CISCO™

Cisco is the worldwide leader in networking that transforms how people connect, communicate, and collaborate. Since 1984, Cisco has led in the innovation of IP-based networking technologies, including routing, switching, security, TelePresence systems, unified communications, video, and wireless. The company's responsible business practices help ensure accountability, business sustainability, and environmentally conscious operations and products. Learn more at www.cisco.com.

At IBM, we strive to lead in the invention, development and manufacture of the industry's most advanced information technologies. IBM and Rational Software were founding members of the Eclipse.org consortium in 2001, and today IBM Rational is a Strategic Member of the Eclipse Foundation, helping to lead the growth of Eclipse technology and the Eclipse Community. Our Jazz technology platform adds value to Eclipse with solutions designed to make software delivery more collaborative, productive, and transparent. IBM Rational Team Concert, Quality Manager and Requirements Composer are the first of a planned family of offerings to leverage the Jazz platform.

Intel, the world leader in silicon innovation, develops technologies, products and initiatives to continually advance how people work and live. Intel Software connects Intel to the worldwide software community and provides resources, technologies, products and services developers need to create innovative products and industry-leading software solutions designed to run best on Intel platforms. Intel strives to help independent software vendors, operating system developers, OEMs, channel members and systems integrators deliver exceptional customer value and achieve differentiation on Intel processor technologies. For more information, please visit: Learn more at www.intel.com/go/software.

JBoss Enterprise Middleware is a broad portfolio of enterprise-class open source middleware, delivered by Red Hat, the leader in open source solutions. Fueled by the thriving JBoss Community, JBoss Enterprise Middleware hardens and integrates innovative community projects into a comprehensive portfolio of stable, supported, enterprise-class distributions that support the entire application lifecycle. The portfolio includes application, portal, data integration, rules management and ESB-based SOA platforms. Available via subscriptions that include patches, updates, support, multi-year maintenance policies, and software assurance, JBoss Enterprise Middleware enables enterprises to confidently deploy their next generation open source middleware reference architecture. Customers like Priceline.com, Continental Airlines, and Geico trust JBoss for improved performance, greater flexibility and control, industry-leading 24x7 support, and significantly lower total cost of ownership. Learn more at jboss.com.

BIRT Exchange is the most active online community for the Eclipse BIRT (Business Intelligence and Reporting Tools) project. Developers who need to build data visualizations into applications can use the site to share ideas, technical tips and code snippets, and download software, documentation and examples. The site also features an Open Marketplace, a showcase where developers and organizations can promote, distribute and sell BIRT-related software. BIRT Exchange is sponsored by Actuate, the company that initiated and co-leads the BIRT project. Actuate offers technical support, training and consulting services for Eclipse BIRT users, as well as commercial products that extend BIRT.

Agitar Technologies enables the enterprise to save time and money by releasing Java applications faster with fewer bugs. Both new and legacy applications are more easily managed to allow you to meet rapidly changing business needs. "AgitarOne" enables software teams to create, use, and manage the extensive set of unit tests needed to be truly agile. Customers have cut legacy maintenance efforts by 50%, released new applications 30% faster with fewer bugs, and cut the cost of finding and fixing post-release bugs by 90%. Agitar Technologies is a privately-held company headquartered in Cranston, RI. For more information visit www.agitar.com.

Built upon the same world-class technology that powers Amazon.com, Amazon Web Services (AWS) provides businesses with a reliable, easy-to-scale, low-cost computing platform in the cloud. Companies of all sizes, from all around the globe use AWS to build websites, store data, manage business processes and more. <http://aws.amazon.com>

We develop software at the interface to the customer. BSI CRM is the leading Swiss solution for every task and every relationship - sales, marketing, service management, multichannel contact center. The simplicity and the versatility of the software have convinced more than 20,000 users: ABB, APG, Hermes, Holcim, PostFinance, PwC, Sika, Tamedia, Viseca and other market leaders rely on BSI to realize their customer dialogue. Our products are based on Eclipse RCP. Thanks to Service Oriented Architecture all BSI applications are easily integrated into any IT landscape.

Google's innovative search technologies connect millions of people around the world with information every day. Founded in 1998 by Stanford Ph.D. students Larry Page and Sergey Brin, Google today is a top web property in all major global markets. Google's targeted advertising program provides businesses of all sizes with measurable results, while enhancing the overall web experience for users. Google is headquartered in Silicon Valley with offices throughout the Americas, Europe and Asia.

Soyatec, an Eclipse Foundation member, is one of the major Eclipse contributors and a leading provider of Eclipse-based UI solutions and high-quality professional services. It is an innovative company dedicated to providing a modern, flexible and highly customizable component-based UI framework with a set of powerful visual design tools and a UI modeling engineering system in MDE. In Eclipse, Soyatec leads the following projects: VE (Visual Editor), PMF (Presentation Modeling Framework) and ESL (Eclipse development tools for Silverlight). Soyatec also participates on EGF (Eclipse Generation Framework), and contributes massively on the e4 project in declarative UI - XWT and Visual design tools.

Xored is an Eclipse-centric company.

Founded in 2002 as an Eclipse-centric company, Xored provides add-on tools, consulting, and software development services to leading telecoms, software development companies, and enterprises. Today we have accumulated over 100 man-years of development experience with Eclipse the technology stack, and counting. Xored is actively innovating and contributing to the Eclipse community, being the founder and leader of the Dynamic Languages Toolkit project. In 2010 we are continuing to innovate in Eclipse, announcing a brand-new product line. Our tools for software developers and vendors address different issues of organizing QA and support of Eclipse-based software products, helping to increase software quality and developer productivity.
