FRIENDS OF PAUL CEGLIA ISSUE PRESS RELEASE

Click here for "Friends of Paul Ceglia" press release. Exposes more C.I.A./NSA ties to the Facebook corruption of the U.S. government, or vice versa. (James P. Chandler advised the C.I.A., NSA, Patent Office (David J. Kappos), Justice Department (Eric H. Holder, Jr.) and the White House simultaneously, according to Washington insiders who wished to remain anonymous.) (Remember: Edward Snowden revealed substantial Facebook collaboration with the NSA/CIA in PRISM.) Ceglia is the victim of a political hit job to protect Facebook in who all of the judges and U.S. Attorneys have investments and relationship conflicts. We suggest you send this press release to decision influencers you know. The "Court of Public Opinion" may be the only court that can stop the evident corruption in our legal system. After all, these judges collect their paychecks from "We The People." Why are we continuing to pay for this abuse of power? Click here for Wellsville (NY) Daily Reporter coverage.

Click here to read the just published forensic results that support Paul Ceglia and prove unequivocally that the Ceglia-Zuckerberg contract is genuine (NOT a forgery, as Eric Holder's minions concocted). One of the forensic experts cited is LARRY F. STEWART, former director of the U.S. SECRET SERVICE FORENSIC LABORATORY.

—The newly-leaked Chandler notes refer to the Central Intelligence Agency (‘C.I.A.’) and a ‘National Security Academy’ sponsored by Chandler’s ‘NIPLI’ (National Intellectual Property Law Institute) for which there is ‘no info. on www.’ This is consistent with the experience of the AFI university law research librarians who could find nothing on the World Wide Web about Chandler’s activities.

"Paper presented to C.I.A." Chandler’s notes disclose a C.I.A. National Security Academy that he is promoting for which there will be no public accountability.

"Chandler has faith in the government."

This affirmation of faith from a law professor emeritus of George Washington University, member of President Clinton’s National Information Assurance Council, and author of the Economic Espionage Act of 1996 and the Federal Trade Secrets Act, would certainly lead a hearer to believe that Professor Chandler will follow the very laws he helped create.

"JPC [James P. Chandler] enjoys his life in Montgomery County." Chandler appears to be making his physical proximity to the proposed IBM/The Eclipse Foundation facilities in Montgomery County as a selling point. This note smacks of nepotism.

C.I.A. AND THE FACEBOOK CARTEL ARE HEAVILY INVESTED IN CLOUDERA "BIG DATA" STORAGE. it did not take AF1 investigators long to discover deep connections among these Chandler notes, the C.I.A. and the Facebook Cartel. Cloudera’s $1.2 billion in investors includes the C.I.A. (IN-Q-TEL), ACCEL PARTNERS, MERITECH CAPITAL PARTNERS and T. ROWE PRICE. These In-Q-Tel investing partners are the largest of Facebook’s investors. ACCEL Partners (James W. Breyer) is Facebook’s largest, Meritech was the sixth largest beneficiary of insider trading and trade secrets are no longer in doubt.

These misappropriations of Leader’s invention and trade secrets are “founded by leading experts on big data from Facebook.” These misappropriations of Leader’s invention and trade secrets are no longer in doubt.

THE 2002 SCENE OF THE CRIME THAT BECAME FACEBOOK, AND THE REST OF THE "SOCIAL" WORLD

MAR. 12, 2015 UPDATE —Newly leaked evidence from 2002 completes the puzzle of events that laid the foundation for the Phoenix-like rise of ‘social’ technology from the ashes of foundering ‘open source’ initiatives—all based on Leader Technologies’ invention.

Starting in late 2001, Leader directors JAMES P. CHANDLER and JAMES E. FREEZE secretly repurposed Leader’s innovations and business plans for their EUROTECH, LTD. (aka Eurotech, SpA) colleagues recently retired from NASA, NSA, Navy and Department of Energy. They used a federal research program as their vehicle to gain custody of Leader’s source code for IBM/ Eclipse, the NSA and Fenwick & West LLP—all in the name of national security, of course. The obscene irony here is that Chandler wrote the Economic Espionage Act of 1996 and the Federal Trade Secrets Act. He was circumventing his own laws. He then leveraged his Harvard relationships to press his agenda for politics, law, technology, security and race relations—all hidden from public view and accountable to no one.

This ‘CRADA’ (Cooperative Research and Development Agreement) gave Leader access to Department of Defense cryptographic programs—which Chandler and Freeze repurposed using Leader’s homeland security business plans for Battelle Memorial Institute, TELIX and EUROTECH, aka KRYPTO.COM, aka MARKLAND TECHNOLOGIES, aka TECHNOX, aka ACCELPARTN, aka EDR TECHNOLOGIES, aka THE WHITE OAK GROUP which has over $1 billion in defense contracts currently. All this is in addition to the repurposing by IBM, XEROX, FACEBOOK, FENWICK & WEST LLP, THE ECLIPSE FOUNDATION and their ‘open source’ devotees. (Read: We like open source software, as long as somebody else spent the money to create it.)

Leader spent over $10 million and 145,000 man-hours. That was a pretty good start for these thieves. Chandler described these activities as a “coup” to Maryland development officials in a secret meeting revealed by meeting notes from that Sep. 02, 2002 meeting just leaked by a whistleblower. Americans For Innovation: SENIOR BILL CLINTON ADVISER WORKED NO-BID PATENT OFFICE CONTRACTS WHILE SHUFFLING INVENTION

3/22/2015 — AFI received stunning new evidence from a whistleblower just as news of Hillary Clinton’s secret email system broke. Notes of secret conversations from Aug. to Nov. 2002 meetings provide more proof of law Professor James P. Chandler’s collusion with the Patent Office, Justice Department, IBM and even Montgomery County, Maryland, to steal Leader Technologies’ invention—his client.

BRAGGADOCIO

Equally stunning is the level of bragadocio and self-interest exhibited by the professor. For example:

“We do valuable work for our country and it is important for that to be understood and acknowledged”

Chandler claimed that the Patent Office deferred to him for decisions on the “whole intellectual property history [of the United States from] 1790 to present . . . “JPC [Chandler] made tentative decision to begin with the TM [trademark] collection - 42 classes... Patent Classes - many many more.”

“Where US policy is being made on an I.P. [issue] - Chandler generally has a say in it.”

“DO NOT GO PUBLIC with this.”

“Chandler hasn’t been in touch with Senators, Congress, etc. [As an Institute, we cannot lobby, can only educate]... if we get it in place - they want to contract back to do the [patent prior art] searches... this is a huge opportunity for the State/County (kind of a ‘coup’ of sorts) . . . the USPO”

These notes provide hard proof of Chandler’s promotion of “IBM Incorporating Members, Business Model – different from current business model... consider some approach to partnering with IBM.” According to IBM’s 2001 Annual Report, they funded The Eclipse Foundation with over $40 million on Nov. 29, 2001.

Chandler even promotes IBM and Eclipse involvement to the county from whom he is seeking special favors so that he can establish a facility for the USPTO that they will contract back to him. Chandler admits he is not allowed to lobby as an Institute, but he is clearly doing just that in these meetings.

Chandler dropped the names of numerous influential people, including Bruce Lehman, then current commissioner of the Patent Office, and Doug Duncan, the well-connected Democrat county executive. Chandler alludes to his mastery over Congress and the Courts, stating “NIPLI and Chandler drafted the [Federal

WILL HUMANKIND EVER LEARN? Facebook’s Orwellian doublespeak about property and privacy (theft) merely repeats the eventual dehumanization of the individual under MAO’s Red Star, Stalin’s SOVIET Hammer & Cycle and Hitler’s NAZI Swastika. Respect for the inalienable rights of each individual is a bedrock value of democracy. The members of the Facebook Cabal abuse this principle at every opportunity. They evidently believe that they deserve special privileges and are willing to lie, cheat and steal in order to treat themselves to these privileges.

ASK CONGRESS: PASS THE INVENTOR PROTECTION ACT!

Trade Secrets Act). In that same exchange he alludes to his mastery of the Justice Department as well where his close confidante, Eric H. Holder, was then assistant attorney general and being advised by Chandler on trade secrets, as Chandler says in these notes.

Exploratory conversation with Boston Scientific figured prominently in Facebook’s 11th hour introduction of dubious on-sale bar evidence in Leader v. Facebook. Those meetings were arranged by Chandler, as these notes confirm. The notes even detail Chandler’s travel schedule to Boston. Lynne Mattice was the chief security officer at Boston Scientific and a Chandler colleague in NIPLI.

Hindsight shows that Facebook was evidently coached by Chandler on how to most effectively blindside Leader with prior art arguments at trial in order to give crony Judge Stark the excuse he needed to support the bogus on-sale bar verdict.

Judge Leonard P. Stark blocked Leader from being able to interview Boston Scientific witnesses once the Boston Scientific evidence emerged on the eve of trial.

Tellingly, Chandler mentioned the name of former Patent Office commissioner, Bruce Lehman. Lehman disclosed in his Senate testimony that Lotus Corporation and Adobe Systems are his former clients. Lotus’ founder, Mitch Kappor, started “Project Chandler(see No. 33)” on Oct. 21, 2002 ostensibly to disseminate open source software (Leader Technologies’ invention). Kappor appears to have become one of the “ombudsmen” Chandler sought in these conversations.

Even more telling, according to The Eclipse Foundations own meeting minutes, they released version 1.0 of the Eclipse “open source” software on Mar. 6, 2002—the same moment that Leader Technologies placed its source code in Professor Chandler’s and Fenwick & West LLP’s custody, ostensibly as a part of their Lawrence Livermore National Laboratory (LLNL) project escrow. See Findings of Fact and Timeline.

George Will said Sunday of the Clintons that they “could find a loophole in a stop sign.” The individuals just exposed by this whistleblower will start digging for their loopholes, but they’re going to need some pretty deep holes. Rarely do such insider notes as this surface, so the opportunities to corroborate this evidence are many.

that AFI has engaged the services of experienced law librarians from a major university who were quite frustrated by the lack of evidence about all these Chandler activities, which were clearly many, and all done in secret. Their conclusion was that the web itself was intentionally cleansed of information about him and his many associations, just like it has been for John P. Breyer, the father of Accel Partners LLP's James P. Breyer, Fenwick & West LLP's client in 2002 when the theft of Leader Technologies' code occurred.

It appears that we finally have a date for the theft of Leader's invention—Mar. 6, 2002.

According to IBM's 2001 Annual Report, they funded THE ECLIPSE FOUNDATION with over $40 million on Nov. 29, 2001. IBM's chief inside intellectual property counsel was MITCH KAPPO, James P. Chandler, III, was IBM's chief outside intellectual property counsel. MITCH KAPPO had cashed out Lotus via IBM and maintained strong ties. Kappos was appointed director of the U.S. PATENT OFFICE in an unusual recess appointment by PRESIDENT BARACK OBAMA on Aug. 07, 2009—without Congressional approval. Graphic: IBM 2001 Annual Report.

Yikes Batman, Lynn Mattice looks like a gangster and Kappor looks like he's already in handcuffs. Probably just me, but Kappor and Kappos differ in only one letter. Wouldn't that be poetic if we find out they are related? I cannot discover much of anything about Kappos' IBM days, his biographies and writings for his first 20 years at IBM are nowhere to be found, just like Chandler's. No doubt the devil is in those details and that is why they are missing.

David kirkpatrick set this up on facebook

The strategy wasn't a secret. Each morning at a meeting of UBS's interest-rate-derivatives desk in Tokyo, Mr. Hayes would change his status on his Facebook page to reflect his daily desires for Libor to move up or down. Originally, the purpose of the feature was to allow users to inform their friends. This feature first became available in September 2006 updates were followed by the "What are you doing right now in 2009, the question was changed to "What's on your mind? (move it up or no move it down ) Facebook than added the feature to tag certain friends (or groups, bankers lawyer Shady traders etc.) The ponzi scheme had everything it needed, Larry Summers + President Barack Obama Sean Parker Facebook extortionist James W. Breyer David kirkpatrick they all know how facebook was stolen.

LIBOR: widespread regulation a tepid stance on addressing new practices. However, even this has been met with reticence, such as RBS' recent attempt to limit Forex fixings. They say the entire chain of events cannot be viewed as having a definitive beginning and an end, as nobody truly knows when Libor-fixings started, but David kirkpatrick and Henry Broget knew about libor fixing back in 2004 David kirkpatrick in an email said he was going to meet Mr. Hayes in london, about libor fixing and he did, David kirkpatrick also did not say what happen at the meeting but i got a reporter to ask him about it and he says he did not find a thing but this is crap David kirkpatrick Henry Broget said he knew how to do support of democratic principles. They promise to conduct themselves in a manner that instills confidence among the citizenry in the rule of law and the judicial system. These promises appear to be meaningless. Our Mission

American citizens must fight abuse of the constitutional right for authors and inventors to enjoy the fruits of their inventions, as a matter of matter of basic property rights and sound public policy. Otherwise, instead of innovation, creativity, genius, ideas, vision, courage, entrepreneurship, respect, property, rejuvenation, morals, ethics, values, renewal, truth, facts, rights, privacy, solutions and judicial faithfulness.

... our society and economy will be dragged down (and eventually destroyed) by copying, infringement, thievery, counterfeiting, hacking, greed, misinformation, exploitation, abuse, waste, disrespect, falsity, corruption, bribery, coercion, intimidation, doublespeak, misconduct, lies, deception, attorney "dark arts," destruction, confusion, dishonesty, judicial chicanery and lawlessness.

If we do not speak up, impeach derelict judges and imprison corrupt attorneys, we cannot possibly hope to start fixing the current ills in our society. Without justice and respect for private property, democracy has no sure foundation.

Current Editorial Focus

We are an opinion blog that advocates for...
addressed. Leader claims that the grand scheme here was for Chandler to funnel Leader’s code to the Eclipse Foundation and then make it open source.

SO WHERE IS LEADER’S CODE?! Seriously. Where is there even a smidgen of evidence to suggest that any module, ANY MODULE, from the Eclipse Foundation even resembles Leader’s code. It’s open. It’s out there. Sooooooooo!!! Until this blog can address this fundamental, obvious question, this is all a joke.

What dog to you have in the Eclipse hunt, Michael? If Eclipse is on the up and up, as you imply, then you’re getting all hot and bothered for no reason. The truth will win out. But you forget, again, that Leader already proved that the prolific Eclipse user Facebook infringes Leader patent on 11 of 11 counts. I realize that is the elephant in the room that your client keeps trying to obscure. Whoops.

Rain, you’re totally missing the point. At trial, Leader demonstrated that Facebook infringed on 11 claims (out of many more that were part of the Leader patent). This had absolutely nothing to do with the Eclipse Foundation, which has hundreds of members. The point that I am making above is that this blog has magically invented the notion that IBM/Chandler/Patent Office/US Government/CIA/You name it conspired to steal Leader’s code. It’s just ridiculous.

The proof is in the pudding. Again—and this is so simple—this blog claims that the Eclipse Foundation was formed to exploit Leader’s code and make it open source. Do you understand what “open source” means? It means that it’s accessible and usable to anyone. It’s in the public domain. Show me a single example where Leader’s code ever surfaced in the public domain. THAT is why this blog is so ridiculous. When it comes down to hard proof, there is nothing there. Instead, this blog simply libels and besmirches the reputations of countless individuals. It’s pretty disgusting when you think about it. That’s my dog in this hunt.

Michael, then allow Leader to examine Zuckerberg’s 28 hard drives that magically appeared 2 days after Facebook denied their existence to the U. S. Circuit Court of Appeals. Or is that another ‘elephant in the room’ you want to ignore?

4. nothing there
5. libels and besmirches
Facebook attorneys aren’t anything if not predictable. You attorneys and your paid astroturfing goons are the ONLY people defending this corruption. You comments about Leader’s patent: (1) proves you are a patent litigation attorney since no layman has a clue what you are talking about with regard to the total number of claims in a patent, and (2) if you were truthful, you would also tell the reader that Leader did assert more than 11 claims; you would tell them that the judge is the one who asked Leader to narrow down the number pursued at trial for the sake of “judicial economy” and to shorten the trial. You are caught again in your misinformation.

The conduct of the people identified in this blog condemn themselves with their immorality. Perhaps their reputations are not well deserved. Money can buy many things, but not integrity. John Adam said it well, “Facts are stubborn things.”

Rain is correct, in Leader’s COMPLAINT against Facebook, Leader asserted all 35 claims of U.S. Patent No. 7,139,761.

If we were true to Michael Krecht’s Astroturfing modus operandi, we’d conclude with comments like “he just pulled that argument out of his nether parts” and accuse him of being ‘nothing but a paid shill’ and a ‘nut case;’ But we won’t do that.

Reply

Michael Krecht March 20, 2015 at 12:57 PM

Rain, you understand nothing about patent law. Of course Leader asserted all 35 claims at the pleading stage. The company was trying to cast as wide a net as possible.

The fundamental question remains unanswered. Where is the Leader code in any Eclipse open source module? Until Leader answers that question, this is all wild speculation and innuendo. Facts are indeed stubborn things.

Mr. Krecht, call me all the names you like, it only further proves my point about you and your ilk. This blog has presented volumes of solid evidence, unlike you. As was mentioned earlier, it was the judge who asked Leader to reduce the number of claims, but you knew that. You are pretending not see and understand. The record shows this is a popular Facebook attorney tactic. And by the way, you used two more Astroturf terms in your latest comment:

1. you understand nothing about patent law
2. wild speculation and innuendo [predictable, accuse others of what you are doing]

That’s 11 Astroturf epithets in your last three posts. Which continuing education class was that at your Crooked Law Firm? The worst thing this country has done is permit national and international law firms. You need to disappear the way of Andersen Consulting and Arter & Hadden.

Not sure about Michael Krecht yet? As pointed out earlier, “you attorneys”, is a good clue. One might even suggest he may be associated with the firm Gibson, Dunn & Crutcher! Just researching that firm, you will find phrases used about them, “GDC abused the discovery process”, “GDC impeded fair discovery by interjecting a “high number of obstreperous and excessive objections and interruptions”. Also, “was obstructive and manipulative, in violation of the rules of discovery.” Along with, “GDC’s conduct was highly reprehensible.” Then, “None of the conduct at issue was accidental; GDC acted with actual malice!” (emphasis added). By the way, those are the words of the Judges of the Supreme Court of Montana in 2007! Stated elsewhere, “The court found
that the firm, which employs about 800 lawyers, acted with a "high level of misconduct" and is using the courts as a "tool" in an attempt to intimidate."

Then there is the Chevron case where GDC attorneys were sanctioned again for "harassment of a witness" in 2011!

The time frame for all of this is just before and during the Leader v. Facebook and ongoing with the Cegla trial.

Anyone see a pattern? These are not the only cases about GDC.

Michael Krecht why don’t you stop with the “wild speculation and innuendo” and produce the original code that the Eclipse Foundation started with! “The proof is in the pudding. Again—and this is so simple” “Facts! (emphasis added) are indeed stubborn things.” to quote an Astroturfer!

Judge Evan J. Wallach, U.S. Court of Appeals for the Federal Circuit, member of the three-judge panel in Leader Techs v. Facebook, Inc., 678 F.3d 1300 (Fed. Cir. 2012). Judge Wallach is not a patent attorney. This begs the question as to why a judge with no knowledge of patent law was assigned to the case. Would anyone ask a dentist to perform brain surgery? The Federal Circuit was specially formed to appoint patent-knowledgeable judges to patent cases. There is no evidence so far in the judicial disclosures that Judge Wallach holds stock in Facebook, although when he was asked on a motion to disclose potential Facebook holdings and other conflicts of interest, he refused along with the other judges. See Motion to Disclose Conflicts of Interest. Judge Wallach continued in silence even after Clerk of Court Horbaly failed to provide him with Dr. Lakshmi Arunachalam’s motions (according to his Federal Circuit staffer Valeri White), and yet the Clerk signed an order regarding that motion on Judge Wallach’s behalf. See a full analysis of these events at Donna Kline Now! Judge Wallach also failed to police his court’s violation of Leader’s Fifth and 14th Amendment constitutional right to due process when he participated in the
fabrication of new arguments and evidence for Facebook in the secrecy of judge’s chambers after he had just invalidated Facebook’s sole remaining item of evidence (using disbelieved testimony as ostensible evidence of an opposite). Judge Wallach also failed to police his court when he failed to apply the Supreme Court’s Pfaff v. Wells Electronics, Inc. test for on-sale bar evidence, which included even the Federal Circuit’s own Group One v. Hallmark Cards, Inc. test—a test which Judge Lourie should have advised Judge Wallach to follow since Judge Lourie helped write that opinion. Group One test omission analysis.

Clerk of Court Jan Horbaly, U.S. Court of Appeals for the Federal Circuit, clerk who signed all the opinions in Leader Techs v. Facebook, Inc., 678 F.3d 1300 (Fed. Cir. 2012). Clerk Horbaly and his staff obfuscated when the court’s ruling was challenged by an amicus curiae brief revealing clear mistakes of law and new evidence. See analysis of the misconduct and misrepresentations within the Federal Circuit Clerk of Court in Leader v. Facebook. Mr. Horbaly failed to disclose his conflicts of interest and close associations with numerous Facebook attorneys and law firms, as well as his close association with one of Facebook’s largest shareholders, Microsoft, who is a Director of The Federal Circuit Bar Association where Mr. Horbaly is an ex officio officer. Additionally, the DC Bar revealed in a written statement that Clerk Horbaly is not licensed to practice law in the District of Columbia. [Editorial: What does that make the Federal Circuit with its location within a stone’s throw of the White House? A self-governing state?]

Judge Randall R. Rader, U.S. Court of Appeals for the Federal Circuit, chief judge responsible for the (mis)conduct of his judges and Clerk of Court in Leader Techs v.
Facebook, Inc., 678 F.3d 1300 (Fed. Cir. 2012). Judge Rader failed to manage his court resulting in a likely situation where his judges never even received briefs that they allegedly ruled on in favor of Facebook. Judge Rader also failed to disclose his conflicting relationships with a Leader principle with whom he may have had deep professional differences during his time at the Senate Judiciary Committee—his former professor of law at George Washington University Law Center, former Leader director Professor James P. Chandler. See analysis of Judge Rader's undisclosed conflicts of interest in Leader v. Facebook. Judge Rader also did not stop his judges from creating new arguments and evidence for Facebook in the secrecy of chambers—after they had debunked all of Facebook's evidence on appeal, which is a clear breach of constitutional due process.

C. Facebook puppet masters:

81. President Barack Obama (appointed Leonard F. Stark to the judge's seat in Delaware Federal District Court eight days after Stark's court allowed Facebook to get away with jury and court manipulation of an on-sale bar verdict which was attained without a single piece of hard evidence; Barack and Michelle Obama were evidently protecting their 47 million "likes" on Facebook)

82. Lawrence "Larry" Summers (Harvard President who aided Zuckerberg's light-speed rise to prominence with unprecedented Harvard Crimson coverage; Obama bailout chief; Clinton Treasury Secretary; World Bank Chief Economist; "Special Advisor" to Marc Andreessen in Instagram; co-creator of the current Russian robber baron economy; close 20-year relationships with protégés Sheryl Sandberg & Yuri Milner; aided in recommendations that created the Russian robber baron economy—and Yuri Milner/DST/Asmanov's money used to purchase Facebook stock)

89. Thomas J. Kim (SEC, Chief Counsel & Assoc. Director) approved Facebook’s 500-shareholder exemption on Oct. 14, 2007, one day after it was submitted by Fenwick & West LLP; Facebook used this exemption to sell $8 billion insider stock to the Russians Alisher Asmanov, Yuri Milner, DST, Digital Sky, Mail.ru which pumped Facebook’s pre-IPO valuation to $100 billion; another Harvard grad, Kim worked at Latham & Watkins LLP which was the chief lobbyist for the National Venture Capital Association in 2002-2004 whose Chairman was . . . James W. Beyer, Accel Partners LLP; in other words Breyer and Kim, both Harvard grads, were associated at the time of the Zuckerberg hacking and theft of Leader Technologies’ software code)

Dr. Saul Greenberg (Facebook’s expert witness from the University of Calgary; disingenuously waived his hands and said he would be “wild guessing” about the purpose of a Java “sessionstate” import statement (even Java newbies know it is used for tracking a user while in a web session); in short, Dr. Greeberg lied to the jury, thus discrediting his testimony)

122. Toni Townes-Whitley (CGI Federal; Michelle Obama’s 1985 Princeton classmate; CGI “donated” $47 million to the Obama campaign; CGI won the no-bid contract to build the www.healthcare.gov Obamacare website; CGI shut off the security features on Obama’s reelection donation sites to increase donations)

CGI Federal (US division of a Canadian company; Donated $47 million to Obama’s reelection, then received the no-bid contract to build the ill-fated Obamacare website; Michelle Obama’s Princeton classmate, Toni Townes-Whitley, is a Senior Vice President of CGI; the website is replete with social features and links to Facebook)

124. Kathleen Sebelius (Obama’s Secretary of Health & Human Services since 2009 responsible for $678 million Obamacare implementation; made the decision to hire CGI Federal on a no-bid contract despite the evident conflict of interest with Michelle Obama and $47 million in Obama campaign donations by CGI; the website is replete with social features and links to Facebook)

HOW TO FILE A FRAUD COMPLAINT AGAINST A UNIVERSITY

The following universities were announced as participants in Ohio State Provost Joseph A. Steinmetz’s corrupt MOOC education initiative named “University Innovation Alliance” (UIA). We have identified the instructions and online forms you need to file a complaint with the participants. MOOC stands for “Massive Open Online Course.”

You should complain about:

(1) the intellectual property theft of social networking source code from Leader Technologies, Columbus, Ohio that is the software engine running the UIA;

(2) the corruption at Ohio State University and OSU’s collusion with Battelle Memorial Institute which helped steal the software being used by UIA; and

(3) the mistreatment of OSU Marching Band Director Jon Waters regarding fabricated Title IX charges that were used to pave the way for Steinmetz to announce UIA.

Universities pride themselves on protection of intellectual property.

Therefore, these universities cannot participate in this abuse of inventor copyrights, patents and trade secrets by The
Ohio State Trustees and Administration. If these universities participate knowingly with Ohio State in its theft of intellectual property, then they are aiding and abetting the theft of intellectual property on a "massive" scale... Massive Open Online Course (MOOC) also known as The Eclipse Foundation.
