DEATH OF MR. F. L. ALLAN

Headmaster of Wallasey Grammar School for 26 years until his retirement in 1960, Mr. Frederick Leonard Allan, of 14 Garden Close, Wallasey, Wirral. He was born in 1895 and had been headmaster of Wallasey Grammar School for 26 years until his retirement in 1960. He died yesterday at the age of 69. Since leaving Wallasey he had been full time secretary of the incorporated association of headmasters and headmasters’ conference, and was on his way to work when his body was found.

A Cambridge graduate, Mr. Allan taught at Royal Grammar School, Worcester before being appointed headmaster of Heanor Grammar School, Derbyshire in 1929. Five years later he took up his appointment as headmaster of Wallasey Grammar School. From 1941 to 1943 he had held a staff appointment at the War Office.

Mr. Allan was mainly responsible for the formation of the Wallasey Boys’ Club in Oakdale Road, and as a tribute to his work the club was named Allan House after him.

Formerly President of the Headmasters’ Conference, Mr. Allan was awarded the Military Cross in the first world war, and also held the M.B.E.

AT RE-UNION DINNER

Only last week-end he had enjoyed a happy evening with his family. He was a popular and respected figure in the community, and his death at the age of 69 has caused great sadness among his friends and colleagues.

DETECTIVES ARE AFRAID IT COULD HAPPEN AGAIN

APPEAL FOR WITNESSES

Police still want people who saw a stranger near Watts Wood, Purfleet (Essex) recently, to come forward. It is thought they may have information which will help detectives to trace the killer of seven-year-old Kim Roberts, whose body was found in the wood a week ago.

Detective Superintendent James Aaxon of the Scotland Yard Murder Squad, in charge of the investigations, said last night: “We have always been on the look out for any possible leads, and we have received several telephone calls from people who may have seen something unusual.”

He said so far the investigation had failed to bring any definite information to light. The incident, which occurred in a remote area of the woods, was being treated as murder, and inquiries were continuing.

The body of the young girl was found in a shallow grave near a stream, and police are now trying to establish the exact circumstances of her death.

BOY, 10, FALLS 18FT. TO LAWN

From Window At West Kirby Home

A ten-year-old boy living at the Children’s Convalescent Home and School, West Kirby, fell 18 feet onto the lawn in front of the house last night.

It was dark and nobody saw it happen, and we think he probably climbed out of the dormitory window and onto the flat roof over my office, said Mr. W. H. Reed.

Professor Kenneth Muir.
Death Of Mr. F.L. Allan

Headmaster of Wallasey Grammar School for 26 years until his retirement in 1960, Mr. Frederick Leonard Allan, of 14 Garden Close Cassiobury, Watford, Herts., died yesterday at the age of 69.

Since leaving Wallasey he had been full time secretary of the Incorporated Association of Headmasters' Conference, and was on his way to work when he had a sudden collapse.

A Cambridge graduate, Mr. Allan taught at Royal Gramar School, Worcester before being appointed headmaster of Heanor Grammar School, Derbyshire in 1929. Five years later he took up his appointment as headmaster of Wallasey Grammar School. From 1941 to 1945 he had held a staff appointment at the War Office.

Mr. Allan was mainly responsible for the formation of Wallasey Boys' Club in Oakdale Road, and as a tribute to his work the club was named Allan House after him. Formerly President of the Headmasters Conference, Mr. Allan was awarded the Military Cross in the first world war, and also held the M.B.E.
Important to all voters—especially those under 30

Have you got a fridge, or a wasabi machine or a car? Or do you hope to have one? Are they luxuries? Or do they just make life more comfortable? Today, when you feel something made of steel, it is ready. Because the steel industry is efficient, not muddled and tangled by red tape and form-filling. The prices you pay are realistic. The quality is improving all the time.

Because the steel industry is making better steel more efficiently. The taxes you pay are much lower than they would be if it were not that efficient companies pay enormous taxes:

Stewarts and Lloyds, for instance, last year paid as much tax as over 170,000 average workers.

Let them nationalize steel and you risk all this. Nationalization means complaints, a slowing down, shortage and waste.

Stand up for Britain’s free steel industry.
