COMPLICIT ENCRYPTION GEEKS ENABLE THE AMERICAN SPY STATE

THE INVASION OF AMERICA'S PRIVACY IS NOT POSSIBLE WITHOUT THE SUPPORT OF ENCRYPTION ENGINEERS

PAY-to-PLAY NEW WORLD ORDER This timeline shows how insiders sell access & manipulate politicians, police, intelligence, judges and media to keep their secrets

Clintons, Obamas, Summers were paid in cash for outlandish speaking fees and Foundation donations. Sycophant judges, politicians, academics, bureaucrats and media were fed tips to mutual funds tied to insider stocks like Facebook. Risk of public exposure, blackmail, pedophilia, "snuff parties" (ritual child sexual abuse and murder) and Satanism have ensured silence among pay-to-play beneficiaries. The U.S. Patent Office is their toy box.

FIG. 1—ADOLF HITLER RELIED UPON HIS "BROWNSHIRTS" TO SPY ON RIVALS.

In 1921, Adolf Hitler organized a group to protect his political rallies. They became known as Brownshirts (also stormtroopers, Sturm Abteilung - SA) after the color of their uniform shirts. Their activities evolved from protecting Hitler and Nazi meetings to disrupting the activities of those who opposed him. As Nazi influence grew, the Brownshirts gained a reputation as a well-organized gang of violent thugs. They became Hitler's private army that led the violence on Kristallnacht (the "Night of the Broken Glass") in November 1938 that destroyed about half the synagogues in Germany and thousands of businesses, and sent tens of thousands of innocent citizens to camps (including the business and family of an AFI contributing writer, God rest their souls).

ENCRYPTION ENGINEERS ARE MODERN DAY BROWNSHIRTS?

While they put many off of Nazism, others were attracted to the group's discipline. In 1934, to consolidate his power, Hitler ordered the killing of 85 Brownshirt leaders in a "blood purge" that became known as the "Night of the Long Knives." These hits were carried out by the SS and Gestapo, the secret police of his emerging regime. Germany's courts turned a blind eye to the murders, a judicial failure that ushered in Hitler as "the supreme judge of the German people." Hitler then proceeded with his Third Reich eugenic vision of German superiority. (Eugenics: literally "well born"—a set of beliefs and practices that aimed to improve the genetic quality of humanity). IBM provided Hitler with computers to catalog Jews, Poles, Gypsies, homosexuals and political opponents.

America's encryption engineers are betraying our trust, just like Hitler's Brownshirts betrayed their own parents, colleagues, neighbors and relatives. No German was immune from their treachery. The American Spy State Cartel (a) spies on everyone, (b) harasses rivals, (c) supports eugenics, (d) is supported by complicit federal judges turning a blind eye to the law, and (e) presses Obama-Hillary's policy for the "harnessing of private incentives to public goals." They also (f) support IBM who formed The Eclipse Foundation in 2001 and created Facebook along with the rest of social networking industry which compiles detailed "dark profiles" on every person on the planet. These are all disturbingly similar attributes to Hitler's fascism.

(NOV. 06, 2015)—The invasion of America's privacy in the Digital Age is not possible without the support of encryption engineers.

Technically, politicians and bureaucrats don't breach your privacy, encryption engineers do. So what has gone wrong with the morality of these talented people? This post will review the facts and leave the moral questions for later.

Encryption engineers manage the digital keys that lock and unlock your data "at rest" (stored) and "in motion" (moving through the Internet).

ENCRYPTION MUST BE REGULATED IN PUBLIC, NOT BY SPIES, BANKERS, CORRUPT JUDGES AND GREEDY LAWYERS

To date, this esoteric, but all-important task of data encryption has been the murky domain of spies, lawyers and bankers, FISA court judges and tech geeks (the "Spy State Cartel").

Encryption scrambles the contents of your messages then files and unscrambles them once they reach their intended destinations using digital keys managed by encryption engineers.

For example, the phrase "your cancer treatment program" would be encrypted with a digital key and travel through the Internet as "Qij\aq6NB5Lf@;kndFq7CN{Q}." So, even if it was intercepted it could not be read. The theory is that this knowledge of your medical condition would remain confidential between you and your doctor.

THE BIG PRIVACY LIE

That is the **BIG PRIVACY LIE**. The fact is, **the Spy State Cartel knows** about your cancer and stores that information (along with every other detail about your life) in a "dark profile" maintained on you offshore—out of the reach of the U.S. Constitution.

Only the NSA and their "public-private partner" commercial crony accomplices have access. See [President Obama Executive Order No. 13691, Feb. 13, 2015—Promoting Private Sector Cybersecurity Information Sharing](#).

On Jun. 06, 2013, we first learned from NSA whistleblower and American patriot Edward Snowden that [all](#) of the major American Internet and telecommunications providers have given the NSA a **backdoor master encryption key to all your data**.

YOUR PERSONAL INFORMATION IS PRIVATE IN ANY FORM

Think about it. Would you be incensed if you arrived home tonight and discovered a person rummaging through your file cabinet? Of course you would. You'd call the police. What if it was the police, along with the phone company, a local politician, your and a group of local business leaders, just nosing around? You'd call out the hounds.

So then, why do you allow that very same activity to occur on your computer and phone just because you cannot see the bits and bytes through which they rummage? Put your foot down. Now!

Leader: 145,000 man-hours • over \$10 million • 20 people • solid engineering • hackers not welcome • affirms privacy, security, property • no foreign influence • respects U.S. Constitution

Facebook: "one to two weeks" • beer money • all by myself • 28 hidden hard drives • stole Harvard photos • hacks email • PayPal Mafia handlers • scofs at privacy • corrupts markets, judges, politicians & gov't agencies

commercial lawyers via the IBM Eclipse Foundation (2001) to write convoluted “end user license agreements” (EULA) where you agreed to give up your privacy in exchange for free applications and services, like email and document sharing. Stop signing and supporting this sneaky, slimy lawyering. **Stop using providers** that invade your privacy with such sneaky, abusive practices.

For example, Facebook’s EULA first states “You own all of the content and information you post on Facebook.” Sounds good, but then in the very next sentence you give up those rights “you grant us a . . . worldwide license to use any IP [intellectual property] you post.” It’s much worse, but the point is made.

OUR ENCRYPTION GEEK SONS AND DAUGHTERS HAVE BETRAYED US

These recalcitrant geek children of ours have allowed this unprecedented assault on our Constitutional rights to privacy and property. They don’t appear to care, so let’s give them motivation to care. Expose them.

When the NSA comes knocking at the door of an American company, they should be told “NO, you don’t have jurisdiction inside the borders of the United States.” But, our encryption engineering children don’t fight for our property and privacy rights. Instead, they just give them the backdoor keys and cash the bribery checks, in our opinion.

WHO ARE THESE ENCRYPTION ENGINEERS?

The National Institute of Standards (NIST) is required by law to publish a list of companies and their hardware and software products that include a “DRBG Algorithm” which likely gives the NSA and their commercial cronies a permanent backdoor. This list includes contact names and addresses.

See Perlroth, N., Larson, J., Shane, S. (Sep. 05, 2013). **N.S.A. Able to Foil Basic Safeguards of Privacy on Web**. The Wall Street Journal.

The **NIST DRBG Validation List** is formatted oddly [NOTE, Mar. 30, 2017: This file has been removed from the NIST website—see [HTML](#) | [PDF](#) versions reproduced from the file when it was available.] Part of each table entry scrolls off the page. Printing cuts off the disclosure about DRBG algorithms, and it is over 200 pages. Experienced investigators say such unwieldy government disclosure files are common in agencies with something to hide from public scrutiny.

Here are properly formatted versions of the NIST file: [HTML](#) | [PDF](#) (Thank you to AFI researchers. It took eight hours to fix.)

The list has over 900 entries currently. It reads like a Who’s Who of Internet, computer, software and telecommunications providers. Includes on the list are Microsoft, Dell, IBM, Cisco, Kaspersky, Red Hat, Samsung, Motorola, Sonus, HP, Palo Alto Networks, Apple, McAfee, Oracle and Northrup Grumman.

Uncannily, the same companies are members of **IBM’s Eclipse Foundation** (2001). These companies all relied on Leader Technologies’ social networking invention stolen by Professor James P. Chandler and the IBM Eclipse Foundation in 2001-2002.

Below are 133 of the most recent entries. Is your son, daughter, friend, or classmate on this list? Ask them why they are complicit or silent about this historic abuse of privacy. Ask them about their “sudden newfound wealth” (very likely for active colluders).

Their investments will likely focus on fellow Cartel members like JPMorgan, Morgan Stanley, Goldman Sachs, HSBC, UBS, Fidelity, Vanguard, T. Rowe Price, TIAA-CREF, Baillie Gifford, Credit Suisse, Barclays, Wells Fargo, **Citigroup**, Bank of

STOP FACEBOOK PROPERTY THEFT

WILL HUMANKIND EVER LEARN? Facebook's Orwellian doublespeak about property and privacy (theft) merely repeats the eventual dehumanization of the individual under MAO's Red Star, Stalin's SOV ET Hammer & Cycle and Hitler's NAZI Swastika. Respect for the inalienable rights of each individual is a bedrock value of democracy. The members of the Facebook Cabal abuse this principle at every opportunity. They evidently believe that they deserve special privileges and are willing to lie, cheat and steal in order to treat themselves to these privileges.

ASK CONGRESS: PASS THE INVENTOR PROTECTION ACT!

LEADER TECHNOLOGIES Inventor Protection Act (Proposed)

America needs to practice what it preaches.

We have no business lecturing the world about free enterprise and the rule of law, when we permit the investors in Ohio-based innovator Leader Technologies to go uncompensated for the risks they took to help invent social networking . . .

—a technology upon which the President and U.S. government now rely;
—a technology *stolen* by the "Facebook Cabal" who recruited the federal courts and Patent Office into their club of corruption.

Rescind. Investigate. Sanction. Certify.

Contact your representatives. Ask them to pass it.
Real American inventors need your support.

HOW CAN YOU STOP THE SPY STATE?

For starters, the Takings Clause of the Fifth Amendment empowers Congress to legislate a payday for Leader Technologies shareholders. This would provide adequate financing for Leader to offer a rational social networking environment—one that offers the application utility that people have come to enjoy about Leader’s invention **without** sacrificing security and privacy.

Contact your elected representatives and ask them to use Congress' power of the purse to pay Leader Technologies and unplug the Cartel.

On January 22nd, 2009 Hillary Clinton signed a Non-Disclosure agreement, or NDA, where she agreed to protect highly classified information, and a failure to do so could result in criminal prosecution.

Thanks GH. We note that none of the alphabet MSM media have covered this critical development in proving Hillary's criminality. The truth does not rate high on their list of priorities.

Propaganda is defined by Merriam-Webster as "ideas or statements that are often false or exaggerated and that are spread in order to help a cause, a political leader, a government, etc."

K. Craine November 7, 2015 at 6:24 AM

AFI researchers have downloaded Hillary's NDA (Nondisclosure Agreement) here so you can read it for yourself: She is now condemned by her own hand.

If Hillary does not go to jail under the Economic Espionage Act of 1996 (18 U.S.C. 1831) and the Federal Trade Secrets Act (18 U.S.C. 1832), then those laws are meaningless.

Ironically, those laws were both written by her mentor, spy master Professor James P. Chandler. Chandler also wrote Subsection (b) of the False Statements Accountability Act of 1996 too (parties and lawyers can lie in lawsuits and to Congress). Let's see if Hillary cites Subsection (b) to justify her lies.

GIBSON DUNN LLP exposed as one of the most corrupt law firms in America

Investigative Reporter Julia Davis investigates Facebook's Leader v. Facebook attorney Gibson Dunn LLP. She credits this firm with the reason why

not a single Wall Street banker has gone to jail since 2008. [Click here](#) to read her article "Everybody hates whistleblowers." [Examiner.com, Apr. 10, 2012](#). Here's an excerpt:

"Skillful manipulation of the firm's extensive media connections allows Gibson Dunn to promote their causes, while simultaneously smearing their opponents and silencing embarrassing news coverage."

This statement followed right after Davis cited Facebook's chief inside counsel in the Leader v. Facebook case, Theodore Ullyot, who appears to have helped lead the Leader v. Facebook judicial corruption. Interesting word choices associated with Gibson Dunn LLP: manipulation, smear. Attorneys swear a solemn oath to act morally, ethically, and in support of democratic principles. They promise to conduct themselves in a manner than instills confidence among the citizenry in the rule of law and the judicial system. These promises appear to be meaningless. More outdated than the old box of AOL installation CDs collecting dust in your basement is the Electronic Communications Privacy Act, or ECPA.

Passed in 1986, the law says the government can access your email without a warrant just because a message is over 180 days old.

In other words, it defies the Constitution and common sense.

Here's the deal: Congress can do something to fix this embarrassing, outdated law. And a large, bipartisan majority in the House is on board with a bill that would do just that – a rare feat for any piece of legislation on Capitol Hill.

In fact, it's now the most cosponsored bill in Congress to not earn a House vote—yet.[1]

So what's the hold-up? Tell Congress to get this important piece of privacy legislation moving – add your name to our petition today.

NEW NBC Thriller BLINDSPOT last night exposed an allegedly fictitious NSA/CIA program called "Operation Daylight" outed by a whistleblower.

Here's the NBC trailer promo:

<http://www.tvguide.com/news/blindspot-operation-daylight-spoilers/>

"Operation Daylight was a pact between the White House, the CIA and the FBI that involved taking information obtained through illegal NSA surveillance of average citizens, and attributing it to criminal sources - hi, Guerrero! - in order to prosecute people (and occasionally blackmail Congressmen). Sound shady? It is."

Sound familiar? We believe that this is exactly what has been happening in Washington DC for more than a decade at the hands of the IBM Eclipse Chandler Spy State Cartel. Art mimics Real Life.

Here's a YouTube clip from NBC Blindspot when the FBI and CIA are given a directive from the White House to start using illegally gathered NSA information against political opponents.

Transcription of NSA Segment:

BETHANY: This is not a program. Where's it written down? What bill allows it? Its illegal, not to mention unconscionable. If the public ever found out about the true reach of the NSA surveillance.

THOMAS: The public wants us to win the war on terror.

BETHANY: This is not about terrorism. This is about the complete invasion of privacy for every citizen in this country.

THOMAS: If people aren't breaking the law, why do they care if we are listening?

BETHANY: We would be breaking the law if we used any of this intell.

BETHANY: If it ever got out, we could go to prison

THOMAS: Wow... and whose talking about prison?

THOMAS: We just received a directive from the White House chief of staff, and I for one intend to act on it.

THIRD FEMALE: Beth, if any one of us says no, this all falls apart.

On Aug. 16, 2009, NSA director [James L.] Jones requested an urgent meeting with Hillary from the White House Situation Room, thus putting foreign state hackers on notice about concurrent event threats. This communication is classified by default. "H."

3. [Two Policy Changes That Will Make America More Democratic \(and less contentious\), Dec. 21, 2012](#)

OUR MISSION

American citizens must fight abuse of the constitutional right for authors and inventors to enjoy the fruits of their inventions, as a matter of matter of basic property rights and sound public policy. Otherwise, instead of innovation, creativity, genius, ideas, vision, courage, entrepreneurship, respect, property, rejuvenation, morals, ethics, values, renewal, truth, facts, rights, privacy, solutions and judicial faithfulness,

. . . our society and economy will be dragged down (and eventually destroyed) by copying, infringement, thievery, counterfeiting, hacking, greed, misinformation, exploitation, abuse, waste, disrespect, falsity, corruption, bribery, coercion, intimidation, doublespeak, misconduct, lies, deception, attorney "dark arts," destruction, confusion, dishonesty, judicial chicanery and lawlessness.

If we do not speak up, impeach derelict judges and imprison corrupt attorneys, we cannot possibly hope to start fixing the current ills in our society. Without justice and respect for private property, democracy has no sure foundation.

CURRENT EDITORIAL FOCUS

We are an opinion blog that advocates for strong intellectual property rights. We welcome commenters and contributors. The Leader v. Facebook patent infringement case first came to our attention after learning that the trial judge, Leonard P. Stark, U.S. District Court of Delaware, ignored his jury's admission that they had no evidence to support their on-sale bar verdict, but the judge supported it anyway.

The judicial misconduct has deteriorated from there, replete with two of the three judges on the Federal Circuit appeal panel, Judges Alan D. Lourie and Kimberly A. Moore, holding Facebook stock that they did not disclose to the litigants, and later tried to excuse through a quick motion slipped in at the last minute by the Clerk of Court, Jan Horbaly, and his close friends at The Federal Circuit Bar Association. (The DC Bar subsequently revealed that Mr. Horbaly is not licensed to practice law in Washington D.C.)

The judges ignored [shocking new evidence](#) that Mark Zuckerberg withheld 28 hard drives of 2003-2004 evidence from Leader Technologies that could prove actual theft (and therefore claims even more serious than infringement). In addition, Facebook's appeal attorney, Thomas G. Hungar of Gibson Dunn LLP, has close personal ties to just

Suggest AFI readers send emails to all the engineers on the NIST table above. Turn up the heat and let them know the world is now watching them ...and waiting for them to do the right thing for a change.

Dear NAME OF ENGINEER:

I see that you are on the NIST DRBG VALIDATION list of encryption engineers.

What puzzles me is how so many bright engineers, like you, can be so ethically compromised and silent about the abuses of our Constitutional rights to privacy. Just because one can get away with fooling the general public about the supposed privacy of encryption, you know better. Why are you not shouting from the housetops that digital privacy is a Potemkin Village?

For the sake of our children and grandchildren, I hope you are not a Brownshirt and that you are one of the good guys who steps forward to right these wrongs. Please do not be silent any longer.

Thank you for your time.
