1	THE COURT: Good afternoon,
2	counsel. This is Judge Stark.
3	Let me know who's on the line,
4	please.
5	MR. CAPONI: Good afternoon, Your
6	Honor. This is Eric Caponi from Blank Rome from
7	Facebook. And with me is Heidi Keefe from White
8	& Case.
9	MS. KEEFE: Good afternoon, Your
10	Honor.
11	THE COURT: Good afternoon.
12	MR. ROVNER: And Your Honor, this
13	is Phil Rovner from Potter, Anderson & Corroon
14	for the plaintiff. And with me on the line is
15	Paul Andre from King & Spaulding in California.
16	MR. ANDRE: Good afternoon, Your
17	Honor.
18	THE COURT: Good afternoon. You
19	folks are for Facebook; correct?
20	MR. ANDRE: Your Honor, yeah.
21	We're for Leader Technologies, plaintiff.
22	THE COURT: I'm sorry. Okay. Got
23	you.
24	MS. KEEFE: And Mr. Caponi and

myself are for Facebook. 1 2 THE COURT: Okay. Forgive me. 3 Okay. So for the record, this is 4 the Leader Technologies versus Facebook. 5 our Civil Action Number 08-862-JJF. And the reason for the call today is that both parties 6 7 have some discovery requests, certain discovery 8 disputes. 9 And I reviewed the letters that 10 were submitted in connection with both parties' 11 dispute. I want to begin first and hear just 12 briefly from each side with respect to 13 Facebook's complaint regarding essentially the 14 response to Facebook's Interrogatory Number 10. And let me hear briefly first from 15 16 Facebook on this. 17 MS. KEEFE: Thank you, Your Honor. 18 Again, this is Heidi Keefe. 19 Our complaint is actually, I 20 think, relatively small. What we're looking for 21 here is to simply have Leader's response to 22 Interrogatory 10 be complete. This is an 23 interrogatory in that it is -- it addresses a 24 very limited universe of documents and limited

1 information.

We are asking Leader to give us their support for their contention that the earlier filed, shorter application supports the later issued claims of the patent at issue in this case.

answer that interrogatory is within the four corners of the specification of the patent in question. When Leader came back with its response, its response was, Well, the first response was simply everything. And we said, That's not good enough. We need to understand limitation by limitation where it is.

Their supplemented response, while it went in the right direction, we will give them that, it was circumvented with all of this language like it's just exemplary. You know, this is non-limiting.

It's just some of the claims and some of the examples that we find. And we're simply asking, in order to understand what their position is and move this issue forward, to have a final and complete answer.

1 Now, we understand that if, 2 through the course of discovery, something comes 3 out that completely changes their mind under the Federal Rules, they could come back and attempt 4 5 to supplement their responses. 6 But we're asking for a complete 7 response as they know it at this time. And we simply don't have that yet. 8 9 THE COURT: All right. 10 understand what you're asking for. 11 But as I understand it, they've 12 indicated to you that they believe the priority 13 date is the date of filing of the provisional 14 filing. So you know what their position is, so 15 you could determine what the prior art is based 16 on what they've already told you. 17 Help me out on why it is you're 18 entitled to or what's prejudicing you from them 19 reserving a right to potentially come up with 20 additional arguments or contentions based on 21 what you yourself describe as a limited universe 22 of documents. 23 Why can't they reserve the right 24 to do that?

1 MS. KEEFE: Well, I think -- I 2 think it goes to a number of things, Your Honor. I think, first, what we're talking about in 3 4 terms of the priority date is that the burden is 5 on Leader to prove the priority date. What we did was we said we don't 6 7 believe that you're entitled to that priority date. And, you know, we have to come forward 8 with reasons that we don't believe that -- we 9 10 told them that the word tracking, for example, 11 which is in every one of the claims at issue in 12 this case didn't even appear in the original 13 priority document. 14 The burden then shifts to Leader 15 to establish why it is entitled to that 16 priority -- to that priority documentation. We don't feel that they've done 17 18 that yet. And if all of their support, if 19 everything that they have is what they have 20 right now, we'd like to be able to move 21 potentially for summary judgment resolving this 22 issue, so that the universe of prior art is 23 firmly established and narrowed down. 24 But the way that they crafted

their answers saying that it's simply exemplary, 1 2 they simply don't know or they may have different ideas later doesn't allow us to do 3 4 that, and doesn't allow us to know what the 5 universe of prior art is. The burden is on them at this 6 7 point. We'd like a final answer. If their final answer is as it 8 9 stands right now and they have no other 10 information and they confirm that, then we'd 11 like to move for summary judgment on this issue 12 that they're not entitled to that prior date. 13 That's what we're leading to so 14 that we can have as an absolute what the 15 universe of prior art will be in this case. 16 THE COURT: All right. Let me 17 hear from Leader, please. 18 MR. ANDRE: This is Paul Andre, 19 Your Honor, for Leader. I think Your Honor 20 understands the argument quite well that we put 21 in our letter brief. The patent is entitled to 22 the provisional date absent a showing by clear 23 and convincing evidence that the claims are not 24 enabled by the provisional application.

1 There's been no clear and convincing evidence put forward at all, actually 2 3 no evidence at all. So our position is that we 4 can rely on the entirety of the application. 5 tried to provide an exemplar just to avoid this situation with the Court. 6 7 And it's not our burden at this point to provide additional all-inclusive 8 9 responses. 10 THE COURT: Okay. Fine. 11 Ms. Keefe, anything else to add? 12 MS. KEEFE: I would just say, Your 13 Honor, we actually have provided evidence the 14 word track, for example, which is in every 15 claim, doesn't appear anywhere in the priority 16 application that they're claiming full support of. And I disagree with Mr. Andre's statement 17 18 of the law, but that's in our briefing as well. 19 So... 20 THE COURT: Okay. Fine. 21 I'm prepared to rule on Facebook's 22 request here for further response to 23 Interrogatory Number 10. 24 And at this time, I'm denying

Facebook's request. I think, given the status of the case, that Leader's response at this time is adequate. It's been recognized by Facebook that it may be that Leader will have to or will be in a position to supplement its response over time.

And I think there's nothing that I see that precludes such a supplement from being, based on the documents that Leader is already aware of and has identified and is relying on at this time, or if discovery proves that there's additional evidence on which it can rely that it thinks is responsive to Interrogatory Number 10, Leader may do that as well.

So I'm denying Facebook's request at this time.

Let's now turn to the issues that

Leader has raised with respect to Facebook. And

I do want to go through these quickly, but one

by one.

And since Leader is the moving party on these, let me hear first from Leader on the first issue, which goes to the production of documents from previous litigation.

MR. ANDRE: Your Honor, this is 1 2 Paul Andre. Once again what we're asking for is relevant documents. Not all the documents, just 3 4 the relevant documents from two particular litigations that we've identified, the Connect U 5 case and the Cross Atlanta case. 6 7 The Connect U case is a trade secret case in which case there has been about a 8 9 hundred pages of testimony that's been posted on 10 the web. And we've looked at that testimony and 11 find it relevant to our case. 12 It discusses the development of 13 the Facebook website, the design features, both 14 past and present of their website, indication of key witnesses and documents and staff, certain 15 16 evidence like laptops, et cetera. So we know that's relevant. 17 And Cross Atlanta we believe would 18 be relevant as well because it relates to 19 20 certain applications on the website regarding -you know, it would -- that would be involved in 21 22 our case as well. 23 THE COURT: What about the 24 suggestion that Judge Farnan has already

reviewed this request for relief and set forth 1 2 an alternative procedure in that you're not 3 fully complying with that procedure for getting 4 this type of information? 5 MR. ANDRE: The alternative 6 procedure, Your Honor, was coming to Your Honor 7 with these requests. I actually brought this up at the end of the hearing saying that, you know, 8 9 we still have one issue that was not related to 10 the source codes, but these documents in 11 particular. 12 He specifically said that we could 13 bring that up with Your Honor with a new 14 procedure that he's instituting for all new 15 discovery disputes. And his order was very 16 specific as well about the course of non-case 17 dispositive motions and referred them to Your 18 Honor. 19 So I think what Judge Farnan was 20 talking about and the way he explicitly said 21 that was we could bring this up during this 22 procedure. 23 THE COURT: Okay. Ms. Keefe or 24 Mr. Caponi, you want to respond?

1 MS. KEEFE: Your Honor, obviously, 2 we disagree. We think that what happened --3 this is actually -- all of these issues are 4 disputes that the parties have been having since 5 the very, very beginning of this case in terms of what is the extent of discovery that's 6 7 allowed by the infringement contentions that Leader has provided thus far. 8 9 And we've been in front of Judge 10 Farnan twice on the same issue. And what Judge 11 Farnan did was he said, Okay, guys. I hear both 12 of you and I am going to come up with a 13 compromise. At which point he instituted this 14 procedure whereby we would give them a list of the source code modules. 15 16 They would pick a reasonable number. They would be reviewed. 17 18 And based on, you know, that 19 review, we would be able to narrow the case down 20 through the infringement contentions to what was 21 truly relevant. 22 Mr. Andre did, in fact, raise the 23 issue of the related or unrelated litigation at 24 the end of the hearing. And what I said to

Judge Farnan was, Your Honor, this relates 1 2 exactly in the same way that the technology documents do. We can't possibly know what's 3 4 related and what is not until we know what the 5 technology is. At that point, the judge 6 7 reiterated that he was denying all of the motions and that we were to go forward on this 8 9 new procedure. 10 I then raised the fact that we had 11 a completely different issue, which was a broad 12 spectrum response and should we bring that 13 before Judge Farnan or should we bring that 14 before Your Honor, because he was deferring future issues to you. And he said future issues 15 16 will go in front of Judge Stark. 17 He did not say we can readdress 18 all of the issues that had come before. 19 had been denied in favor of the staggered 20 approach that he put in place. 21 And that staggered approach makes 22 sense because it's all about figuring out what 23 is the relevant part of Facebook's website 24 that's at issue. And, therefore, what parts of

other litigations may or may not be relevant. 1 2 THE COURT: Okay. Mr. Andre. 3 MR. ANDRE: Your Honor, I disagree 4 completely with Ms. Keefe's characterization of 5 what Judge Farnan ruled on and what he stated. 6 He actually stated he denied all 7 motions as moot. It says it on Page 34 of the transcript. And then he -- basically he wants 8 9 to defer all future discovery to Your Honor to 10 handle these. 11 The fact of the matter is Facebook 12 has been complaining all along that they don't 13 understand the scope of the case. So what we've 14 done now, we've identified specifically, I don't know if you call them source code modules or 15 16 data files, we've identified ones that we were 17 interested in looking at at this point. 18 So they know what we are looking at to be relevant any way, so they know what 19 20 documents they can produce with the previous 21 litigation. 22 It's a little bit different, 23 because I know with the Connect U case, one of 24 our positions is they copied the White paper we

published. And they were able to design and 1 2 develop their website based on that White paper. 3 There's nothing unclear about 4 that. I've looked at this testimony and read it 5 myself, and it's very clear that they talk about 6 how they designed and developed the website and 7 how they were able to code the entire thing in two weeks. Or less than two weeks in some 8 9 cases. 10 So we know that's relevant to our 11 willful case, regardless of Ms. Keefe saying, We 12 don't know what the technology is. You know, 13 we've been hearing that song and dance since day 14 one. So the information that's in these 15 16 previous litigations and like an olympic universe of information we're entitled to. 17 18 There's absolutely no reason not to give it up 19 at this time. 20 THE COURT: Ms. Keefe, do you want 21 to add anything regarding why it wouldn't be 22 relevant, assuming I reach this issue on the 23 merits? 24 MS. KEEFE: Your Honor, this is

absolutely not relevant at this point. They've 1 2 actually -- they have established absolutely no way of knowing that -- sorry. Let me back up. 3 4 They have not established, in any 5 way, that we had access to any White papers or documentation, and that they have and we've 6 7 answered interrogatories that have absolutely said that we did not. And so it is not relevant 8 9 at this point. 10 And the only thing that they've 11 otherwise been saying is that these litigations 12 are somehow related to the technology of the 13 Facebook website. And that's exactly what this 14 staggered approach is designed to do is to try 15 to figure out what is that technology that 16 they're using. The fact that they've identified 17 some modules that they want to look at does not, by definition, make them relevant. 18 19 In fact, they haven't even viewed 20 those modules yet. They're scheduled to do so 21 later that week. 22

We would ask that the Court continue with the parties on the course set by Judge Farnan, and that they be forced to look at

23

24

the source code, come back and tell us what's 1 2 really at issue in this case. And we'll go forward from there. 3 4 THE COURT: All right. And, 5 Mr. Andre, whether it's up to me independently 6 or whether Judge Farnan has already decided that 7 this is the way to proceed, it sounds like a reasonable way of proceeding, why should I not 8 9 hold you to going and reviewing some of this 10 source code and other materials and then seeing 11 if you can make a showing as to the relevance of 12 the other litigation and maybe the other stuff 13 you're seeking here? 14 MR. ANDRE: Your Honor, it's 15 something that we can already show the relevance 16 of at least Connect U, because that has been 17 produced publicly or a hundred pages of it has 18 been. We need the technical documents 19 20 when we get to that part of the brief to 21 actually understand the source code. If you 22 read source code in a vacuum, you can do it, to 23 some degree, but you need the supporting 24 documents, the design notes, and various other

technical support for that source code to get 1 2 full understanding of what's going on there. 3 So, you know, this is nothing more 4 than Facebook from day one they're trying to run 5 out the clock on us. We have a November discovery cutoff in this case. 6 7 And they've been acting like they don't know what this case is about. We've given 8 9 detailed infringement contentions based on 10 public information. We identified the 11 functionality. 12 We gave them screen shots. 13 gave them API calls. 14 It is something that, regardless 15 of what we say, they come back and plead 16 ignorance. We don't know what they're talking 17 about now. 18 They are saying that is not relevant. Well, I know for a fact the Connect U 19 20 testimony is relevant. 21 I can tell you right now what I'd 22 like to use in that testimony in my case in 23 chief, just what I told you about, the amount of 24 time it took them to write the code for the

Facebook website. 1 So there's other information there 2 3 as well. Obviously, the design features and 4 some other identification of documents of 5 witnesses that we would like to get. So I know that's relevant. 6 7 And Ms. Keefe saying that, you know, we don't know what the case is about. 8 9 one has to do is read the patent and the claims 10 and, as Judge Farnan said on multiple occasions, 11 this is not the type of claims that people cannot understand. It's fundamental 12 13 architecture of their website that we believe is 14 infringing and there's no reason to withhold 15 these documents whatsoever. 16 They have already produced them 17 once in the previous litigations. They can do it 18 again. 19 THE COURT: I guess by necessity, 20 we've overlapped now into the second request 21 that Leader makes which is more specifically 22 with respect to the technology for the Facebook 23 website. 24 Is there anything else to add on

that request that we haven't already addressed? 1 2 Mr. Andre, first. 3 MR. ANDRE: Your Honor, none other 4 than there's no reason not to produce it. 5 only reason they put forward is they said Judge Farnan didn't order it. 6 7 They have been dodging their discovery obligations since the beginning of 8 9 this case. Just because a judge doesn't order 10 it, that doesn't mean you don't produce it 11 pursuant to the Federal Rules. 12 So our position there is that we 13 identified the module or the data files, 14 whatever you want to call them. We want the 15 supporting documents for those so we can make 16 heads or tails of the source code. And there's 17 absolutely no reason not to produce them. 18 THE COURT: And when is it that 19 you're scheduled to go look at something? 20 MR. ANDRE: We have our expert 21 witness coming in this week to look at it on 22 Thursday. 23 THE COURT: And why should I not 24 put all of this on hold, you know, my decision,

you know, for a week or so and get you all back 1 2. after you had the chance to have your expert 3 review those materials that are already arranged 4 to be seen and see what the dispute looks like, 5 you know, a week from now? MR. ANDRE: Well, the expert 6 7 already informed us that he'll need technical documents to actually conclude, you know, make 8 9 his evaluation of the source code. 10 THE COURT: So are you saying he's 11 not going to be able to get anything productive 12 done on Thursday if I --13 MR. ANDRE: No. We'll get some 14 productive information done. There's no doubt 15 about it. 16 He's going to be able to go in, 17 see how the source code is set out because the 18 list they gave us was -- it was supposed to be a 19 map of the source code. They didn't give us a 20 map. 21 They gave us a list of 400 titles, 22 some of them as ridiculous as this is Letter R 23 or the Letter N or entitled documents. So 24 they're not descriptive in nature and they were

1 not a map at all. 2 But we decided we're going to work 3 with this, because we know what their approach 4 is, try to push discovery out as long as 5 possible and run out the clock on us. 6 What the expert is going to do is 7 go in and see how the source code is structured. He's going to do a lot of information from that 8 9 first review. 10 He's not going to be able to get a 11 conclusive call one way or the other on the 12 source code until he actually sees the support 13 documents. 14 THE COURT: Ms. Keefe, I want you 15 to have a chance to address anything further 16 with respect to the technology documents, but 17 also articulate for me what, if anything, I 18 would be gaining particularly in terms of 19 clarity of this issue if I were to defer ruling 20 for, say, a week until after the expert for 21 Leader has had a chance to do whatever he or she 22 is going to do on Thursday. 23 MS. KEEFE: Absolutely. you, Your Honor. 24

I think, first off, this goes back to the notion that this is -- we're in a new kind of place with this discovery. We're in a staggered form.

Yet their argument has always been -- we understand that ours has always been that we don't. Judge Farnan specifically accepted both parties' position, and in fact, he actually said, you know, "Okay. Leader's given enough at this stage of the case, but not enough to let them go full bore into Facebook."

And that's why he created something that would protect both sides, their interest at looking at some information, but our interest in protecting what's most important to us, which is our code. And the fact that the site and the company are essentially massive, and therefore, we need to be able to make sure that only what's relevant is what's going on.

The judge then said what -- you know what I think -- this is another quote.

"What I think we need to do to try and make this a little bit informed and to let it evolve a little bit, I think I would like Facebook to

produce that category list" -- which we did. 1 "Then I'd like to see how reasonable Leader is 2. in pulling that list. Does that make sense?" 3 4 So we gave them a list. They 5 picked their list. 6 We thought it was a little bigger 7 than it should be, but we denied to -- not to raise that fight. Now, we're producing that 8 9 material. Then they -- they haven't even seen 10 the code and yet they're telling me that they 11 can't understand it. I think that they will find that 12 13 the code actually is quite understandable. I am 14 not a computer scientist and I'm able to understand Facebook's code by looking at it. 15 16 This isn't a company that makes 17 software that they then sell, so there aren't 18 things like user manuals going around. Facebook 19 crafts little keys. 20 It goes up on the -- as the 21 website and it changes over time quite a bit. 22 So I think Your Honor's approach in going back 23 to what Judge Farnan had originally intended is 24 a good one, because I think they'll find when

they actually do review the code that they will understand what they're looking at. And they'll then be able to narrow their request as everyone intended this process to do in order to only get at that which they really need and not the things that they don't.

Regardless of what Mr. Andre says, we do not still actually have a good grasp on what they are accusing of infringement. And that's why this process was set in place.

So, please, Your Honor, don't put the cart before the horse. Have them review the code. They're set to do so this week.

And then Mr. Andre and myself can talk about what they saw or didn't see, why something made sense or didn't make sense.

Judge Farnan also anticipated this happening and he said that if, in fact, once we went through process number one, we couldn't agree on what was happening, he talked about the possibility of bringing experts in from both sides to tell him why they would want more than has been already given, or an expert on my side to say why they don't need what's going on.

So that was another part of Judge 1 2 Farnan's entire approach to this stage-in-tiers discovery. We're not trying to stall things. 3 If the other side, if Leader 4 believes that we need more time, we're 5 6 absolutely happy to go to the Court and get 7 discovery extended. This is the position and this is what Judge Farnan put in place. And 8 9 we'd like to see that through. 10 THE COURT: Okay. Let's move on 11 to the final topic, which is Leader's demand or 12 request that there be additional substantive 13 responses to the Request for Admission. 14 Mr. Andre, would you address that 15 for me? 16 MR. ANDRE: Yes, Your Honor. 17 Essentially what's happening, we've filed a very 18 specific set of Request for Admissions. 19 We're not asking him to admit 20 infringement or anything of that nature, but we 21 did ask them to make certain admissions 22 regarding their technology. And instead of 23 giving any substantive responses, they went 24 through and made objections that were so far off

the reality that it would be impossible to craft our RFA that would be answerable according to Facebook. So they objected to all the RFA's and then denied it based on those objections.

I mean, just to give Your Honor some examples, if you look at the Request for Admission 22 where it says admit that Facebook's website stores information about users in one or more databases. The objection was that was vague and ambiguous.

They said the word stores information and users are vague and ambiguous, and therefore, they denied it based on that.

Another one that was a good example is RFA 28, admits that Facebook's website is hosted from servers located in the territory of the United States. Objection to the word hosted and denied the RFA based on that.

You know, counsel can play these games of not wanting to admit any RFA. And admitting RFA's or not are discovery tools that lawyers don't like to use or to answer. But there has to be some substantive responses other

than denials based on objections. 1 THE COURT: And what about the 2 3 proposals that they offered to try to get you 4 more information, either they would answer an 5 interrogatory giving their explanation for their 6 denials or you would serve new RFA's? 7 MR. ANDRE: Well, the new RFA's would -- they wouldn't commit to the fact. 8 9 we gave RFA's with specific definitions, they 10 asked -- when they asked us to define 11 essentially every word in the RFA. If we were 12 to give those specific RFA's, would they even answer those? 13 14 They'd object to them according to 15 We couldn't get that locked in, one way 16 or the other. They said you try to refile them 17 and make them clear for us. Once again, a stall 18 tactic. 19 It was -- obviously, Ms. Keefe 20 would love to ask for extension of discovery and 21 lose our trial date in June of next year. 22 The other alternative about interrogatories, I believe it was conditioned 23 24 upon the fact that if that's the case, that

would use up all of our remaining 1 2 interrogatories. We have a limited number of 3 interrogatories in the case. THE COURT: What if we amended it 4 5 so that it wouldn't count towards your interrogatory limit, or alternatively, required 6 7 them to respond very quickly to a new set of RFA's. 8 9 Would either of those approaches 10 solve the problem? 11 MR. ANDRE: That would be fine, 12 Your Honor, if they responded substantively and 13 not with just objections. Again, that would be 14 fine with us. 15 THE COURT: All right. Ms. Keefe. 16 MS. KEEFE: Well, I mean, Your 17 Honor, I can't -- I'm not even sure where to 18 start. Let me back up. 19 As far as the interrogatory 20 proposition goes, our proposition to them was 21 that we would answer an interrogatory, so long 22 as -- and we wouldn't count it as each one being 23 a separate interrogatory for each RFA that had 24 to be responded to so long as they would give us

the same courtesy. If, after we served RFA's on 1 2 them, a single interrogatory would count. So it wasn't at all that the rogs 3 4 would be used up. It was exactly the opposite. 5 It was that both parties would 6 agree that the rogs would not be used up and 7 they would treat interrogatories to define why the RFA was answered that way in a similar 8 9 fashion. So we'd actually be extremely content 10 if Your Honor said, All right. You're allowed 11 to serve an interrogatory asking for the reasons 12 for the denial. We will answer that 13 interrogatory and not count it against their 14 total. 15 So long as when we serve RFA's on 16 them and then serve a similar single 17 interrogatory, it doesn't count against us. 18 That's the proposition and we are still willing 19 to do that. 20 THE COURT: Let's stop there, 21 because my understanding is Mr. Andre would be 22 content with that. Am I right, Mr. Andre? 23 MR. ANDRE: Your Honor, that would 24 be fine as long as, you know, the -- one of our

concerns is that, you know, we sent a very 1 limited world of RFA's to them and there is no 2 limit on RFA's. 3 4 Even though we requested it in our 5 Rule 16 conference, there are no -- in our initial conference with the counsel. Then we 6 7 stipulated to the fact that there would be no limits on RFA's. 8 9 So we are a little bit concerned 10 by the fact that we may get 250 RFA's from them. 11 It would be so unduly burdensome for us to have 12 to answer them on a interrogatory basis, that 13 that would be our only concern. 14 Maybe if counsel would agree to 15 limit the number of RFA's in the case in total, 16 that would be a way to alleviate that concern. 17 THE COURT: All right. I'm not 18 going to require any limitation on RFA's. 19 At this point, I find I've got at 20 least a full-time job just dealing with the 21 discovery disputes that are in front of me. I'm 22 not going to worry about ones that might come 23 down the pike. 24 But if they do, obviously you all

know how to raise a discovery dispute with me. 1 2 With respect to the RFA's, I am going to rule by ordering that Facebook provide in the form of 3 4 interrogatory response. I guess actually I need 5 to rule, Mr. Andre, that Leader serve an 6 interrogatory that won't count towards your 7 limit whereby you ask for Facebook's basis for the responses to the RFA's. 8 9 If at some point Facebook wants to 10 serve the same interrogatory for the same 11 limited purpose on Leader, that interrogatory also will not count towards whatever 12 13 interrogatory limit is otherwise in place. That 14 takes care of that issue. And let me give you my ruling with 15 16 respect to the first two issues that Leader has raised. And there I'm going to deny without 17 18 prejudice to -- I'm going to deny Leader's 19 request at this time for any further -- for any 20 production of documents from other litigation or 21 production of additional technical documents. 22 I want to let the situation that's 23 in place play out, but only for a very limited 24 additional time. And specifically let me tell

you what I'm looking for.

My understanding is that Leader's expert is going to be reviewing source code this Thursday the 16th. After that review is complete, the parties are to meet and confer and discuss, at a minimum, these two discovery requests that Leader presented to the Court today.

If you're not able to resolve amicably those two disputes, then by the end of the day next Thursday the 23rd, I want a single letter on behalf of both parties not to exceed a total of five pages that sets out for me what remains in dispute with respect to those two requests and what each side's proposal is for how I should resolve them.

And I will get back to you after I get that letter as to whether I need further information from you and whether I need to schedule a call or if I'm able to just resolve it based on the letter.

I don't want any reargument at this time, but I do want to make sure everybody understands what I have ruled here.

1
                     Any questions, Mr. Andre?
 2
                     MR. ANDRE: No, Your Honor. Thank
 3
       you.
4
                      THE COURT: Okay. And Ms. Keefe?
5
                     MS. KEEFE: No. Thank you very
6
       much, Your Honor.
7
                     THE COURT: All right. Thank you
       all very much, counsel.
8
9
                     Bye.
