NIPLI Reciprocal Attendance Program

Trust and Confidence in the Global Infrastructure

We are pleased to announce a reciprocal attendance arrangement with The Open Group and their third quarterly conference of 1999, taking place the following week (October 25/26) at the Hilton Crystal City, near National Airport.

This conference brings together distinguished speakers from the regulatory, legal, economic, and business communities to explore the issues and challenges of building the trust and confidence necessary to support global eCommerce.

Visit [The Open Group](#) for more details and to register directly with The Open Group. ICI members may attend this conference at the US Government and academic rate of \$495.

The Open Group Conferences

Conference dates	Location	Plenary focus
26-30 June, 2000	Austin, Texas, USA	The Directory-Enabled Enterprise
23-27 October, 2000	Washington, DC	Security & Critical Infrastructure (subject to revision)
5-9 February, 2001	San Francisco Bay Area, California, USA	TBA
23-27 April, 2001	Germany/Scandinavia	TBA
16-20 July, 2001	Washington DC	TBA
22-26 October, 2001	London	TBA

● [Archive of past conferences](#)

Please note that certain information relating to Open Group conferences cannot be made available to the general public

Conferences include the Members Meeting and Program meetings in addition to Plenary sessions.

--	---	--

The UNIX® Operating System: Mature, Standardized and Start-of-the-Art

- Continual development over the last twenty-five years
- Deployed in millions of installations on nearly every hardware platform
- A reputation of stability and scalability
- Continued innovation as new technologies assimilated
- The popular choice for the internet

THE Open GROUP

UNIX® Past Perceptions

- Uncompromising
- Command line interface required technical competence
- Command line syntax not intuitive
- Interface unfriendly
- Security often nonexistent

• Today, these perceptions are only of historical interest.

THE Open GROUP

UNIX® Present

- A Standard Graphical User Interface
 - The Common Desktop Environment
- A Standard definition of the core operating environment
 - The Single UNIX Specification
 - Imitated by many "look-alike" products
- Security up to and including B1
- The internet server of choice
- Clustering and other high availability innovations available today

THE Open GROUP

<http://www.opengroup.org/regproducts>

UNIX 95 Registered Products

- Bull (S)CALATM & SAGIST (S)TM FAMILIES of symmetric, multi-processor and clustered systems & other binary compatible Bull CP2200 main processing systems with AIX® Version 4.2.1 for later and C for AIX® Version 3 or later & XTI API Version 2
- Digital UNIX® Version 4.0 running Digital's AlphaStation and Digital's AlphaServer
- Hewlett Packard HP-UX Release 10.20 and later on all HP-UX architectures (HP-UX 11.00 and later on all HP-UX architectures)
- IBM® Business Partner (BP) UNIX Release 4.0 and later on all BP UNIX architectures (BP UNIX 4.0 and later on all BP UNIX architectures)
- NEC UNIVEX® 700.0 and later on UNIVEX and UNIVEX/600 Series
- NCR UNIX System V Release 4 MP RAS Release 2.00 or later on NCR WorkMark Series 2000 Series (NCR Series 2.0 and on NCR WorkMark and "C" Series - 6800 based systems)
- SCO UNIX® Family (Vx) 5.0 and later for single and multiprocessor (see SCO's list of Products)
- SGI UNIX® Family (IR) 1.1 and later for single and multiprocessor (see SGI's list of Products)
- Sun Microsystems® Solaris 2.0 and later on all Solaris architectures (Solaris 2.0 and later on all Solaris architectures)
- Tandy UNIX® Release 4.0 and later on all Tandy UNIX architectures (Tandy UNIX 4.0 and later on all Tandy UNIX architectures)
- Tru64 UNIX® Release 4.0 and later on all Tru64 UNIX architectures (Tru64 UNIX 4.0 and later on all Tru64 UNIX architectures)

THE Open GROUP

The Value of Standards

- Driven by the need for commonality and the desire to avoid consumer "lock-in"
- Endorsed by US and European Governments
- Resulted in the industry agreed definitive specification of what constitutes a UNIX system:
 - The Single UNIX Specification (1994)

THE Open GROUP

The Value of Standards (Cont'd)

- Today, all the major vendors have implemented the Single UNIX Specification
- The UNIX mark is validated using extensive tests and backed up by a unique vendor guarantee - **The Open Brand**
- The Open Brand
 - operates under trademark law
 - designates products that are guaranteed to conform to open systems specifications
 - a vendor guarantees that any non-compliances will be fixed within a defined time period

THE *Open* GROUP

The Single UNIX Specification

- Designed to give software developers a single set of APIs to be supported by every UNIX system
- Shifts the focus from incompatible UNIX system product implementations to compliance to a single set of APIs
- If an OS meets the specification and commonly available applications run on it then it is open.

THE *Open* GROUP

The Single UNIX Specification

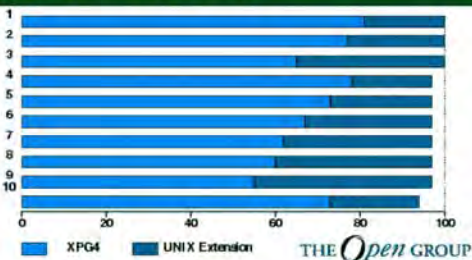

THE *Open* GROUP

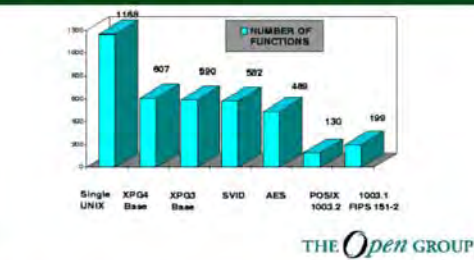

The User Driven Process

Application Coverage by Specification For Ten Representative Applications

Portability functions (UNIX 95)

The Single UNIX Specification Version 2

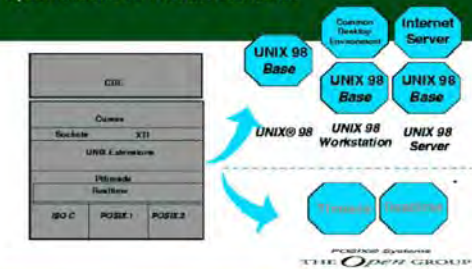

Formal Standards Alignment

- Builds on the foundation of latest international standards
 - mandates POSIX options to form a rich foundation which you can depend on
 - ISO/IEC 9945-1:1996 (POSIX) (System Interfaces)
 - Classic POSIX.1 functionality plus...
 - Realtime
 - Threads
 - ISO/IEC 9945-2:1992 (Shell & Utilities)
 - ISO/IEC 9899:1990/Amendment 1:1995 (MSE)
- THE *Open* GROUP

Mandated POSIX.1 Options

Specifications vs Product Standards

UNIX 98 Product Standards

- UNIX 98 - the mark for systems conforming to Version 2 of the Single UNIX Specification
 - UNIX 98 - "the Base"
 - UNIX 98 Workstation
 - UNIX 98 plus CDE
 - UNIX 98 Server
 - UNIX 98 plus Internet Server capabilities
 - Adds interoperability services to the UNIX 98 APIs in support of internetworked services
- THE *Open* GROUP

UNIX 98 New Features Derivation

UNIX 98 Threads - Benefits

- A large benefit to certain classes of applications, such as server or parallel processing
 - allows significant gains on multiprocessor hardware
 - increases application throughput, even on uniprocessor hardware
 - Built upon POSIX Threads with extensions.
- THE *Open* GROUP

UNIX 98 LFS and 64-bit

- The *Single UNIX Specification* has been updated to support large files with unlimited file offsets and 64-bit and larger systems
 - Removed 32-bit dependencies
 - Provides support for new leading-edge applications demanding larger data model and address space
- THE *Open* GROUP

UNIX 98 Realtime

- Historically UNIX has been a timesharing system
- Today's applications have more stringent performance and robustness requirements
- Require predictable execution characteristics and precise timing.
- A new UNIX Realtime extension introduced based on POSIX 1003.1b

<http://www.UNIX-systems.org/version2/whatsnew/realtime.html>

THE Open GROUP

UNIX 98 and the Year 2000

- The *Single UNIX Specification* has been reviewed for Year 2000 alignment
- A white paper has been produced for existing users giving practical advice for users
- Year 2000 changes incorporated into Single UNIX Specification for UNIX 98

<http://www.UNIX-systems.org/version2/whatsnew/year2000.html>

THE Open GROUP

Portability functions (UNIX 98)

Specification	Number of Functions
UNIX 98 Workstation	3030
Single UNIX Version 2	1434
Single UNIX Base	1168
XPG4 Base	807
POSIX 1003.1-1998	390
SVID3 Base	582
AES	489
POSIX 1003.2	130
1003.1-98 PFS 151-2	199

THE Open GROUP

UNIX 98 Server

- Captures existing de-facto practice
- Includes a *platform-independent* Internet Server Product Standard
- Additional functionality over existing UNIX 98 Product standard includes:
 - The Internet Protocol Suite
 - Java Support (JRE 1.1)
 - Internet capabilities to support network computing

THE Open GROUP

UNIX 98 Server - Internet Services

THE Open GROUP

UNIX System Strengths

- UNIX systems retain high-end system strengths
 - Stability and reliability
 - Scalability
 - High throughput
 - Database engine
 - Internet support

THE Open GROUP

Stable, Reliable and Mature

- Stable, Reliable and Mature
 - Safe, not risky
 - 25-year heritage of end-user development and use
 - Strong growth market
 - \$122 billion installed base
 - 150 countries
 - \$39 billion market currently, growing to \$50 billion in year 2000

THE Open GROUP

Mission Critical

- Proven Mission-Critical Capabilities
 - Widely deployed across industries and applications
 - 82% of all Internet servers
 - Majority of all scaleable enterprise databases, on-line transaction processing systems, and enterprise client/server applications
 - 24x7x52

THE Open GROUP

Open

- "Guaranteed Open" — The Open Group
 - Freedom of Choice
 - Consistent GUI — Common Desktop Environment (CDE)
 - Access to applications and data across multi-vendor platforms

THE Open GROUP

UNIX Futures - Key IT Trends

- The emergence of Network computing
- Knowledge Management
- Digital media replacing physical objects

UNIX is the optimal platform to take advantage of the latest IT trends. Continuing evolution to address scalability issues, and new technologies such as IPv6

THE Open GROUP

UNIX Systems - The Future

The leading operating system for mission- and business-critical computing applications, the open UNIX system environment provides unmatched maturity, throughput, reliability, stability and scalability, supported by multiple vendors.

Unlike other operating system environments, the customizable UNIX system can network the legacy past with the heterogeneous enterprise present and is flexible and robust enough to handle whatever the future brings.

About Us

The Open Group: Leading the development of open, vendor-neutral IT standards and certifications

The Open Group is a global consortium that enables the achievement of business objectives through IT standards. With more than 400 member organizations, we have a diverse membership that spans all sectors of the IT community – customers, systems and solutions suppliers, tool vendors, integrators and consultants, as well as academics and researchers to:

- Capture, understand and address current and emerging requirements, and establish policies and share best practices
- Facilitate interoperability, develop consensus, and evolve and integrate specifications and open source technologies
- Offer a comprehensive set of services to enhance the operational efficiency of consortia
- Operate the industry's premier certification service

[Our Vision & Mission](#) | [Our Services](#) | [IT Standards](#)

The Open Group Vision

Boundaryless Information Flow™ achieved through global interoperability in a secure, reliable and timely manner

The Open Group Mission Statement

The mission of The Open Group is to drive the creation of Boundaryless Information Flow™ achieved by:

- Working with customers to capture, understand and address current and emerging requirements, establish policies, and share best practices
- Working with suppliers, consortia and standards bodies to develop consensus and facilitate interoperability, to evolve and integrate specifications and open source technologies
- Offering a comprehensive set of services to enhance the operational efficiency of consortia
- Developing and operating the industry's premier certification service and encouraging procurement of certified products
