

Agriculture and Food Security.

Inclusive market systems that improve productivity, incomes, and nutrition

Regions: Asia | Europe and Eurasia | Latin America and the Caribbean | Africa | Middle East and North Africa

SHARE

At Chemonics, we are committed to working together to find and implement innovative projects that achieve development impact. That's why we build strategic partnerships that promote agricultural development, economic growth, and food security. As a result, local communities are able to enhance resiliency, increase incomes, and improve nutrition. Our projects address food security for vulnerable populations, ensure improved livelihoods for smallholder farmers, and provide stable access to nutritious food. Our successes are rooted in technical and innovative approaches. We've connected rural farmers with mobile banking services, and we've identified and supported local agriculture luminaries to guide sustainable improvements throughout the sector.

Nutrition

To improve nutritional outcomes, we must use an integrated approach that addresses the many pathways that lead to undernutrition. We need multi-sectoral approaches that incorporate nutrition-specific and nutrition-sensitive interventions as well as social and behavior change. Our approach to reducing malnutrition and advancing dietary diversity begins at the community level, starting with the first 1,000...
