

## Lady Rosebery's Fortune

**LADY ROSEBERY'S FORTUNE.** — Lady Rosebery (says a writer in *Truth*) leaves a fortune of three millions odd, 1,000,000*l.* of which was settled on the title at her marriage, which, together with the other two, will now probably revert to the use of Lord Rosebery for his lifetime. Mentmore goes, it is said, to her second son—a very wise provision, seeing that the young Lord Dalmeny is otherwise plentifully provided for, while the fortunes of the two daughters will be in every way ample. In the seventies we were not so liberal-minded as we are now, and great was the stir occasioned some twelve years back when the engagement of the young and popular Lord Rosebery to Miss **Hannah de Rothschild** was first announced. Lord Beaconsfield, as the first Jewish Prime Minister of England, very appropriately gave away the bride. It was at the time an open secret that the young lady had been enamoured for a considerable period previous to the engagement having been entered into.
