archived downloads from the eclipse project

## Archived Downloads

On this page you can find the archived [builds](#) produced by the [Eclipse Project](#). Archived builds consist of older releases and not propagated to Eclipse mirrors. To get started run the program and go through the user and developer documentation provided in the online help system. If you have problems downloading the drops, contact the [webmaster](#). If you have problems installing or getting the workbench to run, [check out the Eclipse Project FAQ](#), or try posting a question to the [newsgroup](#). All downloads are provided under the terms and conditions of the [Eclipse.org Software User Agreement](#) unless otherwise specified.

Eclipse support for Java™ 8 is built-in to [Luna \(4.4\)](#) so it, and all subsequent builds, contain full support for [Java™ 8](#). For Kepler SR2 (4.3.2), a [feature patch](#) with preliminary Java™ 8 support is available ([P20140317-1600](#)).

Current builds are available [here](#). Looking for the build schedule or build stats then look [here](#). For information about different kinds of builds look [here](#).
