

**Exhibit D2**

# Common Public License Version 0.5

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS COMMON PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

## 1. DEFINITIONS

"Contribution" means:

- a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
- b) in the case of each subsequent Contributor:
  - i) changes to the Program, and
  - ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents " mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

## 2. GRANT OF RIGHTS

- a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-

exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

### 3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

- a) it complies with the terms and conditions of this Agreement; and
- b) its license agreement:
  - i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;
  - ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;
  - iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and
  - iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

- a) it must be made available under this Agreement; and
- b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

#### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a

commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

## 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR

ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed. In addition, If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. IBM is the initial Agreement Steward. IBM may assign the

responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

## **CPL to EPL Transition Plan**

September 2, 2004

## 1. Background

The Eclipse Foundation has made a policy decision to switch from the Common Public License (“CPL”) to the Eclipse Public License (“EPL”) for open source software published under its auspices. The differences between the two licenses can be summarized as:

- The Eclipse Foundation replaces IBM as the Agreement Steward in the EPL
- The EPL patent clause is revised by deleting the following sentence from Section 7 of the CPL:

"If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed."

For more detail refer to the actual license documents and the FAQ(s) that have been provided.

In order to effectuate the transition from the CPL to the EPL, the Eclipse Foundation will be seeking the agreement of each contributor to dual license their contributions under both the CPL and the EPL. This document contains a Draft Transition Plan to effect this change. The initial focus was mainly on the Platform, PDE, JDT, and CDT projects, which have synchronized content and (nearly) synchronized release dates in Summer 2004. However, the plan is intended to be comprehensive and cover all Eclipse projects.

## 2 CPL to EPL Transition Plan

### 2.1 Overview

The plan for transitioning from CPL to EPL is to license the current release of each Eclipse subproject, together with any maintenance updates that may be shipped from time to time, under both CPL and EPL for a transition period of approximately 6-8 months and will be roughly aligned with major releases of the Platform. This will hopefully give the community adequate time to adjust to the changes. If any projects find the timeframes to be impractical or feel the plan imposes an unreasonable burden for other reasons, they are encouraged to request an exception to the plan from the EMO. The EMO is prepared to work with projects to mitigate the impact of the license transition process.

Past release streams which were licensed under CPL only and are still in use (e.g. Eclipse 2.x), will continue to be supported as CPL only. As noted, maintenance streams of current releases will be dual licensed. New development streams going forward will operate under EPL only. Under the plan, most inbound contributions will be contributed

under both EPL and CPL during the transition period. Contributions to dual licensed streams under a single license will be possible but not encouraged, and will be handled as special cases (similar to the process currently used to deal with third party code that is not contributed under the CPL). The intention is that this process will be completed for all projects by December 31 2004. That is, by that date and for every project, CPL only development will cease, the current release will be offered under dual license, and new development will be EPL only.

At some well defined switchover date (currently expected to be in 1H05), all Eclipse development will move to EPL only. The exact date of the switchover will depend on individual project schedules, as well as the level community interest in dual licensed streams (requiring active maintenance, hence dual licensing on inbound contributions).

With regard to projects which have Summer 2004 releases, the plan is to hold the current dates and publish CPL licensed releases on schedule. As soon as is practicable thereafter, these projects will prepare dual licensed releases. Meanwhile, the Eclipse Foundation will attempt to contact all contributors to all projects to seek their agreement to license their contribution under both the EPL and CPL. As above, all projects should have re-licensed by December 31 2004.

## **2.2 Plan Details**

The plan can proceed along three parallel tracks, Approval, Implementation, and Communications, each of which is discussed in more detail below. In each track there are a set of milestones which can be used to measure progress, and also provide an opportunity to adjust the plan based on feedback and circumstances.

### **2.2.1 Approval Track**

- 2.2.1.1 Issue draft plan for review by Eclipse Foundation Board of Directors, their advisors, and Eclipse legal advisors (Completed).
- 2.2.1.2 Obtain Board Approval, possibly with modifications to the plan (Completed)
- 2.2.1.3 Create a subcommittee of the Board (“the Relicensing Committee”) to monitor progress and provide direction re: plan execution (Completed).
- 2.2.1.4 Review and approval of Final Plan for implementing re-licensing (August 18).
- 2.2.1.5 Publish the final Plan and associated supporting documents on the Eclipse web site (August 25).

### **2.2.2 Implementation Track**

- 2.2.2.1 August 2<sup>nd</sup>: Disseminate implementation plan (this plan) for review and comment (Completed).
- 2.2.2.2 August 18: Final Plan Approval (Mike Milinkovich)

2.2.2.3 August 16: Begin process of creating contributor knowledge base by surveying all projects (Kathleen Barry and Adrian Cho). Much of this work is already done as IBM has made available to the Foundation detailed lists of contributions made to the Platform and select other components led by IBM. In the course of doing this work, more detailed information may be collected on contributors and their contributions to assist with any downstream IP pedigree analysis. But the priority now is to facilitate the license transition process by first identifying contributors and then seeking their agreement to license their contributions under both the EPL and CPL.

The information needed for each committer or contributor:

- a. personal contact data (essential: name, email address, project(s); optional: address, phone, fax)
- b. does the person or their employer as appropriate agree that all of their contributions will also be licensed under the EPL.
- c. does the person agree that their personal data may be collected and stored by the Eclipse Foundation.

Other information:

- d. if a committer, have they read and agreed to the Eclipse Committer Agreement and the Eclipse Foundation IP Policy?
- e. employment information (name and address of employer; is the person participating as an individual or on behalf of their employer; is subject to an employment relationship which transfers IP rights from employee to employer; does the employer consent to their participation in the project and contribution of code and artifacts under CPL and EPL; is the person "non-affiliated", i.e. neither an employee of an Eclipse Foundation member company nor a signatory of the Membership Agreement).

#### 2.2.2.4 August 25: TRANSITION BEGINS

a) Communications materials will be finalized and relevant documents made available on the website. The documents will include:

- EPL FAQ (owned by Rich Main & Mike Milinkovich and based on input from reviews of this plan and other parties). The FAQ will continue to evolve even after initial publication.
- Transition Process FAQ (owned by Adrian Cho and Brian Barry) will be aimed at developers and cover questions specific to the transition process.
- Changes to Terms of Use and Software User Agreement (Adrian Cho).
- Communications to contributors (Kathleen Barry, Adrian Cho)

b) CPL-EPL Transition is in effect. All inbound contributions are by default now contributed under both the CPL and EPL and can be applied to any development or maintenance stream. Contributors can, if necessary, contribute under only one license; in such a case it is the responsibility of the contributor to clearly indicate the license

selected by copyright labels and other notices. Such single-license contributions and their incorporation into the code base will be handled on a case-by-case basis during the transition period, similar to the process used now for incorporating third party code not contributed under the CPL.

d) Foundation begins contacting all contributors. Kathleen Barry will handle the actual correspondence and compilation of results. Each case where the contributors cannot be contacted, where they do not wish for their contribution to also be licensed under the EPL, or where there are other issues, will be referred to Mike Milinkovich and handled on an individual basis.

#### 2.2.2.5 CHANGES TO CONTENT

a) For releases that were already made available prior to August 25 2004 the CPL will be maintained. Those releases cannot be re-licensed without opening a maintenance or development stream based on that release.

b) For open streams, once a stream is ready for release under the EPL, the project has two re-licensing options:

i) Modify all the source files to change all legal notices. Modify all abouts, feature licenses, and feature update licenses.

OR

ii) As per i) but source files will NOT BE UPDATED. This means that source builds for the stream will contain source files with effectively "incorrect" license notices which will be "overridden" by the abouts, Software User Agreement and other content. The use of this mechanism will be well publicized and explained in other documentation on the website including the FAQ. Because it is possible to obtain content from [www.eclipse.org](http://www.eclipse.org) in a variety of ways, this needs to be explained carefully. It is possible, for example, that users will obtain content directly from CVS and it will say "CPL" when it is actually both CPL and EPL. The license status for each project should be known and documented on the Eclipse web site.

Support (advice) for these content updating efforts will come from the PMCs and Adrian Cho.

Option i) is the preferred method. However, regardless of whether option i) or ii) is used, the notices may be changed to license under the EPL only or both the CPL and the EPL (see note below about restriction on open CPL streams after the Completion Date, December 31 2004).

Using one of the available options, projects should aim to provide dual licensed EPL/CPL content for their current release and its maintenance stream, as soon as is practical. New development going forward should be done under EPL only.

**NOTE: The plan goal is that by the December 31 2004 completion date, there will be NO open CPL or CPL-EPL streams of development and that all appropriate source files will be modified with EPL notices. The Re-licensing Committee can approve exceptions to this rule, together with a stated duration for the exception. The criteria for considering an exception are: the size of the project; cost to completely change all source files; project schedules; and available resources.**

#### 2.2.2.6 December 31st – TRANSITION ENDS

- a) Except for cases approved specifically by the Re-licensing Committee, all new development streams must be EPL
- b) All projects are offering both EPL and CPL licensed versions of their current release.

#### 2.2.2.7 1H05 – EXACT DATE TBD – LICENSE SWITCHOVER

- a) Terms of Use changed to license all incoming contributions as EPL only
- b) All CPL streams have been stabilized and all development is being done under EPL.

### 2.2.3 Communications Track

2.2.3.1 Ensure that EPL is approved by the Open Source Initiative and posted on the list of approved licenses on their web site (Completed).

2.2.3.2 Define overall communications strategy, including issues, talking points, etc. (Mike Milinkovich)

2.2.3.3 Press release and briefings as per communications strategy.

# Tentative IP Log for eclipse.platform, eclipse.jdt and eclipse.pde

This tentative IP Log is generated dynamically from automatically collected project information. This information has not been vetted for accuracy by the Eclipse Foundation and may not represent the true state of the IP of this project(s). Please refer to the official approved IP Log(s) associated with the official release(s) of this project(s) for more information.

		some XML file can not be properly handled by

309902 ( <a href="https://bugs.eclipse.org/309902">https://bugs.eclipse.org/309902</a> )	1138 bytes	org.eclipse.pde.internal.core.text.XMLEditModel when one attribute name is sub-string of another Attachment 165529: Patch to DocumentHandler.java
Aaron Maenpaa (gmail.com)		
201998 ( <a href="https://bugs.eclipse.org/201998">https://bugs.eclipse.org/201998</a> )	105203 bytes	Provide a wizard that generates NL fragments Attachment 116831: Addresses issues in comment #50
Achim Demelt (googlemail.com)		
278844 ( <a href="https://bugs.eclipse.org/278844">https://bugs.eclipse.org/278844</a> )	16396 bytes	[JUnit] Separate UI from non-UI code Attachment 145697: Fixes for concurrency issues
284885 ( <a href="https://bugs.eclipse.org/284885">https://bugs.eclipse.org/284885</a> )	1210 bytes	[launching] manage launch configurations using features (feature based launching) Attachment 159993: Patch to fix launching of legacy launch configs
Aditya Aswani (samsung.com)		
2cc542 ( <a href="http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=2cc542db5dcda24fbb9f6e89d8b8a190d662cc05">http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=2cc542db5dcda24fbb9f6e89d8b8a190d662cc05</a> )	9 lines	<b>Bug 279147</b> ( <a href="https://bugs.eclipse.org/279147">https://bugs.eclipse.org/279147</a> ) - [patch] [samples] array index out of range error
545fb9 ( <a href="http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=545fb959e5387c4d8c6b60a7a0416d5574b79fe1">http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=545fb959e5387c4d8c6b60a7a0416d5574b79fe1</a> )	8 lines	<b>Bug 421636</b> ( <a href="https://bugs.eclipse.org/421636">https://bugs.eclipse.org/421636</a> ) - Selecting extension from quick outline (Ctrl-O) only works
Aghiles Abdesselam (ca.ibm.com)		
266970 ( <a href="https://bugs.eclipse.org/266970">https://bugs.eclipse.org/266970</a> )	11233 bytes	[CSS] Widget.setData keys should be qualified Attachment 131290: qualified updated
266146 ( <a href="https://bugs.eclipse.org/266146">https://bugs.eclipse.org/266146</a> )	2829 bytes	[CSS] JUnit for: Property retrieval must check instanceof and return null Attachment 126844: junit test for retrieveCSSProperty()
266804 ( <a href="https://bugs.eclipse.org/266804">https://bugs.eclipse.org/266804</a> )	14556 bytes	[CSS] borderVisible VS border-visible Attachment 127329: properties and junits updated
265232 ( <a href="https://bugs.eclipse.org/265232">https://bugs.eclipse.org/265232</a> )	17836 bytes	[CSS] CTabFolder extended properties are missing retrieveCSSProperty() Attachment 126485: retrieveCSSProperty() does not only return null & junit test
265214 ( <a href="https://bugs.eclipse.org/265214">https://bugs.eclipse.org/265214</a> )	42351 bytes	[CSS] Summary bug for Cascading Rule Tests and CTabFolder Properties Attachment 125948: CSS Properties and JUnits
266028 ( <a href="https://bugs.eclipse.org/266028">https://bugs.eclipse.org/266028</a> )	12085 bytes	[CSS] Property retrieval must check instanceof and return null Attachment 126618: instanceof check and will return null when appropriate
263184 ( <a href="https://bugs.eclipse.org/263184">https://bugs.eclipse.org/263184</a> )	1031 bytes	[CSS] Need Shell:active pseudo class Attachment 128268: fix in the junit test
271531 ( <a href="https://bugs.eclipse.org/271531">https://bugs.eclipse.org/271531</a> )	8316 bytes	[CSS] Button styleable properties Attachment 133183: Label and Button now have alignment styleable property
Alban Browaeys (yahoo.com)		
242788 ( <a href="https://bugs.eclipse.org/242788">https://bugs.eclipse.org/242788</a> )	914 bytes	a lot of popup ends up as null error Attachment 108896: check if the parent is disposed before setting the parent as the shell (and use display instead if so)
250707 ( <a href="https://bugs.eclipse.org/250707">https://bugs.eclipse.org/250707</a> )	977 bytes	[Proxy] remains an issue : if gnome proxy is set to direct connection pd is null and the java code does not handle that Attachment 114991: Fix the bug about gnome direct connection triggering a null pointer exception

Aleksandra Wozniak (gmail.com)			
239959 ( <a href="https://bugs.eclipse.org/239959">https://bugs.eclipse.org/239959</a> )	29364 bytes	Adding content to Compare with other resource dialog by drag&dropping Attachment 108951: patch #8	
243873 ( <a href="https://bugs.eclipse.org/243873">https://bugs.eclipse.org/243873</a> )	1546 bytes	NPE in Compare with Other dialog Attachment 109784: patch #1	
240294 ( <a href="https://bugs.eclipse.org/240294">https://bugs.eclipse.org/240294</a> )	1535 bytes	Unused class in source code Attachment 107446: Removes Messages.java from org.eclipse.compare.internal	
241539 ( <a href="https://bugs.eclipse.org/241539">https://bugs.eclipse.org/241539</a> )	1995 bytes	Key binding for Compare with Other dialog Attachment 109790: patch #1	
244623 ( <a href="https://bugs.eclipse.org/244623">https://bugs.eclipse.org/244623</a> )	974 bytes	Cannot perform compare from Compare with Other dialog Attachment 110399: patch #1	
Alena Laskavaia (gmail.com)

# Common Public License Version 0.5

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS COMMON PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

## 1. DEFINITIONS

"Contribution" means:

- a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
- b) in the case of each subsequent Contributor:
  - i) changes to the Program, and
  - ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents " mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

## 2. GRANT OF RIGHTS

- a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-

6/24/2015

Common Public License Version 0.5

exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

### 3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

- a) it complies with the terms and conditions of this Agreement; and
- b) its license agreement:
  - i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;
  - ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;
  - iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and
  - iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

- a) it must be made available under this Agreement; and
- b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

#### **4. COMMERCIAL DISTRIBUTION**

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a

commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

## **5. NO WARRANTY**

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## **6. DISCLAIMER OF LIABILITY**

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR

ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed. In addition, If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. IBM is the initial Agreement Steward. IBM may assign the

6/24/2015

Common Public License Version 0.5

responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

Exhibit D2

**CPL to EPL Transition Plan**

September 2, 2004

## 1. Background

The Eclipse Foundation has made a policy decision to switch from the Common Public License (“CPL”) to the Eclipse Public License (“EPL”) for open source software published under its auspices. The differences between the two licenses can be summarized as:

- The Eclipse Foundation replaces IBM as the Agreement Steward in the EPL
- The EPL patent clause is revised by deleting the following sentence from Section 7 of the CPL:

“If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed.”

For more detail refer to the actual license documents and the FAQ(s) that have been provided.

In order to effectuate the transition from the CPL to the EPL, the Eclipse Foundation will be seeking the agreement of each contributor to dual license their contributions under both the CPL and the EPL. This document contains a Draft Transition Plan to effect this change. The initial focus was mainly on the Platform, PDE, JDT, and CDT projects, which have synchronized content and (nearly) synchronized release dates in Summer 2004. However, the plan is intended to be comprehensive and cover all Eclipse projects.

## 2 CPL to EPL Transition Plan

### 2.1 Overview

The plan for transitioning from CPL to EPL is to license the current release of each Eclipse subproject, together with any maintenance updates that may be shipped from time to time, under both CPL and EPL for a transition period of approximately 6-8 months and will be roughly aligned with major releases of the Platform. This will hopefully give the community adequate time to adjust to the changes. If any projects find the timeframes to be impractical or feel the plan imposes an unreasonable burden for other reasons, they are encouraged to request an exception to the plan from the EMO. The EMO is prepared to work with projects to mitigate the impact of the license transition process.

Past release streams which were licensed under CPL only and are still in use (e.g. Eclipse 2.x), will continue to be supported as CPL only. As noted, maintenance streams of current releases will be dual licensed. New development streams going forward will operate under EPL only. Under the plan, most inbound contributions will be contributed

under both EPL and CPL during the transition period. Contributions to dual licensed streams under a single license will be possible but not encouraged, and will be handled as special cases (similar to the process currently used to deal with third party code that is not contributed under the CPL). The intention is that this process will be completed for all projects by December 31 2004. That is, by that date and for every project, CPL only development will cease, the current release will be offered under dual license, and new development will be EPL only.

At some well defined switchover date (currently expected to be in 1H05), all Eclipse development will move to EPL only. The exact date of the switchover will depend on individual project schedules, as well as the level community interest in dual licensed streams (requiring active maintenance, hence dual licensing on inbound contributions).

With regard to projects which have Summer 2004 releases, the plan is to hold the current dates and publish CPL licensed releases on schedule. As soon as is practicable thereafter, these projects will prepare dual licensed releases. Meanwhile, the Eclipse Foundation will attempt to contact all contributors to all projects to seek their agreement to license their contribution under both the EPL and CPL. As above, all projects should have re-licensed by December 31 2004.

## **2.2 Plan Details**

The plan can proceed along three parallel tracks, Approval, Implementation, and Communications, each of which is discussed in more detail below. In each track there are a set of milestones which can be used to measure progress, and also provide an opportunity to adjust the plan based on feedback and circumstances.

### **2.2.1 Approval Track**

2.2.1.1 Issue draft plan for review by Eclipse Foundation Board of Directors, their advisors, and Eclipse legal advisors (Completed).

2.2.1.2 Obtain Board Approval, possibly with modifications to the plan (Completed)

2.2.1.3 Create a subcommittee of the Board (“the Relicensing Committee”) to monitor progress and provide direction re: plan execution (Completed).

2.2.1.4 Review and approval of Final Plan for implementing re-licensing (August 18).

2.2.1.5 Publish the final Plan and associated supporting documents on the Eclipse web site (August 25).

### **2.2.2 Implementation Track**

2.2.2.1 August 2<sup>nd</sup>: Disseminate implementation plan (this plan) for review and comment (Completed).

2.2.2.2 August 18: Final Plan Approval (Mike Milinkovich)

2.2.2.3 August 16: Begin process of creating contributor knowledge base by surveying all projects (Kathleen Barry and Adrian Cho). Much of this work is already done as IBM has made available to the Foundation detailed lists of contributions made to the Platform and select other components led by IBM. In the course of doing this work, more detailed information may be collected on contributors and their contributions to assist with any downstream IP pedigree analysis. But the priority now is to facilitate the license transition process by first identifying contributors and then seeking their agreement to license their contributions under both the EPL and CPL.

The information needed for each committer or contributor:

- a. personal contact data (essential: name, email address, project(s); optional: address, phone, fax)
- b. does the person or their employer as appropriate agree that all of their contributions will also be licensed under the EPL.
- c. does the person agree that their personal data may be collected and stored by the Eclipse Foundation.

Other information:

- d. if a committer, have they read and agreed to the Eclipse Committer Agreement and the Eclipse Foundation IP Policy?
- e. employment information (name and address of employer; is the person participating as an individual or on behalf of their employer; is subject to an employment relationship which transfers IP rights from employee to employer; does the employer consent to their participation in the project and contribution of code and artifacts under CPL and EPL; is the person "non-affiliated", i.e. neither an employee of an Eclipse Foundation member company nor a signatory of the Membership Agreement).

#### 2.2.2.4 August 25: TRANSITION BEGINS

a) Communications materials will be finalized and relevant documents made available on the website. The documents will include:

- EPL FAQ (owned by Rich Main & Mike Milinkovich and based on input from reviews of this plan and other parties). The FAQ will continue to evolve even after initial publication.
- Transition Process FAQ (owned by Adrian Cho and Brian Barry) will be aimed at developers and cover questions specific to the transition process.
- Changes to Terms of Use and Software User Agreement (Adrian Cho).
- Communications to contributors (Kathleen Barry, Adrian Cho)

b) CPL-EPL Transition is in effect. All inbound contributions are by default now contributed under both the CPL and EPL and can be applied to any development or maintenance stream. Contributors can, if necessary, contribute under only one license; in such a case it is the responsibility of the contributor to clearly indicate the license

selected by copyright labels and other notices. Such single-license contributions and their incorporation into the code base will be handled on a case-by-case basis during the transition period, similar to the process used now for incorporating third party code not contributed under the CPL.

d) Foundation begins contacting all contributors. Kathleen Barry will handle the actual correspondence and compilation of results. Each case where the contributors cannot be contacted, where they do not wish for their contribution to also be licensed under the EPL, or where there are other issues, will be referred to Mike Milinkovich and handled on an individual basis.

#### 2.2.2.5 CHANGES TO CONTENT

a) For releases that were already made available prior to August 25 2004 the CPL will be maintained. Those releases cannot be re-licensed without opening a maintenance or development stream based on that release.

b) For open streams, once a stream is ready for release under the EPL, the project has two re-licensing options:

i) Modify all the source files to change all legal notices. Modify all abouts, feature licenses, and feature update licenses.

OR

ii) As per i) but source files will NOT BE UPDATED. This means that source builds for the stream will contain source files with effectively "incorrect" license notices which will be "overridden" by the abouts, Software User Agreement and other content. The use of this mechanism will be well publicized and explained in other documentation on the website including the FAQ. Because it is possible to obtain content from [www.eclipse.org](http://www.eclipse.org) in a variety of ways, this needs to be explained carefully. It is possible, for example, that users will obtain content directly from CVS and it will say "CPL" when it is actually both CPL and EPL. The license status for each project should be known and documented on the Eclipse web site.

Support (advice) for these content updating efforts will come from the PMCs and Adrian Cho.

Option i) is the preferred method. However, regardless of whether option i) or ii) is used, the notices may be changed to license under the EPL only or both the CPL and the EPL (see note below about restriction on open CPL streams after the Completion Date, December 31 2004).

Using one of the available options, projects should aim to provide dual licensed EPL/CPL content for their current release and its maintenance stream, as soon as is practical. New development going forward should be done under EPL only.

**NOTE: The plan goal is that by the December 31 2004 completion date, there will be NO open CPL or CPL-EPL streams of development and that all appropriate source files will be modified with EPL notices. The Re-licensing Committee can approve exceptions to this rule, together with a stated duration for the exception. The criteria for considering an exception are: the size of the project; cost to completely change all source files; project schedules; and available resources.**

#### **2.2.2.6 December 31st – TRANSITION ENDS**

- a) Except for cases approved specifically by the Re-licensing Committee, all new development streams must be EPL
- b) All projects are offering both EPL and CPL licensed versions of their current release.

#### **2.2.2.7 1H05 – EXACT DATE TBD – LICENSE SWITCHOVER**

- a) Terms of Use changed to license all incoming contributions as EPL only
- b) All CPL streams have been stabilized and all development is being done under EPL.

### **2.2.3 Communications Track**

**2.2.3.1 Ensure that EPL is approved by the Open Source Initiative and posted on the list of approved licenses on their web site (Completed).**

**2.2.3.2 Define overall communications strategy, including issues, talking points, etc. (Mike Milinkovich)**

**2.2.3.3 Press release and briefings as per communications strategy.**

# Tentative IP Log for eclipse.platform, eclipse.jdt and eclipse.pde

This tentative IP Log is generated dynamically from automatically collected project information. This information has not been vetted for accuracy by the Eclipse Foundation and may not represent the true state of the IP of this project(s). Please refer to the official approved IP Log(s) associated with the official release(s) of this project(s) for more information.
