**LEADER TECH V. FACEBOOK,
CASE NO. No. 2011-1366.**

HEARING TRANSCRIPT

(UNOFFICIAL V.2, typos corrected)

COURT: UNITED STATES COURT OF APPEALS
FOR THE FEDERAL CIRCUIT

PROCEEDING: ORAL ARGUMENTS

DATE: March 5, 2012

START TIME: 10:30 AM

END TIME: 11:06 AM

DURATION: 35 min. 28 sec.

PARTICIPANTS:

JUDGE ALAN D. LOURIE

JUDGE KIMBERLY A. MOORE

JUDGE EVAN J. WALLACH

LEADER ATTORNEY: DARYL L. JOSEFFER

FACEBOOK ATTORNEY: THOMAS HUNGAR

SOURCE: OFFICIAL RECORDING OF THE
PROCEEDINGS AVAILABLE FROM
[http://www.cafc.uscourts.gov/oral-
argument-recordings/search/audio.html](http://www.cafc.uscourts.gov/oral-argument-recordings/search/audio.html)

1 [BEGIN RECORDING]

2 **JUDGE LOURIE:** Next case is Leader Technologies vs.
3 Facebook 6000111366. Mr. Joseffer, ready when you are.

4 **MR. JOSEFFER:** Good Morning. The, the key legal
5 question on this appeal is what constitutes clear and
6 convincing evidence. Because.

7 **JUDGE LOURIE:** The legal question isn't the question
8 whether there was substantial evidence before a jury?

9 **MR. JOSEFFER:** Well, the question was whether there
10 was sufficient evidence from which the jury could could
11 find there was clear and convincing evidence of the
12 timing question. The reason I said it's a legal question
13 is you're going to have to know what does it mean for
14 evidence, not just to be some evidence or even a fair
15 amount of evidence, but clear and convincing evidence.
16 And on that point, the key issue underlying issue in
17 dispute here is the exact issue is when did Leader2Leader
18 first embody the patented invention. Before or after the
19 critical date.

20 **JUDGE WALLACH:** Wasn't that a question for the jury?

21 **MR. JOSEFFER:** If there's sufficient evidence to go
22 either way, yes. But the whole point of judicial review
23 of jury verdicts is to ensure that there is sufficient
24 evidence, especially under the clear and convincing
25 standard. And on that point, Facebook chose to rely on an

1 attack on the credibility on Leader's CEO Michael
2 McKibben and on an interrogatory response they just
3 didn't address the question. And as a matter of law, that
4 gives rise to at the most speculation or surmise, not the
5 kind of hard facts that required for clear and convincing
6 evidence. Under any other conclusion, you'd effectively
7 be nullifying the clear and convincing standard.

8 **JUDGE WALLACH:** On Page 21 of your opening brief, you
9 say, ah, that the improper attempt to shift the burden of
10 proof to Leader, only confirms Facebook's fundamental
11 failure to carry its own burden. And you sight to Pfizer
12 for that proposition. Saying, quoting "burden of proof
13 never shifts to the patentee to prove validity." In
14 Pfizer, we go on to say that the patentee "would be well
15 advised to introduce evidence sufficient to rebut that of
16 the challenger." But, that doesn't shift the burden.
17 There's two different things. It seems to me that, ah, if
18 Facebook met their burden, initially, with their cross
19 examination, and their argument about interrogatory
20 response and some other things that that District Court
21 judge discussed that was in the body and in the footnote,
22 uh, wouldn't you have been well advised to submit
23 rebuttal evidence such as the source code to the jury?
24 You make a, you make a huge argument about Facebook's

1 failure to submit that source code. But you could have
2 done it, couldn't you?

3 **MR. JOSEFFER:** The fact that we're here kinda answers
4 the question that, you know. Sure, if we put other stuff
5 in the record, maybe, we wouldn't be here, right? Um, but
6 that's frankly always true at every appeal that's I've
7 ever argued that, gee, if the specification had been a
8 little more specific. But, the, the reasons that we
9 didn't do any more are a few things. First, remember
10 Facebook at trial was raising a lot of different issues,
11 including invalidity issues. And on every other one, so
12 we had to make decisions on every other one had an expert
13 presenting an element-by-element analysis based on
14 technical data. So this one we're at didn't, and where it
15 was just relying on witness testimony when both witnesses
16 direct testimony point supported us, it didn't seem to be
17 one where we were going to end up spending a lot of time
18 at trial on. But, second, even at

19 **JUDGE WALLACH:** So it's a lawyer decision at trial.

20 **MR. JOSEFFER:** In part. Um, because again this is
21 what burden of proof is for. You find out what they are
22 putting on and you decide how to use your time to respond
23 to it. And here, all they were doing was attacking our
24 witnesses who testified in our favor and then looking to
25 an interrogatory that really didn't address the question.

1 And the, the, if you read the closing arguments the
2 District Court's JMOL decision makes it really clear that
3 that's what Facebook was relying on.

4 **JUDGE WALLACH:** Well, they're they're looking at that
5 testi, testimony at trial, live testimony. They're
6 looking at that interrogatory response. But, they've also
7 got a deposition response that seems to be directly
8 contrary and they're relying on that in there.

9 **MR. JOSEFFER:** No and that's part of their
10 credibility though because what Mr. McKibben testified to
11 in his deposition, was he said well, that was a long time
12 ago and I don't specifically recall but other people keep
13 track of that information. Now, if the jury wanted to
14 infer that well if he didn't recall then, but he recalls
15 now, he must be lying now. That goes to the credibility
16 attack, you could throw it as testimony for that reason
17 as the jury instructions told the jury that's what they
18 could do. But there's there's no, again, there's no
19 affirmative evidence from that first deposition.

20 **JUDGE LOURIE:** Mr. Joseffer, in context to the fact
21 that this is a jury verdict, ah, we're not talking about
22 a little slip here. Uh, this had been under development
23 since what, 1999. And a critical date is '02. And they
24 are demonstrating this to various parties - Wright
25 Patterson, Boston Scientific, The Limited and at least

1 two of these parties agreed to buy it. Wasn't this
2 clearly on sale and when you couple this with the
3 testimony, ah where ah the key witness was simply unsure
4 of dates. Why wasn't the jury allowed to uh, uh make its
5 decision and be affirmed.

6 **MR. JOSEFFER:** Well the point is to keep track of
7 what this is and that's the critical issue. Is there's no
8 dispute. I mean, for purposes of appeal, there's no
9 dispute that evolving Leader2Leader product suite had
10 been subject to borrowing activity. There's no dispute
11 that the patented invention was something they had been
12 working on for a while. Ohm, the question is when was the
13 patented invention, you know, completed, put in the
14 invention properly demonstrated and offered for sale.

15 **JUDGE LOURIE:** You said right around the time of
16 December 11th. I mean that almost sounds like it was
17 targeted right after the critical date. The jury didn't
18 believe him.

19 **MR. JOSEFFER:** It was targeted because, I mean, it
20 was targeted because of the provisional. Remember, the
21 idea here was they thought the provisional had to be
22 enabled, that it first needed to be completed.

23 **JUDGE MOORE:** You gotta slow down. You talk so fast.
24 I'm and I talk fast and I'm having trouble following you.
25 So, please, slow down.

1 **MR. JOSEFFER:** Thanks for the reminder. I appreciate
2 that, it's good to know. Uh, what they did, the
3 testimony; they knew the provisional had to be enabled so
4 they filed the provisional just a day or two.

5 **JUDGE WALLACH:** It's good to know but you're not
6 doing it.

7 **MR. JOSEFFER:** I'm sorry.

8 **JUDGE MOORE:** You're at the same speed you were a few
9 minutes ago.

10 **MR. JOSEFFER:** So what they did is they filed the
11 provisional right after they reduced it to practice. They
12 then filed the final application uhm, just under a year
13 from the provisional. There's nothing, you know, devious
14 about that. And so, the point is that then what you've
15 got is the critical date and the product being reduced to
16 practice. Basically, at the same time.

17 Now what Facebook argues and again there's no
18 evidence to the contrary just innuendo speculation. It
19 also makes sense; it's kind of a point of provisional.
20 But what Facebook is arguing then is that while there may
21 have been a two-day window, before December 11 of 2002 in
22 which you had a reduction of practice but the critical
23 date hadn't kicked in yet. But even for that and this is
24 what the District Court's footnote when to in its
25 opinion. There's just no evidence either that the patent

1 invention was, there are two things about that. One is
2 what they're looking at is e-mail from December 8th
3 discussing efforts for sale of Leader2Leader before then.

4 And one, that's the first of things before then not
5 after then in that 2 to 3 day window. But second, again
6 the e-mail, like everything else just talks about
7 Leader2Leader. Not about the patented invention. And the
8 whole point of the clear and convincing evidence standard
9 is that you need actual evidence and sufficient evidence
10 and if you look at this Court's decisions of Eli Lilly
11 and in 3M, there was real evidence there. Uhm, there's
12 real evidence to support a jury verdict. But this Court
13 held that it wasn't clear and convincing.

14 If you look at the Supreme Court's decisions on
15 barbed wire patent case or Nikki Shawa. There was a ton
16 of evidence of pieces of evidence. More than 20 witnesses
17 testified in the barbed wire case. But the Supreme Court
18 held the question isn't whether you got some evidence
19 it's not whether you have a lot of evidence. It's whether
20 you have clear and convincing evidence on a relevant
21 question. And here, their entire theory at trial was
22 unnecessarily to try to uhm draw an inference that's just
23 not true and the source code's really important. If I
24 could just get back to how Facebook would have proved
25 this issue at trial if it was actually right. During

1 discovery, it moved to compel the source code, and the
2 Court granted the motion to compel us, the source code on
3 the ground that that's the only way Facebook could figure
4 out whether the patent whether Leader2Leader actually
5 practiced the patented invention.

6 We produced the source code and they reviewed it and
7 guess what, no one ever heard anything about it again.
8 And then they put no expert testimony in on it. Also,
9 during discovery, before they noticed depositions of our
10 customers to ask the customers what was offered for sale
11 what was demonstrated to you, and counsel doesn't take
12 them. So all the ways you actually prove a theory at
13 trial, you know Facebook did try to prove its other
14 defenses at trial with real evidence. Facebook chose not
15 to pursue it.

16 **JUDGE WALLACH:** Mr. Joseffer, you're on the horns of
17 a dilemma. You keep saying real evidence. You can't
18 really say to this Court with a straight face that
19 testimony by a witness is not real evidence.

20 **MR. JOSEFFER:** But the testimony supports us. When
21 the witnesses, the two witnesses, McKibben and Lamb, when
22 they were directly asked the question about whether they
23 delayed the patent invention Leader2Leader, they both
24 said no.

1 **JUDGE WALLACH:** That's correct. That's correct. That
2 testimony says something. And if a wit, if a trier of
3 fact looks at that witness and says, look at him, he's
4 got his hands up in the air and his palms raised to the
5 ceiling. He's looking with his eyes you know and they
6 make a record of that and they say obviously he's lying
7 to me. That's real evidence too, is it not? Demeanor of
8 the witness?

9 **MR. JOSEFFER:** This is the point. It's evidence that
10 allows the jury to, according to jury instruction and
11 about 24 cases cited in the brief, to disregard the
12 witness's testimony. It's not evidence, affirmative
13 evidence, that's contrary to what the witness testified
14 is true.

15 **JUDGE WALLACH:** Pardon my Latin, but I seem to recall
16 something in law school that says "Falsus in uno, falsus
17 in omnia?" Something like that. If you're lying about one
18 thing, there can be a presumption, presumption that
19 you're lying about everything?

20 **MR. JOSEFFER:** For purposes of this appeal, there's a
21 standard of review, right? We're not disputing the jury
22 can conclude that McKibben lied about everything he said.
23 You can just toss all his testimony out. That's a
24 different point. The point, though, is that, and this is
25 Nikki Shawa is again is a Supreme Court case on clear and

1 convincing. That just means you can throw the testimony
2 out. For summary judgment JMOL to mean anything, the
3 party with the affirmative burden of proof still has to
4 have their own affirmative evidence.

5 **JUDGE WALLACH:** And their affirmative evidence is
6 that there's sales negotiations going on with Wright-
7 Patterson Air Force Base, with the GAP, uh The Limited.
8 Um, with one other, Boston Scientific uh, and that uh,
9 that testimony by your key witness is no uh, we didn't
10 have, uh the patent incorporated in the Leader2Leader at
11 that point. You can take those two things together and
12 then you take the evidence that they put on that that
13 interrogatory answer that you say, "oh no, it was only
14 directed at this time" and they say, "oh yea, well if you
15 answered it that way and you meant it that way, you
16 should have explained it."

17 **MR. JOSEFFER:** Sir, a couple things. All of that
18 evidence about barring activity, again, that all relates
19 to Leader2Leader. The only. I agree with you about going
20 to interrogatory cause the only thing that they really
21 have used to try to tie patent invention to Leader2Leader
22 such as the barring activity would actually relate to the
23 patent invention, is the interrogatory response which

24 **JUDGE WALLACH:** No, there's the deposition response
25 as well.

1 **MR. JOSEFFER:** But he didn't remember at the time.
2 And he said other people keep and again you can throw out
3 his testimony. But under the case law, you throw out his
4 testimony, what do you have left?

5 **JUDGE MOORE:** Mr. Joseffer.

6 **MR. JOSEFFER:** It's the interrogatory. I would like
7 to

8 **JUDGE MOORE:** I want to, I want to ask you and I'm
9 going to couch this by saying it's a friendly question,
10 so just listen to it, OK? Uh, if you were trying to prove
11 infringement, forget about clear and convincing evidence
12 for preponderance damage. You're trying to prove
13 infringement, can you establish your case by simply
14 calling the defendant to the stand and asking the
15 defendant whether or not he practices all the claims,
16 having him say no and saying, hah jury, I've established
17 my case. I rest my case.

18 **MR. JOSEFFER:** Exactly, and you're at the

19 **JUDGE MOORE:** Can you do that?

20 **MR. JOSEFFER:** No. Of course not.

21 **JUDGE MOORE:** And that's preponderance of the
22 evidence.

23 **MR. JOSEFFER:** Correct. And under.

24 **JUDGE MOORE:** And you sure can't do it under clear
25 and convincing, right?

1 **MR. JOSEFFER:** Exactly. And so the question then and
2 that's what summary judgment and JMOL are for, otherwise
3 they'd never so the question is what else do they have on
4 the key question, not on Leader2Leader, on the key
5 question of when the patent and invention was in
6 Leader2Leader to help them connect the dots, and on that,
7 it really does all come back to the interrogatory. And
8 the reason that's not that's not even close clear and
9 convincing is three things. First, the question asked in
10 the present tense does Leader2Leader, you know, what
11 products embody, and the answers in the present tense,
12 about embodies, this is years later. Second, the present
13 tense is not an accident because at this point in time,
14 remember, Facebook hadn't flipped its theory. At that
15 point, Facebook was still arguing that Leader2Leader is
16 currently falsely marked because.

17 **JUDGE MOORE:** Your interrogatory you're going so fast
18 again so I want to make sure that I understand your
19 point. Uhm, your point is the interrogatory says for each
20 claim uh tell us uh that Leader contends is practiced by
21 any product. You're saying we answered it honestly, we
22 said Leader2Leader practices this. Doesn't mean that
23 Leader2Leader at all times practices it. Right?

24 **MR. JOSEFFER:** And that wasn't. Right. And the reason

1 **JUDGE MOORE:** And that's your point. I just wanted to
2 make sure I understand your argument.

3 **MR. JOSEFFER:** Yes, yes and there's a reason for
4 that. It wasn't like we were trying to hide something.
5 The reason is, the present tense was technically
6 important because, at the time, Facebook was asserting a
7 false marketing defense where the present tense is what
8 matters.

9 **JUDGE MOORE:** They never asked you by interrogatory?
10 Uh, at what point you started to offer the product that
11 tells this that embodies the planes?

12 **MR. JOSEFFER:** The key other interog.

13 **JUDGE MOORE:** That would be a standard interrogatory
14 that I would expect to see but I didn't see it cited.

15 **MR JOSEFFER:** Right. And they didn't they did ask one
16 other interrogatory at the same time as this one which
17 was important and that was.

18 **JUDGE MOORE:** And they had the false marking claim,
19 which is probably why they wanted it in the present tense
20 to know which of your sayings actually did.

21 **MR. JOSEFFER:** Exactly. If we would have answered
22 that in the past tense, they would have said it was not
23 responsive and they would have been right. Now.

1 **JUDGE MOORE:** Because it was related to their false
2 marking claim, that's why they wanted it in the present
3 tense.

4 **MR. JOSEFFER:** And they did serve at the same time as
5 separate interrogatory concerning prior uses. And which
6 we answered truthfully that there were none. So, in
7 context, it was clear that that interrogatory was about
8 the present for false marking as separate prior use
9 interrogatory response that they don't talk about a lot.
10 And it also bears emphasis that you know that because of
11 false marking, they were arguing all along until the end
12 of discovery that Leader2Leader did not embody the
13 patent's invention.

14 And when they pulled this 180-degree switcheroo
15 shortly before trial, we're not raising that as a
16 procedural objection. But, when the question is why is
17 the party that did not bear the burden of proof for clear
18 and convincing evidence did not have more, the answer is
19 well right before trial, they changed us. And of all
20 their theories, this was the one that didn't even have
21 expert or technical evidence, so why wouldn't we have
22 done more or could we have done more at that point.

23 **JUDGE WALLACH:** The record doesn't contain everything
24 surrounding the interrogatories? It just has that page or
25 pages? Were there definitional provisions or anything

1 that required you to expand your, your response at any
2 point?

3 **MR. JOSEFFER:** No. And again, they, they because at
4 the same time, they filed a separate prior-use
5 interrogatory. I suppose that, I mean look, as a matter
6 of general updating law, right? With this being a false
7 marking question about embodies, if the answer to
8 embodies for false marking purposes, the current version
9 had changed, I'm sure he would have updated it. But since
10 it wasn't directed at that and there was a separate prior
11 use question, there's no need to update that because the
12 prior uses were what they were. Um.

13 **JUDGE LOURIE:** Mr. Joseffer, you have consumed your
14 total time, but you've gotten a lot of questions, we'll
15 give you two minutes for rebuttal.

16 **MR. JOSEFFER:** Thank you.

17 **JUDGE LOURIE:** Mr. Hungar.

18 **MR. HUNGAR:** Thank you your Honor. May it please the
19 court. Thomas Hungar for appellee Facebook. Uh, with
20 respect to what Mr. Joseffer described as the key issue,
21 when did Leader2Leader first embody the invention before
22 or after the critical date. Uh, there is, there are a
23 number of pieces of evidence that support the jury's
24 finding in favor of Facebook on that issue. In the first
25 place, um, Mr. McKibben testified that even under his

1 version of the events at trial, the invention was fully
2 complete, done, fully coded and part of Leader2Leader a
3 plug into part of Leader2Leader before, a few days before
4 he said.

5 **JUDGE MOORE:** This is your attack argument.

6 **MR. HUNGAR:** In part your Honor, yes. But, but
7 actually, it goes beyond.

8 **JUDGE MOORE:** No. What was offered for sale. But, it
9 actually goes beyond that your Honor because on December
10 8th which is obviously within a few days before the
11 critical date of December 10, 2002. On December 8th, 2002,
12 Mr. McKibben sent an e-mail in which he described the
13 current state of their negotiations with both The Limited
14 and Boston Scientific. In that e-mail, he specifically
15 said looking to a contract that they expected to sign in
16 January with respect to the Limited that what they were
17 offering to the Limited was Leader2Leader with quote the
18 full suite of technology close quote. December 8th that's
19 three days uh two days before the critical date within
20 the time period when even under Mr. McKibben's own
21 testimony, the invention is done, complete part of
22 Leader2Leader. That's at 25705 of the joint appendix. And
23 they're offering the full suite of Leader2Leader
24 **JUDGE WALLACH:** Well, six months before that, if
25 there was a Leader2Leader.

1 **MR. HUNGAR:** Yes your Honor.

2 **JUDGE WALLACH:** Program.

3 **MR. HUNGAR:** Yes your Honor.

4 **JUDGE WALLACH:** If they had offered it for sale to
5 someone, wouldn't they have said, this is our full suite
6 of technologies?

7 **MR. HUNGAR:** Actually, in the you're referring to the
8 Wright-Patterson offer in January, 2010. In that offer,
9 they also used language making clear that Leader2Leader
10 with Digital Leaderboard, and that's important, is
11 operational and fully developed. That's what the January
12 in 2010 offer to Right Patterson says and remember, the,
13 their own again, Mr. Lamb, the other inventor's own
14 testimony relies on an August 19, 1999 e-mail as evidence
15 in the conception of the invention, of the patent
16 invention in August, 1999, that e-mail refers to the
17 invention as quote Digital Leaderboard. So we have the,
18 the name of the invention in 1999. Digital Leaderboard
19 with, with Leader2Leader as being offered in January of
20 2002 so that, we submit provides clear and convincing
21 evidence of what was being offered at that point. And, of
22 course, the interrogatory when they when they described
23 what practice the invention, again, they say
24 Leader2Leader with the Digital Leaderboard engine. So,
25 so, the Digital Leaderboard evidence provides an

1 additional ground for finding this uh, upholding the
2 verdict.

3 In addition, I'd like to point out that Mr. Lamb's
4 testimony um, to be sure, he testified as Mr. Joseffer
5 suggests that the jury didn't have to believe that the
6 testimony that supports the other side's version, and he
7 also testified separately. He said that the technology
8 took a couple of years, maybe three to full implement
9 after conception date. Conception is August of 1999, a
10 couple of years would be August of 2001. Three years
11 would be August of 2002. All before the critical date.
12 And that's at 24829.

13 **JUDGE MOORE:** Mr. Hungar, if, suppose that all this
14 other evidence that you're referring to didn't exist. I
15 just want to try to focus on principles of law. There's
16 no interrogatory responses, there are no e-mails, there's
17 nothing.

18 **MR. HUNGAR:** Yes.

19 **JUDGE MOORE:** Do you agree with sort of the relative
20 outrage that somebody couldn't just call the inventor to
21 the stand and say disbelieve him and thereby I've met my
22 clear and convincing evidence burden.

23 **MR. HUNGAR:** I agree. That's correct your Honor. The
24 law.

1 **JUDGE MOORE:** You agree that if all that other stuff
2 didn't exist, but you're saying this is not that case.

3 **MR. HUNGAR:** Yes, that's absolutely right. On that
4 case, the, the jury is entitled to disbelieve and that,
5 that can be, that is affirmative evidence. The Supreme
6 Court said in Reeves that the third circuit said in Urban
7 which is a criminal case so certainly in a civil case,
8 even one subject to clear and convincing evidence
9 standard, it is clear and convincing evidence standard.
10 It is affirmative evidence, but it is also clear that,
11 standing alone, it is not enough to get over the burden.
12 But it does serve as additional evidence to support the
13 other evidence in the record and here we have ample other
14 evidence in the record that confirms that what they were
15 offering was the patented technology.

16 **JUDGE MOORE:** But I'm troubled by the interrogatory
17 responses providing that theoretical affirmative
18 evidence, because interrogatory responses were couched
19 absolutely in the present tense and given the presence of
20 your false marketing claim, it seems to me you were going
21 after very much what are you selling today that embodies
22 these claims. And not, and how long have you been selling
23 it in that form. And that's a standard interrogatory I've
24 seen in most patent cases is when did you start selling
25 it as it embodies the claims and that interrogatory

1 doesn't seem to have been presented to us. So, I want to
2 know what your thoughts are about the interrogatory
3 because certainly the District Court relied on some. The
4 District Court only cited two things, as the evidence
5 substantiates the jury verdict. He cited the
6 interrogatories and he cited the testimony that was
7 disbelieved. So that's you're, you're pointing to other
8 stuff. What do you think about these interrogatories?
9 Let's go piece by piece.

10 **MR. HUNGAR:** OK, although I. The District Court
11 actually point to other evidence in the footnote where he
12 goes through other evidence which we also.

13 **JUDGE MOORE:** With note of conception, yes. Yes, the
14 evidence of conception in the footnote.

15 **MR. HUNGAR:** But also that's, that's what I referred
16 to where they admit, they themselves admit even at trial
17 that the technology is done and part of Leader2Leader
18 before their critical date.

19 **JUDGE MOORE:** Prior to the critical date.

20 **MR. HUNGAR:** Yes.

21 **JUDGE MOORE:** Yes, OK. So.

22 **MR. HUNGAR:** And again, they also admitted again that
23 it's part of a plug-in to Leader2Leader at that time once
24 it's complete. But, from that aside with respect to the
25 interrogatory your Honor. Again, even if you're looking

1 at interrogatory you have to take into account Mr.
2 McKibben's testimony.

3 **JUDGE MOORE:** No, but I want, I mean the
4 interrogatory is a legal response and it says is
5 practiced.

6 **MR. HUNGAR:** Yes.

7 **JUDGE MOORE:** I mean, how in the world did, could it
8 ever be used to support the notion that it was practiced
9 ten years earlier.

10 **MR. HUNGAR:** Well your Honor. When you're talking
11 about a product and the product is Leader2Leader. We know
12 that Leader2Leader was on sale they conceded at that
13 trial but now they concede for purposes of appeal that it
14 was on sale prior to the date and they admit without
15 qualification Leader2Leader practices the patent. OK? Now
16 it's true, it's in the present tense but it is certainly
17 evidence from which a jury can infer that well, it
18 practices the patent. They didn't say that there was ever
19 a time when it didn't practice the patent. So, if it's
20 Leader2Leader it seems like it practices the patent. But
21 when you add to that, we, we noticed a 30(b)(6)
22 deposition of Mr. and they put up Mr. McKibben to testify
23 and that.

24 **JUDGE MOORE:** Mr. Hungar, suppose this is turned
25 around on infringement. How would you like it if your

1 interrogatory said our current version of Leader2Leader
2 or, it doesn't say current, but it says Leader2Leader
3 practices the claim you admit it. And then, they say,
4 therefore, we're entitled to get damages for all years
5 you've ever sold this. And you say, wait a minute, time
6 out, it didn't always have this form. I mean this is
7 software. This stuff is changing every single day.

8 **MR. HUNGAR:** Well it may be. I mean it's not like;
9 this isn't like Microsoft Word where you have it a
10 different version coming out. It's not like there's
11 something called Version 1 of Leader2Leader and Version 2
12 of Leader2Leader. There aren't many documents that say
13 that. It's always been called Leader2Leader, but.

14 **JUDGE MOORE:** But Digital Leaderboard. Right. It had
15 a whole different name when [garbled].

16 **MR. HUNGAR:** That, that, that's part of that, but I
17 described as part of it but that was the engine of.

18 **JUDGE MOORE:** That's the functionality that's at
19 issue.

20 **MR. HUNGAR:** Yes. And that's the functionality.

21 **JUDGE MOORE:** Even a separate name.

22 **MR. HUNGAR:** That was part of the offer.

23 **JUDGE MOORE:** But that name was never mentioned in
24 those earlier offers.

1 **MR. HUNGAR:** That's not correct your Honor. In the
2 January, 2002 offer to Wright Patterson, it specifically
3 referred to Digital Leaderboard being part of the system
4 and fully operational.

5 **JUDGE MOORE:** Is that prior to the critical date?

6 **MR. HUNGAR:** Yes your Honor. That's January, 2002.
7 The critical date is December 10, 2002. Um.

8 **JUDGE WALLACH:** I do think that Helen raises a good
9 question. Why shouldn't you put in the code. I mean it's
10 a question I asked appellate counsel too; but.

11 **MR. HUNGAR:** Your honor, the whole argument about
12 argument about the code, of course, has nothing to do
13 with the record before the jury. They claim in their
14 brief that, oh we gave them all the copies of the source
15 code. There's nothing in the evidence in the record
16 before the jury to that effect. In fact, there's nothing
17 in the record to that effect. The only thing the record
18 says is we'll make we'll give them what's available so my
19 understanding, not that this is in the record, but my
20 understanding is, in fact, that we did not have, were
21 never given a pristine copy of the code, as it existed,
22 before the critical date. But whether, that's neither
23 here nor there. The question is what was in front of the
24 jury.

1 There's no case from this court that says you must
2 offer the source code. In fact, the standard is any
3 relevant evidence. And when you're trying, just as Mr.
4 Joseffer said, when you have a lot of issue to try. A lot
5 of different factual issues, and here you've got the
6 admission of the party opponent on the critical issue
7 that you can give to the jury, why try to complicate
8 matters further by trying to introduce technical
9 evidence. Particularly in the case of source code, it's
10 often the case you just can't get it because

11 **JUDGE MOORE:** Why didn't your expert testify on it?

12 **MR. HUNGAR:** Well, again, your Honor. My
13 understanding, not in the record. My understanding we
14 were never given a pristine copy of the source code as it
15 existed before the critical date so we wouldn't have been
16 in the position to do it. Also.

17 **JUDGE MOORE:** What do you mean, pristine - does it
18 have a coffee stain on it? I mean what, what does that
19 mean? What were you.

20 **MR HUNGAR:** Without any um additions without any
21 changes made afterwards.

22 **JUDGE MOORE:** But whose obligation is it to get the
23 discovery from them that you want? It's yours. You've got
24 to file the appropriate interrogatories. You've got to
25 file the appropriate requests for documents.

1 **MR. HUNGAR:** Your Honor, we filed a 30(b)(6) notice
2 as I was saying earlier and it specifically addressed
3 question after question that we want to know every
4 version at what time was conception, at what time was
5 reduction to practice. We're going to ask you on every
6 version that practiced the patent and when.

7 **JUDGE MOORE:** And do you believe they failed to
8 comply? And if so, why didn't you move for a motion to
9 compel them on it?

10 **MR. HUNGAR:** Your honor, we asked.

11 **JUDGE MOORE:** You're up here on appeal complaining
12 that you didn't have a pristine copy. I have no clue what
13 you even mean by that. And, and that that somehow
14 justifies why you, you didn't include it as any of the
15 evidence.

16 **MR. HUNGAR:** I'm not complaining your Honor, I'm
17 simply answering the question about why it is that we
18 chose to try the case in a different way which trial
19 counsel, as Mr. Joseffer said, have to make judgments
20 about what's to be most effective in the limited time
21 available. And that's the reason, or one of the reasons
22 why we tried it that way, but with respect 30(b)(6)
23 deposition your Honor, the 30(b)(6) deposition noticed
24 notified them and this was in February of 2010. Some five
25 months before the trial. That the notice said we want to

1 talk about these issues: reduction to practice and which
2 which versions of the software practice or patent and so,
3 we asked Mr. McKibben. Can you identify any version of
4 Leader2Leader that didn't practice the patent. He can't
5 identify any version. That, combined with the
6 interrogatory response, those two facts, in and of
7 themselves, provide strong evidence that if he, if the
8 inventor and president of the Company can't identify any
9 version that didn't practice the patent and then given an
10 unqualified answer that says it does talk to the patent.

11 **JUDGE MOORE:** Did he say I can't identify anything or
12 did you ask him specifically at which point in time a
13 different version that didn't have these features existed
14 and he responded that he couldn't recall.

15 **MR. HUNGAR:** Um, the question was: Can you identify
16 any iteration of the Leader2Leader product.

17 **JUDGE MOORE:** Which can you tell me what page you're
18 on?

19 **MR. HUNGAR:** 25761 of the joint [garbled].

20 **JUDGE WALLACH:** Can you identify any iteration of
21 the, of the Leader2Leader product, and that, in your
22 opinion, did not implement what was claimed in the 761
23 patent. Answer, that was a long time ago, I can't point
24 to a specific point. So he admit.

1 **JUDGE MOORE:** That's a timing question as opposed to
2 a response that there never existed one. Right? If he's
3 not saying that his response is not an acknowledgement
4 that Leader2Leader has always.

5 **MR. HUNGAR:** But, but, but.

6 **JUDGE MOORE:** Can you agree? Leader2Leader when
7 first, when first put on the market didn't have the
8 Digital Leaderboard in it.

9 **MR. HUNGAR:** No, no we don't agree your Honor, to the
10 contrary. The first offering the record to Wright-
11 Patterson where they specifically say it has Digital
12 Leaderboard. That evidence standing alone is sufficient
13 to support the jury's verdict.

14 **JUDGE MOORE:** I'm still which page did you say it on
15 257. I'm sorry.

16 **MR. HUNGAR:** 25761.

17 **JUDGE WALLACH:** [garbled] 20.

18 **MR. HUNGAR:** That's in Volume 2. The joint appendix.
19 And the Wright-Patterson offer which refers specifically
20 to Digital Leaderboard is Defendant's Exhibit 179 and the
21 references to Digital Leaderboard are at 27202 and 27204,
22 uh, perhaps among others. And, again, it specifically
23 talks about Leader2Leader with the Digital Leaderboard
24 system and how it's going to provide a collaboration
25 environment, it's operational, it's already developed and

1 this was well before the critical date. So, your Honor,
2 that evidence, as well even if you leave the
3 interrogatory response completely aside, which, of
4 course, you can't do. Reading the evidence most favorable
5 to the verdict. But even putting the interrogatory
6 response aside, that other evidence provides clear and
7 convincing evidence of invalidity.

8 **JUDGE MOORE:** Can I ask you a quick question about
9 your divided infringement alternative grounds for a
10 permit?

11 **MR. HUNGAR:** Yes.

12 **JUDGE MOORE:** Um, the claim says the computer
13 implemented method of managing data comprising computer
14 executable act. The key phrase it seems to me is
15 "computer executable acts" which comes after the work
16 comprising. Yet, you all claim it's part of the preamble
17 and somehow Mr. Joseffer didn't respond to the contrary,
18 but um, do you know, the MPEP and pretty much all patent
19 books say that the transition phrase comprising is the
20 end of the preamble and these words come after it. So I
21 don't see that limitation as being part of the preamble,
22 I see it as the body of the claim.

23 **MR. HUNGAR:** Well, even if that's true, your Honor.
24 The fact remains that

1 **JUDGE MOORE:** Do you question whether that's true or
2 do you know, are you certain as you stand here what
3 portion of this claim represents the preamble.

4 **MR. HUNGAR:** Well, my understanding of the preamble
5 is what comes before the list of the body of the elements
6 of the claim that are

7 **JUDGE MOORE:** Do you know what a transition is in a
8 conductive preamble at the end of comprising of?

9 **MR. HUNGAR:** Yes, comprising would be a transition,
10 yes.

11 **JUDGE MOORE:** Right, consisting of consisting
12 essentially of. The MPEP actually defines all of this in
13 case you.

14 **MR. HUNGAR:** Right. I've looked at it your Honor, and
15 I understand that comprising of the transition term, our,
16 our understanding of this question is as set forth in the
17 brief, but, as was also argue in the brief whether or not
18 you view that as uh, limiting or applying to the claim,
19 the fact remains that in the final step, they add a user
20 step. And you can't give meaning to those words. I mean
21 this court again and again considering similar language
22 has concluded that requires third party, third party user
23 action. And it's not, therefore, uh, something that
24 Facebook can do.

1 **JUDGE MOORE:** Well, it says dynamically updating the
2 stored metadata? Is that the.

3 **MR. HUNGAR:** No, it says that, which clearly the
4 system can do. But, then, after that you have the
5 wherein, wherein clause, which introduces an additional
6 limitation, the user employs at least one of the
7 application in data from the second environment. That
8 requires the user to do something. And, therefore, the
9 Facebook system must do something and the user must do
10 something. And, ultimately, what the user does is going
11 to, is going to result in some computer execution. Even
12 if you're reading computer executable in, that's still
13 being, that's still happening; but the user has to do
14 something. That's unambiguous language requiring user
15 action and therefore, you have to prove joint
16 infringement and the jury found against the them on that.

17 **JUDGE LOURIE:** Thank you Mr. Hungar. We have your
18 argument. Mr. Joseffer has a couple of minutes left.

19 **MR. JOSEFFER:** Thanks. Um. To start out, if you take
20 what the evidence of Facebook has proffered and you
21 remove two things. One is McKibben on the theory that he
22 lied but Mr. Hungar said that's not you know, that's not
23 going to get you there and you take out the interrogatory
24 for reasons that we've been discussing with Judge Moore.
25 The answer is, what would be left? And the answer is

1 nothing that would even be near, near clear and
2 convincing evidence. And we know that in part because the
3 District Court in the JMOL opinion relied solely on the
4 combination of those two things. And then the footnote,
5 you know, drop the footnote but it said that it was
6 relying on those two things.

7 If you read the closing argument, Facebook was
8 pounding credibility all along. So we've now gone from
9 Facebook argument credibility as the linchpin of its case
10 below saying, aw, there's lots of other stuff. Don't
11 worry about credibility. And, and the bottom line is that
12 all this other stuff they're arguing now is either waived
13 because it wasn't presented below or is wrong or both.

14 For example, Digital Leaderboard now seems to be
15 their key effort to try to tie Leader2Leader to the
16 patented invention. If you read the entire trial
17 transcript, you won't see a single description of what a
18 Digital Leaderboard is, much less a clear and convincing
19 one. The reason is it's not what Facebook was trying to
20 prove its case on below. The correct answer which, again,
21 you're not going to find this in the record, but the
22 correct answer, if it's helpful to the Court, is
23 additional Leaderboard is the software component, the
24 engine that drives the overall Leader2Leader product.
25 Leader2Leader's an evolving product over time, whatever

1 it happens to include in it, the software component, will
2 now be included in Digital Leaderboard, which is why the
3 phrase is Leader2Leader powered by the engine.

4 **JUDGE MOORE:** Do you mean that Digital Leaderboard
5 refers to the plug-in that is really the functionality
6 [garbled].

7 **MR. JOSEFFER:** No, that's, that's our point,
8 whatever, whatever software Leader.

9 **JUDGE MOORE:** No, but that's our point. I don't
10 understand what that means.

11 **MR. JOSEFFER:** No, we don't at all and there's no
12 evidence that it is because this is the key thing. If the
13 problem is, from the jury, you read the trial transcript,
14 there's no description of Leader of Digital Leaderboard,
15 'cause there's no evidence on this.

16 Going outside of the record, this is what it is. And
17 we would have explained this if they had actually raised
18 the point at trial. Digital Leaderboard is just the
19 software module or the engine that drives the entire
20 Leader2Leader product. Digital Leaderboard is the
21 software module. So, before the patented invention was in
22 the product, you had a Leader2Leader powered by Digital
23 Leaderboard. OK? And the Digital Leaderboard was the
24 software module for the product.

1 After you later complete the patented invention and
2 put it in the product, the patented invention is then in
3 software prod, the software that goes into Digital
4 Leaderboard for sure. But, Digital Leaderboard is not
5 synonymous with just the patented invention any more than
6 Leader2Leader is synonymous with just the patented
7 invention.

8 But, the reason that at the appellate court is you
9 really don't have to try and sort through all of these,
10 you know, convoluted factual connect-the-dots factual
11 theories is that, one, they weren't presented below, and
12 two um, they certainly are not clear and convincing
13 evidence. And even if you look, even with the
14 interrogatory.

15 **JUDGE MOORE:** Do you agree it was reduced to
16 practice prior to the critical date?

17 **MR. JOSEFFER:** It just, and that was the whole point
18 of the filing of the provisional patent application then.
19 The problem is Facebook at trial actually did it.
20 Remember, because the critical date is right at the time
21 that the application was filed and the barring activity
22 in that few days window just before?

23 Facebook, at trial, was arguing that the invention
24 was ready for patenting for purposes of barring activity.
25 But, was not enabled for purposes of giving us the

1 benefit of the provisional under which we easily would
2 have won. Which I think is another reason that Facebook
3 really tried not to prove its case too meticulously here
4 because, in addition to being wrong, it was really on the
5 horns of a dilemma there between whether it was ready for
6 patenting for the one purpose or the other. Either way,
7 we should have won. They have a factual way to
8 distinguish that, but it's dicey. So that's why they
9 didn't have evidence. I know, I know I'm well over. If
10 you want me to respond to method point, I could.

11 **JUDGE LOURIE:** No, I think we've heard the case.
12 Thank you, Mr. Joseffer. We'll take the case under
13 advisement.

14 **MR. JOSEFFER:** Thank you.

15 [END RECORDING]
