LEGEND: Some corruptocrat photos in this blog contain a stylized Christian Celtic Wheel Cross in the background alongside the text "Corruption Central" meaning we have put the person's conduct under the microscope and discovered that he or she is at the center of global corruption. Judge Amy Berman Jackson asserts that it is unambiguously (to her

anyway) a rifle cross hair. This shows her woeful ignorance of theology, history, symbology and engineering. It could be many things, but she clearly wanted to see a rifle sight (ask her about her role in Fast and Furious gun running). Others assert equally ignorantly that it is a pagan or white supremacist symbol. This stylized Christian Chi

Rho Cross dates to 312 A.D. when Emperor Constantine adopted the symbol after his history-changing "By this sign, you shall conquer" vision on the Milvian Bridge. A similar Wheel Cross form was widely used in Ireland by the eighth century. The triple entendre indicates that the person's corrupt

life, when studied under a microscope, has been found wanting, but that there is hope in Christ if the person repents from his or her wicked ways. It triples as a reticle or graticule built into all sorts of eyepieces in microscopes, oscilloscopes, surveying instruments, astronomy optics,

precision pointers, binoculars, etching equipment, and yes, gun sights, but also computer mouse pointers! Therefore, to claim that it could only mean a gun sight, as Judge Jackson did, is truly ignorant. As shown, it is a call to prayer and repentance based upon microscopic observation of the corruptrat's conduct. For Judge Jackson to use her ignorance of this symbol as the excuse to gag Roger Stone's FREE SPEECH right to defend himself is heinous abuse of authority. Chief Justice John Roberts should censor her immediately. Patriots must demand it.

Clintons, Obamas, Summers were paid in cash for outlandish speaking fees and Foundation donations. Sycophant judges, politicians, academics, bureaucrats and media were fed tips to mutual funds tied to insider stocks like Facebook. Risk of public exposure, blackmail, pedophilia, "snuff parties" (ritual child sexual abuse and murder) and Satanism have ensured silence among pay-to-play beneficiaries. The U.S. Patent Office is their toy box from which to steal new ideas.

Nov. 22, 2020—A favorite strategy of corrupt bureaucrats like Arizona Secretary of State Katie Hobbs is to shift their statutory accountability to third party “consultants.”

It is called “deniability.” However Katie, you forgot something important about enabling public behavior. If you delegate your elected responsibilities to corrupt third parties, that puts the liability on you. *We did not elect them, we elected YOU.* Their crimes are your crimes since their acts are done under the color of YOUR authority.

In other words, if the bureaucrat plans to commit illegal acts, or otherwise avoid responsibility for bad acts, the

The more corrupt the profession, the more deniability is prevalent. A similar phrase is "CYA" (Cover Your Ass). Those professions include law, politics and media. Technology too has fallen victim to these professions. If one doubts this, just take a look at the 2000+ page End User (CYA) Software License Agreements.

For example, providers like Facebook disabuse fundamental intellectual property Constitutional principles with a confidence trick whereby you, the user, inadvertently agree to *give up 100% of your intellectual property rights*.

[Facebook Permissions](#):

Paragraph 2: "You own the intellectual property rights (things like copyright or trademarks) in any such content that you create and share on Facebook and the other Facebook Company Products you use."**—SOUNDS GOOD.**

Paragraph 4: "[Y]ou grant us [Facebook] a non-exclusive, transferable, sub-licensable, royalty-free, and worldwide license to host, use, distribute, modify, run, copy, publicly perform or display, translate, and create derivative works of your content."**—THE BAIT & SWITCH SCAM.**

HEADS UP TO ARIZONA VOTERS:

Secretary of State Katie Hobbs scammed you in her selection of an outside federal agency—the **U.S. Election Assistance Commission**—to ostensibly "test" and certify the corrupt Dominion voting machine (and ES&S)—who then sent some of the testing to Canada where non-citizens, with no liability, were hired to give reliable, patriotic opinions.

This is just outrageous. It is an obvious attempt to use the power of a federal agency to organize the full disenfranchisement of America. The Commission should be closed immediately and their employees prosecuted for their utter betrayal of the entire U.S. citizenry of all parties.

NAZI Swastika. Respect for the inalienable rights of each individual is a bedrock value of democracy. The members of the Facebook Cabal abuse this principle at every opportunity. They evidently believe that they deserve special privileges and are willing to lie, cheat and steal in order to treat themselves to these privileges. ✂

We will focus on Dominion below since it is the voting machine that Hobbs chose to count the votes in [Maricopa County](#) vote. For the geographically challenged, this is the most populous county in Arizona containing Phoenix, and the fourth most populated county in the United States (4.5 million souls).

WISCONSIN DID NOT USE THE U.S. ELECTION ASSISTANCE COMMISSION FOR THEIR TESTING; THEY TOLD US THINGS THE COMMISSION HID FROM MANY STATES

We analyzed the Wisconsin testing in our [previous post](#).

While Wisconsin's testing was juvenile, they did provide us clues to important connectivity and ballot duplication that Arizona hid in its testing.

CORRUPT SOFTWARE, TESTING AND CERTIFICATION IS A DOMINION VOTING SYSTEMS FEATURE

The Wisconsin testing report revealed at least four corruption-enabling features in Dominion, for example:

1. [Photocopied](#) (read: fake) ballots could be read by the Dominion ballot scanner.
2. The Dominion machine supports [telecommunications modems](#) of all kinds.
3. The Dominion machine 100% connects to the [Internet/telecom](#) outside world in real time.
4. [Dominion dial-outs during election night](#) are "hard-coded" into the machines (thus enabling Dominion to change the software at any time).

The Arizona testing report from the U.S. Elections Assistance Commission did not disclose or test any of the above "features" of Dominion!

Here is [Katie Hobbs' testing report for Dominion](#) (and all others) (395 pgs., 19.8 MB) used in Maricopa County.

Note that **Georgia Secretary of State Brad Raffensperger** also used the same U.S. Election Assistance Commission testing for his Dominion machines as used by Katie Hobbs. Raffensperger proudly claimed on Nov. 17, 2020 that he had done a “random sample of machines to confirm no hack or tamper: 'Pro V&V (including TÜV SÜD) found no evidence of the machines being tampered.'”

This statement followed right after Davis cited Facebook's chief inside counsel in the *Leader v. Facebook* case, Theodore Ulyot, who appears to have helped lead the *Leader v. Facebook* judicial corruption. Interesting word choices associated with Gibson Dunn LLP: manipulation, smear. Attorneys swear a solemn oath to act morally, ethically, and in support of democratic principles. They promise to conduct themselves in a manner than instills confidence among the citizenry in the rule of law and the judicial system. These promises appear to be meaningless. Astoundingly...
Telecommunications Requirements, Security, External Threats, Wireless were “not applicable” to the testing!

U.S. ELECTIONS ASSISTANCE COMMISSION *DID NOT TEST* THE INTERNET CONNECTIONS, OR DO VULNERABILITY TESTING ON DOMINION!

4.1.1 Rationale for 'Not Applicable' Requirements

All requirements that were excluded from the previous test campaign (D-Suite 5.5) were also deemed not applicable to this test campaign due to the submitted modifications not impacting the specific requirements. These requirements are identified below:

- Volume I, Section 6.2.6 (Telecommunications Requirements: Integrity)
- Volume I, Section 7.5.2-7.5.4 (Security: Protection Against External Threats, Monitoring and Responding to External Threats, and Shared Operating Environment)
- Volume I, Section 7.6 (Use of Public Communications Networks)
- Volume I, Section 7.7 (Wireless Communications)

The rationale for not evaluating the D-Suite 5.5-B to the indicated sections is described in following table. Specific requirements that are excluded from this test campaign are identified in the EAC spreadsheet.

Table 4-1. Not Applicable Requirements

EAC 2005 VVSG Version 1 Volume I, Section	Rationale for 'Not Applicable'
6.2.6	These requirements are written for use of public networks. The D-Suite 5.5-B does not utilize public networks.
7.5.2-7.5.4	These requirements are written for use of public networks. The D-Suite 5.5-B does not utilize public networks.
7.6	D-Suite 5.5-B does not support transmission over public networks.
7.7	No wireless technology is utilized in this system.

Readers need to realize how mammoth the problem of NOT testing the Microsoft-supplied components to the Dominion machine is. The [Microsoft Internet Information Server \(IIS\)](#) is the technical backbone of these voting machines. "Internet Information Services server (IIS server) is a Windows Server-based web application used to deliver website content over the internet to an end user." ([Atlantic.net](#), accessed Nov. 23, 2020). Therefore, the notion that Dominion servers are not connected to the Internet is ignorant and laughable. Indeed, IIS handles things like SMTP (Simple Mail Transport Protocol... over the Internet). IIS also handles FTP (file transfer protocol... over the Internet). Or, how about Web Services... over the Web a.k.a. Internet. Hello. The fact that TÜV SÜD ignored Microsoft IIS its testing is criminally negligent.

judicial chicanery and lawlessness.

If we do not speak up, impeach derelict judges and imprison corrupt attorneys, we cannot possibly hope to start fixing the current ills in our society. Without justice and respect for private property, democracy has no sure foundation.

CURRENT EDITORIAL FOCUS

We are an opinion blog that advocates for strong intellectual property rights. We welcome commenters and contributors. The *Leader v. Facebook* patent infringement case first came to our attention after learning that the trial judge, Leonard P. Stark, U.S. District Court of Delaware, ignored his jury's admission that they had no evidence to support their on-sale bar verdict, but the judge supported it anyway.

The judicial misconduct has deteriorated from there, replete with two of the three judges on the Federal Circuit appeal panel, Judges Alan D. Lourie and Kimberly A. Moore, holding Facebook stock that they did not disclose to the litigants, and later tried to excuse through a quick motion slipped in at the last minute by the Clerk of Court, Jan Horbaly, and his close friends at The Federal Circuit Bar Association. (The DC Bar subsequently revealed that Mr. Horbaly is not licensed to practice law in Washington D.C.)

The judges ignored [shocking new evidence](#) that Mark Zuckerberg withheld 28 hard drives of 2003-2004 evidence from *Leader Technologies* that could prove actual theft (and therefore claims even more serious than infringement). In addition, Facebook's appeal attorney, Thomas G. Hungar of Gibson Dunn LLP, has close personal ties to just about every judicial player in this story. The misconduct appears to reach into the U.S. Patent Office through abuse of the reexamination process by Facebook. We will stay focused on *Leader v. Facebook* until justice is served, but we also welcome news and analysis of intellectual property abuse in other cases as well.

For argument's sake, let's say the machines were all connected to IIS in a dedicated intranet, an internal service only. That intranet would have to be statewide, and those IIS servers would be talking to one another in a VPN (virtual private network). One flip of the VPN security settings on just a single IIS server would expose the entire network to the Internet. That flip could easily occur by a single Arizona network person, or by Microsoft, or by any hacker or state actor with any skill at all.

At minimum, the Her Majesty's Canadian subjects at TÜV SÜD Canada, Inc. would know how to flip the security switches, for sure, not to mention access those servers wirelessly from the parking lot (they did that testing).

jury made the on-sale bar decision *without any evidence other than speculation*, and yet he supported that verdict anyway. Just months before trial, Judge Stark allowed Facebook to add the on-sale bar claim after the close of all fact discovery and blocked Leader from preparing its defenses to this new claim. Judge Stark allowed the claims despite Leader's prophetic argument that the action would confuse the jury and prejudice Leader. He also permitted the jury to ignore the *Pfaff v. Wells Electronics, Inc.* test for on-sale bar, even after instructing the jury to use it. (See that [Jury Instruction No. 4.7 here.](#)) He also contradicted his own instruction to Leader to answer Interrogatory No. 9 in the present tense (2009), then permitted the jury to interpret it as a 2002 admission as well. Facebook's entire on-sale bar case is based upon this interrogatory. (Editorial: Hardly sufficient to meet the "heavy burden" of the clear and convincing evidence standard.)

Judge Alan D. Lourie, U.S. Court of Appeals for the Federal Circuit, panel judge in *Leader Techs v. Facebook, Inc.*, 678 F.3d 1300 (Fed. Cir. 2012). Judge Lourie stood to benefit financially from undisclosed holdings in Facebook. See [analysis of Judge Lourie's T. Rowe Price holdings re. the Facebook IPO](#). Judge Lourie also failed to apply his own law-test in *Group One v. Hallmark Cards* to the evidence. Judge Moore failed to follow the long-held precedent for testing on-sale bar evidence in *Pfaff v. Wells Electronics, Inc.*—an evident and intentional omission coming from a former patent law professor. After debunking all of Facebook's evidence on appeal, Judge Moore created new argument in the secrecy of chambers to support Facebook and prevent the on-sale bar verdict from being overturned—a clear breach of constitutional due process.

Judge Evan J. Wallach, U.S. Court of Appeals for the Federal Circuit, member of the three-judge panel in *Leader Techs v. Facebook, Inc.*, 678 F.3d 1300 (Fed. Cir. 2012). Judge Wallach is not a patent attorney. This begs the question as to why a judge with no knowledge of patent law was assigned to the case. Would anyone ask a dentist to perform brain surgery? The Federal Circuit was specially formed to appoint patent-knowledgeable judges to patent cases. There is no evidence so far in the judicial disclosures that Judge Wallach holds stock in Facebook, although when he was asked on a motion to disclose potential Facebook holdings and other conflicts of interest, he refused along with the other judges. [See Motion to Disclose Conflicts of Interest.](#) Judge Wallach continued in silence even after Clerk of Court Horbaly failed to provide him with Dr.

1.1.2 Description of Modification

The **Dominion Democracy Suite 5.5-B Voting System** is a modified voting system configuration that includes upgrades to the components of the D-Suite 5.5 Voting System. The list below includes changes between this system and the baseline of the Democracy Suite 5.5 Voting System:

GENERAL MODIFICATIONS

- Addition of **ImageCast Evolution (ICE)**, a precinct-level, optical scan, ballot counter (tabulator) designed to perform three major functions: ballot scanning and tabulation, ballot review and second chance voting, and accessible voting and ballot marking. Submitted version: ICE firmware version 5.5.6.1, hardware version PCOS 410A.

Clerk of Court Jan Horbaly, U.S. Court of Appeals for the Federal Circuit, clerk who signed all the opinions in *Leader Techs v. Facebook, Inc.*, 678 F.3d 1300 (Fed. Cir. 2012). Clerk Horbaly and his staff obfuscated when the court's ruling was challenged by an *amicus curiae* brief revealing clear mistakes of law and new evidence. [See analysis of the misconduct and misrepresentations within the Federal Circuit Clerk of Court in Leader v. Facebook](#). Mr. Horbaly failed to disclose his conflicts of interest and close associations with numerous Facebook attorneys and law firms, as well as his close association with one of Facebook's largest shareholders, Microsoft, who is a Director of The Federal Circuit Bar Association where Mr. Horbaly is an ex officio officer. Additionally, the DC Bar revealed in a written statement that Clerk Horbaly is not licensed to practice law in the District of Columbia. Facebook, Inc.*, 678 F.3d 1300 (Fed. Cir. 2012). Judge Rader failed to manage his court resulting in a likely situation where his judges never even received briefs that they allegedly ruled on in favor of Facebook. Katie Hobbs replaced unbroken, bi-partisan chain of custody with citizen spectators while she concealed the foreign interference in the Dominion election machines, and therefore the Arizona election itself.

Her incompetence and arrogance are astounding and cannot be tolerated. She broke the law and common decency.

Arizona's ballots must each be examined for unbroken, bi-partisan chain of custody. If she cannot prove that, then those ballots cannot be counted.

Now that foreign interference has been proven by the government's own documents, and since the FBI, DoJ, NSA, C.I.A. and State Department are complicit in the criminality and are protecting each other, President Trump must act on

The [Executive Order on Imposing Certain Sanctions in the Event of Foreign Interference in a United States Election](#) must now be invoked to the fullest.

Make notes Patriots.

Any politician, bureaucrat, media propagandist that says there is no evidence of voting fraud in the 2020 election is complicit in the fraud. The evidence, like that which has been shown in BLACK AND WHITE here is overwhelming.

This evidence is "judicially recognizable" meaning it can be taken right to court because its sources are what is called "notoriously known" by the public. In other words, the sources, like the State of Arizona and the U.S. Elections Assistance Commission are public bodies upon whose assertions one can rely. That is the law... now we will excuse ourselves to go cough up a hairball.

Keep pounding patriots. Ignore the propaganda and misinformation. Press the fight to restore our sacred vote. If we don't have a reliable vote, we have lost our Republic. It is that simple.

Blessings.

Email comment by PR:

Georgia's Raffensperger faked hacker testing on his Dominion voting machines

Georgia's Secretary of State Brad Raffensperger claimed he did randomized fraud tests on his Dominion voting machines. However, his testing sidestepped the testing of the Microsoft IIS network used to connect the machines. Therefore, the test was pure Kabuki Theater—the testing company, Pro V&V (incl. British Crown subjects at TÜV SÜD Canada), did not test Microsoft components used with even a single Dominion machine for 2020!

When intrusion is a feature—like the Lord Mark Malloch-Brown, Sir Nigel Knowles (DLA Piper Plc) OpTech component in Dominion/Smartmatic and others—hacker tests are irrelevant. Those tests will naturally turn up nothing. Raffensperger and his globalist handlers are counting on the technical inexperience of the general public to get away with this election fraud.

SECURE THE VOTE = STEAL THE VOTE.
Brad Raffesperger is a RINO globalist.

Georgia Secretary of State Brad Raffensperger used the same U.S. Election Assistance Commission testing for his Dominion machines as used by Arizona's Katie Hobbs and many other states. Wisconsin uses Dominion also, but did separate testing not involving the .

Raffensperger proudly claimed on Nov. 17, 2020 that he had done a “random sample of machines to confirm no hack or tamper: 'Pro V&V (including TÜV SÜD) found no evidence of the machines being tampered.'”

<https://americans4innovation.blogspot.com/2020/11/breaking-az-sec-of-state-katie-hobbs.html#dominion-testing-tuv-sud-canada>

Random sampling test will sidestep the Dominion fraud completely, as we shall show.

The glaring failure of Raffensperger's "random sample of machines" does nothing to test for compromised Microsoft Internet Information Servers (IIS) components used to connect all Dominion machines to handle all upgrades, maintenance, collection, file management and

variants; Li appointed a junior attorney from Fenwick & West LLP, Palo Alto/Mountain View, namely Parker Zhang, to be his "Head of Patents;" Fenwick & West LLP represented both Leader Technologies, Inc. and Accel Partners LLC in 2002-2003 and had Leader's source code in their files.)

130. **Rebecca M. Blank** (Secretary, Department of Commerce; oversaw the dubious Leader v. Facebook activities of the Patent Office Director, David J. Kappos, who held over one million dollars in Facebook "dark pools" during the *Leader v. Facebook* proceedings; Kappos purchased this stock within weeks of his surprise recess appointment by President Obama; Kappos also was formerly employed by IBM, who sold Facebook 750 patents during the *Leader v. Facebook* proceedings; right before leaving the Patent Office, Kappos also ordered an unprecedented 3rd reexamination of Leader's patent without even identifying claims)

131. **Mary L. Schapiro** (Chairman, Securities & Exchange Commission; holds 51 Facebook "dark pools" stocks which held stock in Facebook, Baidu and more than a dozen Facebook crony companies; failed to regulate the "dark pools;" failed to disclose her substantial conflict of interest in regulating the run up to the Facebook IPO)

132. **Robert C. Hancock** (Chief Compliance Officer, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athenahealth, Baidu and Facebook during the period of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Park is/has been founder, director and CEO of both Athenahealth and Castlight Health; Todd Y. Park deeply embedded the software from Athenahealth and Castlight Health into HealthCare.gov when he was CTO at Health & Human Services; none of these conflicts of interest were disclosed; Todd Y. Park's ethics pledges and reports are missing from the Office of Government Ethics)

133. **Jonathan Goodman** (Chief Counsel, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athenahealth, Baidu and Facebook during the period of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Therefore, Raffensperger's random sampling test is meaningless Kabuki Theater for finding the Dominion fraud.

Evidently Raffensperger knew that, and that is why he did it so proactively.

We have your number Raffensperger (and Microsoft):

Has no one yet realised that person being displayed to us as Biden, is NOT Biden, but a body double. Jim Fetzer has more that proven this on his show with countless guests using photographic comparisons. Why oh why is this fact not being exposed more openly. Surely a body double is not permitted to run for election. Please advise if I am missing something here. This must at least be yet another crime to add to the many charges of fraud against the Demonografic, sorry Democratic Party.
