(9) *Delivery and return of Films.*—(*a*) Delivery: The renter shall make deliveries hereunder to the exhibitor by delivery at the renter's exchange or by forwarding or consigning to the exhibitor either by the renter or by some other person at the renter's direction, and either by rail, steamer, post, or othe means of transport, not being by air, as the renter may decide, and shall use its best efforts to have each and every film delivered to the exhibitor in time for the authorized exhibition on the exhibition date in said theatre: Provided that the renter shall not be liable in any way whatever for failure or delay in making delivery by reason of the elements, accidents, labour troubles, fires, Government Proclamations, ruling of censors, or by reason of any other delay, accident, or hindrance of whatever kind soever beyond the control of the renter.

(*b*) Possession: For the purposes of this agreement all films and accessories shall be deemed to be in the possession of the exhibitor from the time the exhibitor takes delivery from the premises of the renter or from the time the film is forwarded or consigned to the exhibitor as aforesaid until delivery by the exhibitor to the renter at the renter's exchange, or consignment by any of the means of transport as aforesaid to another exhibitor notified to the exhibitor in writing by the renter.

Digitized by Google

(*c*) Return: The exhibitor shall promptly return all films, together with spools and straps, in the same condition as same were received (reasonable wear and tear excepted), and properly packed in containers and properly addressed to the renter's exchange or to any other place named by the renter in writing to the exhibitor by delivery or consignment as aforesaid. The exhibitor shall consign by such means of transport, other than by air, as may be specified in writing by the renter.

(*d*) Freight: The exhibitor will pay all costs of transportation of the said films and/or accessories from the renter's exchange, and return to renter's exchange, or to another exhibitor, as the case may be.

(*e*) Damages: The exhibitor agrees that if for any reason not beyond his control despatch instructions are not carried out by him, with the result that loss is thereby caused to the renter and/or the exhibitor to whom the films should have been despatched in accordance with the despatch instructions of the renter, he will pay to the renter by way of liquidated damages a sum equivalent to the amount of the loss thereby suffered by the renter and/or such other exhibitor, and will indemnify the renter against any claim preferred by such other exhibitor against the renter in respect of such loss.

(*10*) *Sound and Projection Equipment.*—The exhibitor undertakes that the reproducing equipment used in connection with any films supplied hereunder will operate properly, reliably, and efficiently to reproduce such recorded sound with adequate volume and high quality, and that he will maintain and keep the projection machine and all other apparatus used by him in a good, proper, and substantial state of repair, order, and condition, and will at all times allow free access for a representative of the renter appointed in writing by the renter for that purpose to enter into every part of the said theatre or theatres for the purpose of inspecting and/or testing such sound and/or projecting equipment and apparatus. If, after any such inspection or test, the representative (being a person approved by writing in that behalf by the Chief Inspector for the time being under the Cinematograph Films Act, 1928) serve upon the exhibitor or leave for him at the said theatre notice in writing requiring the exhibitor, within a time specified in such notice, to do or to refrain from doing anything in connection with the said equipment or the use thereof which in the opinion of the representative is necessary for the more satisfactory exhibition of the said films, the exhibitor shall observe and/or perform the requirements of such notice within the time specified therein, and in the event of the exhibitor failing to observe or perform the requirements of such notice, and so long as such failure continues, the renter shall be entitled to refuse to supply or allow the said films or any of them to be exhibited, but nevertheless without prejudice to any other right or remedy the renter may have under this agreement.

(*11*) *Copyright.*—(*a*) The right to exhibit the said films shall include a right under all copyrights in respect of such films and of the recorded sound in synchronism therewith, but not the right to perform in public any musical work included in such recorded sound.

(*b*) The exhibitor warrants that he will have at the date or dates of the exhibition of each of such films an effective license from the Australasian Performing Rights Association, Limited, or other person or association of persons designated in writing by the renter upon inquiry by the exhibitor who or which may control the right of public performance of such copyrighted musical or other composition to perform publicly such composition.

(*c*) Each party will indemnify the other against any claim in respect of infringement of copyright or infringement of the right of public performance, as the case may be, where the same arises by reason of a breach by such first-named party of his obligations under this clause.

(*12*) *Slander or Libel.*—The renter will indemnify the exhibitor against any claim in respect of any slander or libel which arises exclusively from the contents of any film exhibited pursuant hereto and/or the use of advertising matter in relation thereto supplied by the renter.

(*13*) *Cutting and Alteration of Films.*—The exhibitor shall exhibit each film in its entirety, and shall not copy, duplicate, cut, or alter any film excepting with the written or telegraphic consent of the renter.

(*14*) *Loss and Damage to Films.*—(*a*) The exhibitor shall forthwith on the receipt of any film hereunder report to the renter on a form to be supplied by the renter upon application by the exhibitor the condition of such film.

(*b*) The exhibitor shall immediately notify the renter's exchange by prepaid telegram of the loss, theft, or destruction of or damage or injury to any print. If any film shall be received from the exhibitor by the renter or any subsequent

Digitized by Google

exhibitor in a damaged or partially destroyed condition it shall be deemed to have been so damaged or destroyed while in possession of the exhibitor, unless the latter before or immediately after the first public exhibition thereof shall have telegraphed the renter that such print was received by the exhibitor in a damaged or partially or wholly destroyed condition, and setting forth fully the nature of such damage and the amount of footage so damaged or destroyed.

(*c*) The exhibitor shall pay to the renter a sum equal to the cost of replacement at the renter's exchange for each linear foot of film which may be lost, stolen, destroyed, or so damaged as to be unfit for further exhibition while in the possession of the exhibitor.

(*d*) If damage occurs to any film while in the possession of the exhibitor, but such damage is not of such nature as to preclude further exhibition, the exhibitor shall pay to the renter a sum in proportion to the nature and extent of such damage. The amount of such damage shall be determined by mutual agreement or by arbitration, but in no case shall it exceed the value of the film as set out in subclause (*c*) hereof.

(*e*) The exhibitor shall not be relieved of his obligation to return all discs and other accessories by reason of the same having been broken, worn out, or damaged.

(*15*) *Insurance.*—The exhibitor shall insure and keep insured all films to be supplied hereunder while in his possession under a block risk policy effected and operated from time to time by a Board constituted of an equal number of representatives of the Film Exchanges Association of New Zealand (Incorporated) and the New Zealand Motion Picture Exhibitors' Association (Incorporated), and constituted pursuant to an agreement between the said associations, dated the 6th day of August 1935, or to any agreement in substitution or renewal thereof, and shall punctually pay to the said Board all contributions or levies required of or made upon him by the said Board to enable such insurance to be effected and maintained; and, in the event of default by the exhibitor in payment of any such contribution or levy, the renter may if it thinks fit pay the same and recover the amount thereof from the exhibitor: Provided, however, that in the event of such Board for any reason ceasing to exist or to function, the exhibitor shall insure and keep insured the said films whilst the same are deemed to be in his possession hereunder against the same risks as specified in the said block policy in some insurance office approved by the renter, the total insurance cover in respect of any one programme to be not less than £300 (or such other sum as may be agreed upon from time to time or in default of agreement fixed by arbitration), and shall punctually pay all premiums in respect thereof, the renter having the right in the event of default by the exhibitor to pay the same and recover the amount from the exhibitor.

(*16*) *Broadcasting prohibited.*—The broadcasting of or from any films supplied under this agreement is expressly prohibited.

(*17*) *Switching.*—The renter reserves the right to switch each and every film supplied hereunder to any other exhibitor or exhibitors for return in due course: Provided that such switching shall not affect the normal screening of the programme of which such film is a part. No costs or expense in effecting such switching shall be borne by the exhibitor unless the switching be at his request.

(*18*) *Observance of Acts and By-Laws.*—The exhibitor and the renter shall as the same are applicable to motion-picture theatres and/or the control, care, and use of film at all times fully and effectually comply with all Acts of Parliament and rules and regulations thereunder, as well as with all by-laws of any local government or other authority having power in that behalf for the locality or district wherein the said films are to be used.

(19) *Assignment.*—This agreement shall not be assigned, transferred, or otherwise disposed of by the exhibitor to any other person without the written consent of the renter, which consent shall not be arbitrarily withheld, and shall not in any case be effective until such other person has agreed with the renter to carry out the terms and provisions hereof. Notwithstanding such consent, the exhibitor shall remain responsible to the renter hereunder unless a release from liability is given to him in writing.

(20) *Waiver.*—The waiver by either party of any breach or default by the other party shall not be construed as a waiver of any other or subsequent breach or default by such other party whether similar or otherwise.

(21) *Notices.*—(*a*) All notices to be given to either party hereunder shall be sufficiently served if sent by prepaid post to the address of the party to whom notice is given last known to the other party, and any notice so sent shall be

Digitized by Google

deemed to have been received on the day when it would have ordinarily been received in the course of post: Provided that any notice of the despatch of film or accessories shall be addressed to the theatre to which the film is booked.

(*b*) Any notice of availability given to the exhibitor under the provisions of section 9 of the Cinematograph Films Amendment Act, 1934, shall expressly intimate that it is an availability notice under the Act.

(22) *No Partnership.*—It is expressly agreed that this agreement in no way constitutes a partnership between the parties hereto.

(23) *Oral Promises.*—No oral promise, representation, understanding, or agreement in reference hereto shall be of any force or effect.

(24) *Stamp Duty.*—The renter has the right to stamp his copy of this agreement and to charge the exhibitor with the amount of stamp duty paid thereon.

(25) *Theatre closed.*—In the event of the said theatre being closed by Government Proclamation or by Parliamentary, Ministerial, departmental, or local authority (statutory or otherwise) under any real or assumed authority or power not being due to any withdrawal or suspension of the exhibitor's license in respect of such theatre for any cause within the power of the exhibitor to remedy, or in the event of such theatre being destroyed or damaged to such an extent as to be unfit for use or occupation so that any film to be exhibited hereunder cannot be exhibited on the day or days when it should be so exhibited, then this contract shall terminate in respect of such number of films as would have been exhibited in the theatre in terms of this contract: Provided that in the event of screening not being resumed by the exhibitor in the said theatre or a substitute theatre in or near the same locality within forty days next after the day when a film was last screened therein, the renter shall have the right of terminating this agreement, in which case the agreement shall be deemed to have terminated at the date when the theatre closed owing to one or either or all of the causes aforesaid. Such determination of the agreement shall be without prejudice to the rights of either party in respect of any matter then outstanding between them under this agreement up to the time of such determination.

(26) *Breach.*—(*a*) If during the term hereof the renter fails or refuses to deliver and/or the exhibitor fails or refuses to exhibit any of the said films (save and except such as may be rejected under section 8 of the Cinematograph Films Amendment Act, 1934, or where elimination of any film or delay or failure is due to any of the permissible reasons provided herein), or if either party violate or breach the provisions contained herein, the renter or the exhibitor, as the case may be, shall pay to the other party the damage so caused.

(*b*) If the exhibitor—

(i) Shall fail or refuse to pay the rental of any such film as provided in this agreement or to furnish statements of the receipts of such theatre if any are required hereunder, or to give the renter's representative access to the said theatre or its box-office and/or to the exhibitor's books and records relative to films the rentals of which are based upon the said theatre's admission receipts as herein provided; or

(ii) Makes default in the due observance and performance of the obligations on his part under clauses numbered 2 (Time and Place of Exhibition), 7 (Admission Prices), 11 (Copyright), 15 (Insurance), 16 (Broadcasting), and 18 (Observance of Acts and By-laws), or any of them; or

(iii) Commits any other breach going to the root of the contract; or

(iv) Becomes insolvent or is adjudicated a bankrupt, or in the case of a company goes into liquidation except for reconstruction, or executes an assignment for the benefit of his creditors; or if a receiver is appointed for any of the property of the exhibitor; or

(v) Voluntarily or by operation of law should lose control of the said theatre or of his said interests therein, making it impossible for the exhibitor to exhibit the said films at the said theatre;

then, upon the happening of any one or more of said events, the renter may at his option (1) terminate this agreement, or (2) suspend the delivery of films hereunder until such default or defaults should cease and be remedied: Provided that the renter may not suspend delivery of films as provided herein on account of any payment arising out of this agreement which may be *bona fide* in dispute and in respect of which arbitration as provided for in this agreement is applied for. The lodgment of the amount in dispute with the Secretary of the New Zealand Motion Picture Exhibitors' Association to abide the result of the dispute shall be a sufficient warranty of the exhibitor's *bona fides*.

(*c*) In the event of suspension of delivery by the renter in exercise of the foregoing power in that behalf, the renter shall have the right to reduce the

Digitized by Google

number of films by the number the delivery of which is suspended pending ratification of the breach, and to deal with such suspended films in all respects as the renter thinks fit.

(*d*) If the renter shall—

(i) Persistently fail to supply film on due dates; or (ii) Give prior exhibition to a competitive theatre in breach of this agreement; or (iii) Commit any other breach going to the root of the contract, then, upon the happening of any of such events, the exhibitor may at his option—(1) Terminate this agreement; or (2) Suspend payments herein until such default or defaults shall cease and be remedied, and in the event of such suspension may reject such number of films as would otherwise have been screened by him during such period of default in addition to any other rights of rejection he may have hereunder.

(*e*) It is agreed that the exercise of any of the said remedies by the renter or the exhibitor shall be in addition to and without prejudice to any right or remedy of either against the other at law or in equity and/or otherwise provided for in this agreement.

(27) *Tender of Film.*—In any circumstances arising in connection with the exercise by the renter of its remedies under this agreement where the formal tender to the exhibitor of any film may be necessary to the proper exercise of any such remedy a written offer to supply such individual film on the due date shall for that purpose be deemed a sufficient tender to the exhibitor of the film therein named. No such offer shall be effective unless it contains an intimation that it is intended as a formal tender of film for the purposes of this clause.

(28) *Arbitration.*—If any question or difference whatsoever shall arise between the parties hereto touching these presents, or any clause or thing herein contained, or the construction of this agreement, or as to any matter in any way connected with or arising thereout or the operation thereof, or the rights, duties, or liabilities of either party in connection with the premises, then, and in every such case, unless the parties concur in the appointment of a single arbitrator, the matter in difference shall be referred to two arbitrators, one to be appointed by each party to the difference, or to an umpire to be appointed by the arbitrators pursuant to and so as with regard to the mode and consequence of the reference, and in all other respects to conform to the provisions in that behalf contained in the Arbitration Act, 1908, or any then subsisting statutory modification thereof: Provided, however, that in the case of any such question or difference (excepting where in any particular previous clause of this agreement an express reference to arbitration is made) where the matter in dispute involves a sum of money exceeding £100, or where the determination of the matter in dispute is likely to or may result in the payment by one party to the other of a sum exceeding that amount or in a loss falling on either party equivalent in terms of money to a sum in excess of that amount, it shall not be obligatory on the parties to have such question of difference submitted to arbitration as aforesaid, but either of them shall be at liberty as to proceed as though this clause relating to arbitration were not embodied herein, and in that event the other party shall not be entitled to plead this clause in bar of such proceedings.

(29) *Venue.*—This agreement shall be deemed to have been made at the office of the renter in the City of Wellington, New Zealand, and shall be governed by the laws of New Zealand.

(30) *Acceptance by Renter.*—Until accepted in writing by the renter, its managing director, or manager, or other authorized agent on behalf of the renter, and notice of acceptance sent to the exhibitor, this agreement shall be deemed an application for a contract only and may be withdrawn by the exhibitor any time before such acceptance. Unless such notice is sent to the exhibitor within twenty-eight days after the date of the exhibitor making such application, the said application shall be deemed to have been withdrawn. A copy of this application signed by the exhibitor shall be left with the exhibitor at the time of signing, and in the event of the acceptance thereof as above provided, a duplicate copy signed by the renter in manner aforesaid shall be forwarded to the exhibitor.

(31) *Interpretation of Terms.*—The word "film" means a motion-picture film with all disks, records, and/or other devices other than sound reproducing equipment, which may be necessary to reproduce sound (including music and/or words) in synchronization with such film. The reference in this agreement to "the said theatre" shall, unless the context otherwise requires, mean the theatre of which the name is set out in the introductory part of these presents or the

Digitized by Google

Schedule hereto, and where the names of two or more theatres are set out reference in this agreement to "the said theatre" shall, unless the context otherwise requires, means such of the theatres so set out at which any film in question was or is to be or ought to be or ought to have been exhibited as the case may require. In this agreement, except where the context otherwise requires, words importing the singular number shall be deemed to include the plural number and *vice versa*, and words importing the masculine gender shall be deemed to include the feminine and neuter genders. This agreement has for convenience of reference been set out in paragraphs with suitable captions but such captions shall not be read so as to indicate that all the provisions relating to any one subject are necessarily contained under the caption suggesting that subject.

(32) *Standard Form.*—This standard form may not be varied so as to provide for any right of cancellation at the option of the renter other than for a breach coming within clause 26 hereof.

Any addition hereto not inconsistent herewith shall be written or printed in Part C hereof, or in some separate document.

In Equity No. 793—In the United States District Court for the District of Delaware. *United States of America, petitioner, v. Radio Corporation of America, RCA Communications, Inc., et al., defendants.* Amendment to Consent Decree. Filed July 2, 1935.

Part VI of the consent decree entered herein on November 21, 1932, having provided that the issues presented by the amended and supplemental petition, and the amendment to the amended and supplemental petition with reference to contracts, arrangements and understandings between the defendants or any of them and foreign companies and governments should be specially reserved for trial and determination if that should become necessary, for a period of two and one-half years from the date thereof;

And such of the issues aforesaid as pertained to license and sales agreements having been terminated before the expiration of such period of two and one-half years by the entry of a decree on May 25, 1934; and the period of two and one-half years referred to in Part VI of the aforesaid decree having elapsed, and petitioner by leave of court having filed its second amendment to its amended and supplemental petition, and defendants, Radio Corporation of America and RCA Communications, Inc., having filed their answers to the amendment and to the second amendment to the amended and supplemental petition, and the cause having heretofore been set down for hearing and trial upon the remaining issues, that is to say, those pertaining to foreign traffic and communications agreements, arrangements, and understandings between defendants, Radio Corporation of America or RCA Communications, Inc., and foreign governments and companies and others; and no testimony or evidence having been taken herein;

And said defendants, Radio Corporation of America and RCA Communications, Inc., and petitioner having consented to the entry of this Amendment to said consent decree entered on November 21, 1932, as noted at the foot hereof;

Now, therefore, said consent decree entered on November 21, 1932, is hereby amended by adding thereto the following paragraphs:

"A

"Said defendants, Radio Corporation of America and RCA Communications, Inc., and their subsidiaries are hereby perpetually enjoined from claiming or asserting that any of their foreign traffic or communication agreements, arrangements, or understandings with governments, companies, or others prevents or prohibits the other contracting party thereto (a) from establishing, or permitting to be established, with any other person or persons, such radio circuit or circuits to or from the United States, its territories or possessions (either direct or indirect) as such other contracting party may desire, in addition to or other than those provided for by the aforesaid agreements, arrangements, or understandings, or (b) from transmitting, or permitting to be transmitted, by or over such other or additional circuit or circuits messages which may be specially so routed by the sender.

Digitized by Google

"B

"Said defendants, Radio Corporation of America and RCA Communications, Inc., and their subsidiaries are hereby perpetually enjoined from hereafter making or entering into any foreign traffic or communications agreement, arrangement, or understanding with any government, company, or person which shall, or which shall be claimed or construed by said defendants or any of their subsidiaries to prevent or prohibit the other contracting party thereto (a) from establishing, or from permitting others to establish, with any other person or persons, such radio circuit or circuits to or from the United States, its territories, or possessions (either direct or indirect) as the other contracting party may desire, in addition to or other than any circuit or circuits provided for by such agreement, arrangement, or understanding, or (b) from transmitting, or permitting to be transmitted, by or over such other or additional circuit or circuits messages which may be specially so routed by the sender.

"C

"The said defendants, Radio Corporation of America and RCA Communications, Inc., being the only defendants involved in said reserved issues as to foreign traffic and communication contracts, arrangements, or understandings, this cause is dismissed as to the other defendants, as to said issues."

JOHN P. NIELDS,
D. Judge.

JULY 2, 1935.

The entry of the foregoing amendment to the decree of November 21, 1932, is hereby consented to.
July 2, 1935.

District Court of the United States, District of Delaware. In Equity No. 793. *United States of America, Petitioner* v. *Radio Corporation of America, General Electric Company, International General Electric Company, Westinghouse Electric & Manufacturing Company, Westinghouse Electric International Company, National Broadcasting Company, Inc., R. C. A. Communications, Inc., R. C. A. Photophone, Inc., RCA Radiotron Company, Inc., RCA Victor Company, Inc., American Telephone and Telegraph Company, Western Electric Company, Inc., General Motors Corporation and General Motors Radio Corporation, Defendants.* Consent Decree.

This cause coming on to be heard this 21st day of November 1932, and the several defendants having accepted service of process and having appeared and filed their answers to the Petition and to the Amended and Supplemental Petition herein, which latter has superseded the original Petition and is hereinafter referred to as the Petition, and the cause having heretofore this day been dismissed as to the General Motors Corporation, General Motors Radio Corporation, American Telephone and Telegraph Company, and Western Electric Company, Inc.;

Digitized by Google

And the petitioner and the remaining defendants (hereinafter in this decree referred to as the defendants) having filed a stipulation with the Clerk of the Court wherein and whereby the defendants consent to the making and entering of this decree;

And the petitioner by its counsel having represented to the Court that this decree will provide suitable relief concerning the matters which the petitioner charges in said Petition, and having requested that this decree be made and entered;

And it appearing that by reason of the consents of the defendants to this decree and the acceptance of the same by the petitioner it is unnecessary to proceed with the trial of the cause or to take testimony therein or that any adjudication be made by the Court of the issues presented by the pleadings herein, other than those hereinafter specially reserved in Section VI hereof;

Now, therefore, without taking any testimony or evidence and without making any adjudication, it is, upon and in accordance with such stipulation and consent, hereby ordered and decreed as follows:

I

The Court has jurisdiction of the subject matter hereof and of all the parties hereto and has full power and authority to enter this decree and the allegations of the Petition state a cause of action against the defendants under the provisions of the Act of Congress of July 2, 1890, entitled "An Act to protect trade and commerce against unlawful restraints and monopolies" and Acts amendatory thereof and supplemental or additional thereto, known as the Federal Anti-Trust Laws.

II

General Electric Company and Westinghouse Electric & Manufacturing Company, respectively, shall divest themselves of the holdings of themselves and their respective subsidiaries of shares of stock of the Radio Corporation of America. This shall be done as follows:

General Electric Company shall within three months from the date hereof divest itself of substantially one-half of all of the holdings of itself and its subsidiaries of the shares of common stock of Radio Corporation of America by distributing such shares ratably to its own common stockholders, or causing them to be so distributed.

The balance of such common stock and the shares of preferred stock of Radio Corporation of America held by General Electric Company and its subsidiaries shall be disposed of within three years from the date hereof, by distributing such shares ratably to its own common stock holders, or causing them to be so distributed, or otherwise disposed of.

Westinghouse Electric & Manufacturing Company shall within three months from the date hereof divest itself of substantially one-half of all of the holdings of itself and its subsidiaries of the shares of common stock of Radio Corporation of America, by distributing such shares ratably to its own stockholders, or causing them to be so distributed.

The balance of such common stock and the shares of preferred stock of Radio Corporation of America held by Westinghouse Electric & Manufacturing Company and its subsidiaries shall be disposed of within three years from the date hereof by distributing such shares ratably to the shareholders of Westinghouse Electric & Manufacturing Company, or causing them to be so distributed, or otherwise disposed of.

The distribution of shares of Radio Corporation of America to shareholders of General Electric Company and of Westinghouse Electric & Manufacturing Company, herein provided for, shall be without any restriction on the full rights of ownership of the several distributees, including the right to dispose of the same as they see fit.

In any disposition of shares of common stock hereby required to be made by General Electric Company and Westinghouse Electric & Manufacturing Company, or its or their subsidiaries (other than for the purpose of distribution to stockholders), they shall not knowingly sell or transfer to any one interest shares of such common stock to an aggregate in excess of 150,000 shares of the present common stock, or stock which at the time may be equivalent to 150,000 shares of the present common stock in respect to the then existing voting rights.

Digitized by Google

Pending the disposition of such stock, General Electric Company and Westinghouse Electric & Manufacturing Company and their respective subsidiaries (other than G. E. Employees Securities Corporation) shall be enjoined from exercising any voting rights with respect to such stock, except that they shall from time to time, as requested by the executive committee of the board of directors of Radio Corporation of America, as such executive committee may then be constituted, give to it or to such person or persons as such executive committee may designate, proxies, with power of substitution, to vote such stock for the election of directors of Radio Corporation of America or for the transaction of ordinary business at any annual or special meeting of stockholders; and as to all other matters as to which the stockholders' action is required, such holders may, at their election, give proxies to such executive committee or, in case any of them fails to do so within ten days before the date set for any such meeting, it shall give such proxies as may be directed by an order of this Court on the application of the defendant, Radio Corporation of America, or the holder of such stock.

General Electric Company and Westinghouse Electric & Manufacturing Company shall report to the Court at the ends of the aforesaid periods of three months and three years, respectively, with regard to their compliance with the foregoing provisions of this Section II.

Except as aforesaid, General Electric Company and Westinghouse Electric & Manufacturing Company, and each of them, are enjoined after the expiration of such period of three months from acquiring or holding, directly or indirectly, any shares of stock of Radio Corporation of America or any of its subsidiaries, present or future; provided, however, that nothing herein contained shall be construed to prevent G. E. Employees Securities Corporation from continuing to hold, and from exercising all rights with respect to, not more than 50,000 shares of A Preferred and 10,000 shares of B Preferred stock of Radio Corporation of America now held by it.

III

General Electric Company and Westinghouse Electric & Manufacturing Company, respectively, shall cause all of their officers, directors, employees, or agents, who are now members of the board of directors, or other boards or committees of Radio Corporation of America, or of any of its subsidiaries, to resign, within ten days from the date hereof, from such boards and committees, and are hereby enjoined and restrained from thereafter permitting any such officer, director, employee, or agent to act as a member of any such board or committee; and Radio Corporation of America and its subsidiaries are likewise enjoined and restrained from thereafter permitting any officer, director, employee or agent of General Electric Company or Westinghouse Electric & Manufacturing Company to become or to act as a member of any such board or committee; provided, however, that for a period of not longer than five months from the date hereof, Owen D. Young and Andrew W. Robertson may continue to serve, at the pleasure of the Radio Corporation of America, as members of the boards and committees of Radio Corporation of America and its subsidiaries, and provided, further, that the Advisory Council of National Broadcasting Company, Inc., so long as its functions shall continue to be merely advisory, shall not be deemed to be a board or committee within the meaning of the foregoing provision.

IV

The defendants are hereby enjoined and restrained from recognizing as exclusive or asserting to be exclusive any license for the enjoyment of patents or patent rights in the following agreements, referred to in the Petition:

1. The Agreement between the Radio Corporation of America and the General Electric Company, dated November 20, 1919, and referred to as Agreement A;
2. The Agreement between General Electric Company and American Telephone and Telegraph Company, dated July 1, 1920, and referred to as Agreement B;
3. The Agreement between the Radio Corporation of America and United Fruit Company, dated March 7, 1921;
4. The Agreement between the Westinghouse Electric & Manufacturing Company and The International Radio Telegraph Company, dated June 29, 1921, and referred to as Agreement D;

Digitized by Google

5. The Agreement between the General Electric Company, Radio Corporation of America, and Westinghouse Electric & Manufacturing Company, dated June 30, 1921, and referred to as Agreement E;

6. The Agreement between General Electric Company and American Telephone and Telegraph Company, dated July 1, 1926, and referred to as Modified Agreement B;

7. The Agreement between General Electric Company, Radio Corporation of America and Westinghouse Electric & Manufacturing Company, dated June 11, 1929, and referred to as Agreement L;

8. The Agreement between General Electric Company, Radio Corporation of America, and Westinghouse Electric & Manufacturing Company, dated January 1, 1930, and referred to as Agreement M;

and are likewise enjoined and restrained from recognizing or asserting the continued existence or the continued obligation of any provision of any of said agreements restricting or limiting the right of a party thereto freely to engage in such business or activities as it may desire or to make such use of its patents or patent rights as it may desire.

V

The defendants are and each of them is further enjoined and restrained from making or entering into any combination, agreement, understanding, or joint endeavor between them or any two or more of them (except between any one defendant and its subsidiaries, or between subsidiaries of any one defendant) or between them or any one of them and third persons, in restraint of interstate or foreign commerce of the United States in violation of the Anti-Trust Laws of the United States by:

(*a*) limiting or restricting the freedom of any defendant to grant licenses under its own patents or patent rights in the fields of radio purposes as defined in the Agreement A-1 attached to the stipulation consenting to this decree, or in the application in fields other than of radio purposes, of radio tubes or tubes having the functional characteristics of radio tubes or of other radio devices or circuits;

(*b*) limiting or restricting the freedom of any defendant or any party to such combination, agreement, understanding, or joint endeavor to engage in trade and commerce in said fields of radio purposes and in said applications either by exchange of exclusive licenses under patents, by agreements restricting or burdening the right of an owner of a patent or patent right to enjoy the same or to grant licenses thereunder, by agreements for division of fields of territory, or by other similar means or devices;

provided, however, that nothing herein contained shall be deemed or construed to prevent any defendant from acquiring or assigning or agreeing to acquire or assign patents or other property or granting or agreeing to grant, or continuing to act under, exclusive rights thereunder or in connection therewith, or taking any other action, if not done to restrict liberty of action as part of a plan or purpose to restrain interstate or foreign commerce of the United States as prohibited by the Anti-Trust Laws of the United States, it being recognized that patents and patent rights may be bought, sold, and transferred as may other kinds of property and subject only to like limitations.

VI

The issues presented by the Petition and the amendment thereto this day filed, with reference to contracts and arrangements and understandings between the defendants or any of them and foreign companies and governments, are specially reserved for trial and determination if that becames necessary, for a period of two and one-half years from the date hereof, such period being allowed for the reason stated in the stipulation consenting to this decree. Said contracts, arrangements, and understandings now existing are not affected by and do not come within the provisions of the previous Sections of this decree. The defendants affected hereby shall at the end of one year from the date hereof render to the Attorney General a written report as to what has been and what is being done with reference to the matters covered by the foregoing portion of this Section VI, and on the request of the Attorney General shall at any time irrespective of the rendering of said report give to him

Digitized by Google

full information respecting such matters. If prior to the expiration of said period of two and one-half years the defendants have succeeded in securing modifications or changes of said contracts, arrangements, and understandings, to meet the objections of the petitioner, the cause shall be dismissed as to the issues so reserved, but otherwise upon the expiration of said period (unless it be shown to the Court at that time that defendants have used due diligence to secure the modification or change of said contracts, arrangements, or understandings and that no reason of public interest exists why such trial should not be further continued, in which case the trial may be postponed to such time as the Court deems advisable) the cause shall forthwith be placed upon the trial calendar next following and shall be set for trial on the reserved issues at the earliest convenience of the Court. If said issues are to be tried the defendants may file their answers to the amendment to the Petition on or before the expiration of said period, but a failure to do so shall not prevent the cause from being placed on the calendar and set for trial as hereinbefore provided. At any time after the said one year from the date hereof the petitioner may, on notice to the defendants affected thereby, apply to the Court to have said period of two and one-half years shortened upon showing to the satisfaction of the Court that the defendants have not been diligent in dealing with said foreign contracts, arrangements, and understandings by negotiation or otherwise, or that there appears no likelihood of their being satisfactorily adjusted.

VII

The term subsidiary as used in this decree means a corporation the majority of the voting stock of which is owned by any of the named defendants.

VIII

Jurisdiction is hereby expressly reserved for the purpose of enforcing or modifying this decree on application of any of the parties hereto. Jurisdiction is further reserved to permit any of the defendants, after the expiration of three years from the date hereof, to apply to the Court for permission to acquire stock in any other of the defendant corporations, or their subsidiaries, which permission may be granted upon proof to the satisfaction of the Court that such acquisition of stock will not tend to defeat the purpose of this decree or violate the anti-trust laws or operate in any manner otherwise inimical to the public interest.

(Signed) JOHN P. NIELDS,
J. Judge.

MEMORANDUM FOR THE CHAIRMAN

(Re: Information available in the library on the subject of patent pools.)

On May 15 you transmitted to me copy of a letter of May 14 from Senator Wheeler, and asked if I had anything on the subject which might be sent him. He desires material and information upon which a legislative study might be made of the patent pool situation—particularly in the electrical appliance and radio fields.

In response I send you herewith, in duplicate, copies of an informal bibliography on the subject compiled in the library in 1931, with two or three recent additions; and copies of an office memorandum, dated February 2, 1933, to the chief examiner, by Attorney-Examiner Edward R. Pruner. Both these papers are in the nature of guides to further study on the subject, rather than definitive source material.

Attention might be directed especially to the following items noted in the bibliography: The three reports of the Federal Trade Commission on kitchen furnishings and domestic appliances, radio industry, and supply of electrical equipment and competitive conditions; hearings before the House Committee on Patents on H. R. 4523, Seventy-fourth Congress, on pooling of patents; the newly formed American Economic Foundation; and to the case of *U. S.* v. *Radio Corporation of America, et al.* The petition, answer, and decree are doubtless available from the Department of Justice. Of possible interest is the following excerpt taken from the list of principal activities now under

Digitized by Google

way in larger trade associations which appears in the introduction to "Selected Trade Associations of the United States, January 1935"; "A number of leading industries have solved the problem of interfering patents or claims, which otherwise might have been ruinous to the development of a new or to the improvement of an existing industry, by various cross-licensing plans."

Respectfully submitted.

HOWARD R. ELIASON, *Librarian.*

Cases

Blount Manufacturing Company vs. *Yale & Towne Manufacturing Company* (166 Fed. 555). There seems to be no way to prevent a patentee from buying up and suppressing competing patents as they appear. It has been suggested that acquisition of competitive patents may be controlled by judicial limitations on the power of assignment clause of the Patent act.

Indiana Manufacturing Company vs. *J. I. Case Threshing Machine Co.* (148 Fed. 21.)

Motion Picture Patents Company vs. *Universal Film Manufacturing Co.* (325 Fed. 398, 399, 800.)

National Cotton Oil Company vs. *Texas.* (197 U. S. 115.)

National Harrow Company vs. *E. Bement & Son.* (57 N. E. 764.)

National Harrow Company vs. *Hench.* (83 Fed. 36.)

Rubber Tire Wheel Company vs. *Milwaukee Rubber Works Company.* (142 Fed. 531; 154 Fed. 358; 210 U. S. 439.)

Standard Sanitary Manufacturing Company vs. *United States* (226 U. S. 20). In this case the ostensible machinery was a trade association which held the patents and of which the greater part of the manufacturers and jobbers (90% in number and purchasing power) were members. In this case price fixing was also present.

Digitized by Google

U. S. vs. *General Electric Company* (272 U. S. 476). "It is well settled, as already said, that where a patentee makes the patented article and sells it, he can exercise no future control over what the purchaser may wish to do with the article after his purchase. It has passed beyond the scope of the patentee's rights."

U. S. vs. *Radio Corporation of America, General Electric Co., American Telephone & Telegraph Co. et al.* Involves pooling and cross-licensing of radio patents. Petition filed May 13, 1930; consent decree entered November 21, 1932. In re petition of Torquay Corporation for leave to intervene dismissed, April 3, 1933.

U. S. vs. *Standard Oil of Indiana et al.* (33 Fed. 617). Decree reprinted, IV CCH., p. 1077.

Virtue vs. *Creamery Package Company.* (227 U. S. 8.)

MEMORANDUM

SUBJECT: PATENT POOLS

This memorandum was prepared in compliance with instructions from the Chief Examiner, and reference is made to letter dated January 18, 1933, addressed to Commissioner Humphrey by Congressman Bloom, of New York, who requested information concerning "how many industries in the United States have a closed licensing system of patent control and/or how many patent pools there are in the United States." The question arises whether the word "closed" as used above was not intended to mean "cross", because "cross-licensing" is a familiar term used in connection with pooling of patents.

On the specific question presented by Congressman Bloom as to the number and size of patent pools in the United States, the writer's search revealed that little or no authentic information exists, although numerous references to the practice of pooling patents were found. Sufficient information on the subject was found to show that the practice of pooling patents is quite common. Of course, this conclusion is partially based upon the number of court decisions centering about patent pools during the past 35 years, to which limited reference is made here. There will be given later a list of patent pools collected from various sources, and while it is not known how many more might be in existence, it is reasonably safe to say that those shown below are being operated at the present time.

Referring briefly to the court decisions rendered on the subject of patent pools, about 20 cases involving such pools have been in the high courts since 1902, when the case of the *National Harrow Company* v. *Bement* (186 U. S. 70) was decided. Most of the court cases arising since 1912 following the famous *"Bathtub case"* (*Standard Sanitary Manufacturing Company* v. *United States*, 226 U. S. 20). Pooling of patents was declared illegal in the *Bathtub case*, and it became a leading case on the subject. Later examples of patent pools came to light in such cases as *Motion Picture Patents Company* v. *Universal Film Company* (243 U. S. 502); the *Shoe Machinery case* (247 U. S. 32); the *Gasoline Cracking case* (*Standard Oil Company of Indiana et al.* v. *United States*, 283 U. S. 163); and the very recent case involving the Radio Corporation of America. A review of practically all of the important cases on patent pools is contained in the *Gasoline Cracking case.*

Little information of value as to the number and size of patent pools was obtained from interviews with officials of the Department of Justice, Department of Commerce, United States Patent Office, the Library of Congress, and the library of the Supreme Court.

In an interview with the acting special assistant to the Attorney General in charge of antitrust work the writer learned that the Department of Justice had no available compilation of existing patent pools or combinations among industries concerning patents. Mr. Hardy, the acting special assistant, stated that while the Department of Justice handled individual cases involving patent pools

Digitized by Google

as each one came before it, no study was ever made of the practice of pooling patents. However, he offered access to the general files of the Department, should it be desired to count such cases involving combinations on patents as might be found. This offer was not accepted. However, the Attorney General in his annual report for the fiscal year 1924 refers (p. 16) to patent pools as follows:

"The work of this division during the year has been directed mainly toward the solution of two major problems arising in the enforcing of the antitrust law. * * * The second problem involves the application of the antitrust law of restraints of trade and monopolies based upon the acquisition of or pooling of competitive patents." And in his annual report for the fiscal year 1925 (p. 20) the matter of pooling patents was again referred to as follows:

"Combination by means of cross licenses under patents are now frequently encountered in the work of the division."

The United States Patent Office could furnish no information on the subject of patent pools. The law examiner and assistant to the Commissioner of Patents pointed out that the Patent Office did not require licenses to be recorded after the manner of recording assignments of patents which is a requirement in the Office. He also pointed out that if there is a practice among industries to pool their patents there would be an attaching secrecy which would prevent publicity being given to them. He stated that the Commissioner of Patents had been asked concerning a similar question which was submitted to him by the Bureau of Foreign and Domestic Commerce of the Department of Commerce and that the Commissioner replied on that occasion that he had no information concerning the number and size of patent pools among industries.

Inquiry was made at the Office of Bureau of Foreign and Domestic Commerce, Department of Commerce, with reference to what study had been made concerning patent pools, and in an interview with Mr. George S. Parsons, business assistant in the Marketing Service Division, it was learned that he made a somewhat superficial investigation of the subject at the Department of Justice, United States Patent Office, and the Federal Trade Commission and had collected a few references to patent pools from trade journals and other magazines. This study was made in compliance with a similar request which Congressman Sol Bloom, of New York, had made to the Department of Commerce. Mr. Parsons stated that when he learned that the Federal Trade Commission had the question under consideration he concluded that the Commission would reply more fully on the subject than the Department of Commerce could do, and prepared a memorandum to that effect for his superior in the Department.

Inquiry was also made to the librarian of the Supreme Court library as to whether or not any compilation had been made which would show the number and extent of patent pools among industries. The librarian informed the writer that the subject was one on which the library had scant information, as they relied on the Patent Office and the Library of Congress for such information. The librarian referred the writer to the United States Patent Office.

A similar inquiry was made to the Library of Congress, and, together with the librarian in charge of the law section, a search was made for authorities concerning the specific subject of the number and size of patent pools. No bibliography has been prepared covering the general subject of patent pools, and the most that could be learned in the law section was that patent pools were referred to in articles appearing in law-school reviews and similar books. However, these works were confined to a review of cases appearing in court decisions, which are already noted above.

Reference was made through the industrial arts and readers' guide indexes to numerous books and periodicals which treated the subject of patent pools, and from this source was obtained practically all the information used in the preparation of the list of patent pools given herein. Many of the books which have been published on the subject of patents contain sections on interchange of patent rights (patent pools), and some of them are worthy of note. These are: Trade Associations, Their Economic Significance and Legal Status, published by the National Industrial Conference Board (1925); the Economics of Our Patent System, by Floyd L. Vaughn (1925); and Trade Associations: Their Legal Aspects, by Benjamin S. Kirsh (1928). These books refer only to the automobile and aircraft pools. However, the volumes named above give a complete review of the decided cases on patent pools. Many other authorities on patent pools and interchange of patent rights as a legal subject might be named, but this is not done, for the reason that practically all books consulted review the

Digitized by Google

court cases on the subject and give little information on patent pools alleged to be operating at the present time.

A memorandum was prepared on January 4, 1923, by the Chief of the Enemy Trade Division of the Federal Trade Commission for Commissioner Thompson on the subject of United States patent laws. This memorandum contained a paragraph on pooling of patents, in which are named the automobile, radio, and airplane industries and also the International Harvester Co. and the Du Pont interests as being involved in patent pools. Although it is stated in the memorandum that "no authentic information on this point could be secured", the memorandum also suggests that pooling agreements would be more or less secret in charatcer, of which Patent Office officials and others disclaimed any knowledge.

The Federal Trade Commission has had before it the question of patent pools forming illegal combinations in restraint of trade or tending to create a monopoly in a number of cases, one of the most important being the *Radio case*, recently closed by a consent decree. A similar case was *Federal Trade Commission* v. *Poor & Moore* (F. T. C. 1–3886–3–1), which was a patent pool on railroad rail anchors. This case was investigated rather extensively, although no action on it was taken by the Commission.

While it is believed that an extensive list of existing patent pools might be prepared if the facts about them could be obtained, it is regretted that the available sources contain so little information concerning their existence and operation. The following list gives those patent pools found in the course of the writer's investigation, as described above, and believed to be in existence today:

Washing-machine industry—Patent pool: Organized by washing machine manufacturers in 1917. The pool was still in existence in 1925, according to the F. T. C. report on house furnishings industry, vol. III, p. 21.

Automobile industry—Pool on development patents: Created by the Automobile Chamber of Commerce and put into execution in 1915, following the long litigation over the Selden patents. Referred to in Trade Associations, published by the National Industrial Conference Board (p. 144).

Aircraft industry: Patent pool formed on April 14, 1931, by the Manufacturers Aircraft Association, based upon a cross-licensing agreement which made patents available to all builders of aircraft, thus preventing litigation and other interferences, as announced in the New York Times, issue of April 15, 1931 (p. 25).

Hosiery—Patent pool about completed: No-run hosiery development to be controlled by patent pool. Article states: "While the initial organization of the patent pool has been practically completed, according to attorney Smith, a 'complete patent monopoly' is contemplated as the first step toward the protecting of mills licensed by the pool. * * * Announced by Textile World (81–713, issue of Feb. 20, 1932).

Petroleum: Distillation Corporation created to hold patents. Stock to be purchased by Standard Oil of New Jersey, Standard Oil Development Co., Atlantic Co., and the Foster-Wheeler Corporation. Announced by National Petroleum News, issue of July 13, 1932 (p. 32).

Petroleum: Hydrogenation patent pool announced in the Business Week, issue of August 17, 1932. The article states: "When Standard of New Jersey acquired from the German Chemical Trust, American rights to the patents for hydrogenation process, the decision was made of mutualizing the patents for the benefit of the whole industry." It was announced that any important refiner may subscribe to stock in the patent-holding company which was created. This patent pool may be the same as the one announced above in the petroleum industry.

German Patents Exchange: May or may not be patent pool. Formed to lease licenses. Development of plan for the international exchange of patent rights on a sale or leasing basis is sought by B. Lillienthal, president of A. G. Fuer, Amerika Interessen. * * * The plan as outlined by Mr. Lillienthal (according to exporters who are reported in Automotive Industry) is the first organized attempt to promote patent interchange, but interest in the subject has been keen for the past year. Announced in Automotive Industry, issue of October 1, 1932.

Lacquer industry: Patent pool referred to in article in the Metal Industry, issue of August 1931 (p. 329), E. I. du Pont de Nemours Co. filed suits against the Glidden Co. on June 18, 1931. The suit was brought because "the Glidden Co. refused to sign the Du Pont lacquer licensing agreement which has been offered to a limited number of lacquer manufacturers."

Digitized by Google

The most enlightening discussion on patent pools is contained in an article which appeared in Sales Management, issue of May 11, 1929, by John Allen Murphy, entitled "Cooperation as a Substitute for Mergers, Cross Licensing as a Preventative of Monopoly." In that article Mr. Murphy states:

"Increasingly, businessmen are wondering if they cannot enjoy some of the benefits of mergers without having to destroy the independence or separate identities of their organization. Numerous companies are finding the materialization of this desire in cooperation. Companies in many of our principal industries are getting together with the aim of achieving through association the same objectives that other concerns are attempting to accomplish through consolidation.

"This cooperative movement is tending in several different directions, but principally, as follows:

"(1) Cooperation for the interchange of patents."

* * * * * * *

The author reviews the situation in business of various industries engaging in interchange of patent rights and names such industries as rayon, lacquer, radio, airplane, paints and varnishes, glass, iron puddling, decorative art products, hosiery, farm machinery, automobile, gasoline, and closes with special mention of radio manufacturers' association's promotion of a cross-licensing plan on patents. Mr. Murphy closes his article with the following statement:

"Let me make it clear in conclusion that all the units in an industry where patent pools exist do not subscribe to the cross-licensing agreement. Hence all patents covering a licensing industry are not in the pool. Anyway, to do its job well, the patent pool does not have to include all patents. The pool can be successful if it includes the principal patent and if the agreement contains representative members of the industry. When thus handled a patent pool acts as a stabilizing force in an industry and as an influence against demoralizing litigation."

Respectfully submitted.

EDWARD R. PRUNER,
Attorney-Examiner.

FEBRUARY 2, 1933.

United States of America, before Federal Trade Commission. Docket No. 1115, in the matter of General Electric Co. et al. Brief in opposition to motion of the respondents to dismiss the complaint. Edward L. Smith, attorney; Robert E. Healy, chief counsel.

INTRODUCTORY

The motion of the respondents presents, broadly stated, three points of law upon which they rely and certain propositions of fact. The propositions of law may be stated to be these:

(1) That the Commission has no jurisdiction, because the acquisition of property, through the interchange of patent licenses or otherwise, is not within the jurisdiction of the Commission.

(2) That if the cross licenses bring about an unlawful restraint of trade, the only law violated, if any, would be the Sherman Act; for it is claimed section 5 of the Federal Trade Commission Act does not confer a jusisdiction coextensive with that of the courts to enforce the Sherman Act, and because, it is also claimed, the Commission has only power over involuntary restraints of trade as distinguished from voluntary restraints.

(3) That since traffic contracts between the Radio Corporation of America and foreign governments in some cases, and between the Radio Corporation of America and companies in foreign countries in other cases, are challenged by the complaint, those governments or companies are indispensable parties.

To these points of law may, perhaps, be added, although it is not expressly stated to be such, the claims that the Federal Government assisted in the organization of the Radio Corporation; that the cross-license agreements attacked by the complaint were entered into with the knowledge of an officer of the Navy; and that certain of the contracts were filed with Attorneys General of the United States.

The matters of fact upon which the respondents rely may broadly be stated to be these:

Digitized by Google

1. That the parties respondents were not competing but supplementary in their relations to each other.

2. That the cross licensing furnished the solution of a patent deadlock.

3. That certain benefits to the public have resulted from the combination of the respondents, which benefits would not have been brought about if the attacked agreements had not been entered into.

As a part of the issues of fact raised by the respondents may be considered the point hereinabove mentioned, namely, that the Radio Corporation was organized and the combination of respondents brought about by the Federal Government, and that there has been approval, either express or implied, by successive Attorneys General of the United States, of the agreements charged by the Commission to be in violation of section 5 of the Federal Trade Commission Act.

All of these points, both as to law and as to fact, will be answered, the points of fact by way of setting forth the activities of each company entering into the combination prior to the cross-licensing contracts, the advances made in the art up to those times, and the position of each of the companies entering into the cross-licensing agreements.

We will point out that the record shows conclusively that the companies entering into the combination were competitors, both actual and potential; that competing devices and competing patents (rights to exclude others from manufacturing, using, or selling devices and apparatus capable of the same uses) were brought into the combination; that the combination has had the effect of retarding the art instead of advancing it; that the Federal Government did not participate in any way in the organization of the Radio Corporation, or approve, expressly or by implication, any of the agreements; that at the time that the cross-licensing agreements were entered into, the entire radio field was open, the fundamental patents having expired, to whomsoever desired to enter the field; that the conduct of the respondents has been such as to negative the claim of Government participation if such a claim would be a legal defense to this proceeding, which we submit it is not; that even though the patents involved were supplementary, the contracts bring about illegal restraints in violation of the Federal Trade Commission Act.

The record (p. 113) shows the filing of a petition by the United Fruit Co. before the taking of testimony was begun, which petition was in the nature of a motion to dismiss. On the hearing of the motion the restraints as to the United Fruit Co. in the contracts involved were pointed out.

The motion was overruled by the Commission on October 13, 1924 (record, p. 116). On October 30, 1925, before the taking of testimony was begun (record, p. 129), a motion was filed by all of the parties to dismiss the complaint. The motion was referred by the trial examiner to the Commission, which directed the trial examiner to hear arguments on the motion and to pass upon it. On January 11, 1926, this motion was heard (record, pp. 493–549). Upon the conclusion of the arguments the trial examiner overruled the motion.

All of the contracts set out in the complaint and all of the matters of corporate record set out in the complaint are established. The pending motion being in the nature a demurrer to the evidence, we do not deem it necessary, insofar as the facts are concerned, to discuss the facts to the degree which might be required if the case were before the Commission on the entire proof. Therefore, the facts will be presented in the brevity which the nature of the motion requires; and we submit that this record shows directly and without uncertainty, facts legally sufficient to justify this Commission to enter its order in this case. (*Indiana Quartered Oak Co.* v. *Federal Trade Commission*, not yet reported.)

I. Argument on the Facts

United Fruit Co., Wireless Specialty Apparatus Co.

The record discloses that the United Fruit Co. through its subsidiaries, the Tropical Radio Telegraph Co., a wireless operating company, and the Wireless Specialty Apparatus Co., a manufacturing company, was a strong factor in wireless. The stations which the United States Fruit Co. had, prior to entering into the attacked cross licenses, were located at the following places and were constructed in the years indicated: Cape San Antonio, Cuba, 1908 or 1909; Swan Island, Caribbean Sea, 1907 or 1908; Santa Marta, Colombia Station, 1911 or 1912; Bocas del Toro Station, 1904 or 1905; Limon, Costa Rica,

Digitized by Google

1904 or 1905; Bluefields, Nicaragua, 1905 or 1906; Rama, Nicaragua, 1905 or 1906; New Orleans, 1912; Burrwood, 1912 (record, pp. 1024–1025). These stations communicated with ships as well as with shore stations. The communication from these stations was as follows:

The Bocas del Toro station communicated with Limon, Costa Rica; the Bluefields station communicated with Limon, Costa Rica, and occasionally with Bocas; the Limon station communicated with Bluefields and with Bocas and occasionally with Swan Island, depending on conditions; the Swan Island station communicated with Santa Marta and with ships, and, as occasion arose, Bluefields and Limon and Bocas del Toro also communicated with ships. Swan Island communicated with ships and with Santa Marta and with New Orleans. Rama, Nicaragua, communicated with Bluefields, Nicaragua, and Limon, Costa Rica; Cape San Antonio, Cuba, communicated with ships and with New Orleans and with Swan Island; New Orleans communicated with Cape San Antonio and with Swan Island and with Burrwood, and Burrwood communicated with New Orleans and with ships. Swan Island communicated with Belize, British Honduras, with Tela, Honduras, with Puerto Cortez, Honduras, with Celba, Honduras, with Puerto Castilla, Honduras; Limon communicated with Colorado Bar, Costa Rica, and Bluefields also communicated with some station at a mine up in Nacaragua (record, pp. 1027–1029).

At places where the United Fruit Co. had wireless stations there were no other wireless stations (record, p. 1029). An idea of the scope of the business of the United Fruit Co. in wireless can be gathered from the fact that up to 1917, the United Fruit Co. had invested about $2,000,000 in wireless (record, p. 1045), and from the further fact (record, p. 1051) that next to the Marconi Co., the United Fruit Co. in 1917, probably was more heavily interested financially in radio than was any other corporation.

In 1917, at a hearing before the Committee on Merchant Marine and Fisheries of the House of Representatives, Sixty-fourth Congress, second session, George S. Davis, general manager of the radio department of the United Fruit Co. (record, p. 1055), said: "We now have under contract, high-powered stations which, when completed, will probably be more modern than any other station in the country, including those of the Government."

At a hearing before the Committee on Merchant Marine and Fisheries of the House of Representatives, Sixty-fifth Congress, third session, on H. R. 13159, the radio manager of the United Fruit Co., in speaking of the claim of the American Marconi Co. that it intended to acquire 100 percent of the communication business, said this: "There has been a great deal of discussion before the committee about the monopoly of radio. Mr. Nally said he hoped to obtain 100 percent. I do not like to tear down a house of cards; but I will assure you, or anyone, that the United Fruit Co. would have prevented, through the operation of its system, the entire monopolizing of the radio business, and will, if this bill is not passed" (record, p. 1069).

The purpose of the United Fruit Co. to continue in the wireless field in competition with the Radio Corporation of America after that corporation was formed, but before the United Fruit Co. entered into the cross-licensing arrangement with it, appears from the fact (Commission's exhibit 128) that the Tropical Radio Telegraph Co., with a number of other wireless companies, was endeavoring to purchase or lease the Siasconsett station of the Navy Department.

Commission's exhibits 126 and 127 show the patents and applications belonging to or licensed to United Fruit Co., the Tropical Radio Telegraph Co., and the Wireless Specialty Apparatus Co. The patents are about 110. The applications are approximately five in number. The interest of United Fruit Co. in radio is further shown by Commission's exhibit 6, which is a publication of the Wireless Specialty Apparatus Co., entitled "Radio equipment", copyrighted in 1919, although written in 1918. From this book it appears that the company was manufacturing transmitters, battery-charging panels, motor generators, low-tension control panels, transformers, high-tension radio panels, antenna switches, lighting switches, radio pack equipment (by this is meant a complete two-way radio unit capable of sending as well as receiving radio messages), generators, receivers, detectors of various kinds, vacuum-tube receivers, amplifyng transformers, vacuum-tube sockets, generators for transmitters, telephones, condensers, variable air condensers, rotary spark gaps, constant impedance audibility meters, and wireless telephone transmitters. The company had built wireless telephone transmitters as early as September 6, 1902.

Digitized by Google

"The 50 or more patents issued since 1906 to the Wireless Specialty Apparatus Co. control a wide range of devices and circuits used in radio telegraphy and telephony" (Commission's exhibit 6, pp. 66).

We quote the following from Commission's exhibit 6:

"The Wireless Specialty Apparatus Co. of Boston resulted from a partnership formed in 1906, by Messrs. Greenleaf Whittier Pickard and Philip Farnsworth. Mr. Pickard, after years of research, had solved the problem of aural reception of radio signals. His inventions in the field of radio detectors and receiving apparatus retired the unreliable coherer forever from the art. The purpose of the partnership was a formation of a legal and engineering combination to patent, market, and manufacture the fruits of Mr. Pickard's inventive genius. In 1907, Col. John Firth was admitted to the organization, and the Wireless Specialty Apparatus Co., Inc. At that time its sole capital was the talent possessed by its three partners in their respective fields.

"The first order received by the company was in February 1907, when the Signal Corps of the United States Army ordered 35 silicon detectors.

"Between 1907 and 1912 Mr. Pickard continued his research. He developed and patented all the successful forms of crystal detector apparatus and circuits in use today. He also patented the loop direction finder and radio compass in 1908, and the circuits in use at the present time for static elimination and unilateral direction finding. He patented, as well, a mass of specific manufacturing and design solutions for existing radio problems. The radio pack set for the United States Signal Corps was designed and manufactured in large quantities during this period. Our I-P-76 receiver is the most widely known radio receiver in the art.

"In 1912, when Colonel Firth disposed of his interest, the company's engineering, manufacturing, and sales organizations were moved from New York to Boston, Mass., where they, as well as the general offices of the company, are now located.

"The growth of the company from 1912 on was very rapid, and its business reached a great magnitude. It was during this period that the United Fruit Co. decided to equip all of the vessels of its Great White Fleet and its shore stations in Central and South America and the West Indies with radio apparatus designed and manufactured by the Wireless Specialty Apparatus Co.

"The United Fruit Co., as is well known, maintains an extensive radio communication service not only on its great fleet of ships but in the countries of North, South, and Central America and the West Indies, where, owing to the severe atmospheric conditions prevailing during 9 months out of the year, it is very difficult to maintain reliable radio communication. Radio apparatus for this service must be designed not only to withstand the ravages of tropical heat and dampness but to function under the most severe physical and electrical conditions imaginable and still retain the highest possible degree of selectivity in order to 'work through' tropical static.

"The Wireless Specialty Co.'s apparatus installed at all of the United Fruit Co. tropical stations and on the steamships of its Great White Fleet has successfully met all of these conditions, and more than anything else has contributed to the latter company's success in maintaining radio service of unequaled reliability to and from its ships and between the countries of Central and South America and the West Indies and the United States.

"The marked superiority of the United Fruit Co.'s radio service, largely carried on through the medium of radio equipment furnished by the Wireless Specialty Apparatus Co., led to our equipment being installed on many other steamships, and the Wireless Specialty Co. equipment became standard radio apparatus the world over.

"At the beginning of the war over 90 percent of the commercial ship and shore stations, as well as the vast majority of experimental and research stations, in the Western Hemisphere were equipped with crystal detecting and receiving apparatus either sold directly by us or licensed under our patent designs. By 1917 the products of the Wireless Specialty Apparatus Co. were being used in every country of the globe.

"Then came the World War, and the company exerted all of its energies toward the design and manufacture of radio equipment for the United States and allied governments. The same pre-war superiority of the Wireless Specialty apparatus was maintained during the stress of war. Tremendous quantities of high-grade apparatus were developed and built for the United States Navy. Code messages that guarded our crusaders across the submarine-infested Atlantic were continuously transmitted and accurately received during this

Digitized by Google

stirring period by means of the equipment furnished to the Navy Department by the Wireless Specialty Apparatus Co. Our citizen soldiery, when hundreds of miles off the coast of Europe, felt the relief brought by the presence of the misty horizon of United States and allied destroyers summoned by radio. If they could have looked into the radio rooms of the transport flotilla they would have seen the peacetime product of the Wireless Specialty Apparatus Co. functioning smoothly in its new war dress, guarding lives with the same effectiveness with which it served the commerce of the United States and Central and South America through the medium of the United Fruit Co.'s Great White Fleet and this company's chain of radio stations in the countries bordering the Gulf of Mexico and the Caribbean Sea.

"During the war the research and manufacturing organizations passed through another expansion phase. Five additional manufacturing plants were equipped. The total value of the apparatus manufactured by the company during this period is measured in millions of dollars.

"At the present time the Wireless Specialty Apparatus Co. is the second largest radio engineering and manufacturing organization in the Western Hemisphere."

* * * * * * *

"We are in an excellent position to develop and build special radio telegraph and telephone equipment and condensers. We will gladly quote from your drawings and specifications."

* * * * * * *

"In the 6 years between 1906 and 1912 the Wireless Specialty Apparatus Co. built a series of special transmitters for the needs of its research organization. Along with this work was carried on the development of condensers and the various units which compose a transmitter, such as coils and switch mechanism.

"In 1912 two types of transmitters were offered for commercial and military purposes. These sets were, respectively, a portable set for field service and a 1-kilowatt panel transmitter for ship and shore stations. The pack set designed by the Wireless Specialty Apparatus Co. combined a complete transmitting and receiving equipment in one chest. At this stage of the radio art it was the practice to install the units comprising the transmitter separately on the walls, ceiling, and floor of the operating room, and the 1-kilowatt transmitter developed as a result of our experience with pack sets was the pioneer transmitting set in which all transmitting units were combined and permanently located upon a single panel board. This provided a compact unit for centralizing the control of the prime mover, the 500-cycle system, and the radio-frequency circuits. With this type of equipment, wave length could be rapidly changed and power easily varied. The adjustments thus became greatly simplified. Since this time practically all radio transmitters have been built on the panel-board principle."

* * * * * * *

"Some of the other important inventions and patents owned by the Wireless Specialty Apparatus Co. are:

"The standard receiving inductance with two interconnected switches for control by large and small units.

"Leyden jar condensers in which the conducting surfaces are electrolytically deposited copper or other metal.

"Basic patent for use of the combination consisting of a 500-cycle generator at the transmitter and rectifying detector with telephone at the receiver.

"Various forms of sheet condensers for spark circuits, protective condensers, and various other uses.

"Constant impedance audibility meter.

"Telephone receivers with protective spark gaps.

"The so-called inductance ticker system of receiving radio signals.

"Testing apparatus for detectors and receiving circuits, using oscillations from a buzzer or other source.

"Rotary tone condenser reception.

"Various circuits: The apparatus and methods for transmission and reception, including the standard system involving the transmission of waves in groups of high frequency, the rectification of the received currents, the charging of a condenser and discharging in through the telephones.

"Various practical forms of static eliminators, including those using the loop antenna.

Digitized by Google

"A large number of patents on important phases of radio communication are pending. This is indicative of the policy of the company to maintain its supremacy as a specialist in the development of the radio art.

"The accompanying photographs show the earliest successful apparatus for the transmission of speech by means of wireless waves, known to us.

"On September 6, 1902, in Boston, Mass., Mr. Greenleaf Whittier Pickard used this equipment in a demonstration before a group of telephone engineers, including Messrs. H. J. W. Fay and H. W. Shreeve, under the auspices of the American Telegraph & Telephone Co. (Bell System). The receiver was of special interest, for it included the first Wollaston-wire 'electrolytic' detector. The transmitter was of the spark type, using discharges above audible frequency.

"This 1902 installation was not of commercial nature, of course, but it was operative radio telephony and demonstrated the future possibilities."

These statements which appear in the publication of the Wireless Specialty Apparatus Co. are not by any means exaggerations, for the record establishes the truth of the statements (record, pp. 1080–1086).

The competition which existed between the Radio Corporation of America from its organization and the United Fruit Co., both in the communication field through the Tropical Radio Telegraph Co., and in the manufacturing field through the Wireless Specialty Apparatus Co. was eliminated in 1921 by the contracts mentioned in paragraphs 15 and 16 of the complaint, in evidence as Commission's exhibits 89, 90, and 129. By one of these contracts the General Electric Co. acquired one-half of the stock of the Wireless Specialty Apparatus Co., owned by the United Fruit Co. (United Fruit Co. owning 98 percent of the stock) and later but during the taking of testimony in the proceeding, the General Electric Co. acquired from the United Fruit Co. its remaining stock in the Wireless Specialty Apparatus Co. These contracts will be briefly summarized, as will other important contracts entering into the combination hereinafter.

THE INTERNATIONAL RADIO TELEGRAPH CO. AND THE WESTINGHOUSE ELECTRIC & MANUFACTURING CO.

That part of the transcript of the record (pp. 579–763) containing the testimony of Samuel M. Kintner (vice president of the International Co. until its dissolution and manager of the research department of the Westinghouse Electric & Manufacturing Co. since February 1922), establishes conclusively that through the International Radio Telegraph Co. and the Westinghouse Electric & Manufacturing Co. there was potential and actual competition in every branch of the wireless field between the Radio Corporation of America, General Electric Co., American Telephone & Telegraph Co., and United Fruit Co., and their subsidiaries, on the one hand, and Westinghouse and International, on the other. The Commission will remember that the Westinghouse Co. and International Co. were not brought into the combination until June 30, 1921, prior to which time the Radio Corporation, the General Electric Co., the United Fruit Co., and the American Telephone & Telegraph Co., and their subsidiaries, had combined.

The activities of the International Radio Telegraph Co. were not as well known to the general public as they were to those in the wireless communication field and in the scientific field. Prior to its dissolution, which was brought about after it conveyed its assets to the Radio Corporation of America, it had been in existence almost 20 years. It built and sold wireless apparatus as early as 1909 and 1910. This apparatus consisted of shore stations complete and ship sets, both transmitting and receiving (record, pp. 585–587). It had in its employ more men of professional prominence engaged in radio research than were employed by any other radio organization in this country, if not in the world (record, 598). Among these was Professor Fessenden, whose testimony in this proceeding will hereinafter be referred to at some length. Kintner candidly states that Fessenden is one of the outstanding figures in the development of radio (record, p. 601).

The company as early as 1902, had invented wireless telephony; it had given public demonstrations of the system as early as 1903 (record p. 601). Of the demonstrations, Kintner said: "I know from the records that he (Fessenden) had made tests to prove that it would operate prior to that time" (1903)[1] (record, p. 601).

[1] Parenthesis ours.

Digitized by Google

As early as 1906, the company had succeeded in developing a high frequency alternator for the "transmission in the most efficient ways" and which was also necessary for the best operation of radio telephone. When Kintner was asked what effect the progress of his organization had upon the utility of the Marconi system then in use, he said:

"It did not have any immediate effect, but it demonstrated the workability of the system, which, prior to that time, was looked upon as rather a fanciful conception" (record, p. 603).

When he was asked his opinion as to the relative merits of the Marconi Co. system and the system of his organization as early as 1906, he said that the system developed by the organization with which he was then connected (that is, a predecessor of the International Radio Telegraph Co.) was superior to the system of the Marconi Co. (record, p. 603).

The International Radio Telegraph Co. went through several reorganizations and changes of name. It was early known as the National Electric Signalling Co., but in our reference to the activities of the companies up to and including the acquisition of the assets of the company by the Radio Corporation of America, we will refer to it as the International Co.

In 1906 a demonstration of the International system of radio telephony was given to a number of scientists and engineers, including several engineers of the Bell Telephone Co. As early as 1906 the International Co. had conducted trans-Atlantic communication between its station at Brant Rock, Mass., and its station at Machrihanish, Scotland. That was the earliest recorded two-way trans-Atlantic communication, although earlier than 1906 the Marconi Co. had conducted one-way trans-Atlantic communication (record, pp. 606–608).

As early as 1909, or early in 1910, the International Co. had contracted with the Navy Department for the construction and equipment of, and later under that contract manufactured and equipped, the Navy Arlington Radio Station. The equipment was accepted after acceptance tests proved the worth and workability of the apparatus (record, p. 609). Equipment was furnished as early as 1913 for powerful transmitters for Navy cruisers. As early as 1911, it operated a radio station located at the Bush Terminal in New York. This station was so well equipped that it could handle all of the New York radio traffic, both incoming and outgoing (record, p. 773).

Perhaps the situation of the International Co. in the communication field is best described in a statement made by Kintner on December 22, 1920, before the House Committee on Merchant Marine and Fisheries, as follows:

"At present we are operating five ship-to-shore stations on the Atlantic coast from Cape May to Siasconset, Mass., and are now engaged in the construction of our first transatlantic station up in Maine" (record, p. 680).

It should be stated here that the contemplated trans-Atlantic station mentioned by Kintner was the one with which the Westinghouse Co., through the International Co., intended to enter the transatlantic communication field in competition with the General Electric Co. and the Radio Corporation of America.

The International Co. was the owner of a large number of patents. These appear as annexed exhibit 1 to Commission's exhibit 7. These patents, as is apparent from the description of them, cover all of the phases of wireless telegraphy and wireless telephony, as, for instance, antenna, tubes, towers, tuning antenna, methods for increasing efficiency, sustained waves, location of ships by triangulation, high frequency, and musical spark operation, receiving on telephone, broad radio telephone apparatus, radio telephone method, signaling, effecting modulation, simultaneous sending and receiving on same aerial, high-speed sending and phonograph recording, high-speed secret sending, high-speed rotating disc electrode gap, signaling by varying the frequency, inserting signaling, secrecy operation and interference prevention, tuning arrangements involving several circuits, high-power station design and accessories, method of controlling spark gaps, beats method of operation, group-frequency selection, signalling from aeroplanes, system for locating direction from which signals are coming, directional-wave projection, operation by earth component of waves, duplex operation, generation of oscillations, impulse excitation method, general distribution of news by sound writing pictures, receivers, interference prevention, relay method for operating sounder, simultaneous variation for tuning and coupling, detector current operated constantly receptive, hot-wire barretter detector, liquid-barretter detector, form of crystal detector, static type receiver, receiver operating by change in frictional contact, vacuum tube containing rarified helium gas, operation in receiving, high-speed recording, re-

Digitized by Google

ceiver circuit arrangement, hysteresis forms of detector, crystal rectifier detectors, electrolytic detectors, series of coupled resonant circuits to secure selectivity, static reducing, detector operating by change of surface tension, tuners, coils for intense fields, relay for sounder, special form of coherer, variable tuners, finder for pick-up of spark signal, detail of design for high frequency alternator, compressed air condenser, wave chute, static telephone receiver, conducting sheet around lead-in wires, method of tuning requiring special inductance, details of gap construction employing critical distance phenomena, amplifying telephone relay, means for driving high-frequency alternators, device for generating oscillations, multiple series gap, spark gaps, condensers, high-speed constant torque prime mover, ultra-high frequency alternator, lightning arrester, multiple line signaling, telephone transmitter, galvanometer, break-key, wave meter, method of forming stranded conductor for radio work, form of contact members, special construction of telegraphone wire, receiving transformer, circuit arrangement for amplifying, remote-control switch.

It is apparent, therefore, that the patent situation of the International Co. was so strong as to cover the entire field of wireless telegraphy and wireless telephony and that when these patents were pooled with the patents of the other companies entering into the combination attacked by the complaint, they were joined with patents covering the same fields. In other words, the patents of the International Co. were a part of the vast pool of competing patents.

The patent situation of the International Co. was further strengthened by reason of a license agreement between it and Armstrong (Commission's Exhibit 15). This license agreement gave the International Co. the right to use the Armstrong feed-back circuit or regenerative circuit for the following class of stations: (*a*) Coastal land radio stations carrying on ship and shore work at comparatively low powers and for short distances; (*b*) intermediate or moderately powered stations carrying on business principally in competition with wire telegraphy and wholly within the United States over distances not exceeding 1,500 miles; (*c*) high-powered or long-distance stations for carrying on such communication as transoceanic, transcontinental, intercontinental, or, in general, operating in competition with long distance cables or transcontinental and long-distance land lines. Therefore, insofar as the use of the Armstrong regenerative circuit patents might have been necessary for the successful operation of wireless telegraphy and telephony, the International Co., by reason of this license agreement of May 12, 1920, was in position to use those patents.

Previously, that is as early as October 15, 1914, the company had entered into a cross-licensing arrangement with the Marconi Co. of America (Commission's Exhibit 15). The company was further fortified by reason of the fact that on August 5, 1920, it secured from the Navy Department (Commission's Exhibit 25) a license to use the Poulsen arc patents which the Navy Department (Commission's Exhibit 25) purchased, with other assets, from the Federal Telegraph Co. of California for $1,600,000. These patents appear as exhibit A of Commission's Exhibit 25, and aggregate almost 200.

The record in this case establishes beyond any question that with these Navy patents alone, the International Co. and its successor to the patents, the Westinghouse Co. (see Commission's Exhibit 25) could have, without the use of any other patents, conducted commercially successful trans-Atlantic, trans-Pacific, transcontinental, and intercontinental communication in competition with the Radio Corporation of America; for it was by means of arc apparatus that communication, that is to say, reliable, dependable communication was had between this country and Europe prior to the organization of the Radio Corporation (record, pp. 624–671).

The best proof of our claim in this respect is in the fact that (Commission's exhibit 94, Jan. 8, 1921) an agreement between the Federal Telegraph Co. of California and the Government of China for the installation and operation of radio stations in China and in America to communicate with one another by means of this arc system, employing exactly the same patents as those licensed to the International Co. by the Navy Department, was assumed by the Federal Telegraph Co. of Delaware which was organized by the Radio Corporation of America and the Federal Telegraph Co. of California.

The history of the International Co. from 1919, when the General Electric Co. went into the wireless field through the Radio Corporation of America, is very interesting. On August 5, 1920, the new International Co. secured its license from the Navy Department. On May 12, 1920, the International Co.

Digitized by Google

had secured its license from Armstrong. Then, or about that time, there arose some real interest in the activities of the International Co. General Electric Co. made an offer to purchase the company (record, pp. 661–663) but on June 21, 1920 (Commission's exhibit 8) the Westinghouse Co. agreed to subscribe $2,500,000 in cash for the capital stock of a new company which was to take over the assets of the old International Co. On the same day, June 21, 1920 (Commission's exhibit 9), the International Co. granted to the Westinghouse Co. an exclusive license, with a right to grant sublicenses, under all of the patents of the International Co. then obtained, or which it might obtain prior to January 1930. By this contract, the International Co. was to embark into the communication business. The Westinghouse Co. was to do the manufacturing, but agreed not to sell patented devices or apparatus to business competitors of the International Co. for use in the field of the International Co. About this time Kintner went to Europe in behalf of the Westinghouse Co. and in behalf of the International Co. in order to negotiate traffic contracts with foreign stations (record, p. 697). Prior to that time, the International Co. has made tests of its ability to receive messages destined from stations located in foreign countries, particularly European countries, to this country. Kintner found that the Radio Corporation of America had entered into such traffic contracts in Europe as to make it impossible for traffic contracts to be entered into with European companies or countries satisfactory, from the standpoint of revenue, to the International Co. (record, p. 696).

The intention of the company to embark seriously into trans-Atlantic communication field, and other radio fields, is further apparent from this testimony of Kintner (record, pp. 683–684):

"Question. What other plans did the International Radio Telegraph Co. have in the communication field upon its organization in the year 1920?

"Answer. Well, its plans in communication consisted of the building of one transoceanic station and the building of a sufficient number of stations to engage in the ship-to-shore business. That was as far as their plans extended at that time.

"Question. Did it at any time later than June 1920, have additional plans or aims in the communication field?

"Answer. No.

"Question. Did it intend or plan to broadcast weather reports as part of its ship-to-shore service?

"Answer. Yes.

"Question. And what other things, as part of its ship-to-shore service, did the International Co. plan?

"Answer. Well, its ship-to-shore service would consist of the handling of messages for the shipowners in the navigation of their vessels in the transmission of commercial messages which originated with the passengers or on shore and addressed to the passengers, and, in order to popularize the service, they proposed to send news items and things of that kind, which could be used by the ships in bulletins or in little newspapers published on the ships, for the benefit of the passengers.

"Question. Did the company intend to or plan, or did you intend to or plan, to give that information to others than those who were using your shore-to-ship service? Did you intend to give that information generally to whomsoever might listen?

"Answer. I do not recall the details of that. It was quite likely that it was addressed to our own ships.

"Question. Do you remember having said that you intended to be a sort of a town crier from Pittsburgh, with a voice that could be heard for several hundred miles?

"Answer. That, I think, was in connection with the Pittsburgh broadcasting service rather than the ship service.

"Question. Were the radio activities of the Westinghouse Co. centered in the International Radio Telegraph Co. after June 1920, or did the Westinghouse Co., under its own name, do its radio work?

"Answer. All the communications in a public-service connection were conducted by the International Radio Telegraph Co., and all communications between the factories of the Westinghouse Co. and their own interests in parallel with telegraph lines were conducted by the Westinghouse Co. In addition to that the Westinghouse Co. started up a broadcasting activity.

"Question. When was that?

Digitized by Google

"Answer. Their first broadcast was started in the reporting of the Presidential election in 1920.

"Question. Was that the first broadcast station, as we now know broadcast stations to be, in this country?

"Answer. That was the original broadcasting station, and that night was the beginning of that regular service."

The Pittsburgh broadcast station of the Westinghouse Co. having proved such a great success, the company constructed another at Newark, N. J., at about the same time. Another broadcast station at Springfield, Mass., and still another at Chicago were planned (record, p. 696). That the Westinghouse Co. was the first of the companies in this combination to conduct broadcasting regularly is further apparent from the cross-examination of Mr. Kintner (record, pp. 632–633). This testimony also shows the sale and use of radio receiving sets as early as 1919, 2 years prior to the time when the Westinghouse Co. entered into its arrangement with the Radio Corporation of America, the telephone company, and the other respondents. (See also record, p. 1595.)

"Question. Can you describe in any great detail what he was doing, if anything, in the way of broadcasting at his home before the erection of the broadcasting station at the East Pittsburgh works?

"Answer. Late in 1919 he started telephony in his experiment and sent out messages of speech and phonograph records, and things of that kind, and later a number of people who listened in on the signals that he sent wrote to him in considerable number and even supplied him with new phonograph records to play for them, and he was finally persuaded, on account of the number of requests that he received, to undertake this broadcasting at regular intervals; so he agreed to do this every Wednesday and Saturday night at certain times. This kept growing in size and numbers of requests until, by the summer of 1920, the late summer of 1920, some of the department stores in Pittsburgh were carrying radio receiving sets of approved types, which were advertised as suitable for listening to Mr. Conrad's concerts. It was as a result of this publicity that the attention of Mr. Davis, vice president of the Westinghouse Co., conceived the idea of broadcasting as we know it today; and I recall very distinctly his remarking to Mr. Conrad that he was going to take his station away from him and put it in East Pittsburgh and start a regular service every night in the week and advertise the program that he was going to put out and run it like a newspaper was run. The station was hastily put together and was in operation just 1 or 2 days preceding the election in 1920; and I remember very distinctly the fears we had that the station might fail in carrying through the program that night, so Mr. Conrad had his station all ready to go on the air in the event that such an occurrence happened."

The sum of $2,500,000 paid by Westinghouse Co. for capital stock of the International Co. was not the only financial investment of the company in the wireless field. It purchased from Armstrong and Pupin the feedback or regenerative patents, together with the other patents which appear in Commission's exhibit 14⅓; under one condition of that option the commitment of the Westinghouse Co. was $335,000, while under another condition the commitment was $535,000.

The Westinghouse Co., therefore, we have shown, was engaged in broadcasting, had purchased the patents which enabled it to manufacture and sell broadcast receivers. It had on hand a supply of vacuum tubes (record, p. 746). It was in a position to enter the wireless field in competition with the Radio Corporation of America, and it was in a position to enter into the field of wireless telephony; that is, commercial wireless telephony in competition with the wire telephony system of the American Telephone & Telegraph Co. That all of this is so must be apparent from the fact that in the short period of 6 months, namely, from May 22, 1920, to November 4, 1920, it committed itself to the expenditure of over $3,000,000.

All of this competition, both actual and potential, was eliminated on June 30, 1921, when the Westinghouse Co. entered into the cross-licensing arrangement with Radio Corporation of America, the General Electric Co., and other respondents, and when, on the same day, the International Co. sold all of its assets excepting its patents (these having previously been sold to the Westinghouse Co.) to the Radio Corporation of America for 1,000,000 shares of preferred stock of the Radio Corporation of the par value of $5 each and for 1,000,000 shares of its common stock without par value.

The Commission will find in Commission's exhibit 14⅓ the mention of certain licenses which had previously been granted by Armstrong; these license

Digitized by Google

contracts are in evidence. The patents licensed were sufficient for the construction of complete radio receiving sets (record, p. 3,734), and through these licensees there sprung up, upon the advent of broadcasting by the Westinghouse Co., a market for radio receiving sets beyond the market which had previously existed, the previous market having been to so-called amateurs. Among the names of the licensees will be found the Precision Equipment Co., whose name was changed to the Crosley Manufacturing Co., which produced well-known radio receiving sets. Another is A. H. Greebe & Co., which manufacture the well-known Greebe sets. These sets were manufactured and sold by all of these licensees prior to June 1921, when the Westinghouse Co. entered into its arrangement with the Radio Corporation of America. The record shows that thereupon suits were commenced by the Westinghouse Co. against the licensees based upon the claim that the licenses did not permit the licensees to sell sets to the general public. Many of these suits were settled by supplementary agreements between the Westinghouse Co. and the licensees expressly conferring the right to sell to the public generally but increasing the royalty to a much higher rate than the royalties called for in the original license agreements. (See Commission's exhibit 162.)

During the course of the oral argument made by the respondents in support of their motion to dismiss, and in their briefs, great stress is laid on the tube situation and upon the alleged need by the Westinghouse Co. of tubes. The record in this case shows conclusively—and it is not contradicted, nor was the witness cross-examined—that prior to the Westinghouse cross-licensing arrangement with General Electric Co., the former had developed receiving tubes and transmitting tubes which it felt were safe as far as infringement of the DeForest and other patents was concerned, and that arrangements for the distribution of these tubes were being negotiated by the Westinghouse Co. and distributors. This appears (record, p. 2,209) from the testimony of C. B. Cooper, one of the outstanding men in the radio industry:

"Question. Do you remember whether you were told by Weston or somebody else that some of the Westinghouse officials thought that the receiving tube would not infringe existing patents?

"Answer. My recollection is that Weston told me that they were pretty sure it was O. K.

"Question. What do you mean by O. K.?

"Answer. That they would go ahead and put them out—I think that was about the last I heard of it.

"Question. And that was prior to June 1921?

"Answer. Yes.

"Question. Did you ever receive any of these receiving tubes from the Westinghouse Co.?

"Answer. I do not believe I ever did. I cannot recollect now that I did.

"Question. But you did receive the transmitting tubes?

"Answer. Yes.

"Question. What was your purpose in negotiating with the Westinghouse Co. regarding the receiving tubes? What was your object?

"Answer. To distribute them also. In other words, what I was trying to bring about was that we would become their distribution and service medium as far as the ships were concerned.

"Question. How far did those negotiations go; was there any arrangement made?

"Answer. No arrangement was ever made; it was purely negotiation.

"Question. What became of the negotiations?

"Answer. It entirely dropped.

"Question. At what time?

"Answer. Oh, at the time the combination was formed."

THE AMERICAN MARCONI CO.

When the Radio Corporation of America acquired the assets of the American Marconi Co., it acquired a vast number of patents (Commission's exhibit 73). The Radio Corporation also acquired patent rights from the British Marconi Co. (Commission's exhibit 86). The American Marconi Co. had had rights in the patents of the National Electric Signaling Co. (Commission's exhibit 56). It also had a license under the Armstrong patents (Commission's exhibit 57). The Radio Corporation secured the American Marconi Co.'s patents, rights in

Digitized by Google

the patents of the British Marconi Co., and the American Marconi Co.'s rights in the Armstrong patents.

The early wireless situation from the standpoint of stations is best portrayed by a map of principal interoceanic wireless stations and coast stations of the world, which appears as an appendix to the annual report of the American Marconi Co. for 1914 (Commission's exhibit 60). All of the American trans-Pacific and trans-Atlantic stations shown on the map are those of the American Marconi Co. The map shows foreign stations with which American Marconi Co. had traffic arrangements.

As early as 1914 there was communication by wireless between this country and Japan and if the British Admiralty had not commandeered the English transoceanic stations there would have been trans-Atlantic communication between this country and Europe as early as 1914. This is our answer to the contention by the respondents that if it had not been for the combination attacked by the complaint there would yet be no trans-Atlantic or trans-Pacific communication by wireless. We quote from the 1914 annual report of the directors of the Marconi Wireless Telegraph Co. of America, as follows (Commission's exhibit 60):

"REPORT ON HIGH-POWER STATIONS

"In addition to the progress made in ship and shore communications much has been accomplished during the year with the high-power stations for long-distance work. In the northern district on the Pacific coast—probably the largest in point of territory in the Marconi organization—there has been completed a powerful station at Ketchikan, Alaska, and a chain of wireless stations to cover this territory has been planned.

* * * * * * *

"At Juneau your company has another station under construction and the United States terminal at Astoria, Oreg., is nearing completion. This latter plant will be ready about May 1, and the first link in the chain will then be open to public service.

"Your company's trans-Pacific service between San Francisco and Honolulu opened September 24, and with but few interruptions of short duration, due to the failure of the power company to supply current, has been working continuously ever since. The service rendered has been most satisfactory and almost without complaint from the public.

"This service was inaugurated with a substantial reduction in the rates established and maintained by the cable company over a period of some 11 years' operation. As a result your company secured most of the business, and, notwithstanding the fact that the cable company was compelled some months since to reduce their rates to meet ours, the volume of wireless traffic still shows a continued increase. Two new classes of messages, the night letter and the week-end letter which were introduced into the wireless service have become very popular with the Hawaiians.

"The arrangements made for direct service between New York and London had been practically completed when the outbreak of the war forced your officers to set aside the vigorous campaign through which it had been planned to secure a share of the trans-Atlantic cable business. The duplex stations at Belmar, N. J., and New Brunswick, N. J., were completed and being tested late in July when word came that the corresponding English stations at Carnarvon and Towyn, in Wales, had been commandeered by Great Britain for the use of the Admiralty. This came as a very serious blow to your company's hopes. A strong transoceanic department had been organized and 24-hour service was to be provided through a new commercial office opened in the heart of New York's financial district.

"There is small likelihood that your company shall be able to continue tests or open the stations to public service until the end of the war, but when that time arrives your officers expect to be reimbursed in full, claims for indemnity on losses sustained being included with those which the affiliated English Marconi Co. will ask from the British Government.

"The direct service between Boston and Norway through the transoceanic stations which have been building at Marion, Mass., and Chatham, Mass., has also been blocked by the war. The construction work on both the stations of your company and those in Norway is almost finished and the installation of the apparatus could have been completed before now had it not been that

Digitized by Google

the equipment is being made in England. It is doubtful whether it can be delivered here or in Norway until the war is over.

"Norway, though popularly conceived as a country of little commercial importance, in reality ranks fourth in tonnage among all the maritime powers of the world, and the connection with Boston, one of America's greatest seaports, should prove a profitable one when the circuit can be opened."

The application of wireless to other fields had already been made prior to 1915 by the American Marconi Co., as witness the following (Commission's exhibit 60):

"The application of wireless to railroading has made some advances following the graphic demonstration of its utility during the blizzard which swept the eastern States early last year. All the railroads in the zone affected were blocked for hours, and in some cases, days, the one exception being the Lackawanna Railroad, which had installed a Marconi system, and through it operated its trains wholly by wireless and without mishap. Two other railroads called upon the Lackawanna to forward messages and were greatly aided during the time when their wire telegraph lines were prostrated. Wireless telegraphy as an auxiliary means of communication is now receiving the close consideration of railroad organizations, and from all appearances this branch of your compny's business is soon to be considerably expanded."

The advances made in the arts of radio by this company were so great as to call for the following in the report of the engineering department (Commission's exhibit 60) for 1915:

"WIRELESS TELEPHONE DEVELOPED

"It is also practically assured that during the coming year a commercial wireless telephone will be placed on the market."

The present claim that the American Marconi Co. was dominated by British interests is disapproved by the following statement in the 1915 annual report of the American Marconi Co. (Commission's exhibit 61):

"With wireless communication featured prominently in the official measures taken for the safeguarding of the country, it is reassuring to know that your company, representing practically the entire American field of commercial wireless telegraphy, is managed by Americans and conducts its operations under the direct supervision of the United States Government. Any suggestion that its control is in the hands of foreign interests through capital investment is directly refuted by a very recent analysis of its list of stockholders, numbering 23,027, of whom 21,664 are residents of the United States."

The efficiency of the Marconi wireless system is further shown in this report of 1915, as follows (Commission's exhibit 61):

"REPORT OF HIGH-POWER STATIONS

"There has been no change in the commercial status of the trans-Atlantic stations, the high-power equipments remaining closed to business on account of the war. The British Admiralty still holds for imperial government use the English plants constructed to operate with your company's Belmar and New Brunswick duplex stations, and thus far, because of the war, it has been impossible to open similar direct service with Norway and northern Europe through the newly completed high-power stations at Marion, Mass., and Chatham, Mass.

"Reliable and rapid service has been maintained between your company's stations in California and Hawaii, and the volume of traffic shows steady improvement.

"The Hawaiian stations are known as two-way stations, being constructed so as to work with California and Japan simultaneously. The Japanese Government recently notified your company that its new wireless stations at Funnabashi and Otchisi near Tokio, are complete and tests are now being made daily with a view to early inauguration of a public service, spanning 5,600 miles of the Pacific. Negotiations on traffic regulations are now in progress with the Japanese Government Department of Communications, and it is expected that by means of the Japanese Government cables the service will be extended to China, Manchuria, and other Far Eastern countries.

"The new circuit connecting the United States with Alaska was opened in August 1915 and has since furnished reliable communication throughout the 826 miles covered by your company's stations at Astoria, Oreg., and Ketchikan and

Digitized by Google

Juneau, Alaska. Although operated in competition with the submarine cable, the wireless traffic has shown steady increase each month, and has given practically continuous service, whereas the cable is operated by 6 hours daily. Many times since the opening the cable service has been interrupted, and your company's system has furnished the only means of communication with the territory.

A reduction of some 20–25 percent in rates and the establishment of three classes of dependable service have been the means of making the Marconi service exceedingly popular, and it has been highly commended by the Alaska press, commercial houses, and the public.

Direct service between America and Japan was inaugurated by the American Marconi Co. in November 1916. The annual report of the company for 1916 states (Commission's Exhibit 62):

"The war conditions, preventing the operation of your trans-Atlantic stations at New Brunswick and Belmar, N. J.; and at Marion and Chatham, Mass., remain unchanged. The British Admiralty still holds, for military purposes, the English plants constructed for exchange of traffic with this country. The continuance of the war has likewise rendered it impossible to inaugurate our direct service with Scandinavia.

"Service with Japan was successfully inaugurated on the 15th of November, last, and an increasing volume of traffic is being handled, under Government censorship, at a tariff one-third lower than that of the submarine cable. On the Pacific, as on the Atlantic, operations are restricted by war conditions, the Japanese stations being controlled by that Government. For the present, therefore, the new service is limited to traffic between San Francisco, Hawaii, and Japan."

The 1917 report of the company states (Commission's Exhibit 63):

"The Massachusetts stations, intended for communication with Scandinavia and Russia, and now in course of construction, have likewise been commandeered by the Navy Department, and the work of completion is being pushed forward as rapidly as possible, so that they may be turned over to that Department without unnecessary delay."

From this report further proof on the lack of necessity of General Electric Co.'s patents is evidenced by the description of the Pan-American Wireless Telegraph & Telephone Co., which was organized to construct high-power stations to connect America with Mexico, West Indies, Central and South America for wireless communication.

That the Marconi Co., independent of the General Electric Co. and all of the other corporations respondents in this proceeding, was able to conduct transoceanic wireless is further evidenced from its 1918 annual report, which contains a statement made by Mr. Nally, general manager of the American Marconi Co. (who upon the organization of the Radio Corporation became its president), before the House Committee on Merchant Marine and Fisheries on December 17, 1918. Mr. Nally said (Commission's Exhibit 64):

"I might also say that the Marconi Co. has successfully operated transoceanic radio service at a higher rate of speed than has ever been accomplished by other agencies. The Marconi Co. was the pioneer in automatic high-speed transmission and automatic high-speed reception. It has developed this system to a remarkable degree of proficiency. Whereas it is not possible to operate a radio circuit by hand (or, as we term it, manual operation) at more than 30 words per minute, the Marconi Co. has successfully and for long periods transmitted by automatic-speed operation at speeds varying from 60 to 100 words per minute. This remarkable advance in the art, as can readily be seen, immediately doubles and even quadruples the capacity of a single circuit. I believe I am safe in saying that the Navy Department still makes use of the old system of manual transmission in the operation of its high-power station.

* * * * * * *

"When, in August 1914, the European war broke out, the American Marconi Co. was at work upon the final tests of the high-power stations which it had constructed at great cost at New Brunswick and Belmar, N. J., for operation with similar and complementary stations owned by the British Marconi Co. and located in Carnarvon and Towyn, Great Britain.

"Immediately upon declaration of war, Great Britain took over the high-power stations at the places named, and we were, therefore, unable to carry on our great enterprise.

Digitized by Google

"Many months in advance of the time that we had appointed for the opening of our service we engaged a corps of the finest and most expert operators that ever worked a cable—we had our pick from the different cable companies. These men were given a course of many months' training in wireless, and finally, when on September 24, 1914, we completed our chain of high-power stations in California and Hawaii for trans-Pacific communication with Japan, via Hawaii, we utilized many of these men for this service, which was in very satisfactory operation at the time our country entered the war in April 1917, when our Government took over all of our stations, both coastal and high power, and have had them ever since.

"We also erected in Massachusetts, a transmitting station at Marion, and a receiving station at Chatham, Cape Cod, high-power station similar to the New Jersey, California, and Hawaii stations above referred to, but the completion of these stations was delayed and interfered with on account of the war, the Norwegian stations, with which they were to work, having only recently been completed. This circuit was intended for wireless communication with Scandinavia and Russia, and but for the war would be in full operation at this time.

"The company also constructed and operated coastal stations for ship-and-shore business at 45 points, from northern Alaska, on the Pacific coast, to southern California, and from the extreme north Atlantic coast to the extreme South, and in the Gulf region, and in the region of the Great Lakes."

Further evidence that we are correct in our claim appears from the statement of Hon. John W. Griggs, a former Governor of New Jersey, a former Attorney General of the United States, and, at the time of his statement, president of the American Marconi Co. (Commission's exhibit no. 64):

"When Mr. Marconi had developed the knowledge of the Hertzian waves so as to be able to produce signals, and had secured patents in Great Britain and the United States, they formed the Marconi Co. of New Jersey, and Mr. Marconi conveyed to it all the patents and inventions he then had with an agreement to convey to it all other patents and inventions which the parent company acquired, and I think that is substantially the only agreement on the subject that ever existed between the two companies.

"In addition to the patents in that contract, the company has put out $7,000,000 worth of stock, which was paid for in cash. Its present capital is $10,000,000, and I think its total assets, as figured on its statement, amount to something like $12,000,000. It has no bonded indebtedness—it has no indebtedness whatever except the week-to-week current bills that it incurs. It has paid two dividends in the course of the 15 or 16 years it has been engaged in business. It has 22,000 stockholders, the most of whom are residents of the United States, who acquired their stock on the hope and expectation that eventually the Marconi Co. would be able to become a successful competitor of the oceanic cables and thereby would derive a large income which would justify an investor in waiting 10 or 15 or even 20 years for a dividend, because he expected when the result was obtained he would reap largely in returns.

"The company, out of the $7,000,000 which it raised in 1912 by an issue of stock of that amount, has spent about $5,000,000 in building stations preparatory to trans-Atlantic, trans-Pacific, transoceanic service. Of course, you cannot have transoceanic service unless you have not only a station at this end, but you have to have a coordinating station in the other country. So that whether it is the United States Navy, or whoever it is, that attempts to carry on wireless internationally, they must have somebody to cooperate with at the other end or they cannot do it.

"The Marconi Co. had in Great Britain the British Marconi Co. to cooperate with, who did agree to put up and who did put up a coordinating station. The Marconi Co. had a contract with the Government of Norway to put up a coordinating station in Norway, and they have put up that station there. The Marconi Co. had an agreement with Japan to put up a coordinating station in Japan, and when the United States was dragged into this war, we were carrying on successfully profitable wireless communication with Japan.

"And I might stop right here to say that since the United States Navy took over our San Francisco and Hawaiian stations, that service has been stopped. It has not been renewed, and today it takes 7 days to get a cable from the United States to Japan, and we put it through and got an answer back in less than an hour.

"I said we spent $5,000,000 in getting ready to do this international communication business. It was from that that the promoters of the company—and

Digitized by Google

when I speak of 'promoters' I mean not in the sense of those who sold the stock, because we did not have any such promotion, but I mean those who were proceeding with the business and development of the company. It was their expectation that the great profit of the company would come from this long-distance service, and what we expect was that we would so cut into the rates charged by the cable companies that we would acquire a very large part of the business; and not only that but that we could take certain messages that were called 'deferred' messages at rates which the cable companies could not afford to transmit.

"Well, just when we were ready to inaugurate this service with the British Islands, Great Britain went into the war, and, of course, they had to take over the stations, and our stations have been idle ever since. I am speaking only of our long-distance stations—they have been idle ever since, so far as the Marconi Co. has been concerned, although I understand the Navy Department has operated one or more of them to some extent."

The claim by the respondents that transoceanic wireless was brought about by the combination which is attacked by the complaint, is refuted by all of this proof which we have cited, and by the further fact that prior to 1917 traffic contracts were made by the American Marconi Co. for communication with Japan (Commission's exhibit 79), and for communication with Norway (Commission's exhibit 80)..

Stress has been laid on the claim that the American Marconi Co. was dominated by alien interests. The record shows that claim also to be ill-founded. The stock of the British Marconi Co. in the American Marconi Co. was non-voting (record, p. 870). Besides the stock interest of the British Marconi Co. was not a controlling interest, being about one-sixth. The record shows the following statement by the witness Sarnoff, connected with the American Marconi Co., and since the organization of the Radio Corporation of America, general manager for the latter company:

"The American-Marconi Co. is an affiliated company. We are not a subsidiary of any company. The American company is controlled by an American management. Its policies are formed and executed here. The apparatus used on ship and shore is manufactured in this country and designed by American engineers, and we are in no wise subsidiary to the British Marconi Co. The affiliation is essential because of the international communication which is proposed by the Marconi Co. We must have an agreement with people abroad, just the same as the United States Government would have to have an agreement abroad if it communicated internationally."

He further stated that while the British Marconi Co. owned stock in the American Marconi Co., its interest was by no means controlling (record, pp. 915-916). Indeed, respondent's exhibit no. 6 shows that the entire foreign stock holdings in the American Marconi Co., including the holdings of the British Marconi Co., were about 42 percent on July 1, 1919.

We submit that the record in this case establishes from the testimony of the witness Weagant, formerly chief engineer of the Marconi Co., and at the time he testified employed by the Radio Corporation as an expert for patent litigation (record, p. 2935), that the American Marconi Co., without any patents other than those which it owned and in which it had an interest, could have conducted its business without any patents of the General Electric Co., the American Telegraph & Telephone Co., United Fruit Co. or Westinghouse Co., or any of their associated and affiliated companies. He testified that the General Electric Co. saw a big commercial possibility in the American Marconi Co. (record, 6. 2955). Of the patent situation, he said (record, p. 2964):

"In the reception there was one patent that was vital. That was the DeForest audion. There was a tube that I invented myself and which our attorney said was noninfringing. That could have done the job so that the acquiring of the patents was not necessary. There was another very important patent, the Fessenden heterodyne. I invented one or two substitutes for it. Alexanderson invented another that was desirable, but not absolutely necessary. This pooling of the patents by this combination was not necessary for the transoceanic or for the ship-to-shore and ship-to-ship communication field. The fundamental motives leading to the combination was the desire on the part of the General Electric Co. to realize on their very large investment in the development of the Alexanderson system; also the fact that they very cleverly seized upon and made use of the opposition of the Navy Department to the British Marconi Co. to aid in carrying out this plan; whereas, on the other hand, I very firmly believe that the Marconi Co. could have carried on" (record, pp. 2964-2967).

Digitized by Google

Some of Weagant's inventions are described in the book called "Vacuum Tubes in Wireless Communication", copyrighted in 1919 by the Wireless Press, Inc., a subsidiary of the Radio Corporation of America. The book is known as Commission's exhibit 403 for identification. The Commission will remember that at the oral argument on the pending motion the book was offered in evidence as Commission's exhibit no. 403. From page 176 to and including page 182 will be found descriptions of Weagant's tube, Weagant's circuit for his transmitting tube, and Weagant's circuit for wireless telephony transmission. On pages 102–103 appear descriptions of Weagant's receiver for damped and undamped oscillations and of Weagant's receiver for continuous and discontinuous waves.

The testimony of Bucher (record, p. 4066–4096) and his books show circuits of the Marconi Co. and complete descriptions of the Marconi Co.'s system of wireless communication. It is convincing from this record that when the General Electric Co., through the radio Corporation of America, acquired the American Marconi Co., it put itself into the communication field of wireless telegraphy and wireless telephony in a way which made it unnecessary to secure any other patents and in a degree which put the Radio Corporation of America, without any patents other than the Marconi patents, in a position to compete with the American Telegraph & Telephone Co. by way of offering to the American public wireless telephony in competition with the wire telephony system of the American Telegraph & Telephone Co.

Indeed the position of the Marconi Co. for transoceanic communication is further established, if further proof be deemed necessary, by the fact that in 1914 the American Marconi Co. caused to be organized a number of telegraph companies (record, pp. 809–814) for the purpose of connecting its trans-Atlantic stations by land telegraph wires to strategic points in the United States, which were looked upon as localities from and to which trans-Atlantic messages would be destined.

THE GENERAL ELECTRIC CO. AND THE RADIO CORPORATION OF AMERICA

The Radio Corporation of America, being from its inception controlled by the General Electric Co., it seems not inappropriate to discuss these two companies together. We have previously shown how, when the Radio Corporation of America acquired the assets of the American Marconi Co., it put itself in position to conduct every kind of wireless communication.

The General Electric Co. at that time, namely, 1919, was also in the very same position, as appears from the record.

Respondents' exhibit no. 17, which is a letter dated March 29, 1919, to Assistant Secretary of the Navy Roosevelt, in itself, partly at least, indicates the developments made up to that time by the General Electric Co. We quote the following from the letter:

"We have, over an extended period, been negotiating with the Navy Department in regard to furnishing several of our radio devices, including a photographic receiver, barrage receiver, and methods of simultaneous sending and receiving of radio messages, and we now have a contract with the Navy Department for completing the installation of the New Brunswick high-power radio station."

The Navy Department itself was familiar with the developments made by the General Electric Co., for, in answering the letter hereinabove quoted, Assistant Secretary Roosevelt mentioned the fact that the General Electric Co. had "numerous excellent devices for radio telegraphy" (respondents' exhibit 18).

In January and February 1920, which was prior to the General Electric Co.-American Telephone & Telegraph Co. license, the Radio Corporation of America published a copyrighted book called the "Alexanderson System for Radio Telegraphy and Radio Telephone Transmission." The book (Commission's exhibit 272) contains 55 pages which completely describe the system. It is a system developed by Alexanderson, of the General Electric Co. We quote the following from pages 53 and 55 of the exhibit:

"Figure 47 is an oscillographic record taken on the 200-kilowatt set at New Brunswick, N. J., with Secretary Daniels, of the United States Navy Department, at Washington, D. C., speaking to President Wilson aboard the U. S. S. *George Washington* at sea.

"The satisfactory operation provided by the amplifier is here again well demonstrated.

Digitized by Google

"When the Alexanderson system is used in radiotelephony the control circuit of the amplifier is placed in the output circuit of a bank of vacuum valve amplifiers. The input circuits of the amplifier bank are controlled by three preceding stops of vacuum tube amplifiers, which in turn are actuated by the microphone.

"In a number of experimental tests made with the telephone set at New Brunswick, the voice was projected to European stations. At distances up to 2,500 miles very satisfactory results were obtained. The eventual use of the Alexanderson system for commercial long-distance radiotelephony can be predicted with considerable confidence."

It must have been of this long-distance wireless telephone conversation between President Wilson and Secretary Daniels that the witness Sarnoff was speaking (record, p. 923) when he stated that the distance over which the telephone conversation was held was in excess of 1,000 miles.

Further evidence of the extent to which the General Electric Co. had developed wireless communication is found in the testimony of Albert G. Davis (record, p. 2803), in which, referring to the book, "Radio Telephony", by Goldsmith, copyrighted 1918 (Commission's exhibit 385), he said:

"I remember particularly when Alexanderson was able to send and receive from a ship simultaneously, and that was not long before the contracts, not long before this book was copyrighted. It was regarded as a very wonderful thing."

Prior to July 1, 1920, the General Electric Co. had also interested itself in broadcasting. This is established by the testimony of Albert G. Davis, a vice president of the General Electric Co. We quote from the record (p. 1855):

"July 1, 1920, we had this Union Club broadcasting performances which I mentioned this morning, and our engineers cooperated with those boys on that.

"We had had some telephone conversations between Pittsfield and Schenectady, which I think I mentioned yesterday. We had made some important inventions, but we had not put any radiotelephone into use. The Telephone Co. had a plant at Deal Beach, N. J., which had been run experimentally, and I think had done some experimental broadcasting, but they can tell you better than I can about it, and I think about that time Mr. Conrad, of the Westinghouse Co., one of their engineers, was beginning to carry on broadcasting experiments on a small scale which ultimately led, and not very long afterwards, to the establishment of the station KDKA, which was the first permanent broadcasting station in the world, so far as I know.

"The principal practical use of radiotelephony—the only practical use of radiotelephony, as far as I know, had been with the Government in connection principally with the Navy, and to a lesser extent in connection with the Army. By the time the war finished a whole squadron of airplanes could be in communication with the ground and each other."

Thus shows the record: Three of the companies respondents—that is to say, Radio Corporation of America, American Telephone & Telegraph Co., and Westinghouse Co.—were in a position prior to the cross-licensing agreements to enter the broadcasting field in competition with each other.

The list of General Electric Co.'s radio patents in evidence shows that the interest of the General Electric Co. in radio long antedated 1919. When the witness Davis was asked to describe the inventions developed by the General Electric Co. in the radio, or other communication fields, he stated as follows (record, p. 1765–6):

"There were a great number. One of the most important was the invention of Dr. Langmuir on the vacuum tube which was then involved in interference in the Patent Office with Dr. Arnold, of the Western Electric Co.

"Then there was the Alexanderson alternator which is covered by a group of patents and the so-called accessories to the alternator, such as the multiple-tuned antenna and also the so-called barrage receiver, a very important speed governor for the alternator which was quite important to radio alternators because radio alternators must be maintained at very accurate speeds, and it was a very severe test to do it because the whole load is thrown on and off when the key is opened and closed, so that there is a tendency for the alternator to speed up and slow down again very rapidly.

"Then there was the magnetic-modulator also invented by Alexanderson, which was a very important contribution to long-distance telegraphy which was what, at that time, we had our principal thought about, transoceanic commercial communication.

Digitized by Google

"Then Dr. Alexanderson had also invented what is known as the geometric radio frequency tuning, which is a very important development in reception which is now embodied in, I think, all of the very high-grade broadcasting receiving sets—certainly most of them—and, in addition to that, he had made some fundamental inventions in what we call modulation, which is the emission of the—it is part of the sending out of the telephone signal from the station, the vital part of the sending out of the telephone signal, and he has a patent on that. I do not remember whether it issued before or after this date, but the application was then pending which covers the modulation which is used, as far as I know, in every telephone transmitting or broadcasting station in the world.

"There were a great many other patents, there were hundreds of them, and inventions."

The General Electric Co. had also developed vacuum tubes; that is, tubes capable of the same uses as were the DeForest tubes. This is established by the testimony of the witness Albert G. Davis (record, p. 4071) and the tubes are described in chapter 53 of Bucher's book, called Vacuum Tubes in Wireless Communication, to which we have hereinbefore referred. The book, as we have said, was written prior to the organization of the Radio Corporation. The same book shows that the General Electric Co. had invented circuits for the use of these vacuum tubes. Again we refer the Commission to this book, Bucher's testimony (record, p. 4086–4096) and to Dr. Goldsmith's book on radiotelephony (Commission's exhibit 385).

The Radio Corporation, although fortified as we have shown it to have been, by reason of the fact that it consolidated two complete systems (that is, one of the Marconi Co. and the other of the General Electric Co.), in order to forestall any competition in the trans-Atlantic communication field, acquired early in its history the Tuckerton wireless station, which prior to 1919 had communicated with Europe (record, p. 922; Commission's exhibit 75, dated Sept. 2, 1919).

This record establishes that the Radio Corporation of America did not require for its business of communication, nor for broadcasting, nor for the broadcast-receiver field, any patents of the telephone company, of the Westinghouse Co., United Fruit Co., or of any other person or organization, so that when the combination with the other respondents was brought about by the contracts attacked, separate and independent methods and patents were consolidated into one pool, which eliminated competition among these powerful corporations.

THE AMERICAN TELEPHONE & TELEGRAPH CO. AND THE WESTERN ELECTRIC CO.

(By our reference to the American Telephone & Telegraph Co. we mean not only that company, but its manufacturing subsidiary, the Western Electric Co.)

An examination of the patents of the American Telephone & Telegraph Co., that is, patents originating from its own work (Commission's exhibit 274–275), will disclose that the interest of the telephone company in wireless was long prior to the organization of the Radio Corporation of America. In addition to the patents which it secured through its own inventions, it had important additional patent rights; among these were rights in the DeForest tube, circuit, and other patents (Commission's exhibit 275), while, as early as December 7, 1916 (Commission's exhibit 271), it had acquired patent rights from the Atlantic Communication Co., which, prior to that time, had communicated by wireless between America and Europe (record, p. 2060). In addition to these patents, it secured licenses under the Latour patents (Commission's exhibit 275).

The patents of the telephone company and the patents under which it was licensed, covered practically every phase of commercial wireless and of wireless or radio for entertainment. Just as others of the respondents had patents for complete systems of wireless, so had the telephone company. Again we refer the Commission to the examination of Bucher concerning his book on Vacuum Tubes in Wireless Communication (Commission's exhibit 403 for identification), to that part of his examination devoted to the progress made in wireless as shown in his book called Practical Wireless & Telegraphy and to Radio Telephony (Commission's exhibit 385) by Goldsmith.

The general manager of the Radio Corporation of America testified as follows (record, p. 923):

"Question. Were you in any wise familiar with any wireless telephony or radio telephony or experiments in that direction being conducted by the American Telephone & Telegraph Co. directly, or through its affiliated or subsidiary companies?

"Answer. Only in a general way.

Digitized by Google

"Question. What was your knowledge?

"Answer. I knew of the experiments which they had conducted with a wireless-telephone station at the Arlington Naval Station, and of the fact that they had transmitted the human voice to Hawaii and also to Paris.

"Question. When had they done that?

"Answer. I believe it was either 1914 or 1915."

We know of no better way of asserting our claim that the American Telephone & Telegraph Co., without any patents other than those which it owned and for which it had licenses, was in a position prior to the organization of the Radio Corporation of America, to enter into all forms of radio and wireless, than to quote in full a letter written July 18, 1919, by Gen. John J. Carty, vice president of the American Telephone & Telegraph Co., to Hon. Josephus Daniels, the Secretary of the Navy. The letter in full is as follows (Commission's exhibit 276):

NEW YORK CITY, *July 18, 1919.*

HON. JOSEPHUS DANIELS,
Secretary of the Navy, Washington, D. C.

DEAR SIR: Now that the hostilities have ceased, this company is going forward with radio development work which was suspended during the war because we placed the scientific staff of this company at work upon war problems for the Navy and for the Army.

We have made important advances in radio telegraphy and telephony. These improvements, in addition to the large number of other important fundamental devices for which we hold the patent rights, give us assurance that we can give satisfactory telephone service between ships at sea and to all portions of the United States through the medium of radiotelephone and the wires of our system.

Before attempting to arrange for commercial working, it is thought that it would be best to plan at first only for an experimental demonstration on a commercial scale which would be made by erecting two radio stations, one on the New Jersey coast and the other on Cape Cod. Each of these stations could be employed for private telephone service from telephones in our wire system to ships at sea within a radius of 200 miles. This would enable ships entering or leaving Boston or New York, or ships at intervening points, to connect with telephone subscribers nearly everywhere in the United States.

In the performance of our function of providing telephone service to the public, it is desirable that it should be made comprehensive and should include, where practicable, communication with ships.

In the schedule attached hereto is given a statement of the wave lengths or frequencies which would be required for the use of our proposed radio stations.

It is our understanding that the Navy Department now exercises the functions with respect to radio licensing and control which were formerly under the jurisdiction of the Department of Commerce. Accordingly, therefore, we request that we be permitted to employ, in the radio stations above-mentioned, for the purpose of radiotelephony, wave lengths as described in the schedule attached hereto.

Attached also is a map showing the proposed location of the New Jersey station. The exact location of the Cape Cod station is not yet determined. In locating a radiotelephone station proximity to the wire system must be considered as well as nearness to the sea. It is expected that these stations will be completed early in the next year and we are confident that the results will be gratifying and of value to the public.

We feel they will be particularly interesting to the Navy Department because of the historic association of the Navy with our development of radiotelephony. I have in mind the day, a few years ago, when I heard you, sitting at your desk in the Navy Department at Washington, and using the earlier system which we developed, speak and give orders to Captain Chandler on the bridge of the *New Hampshire* at Hampton Roads, the first time in the history of any Navy that such a thing was done.

We would be greatly obliged if you would advise us regarding our request for the use of the wave lengths specified in the schedule. Concerning permission to operate these radio stations, we are told that the proper time to apply for the necessary authority is after the stations have been erected and equipped. Having in mind the harmonious cooperation which has existed so long between the Navy and this company, particularly in the matter of radiotelephony, we would welcome any suggestions which you may care to make.

Respectfully submitted.

JOHN J. CARTY, *Vice President.*

Digitized by Google

This letter is our answer to the claim of the respondents that the Telephone Co. was not able, by reason of the patents which it owned, and in which it had an interest, to enter the wireless field in competition with the Radio Corporation of America, the General Electric Co., the Westinghouse Co., and the United Fruit Co. It is our answer to the claim that the organization of the Radio Corporation, and the execution of the cross licenses attacked by the complaint, brought about wireless telephony. It supports the testimony of Fessenden, to which we hereinafter refer.

THE STATE OF THE ART AT THE TIME OF THE CROSS LICENSE AGREEMENTS, AND THE SCOPE OF SUCH AGREEMENTS

Respondents claim that through the cross licenses a new art and industry was brought into being, and they point particularly to the field of broadcasting and to the field of wireless telephony. The record shows from the testimony of witnesses that the agreements have retarded development in radio (record, p. 1432) and that they have stifled the art (record, p. 3893). Broadcasting was known as early as 1906, for on Christmas Eve of that year, the National Electric Signalling Co. broadcast a program which was heard as far as Cape Hatteras (record, p. 3907). In 1910 the DeForest Co. broadcast the opera "Pagliacci", from the Metropolitan Opera House in New York (record, p. 3131). In 1914 a company with which the witness Myers was associated, broadcasted entertainment regularly (record, p. 3776) and before the cross licenses were entered into, there was regular broadcasting from a station in California (record, p. 2291).

As early as 1905 there were purchased by the Navy Department from the National Electric Signalling Co., apparatus for wireless telephony, apparatus for wireless telegraphy for use for distances up to 1,000 miles, apparatus for secret sending which was guaranteed to send and receive messages without the possibility of their being read by other vessels not equipped with that apparatus, apparatus for locating the positions of ships at sea at all distances within 200 miles of shore, apparatus for indicating the position and course of ships within the range of 3 miles in fog, and apparatus guaranteed to prevent interference (record, p. 3906).

As early as 1907 wireless telephony was developed to a degree which rendered it adaptable for general commercial use, so much so that a contract was drawn between the Bell Telephone Co. and a wireless company for the installation of radio telephony for use over long distances in place of the use of wire lines. This contract was drawn only after extensive tests, showing the workability of the apparatus, had been made and had been approved by the Telephone Co.; and it appears from the record that the American public would have had wireless telephony as early as 1907 but for the fact that the installation of wireless would have rendered obsolete and brought about a loss of the wire lines in which the Telephone Co. had a tremendous investment (record, p. 3892–9).

Respondents also point to the development of radio receiving sets; but the record shows that before the cross licenses, radio receiving sets were being manufactured and sold by numerous manufacturers in the United States.

On our Pacific coast, for years prior to the cross licenses, the Federal Telegraph Co. was conducting, and still conducts, a reliable, dependable wireless telegraph system between the important cities on the Pacific coast. Indeed, the record shows that long prior to the cross licenses, ships at sea were able to communicate with one another at distances of 5,000 miles (record, p. 1365).

Therefore, the record thoroughly establishes that the claims of the respondents as to bringing about a new art are unfounded.

The extent of the power possessed by the respondents by reason of the vast number of patents pooled through the cross licenses and by reason of their financial strength, is shown by the following testimony of the witness Priess regarding an interview he had with Dr. Goldsmith, of the Radio Corporation, which at the time, was endeavoring to acquire certain patent rights of the witness (record, pp. 3041–3044; 3046–3047):

"Question. Was any statement made to you by Dr. Goldsmith, by way of inducing you to give an option to the Radio Corporation of America?

"Answer. That matter was generally discussed, and Dr. Goldsmith pointed out the advantages of dealing with the Radio Corporation.

"Question. What did he say were the advantages?

"Answer. The advantages were that the Radio Corporation, through their dominant patent situation, or strong patent situation, could give a strength to the patents resulting from these inventions that no other company could.

Digitized by Google

"The Radio Corporation had numerous inventions on file, and by agreement a laborious process of interference could be reduced.

"Question. Do you remember anything else that Mr. Goldsmith said in that connection?

"Answer. He also pointed out that the reverse was true if there was some other small radio company which held the inventions.

"Question. What do you mean by that?

"Answer. That the numerous cases of the Radio Corporation which it then had, patent cases and numerous cases that they had in the office would serve to tangle the resulting patents in interferences or other proceedings so that it was for that the patents would have little or no value to the company obtaining a license.

"Quesion. That is, you mean to the smaller company?

"Answer. Yes.

"Question. Did he say anything else in that same connection that you recollect?

"Answer. I do not recall.

"Question. Do you remember whether or not Dr. Goldsmith said to you that the Radio Corporation was a logical company to deal through or with?

"Answer. Yes; he said that in substance.

"Question. Do you remember whether or not he said that was because they were in a position to practically invalidate any patents that they sought to fight?

"Answer. Correct, that is so.

"Question. He said that to you?

"Answer. He did.

* * * * * * *

"By Mr. SMITH:

"Question. Did you believe, when you entered into the option agreement with the Radio Corporation, that the Radio Corporation was in a position to practically invalidate any patents they sought to fight?

* * * * * * *

"Answer. I did.

* * * * * * *

"By Mr. Smith:

"Question. Why did you believe that?

"Answer. I believed that because there are very few inventions that are of such a nature that they stand in an art independent of any other work of man; and since such is the case inventions in the same art, that all the claims of inventions in the same art serve to restrict the scope of one particular invention, and the more claims that can be assembled the more restricted that scope can be made. If each of these claims is hotly prosecuted and they are sufficient in number, an invention can be reduced to practically zero value by its narrowing, by this narrowing process.

"I knew the Radio Corporation had under its control the maximum number of radio inventions in this country, and they also had the proper legal talent and the financial resources to perform the maneuver of the type mentioned.

"Question. Particularly as against an individual or small company?

"Answer. Particularly against an applicant with no financial resources and without the expert talent that the Radio Corporation possessed."

* * * * * * *

"Question. Did Mr. Goldsmith in these negotiations with you speak of the financial power of the Radio Corporation?

"Answer. Not that I remember.

"Question. Do you remember that he said or spoke of its ability to stand a long seige of litigation?

"Answer. I do in that connection. Dr. Goldsmith mentioned the fact that the Radio Corporation differed from a small company in that it could stand a loss of the magnitude of half a million dollars without seriously affecting the Radio Corporation, while a smaller company would be wiped out completely with such a loss.

"Question. Did he also suggest to you anything about the ability of the Radio Corporation to build up a ground work of interference action by reason of the patents which it held?

Digitized by Google

"Answer. He did. I have already testified as to that.

"Question. Now, have you stated all that you recollect that he said to you during these negotiations?

"Answer. In substance that is the essence.

"Question. Do you remember whether or not he pointed out to you that if you dealt with any other company, that company would be the target of litigation by the Radio Corporation?

"Answer. Yes; that expression was used.

"Question. He told you that if you dealt with any other company, that company would be the target of litigation by the Radio Corporation?

"Answer. Correct."

FESSENDEN'S TESTIMONY (RECORD, PP. 3864–3942, 3950–4015)

The witness Fessenden's testimony shows conclusively that the cross licenses have retarded the art of radio; that at the time the cross licenses were entered into each of the companies entering into the combination was able from a patent standpoint to enter the entire radio field in competition with the others; that all of the forms of wireless now familiar to the public were well known and practiced prior to the combination; that the combination was brought about by a realization on the part of the respondents of the practically unlimited commercial advantage to them in monopolizing the entire field.

Professor Fessenden is one of the outstanding figures in radio, and ranks with Marconi and DeForest. All of the witnesses who were asked about his standing gave him unstinted praise, and that applies as well to witnesses associated with the respondents. His testimony goes so squarely to the issues involved in the complaint, and so thoroughly confirms the evidence we have previously pointed out in discussing the activities of the companies entering the combination, that perhaps it should be set forth in full in this brief. The testimony, however, is quite lengthy; for that reason, we do not set it forth at length herein, but commend that part of the record to the Commission's consideration. The testimony confirms (record, p. 3941) the testimony of Myers and others and the other convincing proof that in this combination were pooled innumerable competing patents.

RESTRICTIONS ON SALE BY RADIO CORPORATION

The respondents concede that the Radio Corporation, in the sale of various articles, employs notices of restrictions imposed upon the purchaser. These appear in evidence as Commission's Exhibit Nos. 113, 382. These notices, or rather the restraints sought to be imposed by the notices, have long since been held to be beyond the right of a seller, in a long line of cases with which this Commission is familiar, namely:

Dr. Miles Medical Company v. *John D. Park & Sons Company* (220 U. S. 373).

Boston Store v. *American Graphaphone Company* (246 U. S. 8).

Motion Picture Patents Company v. *Universal Film Company* (243 U. S. 502).

Strauss v. *Victor Talking Machine Company* (243 U. S. 490).

Bauer v. *O'Donnell* (229 U. S. 1).

Bobbs-Merrill Company v. *Strauss* (210 U. S. 339).

TRAFFIC CONTRACTS

All of the traffic contracts of the Radio Corporation with companies in foreign countries, and with countries owning stations, are in evidence. The traffic manager of the Radio Corporation of America testified that as to those countries with which the Radio Corporation had traffic contracts, there were no stations other than those owned by the countries capable of communicating with America, and that with respect to the companies in foreign countries with which the Radio Corporation of America has traffic contracts, there are no other companies owning stations capable of communicating with the United States (record, p. 4020). All of these contracts are exclusive, either expressly so, or exclusive in effect.

Digitized by Google

THE PROOF OF THE POOLING OF COMPETING PATENTS

In our discussion of the activities of the companies entering into the cross licenses, we have indicated how each of the companies had its own independent system of radio. That the combination is a pool of competing patents is firmly established by the testimony of witnesses. The following appears in the testimony of the witness Simon (record, p. 3223):

"Question. Do you have any familiarity with the patents which have been cross licensed among the General Electric Co., the Radio Corporation, the Westinghouse Co., the Telephone Co., the Wireless Specialty Apparatus Co., and the United Fruit Co.?

"Answer. I am familiar with them in a general way.

"Question. Do those licenses cover different systems for reception?

"Answer. I should say they do.

"Question. Do they cover different means or methods for transmission?

"Answer. Yes, sir; they do.

"Question. Can any of these systems of reception covered by these cross-licensing agreements be used independently of the other systems?

"Answer. Yes; they can.

"Question. Can any of these systems of transmission pooled by these cross-licensing arrangements to be used independently of any of the other systems?

"Answer. Yes; I am sure they can."

We quote the following testimony of the witness Myers (record, pp. 3729–3734):

"Question. Are you familiar with the advances made by the General Electric Co., or that have been made by the General Electric Co. prior to 1919, and with the patents which it owned prior to 1919?

"Answer. In a general way; yes.

"Question. Do you have an opinion as to whether or not the General Electric Co., prior to its purchase of the assets of the Marconi Wireless Telegraph Co. of America, could have conducted successfully wireless communication commercially without the use of any other patent other than those of its own; do you have an opinion?

"Answer. Well, there was some public indication that they could.

"Question. Over any distance?

"Answer. Yes; I believe they could have held commercial communication.

"Question. For what distance?

"Answer. That I would hesitate to say, because I am not at all familiar with the scope of the patents they held at that time.

"Question. Only in a general way?

"Answer. Yes.

"Question. You state by way of answering the question that there were certain indications as to what the General Electric Co. was able to do. What do you mean by that?

"Answer. The usual newspaper publicity as to the so-called epoch-making strides in radio.

"Question. Did you, prior to the organization of the Radio Corporation—did you hear any claims made by the General Electric Co. as to the progress being made by that company in the wireless field?

"Answer. Yes.

"Question. What were those statements and who made them?

"Answer. Why, they have always specifically announced their epoch-making strides in radio communication.

"Question. Those statements that you have in mind in your answer were published statements?

"Answer. Press statements; yes.

"Question. Did you ever hear any oral statements from any of the officers or employees of the General Electric Co. prior to the organization of the Radio Corporation as to the progress being made by the General Electric Co. in radio?

"Answer. No.

"Question. Are you familiar with the patents which the American Telephone & Telegraph Co. and the Western Electric Co. owned, or had an interest in, by way of licenses prior to the organization of the Radio Corporation of America?

"Answer. That is radio patents?

"Question. Yes.

"Answer. In a general way; yes.

Digitized by Google

"Question. State whether or not, in your opinion, the American Telephone & Telegraph Co., prior to the organization of the Radio Corporation of America, could have, by reason of the patents which it owned, by reason of the patents licensed to it, carried on successful commercial wireless communication?

"Answer. I think they probably demonstrated the efficacy of their apparatus in these historical tests from Arlington to Paris and from Arlington to Hawaii by telephone and telegraph.

"Question. When was that?

"Answer. In 1915, I believe.

"Question. Is that a matter of history in the radio world and radio art?

"Answer. That was the first trans-Atlantic, trans-Pacific telephone demonstration ever given over those vast distances.

"Question. And that is a matter of history in the radio world?

"Answer. Oh, yes.

"Question. Are you familiar with the patents which have belonged to the Federal Telegraph Co. of California, sold by that company to the Navy Department, and licensed by the Navy Department either to the International Radio Telegraph Co. or to the Westinghouse Electric & Manufacturing Co.?

"Answer. I was thoroughly familiar with the original patents, Mr. Smith.

"Question. And are you familiar with the patents sold to the Navy Department.

"Answer. In a general way.

"Question. State whether or not, in your opinion, the Westinghouse Electric & Manufacturing Co. or the International Radio Telegraph Co., as the case may be, could have from the patents licensed to them, or either of them, by the Navy Department, have conducted a successful commercial trans-Atlantic wireless system or communication?

"Answer. May I ask whether they are Poulsen patents?

"Question. Yes.

"Answer. My answer is 'Yes.'

"Question. That is without the use of any patents belonging to the General Electric Co.?

"Answer. Undoubtedly.

"Question. And without the use of any patents belonging to the Marconi Wireless Telegraph Co. of America?

"Answer. Yes.

"Question. And without the use of any patents belonging to the corporations respondent in this case?

"Answer. Yes.

"Question. Are you familiar with the patents owned or controlled by the Wireless Specialty Apparatus Co., United Fruit Co., and Tropical Radio Telegraph Co., at the time the United Fruit Co. entered into its arrangement—its cross-licensing arrangement, with the Radio Corporation of America?

"Answer. Only in a general way, Mr. Smith.

"Question. Will you state your opinion as to whether there were any patents owned by any of those companies which were necessary to the Radio Corporation of America for successful wireless communication?

"Answer. I don't believe so.

"Question. Do you know whether or not, prior to the organization of the Radio Corporation of America, tube radio receiving sets were sold in the United States?

"Answer. Oh, yes."

In addition to this proof the witness Armstrong (typewritten record, p. 3810–3817, which testimony has not been printed by the respondents) pointed out specific patents covering the manufacture of articles adaptable for the same uses covered by patents included in the licenses.

Without quoting herein all of the testimony of the witness Fessenden, regarding the pooling of competing patents by the respondents, we believe it will be sufficient if we call the attention of the Commission to the following question and answer, on page 3941:

"Question. Do you know whether or not there entered into this combination, called the Radio Corporation, competing patents of the companies making up the group or combination, or were all of the patents which entered into this combination independent patents?

"Answer. A considerable number of them were competing patents."

Digitized by Google

He proceeds during the course of the examination to outline some of the competing patents which entered into the pool. These are described in the record on pages 3941–3942, 3951.

The record, therefore, establishes clearly that the patents pooled by the cross licenses were not independent patents but that the pool acquired a vast number of competing patents.

REFUSAL TO SELL

The monopoly possessed by the respondents through their cross licenses has been carefully guarded by them, by their persistent and combined refusal to sell to anyone who might by any chance enter the communication or broadcasting field in competition with them. These instances are numerous. We suggest herein but a few of them:

Simon (record, p. 3193).
International News (record, p. 4036–4038).
Commercial Cable Co. (record, p. 3456–3465).
United States Shipping Board (Commission's exhibit 411).
Federal Telegraph Co. (record, p. 1745).
Wired Wireless, Inc. (record, p. 2404–2410).
The city of New York (record, p. 4109–4130).
Simpson (record, p. 1427).

The refusal to sell to Wired Wireless, Inc., was a refusal by the Telephone Co. to furnish a wire line to be used by Wired Wireless, Inc., so that its programs might be originated at its studio in New York instead of at Staten Island, which is inconvenient to the artists furnishing programs.

The refusal to sell to the city of New York was by the Telephone Co., which quoted such a high price for a broadcasting station, and which imposed such restrictive terms on the use of the station that the city considered the price and the restrictions the equivalent of a refusal to sell. As a matter of fact, the Telephone Co. did not sell the broadcasting station which the city of New York wanted to buy.

CHARTS SUBMITTED BY THE RESPONDENTS

The respondents have submitted a number of charts; among them are two of station KDKA. The charts include a list of patents employed.

As to the tube patents, we submit that the testimony establishes that there are no pending patents on vacuum tubes which are considered by tube manufacturers as valid or valuable. In other words, many of the patents cover nonessentials, are therefore unnecessary and there is no adjudication of any of these tube patents which restricts any tube manufacturer from manufacturing and selling tubes.

An examination of the patents shown to be employed in station KDKA will reveal that a great number of them were issued long after the cross licenses were entered into.

The Commission will find in the patents a great number expiring in 1940, 1941, 1943, which indicates that the patents were issued long after the cross licenses were entered into. This fact alone, we submit, would establish the lack of necessity of the cross licenses. Besides, radio is a changing art just as other industries are changing, notably the automobile industry, and the fact that a number of patents are now employed in the manufacture of an automobile does not by any means signify that automobiles could not be built without all of the patents now employed.

The charts also portray patents employed in radio receiving sets sold by the Radio Corporation of America. One chart gives the patents in Radiola 20, production of which was started in 1925. Here again will be found patents on tubes and patents which were not issued until long after the cross licenses were entered into. Besides, a chart showing patents employed in a receiving set produced in October 1925 is no criterion of the patents employed in 1921, which was the year in which the Westinghouse, General Electric, Radio Corporation, Telephone Co. and the United Fruit Co. contracts were entered into.

As against the showing of these charts, we recall to the Commission's attention the fact that the Westinghouse Co. did manufacture and sell radio receiving sets prior to 1921 and that the Armstrong patents which it owned were sufficient for the construction of a complete radio receiving set. Further as against this chart, we submit the proof in the record that the United Fruit Co. and others had manufactured and sold radio receiving sets prior to 1921, and

Digitized by Google

that all of the companies were able in 1921 to go into the radio receiving set field in competition with each other.

SALE BY TELEPHONE CO. AND UNITED FRUIT CO. OF THEIR STOCK IN RADIO CORPORATI N OF AMERICA DOES NOT WARRANT DISMISSAL OF THE PROCEEDINGS AS TO THOSE COMPANIES

The United Fruit Co. and the American Telephone & Telegraph Co. claim to have disposed of the stock which they owned in the Radio Corporation of America, and they urge that fact as grounds for dismissal of the proceeding as to them. The contracts making up this patent pool have not been canceled. They are still in existence. The Telephone Co. contract is essentially continuous. That is because, while its term is for 10 years, there is a provision in the contracts for automatic extensions unless a 3-year prior notice is given. As to the United Fruit Co. contracts, they run for a definite term of 24 years, and a further indefinite term depending upon the life of any patent that may be granted to any of the contracting parties up to 1945, and for a further period depending upon the granting of a patent on any application for a patent that may be filed at any time up to 1945. Therefore, the contracts which brought about the restraints being still in effect, the sale of stock does not bring about a situation consistent with the laws against restraints and unfair competition.

THE CROSS-LICENSING CONTRACTS BRIEFLY SUMMARIZED

The cross-licensing contracts (Commission's exhibits 14, 17, 19, 83, 88, 89, 90, 129) may be briefly summarized as follows:

1. They contain conditions and terms beyond the reward which a patentee, by the grant of his patent, is entitled to.
2. They contain conditions which in their very nature are illegal.
3. They apportion among the respondents the entire field of wireless.
4. They protect each of the companies against any competition in their respective fields from any of the other companies in the combination; for instance, the potential competition between the General Electric Co. and Westinghouse Co., on the one hand, and the American Telephone & Telegraph Co., on the other hand, in wire telephony or wireless telephony is eliminated.
5. The restraints imposed by the licenses extend for a term far beyond the life of any patent in existence at the time of the execution of the contracts. The Telephone Co. contract, while for a definite term of 10 years, is automatically extended indefinitely after such 10-year period, while the other contracts run for a term of 24 years, which is 7 years longer than the term of any patent issued in 1921; in addition, a further term is provided by the agreement that the licenses shall also continue in effect during the life of any patent which may be granted on any application for a patent filed by any of the parties up to 1945.
6. The General Electric Co. and the Westinghouse Co., by apportioning among themselves all of the manufacturing of articles to be sold exclusively by the Radio Corporation of America, eliminated themselves from competition against each other in the sale of radio equipment; and by the agreements the General Electric Co. and Westinghouse Co. put themselves out of interstate commerce in competition with each other. The establishment of the Radio Corporation of America as a sole seller of articles manufactured by Westinghouse Co. and by General Electric Co. monopolized the sale of radio materials produced by the manufacturing companies.
7. The agreement on the part of the Radio Corporation of America to purchase from General Electric Co. and Westinghouse Co. eliminated the Radio Corporation of America from competition with those two companies.
8. Competition was substantially lessened and the tendency to create a monopoly in the sale of unpatented parts of chassis and of unpatented consoles and cabinets and of other unpatented radio devices and apparatus, was brought about (consequently the effect charged in the amendment made to the complaint on Jan. 31, 1928, was brought about by the contracts).
9. Price competition was eliminated.
10. By the contracts, the General Electric Co. and Westinghouse Co. eliminated themselves from the field of selling broadcasting transmission equip-

Digitized by Google

ment and gave that field to the Telephone Co., while the Telephone Co., by the licenses, eliminated itself from the field of manufacturing and selling radio receiving sets and gave that field to the Radio Corporation, General Electric Co., and Westinghouse Co.

11. The contracts eliminated competition in the purchase of inventions and patents, for the contracts require that no party shall acquire rights under or patents or inventions applicable to the field of any of the other parties, unless the party proposing to acquire such rights shall give the other parties an opportunity to be represented in the negotiations and thereby to acquire rights for their fields.

12. The United Fruit Co., by its contract, agreed not to compete in wireless communication with the Radio Corporation of America, and the restraints to which it committed itself are similar to those hereinabove mentioned. The United Fruit Co. eliminated itself from competition in the sale of radio apparatus by these means:

(*a*) By conveying to the General Electric Co. the stock in its manufacturing subsidiary, and

(*b*) By agreeing to purchase wireless and radio devices from the Radio Corporation.

13. The contracts brought about the restraint of competition and the creation of a monopoly as set out in paragraph 30 of the complaint.

14. Such a vast number of patents of every kind, that is, good, invalid, adjudicated, nonadjudicated, useful, and obsolete were pooled as to place it within the power of the respondents to keep everyone not in the combination out of the radio field.

15. The contracts put the group in a position where real competition cannot arise among the companies in the pool.

THE CLAIM OF GOVERNMENT PARTICIPATION

The respondents claim that the United States Government participated in the organization of the Radio Corporation of America; that the Government approved of the contracts whose legality is attacked by the complaint; that various Departments assisted the Radio Corporation in many of its acts. That claim is shown by the record to be ill-founded. The letter of former Attorney General Daugherty (respondents' exhibit no. 28) is clearly a refusal to comply with the request of the Radio Corporation of America that the Attorney General express an opinion regarding the applicability of the Sherman Antitrust Act and of the Clayton Act to the cross-licensing agreements. The letter of former Attorney General Palmer (Respondents' Exhibit No. 27) also is a refusal to express an opinion on the legality of the contract submitted to him January 15, 1921. Indeed, the Attorney General cautions the General Electric Co. that the "failure to express an opinion is not to be construed as a form of approval."

All that the record does show is that President Wilson designated Admiral Bullard to attend the stockholders and directors' meetings of the Radio Corporation of America as requested by them. The request to the President was made because of the provisions of a bill pending then in the House of Representatives, the bill being known as H. R. 10831. The act was intended to protect against control of the communication business by foreign countries and against the granting to aliens of licenses to operate stations. The bill also provided that certain restrictions of the law should not apply to those corporations whose bylaws provided, among other things, for attendance and hearing at stockholders' and directors' meetings of "a representative of the Secretary of the Navy of or above the rank of captain." Therefore, all that Admiral Bullard was empowered to do, if the bill had passed, would have been to attend meetings of the stockholders and directors; but previous to January 3, 1920, the Radio Corporation of America had been organized, not by the Secretary of the Navy, not by The Assistant Secretary of the Navy, but by the General Electric Co.

There is nothing in this record which indicates in the slightest degree that the Secretary of the Navy or that The Assistant Secretary of the Navy had anything to do with the organization of the Radio Corporation of America; furthermore, there is nothing in this record which shows that the activities of Admiral Bullard were in any way brought to the knowledge of, much less approved, by the Secretary of the Navy or by The Assistant Secretary of the Navy. The record shows that upon the retirement of Admiral Bullard

Digitized by Google

from the Navy he took employment with the Radio Corporation of America (record, p. 894). Furthermore, the record shows that at no time since 1921, when Admiral Bullard was sent by the Navy Department to China, has any officer of the Navy attended meetings of the board of directors of the Radio Corporation. Indeed (record, p. 898), the Radio Corporation of America has not since 1921 requested the designation of anybody from the Navy Department to attend meetings of its board.

The motives of Admiral Bullard appear from this record conclusively to have been personal rather than official for the record establishes (p. 2916) that Admiral Bullard had an ambition to resign from the Navy to become head of the Radio Corporation of America.

The true attitude of the Navy Department is apparent from a letter dated December 16, 1921, by Secretary of the Navy Denby to the Department of State, a copy of which was sent to the Radio Corporation of America. In the letter appears the policy of the Navy Department in the following language:

"The Navy Department fears that any commitment on the part of the Government to an arrangement favorable to a monopoly by a single commercial company, though limited to a particular service, would but lend the means toward extending monopoly to other services, such as development and distribution of apparatus in general, and this is considered absolutely undesirable, particularly in the field of supply and service to ships."

The courtesies extended by the State Department to the Radio Corporation of America of course did not mean any ratification of all of the acts of the Radio Corporation of America, nor did those courtesies signify by any means an approval by the State Department of the cross license or of any of the acts of the Radio Corporation. The Radio Corporation was not the only wireless company which received courtesies from the State Department for the record shows (p. 1650) that the State Department extended the same courtesies to the Federal Telegraph Co. of California when it was undertaking its contract with China, which contract later came under the control of the Radio Corporation of America by the organization of a new Federal Co. of Delaware, to which the China contract was assigned.

The very history of the respondents negatives any claim that the United States, through the Navy Department, the Department of Justice, or State Department, participated in its organization or approved its acts, for that history establishes:

1. That the respondents have divided among themselves the entire field of wireless.
2. That the Radio Corporation sells only to jobbers handling only its sets and that those jobbers sell only to retailers selected by the Radio Corporation (record, p. 1407, 1412).
3. That the Radio Corporation has defamed its competitors (record, p. 3170–3186).
4. That it has defamed its competitors' goods (Commission's exhibit 229; Commission's exhibit 230).
5. That it has cut off from its lists of jobbers those selling sets of other manufacturers (Record, p. 1249–1256; 3473–3479).
6. That the members of the combination have exacted outrageous prices (record, p. 1232–33; 3976).
7. That the Radio Corporation has acquired by purchase the assets of competitors (record, p. 4157).
8. That it has acquired by purchase the capital stock of competitors. (See United Fruit contract; record, p. 2021.)
9. That it has permitted to be held out as independent a competitor when in truth the competitor was selling products manufactured by members of the combination (record, p. 2018).
10. That the Radio Corporation and the other respondents have affixed illegal notice of illegal restrictions on products sold (Commission's exhibit 113, 382).
11. That the Radio Corporation has used its financial power to prevent new capital from being supplied to a competitor (record, p. 2193).
12. That the Radio Corporation has used its power to prevent the consummation of a financial arrangement between a competitor and the Government of China (record, p. 1647).
13. That the General Electric Co. attempted to purchase the stock of a corporation manufacturing parts for a competitor (record, p. 2391).
14. That the Radio Corporation has been refused relief from a court of equity because of the harshness of a contract on which it sued for specific performance (record, p. 3085–3086).

Digitized by Google

15. That the Radio Corporation has been found guilty of contempt of court (record, p. 3762).

16. That the combination has been sued for $60,000,000 for violation of the Sherman Antitrust Act, which suit, we understand, has been settled (record, exhibit 87).

17. That the Radio Corporation has been found guilty by a State court of equity of espionage, which judgment has been sustained by the court of last resort of that State (record, p. 2057).

18. That it has been found guilty of violating section 3 of the Clayton Act (24 Fed. (2d) 565).

19. That it has retarded the art of radio (record, p. 3974; record, pp. 1430–1432).

20. That it has used the cross-licensing of patents as a subterfuge for illegal restraint and monopolization (Commission's exhibit 232; Commission's Exhibit 235).

Therefore, we submit, the claim of Government participation or approval is shown by this record to be unwarranted.

Argument on the Law

1. The jurisdiction of the Commission over voluntary restraint of trade

The respondents contend that the jurisdiction of the Commission is confined under section 5 of the Federal Trade Commission Act to jurisdiction over involuntary restraints as distinguished from voluntary restraints. In that contention respondents are confronted with *Pacific States Paper Trade Association* v. *Federal Trade Commission* (273 U. S. 52), in which a combination which was a voluntary one was held to be amenable to an order to cease and desist issued by this Commission under section 5 of the Federal Trade Commission Act.

Orders by the Commission against other forms of voluntary restraints have been sustained in numerous other cases in circuit courts of appeals. We need to refer to only two as illustrative of the proposition that the Commission has the right to effect the dissolution of voluntary restraint, those two cases being *National Harness Manufacturer's Association* v. *Federal Trade Commission* (288 Fed. 705) and *Southern Hardware Jobber's Association* v. *Federal Trade Commission* (290 Fed. 773).

Therefore, the contention of the respondents in this respect is clearly against the decided cases.

2. No additional parties are necessary to give the Commission jurisdiction

Respondents claim that the traffic contracts being with foreign countries and with foreign companies, the companies are necessary parties before the Commission has power to enter an order affecting those companies, and that as to the countries the subject matter is one for diplomatic action rather than for action by a court or by a commission.

Regarding the contention as to the companies, the contention of the respondent is against the opinion of the Supreme Court in *United Shoe Machine Corporation* v. *U. S.* (258 U. S. 456), in which the court said:

"It is contended that the suit must fail for want of necessary parties in as much as the lessees were not brought into it; that they were necessary parties because their rights were necessarily adjudicated in enjoining the enforcement of the contracts involved. But we agree with the District Court that the lessees were not indispensable or even necessary parties. The relation of indispensable parties to the suit must be such that no decree can be entered in the case which will do justice to the parties before the court without injuriously affecting the rights of absent parties. 1 Street's Equity Practice, section 519, quoted with approval in *Waterman* v. *Canal-Louisiana Bank Co.* (215 U. S. 33), in which case the former adjudications in this court are cited and considered. The covenants were inserted for the benefit of the lessor and were of such restrictive character that no right of the lessee could be injuriously affected by the injunction which was prayed in the case. We are of the opinion that their presence was not necessary to a decision."

The claim of the respondents as to the contracts with foreign countries is based upon a number of cases which have involved only actions in rem against the physical property of a foreign sovereign and actions in personam

Digitized by Google

to recover damages for acts committed in foreign states. Therefore the cases cited by the respondents are not applicable to the jurisdiction of the Commission over the Radio Corporation's contracts with foreign countries.

The commission has jurisdiction over a combination brought about by a conspiracy to violate section 5 of the Commission Act. Since the parties are subject to the jurisdiction of the Commission and since the subject matter of the restraints concerns the violation of laws which the Commission is empowered to enforce and since the traffic contracts with the foreign governments are for the benefit of the combination alleged to be brought about by a conspiracy in restraint of trade, the principle quoted from the *United Machinery case* would seem to be applicable to the case of the respondents in bringing about and maintaining these traffic contracts.

3. THE COMBINATION IS AN ILLEGAL RESTRAINT OF TRADE

On two broad and general principles the combination of the respondents is an illegal restraint of trade:

(1) The first of these is that the licenses contain conditions and provisions which are beyond the reward which the patentee by the grant of the patent is entitled to secure. This principle was reaffirmed in *U. S.* v. *General Electric Company* (47 Sup. Ct. Rep. 192), in which the court said:

"Conveying less than title to the patent or part of it, the patentee may grant a license to make, use, and vend articles under the specifications of its patent for any royalty or upon any condition or promise of which is reasonably within the reward which the patentee by the grant of the patent is entitled to secure."

(2) The second of these is that rights secured by a patent do not protect the making of contracts in restraint of trade or those which tend to monopolize trade or commerce, in violation of the general laws against the restraint of trade. The principle has been stated by the Supreme Court in *United Shoe Machinery Corporation* v. *U. S.* (258 U. S. 463), in these words:

"Undoubtedly the patentee has the right to grant the use of the rights or privileges conferred by his patent to others by making licenses and agreements with them which are not in themselves unlawful, but the right to make regulations in the public interest under the police power of the States or in the exertion of the authority of Congress over maters within its consitutional power is controlled by general principles of law, and the patent right confers no privilege to make contracts in themselves illegal, and certainly not to make those directly violative of valid statutes of the United States. It was held by his court in *Standard Sanitary Manufacturing Company* v. *U. S.* (226 U. S. 20), that the rights secured by a patent do not protect the making of contracts in restraint of trade, or those which tend to monopolize trade or commerce in violation of the Sherman Act. That principle was followed with approval when applied to rights secured under the copyright laws of the United States. *Straus* v. *American Publishers' Association* (231 U. S. 222). The same conclusion was reached in a well considered opinion in the Supreme Judicial Court of Massachusetts involving a State enactment. Opinion of the Justices, 193 Mass. 605 * * * A patent grant does not limit the right of Congress to enact legislation not interfering with the legitimate rights secured by the patent but prohibiting the public interest the making of agreements which may lessen competition and build up monopoly."

These principles will be referred to at length in our discussion of the leading cases involving rights of patentees under patent licenses, cross licenses, and patent pools.

The case of *Bement* v. *National Harrow Company* (186 U. S. 88), is urged by the respondents as an authority for the legality of the pool of patents involved in this case; but in the *Bement case* there was nothing involved except the legality of a single license contract between the National Harrow Co. and Bement, and it does not appear from that case that there were restraints similar to the restraints involved in the contracts entered into by the respondents in this proceeding. The issue in the case did not require a determination by the Supreme Court of the legality of the combination. That the court was limiting its opinion as stated is emphasized in the last paragraph of the court's opinion, as follows:

"It must, however, be conceded that the escrow agreement above set forth looks to the signing by the parties mentioned therein of all contracts similar to those between the parties to this suit, designated A and B, and containing

Digitized by Google

like conditions relating to the patents respectively owned by such parties. But there is no finding by the reviewers that such contracts were, in fact, entered into by those other parties, nor that they constitute a combination of most, if not all, of the persons and corporations engaged in the business concerning which the agreements between the parties to this suit were made. If such similar agreements had been made, and if, when executed, they would have formed an illegal combination within the act of Congress, we cannot presume, for the purpose of reviewing this judgment, in the absence of any finding to that fact, that they were made and became effective as an illegal combination. As between these parties, we hold that the agreements A and B actually entered into were not a violation of the act. We are not called upon to express an opinion upon a state of facts not found. Upon the facts found, there is no error in the judgment of the court of appeals and it must, therefore, be affirmed." (186 U. S. 88.)

In *Standard Sanitary Manufacturing Company* v. *U. S.* (226 U. S. 48), in which the *Bement case* above mentioned was relied upon for the proposition that the owners of patents are exempt from provisions of the Sherman law, the court pointed out that the *Bement case* was not authority for the proposition. It said this:

"There was a contention in that case (the *Bement case*)[1] that the contract of the National Harrow Co. with Bement & Sons was part of a contract and combination with many other companies and constituted a violation of the Sherman law, but the fact was not established and the case was treated as one between the particular parties, the one granting and the other receiving a right to use a patented article with conditions suitable to protect such use and secure its benefits."

The combination known as the National Harrow Co. has been condemned in those cases in which the legality of the combination, as a combination, was attacked. A large amount of litigation arose out of the formation during 1890 and 1891 of the "Harrow Trust" through the medium of the National Harrow Co. of New York and New Jersey. This group of cases questioning the legality of the combination, as a combination, is clear authority for the proposition that a combination of competing patents falls within the prohibition of the Sherman law. A summary of the facts disclosed in the various Harrow cases hereinafter cited reveals the following:

Prior to September 1890, a large number of independent harrow manufacturers were operating in competition with each other, many of them under separate competing patents. There had been a considerable amount of litigation over the validity of some of these patents. In September 1890 (2 months after the passage of the Sherman Act), some of these manufacturers, owning separately most of the patents, organized the National Harrow Co. of New York and transferred to it their several patents, license contracts, and privileges. That corporation entered into various contracts with harrow manufacturers, which were held to be illegal on account of restraints contained in contracts extending their terms beyond the lifetime of the patents. *Strait* v. *National Harrow Company* (18 N. Y. Supp., 224) (discussed at length hereinafter). Thereafter, the scheme centering in the National Harrow Co. of New York was abandoned, and the National Harrow Co. of New Jersey was organized as its successor. This company was formed for the sole purpose, not of manufacturing harrows, but of acquiring assignments of all patents operated by competing harrow manufacturers. Its general scheme was thereafter to grant licenses back to each of the companies assigning patents to it, under which each licensee would be entitled to use the same patents which it had used before, i. e., to continue to operate under what had formerly been its own patents. The licensees were bound by agreement to make no other harrows except those which they were licensed to make, with one exception, which was this: They were also permitted to make harrows to be sold direct to other licensees of the National Harrow Co. If this was done, the company manufacturing could only sell harrows which the purchaser had been licensed by the National Harrow Co. to manufacture for itself. All licensees agreed not to contest the validity of any of the National Harrow Co.'s patents. A large majority (approximately 90 percent or more) of the harrow manufacturers of the United States entered into the scheme and assigned their patents to the National Harrow Co. That company, under the scheme, was to take

[1] Parenthesis ours.

Digitized by Google

charge of all patent litigation (since it was the owner of all patents), and was to fix the prices at which its several licensees should sell.

With this preliminary statement of the facts in mind, we may approach the cases in the order in which they arose.

Strait v. *National Harrow Co.* (Supreme Court of New York, special term, 1891) (18 N. Y. Supp. 224).

This was the case already mentioned, based upon the earlier combination which centered around the National Harrow Co. of New York. The plaintiff contracted to assign its patents to the defendant and not to manufacture or sell harrows thereafter for 50 years at any place in the United States except within the State of Montana. This agreement was to be signed by other manufacturers, all of whom were to receive licenses on similar terms. In this case the plaintiff sued for relief from the contract which it had signed, on the ground that the contract was illegal. After disposing of certain preliminary questions, the court pointed out that the harrows mentioned in the scheme (float springtooth harrows) were the only successful type then in use, and that the scheme constituted a perfect monopoly. Full relief was granted to the plaintiff from the consequences of his unlawful agreement, which remained executory.

The following quotation from the opinion is of particular importance with respect to the defense set up in this case that a combination of competing patents is lawful when its purpose is to settle litigation (18 N. Y. Supp., 224, 233):

"The defendant further contends that the purpose of the contract made is to prevent disastrous litigation. Such purpose is lawful. *But the combination effected has gone much further than such a purpose required. An unlawful combination cannot be cloaked by a lawful purpose, when that is associated with others which the law condemns.* * * * Nor is the defendant's contention that the monopoly formed is authorized by the Federal statutes a justification of these contracts. If these contracts were limited to the lifetime of these patents, the argument should not be dismissed without a serious consideration. But when the parties have assumed to contract for 50 years beyond the possible lifetime of any of these patents, it is clear that the Federal law has given no right to such monopoly." [Italics ours.]

National Harrow Co. v. *Quick* (C. C. D. Ind., 1895; 67 Fed. 130): This was a suit brought by the National Harrow Co. for infringement of one of its patents. The defense was, first, that the plaintiff constituted an unlawful trust or monopoly; second, that the patent sued upon was void for lack of invention; and third, that the defendant had not infringed. The district court held that the combination was clearly one which was illegal as in restraint of trade and that the plaintiff could not recover. This decision was affirmed, though upon another ground (namely, that the patent sued upon was void for for lack of invention) by the Seventh Circuit Court of Appeals (74 Fed. 236).

National Harrow Co. v. *Hench* (C. C. E. D. Pa. 1896; 76 Fed. 667; affirmed on appeal, 3d C. C. A.; 83 Fed. 36): In this case the National Harrow Co. sued to enjoin the defendant, which was one of its licensees, from selling harrows at prices less than those specified in its license contracts. The defense set up was that the contract sued upon was part of the illegal combination in restraint of trade. The court held that it was perfectly evident that the scheme was devised for the purpose of preventing competition, and refused to grant the plaintiff relief, saying (76 Fed. 667, 669):

"I am not able to concur in the view that the principle of these cases (State court decisions dealing with restraint of trade) is inapplicable here, because the agreement in question involves patents. It is true that a patentee has the exclusive control of his invention during the life of the patent. He may practice the invention or not, as he sees fit, and he may grant to others licenses upon his own terms, but where, as was the case here, a large number of independent manufacturing concerns are engaged in making and selling, under different patents and in various forms, an extensively used article, competition between them is the natural inevitable result, and thereby the public interest is promoted. Therefore, a combination between such manufacturers, which imposes a wide-spread restraint upon the trade, and destroys competition, *is as injurious to the community*, and as obnoxious to sound public policy, *as if the confederates were dealing in unpatented articles* * * *. By the united action of more than a score of different manufacturers, natural and salutary competition is destroyed. To sanction such a result, because accomplished by a combination of patentees, would be, I think, to pervert the patent laws." [Italics ours.]

Digitized by Google

This decision was affirmed by a unanimous opinion in the Third Circuit Court of Appeals (83 Fed. 36). That court pointed out that a restraint of trade was sometimes justifiable (as in the case of the sale of a business with a covenant by the seller not to engage in competition with the purchaser). But in this case it pointed out there were no circumstances which would justify the combination. The following quotation from the court's opinion well represents our contention on this point (83 Fed. 36, 38):

"The fact that the property involved is covered by letters patent is urged as a justification; but we do not see how any importance can be attributed to this fact. *Patents confer a monopoly as respects the property covered by them, but they confer no right upon the owners of several distinct patents to combine for the purpose of restraining competition and trade. Patented property does not differ in this respect from any other.* The fact that one patentee may possess himself of several patents, and thus increase his monopoly, affords no support for an argument in favor of a combination by several distinct owners of such property to restrain manufacture, control sales, and enhance prices. Such combinations are conspiracies against the public interests, and abuses of patent privileges. The object of these privileges is to promote the public benefit, as well as to reward inventors. *The suggestion that the contract is justified by the situation of the parties—their exposure to litigation—is entitled to no greater weight. Patentees may compose their differences, as the owners of other property may, but they cannot make the occasion an excuse or cloak for the creation of monopolies to the public disadvantage.* [Italics ours.]

National Harrow Co. v. *Hench* (C. C. N. D., N. Y., 1898; 84 Fed. 226): This was a suit between the same parties as in the Pennsylvania case just cited. In this case the plaintiff declared on the assignment of the patent to it by the defendant. In the Pennsylvania case the plaintiff had declared on the license. The court held that the result in either case was the same, and that both the license and the assignment were invalid as steps in the unlawful scheme.

We next come to *Blount Manufacturing Co.* v. *Yale Towne Manufacturing Co.* (C. C. D. Mass. 1909, 166 Fed. 555). Of this case, Gladney in his work on Restraints of Trade in Patented Articles (p. 365), states:

"The case entitled as above is vastly important. No decision that we have anywhere chanced upon, evinces more care and precision than the one here to be considered. The argument exhibits the sure and easy progress of complete mastery. It is unfolded without dogmatism and convinces without triumph. When the premises are fairly laid out we feel instantly the tightened grip of the conclusion. The preliminary propositions force the conclusion announced with all the inexorable certainty of an euclidean demonstration. The understanding is captivated and bound by the irregragable ligatures of ultimate thinking. Indeterminate prepossession, obstinate prejudices and undefined vagaries are squeezed out like liquid from a pulpy mass under hydraulic press."

This was a bill for an accounting under a contract, to which a demurrer was interposed on the ground of illegality. From the pleadings it appeared that a group of agreements had been made between the Blount Co., The Yale & Towne Co., and others (Corbin and The Russell & Erwin Co.), all of which were manufacturers, under competing patents, of liquid door checks—patented articles. The series of agreements, as the court found, constituted: "related parts of a general plan to regulate and control the business of dealing in liquid door checks. The plan comprehends the maintaining of prices, the pooling of profits, the elimination of competition, and the restraint of improvements." (166 Fed. 555, 556.)

The court pointed out that, apart from the patent features, such a combination would constitute a clear violation of the Sherman Act. The court then went on to say (166 Fed. 555, 557):

"It seems self-evident that a contract which is only coextensive with the monopoly conferred by letters patent, and which creates no additional restraint of trade or monopoly, does not conflict with the Sherman Act. The monopoly granted by letters patent is of a particular invention. Devices thus protected by patents are as a matter of fact in commercial competition with both patented and unpatented devices. *A contract whereby the manufacturers of two independent patented inventions agree not to compete in the same commercial fields deprives the public of the benefits of competition, and creates a restraint of trade which results, not from the granting of letters patent, but from agreement. While the monopoly of the patented articles is not increased, the monop-*

Digitized by Google

oly of the commercial field is increased by the 'unified tactics' as to prices." (Italics ours.)

After pointing out that the nonuse of an invention is fully within the rights of the owner of the patent (as the Supreme Court held in the *Paper Bag Patent case*, 210 U. S., 405), the court said that it did not necessarily follow that the owner of a patent could by agreement bind himself to nonuse. Nonuse ordinarily violates no law; but to contract with another, whereby that other is given the power to compel one not to use, is a combination in restraint of trade (166 Fed. 555, 562):

"Combinations between owners of independent patents whereby, as part of a plan to monopolize the commercial field, competition is eliminated, are within the Sherman Act, for the reason that the restraint of trade or monopoly arises from combination, and not from the exercise of rights granted by letters patent. As by the terms of the contract under consideration the owners of distinct patents each agreed to restrain its own interstate trade, I am of the opinion that the contracts are in these particulars obnoxious to the Sherman Antitrust Act."

The demurrer was therefore sustained.

Standard Sanitary Manufacturing Company v. *United States* (226 U. S. 20), affirming the decision of a three-judge circuit court in the District of Maryland (191 Fed. 172; commonly known as the *Bathtub case*): In this case the petition charged a violation of both section 1 and section 2 of the Sherman Act. The facts disclosed were briefly these. The Standard Sanitary Manufacturing Co. owned a patent (the Arrott patent) covering a mechanical dredger used in sifting enamel powder onto red-hot iron castings to produce enameled bathtubs and other articles. The validity of the Arrott patent had been specifically sustained in litigation. The Standard Co. manufactured 50 percent of the enamelware of the country. Some of the other manufacturers were infringers, and controversies existed. The defendant, Wayman, obtained options on the Arrott patent and on two others, owned respectively by the Mott and Wolff companies. After obtaining these options, Wayman proceeded to negotiate contracts with the other defendants. The contracts were finally executed soon after Wayman had obtained assignments of the patents. By these contracts, Wayman granted a license under all three patents to each corporate defendant. The circuit court found as a matter of fact that all the companies knew that the others would execute those agreements when their turn came, and that no company would have executed them without this knowledge.

To the defense that the agreements were lawful contracts made by the owner of a patent with his several licensees, the circuit court declared that the owner of a patent could not require his licensee to violate the law (191 Fed. 172, 189):

"A patentee may not require his licensee to sell a patented oil which flashes below the minimum temperature prescribed by the State law (*Patterson* v. *Kentucky*, 97 U. S. 501: 24 L. Ed. 1115). He may not authorize his licensee to prescribe and sell his patented medicine in a State which requires of all who write prescriptions that they shall have qualifications not possessed by the licensee (*Jordan* v. *Overseers of Dayton*, 4 Ohio 295). Selling oil with a low flashing point or prescribing patent medicine without having a State license to practice medicine would no more strike the average man as akin to murder or arson than would a combination to fix prices. In one respect they are like murder and arson. They are violations of law outside the patent laws. So is a combination in restraint of trade. What the court meant was what the court said—a patentee cannot require his licensee to violate a law outside of the patent law. Murder and arson are outside the patent law. Every obligation which a patentee attempts to impose upon his licensee to break any law outside of the patent law is in that respect like a requirement to commit murder or arson. In the nature of things such must be the law. A patentee is as much subject to the laws of the land as is any other man. From one special application of one class of laws he is exempt. At common law and by statute a man who invented a new and useful thing might be given a right which would enable him for a limited time effectually to monopolize it. The courts have said that this right to monopolize what he invented cannot be taken from a patentee by State laws. They say it has not been taken away by Congress. All men knew that Congress never intended, when it passed the Sherman Act, to change the patent law. It did not do so.

* * * * * * *

(191 Fed. 172, 190): "*The patentee may, in spite of that law, monopolize for the term of his patent the thing which he or his assignor invented. Neither*

Digitized by Google

at common law nor in this country by statute has he ever had a right to monopolize anything else. As to everything not validly claimed in his patent he is as other men. If by the common law or the statutes of the State or by the enactment of Congress men are forbidden to restrain trade or to monopolize it, a patentee may not restrain trade or attempt to monopolize it in anything except that which is covered by his patent." (Italics ours.)

In the Supreme Court (*Standard Sanitary Mfg. Co.* v. *United States*, 226 U. S. 20), the Government contended, as we contend here, that the patent situation was used as a cloak of legality to cover an otherwise illegal enterprise. With respect to this contention, the Supreme Court said (226 U. S. 20, 40): "The fact being in controversy, we place our consideration and decision on other elements." Accordingly, the court proceeded to decide the case accepting the defendant's own view of the situation. In answer to the contention that the scheme had been adopted as a means of benefiting the public through the "elimination of seconds", the court very properly said (226 U. S. 20, 41):

"But the scheme has other features and effects which counsel overlook or ignore. It is immediately open to the criticism that its parts have no natural or necessary relation. What relation has the fixing of a price of the ware to the production of 'seconds'? If the articles were made perfect their price in compensation of them and by unfettered competition would adjust itself. To say otherwise would be in defiance of the examples of the trading and industrial world. Nor was a combination of manufacturers necessary to the perfection of manufacture and to rivalry in its quality."

Similarly in the present case, the defendants advance as their motive the desire to settle patent infringement disputes (a factor which was also present in the *Standard Sanitary case;* see 226 U. S. 20, 36). In answer to this the Commission may well ask what relation to patent litigation or to the public good can be found in the territorial restrictions, and other restrictions contained in the cross licenses in this case. In the *Standard Sanitary case*, after pointing out that the agreements made by Wayman changed a competitive condition to one of cooperation, the court pointed out (226 U. S. 20, 48):

"The agreements clearly, therefore, transcended what was necessary to protect the use of the patent or the monopoly which the law conferred upon it. They passed to the purpose and accomplished a restraint of trade condemned by the Sherman law. It had therefore, a purpose and accomplished a result not shown in the *Bement case.* * * *" (226 U. S. 20, 49):

"*Rights conferred by patents are indeed very definite and extensive, but they do not give any more than other rights an universal license against positive prohibitions. The Sherman law is a limitation of rights, rights which may be pushed to evil consequences and therefore restrained.*" (Italics ours.)

In *Rubber Tire Wheel Co.* v. *Milwaukee Rubber Works* (154 Fed. 258) and *Indiana Manufacturing Co.* v. *J. I. Case Threshing Machine Co.* (154 Fed. 365), both cases being decided on the same day by the Circuit Court of Appeals for the Seventh Circuit, there was nothing involved except the aggregation of a vast number of patents. The opinions do not show restraints similar to, or in the degree, or for the term of the restraints in the cross licenses in this case. Neither of these cases was brought by the Government for the purpose of attacking the combination. Both cases were dismissed by stipulation in the Supreme Court, the *Rubber case* (210 U. S. 439) and the *Threshing Machine case* (207 U. S. 603). Of the dismissal by stipulation of the *Rubber case*, Gladney in his Restraints of Trade in Patented Articles, says:

"That was a wise pool, a wise stipulation, and a wise dismissal. The pool had no thought of pleading its miraculous justification by faith before the all-seeing eyes of that great tribunal. The pool knew, and its counsel knew, that there was no more chance of convincing the Supreme Court of the legality of its system of contracts, of its sandbagging commission, of its valient good faith, than there is of driving a 40-horsepower automobile through a finger ring. It will not be surprising if the courts of other circuits assume the same attitude towards this decision that the Court rendering it did towards the decision of the Court of Appeals for the Sixth Circuit adjudicating the tire patent void. In good faith they will regard the decision as erroneous" (p. 363).

Of the dismissal of the *Threshing Machine case* by stipulation, Gladney says (p. 365):

"The pool, when dragged to the front door of the Supreme Court always escapes dissolution and the hot branding iron of condemnation in some way, and as a last resort 'per stipulation'. But what would happen if the Government itself should start out after the pool? What recoures then could be had 'per stipulation'."

Digitized by Google

From all these authorities, it is apparent that since the license contracts contain conditions beyond the reward which the patentee by the grant of the patent is entitled to secure, and that since the contracts are in restraint of trade in violation of general law to which the patent laws are subject, the combination is an illegal restraint of trade.

THE COMMISSION HAS POWER TO ENTER AN ORDER TO CEASE AND DESIST IN THIS PROCEEDING

The respondents contend that if the combination attacked by the complaint is illegal, it violates the Sherman Antitrust Act and not the Federal Trade Commission Act; and that under the *Eastman Kodak case* (274 U. S. 619), the Commission is without power to enter an order against the respondents in this proceeding.

An examination of the cases, both in the Supreme Court and in various circuit courts of appeal, sustaining orders to cease and desist entered by the Commission, shows clearly that the Commission has authority to enjoin methods and practices which are violations of the Sherman Antitrust Act, as well. The principle upon which the Supreme Court affirmed (*Federal Trade Commission* v. *Eastman Kodak Co., et al.* (274 U. S. 619)) the decree of the Circuit Court of Appeals for the Second Circuit has no application to the present proceeding because the complaint here attacks contracts, restraints, and restrictions.

As to the contention of the respondents that the Commission has no jurisdiction over facts which constitute violations of the Sherman Antitrust Act, we point to a great number of cases in which orders of the Commission have been affirmed in cases in which the methods, acts, and practices were also without doubt violations of the Sherman Antitrust Act as well. Among these are *Southern Hardware Jobbers' Association* v. *Federal Trade Commission* (290 Fed. 773), *Western Sugar Refining Co.* v. *Federal Trade Commission* (275 Fed. 725), *Wholesale Grocers' Association of El Paso* v. *Federal Trade Commission* (277 Fed. 657), *National Harness Manufacturers' Association* v. *Federal Trade Commission* (261 Fed. 170; 268 Fed. 705), *Arkansas Wholesale Grocers' Association* v. *Federal Trade Commission* (18 Fed. (2d) 866), and *Pacific States Paper Trade Association* v. *Federal Trade Commission* (4 Fed. (2d) 457, 273, U. S. 52).

Indeed, in the *Kodak case* the Circuit Court of Appeals for the Second Circuit (7 Fed. (2d) 996) sustained a part of the Commission's order which prohibited the continuance of an agreement in restraint of trade clearly in violation of the Sherman Antitrust Act.

In the *Pacific States Paper Trade Association case* (273 U. S. 52), there was before the Supreme Court an order to cease and desist made by the Commission enjoining the fixing of uniform resale prices by an agreement among the members of an association. We realize that it is not necessary to cite to this Commission authorities holding that such agreements are in violation of the Sherman Antitrust Act. The Supreme Court, in the *Pacific States Paper Trade Association case*, in an opinion delivered by Mr. Justice Butler unanimously sustained the Commission in ordering the discontinuance of the price-fixing agreements entered into by the members of the *Pacific States Paper Trade Association case*. This case, therefore, is clear authority for the proposition that the Commission has the power to cancel agreements in restraint of trade, which agreements violate the Sherman Antitrust Act.

The Circuit Court of Appeals for the Second Circuit, in *American Tobacco Co.* v. *Federal Trade Commission* (9 Fed. (2d) 586), held, in effect, that the Commission did not have jurisdiction over restraints of trade which violated the Sherman law. Of the opinion of the Circuit Court of Appeals the Supreme Court, in *Federal Trade Commission* v. *American Tobacco Co.*, stated unanimously, in an opinion by Mr. Justice Butler, as follows (274 U. S. 544):

"The opinion of the circuit court of appeals is of uncertain intendment and is not satisfactory as an exposition of the law. What this Court has said in many opinions indicates clearly enough the general purpose of the statute, and the necessity of applying it with strict regard thereto."

In the *Tobacco case*, therefore, the Supreme Court, in effect, reiterated what it decided in *Pacific States Paper Trade Association case* hereinabove referred to, namely, that the Commission's jurisdiction extends to restraints which violate the Sherman Antitrust Act, and that because a restraint is in violation of the Sherman Antitrust Act, it is not, therefore, outside of the jurisdiction of the commission.

Digitized by Google

The Supreme Court, in the *Kodak case* (274 U. S. 624), was dealing with physical property, and physical property solely (see dissenting opinion of Mr. Justice Stone), that physical property being laboratories and other physical assets. The Court said:

"So here, the Commission had no authority to require that the company divest itself of the ownership of the laboratories which it had acquired prior to any action by the Commission. If the ownership or maintenance of these laboratories has produced any unlawful status, the remedy must be administered by the courts by appropriate proceedings therein instituted."

The complaint in this case attacks contracts, rights, restraints, and restrictions (see par. 30 of complaint, record, p. 27; and amendment thereto, record, p. 123). There is a distinct difference between physical property in the form of laboratories, on the one hand, and contracts, rights, restraints, and restrictions, on the other hand. Therefore, the language quoted from the opinion of the Supreme Court cannot be held to have any application to the power of the Commission in this case. Furthermore, the form or method of competition here involved, embodying contracts, agreements, restraints, and restrictions, has been held, as we have hereinabove pointed out, to be in violation of the Federal Trade Commission Act, even though in violation of the Sherman Antitrust Act as well.

CONCLUSION

Since the record discloses proof of facts in violation of section 5 of the Federal Trade Commission Act, we submit that the motion to dismiss should be denied.

Respectfully,

EWARD L. SMITH, *Attorney.*
ROBT. E. HEALY, *Chief Counsel.*

SUN OIL CO.,
Philadelphia, January 15, 1936.

The Hon. WM. I. SIROVICH,
Chairman, Committee on Patents,
24 Fifth Avenue, New York, N. Y.

DEAR SIR: Further to our letter of December 3, 1935, acknowledging receipt of your letter of November 6, 1935, the following is a list of patents, believed to be complete, owned by Sun Oil Co.:

Your letter does not define a patent pooling or cross-licensing agreement. Our understanding of the kind of agreement to which your questions are intended to be directed is one, more or less reciprocal in character, wherein two or more parties, engaged in the same business and actual or prospective competitors, license each other under their respective patents, the only or principal consideration received by each party being the license or licenses received by the other party or parties; the object being either to establish a monopoly, general or limited, that will suppress or limit competition, or to create a common ownership of competitive patents that will enable licenses to be granted to others on terms that will benefit both or all parties to the agreement. We have never been a party to any such agreement.

We might say that many, if not most, patent license agreements, wherein one party is the real licensor and the other the real licensee, and in which the main consideration is the payment by the licensee to the licensor or a substantial money consideration in the form of a prepaid license fee or a continuing royalty, contain the common provision that the licensor shall have the right to grant licenses under any improvements that the licensee may make upon the invention licensed by the licensor. It is also not uncommon where applications for patents for the same broad invention are filed by different parties and where the Patent Office declares interferences, between such applications, the outcome of which, if contested, would be uncertain, settlements are frequently made providing that each party shall have a nonexclusive license under any patent that may issue to the other party. The parties then determine, after investigation, which party is entitled to claim the subject matter common to the two applications. The broad patent then issues to such party and a specific patent may issue to the other party. We take it that your inquiries are not directed to licenses of the character of those above specified, wherein the cross-licensing provision is a mere incident of an ordinary patent license granted by one party to another.

With respect to any patent license agreement of the character above mentioned in which we are the real licensees, we are in most cases not informed of all the patents under which we are licensed, we being interested, usually, only in securing immunity from suit for infringement by the licensor—usually for infringement of some one or more patents which we are using or of which, if unlicensed, we might be charged with infringement. Nor can we undertake to say which of such patents we are using.

So far as concerns our own patents, we are commercially using a large proportion. The use of others has been abandoned, due to being superseded by better processes or apparatus. Still others cover processes or apparatus whose use, at the time of application for patent, was contemplated as possible or probable but which were never in fact used.

We have never entered into any agreement wherein we have not retained the right to use, and grant licenses under, our own patents.

Digitized by Google

A copy of the bylaws of Sun Oil Co. is herewith enclosed.

Since we are not parties to any patent-pooling agreement nor to any cross-licensing agreement of the kind to which we assume your inquiries are directed, and since we are not engaged in the business of granting licenses under our own patents (although in some instances we have granted licenses under certain of our patents), we have no "forms" for such agreements that we have ever used or which would be applicable to our business.

We cannot undertake to estimate the value of patents owned by us.

In most instances our patents were taken out by our officers and employees and assigned to the company in accordance with the terms of general contracts of employment made with our employees whereby inventions made by them relating only to our particular business while they are in our employ are assignable to the company. Those leaving our employ are under no obligation to assign inventions subsequently made. While the making of improvements, patentable or not, that contribute to the efficiency and economy of our refining processes is a material factor in determining an employee's compensation, it is impossible to apportion the part thereof that could be considered compensation for his inventions.

Patents, whether owned by us or licensed by us or under which we are licensed, have never formed a basis for corporation or charter franchises.

We believe that in many instances patent-pooling arrangements between competitors are entirely legitimate and may be practically compelled by the desirability, not to say the necessity, of avoiding damaging or even ruinous litigation. Where, however, an organized patent exploiting concern (which may be and usually is, created by a patent-pooling arrangement) devotes itself exclusively to securing patents covering not only useful inventions but also all possible expedients which competent engineers will, in the exercise of their expected skill, adopt when necessity arises, it creates a condition which forces everyone engaged in the business to which the patents of the exploiting concern relates to pay tribute to it or to run the risk of possible ruinous litigation. We do not know how to remedy this difficulty, because there is no yardstick by which the Patent Office or the courts can determine whether the disclosure of a patent involves invention or mechanical skill. Many patents have been sustained which, in the opinion of those skilled in the art, as well as in the opinion of disinterested patent lawyers, involve no invention and cover expedients the adoption of which in the natural evolution of the art, occurs as a matter of course. It is very difficult to suggest any amendment to the patent laws that would remedy the situation.

We have, however, one suggestion to make to cure a specific evil. It frequently happens that a process is used, or a machine, article, or composition made and sold, for years by the industry with knowledge that it is unpatented and with no suspicion that it is patentable. A patent covering such process, machine, article, or composition unexpectedly issued on an application which has been pending for years. In many instances the claims have been revised, during the pendency of the application, to cover the developed commercial art. The industry may have large capital invested, devoted to the use or manufacture of the patented subject matter and, although it believes it has a good defense against the patent, feels constrained to take licenses, if it can get them, on the best terms obtainable, since it cannot afford to take the risk of injunction and large recovery. We believe that this condition would be ameliorated by providing that the life of no patent shall extend beyond a period of 20 years from its date of application. Such a law would also greatly expedite the prosecution of applications. In some cases, as in interferences, there might be some injustice done in that a delay of more than 3 years in issue of his patent would not be the inventor's fault; but the interest of the inventor in an exceptional case should be subordinate to the interests of the public.

Another amendment to the patent law which would ameliorate the condition above outlined would be to provide that in the case of one who made, used, or sold an invention before the issue of a patent therefor, no damages or profits would be recoverable for infringement of such patent during the period prior to a decree of a court establishing the validity of the patent.

We have another suggestion to make. The presumption of validity that attaches to a patent is given, in our opinion, too great weight by the courts. In the case of a monopoly that is granted by a bureaucrat (who may or may not be experienced, competent, and have knowledge of the actual commercial art), in ex parte proceedings, to a single individual to whom 130,000,000 people

Digitized by Google

must pay tribute, no presumption of validity should attach. We believe that this condition would be remedied by allowing an applicant to have a patent even if the Patent Office, after due examination, find the claims, in its opinion, unpatentable. The burden would then be upon the courts to decide patentability, in an inter partes case, with no presumption one way or the other. If any burden should be assumed by either side, it should be assumed by the plaintiff. A patent monopoly is as apt as any other monopoly to be oppressive, unjust, and unlawful, and the public should not have the burden of convincing the courts that an individual is not entitled thereto. The burden should be upon the individual to convince the courts that he is entitled thereto.

Another suggestion we have to make is that the public shall have the right to proceed, in the Patent Office, within a limited time after its issue, to institute annulment proceedings, the Patent Office being given the right to annul the patent or to issue it with more restricted claims. The main objection to such an amendment would be that it would require an enlargement of the Patent Office, the expense of which, however, could be defrayed, in part at least, by requiring the payment of substantial fees. An analogous practice already exists in the Patent Office in the institution of opposition and cancelation proceedings in the case of trade marks and we are advised that it works satisfactorily.

Very truly yours,

SUN OIL CO.,
FRANK S. BUSSER,
Patent-Counsel.

BYLAWS OF SUN OIL CO.

ARTICLE I. DIRECTORS

SECTION 1. There shall be a board of directors consisting of eight members, who shall be elected annually at the annual meeting of the stockholders; they shall hold office for 1 year and until their successors are duly elected and qualify.

Such election shall be conducted by two inspectors appointed by the presiding officer of the meeting, which inspectors shall be duly sworn, and shall in writing certify to the returns; but no person who is candidate for the office of director shall act as inspector, judge, or clerk of such election.

If the office of any director becomes vacant, the remaining directors, by a majority vote, may elect a successor, who shall hold office for the unexpired term, and until his successor is elected, or if the number of directors is at any time increased, the existing directors may by majority vote elect the additional director or directors, who shall hold office until the next annual meeting of the stockholders and until his or their successors are elected.

ARTICLE II. OFFICERS

SECTION 1. The board of directors shall immediately after the adjournment of the annual meeting, or as soon thereafter as possible, meet for organization, and choose a president, one or more vice presidents, a treasurer and assistant treasurer, and a secretary and assistant secretary, and such subordinate officers as the board of directors may, from time to time, create; provided, however, that the offices of assistant treasurer and assistant secretary may or may not be filled, at the pleasure of the board of directors.

The offices of treasurer and secretary, and the offices of assistant treasurer and assistant secretary, may be held by the same person at the discretion of the board.

All of said officers shall hold their offices at the pleasure of the board.

ARTICLE III. PRESIDENT

SECTION 1. The president shall preside at all meetings of the board of directors and of the stockholders. He shall have, under the control of the directors, general supervision and direction of all department of the company's service; he shall sign all certificates of stock, and all contracts, and other instruments, unless otherwise ordered by the board; and shall perform all duties incidental to his office.

It shall be the duty of the president and in his absence, of the board of directors, to fix from time to time, the salaries of all the officers, managers, and heads of departments of the company.

Digitized by Google

ARTICLE IV. VICE PRESIDENTS

SECTION 1. The vice presidents shall (in order of their seniority) in the absence of the president perform the duties of the president, and perform such other duties as shall, from time to time, be imposed upon them by the board. The performance of any such duty by either of said vice presidents shall be conclusive evidence of his right to act.

ARTICLE V. SECRETARY

SECTION 1. The secretary shall keep minutes of all meetings of the board of directors and of the stockholders, and shall give all notices of meetings of the stockholders and of the board of directors. He shall have custody of all deeds, contracts, agreements, and other records, except as otherwise provided in these bylaws or by the board of directors, and shall attend to such correspondence of the company as the board of directors shall direct. He shall be the custodian of the seal of the company and shall affix it to any instrument requiring the same, except as otherwise provided herein or by the board of directors; and shall be sworn to the faithful discharge of his duties.

ARTICE VI. ASSISTANT SECRETARY

SECTION 1. The assistant secretary shall, during absence of the secretary, perform all of the duties of the secretary, and his performance thereof shall be conclusive evidence of his right to act.

ARTICLE VII. TREASURER

SECTION 1. The treasurer shall have charge of all receipts and disbursements of the company, and shall be the custodian of the company's funds. He shall have full authority to receive and give receipts for all moneys due and payable to the company from any source whatever, and to endorse checks, drafts, and warrants in its name and on its behalf, and full discharge for the same to give. He shall provide and arrange for the keeping of a regular set of books of account and be the custodian of all books and papers relating to the financial affairs of the company. He shall deposit the funds of the company in its name in such depositories as may be designated by the board of directors. The treasurer shall also sign all checks, notes, drafts, and certificates of stock. A report of the financial condition of the company shall be made by the treasurer to the president, whenever requested by the president. He shall give a bond for the faithful performance of his duties in such sum as the board of directors may by resolution specify.

ARTICLE VIII. ASSISTANT TREASURER

Section 1. The assistant treasurer shall, during the absence of the treasurer, perform all the duties of the treasurer, and he shall give a bond for the faithful performance of his duties in such sum as the board of directors may by resolution specify. His performance of any of the duties of the treasurer shall be conclusive evidence of his right to act.

ARTICLE IX. MEETINGS

SECTION 1. The annual meeting of the stockholders for the election of directors for the ensuing year and for the transaction of such other business as may be properly brought before the meeting, shall be held at the general office of the company in the city of Philadelphia, State of Pennsylvania, on the second Tuesday in March, at 11 o'clock a. m. in each and every year.

Each share of stock with voting power shall be entitled to one vote, except as otherwise provided in the certificate of incorporation, which vote may be give either in person or by proxy, but no proxy shall be voted on after 3 years from its date, nor shall any share of stock be voted on at any election which has been transferred on the books of the company within 20 days next preceding such election.

All elections for directors shall be by ballot, and the poll at every election shall remain open at least one hour, unless all of the stockholders with voting power are present in person or by proxy and have sooner voted, or unless all the stockholders with voting power waive this provision in writing.

Digitized by Google

SEC. 2. Special meetings of the stockholders may be called at any time by the president or vice presidents of the company, upon the order of the board of directors or upon the written request of the holders of 25 percent of the capital stock with voting power outstanding at the time.

Unless waived, 10 days' notice of all stockholders' meetings either annual or special, shall be given by the Secretary either personally or by mailing a notice addressed to each stockholder entitled to vote at his last postoffice address given on the books of the company.

SEC. 3. Immediately following their election at the annual meeting of the stockholders, the board of directors shall meet for the purpose of organization. Regular meetings of the board of directors thereafter may be held at such times and at such places as said directors may by resolution determine.

Special meetings of the directors may be called at any time by the president, or such meetings shall be called upon the written request of a majority of the directors.

No notice shall be required of the meeting of the board of directors for the purpose of organization or for the regular meetings fixed as aforesaid, but at least 48 hours' notice shall be given by mail or telegraph of all special meetings of the directors, but this notice may be waived at any time in writing or by telegraph. A meeting of the directors may be held without notice at any time when all of the directors are present.

At all meetings of the directors a majority of the directors in office shall constitute a quorum for the transaction of business.

ARTICLE X. COMMITTEES

SECTION 1. The board of directors may appoint such committees, and officers therefor, as it may deem proper, and may delegate to such committees any of the powers possessed by the board.

SEC. 2. Committees shall keep full records of their proceedings, and shall report the same to each regular meeting of the board, or when called upon by the board.

SEC. 3. A majority of any committee shall have power to act.

SEC. 4. The board of directors may appoint an executive committee who shall have and may exercise so far as permitted by law the powers of the board of directors in the management of the business and affairs of the corporation, and may authorize the seal of the corporation to be affixed to all papers which may require it.

ARTICLE XI. STOCK

SECTION 1. *Certificates.*—Certificates evidencing the ownership of the shares of stock of the company of any class shall be issued to those entitled to them by transfer and otherwise. Each certificate for preferred stock and common stock shall bear a distinguishing number, the signature of the president or vice president, and of the secretary or an assistant secretary or of the treasurer or an assistant treasurer, the seal of the company, and such recitals as may be required by law. The preferred- or common-stock certificates in any class or classes shall be issued in numerical order, and a full record of the issuance of each such certificate shall be made in the books usually kept for that purpose or required by law. The certificates for preferred stock and common stock shall be of such form and design as the board of directors may adopt, and the form and design thereof may from time to time be changed by the board.

SEC. 2. *Transfers.*—All shares of stock may be transferred on the proper books of the company by the registered holders thereof or by their attorneys legally constituted or their legal representatives by a surrender of the certificates therefor for cancelation and a written assignment of the shares evidenced thereby. The board of directors may from time to time appoint such transfer agent and registrars of stock as it may deem advisable and may define their powers and duties. There shall, however, always be a transfer agent which shall be a trust company or national bank with an office in the Borough of Manhattan, city of New York.

SEC. 3. *Closing of transfer books.*—The stock-transfer books of the company shall be closed for a period of 20 days next preceding, and also on the day of, any meeting of the stockholders for the election of directors. The stock-

Digitized by Google

transfer books shall be open to the inspection of the stockholders of the company as required by law.

SEC. 4. *List of stockholders.*—It shall be the duty of the treasurer or assistant treasurer of the company to prepare, at least 10 days before every election of directors, a true, full, and complete list of all the stockholders of the company entitled to vote at the ensuing election, with the residence of each, and with the number of shares held by each, which list shall be arranged in alphabetical order and shall at all times during the usual hours of business be open to the examination of any stockholder.

SEC. 5. *Dividends.*—If any date appointed for the payment of any dividend, or fixed for determining the stockholders of record, to whom the same is payable, shall in any year, fall upon a Sunday or legal holiday, then such dividend shall be payable, or such stockholder of record shall be determined on the next succeeding day not a Sunday or legal holiday.

ARTICLE XII. LOST CERTIFICATES OF STOCK

SECTION 1. Any person or persons applying for a certificate of stock to be issued in lieu of one alleged to be lost or destroyed, shall pursuant to the laws of the State of New Jersey relating to lost or destroyed certificates of stock, furnish to the company such information as the board of directors may require to ascertain whether a certificate of stock has been lost or destroyed.

ARTICLE XIII. SEAL

SECTION 1. The seal of the corporation shall be circular in form, and shall have inscribed thereon the following words and figures "Sun Oil Co., Incorporated 1901, New Jersey."

ARTICLE XIV. AMENDMENTS

SECTION 1. These bylaws may be altered or amended at any annual meeting of the stockholders, or at any special meeting called for that purpose, by a majority vote of all the stockholders; or at any meeting of the directors, by a majority vote of the directors. March 8, 1932.

INTERNATIONAL HARVESTER CO., INC.,
606 South Michigan Avenue,
Chicago, December 12, 1935.

Mr. WILLIAM I. SIROVICH,
Chairman, Committee on Patents of the House of Representatives,
244 Fifth Avenue, New York City.

SIR: We acknowledge receipt of your circular letter of November 9 and are pleased to assist your committee by supplying the information you request so far as the matters covered in the list of inquiries you submit apply to patents held by this company and are pertinent to the scope of House Resolution 196.

For convenient reference, your inquiries are answered in the order numbered:

1. International Harvester Co. holds title to 916 patents. It is also entitled to use the subject matter of certain six patents included in a cross-license agreement covering power-lift plow patents referred to in more detail below. It is also a party to the Automobile Manufacturers' Association cross-license agreement referred to below. A list of all patents used under cross-license agreement is given below. A list of the large number of patents owned by the company would merely represent a mass of numbers and dates serving no purpose. Patent ownerships are matters of public record. However, we have no objection to furnishing a complete list, other than the time and labor it involves.

2. Approximately two-thirds of the patents owned by this company are not in current use. The reason for nonuse in most cases is because the patent was based on an implement or detail of construction which has since become obsolete and gone out of manufacture, or on some experimental implement or construction which failed to prove commercially practicable and was dropped. In a relatively few cases the patents were taken out to record priority in a new conception which might be usable but for which no practicable commercial use has yet been found or developed.

Digitized by Google

3. The only cross-licensing agreement involving an association having a constitution and bylaws to which this company belongs is that of the Automobile Manufacturers' Association, 366 Madison Avenue, New York City. Your committee presumably has obtained from that association all information desired concerning its constitution and bylaws.

4. We attach hereto (1) a copy of the Automobile Manufacturers' Association cross-license agreement to which this company is a party, and (2) copy of a trust agreement effected April 27, 1920, under which certain patents covering power lift plow constructions were placed in trust by the LaCrosse Plow Co. and by this company with the provision that licenses on moderate terms were to be available to all others desiring same.

5. The preceding paragraph (4) answers this inquiry.

6. The names of inventors and numbers of the existing patents contributed by this company to the cross-license agreement of the Automobile Manufacturers' Association are as follows:

Inventor	Patent no.	Date of issue	Inventor	Patent no.	Date of issue
Howe	1295505	Feb. 19, 1919	Cox	1435281	Nov. 14, 1922
Do	1295506	Do.	Mott	1440930	Jan. 2, 1923
Sperry	1322640	Nov. 25, 1919	Kings	1443183	Jan. 23, 1923
Horthy	1334536	Mar. 23, 1920	Johnston	1464713	Aug. 14, 1923
Arnold	1376500	May 3, 1921	Burger	1543638	Jan. 23, 1925
Burger	1396387	Nov. 1, 1921	Burger, et al	1568134	Jan. 5, 1926
Howe	1400678	Dec. 20, 1921	Burger	1589360	June 22, 1926
Johnston	1409006	Mar. 7, 1922	Baker	1639449	Aug. 16, 1927
Howe	1413479	Apr. 18, 1922	Schoenrock	1639470	Do.
Arnold	1433060	Oct. 24, 1922	Derr	1667514	July 17, 1928

The names of inventors and numbers of existing patents contributed by this company to the power lift patent trust of April 27, 1920, are as follows:

Inventor	Patent no.	Date of issue	Inventor	Patent no.	Date of issue
W. S. Graham	1295479	Feb. 25, 1919	A. C. Lindgren	1440924	Jan. 2, 1923
C. W. Mott	1319483	Oct. 21, 1919	W. S. Graham and J. L. Hipple	1446118	Feb. 20, 1923
A. C. Lindgren	1387500	Aug. 16, 1921	A. C. Lindgren	1561611	Nov. 17, 1925
J. F. Steward	1388978	Aug. 30, 1921	W. S. Graham	1632128	June 14, 1927
A. C. Lindgren and R. B. Johnston	1394914	Oct. 25, 1921	Do	1755819	Apr. 22, 1930
C. W. Mott	1394930	Do.			

The applications resulting in the above patents included in the two cross-license agreements above referred to were assigned to International Harvester Co. as of the date of filing of such applications. The inventions were made by the company's own engineers or designers, who are under contract to assign their inventions. Accordingly, no payment was made for any individual patent in the above lists and no estimate can be placed on its value.

7. The answer to this inquiry is "No."

8. In every instance the inventor on the patents above listed was an employee of this company at the time of the assignment of his invention and, with one exception, is still an employee at this time. Employees such as these, who are employed as inventors or designers, are under contract to assign their inventions relating to the company's product without other compensation than is provided for in their employment agreements.

9. The patents used by this company as licensee under the power lift plow trust agreement above referred to are as follows:

Inventor	Patent no.	Date of issue	Inventor	Patent no.	Date of issue
Davis & Bebinger	1338550	Apr. 27, 1920	J. F. Steward	1388978	Aug. 30, 1921
C. G. Strandlund	1376787	May 3, 1921	A. C. Lindgren	1440924	Jan. 1, 1923
W. W. Cameron	1377057	Do.	Do	1561611	Nov. 17, 1925

Digitized by Google

We know of no patent in the Automobile Manufacturers' Association cross-license agreement which is in use by us. Any valuation to be placed on the six patents above listed as used by us would be purely a matter of conjecture, as no direct revenue is derived from them. Title to the six patents above listed is in Fred Gerlach and Arnold B. Kller, trustees.

10. Nonmembers of the Automobile Manufacturers' Association cross-license agreement are not entitled to a license thereunder. Under the power lift plow trust agreement any manufacturer may have a license at the terms stated therein; namely, 50 cents per plow bottom.

11. This inquiry is answered in the preceding paragraph (10).

12. We have no amendments to suggest to existing patent laws. Generally speaking, we are disposed to indorse the recommendations of the American Bar Association as to needed patent legislation.

Yours very truly,

INTERNATIONAL HARVESTER CO.,
By V. F. LASSAGNE, *Patent Attorney.*

THIRD EXTENSION CROSS-LICENSING AGREEMENT BETWEEN _____ AND AUTOMOBILE MANUFACTURERS ASSOCIATION, INC., DATED _____

Whereas it is for the individual interests of the manufacturing members of the Automobile Manufacturers Association, Inc., a Corporation duly organized under the laws of the State of New York (hereinafter called the "Association"), that the possibility of patent litigation between manufacturing members of the Association over patents on or relating to motor vehicles or the manufacture thereof should be reduced, and to that end that there should be an exchange of licenses between them under Letters Patent for inventions relating to motor vehicles, or to parts or accessories therefor, or to the manufacture thereof, to the extent hereinafter set forth, such licenses to be of the character and subject to the conditions and limitations hereinafter provided:—

Now, therefore, these presents witness:

(1) That _____, a corporation duly established under the laws of _____ (hereinafter called the "Grantor"), being a manufacturing member of said Association, in consideration of the covenants of the Association herein contained and of other good and valuable considerations, hereby grants unto the Association the right and license and full power and authority, for the term and subject to the exceptions, conditions, and limitations hereinafter set forth, to grant in writing personal licenses and shop rights under any and all Letters Patent of the United States, not hereinafter expressly excepted, now owned or controlled by the Grantor or under which it has the right to grant licenses, covering inventions capable of use in or in connection with motor vehicles, or parts or accessories therefor, or in, or in connection with the manufacture thereof (all of which are hereinafter referred to as "motor vehicle patents"), insofar as such Letters Patent were on January 1, 1930, owned or controlled by the Grantor or its predecessor or predecessors in the business of manufacturing motor vehicles or under which on January 1, 1930, the Grantor or its predecessor or predecessors in the business of manufacturing motor vehicles had the right to grant such licenses or shop rights; and the Grantor does hereby irrevocably authorize said Association to execute such licenses and shop rights in the name of the Grantor with the same force and effect as if executed directly by the Grantor.

(2) This instrument, and the right, power, and authority hereby granted and conferred shall not apply to or include: (*a*) design patents, which are hereby expressly excepted from the operation hereof, nor (*b*) any patents so far as the claims thereof cover inventions not applicable to or relating to motor vehicles as such, but relating to mechanism, devices, contrivances, or the manufacture thereof, specially employed to adapt motor vehicles to the carrying, handling, or storing of goods, wares, merchandise, materials, or freight of any kind, to use as fire apparatus, to use as tractors, to ambulance use, or to use as motor busses or for other public passenger service; and not applicable to or useful in any type of motor vehicle primarily intended or commonly used for private passenger use, or the manufacture thereof. Patents or claims for inventions relating or applicable both to one or more of the special adaptations of motor vehicles above enumerated, and also to any type or types of motor vehicles primarily intended or commonly used for private passenger use, or the manufacture thereof, are included within the operation of this instrument and not excepted.

It is understood and agreed, however, that there are excluded from the patents of the grantor licenses under which are granted or to be granted under this agreement (a) any and all patents owned or controlled by and (b) any and all patents whose inventions were developed in whole or in part by any existing corporation controlled by or related to the Grantor which corporation is not itself engaged in the business of manufacturing complete motor vehicles, as well as (c) any patent or patents whose inventions are utilized by and (d) any and all patents whose inventions were developed in whole or in part by the Grantor in a distinct Division engaged solely in continuing the business of a prior corporation which was itself not engaged in the business of manufacturing complete motor vehicles.

It is understood and agreed, however, that there are excluded from the patents of the Grantor, upon or under which licenses are granted or to be granted under this agreement, all patents except those patents owned or controlled or under which a right to grant licenses was had by the Grantor on the 1st day of January 1930, and which the Grantor under the terms of the Second Extension Cross-Licensing Agreement agreed should be licensed thereunder, if any such Agreement had ever been executed by the Grantor, and no patent whatsoever owned or controlled or under which a right to grant licenses was had by the Grantor and which it acquired or which was issued to it after January 1, 1930, shall be considered under any circumstances as coming within the terms of this agreement, nor shall any person whosoever have any right to a license thereunder or any other interest therein without the express consent in writing of the Grantor, notwithstanding anything to the contrary which may be contained in this agreement.

(3) The right, power, and authority hereby granted and conferred and the licenses granted hereunder shall apply to any patent only so far as the Grantor now has, or shall have at any time hereafter, the right to grant licenses or shop rights thereunder without violating the legal or equitable rights of any other person, whether secured to him by contract, license agreement, or otherwise, having priority over the rights granted to the Association by this instrument; and all licenses or shop rights granted hereunder shall be with such exceptions or such special restrictions, in the case of particular patents, as may be necessary to avoid the violation of such rights of third persons.

(4) If the Grantor does now or shall hereafter enjoy the use, in the conduct of its business, of any motor vehicle patent controlled by the Grantor either by contract, equitable ownership, exclusive license, or otherwise, so that the Grantor has the legal right and power to procure the grant of licenses or shop rights thereunder to others but is not empowered to grant such licenses or shop rights directly, the Grantor hereby covenants to procure the execution of such further instruments as may be necessary to empower the Association to grant licenses and shop rights under such patent as provided in this instrument and to make the licenses and shop rights granted hereunder effective.

(5) The Grantor hereby agrees to mail to the office of the Association in New York City, within thirty days from the date hereof, a list of all patents within the general description contained in paragraph (1) hereof and under which by the terms hereof licenses are to be granted (not including design patents) now owned or controlled by it or under which it now has the right to grant licenses or shop rights (including patents in which the Grantor has such an interest as is defined in paragraph (4) hereof). But the failure or neglect of the Grantor to list or report any patent as herein agreed, shall in no way affect the operation of this instrument upon such patent.

(6) The licenses and shop rights granted hereunder and the right, power, and authority of the Association hereunder to grant such licenses and shop rights shall exist and be exercised only in the case and for the benefit of such manufacturing members of the Association in good standing as shall execute with the Association this Agreement.

(7) The licenses and shop rights existing and granted by the Association hereunder shall in each case authorize the licensee therein named to manufacture in its regular manufacturing establishment within the United States, or to have manufactured for it within the United States, and to use and sell for others to use, motor vehicles and accessories and repair and replacement and other parts therefor, including the shipment thereof to foreign countries and the use and sale thereof in such foreign countries, free from any liability for infringement of the Letters Patent of the United States under which such licenses and shop rights are granted, so far as the Grantor has power to grant such authority. But it is expressly stipulated and agreed that neither this instrument nor any license or shop right granted hereunder shall be

Digitized by Google

construed to give any manufacturing rights whatever under foreign patents, whether or not owned by the Grantor, and all grants of licenses or shop rights hereunder shall expressly so state.

All licenses and shop rights granted by the Association hereunder shall be substantially uniform in tenor (except as provided in paragraph (8) hereof) and shall be in strict accordance with all the conditions and limitations specified in this instrument, and the covenants of the Association hereinafter set forth, all of which, so far as they relate to the grant of licenses or shop rights hereunder, shall be construed not merely as covenants by the Association, but also as defining and limiting the right, power and authority hereby granted and conferred.

(8) All the grants of licenses or shop rights issued by the Association hereunder must be executed in behalf of the Association by one of its officers thereunto duly authorized; must be indivisible, non-assignable, and personal to the licensee; and must contain a statement that such grant is executed in pursuance of the right, power, and authority given by this instrument. Such licenses and shop rights shall extend, and must be stated in the grant thereof to extend, only for so long as the licensee named therein shall remain a manufacturing member of the Association in good standing, and for six months thereafter, but in no event beyond the first day of January 1940. All such grants shall contain a provision reserving against the licensee the same rights with respect to a material breach of the terms of the instrument similar to this executed by the licensee, which are reserved against the Grantor in paragraph (15) hereof, in respect to a material breach of the terms of this instrument.

(9) If the control or interest or right of the Grantor in any patent coming within the operation of this instrument is subject to such conditions that the use of such patent by other members of the Association licensed hereunder would involve the payment to any person or persons other than the Grantor of additional royalties or additional consideration for the use thereof, the licenses and shop rights thereunder granted by the Association pursuant to the terms of this instrument shall stipulate for the payment by each licensee of the additional royalties or additional consideration payable by reason of the use of such patent by such licensee; but the Grantor shall not be entitled to receive to its own use and profit any royalty or other consideration from the grantee of any license or shop right granted by the Association under the terms of this instrument, except the reciprocal rights expressly provided for in this instrument. It is understood, however, that any member of the Association entitled to receive grants of licenses or shop rights hereunder may refuse to accept a license or shop right under any one or more patents, for the use of which any royalty or other special consideration must be paid under the terms of this paragraph, or, having accepted such license, or shop right, may at any time thereafter surrender the same, and upon such surrender and to the extent thereof shall be freed from the special obligations so imposed.

(10) In consideration of the foregoing, and of the further covenants on the part of the Grantor hereinafter contained, the Association hereby covenants and agrees as follows:

(*10–a*) That in exercising or attempting to exercise the right, power, and authority hereby granted and conferred it will conform strictly in all respects to the terms and provisions of this instrument and the limitations herein contained.

(*10–b*) That the Association will forthwith grant to the Grantor all licenses and shop rights which it is authorized to grant under the instruments substantially equivalent to this executed by other members of the Association, except so far as the Grantor may refuse to accept a license or shop right under a particular patent or patents, as provided in the pragraphs of said instruments executed by other members of the Association as aforesaid, corresponding to paragraph (9)hereof; it being understood that, subject to the same exception, the Association will at the same time grant to all other members thereto entitled, the licenses and shop rights which it is authorized to grant hereunder.

(*10–c*) That no manufacturing member who has not executed and delivered an agreement substantially equivalent to this on or before May 1, 1935, will be allowed to execute and deliver such an agreement, and thereby qualify to receive licenses or shop rights hereunder, except by special permission of the Association, granted in the following manner: Notice of the application of any

Digitized by Google

such member for such permission shall be mailed to all the Directors of the Association at least ten days before a regular meeting of said Directors, stating that such application will be presented for action at said regular meeting; and a quorum being present at said meeting, said application may be granted by a four-fifths vote of all the Directors present.

(*10–d*) Every applicant for admission to the Association, subsequent to January 1, 1935, and prior to January 2, 1940, as a manufacturing member thereof, will be required as a pre-requisite of such admission to execute and deliver to the Association an instrument substantially equivalent to this, except by special permission of the Association, granted in the manner provided in the preceding Clause 10–c.

(11) The right, license, power, and authority herein granted and conveyed to the Association are not transferable by it to any other body or successor, but shall be exercised by the Association alone, acting through its Board of Directors and its duly authorized officers.

(12) In case the Grantor ceases to be a manufacturing member of the Association in good standing, the right, power, and authority of the Association to grant licenses and shop rights hereunder shall not cease and determine, but shall thereafter remain in full force until January 1, 1940, and all licenses and shop rights granted by the Association in accordance with this instrument, whether before or after such termination of membership, shall be and remain in full effect and validity.

(13) On the termination of any license or shop right granted by the Association hereunder, the licensee shall be free to contest the validity of any patent included in such license exactly as if such license had not been granted.

(14) The Grantor covenants and agrees to waive and release, and does hereby waive and release, any claim it may now or hereafter have for damages or profits on account of the infringement of any patent covered by this instrument, by reason of the manufacture of any motor vehicles, parts, or accessories by or for any grantee of licenses or shop rights hereunder, before the granting thereof, or by reason of the use or sale by such licensee or by any other person of motor vehicles, parts, or accessories so manufactured; and the Grantor hereby authorizes the Association to incorporate in all grants of licenses or shop rights hereunder a statement confirming such waiver and release to the licensee, and to all persons who may have sold or used motor vehicles, parts, or accessories previously manufactured by or for such licensee.

(15) Any material breach by the Grantor of its agreements herein contained or its obligations hereby imposed shall be sufficient ground for the cancellation of any or all grants of licenses or shop rights to the Grantor, which may have been made under or pursuant to like Agreements executed by other Manufacturing Members of the Association under which the Grantor has enjoyed rights or licenses.

In witness whereof the Grantor and the Association have duly executed this instrument by their officers thereunto duly authorized and attached their corporate seals hereto on the dates appearing below.

MEMORANDUM OF AGREEMENT

This agreement made and entered into as of the Twenty-seventh day of April, A. D., 1920, by and between La Crosse Plow Company (a Wisconsin corporation), of La Crosse, Wisconsin, party of the first part, and International Harvester Company, a corporation of New Jersey, having its principal office and place of business at Chicago, Illinois, party of the second part, witnesseth:

That whereas said parties have been engaged in the development and manufacture of certain inventions relating to power lift plows set forth in the letters patent and applications for letters patent hereinafter set forth; and whereas each of said parties has found it necessary to use some of the inventions of the other party in the manufacture and sale of power lift plows; desires to avoid litigation between the parties respecting the patent rights of either of the parties; desires to dispense with infringement suits against one another under their respective patents; and desires to encourage the use of said inventions by making it possible for other manufacturers to acquire licenses to use the aforesaid inventions without the necessity of negotiating separate licenses from each of the parties hereto;

Now, therefore, in consideration of the premises, the sum of One Dollar ($1.00) by each party to the other in hand paid, and the mutual promises and considerations hereinafter set forth the parties hereto have agreed and do hereby agree as follows:

I. Party of the first part agrees to convey or cause to be conveyed to the trustees hereinafter named, the following:

UNITED STATES PATENTS

Patent no.	Title	Date of issue	Inventor
1227745	Plow	May 29, 1917	Cameron.
1239559	Tractor Plows	Sept. 11, 1917	Biebinger.

233149	Power Lift Disk Plow	Feb. 23, 1920	Lindgren.

It is also understood that this agreement and license (Exhibit A) attached includes any applications or patents for any of the inventions covered by the foregoing which have been, or may be, applied for or procured in the Dominion of Canada by party of the second part.

III. The parties hereto also agree to assign to said trustees all rights of recovery of damages or profits arising from past infringement of the patents herein enumerated.

IV. Said trustees jointly shall hold said patents and rights in trust for the benefit of the parties hereto and subject at all times to all the terms and conditions of, and for the purpose of executing, this agreement. No license respecting any of the aforesaid inventions shall be valid or binding unless and until reduced to writing and executed by both of the trustees.

V. Said trustees shall grant to the parties hereto a license in accordance with and upon the terms, conditions, and restrictions contained and set forth in Exhibit A, which is hereto attached and made a part hereof.

VI. Said trustees shall grant to any and all other party or parties desiring to acquire such rights, a license to manufacture and sell plows embodying one or more of the aforesaid inventions upon the terms and conditions which are set forth in Exhibit B, which is hereto attached and made a part hereof. The terms, considerations, and conditions set forth in said Exhibit B shall govern the grant of all licenses until altered or amended by agreement of the trustees.

It is the intention, and within the contemplation of the parties hereto, that licenses to make and sell plows embodying said inventions shall be granted and that the trustees shall be obligated to grant such licenses to any and all responsible concerns or manufacturers upon substantially equal terms and without restriction, other than that the licensees shall refrain from any unfair

Digitized by Google

competition or unlawful simulation in appearance or marking of the plows of any other licensee, and that the trustees shall do all things reasonably necessary to encourage the sale of such licenses.

VII. Each of the parties hereto shall designate one trustee and the two trustees so designated jointly shall have full power, right, and authority to grant licenses, institute and maintain suits for infringement and to exercise ownership over all of the aforesaid inventions and patents for the benefit of the parties, subject to the terms of this agreement.

VIII. All proceeds and moneys received by the trustees from licenses or in payment of royalties accruing after the date hereof shall be immediately, upon the receipt thereof, divided and distributed as follows:

Sixty per cent (60%) to party of the first part; and

Forty per cent (40%) to party of the second part.

IX. In event of any suit or litigation for infringement of any of the patents held by the trustees under this agreement, the cost of such suit or litigation shall be deducted from the recovery and the excess of the recovery over said cost shall be divided in the same ratio as royalties received and accruing subsequent to the date hereof. If the recovery shall be less than the cost of any such suit or litigation, the deficit shall be borne equally by the parties. During the pendency of any suit or suits, each of the parties shall advance one-half of the cost and expense of such suit or suits.

The cost of conducting any interference proceeding involving any patent or application, which by the terms of this agreement shall be or is to become vested in the trustees, shall be borne equally by the parties.

Each party shall pay its own trustee for such services as he may render in administration of this trust.

X. Party of the first part hereby designates and appoints Fred Gerlach, of Chicago, Illinois, to act as its trustee, and Harry J. Hirshheimer, of La Crosse, Wisconsin, as his successor-in-trust. Party of the second part hereby designates and appoints Arnold B. Keller, of Chicago, Illinois, to act as its trustee, and H. B. Utley, of Chicago, Illinois, as his successor-in-trust. Each of the parties hereto reserves solely unto itself, its successors, assigns, and legal representatives, the right to designate and appoint, at any time, a substitute for the trustee or successor-in-trust herein designated by it. Any substitute so designated and appointed shall have full power to act in lieu of the replaced trustee or successor-in-trust, and any substitution shall become effective upon written notice to the other party or the remaining trustee.

XI. Should either party hereto now own or before the twenty-first day of August 1934, develop or acquire from its employees who are, or may be, under contract with said party to assign their inventions, any improvement or invention in power lift mechanism for plows, said inventions and improvements, together with any patent or patents which may be procured thereon shall be conveyed by the party acquiring the same to the trustees to have and to hold the same subject to the terms and conditions of this agreement with the same force and effect as if such inventions and improvements had been included in Paragraphs I and II of this agreement.

XII. If either party hereto should, in the future, desire to purchase any improvement or invention in, or patent for, power-lift mechanism for plows, other than those specified in paragraph XI, it shall submit the same, with the proposed terms of purchase, to the other party, and such purchase shall then be made for the benefit of both parties, provided each party shall agree to pay one-half of the consideration for said purchase. The title to any improvement or invention or patent therefor, so purchased, shall be conveyed to the trustees, and be held subject to the terms of this agreement. If either party shall be unwilling to contribute one-half of the consideration for such purchase, the other party shall be at liberty to purchase said improvement or invention or patent solely for its own use and benefit, and without subjecting the same to the terms of this agreement.

If either party hereto should in the future desire to purchase or acquire a license to manufacture and sell any invention or improvements relating to power-lifts for plows, it shall submit the same, with the proposed terms of purchase, to the other party and shall require, as a condition to said purchase or acquisiton, that the licensor shall grant to the other party to this agreement like rights upon like terms and conditions, if the other party shall desire to acquire such license.

Digitized by Google

XIIA. It is further agreed and understood that if either party now owns any patent, application or invention relating to power lifts for plows, in addition to those specified in paragraphs I and II hereof, and any patent, application, or invention which is necessary, in the manufacture and sale, to the other party or any licensee, of plows embodying the power-lift mechanism set forth in patents and applications specified in paragraphs I and II, said additional applications, patents, or inventions shall be regarded as included in this agreement to the extent necessary to empower the parties hereto and all licensees to use the same in the licensed plows.

Neither party hereto shall be under any obligation to convey to the trustees any interest in, or right to make or sell, any invention or improvement that relates solely to, or is usable solely in, any implement other than a power lift plow. It is understood and agreed that if either party should acquire or become vested with any improvements or invention in any power-lift mechanism which is susceptible of use in plows and other agricultural implements, the party acquiring or becoming vested therewith shall convey to the trustees the exclusive right to make and sell said invention or improvements in power-lift plows, reserving unto itself all rights to make use and sell the same for all other implements, purposes, and uses.

XIII. All moneys which may be received by the trustees in payment of royalties for, or in settlement of, plows sold by the Janesville Machine Company or its successor, the Samson Tractor Company, prior to April 27, 1920, shall belong and be paid by the trustees to the La Crosse Plow Company. In making such settlement, the trustees shall act solely as the agents of, and under the direction of, the La Crosse Plow Company upon terms acceptable to said company.

XIV. All moneys which may be received by the trustees in payment for, or in settlement of, plows sold prior to April 27, 1920, by the Vulcan Plow Company, of Evansville, Indiana; Bucher and Gibbs Company, of Canton, Ohio; and Collins Plow Company, of Quincy, Illinois, shall belong and be paid by the trustees to the International Harvester Company. In making such settlement, the trustees shall act solely as the agents of, and under the direction of, the International Harvester Company upon terms acceptable to said company.

XV. All other royalties or moneys received by the trustees in payment for, or in settlement of, plows sold prior to the 27th day of April 1920, shall be divided between the parties in accordance with Paragraph VII of the agreement of April 27, 1920, it being understood by and between the parties hereto that the right of International Harvester Company to recover past damages and profits for infringement of those patents recited in the agreement of April 27, 1920, which were acquired by said Company from Parlin and Orendorff Company does not include the right to collect any damages or profits accruing for infringement of said patents prior to July 1, 1919.

XVI. All settlements for royalties due or infringements occurring prior to April 27, 1920, and referred to in Paragraph XV, shall be made upon terms that are acceptable to both of the trustees.

If, at any time, the trustees shall be unable to agree upon the terms of settlement for royalties due or infringements occurring prior to April 27, 1920, from any infringer, and said infringer shall agree to take a license and pay all royalties accruing since said date, upon the terms herein established, the trustee shall grant such license, if either of them shall request that such license be granted. In such license, the trustees shall specifically reserve unto themselves and exempt all rights of action accruing for infringement prior to said date.

Any offer in settlement for royalties due or infringements occurring prior to April 27, 1920, at the rate of Three Dollars ($3.00) per plow implement up to and including three thousand (3,000) implements, and One Dollar ($1.00) per plow bottom upon all implements in excess of the number of three thousand (3,000), but not to exceed Two and One-Half Dollars ($2.50) per implement shall be accepted by the trustees.

XVII. This agreement shall remain in force until the expiration of the patents which have been, or may be, conveyed or granted to the trustees under this agreemnt, and this agreement shall be binding upon and inure to the beenfit of the sucessors, assigns, and legal representatives of the parties of the first and second parts hereto.

in accordance with the terms of, and under an agreement made and entered into as of the 27th day of April, A. D. 1920, by and between La Crosse Plow Company (a Wisconsin corporation), of La Crosse, Wisconsin, party of the first part, and International Harvester Company (a New Jersey corporation), of Chicago, Illinois, party of the second part; and

Whereas said agreement provides that a license to manufacture and sell plows, embodying the improvements and inventions set forth in the aforesaid applications and letters patent, shall be granted to said companies;

Now, therefore, pursuant to, and under the terms of said agreement, and particularly Paragraph V thereof, and in consideration of the sum of One Dollar ($1.00) from each of the licensee parties, the receipt of which is hereby acknowledged:

I. The aforesaid (signed) Fred Gerlach and (signed) Arnold B. Keller, as trustees, do hereby license and empower:

(A) Said La Crosse Plow Company to make, use, and sell in the United States and Canada plows embodying all singular the improvements and inventions set forth in all and singular the aforesaid letters patent and applications for letters patent to the full end of the terms for which said letters patent have been, or for which letters patent may be granted therefor, or any reissues or extensions thereof, without the payment of royalty, except as hereinafter provided;

(B) Said International Harvester Company to make, use, and sell in the United States and Canada plows embodying all and singular the improvements and inventions set forth in all and singular the aforesaid letters patent and applications for letters patent, to the full end of the terms for which said letters patent have been, or for which letters patent may be granted therefor, or any reissues or extensions thereof, without the payment of royalty, except as hereinafter provided.

II. The foregoing license to the International Harvester Company shall be construed and understood to include the following subsidiary companies, to-wit:

(1) Chattanooga Plow Company, a corporation organized under the laws of the State of Tennessee, located at Chattanooga, Tennessee;

(2) International Harvester Company of Canada, Limited, a corporation organized under the laws of the Dominion of Canada, having its principal place of business at Chicago, Illinois; and

(3) International Plow Works of Canada, Limited, a corporation organized under the laws of the Dominion of Canada, having its general office located at Chicago, Illinois.

Digitized by Google

III. The exemption from the payment of royalties by the International Harvester Company for the right to use the licensed improvements and inventions shall extend to plows manufactured in the plants now owned by it and the aforesaid subsidiaries. If said International Harvester Company (a New Jersey corporation) shall hereafter acquire any other plant for the manufacture of plows or any other subsidiary than those aforesaid, it shall pay to the undersigned the established royalties upon all plows embodying the aforesaid inventions or any of them made in or by said hereafter-acquired plants or subsidiaries.

IV. The exemption from payment of royalties by the aforesaid La Crosse Plow Company for the right to use the licensed improvements and inventions shall extend to all plows manufactured in the plants now owned or controlled by it and any which it may hereafter acquire or by any subsidiaries it may hereafter acquire, provided that the aggregate number of plows made and sold during any calendar year by said company and its subsidiaries shall not exceed two-thirds (⅔rds) of the aggregate number of plows made and sold by the International Harvester Company and its subsidiaries during the same year. Said La Crosse Plow Company shall pay to the undersigned the established royalty upon all plows which may be made by it or its subsidiaries in excess of said two-thirds (⅔rds) of the aggregate number made by the International Harvester Company and its subsidiaries during the corresponding calendar year.

V. It is understood and agreed that the rights to make and sell plows embodying any and all improvements which the undersigned may acquire under and in accordance with paragraphs XI and XII of the aforesaid agreement of the 27th day of April, A. D. 1920, are included in the foregoing licenses to the said International Harvester Company and the La Crosse Plow Company.

V. The rights and license privileges aforesaid are not divisible and shall not be assignable by either party, except only in connection with its plow business in entirety, including all of its subsidiaries. If either party should separately dispose of any of its subsidiaries the transferee shall be obligated to pay royalties upon all plows embodying the aforesaid inventions and improvements aforesaid made and sold by it subsequent to the date of the transfer.

Done at Chicago, Illinois, this 28th day of July 1920.

And whereas the licensee is desirous of acquiring the right to manufacture, use, and sell plows embodying the inventions and improvements aforesaid under and by virtue of the aforesaid letters patent and those which may be granted upon the aforesaid applications or any reissues or extensions thereof, throughout the United States and the Dominion of Canada;

Now, therefore, in consideration of the premises, and the mutual considerations hereinafter set forth, it is hereby agreed as follows:

I. The licensors hereby license and empower the licensee to manufacture and sell plows embodying the inventions and improvements embodied in the aforesaid letters patent and applications throughout the United States and the Dominion of Canada, subject to the following terms and conditions and subject to the performance, well and truly to be made, by the licensee of all and singular the promises and obligations hereinafter made.

II. The licensee agrees—

(a) to pay the licensors a royalty on each and every plow manufactured and sold by said licensee and embodying any of the inventions or improvements at the rate of fifty cents (50¢) for each plow bottom on or adapted to be carried by the plow;

(b) to account on the 20th day of January and July of each year for the semi-annual periods ending on the first days of said months and to pay on said accounting days the royalties accruing during the immediately preceding semi-annual period;

(c) to keep full and true records of all business done in the manufacture and sale of the licensed plows, which shall be open to the inspection at all reasonable times of the licensors or an accountant duly authorized by them;

(d) to mark all licensed plows "patented", together with the dates of any and all patents which cover said plows.

III. It is understood and agreed that the licensee, in exercise of the license hereby acquired, shall no copy or simulate in appearance, dress, or design, licensed plows manufactured and sold by any other licensee, in order to avoid any confusion or unfair competition in trade between the goods of the various licensees.

IV. Upon failure to perform any of the obligations herein assumed, or in case of a breach by the licensee, the licensors shall have the right to terminate

Digitized by Google

this license, provided that the licensee shall not make good any default or remedy the breach within ten (10) days from a written notice thereof by the licensors. Such termination shall not release the licensee from payment of any royalties accruing prior to such termination.

V. Unless terminated as aforesaid, this agreement shall remain in force until the expiration of the patents under which license is hereby given.

VI. This license shall be transferable with the entire business and good will of the licensee, but not otherwise assignable, and is not divisible.

Done at Chicago, Illinois, the day and year first above written.

Trustees.

Licensee.

INTERNATIONAL BUSINESS MACHINES CORPORATION,
New York, December 31, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
Fifth Avenue Hotel, 24 Fifth Avenue, New York, N. Y.

SIR: In accordance with letter written in my absence under date of November 19, 1935, I submit the following data on patents as requested in your letter of November 6, 1935. The information given applies not only to International Business Machines Corporation and its divisions but to subsidiary predecessors and affiliated companies of such corporation and to a wholly owned existing subsidiary, Electromatic Typewriters, Inc.

The information is grouped under numbered headings corresponding to those of the questionnaire.

1. The attached list of patents marked (1) comprises (1*a*) a list of all patents directly owned by International Business Machines Corporation as of December 3, 1935; (1*b*) a list of all patents directly owned as of December 3, 1935, by Electromatic Typewriters, Inc., a wholly owned subsidiary; (1*c*) a list of all patents (as complete as now ascertained) under which International Business Machines Corporation or its predecessor subsidiaries (now merged in it) or its existing subsidiary, Electromatic Typewriters, Inc., have rights in patents acquired from others under simple license (not cross-licenses or under patent-pooling agreements). There are still other patents owned by others as to which this company may have license rights.

NOTE.—On the lists the symbols U, X, Y, and Z after the respective patents refer to question 8 of the questionnaire.

NOTE.—As to patents under cross-license or patent-pooling agreements see following answer to question no. 4.

2. We are making use of or have made use of all of our patents commercially or upon past, present, and impending development of our products. All of our inventors have access in making new improvements to all of our existing or previously made improvements.

3. Copy of articles of incorporation are herewith attached and marked "3."

4. The company is not a party to any existing cross-license or patent-pooling agreement.

5. See paragraph no. 4 supra.

6. See paragraph no. 4 supra.

7. No; see paragraph no. 4 supra.

8. See attached lists of patents. The symbols on the margin indicate the following:

U. Inventor was employed by assignee corporation or associated and/or subsidiary corporation at time of making invention and is still so employed.

X. Inventor was employed by assignee corporation or associated and/or subsidiary corporation at time of making invention, but is not now so employed.

Y. Inventor was not employed by assignee corporation or associated and/or subsidiary corporation at time of making invention, but is now so employed.

Z. Inventor was not employed by assignee corporation or associated and/or subsidiary corporation at time of making invention and is not now so employed.

As to the query, in paragraph 8, "If so, does assignee retain contract providing such invention shall belong to employer without additional cost?" the

Digitized by Google

following explanation is submitted as to inventions made by employee inventors: Such inventions are usually assigned to the corporation without special extra compensation, but in especially meritorious cases, special extra compensation has been paid to employee inventors.

9. See paragraph no. 4 supra.

10. See paragraph no. 4 supra.

11. See paragraph no. 4 supra.

12. We believe that the present patent laws are adequate and that the improvements to be made should be in the existing system and procedure in the Patent Office rather than by amendments or changes in the basic law. If procedure, which is already under control of the Commissioner of Patents, with respect to pending applications, were simplified and clarified; if more extensive and comprehensive searches be made in the Patent Office before allowance of patents, and if interference procedure in the Patent Office were expedited and simplified, better patents and (probably) a greater percentage of valid patents would be issued more expeditiously and with less technical complication. Better patents more quickly obtained would be of advantage to the general public and would afford adequate protection to meritorious inventions. Ultimately such changes, which might require enlargement of Patent Office personnel and direction and guidance of such personnel to the outlined ends, would effect greater justice to inventors and to the public and would diminish litigation and controversies as to patented inventions.

Your respectfully,

THOS. J. WATSON, *President.*

CERTIFICATE OF INCORPORATION OF COMPUTING-TABULATING-RECORDING-CO.

The undersigned, all of whom are natural persons of full age and citizens of the United States, and at least one a resident of the State of New York, being desirous of becoming a corporation, other than a monied corporation or a corporation provided for by the banking, the insurance, the railroad, and the transportation corporation laws, or an educational institution or corporation which may be incorporated as provided in the Education Law, pursuant to the provisions of the Business Corporations Law of the State of New York, do hereby make, sign, and acknowledge this certificate stating as follows:

First. The name of the proposed corporation is "Computing-Tabulating-Recording-Co."

Second. The purposes for which it is formed are:

To manufacture, use, buy, sell, lease, deal in, or in any way turn to account patented and unpatented machines, apparatus, appliances, products, and property.

To manufacture, use, buy, sell, lease, and deal in all materials and articles required in the manufacture and use of the aforesaid machines, apparatus, appliances, products, and property.

To manufacture, buy, sell, and deal in cards and stationery and other articles required in the use of or used in connection with the machines manufactured, sold, or leased by the Company or otherwise utilized.

To apply for, purchase, acquire, register, hold, own, use, sell, assign, lease, mortgage, or otherwise dispose of, as well as to grant licenses in respect of, or otherwise turn to account letters patent of the United States and of any foreign country, patents, patent rights, licenses, privileges, inventions, improvements, formulæ, and processes, trade marks and trade names, and pending applications for patents and trade marks, to use, work, and develop the same in the conduct of any business, manufacturing or otherwise, in any part of the United States or abroad.

In general to carry on any other manufacturing or distributing business in connection with the foregoing and to have and to exercise all the powers conferred by the laws of the State of New York upon corporations formed under the Business Corporations Law.

Third. The amount of the capital stock is Ten thousand Dollars ($10,000) all of which shall be of one class.

Fourth. The number of shares of which the capital stock shall consist is one hundred (100) of the par value of One hundred Dollars ($100) each.

The amount of capital with which said corporation will begin business is Five hundred Dollars ($500).

Fifth. The location of the principal business office is to be in the Town of Endicott, County of Broome, and State of New York.

Sixth. The duration of the corporation is to be perpetual.

Seventh. The number of the Directors of the corporation shall be five.

Digitized by Google

Eighth. The names and post office addresses of the Directors for the first year are as follows: Percy H. Brundage, 135 Broadway, Borough of Manhattan, New York City; Frederick H. Allen, 63 Wall Street, Borough of Manhattan, New York City; Walter Havlland, 60 Ann Street, Borough of Manhattan, New York City; William H. Wingate, 306 West Ninety-third Street, Borough of Manhattan, New York City; Reginald P. Walden, 26 Broadway, Borough of Manhattan, New York City.

Ninth. The names and post office addresses of the subscribers to the certificate and a statement of the number of shares of stock which each agrees to take in the corporation are as follows: Percy H. Brundage, 135 Broadway, Borough of Manhattan, New York City, 1; Frederick H. Allen, 63 Wall Street, Borough of Manhattan, New York City, 1; Walter Haviland, 60 Ann Street, Borough of Manhattan, New York City, 1; William H. Wingate, 306 West Ninety-third Street, Borough of Manhattan, New York City, 1; Reginald P. Walden, 26 Broadway, Borough of Manhattan, New York City, 1.

Tenth. Said corporation may purchase, acquire, hold and dispose of the stock, bonds and other evidences of indebtedness of any corporation, domestic or foreign, and issue in exchange therefor its stock, bonds or other obligations.

Eleventh. The Directors may designate from their number an Executive Committee which shall for the time being in the intervals between its meetings and to the extent provided by the By-Laws exercise the power of the Board of Directors so far as it may lawfully do so in the management of the affairs and business of the Company.

The Board of Directors shall from time to time decide whether and to what extent and at what times and under what conditions and requirements the accounts and books of the corporation, or any of them, except the stock book, shall be open to the inspection of the Stockholders, and no Stockholder shall have any right to inspect any books or documents of the corporation except as conferred by statute in New York or authorized by the Board of Directors.

The Directors of the corporation need not be Stockholders therein.

Twelfth. The Company may use and apply the surplus, property, earnings or accumulated profits in the absolute discretion of the Directors to the creation and maintenance of a surplus fund and to the purchase and acquisition of its own capital stock and it may take said capital stock in payment or satisfaction of any debt due to the Company from time to time and to such extent and manner and upon such terms as the Directors shall determine and may re-issue any stock so acquired.

Thirteenth. A director of this Company shall not be disqualified by his office from contracting with the Company, either as vendor, purchaser or otherwise, nor shall any such contract, or any contract or arrangement entered into by or on behalf of the Company, in which any Director shall be in any way interested, be avoided on that account, or by reason of the fact that any firm of which such Director is a member or any corporation in which such Director is a Shareholder or a Director shall be interested therein; Provided such contract shall have been adopted or authorized by a vote of at least a majority of the whole Board of Directors not interested in any way therein or shall have been ratified and approved by the affirmative vote of holders of a majority in amount of the capital stock of the Company; nor shall any Director so contracting or so interested be liable to account to the Company for any profit realized by him from or through any such contract or arrangement so adopted by the Board of Directors, or ratified and approved by the Stockholders in the manner aforesaid, by reason of such Director holding such office or the fiduciary relation thereby established, provided such Director shall have disclosed the fact of his interest in such contract or arrangement at the meeting of the Directors or Stockholders at which the contract or arrangement is so adopted and determined upon, or so ratified and approved by the Stockholders.

In witness whereof, we have made, signed and acknowledged this certificate this 14th day of June 1911.

In the presence of:

REGINALD P. WALDEN.

CERTIFICATE OF REORGANIZATION OF COMPUTING-TABULATING-RECORDING CO., PURSUANT TO SECTION 24 OF THE STOCK CORPORATION LAW

1. The name under which the Corporation was originally organized is Computing-Tabulating-Recording Co.

2. The law under which the Corporation was organized is Laws of 1909, Chapter 12, Article 2, as amended by Laws of 1909, Chapter 484.

3. The dates on which, and the public offices in which the Certificate of Incorporation of the Corporation was filed, are: June 16, 1911, in the office of the Secretary of State of New York; June 19, 1911, in the office of the County Clerk of Broome County, New York.

4. The amount of capital stock authorized by the Certificate of Incorporation was $10,000, which amount has been changed by consent authorizing such change, filed in the office of the Secretary of State of New York, on July 10, 1911, and in the office of the County Clerk of Broome County, New York, on July 10, 1911. The amount to which the capital stock was increased by such consent is $12,000,000.

5. The amount of each payment of taxes for the privilege of organizing or of increasing the capital stock of the Corporation is as follows:

(a) For the privilege of organizing the Corporation, $5.00.

(b) For the privilege of increasing the Capital stock of the Corporation, $5,995.00.

6. The number of shares into which the capital stock has been divided is 120,000, all of one class.

7. The number of shares issued and outstanding is 104,827.

8. The number of shares that may henceforth be issued by the Corporation is 200,000.

9. None of the new shares are to be preferred.

10. The amount of capital with which the Corporation will carry on business is $11,000,000.

11. The terms upon which the new shares of the reorganized Corporation shall be issued in place of the outstanding shares of stock are the issuance

Digitized by Google

of one share without nominal or par value for each share of outstanding stock of the par value of $100.

12. The Board of Directors may issue and sell its authorized shares from time to time for such consideration as shall be the fair market value of said shares.

In witness whereof this certificate is signed and acknowledged by the President and the Secretary of the Corporation, who have made and annexed the affidavit below set forth.

CERTIFICATE OF MERGER OF INTERNATIONAL BUSINESS MACHINES CORPORATION INTO COMPUTING-TABULATING-RECORDING CO. AND CHANGE OF NAME OF COMPUTING-TABULATING-RECORDING CO. TO INTERNATIONAL BUSINESS MACHINES CORPORATION, PURSUANT TO SECTION 85 OF THE STOCK CORPORATION LAW

Computing-Tabulating-Recording Co., a New York stock corporation, pursuant to Section 85 of the Stock Corporation Law, certifies:

1. That Computing-Tabulating-Recording Co. owns all the stcok of International Business Machines Corporation, a domestic stock corporation organized for or engaged in business similar to that of Computing-Tabulating-Recording Co., the possessor corporation.

2. That at a meeting of the Board of Directors, of Computing-Tabulating-Recording Co., duly called and held on the 30th day of January, 1924, the following resolution was adopted, to wit:

Whereas Computing-Tabulating-Recording Co., a New York corporation, now owns all the stock of International Business Machines Corporation, a domestic corporation, organized for or engaged in business similar to that of this corporation.

It is hereby resolved by the Board of Directors of Computing-Tabulating-Recording Co. to merge such International Business Machines Corporation and to assume all of its obligations; and it is

Resolved, that the President or a Vice-President and the Secretary or Treasurer of Computing-Tabulating-Recording Co. are directed to sign in the name and under the corporate seal of Computing-Tabulating-Recording Co. a Certificate of such ownership and setting forth a copy of this resolution of this, its Board of Directors, to merge such other corporation and to assume all of its obligations and the date of the adoption thereof; and to file such certificate in the office of the Secretary of State of the State of New York.

Resolved, that the officers of Computing-Tabulating-Recording Co. be and they hereby are authorized and directed to do all other acts and things whatsoever which may be requisite or proper for the full and complete accomplishment of said merger;

Resolved, That Computing-Tabulating-Recording Co. hereby relinquishes its corporate name and assumes in place thereof the name of the merged corporation, to wit, the name International Business Machines Corporation.

3. That the date of the adoption of said resolution was January 30, 1924.

In witness whereof this certificate is signed in duplicate under the corporate seal and in the name of Computing-Tabulating-Recording Co. by its president and its secretary this 6th day of February, 1924.

[SEAL] COMPUTING-TABULATING-RECORDING CO.,
By THOS. J. WATSON, *President.*
JOHN G. PHILLIPS, *Secretary.*

STATE OF NEW YORK,
County of New York, ss:

On this 6th day of February 1924 before me personally came Thomas J. Watson and John G. Phillips, to me known, who being by me severally duly sworn, each for himself deposes and says, that he, the said Thomas J. Watson, resides in Short Hills, State of New Jersey, and is the president of Computing-Tabulating-Recording Co., the corporation which executed the foregoing certificate, and that he, the said John G. Phillips, resides in Hawthorne, in the State of New Jersey, and is the secretary thereof; that he knows the seal of said corporation; that the seal affixed to said certificate is such corporate seal; that it was so affixed by order of the board of directors of said corporation, and that he signed his name thereto by like order.

[SEAL] GRACE M. BRENNAN,
Notary Public, Kings County.

Certificate filed Kings County, register no. 4379. Kings County Clerk's no. 366. Certificate filed New York County, register no. 40429. New York County Clerk's no. 1088. My term expires March 30, 1924.

STATE OF NEW YORK,
Department of State, ss:

I certify that I have compared the preceding copy with the original certificate of merger of International Business Machines Corporation with Computing-Tabulating-Recording Co. and the adoption of the name of International Business Machines Corporation, filed in this department on the 14th day of February 1924, and that such copy is a correct transcript therefrom and of the whole of such original.

Witness my hand and the official seal of the department of state at the city of Albany, this 21st day of July 1933.

FRANK S. SHARP,
Deputy Secretary of State.

(Endorsement on back:) Certificate of merger of International Business Machines Corporation into Comupting-Tabulating-Recording Co. and change of name of Computing-Tabulating-Recording Co. to International Business Machines Corporation, pursuant to section 85 of the Stock Corporations Law, State of New York, Office of Secretary of State, Filed Feb. 14, 1924. James A. Hamilton, Secretary of State. (Original.)

CERTIFICATE OF CHANGE OF PROVISIONS WITH REGARD TO THE ISSUE AND SALE OF NO PAR VALUE STOCK OF CERTIFICATE OF INCORPORATION (AS AMENDED BY CERTIFICATE OF REORGANIZATION) OF INTERNATIONAL BUSINESS MACHINES CORPORATION PURSUANT TO SECTION THIRTY-FIVE OF THE STOCK CORPORATION LAW

We, the undersigned, President and Secretary respectively of the International Business Machines Corporation do hereby certify and state as follows:

1. The nome of the Corporation is International Business Machines Corporation; the name under which it was originally incorporated was Computing-Tabulating-Recording Co.

2. The date of filing of the Certificate of Incorporation in each State office where filed is:

In the office of the Secretary of State of the State of New York on June 16, 1911.

In the office of the Clerk of Broome County on June 19, 1911.

3. The provisions of the Certificate of Incorporation (as amended by Certificate of Reorganization heretofore filed) to be amended or eliminated are as follows:

"The Board of Directors may issue and sell its authorized shares from time to time for such consideration as shall be the fair market value of said shares."

The provisions to be substituted therefore are:

"The Corporation may issue and may sell its authorized shares without par value from time to time, for such consideration as, from time to time, may be fixed by the Board of Directors and authority is hereby confirmed upon such Board so to fix the consideration."

In witness whereof, we, the President and Secretary of said International Business Machines Corporation have subscribed and acknowledged this certificate in duplicate this 16th day of February 1926.

THOS. J. WATSON, *President.*
JOHN G. PHILLIPS, *Secretary.*

STATE OF NEW YORK,
County of New York, ss:

On this 16th day of February 1936 before me personally appeared Thomas J. Watson and John G. Phillips to me known and known to me to be the individuals described in and who executed the foregoing instrument and they

severally acknowledged to me that they executed the same as President and Secretary, respectively, of International Business Machines Corporation.

[SEAL] JOSEPH E. KAISER, *Notary Public.*

STATE OF NEW YORK,
County of New York, ss:

Thomas J. Watson and John G. Phillips being severally duly sworn, each for himself, deposes and says: that he, Thomas J. Watson is the President and he, John G. Phillips is the Secretary of International Business Machines Corporation, the Corporation above mentioned, that they have been authorized to execute and file the foregoing certificate by the votes cast in person or by proxy of the holders of record of two-thirds of the outstanding shares of the Corporation entitled to vote thereon, and that such votes were cast at a stockholders' meeting held on the 16th day of February 1926, being the date specified in the notice of said meeting, which notice was given pursuant to Section 45 of the Stock Corporation law.

THOS. J. WATSON.
JOHN G. PHILLIPS.

Severally subscribed and sworn to before me this 16th day of February 1926.

[SEAL] JOSEPH E. KAISER, *Notary Public.*

STATE OF NEW YORK,
Department of State, ss:

I certify That I have compared the pro——— copy with the original Certificate of Amendment of Certificate of Reorganization of International Business Machines Corporation filed in this department on the 19th day of February, 1926, and that —— copy is a correct transcript therefrom and of the whole of such original.

Witness my hand and the official seal of the Department of ——— at the City of Albany, this 21st —— of July, one thousand nine hundred and thirty-three.

FRANK S. SHARP,
Deputy Secretary of State.

(Endorsement on back:) Certificate of change of provisions with regard to the issue and sales of no par value stock of certificates of incorporation (as amended by certificate of incorporation) of International Business Machines Corporation, pursuant to section thirty-five of the Stock Corporation law. State of New York, office of Secretary of State. Filed Feb. 19, 1926. ——— ———. Filing fee, $20. Florence E. S. Knapp, Secretary of State. By ———

CERTIFICATE OF INCREASE OF NUMBER OF SHARES AND OF CHANGE OF THE STATEMENTS RESPECTING CAPITAL CONTAINED IN CERTIFICATE OF INCORPORATION (AS AMENDED BY CERTIFICATE OF REORGANIZATION) OF INTERNATIONAL BUSINESS MACHINES CORPORATION PURSUANT TO SECTION THIRTY-SIX OF THE STOCK CORPORATION LAW

WE, the undersigned, President and Secretary respectively of International Business Machines Corporation do hereby certify and state as follows:

1. The name of the Corporation is International Business Machines Corporation; the name under which it was originally incorporated was Computing-Tabulating-Recording Co.

2. The date of filing the Certificate of Incorporation in each State office where filed is:

In the office of the Secretary of State of the State of New York on June 16, 1911.

In the office of the Clerk of Broome County on June 19, 1911.

3. The total number of shares which it is already authorized to issue is Two hundred thousand (200,000); the number thereof which have a par value is none; and the number thereof which are without par value is Two hundred thousand (200,000).

Digitized by Google

4. None of the shares already authorized are classified.

5. The number of shares issued and outstanding is One hundred ninety-two thousand eight hundred eighty-one (192,881).

6. The statements respecting its capital contained in its Certificate of Reorganization filed pursuant to law are:

"The amount of capital with which the Corporation will carry on business is $11,000,000."

7. The total number of shares, including those previously authorized, which the Corporation may henceforth have is Seven hundred fifty thousand (750,000) shares; the number thereof which are to have a par value is none; and the number thereof which are to be without par value is Seven hundred fifty thousand (750,000).

8. None of the shares are to be classified.

9. The capital of the Corporation shall be at least equal to the sum of the aggregate par value of all issued shares having par value, plus the aggregate amount of consideration received by the Corporation for the issuance of shares without par value, plus such amounts as, from time to time, by resolution of the Board of Directors, may be transferred thereto.

In witness whereof, we, the President and Secretary of said International Business Machines Corporation have subscribed and acknowledged this certificate in duplicate this 16th day of February 1926.

FADA RADIO & ELECTRIC CO.,
Thompson Avenue, Twenty-ninth and Thirtieth Streets,
Long Island City, N. Y., January 3, 1936.

HOUSE OF REPRESENTATIVES, UNITED STATES,
COMMITTEE ON PATENTS,
24 Fifth Avenue, New York City, N. Y.
(Attention Mr. William I. Sirovich, chairman.)

GENTLEMEN: We refer to your letter of the 9th ultimo pertaining to the question of patents, etc.

While our company has certain patents pending and certain patent grants on various phases of our industry, with the exception of our various trade-mark patents none of these are being employed at the present time in our merchandise.

Regarding patents under which we operate as licensees of the R. C. A. and Hazeltine patent groups, we are submitting hereunder the numbers of these respective patents:

R. C. A. PATENTS

We have no record of the names of the inventors, nor of the subjects of the patents, and it would take considerable work to obtain this information. In view of the fact that you will doubtless be receiving this information from other licensees of the R. C. A. and Hazeltine groups we trust our decision not to supply these details will not represent an inconvenience.

We sincerely hope the data presented in this letter will serve your purposes and if we may be of further service, kindly let us hear from you.

Very truly yours,

FADA RADIO & ELECTRIC CO.,
J. M. MARKS, *General Manager.*

CHESTER A. ADEE,
11 Broadway, New York, December 24, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
Washington, D. C.

DEAR SIR: Your letter addressed to the president of Ingersoll-Rand Co. has been referred to me for reply inasmuch as I have charge of patent matters for that company.

We have not been accustomed to keep the requested information in the form desired, hence the delay in answering your letter. The following paragraphs are numbered to correspond to the items in your letter and answer the questions as well as we are able to do so.

1. Attached hereto is a photostat copy of a list of all patents issued to Ingersoll-Rand Co. since November 1, 1918. To comply with item 1 of your letter there should be added to this list Brewer Patent No. 1461379, under which we have a license from the owner by virtue of a cross-license agreement involving also Ingersoll-Rand Co.'s Patent No. 1899002.

2. We are not operating under the great majority of the patents in the list. It is impossible to state why without taking each patent separately. Our patent department files an application on practically everything which is developed at the shops and appears patentable. The engineers embody the inventions in the product if they consider it advantageous.

3. We belong to no patent-pooling organization or association and cannot therefore furnish any data for this item.

4. Ingersoll-Rand is cross-licensee in an agreement involving the Brewer and LeValley patents mentioned above. The license under the Brewer patent is the sole consideration for the license under the LeValley patent. Incidentally this cross-license is of little practical importance.

5. We have no form of cross-licensing or pooling agreement with others.

6. The Brewer-LeValley agreement referred to above is dated February 25, 1935. The LeValley patent was assigned to Ingersoll-Rand Co. The consideration in the assignment is $1. The value of the patent is very problematical and has always been so.

7. The answer to this item is "No."

8. Assuming that the inventors referred to are those found in the attached list of patents, substantially all of them were employees of the company at the time of the filing of the patent applications. A copy of the form of the employee's contract with regard to inventions is attached hereto.

9. The Brewer patent referred to above is owned by the DeVilbiss Co. of Toledo, Ohio. I do not know its value.

Digitized by Google

10. Naturally, in consideration of the license under the Brewer patent, we gave a license under the LeValley patent. There are no other cross-licenses that I can find.

11. None.

12. I have no comments or suggestions that have not been made elsewhere.

I am afraid that the answers to your questions may appear odd. Ingersoll-Rand Co. has studiously avoided granting licenses under its patents. When it has taken a license under a patent such license has almost always been exclusive in its nature. It would appear therefore that the company has very little to disclose that applies to your inquiry.

Respectfully yours,

C. A. ADEE.

LIST OF PATENTS ASSIGNED TO INGERSOLL-RAND CO., NOVEMBER 1, 1918, TO DATE

AGREEMENT FOR ASSIGNMENT OF INVENTIONS

In consideration of one dollar ($1) paid to me by Ingersoll-Rand Co., the receipt whereof by me is hereby acknowledged and of my employment by that company during such time as may be mutually agreeable to that company and myself, I agree to assign and hereby do assign to said company, its successors and assigns, all my rights to inventions which I have made or conceived or which I may hereafter make or conceive, either solely or jointly with others, in the course of such employment, or with the use of the time, material, or facilities of said company, or relating to any method, substance, machine, article of manufacture, or improvements therein within the scope of the business of that company; and I further agree that, without charge to said company, but at its expense, I will disclose such inventions to the said company as soon as practicable after they are made, and execute, acknowledge, and deliver at the request of the company all papers including patent applications which may be requisite for obtaining patents on said inventions in any and all countries and to vest title thereto in said Ingersoll-Rand Co., its successors or assigns, and do all other acts and things which may be necessary and proper to be done in furtherance of these ends, the inventions to remain the property of Ingersoll-Rand Co. whether patented or not.

In order that future disputes may not occur, all patents issued prior to the date of my employment with Ingersoll-Rand Co., are excluded from this agreement, and all other inventions which I wish to exclude therefrom are listed within.

Witness my hand and seal this _____ day of _____, 19____

_____ [SEAL]

Witnesses:

_____

_____

The men who are asked to sign this agreement are those who in the natural course of events may be brought in touch with the problems which are from time to time presented to Ingersoll-Rand Co. for solution and with the efforts which are being made by various engineers attached to the company to solve these problems. Without an agreement to assign inventions along the line of the company's activities it would be impossible to put these men in any such relations with the company's work and to bring them into free and open relations with those engineers who are regularly assigning inventions to the company.

While the company holds out no promise of additional compensation for assignment of inventions, its policy is to recognize all good service of whatever nature, by proper adjustment of the salaries of employees, by advancement in opportunity and responsibility, and otherwise, and inventive ability is in general recognized as an element of value just as designing ability, executive ability, and other similar traits are recognized.

As the employee is to assign inventions which he makes after he enters the employ of the company, then for his own protection as well as in the interests of the company it is desirable that records should be made of the inventions which he possesses at the time of employment and which he would therefore naturally wish to exclude from the operation of the contract and to take up specially with the company if they were such that the company would be likely to be interested in them.

CONFIDENTIAL INFORMATION

It is obvious that during this employment a man may acquire many records and data and much confidential information which under no circumstances should be used after the termination of the employment. There is also much that is marginal, or as to which doubt may arise. It is difficult exactly to draw the line in writing; a man's own sense of propriety is usually the safest guide in each particular case. The more experience he has the more careful he becomes in such matters. The company will in many cases be glad to have the employee use such information, but expects the employee to obtain permission in each case when doubt arises.

Chronological index

Patent no.	Patentee	Date	Title
1284815	Taylor, A. H	Nov. 12, 1918	Spike Holder for Spike Driving Machines.
1289285	Slater, F. M	Dec. 31, 1918	Valve for Percussive Tools.
1291854	Haight, H. V	Jan. 21, 1919	Unloader for Compressors.
1293792	Jimerson, F. A	Feb. 11, 1919	Crank Bearing for Close Corner Drills.
1297830	Gibson, A. H	Mar. 18, 1919	Connecting Rod Construction.
1297889	Miller, F	do	Core Drill.
1297925	Stage, H. I	do	Automatic Pneumatic Feed.
1299773	Peters, A. E	Apr. 8, 1919	Governing Mechanism for Steam Engines.
1299814	Bayles, L. C	do	Feeding Means for Drills.
1299815	do	do	Plate Valve.
1302019	Ditson, J	Apr. 29, 1919	Drill Sharpener.
1302084	Peters, A. E	do	Plate Valve.
1302268	Abrams, H. T	do	Apparatus for Elevating Fluids by Compressed Air.
1304442	Bayles, L. C., Slater, F. M	May 20, 1919	Cylinder and Guide Construction for Hammer Drills.
1304459	Ditson, J	do	Drill Sharpener.
1306106	do	June 10, 1919	Drill Steel Pinning Device.
Re14662	Haight, H. V	do	Unloader for Compressors.
1311897	Ihrmark, C. G	Aug. 5, 1919	Tool Holder.
1311922	Slater, F. M	do	Fluid Current Meter.
1311925	Smith, W. A	do	Percussive Tool.
1316184	Prellwitz, W	Sept. 16, 1919	Plate Valve.
1317874	Haight, H. V	Oct. 7, 1919	Fluid Operated Percussive Drill.
1317875	Hansen, C. C	do	Feeding Means for Core Drills.
1321565	Smith, W. A	Nov. 11, 1919	Mounting for Hammer Drills.
1324064	Peters, A. E	Dec. 9, 1919	Emergency Stop for Steam Engines.
1324078	Smith, W. A	do	Percussive Tool.
1328077	Boyer, L. E	Jan. 13, 1920	Method of and Apparatus for Forming Rifled Bores in Metal.
1336930	Stage, H. I	Apr. 13, 1920	Rock Drill Seating and Controlling Means.
1337670	Smith, W. A	Apr. 20, 1920	Pin Puller.
1338259	do	Apr. 27, 1920	Impact Engine.
1338732	Jimerson, F. A	May 4, 1920	Reversing Mechanism for Fluid Engines.
1343190	Abrams, H. T	June 15, 1920	Automatic Valve for Air List Pumps.
1343610	Bayles, L. C	do	Fluid Operated Percussive Tool.
1343649	Smith, W. A	do	Valve for Percussive Tools.
1344415	Longacre, F. V. D	June 22, 1920	Electric Welding Apparatus.
1345364	Hansen, C. C	July 6, 1920	Throttle Valve.
1345731	Ambrose, R. L	do	Mounting for Drills.
1346163	Bayles, L. C., Slater, F. M	July 13, 1920	Roller Bearing Construction.
1347185	Smith, W. A	July 20, 1920	Mounting for Rock Drills.
1347786	Longacre, F. V. D	July 27, 1920	Starting Means for Motor Driven Compressor Installations.
1349145	Breinl, J. C	Aug. 10, 1920	Valve.
1349146	Christmas, A. F	do	Governing Mechanism for Internal Combustion Engines.
1349330	Ditson, J	do	Fluid Operated Vise.
1350342	Smith, W. A	Aug. 24, 1920	Valve for Percussive Tools.
1350407	Haight, H. V	do	Throttle Valve for Percussive Tools.
1352025	Prellwitz, W	Sept. 7, 1920	Plate Valve.
1352036	Smith, W. A	do	Valve.
1352050	Christmas, F. A	do	Governing Fuel Pump.
1352060	Gibson, A. H	do	Centrifugal Brake for Power Trucks.
1352648	Beyer, H. E., Hall, W. G	Sept. 14, 1920	Rectifier and Condenser.
1353706	Bancel, P. A	Sept. 21, 1920	Regenerative Power Installation.
1353796	Stage, H. I	do	Fluid Operated Percussive Tool.
1354276	Bancel, P. A	Sept. 28, 1920	Surface Condenser.
1354318	Longacre, F. D	do	Valve.
1354348	Smith, W. A	do	Fluid Actuated Reciprocating Motor.
1355175	do	Oct. 12, 1920	Percussive Tool.
1355806	Bayles, L. C	Oct. 19, 1920	Drill Steel Retainer.
1358441	Hansen, C. C	Nov. 9, 1920	Core Drill.
1358486	Wilhelm, R. H	do	Handle for Percussive Tools.
1358889	Smith, W. A	Nov. 16, 1920	Mounting for Drills.
1359119	do	do	Percussive Tool.
1361329	Hansen, C. C	Dec. 7, 1920	Oil Burning Forge.

Chronological index—Continued

Patent no.	Patentee	Date	Title
1361632	Slater, F. M	Dec. 7, 1920	Feeding Means for Drills.
1361636	Stage, H. I	do	Regulating Valve for Drill Feeding Means.
1363586	Hansen, C. C	Dec. 28, 1920	Subaqueous Rock Drill.
1367343	Anderson, W. E	Feb. 1, 1921	Impeller-Vane for Water Pumps.
1367360	Ditson, J	do	Centering Device.
1368238	Carpenter, A. O	Feb. 15, 1921	Cooling Means for Compressors and Pumps.
1368248	Ditson, J	do	Capstan.
1370061	Smith, W. A	Mar. 1, 1921	Throttle-Valve for Drills.
1370251	Wilhelm, R. H	do	Pinning-Out Machine for Drill Steels.
1370923	Slater, F. M	Mar. 8, 1921	Independent Rotation for Percussive Tools.
1371293	Brackett, J. C	Mar. 15, 1921	Shoveling and Loading Machine.
1371344	do	do	Do.
1371345	do	do	Do.
1371701	Lundell, R. A	do	Piston and Connecting Rod Construction.
1371721	Bayles, L. C	do	Exhaust-Valve for Hammer Drills.
1372037	Parsons, F. W	Mar. 22, 1921	Cover-Retainer for Vacuum Pumps.
1372914	Smith, W. A	Mar. 29, 1921	Automatic valve for Independent Rotation Drills
1372915	do	do	Automatic Valve.
1373853	Bayles, L. C., Slater, F. M	Apr. 5, 1921	Throttle Valve for Drills.
1373866	Christmas, A. F	do	Governor for Steam Engines.
1375252	Huff, L. R	Apr. 19, 1921	Plate Valve.
1375433	Wilhelm, R. H	do	Tool Retainer for Hammer Drills.
1375443	Bayles, L. C	do	Rotating Construction for Percussive Tools.
1375444	do	do	Rotating Device for Percussive Tools.
1376409	Ditson, J	May 3, 1921	Adjustable Stop Member for Gaging Blocks.
1376484	Tuttle, G. G	do	Plate Valve.
1377479	Hansen, C. C	May 10, 1921	Liquid Fuel Burner.
1378028	Hart, T. J	May 17, 1921	Compressor Overload Regulator.
1378491	Stage, H. I	do	Unitary Regulating and Controlling Means for Drill Feed Mechanism.
1379225	Smith, W. A	May 24, 1921	Pinning-Out Machine for Drill Steels.
1379935	Peters, A. E	May 31, 1921	Centering Device.
1379955	Bancel, P. A	do	Jet Condenser.
1380460	do	June 7, 1921	Method and Apparatus for Devaporising and Cooling.
1381646	Kirgan, J. F	June 14, 1921	Spray Head.
1382325	Slater, F. M	June 21, 1921	Support for Rotating Stope Drills.
1383258	Hoffman, P	June 28, 1921	Constant Volume Regulator for Turbo Compressors.
1383373	Bayles, L. C	July 5, 1921	Valve.
1383404	Kirgan, J. F	do	Spray Head.
1383434	Smith, W. A	do	Drill Steel Retainer.
1383850	Pitts, C	do	Belt Drive.
1383939	Hansen, C. C	do	Double Core Barrel for Core Drills.
1384216	Smith, W. A	July 12, 1921	Rock Drill.
1384520	Ditson, J	do	Adapter for Saddle Clamps.
1384641	Smith, W. A	do	Blowing Device for Percussive Tools.
1384661	Guiley, H. A	do	Rotation Means for Percussive Tools.
1384686	Christmas, A. F	do	Vaporizer for Internal Combustion Engines.
1385115	Cone, J. D	July 19, 1921	Centrifugal Pump.
1385134	Jimerson, F. A	do	Fluid Actuated Rotary Tool.
1385147	Prellwitz, W	do	Plate Valve.
1385467	Parsons, F. W	July 26, 1921	Valve Seat Retainer.
1386769	Ditson, J	Aug. 9, 1921	Dolly-Return Device.
1390834	Stage, H. I	Sept. 13, 1921	Motor Rotation Impact Tool.
1391628	Haight, H. V	Sept. 20, 1921	Percussive Tool.
1391629	do	do	Hammer Drill.
1393072	Bayles, L. C	Oct. 11, 1921	Front Head for Rock Drills.
1393085	Carpenter, A. O	do	Compressor.
1393094	Ditson, J	do	Pin Puller.
1393403	Smith, W. A	do	Drill Sharpener.
1395082	Bayles, L. C	Oct. 25, 1921	Fluid Actuated Motor.
1395090	Carpenter, A. O	do	Compressor Unloader.
1395702	Ditson, J	Nov. 1, 1921	Shank and Bit Punch.
1395747	Smith, W. A	do	Do.
1397091	Douglass, R. W	Nov. 15, 1921	Heat Exchanger.
1401551	Parson, F. W	Dec. 27, 1921	Fluid Actuated Clutch Pulley.
1401858	Bayles, L. C	do	Pneumatic Column.
1403284	Beaver, C. P	Jan. 10, 1922	Front Head for Rock Drills.
1404179	Veasey, J. H	Jan. 17, 1922	Fluid Pressure Actuated, etc.
1406185	Hansen, C. C	Feb. 14, 1922	Shot Bit.
1406767	Slater, F. M	do	Handle for Stope Drills.
1406815	Bancel, P. A	do	Compartment Surface Condenser.
1406853	Hansen, C. C	do	Casing Cutting Tool.
1406906	Smith, W. A	do	Air Feed Control for Rock Drills.
1406907	do	do	Do.
1406908	do	do	Do.
1407589	Slater, F. M	Feb. 21, 1922	Front End Construction for Rotating Rock Drills.
1407590	do	do	Throttle Valve for Rock Drills.
1407591	do	do	Air Feed Control for Rock Drills.
1407599	Stage, H. I	do	Automatic Air Feed Control for Rock Drills.

Chronological index—Continued

Patent no.	Patentee	Date	Title
1408638	Prellwitz, W.	Mar. 7, 1922	Compressor.
1408660	Trumpler, W. E.	do	Constant Volume Regulator for Turbo Compressors.
1408684	Balyes, L. C., Slater, F. M.	do	Percussive Tool.
1408700	Hill, F. A.	do	Regulator for Turbo Compressors.
1408710	Nusim, M. J.	do	Constant Volume Regulator for Turbo Compressors.
1408935	Ditson, J., Peters, A. E.	do	Shank and Bit Punch.
1409020	Parsons, F. W.	do	Safety Stop for Power Engines.
1409904	Bayles, L. C.	Mar. 21, 1922	Side Bolt Construction for Percussive Tools.
1409905	do	do	Pneumatic Column.
1411253	do	Apr. 4, 1922	Percussive Tool.
1411701	Huff, L. R.	do	Constant Volume Regulator for Turbo Compressors.
1411795	Metzgar, C. W.	do	Valve Seat Retainer.
1412469	Jimerson, F. A.	Apr. 11, 1922	Bit Chuck Retainer.
1413499	Smith, W. A.	Apr. 18, 1922	Automatic Air Feed Control for Rock Drills.
1414168	Bayles, L. C., Slater, F. M.	Apr. 25, 1922	Automatic Regulating Valve for Fluid Operated Motors.
1414222	Slater, F. M.	do	Regulating Valve for Rock Drills.
1414224	Smith, W. A.	do	Rock Drill.
1414225	do	do	Do.
1414234	Tuttle, G. G.	do	Drill Steel Retainer.
1414665	Parsons, F. W.	May 2, 1922	Valve Seat Retainers.
1415047	do	May 9, 1922	Portable Compressor Unit.
1415553	Hansen, C. C.	do	Oil Burning Forge.
1415647	Huff, L. R.	do	Pressure Regulator for Turbo Compressors.
1415957	Smith, W. A.	May 16, 1922	Rock Drill.
1415958	do	do	Automatic Air Feed Control for Rock Drills.
1416515	Saunders, W. L.	do	Method of and Apparatus for Loading.
1416637	Hart, T. J.	do	Plate Valve.
1417041	Ditson, J.	May 23, 1922	Double Drum Hoist.
1418202	Parsons, F. W.	May 30, 1922	Vertical Compressor Unit.
1418333	Smith, W. A.	June 6, 1922	Rock Drill.
1418336	Stage, H. I.	do	Pneumatic Drill Column.
1421183	Ditson, J.	June 27, 1922	Hoist.
1421309	Redfield, S. B.	do	Compressor Unloader.
1422476	Prellwitz, W.	July 11, 1922	Clearance Valve for Compressors.
1422573	Hoffman, P., Reed, F. C.	do	Gas Booster Regulator.
1423343	Lundell, R. A.	July 18, 1922	Piston and Connecting Rod Construction.
1423344	do	do	Do.
1423595	Bayles, L. C.	July 25, 1922	Pin Retainer for Tool Holders.
1425613	Stage, H. I.	Aug. 15, 1922	Feeding Means for Drills.
1425949	Ditson, J.	do	Guard for Valve Handles.
1427835	Metzgar, C. W.	Sept. 5, 1922	Fluid Compressor.
1428745	Bayles, L. C.	Sept. 12, 1922	Valve Spindle Retaining Device.
1428847	Jimerson, F. A.	do	Built-up Crank Shaft.
1428981	Redfield, S. B.	do	Compressor Unloader.
1429786	Smith, W. A.	Sept. 19, 1922	Rock Drill.
1429808	Tuttle, G. G.	do	Drill Steel Retainer.
1429809	do	do	Do.
1429810	do	do	Do.
1430558	Jimerson, F. A.	Oct. 3, 1922	Pneumatic Hose Coupling.
1430577	Metzgar, C. W.	do	Fluid Compressor.
1430578	do	do	Compressor Regulator.
1430581	Parsons, F. W.	do	High Pressure Compressor Unit.
1430764	Smith, W. A.	do	Rock Drill.
1431415	Parsons, F. W., Jimerson, F. A.	Oct. 10, 1922	Built-up Crank Shaft.
1431416	do	do	Do.
1433094	Parsons, F. W.	Oct. 24, 1922	Plate Valve.
1436638	Bayles, L. C.	Nov. 28, 1922	Air Feed Control for Rock Drills.
1436699	Ditson, J.	do	Oiler for Drill Sharpener Cylinders.
1437609	Nusim, M. J.	Dec. 5, 1922	Impeller.
1437610	do	do	Do.
1437632	Bayles, L. C.	do	Manual Air Feed Control for Rock Drills.
1441431	Kirgan, J. F.	Jan. 9, 1923	Tube Cleaner.
1441638	Slater, F. M.	do	Oil and Air Separator for Rotary Motors.
1441700	Middlemiss, B. A.	do	Loading Machine.
1442852	Brackett, J. C.	Jan. 23, 1923	Do.
1443128	Hansen, C. C.	do	Rock Drill.
1448506	Prellwitz, Wm.	Mar. 13, 1923	Shaft Coupling.
1448925	Fulton, J. S., McIntyre, J. K.	Mar. 20, 1923	Impellor Mounting for Centrifugal Pumps.
1450709	Bayles, L. C.	Apr. 3, 1923	Column or Support for Rock Drills.
1451362	Hansen, C. C.	Apr. 10, 1923	Independent Rotation for Percussive Tools.
1451363	do	do	Lug Chuck for Rock Drills.
1452140	Bayles, L. C.	Apr. 17, 1923	Air Feed Control for Rock Drills.
1452154	Hansen, C. C.	do	Rotation Release for Rock Drills.
1452155	do	do	Automatic Liquid Valve.
1453518	Price, W. T.	May 1, 1923	Main Bearing.
1453681	Jones, J. W.	do	Oil Governor for Compressor Engines.
1454402	Parsons, F. W.	May 8, 1923	Centrifugal Unloader for Compressors.

1456972	Christmas, A. F	May 29, 1923	Governing Fuel Pump.
1456983	Hansen, C. C	do	Soil Coring Tool.
1457777	Kirgan, J. F	June 5, 1923	Jet Augmentor or Ejector.
1458328	Ditson, J., Peters, A. E	June 12, 1923	Pedestal Punch.
1458625	Metzgar, C. W	do	Plate Valve Lifter.
1460824	Parsons, F. W	July 3, 1923	Compressor Valve.
1462301	do	July 17, 1923	Plate Valve Unloader.
1462874	Slater, F. M	July 24, 1923	Rotary Cylinder Motor.
1463134	Haight, H. V	do	Shank and Bit Punch.
1464666	Slater, F. M	Aug. 14, 1923	Anti-Friction Bearing.
1464755	Ditson, J., Parkhill, M. S	do	Forging Machine.
1464930	Gulley, H. A	do	Rotation for Rock Drills.
1465568	Taylor, A. H	Aug. 21, 1923	Reducing Valve for Rock Drills.
1467066	Prellwitz, Wm	Sept. 4, 1923	Compressor.
1470022	McIntrye, J. K	Oct. 9, 1923	Centrifugal Pump.
1470077	Haight, H. V	do	Plate Valve Unloader.
1470622	Jimerson, F. A	Oct. 16, 1923	Fluid Actuated Tie Tamper.
1470625	Jones, J. W	do	Plate Valve.
1472040	Bayles, L. C	Oct. 30, 1923	Automatic Air Feed and Rotation, Motor Control for Rock Drills.
1472382	Bayles, L. C., Slater, F. M	do	Locking Device for Independent Rotation Motors.
1472424	Bayles, L. C	do	Oiling Device for Rock Drills.
1474159	Morrow, H. W	Nov. 13, 1923	Pin Puller.
1475939	Ditson, J	Dec. 4, 1923	Apparatus for Forging Five Point Rock Drill Bits.
1476814	Gulley, H. A	Dec 11, 1923	Rotation Release for Rock Drills.
1477259	Hansen, C. C	do	Pneumatic Coal Pick.
1478220	do	Dec. 18, 1923	Oiling Device for Rock Drills.
1479356	Bayles, L. C	Jan. 1, 1924	Spool Valve for Rock Drills.
1479357	Bayles, L. C., Morrow, H. W.	do	Pin Puller.
1479395	Metzgar, C. W	do	Plate Valve Lifter.
1480552	Hansen, C. C	Jan. 15, 1924	Independent Rotation for Percussive Tools.
1480566	Parsons, F. W	do	Gear Drive.
1481334	Allen, R. O	Jan. 22, 1924	Connecting Rod Construction.
1481641	Jimerson, F. A	do	Tie Tamper Front End Construction.
1481642	do	do	Combination Riveter.
1481643	do	do	Percussive Tool Front End Construction.
1482396	Hansen, C. C	Feb. 5, 1924	Apparatus for Channelling Rock.
1482397	do	do	Core Breaker.
1483111	Price, W. T	Feb. 12, 1924	Filter.
1484643	Hansen, C. C	Feb. 26, 1924	Hand Regulating Valve for Rotation Motors.
1484673	Redfield, S. B	do	Compressor Unloader.
1484674	do	do	Pilot Valve for Compressors.
1484678	Slater, F. M	do	Fluid Actuated Inlet Valve for Rock Drills.
1484679	do	do	Do.
1484763	Ditson, J., Peters, A. E	do	Hoist.
1484944	Hansen, C. C	do	Road Surfacing Machine.
1484960	Peck, C. H	do	Rotary Cylinder Motor.
Re 15780	Ditson, J	Mar. 4, 1924	Hoist.
1486120	Bayles, L. C	Mar. 11, 1924	Mounting for Rock Drill.
1487005	do	Mar. 18, 1924	Oiling Device for Rock Drills.
1487051	Ditson, J	do	Rotary Gear Motor Hoist.
1487160	Hentzell, A. A	do	Die for Drill Sharpening Machines.
1487769	Tuttle, G. G	Mar. 25, 1924	Piston Valve for Compressors.
1487770	do	do	Do.
1488525	Bayles, L. C	Apr. 1, 1924	Rock Drill Centralizer.
1488529	Carpenter, A. O	do	Power Unit.
1488538	Hansen, C. C	do	Rotation Motor for Rock Drills.
1488552	Parkhill, M. S	do	Mounting.
1488554	Plumb, C. V	do	Rock Drill Centralizer.
1488796	Parsons, F. W	do	Piston and Connecting Rod Construction.
1490976	Huff, L. R	Apr. 22, 1924	Regulator for Turbo Compressors.
183440	Trademark	Apr. 29, 1924	Hammer.
1493951	Bayles, L. C	May 13, 1924	Blowing Device for Drill Steels.
1494030	Slater, F. M	do	Impulse-Actuated Rock Drill.
1494917	Kirgan, J. F	May 20, 1924	Low Level Multi-Jet Condenser.
1494944	Bancel, P. A	do	Double Multi-Jet Condenser.
1495150	Kirgan, J. F., Bancel, P. A	May 27, 1924	Jet Augmentor or Ejector.
1495151	Bancel, P. A	do	Vacuum Pan Unit.
1495185	Kirgan, J. F	do	Jet Augmentor or Ejector.
1495214	Wickersham, N. R	do	Governor Oil Leg.
1495299	Hansen, C. C	do	Chuck for Preventing Dust with Rock Drills.
184620	Trademark	do	"10".
1496512	Bancel, P. A	June 3, 1924	Condenser Tube Sheet Cleaner.
1497226	Pitts, C	June 10, 1924	Short Belt Drive.
1498170	Jimerson, F. A	June 17, 1924	Connecting Rod Bearing.
1501917	Peters, A. E	July 22, 1924	Oiling Device for Drill Sharpeners.
1501918	Peters, A. E., Parkhill, M. S	do	Sharpeners for Drill Steels.

Patent no.	Patentee	Date	Title
1502339	Jimerson, F. A	July 22, 1924	Bonding Drill.
1502648	Smith, W. A	do	Shank and Bit Punch.
1503490	Ditson, J., Peters, A. E	Aug. 5, 1924	Do.
1503895	Hansen, C. C	do	Wagon Drill.
1503922	Slater, F. M	do	Fluid Pressure Impulse System.
1503932	Wilhelm, R. H., Rudlin, F. W.	do	Steel Retainer.
1504341	Hansen, C. C	Aug. 12, 1924	Air Line Oiler.
188010	Trademark	do	"10."
1505195	Hansen, C. C	Aug. 19, 1924	Trench Digger.
1505283	Nusim, M. J	do	Combined Gas Exhauster and Tar Extractor.
1505604	Redfield, S. B	do	Compressor Unloader.
1505727	Prellwitz, Wm	do	Handle for Percussve Tools.
1505779	Hansen, C. C	do	Soil Sampling Tool.
1505780	do	do	Do.
1506119	do	Aug. 26, 1924	Core Drill Bit.
1506805	Bancel, P. A	Sept. 2, 1924	Augmenter Cooler.
1506862	Parsons, F. W	do	Governor for Fluid Actuated Rotary Tools.
1506908	Kirgan, J. F	do	Jet Augmenter or Ejector.
1506943	Reed, F. C	do	Volume Regulator Guide.
1508004	Bancel, P. A	Sept. 9, 1924	Expansion Joints for Condensers.
1508722	Price, W. T	Sept. 16, 1924	Engine Fuel Regulation.
1509220	Bayles, L. C., Peters, A. E	Sept. 23, 1924	Shank and Bit Punch.
1517015	Price, W. T	Nov. 25, 1924	Oil Engine.
1517457	Reed, R. H	Dec. 2, 1924	Combined Tar Extractor and Gas Exhauster.
1517470	Slater, F. M	do	Air Feed Lock for Rock Drills.
1517478	Wilhelm, R. H	do	Steel Retainer.
1517479	do	do	Do.
1517488	Bancel, P. A	do	Augmenter Cooler.
1517490	Bayles, L. C., Abrams, H. T	do	Regulator for Air Lift Pumps.
1517491	Bayles, L. C	do	Forming Tool for Channeler Bits.
1517497	Ditson, J	do	Blowgun for Drill Sharpeners.
1517503	Hansen, C. C	do	Regulating Valve for Rotation Motors.
1517504	do	do	Drill Rod Packing.
1519134	do	Dec. 16, 1924	Hammer Type Channeling Machine.
1519135	do	do	Composite Bit.
1519136	do	do	Drill Rod Packing.
1519171	Slater, F. M	do	Air Feed Lock for Rock Drills.
1519182	Zimmermann, W. F	do	Hollow Butt Welded Piston for Sand Rammers.
1519705	Redfield, S. B	do	Unloader.
1520023	Haight, H. V	Dec. 23, 1924	Air Line Oiler.
1520390	Carpenter, A. O., Le Valley, J.	do	Oiling Device.
1520728	Slater, F. M	Dec. 30, 1924	Fluid Actuated Inlet Valve for Rock Drills.
1521721	Smickle, R. H	Jan. 6, 1925	Retainer for Rock Drill Steels.
1521761	Ditson, J	do	Drill Sharpener.
1522239	Hansen, C. C	do	Packing Device for Drill Rods.
1522240	do	do	Rock Drill Mounting.
1522336	Slater, F. M	do	Air Feed Brake for Rock Drills.
1523844	Smith, W. A	Jan. 20, 1925	Steel Retainer.
1523873	Hansen, C. C	do	Fluid Actuated Inlet Valve for Rock Drills.
1524251	Jimerson, F. A	Jan. 27, 1925	Retainer for Percussive Tools.
1524280	Bancel, P. A	do	Condenser Tube Terminal.
1524281	do	do	Multi-Jet Condenser Casing.
1524301	Haight, H. V	do	Anvil Block Lug Chuck.
1524807	Bancel, P. A	Feb. 3, 1925	Twin Multi-Jet Condenser.
1525020	Bayles, L. C., Tuttle, G. G	do	Water Tube for Rock Drills.
1525235	Hansen, C. C	do	Soil Sampling Tool.
1526022	Stage, H. L	Feb. 10, 1925	Shoveling and Loading Machine.
1526040	Bancel, P. A	do	Steam Jet Vacuum Pump.
1526041	do	do	Low Level Multi-Jet Condenser.
1526055	Ditson, J	do	Device for Forming Shanks and Collars on Drill Steels.
1528781	Peck, C. H	Mar. 10, 1925	Pneumatic Hammer.
1530059	Rathbun, G. J	Mar. 17, 1925	Distributor for Combustion Engine.
1530492	Haight, H. V	Mar. 24, 1925	Motor Mounting.
1531315	Slater, F. M	Mar. 31, 1925	Air and Water Tube for Rock Drills.
1532118	Bayles, L. C	Apr. 7, 1925	Tar Extractor.
1532205	Slater, F. M	do	Feeding Mechanism for Rock Drill.
1535143	Wilhelm, R. H	Apr. 28, 1925	Mounting for Rock Drills.
1535198	Bayles, L. C	do	Rotation for Rock Drills.
1535221	Hansen, C. C	do	Swivel Mounting for Hoists.
1535381	Stage, H. L	do	Shoveling Machine.
1535411	Hansen, C. C	do	Pavement Breaker.
1535417	Huff, L. R	do	Open Impeller.
1535704	Wilhelm, R. H	do	Spike Holding Device.
1536282	Brackett, J. C	May 5, 1925	Shoveling and Loading Machine.
1536306	Nusim, M. J	do	Radial Impeller.
1537058	Bancel, P. A., Kirgan, J. F	May 12, 1925	Condenser Unit.
1537083	Hansen, C. C	do	Combined Centralizer and Retainer for Rock Drill Steels.

Patent no.	Patentee	Date	Title
1537084	Hansen, C. C	May 12, 1925	Roller Guide for Channeler Steels.
1537089	Jimerson, F. A	do	Track Wrench.
1538935	Haight, H. V	May 26, 1925	Feeding Mechanism for Rock Drills.
1540882	Hansen, C. C	June 9, 1925	Solid Shot Bit.
1540886	Huff, L. R	do	Hydraulic Pressure Controlling Device.
1540910	Smith, W. A	do	Rock Drill.
1542596	Bancel, P. A	June 16, 1925	Condensing Unit.
1543674	Lear, E. B	June 30, 1925	Double Drum Hoist.
1543675	do	do	Do.
1543680	Redfield, S. B	do	Centrifugal Unloader.
1543684	Slater, F. M	do	Hoist.
1543815	Bayles, L. C., Abrams, H. T	do	Fluid Pressure Pumping Apparatus.
1543816	Bayles, L. C	do	Valve for Rock Drills.
1543817	do	do	Pressure Regulating Device.
1543845	Hansen, C. C	do	Double Drum Hoist.
1543846	do	do	Do.
1543856	Lear, E. B	do	Do.
1543871	Prellwitz, Wm	do	Water Tube Back Head Connection for Rock Drills.
1543883	Slater, F. M	do	Automatic Air Feed Regulator for Rock Drills.
1544644	Jimerson, F. A	July 7, 1925	Fluid Actuated Rotary Tool.
1545050	Hansen, C. C	do	Clutch for Hoists.
1545118	Bayles, L. C	do	Rock Drill.
1546466	do	July 21, 1925	Fluid Pressure Regulating Valve.
1547774	Prellwitz, W	July 28, 1925	Handle for Percussive Tools.
1548946	Haight, H. V	Aug. 11, 1925	Air Line Oiler.
1549974	Hansen, C. C	Aug. 18, 1925	Coal Pick Mounting.
1550332	Bancel, P. A	do	Surface Condenser.
1550368	Kirgen, J. F	do	Do.
1550376	Longacre, F. D	do	Valve.
1550402	Taylor, N. E	do	Surface Condenser.
1550875	Carpenter, A. O	Aug. 25, 1925	Automatic Speed Regulator.
1550876	do	do	Governor Controller for Internal Combustion Engines.
1550902	Hansen, C. C	do	Regenerative Heater for Compressed Air in Oil Furnace.
1550964	Jones, J. W	do	Automatic Speed Regulator.
1551062	Slater, F. M	do	Rock Drill.
1552534	Bancel, P. A	Sept. 8, 1925	Multiple Effect Evaporating Apparatus.
1552562	Kirgan, J. F	do	Do.
1553961	Pryne, L	Sept. 15, 1925	Diameter Gauge.
1554003	Hansen, C. C	do	Valve Chest for Rock Drills.
1554004	do	do	Valve Bushing.
1554726	Hoffman, P	Sept. 22, 1925	Combined Exhauster and Tar Extractor.
1554755	Parsons, F. W	do	Clutch Coupling.
1554756	Peters, A. E	do	Engine.
1554766	Slater, F. M	do	Air Feed Brake for Rock Drills.
1554776	Bayles, L. C	do	Cushioning Device for Rock Drills.
1554777	Bayles, L. C., Slater, F. M	do	Rock Drill.
1554799	Ditson, J	do	Shank and Bit Punch.
1554819	Haight, H. V	do	Double Drum Hoist.
1554820	Hansen, C. C	do	Air Feed Control for Stopers.
1554984	Bayles, L. C	Sept. 29, 1925	Fluid Actuated Distributing Valve for Rock Drills.
1554985	do	do	Water Head.
1555248	Hansen, C. C	do	Double Drum Hoist.
1555709	Huff, L. R	do	Hydraulic Pressure Controlling Device.
1555793	Stage, H. I	do	Shoveling and Loading Machine.
1555967	Hansen, C. C	Oct. 6, 1925	Slip Drum Hoist.
1557399	Bancel, P. A	Oct. 13, 1925	Multi-Jet Condenser.
1557416	Carpenter, A. O	do	Car Lifting Device.
1558221	Bayles, L. C., Slater, F. M	Oct. 20, 1925	Lubricator for Rock Drills.
1558303	Smickle, R. H	do	Double Tube Connection.
1558573	Bancel, P. A	Oct. 27, 1925	Condenser Unit.
1558630	Reed, R. H	do	Hydraulic Seal for Rotary Engine.
1561072	Hansen, C. C	Nov. 10, 1925	Hoist.
1561091	Lear, E. B	do	Double Drum Hoist.
1561722	Jimerson, F. A	Nov. 17, 1925	Motor.
1561738	Miller, R	do	Apparatus for Feeding Fuel in Injection Engines.
1561745	Redfield, S. B	do	Main Bearing.
1561773	Carpenter, A. O	do	Governor Controller for Internal Combustion Engines.
1563742	Hansen, C. C	Dec. 1, 1925	Clutch Mechanism for Double Drum Hoists.
1563802	Smith, W. A	do	Water Tube Connection.
1563951	Bancel, P. A	do	Surface Condenser.
1564780	Hansen, C. C	Dec. 8, 1925	Dustless Rock Drill.
1564781	do	do	Double Drum Hoist.
1564793	Hulshizer, G. W	do	Water Tube Guide.
1564893	Prellwitz, W	do	Mounting for Concrete Breaker.
1564954	Goodwillie, J. E	do	Surface Condenser.
1564956	Hansen, C. C	do	Pile Driver Attachment for R. D.
1564963	Kirgan, J. F	do	Self Cleaning Spray Head.

1564975	Prellwitz, Wm	Dec. 8, 1925	Steel Retainer.
1566095	Jimerson, F. A	Dec. 15, 1925	Fluid Actuated Rotary Machine.
1566096	do	do	Reversible Throttle Handle.
1566308	Carpenter, A. O	Dec. 22, 1925	Vertical Compressor.
1566825	Hansen, C. C	do	Mortar Projector.
1566849	Slater, F. M	do	Double Drum Hoist.
1569635	do	Jan. 12, 1926	Do.
1569671	Parsons, F. W	do	Compressor Valve Lifter.
1570964	Hansen, C. C	Jan. 26, 1926	Air Feed Control for Stopers.
1571496	Smith, W. A	Feb. 2, 1926	Air Line Lubricator.
1571992	Bayles, L. C	Feb. 9, 1926	Throttle Valve.
1571993	do	do	Valve for Rock Drill.
1572009	Hansen, C. C	do	Shoveling and Loading Machine.
1572498	McClay and Haight	do	Paper Making Machine.
1572529	Haight, H. V	do	Chuck Assembly for Rock Drills.
1572557	Peters, A. E	do	Clutch Mechanism for Hoist Control.
1573457	Slater, F. M	Feb. 16, 1926	Valve for Rock Drills.
1573458	Smith, W. A	do	Cushion Handle.
1573474	Bayles, L. C	do	Removable Water Tube Connection for Stope Drills.
1573491	Hansen, C. C	do	Double Drum Hoist.
1574016	Bayles, L. C	Feb. 23, 1926	Rock Drill Front End.
1574085	Hansen, C. C	do	Double Drum Hoist.
1574128	Slater, F. M	do	Water Guard for Rock Drills.
1574756	Redfield, S. B	Mar. 2, 1926	Water Valve for Compressors.
1574768	Tuttle, G. G	do	Handle for Rock Drills.
1574814	Hansen, C. C	do	Mounting for Concrete Breakers.
1574910	Lear, E. B	do	Double Drum Hoist.
1574911	do	do	Do.
1574912	do	do	Do.
1574945	Slater, F. M	do	Fluid Pressure Pumping Apparatus.
1575310	Bancel, P. A	do	Surface Condenser.
1575531	Brackett, J. C	do	Coal Cutting Machine.
1575792	Prellwitz, W	Mar. 9, 1926	Steel Retainer.
1575798	Slater, F. M	do	Double Drum Hoist.
1575810	Bancel, P. A	do	Surface Condenser.
1575914	Hansen, C. C	do	Double Drum Hoist.
1576465	Pryce, L	do	Testing Hammer Rock Drill.
1576466	do	do	Straining Fluid in Fluid Transmission System.
1577590	Rathbun, J. G	Mar. 23, 1926	Oil Pump for Comb. Engine.
1577596	Smith, W. A	do	Steel Retainer for Rock Drills.
1578379	Armstrong, W. H	Mar. 30, 1926	Mechanical Tie Tamper.
1578380	do	do	Do.
1578383	Bayles, L. C., Slater, F. M	do	Throttle Valve for Rock Drills.
1578433	Hansen, C. C	do	Oiling Device for Flat Piston Motors.
1578434	do	do	Spring Sinker Handles for Drifters.
1578440	Hoffman, P	do	Volume Regultor Gauge.
1578441	Huff, L. B	do	Constant Volume Regulator.
1578500	Ditson, J	do	Forging Machine for Coal Cutter Picks.
1578997	Hulshizer, G. W	do	Air Feed Brake.
1579010	Levine, H	do	Engine.
1579041	Tuttle, G. G	do	Water Tube Connection.
1579063	Bayles, L. C	do	Steering Apparatus.
1581668	do	Apr. 20, 1926	Rock Drill.
1581699	Sturrock, J	do	Surfacing Machine.
1582075	Page, R. F	Apr. 27, 1926	Hoist Driving Gear.
1582076	do	do	Hoist.
1582120	Carpenter, A. O	do	Oiling Device.
1582464	Hansen, C. C	do	Valve for Square Piston Engine.
Re16346	Ditson, J	May 4, 1926	Shank and Bit Punch.
1584715	Bayles, L. C	May 18, 1926	Spool Valve for Rock Drills.
1584767	Hansen, C. C	do	Steel Retainer.
1584792	Mock, J. F	do	Double Tube.
1584799	Page, R. F	do	Handle for Percussive Ramming Tool.
1584800	do	do	Valve for Percussive Ramming Tool.
1584817	Slater, F. M	do	Graduated Air Feed Relief for Rock Drills.
1584859	Huff, L. R	do	Volume Regulator Gauge.
1584860	do	do	Do.
1585428	Slater, F. M	do	Rock Drill.
1585639	Bancel, P. A	May 25, 1926	Surface Condenser.
1585640	do	do	Do.
1585641	Bayles and Slater	do	Rotation and Feed Regulator.
1585668	Hansen, C. C	do	Drill Steel Guide.
1585700	Sturrock, J	do	Oil Trap for Rotary Engines.
1585821	Bayles, L. C	do	Hand Rotated Rock Drill.
1585822	do	do	Air and Water Tube.
1586205	Levine, H	do	Shank and Bit Punch.
1586234	Bancel, P. A	do	Surface Condenser.
1586269	Smith, W. A	do	Air Feed Lock.
1586635	Metzgar, O. W	June 1, 1926	Valve Opener.
1587013	Longacre, F. V. D	do	Multiple Clearance Control.
1587014	do	do	Series Clearance Control.

1591930	Smith, W. A	do	Balanced Anvil Block.
1592845	Goodwillie, J. E	July 20, 1926	Surface Condenser.
1592849	Hansen, C. C	do	Rock Drill Valve.
1592850	do	do	Water Tube.
1592851	do	do	Steel Retainer for Rock Drills.
1592855	Hulshizer, G. W	do	Valve for Rock Drills.
1592856	Jimerson, F. A	do	Pneumatic Hammer Tool.
1592858	Lear, E. B	do	Side Bolt Construction.
1593561	Bayles, L. C	July 27, 1926	Dustless Rock Drill.
1593595	Peters, A. E	do	Double Drum Hoist.
1593606	Slater, F. M	do	Rock Drill.
1593615	Zimmermann, W. F	do	Cooling Device for Pneumatic Tools.
1593629	Hansen, C. C	do	Equalizer for Rock Drills.
1593914	Redfield, S. B	do	Plate Valve.
1594169	Goodwillie, J. E	do	Surface Condenser.
1594172	Hansen, C. C	do	Double Drum Hoist.
1594173	do	do	Do.
1594217	Smith, W. A., Jr	do	Blowing Device.
1594228	Tuttle, G. G	do	Dustless Anvil Block.
1594232	Zimmermann, W. F	do	Exhaust Deflector.
1595011	Taylor, N. E	Aug. 3, 1926	Surface Condenser.
1594920	Bancel, P. A	do	Do.
1594922	Bayles et al	do	Dustless Rock Drill.
1594931	Ditson, J	do	Shank and Bit Punch.
1594944	Hansen, C. C	do	Air Line Lubricator.
1594945	do	do	Double Drum Hoist.
1594959	Huff, L. R	do	Constant Pressure Regulator.
1594964	Jimerson, F. A	do	Reversible Throttle Valve.
1594976	Parsons, F. W	do	Cooler for Air Compressors.
1594986	Longacre, F. V. D	do	Compressor Regulator.
1595004	Haight, H. V	do	Pneumatically Operated Chair for Hoist Cages.
1596252	Hansen, C. C	Aug. 17, 1926	Cushion Handle.
1596269	Jimerson et al	do	Hoist Driving Gear.
1596303	Redfield, S. B	do	Deep Well Displacement Pump.
1597192	Hansen, C. C	Aug. 24, 1926	Rotation Device.
1597245	Prellwitz, Wm	do	Handle for Percussive Tool.
1597248	Rathbun, E	do	Internal Combustion Engine.
1597394	Slater, F. M	do	Rock Drill Valve.
1597412	Lear, E. B	do	Air Feed Control.
1597413	Lee, Gordon	do	Rock Drill.
1597415	Markley, E. H	do	Surface Condenser.
1598426	Ditson, J	Aug. 31, 1926	Shank and Bit Punch.
1598439	Hansen, C. C	do	Submarine Hammer Drill Unit.
1598440	do	do	Oscillating Valve for Rock Drill.
1598472	Zimmermann, W. F	do	Fluid Actuated Percussive Machine.
1598589	Smith, W. A	do	Rock Drill Oiling Device.
1598637	Bayles, L. C	Sept. 7, 1926	Compressor Unloader.
1598645	Hansen, C. C	do	Rotation Mechanism for Rock Drill.
1598649	Kirgan, J. F	do	Steam Condenser.
1598650	Levine, H	do	Shank and Bit Punch.

Patent no.	Patentee	Date	Title
1598652	Peters, A. E	Sept. 7, 1926	Square Piston Engine.
1598654	do	do	Shank and Bit Punch.
1599197	Barnett, W. J	do	Rock Drill.
1599199	Bayles, L. C	do	Shank and Bit Punch.
1599232	Haight, H. V	do	Reversing Switch.
1599281	Longacre, F. V. D	do	Plate Valve.
1599364	Jimerson, F. A	do	Close Quarter Drill.
1599367	Lear, E. B	do	Double Drum Hoist.
1599414	Huff, L. R	Sept. 14, 1926	Compressor Valve.
1599816	Hansen, C. C	do	Rectangular Slide Valve for Rock Drills.
1599823	Lear, E. B	do	Spool Valve.
1600003	Kirgan, J. F	do	Steam Condenser.
1601211	Haight, H. V	Sept. 28, 1926	Compressor Unloader.
1601713	Bayles, L. C	Oct. 5, 1926	Blowing Device.
1602208	Price, Wm. T	do	Fuel Regulator for Injection Type Engines.
1602210	Rathbun, G. J., et al	do	Internal Combustion Engine.
1602901	Hansen, C. C	Oct. 12, 1926	Shank and Bit Punch.
1604011	Zimmermann, W. F	Oct. 19, 1926	Pneumatic Chipping Hammer.
1604043	Hansen, C. C	do	Rock Drill.
1604080	Smickle, R. H	do	Broaching attachment for Rock Drill.
1604081	Smith, W. A	do	Rock Drill.
1604957	Bayles, L. C	Nov. 2, 1926	Rock Drill Shell Oiler.
1604958	do	do	Hammer Type Extractor.
1605148	Smith, W. A	do	Chuck for Rock Drills.
1605157	Bancel, P. A	do	Surface Condenser.
1605434	Hansen, C. C	do	Oiling Device.
1605435	do	do	Steel Retainer.
1605941	do	Nov. 9, 1926	Do.
1605980	Peck, C. H	do	Pneumatic Hammer Back Head.
1605986	Redfield, S. B	do	Removable Crank Counterbalance.
1606823	Bayles, L. C	Nov. 16, 1926	Flat Valve.
1606835	Hansen, C. C	do	Rock Drill Valve.
1606844	Redfield, S. B	do	Locking Device.
1606847	Smith, W. A	do	Blowing Device.
1607531	Haight, H. V	Nov. 2, 1926	Starting Unloader.
1608559	Hansen, C. C	Nov. 30, 1926	Compression Relief Valve.
1608616	Prellwitz, Wm	do	Cushion Valve.
1609117	Hansen, C. C	do	Cushioning Device for Handles.
1609496	Reed, R. M	Dec. 7, 1926	Oiling Device for Bearings.
1609502	Thomas, F. H	do	Fluid Actuated Hammer tool.
1610372	Hansen, C. C	Dec. 14, 1926	Submarine Hammer Drill Unit.
1611027	do	do	Double Drum Hoist.
1611678	Redfield, S. B	Dec. 21, 1926	Sealing Device.
1612638	Metzgar, C. W	Dec. 28, 1926	Dual Pressure Clearance Unloader.
1612639	do	do	Compressor Inter-Cooler Regulator.
1612933	do	Jan. 4, 1927	Compressor Unloader.
1614123	Hansen, C. C	Jan. 11, 1927	Drill Steel Centralizer.
1614124	do	do	Gas Compressor Valve.
1614130	Jimerson, F. A	do	Handle for Pneumatically Operated Tools.
1614138	Longacre, F. V. D	do	Compressor Unloader.
1614143	Metzgar, C. W	do	Do.
1614158	Slater, F. M	do	Hoist.
1614182	Brackett, J. C	do	Coal Cutter.
1614969	Rudlin, F. W	Jan. 18, 1927	Distributing Valve for Rock Drills.
1616146	Smickle, R. H	Feb. 1, 1927	Double Tube Connection.
1616450	Huff, L. R	Feb. 8, 1927	Constant Volume Regulator.
1616470	Smith, W. A	do	Rock Drill.
1616986	Prellwitz, W	do	Balanced Chamber Clearance Unloader.
1616987	do	do	Three Step Clearance Control.
1616988	Redfield, S. B	do	Two Chamber Clearance Unloader.
1616989	do	do	By Pass Clearance Uuloader.
1616990	do	do	Single End Clearance Uhloader.
1616991	do	do	Three Chamber Clearance Unloader.
1617518	Hansen, C. C	Feb. 15, 1927	Rock Drill.
1619098	Bancel, P. A., Kirgan, J. F	Mar. 1, 1927	Pump Controller.
1621250	Hansen, C. C	Mar. 15, 1927	Rock Drill.
1621254	Hulshizer, G. W	do	Valve for Rock Drills.
1621913	Longacre, F. V. D	Mar. 22, 1936	Clearance Unloader.
1622374	Goodwillie, J. E	Mar. 29, 1927	Surface Condenser.
1623411	Hulshizer, G. W	Apr. 5, 1927	Friction Head for Rifle Bars.
1623419	Lee, G	do	Rock Drill.
1623489	Naab, J	do	Compressor Unloader.
1623494	Redfield, S. B	do	Centralized Interlocking Control for Multi-Stage Compressors.
1625654	Hansen, C. C	Apr. 19, 1927	Engine.
1625681	Prellwitz, W	do	Single Chamber Clearance Unloader.

1642113	Kirgan, J. F	do	Surface Condenser.
1643069	Hansen, C. C	Sept. 20, 1927	Air Line Oiler.
1644016	Haight, H. V	Oct. 4, 1927	Pneumatically Controlled Rheostat.
1644026	Mock, J. F	do	Centralizer for Drill Steels.
1644030	Prellwitz, W	do	Handle for Rock Drills.
1645989	Hansen, C. C	Oct. 18, 1927	Mud Guard for Submarine Drills.
1646090	do	do	Broaching Attachment.
1646091	do	do	Steel Retainer.
1646773	Slater, F. M	Oct. 25, 1927	Do.
1647201	Smickle, R. H	Nov. 1, 1927	Broaching Attachment.
1647230	Jimerson, F. A	do	Crank Shaft.
1648886	Allen, R. O	Nov. 15, 1927	Locking Device.
1649076	Prellwitz, W	do	Compressor.
1649651	Bayles, L. C	do	Chuck for Rock Drills.
1649730	Prellwitz, W	do	Spring Handle.
1651066	Morrison, W. A	Nov. 29, 1927	Safety Device for Oil Injection Engines.
1651082	Bayles, L. C., Morrow, H. W	do	Dies for Forging Calking and Yarning Irons.
1653071	Smith, W. A	Dec. 20, 1927	Water and Air Tube Connection.
1653080	Zimmermann, W. F	do	Tie Tamper Piston.
1653110	LeValley, J	do	Free Air Unloader for Compressors.
1653968	Peters, A. E	Dec. 27, 1927	Dolly Retainer.
1655107	Prellwitz, W	Jan. 3, 1928	Air Receiver for Compressors.
1655112	Taylor, N. E	do	Steam Condenser.
1655418	Haight, H. V	Jan. 10, 1928	Back Pressure Valve.
1656540	Smith, W. A	Jan. 17, 1928	Blowing Device.
1656541	do	do	Valve for Rock Drills.
1656546	Tuttle, G. G	do	Mounting for Percussive Tools.
1656707	Hansen, C. C	do	Steel Retainer for Submarine Hammer Drills.
1656708	do	do	Air Line Oiler.
1657165	Lear, E. B	Jan. 24, 1928	Double Drum Hoist.
1657177	Rathbun, G. J	do	Gas Engine Driven Air Compressor.
1657930	Jimerson, F. A	Jan. 31, 1928	Close Quarter Drill.
1658941	Redfield, S. B	Feb. 14, 1928	Lock for Self Packing Pistons.
1658984	Hansen, C. C	do	Air Line Oiler.
1660507	do	Feb. 28, 1928	Broaching Tool.
1660509	Hulshizer, G. W	do	Rock Drill Oscillating Valve.
1660528	Rudlin, F. W	do	Rock Drill.
1662918	Haight, H. V	Mar. 20, 1928	Unloading System.
1663530	Metzgar, C. W	do	Compressor Regulator and Unloader.
1664623	Hansen, C. C	Apr. 3, 1928	Broaching Tool.
1664625	Hulshizer, G. W	do	Rotation Mechanism for Rock Drills.
1665071	Prellwitz, W	do	Steel Retainer.
1665269	Lear, E. B	Apr. 10, 1928	Mounting for Rock Drills.
1665279	Redfield, S. B	do	Multi-Pressure Regulator.
1665496	Hansen, C. C	do	Guide for Broaching Tools.
1665497	do	do	Air Line Oiler.
1666176	Lear, E. B	Apr. 17, 1928	Steel Retainer for Rock Drills.
1666425	Mock, J. F	do	Steel Retainer.
1666427	Smith, W. A., Jr	do	Valve for Rock Drills.
1668559	Hansen, C. C	May 8, 1928	Steel Guide for Submarine Drills.

1696485	Ihrmark, G	do	Air Line Oiler.
1697648	Hansen, C. C	Jan. 1, 1929	Guide for Working Implements.
1697649	do	do	Sand Pipe for Rock Drills.
1698783	Ditson, J	Jan. 15, 1929	Shank and Bit Punch.
1699636	Smith, W. A	Jan. 22, 1929	Adjustable Guide Shell.
1701631	Slater, F. M	Feb. 12, 1929	Locking Device for Steel Retainers.
1702604	Hansen, C. C	Feb. 19, 1929	Lubricator.
1704364	Markley, E. H	Mar. 5, 1929	Tube Cleaning Apparatus.
1704493	Wilhelm, R. H	do	Water Tube Connection.
1707661	Hansen, C. C	Apr. 2, 1929	Air Line Oiler.
1708116	Bayles, L. C., Tuttle, G. G	Apr. 9, 1929	Steel Retainer.
1708173	Hansen, C. C	do	Submarine Drill.
1708606	Haight, H. V	do	Electric Switch.
1711811	Rudlin, F. W	May 7, 1929	Valve for Rock Drills.
1712229	Peters, A. E	do	Air Line Oiler.
1712239	Wilhelm, R. H	do	Front Head for Rock Drills.
1712277	McIntyre, J. K	do	Thrust Bearing.
1712436	Jimerson, F. A	do	Percussive Tool.
1712437	do	do	Locking Device for Handles.
1713534	Kirgan, J. F	May 21, 1929	Surface Condenser.
1713545	Miller, R	do	Starting and Stopping Apparatus for Internal Combustion Engines.
1713784	Slater, F. M	do	Pneumatic Tool.
1713859	Wilhelm, R. H	do	Rock Drill.
1713967	Kirgan, J. F	do	Surface Condenser.
1714051	Slater, F. M	do	Fluid Actuated Percussive Tool.
1715359	Hansen, C. C	June 4, 1929	Chuck Mechanism for Rock Drills.
1715675	Perers, A. E	do	Air Line Oiler.
1716443	Hulshizer, G. W	June 11, 1929	Chuck for Rock Drills.
1716469	Smith, W. A	do	Penumatic Tool.
1716533	Redfield, S. B	do	Air or Gas Compressing System.
1717818	Thomas, F. H	June 18, 1929	Pneumatic Tool.
1718070	Peters, A. E	do	Engine.
1718466	Kirgan, J. F	June 25, 1929	Surface Condenser.
1719143	Slater, F. M	July 2, 1929	Percussive Tool.
1719155	Wilhelm, R. H	do	Water Tube Connection.
1719183	Kirgan, J. F	do	Surface Condenser.
1719468	Hansen, C. C	do	Guide for Drill Steels.
1719998	Prellwitz, W	July 9, 1929	Compressor.
1720435	Peters, A. E., and Ditson, J	do	Shank and Bit Punch.
1721279	Peck, C. H	July 16, 1929	Squeeze Riveter.
1721674	Smith, W. A	July 23, 1929	Blowing Device.
1723730	Haight, H. V	Aug. 6, 1929	Foot Control for Shank and Bit Punches.
1724138	Kirgan, J. F	Aug. 13, 1929	Surface Condenser.
1724737	Smith, W. A., Jr	do	Valve Mechanism for Rock Drills.

1730013	Rathbun, G. J	do	Governor for Internal Combustion Engines.
1732887	Hansen, C. C	Oct. 22, 1929	Mud Guard for Submarine Drills.
1734984	Smith, W. A., Sr., Smith, W. A., Jr.	Nov. 12, 1929	Valve for Rock Drills.
1734985	Smith, W. A., Jr	do	Do.
1735354	do	Nov. 26, 1929	Blowing Device for Rock Drills.
1737312	Jimerson, F. A	do	Valve for Pnuematic Tools.
1738050	Hansen, C. C	Dec. 3, 1929	Quenching Device for Drill Steels.
1739000	Jordso, Jr., A	Dec. 10, 1929	Pumping Unit.
1739117	Bayles, L. C	do	Water Tube for Rock Drills.
1739141	Hansen, C. C	do	Liquid Feeding Device for Rock Drills.
1739143	Hulshizer, G. W	do	Valve for Rock Drills.
1740122	Slater, F. M	Dec. 17, 1929	Rock Drill.
1740259	Morrison, W. A	do	Safety Device for Oil Injection Engines.
1742725	Peters, A. E	Jan. 7, 1930	Engine.
1742765	Hansen, C. C	do	Guide for Broaching Tools.
1743090	Bayles, L. C	Jan. 14, 1930	Air Feed Controlling Device.
1743806	Buckley, E. L., McAllister, R.	do	Compressor Regulating Apparatus.
1744964	Hansen, C. C	Jan. 28, 1930	Retracting Device for Rock Drills.
1744971	Kirgan, J	do	Pump Seal.
1745142	Bancel, P. A	do	Surface Condenser.
1745166	Hansen, C. C	do	Chuck Mechanism for Rock Drills.
1747164	Ditson, J., Peters, A. E	Feb. 18, 1930	Air Return Dolly.
1747869	Hansen, C. C	do	Mounting for Rock Drills.
1747876	Metzgar, C. W	do	Muffler.
1747878	Parkhill, M. S	do	Water Connection.
1747888	Cousins, G. T	do	Forging Mechanism.
1748145	Rathburn, G. J	Feb. 25, 1930	Internal Combustion Engine.
1748639	Ditson, J	do	Shank and Bit Punch.
1749141	Kirgan, J	Mar. 4, 1930	Steam Condenser.
1749439	Neafie, A. J	do	Fastener Holding Device.
1750070	Tuttle, G. G	Mar. 11, 1930	Air Line Oiler.
1750276	McAllister, R. C	do	Compressor Unloader.
1750323	Lear, E. B	do	Valve for Rock Drills.
1750340	Zimmermann, W. F	do	Locking Device.
1751230	Briggs, A. J	Mar. 18, 1930	Compressor Valve.
1751714	Peters, A. E	Mar. 25, 1930	Air Line Oiler.
1753007	Hansen, C. C	Apr. 1, 1930	Drill Feeding Device.
1753034	Thomas, F. H	do	Steel Retainer.
1753039	Armstrong, L. V. H	do	Steering Gear.
1754331	Metzgar, C. W	Apr. 15, 1930	Dual Pressure Unloader.
1755702	Murphy, T. L	Apr. 22, 1930	Valve Mechanism for Rock Drills.
1756466	Mack, A. R	Apr. 29, 1930	Valve for Rock Drills.
1757082	Haight, H. V	May 6, 1930	Piston Rod.
1757084	Hansen, C. C	do	Air Line Oiler.
1757576	Kirgan, J	do	Centrifugal Pump.
1758316	Hansen, C. C	May 13, 1930	Portable Universal Drill Mounting.
1758492	Bayles, L. C	do	Blowing Device for Rock Drills.
1758493	do	do	Bit Punch.
1758538	Redfield, S. B	do	Water Cooling Device for Compressors.
1758921	Bayles, L. C	May 20, 1930	Valve for Pneumatic-Displacement Pumps.
1759562	Allen, R. O	do	Implement Retainer for Pneumatic Tools.
1759573	Hansen, C. C	do	Driving Device for Pipes.
1760985	Jimerson, F. A	June 3, 1930	Spring Handle for Percussive Tools.
1761134	Lear, E. B	do	Valve for Rock Drills.
1761578	Metzgar, C. W	do	Starting Device for Compressors.
1762178	Lear, E. B	June 10, 1930	Air Feed Controlling Device.
1763683	Bayles, L. C	June 17, 1930	Oiling Device.
1763701	Hansen, C. C	do	Feeding Device for Rock Drills.
1764259	do	do	Portable Pumping Unit.
1769921	do	July 8, 1930	Centralizer for Drill Steels.
1770142	Miller, R	do	Oil Scraper.
1770676	Smith, W. A., Jr	July 15, 1930	Valve Mechanism for Rock Drills.
1770680	Tuttle, G. G	do	Steel Retainer.
1770746	Bayles, L. C	do	Shank and Bit Punch.
1770873	do	do	Do.
1771181	Lear, E. B	July 22, 1930	Valve for Rock Drills.
1771712	Jimerson, F. A	July 29, 1930	Spike Extractor.
1771868	Wilhelm, R. H	do	Valve for Rock Drills.
1773366	Lear, E. B	Aug. 19, 1930	Rotation Mechanism for Rock Drills.
1773803	Bancel, P. A	Aug. 26, 1930	Condensate Reheater.
1774570	Smith, W. A., Sr	Sept. 2, 1930	Feeding Device for Rock Drills.
1774571	Smith, W. A., Jr	do	Valve for Rock Drills.
1774572	do	do	Do.
1774884	Hansen, C. C	do	Drive Head for Driving Pipes.
1775917	Rudlin, F. W	Sept. 16, 1930	Driving Device.
1776273	Smith, W. A., Jr	Sept. 23, 1930	Valve Mechanism for Rock Drills.

Chronological index—Continued

Patent no.	Patentee	Date	Title
1776509	Hulshizer, G. W.	Sept. 23, 1930	Rotation Mechanism for Rock Drills.
1776521	Smith, W. A., Sr., and Smith, W. A., Jr.	do	Pile Driver Attachment for Rock Drills.
1776594	Mock, J. F.	do	Centralizer for Drill Steels.
1776604	Smith, W. A., Sr., and Curtis, J. C.	do	Rock Drill Blowing Device.
1777280	Bancel, P. A., and Kirgan, J. F.	Oct. 7, 1930	Steam Condensing Apparatus.
1777305	Hansen, C. C.	do	Cushioning Device for Rock Drills.
1777306	Hart, D. W.	do	Shank and Bit Punch.
1777324	Mock, J. F.	do	Locking Device for Throttle Valves.
1777334	Smith, W. A., Jr.	do	Valve for Rock Drills.
1777335	do	do	Do.
1777336	do	do	Do.
1777340	Wallden, O. K. A.	do	Oiling Device.
1777775	Smith, W. A., Jr.	do	Valve Mechanism for Rock Drills.
1778320	Hansen, C. C.	Oct. 14, 1930	Locating Device for Submarine Drills.
1779251	Redfield, S. B.	Oct. 21, 1930	Motor Driven Timing Device for Well Pumps.
1779252	Simmons, C. W.	do	Control Mechanism for Pressure Fluid Supply Lines.
1779645	Smith, W. A., Sr., Hulshizer, J. I., and Fuehrer, G. H.	Oct. 28, 1930	Percussive Tool.
1780524	Huff, L. R.	Nov. 4, 1930	Plate Valve.
1780538	Redfield, S. B., Naab, J.	do	Accumulator Timing Element for Pressure Fluid Supply Valves.
1780725	Smith, W. A., Sr., Smith, W. A., Jr.	do	Valve Mechanism for Rock Drills.
1781021	Lear, E. B.	Nov. 11, 1930	Valve for Rock Drills.
1781032	Redfield, S. B.	do	Connection for Drill Rods.
1782102	Smith, W. A., Jr.	Nov. 18, 1930	Valve for Rock Drills.
1783290	Hulshizer, G. W.	Dec. 2, 1930	Anchor for Drilling Mechanism.
1783787	Hansen, C. C.	do	Excavating Machine.
1783829	Curtis, J. C.	do	Valve for Rock Drills.
1784009	Huff, L. R.	Dec. 9, 1930	Constant Volume Regulator.
1784012	Jowett, J. H.	do	Front Head for Pneumatic Tools.
1785344	Hansen, C. C.	Dec. 16, 1930	Charging Device.
1785550	do	do	Hose Clamp.
1786135	Smith, W. A., Sr.	Dec. 23, 1930	Feeding Device for Percussive Motors.
1786175	Smith, W. A., Sr., Hulshizer, J. I.	do	Do.
1787229	Zimmermann, W. F.	Dec. 30, 1930	Tool Retainer for Pneumatic Tools.
1787960	Slater, F. M.	Jan. 6, 1931	Pneumatic Tool.
1788032	Rathbun, G. J.	do	Safety Overspeed Governor.
1788033	Slater, F. M.	do	Air Line Oiler.
1788034	Smith, W. A., Sr.	do	Feeding Device.
1788524	Jimerson, F. A.	Jan. 13, 1931	Engine.
1788972	Bayles, L. C.	do	Chuck Bushing for Block Drills.
1789101	Hansen, C. C.	do	Wearing Block for Steel Retainers.
1789117	Smith, W. A.	do	Rock Drill.
1789118	Smith, W. A., Jr.	do	Valve for Rock Drills.
1789698	Curtis, J. C.	Jan. 20, 1931	Do.
1789816	Hansen, C. C.	do	Charging Device.
1789859	Bayles, L. C.	do	Centralizer for Drill Steels.
1791028	Huff, L. R.	Feb. 3, 1931	Hydraulic Speed Governor.
1791034	Lear, E. B.	do	Blower Valve for Rock Drills.
1791036	Murphy, T. L.	do	Valve Chest for Rock Drills.
1791974	Prellwitz, W., Wilhelm, R. H.	Feb. 10, 1931	Drill Feeding device.
1792060	Bancel, P. A.	do	Surface Condenser.
1792221	Hansen, C. C.	do	Hose Clamp.
1792881	Williams, P. A.	Feb. 17, 1931	Blowing Device.
1793000	Metzgar, C. W.	do	Inlet Unloader Valve.
1793119	Moore, R. P.	do	Condensing Apparatus.
1794135	Bancel, P. A.	Feb. 24, 1931	Condenser.
1795306	Jimerson, F. A.	Mar. 10, 1931	Implement Retainer.
1796457	Hansen, C. C.	Mar. 17, 1931	Water Head for Rock Drills.
1796784	do	do	Locating Device for Drill Mountings.
1796796	LeValley, J.	do	Compressor Unloader.
1797688	do	Mar. 24, 1931	Cooling Water Regulator.
1798257	Hansen, C. C.	Mar. 31, 1931	Front Head for Rock Drills.
1798746	Markley, E. H.	do	Packing Ring Retainer.
1798748	Murphy, T. L.	do	Blowing Device for Fluid Actuated Tools.
1799762	Rathbun, G. J.	Apr. 7, 1931	Pipe Coupling.
1800231	Slater, F. M.	Apr. 14, 1931	Locking Device for Throttle Valves.
1800242	Baker, C. S.	do	Compressor Valve Lifter.
1800998	Hansen, C. C.	do	Drill Steel Coupling.
1802983	Prellwitz, W.	Apr. 28, 1931	Drill Steel Retainer.
1802987	Shook, J. F.	do	Rock Drill.
1804584	Bancel, P. A.	May 12, 1931	Condenser.
1804892	Parsons, F. W.	do	Clearance Valve Assembly.
1805521	Hansen, C. C.	May 19, 1931	Feeding Device for Rock Drills.
1805670	Miller, R.	do	Internal Combustion Engine.

Patent no.	Patentee	Date	Title
1805695	Hansen, C. C	May 19, 1931	Valve for Rock Drills.
1806301	LeValley, J	do	Pressure Controlled Valve.
1806315	Smith, W. A., Sr	do	Chuck for Rock Drills.
1806799	Hansen, C. C	May 26, 1931	Steel Retainer.
1807787	Jimerson, F. A	June 2, 1931	Fluid Actuated Percussive Tool.
1807799	Slater, F. M	do	Steel Retainer.
1807800	Smith, W. A., Sr., Smith, W. A., Jr.	do	Valve for Rock Drills.
1808452	Cousins, G. T	do	Holding Device.
1808481	Slater, F. M	do	Pneumatic Tool.
1808482	Smith, W. A., Jr	do	Valve Mechanism for Rock Drills.
1809141	Mock, J. F	June 9, 1931	Handle for Rock Drills.
1810988	Slater, F. M	June 23, 1931	Valve Mechanism for Rock Drills.
1811626	Hansen, C. C	do	Pile Driver Attachment for Rock Drills.
1811850	Huff, L. R	June 30, 1931	Centrifugal Hydraulic Speed Governor.
1812304	Peters, A. E	do	Drill Sharpener.
1812309	Sherzer, A. F	do	Centrifugal Pump.
1813747	Kirgan, J	July 7, 1931	Do.
1813754	Metzgar, C. W	do	Heat Exchanger.
1813773	Smith, W. A., Jr	do	Valve for Rock Drills.
1813774	Smith, W. A., Jr., Fuehrer, G. H.	do	Blowing Device for Rock Drills.
1814516	Larson, C	July 14, 1931	Dolly for Drill Sharpeners.
1814858	Rutter, J. A	do	Locking Device for Bolts.
1815166	Smith, W. A., Jr	July 21, 1931	Valve for Rock Drills.
1816324	Hansen, C. C	July 28, 1931	Cleansing Device for Rock Drills.
1816481	do	do	Drilling Apparatus.
1817188	Haight, H. V	Aug. 4, 1931	Bolt and Locking Sleeve.
1817308	Hansen, C. C	do	Steel Support for Rock Drills.
1818393	do	Aug. 11, 1931	Feeding Device for Rock Drills.
1820727	Bayles, L. C	Aug. 25, 1931	Drill Column.
1821677	Smith, W. A	Sept. 1, 1931	Protective Device.
1822092	Hansen, C. C	Sept. 8, 1931	Oiling Device.
1822100	Lear, E. B	do	Air Line Oiler.
1822115	Shepherd, B. F	do	Chucukor Rock Drills.
1823446	Hansen, C. C	Sept. 15, 1931	Mounting for Rock Drills.
1823455	Kirgan, J	do	Centrifugal Pump.
1827195	Hansen, C. C	Oct. 13, 1931	Clamp.
1827725	Baker, C. S	Oct. 20, 1931	Clearance Valve Assembly.
1828185	Hansen, C. C	do	Air Line Oiler.
1828206	Simmons, C. W	do	Device for Pressure Fluid Control Valves.
1828491	Curtis, J. C	do	Valve for Rock Drills.
1828862	Hansen, C. C	Oct. 27, 1931	Chuck for Broaching Steel.
1829245	Smith, W. A., Jr	do	Blowing Device for Rock Drills.
1829246	Smith, W. A., Sr., Smith, W. A., Jr.	do	Percussive Tool.
1830185	Bancel, P. A	Nov. 3, 1931	Condenser.
1831445	Hansen, C. C	Nov. 10, 1931	Shell for Rock Drills.
1831446	do	do	Feeding Device for Rock Drills.
1831454	Kirgan, J	do	Condenser.
1831601	LeValley, J	do	Valve Mechanism.
1831961	Lemp, H	Nov. 17, 1931	Thermostatic Control for Radiator Fan Motors.
1832630	Hansen, C. C	do	Motor Drive.
1832637	Kirgan, J	do	Condenser.
1832811	Jowett, J. H	do	Handle for Ballast Tampers.
1833611	Kirgan, J	Nov. 24, 1931	By-Pass Condenser.
1834953	do	Dec. 8, 1931	Condensing System.
1835066	Lear, E. B	do	Piston for Rock Drills.
1835662	McAllister, R. C	do	Floating Plunger.
1835675	Smith, W. A., Sr., Smith, W. A., Jr.	do	Feeding Device.
1836688	Smith, W. A., Jr	Dec. 15, 1931	Valve for Rock Drills.
1836715	Hulshizer, G. W	do	Water Tube Connection.
1836929	Metzgar, C. W	do	Drain Valve for Coolers.
1837735	Terry, E. F	Dec. 22, 1931	Valve for Rock Drills.
1838419	Lemp, H	Dec. 29, 1931	Speed Control Apparatus for Locomotives.
1838459	Smith, W. A., Sr., Thomas, F. H.	do	Feeding Device.
1842026	Hulshizer, G. W	Jan. 19, 1932	Clamp.
1843958	Smith, W. A., Jr	Feb. 9, 1932	Valve for Rock Drills.
1844873	Smith, W. A., Sr	do	Feeding Device for Rock Drills.
1844874	Smith, W. A., Sr., Fuehrer, G. H.	do	Feeding Device for Percussive Motors.
1846372	Thomas, F. H	Feb. 23, 1932	Pneumatic Tool.
1846804	Hansen, C. C	do	Fluid Actuated Percussive Tool.
1846817	Smith, W. A., Jr	do	Rotation Mechanism for Rock Drills.
1846818	do	do	Valve for Rock Drills.
1846819	do	do	Rock Drill.
1846828	Baker, C. S	do	Cooling Device.
1846832	Bayles, L. C	do	Control Valve.
1846837	Burdette, C. E	do	Vented Motor Casing.
1850690	Redfield, S. B	Mar. 22, 1932	Retaining Device for Plate Valves.

1879370	McAllister, R. C	do	Compressor Cylinder.
1880338	Benson, I. N	Oct. 4, 1932	Carriage for Spike Drivers.
1880623	Williams, P. A	do	Broaching Tool.
1881258	Bayles, L. C	do	Percussive Tool.
1881274	Hart, D. W	do	Locating Device.
1885516	Bancel, P. A	Nov. 8, 1932	Condenser.
1888333	Terry, E. F	Nov. 22, 1932	Handle for Rock Drills.
1889409	Lear, E. B	Nov. 29, 1932	Safety Device for Rock Drills.
1889422	Shook, J. F	do	Dustless Rock Drill.
1889423	Smith, W. A., Sr	do	Valve for Rock Drills.
1890914	Parsons, F. W., Sr	Dec. 13, 1932	Engine.
1891936	Lemp, H	Dec. 27, 1932	Controlling Device for Locomotives.
1891953	Sellars, O. H	do	Guide for Drill Steels.
1893203	Hansen, C. C	Jan. 3, 1933	Percussive Drill Unit.
1893209	Parkhill, M. S	do	Valve Cage.
1894799	Smith, W. A., Jr	Jan. 17, 1933	Distributing Valve.
1894801	Terry, E. F	do	Water Connection.
1896621	Hentzell, A. A	Feb. 7, 1933	Forging Mechanism.
1896633	Lemp, H	do	Speed Control Apparatus for Locomotives.
1897595	Terry, E. F	Feb. 14, 1933	Valve for Rock Drills.
1898639	Mosher, W. H	Feb. 21, 1933	Rock Drill.
1898645	Slater, F. M	do	Air Feed Mounting for Rock Drills.
1898655	Hulshizer, G. W	do	Valve for Rock Drills.
1898909	do	Feb. 28, 1933	Feeding Device for Rock Drills.
1899002	LeValley, J	do	Unloader for Compressors.
1900504	Kirgan, J	Mar. 7, 1933	Condensing Apparatus.
1900924	Firth, R. V. D	Mar. 14, 1933	Oiling Device for Bearings.
1902038	McAllister, R. C	Mar. 21, 1933	Connecter.
1902065	Frelin, F	do	Pump.
1902530	Terry, E. F	do	Handle for Rock Drills.
1902536	Bayles, L. C	do	Blowing Device for Rock Drills.
1902562	Lear, E. B	do	Blowing Device for Pneumatic Tools.
1904062	Prellwitz, W	Apr. 18, 1933	Portable Compressor.
1904875	Metzgar, C. W	do	Heat Exchanger.

HERCULES POWDER CO., INC.,
Wilmington, Del., November 29, 1935.

WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
House of Representatives.

DEAR SIR: Your letter dated November 6, 1935, directed to Mr. R. H. Dunham, president of Hercules Powder Co., has been handed to us for reply.

The information which is requested, and which you list in items numbered 1 to 12, inclusive, in your communication dated November 6, 1935, is sent herewith. We refer below to each item by the number given in your said letter.

1. A list of all of the patents owned by Hercules Powder Co., as of November 12, 1935, is sent herewith, marked "No. 1." We also attach another list marked "No. 1–A" which includes the patents now being used by Hercules Powder Co. through cross-license agreements, or otherwise. Hercules Powder Co. is not using any patents through a pooling agreement, and has not made no pooling agreements of any kind with anyone.

2. Some of our patents are now used by us at the present time, for the reason that we can find no use for such patents.

3. We send herewith a copy of the certificate of incorporation of Hercules Powder Co., with all amendments to date, and we also forward a copy of the bylaws of Hercules Powder Co.

4. Photostat copies of all cross-license agreements which Hercules Powder Co. has made are sent herewith, these papers being marked "No. 4".

Digitized by Google

5. The photostat copies of cross-licenses under no. 4 above are the only forms of cross-licensing agreements made between Hercules Powder Co. and others to date.

6. The information called for in your question 6 is supplied by the list sent herewith marked "No. 6". The estimated value of the patents at the date of purchase, and at the present time, is not given because we have no means of placing an estimate thereon.

7. Our answer to your question 7 is "No."

8. The questions asked in item no. 8 are answered in the paper sent herewith marked "No. 8."

9. The list sent herewith marked "No. 9" supplies the information called for by question 9, except that relative to the valuation of existing patents which, as above stated, we are unable to give as we have no means of valuing the patents.

10. As above stated, we have no patent pool, and have made no patent pooling agreement with anyone.

11. As above stated, we have no patent pool.

12. We have no suggestions to offer.

Kindly acknowledge receipt of the enclosed papers. We regret the delay in furnishing the above, but it was unavoidable in view of the amount of work involved.

Very truly yours,

JOHN A. GRAVES,
Assistant General Counsel.

No. 1.—*Complete list of all patents owned by Hercules Powder Co.*

Patent no.	Date of issue	Title
1289016	Dec. 24, 1918	Process of Producing Sodium Sulfid.
1293515	Feb. 4, 1919	Process of Recovering Solvent from Colloided Nitrocellulose.
1295262	Feb. 25, 1919	Process of Producing Ammonia from Alkali Cyanid.
1295293	-----do-----	Process of Producing Ammonia from Alkali Ferrocyanid.
1296647	Mar. 11, 1919	Cutting Off Machine for Taffy or the Like.
1297524	Mar. 18, 1919	Process of Purifying Nitro-Aromatic Compounds.
1301105	Apr. 22, 1919	Explosive and Process of Producing the Same.
1307032	June 17, 1919	Nitroglycols.
1307033	-----do-----	Do.
1307034	-----do-----	Do.
1309623	July 15, 1919	Catalyzer.
1311158	July 29, 1919	Process of Concentrating Acetic Anhydrid.
1312842	Aug. 12, 1919	Process of Making Cyanogen Compounds.
1332195	Mar. 2, 1920	Process for Producing Nitric Acid.
1339242	May 4, 1920	Process of Making Manganates.
1343317	June 15, 1920	Process of Stabilizing Nitrostarch.
1347158	July 20, 1920	Process of Oxidizing Ammonia to Nitric Acid.
1347159	-----do-----	Do.
1347160	-----do-----	Process of Catalytically Combining Gases.
1367608	Feb. 8, 1921	Explosive Powder.
1404687	Jan. 24, 1922	Primary Detonating Compositions.
1406565	Mar. 7, 1922	High Liquid Pressure Detonator.
1428011	Sept. 5, 1922	Process of Increasing the Sensitiveness and Power of Explosive Compositions and Products Thereof.
1437223	Nov. 28, 1922	Pocket Magneto.
1444594	Feb. 6, 1923	Process of Impregnating Plant Tissues with Ammonium Nitrate for Explosive Purposes.
1447248	Mar. 6, 1923	Smokeless Powder Dynamite.
1458925	June 19, 1923	Detonator.
1460708	July 3, 1923	Processes of Manufacturing Diazodinitrophenol.
1463864	Aug. 7, 1923	Process of Making Storage Battery Elements.
1466147	Aug. 28, 1923	Explosive.
1472791	Nov. 6, 1923	Processes for the Manufacture of Ammonium Picrimate.
1478588	Dec. 25, 1923	Explosive.
1480795	Jan. 15, 1924	Blasting Cap.
1503956	Aug. 5, 1924	Explosive and Process of Making Same.
1505438	Aug. 19, 1924	Process of Extracting Turpentine and Rosin from Resinous Wood.
1509935	Sept. 30, 1924	Explosive and Process of Its Manufacture.
1520093	Dec. 23, 1924	Process of Making Sulphuric Acid.
1523802	Jan. 20, 1925	Process of Restoring Used Decolorizing and Clarifying Agents.
1568324	Jan. 5, 1926	Process of Manufacture Adhesive Blends of Sodium Nitrate and Ammonium Nitrate for Explosive Purposes.
1575894	Mar. 9, 1926	Machine for Making Paper Shells.
1605004	Nov. 2, 1926	Process for Manufacture of Oleum.
1608006	Nov. 23, 1926	Process of Absorbing Sulphur Trioxide from Gases Containing Same.
1613334	Jan. 4, 1927	Granular Ammonium Nitrate and Process of Making Same.
1613335	-----do-----	Ammonium Nitrate Explosive.
1625491	Apr. 19, 1927	Transportable Dynamite Magazine.
1626362	Apr. 26, 1927	Oxidized Pine Oil for Pigments.

No. 1.—*Complete list of all patents owned by Hercules Powder Co.*—Continued

Patent no.	Date of issue	Title
1650186	Nov. 22, 1927	Explosive.
1650689	Nov. 29, 1927	Method of Removing Diphenylamine from Smokeless Powder.
1653008	Dec. 20, 1927	Nitrocellulose Lacquer and Process of Making Same.
1653009	....do....	Pine Oil Product and Process of Making Same.
1653010	....do....	Nitrocellulose Lacquer.
1653023	....do....	Process of Making Nitric Acid.
1653519	....do....	Method of Obtaining Nitrocellulose from Smokeless Powder.
1661278	Mar. 6, 1928	Method of Preparing Progressive Burning Smokeless Powder.
1663277	Mar. 20, 1928	Apparatus for Harvesting Stumps.
1665834	Apr. 10, 1928	Mechanism for Cutting Paper Shell Blanks from Continuous Rolls of Paper.
1667083	Apr. 24, 1928	Gelatin-Dynamite Explosive.
1671792	May 29, 1928	Method of Impregnating Absorptive Material for Use in Explosive.
1671793	....do....	Blasting Explosive.
1681181	Aug. 21, 1928	Method and Apparatus for Packing Cartridges.
1682280	Aug. 28, 1928	Process of Preparing Alkyl Esters of Abietic Acid.
1685344	Sept. 25, 1928	Machine for Securing Bridge Wires to Lead Wires of Electric Blasting Caps.
1685382	....do....	Method of Bridging the Connecting Wires of Electric Blasting Caps.
1691065	Nov. 13, 1928	Process of Making Dipolymer.
1691066	....do....	Dehydration Products of Pine Oil and Process of Producing Same.
1691067	....do....	Process of Making Dipolymer.
1691068	....do....	Do.
1691069	....do....	Do.
1691573	....do....	Do.
1694179	Dec. 4, 1928	Process of Refining Wood Rosin.
1696337	Dec. 25, 1928	Method of Producing Abietic Acid Esters of Polyglycerol.
1696696	....do....	Process of Extracting Rosin and Turpentine from Wood.
1697530	Jan. 1, 1929	Method of Producing Glycol Esters of Abietic Acid.
1706517	Mar. 26, 1929	Blasting Explosive.
1715083	May 28, 1929	Method of Refining Rosin.
1715084	....do....	Process of Recovering High-Grade Wood Rosin.
1715085	....do....	High-Grade Wood Rosin.
1715086	....do....	Method of Refining Rosin.
1715087	....do....	Do.
1715088	....do....	Do.
1719431	July 2, 1929	Process of Refining Wood Rosin.
1722765	July 30, 1929	Process of Recovering Terpene Products from Gasoline Terpene Mixtures.
1737763	Dec. 3, 1929	Process of Refining Wood Rosin.
1737775	....do....	Method of Reclaiming Rubber from Scrap.
1738595	Dec. 10, 1929	Method for Firing Explosives.
1741146	Dec. 31, 1929	Explosive.
1743403	Jan. 14, 1930	Method for the Separation of Alpha Terpineol from Pine Oil.
1746532	Feb. 11, 1930	Method of Producing Cymene.
1746895	....do....	Lacquer.
1749482	Mar. 4, 1930	Method of Producing Alkyl Esters of Abietic Acid.
1749483	....do....	Do.
1753860	Apr. 8, 1930	Apparatus for Producing Canals or the Like.
1759565	May 20, 1930	Charge for Blasting Caps.
1771044	July 22, 1930	Method of Producing Resin Esters.
1772546	Aug. 12, 1930	Method of Separating Certain Components from Pine Oil.
1772895	....do....	Process of Producing a Turpentine Substitute from Pine Oil.
1776089	Sept. 16, 1930	Apparatus for Pulling Stumps.
1776857	Sept. 30, 1930	Rubber Composition.
1777704	Oct. 7, 1930	Method of Separating Anethol from Pine Oil.
1777710	....do....	Method for Producing Low-Density Pulp.
1779710	Oct. 28, 1930	Diethylene Glycol Esters of Abietic Acid and Method of Producing the Same.
1779825	....do....	Manufacture of Nitrostarch.
1780962	Nov. 11, 1930	Viscosimeter.
1782401	Nov. 25, 1930	Method of Producing Rosin Oil.
1788438	Jan. 13, 1931	Smokeless Powder.
1791558	Feb. 10, 1931	Method of Treating Rosin.
1793220	Feb. 17, 1931	Drying Oil and Method of Producing the Same.
1793807	Feb. 24, 1931	Viscosimeter.
1795440	Mar. 10, 1931	Blasting Cap.
1800834	Apr. 14, 1931	Method of Refining Rosin.
1800862	....do....	Method of Separating Secondary Alcohols from Pine Oil.
1800954	....do....	Blasting Cap.
1805883	May 19, 1931	Method of Producing Building Board.
1806973	May 26, 1931	Method of Producing High-Grade Rosin.
1811663	June 23, 1931	Method of Producing Explosives.
1816146	July 28, 1931	Solubilized Nitrocellulose.
1817561	Aug. 4, 1931	Lacquer.
1818733	Aug. 11, 1931	Method for the Digestion of Nitrocellulose.
1820265	Aug. 25, 1931	Ester Gum and Method of Producing.
1820298	....do....	Process for Purifying Rosin.
1824020	Sept. 22, 1931	Method of Producing Resin Esters.
1828788	Oct. 27, 1931	Explosives.
1832853	Nov. 24, 1931	Method and Apparatus for Denitrating Acid Mixtures and Concentrating Acid Mixtures.
1832864	....do....	Method of Removing Color Bodies from Rosin.
1833454	....do....	Method for Producing Explosive.
1835063	Dec. 8, 1931	Process of Refining Rosin.
1835753	....do....	Blasting Cap.

No. 1.—*Complete list of all patents owned by Hercules Powder Co.*—Continued

Patent no.	Date of issue	Title
1839529	Jan. 5, 1932	Quick Drying Lacquer.
1840395	Jan. 12, 1932	Method for Producing Resin Acid Esters.
1840431	----do----	Charge for High Explosive Shells.
1840969	----do----	Impregnating Compound.
1843284	Feb. 2, 1932	Resin Acid Ester and Method of Producing.
1844862	----do----	Method of Producing Hydrated Metal Nitrates.
1847520	Mar. 1, 1932	Method of Loading High Explosive Shells.
1849537	Mar. 15, 1932	Method of Purifying Rosin.
1850224	Mar. 22, 1932	Composition of Matter.
1850225	----do----	Do.
1850983	----do----	Method of Producing Fenchone.
1852041	Apr. 5, 1932	Method of Purifying Nitrated Polyhydric Alcohols.
1852054	----do----	Percussion Cap.
1852244	----do----	Method of Producing Rosin Oils.
1852245	----do----	Method of Refining Rosin.
1854165	Apr. 12, 1932	Method of Refining Turpentine.
1855464	Apr. 26, 1932	Method of Producing Fermentable Sugars and Alcohol from Wood.
1856103	May 3, 1932	Blasting Cap.
1856453	----do----	Method of Treating Fibrous Material.
1876454	Sept. 6, 1932	Method of Producing Fenchone.
1877179	Sept. 13, 1932	Hydrogenated Resin Esters and Method of Producing.
1882298	Oct. 11, 1932	Safety Glass.
1886586	Nov. 8, 1932	Drying Oil.
1886587	----do----	Method of Preparing Xanthates of Terpene Alcohols.
1887097	----do----	Method of Refining Rosin.
1887122	----do----	Connector for Cordeau Bickford.
1887157	----do----	Method of Refining Rosin.
1887171	----do----	Crystalline Fenchyl Alcohol and Method of Separating the Same from Pine Oil.
1887290	----do----	Blasting Cap.
1888025	Nov. 15, 1932	Method of Extracting Resinous Material from Plant Tissue.
1888581	Nov. 22, 1932	Process of Recovering Rosin from Rosin-Containing Soap Produced in the Manufacture of Paper Pulp from Rosin-Containing Wood.
1890086	Dec. 6, 1932	Method of Refining Rosin.
1890112	----do----	Igniter Charge for Blasting Caps.
1890128	----do----	Floor Covering.
1893802	Jan. 10, 1933	Method of Producing Para-Cymene.
1894975	Jan. 24, 1933	Method of Refining Rosin.
1895144	----do----	Explosive.
1895488	Jan. 31, 1933	Blasting Cap.
1895492	----do----	Method and Apparatus for Concentrating Nitric Acid.
1896793	Feb. 7, 1933	Method of Separating Terpene Compounds from Gasoline Used for Extracting Rosin from Wood.
1897379	Feb. 14, 1933	Method of Refining Rosin.
1901469	Mar. 14, 1933	Blasting Cap.
1901561	----do----	Method of Dehydrating Nitrocellulose and the Product Thereof.
1901626	----do----	Method of Refining Rosin.
1901680	----do----	Method of Hydrogenating Abietic Acid Ester.
1903302	Apr. 14, 1933	Package for Blasting Caps.
1905173	Apr. 25, 1933	Method of Refining Rosin.
1908500	May 9, 1933	Method of Purifying Nitrated Cellulose.
1908569	----do----	Impregnated Material and Method of Impregnation.
1908754	May 16, 1933	Method of Refining Rosin.
1908857	----do----	Nitrostarch and Method of Producing.
1910487	May 23, 1933	Blasting Caps.
1910564	----do----	Drying Oils and Method of Producing the Same.
1910799	----do----	Core Oil.
1910807	----do----	Method of Producing Hydrated Nitrate Double Salt.
1911201	May 30, 1933	Apparatus for the Digestion of Nitrocellulose.
1912399	June 6, 1933	Method of Purifying Aliphatic Organic Nitrates.
1912423	----do----	Blasting Cap.
1915388	June 27 1933	Method of Separating Borneol from Pine Oil.
1922123	June 15, 1933	Inulin Nitrate and Method of Producing.
1924342	Aug. 29, 1933	Delay Cap.
1924912	----do----	Explosive.
1924934	----do----	Method of Producing Esters of Resin Acids.
1926213	Sept. 12, 1933	Resistance Wire.
1928020	Sept. 26, 1933	Method of Treating Pine Oil for the Separation of Components Therefrom.
1929911	Oct. 10, 1933	Blasting Cap.
1931226	Oct. 17, 1933	Rosin Compounds.
1932183	Oct. 24, 1933	Method of Separating Certain Components from Pine Oil.
Re. 19989	Nov. 7, 1933	Smokeless Powder.
1933939	----do----	Preparation of Tenebone.
1935917	Nov. 21, 1933	Composition of Matter and Method of Making.
1936989	Nov. 28, 1933	Nitrated Carbohydrate Solution.
1939365	Dec. 12, 1933	Paraphenylenediamine Dipicrate and Process of Preparing Same.
1943231	Jan. 9, 1934	Nitro-Mixed Fatty Acid Esters of Cellulose and Method for Producing.
1944241	Jan. 23, 1934	Hydrogenated Methyl Abietate and Method of Producing.
1945344	Jan. 30, 1934	Blasting Explosive.
1945501	----do----	Method of Separating Borneol from Pine Oil.
1946322	Feb. 6, 1934	Composition for the Impregnation of Cable Insulation.
1946338	----do----	Tracing Paper and Method of Producing.

No. 1.—*Complete list of all patents owned by Hercules Powder Co.*—Continued

Patent no.	Date of issue	Title
1949841	Mar. 6, 1934	Fuse for Shells.
1950869	Mar. 13, 1934	Centrifugal.
1950894	....do.....	Coating Composition.
1951595	Mar. 20, 1934	Blasting Cap.
1951708	....do.....	Ozonation Products of Terpene Alcohol.
1952591	Mar. 27, 1934	Method for Producing Diazodinitrophenol.
1952633	....do.....	Method of Producing Nitric Acid.
1957180	May 1, 1934	Method for Digesting Nitrocellulose.
1957786	May 8, 1934	Coating Composition.
1957788	....do.....	Method of Refining Rosin.
1958860	May 15, 1934	Wetting-Out Agent.
1958870	....do.....	Method and Machine for Bunching Lead Wires.
1959564	May 22, 1934	Method of Refining Rosin.
1959590	....do.....	Fatty Acids Esters of Carbohydrates and Method for Producing.
1960591	May 29, 1934	Composition for Fuse, Igniter Charges and the Like.
1961398	June 5, 1934	Method of Separating Components of Pine Oil.
1961931	....do.....	Coating Composition.
1964077	June 26, 1934	Flash Composition.
1964390	....do.....	Delay Cap.
1965362	July 3, 1934	Method of Producing Smokeless Powder.
1966806	July 17, 1934	Do.
1969900	Aug. 14, 1934	Towel.
[1] 19288	Aug. 28, 1934	Method of Treating Fibrous Materials.
1971502	....do.....	Fuse Powder for Metal Delays.
1973693	Sept. 18, 1934	New Composition of Matter and Method of Producing.
1973865	....do.....	Method for Hydrogenating Resinous Compounds.
1975211	Oct. 2, 1934	Drying Oil and Method of Producing It.
1977064	Oct. 16, 1934	Method of Separating Anethol from Pine Oil.
1978135	Oct. 23, 1934	Method of Refining Rosin.
1978598	Oct. 30, 1934	Synthetic Resin and Method of Producing.
1978948	....do.....	Binding Composition.
1979671	Nov. 6, 1934	Method for the Production of Rosin Esters.
1988532	Jan. 22, 1935	Method of Producing Mixed Esters of Cellulose.
1989729	Feb. 5, 1935	Ignition Composition.
1990367	....do.....	Method of Refining Rosin.
1993025	Mar. 5, 1935	Alpha-Terpinene-Maleic Anhydride Reaction Product and Method of Producing It.
1993026	....do.....	Composition of Matter and Method of Making the Same.
1993027	....do.....	Composition of Matter and Method of Production.
1993028	....do.....	Composition of Matter and Method of Producing.
1993029	....do.....	Do.
1993030	....do.....	Do.
1993031	....do.....	Terpene-Maleic Anhydride Reaction Products and Method of Producing.
1993032	....do.....	Synthetic Resin and Method of Producing the Same.
1993033	....do.....	Do.
1993034	....do.....	Do.
1993035	....do.....	Method of Producing a Pinene-Maleic Anhydride Reaction Product.
1993036	....do.....	Synthetic Resin and Method of Producing.
1993037	....do.....	Reaction Product of Cineol and Maleic Anhydride and Process of Making It.
1993415	....do.....	Sulphonated Polymerized Terpene and Method of Producing Same.
1993434	....do.....	Method for Impregnating Carbonaceous Material.
1994131	Mar. 12, 1935	Process for the Production of Cineol.
1995600	Mar. 26, 1935	Method of Treating Rosin and Rosin Product.
1996146	Apr. 2, 1935	Method for Graining Explosive Compositions.
1996846	Apr. 9, 1935	Printing Lacquer.
[1] 19525	....do.....	Coating Composition.
1998099	Apr. 16, 1935	Surface Coating.
1999572	Apr. 30, 1935	Nitrated Cellulose and Method of Producing.
1999812	....do.....	Coating Composition.
1999820	....do.....	Delay Cap.
1999828	....do.....	Nitrated Polyhydric Alcohol Emulsion and Process of Producing.
2001070	May 14, 1935	Nitrocellulose Gelatin and Method of Producing.
2001102	....do.....	Method for the Production of Aralkyl Ethers of Cellulose.
2002583	May 28, 1935	Ozonization products of Terpene Alcohols and Method of Producing.
2003458	June 4, 1935	Method of Dehydrating Pine Oil.
2003471	....do.....	Sulphonated Terpene Product and Method of Producing Same.
[1] 19612	June 18, 1935	Coating Compositions.
[1] 19645	July 16, 1935	Method for Producing Diazodinitrophenol and the Product Thereof.
2008366	....do.....	Igniter Powder.
2008641	....do.....	Lacquer Enamel, Base Solution, and the Like.
[1] 19661	July 30, 1935	Composition for Fuse, Igniter Charges, and the Like.
2011707	Aug. 20, 1935	Preparation of Terpene Esters of Dicarboxylic Acids.
2012621	Aug. 27, 1935	Method of Producing Anhydrous Ammonia.
2012622	....do.....	Heterocyclic-Esters of Resin Acids.
2012827	....do.....	Blasting Cap.
2018634	Oct. 22, 1935	Method of Refining Rosin.
1839161	Dec. 29, 1931	Method of Producing Glycol Esters of Abietic Acid.

[1] Reissue.

No. 1A.—*Patents now being used by Hercules Powder Co. by cross-license or otherwise, and Hercules Powder Co. licenses now being used*

Patent no.	Date of issue	Title
1365739	Jan. 18, 1921	Preparation of Ammonia.
[1] 16267	Feb. 16, 1926	Process of Separating Butyl Alcohol and Water.
1589328	June 15, 1926	Aqueous Emulsions of Electrodepositable Cellulosic Compounds and Coalescing Agents Therefor.
1594861	Aug. 3, 1926	Dynamite Composition.
1600143	Sept. 14, 1926	Process of Improving Steam Distilled Wood Turpentine.
1603164	Oct. 12, 1926	Low-Density Dynamite.
1609221	Nov. 30, 1926	High-Explosive Compound.
1639906	Aug. 23, 1927	Safety Blasting Cap.
1708685	Apr. 9, 1929	Absorption Apparatus.
1721610	July 23, 1929	Method of Depilating Carcasses.
1735342	Nov. 12, 1929	Process and Apparatus for the Manufacture of Nitric Acid.
1749082	Feb. 25, 1930	Carcass Treating Method.
1788406	Jan. 13, 1931	Soluble Nitrocellulose and Coating Composition Containing the Same.
1793983	Feb. 24, 1931	Colloidal Emulsion and Process.
1814597	July 14, 1931	Gauze or Screen Catalyst Holder or Support.
1840404	Jan. 12, 1932	Process for the Production of Cellulose Acetate Free from Haze.
1879064	Sept. 27, 1932	Gelatinous Explosive Composition.
1840063	Jan. 5, 1932	Nitric Acid Process.
1918370	July 18, 1933	Plant for Manufacturing Chlorination Products of Caoutchouc.
1919216	July 25, 1933	Process of Ammonia Oxidation.
1927963	Sept. 26, 1933	Catalyst for Ammonia Oxidation.
2013928	Sept. 10, 1935	Chill-Hardening Adhesive.

QUESTION NO. 8

The inventors, employees of Hercules at the time of making the invention, are marked by an asterisk on the tabulation answering question no. 6. All such inventors still retain contract providing that such invention belongs to employer without additional cost.

Those inventors marked with a double asterisk are no longer employed by Hercules Powder Co.

AGREEMENT

This agreement made this 6th day of September 1933, by and between E. I. du Pont de Nemours & Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware, (hereinafter referred to as du Pont) and the Hercules Powder Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware (hereinafter referred to as Hercules),

Witnesseth, that:

1. Whereas, du Pont represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent No. 1831537, issued November 10, 1931, to John F. McCune, and in and to the inventions described in said Letters Patent;

Digitized by Google

2. Whereas Hercules represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent 1613335, issued January 4, 1927, to Ernest M. Symmes, and to the inventions described in said Letters Patent;

3. Whereas, Hercules desires to obtain and du Pont is willing to grant to Hercules a non-exclusive, non-assignablel license to practice the invention, to manufacture, use and/or sell the products covered by the aforesaid U. S. Letters Patent 1831537 throughout the United States of America, its territories and dependencies; and

4. Whereas, du Pont desires to obtain and Hercules is willing to grant to du Pont a non-exclusive, non-assignable license to practice the invention, and manufacture, use and/or sell the product covered by the aforesaid U. S. Letters Patent 1613335 throughout the United States of America, its territories and dependencies;

5. Now, therefore, in view of the premises and in consideration of Five Dollars ($5.00) paid by each party to the other party, receipts of which are hereby acknowledged, it is hereby mutually agreed as follows:

LICENSE

6. Du Pont hereby grants to Hercules a non-exclusive, non-assignable license under said patent 1831537 to make, use and/or sell throughout the United States of America, its territories and dependencies, the products described and claimed in said patent or any reissue thereof. No right to sub-license is given.

7. Hercules hereby grants to du Pont a non-exclusive, non-assignable license under said patent 1613335 to make, use and/or sell throughout the United States of America, its territories and dependencies, the products described and claimed in said patent or any reissue thereof. No right to sub-license is given.

DURATION

8. The license granted herein to Hercules by du Pont shall extend from July 7, 1933, for the full term of the said U. S. patent 1831537.

9. The license granted herein to du Pont by Hercules shall extend from July 7, 1933, for the full term of said U. S. patent 1613335.

PAST INFRINGEMENT

10. Neither of the parties to this agreement shall be liable to the other for any past infringement or contributory infringement of the patents which constitute the subject matter of this agreement, and each party is hereby released from all liability for infringement preceding this agreement.

SUITS

11. Neither party shall be under any obligation to institute suits or prosecute infringers under the aforesaid patents, nor shall either party be in any way responsible or liable to the other for failure to prosecute infringers. If either party elects to prosecute any infringers the conduct of such suit and any recoveries therein shall belong entirely to the party bringing the suit.

12. This written license contract embodies all of the understandings and agreements between the parties concerning the license herein granted, there being no other previous or contemporaneous understanding or agreements, oral or written, between the parties on the foregoing subject.

In witness whereof the parties hereto have caused these presents to be signed by their respective proper officers and their respective corporate seals to be hereto affixed as of the day and year first above written.

AGREEMENT

This agreement made this 6th day of September 1933, by and between E. I. du Pont de Nemours & Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware, (hereinafter referred to as du Pont) and the Hercules Powder Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware, (hereinafter referred to as Hercules),

Witnesseth, that:

1. Whereas, du Pont represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent No. 1743172, issued January 14, 1930, to William H. Ward, and in and to the invention described in said Letters Patent; and

2. Whereas, Hercules represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent 1895144, issued January 24, 1933 to Henry W. Botts and Hubert H. Champney, and to the inventions described in said Letters Patent; and

3. Whereas, Hercules desires to obtain and du Pont is willing to grant to Hercules a non-exclusive, non-assignable license to practice the invention, to manufacture, use and/or sell the products covered by the aforesaid U. S. Letters Patent 1743172 throughout the United States of America, its territories and dependencies; and

4. Whereas, du Pont desires to obtain and Hercules is willing to grant to du Pont a non-exclusive, non-assignable license to practice the invention, and manufacture, use, and/or sell the product covered by the aforesaid U. S. Letters Patent 1895144 throughout the United States of America, its territories and dependencies;

5. Now, therefore, in view of the premises and in consideration of Five Dollars ($5.00) paid by each party to the other party, receipts of which are hereby acknowledged, it is hereby mutually agreed as follows:

LICENSE

6. Du Pont hereby grants to Hercules a non-exclusive, non-assignable license under said patent 1743172 to make, use and/or sell throughout the United States of America, its territories and dependencies, the products described and claimed in said patent or any reissue thereof. No right to sub-license is given.

7. Hercules hereby grants to du Pont a non-exclusive, non-assignable license under said patent 1895144 to make, use, and/or sell throughout the United States of America, its territories and dependencies, the products described and claimed in said patent or any reissue thereof. No right to sub-license is given.

DURATION

8. The license granted herein to Hercules by du Pont shall extend from July 7, 1933, for the full term of the said U. S. patent 1743172.

9. The license granted herein to du Pont by Hercules shall extend from July 7, 1933, for the full term of said U. S. patent 1895144.

PAST INFRINGEMENT

10. Neither of the parties to this agreement shall be liable to the other for any past infringement or contributory infringement of the patents which constitute the subject matter of this agreement, and each party is hereby released from all liability for infringement preceding this agreement.

SUITS

11. Neither party shall be under any obligation to institute suits or prosecute infringers under the aforesaid patents, nor shall either party be in any way responsible or liable to the other for failure to prosecute infringers. If either party elects to prosecute any infringers the conduct of such suit and any recoveries therein shall belong entirely to the party bringing the suit.

12. This written license contract embodies all of the understandings and agreements between the parties concerning the license herein granted, there being no other previous or contemporaneous understandings or agreements, oral or written, between the parties on the foregoing subject.

Hercules Powder Company.
By T. W. Bacchus, *Vice President.*

Attest:

E. B. Morrow, *Secretary.*

This Agreement made this 10th day of October 1935, by and between Hercules Powder Company, a corporation organized and existing under the laws of the State of Delaware, having its principal place of business at Wilmington, Delaware (hereinafter called Hercules), and E. I. du Pont de Nemours & Company, a corporation organized and existing under the laws of the State of Delaware, and having its principal place of business at Wilmington, Delaware (hereinafter called du Pont).

Witnesseth: Whereas, certain United States Patent applications and United States patents belonging to Hercules and du Pont are involved in certain interferences, to wit;

Interference no.	Patent number and date or application serial number and date	
	Assigned to Hercules	Assigned to du Pont
66357	Irvin W. Humphrey, Patent No. 1877179, Sept. 13, 1932.	Roger Adams, Serial No. 599362, Mar. 16, 1932.
68330	Irvin W. Humphrey, Serial No. 411201, Renewal filed Sept. 22, 1932.	Do.
68331	Irvin W. Humphrey, Serial No. 605457, Apr. 15, 1932.	Do.
68332	Irvin W. Humphrey, Serial No. 636015, Oct. 3, 1932.	Do.
69220	Alfred L. Rummelsburg, Serial No. 715941, Mar. 16, 1934.	Claude O. Henke and Milton A. Prahl, Serial No. 690230, Sept. 20, 1933.
69894	Irvin W. Humphrey, Serial No. 687481, Aug. 30, 1933.	Claude O. Henke and Milton A. Prahl, Serial No. 690231, Sept. 20, 1933.
70599	Rollin J. Byrkit, Patent No. 1901630, Mar. 14, 1933.	Wilbur A. Lazier, Serial No. 584573, Jan. 2, 1932.
	Irvin W. Humphrey, Serial No. 727443, May 25, 1934.	Wilbur A. Lazier, Serial No. 10794, Mar. 13, 1935.
70593	Irvin W. Humphrey, Serial No. 687481, Aug. 30, 1933.	Harold J. Barrett and Wilbur A. Lazier, Serial No. 749070, Oct. 19, 1934.
	Irvin W. Humphrey, Serial No. 22264, May 18, 1935.	

and Whereas, Hercules and du Pont desire to settle said interferences amicably by the filing of concessions of priority, and the granting of licenses by each to the other, under patents involved in said interferences or patents which may issue on the applications involved in said interferences and under certain other patents as provided for hereinafter, to practice the inventions within the field of the agreement as hereinafter defined, and

Whereas du Pont is the owner by assignment of each of the patents listed in Schedule A attached hereto and forming a part hereof, relating to metal chromite catalysts and their use in hydrogenation, and

Whereas du Pont and Hercules may have or may later obtain rights under other patents relating to metal chromite catalysts and their use in hydrogenation, and

Whereas both parties wish to be free to manufacture and use such metal chromite catalysts in the preparation of certain compounds,

Now, therefore, in consideration of the provisions hereof and of other good and valuable consideration, the receipt of which is hereby acknowledged, it is agreed as follows:

1. The parties hereto and each of them, shall use their best efforts to terminate the Interferences Nos. 66357, 68330, 68331, 68332, 69220, 69894, 70593, and

Digitized by Google

70599, and any other interferences hereafter declared as a result of motions heretofore made in any of the said interferences, a reasonable time before the earliest date set for testimony in chief of the junior party to close, by filing a concession of priority with respect to each issue of said interferences in favor of the party which he or they shall deem to be entitled to the award in accordance with the rules employed by the Patent Office tribunals for determining priority in such cases or by such other action as may be mutually agreed to be best in the premises.

2. The filing of said concession of priority or the taking of said other action, as the case may be, shall be in accordance with agreements of the parties as to which party is entitled to the award of priority of each of the issues involved in said interferences, said agreements being based upon disclosures and records submitted by each party to the other of the facts which it considers necessary to establish the merits of its case, provided, however, that a concession of priority may be filed by either party without disclosing the facts upon which his claim of priority is based.

3. For the purpose of agreeing on said issues, each of the parties hereto shall promptly present to the other a full showing of the evidence upon which it relies to establish its alleged dates of invention, and the parties shall determine from such evidence which of the respective parties to the interferences is the first inventor as to each count in accordance with the rules employed by the Patent Office tribunals for determining priority; provided, however, that a concession of priority may be filed in lieu of submitting said evidence. For the purpose of arriving at prompt decisions as to concessions of priority, each of the parties hereto shall promptly designate to the other the name of its representative having power to decide on concession of priority in the interferences hereunder.

4. In the event that no concession of priority shall have been filed as to an issue or issues in said interferences, and Hercules and du Pont are unable to agree upon an award of priority as to said issue or issues within a reasonable time as hereinbefore provided, then in that event the issue or issues as to which no agreement was reached may be contested by the parties as if no steps with a view to settlement in accordance with this agreement had been taken; provided, however, that no appeal shall be taken from any decision of the Examiner of Interferences awarding priority to one of the parties with respect thereto.

5. The license rights created in accordance with this contract shall not be affected by any act of either party hereto, or by a failure to act on the part of either party hereto, with respect to the settlement of the aforesaid interferences as provided for herein.

6. Each party shall grant, and does hereby grant, to the other a non-exclusive license throughout the United States, its territories, and possessions, under the claims of any patent controlled by it now involved in the aforesaid interferences, and any patent hereafter controlled by it and granted on the aforesaid applications or any division, renewal, or reissue thereof; provided, however, that said license shall be limited within the scope of said claims to the right to make, use, and sell abietyl alcohol, hydroabietyl alcohols, natural resin acid alcohols, hydrogenated natural resin acid alcohols, esters of the above named alcohols, hydrogenated esters of abietic acid, hydrogenated esters of rosin, hydrogenated esters of resin acids, and products or compositions of matter containing said esters and/or alcohols, and to practice processes of making or using any of said esters, alcohols, and/or products; provided, however, that the license provided for in this paragraph shall be royalty free except as provided in paragraph 8 hereof, and provided, also, that said license shall extend to no other patent or patents than those hereinabove indentified except as otherwise provided for in paragraph 7 hereof.

7. Each party shall grant, and does hereby grant, to the other, a nonexclusive license under the claims of any United States patent or patents controlled by it, or licensed to it by a third party with a right to grant sublicenses, hereafter or heretofore issued upon an application based upon an invention reduced to practice actually or constructively prior to March 26, 1935 (including the United States patents enumerated in Schedule A hereof), for a metal chromite hydrogenation catalyst, a process of making said catalyst, or a process of hydrogenation which employs said catalyst; provided, however, (1) that said license shall extend only to the use of said catalyst and its preparation for use in the manufacture for use or sale of abietyl alcohol, hydroabietyl alcohols, rosin acid alcohols, hydrogenated rosin acid alcohols, esters of the alcohols above named in this paragraph, hydrogenated esters of abietic acid, hydrogenated esters of rosin, and hydrogenated esters of resin acids; (2) that said license shall in no case extend to

Digitized by Google

the use or preparation for use of said catalyst in the manufacture of non-cyclic alcohols; and (3) that said license shall be royalty-free except as provided in paragraph 8 hereof.

8. In the event that either party hereto by reason of the operation of paragraphs 6 and/or 7 hereof becomes a licensee under a patent or license of the other party hereto and the licensor is obligated to pay royalty to a third party with respect to operations of said licensee, the licensor shall notify the licensee of such royalty obligation and the licensee shall thereafter pay the full amount of any royalty which comes due from time to time to said third party as the consequence of licensee's operations, said licensee rendering at the same time a full statement of the operations with respect to which the royalty is payable, and each such payment and statement being made in such form and at such time and place as will enable the licensor to discharge its obligations to said third party with respect to licensee's operations; and to this end each party agrees to permit its records and books of account to be examined by the other party from time to time during business hours to the extent required to verify the statements and payments provided for in this paragraph.

9. In the event that any of the patents or applications involved in the aforesaid interferences, or a patent resulting therefrom, are or shall become involved in an interference or interferences with a third party on a subject matter of invention within the field of this agreement, and in the disposition of said interference a settlement is made, the party hereto who is involved in said interference shall use his best offices to obtain rights enabling him to practice the interfering invention, and also rights enabling the other party hereto to practice said invention upon terms which are at least as favorable as those which he obtains for himself.

10. The licenses granted in accordance with this agreement shall inure to the benefit of and be binding upon the parties hereto and their subsidiaries as defined in paragraph 11 hereof, and the successors and assigns of their entire business of making, using, and/or selling the alcohols, esters, and/or products enumerated in paragraph 6 hereof, throughout the United States and its territories and possessions, but otherwise the licenses shall not be assignable and licensee shall have no right to grant any sublicense to any third party under any license granted to it and created by this agreement; and in case the entire interest in any or all of the Letters Patent or applications covered by this agreement shall be assigned, the assignment shall be expressly subject to the provisions of this agreement, including the licenses and immunities herein provided for.

11. For the purpose of this agreement, a subsidiary company shall be defined as any corporation or organization more than 50 percent of the voting shares of which are owned directly or indirectly, or the voting rights of which are controlled, by the party concerned.

12. Any license or sublicense provided for herein under any patent may be surrendered by the licensee or sublicensee as the case may be, by giving 60 days' notice to the other party hereto, provided the licensee is not in default thereunder and provided that said surrender shall not impair the rights of the said other party hereunder, and that such surrender of any license or sublicense shall not impair the validity of licenses under other patents granted hereunder.

13. The parties hereto mutually release each other from any and all claims on account of any act of infringement or contributory infringement of any patents under which the parties hereto are respectively licensed hereunder, which act was committed prior to the execution of this agreement and which act if committed during the life of this agreement would be licensed hereunder, provided, however, that the release provided in this paragraph shall not extend to any patent as to which either party has prior obligations inconsistent with said release.

14. It is agreed that every license granted or to be granted by this agreement shall be irrevocable and shall extend for the life of the respective patent specified under which the license is granted or to be granted, unless said license is surrendered as provided in paragraph 12.

15. Any notice or document required to be served hereunder by either party on the other may be served by enclosing the same in a postpaid wrapper, addressed to Hercules at Delaware Trust Building, Wilmington, Delaware, and to Du Pont at duPont Building, Wilmington, Delaware, and dispatching the same by registered mail in any United States Post Office.

16. This written contract embodies all of the understandings and agreements between the parties concerning the settlement of the above enumerated interferences, there being no other previous or contemporaneous understandings or agreements, oral or written, between the present parties on the foregoing subject.

SCHEDULE A

U. S. Patent No. 1746782 issued Feb. 11, 1930.
U. S. Patent No. 1746783 issued Feb. 11, 1930.
U. S. Patent No. 1829046 issued Oct. 27, 1931.
U. S. Patent No. 1839974 issued Jan. 5, 1932.
U. S. Patent No. 1964000 issued June 26, 1934.
U. S. Patent No. 1964001 issued June 26, 1934.
U. S. Patent No. 1984884 issued Dec. 18, 1934.

STATE OF DELAWARE,
County of Newcastle, ss:

On this 24th day of September 1935, before me personally came L. N. Bent, to me known, who, being by me duly sworn, did depose and say that he resides at Wilmington, Delaware; that he is the vice president of Hercules Powder Company, one of the corporations described in and which executed the foregoing instrument; that he knows the seal of said corporation; that the seal affixed to said instrument is such corporate seal; that it was so affixed by authority of the Board of Directors of said corporation; and that he signed his name thereto by like authority.

JAMES A. LEE,
[SEAL.] *Notary Public.*

STATE OF DELAWARE,
County of New Castle, ss:

On this 10th day of Oct. 1935, before me personally came W. F. Harrington, to me known, who being by me duly sworn, did depose and say that he resides at Wilmington, Del., that he is the Vice President of E. I. Du Pont de Nemours and Company, one of the corporations described in and which executed the foregoing instrument; that he knows the seal of said corporation; that the seal affixed to said instrument is such corporate seal; that it was so affixed by authority of the board of directors of said corporation; and that he signed his name thereto by like authority.

P. G. STRICKLAND,
Notary Public.

This Agreement, made and entered into this 19th day of June, 1934, by and between Hercules Powder Company, a corporation organized under the laws of the State of Delaware and hereinafter referred to as "Hercules", and I. G. Farbenindustrie Aktiengesellschaft, a corporation organized under the laws of Germany and hereinafter referred to as "I. G.";

Witnesseth that: Whereas, I. G. has developed methods for the large scale manufacture of ethyl and benzyl celluloses, is now and has been for many years engaged in the commercial exploitation of these products and is the sole owner of the entire right, title, and interest in and to numerous United States letters patent and applications for United States letters patent relating to the manufacture and use of these products, against which there is no outstanding assignment, grant, license, mortgage, option, or agreement, express or implied, which may or could in any manner abridge, modify, or lessen the rights hereby granted and intended to be granted, except as herein pointed out; and

Whereas, Hercules now plans to undertake the large scale manufacture and commercial exploitation of ethyl and benzyl celluloses, and desires to acquire

Digitized by Google

the knowledge and experience possessed by I. G. in relation to the manufacture, use, and sale of these products and to acquire the I. G.'s present United States patent rights and applications therefor, or to obtain exclusive licenses thereunder for the life thereof, insofar as they relate to the manufacture and use of ethyl and/or benzyl celluloses and/or their derivatives, together with all claims of I. G. in law or in equity arising out of past infringement thereof in the premises, and the right to sue for and collect the same for its own use; and

Whereas, both parties desire to bring about a mutual exchange of technical information and patent rights relating to the manufacture and use of ethyl and/or benzyl celluloses and/or their derivatives for a limited period, to the end that duplication of effort may be avoided and the commercial exploitation of such cellulose products thereby promoted:

Now, therefore, for and in consideration of the sum of Five (5) Dollars, by each party to the other in hand paid, receipt whereof is hereby acknowledged, and of other good and valuable considerations, the parties hereto mutually agree as follows:

I. It is understood and agreed that wherever in this agreement the expression "ethyl and/or benzyl celluloses and/or their derivatives" is employed, this expression is limited to include only such cellulose compounds which contain at least one unsubstituted ethyl or benzyl group which is attached to the cellulose molecule by means of an ether linkage, and which cellulose compounds are soluble in neither water nor alkali.

It is understood and agreed that wherever in this agreement the "use" of ethyl and/or benzyl celluloses and/or their derivatives is referred to, only those uses are meant which do not conflict with the uses concerning which I. G. has already obligated itself to transfer its inventions to someone else in the United States of America, its territories and/or its possessions. (Generally speaking, the fields of use which are to be excluded from this agreement by the above definition are those uses in the dyestuff, pharmaceutical, and photographic fields).

II. I. G. agrees that it will, on request, fully disclose to any duly accredited agent or agents of Hercules all information of which I. G. is now possessed, relating to the present and past manufacture, use and/or sale of ethyl and/or benzyl celluloses and/or their derivatives. To this end, I. G. will permit such duly accredited agent or agents of Hercules to have free access to the I. G.'s plants in which the said products are manufactured, its laboratories in which said products and uses therefor are developed and its sales departments which are entrusted with the sale of said products, during all regular business hours within one year from the date of this agreement, and at the same time will instruct its employes and technical experts having knowledge to fully inform any duly accredited agent or agents of Hercules in the premises. The traveling expenses and salaries of any such duly accredited agent or agents of Hercules will be paid by Hercules.

III. I. G. agrees to assign, by an instrument in writing, in form for recording in the United States Patent Office, to Hercules, its successors and assigns, the entire right, title, and interest in and to the United States letters patent, and applications for United States letters patent enumerated in the attached schedule "A", the inventions disclosed by said applications, and each of them, and the patents to be issued thereon, and each of them, and the entire present interest of I. G. as such may appear in and to any and all other now existing United States letters patent or applications for United States Letters patent, which relate entirely to the manufacture, use and/or sale of ethyl and/or benzyl celluloses and/or their derivatives, the inventions disclosed by any such applications and the patents to be issued thereon, together with all claims of I. G. in law or in equity, arising out of past infringement of any such United States letters patent in the premises, and the right to sue for and collect the same.

Hercules agrees to grant to I. G. an indivisible, transferable, royalty-free, non-exclusive license under any United States letters patent which may be assigned to it by virtue of this Article III, said license to take effect five years after the date of this agreement and to continue to the ends of the terms for which the respective patents are granted.

IV. I. G. will, without any consideration other than that expressed herein, grant to Hercules and Hercules subsidiaries an exclusive license under the United States letters patent and any and all United States letters patent which may be granted on the applications for United States letters patent listed in the attached schedule B, and an exclusive license under any and all other now existing United States letters patent or applications for United States letters patent, which relate only partly to the manufacture, use, and/or sale of ethyl and/or

Digitized by Google

benzyl celluloses and/or their derivatives, the inventions disclosed by any such applications and the patents to be issued thereon, in which I. G. may at present have any interest, for the full terms of the respective patents, said license, however, to be limited to the manufacture, use and/or sale of ethyl and/or benzyl celluloses and/or their derivatives.

I. G. grants to Hercules the sole right to bring suit for its own sole use on account of any past or future infringement of any United States letters patent so exclusively licensed, where the infringement thereof has arisen or arises on account of the manufacture, use, and sale of ethyl or benzyl celluloses or their derivatives.

Hercules agrees that the exclusive licenses to be granted to it in accordance with this article IV shall after a period of five years from the date of this agreement become non-exclusive to the extent that I. G. shall after five years from the date of this agreement be entitled to grant one indivisible, transferable, royalty-free, non-exclusive license under each of the United States letters patent referred to in this article IV, said non-exclusive licenses to continue for the full terms for which said United States letters patent are granted.

V. In return for the information and patent rights to be furnished to it by I. G. in accordance with Articles II, III, and IV above, Hercules agrees to pay to I. G. the following amounts:

A. $8,000 (Eight Thousand Dollars) upon execution and delivery of this agreement;

B. $8,000 (Eight Thousand Dollars) if and when Hercules shall enlarge the capacity of its plant or plants for the manufacture of ethyl and bensyl cellulose and their derivatives to such an extent that the combined daily capacity for the production of said products shall exceed 700 pounds (seven hundred pounds);

C. $9,000 (Nine Thousand Dollars) if and when Hercules shall enlarge the capacity of its plant or plants for the manufacture of ethyl and bensyl cellulose and their derivatives to such an extent that the combined daily capacity for the production of said products shall exceed 2,000 pounds (two thousand pounds).

VI. Both parties agree that for a period of five (5) years from the date of this agreement, they will freely exchange all information possessed or acquired by them relating to the manufacture and/or use of ethyl and/or benzyl celluloses and/or their derivatives, including full information concerning any new inventions or discoveries made or acquired by either of them relative to such manufacture and or use. To this end, each party will grant to any duly accredited agent or agents of the other free access to its plant or plants for the manufacture of ethyl and/or benzyl celluloses and/or their derivatives, and its laboratories engaged in the testing of said products and research in connection with their manufacture and use, and will instruct its employes and technical experts having knowledge of the manufacture and use of said products and of research in connection with their manufacture and use, to fully inform any duly accredited agent or agents of the other party in the premises. The traveling expenses and salaries of such duly accredited agent or agents shall be paid by the party whom said agent or agents represent.

VII. Both parties agree that they will not disclose to anyone else any confidential information received from the other in accordance with the provisions of Articles II and VI above, and will scrupulously refrain from any acts which would tend to lessen the chances which the party divulging to the other such information regarding any new invention or discovery may have, to obtain adequate patent protection therefor.

VIII. I. G. agrees that it will grant to Hercules and Hercules subsidiaries a royalty-free license limited to the manufacture, use, and/or sale of ethyl and/or benzyl celluloses and/or their derivatives under any and all United States letters patent which I. G. may own or control covering inventions made or acquired by I. G. within five (5) years after the date of this agreement. It is agreed that any license granted in accordance with the provisions of this paragraph shall be exclusive for the period from the date of grant of such United States letters patent or patents so licensed until five (5) years from the date of this agreement, and thereafter shall continue as a non-exclusive license for the full term of any such letters patent or patents, and any reissue thereof.

IX. Hercules agrees that it will grant to I. G. a royalty-free license limited to the manufacture, use, and/or sale of ethyl and/or benzyl celluloses and/or their derivatives under any and all German patents which Hercules may own or control covering inventions made or acquired by Hercules within five (5) years after the date of this agreement. It is agreed that any license granted in accordance with the provisions of this paragraph shall be exclusive for the period from

Digitized by Google

the date of grant of such German letters patent or patents so licensed until five (5) years from the date of this agreement, and thereafter shall continue as a non-exclusive license for the life of any such letters patent or patents, and any reissue thereof.

I. G. agrees that in the case of any application for a German patent specifically relating to the manufacture and/or use of ethyl and/or benzyl celluloses and/or their derivatives, which it may file in the German patent office or acquire within five (5) years from the date of this agreement, it shall forward to Hercules a copy of such German application within six (6) months from the filing date thereof, or upon its acquisition thereof, and at the same time notify Hercules whether or not I. G. will file a corresponding application for United States Letters patent. If I. G. notifies Hercules that it will not file such a corresponding United States application, Hercules shall be subrogated to I. G.'s right, if any, to file such a corresponding United States application at its own expense, provided that Hercules, within three (3) months from the receipt of the copy of the German application, shall notify I. G. of its intention to file such corresponding United States application. I. G. agrees that upon receipt of such notification from Hercules, it will promptly forward to Hercules all papers, duly executed, necessary for the filing of such corresponding United States application, including an assignment to Hercules of the invention, application, and any patent that may issue upon such application, to enable Hercules to file such corresponding United States application within one year from the filing date of the German application, and further agrees to execute, on request by Hercules, any documents deemed necessary by Hercules for the prosecution of any such application or for the filing and prosecution of any division of continuation thereof, or for the reissue of any United States patent issued on any such application. Hercules agrees that, five (5) years after the date of this agreement, it will grant to I. G. an indivisible, transferable, royalty-free, nonexclusive license under any United States letters patent which may be granted to it on any such corresponding United States application thus acquired by Hercules within five (5) years after the date of this agreement, said nonexclusive license to continue for the life of the respective United States letters patent.

XI. Hercules agrees that in the case of any application for United States letters patent specifically relating to the manufacture and/or use of ethyl and/or benzyl celluloses and/or their derivatives, which it may acquire or file in the United States Patent Office at any time within five (5) years from the date of this agreement, it shall forward to I. G. a copy of such application for United States letters patent within six (6) months from the filing date thereof or upon its acquisition thereof, and at the same time notify I. G. whether or not Hercules will file a corresponding application for a German patent. If Hercules notifies I. G. that it will not file such a corresponding application for a German patent, I. G. shall be subrogated to Hercules' right, if any, to file such a corresponding application for a German patent at its own expense, provided that I. G., within three (3) months from the receipt of the copy of the application for United States letters patent, shall notify Hercules of its intention to file such a corresponding application for a German patent. Hercules agrees that upon receipt of such notification from I. G., it will promptly forward to I. G. all papers, duly executed, necessary for the filing of such corresponding application for a German patent, including an assignment to I. G. of the invention, application, and any patent that may issue upon such application, to enable I. G. to file such corresponding application for a German patent within one year from the filing date of the application for United States letters patent and further agrees to execute, on request by I. G., any documents deemed necessary by I. G. for the prosecution of any such application or for the filing and prosecution of any division or continuation thereof, or for the resissue of any German patent issued on any such application. I. G. agrees that, five (5) years after the date of this agreement, it will grant to Hercules an indivisible, transferable, royalty-free, nonexclusive license under any German patent which may be granted to it on any such corresponding application for a German patent thus acquired by I. G. within five (5) years after the date of this agreement, said nonexclusive license to continue for the full life of the respective German patent.

XII. I. G. agrees that it will not abandon any application for United States letters patent which is to be licensed to Hercules in accordance with this agreement, without first notifying Hercules and enabling Hercules to continue the prosecution of such application for United States letters patent at the expense of Hercules. In the event that I. G. wishes to abandon, and Hercules intends to continue the prosecution thereof, I. G. will promptly execute and deliver to

Digitized by Google

Hercules such documents as are necessary in order to allow Hercules so to do, including an assignment to Hercules of the invention, application, and any patent that may issue upon such application, and in event any patent issues upon any such application, Hercules shall, five years after the date of this agreement, execute and deliver to I. G. an indivisible, transferable, royalty-free, non-exclusive license under any United States letters patent granted upon any such application.

XIII. Hercules agrees that it will not abandon any application for a German patent which is to be licensed to I. G. in accordance with this agreement without first notifying I. G. and enabling I. G. to continue the prosecution of such application for a German patent at the expense of I. G. In the event that Hercules wishes to abandon, and I. G. intends to continue the prosecution thereof, Hercules will promptly execute and deliver to I. G. such documents as are necessary in order to allow I. G. so to do, including an assignment to I. G. of the invention, application and any patent that may issue upon such application, and in event any patent issues upon any such application, I. G. shall, five (5) years after date of this agreement, execute and deliver to Hercules an indivisible, transferable, royalty-free, non-exclusive license under any German patent granted upon any such application.

XIV. If either party hereto desires to abandon any German patent owned by it under which the other party has, or is entitled to, a license hereunder, it shall notify the other party of its intention so to do, and shall offer to duly assign to such other party, without cost, such party's entire right, title, and interest in and to such German patent, and if such transfer is made, such assignee shall promptly, without cost, deliver to the party assigning such German patent an indivisible, transferable, royalty-free, nonexclusive license under the said German patent. If such offer is not accepted within three months from the date thereof, the said abandonment may be forthwith effected, notwithstanding the license held by the other party under the said German patent.

XV. The licenses under United States letters patent granted herein shall extend for the term and terms of each and all of said United States patents, or any reissues thereof, and shall cover the United States, and the territories and possessions of the United States.

XVI. The benefits (with the exception of the transferable, non-exclusive licenses which are hereinabove provided for) accruing to and/or the obligations incurred by either party by virtue of this agreement, shall be assignable by that party only to the successors or assigns of substantially the entire business of that party relating to the manufacture and/or use of ethyl and/or benzyl cellulose and/or their derivatives.

XVII. Any notice required under this agreement shall be deemed properly given, if deposited in the United States or German registered mail, duly addressed to Hercules as "Hercules Powder Company, Delaware Trust Building, Wilmington, Delaware, United States of America," or to I. G. as "I. G. Farbenindustrie Aktiengesellschaft, Leverkusen-I. G. Werk, Germany," as the case may be.

In testimony whereof, the parties hereto have cuased this agreement to be signed by their duly authorized officers.

AGREEMENT

This agreement, made this 29th day of December, 1933, by and between Atlas Powder Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware (hereinafter referred to as "Atlas"), and Hercules Powder Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware (hereinafter referred to as "Hercules"); witnesseth that:

1. Whereas, Atlas represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent No. 1880116, issued September 27, 1932, to Richard H. Stratton, and in and to the inventions described in said Letters Patent;

2. Whereas, Hercules represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent No. 1650186, issued November 22, 1927, to Hubert H. Champney, and to the inventions described in said Letters Patent;

3. Whereas, Hercules desires to obtain, and Atlas is willing to grant to Hercules, a non-exclusive, non-assignable license to practice the invention, to manufacture, use and/or sell the products covered by the aforesaid United States Letters Patent No. 1880116, throughout the United States of America, its territories and dependencies; and

4. Whereas, Atlas desires to obtain, and Hercules is willing to grant to Atlas, a non-exclusive, non-assignable license to practice the invention, and manufacture, use, and/or sell the product covered by the aforesaid United States Letters Patent No. 1650186, throughout the United States of America, its territories and dependencies:

5. Now, therefore, in view of the premises and in consideration of Five Dollars ($5) paid by each party to the other party, receipts of which are hereby acknowledged, it is hereby mutually agreed as follows:

LICENSE

6. Atlas hereby grants to Hercules a non-exclusive, non-assignable license under said patent No. 1880116, to make, use, and/or sell throughout the United States of America, its territories and dependencies, the products described and claimed in said patent, or any reissue thereof. No right to sub-license is given.

7. Hercules hereby grants to Atlas a non-exclusive, non-assignable license under said patent No. 1650186, to make, use, and/or sell throughout the United

Digitized by Google

States of America, its territories and dependencies, the products described and claimed in said patent, or any reissue thereof. No right to sub-license is given.

DURATION

8. The license granted herein to Hercules by Atlas shall extend from January 1, 1934, for the full term of the said United States Patent No. 1880116.

9. The license granted herein to Atlas by Hercules shall extend from January 1, 1934, for the full term of said United States patent No. 1650186.

PAST INFRINGEMENT

10. Neither of the parties to this agreement shall be liable to the other for any past infringement or contributory infringement of the patents which constitute the subject matter of this agreement, and each party is hereby released from all liability for infringement preceding this agreement.

SUITS

11. Neither party shall be under any obligation to institute suits or prosecute infringers under the aforesaid patents, nor shall either party be in any way responsible or liable to the other for failure to prosecute infringers. If either party elects to prosecute any infringers the conduct of such suit and any recoveries therein shall belong entirely to the party bringing the suit.

12. This written license contract embodies all of the understandings and agreements between the parties concerning the license herein granted, there being no other previous or contemporaneous understandings or agreements, oral or written, between the parties on the foregoing subject.

In witness whereof, the parties hereto have caused these presents to be signed by their respective proper officers and their respective corporate seals to be hereto affixed as of the day and year first above written.

Approved as to form—

THOMAS J. LAFFEY, *General Counsel*

AGREEMENT

This agreement made as of this 18th day of October 1935, by and between Eastman Kodak Company, a New York Corporation, having a place of business at Rochester, New York, hereinafter called Kodak, which term shall, where the context permits, refer to and include any company allied to Eastman Kodak Company as a subsidiary company or by common ownership or control; and Hercules Powder Company, a Delaware Corporation, having a place of business at Wilmington, Delaware, herein called Hercules, which term shall, where the context permits, refer to and include any company subsidiary to Hercules Powder Company,

Witnesseth that:

Whereas Kodak manufactures and is equipped to manufacture cellulose esters known as cellulose acetate propionate and cellulose acetate butyrate;

Whereas Hercules is equipped to distribute large quantities of cellulose acetate propionate and cellulose acetate butyrate and is willing to use its best efforts to sell those esters throughout the United States in the protective coating field;

Whereas Kodak has a number of patents and applications covering cellulose acetate propionate and cellulose acetate butyrate hereinafter called "Kodak's cellulose ester patents and applications", and their use in the protective coating field as herein defined, hereinafter called "Kodak's protective coating patents and applications", and Hercules is desirous of obtaining a license under those patents and applications to sell those cellulose esters in that field; and

Digitized by Google

Whereas for the periods and within the limitations herein designated Kodak is willing to supply Hercules' requirements for cellulose acetate propionate and cellulose acetate butyrate and Hercules is willing to purchase all of its requirements exclusively from Kodak;

Now, therefore, in consideration of the covenants and promises herein contained and of the payment of One Dollar ($1.00) and other good and valuable considerations by each party to the other, receipt whereof is hereby acknowledged, the parties hereto hereby mutually agree each with the other as follows:

ARTICLE 1. DEFINITIONS

The "protective coating field" is hereby defined as that field in which solutions or compositions of cellulose esters, including but not limited to lacquers and/or varnishes in the ordinary commonly accepted meaning of the terms, are applied to articles, such as textiles, paper, fabrics, wood, metal, and any other articles not hereinafter especially excepted, for the purpose of water-proofing, protecting, insulating, or beautifying such articles, but said field shall not include the covering of articles by molding or with molding compositions, nor the coating of yarns, textiles, or fabrics for use in wearing apparel, nor the coating of thin colloidized cellulose or cellulose derivative sheeting for any purpose whatsoever, nor the manufacture of sensitized photographic goods.

"Protective coatings" are hereby defined as solutions or compositions containing cellulose acetate propionate and/or cellulose acetate butyrate, which are adapted for use in the protective coating field.

"Cellulose acetate propionate" is hereby defined as any cellulose ester containing both acetyl and propionyl radicals and the acyl content of which substantially all consists of acyl radicals contained in the group consisting of acetyl, propionyl, and butyryl radicals.

"Cellulose acetate butyrate" is hereby defined as any cellulose ester containing both acetyl and butyryl radicals and the acyl content of which substantially all consists of acyl radicals contained in the group consisting of acetyl, propionyl, or butyryl radicals.

Kodak's cellulose ester patents and applications are those set forth in Schedule A attached hereto; it is intended that this term shall include all patents and applications now or hereafter owned or controlled by Kodak and under which Kodak has the right to grant licenses during the continuance of this agreement which contain claims to cellulose acetate propionate or cellulose acetate butyrate.

Kodak's protective coating patents and applications are those set forth in Schedule B attached hereto; it is intended that this term shall include all patents and applications now or hereafter owned or controlled by Kodak and under which Kodak has the right to grant licenses during the continuance of this agreement which contain claims covering protective coatings as above defined, coated articles, or compositions useful as such protective coatings.

ARTICLE 2. LICENSE TO HERCULES

Kodak hereby grants to Hercules for the term of this agreement the exclusive, royalty-free right and license, throughout the United States, under Kodak's cellulose ester patents and applications to use and to sell for use in the protective coating field only, cellulose acetate propionate and cellulose acetate butyrate purchased from Kodak, and Hercules agrees that it will not during the continuance of this agreement use cellulose acetate propionate or cellulose acetate butyrate in any other field, nor sell cellulose acetate propionate or cellulose acetate butyrate to others for use in any other field.

Kodak further grants to Hercules for the term of this agreement the exclusive, royalty-free right and license, throughout the United States, under Kodak's protective coating patents and applications to make, use, and sell protective coatings containing cellulose acetate propionate and/or cellulose acetate butyrate purchased by Hercules from Kodak, together with the right to grant to others the non-exclusive sublicense to make, use, and sell protective coatings containing cellulose acetate propionate and/or cellulose acetate butyrate purchased by Hercules from Kodak, and Hercules agrees that it will not during the continuance of this agreement use or sell, or license others to use or sell, solutions or compositions containing cellulose acetate propionate and/or cellulose acetate butyrate, outside the protective coating field.

Digitized by Google

Any rights and licenses granted by this Article 2 under any patents under which Kodak shall have the right to grant licenses during the continuance of this agreement shall be subject to the same terms and conditions as those to which Kodak is subject in exercising its right to grant said rights and licenses.

Promptly after the execution of this agreement, Kodak will furnish to Hercules so much of the information contained in the applications for Letters Patent which are set forth in Schedules A and B attached hereto as shall in Kodak's opinion pertain to the protective coating field.

ARTICLE 3. LICENSE TO KODAK

Hercules hereby grants to Kodak the non-exclusive, royalty-free right and license throughout the United States to make, use, and sell the inventions disclosed in its Billing & Tinsley U. S. patent No. 1973693 granted September 18, 1934, such right and license to be and become irrevocable when and after this agreement shall have been in force for a period of twenty-six months.

Hercules further grants to Kodak during the continuance of this agreement the exclusive, royalty-free right and license, throughout the United States, under its U. S. patent no. 1973693 and any other U. S. patents or applications which it now or hereafter during the continuance of this agreement owns or controls, to make, use, and sell cellulose acetate propionate and/or cellulose acetate butyrate.

Hercules further grants to Kodak during the continuance of this agreement the non-exclusive, royalty-free right and license throughout the United States to make, use and sell any of the inventions which it now or hereafter during the continuance of this agreement owns or controls which relate in any way to the manufacture and/or to the use of cellulose acetate propionate and/or cellulose acetate butyrate and which right and license is not granted to Kodak under either of the preceding paragraphs of this Article 3

ARTICLE 4. RESERVATION BY KODAK

Kodak will not, during the continuance of this agreement, sell cellulose acetate propionate and/or cellulose acetate butyrate or protective coatings or compositions containing those cellulose esters or either of them to anyone for use in the protective coating field, but Kodak reserves and shall have the absolute right at all times to make and use cellulose acetate propionate and/or cellulose acetate butyrate and/or protective coatings and/or compositions containing those cellulose esters or either of them in any manner that it may see fit and for any and every purpose whatsoever and to make, use, and sell articles coated with such protective coatings and to make, use, and sell cellulose acetate propionate and/or cellulose acetate butyrate and/or compositions and articles containing those cellulose esters or either of them in the yarn, textile, and/or fabric fields and in any and every field other than the protective coating field, and to license or sublicense others to make, use, and sell compositions and articles containing cellulose acetate propionate and/or cellulose acetate butyrate in the yarn, textile, and/or fabric fields and in any and every field other than the protective coating field.

ARTICLE 5. HERCULES' PURCHASES

During the continuance of this agreement, Hercules agrees that it will use its best efforts to promote the use and sale of cellulose acetate propionate and cellulose acetate butyrate in the protective coating field and that it will use its best efforts to supply the reasonable market demand therefor in the United States and that it will purchase from Kodak its entire requirements for cellulose acetate propionate and cellulose acetate butyrate at the prices and upon the terms hereinafter set forth.

Kodak agrees that, during the continuance of this agreement, it will furnish to Hercules at the prices and upon the terms hereinafter set forth, Hercules' entire requirements for cellulose acetate propionate and cellulose acetate butyrate for the purposes herein set forth; provided, however, that Kodak shall not be required to furnish to Hercules cellulose acetate propionate and/or cellulose acetate butyrate in quantities in excess of the following:

Fifty thousand (50,000) pounds during the 1st year of this agreement,

Seventy-two thousand (72,000) pounds during the 2nd year of this agreement,

One hundred and eighty thousand (180,000) pounds during each of the 3rd, 4th, and 5th years of this agreement,

Digitized by Google

Three hundred and sixty thousand (360,000) pounds during the 6th year of this agreement and a like quantity during each year thereafter;

provided, further, that Kodak shall not be required to ship to Hercules in any one calendar month more than one-tenth (1/10) of the maximum quantity which Kodak is required to furnish to Hercules in the year of this agreement in which that month occurs; and provided, further, that in the event Hercules' requirements for cellulose acetate propionate and/or cellulose acetate butyrate in any one calendar month exceed the maximum quantity which Kodak has agreed to furnish to Hercules during that month, Hercules will request Kodak in writing to furnish such excess requirements at the prices and upon the terms herein provided, and Kodak will advise Hercules within ten (10) days after receipt of such request if Kodak shall be unable to furnish such excess requirements within the time provided in Article 6 hereof. If Kodak notifies Hercules that it will be unable to furnish such excess requirements, then Hercules may produce or purchase such excess requirements elsewhere and the license granted to Hercules by Article 2 hereof shall apply and extend to such excess requirements.

If at any time during the continuance of this agreement, Kodak fails to make shipment of any quantity of cellulose acetate propionate and/or cellulose acetate butyrate within the maximum quantities above provided in this Article 5 and within the time provided in Article 6 hereof, and Hercules gives Kodak writen notice of such failure to make shipment and Kodak fails within ten (10) days after receipt of such written notice to make shipment of the quantities in question and to advise Hercules of such shipment, then Hercules may produce or purchase elsewhere the quantities in question and the licenses granted to Hercules by Article 2 hereof shall apply and extden to such quantities in question.

ARTICLE 6. PRICES AND TERMS

The prices for cellulose acetate propionate and cellulose acetate butyrate under this agreement shall be as follows:

Cellulose Acetate Propionate

Acetyl content	Propionyl content	Viscosity	Yearly basis	Price per pound f. o. b. cars or motor truck at Kingsport, Tenn.
26–31 percent	15–18 percent	0.5–10 sec	First 50,000 pounds	$0.460
			50,000–100,000 pounds	.440
			100,000–200,000 pounds	.425
28–31 percent	15–18 percent	10–50 sec	First 50,000 pounds	.475
			50,000–100,000 pounds	.455
			100,000–200,000 pounds	.440

Cellulose Acetate Butyrate

Acetyl content	Butyryl content	Viscosity	Yearly basis	Price per pound f. o. b. cars or motor truck at Kingsport, Tenn.
30–33 percent	15–18 percent	0.5–50 sec	First 50,000 pounds	$0.510
			50,000–100,000 pounds	.490
			100,000–200,000 pounds	.475

These prices shall be subject to revision by Kodak from time to time, upon sixty (60) days written notice to Hercules of such revision. Kodak shall have the right to set the price at which it is willing to supply any cellulose acetate propionate or cellulose acetate butyrate not listed above and such prices shall likewise be subject to revision by Kodak from time to time, upon sixty (60) days written notice to Hercules of such revision.

Digitized by Google

Prices are F. O. B. cars or motor truck at Kingsport, Tennessee. Terms of payment shall be thirty (30) days net from date of invoice, with one percent (1%) discount for payment within ten (10) days.

There shall be added to the price herein specified the amount of any Federal, State, or Municipal tax, excise, or other governmental charge upon materials hereby sold, upon the manufacture or transportation thereof or upon any materials used by Kodak in the manufacture of said materials, other than such taxes, excises, or charges as are imposed at the date of this contract; and there shall also be added the amount of any increase in those taxes, excises, or charges imposed at the date of this contract.

With respect to types of cellulose acetate propionate and cellulose acetate butyrate above designated, and with respect to any types of cellulose acetate propionate and cellulose acetate butyrate upon which Kodak has within the previous six (6) months quoted a price to Hercules or which Kodak has within the previous six (6) months supplied to Hercules in quantities of six hundred pounds or more, Hercules will give to Kodak written notice not less than thirty (30) days prior to the first day of each month of the quantity of cellulose acetate propionate, and not less than forty (40) days prior to the first day of each month of the quantity of cellulose acetate butyrate, which Hercules will purchase in each month. With respect to all other types of cellulose acetate propionate and cellulose acetate butyrate which Hercules requires, it will give to Kodak written notice not less than sixty (60) days prior to the first day of the month of the quantity of such other types of cellulose acetate propionate and cellulose acetate butyrate which Hercules will purchase in such month.

Kodak shall not be obligated to supply cellulose acetate propionate and cellulose acetate butyrate to Hercules in quantities less than six hundred (600) pounds upon any single purchase order.

Viscosity, acetyl content, propionyl content, and butyryl content of cellulose acetate propionate and cellulose acetate butyrate covered by this agreement shall be determined in accordance with the methods set forth in the attached Schedule C.

Invoices shall be based on seller's or railroad weights, f. o. b. shipping point, and seller's weights, in case of shipment by truck and railroad's weights in case of shipment by rail shall govern in case of disagreement as to weight, packing list showing gross, tare and net weight to accompany each invoice. Kodak's liability for loss or damage in transportation shall cease on making delivery in good condition to carrier at shipping point.

Kodak shall not be held liable or responsible in any respect for failure to ship or for delay in shipping, nor shall Hercules be held liable or responsible in any respect for failure to accept material hereunder if any such failure or delay is due to war, fire, strike, accident, or other contingencies beyond the absolute control of the party so in default; provided, however, that any shipments made by Kodak before receipt of written notice from Hercules that the latter cannot accept shipments because of any such contingency shall be accepted and paid for by Hercules. In the event of any such excused interference with any shipment, the quantity requirements provided for in this agreement shall be reduced accordingly.

Kodak reserves the right to discontinue deliveries hereunder of any material the manufacture, sale, or use of which by Kodak would, in its opinion, infringe any Letters Patent now or hereafter issued and under which Kodak is not licensed.

Hercules will make an examination and test on arrival and any and all claims against Kodak on account of the materials sold hereunder shall be considered as waived by Hercules unless made in writing within fifteen (15) days after arrival thereof at destination. Liability of Kodak, if any, for inferior quality or defective condition of any materials sold by it hereunder shall be limited to the purchase price of that part of said materials which is so inferior in quality or otherwise defective, and such liability shall be limited to the actual loss or damage to Hercules, if such actual loss or damage is less than said purchase price.

Hercules assumes all risks and liability for results of use by Hercules of the material covered by this contract, including use by Hercules of such material in combination with other substances, and Kodak shall not be liable in any way for results of use by either Hercules or its sublicensees or customers of the material covered by this contract, including use by Hercules and/or its sublicensees or customers of such material in combination with other substances.

ARTICLE 7. TERMINATION

If, during the continuance of this agreement, Hercules shall fail to purchase from Kodak cellylose acetate propionate and/or cellylose acetate butyrate in at least the following quantities with the following specified periods:

Digitized by Google

Twenty-four thousand (24,000) pounds during the 2nd year of this agreement.
Sixty thousand (60,000) pounds during each of the 3rd, 4th, and 5th years of this agreement.
One hundred and twenty thousand (120,000) pounds during the 6th year of this agreement and a like quantity during each year thereafter.
The Kodak may give to Hercules notice in writing within sixty (60) days after the end of any such year of this agreement in which Hercules shall fail to purchase such specified quantities, that the licenses granted by Article 2 hereof shall become non-exclusive within thirty (30) days thereafter and, unless Hercules shall, during said thirty (30) days, place with Kodak firm orders for an amount of cellulose acetate propionate and/or cellulose acetate butyrate sufficient to bring Hercules' purchases up to the foregoing requirements of this Article 7, for the year of this agreement immediately preceding said written notice, the license granted by Article 2 hereof forthwith shall become non-exclusive.
Either party hereto may, at any time after two years from the date hereof, upon three (3) months' written notice to the other of its intention so to do, cancel this agreement except that Hercules shall not, after this agreement shall have been in force for a period of twenty-six months, cancel the license granted to Kodak by the first paragraph of Article 3 hereof.
This agreement shall terminate, in any event, twenty (20) years from the date hereof.
The cancellation by either party or the termination of this agreement shall not relieve Hercules from its obligation to accept and pay for, nor Kodak from its obligation to manufacture and sell, any materials hereunder for which Hercules shall have placed and Kodak shall have accepted an order or orders, or which Hercules has obligated itself to purchase from Kodak, prior to the notice of such cancellation or prior to such termination.

ARTICLE 8. PATENT MARKING

Hercules will mark all products sold and/or manufactured and sold by it under any of the provisions of this agreement in accordance with the United States Statutes governing patent marking and will use its best efforts to cause its sub-licensees under this agreement to mark all articles and products manufactured and sold by them under any of the provisions of this agreement in accordance with the United States Statutes governing patent marking. Hercules will also place on its invoices of products sold and/or manufactured and sold by it under any of the provisions of this agreement a notice that the products so sold are licensed under the Kodak cellulose ester and/or protective coating patents applicable thereto; and Hercules will use its best efforts to cause its sublicensees under this agreement to place on all their invoices of products sold and/or manufactured and sold by them under any of the provisions of this agreement a notice that the products so sold are licensed under the Kodak cellulose ester and/or protective coating patents applicable thereto.

ARTICLE 9. NOTICES

Any notice or communication herein provided for shall be in writing and it shall be deemed to be served if tendered in person to a responsible office of Kodak or of Hercules, or mailed to such party at its last known address by prepaid registered mail.

ARTICLE 10. ASSIGNABILITY OF RIGHTS

This agreement shall not be subject to transfer or assignment by either party hereto except to the successors to its business. The obligations and benefits imposed by this agreement shall be binding upon and inure to the benefit of the parties hereto and any such successor.

ARTICLE 11. TITLES OF ARTICLES

The titles of the Articles of this agreement are no part of the text thereof, are to affect the construction of the Article in no way whatsoever, and are inserted for convenience only.

ARTICLE 12. CONSTRUCTION OF AGREEMENT

This agreement shall be construed according to the Laws of the State of New York, except as to any provisions thereof which are governed, or governed primarily, by the laws of the United States of America.

Digitized by Google

This instrument sets forth the entire agreement between the parties hereto upon the date first above mentioned, there are no understandings, representations or warranties, either oral or written, of any kind whatsoever not expressly set forth herein and this agreement shall not be modified except by an instrument in writing executed in the same manner as this agreement is executed.

In witness whereof, each of the parties hereto have caused the execution of this agreement in duplicate by its proper officer as of the day and year first above written.

SCHEDULE C

PROCEDURE FOR THE DETERMINATION OF THE VISCOSITY OF CELLULOSE ACETATE PROPIONATE AND CELLULOSE ACETATE BUTYRATE

The acetone viscosities of cellulose acetate propionate and cellulose acetate butyrate are determined by the following procedure.

The sample of cellulose acetate propionate or cellulose acetate butyrate to be tested is dried for 15 hours (overnight) at 65° C. Seventy-five grams of this dry sample is weighed into a clean, dry 32-oz. bottle and 300 g. of pure dry acetone is added, giving a 4:1 liquid-solid ratio. The bottle is closed with a tightly fitting ground-in glass stopper and is tumbled end over end in a mechanical tumbling machine for 12 hours. (Seven RPM is a satisfactory rate of tumbling.)

After the cellulose ester is completely dissolved, the solution is brought to about 20° C. and is poured into a glass cylinder 14 inches high and with an inside diameter of one and one-half inch. This cylinder has two graduation marks ten inches apart, the upper being two inches from the top and the lower two inches from the bottom. It is then placed in a water bath maintained at 20° C. until the temperature of the solution has become constant and uniform, and all bubbles have risen to the surface. It is then placed in such a position that a ball falling through the solution will be visible throughout the passage down the column.

The balls used are standard steel 5/16-inch ball bearings of 7.93–7.97 mm diameter and weighing between 2.033 and 2.035 g. (These may be obtained from the Auburn Ball Bearing Company, 28 Industrial Street, Rochester, New York.) One of these standard balls is placed on the center of the top surface of the solution in the cylinder and is allowed to fall through the solution. The time in seconds required for the steel ball to fall through the ten-inch column of solution between the two graduations is measured by a stop-watch. The average of three such determinations is taken as the viscosity of the cellulose ester which is being tested.

ANALYTICAL PROCEDURE FOR THE DETERMINATION OF ACETYL, PROPIONYL, AND BUTYRYL IN CELLULOSE ESTERS

The method consists of an analysis to determine the total acyl content of the ester, isolation of a mixture of the combined acids, and a determination of the molar ratios of the acids in the mixture. From these data the composition of the ester can be calculated by means of simultaneous equations.

Determination of total acyl.—The total combined acyl is determined by a modified Eberstadt method essentially as described in Murray, Staud and Gray (J. Ind. Eng. Chem., Anal. Ed., *3*, 269 (1931)).

The ester is dried in a 100° C. oven for at least one hour and is cooled in a desiccator. Duplicate 1,000 gram samples are placed in stoppered 250 cc Erlenmeyer flasks and to each sample 40 cc of 75% (by volume) ethyl alcohol is added.

Digitized by Google

These samples are heated for one-half hour at about 55° C. to swell the fibers. (A jacketed bath containing methyl alcohol is easily held at this temperature.) Forty cc of standard half-normal sodium hydroxide is then added, the flasks are loosely stoppered and are heated at 55° C. for 15 minutes, after which they are allowed to stand tightly stoppered for two days at room temperature.

The excess alkali is back titrated using standard half-normal hydrochloric acid with phenolphthalein indicator. After reaching a temporary end point the flask is allowed to stand at least a half hour so the alkali can diffuse from the fibers. Additions of standard acid are made until all the free alkali has been neutralized. Unless care is taken at this stage poor check values will be obtained.

Total acyl is calculated as apparent acetyl thus:

$$(\text{cc NaOH} - \text{cc HCl} \times \frac{\text{HCl norm.}}{\text{NaOH norm}} \times \frac{\text{NaOH norm.}}{1000} \times \frac{43.0 \times 100}{\text{sample wt.}} = \% \text{ Apparent}$$

Acetyl. In practice, graphs are used whereby the acetyl value, corresponding to the volume of acid added, can be read directly. If duplicate determinations differ by more than 0.5% acetyl, the analysis is repeated.

Isolation of the mixed acids.—Duplicate 2.0 g. samples (not especially dried) are heated with 80 cc of half normal sodium hydroxide in 500 cc round-bottomed Pyrex flasks. After 48 hours in a 40° C. water bath, enough one-molar phosphoric acid is added to each flask to form mono-sodium-phosphate, which liberates the organic acids from their sodium salts. The flasks are fitted with stoppers containing very small capillary inlet tubes and Kjeldahl distilling heads. (The Jennings type Kjeldahl connecting bulb—Will Corp. Catalog #13172—is more satisfactory than any other type tried. The outlet tube in the head is bent to prevent bumping into the outlet.) These Kjeldahl bulbs are connected to vertical condensers, which have outlet tubes long enough to reach within three inches of the bottoms of the 500 cc distilling flasks used as receivers.

The acid solutions are vacuum distilled to dryness, 25 cc of distilled water is added to each flask, and is again distilled to dryness. The inlets to the capillary tubes are kept closed until the residues in the flasks are nearly dry. Then a small stream of air bubbles is allowed to enter to avoid bumping. The distilling flasks are heated at almost 100° C and the receivers are cooled in ice and salt.

In this operation it is not necessary to work with quantitative accuracy at all stages, but it is necessary to obtain water solutions of the acids in the same ratios as they occur in the esters. The volume of the distillate and rinsings is usually 200-225 cc, which in the majority of cases automatically adjusts the acidity of the distillate to 0.06 to 0.1 normal, the range desired for subsequent extractions.

Determination of the molar ratios of the acids.—The following procedure was adapted from the method described by C. H. Workman (Iowa State J. Sci. Vol. 4, July 1930) and J. Ind. Engr. Chem., Anal. Ed. *3* 264, (1931)). It is based on the distribution ratios of the various acids between water and n-butyl acetate. The ratios are determined for the individual acids using samples of known high purity. From these values and the distribution ratios of the mixtures the molar ratios can be calculated, as described in the next section.

A 25 cc portion of the distillate is titrated against 0.05 normal sodium hydroxide using phenolphthalein indicator. The volume of alkali consumed is designated as M. 30 cc of the distillate is shaken in a small separatory funnel with 15 cc of n-butyl acetate. These volumes are measured accurately using pipettes or burettes. After shaking the mixture thoroughly, the aqueous (lower) layer is drawn off. A dry 25 cc pipette is rinsed with 2 or 3 cc of this solution and then a 25 cc portion is measured out and titrated against the 0.05 normal alkali. The volume of alkali taken is designated M_1. In the same way a second 30 cc portion of the distillate is extracted, this time using 60 cc of the extractant. Again 25 cc of the aqueous layer is titrated, and the volume of alkali is termed M_2. The following ratios are then calculated:

$$\frac{M_1 \times 100}{M} = K_1 \qquad \frac{M_2 \times 100}{M} = K_2$$

K_1 and K_2 are termed the percentage partition coefficients of the acids in the distillate. They represent the percentage of acid remaining in the aqueous phase after extraction.

In a similar manner the distribution ratios are determined for acetic, propionic, and butyric acids. A sample of each acid of tested purity is diluted with distilled water to give 200–300 cc of approximately 0.07 normal solution. Twenty-five

Digitized by Google

cc portions are titrated and 30 cc portions are extracted and titrated as just described. The following partition coefficients are thus determined. In this case, however, the values are left as decimal fractions rather than as percentages. Thus

$$\frac{M_1}{M}=k_1$$

k_1=partition coefficient of acetic acid with 15 cc n-butyl acetate
k_2=partition coefficient of propionic acid with 15 cc n-butyl acetate
k_3=partition coefficient of butyric acid with 15 cc n-butyl acetate
k_4=partition coefficient of acetic acid with 60 cc n-butyl acetate
k_5=partition coefficient of propionic acid with 60 cc n-butyl acetate
k_6=partition coefficient of butyric acid with 60 cc n-butyl acetate

These constants should be checked occasionally and must be redetermined for each new supply of butyl acetate. Blanks should be run on the butyl acetate, for it develops acidity on standing. All measurements should be made with good pipettes or burettes, and extreme care and cleanliness should be observed during this whole operation. The accuracy of the procedure should be checked occasionally using a solution of a known mixture of the three acids.

Calculations.—In order to evaluate three unknowns one must have three simultaneous algebraic equations involving the three unknown quantities. In the case of a ternary acid mixture the sum of the mol percentages of the acids present represents the total acidity, or 100%. If A, P, and B represent mol percentages of acetic, propionic, and butyric acids respectively, the first equation becomes:

(1) $$A+P+B=100$$

The second and third equations are:

(2) $$Ak_1+Pk_2+Bk_3=K_1$$

(3) $$Ak_4+Pk_5+Bk_6=K_2$$

Note that k_1, k_2, k_3, k_4, k_5, and k_6 are known and refer to the pure individual acids, whereas K_1 and K_2 refer to the ternary mixture. By solving these equations for P, the following expressions may be derived:

(4) $$P=\frac{\frac{K_1-100\,k_1}{k_3-k_1}-\frac{K_2-100\,k_4}{k_6-k_4}}{\frac{k_2-k_1}{k_3-k_1}-\frac{k_5-k_4}{k_6-k_4}}$$

(5) $$B=\frac{K_2-100\,k_4-P(k_5-k_4)}{k_6-k_4}$$

Typical values for the partition coefficients of the acids are:

$k_1=0.820$ $k_4=0.521$
$k_2=0.546$ $k_5=0.221$
$k_3=0.255$ $k_6=0.0759$

When these values are substituted in the preceding equations, they simplify to the following forms:

(6) $P=11.9\,(52.1-K_2)-9.36\,(82.0-K_1)$.
(7) $B=2.25\,(52.1-K_2)-0.674\,P$.
(8) $A=100-P-B$.

NOTE.—The above constants and simplified equations are typical, but the exact values should be determined by each analyst, using his own reagents and the best pure acids available. As previously mentioned, these constants must be checked from time to time and particularly when new reagent solutions are put into use.

The results obtained by this method are illustrated by the following analyses of solutions of known composition:

Digitized by Google

	Found (percent)	Taken (percent)
Mixture No. 1:		
Acetic	56.9	57.0
Propionic	30.1	29.8
Butyric	13.0	13.2
Mixture No. 2:		
Acetic	51.1	50.7
Propionic	24.6	24.3
Butyric	24.3	25.0
Mixture No. 3:		
Acetic	56.1	57.0
Propionic	30.8	29.3
Butyric	13.1	13.7

The mol percentages of acid are converted into weight percent acyl of the ester thus:

A × % apparent acetyl = Wt. % Acetyl.

$$P \times \% \text{ apparent acetyl} \times \frac{57}{43} = \text{Wt. \% Propionyl.}$$

$$B \times \% \text{ apparent acetyl} \times \frac{71}{43} = \text{Wt. \% Butyryl.}$$

Agreement

This agreement made this 26th day of June, 1934, by and between Hercules Powder Company, a corporation of Delaware having its principal place of business at 900 Market Street, Wilmington, Delaware, hereinafter referred to as "Hercules"; Foote Mineral Company, Inc., a corporation of Pennsylvania having its principal place of business at 1609 Summer Street, Philadelphia, Pennsylvania, hereinafter referred to as "Foote"; Oscar A. Pickett, of Wilmington, Delaware, hereinafter referred to as "Pickett" and Gordon H. Chambers, of Philadelphia, Pennsylvania, hereinafter referred to as "Chambers", witnesseth that:

Whereas Hercules is the owner by assignment from Pickett of the entire right, title, and interest in and to a certain application for patent for Improvements in Igniter Powder, filed by said Pickett November 12, 1931, Serial No. 574678, and in and to the invention disclosed therein, and United States Letters Patent to be obtained therefor; and

Whereas Foote is the owner by assignment from Chambers of a certain application for patent for Improvements in Ammunition Primer and Detonator Caps and Primer Compositions Therefor, filed September 23, 1931, Serial No. 564725; and in and to the invention disclosed therein and United States Letters Patent to be obtained therefor; and

Whereas the said applications for patents filed by Pickett and Chambers, respectively, are involved in an interference declared by the Commissioner of Patents January 30, 1934, No. 67759; and

Whereas the parties hereto are desirous of settling the issues involved in the said interference.

Now, therefore, for and in consideration of Five Dollars ($5.00) and other good and valuable considerations each to the other paid, the receipt of which is hereby acknowledged, the parties hereto do agree as follows:

1. The parties hereto agree forthwith to fully disclose to each other their patent applications aforesaid and all evidence which they may have relative to the issue of priority between Pickett and Chambers involved in the said Interference No. 67759, and within thirty days from the date hereof to submit all such evidence to counsel for Pickett and Chambers with instructions to determine the issue of priority involved in said interference in accordance therewith.

2. The parties hereto agree to abide by the decision of counsel on the issue of priority in view of the evidence submitted to them. If counsel cannot agree on a decision, then the issue shall be referred to an arbiter agreed to by the parties whose decision shall be final.

3. Pickett and Chambers respectively agree to concede priority in said interference one to the other as priority may be decided by the action of counsel under

Digitized by Google

Paragraph 2 hereof, and Hercules and Foote respectively agree to acquiesce in such concession.

4. Hercules and Foote agree that when the issue of priority has been settled in accordance with Paragraphs 1, 2, and 3 hereof, Hercules will promptly execute and deliver to Foote and Foote will execute and simultaneously deliver to Hercules a free and exclusive license or licenses set forth in Paragraph 5 hereof under any United States patent or patents that may issue on their respective applications, or on any division or continuation thereof, for the full term thereof, and under and for the full term of any reissue or reissues of any such patent or patents; and Hercules and Foote further agree to thereafter promptly prosecute said application(s) to allowance and to promptly issue the patent(s) thereon.

5. The license or licenses executed and delivered under Paragraph 4 hereof shall carry the right to grant sublicenses, and shall be such as may be necessary, in view of the disclosures of said applications of Pickett and of Chambers, of the evidence submitted on their behalf, and of the determination of priority in accordance with Paragraphs 1, 2, and 3 hereof, to effect the following:

(A) To vest in Hercules the exclusive right to make, use, and sell, throughout the United States and its possessions, compositions and devices in accordance with the invention(s) described in said applications of Pickett and Chambers for firing an explosive by detonation (as distinguished from firing explosive by ignition), and compositions and devices for firing black powder when used for blasting purposes, or for firing fuse when used for blasting purposes; but always excepting and excluding compositions and devices which are themselves fired by percussion or by friction, for whatever purpose used, and compositions and devices (however themselves fired) for firing (whether by ignition, detonation, or otherwise) explosive comprised in projectiles, or explosive contained in fixed ammunition, or explosive otherwise used as a propellant, and any other compositions and devices for which Foote is to have exclusive rights under Clause (B) of this paragraph 5 of this agreement; and

(B) To vest in Foote the exclusive right to make, use, and sell, throughout the United States and its possessions, compositions and devices in accordance with the invention(s) described in said applications of Pickett and Chambers which fall into any of the following categories:

Compositions and devices which are themselves fired by percussion or by friction, for whatever purpose used;

Compositions and devices (however themselves fired) for firing an explosive by ignition (as distinguished from firing explosive by detonation); with the exception of compositions and devices for firing black powder when used for blasting purposes or for firing fuse when used for blasting purposes;

Compositions and devices (however themselves fired) for firing (whether by ignition, detonation, or otherwise) explosive comprised in projectiles, or explosive contained in fixed ammunition or otherwise used as a propellant.

(C) To vest in Hercules and Foote respectively nonexclusive licenses to make, use, and sell throughout the United States and its possessions any and all other compositions and devices, in accordance with the invention(s) described in said applications of Pickett and Chambers, for firing or igniting explosives or the like; always and only exceptiong those for which Hercules is to have exclusive rights under Clause (A) and those for which Foote is to have exclusive rights under Clause (B) of this paragraph 5 of this agreement.

In witness whereof, the parties Picket and Chambers have hereunto set their hands and seals and the parties Hercules and Foote have caused these presents to be signed by their proper officers and their corporate seals affixed on the date first above written.

Memorandum of agreement, entered into on the 22nd day of November 1927, by and between E. I. du Pont de Nemours & Company, a corporation of the State of Delaware, hereinafter referred to as du Pont Company, and Hercules Powder Company, a corporation of the State of Delaware, hereinafter referred to as Hercules Company;

Witnesseth:

Whereas du Pont Company represents that by reason of its experience and that of its subsidiary and affiliated companies in the design, contruction, and operation of ammonia oxidation and weak nitric acid plants, it has acquired and accumulated and has at its command information, data, and knowledge pertaining to such design, construction, and operation which will be of value to Hercules Company; and

Whereas Hercules Company has determined that it will erect an ammonia oxidation and weak nitric acid plant or plants and desires to avail itself of the knowledge, data, and information possessed by the du Pont Company and by its subsidiary and affiliated companies hereinbefore referred to upon the terms and conditions hereinafter set forth:

Now, therefore, the parties hereto have agreed and by these presents do agree with each other as follows:

1. Promptly upon the execution hereof, du Pont Company shall place at the disposal of Hercules Company all of the aforesaid knowledge, data, information, etc., pertaining to the design, construction, and operation of such ammonia oxidation and weak nitric acid plants, or pertaining to the manufacture of weak nitric acid from ammonia, and copies of its designs for such oxidation plants, and shall serve Hercules Company in an advisory capacity on all such matters, and du Pont Company, or its affiliated or subsidiary companies, shall grant to Hercules Company a nonexclusive right and license to use and employ, for the full term of any patents now or hereafter granted, any and all of the inventions, whether patented or unpatented, which the du Pont Company, or its affiliated or subsidiary companies, at this date has made or owns, relating to or capable of use in or in connection with any plant designed for ammonia oxidation, it being the intention hereof that Hercules Company, so far as such knowledge, data, and information are concerned, shall have the same advantages in connection with the design, construction, and operation of its said ammonia oxidation and weak nitric acid plants that du Pont Company would have in any of its own plants.

2. In consideration of the performance by du Pont Company of the conditions set forth in the preceding paragraph, Hercules Company agrees to pay to du Pont Company the sum of Ten Dollars ($10.00) per ton of rated capacity of any such ammonia oxidation plants so designed, constructed and operated by Hercules Company, which sum of Ten Dollars ($10.00) per ton of rated yearly capacity shall apply and be payable upon any and all extensions or enlargements of said plant and on all separate and independent ammonia oxidation plants designed, constructed, and operated by Hercules Company in the future, until the total fee paid by Hercules Company to du Pont Company at such rate shall equal the sum of Fifty Thousand Dollars ($50,000,000.00), after which no further charge for the service herein referred to shall be due or payable; it being understood and agreed in this regard that the rated capacity of any such plant or plants shall be based on the rated capacity in terms of 100% HNO_3 of the ammonia burners installed therein.

Payment shall be made to the du Pont Company following the operation of the new plant and not later than one month after its physical completion.

3. Du Pont Company agrees that should Hercules Company desire to avail itself of the same, the services of du Pont Engineering Company may be secured by Hercules Company for the design and construction of said ammonia oxidation plant or plants, which services in connection with the design work shall be furnished on the basis of cost of plans and specifications plus ten per cent (10%), and in connection with the construction work shall be furnished at cost of plant plus seven per cent (7%). But, such design and construction shall be approved by du Pont Company, and du Pont Company agrees that in the performance of its services hereunder, its best efforts shall and will be directed to the end that any such plant or plants designed and constructed by du Pont Engineering Company shall give equally good results in production, yields, and costs in relation to its size and location as the most efficient plant theretofore designed and constructed for du Pont Company; it being understood in this regard, however, that should Hercules Company desire the services of said du Pont Engineering Company for design work only, then and in that event the charge for such service shall be the cost thereof, plus thirty per cent (30%), it being further

Digitized by Google

understood and agreed that the term "cost" as used herein shall be actual cost determined in accordance with the accounting practice of said du Pont Engineering Company, and shall include all administrative and overhead charges of the departments actually engaged in the work, and in the event that Hercules Company shall decide to avail itself of such services, an independent contract will be entered into between Hercules Company and said du Pont Engineering Company.

4. Upon the execution of this agreement it is understood and agreed that the salaries, traveling expenses, and maintenance of du Pont Engineers and Chemists, while directly engaged in assisting Hercules Company in connection with the design and construction of said plant, or placing the same in operation, shall be paid by Hercules Company. Payment shall be made upon the receipt of invoices.

5. The du Pont Company shall, during the period of five years from the date hereof, disclose, transmit, and impart to Hercules Company all knowledge, data, and information which it shall develop or acquire, as and when developed or acquired, in connection with ammonia oxidation, and Hercules Company, during said period, shall likewise, disclose, transmit, and impart to the du Pont Company all knowledge, data, and information which it shall develop or acquire, as and when developed or acquired, in connection with the operation of its ammonia oxidation plants. In event that any patentable discovery or invention is made or conceived by either part to this agreement, its respective servants, agents and/or employes, at any time or times during the said period of five years, then the rights to use each and every such discovery or invention shall thereafter be enjoyed by both parties; and in the event that patent or patents is or are applied for and granted thereon, non-exclusive license or licenses shall be given, without cost, by the owner of the patent or patents, to the other party to this contract, such license or licenses to run for the full term of the patent or patents.

6. It is further understood and agreed that du Pont Company hereunder engages only to supply Hercules Company with the benefit of its best skill and experience as hereinbefore represented in connection with the operation of ammonia oxidation and weak nitric acid plants, and nothing herein contained shall be construed by Hercules Company as a guarantee on the part of du Pont Company of any rate of production or yields in any such ammonia oxidation plant erected by Hercules Company pursuant to the terms hereof.

7. Each party will treat as confidential all secret information, data, and knowledge imparted or delivered to it, under this agreement, by the other party, and the party receiving such information shall not reveal or disclose it to any person outside of its employ, or to any person or corporation whatsoever, without the consent of the other party. But this prohibition shall not apply to any information, data, or knowledge which is known to the scientific or technical world, or which is known to the party to whom disclosed, or which is of such a character that the same would have been available to the party to whom it is disclosed if this contract had not been executed, and in any such case, the party receiving such information shall be under no obligation to refrain from imparting, disclosing, or delivering it to others.

8. The benefits and obligations of this agreement shall inure to and be binding upon the parties hereto, and their successors, as well as any subsidiary of Hercules Company.

In witness whereof, the parties hereto have, for themselves, their successors, and assigns, caused this agreement to be executed and their respective corporate seals to be hereunto affixed on the day and year first above written.

This agreement made this 26th day of June, 1934, by and between The Grasselli Chemical Company, a corporation of the State of Delaware, hereinafter referred to as "Grasselli", and Hercules Powder Company, a corporation of the State of Delaware, hereinafter referred to as "Hercules":

Witnesseth:

Whereas Grasselli is the owner of the entire right, title, and interest in and to U. S. Letters Patent 1927963 dated Sept. 23, 1933, entitled "Catalyst for Ammonia Oxidation", and

Whereas, by agreement entered into on Nov. 22, 1927, by and between E. I. du Pont de Nemours & Company, a corporation of the State of Delaware, hereinafter referred to as "du Pont Company" and Hercules, wherein under paragraph 5 it is provided that the du Pont Company during the period of five years from the date thereof disclose, transmit and impart to Hercules all knowledge, data, and information which it shall develop or acquire, as and when developed or acquired, in connection with ammonia oxidation; and

Whereas Grasselli is a subsidiary of du Pont Company;

Now, therefore, for and in consideration of the sum of One Dollar ($1.00) paid by Hercules to Grasselli, the receipt whereof is hereby acknowledged, it is mutually agreed as follows:

1. Grasselli hereby grants to Hercules a non-exclusive, non-assignable license under the said United States Letters Patent 1927963 to practice the inventions covered by said Letters Patent throughout the United States of America, its territories and dependencies to the end of the time for which said Letters Patent were granted.

In witness whereof the parties hereto have caused this license to be executed, in duplicate, by their respective proper Officers thereunto duly authorized and their respective corporate seals to be hereunto affixed the day and year first above written.

[SEAL] THE GRASSELLI CHEMICAL COMPANY,

AGREEMENT

This agreement made this 6th day of September 1933, by and between E. I. du Pont de Nemours & Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware (hereinafter referred to as du Pont) and the Hercules Powder Company, a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at Wilmington, Delaware (hereinafter referred to as Hercules):

Witnesseth, that—

1. Whereas du Pont represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent No. 1879064, issued September 27, 1932, to Leon O. Bryan, and in and to the inventions described in said Letters Patent;

2. Whereas Hercules represents that it is the owner of the entire right, title, and interest in and to United States Letters Patent 1613334, issued January 4, 1927, to Ernest M. Symmes, and to the inventions described in said Letters Patent;

3. Whereas Hercules desires to obtain and du Pont is willing to grant to Hercules a non-exclusive, non-assignable license to practice the invention, to manufacture, use, and/or sell the products covered by the aforesaid U. S. Letters Patent 1879064 throughout the United States of America, its territories and dependencies; and

4. Whereas du Pont desires to obtain and Hercules is willing to grant to du Pont a non-exclusive, non-assignable, license to practice the invention, and manufacture, use, and/or sell the product covered by the aforesaid U. S. Letters

Digitized by Google

Patent 1613334 throughout the United States of America, its territories and dependencies;

5. Now, therefore, in view of the premises and in consideration of Five Dollars ($5.00) paid by each party to the other party, receipts of which are hereby acknowledged, it is hereby mutually agreed as follows:

LICENSE

6. Du Pont hereby grants to Hercules a non-exclusive, non-assignable license under said patent 1879064 to make, use, and/or sell throughout the United States of America, its territories and dependencies, the products described and claimed in said patent or any reissue thereof. No right to sub-license is given.

7. Hercules hereby grants to du Pont a non-exclusive, non-assignable license under said patent 1613334 to practice the process and make, use, and/or sell throughout the United States of America, its territories and dependencies, the products described and claimed in said patent or any reissue thereof. No right to sub-license is given.

DURATION

8. The license granted herein to Hercules by du Pont shall extend from July 7, 1933, for the full term of the said U. S. patent 1879064.

9. The license granted herein to du Pont by Hercules shall extend from July 7, 1933, for the full term of said U. S. patent 1613334.

PAST INFRINGEMENT

10. Neither of the parties to this agreement shall be liable to the other for any past infringement or contributory infringement of the patents which constitute the subject matter of this agreement, and each party is hereby released from all liability for infringement preceding this agreement.

SUITS

11. Neither party shall be under any obligation to institute suits or prosecute infringers under the aforesaid patents, nor shall either party be in any way responsible or liable to the other for failure to prosecute infringers. If either party elects to prosecute any infringers the conduct of such suits and any recoveries therein shall belong entirely to the party bringing the suit.

12. This written license contract embodies all of the understandings and agreements between the parties concerning the license herein granted, there being no other previous or contemporaneous understandings or agreements, oral or written, between the parties on the foregoing subject.

In witness whereof the parties hereto have caused these presents to be signed by their respective proper officers and their respective corporate seals to be hereto affixed as of the day and year first above written.

BYLAWS OF HERCULES POWDER CO., INC., AS REVISED AND AMENDED MARCH 20, 1928. ORGANIZED UNDER THE LAWS OF DELAWARE

ARTICLE I. STOCKHOLDERS

Digitized by Google

ARTICLE I. STOCKHOLDERS

SECTION 1. *Annual meeting.*—The annual meeting of stockholders shall be held at 11 o'clock in the forenoon on the third Tuesday of March in each year, if not a legal holiday, and if a legal holiday, then on the day next following not a legal holiday, at the principal office of the company in Wilmington, Del., when there shall be elected by ballot, by the majority vote of the stock outstanding entitled to vote, a board of directors, and such other business may be transacted thereat as may come before the meeting.

Digitized by Google

SEC. 2. *Special meetings.*—Special meetings of the stockholders may be called to meet at the principal office of the company in the State of Delaware, at any time, by the chairman of the board, by the president, or by a majority of the board of directors, or upon resolution of the board of directors, which call or resolution shall state the purpose or purposes thereof.

SEC. 3. The board of directors may, from time to time, by resolution, fix another place, inside or outside of the State of Delaware, where such meetings, annual or special, may be held.

SEC. 4. *Notice of meetings.*—The secretary shall cause notice of each meeting of the stockholders to be published once in each of the two calendar weeks next preceding the date of the meeting, in at least one newspaper published in the city of New York. In case of a special meeting, the notice shall indicate briefly the purpose of such meeting. The failure to publish notice of an annual meeting, or any irregularity in the notice of an annual or special meeting, or in the publication thereof, shall not affect the validity of such meeting, or of any proceedings thereat.

No notice of a special meeting shall be required if the owners or holders of record of all the stock entitled to vote shall waive such notice or shall meet thereat either in person or by proxy, and at such a meeting any corporate action may be taken.

SEC. 5. *Quorum.*—The holders of a majority of all of the shares of the capital stock of the company entitled to vote, if present, in person or by proxy, at any stockholders' meeting, shall constitute a quorum for all purposes, unless a larger number shall be required by law or charter provision, in which case the number so required, if present in person or by proxy, shall constitute a quorum.

If a quorum shall fail to attend, in person or by proxy, at any meeting, a majority in interest of the stockholders present, in person or by proxy, may adjourn from time to time, without notice other than by announcement at the meeting, until a quorum shall attend. At any such adjourned meeting at which a quorum shall be present, any business may be transacted which might have been transacted at the original meeting, had a quorum been present.

SEC. 6. *Organization of meeting.*—The chairman of the board of directors shall call meetings of the stockholders to order, and shall act as chairman of such meetings. In his absence or inability to act, the president shall preside. In the absence of the chairman and the president, or their inability to act, then a chairman shall be selected from among the vice presidents. In the absence of all these officers, or their inability to act, then the meeting shall elect a chairman. The secretary of the company shall act as secretary of all meetings of the stockholders, but in the absence of the secretary, the presiding officer may appoint any person to act as secretary of the meeting.

SEC. 7. *Order of business.*—The order of business at all meetings of stockholders shall be as follows:

1. Filing of the proof of notice.
2. Roll call.

A quorum being present:

3. Reading of minutes of preceding meeting, and action thereon.
4. Reports of committees.
5. Reports of officers.
6. Election of directors.
7. Unfinished business.
8. New business.

SEC. 8. *Voting.*—At each meeting of the stockholders, every stockholder entitled to vote thereat may do so in person, or by proxy appointed by instrument in writing, subscribed by such stockholder or his duly authorized attorney, and delivered to the inspectors at the meeting; and he shall have one vote for each share of stock entitled to vote, standing registered in his name, at the time of the closing of the transfer books for said meeting, or at any date fixed by resolution of the board of directors as a record date for the determination of the stockholders entitled to notice of, or to vote at, any such meeting, as the case may be. The votes for directors, and upon demand of any stockholder entitled to vote thereat, the votes upon any question before the meeting, shall be by ballot.

The treasurer shall prepare and make, at least 10 days before every election, a complete list of all stockholders entitled to vote, arranged in alphabetical order and indicating the number of shares held by each, certified under oath by the secretary or by the treasurer of the company. Such list shall be open at the place where such election is to be held, for 10 days, to the examination of any stockholder, and shall be produced and kept at the time and place of election, during

Digitized by Google

the whole time thereof, and subject to the inspection of any stockholder who may be present.

SEC. 9. *Inspectors.*—At each meeting of the stockholders, the polls shall be opened and closed; the proxies and ballots shall be received and be taken in charge, and all questions touching the qualification of voters and the validity of proxies and the acceptance or rejection of votes shall be decided by three inspectors, two of whom shall have power to make a decision. Such inspectors shall be appointed by the board of directors before the meeting, or, in default thereof, by the presiding officer at the meeting, and shall be sworn to the faithful performance of their duties. If any of the inspectors previously appointed shall fail to attend, or refuse or be unable to serve, substitutes shall be appointed by the presiding officer.

SEC. 10. The original or duplicate stock ledger containing the names and addresses of the stockholders, in alphabetical order, and the number of shares held by them, respectively, shall at all times during usual hours for business, be open to the examination of every stockholder, at the principal office of the company.

ARTICLE II. BOARD OF DIRECTORS

SECTION 1. The board of directors shall consist of seven (7) members.

SEC. 2. The number of directors may be increased at any time by the affirmative vote of a majority of the board of directors, at any regular or special meeting; and in such case, the additional director or directors may be chosen at said meeting to hold office until their successors are respectively elected and qualified. In the case of any vacancy in the board of directors, for any cause, the remaining directors, by affirmative vote of a majority thereof, may elect a successor to hold office for the unexpired portion of the term of the director whose place shall be vacant, or until election of a successor, or may, by resolution, reduce the number of directors to the number then in office.

SEC. 3. *Annual and regular meetings.*—The annual meeting of the board of directors shall be held at 11 o'clock in the forenoon on the fourth Wednesday in March of each year, if not a legal holiday, and if a legal holiday, then on the day next following not a legal holiday, at Wilmington, Del. The board may, by resolution, hold such meeting at such other place as it shall determine. Stated or regular meetings of the board may be held at such times and places as shall be determined from time to time by resolution of the board. No notice shall be required for any such annual, regular, or stated meeting of the board.

SEC. 4. *Special meetings.*—Special meetings of the board of directors shall be held whenever called by direction of the chairman of the board, of the president, or of one-third of the directors then in office.

The secretary shall give notice of such special meetings by mailing the same at least 2 days before the meeting, or by telegraphing the same at least 1 day before the meeting, to each director, but such notice may be waived by any director. Unless otherwise indicated in the notice thereof, any and all business may be transacted at a special meeting. At any meeting at which every director shall be present, or at which a quorum is present and those not present have waived notice, any business may be transacted, irrespective of notice or call.

SEC. 5. *Quorum.*—A majority of the board of directors, for the time being in office, shall constitute a quorum. If there be less than a quorum present at any meeting, a majority of those present may adjourn the meeting from time to time. The affirmative vote of a majority of all the directors, for the time being in office, shall be necessary for the transaction of any business or the passage of any resolution.

SEC. 6. *Order of business.*—At meetings of the board of directors business shall be transacted in such order as from time to time the board may determine by resolution.

SEC. 7. *Powers of the board of directors.*—The board of directors shall have the management and control of the property and of the business and affairs of the company, and, subject to restriction imposed by law, the certificate of incorporation, and the bylaws, may exercise all the powers of the company.

SEC. 8. *Bonus plan.*—The directors shall have power to continue, and from time to time to alter, revise, or amend a plan for awarding bonuses to those of the company's employees, including employees who are also directors, who, in the judgment of a majority of the directors then in office, are entitled to such bonuses; *Provided, however,* That no employee who is also a director shall receive a bonus under said plan, unless the same is recommended by the president and the chairman of the board.

Digitized by Google

ARTICLE III. EXECUTIVE COMMITTEE AND FINANCE COMMITTEE

SECTION 1. The board of directors, as and when it shall determine it to be advisable, shall elect from the directors an executive committee and/or a finance committee, and shall designate for each of these committees a chairman, and, if desired, a vice chairman. The board of directors shall fill vacancies in the executive committee or in the finance committee by election from the directors, and at all times it shall be the duty of the board of directors to keep the membership of each such committee full; provided, always, that such committees, when established, shall exist at the pleasure of the board. All action by the executive or by the finance committee shall be reported to the board of directors at its next meeting succeeding such action, and shall be subject to revision or alteration by the board of directors, provided that no act or rights of third parties shall be affected by any such revision or alteration. The executive commitee and the finance committee each shall fix its own rules of procedure, and shall meet where and as provided by such rules or by resolution of the board of directors, but in every case the presence of a majority shall be necessary to constitute a quorum.

In every case the affimative vote of a majority of all the members of a committee shall be necessary to its adoption of any resolution.

SEC. 2. The executive committee shall consist of such number as the board of directors shall from time to time determine.

During the intervals between meetings of the board of directors, the executive committee shall possess, and may exercise, all the powers of the board of directors, in the management and direction of all the business and affairs of the company (except matters assigned to the finance committee), in such manner as the executive committee shall deem for the best interests of the company, in all cases in which specific directions shall not have been given by the board of directors. During the intervals between meetings of the executive committee, the chairman thereof shall possess, and may exercise, such of the powers vested in the executive committee as from time to time may be conferred upon him by resolution of the board of directors, or of the executive committee.

SEC. 3. The finance committee shall consist of such number as the board of directors shall from time to time determine.

The finance committee shall have special and general charge and control of all financial affairs of the company, and such other matters as may be assigned to it from time to time by the board of directors.

During the intervals between meetings of the board of directors, the finance committee shall possess, and may exercise, all the powers of the board of directors, in the management of the financial affairs of the company, and such other matters as may be assigned to it from time to time by the board of directors, such manner as said committee shall deem to be to the best interests of the company, in all cases where specific directions shall not have been given by the board of directors.

During the intervals between meetings of the finance committee, the chirman thereof shall possess, and may exercise, such of the powers vested in the finance committee as from time to time may be conferred upon him by resolution of the board of directors, or of the finance committee.

SEC. 4. In case only an executive committee is created, then that committee, in addition to the powers heretofore given it, shall have all the powers and duties given to the finance committee, and the chairman and the vice chairman thereof shall fill all the offices and perform all the duties herein respectively given to the chairman and vice chairman of the finance committee. In case only a finance committee is created, then that committee, in addition to the powers heretofore given it, shall have all the powers and duties given to the executive committee, and the chairman and the vice chairman thereof shall fill all the offices and perform all the duties herein respectively given to the chairman and vice chairman of the executive committee.

ARTICLE IV. OFFICERS

SECTION 1. The executive officers of the company shall be a chairman of the board of directors, a president, one or more vice presidents, a secretary, and a treasurer, and if the board of directors shall so determine, one or more assistant secretaries and assistant treasurers, all of whom shall be elected by the board of directors.

The board of directors may appoint such other officers as it shall deem necessary, who shall have such authority and shall perform such duties as from time to time may be prescribed by the board of directors. The powers and duties of

Digitized by Google

the chairman of the board of directors and of the president may be exercised and performed by the same person. The powers and duties of the treasurer and secretary may be exercised and performed by the same person. The board of directors may leave unfilled for any such period as it may fix by resolution any offices except those of president, treasurer, and secretary.

All members of all committees, all officers, and all agents shall be subject to removal or suspension at any time by the affirmative vote of a majority of the directors then in office. All officers, agents, and employees other than those appointed by the board of directors, may be suspended or removed by the committee, or by the officer appointing them.

SEC. 2. *Powers and duties of the chairman of the board.*—The chairman of the board shall preside at all meetings of the board of directors, and shall have supervision of such matters as may be delegated to him by the board of directors.

In the absence of the chairman of the board, or his inability to act, the president shall preside.

In the absence of the chairman of the board and the president, or their inability to act, then that director shall preside who, by previous resolution of the board, has been designated to perform the duties of the chairman of the board in such absences or inabilities. In the absence of such designation the board shall determine who shall preside.

SEC. 3. *Powers and duties of the president.*—Subject to the approval, direction, or authorization of the board of directors, the president shall have general management of the company, as well as general charge of its business and property; he shall appoint and discharge employees and agents of the company and determine their compensation. He may execute all authorized bonds, contracts, and agreements, and shall do and perform all acts incident to the office of president, or which are authorized or required by law.

In the absence of the president, or his inability to act, then that director shall act who, by previous resolution of the board, has been designated to perform the duties of the president in his absence or inability to act. In the absence of such designation, the board shall determine who shall perform such duties.

SEC. 4. *Powers and duties of the vice president.*—Each vice president shall have such powers, and shall perform such duties, as may be assigned to him by the board of directors.

SEC. 5. *Powers and duties of the treasurer.*—The treasurer shall be the principal officer in charge of the accounts and accounting department of the company. He shall have the custody of all moneys, securities, contracts, and deeds, and all valuable papers and documents of the company; shall place the same for safe keeping in such depositories as may be designated by the board of directors; shall keep, or cause to be kept, a book or books setting forth the true records of the receipts, expenditures, assets, liabilities, losses, and gains of the company; shall at all reasonable times exhibit his books and accounts to any director of the company, upon application at the office of the company during business hours; and shall, when and as required by the president or the board of directors, render a statement of the financial condition of the company. He shall have charge of the stock certificate books, transfer books, and stock ledgers of the company. He shall register and transfer stock of the company, or cause the same to be done, under such regulations as may be prescribed by the board of directors. He, or an assistant treasurer of the company, shall countersign certificates of stock, bonds, and debentures of the company, and he shall perform all acts incident to the position of treasurer, subject to the control of the board of directors.

The treasurer shall give the company a bond for the faithful discharge of his duties, in such amount and with such surety as shall be prescribed and approved by the board of directors.

By virtue of his office, the treasurer shall be an assistant secretary, and shall have such powers, and may perform such duties, as may be assigned to him by the board of directors.

SEC. 6. *Powers and duties of the assistant treasurer.*—Each assistant treasurer shall have such powers, and shall perform such duties, as may be assigned to him by the board of directors, and shall give bond for the faithful performance of his duties, in such sum and with such surety as the board of directors may require.

SEC. 7. *Powers and duties of the secretary.*—The secretary shall keep the minutes of all the meetings of the board of directors, and the minutes of all the meetings of the stockholders; he shall attend to the giving and serving of all notices of the company; he shall have custody of the seal of the company, he shall attest the execution of all contracts and other instruments authorized by the board of directors; and, when so required, shall affix the seal of the company thereto; he

Digitized by Google

shall have charge of such books, records, and other papers as the board of directors may direct, all of which shall, at all reasonable times, be open to the examination of any director, upon application at the office of the company during business hours, and he shall in general perform all the duties incident to the office of secretary, subject to the control of the board of directors.

By virtue of his office the secretary shall be an assistant treasurer and shall have such powers, and shall perform such duties, as may be given or assigned to him by the board of directors. The secretary shall be sworn to the faithful discharge of his duties.

SEC. 8. *Powers and duties of the assistant secretary.*—Each assistant secretary shall have such power, and shall perform such duties, as may be assigned to him by the board of directors, and shall be sworn to the faithful discharge of his duties.

SEC. 9. *Voting upon stock.*—Unless otherwise ordered by the board of directors, the chairman of the board of directors, the president, or any vice president who is also a director, shall each have full power and authority, in behalf of the company, to attend and to act and to vote, in person or by proxy, at any meeting of the stockholders of any company in which the company may hold stock, and at any such meeting shall possess, and may exercise, any and all the rights and powers incident to the ownership of such stock, and which, as the owner thereof, the company might have possessed and exercised, if present. The board of directors, by resolution, from time to time, may confer like powers upon any other person or persons.

SEC. 10. *Endorsement of securities for transfer.*—The chairman of the board of directors, the president, and the chairman of the finance committee shall each have power to endorse and deliver, for sale, assignment, or transfer, certificates of stock or bonds, or other securities, registered in the name of or belonging to this company, whether issued by this company or by any other corporation, government, state, or municipality; and the board of directors from time to time may confer like power upon any other officer, agent, or person, by resolution duly adopted at any regular or special meeting of the board of directors. Every such endorsement must be countersigned by the treasurer or an assistant treasurer.

ARTICLE V

SECTION 1. *Certificate of shares.*—The certificate for shares of the capital stock of the company shall be in such form, not inconsistent with the certificate of incorporation, as shall be prescribed by the board of directors. The president shall issue, or cause to be issued, to each stockholder, a certificate or certificates signed by himself or a vice president, and countersigned by the treasurer or an assistant treasurer, with the seal of the company affixed thereto, certifying the number of shares of stock of the company owned by such stockholder. No certificate shall be valid unless it is signed by the president or a vice president, and countersigned by the treasurer or an assistant treasurer.

SEC. 2. Shares of stock of the company shall be transferable only upon its books by the holder or holders thereof, in person or by proxy, or by his or their duly authorized attorney or legal representative, who shall, at such time, surrender to the company the old certificate or certificates, and receive new certificates in exchange therefor. Surrendered certificates shall be canceled at the time of such transfer. Each transfer shall be recorded, and the original record, or duplicate thereof, shall be kept at the principal office of the company in the State of Delaware.

SEC. 3. *Regulations.*—The board of directors may make rules and regulations concerning the issue, transfer, and registration of certificates for shares of the capital stock of the company.

The board of directors may appoint a transfer agent and a registrar of transfers, and may require all stock certificates to bear the signature of such transfer agent and of such registrar of transfers.

SEC. 4. *Closing of transfer books or fixing record date.*—The board of directors shall have power to close the stock transfer books of the company for a period not exceeding 40 days, nor less than 10 days, preceding the date of any meeting of stockholders, or the date for the payment of any dividend, or the date for allotment of rights, or the date when any change or conversion or exchange of capital stock shall go into effect: *Provided, however,* in lieu of closing the stock transfer books of the company, the board of directors may fix in advance a date not exceeding 40 days, nor less than 10 days, preceding the date of any meeting of stockholders, or the date for the payment of any dividend, allotment of rights, change, or conversion or exchange of capital stock, as a record date for the

Digitized by Google

determination of the stockholders entitled to notice of, and to vote at, any such meeting, or entitled to receive payment of any dividend, allotment of rights, or exercise the right in respect of any change, conversion, or exchange of capital stock, as aforesaid.

SEC. 5. *Dividends.*—Dividends may be declared by the board of directors in its discretion from surplus or net profits of the company.

SEC. 6. *Working capital.*—Before making any distribution of profits, there may be set aside out of the net profits of the company, such sum or sums as the directors from time to time, in their absolute discretion, deem expedient, for working capital, or for the expansion of the business, or for contingencies, or for equalizing dividends, or for any other purpose, and all profits of any year not distributed as dividends, shall be deemed to have been thus set apart by the directors.

ARTICLE VI. GENERAL PROVISIONS

SECTION 1. *Notice.*—Unless otherwise expressly provided, any notice required by these bylaws to be given to any person, or persons, shall be in writing, and may be given by duly depositing the same in a post office or letter box in a post-paid sealed wrapper, addressed to such person or persons at his or their address as the same appears on the books of the company, and such notice shall be held to have been given on the day of such deposit.

SEC. 2. *Corporate seal.*—The company shall have a seal, upon which shall be inscribed its name, the year of its creation, and the word "Delaware."

A duplicate of the seal may be kept and used by the treasurer, or by any assistant secretary or assistant treasurer, when specially authorized by the board of directors.

Sec. 3. *Adjournments.*—Whenever at any meeting provided for in these bylaws less than a quorum shall be present or represented, such meeting may thereupon be adjourned from time to time by a majority vote of those present or represented, without notice, until a quorum shall be present or represented: *Provided, however,* That no adjournment shall be for a period exceeding 1 month at any one time. Any meeting at which a quorum is present or represented may be adjourned in the same manner for such time as may be fixed by a majority vote at such meeting. At any adjourned meeting, whenever a quorum is present, any business may be transacted which could have been transacted at the meeting originally called, had a quorum been present.

ARTICLE VII

SECTION 1. These bylaws may be amended, repealed, or altered, in whole or in part, by a majority vote of the entire outstanding stock of the company entitled to vote, at any regular meeting of the stockholders, or at any special meeting where such action has been announced in the call and notice of such meeting.

SEC. 2. The board of directors may adopt additional bylaws in harmony therewith but shall not alter nor repeal any bylaws adopted by the stockholders of the company.

I hereby certify that the foregoing is a true and correct copy of the bylaws of Hercules Powder Co.

Witness my hand and the corporate seal of the company this _____ day of _____ 19_____.

_____

Secretary.

AMENDED CERTIFCATE OF INCORPORATION OF HERCULES POWDER CO.

CERTIFICATE OF INCORPORATION OF HERCULES POWDER CO.

1. The name of the corporation is Hercules Powder Co.

2. The principal office of the corporation in the State of Delaware is to be located in the city of Wilmington, county of New Castle. The name of the resident agent in charge thereof, upon whom process against this corporation may be served, is G. H. Markell.

3. The nature of the business of the corporation, and the objects or purposes proposed to be transacted, promoted or carried on by it are as follows, to wit:

(*a*) To produce, manufacture, and otherwise prepare, and to buy, sell, store, transport, distribute, and otherwise acquire, use, dispose of and deal in and with (1) powder, dynamite and all other explosives of every name and nature; (2) any

Digitized by Google

and all articles, munitions, appliances, products and things in which or in the manufacture, production, or preparation of which any of the above-mentioned products or commodities may be ingredients or factors; (3) any materials, supplies, products, articles, appliances, machinery or other thing which may be used in or in connection with the manufacture, production, preparation, use, purchase, sale, or distribution of any of the products, commodities, articles, and things aforesaid.

(*b*) To purchase or otherwise acquire, hold, own, occupy, develop, improve, sell, dispose of and convey real property and any and every interest therein either within or without the State of Delaware and anywhere in the world; to extract, remove, produce or prepare from any such property any animal, vegetable, mineral or other product or material therein or thereon, either by agricultural pursuits, mining, quarrying, or by any other method, or means now known or that may hereafter be discovered or invented, and to avail itself in every manner of each and every resource of such property by reducing it to proper form and by use, sale, or other disposition thereof.

(*c*) To manufacture, acquire, own, sell, or otherwise dispose of all kinds of goods, merchandise, and personal property of every nature whatsoever either within or without the State of Delaware and anywhere in the world.

(*d*) To engage in all kinds of business, including the following but without excluding others: All manufacturing, milling, mining, quarrying, building, construction and industrial works and operations; development and utilization of every kind of power; the acquirement, construction, use, operation, sale, and other disposition of all kinds of machinery, plants, factories, warehouses, elevators, boats, ships, buildings, and other structures, and generally the utilization of all instrumentalities, methods, processes and appliances, in all ways and by all means now known or which may hereafter be discovered or invented.

(*e*) To apply for, obtain, register, purchase, lease, or otherwise to acquire, and to hold, use, own, operate, and introduce, and to sell, assign or otherwise to dispose of any trade marks, trade names, brands, copyrights, concessions, patents, inventions, formulae, improvements and processes used in connection with or secured under letters patent of the United States, or any other country, or otherwise, and to use, exercise, develop, grant licenses in respect of, or otherwise to turn to account any such trade marks, copyrights, concessions, patents, licenses, processes and the like, or any such property or rights.

(*f*) To subscribe or cause to be subscribed for, and to purchase or otherwise acquire, hold for investment, or otherwise, sell, assign, transfer, mortgage, pledge, exchange, distribute or otherwise dispose of the whole or any part of the shares of the capital stock, bonds, coupons, mortgages, deeds of trust, debentures, securites, obligations, evidences of indebtedness, notes, good will, rights, assets and property of any and every kind whatsoever, or any part thereof of itself or any other corporation or corporations, stock companies, association or associations, now or hereafter existing, and whether created by or under the laws of the State of Delaware, or of any other State, district, territory, or colony of the United States, or any other country or otherwise, and to use, operate, manage, and control such properties or any of them, either in the name of such other corporation or corporations, stock company or association, or in the name of this corporation, and while owners of any of said shares of capital stock or bonds or other property to exercise all the rights, powers, and privileges of ownership of every kind and description, including the right to vote thereon, with power to designate some person for that purpose from time to time to the same extent as natural persons might or could do.

(*g*) To endorse, guarantee, and secure the payment and satisfaction of the bonds, coupons, martgages, deeds of trust, debentures, securities, obligations, evidences of indebtedness, and shares of the capital stock of other corporations, and also to undertake the whole or any part of the assets and liabilities, existing or prospective, of any person, firm, or association, also to procure any other person or corporation to assume any such obligation or obligations.

(*h*) Without in any particular limiting any of the objects and powers of the corporation, it is hereby expressly declared and provided that the corporation shall have power to do all the things hereinbefore enumerated, and also to issue or exchange stock, bonds, and other obligations in payment for property purchased or acquired by it, or for any other object in or about its business; to borrow money without limit; to mortgage or pledge its franchises, real or personal property, income and profits accruing to it, any stocks, bonds or other obligations, or any property which may be acquired by it, but subject to subdivision J of article VII hereof; to secure any bonds or other obligations by it issued or incurred; to guarantee any bonds or contracts, or other obligations; to make and perform contracts of any kind and description, and in carrying on its business,

Digitized by Google

or for the purpose of attaining or furthering any of its objects, to do any and all other acts and things, and to exercise any and all other powers which a copartnership or natural person could do and exercise, and which now or hereafter may be authorized by law in any part of the world.

(*i*) To carry on any business whatsoever which the corporation may deem proper or convenient in connection with any of the foregoing purposes or otherwise, or which may be calculated directly or indirectly to promote the interests of the corporation or to enhance the value of its property; and it is the purpose of the corporation from time to time to do any one or more of the acts and things herein set forth and it may conduct its business in other States, in the Territories, the District of Columbia, the colonies and dependencies and in foreign countries and places; it may have one office or more than one office and keep the books of the company outside the State of Delaware, except as otherwise provided by law.

4. The total authorized capital stock of the corporation is ten million dollars ($10,000,000), divided into one hundred thousand (100,000) shares of the par value of one hundred dollars ($100) each.

Of such authorized capital stock twenty thousand shares (20,000) amounting to two million dollars ($2,000,000) shall be nonvoting capital stock, and eighty thousand shares (80,000) amounting to eight million dollars ($8,000,000) shall be voting capital stock. The holders of nonvoting capital stock shall have no right to vote thereon at any corporate meeting; but such nonvoting capital stock shall be equal in every other respect with the voting capital stock and shall entitle the holders thereof to equal participation with the holders of voting capital stock in all earnings and dividends, and in any distribution of the company's property upon liquidation or dissolution or winding up (whether voluntary or involuntary).

Except as to nonvoting capital stock owned or held by the following individuals and corporations, viz: Thomas Coleman du Pont, Pierre S. du Pont, Alexis I. du Pont, Alfred I. du Pont, Eugene du Pont, Eugene E. du Pont, Henry F. du Pont, Irénée du Pont, Francis I. du Pont, Victor du Pont, Jr., Jonathan A. Haskell, Arthur J. Moxham, Hamilton M. Barksdale, Edmund G. Buckner, Frank L. Connable, Hazard Powder Co., Laflin & Rand Powder Co., the Eastern Dynamite Co., Fairmont Powder Co., Judson Dynamite & Powder Co., Delaware Securities Co., Delaware Investment Co., California Investment Co., E. I. du Pont de Nemours & Co. of Pennsylvania, du Pont International Powder Co., E. I. du Pont de Nemours Powder Co., and E. I. du Pont de Nemours & Co., the holders of nonvoting capital stock shall have the right at any time to exchange nonvoting capital stock, share for share, for voting capital stock, upon surrender of the certificate evidencing the nonvoting stock so to be exchanged duly endorsed by the owner of record thereof; provided, always, that upon the transfer through death or by will from any one of the individuals or corporations above named of any nonvoting stock of the corporation to some person or persons, other than one of the aforesaid individuals or corporations, or upon the sale by any one of the aforesaid individuals or corporations of nonvoting stock in said corporation to some person or persons, firms, or corporations, other than one of the aforesaid corporations or individuals, or the respective wives or children of said individuals, the nonvoting stock so sold or transferred may be exchanged by the legatee, transferee, or purchaser, share for share, for voting stock of the corporation.

From time to time the capital stock may be increased according to law, but no such increase shall be made without the consent in the manner provided by law of not less than two-thirds in interest of the class of stock so to be increased, and may be issued in such amounts and proportions as shall be determined by the board of directors, and as may be permitted by law. Stockholders of the corporation at the time any such increase in capital stock is issued, shall have a prior right to subscribe for the increased capital stock pro rata to their stockholdings in the corporation.

The amount of capital stock with which the corporation will commence business is two thousand dollars ($2,000).

5. The names and places of residence of each of the original subscribers to the capital stock are as follows: Russell H. Dunham, Wilmington, Del.; John J. Raskob, Claymont, Del.; J. P. Laffey, Wilmington, Del.

6. The duration of the corporation shall be perpetual.

7. The number of directors of the corporation shall be fixed from time to time by the bylaws, and the number may be increased or decreased as therein provided.

In case of any increase in the number of directors the additional directors shall be elected as provided by the bylaws, by the directors, or by the stockholders at an annual or a special meeting.

In case of any vacancy in the board of directors for any cause, the remaining directors, by affirmative vote of a majority of the whole board of directors, may

Digitized by Google

elect a successor to hold office for the unexpired term of the director whose place is vacant, and until the election of a successor.

In furtherance but not in limitation of the powers conferred by law, the board of directors are expressly authorized:

(*a*) To hold their meetings outside of the State of Delaware at such places as from time to time may be designated by the bylaws or by resolution of the board. The bylaws may prescribe the number of directors necessary to constitute a quorum of the board of directors, which number must not be less than a majority of the whole number of directors.

(*b*) To appoint the regular officers of the corporation, and such other officers as they may deem necessary for the proper conduct of the business of the company.

(*c*) To remove at any time any officer elected or appointed by the board of directors, but only by the affirmative vote of a majority of the whole board of directors.

(*d*) To remove any other officer or employee of the corporation or to confer such power on any committee or superior officer of the corporation, unless such removals are otherwise regulated by the bylaws.

(*e*) To appoint, but only by an affirmative vote of a majority of the whole board and from the members of the board, an executive committee, of which a majority shall constitute a quorum, and such committee may exercise any or all of the power of the board of directors to the extent provided in the bylaws, including the power to cause the seal of the corporation to be affixed to any necessary papers.

(*f*) To appoint any other standing committees by the affirmative vote of a majority of the whole board, and such standing committees shall have and may exercise such powers as shall be conferred or authorized by the bylaws.

(*g*) To issue the stock in such amounts and proportions as they may determine up to the total amount of the authorized capital stock or any increase thereof.

(*h*) From time to time to fix and determine and to vary the sum to be reserved over and above its capital stock paid in as working capital before declaring any dividends among its stockholders; to direct and determine the use and disposition of any surplus or net profits over and above the capital stock paid in; to fix the time of declaring and paying any dividend, and, unless otherwise provided in the bylaws, to determine the amount of any dividend. All sums reserved as working capital or otherwise may be applied from time to time to the acquisition or purchase of its bonds or other obligations or shares of its own capital stock or other property to such extent and in such manner and upon such terms as the board of directors shall deem expedient, and neither the stock, bonds, or other property so acquired shall be regarded as accumulated profits for the purpose of declaring or paying dividends unless otherwise determined by the board of directors; but shares of such capital stock so purchased or acquired may be resold, unless such shares shall have been retired for the purpose of decreasing the company's capital stock as provided by law.

(*i*) From time to time to determine whether and to what extent, and at what times and places, and under what conditions and regulations, the accounts and books of the corporation, or any of them, shall be open to the inspection of the stockholders, and no stockholder shall have any right to inspect any account or book or document of the corporation, except as conferred by statute, or authorized by the board of directors or by a resolution of the stockholders.

(*j*) Unless the holders of at least a majority of the voting capital stock of the corporation then outstanding consent thereto in writing filed with the directors or by vote in person or by proxy at a meeting specially called for that purpose, or at an annual meeting, the board of directors shall not mortgage or pledge any of its real property or any shares of the capital stock, or bonds of any other corporation; but this prohibition shall not be construed to apply to the execution of any purchase money mortgage or any other purchase money lien.

(*k*) With the written assent, without a meeting of the holders of two-thirds of its stock, or pursuant to the affirmative vote, in person or by proxy, at any meeting called as provided in the bylaws, of the holders of two-thirds of its stock, issued and outstanding, the board of directors may sell, convey, assign, transfer, or otherwise dispose of, the property, assets, rights, and privileges of the corporation, as an entirety, for such consideration and on such terms as they may determine.

(*l*) Any or all of the rights, powers or privileges herein granted or conveyed may be enlarged, amended, altered, changed or repealed by certificate of amendment authorized and filed in any manner now or hereafter permitted by the laws of the State of Delaware.

In witness whereof we, the undersigned, in order to form a corporation for the purposes and objects hereinbefore stated under and pursuant to the provisions of an act of the legislature of the State of Delaware, entitled "An act providing a general corporation law" (approved Mar. 10, A. D. 1899) and the acts amendatory thereof and supplemental thereto, have hereunto set our hands and seals on this 17th day of October, A. D. 1912.

R. H. DUNHAM.
JOHN J. RASKOB.
J. P. LAFFEY.

In the presence of—

C. R. MUDGE.

STATE OF DELAWARE,
County of New Castle, ss:

Be it remembered, that on this 17th day of October, A. D. 1912, personally came before me, Percy E. Strickland, a notary public in and for the county and State aforesaid, Russell H. Dunham, John J. Raskob, and J. P. Laffey, parties to the foregoing certificate of incorporation, known to me personally to be such, and severally acknowledged the said certificate to be the act and deed of the signers respectively, and that the facts therein stated are truly set forth.

Given under my hand and seal of office the day and year aforesaid.

PERCY E. STRICKLAND, *Notary Public.*

My commission expires May 24, 1914.

Percy E. Strickland, notary public, appointed May 25, 1910; term of office, 4 years; State of Delaware.

STATE OF DELAWARE,
Office of Secretary of State:

I, A. R. Benson, secretary of state of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of certificate of incorporation of the Hercules Powder Co., as received and filed in this office the 18th day of October, A. D. 1912, at 9 o'clock a. m.

In testimony whereof I have hereunto set my hand and official seal at Dover, this 23d day of May in the year of our Lord one thousand nine hundred and twenty-one.

[SEAL] A. R. BENSON, *Secretary of State.*

CERTIFICATE OF AMENDMENT OF CERTIFICATE OF INCORPORATION OF HERCULES POWDER CO.

The certificate of the Hercules Powder Co. of the vote of the stockholders of said company, upon the four amendments of its certificate of incorporation, made under and pursuant to the provisions of an act of the Legislature of the State of Delaware, entitled "An act providing a general corporation law", approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto.

The Hercules Powder Co. a corporation having a capital stock, organized and existing under and pursuant to said act of the Legislature of the State of Delaware, and the acts amendatory thereof and supplemental thereto, by its president and secretary, and under its corporate seal, does hereby certify as follows:

First. That it appears, by the duplicate certificate of Gould G. Rheuby and Robert H. Richards, the judges duly appointed by resolution of the board of directors of said company, duly adopted January 6, A. D. 1914, for the purpose of conducting and counting the vote of the stockholders of said company, at a meeting of said stockholders, held on the 22d day of January, A. D. 1914, at the principal office of the company in room no. 696 of the building situate at the northwest corner of Tenth and Market Streets, in the city of Wilmington, State of Delaware, duly called to consider and to take action upon the resolution of said board adopted on the 6th day of January, A. D. 1914, declaring the advisability of the four proposed amendments to the certificate of incorporation of said company, that at said stockholders' meeting at a vote of the stockholders of said company then having a right to vote thereat, was by ballot in person or by proxy, duly taken for and against the said four proposed amendments; that said vote was conducted by said judges; that said judges decided upon the qualification of the stockholders voting at said meeting for or against said four proposed amendments; that the total number of shares of the voting capital stock of said company, issued and outstanding during all the said 22d day of January, and all the time the said vote was being taken by said stockholders on said four proposed

Digitized by Google

amendments, was 47,298 shares; that during all of such time, the total number of shares of nonvoting capital stock of said company issued and outstanding, was 15,831 shares; that when said vote was completed, said judges did count and ascertain the number of shares respectively voted for and against said four proposed amendments, and declared that the persons or bodies corporate holding a majority of the stock of said company then having voting power (there being but one class of stock of said company then having voting power), had voted a majority of said voting capital stock, for said four proposed amendments; that out of the said total of 47,298 shares of the said voting capital stock of said company issued and outstanding as aforesaid, 40,982 shares thereof were voted for and in favor of each and all of said proposed amendments; that no shares of said voting capital stock was voted against said proposed amendments; that said shares of the voting capital stock of said company so voted as aforesaid, for all said amendments, was a majority of all the capital stock of said company, including voting capital stock and nonvoting capital stock, then issued and outstanding.

Second. That attached hereto and marked "Exhibit A", is a true copy of the said four amendments to the certificate of incorporation of this company, as the same were adopted at the stockholders' meeting as aforesaid; that said four amendments so adopted at said stockholders' meeting are the said four amendments declared to be advisable by the said resolution last above mentioned, and that said meeting was called and held upon due notice thereof first being given to said stockholders, in accordance and compliance with the bylaws of said company.

Third. That also attached hereto and marked "Exhibit B", is one of the duplicate certificates made by the said judges, of the stockholders' vote at said stockholders' meeting, for and against said four amendments.

Fourth. That the persons or bodies corporate holding a majority of the stock of the said company then having voting power (there being but one class of stock of said company then having voting power), voted at said meeting a majority of said voting capital stock for said four proposed amendments; that of the said total of 47,298 shares of the said voting capital stock of said company then issued and outstanding as aforesaid, 40,982 shares thereof were at said meeting, voted for and in favor of each and all of said four proposed amendments; that no shares of said voting capital stock were voted against said proposed amendments; that said shares of the voting capital stock of said company so voted as aforesaid, for all said amendments, was a majority of all the capital stock of said company, including voting capital stock and nonvoting capital stock, then issued and outstanding.

In witness whereof the said Hercules Powder Co. has made under its corporate seal and the hand of Russell H. Dunham, its president, and the hand of George H. Markell, its secretary, the foregoing certificate, and the said president and secretary have hereunto respectively set their hands, and caused the corporate seal of said company to be hereunto affixed this 22d day of January, A. D. 1914.

[SEAL] R. H. DUNHAM, *President.*
GEO. H. MARKELL, *Secretary.*

STATE OF DELAWARE,
County of New Castle, ss:

Be it remembered, that on this 22d day of January, A. D. 1914, I, Aaron Finger, a notary public for the State of Delaware, hereby certify that Russell H. Dunham, president of the Hercules Powder Co., personally known to me to be such, duly executed the foregoing certificate, with exhibit A and exhibit B thereto attached, before me, and that the said Russell H. Dunham, president, as aforesaid, duly acknowledged that the signature of the said president and of the secretary of said company, to said certificate appended, are in the handwriting of the president and secretary of said company, respectively, and that the corporate seal to said certificate affixed, is the common and corporate seal of said company, and that the same was duly affixed by the authority of the stockholders of said company.

In witness whereof I have hereunto set my hand and seal of office the day and year aforesaid.

AARON FINGER, *Notary Public.*

Aaron Finger, notary public. Appointed June 22, 1911, for 4 years, Delaware.

EXHIBIT A

The four amendments to the certificate of incorporation of the Hercules Powder Co., a corporation organized and existing under and pursuant to the provisions of an act of the Legislature of the State of Delaware, entitled "An act providing

Digitized by Google

a general corporation law", approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, and which certificate of incorporation was filed in the office of the secretary of state of said State on the 18th day of October, A. D. 1912, at 9 o'clock a. m.

That the certificate of incorporation of said company so filed be amended, under and pursuant to the provisions of said act of the Legislature of the State of Delaware, entitled "An act providing a general corporation law", approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, as follows, viz.:

First: By striking out all of section 4 of said certificate, and inserting in lieu thereof, the following:

"The total authorized capital stock of the corporation is twenty million dollars ($20,000,000), divided into two hundred thousand (200,000) shares, of the par value of one hundred dollars ($100) each.

"Of such authorized capital stock, one hundred thousand (100,000) shares, amounting to ten million dollars ($10,000,000), shall be preferred stock, and one hundred thousand (100,000) shares, amounting to ten million dollars ($10,000,000), shall be common stock.

"Of such authorized common stock, twenty thousand (20,000) shares, amounting to two million dollars ($2,000,000), shall be nonvoting common stock, and eighty thousand (80,000) shares, amounting to eight million dollars ($8,000,000), shall be voting common stock.

"The holders of nonvoting common stock shall have no right to vote thereon at any corporate meeting; but such nonvoting common stock shall be equal in every other respect with the voting common stock, and shall entitle the holders thereof to equal participation with the holders of the voting common stock in all earnings and dividends, and in any distribution of the company's property upon liquidation or dissolution or winding up (whether voluntary or involuntary).

"Except as to nonvoting common stock owned or held by the following individuals and corporations, viz: Thomas Coleman du Pont, Pierre S. du Pont, Alexis I. du Pont, Alfred I. du Pont, Eugene du Pont, Eugene E. du Pont, Henry F. du Pont, Irénée du Pont, Francis I. du Pont, Victor du Pont, Jr., Jonathan A. Haskell, Arthur J. Moxham, Hamilton M. Barksdale, Edmund G. Buckner, Frank L. Connable, Hazard Powder Co., Laflin & Rand Powder Co., the Eastern Dynamite Co., Fairmont Powder Co., Judson Dynamite & Powder Co., Delaware Securities Co., Delaware Investment Co., California Investment Co., E. I. du Pont de Nemours & Co. of Pennsylvania, du Pont International Powder Co., E. I. du Pont de Nemours Powder Co., and E. I. du Pont de Nemours & Co., the holders of nonvoting common stock shall have the right at any time to exchange nonvoting common stock share for share for voting common stock upon surrender of the certificate evidencing the nonvoting common stock so to be exchanged, duly endorsed by the owner of record thereof, provided always, that upon the transfer through death, or by will, from any one of the individuals or corporations above named, of any nonvoting common stock of the corporation, to some person or persons other than one of the aforesaid individuals or corporations, or upon the sale by any one of the aforesaid individuals or corporations of nonvoting common stock in said corporation, to some person or persons, firms, or corporations other than one of the aforesaid corporations or individuals, or the respective wives or children of said individuals, the nonvoting common stock so sold or transferred may be exchanged by the legatee, transferee, or purchaser, share for share for voting common stock of the corporation.

"The holders of the preferred stock shall be entitled to receive when and as declared from the surplus or net profits of the corporation in excess of such sum if any, as shall have been fixed and reserved as working capital, yearly dividends at the rate of 7 percent per annum and no more, payable quarterly on the 15th days of February, May, August, and November.

"The dividends on the preferred stock shall be cumulative and shall be payable before any dividend on the common stock shall be paid or set apart, so that if in any year dividends amounting to 7 percent shall not have been paid thereon, the deficiency shall be payable before any dividends shall be paid upon or set apart for the common stock.

"Whenever all cumulative dividends on the preferred stock for all previous years shall have been declared, and shall have become payable, and the accrued quarterly installment for the current year shall have been declared, and the company shall have paid such cumulative dividends for previous years, and such accrued quarterly installments, or shall have set aside from its surplus or net profits a sum sufficient for the payment thereof, the board of directors may

Digitized by Google

declare dividends on the common stock payable then or thereafter out of any remaining surplus or net profits.

"In the event of any liquidation or dissolution or winding up (whether voluntary or involuntary), of the corporation, the holders of the preferred stock shall be entitled to be paid in full both the par amount of their shares, and the unpaid dividends accrued thereon, before any amount shall be paid to the holders of the common stock, and after the payment to the holders of the preferred stock of its par value, and the unpaid accrued dividends thereon, the remaining assets and funds shall be divided among and paid to the holders of the common stock, in proportion to their respective shares.

"The corporation may redeem all or any part of the preferred stock on the 15th day of November, A. D. 1915, or on the 15th day of November of each year thereafter, by mailing a notice of the stock to be redeemed to the registered owner thereof, addressed to the lsat registered address of such owner, at least 3 months prior to the day fixed for such redemption, and by publishing a notice of the stock to be redeemed once a week for 6 successive weeks previous to the day fixed for such redemption, in a daily newspaper of general circulation published in the city of Wilmington, Del., and in a daily newspaper of general circulation published in the city of New York, and by paying to the owner of stock so redeemed 120 percent of the par value thereof, all dividends accrued and unpaid thereon, and the dividend accruing on the date of such redemption, provided, however, that in case any of such stock so to be redeemed shall not be presented for delivery and redemption on or before the day fixed for such redemption, then the corporation may pay the amount due on said stock, with dividends as aforesaid to the Guaranty Trust Co. of New York, to pay to, on demand, or hold for the benefit of, the owner of the stock so to be redeemed, and the title to such stock, and all the benefits thereof, shall be held to have passed to the corporation, and all future dividends due thereon shall cease to be due or payable, as of the day fixed for such redemption and of the payment to the said Guaranty Trust Co. as aforesaid. If the amount of the stock so redeemed at any date shall be less than the full amount of the preferrred stock then outstanding, the preferred stock so redeemed as aforesaid shall be drawn by lot from the whole number of shares of preferred stock then outstanding. The corporation, however, shall have no right, anything to the contrary in the statute contained notwithstanding, to compel the redemption or retirement of any of the preferred stock, except upon payment to the owner thereof, or for his account, of 120 percent of the par value thereof, and all accrued and unpaid dividends thereonto the date of such payment.

"The holders of the preferred stock as such shall have no right to vote at any meeting of the corporation; except only when and in the event the corporation shall have been, for the continuous period of 1 year, in default in the payment of dividends thereon or any part thereof, or in the event the net earnings of the corporation for each of the 2 consecutive calendar years, respectively, immediately preceding any such meeting, shall have, for each of said years, fallen below the amount necessary to pay the dividends accruing on such stock, provided, however, that in no event shall the persons and corporations particularly named in the fifth paragraph of section 4 of this certificate, have the right, as the owners or holders of any of said preferred stock, to vote at any meeting of the corporation.

"From time to time the preferred and common stock or either class thereof, may be increased according to law, but no such increase shall be made without the consent, in the manner provided by law, of not less than two-thirds in interest of those shares of each class of stock which then have voting powers, and the capital stock may be issued in such amounts and proportions as shall be determined by the board of directors, and as may be permitted by law, subject to the limitations herein contained.

"The holders of any shares of any class of the capital stock of the corporation, at the time of any issue of the stock of such class, shall, except as hereinafter provided, have the prior right to subscribe to such issue pro rata to their respective holdings in such class, provided the corporation at any and all times shall, subject to the limitations hereinafter mentioned, have the right to and may as and when in the judgment of its board of directors, the interest of the corporation warrants, issue and deliver for not less than par, and for as much above par as is reasonably obtainable, any part of its capital stock and any increase thereof, in exchange or payment for property of whatsoever character by it purchased or obtained, or to be purchased or obtained, including its outstanding income bonds.

"No preferred stock shall be issued, and no dividends on common stock shall be paid, when such issue of stock and such payment of dividends, or either, shall

Digitized by Google

make the total outstanding preferred stock and income bonds of the corporation, exceed in amount 50 percent of the total assets of the corporation, unless at least three-fourths in interest of the holders of such preferred stock shall consent in writing thereto.

"No preferred stock shall be issued without the written consent thereto of at least three-fourths in interest of the holders of such stock then outstanding, unless the earnings of the corporation available for the payment of dividends thereon, shall, for the year immediately preceding, exceed two times the amount necessary to pay for a like period, the dividends of such stock then outstanding, and including such issue; provided, however, that preferred stock may be issued for the purchase of property when such earnings of the corporation, together with the earnings of the property so purchased, shall for the year immediately preceding such purchase, exceed two times the amount necessary to pay for a like period, the dividends on such stock outstanding at the completion of such purchase.

"The amount of capital stock with which the corporation shall commence business is two thousand dollars ($2,000)."

Second. By striking out all of subdivision G, of section 7 of said certificate, and inserting in lieu thereof, the following:

"To issue subject to the limitations and under the authority herein contained, the stock in such amounts and proportions as they may determine, up to the total amount of the authorized capital stock, or any increase thereof."

Third. By striking out all of subdivision J of section 7 of said certificate, and inserting in lieu thereof, the following:

"Unless the holders of at least a majority of the voting common stock of the corporation then outstanding, and at least three-fourths in interest of the holders of the preferred stock then outstanding, consent thereto in writing filed with the directors, the board of directors shall not mortgage or pledge any of its real property or any shares of the capital stock or bonds of any other corporation, but this prohibition shall not be construed to apply to the execution of any purchase money mortgage, or any other purchase money lien."

Fourth. By striking out all of subdivision L of section 7 of said certificate, and inserting in lieu thereof, the following:

"Any and all of the rights, powers, or privileges herein granted or conveyed, may be enlarged, amended, altered, changed, or repealed by certificate of amendment, authorized and filed in any manner now or hereafter permitted by the laws of the State of Delaware, except that there shall be no change, amendment or alteration of this amended certificate of incorporation affecting in any manner the rights of the preferred stockholders herein expressly provided, without the written consent of three-fourths in interest of such stockholders; provided, however, that this exception shall not apply to an amendment of this amended certificate of incorporation changing the amount of the authorized capital stock of the corporation."

EXHIBIT B. JUDGES' CERTIFICATE

To GEORGE H. MARKELL,
Secretary of the Hercules Powder Co.:

We, the undersigned, do hereby certify that by resolution of the board of directors of the Hercules Powder Co., duly adopted January 6, 1914, we were appointed judges, for the purpose of conducting and counting the vote of the stockholders of said company, at a meeting of said stockholders, held on the 22d day of January, A. D. 1914, at the principal office of the company, in room no. 696 of the building situate at the northwest corner of Tenth and Market Streets, in the city of Wilmington, State of Delaware, duly called to consider and to take action upon the resolution of said board adopted on the 6th day of January A. D. 1914, declaring the advisability of the four proposed amendments to the certificate of incorporation of the said Hercules Powder Co., a true copy of which said four proposed amendments is hereto attached and marked "Exhibit I"; that at said stockholders' meeting a vote of the stockholders of said company then having a right to vote thereat was by ballot in person or by proxy duly taken for and against the said four proposed amendments, which said vote was conducted by the undersigned, the two judges appointed as aforesaid; that in our offices as said judges we decide upon the qualification of the stockholders voting at said meeting for or against said four proposed amendments; that the total number of shares of the voting capital stock of said company issued and outstanding during all the said 22d day of January and all the time the said vote was being taken by said stockholders on said four proposed amendments was 47,298 shares, and that during all of such time the total number of shares of non-voting capital stock of said company issued and outstanding was 15,831 shares;

Digitized by Google

that when said vote was completed, we as such judges did count and ascertain the number of shares respectively voted for and against said four proposed amendments and declared that the persons or bodies corporate holding a majority of the stock of said company then having voting power (there being but one class of stock of said company then having voting power), had voted a majority of said voting capital stock for said four proposed amendments; that out of the said total of 47,298 shares of the said voting capital stock of said company issued and outstanding as aforesaid 40,982 shares thereof were voted for and in favor of each and all of said four proposed amendments, and that no shares of said voting capital stock was voted against said proposed amendments; that said shares of the voting capital stock of said company so voted as aforesaid, for all said amendments, was a majority of all the capital stock of said company, including voting capital stock and nonvoting capital stock then issued and outstanding.

In witness whereof we have made out the foregoing certificate accordingly in duplicate and subscribed our names thereto and delivered the same to the secretary of said company.

Dated January 22, A. D. 1914.

GOULD G. RHEUBY,
ROBT. H. RICHARDS,
Judges.

The above and foregoing certificate, in duplicate, was by said judges, Gould G. Rheuby and Robert H. Richards, filed with me as secretary of the Hercules Powder Co., this 22d day of January, A. D. 1914.

In witness whereof I have hereunto set my hand and seal as such secretary on the day and year aforesaid.

[CORPORATE SEAL] GEO. H. MARKELL, *Secretary.*

EXHIBIT I

The four amendments to the certificate of incorporation of the Hercules Powder Co., a corporation organized and existing under and pursuant to the provisions of an act of the Legislature of the State of Delaware, entitled "an act providing a general corporation law, "approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, and which certificate of incorporation was filed in the office of the secretary of state of said State on the 18th day of October, A. D. 1912, at 9 o'clock a. m.

That the certificate of incorporation of said company so filed be amended, under and pursuant to the provisions of said act of the Legislature of the State of Delaware, entitled "an act providing a general corporation law," approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, as follows, viz:

First. By striking out all of section 4 of said certificate and inserting in lieu thereof the following:

"The total authorized capital stock of the corporation is twenty million dollars ($20,000,000), divided into two hundred thousand (200,000) shares, of the par value of one hundred dollars ($100) each.

"Of such authorized capital stock, one hundred thousand (100,000) shares, amounting to ten million dollars ($10,000,000), shall be preferred stock and one hundred thousand (100,000) shares, amounting to ten million dollars ($10,000,000) shall be common stock.

"Of such authorized common stock, twenty thousand (20,000) shares, amounting to two million dollars ($2,000,000), shall be nonvoting common stock, and eighty thousand (80,000) shares, amounting to eight million dollars ($8,000,000), shall be voting common stock.

"The holders of nonvoting common stock shall have no right to vote thereon at any corporate meeting; but such nonvoting common stock shall be equal in every other respect with the voting common stock and shall entitle the holders thereof to equal participation with the holders of the voting common stock in all earnings and dividends and in any distribution of the company's property upon liquidation or dissolution or winding up (whether voluntary or involuntary).

"Except as to nonvoting common stock owned or held by the following individuals and corporations, viz: Thomas Coleman du Pont, Pierre S. du Pont, Alexis I. du Pont, Alfred I. du Pont, Eugene du Pont, Eugene E. du Pont, Henry F. du Pont, Irenee du Pont, Francis I. du Pont, Victor du Pont, Jr., Jonathan A. Haskell, Arthur J. Moxham, Hamilton M. Barksdale, Edmund G. Buckner, Frank L. Connable, Hazard Powder Co., Laflin & Rand Powder Co., the Eastern Dynamite Co., Fairmont Powder Co., Judson Dynamite & Powder Co., Delaware

Digitized by Google

Securities Co., Delaware Investment Co., California Investment Co., E. I. du Pont de Nemours & Co. of Pennsylvania, du Pont International Powder Co., E. I. du Pont de Nemours Powder Co., and E. I. du Pont de Nemours & Co., the holders of nonvoting common stock shall have the right at any time to exchange nonvoting common stock share for share for voting common stock upon surrender of the certificate evidencing the nonvoting common stock so to be exchanged, duly endorsed by the owner of record thereof, provided always that upon the transfer through death, or by will, from any one of the individuals or corporations above named, of any nonvoting common stock of the corporation, to some person or persons other than one of the aforesaid individuals or corporations, or upon the sale by any one of the aforesaid individuals or corporations of nonvoting common stock in said corporation, to some person or persons, firms or corporations other than one of the aforesaid corporations or individuals, or the respective wives or children of said individuals, the nonvoting common stock so sold or transferred may be exchanged by the legatee, transferee, or purchaser, share for share for voting common stock of the corporation.

"The holders of the preferred stock shall be entitled to receive when and as declared from the surplus or net profits of the corporation in excess of such sum if any, as shall have been fixed and reserved as working capital, yearly dividends at the rate of 7 percent per annum and no more, payable quarterly on the 15th days of February, May, August, and November.

"The dividends on the preferred stock shall be cumulative and shall be payable before any dividend on the common stock shall be paid or set apart, so that if in any year dividends amounting to 7 percent shall not have been paid thereon, the deficiency shall be payable before any dividends shall be paid upon or set apart for the common stock.

"Whenever all cumulative dividends on the preferred stock for all previous years shall have been declared, and shall have become payable, and the accrued quarterly installment for the current year shall have been declared, and the company shall have paid such cumulative dividends for previous years, and such accrued quarterly installments, or shall have set aside from its surplus or net profits a sum sufficient for the payment thereof, the board of directors may declare dividends on the common stock payable then or thereafter out of any remaining surplus or net profits.

"In the event of any liquidation or dissolution or winding up (whether voluntary or involuntary) of the corporation, the holders of the preferred stock shall be entitled to be paid in full both the par amount of their shares and the unpaid dividends accrued thereon, before any amount shall be paid to the holders of the common stock, and after the payment to the holders of the preferred stock of its par value, and the unpaid accrued dividends thereon, the remaining assets and funds shall be divided among and paid to the holders of the common stock, in proportion to their respective shares.

"The corporation may redeem all or any part of the preferred stock on the 15th day of November, A. D. 1915, or on the 15th day of November of each year thereafter, by mailing a notice of the stock to be redeemed to the registered owner thereof, addressed to the last registered address of such owner, at least 3 months prior to the day fixed for such redemption, and by publishing a notice of the stock to be redeemed once a week for 6 successive weeks previous to the day fixed for such redemption, in a daily newspaper of general circulation published in the city of Wilmington, Del., and in a daily newspaper of general circulation published in the city of New York, and by paying to the owner of stock so redeemed 120 percent of the par value thereof, all dividends accrued and unpaid thereon, and the dividend accruing on the date of such redemption: *Provided, however*, That in case any of such stock so to be redeemed shall not be presented for delivery and redemption on or before the day fixed for such redemption, then the corporation may pay the amount due on said stock, with dividends as aforesaid, to the Guaranty Trust Co. of New York, to pay to, on demand, or hold for the benefit of, the owner of the stock so to be redeemed, and the title to such stock, and all the benefits thereof, shall be held to have passed to the corporation, and all future dividends due thereon shall cease to be due or payable as of the day fixed for such redemption and of the payment to the said Guaranty Trust Co. as aforesaid. If the amount of the stock so redeemed at any date shall be less than the full amount of the preferred stock then outstanding, the preferred stock so redeemed as aforesaid shall be drawn by lot from the whole number of shares of preferred stock then outstanding. The corporation, however, shall have no right, anything to the contrary in the statute contained notwithstanding, to compel the redemption

Digitized by Google

or retirement of any of the preferred stock, except upon the payment to the owner thereof, or for his account, of 120 percent of the par value thereof, and all accrued and unpaid dividends thereon to the date of such payment.

"The holders of the preferred stock as such shall have no right to vote at any meeting of the corporation, except only when and in the event the corporation shall have been, for the continuous period of 1 year, in default in the payment of dividends thereon or any part thereof, or in the event the net earnings of the corporation for each of the 2 consecutive calendar years, respectively, immediately preceding any such meeting, shall have, for each of said years, fallen below the amount necessary to pay the dividends accruing on such stock: *Provided, however*, That in no event shall the persons and corporations particularly named in the fifth paragraph of section 4 of this certificate have the right, as the owners or holders of any of said preferred stock, to vote at any meeting of the corporation.

"From time to time the preferred and common stock or either class thereof may be increased according to law, but no such increase shall be made without the consent, in the manner provided by law, of not less than two-thirds in interest of those shares of each class of stock which then have voting powers, and the capital stock may be issued in such amounts and proportions as shall be determined by the board of directors, and as may be permitted by law, subject to the limitations herein contained.

"The holders of any shares of any class of the capital stock of the corporation, at the time of any issue of the stock of such class, shall, except as hereinafter provided, have the prior right to subscribe to such issue pro rata to their respective holdings in such class, provided the corporation at any and all times shall, subject to the limitations hereinafter mentioned, have the right to and may as and when in the judgment of its board of directors, the interest of the corporation warrants, issue and deliver for not less than par, and for as much above par as is reasonably obtainable, any part of its capital stock and any increase thereof, in exchange or payment for property of whatsoever character by it purchased or obtained, or to be purchased or obtained, including its outstanding income bonds.

"No preferred stock shall be issued, and no dividends on common stock shall be paid, when such issue of stock and such payment of dividends, or either, shall make the total outstanding preferred stock and income bonds of the corporation, exceed in amount 50 percent of the total assets of the corporation, unless at least three-fourths in interest of the holders of such preferred stock shall consent in writing thereto.

"No preferred stock shall be issued without the written consent thereto of at least three-fourths in interest of the holders of such stock then outstanding, unless the earnings of the corporation available for the payment of dividends thereon, shall, for the year immediately preceding, exceed two times the amount necessary to pay for a like period, the dividends of such stock then outstanding, and including such issue; *Provided, however*, That preferred stock may be issued for the purchase of property when such earnings of the corporation, together with the earnings of the property so purchased, shall for the year immediately preceding such purchase exceed two times the amount necessary to pay for a like period the dividends on such stock outstanding at the completion of such purchase.

"The amount of capital stock with which the corporation shall commence business is two thousand dollars ($2,000)."

Second. By striking out all of subdivision G of section 7 of said certificate and inserting in lieu thereof the following:

"To issue subject to the limitations and under the authority herein contained, the stock in such amounts and proportions as they may determine, up to the total amount of the authorized capital stock, or any increase thereof."

Third. By striking out all of subdivision J of section 7 of said certificate and inserting in lieu thereof the following:

"Unless the holders of at least a majority of the voting common stock of the corporation then outstanding, and at least three-fourths in interest of the holders of the preferred stock then outstanding, consent thereto in writing filed with the directors, the board of directors shall not mortgage or pledge any of its real property or any shares of the capital stock or bonds of any other corporation, but this prohibition shall not be construed to apply to the execution of any purchase-money mortgage, or any other purchase-money lien."

Fourth. By striking out all of subdivision L of section 7 of said certificate and inserting in lieu thereof the following:

"Any and all of the rights, powers, or privileges herein granted or conveyed may be enlarged, amended, altered, changed, or repealed by certificate of amendment, authorized and filed in any manner now or hereafter permitted by the

Digitized by Google

laws of the State of Delaware, except that there shall be no change, amendment, or alteration of this amended certificate of incorporation affecting in any manner the rights of the preferred-stock holders herein expressly provided, without the written consent of three-fourths in interest of such stockholders; *Provided, however*, That this exception shall not apply to an amendment of this amended certificate of incorporation changing the amount of the authorized capital stock of the corporation."

STATE OF DELAWARE,
Office of Secretary of State:

I, A. R. Benson, secretary of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of certificate of amendment of certificate of incorporation of the Hercules Powder Co., as received and filed in this office the 22d day of January, A. D. 1914, at 5 o'clock p. m.

In testimony whereof I have hereunto set my hand and official seal at Dover this 23d day of May in the year of our Lord one thousand nine hundred and twenty-one.

[SEAL] A. R. BENSON, *Secretary of State.*

CERTIFICATE OF AMENDMENT OF AMENDED CERTIFICATE OF INCORPORATION OF HERCULES POWDER CO.

The certificate of the Hercules Powder Co. of the vote of the stockholders, common and preferred, of said company, upon the amendment of its amended certificate of incorporation, made under and pursuant to the provisions of chapter 65 of the Revised Code of Delaware, 1915, and the acts of the general assembly of said State amendatory thereof and supplemental thereto.

The Hercules Powder Co., a corporation having a capital stock, common and preferred, organized and existing under and pursuant to the provisions of an act of the Legislature of the State of Delaware, entitled "An act providing a general corporation law", approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, by its president and secretary, and under its corporate seal, does hereby certify as follows:

First. That it appears by the duplicate certificate of Robert H. Richards and John A. Graves, the judges duly appointed by resolution of the board of directors of said company, duly adopted September 12, A. D. 1922, for the purpose of conducting and counting the vote of the stockholders of said company, at a meeting of said stockholders held on the 24th day of October, A. D. 1922, at the principal office of the company in room 1309 of the Delaware Trust Building, situated at the northeast corner of Ninth and Market Streets, in the city of Wilmington, State of Delaware, duly called to consider and to take action upon the resolution of said board adopted on the 12th day of September, A. D. 1922, declaring the advisability of the proposed amendment to the amended certificate of incorporation of said company; that at said stockholders' meeting a vote of the stockholders, common and preferred, of said company, then having a right to vote thereat, was by ballot in person or by proxy, duly taken for and against the said proposed amendment; that said vote was conducted by said judges, that said judges decided upon the qualification of the stockholders voting at said meeting for or against said proposed amendment; that the total number of shares of the voting common capital stock of said company, issued and outstanding during all the said 24th day of October, and all the time said vote was being taken by said stockholders on said proposed amendment, was 63,750 shares; that the total number of shares of the preferred capital stock of said company, issued and outstanding during all the said 24th day of October, and all the time the said vote was being taken by said stockholders on said proposed amendment was 94,252 shares; that during all of such time the total number of shares of nonvoting common capital stock of said company issued and outstanding was 6,020 shares; that when said vote was completed said judges did count and ascertain the number of shares of common voting stock and the number of shares of preferred stock respectively voted for and against said proposed amendment, and declared that the persons or bodies corporate holding more than two-thirds of all the voting common stock of said company had voted more than two-thirds of all the voting common stock of said company for said proposed amendment, and the persons or bodies corporate holding more than two-thirds of all the preferred stock of said company had voted more than two-thirds of the preferred stock of said company for said proposed amendment; that out of the said total of 63,750 shares of the said voting common stock of said company issued and outstanding, as aforesaid, 61,112 shares thereof

Digitized by Google

were voted for and in favor of said proposed amendment; and no shares of said voting common stock were voted against said proposed amendment; that out of the said total of 94,252 shares of the said preferred stock of said company issued and outstanding, as aforesaid, 84,900 shares thereof were voted for and in favor of said proposed amendment, and 13 shares of said preferred stock were voted against said proposed amendment; that said shares of the voting common stock of said company so voted, as aforesaid, for said amendment, were more than two-thirds of all the common stock of said company, including voting common stock and nonvoting common stock, then issued and outstanding; that said shares of the preferred stock of said company so voted, as aforesaid, for said amendment, were more than two-thirds of all the preferred stock of said company then issued and outstanding.

Second. That attached hereto and marked "Exhibit J", is a true copy of the said amendment to the amended certificate of incorporation of this company, as the same was adopted at the stockholders' meeting, as aforesaid; that said amendment so adopted at said stockholders' meeting was the said amendment declared to be advisable by the said resolution last above mentioned, and that said meeting was called and held upon due notice thereof first being given to said stockholders in accordance and in compliance with the bylaws of said company.

Third. That also attached hereto and marked "Exhibit K", is one of the duplicate certificates made by the said judges of the stockholders' vote at said stockholders' meeting, for and against said amendment.

Fourth. That the persons or bodies corporate holding more than two-thirds of the voting common stock of the said company, voted at said meeting more than two-thirds of said voting common stock of said company for said proposed amendment, and the persons or bodies corporate holding more than two-thirds of all the preferred stock of said company voted at said meeting more than two-thirds of the preferred stock of said company for said proposed amendment; that of the said total of 63,750 shares of said voting common stock of said company then issued and outstanding, as aforesaid, 61,112 shares thereof were at said meeting voted for and in favor of said proposed amendment and no shares of said voting common stock were voted against said proposed amendment, and that of the said total of 94,252 shares of the said preferred stock of said company, then issued and outstanding, as aforesaid, 84,900 shares thereof were at said meeting voted for and in favor of said proposed amendment, and 13 shares of said preferred stock were voted against said proposed amendment; that said shares of the voting common stock of said company so voted, as aforesaid, for said amendment, were more than two-thirds of all the common stock of said company, including voting common stock and nonvoting common stock then issued and outstanding, and that said shares of said preferred stock of said company so voted, as aforesaid, for said amendment were more than two-thirds of the preferred stock of said company then issued and outstanding.

In witness whereof the said Hercules Powder Co. has made under its corporate seal and the hand of Russell H. Dunham, its president, and the hand of Henry H. Eastman, its secretary, the foregoing certificate, and the said president and secretary have hereunto respectively set their hands, and caused the corporate seal of said company to be hereunto affixed this 24th day of October, A. D. 1922.

RUSSELL H. DUNHAM, *President.*
HENRY H. EASTMAN, *Secretary.*

Hercules Powder Co., Incorporated 1912, Delaware.

STATE OF DELAWARE,
County of New Castle, ss:

Be it remembered, that on this 24th day of October, A. D. 1922, I, Robert B. Colling, a notary public for the State of Delaware, hereby certify that Russell H. Dunham, president of Hercules Powder Co., personally known to me to be such, duly executed the foregoing certificate, with exhibit J and exhibit K thereto attached, before me, and that the said Russell H. Dunham, president, as aforesaid, duly acknowledged that the signature of the said president and of the secretary of said company to said certificate appended are in the handwriting of the president and secretary of said company, respectively, and that the corporate seal to said certificate affixed is the common and corporate seal of said company, and that the same was duly affixed by the authority of the stockholders of said company.

Digitized by Google

In witness whereof I have hereunto set my hand and seal of office the day and year aforesaid.

ROBERT B. COOLING, *Notary Public.*

Robert B. Cooling, notary public, appointed February 5, 1921, term 2 years, State of Delaware.

EXHIBIT J

The amendment to the amended certificate of incorporation of the Hercules Powder Co., a corporation organized and existing under and pursuant to the provisions of an act of the legislature of the State Delaware, entitled "an act providing a general corporation law", approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, which certificate of incorporation was filed in the office of the secretary of state of said State, on the 18th day of October, A. D. 1912, at 9 o'clock a. m., and which certificate of incorporation was duly amended under and pursuant to said act of said legislature, and all acts then amendatory thereof and supplemental thereto, by that certificate of amendment of said certificate of incorporation duly filed in the office of the secretary of State of the State of Delaware, on the 22d day of January, A. D. 1914, at 5 o'clock p. m.

That such amended certificate of said company be amended under and pursuant to the provisions of chapter 65 of the Revised Code of Delaware, and the acts of the general assembly of said State amendatory thereof and supplemental thereto, as follows, viz:

By striking out the first three paragraphs of section 4 of said amended certificate of incorporation and inserting in lieu thereof, the following:

"The total authorized capital stock of the corporation is forty million dollars ($40,000,000), divided into four hundred thousand (400,000) shares, of the par value of one hundred dollars ($100) each.

"Of such authorized capital stock two hundred thousand (200,000) shares, amounting to twenty million dollars ($20,000,000), shall be preferred stock, and two hundred thousand (200,000) shares, amounting to twenty million dollars ($20,000,000) shall be common stock.

"Of such authorized common stock, twenty thousand (20,000) shares, amounting to two million dollars ($2,000,000), shall be nonvoting common stock and one hundred and eighty thousand (180,000) shares, amounting to eighteen million dollars ($18,000,000) shall be voting common stock."

EXHIBIT K, JUDGES' CERTIFICATE

To HENRY H. EASTMAN,
Secretary of Hercules Powder Co.:

We, the undersigned, do hereby certify that by resolution of the board of directors of the Hercules Powder Co., duly adopted September 12, A. D. 1922, we were appointed judges for the purpose of conducting and counting the vote of the stockholders of said company, at a meeting of said stockholders, held on the 24th day of October, A. D. 1922, at the principal office of the company, in room 1309 of the Delaware Trust Building, situate at the northeast corner of Ninth and Market Streets, in the city of Wilmington, State of Delaware, duly called to consider and to take action upon the resolution of said board adopted on the 12th day of September, A. D. 1922, declaring the advisability of the proposed amendment to the amended certificate of incorporation of the said Hercules Powder Co., a true copy of which amendment is hereto attached and marked "Exhibit L"; that at said stockholders' meeting a vote of the stockholders, common and preferred, of said company then having a right to vote thereat was by ballot in person or by proxy duly taken for and against the said proposed amendment, which said vote was conducted by the undersigned, the two judges appointed as aforesaid; that in our offices as said judges we decided upon the qualification of the stockholders voting at said meeting for or against said proposed amendment; that the total number of shares of the voting common stock of said company issued and outstanding during all said 24th day of October, A. D. 1922, and all the time the said vote was being taken by said stockholders on said proposed amendment was 63,750 shares; and during all such time the total number of shares of nonvoting common stock of said company issued and outstanding was 6,020 shares; and that the total number of shares of the preferred stock of said company issued and outstanding during all the said 24th day of October, A. D. 1922, and all the time the said vote was being taken by said stockholders on said proposed amendment was 94,252 shares; that when said vote was

Digitized by Google

completed we as such judges did count and ascertain the number of shares of voting common stock and preferred stock of said company respectively voted for and against said proposed amendment, and declared that the persons or bodies corporate holding more than two-thirds of the said voting common stock of said company had voted more than two thirds of all the voting common stock of said company for said proposed amendment and the persons or bodies corporate holding more than two-thirds of all the preferred stock of said company had voted more than two-thirds of all the preferred stock of said company for said proposed amendment; that out of the said total of 63,750 shares of the said voting common stock of said company issued and outstanding, as aforesaid, 61,112 shares thereof were duly voted for and in favor of the said proposed amendment, and no shares of said voting common stock were voted against said proposed amendment, and that out of said total of 94,252 shares of the preferred stock of said company issued and outstanding, as aforesaid, 84,900 shares thereof were duly voted for and in favor of said proposed amendment, and 13 shares of said preferred stock were voted against said proposed amendment, and that said shares of the voting common stock of said company so voted as aforesaid, for said amendment, were more than two-thirds of all the common stock of said company, including voting common stock and nonvoting common stock then issued and outstanding; that said shares of the preferred stock of said company so voted, as aforesaid, for said amendment were more than two-thirds of all the preferred stock of said company then issued and outstanding.

In witness whereof we have made out the foregoing certificate accordingly, in duplicate and subscribed our names thereto and delivered the same to the secretary of said company.

ROBT. H. RICHARDS,
JOHN A. GRAVES,
Judges.

The above and foregoing certificate, in duplicate, was by said judges, Robert H. Richards and John A. Graves, filed with me as secretary of the Hercules Powder Co. this 24th day of October, A. D. 1922.

In witness whereof I have hereunto set my hand and seal as such secretary on the day and year aforesaid.

H. H. EASTMAN, *Secretary.*

Hercules Powder Co., Incorporated 1912, Delaware.

EXHIBIT L

The amendment to the amended certificate of incorporation of the Hercules Powder Co., a corporation organized and existing under and pursuant to the provisions of an act of the Legislature of the State of Delaware, entitled "an act providing a general corporation law," approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, which certificate of incorporation was filed in the office of the secretary of state of said State, on the 18th day of October, A. D. 1912, at 9 o'clock a. m., and which certificate of incorporation was duly amended under and pursuant to said acts of said legislature, and all acts then amendatory thereof and supplemental thereto, by that certificate of amendment of said certificate of incorporation duly filed in the office of the secretary of state of the State of Delaware, on the 22d day of January, A. D. 1914 at 5 o'clock p. m.

That such amended certificate of said company be amended under and pursuant to the provisions of chapter 65 of the Revised Code of Delaware, and the acts of the general assembly of said State amendatory thereof and supplemental thereto, as follows, viz:

By striking out the first three paragraphs of section 4 of said amended certificate of incorporation and inserting in lieu thereof the following:

"The total authorized capital stock of the corporation is forty million dollars ($40,000,000), divided into four hundred thousand (400,000) shares, of the par value of one hundred dollars ($100) each.

"Of such authorized capital stock two hundred thousand (200,000) shares, amounting to twenty million dollars ($20,000,000), shall be preferred stock, and two hundred thousand (200,000) shares, amounting to twenty million dollars ($20,000,000) shall be common stock.

"Of such authorized common stock, twenty thousand (20,000) shares, amounting to two million dollars ($2,000,000), shall be nonvoting common stock, and one hundred and eighty thousand (180,000) shares, amounting to eighteen million dollars ($18,000,000), shall be voting common stock."

STATE OF DELAWARE,
Office of Secretary of State:

I, A. R. Benson, secretary of state of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of certificate of amendment of the Hercules Powder Co., as received and filed in this office the 24th day of October, A. D. 1922, at 2 o'clock p. m.

In testimony whereof I have hereunto set my hand and official seal, at Dover this 24th day of October in the year of our Lord one thousand nine hundred and twenty-two.

[SEAL] A. R. BENSON, *Secretary of State.*

CERTIFICATE OF AMENDMENT OF AMENDED CERTIFICATE OF INCORPORATION OF HERCULES POWDER CO.

Hercules Powder Co., a corporation having a capital stock, common and preferred, organized and existing under and pursuant to the provisions of an act of the Legislature of the State of Delaware entitled "an act providing a general corporation law", approved March 10, A. D. 1899, and the acts amendatory thereof and supplemental thereto, by its president and secretary, and under its corporate seal, does hereby certify as follows:

1. That the following is a true copy of amendments to the amended certificate of incorporation of this company, as the same were adopted at a meeting of the voting common stockholders of the company, duly called and held on the 27th day of November, A. D. 1928, at the principal office of the company in room 1325 of the Delaware Trust Building, situate at the northeast corner of Ninth and Market Streets, in the city of Wilmington, State of Delaware:

"Strike out the first three paragraphs of section 4 of said amended certificate of incorporation, and insert in lieu thereof the following:

" 'The number of shares of stock that may be issued shall be 1,800,000, of which 200,000 shall be preferred, having a par value of $100 each, and 1,600,000 shall be common stock, without nominal or par value. Of such 1,600,000 shares of authorized common stock 100,000 shares shall be nonvoting and 1,500,000 shares shall be voting common stock.

" 'Certificates for shares of the common stock of the corporation of the par value of $100 each, now outstanding, shall be exchanged for certificates representing the shares of the common stock without nominal or par value, on the basis of four of the new shares without nominal or par value for each of the old shares of $100 par value, in such manner as may be prescribed by the board of directors. Record holders of certificates of old common voting stock of the par value of $100 each not exchanged as aforesaid shall possess the voting power only represented by the number of shares of the new common voting stock without nominal or par value, which they are entitled to receive upon making the exchange.

" 'There shall be allocated to common capital account $25 for each share of common stock without nominal or par value, issued in exchange for said old common stock. The board of directors may from time to time issue the remaining shares of the common stock without nominal or par value, authorized hereunder, in such amounts and proportions, and for such consideration, as it may from time to time fix and as may be permitted by law.' And strike out all of paragraph 13 of such section 4, and insert in lieu thereof the following:

" 'The holders of any shares of any class of the capital stock of the corporation, at the time of any issue of the stock of such class, shall, except as hereinafter provided, have the prior right to subscribe to such issue pro rata to their respective holdings in such class, provided the corporation at any and all times shall, subject to the limitations hereinafter mentioned, have the right to and may as and when, in the judgment of its board of directors, the interest of the corporation warrants, issue and deliver for not less than par, and for as much above par as is reasonably obtained, any part of its authorized preferred capital stock, and any increase thereof, and/or any part of its authorized common capital stock, and any increase thereof, in exchange or payment for property of whatsoever character by it purchased or obtained, or to be purchased or obtained; and also to issue, deliver, and sell to the employees (including employees who are members of the board of directors) of the corporation 80,000 shares of the unissued authorized nonpar common capital stock of the corporation, such 80,000 shares, or any part thereof, to be sold from time to time to such employees as such board shall from time to time select, at such price or prices, either above or below the book value of the common stock then outstanding, and on such terms and conditions as such board shall determine, but no sale of such stock, or any part thereof, shall

Digitized by Google

be made to any employee who is then a member of the board of directors, unless a majority of the whole board of directors shall not then be purchasing any of such stock and shall affirmatively vote therefor, and no stockholder shall have any preemptive right to subscribe to or for any such stock then issued, or to be issued, for property or for sale to such employees.' "

2. That said amendments to the amended certificate of incorporation of said Hercules Powder Co. have been duly adopted in accordance with the provisions of section 26 of article I of chapter 65 of the Revised Code of Delaware, 1915, and the acts of the general assembly of said State amendatory thereof and supplemental thereto, and in accordance with the provisions of the amended certificate of incorporation of said Hercules Powder Co. pertinent thereto and requiring the affirmative vote of not less than two-thirds of the voting common stock of said Hercules Powder Co. to authorize the said amendments.

3. That the capital of the corporation will not be reduced under or by reason of said amendments.

In witness whereof the said Hercules Powder Co. has made, under its corporate seal and the hand of Russell H. Dunham, its president, and the hand of E. B. Morrow, its secretary, the foregoing certificate, and the said president and secretary have hereunto respectively set their hands and caused the corporate seal of said company to be hereunto affixed this 27th day of November, A. D. 1928.

[SEAL] R. H. DUNHAM, *President.*
E. B. MORROW, *Secretary.*

STATE OF DELAWARE,
County of New Castle, ss:

Be it remembered, that on this 27th day of November, A. D. 1928, I, Robert B. Cooling, a notary public for the State of Delaware, hereby certify that Russell H. Dunham, president of Hercules Powder Co., personally known to me to be such, duly executed the foregoing certificate before me, and that the said Russell H. Dunham, president as aforesaid, duly acknowledged that the signature of the said president and of the secretary of said company to said certificate appended are in the handwriting of the president and secretary of said company, respectively, and that the corporate seal to said certificate affixed is the common and corporate seal of said company, and that the same was duly affixed by the authority of the stockholders of said company.

In witness whereof I have hereunto set my hand and seal of office the day and year aforesaid.

[SEAL] ROBERT B. COOLING, *Notary Public.*

STATE OF DELAWARE,
Office of Secretary of State:

I, Charles H. Grantland, secretary of state of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of certificate of amendment of the Hercules Powder Co., as received and filed in this office the 28th day of November, A. D. 1928, at 9 o'clock a. m.

In testimony whereof I have hereunto set my hand and official seal at Dover, this 28th day of November in the year of our Lord one thousand nine hundred and twenty-eight.

[SEAL] CHARLES H. GRANTLAND, *Secretary of State.*

STANDARD BRANDS, INC.,
595 Madison Avenue, New York, N. Y.,
November 18, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
24 Fifth Avenue, New York, N. Y.

DEAR SIR: This will acknowledge receipt of your letter of November 12 listing a number of questions pertaining to cross-licensing and patent-pooling agreements under existing patents.

On October 17, Mr. Martin, an investigator for your committee, called on us and we gave him copies of the few patent licenses under which this company operates; none of them, however, can even remotely be considered to fall within the scope of your investigation, and, as explained to Mr. Martin, this company is not a party to any cross-licensing or patent-pooling agreements or arrangements. Therefore, I do not believe we have any information that would be of assistance or even of interest to your committee.

Respectfully yours,

JOSEPH WILSHIRE, *President.*

Digitized by Google

ANNUAL REPORT OF STANDARD BRANDS, INC., FOR THE FISCAL YEAR ENDED DECEMBER 11, 1934

PRESIDENT'S REPORT

NEW YORK, *February 20, 1935.*

To the stockholders:

I respectfully submit the annual report of Standard Brands, Inc., for the year ended December 31, 1934, together with accompanying audited consolidated financial statements which reflect the condition and earnings of your company and its subsidiaries.

Your company's consolidated net income for the year, after all charges and preferred dividends, amounted to $13,384,490.07, equivalent to about $1.06 per share on the common stock outstanding, which is approximately 9 cents less than the amount per share reported for 1933.

Important among the many factors causing this shrinkage were:

Increased costs of both materials and labor, as well as other costs incidental to the various codes.

Decreases that occurred in volume of some of your company's products had a greater effect on earnings than increases in volume of other products.

Dividends on the common stock of 25 cents per share were paid for each quarter of the year, maintaining the rate established in 1932.

In connection with the revision of its Federal income-tax returns for prior years and to conform to the rates used therein, your company has reduced the rates of depreciation on its property with the result that depreciation charges in the income account are approximately $275,000 less than the amount that would have resulted from the application of the rates used by the company in preparing the income account as reported for 1933. However, since new property was added during 1934, actual depreciation charges for the year were only about $240,000 less than for 1933. Furthermore, as a result of the application of these revised rates to prior years, there has been restored to surplus an amount of $1,646,355 which had been charged against income in prior years.

The contract for the sale and distribution of gin, mentioned in the annual report for 1933, was canceled by mutual consent in June 1934, upon payment to your company of $800,000. A net amount of $690,000, after provision for estimated Federal income taxes applicable to this payment, was added directly to surplus and was not included in the consolidated net income reported by your company. Since the cancelation of this contract your company has been engaged in organizing its own distributing channels for the sale of Fleischmann's gin. Progress in this effort has been satisfactory. However, the overoptimism which characterized the gin industry following repeal of the eighteenth amendment is still reflected in excess capacity within the industry and the maximum that your company can expect is a reasonable margin of profit upon its share of the business.

Patents relating to the manufacture of yeast foods and vinegar were acquired during the year at a cost of $688,805.69. It is believed that they will be useful in your company's business, but in conformity to your company's policy of carrying its trade marks, patents, and good will at a nominal value of $1, the cost of these patents has been written off against surplus.

Your company's financial position continues to be sound with current assets at December 31, 1934, of $39,003,409 as against current liabilities of $5,033,592. Surplus at that date amounted to $26,897,344, an increase of $2,528,788 in the year.

As you know, your company maintains an extensive research laboratory, the staff of which is engaged in improving existing products and developing new ones. Work of this character we consider to be of paramount importance. During the past year your company's research activities have led to the successful introduction of XR yeast, which is a stronger, quicker acting yeast, rich in vitamins A, B, D, and G.

On behalf of the officers and directors of your company, I desire to express gratitude and appreciation of the earnest and whole-hearted attention given by your company's organization to its affairs The loyalty of the organization, as clearly demonstrated in the past trying year, is one of the most important assets of your company.

JOSEPH WILSHIRE, *President.*

Standard Brands, Inc., and subsidiary companies consolidated balance sheet, Dec. 31, 1934—Continued

LIABILITIES—Continued

Capital stock:		
Preferred ($7 cumulative, series A)—without par value—authorized, 1,000,000 shares; issued, 70,558 shares at liquidating value of $100 per share	$7, 055, 800. 00	
Common—without par value—authorized, 20,000,000 shares; issued, 12,645,380 shares at stated value of $2 per share (including 520 shares reserved for unexchanged common stocks of companies acquired)	25, 290, 760. 00	
Total capital stock		$32, 346, 560. 00
Earned surplus, Dec. 31, 1934, as per summary of consolidated income and surplus [1]		26, 897, 344. 41
Total		66, 366, 620. 67

[1] Standard Brands, Inc., is a continuation of the business formerly operated as the Fleischmann Co. and subsidiaries, to which the businesses of other constituent companies have been added. Part of the earned surplus of the Fleischmann Co. was transferred to stated capital of Standard Brands, Inc.; in addition a part of the earned surplus of that company as well as all of the surpluses of other companies at date of acquisition, has been applied to reduce book value of intangibles to $1. The earned surplus reported above includes the balance of earned surplus of the Fleischmann Co. after the foregoing charges and after deduction for dividedns paid therefrom by Standard Brands, Inc.

NOTE.—In the above statement all securities included under current assets and general insurance fund are valued at the lower of cost or market. The current assets and current liabilities in forlign countries are converted from foreign currencies into United States dollars at current rates of exchange as of Dec. 31, 1934, any excess over par being credited to a reserve for exchange adjustments. Noncurrent foreign items are converted at par or cost of exchange.

Standard Brands, Inc., and subsidiary companies—summary of consolidated income and surplus for the year ended Dec. 31, 1934

[Includes operations of certain foreign subsidiaries for yearly periods ended Oct. 31, or Nov. 30, 1934]

Gross profit (after deducting manufacturing and other costs of goods sold)	$44, 555, 097. 10
Selling, administrative and general expenses	28, 619, 698. 83
Net profit from operations (after charging depreciation amounting to $1,749,440.71)	15, 935, 398. 27
Other income credits (includes $20,677.55 profit, being the net of all realized profit and loss on foreign exchange)	845, 773. 33
Gross income	16, 781, 171. 60
Income charges (includes net unrealized loss, $10,758.50 due to conversion of foreign net current assets at rates of exchange current Dec. 31, 1934, but not in excess of par)	684, 584. 72
Net income before charging Federal and foreign income taxes	16, 096, 586. 88
Federal and foreign income taxes	2, 195, 516. 77
Net income before deducting amount applicable to minority interest in subsidiary company	13, 901, 070. 11
Less amount applicable to minority interest in preferred and common stocks of subsidiary company	23, 048. 54
Net income applicable to parent company	13, 878, 021. 57

Standard Brands Inc., and subsidiary companies—summary of consolidated income and surplus for the year ended Dec. 31, 1934—Continued

Surplus credits:		
Adjustment of depreciation taken in prior years	$1,646,355.01	
Cancelation by mutual consent of contract for the sale and distribution of gin, less Federal income tax, $110,000, attaching thereto	690,000.00	
Transferred from general insurance fund account	120,042.01	
Adjustment of unrealized depreciation on securities	107,344.75	
Miscellaneous	105,286.82	
Total surplus credits		$2,669,028.59
Total		16,547,050.16
Surplus charges:		
Patents acquired during the year	$688,805.69	
Miscellaneous	190,548.61	
Total surplus charges		879,354.30
Surplus for the year before charging dividends		15,667,695.86
Surplus Jan. 1, 1934		24,368,555.80
Surplus before charging dividends		40,036,251.66
Dividends:		
Preferred	$493,531.50	
Common	12,645,375.75	
Total dividends		13,138,907.25
Surplus Dec. 31, 1934		[1] 26,897,344.41

[1] See footnote on accompanying balance sheet.

NOTE.—Extraordinary expenses, $34,697.98, and a credit adjustment of unrealized depreciation on general insurance fund investments, $150,481.56, were charged and credited, respectively, to general insurance fund account.

ACCOUNTANTS' CERTIFICATE

STANDARD BRANDS, INC.:

We have made an examination of the consolidated balance sheet of Standard Brands, Inc., and its subsidiary companies as of December 31, 1934, and of the related summary of consolidated income and surplus for the year 1934. In connection therewith, we made a review of the accounting methods, examined or tested, in a manner and to the extent which we considered appropriate in view of the company's system of internal accounting control, accounting records of the company and its subsidiaries and other supporting evidence, and made a general review of the operating and income accounts for the year, but we did not make a detailed audit of the transactions.

During the year, in connection with a revision of its Federal income-tax returns, the company reduced the rates of depreciation on property. The decrease of approximately $240,000 in provision for depreciation in 1934 as compared with 1933 was due principally to this reduction in rates.

In our opinion, subject to the foregoing, the accompanying consolidated balance sheet and related summary of consolidated income and surplus, with the notations thereon, fairly present, in accordance with accepted principles of accounting consistently followed by the companies, their financial condition at December 31, 1934, and the results of their operations for the year.

PRINCIPAL PRODUCTS OF STANDARD BRANDS, INC.

PRODUCTS OFFERED TO THE PUBLIC

Fleischmann's XR yeast for health: Recommended by well-known doctors for ridding the body of intestinal poisons, toning up the system, and restoring health and vitality.

Chase & Sanborn's dated coffee: A fine-quality blend, matchless in flavor and aroma. Freshness assured by dating and by swift delivery straight from roasting ovens to grocer.

Chase & Sanborn's tender leaf tea: A superb blend of finest teas. Only the youngest and tenderest tea leaves are used, insuring more delicious flavor and aroma. Richer in theol, the fragrant flavor-bearing essence of all teas.

Royal baking powder: Famous for over 60 years, preferred by three generations of home cooks, food experts, and dieticians.

Royal desserts—Royal quick-setting gelatin: Sets almost twice as fast as ordinary gelatin desserts. Rushed to grocers absolutely fresh, insuring full strength and full flavor. Seven tempting flavors and the new Royal gelatin aspic.

Royal chocolate and vanilla puddings: Delicious and economical. Both take but 5 minutes to prepare. Have healthful arrowroot base instead of ordinary starch.

Fleischmann's distilled dry gin: Fleischmann has been making gin since 1870 except during the prohibition years. Fleischmann's gin is an American gin, made by an American company, distilled from American grains, from an American formula for American taste and drinking customs.

PRODUCTS OFFERED TO BAKERS

Fleischmann's yeast—in 1-pound packages.
Fleischmann's baking powder—made specially for bakers.
Flesichmann's diamalt—a superior malt syrup.
Fleischmann's arkady—a dough improver.
Fleischmann's frozen eggs.
Fleischmann's phos-fo-lac and Fleischmann's cream—acid bases for baking powder.
These fine ingredients help to insure the high quality of bakers' products.

OTHER STANDARD BRANDS PRODUCTS

Distributed from Cleveland: Widlar's teas, coffees, pickles, spices, salad dressting, condiments, sauerkraut, etc., famous in the Central West for their high quality.

Barley malt and rye malt, made by the Fleischmann Malting Co.

Fleischmann's white distilled vinegar, made by Standard Brands, Inc.

Sold in Canada exclusively: Gillett's magic baking powder, Gillex cleanser, Gillett's flake lye, Royal yeast cakes, Gillett's cream of tartar, Gillett's caustic soda, magic soda, and bicarbonate of soda.

Agreement made at New York, N. Y., this 17th day of November 1933, between the Emulsol Corporation, an Illinois corporation having its principal office at 59 East Madison St., Chicago, Illinois, hereinafter designated "Emulsol", and Standard Brands, Incorporated, a Delaware corporation having an office at 595 Madison Avenue, New York, N. Y., hereinafter designated "Standard", Witnesseth:

Whereas Emulsol represents that it is the sole owner of all right, title, and interest in and to United States Letters Patent No. 1730879 patented October 8, 1929, to Albert K. Epstein, and No. 1744575 patented January 21, 1930, to Thomas M. Rector, both assignors to Emulsol, and that Emulsol has the right to grant licenses under the following additional United States Letters Patent: 1595765, 1595766, 1687268, 1687269, 1687270, 1737365, 1842733, 1883652, and represents specifically that it has the right to grant the license and make the agreement hereinafter set forth; and

Whereas, there is now pending in the United States District Court for the Northern District of Ohio, Eastern Division, a suit in equity No. 4587, brought by Emulsol as plaintiff against Standard and The Widlar Corporation and The Fleischmann Corporation (which corporations are affiliated with Standard) as defendants, said suit being based on said United States Letters Patent No. 1730879; and

Whereas, the parties desire to settle the said suit and any liability growing out of the use by said defendants of any of said Letters Patent; and

Whereas Standard desires the license hereinafter set forth:

Now, therefore, in consideration of the premises and of the promises and conditions hereinafter set forth, it is agreed as follows:

1. Emulsol hereby agrees to discontinue the said suit and to waive an accounting and the payment of any costs, damages, profits, or other recovery therein (other than the payment which is made concurrently by Standard as hereinafter set forth, and agrees to waive likewise any and all liability of Standard, The Wildar Corporation, The Fleischmann Corporation, and any other companies subsidiary or related to Standard, and all the customers of said companies or any of them, by reason of the manufacture, use, or sale of anything heretofore made and disclosed or claimed in said Letters Patent or any of them. In part performance of this agreement Emulsol has concurrently herewith executed and delivered to Standard a consent to such termination of said suit.

2. Emulsol further agrees to and hereby does grant a non-exclusive license to Standard, its present subsidiary, controlled and/or affiliated corporations (so long as they remain such) and any successor wholly controlled by Standard or in which there is to a substantial extent the same or common ownership, under all the above described Letters Patent and during the life of this agreement, to make, use, and sell all products and to use all methods and processes disclosed or claimed in said Letters Patent or any of them and for all purposes, without royalty, except:

(*a*) That Standard for itself and the companies above described, agrees not to sell or solicit the sale of any patented products made under this license for use in the manufacture of mayonnaise and salad dressing to the manufacturers named in the annexed Schedule A unless Standard acquires a controlling ownership in such a manufacturer; and

(*b*) That in case Standard or other licensed companies mentioned above sell patented products made under this license for the manufacture of mayonnaise and/or salad dressing by others (exclusive of Standard and other companies specified in the introduction to Section 2), Standard shall pay to Emulsol a royalty at the rate of One-half Cent (½¢) a pound on all licensed products sold to such manufacturers for said purpose.

3. Standard agrees to and hereby does pay to Emulsol the sum of Seven Thousand Dollars ($7,000.00), receipt whereof is hereby acknowledged.

4. The royalties required by paragraph 2 (*b*) shall be paid on the 15th day of January, April, July, and October in each year during the life of this agreement, covering such sales during the three (3) calendar months preceding the month of such payment, and be accompanied with a duly verified report setting forth the facts from which such royalty can be computed Standard agrees further to keep full and accurate records showing the sales of the patented products for mayonnaise and salad dressing, and to permit Emulsol or a duly authorized representative to inspect such records at any time during ordinary business hours to the extent necessary to verify the reports and payments made under this agreement. Sales for the purpose of this agreement shall mean sales by the licensed companies (mentioned in the preamble to Section 2 to) another customer, and shall

Digitized by Google

not be deemed to include or impose a royalty requirement upon a mere transfer or sale of patented material from one of said licensed companies to another of said licensed companies.

5. Standard hereby agrees that in all sales of the licensed products hereunder, it will cause to be affixed to each container in which said products are packed and/or sold a notice reciting that said products are made under one or more of the patents hereby licensed, together with the numbers of such patents or with some other legal and proper form of patent notice.

6. In case there shall be a default in the payment of royalties or the rendering of reports hereunder, Emulsol shall have the option to terminate this agreement at any time provided it gives to Standard thirty (30) days' notice in writing specifying such default and the intention of Emulsol to terminate the agreement therefor, and said default is not corrected within said thirty (30) day period.

7. In case it be held by any court of competent jurisdiction from which no appeal is taken, that any claim of the patents hereby licensed is invalid upon grounds which apply to other licensed claims covering a given product, Standard shall have the right to terminate its obligations as to royalties and reports upon any product not covered by other claims.

8. It is further mutually agreed that Standard shall have the right to terminate this agreement upon six (6) months' notice either (*a*) without stated cause at any time after the expiration of five years from the date of this agreement; (*b*) at any time if the licensed patents are not so respected by the trade as to protect Standard against substantial competition from those not paying substantial considerations to Emulsol and not being diligently sued by Emulsol in the effort to terminate such competition.

9. This agreement and the license shall continue until the expiration of all the licensed Letters Patent, and shall extend throughout the United States and its territories, but no royalty shall be payable after the expiration of any of said patents upon any product not manufactured under an unexpired claim.

10. This agreement shall extend to and be binding upon Emulsol, its successors and assigns and upon Standard and its said other licensed companies.

In witness whereof, each of the parties has caused this instrument to be executed by its officers thereto duly authorized and its corporate seal to be affixed by like authority at New York, N. Y., the day and year first above written.

Certified Public Accountant.

CHICAGO, ILLINOIS,
November 13, 1933.

LICENSE AGREEMENT

This agreement made in accordance with the laws of New York in triplicate this 29th day of October, 1931, between William L. Lomax, of Chicago, Illinois, (hereinafter called inventor) and Frank B. Lomax, doing business under the name and style of Frank B. Lomax Co., having an office and place of business at 365 West Oak Street, Chicago, Illinois, (hereinafter called Licensor), the first parties; and Standard Brands Incorporated, a Delaware corporation having a principal office and place of business at 595 Madison Avenue, New York, New York (hereinafter called Licensee), the second party; witnesseth:

Whereas the first parties hereby warrant that inventor is the inventor of, and the first parties (or one of them) exclusively own the entire right, title, and interest in and to certain inventions relating to processes of treating eggs and in and to an application for United States Letters Patent thereon, Serial Number 557,266, filed on or about August 15, 1931, a copy of said application being hereto attached and marked "Exhibit A", and hereby warrant that no license or right such as to be in conflict with the provisions hereof has heretofore been granted or agreed to be granted; and

Whereas licensee is engaged in the business of packing and selling eggs and desires to use the process and apparatus shown, described and/or claimed in said application and any improvements and/or other inventions relating to egg products and/or processes of treating eggs which the first parties may make and/or acquire or control during the life of this Agreement;

Now, therefore, in Consideration of the premises and of the promises and conditions hereinafter set forth, it is agreed as follows:

1. The first parties hereby grant to licensee the exclusive right in all parts of the United States and its territories and throughout the Dominion of Canada, throughout the term of this Agreement or so long as the terms hereof are fulfilled by second party but no longer, to practice the processes described and/or claimed in said application, make and use the apparatus therein illustrated and/or claimed, and make, use, and sell the products described and/or claimed in said application for Letters Patent of the United States, Serial Number 557,226, and any changes, alterations, additions, or improvements to their said process or the equipment used in connection therewith and/or in any other Letters Patent which the first parties or either of them now or hereafter acquire, own or control, or have the right to grant licenses under, pertaining to the mixing, agitation, or filtration of eggs. Such license herein granted also confers upon Licensee the right to grant sublicenses within the said period, territory, and scope.

2. Licensee agrees to pay to Licensor during the calendar year of 1932 one-tenth (1/10th) of a cent per pound royalty on all eggs packed under said process by or for the Licensee, with a guaranteed minimum royalty of Five Thousand Dollars ($5,000.00) for said calendar year.

For the calendar year of 1933, and all subsequent years, covered by this contract, the Licensee agrees to pay to the Licensor as royalties for all eggs packed by or for the Licensee as follows:

One-tenth (1/10th) of a cent per pound up to and including Twenty Million (20,000,000) pounds;

One-twentieth (1/20th) of a cent per pound in excess of Twenty Million (20,000,000) pounds and up to and including Forty Million (40,000,000) pounds;

One-fortieth (1/40th) of a cent per pound in excess of Forty Million (40,000,000) pounds.

In addition to the foregoing payments, Licensee agrees to pay to the Licensor one-tenth (1/10th) of a cent per pound for all eggs packed under this process by

Digitized by Google

its sublicensees, which, however, shall not include any eggs packed by or for the Licensee.

On all eggs so packed by both Licensee and its sublicensees, royalties shall be due and payable in monthly instalments on or before the 15th day of each month for the eggs packed during the preceding calendar month. In the event that the number of eggs packed during the year 1932 prior to August 1 is insufficient to bring the earned royalties to $5,000.00, the difference between the earned royalties paid and $5,000.00 will be paid to the first parties on or before August 15, 1932, without demand made by the first parties, the said difference, however, to be credited by Licensor against any royalties subsequently payable to Licensor during the calendar year 1932.

3. Licensee agrees to keep and to obligate its sublicensees to keep accurate books and records showing the number of pounds of eggs treated by the use of the said inventions and packed during 1932, month by month, and showing the number of pounds of eggs treated by the use of said inventions and packed during succeeding years, month by month, and to permit the first parties or their duly authorized representatives to inspect said books and records at any time during ordinary business hours.

4. The first parties shall disclose promptly to Licensee, and shall not disclose to any third party except for the purpose of obtaining letters patent, any and all improvements, inventions, letters patent, and applications coming within the scope of this license, and shall, with reasonable diligence, and at the expense of the Licensor, file and prosecute such patent applications on each of said improvements or inventions, as may be necessary or advisable in order to secure adequate patent protection for the Licensee in all parts of the United States and its territories and throughout the Dominion of Canada.

5. The first parties agree to keep the Licensee informed of the status of all applications coming within the scope of this license and to furnish Licensee promptly with copies of all applications and of all Patent Office actions and amendments resulting therefrom.

6. Inventor agrees to execute all applications for Letters Patent or for reissues and all other papers which may be necessary or advisable in order to secure adequate patent protection for Licensee within the scope of this license.

7. Any litigation in defense of the use of said process or any action to stop infringement of said patent which may be affected by this license shall be at the expense of the Licensee and such expense shall not be recoverable out of royalties. Any sum or recovery derived from such litigation shall belong to Licensee. First parties will join as parties plaintiff in any infringement suit brought by second party at the request of second party.

8. If the application for Letters Patent hereinabove identified shall be finally refused or abandoned, or any patent resulting therefrom be held invalid or so limited in its scope by any court of competent jurisdiction so that the Licensee or its sublicensees hereunder do not have substantial protection from such Letters Patent throughout the territories thereof, the obligations of Licensee and its sublicensees hereunder with regard to this contract shall thereupon cease.

9. In the event Licensee should abandon the practice of canning eggs or in the event that its production falls below an amount sufficient to pay a royalty of $10,000.00 per annum for any calendar year after 1932, then Licensor may terminate this license on thirty days' notice. On receipt of such notice, the Licensee agrees to assign to the first parties an unencumbered and full right, title, and interest in any then existing sublicense agreements without further consideration and regardless of the advantageous nature of such sublicenses.

10. Nothing herein contained shall take away any right which Licensee would otherwise have to question the validity of the patents of the first parties after the termination of this license or the right to use processes and make, use, and sell apparatus and products which do not infringe the valid rights of the first parties.

11. Licensee shall have the right to terminate this Agreement at any time between August 1 and October 1 in any year, but shall not thereby be relieved from the payment of royalties which have accrued prior to such notice or the guaranteed minimum royalty for the year 1932. Licensor shall have the right to terminate this license in the event that the Licensee defaults in the payment of its royalties or in the rendering of its reports and such default continues for a period of thirty days after written notice. Unless sooner terminated in accordance with the provisions hereof, this Agreement shall run to the expiration of the last to expire of the patents under which license is hereby granted.

Digitized by Google

12. This Agreement shall extend to and be binding upon the heirs, personal representatives, successors, and assigns of the respective parties.

In witness whereof the first parties have hereunto set their hands and affixed their seals, and the Licensee has cause this instrument to be signed by its officers thereto duly authorized and its corporate seal to be affixed by like authority, the day and year first above written.

On this fourth day of November 1931, before me, a Notary Public, personally appeared William L. Lomax and Frank B. Lomax, the said Frank B. Lomax doing business under the name and style of Frank B. Lomax Co., to me known and known to me to be the individuals described in and who executed the foregoing instrument, and duly acknowledged to me that they executed the same.

[SEAL] MATT J. LYMAN, *Notary Public.*

My Commission Expires October 7, 1934.

STATE OF NEW YORK,
County of New York, ss:

On this twenty-ninth day of October 1931, before me, a Notary Public, personally appeared T. L. Smith, to me known, who, being by me duly sworn, did depose and say that he resides at Summit, New Jersey, that he is First Vice-President of Standard Brands Incorporated, the corporation described in and which executed the foregoing instrument; that he knows the seal of said corporation; that the seal affixed to said instrument is such corporate seal; that it was so affixed by order of the Board of Directors of said corporation, and that he signed his name thereto by like order.

[SEAL] GERTRUDE F. HOGAN, *Notary Public.*

Commission expires March 30, 1932.

IN THE UNITED STATES PATENT OFFICE, PETITION

To the COMMISSIONER OF PATENTS:

Your petitioner, William L. Lomax, a citizen of the United States and resident of Chicago, in the County of Cook, and State of Illinois, whose post-office address is 365 West Oak Street, Chicago, County of Cook, and State of Illinois, prays that letters patent may be granted to him, as sole inventor for the improvement in Process of Treating Eggs set forth in the annexed specification, and hereby appoints Henry B. Floyd, Register No. 11454, of 38 South Dearborn Street (First National Bank Building), City of Chicago, County of Cook, and State of Illinois, his attorney, with full power of substitution and revocation to prosecute this application, to make alterations and amendments therein, to receive the patent, and to transact all business in the Patent Office connected therewith.

WILLIAM L. LOMAX.

SPECIFICATION

To Whom It May Concern:

Be it known that I, William L. Lomax, a citizen of the United States, residing at Chicago, in the County of Cook, and State of Illinois, have invented new and useful improvements in a Process of Treating Eggs of which the following is a specification:

The present invention relates to a process for the preservation and canning of eggs and has to do particularly with a means for obtaining a better and improved product. The invention relates primarily to what are known as "canned eggs", and is of large importance in the baking and other industries in that superior

Digitized by Google

canned eggs and greater uniformity of quality is obtained. It is useful for canned whole eggs, canned yolks, or canned whites of eggs.

At the present time, there are a number of egg breaking establishments or concerns. Eggs are broken, treated, and placed in cans. The yolks and the whites may be separated before canning when desired. The cans are maintained in cold storage until marketed and used. Great volumes of canned eggs are employed by bakers, or in other trades in which there is a demand for fresh eggs, or their equivalent, or for the materials which are contained in eggs. It is for the purpose of improving the canned product prepared by the egg breaker and going to the baker and others using such a product that the present process was perfected.

At the present time, and until the discovery of the present process, canned eggs contained some impurities or lacked uniformity. Such eggs contained materials which were not wholly desirable to the users thereof and which sometimes caused rejection of the product, or the use thereof under apprehension.

Coventionally, canned eggs have been subject to the following impurities or objectionable features, as well as to other undesirabilities. Splinters of the egg shell have gotten into the cans with the eggs to remain there until the eggs were used. When such splinters or parts of shells have not been noted in the product when in the hands of the users and are not removed by such users, the result has been that the ultimate consumer of say, cake, bites into a piece of splinter of shell. A number of damage suits have resulted against users of canned eggs because of the failure of the egg breaker or user of the product to successfully remove all the splinters or pieces of egg shell from the product.

Another objectionable feature in canned eggs has been lumps, some of which are called "meat balls" and others blood spots. Just what causes lumps to form is hard to understand. Some appear to be hardened portions of yolk. Such lumps are found in varying quantities in the heretofore conventional type of canned eggs. Lumps are objectionable to a baker or to other users of canned eggs in that lumps persist and are not broken down during the course of the mixing incidental to the use of the eggs. Lumps are successfully removed only at the breaking plant and must be watched for very carefully. Notwithstanding care, many get into the canned product.

Some dirt may get into conventionally canned eggs. Notwithstanding the fact that the eggs to be broken are kept as clean as is possible to do during the egg breaking operation and only clean eggs are supposed to be used, many of the eggs which get to the egg breaker have foreign matter upon the shell. Not infrequently such foreign matter gets into the eggs before being canned and is carried therewith into a cake or other product in which the canned eggs are employed.

Another product which is normally a part of conventionally canned eggs is the chalaza which serves no good purpose in the egg material insofar as baking is concerned. No successful means for excluding the chalaza from canned eggs has heretofore been devised as far as applicant knows, and until the present invention the chalaza was present in canned eggs. Its slow solubility makes it an undesirable addition to the eggs.

Because of the repeated handlings and mixings of eggs during canning, air has gotten thereinto. There has been a resulting formation of a foam and a froth upon the eggs which foam and froth is highly objectionable.

If air gets into the eggs during the course of canning, a certain amount of foam or froth forms upon the top of the eggs in the can. This frothy or foamy material, during the course of the preservation of the eggs at low temperatures, hardens and becomes gelatinous and provides an undesirable and unusable addition to the canned egg product. The baker or other user of canned eggs endeavors to find a product which is free from froth or foam, which freedom necessitates a total exclusion of air from the eggs after breaking and during the process of canning.

The objects of the present invention include the provision of a process for canning eggs which will exclude shell or splinters of shell from the eggs before canning, will prevent the formation of lumps or remove such lumps from the canned eggs in the course of canning, will exclude all dirt from the canned eggs, will remove the chalaza, which will keep air out of the eggs and which will prevent the formation of foam and froth therein.

All of these objects are attained in the process hereinafter described, and a new and superior canned egg product is the result of such new process.

For carrying out of the present invention, an apparatus such as is illustrated in the accompanying sheet of drawing may be employed, such drawing comprising a single figure somewhat schematic in its effect. Like reference characters are

Digitized by Google

used to designate similar parts in the drawing and in the description of the process following.

For the purpose of carrying out the present process, eggs are broken at a breaking table in the usual way. The egg breaking work is generally done by help skilled in breaking the shell to prevent unnecessary rupture thereof or of the contents of the shell. The women employed for this work become expert in detecting strictly fresh eggs from those which are too old to can. These usable eggs are segregated in a can or receptacle and the old eggs are rejected. Only fresh eggs are employed for canning. The various devices employed in egg breaking or in aiding the operative in the inspection of the broken egg do not form a part of the present process and need not be here illustrated or described.

The selected fresh eggs, which are temporarily dumped into a pail, bucket, or other suitable dish, are emptied into a receiving tank or hopper A, the left-hand tank or member in the drawing. From said hopper or receiving tank A, the eggs are drawn through the conduit B and a pump C and are forced upwardly from the pump C through the discharge conduit D into an egg-mixing tank E. The eggs which are not disintegrated in the mixing tank A are broken up to some extent in the pump C, and are forced into the tank E against the back pressure of the contents of said tank E. Hence, such eggs are not agitated in the presence of air which might otherwise be the case, agitation causing air to mix with the eggs. The effect of the pump C is to disintegrate the eggs without admission of air thereto or the forcing of air thereinto.

In the tank E there is a bottom propeller F which is adapted to be actuated by any suitable prime mover such as the motor G. As the agitation of the propeller F is at the bottom of a tank of eggs and below the top level, the tank E being filled to the line H before operation of the propeller F is started, there is no opportunity to draw or force air into the eggs in the tank.

By the use of the baffles I which surround the propeller F, any tendency on the part of the liquid egg material to rotate in the direction of the movement of the propeller F is overcome, and a complete mixing and agitating of the eggs, without the introduction of air thereinto, is thus obtained in the tank E. When such agitation has been continued until the whites and the yolks of the eggs are thoroughly broken up, disintegrated, and intermixed, the agitation is stopped in tank E, whereupon the egg material which is thoroughly uniform in its proportion of yolk and white content throughout is drawn out of the tank E through the pipe J by a pump K, and forced through the conduit L into a filter M.

The egg material or mix is forced through the filter M from the inside thereof outwardly. The porosity of the filter M is such that the chalaza, splinters or pieces of shell, and foreign matter will not pass through the pores of the filter but will remain on the interior of the filter M.

The filter M is encased in a housing N of suitable dimensions and coextensive with the length of the filter M. As egg material is forced through the pores of the filter M, it collects in the housing N to be drawn therefrom by way of a pipe O by the force of the pump K. The egg material is thus forced to travel into a tank P, which is supplied with an agitator Q adapted to be actuated by a motor R.

The tank P is a temporary storage tank from which the thoroughly mixed egg material is withdrawn coincidentally with its being run into cans, the discharge from the tank P being through the pipe S.

In order to keep the material thoroughly agitated while it is being withdrawn, the agitator Q is operated, said agitator being enclosed by a baffle T to prevent a circulatory action being imparted to the contents of the tank P.

The movement of the egg material through the filter into the tank P is always with a back pressure against the egg material so that there is no opportunity for air to be incorporated into the mixture during its course into the storage tank P. Likewise, no air is incorporated into the mix during the can-filling operation.

In the present process, when the whole egg is employed, disintegration of the egg and an even distribution of the yolk and the whites. This distribution is very important when a recipe calls for a whole egg, for a baker depends upon an average proportion of white and yolk in his whole egg material. Unless the average proportion of the white and yolk as it exists in a single egg is maintained in the large cans of whole eggs which are put in storage and thereafter withdrawn therefrom for the use of bakers, disastrous results will follow because the principles and operations of baking are founded upon the natural proportions of the white of an egg to the yolk thereof.

In the present process, the egg material is kept under agitation at all times but the agitation is not of a type to cause incorporation of air into the mix.

From time to time, the filter M is removed from its casing N and cleansed and replaced or a fresh filter substituted. It is indeed surprising to learn the great

Digitized by Google

quantity of shell and splinters of shell and other undesirable material which collects in such a filter.

Likewise, the fact that the eggs are always advanced under back pressure and at no time have an opportunity to be agitated in the presence of air, there is absolutely no froth or foam upon the eggs in the cans when they are put in storage. Hence, there is no froth or foam thereon or therein to separate and form a layer at the top of the cans of eggs and to provide an annoyance to the user thereof.

When desired, the hopper or small tank A may be omitted, and the eggs deposited directly in the mixing tank, or the eggs may go through pump to filter and then to the second tank. Such an arrangement may be desirable in the smaller egg-breaking establishments.

The three essentials in the apparatus for carrying out the present process are a hopper to receive the eggs, a filter, and a vat or receptacle to receive the filter material. Movement through the apparatus should always be against back pressure, as indicated. The process may be effectively carried out upon yolks alone or whites alone, it not being unusual to can these following separation by the egg breakers.

At the present time it is a common practice to pack eggs containing a quantity of salt, sugar, glycerine, syrup, and other ingredients. Apparently, the number of such added ingredients is increasing from time to time.

What I claim is new and desire to secure by letters patent of the United States is:

1. That process of preserving and canning eggs which includes the step of filtering the whole or any separated part thereof.

2. That process of preserving and canning eggs which comprises filtering the eggs anterior to placing in a storage receptacle.

3. That process of preserving and canning eggs which includes the steps of agitating the egg material to disintegration without incorporating air therein.

4. That process of preserving and canning eggs which includes the steps of agitating the egg material to disintegration without incorporating air therein, and filtering the disintegrated egg material.

5. That process of preserving and canning eggs which includes the steps of forcing eggs through a porous membrane through which the impurities and undesirable ingredients thereof will not pass.

6. That process of preserving and canning eggs which includes the step of beating eggs without surface agitation.

7. That process of preserving and canning eggs which includes the step of mixing the eggs while maintaining the level of the egg material in a substantially undisturbed horizontal plane.

8. That process of preserving and canning eggs which includes the step of mixing the white and yolks of the egg while preventing the incorporation of air therein.

9. That process of preserving and canning eggs which includes the step of advancing the eggs against a back pressure.

WILLIAM L. LOMAX.

OATH

STATE OF ILLINOIS,
County of Cook, ss:

William L. Lomax, the above-named petitioner, being sworn, deposes and says that he is a citizen of the United States, and a resident of Chicago, County of Cook, and State of Illinois, that he verily believes himself to be the original, first, and sole inventor of the improvement in Process of Treating Eggs described and claimed in the annexed specification; that he does not know and does not believe that the same was ever known or used before his invention or discovery thereof, or patented or described in any printed publication in any country before his invention or discovery thereof, or more than two years prior to this application, or in public use or on sale in the United States for more than two years prior to this application; that said invention has not been patented in any country foreign to the United States on an application filed by him or his legal representatives or assigns more than 12 months prior to this application; and that no application for patent on said improvement has been filed by him or his legal representatives or assigns in any country foreign to the United States.

WILLIAM L. LOMAX.

Subscribed and sworn to before me, a Notary Public, this day of 1931.

——— ——— *Notary Public.*

Endorsement on back: License agreement, William L. Lomax and Frank B. Lomax with Standard Brands Incorporated, Dated October 29, 1931.

SUPPLEMENTAL AGREEMENT

This agreement made this 4th day of April 1932, between the Wisconsin Alumni Research Foundation, a Wisconsin corporation not for pecuniary profit (hereinafter called the Foundation) and Standard Brands Incorporated, a corporation organized and existing under and by virtue of the laws of the State of Delaware (hereinafter called the Company),

Witnesseth:

That, Whereas, The Foundation and The Fleischmann Company, an Ohio corporation, did on August 9, 1928, enter into a certain license contract whereby the Foundation granted certain rights and licenses to said The Fleischmann Company to use the invention described in Application for Patent No. 723,171, filed June 30, 1924, and Patent Number 1680818 issued thereon, also any other patents affecting this invention, and

Whereas, the rights and licenses of The Fleischmann Company under said contract have been with the consent of the Foundation, duly assigned to the Company, and

Whereas, there is now pending on appeal in the Supreme Court of the State of Wisconsin, a suit instituted by the Company against the Foundation, to secure a judicial interpretation in regard to the rights of said Company under said contract to sell the activated yeast products therein licensed, and

Whereas, the Foundation and the Company are desirous of composing their differences without further legal proceedings by entering into a Supplemental Contract amending said license contract of August 8, 1928;

Now, therefore, it is agreed as follows:

I. That Section II, Paragraph A of said license contract be amended to read as follows:

A The exclusive right and license to manufacture, use, and sell throughout the United States and Canada, antirachitically activated Foil Yeast, Dried Yeast, Autolyzed Yeast, Hydrolyzed Yeast and like yeast products, whether antirachitically activated in bulk (directly) or by incorporation therein of separately antirachitically activated substance (indirectly) subject, however, to the following terms, conditions and agreements:

1. If such yeast products are to be activated indirectly they shall not be activated to a potency in excess of that obtainable by direct irradiation.

2. None of such yeast products shall be used by the Company or sold to others than licensees of the Foundation for use in a field or fields in which the Foundation has prior to the date hereof issued a license or licenses, except as hereinafter provided. (A list of such licensees and the respective fields covered by such licenses is hereto attached, marked Exhibit "A".)

3. Nothing herein contained shall prevent the Company from selling such activated yeast products without restriction in the feed fields for stock, poultry, animals, and birds, nor shall anything herein contained prevent the Company from selling its activated foil yeast without restriction as heretofore.

4. The Company shall not use or sell such activated yeast products for incorporation in the following products, viz, margarines, cosmetics, bottled soft drinks, chewing gum, flour, and cheese.

5. For all purposes and in all fields other than those hereinabove in sub-paragraphs 2 and 4 set forth (except the natural liquid milk field, as hereinafter set forth) the company has the right to sell and use such activated yeast products without restriction, but it shall not permit the name of Dr. Steenbock, the University of Wisconsin, or the Foundation to be used in the advertising of any product in which such activated yeast products may be incorporated, without the consent and approval of the Foundation.

6. The company shall pay to the Foundation a royalty of Two (2c.) Cents per pound for all such activated yeast products, except Foil Yeast, sold by the Company; such payments shall be made semi-annually and in addition to other payments provided for under said contract of August 8, 1928.

7. The Company shall make no price discrimination in the sale of such activated yeast products in favor of nonlicensees.

II. It is understood by the parties that producers of milk are now seeking to increase the antirachitic qualities of milk by the use of activated yeast as a part of the ration of cows, and it is agreed that the Company will not sell its activated dried yeast to milk producers unless they have a license from the foundation in the form of Exhibit B attached hereto, or similar form as may be mutually agreed upon between the Company and the Foundation from time to time. The Foundation agrees that it will promptly issue a license in such form or similar form and

Digitized by Google

for the consideration therein named, to any and all milk producers designated by the Company, whenever requested by the Company to do so, and it is understood that nothing therein contained shall prevent such licensees from evaporating, condensing, or drying such activated milk, or selling the same to other persons, firms, or corporations intending to evaporate, condense, or dry such activated milk.

III. The Foundation agrees that it will not grant new licenses or permit any of its existing licensees, except insofar a such licensees may already be licensed, to sell or use irradiated ergosterol or any solution thereof as a source or medium of imparting Vitamin D properties to liquid milk to be marketed as such; provided, however, that if the parties, having in mind the public welfare, shall mutually agree that the activation of any particular grade or grades of milk, other than certified milk, by direct addition of ergosterol or any solution thereof (as differentiated from feeding such ergosterol or solution thereof) is a more suitable or satisfactory means of imparting Vitamin D qualities to such milk, than thru the medium of feeding Irradiated Dry Yeast, then this restriction shall not apply as to such grade or grades of milk.

In the absence of such mutual agreement, it is understood that nothing in this paragraph shall prevent the foundation, after two (2) years from the date hereof, from granting licenses to dealers iu milk to use irradiated ergosterol or solutions thereof derived from yeast for direct incorporation into grades of milk other than certified milk as a means of imparting Vitamin D thereto; provided, that the Foundation will not grant any such licenses to producers of milk who may be using irradiated dry yeast. In the event that the Foundation grants any such licenses, the Company agrees that it will supply to such licensees irradiated ergosterol at prices that shall not be in excess of prices which the Company is then obtaining for irradiated ergosterol sold for other purposes, and in no event shall such price be in excess of One Dollar ($1.00) for 666,666 present Steenbock Vitamin D units.

IV. The Company shall cooperate with the Foundation to the best of its ability in enforcing the provisions and restrictions of the preceding paragraphs and to this end agrees that it will promptly discontinue the sale of such activated yeast products to any person, firm, or corporation wrongfully using, disposing of, or intending to wrongfully use or dispose of such yeast; it being understood that the Foundation and the Company shall be in mutual accord as to the facts of such wrongful use or disposition, or intended wrongful use or disposition, of such yeast.

The Company further agrees that it will promptly discontinue the sale of such activated yeast products to any person, firm, or corporation licensed by the Foundation when it comes to the attention of the Company by notice or otherwise that such person, firm, or corporation is violating the provisions of its license from the Foundation, it being understood, however, that the Foundation and the Company shall be in mutual accord as to the facts of such violation.

It is distinctly understood and agreed, however, that the Company shall not be responsible or in any way liable for the wrongful acts or representations of any purchaser or user of said products.

V. The Company agrees that it will keep complete records of the sales of its activated yeast products (except Foil Yeast) and will furnish summaries of such records to the Foundation semi-annually. The Company further agrees that it will, upon request, furnish information as to the amount of activated yeast sold to any licensee whom the Foundation may wish to investigate.

VI. Promptly upon the execution of this Supplemental Agreement the Company shall dismiss the appeal in the case of *Standard Brands, Incorporated*, vs. *The Wisconsin Alumni Research Foundation*, now pending in the Supreme Court of the State of Wisconsin.

VII. It is also agreed that the following language appearing in Clause IX of the contract dated August 8, 1928, shall not hereafter be operative: "and shall be such amount plus an amount, if any, which shall be determined and fixed by the Company at the end of each year after reviewing its licensed operations for such year and in good faith based upon the profitableness and the general value and benefit of the licensed inventions to the Company during such year, and which shall appear, in the judgment of the Company, to be fair and reasonable. It is understood and agreed that each such extra amount determined and paid by the Company in excess of the Twenty-Five Thousand Dollars ($25,000.00) per year minimum shall be considered independently of any such amount of the same character which may have been paid theretofore or which may be paid thereafter."

Digitized by Google

VIII. All other provisions of the contract of August 8, 1928, shall remain unaltered except as expressly modified by this Agreement.

In witness whereof, the Parties have hereunto affixed their corporate seals and caused these presents to be signed, the Wisconsin Alumni Research Foundation, by its officers, and Standard Brands, Incoprorated, by its officers, thereunto duly authorized by their respective Boards of Directors.

License granted this _____ day of _____ by the WISCONSIN ALUMNI RESEARCH FOUNDATION, a Wisconsin corporation not for pecuniary profit, hereinafter called the LICENSOR, to _____ of _____ hereinafter called the Licensee, Witnesseth:

Whereas the Licensor is the owner of United States Letters Patent No. 1,680,818, issued August 14, 1928, relating to antirachitic products and processes, and other patents and applications for patents relating to the same;

Whereas the Licensor has granted a license to Standard Brands, Incorporated, authorizing said Company, exclusively, to activate dried yeast under said patented process, but to sell the same only to other licensees of the Licensor, when said yeast is intended for use in the manner herein licensed;

Whereas the Licensee is desirous of securing a license under said Letters Patent to increase the antirachitic qualities of milk by the feeding of irradiated dried yeast to cows;

Now, therefore, in consideration of the premises and the sum of One Dollar for each cow in a producing herd of not more than _____ cows, the receipt whereof is hereby acknowledged, the Licensor has licensed and empowered, and by these presents does license and empower the Licensee to purchase from Standard Brands, Incorporated, dried yeast antirachitically activated under said Letters Patent and other patents, upon the following terms and conditions:

First. The Licensee shall buy and use such yeast for no other purpose than that of feeding cows to impart antirachitic qualities to milk.

Second. This License shall expire one year from the date hereof.

Third. The Licensee agrees to feed such irradiated dried yeast at the average daily ration of not less than ten (10) ounces per cow until such time as biological tests indicate that a different amount may be fed to impart a potency of not less than approximately 160 Steenbock Units per quart of milk, and Licensee will cause to be made such biological tests as may be necessary.

Digitized by Google

The Licensee shall keep a record of all such activated yeast used and the number of cows fed, and the Licensor shall have the right at any time to inspect such records, as well as the dairy, plant, or farm of the Licensee. Licensor shall also have the right to test the milk activated under this License, and the Licensee will furnish to the Licensor, upon request, free of charge, the necessary samples for this purpose.

Fourth. The Licensee shall not sell any of its antirachitically activated milk to others for use or incorporation in any other marketed product when Vitamin D or antirachitic claims are made or intended to be made for such other marketed product.

Fifth. The activated yeast purchased by Licensee pursuant to this License shall not be resold or otherwise used except for feeding the same to the Licensee's animals, pursuant to the conditions of this license.

Sixth. The Licensee shall not, without the approval of the Licensor, circulate any advertising material relating to the Licensor, the Steenbock process, the Steenbock patents, the University of Wisconsin, or Dr. Steenbock, nor shall Licensee make any unwarranted claims for the milk so produced.

Seventh. The Licensee shall not assign this license without the written consent of the Licensor.

Eighth. Licensee hereby accepts the said License upon the terms and conditions herein set forth and does hereby agree to comply with all the said terms and conditions. Violation of any of such terms and conditions shall constitute sufficient cause for the revocation of this license forthwith.

(Endorsement on back.) Wisconsin Alumni Research Foundation, Supplemental Agreement, Dated April 4, 1932, Terminating July 31, 1936.

MEMO RE AGREEMENT OF AUGUST 8, 1928, BETWEEN THE WISCONSIN ALUMNI RESEARCH FOUNDATION AND THE FLEISCHMANN COMPANY

It is understood by the parties that the statement of permissible claims for the Company's advertising referred in paragraph X, sub-paragraph (b), shall include a provision whereby the Company's advertising use of the name "Steenbock" (beyond the use thereof in the legend of said paragraph) shall be submitted in advance for approval to a Trustee of the Foundation in New York City, appointed for the purpose, and that such approval shall not be unreasonably withheld or delayed.

MEMORANDUM OF ADVERTISING POLICY AND "LIMITS OF FACT STATEMENT" RELATING TO ANTI-RACHITICALLY ACTIVATED YEAST REFERRED TO IN FLEISCHMANN COMPANY-WISCONSIN ALUMNI RESEARCH FOUNDATION CONTRACT, PARAGRAPH X (B), OF AUGUST 8, 1928

All statements relating to ergosterol shall be in strict accordance with the facts, and all advertising copy and publicity articles will be referred to Dr. Lee for careful study and okeh.

A general statement regarding the importance of vitamins in the diet may be used.

The facts on which Dr. Steenbock and Dr. Lee are in general agreement and on which advertising statements may be based are as follows:

1. That through the addition of activated ergosterol yeast now carries another vitamin—Vitamin D—also known as the antirachitic vitamin.
2. In the human diet, under practical conditions, Vitamin D is necessary for the proper assimilation and retention of lime and phosphorus and for growth.
3. Vitamin D is especially important for expectant and nursing mothers.
4. Vitamin D is absolutely essential for the infant and growing child and valuable during the entire period of bone growth, for which it is a necessary factor. It makes the musculature firmer.

Digitized by Google

5. Cow's milk is always inferior to mother's milk, which is frequently deficient in vitamin D.

6. In the human diet Vitamin D is essential for the retention of lime and phosphorus, which is so important for the roper development of the teeth.

7. Yeast now has the active principle, Vitamin D, of cod liver oil.

8. Yeast properly treated with ergosterol is as valuable as a source of Vitamin D as cod liver oil.

9. A cake of yeast with the proper amount of activated ergosterol has the same anti-rachitic properties as cod liver oil.

10. One cake of yeast, properly activated, contains as much Vitamin D as a teaspoonful of cod liver oil

11. Vitamin D is especially valuable for those children living in cities, who are deprived of a normal amount of bring sunshine.

12. Vitamin D is produced in the yeast by the action of ultra violet light.

13. Yeast is the richest known source of that substance which when exposed to ultra violet light is converted into Vitamin D.

14. Ergosterol is known as the pro-vitamin D, because by the action of the ultra violet it is converted into Vitamin D or rather anti-rachitic vitamin.

15. Yeast is the richest known source of ergosterol which is converted into Vitamin D by irradiation.

16. Vitamin D in the diet guards against rickets which come from lack of sunshine. The mere brightness of the sun is no criterion of its richness in ultra violet. The essential seems to be the clearness of the atmosphere. Smoke and dust prevent the ultra violet from reaching the surface of the earth.

17. In the so-called sunshine treatment the optimum exposure is difficult to determine; since its efficacy depends upon the amount of ultra violet light which varies with the atmospheric conditions. Direct treatment with ultra violet light is unreliable as to dosage, and may result in considerable harm. Over-treatment with ultra violet is dangerous.

18. The use of ultra violet should be strictly confined to institutional treatment.

19. One advantage of the Fleischmann activated yeast is the accuracy of the dosage. There is no danger of an overdose.

N. B.—It is understood that as soon as the proper amount of activated ergosterol to be used in yeast has been established, in no case shall a yeast cake contain more than four times this amount.

20. Stores setting forth the facts of the effect of ergosterol and irradiated food stuffs on chickens, rats, and other laboratory animals and laboratory photographs are permissible.

21. Advertising relating to this subject may contain some one of the following legends:

Activated by the Steenbock Process under licenses from the Wisconsin Alumni Research Foundation, or

Contains Vitamin D produced by the Steenbock Process as licensed by the Wisconsin Alumni Research Foundation, or

Anti-rachitically activated by the Steenbock Process under license from the Wisconsin Alumni Research Foundation, or

Some similar legend which will be submitted for approval.

22. The importance of educating the public as to the meaning of irradiation and the value of Vitamin D will be constantly borne in mind and stressed.

23. A constant effort will be made to keep the advertising on a high dignified plane, and all advertising featuring either Dr. Steenbock, his work or the University of Wisconsin will be submitted to Dr. Steenbock for approval.

24. It is understood that the above is merely a preliminary attempt to agree on the facts as they now stand and is subject to change and amplification as the science progresses and our knowledge of the value of vitamin D grows.

(Sgd.) R. E. LEE.

L. M. Hanks, being first duly sworn, says that he is Secretary of the Wisconsin Alumni Research Foundation and that he has attended the meeting of the said Foundation held on August 13, 1928, in the City of Madison, Wisconsin, attending said meeting both as a Trustee and as Secretary of said Foundation; that as such Secretary he has custody of the minutes of said meeting and that he knows that said minutes correctly report the proceedings of said meeting; and that the annexed copy of the resolution passed at the said meeting correctly reports the resolution duly made, seconded and carried by the said Board of Trustees in said

Digitized by Google

meeting; and that the same was not modified, canceled or weakened by any other or further proceedings held by the said Board.

L. M. HAWKS.

Subscribed and sworn to before me this 13th day of August A. D., 1928.

[SEAL] H. J. BECK,
Notary Public, Dane County.

My commission expires Aug. 19, 1928.

At a meeting of the Trustees of The Wisconsin Alumni Research Foundation held at The Central Wisconsin Trust Company, Madison, Wisconsin, on the 13th day of August 1928, at nine-thirty A. M., at which meeting the following Trustees were present: Thomas E. Brittingham, Vice President; L. M. Hanks, Secretary and Treasurer; Timothy Brown, and Professor Harry Steenbock, the following resolution, proposed by Mr. Brown and seconded by Mr. Hanks, was unanimously adopted:

Whereas Mr. W. S. Kies, one of the trustees of The Wisconsin Alumni Research Foundation, and Professor Harry Steenbock, pursuant to authority delegated to them at the meeting of the trustees held on Saturday, August 4, 1928, have executed on behalf of the Foundation under date of August 8, 1928, a certain license agreement between The Wisconsin Alumni Research Foundation and The Fleischmann Company, a copy of which is hereinafter set forth: Now, therefore, be it

Resolved, That the trustees do hereby approved, ratify, and confirm in all respects the said agreement so executed on August 8, 1928, by Mr. W. S. Kies and Professor Harry Steenbock on behalf of The Wisconsin Alumni Research Foundation with The Fleischmann Company; and be it further

Resolved, That a copy of the minutes of this meeting, duly certified, be attached to the Fleischmann Company's duplicate original of said agreement.

L. M. HANKS, *Secretary.*

AGREEMENT

This agreement dated the 8th day of August 1928 between The Wisconsin Alumni Research Foundation, a corporation not for profit under the laws of the State of Wisconsin (hereinafter called the Foundation) and The Fleischmann Company, a corporation organized and existing under the laws of the State of Ohio and having a principal office in the City, County, and State of New York (hereinafter called the Company), each by its proper officers thereunto duly authorized, Witnesseth:

I. The Foundation represents and warrants that it has full right and authority to convey the license rights hereinafter granted.

II. The Foundation grants the Company under application for United States patent, Serial No. 723,171, filed June 30, 1924, by Harry Steenbock and under any and all United States Letters Patent which may eventuate therefrom, and under any and all additional United States patents and applications therefor now owned or hereafter acquired by the Foundation relating to antirachitic activation of substances (all hereinafter referred to as the Foundation patent rights), the following rights and licenses for the entire effective territory of said patents:

A. The exclusive right and license to manufacture antirachitically activated Foil Yeast, Dried Yeast, Autolyzed Yeast, Hydrolyzed Yeast, and the like yeast products whether antirachitically activated in bulk (directly) or by incorporation therein of separately antirachitically activated substance (indirectly) and to sell such antirachitically activated Foil Yeast, Dried Yeast, Autolyzed Yeast, Hydrolyzed Yeast, and the like yeast products without restriction throughout the United States and Canada, the Company agreeing, however, that it will not knowingly sell any of its products licensed under this paragraph in substantial quantities in the exclusive licensed field of any other licensee of the Foundation under the Foundation patent rights and that, if such sale should occur, it will after notice use all reasonable business effort in good faith to prevent the recurrence thereof.

B. The exclusive right and license to manufacture antirachitically activated compressed yeast of the type used commercially by bakers or in the home whether antirachitically activated directly or indirectly and to sell the same only to other licensees of the Foundation.

C. The exclusive right and license to make and the exclusive right and license to sell, but only to other licensees of the Foundation, yeast and yeast products, as defined in Paragraph A and B above, but unactivated, for use as a source of

Digitized by Google

antirachitically activatable unsaponifiable lipoids for antirachitic activation, it being understood, however, that the right and license of the Company under the provisions of this Paragraph C shall remain exclusive only during the period or periods that the Company's net selling price for such yeast and yeast products to other licensees of the Foundation shall not be in excess of the Company's net selling price for equal quantities of similar substance sold under similar conditions as to delivery and the like at the same time to bakers or the Company's other trade customers. It is understood and agreed that the rights of the Company to sell unactivated compressed yeast shall not be affected by any provisions of this agreement and that such sale by the Company shall not affect the term or force of this agreement.

D. A non-exclusive right and license to make and the exclusive right and license to sell, but only to other licensees of the Foundation, antirachitically activatable unsaponifiable lipoids, for antirachitic activation, derived from compressed yeast or dried yeast or other yeast used commercially by bakers or in the home, it being agreed, however, that the right and license of the Company under the provisions of this paragraph D shall remain exclusive only during the period or periods that the Company's net selling price therefor to other licensees of the Foundation shall not be more than 10% in excess of the bona fide cost to such licensees of equal quantity of such substance of equal quality imported from abroad (save for such prohibition) and delivered at the same point in the United States with duty and transportation charges paid.

E. A non-exclusive right and license to make and/or sell, but only to other licensees of the Foundation, antirachitically activated unsaponifiable lipoids derived from yeast and yeast products.

III. The Foundation undertakes and agrees that all future licenses which it may grant under the Foundation patent rights shall be granted in all cases subject to the rights of the Company as hereinabove set forth and that no license shall be granted by the Foundation to any other yeast manufacturer, in the United States or Canada, than the Company.

IV. The Foundation undertakes and agrees that in each license hereafter executed under its patent rights, it will incorporate a restrictive provision whereby such licensee shall not be licensed to import into the United States any antirachitically activated foil yeast, dried yeast, autolyzed yeast, hydrolyzed yeast, or compressed yeast, and shall not be licensed to antirachitically activate in the United States any foil yeast, dried yeast, autolyzed yeast, hydrolyzed yeast, or compressed yeast imported from outside the United States.

V. The Foundation further undertakes and agrees that in each such future license (with only the possible exception stated in Paragraph VI following) it will also incorporate a restrictive provision whereby such licensee shall not be licensed to import into the United States any antirachitically activatable unsaponifiable lipoids derived from yeast or yeast products for antirachitic activation nor any antirachitically activated unsaponifiable lipoids derived from yeast or yeast products during any period or periods that such licensee can purchase from the Company such substances, of equal or better quality, at prices not more than ten percent (10%) in excess of the actual cost to such licensee of such material purchasable by it (save for such prohibition) outside the United States for importation into the United States with duty and transportation charges paid.

VI. It is understood that the Foundation is negotiating with certain pharmaceutical manufacturing companies for the grant of licenses under the Foundation patent rights for the manufacture and sale of antirachitically activated unsaponifiable lipoids for medicinal and pharmaceutical purposes. If, in the opinion of the Foundation, the successful conclusion of such negotiations requires it, then it is agreed by the parties hereto that as to such licensees only and as to such licenses only for antirachitically activated unsaponifiable lipoids for sale for medicinal and pharmaceutical purposes and not for sale to any other licensees of the Foundaion the restrictive provision of paragraph V above shall not apply.

VII. Whereas Steenbock, the inventor above named, has not yet determined upon the dosage or degree of antirachitic activation for the contemplated licensed operations of the Company with the precision desirable for commercial operations, it is agreed by the parties that the licenses hereby granted the Company shall begin from the date hereof and extend over a period of two years from a date sixty (60) days after the Company shall indicate its approval of or agreement on the matter of dosage or of degree of antirachitic activation of its licensed product foil yeast. It is understood that Steenbock will proceed with diligence to determine and advise the Company regarding this matter of dosage or degree of antirachitic activation and the Company agrees that it will with diligence thereafter

Digitized by Google

and in good faith consider such recommendations and test the same to the end of reaching an early approval thereof or mutual agreement regarding the matter.

VIII. The Company agrees to pay the Foundation in full payment for the licenses hereinabove granted, the minimum sum of Fifty Thousand Dollars ($50,000.00) payable as follows:

Ten Thousand Dollars ($10,000.00) on the execution of this agreement;

Ten Thousand Dollars ($10,000.00) on the date of the beginning of the two-year period provided for above in Paragraph VII, and

Ten Thousand Dollars ($10,000.00) semiannually thereafter until said Fifty Thousand Dollars ($50,000.00) is fully paid. The Company agrees, moreover, that at the end of said two-year period it will review its licensed operations, and in good faith, based upon the profitableness and general value and benefit of the licensed inventions to the Company during said period, make such increased payment, if any, therefor to the Foundation as shall, in the judgment of the Company, be fair and reasonable.

IX. The Foundation hereby grants the Company an option to extend the licenses hereinabove granted for an additional term of five (5) years and also grants the Company an option to extend the licenses hereinabove recited for such period beyond said five (5) years extension as will constitute the balance of the full term and life of any United States Letters Patent of the Foundation hereinabove referred to, it being understood that the said options are independent and may be independently and successively exercised by the Company and that the amounts payable by the Company to the Foundation as full royalty during the term of either of such extended licenses shall be a minimum of Twenty-Five Thousand Dollars ($25,000.00) per year and shall be such amount plus an amount, if any, which shall be determined and fixed by the Company at the end of each year after reviewing its licensed operations for such year and in good faith based upon the profitableness and the general value and benefit of the licensed inventions to the Company during such year, and which shall appear, in the judgment of the Company, to be fair and reasonable. It is understood and agreed that each such extra amount determined and paid by the Company in excess of the Twenty-five Thousand Dollars ($25,000.00) per year minimum shall be considered independently of any such amount of the same character which may have been paid theretofore or which may be paid thereafter. Each of the options hereby granted may be exercised by the Company and the extended licenses thereby secured to the Company at any time while license rights of the Company are in force and that written notice to such effect deposited in the registered mail and addressed to the Foundation shall be a sufficient exercise of each of said options.

X. The Foundation agrees that the name "Steenbock" and the title "The Wisconsin Alumni Research Foundation" may be used by the Company in advertising its products made under the license granted hereby, but to the extent only as follows:

(a) The Company's advertising which includes said name and/or said title shall be of a dignified and ethical character and not extravagant and not sensational;

(b) The Company's advertising which includes said name and/or said title shall, so far as it advances therapeutic claims for its advertised products arising from inclusion therein of any invention within the Foundation patent rights, confine said claims within the limits of fact statement to be defined by the Foundation promptly hereafter;

(c) The Company's advertising which includes said name and/or said title shall be accompanied by a legend or phrase as follows:

"Made under the Steenbock process as licensed by the Wisconsin Alumni Research Foundation."

(d) No restriction shall ever be imposed on the Company's advertising under the provisions of this paragraph beyond restrictions which the Fouudation has imposed, and/or shall impose, upon all of its other licensees under the Foundation patent rights.

XI. Promptly upon the execution of this agreement the Company undertakes to disclose to the Foundation or to Dr. Steenbock the full recommendations of the Company's patent counsel as to procedure and means for improving the Foundation's patent rights and the Company undertakes further to instruct its attorneys to cooperate to the fullest extent with Dr. Steenbock and/or the Foundation's patent counsel to effect such improved status of the Foundation's patent rights.

XII. It is understood and agreed that the parties, as promptly as possible hereafter, will endeavor to agree on suitable provisions to be incorporated in this

Digitized by Google

agreement, or a supplemental agreement, affecting their ancillary or incidental respective obligations. As examples of such matters on which the parties will endeavor to reach such agreement are the following:

(a) The effect of a final and determinative decree by a court of competent jurisdiction adjudging the claims of the Foundation patents which cover the licensed operations of the Company to be ineffective to protect the Company's operations under the licenses hereby granted;

(b) The effect of a final and determinative decree by a court of competent jurisdiction enjoining the Company from continuing its operations or any of them under the licenses hereby granted:

(c) The institution and maintenance of suits against infringers of the Foundation patent rights, insofar as such infringement may arise to the prejudice of the Company's rights under the licenses hereby granted;

(d) The rights of the parties in and to any future patentable inventions which may be developed by the Company by way of improvement on the subject-matter of the Foundation patent rights under which the Company is licensed;

(e) The rights and obligations of the parties in the event that the Company is sued by any third party for patent infringement arising from the operations of the Company under license from the Foundation.

In witness whereof the parties have hereunto affixed their corporate seals and caused these presents to be signed, The Wisconsin Alimuni Research Foundation, by its agents, and The Fleischmann Company, by its officers, thereunto duly authorized by their respective Boards of Directors.

(Endorsement on back:) Agreement between THE WISCONSIN ALUMNI RESEARCH FOUNDATION and THE FLEISCHMANN COMPANY.

AGREEMENT

This agreement, made May 10, 1935, between S. M. A. Corporation, a corporation organized and existing under the laws of the State of Ohio, with principal office at Cleveland, Ohio (and hereinafter called "SMA"), party of the first part,

Digitized by Google

and Standard Brands Incorporated, a corporation organized and existing under the laws of the State of Delaware, with principal offices at New York City, New York (and hereinafter called "Standard"), party of the second part, Witnesseth:

Whereas SMA is the owner of certain inventions and applications for patents filed and about to be filed in the Patent Office of the United States by W. O. Frohring, A. F. O. Germann, Vernon Jersey, Harold M. Barnett, et al., and relating to a product high in Vitamin A content and the process and methods for production thereof, and is now engaged in manufacturing certain products thereunder (the present product being known as "Primatene"); and

Whereas Standard is engaged in the manufacture and sale, among other things, of Fleischmann's Yeast;

Now, Therefore, the parties agree:

ARTICLE I

SMA shall sell and deliver to Standard, f. o. b. Mason, Ingham County, Michigan, SMA products of high Vitamin A content (now sold under the trade name of Primatene and hereinafter called "Primatene"), with a Vitamin A potency as ordered from time to time by Standard, but not to exceed a potency of over four thousand two hundred (4,200) U. S. P. X units per gram.

During each twelve (12) month period from the effective date hereof Standard shall purchase for use in Fleischmann's Yeast its entire requirements of Vitamin A products for such purpose and SMA shall sell the same to Standard and make delivery thereof with all reasonable promptness and not more than fifteen (15) days after the receipt of each order from Standard. Standard shall pay to SMA for the Primatene at the rate of fifty-five cents (55¢) per million (1,000,000) U. S. P. X units less 10% to allow for unavoidable inaccuracies in the biological assays. Standard agrees to use Primatene in all fresh yeast for health manufactured by it, incorporating approximately 200 U. S. P. X units in each half-ounce yeast cake. In addition, Standard shall supply SMA with cotton-seed oil necessary for the preparation of the Primatene solution to be used by Standard under this contract. The concentration of Vitamin A shall be 5,600,000 U. S. P. X units per gallon, unless otherwise specified by Standard.

The purchase price of all products bought by Standard hereunder shall be paid within the first ten (10) days of the month following delivery.

Deliveries by SMA shall be subject to acts of God, riots, civil or military commotion, strikes, floods, drouths, fires, or other causes beyond its control.

ARTICLE II

SMA guarantees that all Primatene delivered to Standard for the use designated shall have a potency in Vitamin A content as described in Article I. The vitamin unit referred to herein is that known as U. S. P. X (1934 revised).

ARTICLE III

SMA warrants that it has not licensed or sold heretofore, and covenants that it will not hereafter during the existence of this contract, either sell, or license the use and sale of, Primatene or other Vitamin A product, or license said inventions or any patents, either United States or foreign, relating thereto, to any other person or corporation for use in yeast.

ARTICLE IV

Recognizing the necessity of establishing and permanently maintaining in good repute Primatene with its Vitamin A, and the products in which it may be incorporated, and the effect of extravagant or unwarranted statements relating to the potency or efficiency of Primatene or the Vitamin A content thereof, Standard shall not make any statement in its advertising regarding Primatene and/or its Vitamin A content except statements which are like or substantially like those contained in the attached "List of Advertising Statements," or those which may be added thereto by SMA.

ARTICLE V

SMA, if requested by Standard, will, through its attorneys, defend Standard from any actions at law or equity alleging that the products sold hereunder by SMA to Standard infringe any other patents, and will defray the costs and expenses of such attorneys and also pay court costs in any such litigation.

Digitized by Google

If Standard desires action to be instituted against any person or corporation alleged to be infringing any patents owned or controlled by SMA and involved in the manufacture of Primatone, it may so notify SMA in writing, naming the alleged infringer. Within ninety (90) days after the receipt by SMA of such notice, SMA, at its own expense, may file suit to enjoin the continuation of such infringement and/or the recovery of damages therefor, and shall pay to Standard all sums of money recovered thereunder after first deducting its costs and expenses therein. If at the end of such ninety (90) days SMA shall have failed to file suit, Standard may institute such suit at its own expense and in the name of SMA and may retain any and all sums of money recovered therein.

ARTICLE VI

Though executed on the date hereinabove recited this contract shall be effective as of April 1, 1935 and shall continue for three (3) years thereafter; provided, however, that Standard shall have the option to extend it for an additional two year period by giving sixty (60) days' notice in writing prior to the expiration of the first three-year period. Thereafter, subject to the prior written agreement of the parties on the quantities and prices for each ensuing term, this contract may be similarly renewed by Standard prior to the expiration of each two-year period.

During this contract and the first renewal period of two (2) years, Standard shall purchase from SMA its entire requirements of Primatene for use in yeast and SMA shall deliver such Primatene to Standard at a price not exceeding Fifty-Five Cents (55¢), less 10%, per million (1,000,000) U. S. P. X units.

If Standard discontinues the use of Vitamin A in Yeast, Standard shall have the right to cancel the contract at the end of any year during this agreement or any renewal thereof, by giving sixty (60) days' notice in writing prior to the end of such year.

ARTICLE VII

Standard shall not sell or otherwise dispose of, except in its product herein defined, any Primatene purchased hereunder, and this contract shall not be assignable by Standard without first having secured the written consent of SMA, except (a) Standard may assign to a corporation which purchases substantially all of the assets of Standard, and (b) the rights granted hereunder to Standard may be exercised by any of its subsidiary or related companies, subject to their performance of the obligations imposed hereby upon Standard; provided, however, that Standard shall not thereby be released from the obligations hereof (save that the aggregate purchases of such subsidiary or related companies may be applied toward the minimum purchases of Standard set forth in Article I hereof).

ARTICLE VIII

SMA shall use its best efforts and diligence to obtain at its own expense, United States Letters Patent covering said inventions and said Primatene and processes and method for production thereof. At the request, and at the expense of Standard, SMA shall file suitable applications, and thereafter diligently prosecute the same, in any and all foreign countries which Standard by written notice to SMA may request and designate. Said applications and patents and all rights thereunder shall belong to SMA. In all countries in which applications shall have been filed pursuant to this provision, Standard shall have (and SMA binds itself to execute upon request) a royalty free license to manufacture, sell, and use, but in yeast only, the products covered by said patents, and except as to price and quantities, subject to the restrictions and limitations imposed upon Standard hereby, which license or licenses shall be co-extensive with this contract and all renewals and extensions thereof.

ARTICLE IX

In the event of breach of any covenant hereof by Standard or by its assignees or its subsidiaries or related companies exercising rights hereunder pursuant to Article VII, this contract and all rights and obligations of the parties save those theretofore accrued, shall terminate upon the delivery to Standard by SMA of written notice of cancellation of the contract.

Digitized by Google

ARTICLE X

Except for rights and obligations accrued thereunder to date hereof, the agreement heretofore made between the parties dated November 22, 1933, the supplemental agreement dated November 22, 1933, and the supplemental agreement dated May 1, 1934, are terminated and cancelled. It is agreed, however, that all sums due SMA under the price adjustment clause in supplemental agreement dated November 22, 1933, are hereby waived.

ARTICLE XI

All notices provided herein shall be regarded as delivered by the deposit, in the United States mail, of registered letter directed to the opposite party, as follows: if so S. M. A. Corporation, at 4614 Prospect Avenue, Cleveland, Ohio; if to Standard Brands Incorporated, at 595 Madison Avenue, New York City, New York. Either party may give notice to the other of change of address.

In witness whereof the parties hereto have hereunto set their hands by their duly authorized officers, the day and year first above written.

STATEMENTS OF FACTS UPON WHICH ADVERTISING CLAIMS WILL BE BASED

1. According to the present accepted definition of a vitamin, carotene is a vitamin.
2. Carotene is known as primary or pro-vitamin A.
3. Carotene is converted (in the body) into Vitamin A.
4. Through the addition of pure carotene, Fleischmann's Yeast now supplies a fourth vitamin—vitamin A—the anti-infective vitamin.
5. One cake of Fleischmann's Yeast supplies 200 units of vitamin A.
6. Fleischmann's Yeast now supplies both active principles of cod liver oil in the form most suited for the human body.
7. Pure carotene is the international unit for measuring vitamin A. The international unit of vitamin A is that amount equal in activity to 0.001 milligram, or 1 gramma, of standard carotene.
8. Carotene is the natural fruit and vegetable source of vitamin A, and is vitamin A in the form to which man has adapted himself by nature.
9. The inclusion of three cakes of Fleischmann's Yeast in the daily diet provides 600 units of vitamin A in the form of carotene. Nutrition experts agreement that this is a desirable and safe, healthful supplement of vitamin A for the average American diet.
10. One great advantage of Fleischmann's Yeast with Carotene is the accuracy of the dosage of vitamin A.
11. Fleischmann's Yeast contains a dependable dosage of vitamin A in a palatable form.
12. Vitamin A is known as the anti-infective vitamin.
13. Vitamin A is known as the anti-xerophthalmic vitamin.
14. Vitamin A increases the resistance of the mucous membranes to invasion by disease producing organisms.
15. Vitamin A helps to keep the mucous membranes in a healthy condition.
16. Vitamin A is an aid in preserving and promoting health and vigor.
17. A liberal supply of vitamin A is an extremely important factor in maintaining a full measure of health and vigor. A. M. A.
18. Vitamin A is necessary for the normal growth of all the tissues.
19. Normal adults need several times larger the amount of vitamin A in order to do their best than they need to prevent characteristic signs of deficiency.
20. A deficiency of vitamin A may produce a lasting deleterious effect on the body.

Digitized by Google

21. When the diet is deficient in vitamin A there is widespread weakening of the body.
22. Vitamin A is necessary to preserve the anatomic and physiologic integrity of the body surfaces, enabling them to function as the normal protective barrier against disease producing organisms.
23. A lack or deficiency of vitamin A predisposes to infection by changing the natural protective forces effective against bacterial organisms, and by breaking down the natural resistance of the body.
24. Deficiency in the intake of the other vitamins also lowers the resistance to infection, but there is no evidence that the relationship is as direct as in vitamin A deficiency.
25. Vitamin A stands out conspicuously as one of the dietary factors related to respiratory infections.
26. A lack or deficiency of vitamin A in the diet predisposes to colds, bronchitis, and infections of the respiratory mucuous membrane.
27. Partial vitamin A deficiency disturbs the function of the retina of the eye and causes night blindness, while a marked deficiency leads to the destruction of the eye.
28. Vitamin A is necessary for undisturbed function of the glands of the body and is a factor in preserving dental health insofar as proper functioning of the salivary glands are maintained.
29. Vitamin A is essential for the proper formation of the enamel forming organ in the embryo.
30. Vitamin A is especially important for the expectant mother. It is necessary for the formation of healthy tooth germs in the unborn child.
31. Fleischmann's Yeast with carotene may prevent the development of symptoms of vitamin A deficiency.
32. A mild deficiency of vitamin A may lower the resistance of the body to infection before there are pronounced evidence of its deficiency.
33. Vitamin A helps to guard us against many forms of infection.
34. Vitamin A lessens the danger of infections of the eye, nose, throat, lungs, and kidneys.
35. Experimental work with animals indicates that carotene gives better protection against upper respiratory infection than cod liver oil (Turner and Loew, Jour. Inf. Dis. 52, 102 (1933)).
36. During fever, the body store of carotene is rapidly depleted; the need of supplying it daily is therefore obvious (Clausen Am. J. Dis. Child., 42, 6981 (1931)).
37. The presence of carotene in milk and butter emphasizes the importance of this vitamin in nutrition.
38. Mother's milk contains carotene. The importance of an adequate supply for nursing mothers would seem to be obvious.
39. Carotene appears to be present in the reproductive organs of both plants and animals. This fact appears to be significant (Euler, Bull. Soc. Chim. Biol., 838 (1932)).
40. Carotene is a plant pigment. Nutritionists tell us that plant pigments are essential to health (Kugelmass, Feeding in Infancy and Childhood, page 35).

OCTOBER 30TH, 1933.

SUPPLEMENTAL AGREEMENT

This supplemental agreement, made May 1, 1934, between S. M. A. Corporation, a corporation organized and existing under the laws of the State of Ohio, with principal offices at Cleveland, Ohio, and Standard Brands Incorporated, a corporation organized and existing under the laws of the State of Delaware, with principal offices at New York City, New York, Witnesseth:

That in consideration of the sum of One Dollar ($1.00) paid by Standard Brands Incorporated to S. M. A. Corporation, receipt of which is hereby acknowledged, and in further consideration of the mutual promises between the parties covering Primatene, the formal Contract dated November 22, 1933, and the Supplemental Contract dated November 22, 1933, shall be amended so that the commencement date of the Contract shall be April 1, 1934, instead of January 1, 1934. It is further mutually agreed that all yearly periods shall be computed from April 1st.

In all other respects the Agreement, dated November 22, 1933, and the Supplemental Agreement, dated November 22, 1933, shall remain the same.

SUPPLEMENTAL AGREEMENT

This agreement, made November 22, 1933, between S. M. A. Corporation, a corporation organized and existing under the laws of the State of Ohio, with principal offices at Cleveland, Ohio, and Standard Brands Incorporated, a corporation organized and existing under the laws of the State of Delaware, with principal offices at New York City, New York, Witnesseth:

That in consideration of the sum of One Dollar ($1.00) paid by Standard Brands Incorporated to S. M. A. Corporation, receipt of which is hereby acknowledged, and in further consideration of the execution of the contemporaneous contract between the parties covering Primatene, the formal contract shall be modified as follows for shipments during the first twelve months period of the contract:

If total shipments for first twelve months are—	The price per million ADMA units shall be—
	Cents
70,000 million ADMA units	95½
80,000 million ADMA units	91
90,000 million ADMA units	86½
100,000 million ADMA units	82
110,000 million ADMA units	77½
120,000 million ADMA units	73½

On all Primatene shipped in excess of one hundred twenty thousand million (120,000,000,000) ADMA units, but less than one hundred fifty thousand million (150,000,000,000) ADMA units, the price will be $0.657 per million units.

On all Primatene shipped in excess of one hundred fifty thousand million (150,000,000,000) ADMA units, the price will be One Dollar ($1.00) per million units.

The formal contract shall be further modified as follows for shipments during the second year of the contract:

It total shipments for second twelve months are—	The price per million ADMA units shall be—
	Cents
70,000 million ADMA units	95½
80,000 million ADMA units	91
90,000 million ADMA units	86½
100,000 million ADMA units	82

For all Primatene shipped in excess of 100,000 million SMA units the price will be not more than 82c per million.

The S. M. A. Corporation shall bill Standard Brands Incorporated each month at the scale price of the estimated annual requirements of Standard Brands Incorporated. Adjustment in price shall be made at the close of each yearly period.

Nothing in this supplemental agreement shall be construed to change the cancellation provisions contained in Article VI of the formal contract.

AGREEMENT

This agreement, made November 22, 1933, between S. M. A. Corporation, a corporation organized and existing under the laws of the State of Ohio, with principal offices at Cleveland, Ohio (and hereinafter called "SMA"), party of the first part, and Standard Brands Incorporated, a corporation organized and existing under the laws of the States of Delaware, with principal offices at New York City, New York (and hereinafter called "Standard"), party of the second part, Witnesseth:

Whereas, SMA is the owner of certain inventions and applications for patents filed and about to be filed in the Patent Office of the United States by W. O. Frohring, A. F. O. Germann, Vernon Jersey, Harold M. Barnett, et al, and relating to a product high in Vitamin A content and the process and methods for production thereof, and is now engaged in manufacturing certain products thereunder (the present product being known as "Primatene"); and

Whereas, Standard is engaged in the manufacture and sale, among other things, of Fleischmann's Yeast;

Now therefore, the parties agree:

ARTICLE I

SMA shall sell and deliver to Standard, f. o. b. Mason, Ingham County, Michigan, SMA products of high Vitamin A content (now sold under the trade name of Primatene and hereinafter called "Primatene"), with a Vitamin A potency as ordered from time to time by Standard, but not to exceed a potency of over three thousand (3,000) ADMA units per gram.

During each twelve (12) month period from January 1, 1934, which shall be the date of commencement of this contract, Standard shall purchase for use in Fleischmann's Yeast its entire requirements of Vitamin A products for such purpose but which shall not be less than sixty billion (60,000,000,000) ADMA units, and SMA shall sell the same to Standard and make delivery thereof with all reasonable promptness and not more than fifteen (15) days after the receipt of each order from Standard; provided, however, that Standard shall not be required to purchase nor SMA required to sell and deliver quantities of Vitamin A products in excess of 150,000,000,000 ADMA units per year. Standard shall pay to SMA for the Primatene at the rate of One Dollar ($1.00) per million (1,000,000) ADMA units. In addition thereto, Standard shall pay to SMA for each pound of solution purchased by Standard from SMA hereunder and containing Primatene, a sum equal to the price per pound which Standard is then paying for cotton seed oil purchased by it for use in its Fleischmann's Yeast product.

The purchase price of all products bought by Standard hereunder shall be paid within the first ten (10) days of the month following delivery.

Deliveries by SMA shall be subject to acts of God, riots, civil or military commotion, strikes, floods, drouths, fires, or other causes beyond its control.

ARTICLE II

SMA guarantees that all Primatene delivered to Standard for the use designated shall have a potency in Vitamin A content as described in Article I. The test of Vitamin A content shall be that specified by the American Drug Manufacturers Association, Vitamin Committee, reported in the Journal of the American Pharmaceutical Association, issue of June 1932, page 597.

Digitized by Google

ARTICLE III

SMA warrants that it has not licensed or sold heretofore, and covenants that it will not hereafter during the existence of this contract, either sell, or license the use and sale of, Primatene or other Vitamin A product, or license said inventions or any patents, either United States or foreign, relating thereto, to any other person or corporation for use in yeast. In addition to the purchase price of the products ordered by Standard hereunder, Standard shall pay to SMA a fee of $1,000.00 per annum during the life of this agreement, the first annual fee to be paid simultaneously with the execution of this agreement, and the annual fees thereafter to be paid within thirty (30) days after the commencement of each and every annual period during the life of this agreement.

ARTICLE IV

Recognizing the necessity of establishing and permanently maintaining in good repute Primatene with its Vitamin A, and the products in which it may be incorporated, and the effect of extravagant or unwarranted statements relating to the potency or efficiency of Primatene or the Vitamin A content thereof, Standard shall not make any statement in its advertising regarding Primatene and/or its Vitamin A content except statements which are like or substantially like those contained in the attached "List of Advertising Statements" or those which may be added thereto by SMA.

ARTICLE V

SMA, if requested by Standard, will, through its attorneys defend Standard from any actions at law or equity alleging that the products sold hereunder by SMA to Standard infringe any other patents and will defray the costs and expenses of such attorneys and also pay court costs in any such litigation.

If Standard desires action to be instituted against any person or corporation alleged to be infringing any patents owned or controlled by SMA and involved in the manufacture of Primatene, it may so notify SMA in writing, naming the alleged infringer. Within ninety (90) days after the receipt by SMA of such notice, SMA, at its own expense, may file suit to enjoin the continuation of such infringement and/or the recovery of damages therefor, and shall pay to Standard all sums of money recovered thereunder after first deducting its costs and expenses therein. If at the end of such ninety (90) days SMA shall have failed to file suit, Standard may institute such suit at its own expense and in the name of SMA and may retain any and all sums of money recovered therein.

ARTICLE VI

Except for obligations theretofore accruing, this contract shall terminate three (3) years from date hereof; provided, however, that Standard shall have the option to extend it for an additional two year period, by giving sixty (60) days, notice in writing prior to the expiration of the first three year period. Thereafter, subject to the prior written agreement of the parties on the quantities and prices for each ensuing term, this contract may be similarly renewed by Standard prior to the expiration of each two year period.

During this contract and the first renewal period of two years, SMA agrees to deliver Primatene that may be required by Standard at a price not exceeding One Dollar ($1.00) per million (1,000,000) ADMA units for a quantity not in excess of one hundred and fifty billion (150,000,000,000) ADMA units per year.

If Standard discontinues the use of Vitamin A in Yeast, Standard shall have the right to cancel the contract at the end of any year during this agreement or any renewal thereof, by giving sixty (60) days' notice in writing prior to the end of such year.

ARTICLE VII

Standard shall not sell or otherwise dispose of except in its product herein defined, any Primatene purchased hereunder, and this contract shall not be assignable by Standard without first having secured the written consent of SMA, except (a) Standard may assign to a corporation which purchases substantially all of the assets of Standard, and (b) the rights granted hereunder to Standard may be exercised by any of its subsidiary or related companies, subject to their performance of the obligations imposed hereby upon Standard; provided, however, that Standard shall not thereby be released from the obligations hereof

Digitized by Google

(save that the aggregate purchases of such subsidiary or related companies may be applied toward the minimum purchases of Standard set forth in Article I hereof).

ARTICLE VIII

SMA shall use its best efforts and diligence to obtain, at its own expense, United States Letter Patent covering said inventions and said Primatene and processes and method for production thereof. At the request, and at the expense of Standard, SMA shall file suitable applications, and thereafter diligently prosecute the same, in any and all foreign countries which Standard by written notice to SMA may request and designate. Said applications and patents and all rights thereunder shall belong to SMA. In all countries in which applications shall have been filed pursuant to this provision, Standard shall have (and SMA binds itself to execute upon request) a royalty free license to manufacture, sell and use, but in yeast only, the products covered by said patents, and except as to price and quantities, subject to the restrictions and limitations imposed upon Standard hereby, which license or licenses shall be coextensive with this contract and all renewals and extensions thereof.

ARTICLE IX

In the event of breach of any covenant hereof by Standard or by its assignees or its subsidiaries or related companies exercising rights hereunder pursuant to Article VII, this contract and all rights and obligations of the parties save those theretofore accrued, shall terminate upon the delivery to Standard by SMA of written notice of cancellation of the contract.

ARTICLE X

All notices provided herein shall be regarded as delivered by the deposit in the United States mail, of registered letter directed to the opposite party, as follows: if to S. M. A. Corporation, at 4614 Prospect Avenue, Cleveland, Ohio; if to Standard Brands Incorporated, at 595 Madison Avenue, New York City, New York. Either party may give notice to the other of change of address.

In witness whereof, the parties hereto have hereunto set their hands by their duly authorized officers, the day and year first above written.

AGREEMENT

Agreement made at New York, N. Y., this 22d day of March 1935 between Clarence G. Stone, of 304 First Avenue, Mount Vernon, N. Y., and Abraham Edelman, of 115 West One hundred and Seventy-second Street, Bronx, N. Y. (hereinafter collectively designated "the Inventors"), and Standard Brands Incorporated, a New Jersey corporation having an office at 595 Madison Avenue, New York, N. Y. (hereinafter designated "the Company"), Witnesseth:

Whereas the Inventors are the joint inventors and owners of a certain new and useful invention, to wit: Improvements in Photo-Electric Color Comparator, for which an application for United States Letters Patent, Serial No. 691910, was filed October 3, 1933; and

Whereas the Company has at its own expense prepared and filed said application, and desires to use the invention thereof in its coffee business:

Now, therefore, in consideration of the premises and of the promises and conditions hereinafter contained, it is agreed as follows:

1. The Company waives and releases any rights in or under said invention or application except as set forth herein.

2. The Inventors hereby grant to the Company, its successors and subsidiaries, a royalty free personal license and shopright to use, in its or their business only, said invention and to make or have made, for its or their use only, apparatus and devices constructed in accordance with said application, Serial No. 691910, and

any divisions or continuations thereof and under any Letters Patent of the United States obtained on such applications throughout the life of said Letters Patent.

3. The Inventors release the Company from all further liability and expense in connection with the prosecution of said application, Serial No. 691910, and shall take over the prosecution of said application, and shall be free to entrust the prosecution of the same to patent attorneys of their own selection; but the Inventors shall not reimburse the Company for expenses heretofore incurred.

4. This agreement shall supersede any other or prior agreement between the parties with reference to this subject matter.

In witness whereof, the Inventors have each hereunto set his hand and affixed his seal, and the Company has caused this instrument to be signed and its corporate seal to be affixed at New York, N. Y., by its officers thereto duly authorized, the day and year first above written.

GRAYBAR BUILDING, LEXINGTON AVENUE AT FORTY-THIRD STREET,
New York, December 23, 1935.

DR. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
Fifth Avenue Hotel, Fifth Avenue and Ninth Street, New York, N. Y.

DEAR DR. SIROVICH: I am enclosing for insertion in the permanent records of the hearings of your committee, in final form, the statement which I had the honor to make before your committee on December 2.

As I explained to the clerk of your committee, to whom I handed a rough draft of the statement as delivered, this was prepared in haste and was to be replaced in the permanent record of your committee by the final form in which the statement appears, as enclosed herein, with the substantiating footnotes, in which there is a considerable amount of material which may be of interest to your committee.

If the statement is printed in your permanent records, as I assume it will be, the footnotes should, of course, be printed on the same page as the appropriate text, or as an appendix to the statement (as you may desire).

Will you kindly have returned to me the temporary draft of the statement, which I left with the clerk on December 2.

With best wishes,
Sincerely yours,

FRANK I. SCHECHTER.

WOULD COMPULSORY LICENSING OF PATENTS BE UNCONSTITUTIONAL?*

By Frank I. Schechter

The famous dictum of Dr. Samuel Johnson, uttered over 150 years ago, "that patriotism is the last refuge of a scoundrel" has, I am sorry to say, acquired—especially in view of the recent antics of eminent counsel—a popular corollary in the vernacular of today that the Constitution of the United States is the last hideout for desperate lawyers. This feeling is not, I believe, directed against the motives or the logic of those attorneys and also those professors of law who are confronted with the interpretation of proposed legislation that is, for one

*This paper was read at the request of the Committee on Patents, House of Representatives, at a hearing on H. Res. 196 and H. R. 4523, 74th Cong., 1st sess., held at New York City on December 2, 1935. I am indebted to Mr. Leslie D. Taggart of the New York Bar for his assistance in its preparation. I also desire to thank the authorities of the Columbia Law Library for many courtesies and for putting at my disposal their valuable collection of early American treatises concerning patent law.

reason or another, obviously and palpably unconstitutional.[1] However, there is another type of legislation, concerning which the plea of unconstitutionality is not received with equal equanimity. There are, from time to time, legal and social reforms advocated, the unconstitutionality of which is instinctively, vehemently and uncompromisingly challenged with, on the one hand, "an exquisite aloofness from the vulgarity of contemporary ideas" [2] and, on the other hand, a lack of historical perspective and of sound, factual basis. The plea of unconstitutionality in such cases cannot and should not be successfully maintained by the mere and sheer process of reiteration.

I have been invited by the Committee on Patents to discuss the constitutionality and the historical background of what has been aptly described by a subcommittee of the American Bar Association as "a hardy perennial", viz: A proposal for some form of compulsory licensing of patents.[3] In appearing before you, I have made it perfectly clear to your chairman, and so that there be no misunderstanding, I desire to repeat now that I am not a member of the patent bar, and that I am not speaking to you in the capacity of a patent attorney but merely as a member of the general bar, interested in historical research and in problems of constitutional law.

Article I, section 8 of the Constitution of the United States provides that Congress "shall have the power * * * to promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries." At the hearings before your committee in 1912 on the Oldfield Revision and Codification of the Patent Statutes, and also at other times and places when various proposals for compulsory licensing of patents, or for a refusal of a court of equity to protect the owner of a patent who has not used his patent has been discussed, such proposals have been denounced most emphatically as "unconstitutional", "unfair", and "un-American." [4] I am well aware that any compulsory licensing system may have

[1] The duty of the court with regard to such statutes is quaintly reflected in an observation made by that great constitutional commentator, Associate Justice Joseph Story, of the Supreme Court, nearly a hundred years ago to his colleague, Mr. Justice McLean: "There will not, I fear, ever in our day, be any case in which a law of a State or of Congress will be declared unconstitutional; for the old constitutional doctrines are fast fading away, and a change has come over the popular mind, from which I augur little good. Indeed, on my return home, I came to the conclusion to resign." W. W. Story, *Life and Letters of Joseph Story*, (Boston, 1851), Vol. II, p. 272. The reference of Judge Story is to *Charles River Bridge* v. *Warren Bridge*, concerning which see under that title in Index to C. Warren, *The Supreme Court in United States History*, revised ed., Vol. II (Boston, 1926), at p. 770. See also Story's mournful lamentations as to the passing of "The doctrines and the opinions of the 'Old Court'" in C. Warren, loc. cit., Vol. II, p. 129.

[3] *American Bar Association*, Section of Patent, Trade-Mark, and Copyright Law. *Committee Report*. (July 15–16, 1935), pp. 29 ff.

[4] For opposition on such grounds in *Hearings on Oldfield Revision* (1913) see testimony; in No. 12 by H. Pettit (p. 6); by S. E. Edmonds (*loc. cit.*, pp. 8, 13–14); in No. 14, by L. Gifford (pp. 4–5); in No. 24, by F. F. Church (p. 12); "* * * the bill strikes at the very foundation of our patent system"; in No. 26, by F. F. Fish (pp. 6–7); in No. 27, by W. F. Rogers, President of the Patent Law Association of Washington, D. C., who was especially emphatic on this point: "Thus historically and traditionally * * * the spirit of our patent laws is that of an untrammeled grant of exclusion * * *. It would be an archaic and reactionary step to inject * * * compulsory license or * * * working" (*Ibid.*, p. 11). "It is not the Constitution we follow. It is not the law we adopted. It is not the bargain we made. It is not the policy which has studded every county, town, and hamlet with thriving independent shops and plants, with industries which never could have begun or lived but for the protection of the patent law" (*Ibid.*, p. 12). See W. F. Rogers' testimony (*ibid.*, p. 22) and, by P. T. Dodge (*ibid.*, p. 35); E. W. Bradford (*ibid.*, p. 37).

Belief in the constitutionality or historical justification of such legislation, although accompanied often by comment on the practical difficulties therein involved, was expression by F. L. Dyer, President of Thomas A. Edison, Inc. (in No. 10, p. 38); by H. L. Ward, representing the Inventors' Guild (No. 3, pp. 20, 22; No. 4, p. 22); by F. Y. Gladney (in No. 16, pp. 22 ff.); by F. L. O. Wadsworth (in No. 21, pp. 10 ff.); by W. H. Chamberlin (in No. 23, p. 4); by the Commissioner of Patents in Senate Doc. No. 555, 62nd Cong., 2nd Sess., relative to Bill S. 6273, recommending amendment to proposed Oldfield Bill by District Court granting a license after four years: "It is believed that such a measure will have the effect of placing all valuable inventions in public use within a reasonable time and will also encourage the establishment in the United States of manufactories for the production of patented machines, devices, etc., which have been patented by persons who are not citizens of the United States."

The Oldfield Report on the Revision of the Patent Laws (H. R. Report No. 1161, 62nd Congress, 2nd Session, August 8th, 1912, to accompany H. R. no. 23417) recommending compulsory licensing, stated (pp. 6–7): "Nonuse or suppression, in order to afford the basis for compelling the grant of a license, must be for the purpose or with the result of suppressing competition between the specific articles protected by the patent suppressed and some other article made and sold by the owner of the patent. Any one who objects to such a law must claim the right in the owner of a patent to suppress purely as a device to manipulate the market. Undoubtedly the framers of the patent law never contemplated such a use of patents. * * * What such a concern will pay for the patent will be determined by what it considers it worth to get the patent out of the way—its value in nonuse, not in active work. In such case the patent is valued for the protection that its ownership will give to a pre-existing monopoly and not for the profits to be made from the manufacture and sale of the new commodity." The "Minority Report" (*H. R. Report No. 1162, part 2, 62nd Congress, 3rd Session*) (February 26th, 1913), with equal emphasis opposed compulsory licensing, laying particular stress on the fact that in the "Majority Report" no concrete evidence of the suppression of patents was introduced and, it maintained, signatories of the Report relied not upon testimony "but upon comments and complaints in the public press * * * and upon instances which they contend are to be found in Reports of Decisions of the Federal Courts" (pp. 1–2).

For the difficulty existing formerly, but presumably presently eliminated of finding specific evidence of the suppression of patents, see F. W. Vaughn "Suppression and Non-Working of Patents * * *" in (1919) 9 *American Economic Review*, at pp. 693–4. *Cf.* testimony of F. Y. Gladney at *Oldfield Hearings*,

Digitized by Google

its difficulties and perplexities; some of these were brought out in the Oldfield hearings of 1912;[5] some of these have been considered by Prof. Floyd L. Vaughan in his valuable work on Economics of our Patent System;[6] some of these have recently been presented by a subcommittee of the American Bar Association in its 1935 meeting at Los Angeles;[7] and furthermore there is much illuminating material on the pros and cons of compulsory licensing in the most recent edition of Terrell's authoritative treatise on the law relating to patents in England, where the practical workings of that system of compulsory licensing may be watched both in legislation and in litigation.[8]

However, as indicated above, with the technique of a compulsory licensing system in the United States I am not concerned; if such a system is constitutional, and if the testimony brought out at the hearings of this committee indicate it to be desirable, then I have no doubt that it can be worked out by your committee with the proper cooperation of the patent bar, and also of the bench. The only phase of this problem with which I am concerned here is the constitutional phase, the appropriate elucidation of which necessitates an inquiry into the rationale and history of our patent system. I believe that this whole problem will be clarified if the proper distinction be at all times kept in mind between what Congress was empowered to do under article I, section 8, of the Constitution, and what Congress has, as evidenced in the present patent law, for the present, deemed it advisable to do in the exercise of that constitutional power. There is no question but that, as it has been consistently construed by the Supreme Court of the United States, the present statutory right of an inventor "to make, use, and vend the invention or discovery" includes the paradoxical right under his patent not to make, not to use, and not to vend his invention or his discovery during the term of his patent. Mr. Justice Brandeis has recently said for the Supreme Court that "if the patent is valid the owner can, of course, prohibit entirely the manufacture, sale, or use of such packages * * *."[9] As you are doubtless aware, this whole doctrine of the right of nonuser was developed in 1908 by the Supreme Court in the *Paper Bag Patent case.*[10] In that case, involving a bill in equity to retain the infringement of a certain patent, it was contended for the defendant by the able author of Walker on Patents that:

"To permit the owner of a patent held in nonuse to invoke the aid of courts of equity to enjoin the use by others of an invention which he refuses to use himself, would defeat the very object of the patent laws and of the constitutional provision to which they owe their existence, and such a course, had it been pursued in the past, would have blocked the road along which the great historic inventions of the nineteenth century have proceeded to their present state of perfection." [11]

No. 16, cited *supra*, at p. 23: "Another instance of suppressing patents we might call voluntary suppression, where a manufacturing concern buys up patents competitive with other patents that it owns and deliberately suppresses them. We know that is done every day. The practice has a judicial history. The courts time and again have commented on the fact. In the Thrashing Machine case tried out in the court of appeals for the seventh circuit, the facts were that the thrashing machine combine owned 105 patents on a straw stacker. In the reports of the decisions of the Federal courts you will find statements like this: That the complainant indulges the common practice of buying up patents to get rid of them in competition with the patents that they own."

For contemporary comments on the proposed Oldfield compulsory working legislation, see O. C. Bellman "The Compulsory Working of Patents" (1912), 24 *Green Bag* 513, 517 (calling such legislation "detrimental to the just rights of manufacturers and inventors, and decidedly un-American"), O. R. Barnett "The Oldfield Bill" (1913), 22 *Yale L. J.* 383 (partly favorable to "remedial legislation"); G. H. Montague, "The Pro-Posed Patent Law Revision", (1912) 26 *Harvard L. Rev.* 128 (opposed to such legislation on the ground that patent owners' rights are neither greater nor less than those of owners of unimproved land [p. 153]. See also Case Note in (1907) 20 *Harvard L. Rev.*, pp. 638–639, criticizing the decision in favor of a patentee who had not used his patent, in the *Paper Bag Patent Case*, 150 Fed. 741, later affirmed, 210 U. S. 405 (1908); *cf.* "The Effect of Non-Use on a Patentee's Remedy against Infringement", in (1903) 18 *Yale L. J.* 52, approving the decision of the Supreme Court in the *Paper Bag Patent Case*, on the ground that Article I, Section 8, of the Constitution obviously did not intend to give patentees "a narrower right than that which inheres in the absolute owners of property in general" (p. 53); *Walker on Patents*, 6 Ed., sec. 200.

Digitized by Google

The reasoning of the court, in rejecting Mr. Walker's plea that an inventor may not invoke the protection of equity where there has been no commercial use of his patent, can be summarized in the Court's own language as follows:

(1) "The patent law is the execution of a policy having its first expression in the Constitution, and it may be supposed that all that was deemed necessary to accomplish and safeguard it must have been studied and provided for.[12]

(2) "As to the suggestion that competitors were excluded from the use of the new patent, we answer that such exclusion may be said to have been of the very essence of the right conferred by the patent, as it is the privilege of any owner of property to use or not use it, without the question of motive.[13]

(3) "In some foreign countries the right granted to an inventor is affected by nonuse. This policy, we must assume, Congress has not been ignorant of nor of its effects. It has, nevertheless, selected another policy; it has continued that policy through many years. We may assume that experience has demonstrated its wisdom and beneficial effect upon the arts and sciences.[14]

(4) "From the character of the right of the patentee we may judge of his remedies. It hardly needs to be pointed out that the right can only retain its attribute of exclusiveness by a prevention of its violation. Anything but prevention takes away the privilege which the law confers upon the patentee. * * * Whether, however, a case cannot arise where, regarding the situation of the parties in view of the public interest, a court of equity might be justified in withholding relief by injunction we do not decide."[15]

As thus summarized, the *Paper Bag Patent* decision would merely appear to have committed the Supreme Court to a finding that the present patent law then in effect may be interpreted to permit nonuse by an inventor during the term of his patent; it would not necessarily commit the Court to a further finding that, if the testimony now brought out by this committee discloses clearly the urgent present necessity for a compulsory licensing system, nevertheless the establishment now by Congress of such a system would not fall within the grant of power to Congress conveyed by article I, section 8, of the Constitution. It is a strange thing that within 3 years after the decision of the Supreme Court in the *Paper Bag Patent* case, that Court, in the famous case of *Bauer* v. *O'Donnell*, holding that the grant under the patent law "of the exclusive right to make, use, and vend the invention or discovery", did not permit the patentee to limit the price of future retail sales of his patented product, stated in most emphatic language that, even if the patent law be most "liberally construed" in favor of the patentee, his patent rights under that law were exactly what they said, viz, "to make, use, and vend", and that these words have no less simple and more mystic connotation. Here is what the Court said:

"In framing the act and defining the extent of the rights and privileges secured to a patentee Congress did not use technical or occult phrases, but in simple terms gave an inventor the exclusive right to make, use, and vend his invention for a definite term of years. The right to make can scarcely be made plainer by definition, and embraces the construction of the thing invented. The right to use is a comprehensive term and embraces within its meaning the right to put into service any given invention. And Congress did not stop with the express grant of the rights to make and to use. Recognizing that many inventions would be valuable to the inventor because of the sales of the patented machine or device to others, it granted also the exclusive right to vend the invention covered by the letters patent. To vend is also a term readily understood and of no doubtful import. Its use in the statute secured to the inventor the exclusive right to transfer the title for a consideration to others. In the exclusive rights to make, use, and vend, fairly construed, with a view to making the purpose of Congress effectual, reside the extent of the patent monopoly under the statutes of the United States."[16]

However, despite this seemingly specific construction by the Court of the language of the patent law, as indicated above, it still remains the doctrine of the Supreme Court, as enunciated by Mr. Justice Brandies that the patentee, "can, of course, prohibit entirely the manufacture, sale, or use" of a patented article during the term of the patent.

Nevertheless, despite this present doctrine of the Supreme Court, I cannot help feeling that:

(1) The present holding of the Supreme Court on this point disregards the history, intent, and logic underlying the whole of any rational system and our system of rewards to inventors for their discoveries, and

(2) This present view of the law might well be reconsidered by the Court, if evidence of the nonuse and supression of patents, and of the injury to public welfare occasioned thereby, gathered by your committee, is deemed sufficiently impressive and socially urgent by the court.

From the historical data which I now submit to you, it seems to me that when the framers of the Constitution gave Congress the power "to promote the progress of science and the useful arts by securing * * * to * * * inventors the exclusive right to their respective * * * discoveries", they certainly did not contemplate that this promotion of such "progress" could be accomplished by legislation permitting an inventor receiving a patent to file that patent away in his safe for the patent term, or for an undue portion thereof, or to sell that patent to a purchaser engaged in the wholesale filing away and suppression of patents similarly acquired. Apart from the doctrine of the Supreme Court consistently followed for over a hundred years, that the main and primary purpose of our patent laws is not the creation of private fortunes for the owners of patents but "to promote the progress of science and useful arts,"[17] there are two cardinal principles of constitutional interpretation justifying or even necessitating the historical expedition to ascertain the nature of the reward which the framers of the Constitution intended to enable Congress to confer upon inventors. These two principles are as follows:

(1) In the first place, to a certain school of constitutional lawyers, it may be a rather startling although fairly obvious idea that when the framers of the Constitution used the words "to promote the progress of science and useful arts", they actually meant what they said. Those words, "to promote the progress of science and useful arts", would seem to fall within the category of those described as early as 1793, by Chief Justice John Jay, as "express, positive, free from ambiguity," and accordingly to come within the rule he then enunciated that "words are to be understood in their ordinary and common acceptation * * *."[18] From the evidence which I shall submit to you, I believe that it will appear that the "ordinary and common acceptation" of the words used in article I, section 8 of the Constitution would prevent any express or implied implication of an intention to allow inventors to suppress or to assign for suppression the patents granted to them.

(2) However, there is a further rule of constitutional interpretation which may be applicable here, viz: That if there is any doubt, any ambiguity, in the language of the constitutional grant of power to Congress in this respect, such doubt, and such ambiguity shall be resolved and decided by evidence not merely of practice contemporaneous with the framing of the Constitution, but also by evidence of colonial and English experience on the point at issue long prior to the framing of the Constitution. There is hardly a single major clause of or important

---

meaning would seem not to be doubtful if we can avoid reading into them that which they really do not contain."

Mr. Justice Holmes dissenting opinion is interesting for its comment upon the *Paper Bag Patent* decision: "I suppose that a patentee has no less property in his patented machine than any other owner, and that in addition to keeping the machine to himself the patent gives him the further right to forbid the rest of the world from making others like it. In short, for whatever motive, he may keep his device wholly out of use. *Continental Paper Bag Co.* v. *Eastern Paper Bag Co.*, 210 U. S. 405, 422. (p. 519.) * * * Not only do I believe that the rule that I advocate is right under the *Paper Bag Case*, but I think that it has become a rule of property that law and justice require to be retained. For fifteen years, at least since *Bement* v. *National Harrow Co.*, 186 U. S. 70, 88–93, if not considerably earlier, the public has been encouraged by this court to believe that the law is as it was laid down in *Heaton-Peninsular Button-Fastener Co.* v. *Eureka Specialty Co.*, 77 Fed. Rep. 288, 25 C. C. A. 267, and numerous other decisions of the lower courts. (p. 520.) * * * I leave on one side the question of the effect of the Clayton Act, as the court has done, *and also what I might think if the Paper Bag Case were not upheld*, or if the question were upon the effect of a combination of patents such as to be contrary to the policy that I am bound to accept from the Congress of the United States." (italics mine.) (p. 521.)

phrase or even word employed in the Constitution in the interpretation of which the Supreme Court has not gone back, not merely to the famous contemporary writings compiled under the name of "The Federalist," or to the records of the Constitutional Convention, and of the State ratification conventions and to the private correspondence of the framers of the Constitution, but also to prior State and Colonial legislation, or even to the still earlier but often fundamental English experience reflecting or illuminating the particular constitutional phraseology under consideration.[19]

If then we have indisputable judicial sanction for a search into the beginnings of the patent system in order to determine whether the promotion of "the progress of science and useful arts" is accomplished by nonuser of a patent, the answer of history on both sides of the Atlantic is a flat and emphatic no. An ancient Greek historian has recorded that the luxury-loving Sybarites, in what may perhaps be one of the first patent grants known (in the third century B. C.), encouraged a caterer or cook who had invented a dish "which was especially choice" by allowing no one else to "adopt the use of it before the lapse of a year, in order that the first man to invent the dish might possess the right of manufacture during that period * * *."[20] Jumping from the Greece of Alexander the Great to the England of Queen Elizabeth, we find there an immediately significant point to be recalled here, namely that the whole institution of grants of patents for invention arose from the practical necessities of Great Britain in literally promoting "the progress of science and useful arts." In other words, patents for invention (as distinguished from the great trading monopoly patents) were granted with the ever-present thought of introducing into Great Britian new industries, and of improving those industries already there existent. In this connection it is interesting to note that the first exclusive patents for invention granted in Great Britian were given, not to Englishmen, but to foreigners whose discoveries were regarded by the Crown as being of vital significance for British industry.[21] The development of the British patent system is, of course, inex-

S. 511, 522 (1935, explaining original necessity for "Commerce Clauses", Art. I, Sec. 8); *Gordon* v. *Washington*, 295 U. S. 30, 36 (1935, construing meaning of phrase "suits in equity" in Judiciary Act of 1789). See also R. P. Post "Constitutionality of Government Spending For General Welfare" in 32 *Va. L. Rev.* (1935) I, at p. 2 ff., and authorities, articles, and brief there cited.

For cases specifically dealing with *patent* questions and going back to English precedents, see *Pennock* v. *Dialogue*, 2 Peters 1, 18 (1829); *Grant* v. *Raymond*, 6 Pet. 218, 241–2, 247–8 (1832); *Shaw* v. *Cooper*, 7 Pet. 292, 319–320 (1833); see also the great steamboat case, *Livingston & Fulton* v. *Van Ingen*, 9 Johns. 506, 577, 587 (decided by the New York Court of Errors in 1812, per James Kent, then Chief Justice); however, as to *patent* law, seemingly *contra*—perhaps due to the idolatry of the biographer for his subject—*cf.* W. W. Story in his *Life and Letters of Joseph Story* (Boston, 1851), Vol. I, pp. 236–7: "Cases began to arise involving all the principles applicable to patents; and to the adjudication of these, the existing rules were not only to be practically applied as they never before had been, but new rules and modifications were demanded. The questions were often so novel, that counsel were forced to argue, and the court to decide, without chart and upon general principles. I have often heard my father relate, that in several of the early cases tried before him, the gentlemen engaged in them apologized for the mode in which they had been conducted, saying, that the law was so without precedent and form, that they knew not how to proceed." And again: "The condition of the law relating to *patents*, when my father came to the bench, has already been adverted to. In its principles and practice it was nearly formless in America, and the English decisions were so contradictory and unsatisfactory as to afford little aid. The strong inventive genius of New England began to develop rapidly after the war, and his circuits were crowded with patent cases. It became his office, therefore, almost to construct the law on this subject, and the system which is now developed is mainly owing to his effort. This law then in England was a mere shuttlecock between equity, with its liberal doctrines, and the common law, with its fear of monopoly." (*Ibid*, Vol. II, p. 584.) *Cf.* T. G. Fessenden, *Essay onthe Law of Patents* (Boston, 1810), pp. 42 ff., 176 and note.*

[20] According to Phylarchus, quoted in *Athenaeus*, The Deipnosophists, XII, 521 (tr. C. B. Gulick, *Loeb Classical Library* edition, Vol. 5, London (1933), p. 349; Gulick cites: "C. [21] See W. H. Price, *The English Patents of Monopoly* (Harvard Econ. Studies, I (1913)), pp. 7–8: "* * * The earliest recorded application for an exclusive patent for introducing a new art into England bears the date of 1558 and was presented jointly by an Englishman and an Italian. The petition was granted in 1562 as a reward of 'diligent travail' and to 'give encouragement to others'. Meanwhile two other patents had been granted for inventions of foreign origin. Before any one of these was conceded, another Italian, Giacopo Acontio, in a petition for a patent prefaced his application with the suggestion that 'nothing is more honest than that those who by searching have found out things useful to the public should have some fruit of their rights and labors, as meanwhile, they abandon all other modes of gain, are at much expense in experiments, and often sustain much loss.' He then explained that he had invented certainf furnaces and 'wheel-machines' which others would copy without remunerating him unless he were protected." See also *ibid*, pp. 62–3, 67.

tricably interwoven with the great struggle against monopolies resulting ultimately in the passing of the Statute of Monopolies which specifically exempted from its operation patents for invention. One thing is clear in all that early period of patents for invention in England, and that is the emphasis placed upon the social undesirability and the illegality of nonuse of a patent. Patents granted to Italians, Hollanders, Germans, etc., were all predicated upon their actual use for commercial purpose in Great Britain within a certain period, and patentees, whether foreigners or Englishmen, who failed to comply with this requirement of use, soon found themselves patentless. Thus in 1563, owing to a growing scarcity of wood fuel, Queen Elizabeth granted a license to George Gylpin and Peter Stoughberken to make ovens and furnaces for 10 years. The grant refers to the "growing scarcity of wood fuel owing to the large consumption in the brewing and baking trades" and "is void in case the patentees fail to come over (presumably from Germany) and put the grant into practice within 2 months * * *."[22] Again, in 1571, in the grant for an engine for land drainage and water supply "the grant is void if the engine be not erected within 2 years."[23] The Crown, being fully aware of the hatred, in England, of monopoly, was careful to emphasize the fact that such monopolies were granted for use by the public. In Francis Bacon's "Defense of the Royal Perogative in the Grant of Patents" (1601), he takes great care to distinguish between those patents which he avers, "truly in my own conscience, are hateful to the subject as monopolies", and those patents for inventions which are useful to and usable by the public. Of these he says:

"If any man out of his own wit, industry, or endeavor, find out anything beneficial for the commonwealth, or bring any new invention, which every subject of this realm may use; yet in regard of his pains, travail, and charge therein, her Majesty is pleased (perhaps) to grant him a privilege to use the same only by himself, or his deputies, for a certain time: This is one kind of monopoly."[24]

Even the haughty Elizabeth herself, in her "golden speech" to her last Parliament pleaded that any patents which she had granted, and which had not been actually used for the public good, had been obtained from her by fraud: "Since I was queen", she said: "yet did I never put my pen to any grant but upon pretext and semblance made me, that it was for the good and avail of my subjects generally, though a private profit to some of my ancient servants, who have deserved well; but that my grants shall be made grievances to my people, and oppressions, to be privileged under color of our patents, our princely dignity shall not suffer it.

"When I heard it, I could give no rest unto my thoughts until I had reformed it, and those varlets, lewd persons, abusers of my bounty, shall know I will not suffer it."[25]

In 1611, a certain Simon Sturtevant filed a petition for a metallurgical patent which ended with a statement that "he was not tied to any time in the trial of his invention." However, he "was speedily undeceived for in the following year the patent was canceled on the ground of his * * * neglect to work the patent."[26] It is also of significance that in 1639, King Charles I, "fearing to meet the Parliament, which soon had to be called, with a grievance of the monopolies still unremedied," issued a proclamation in which, inter alia, he revoked and canceled "all patents for new inventions not to be in practice within 3 years next after the date of the said grant.[27]

PATENTS FOR INVENTION OR INDUSTRY IN THE AMERICAN COLONIES

In our quest of the intention of the framers of the Constitution who, in article I, section 8, authorized Congress "to promote the progress of science and useful arts by securing * * * to * * * inventors the exclusive right to their respective * * * discoveries", we now return from England to the New World. We find in the records of the American Colonies as strong, if not even more, impressive evidence that nonuser and the suppression of patents granted

were absolutely foreign to the colonial concept of a patent for invention. A mere reading of some of these patents in chronological order clearly indicates the steady and general trend that they were granted either to foreigners who had already tried out the workability of their inventions, or to the colonists themselves, not merely for the general purpose of fostering trade among the Colonies and abroad, but to meet some specific emergency affecting the more or less immediate needs of the colonists. The spirit of these patent grants demanded, as Professor Vaughan states, "a concrete introduction, not a mere disclosure of the invention." [28]

Thus, in 1652, the General Court of Massachusetts Bay granted to John Clarke a 3-year patent for an invention: "for saueing of firewood & warming of rooms wth little coste & charges, by which meanes great benefitt is like to be to the country, & especially to these populous places; & if any family or other pson doe with the consent & direction of the sd Mr Joh Clarke, or without his consent, doth improue, or vse sajd experiment, they shall pay ten shillinge to the sd Mr. Clarke, for which he may sue or implead any pson before any commissionor for the same, as the case shall require." [29]

Again, 4 years later the General Court of Massachusetts Bay dealt with the problem of "the vncertajntje of procuring salt amongst vs for our necessary vses" and whereas Mr. John Winthrop "proffereth to make salt for the colony after a new way", they granted him a 21-year patent for "making salt after his new way." [30]

In 1691, the legislature of the Province of South Carolina, having been approached by Peter Jacob Guerard, the inventor of a rice-husking machine, and in order to encourage the said Guerard "& all other ingenious & industrious persons * * * to essay such other machines as may conduce to the better propagation of any commodityes of the produce of this Collony" granted the said Guerard a 2-year patent for his "Pendulum Engine" and forbade the manufacture of said "Pendulum Engine" by others "unlesse he or they shall first pay unto the said Peter Jacob Guerard forty shillings current money of this Province, for each such Engine he or they shall make, sett up or use as aforesaid." [31]

In 1733, the same legislature of the Province of South Carolina granted to Charles Lowndes a 4-year exclusive privilege for making "a new engine for the pounding and beating of rice" but specifically provided "That the said Charles Lowndes, his executors, administrators, and assigns, shall not, during the term of four years aforesaid, receive or take any more than the just and full sum of sixty pounds current money from any person that shall apply for a lycence in writing from him the said Charles Lowndes, his executors, administrators, or assigns, for the making or using any such Engine * * *." [32]

Four patents granted by the thriving industrial Colony of Connecticut from 1746 to 1753 involving a new art or industry are equally significant.

1. John and Stephen Jerom were granted (in 1746) "the sole liberty and privilege of making salt by the boiling of sea water" for 14 years, provided, however, that if the patentees "shall neglect or fail, to erect, set up and prepare suitable works and materials for the making of salt, as aforesaid, for the space of two years, or shall fail of making the quantity of five hundred bushels of good salt in any one of the remaining twelve years after the said two years, that then this grant and every part thereof shall be void and of none effect; anything therein before to the contrary in any wise contained notwithstanding." [33]

2. In the following year Thomas Darling of New Haven prayed for "the sole liberty of making glass in this Colony." This "sole liberty and privilege of making and manufacturing glass in this Colony" was granted to him for 20 years on the condition, however, that "if the memorialist and his assigns shall

[28] F. W. Vaughan, *supra*, note 6, p. 20. For a thorough background of the relation of colonial industries to the necessity for inventive energy and protection by patents, see W. B. Weeden, *Economic and Social Hist. of New England* (Boston 1890), in Index to vol. II, *s. v.* "Inventions"; V. S. Clark, *History of Manufactures in the United States* (Washington, D. C., 1916), vol. I, pp. 48–53, chs. VIII and IX; J. L. Bishop, *Hist. of American Manufactures*, vol. I (Philadelphia, 1864), pp. 96, 114, 186.

[29] *Records of the Company and Governor of Massachusetts Bay*, (ed. N. B. Shurtleff) vol. III, (1854) p. 283.

[30] *Ibid.*, Vol. II, p. 259, May 14, 1656.

[31] *South Carolina, Statutes at Large*, (edited by Thomas Cooper, Columbia, S. C., 1837) Vol. II, p. 63, No. 72 (1691).

[32] *The Statutes at Large of South Carolina*, ed. D. J. McCord, Vol. VI (Columbia, S. C., 1839), p. 630, No. 6 (1733).

[33] *The Public Records of the Colony of Connecticut*, ed. C. D. Hoadly, (Hartford, 1876) p. 246, (1746). For the importance of salt to the colonists, see W. B. Weeden, *op. cit., supra*, note 27; Index to vol. II, *s. v.* "Salt"; V. S. Clark, *op. cit., supra*, note 27, Index to vol. I, *s. v.* "Salt." It is not always easy "to mark the transition from the monopolies of an earlier date to the patent rights which play so important a part in modern legislation affecting manufactures" (V. S. Clark, *op. cit., supra*, note 27, vol. I, p. 53); in this and the other Connecticut patents, whether for invention or introduction of an industry, the point to be noted is the condition that the public benefit be prompt and not unduly suspended.

Digitized by Google

neglect or fail to erect, set up and prepare suitable works and materials for the making of glass, as aforesaid, for the space of four years, or shall fail of making the quantity of five hundred feet of good window-glass in any one of the remaining sixteen years after the aforesaid four years, that then this grant and every part thereof shall be void and of none effect, anything thereinbefore to the contrary in anywise contained notwithstanding." [34]

3. In the same year (1747), Joseph Pitkin of Hartford was granted "the sole privilege of slitting iron within this Colony for the term of fourteen years * * *" with this proviso only, "that he shall certify this Assembly in May next that he hath began to provide to building a slitting mill, and that the same be set on work within two years from the present sessions of this Assembly, and kept going as occasion shall be to the end of the said term." [35]

4. In 1753, Jabez Hamlin and Elihu Chauncey, of New Haven, were granted "the exclusive liberty and privilege" for 15 years of setting up and operating machines "for managing ye linnen manufactures", but with a reservation that "if the memorialists failed to set up one such machine in every town within five years, they should lose the privilege in that town." [36]

Returning to Massachusetts for a minute, in 1750 the legislature granted a 10-year patent to a manufacturer of sperm candles and other whale products "requiring him to teach at least five apprentices during that period, of whom two should be nominated by the General Court." [37]

In 1761, the Colony of Rhode Island granted James Lucena a 10-year patent for making castile soap, it being recited: "* * * that he proposes to set up the manufactory thereof in this colony; that the procuring one of the chief materials will employ many poor people, and the manufactory be otherwise highly beneficial to the public, by furnishing a great and valuable article of commerce, which may be exported to all parts of the continent, to the West Indies, &c;" [38]

POST-REVOLUTIONARY PATENTS FOR INVENTIONS GRANTED PRIOR TO THE ADOPTION OF THE CONSTITUTION

The post-revolutionary grants of patents are similarly significant in their insistence that an exclusive right of manufacture actually implies manufacture and not nonuse of the patent. Thus, in March 1780, the General Assembly of the Commonwealth of Pennsylvania granted to Henry Guest "the sole and exclusive right, for the term of 5 years, of manufacturing oil and blubber from the materials he has discovered"; this exclusive right was, however, to become effective only "after the time at which the aforesaid Henry Guest shall erect a manufactory in this State, and produces oil and blubber therein for sale from the materials he has discovered, provided the same be done within the space of 8 months from the time of passing this act * * *." [39] In the same year, the New York Legislature granted the same Henry Guest "the sole and exclusive right of making and vending within the State for the space of 5 years the same species of oil and blubber"; adding to this grant:

"Provided, nevertheless, that the grant hereby made shall not take effect until the said Henry Guest shall have filed in the secretary's office in this State a writing containing the names and descriptions of the materials aforesaid, and the method and process of making such blubber and oyl, or a substitute for blubber and oyl; nor until the said Henry Guest shall have a manufactory erected for the purpose, and shall have made such blubber or oyl, or a substitute for blubber or oyl, of the materials aforesaid, within this State." [40]

In South Carolina, from which, as we shall see, hailed one of the two drafts of what ultimately became the patent clause of the Constitution, there was enacted in 1784 probably the first real general patent law, as distinguished from an individual legislative grant of a patent. In that statute, entitled "An act for the encouragement of arts and sciences", the major portion thereof dealt with the exclusive rights of copyright owners and provided that if, upon complaint to the court and judges of the court of common pleas, it shall be found that the grantee

It may be of interest to note that "before or as soon as * * * Guest begins to manufacture the aforesaid oil and blubber in this state he shall put up in the said manufactory or manufactories a printed account in English and German of the said materials * * *". [Section III.]
[40] *Session Laws of the State of New York* (1777–1784) ch. 71, republished in Vol. I (Albany, 1886) p. 277.

Digitized by Google

has neglected to "furnish the public with sufficient editions thereof * * *", the grantee of such copyright shall furnish security that "a suffiicent number of copies of such book or pamphlet" shall be published, and "if such author or proprietor shall, before said court, neglect or refuse to give such security as aforesaid, the said court are hereby authorized and empowered to give to such complainant a full and ample license to reprint and publish such book or pamphlet, in such numbers, and for such term, as said court shall judge just and reasonable: * * *" This principle of user in the same statute was likewise extended to the inventors of machines in the following language:

"IV. And be it further enacted by the authority aforesaid, that the inventors of useful machines shall have a like exclusive privilege of making or vending their machines for the like term of fourteen years, under the same privileges and restrictions hereby granted to and imposed on the authors of books."[41]

Again, in 1788, the Legislature of South Carolina passed a special act granting to Samuel Knight "the sole and exclusive right and liberty of erecting, building, constructing, and vending within this State "a machine for the pounding of rice" for and during the term of 14 years"; "provided always", however—

"that if any person or persons shall tender or pay to the said Samuel Knight, his heirs or assigns, the sum of five pounds sterling, he or they shall and are obliged and required to grant each and every such person, or persons, a license and permission * * * authorizing him or them to construct or building such machine."[42]

THE CONSTITUTION AND THE PROTECTION OF PATENTS OF INVENTIONS

In advocating, in the Federalist, to the people of the State of New York the ratification of the Constitution, Madison, quoting the proposed power in Congress "to promote the progress of science and useful arts by securing, for a limited time, to authors and inventors the exclusive right to their respective writings and discoveries", stated:

"The utility of this power will scarcely be questioned. The copyright of authors has been solemnly adjudged, in Great Britain, to be a right of common law. The right to useful inventions seems with equal reason to belong to the inventors. The public good fully coincides in both cases with the claims of individuals. The States cannot separately make effectual provision for either of the cases, and most of them have anticipated the decision of this point, by laws passed at the instance of Congress."[43]

Just what State patent laws, "passed at the instance of Congress", Madison referred to is not altogether clear; we have already quoted the South Carolina statute of 1784. From the standpoint of the immediate necessity and purpose of a general patent statute, implying an exclusive right of use in the patentee but not the right to suppress his patent, we do know that as early as 1783 a committee of the Continental Congress, to which had been referred a petition for a patent for the manufacture of steel, thus reported on the desirability of rewarding inventors:

"The committee, however, considering that there are at this time many important manufactures in the different States and that others may be attempted which by proper attention and encouragement may be carried to great perfection by which our own citizens may be employed and supported and large sums of money be saved which must otherwise be expended in foreign countries, circumstances which deserve the most serious consideration at a period when the United States are labouring under heavy debts, both foreign and domestic: Wherefore, the following resolution is submitted:

"That it be recommended to the legislatures of the several States to countenance and encourage the establishment of useful manufactures, either by premiums or by such other means as they may find most effectual which are consistent with the confederation and the treaties subsisting between the United States and foreign powers."[44]

Again, in the same year, the committee of the Continental Congress, expressing apprehension as to the workability of a mechanical boat, for which its inventor prayed for "a compensation in land on the west side of the Ohio", stated—

"That if the boat proposed to be constructed by Mr. McMechen shall answer the valuable purposes that from his memorial he seems to expect, Congress, when

Digitized by Google

the situation of their affairs permit of it, will take the same into consideration; and notwithstanding that he may have published his discovery, they will grant such premium to the projector as to them may seem an adequate compensation."[45]

Acting on another petition for a grant of land to an inventor of a mechanical boat, the Continental Congress resolved, in 1785:

"That 30,000 A[s] of land in the new purchase to the west of the Ohio be given to James Rumsey, provided he shall before the first day of May next produce good and sufficient evidence that by means of certain mechanism of his invention wrought or aided by three men only, a boat carrying ten tons has been moved (sic) for six days in succession against the stream of the R. Ohio at the rate of (sic) 50 miles (sic) per day." [46]

In arguing that the use of the term "exclusive right" referred to in article I, section 8, of the Constitution, would render a compulsory licensing system or cancelation of a patent for nonuse unconstitutional, stress has been laid on the fact that in Madison's draft, submitted to the Convention on August 18, 1787, the phrase used was "to encourage by premiums and provisions the advancement of useful knowledge and discovery", furthermore, that Charles Pinckney, on the same date, proposed "to grant patents for useful inventions", while the phraseology as finally adopted on September 5, 1787, by Judge Brearley's committee on postponed matters, read 'by securing' for limited times to * * * inventors, the exclusive right to their respective * * * discoveries." [47] From this change in phraseology it has been argued by a very learned authority on patent law, Mr. Karl Fenning, that—

"It is significant, therefore, that in framing the Constitution in its final form, words 'patent' and 'copyright' were not used, possibly lest the power be limited to the particular forms of conditional exclusive rights which were at that time known as 'copyrights and patents.' "

From the "words finally chosen for the Constitution", Mr. Fenning deduces that "these seem to allow no limitations on the 'exclusive' right such as requirements for working or compulsory licensing." [48]

However, this reasoning, although ingenious is, I believe, purely surmise and unsupported at any rate as far as I can at present gather by contemporary evidence On the contrary, I submit that (1) we do know that the final corrections of Judge Brearley's committee and of the "Committee on Style and Correction" were not carefully or discriminately considered by the delegates to the convention, who, Mr. Charles Warren the learned historian of "The Making of the Constitution" tells us "were now 'very impatient' to get through, and tolerated little debate"; "the delegates were evidently tired and anxious to finish their labors and go home." [49] (2) We likewise know that the congressional grants to inventors and authors finally authorized under article I, section 8, of the Constitution represent the utmost limits to which the framers of the Constitution, inheriting and raised in the fear of monopolies, were willing to go, and that the proposal of a broader power "to establish public institutions, rewards and immunities for the promotion of agriculture, commerce, trade and manufacture" was emphatically rejected.[50] (3) We also know from contemporary, as well as later evidence, that the sole encouragement to obtain, or the consideration for these limited patent and copyright grants, was regarded as the economic inducement of recurring profit through the constant use by the grantee of his constitutional monopoly. As James Iredell, later one of the first Associate Justices of the Supreme Court, wrote in defense of the Constitution in 1788, "the interest of the proprietor (of a copyright) will always induce him to publish a quantity fully equal to the demand." [51] In an early patent decision the Supreme Court likewise described the inventor's reward as "the profits arising from the sale of the thing invented." [52]

In this connection and on the question as to contemporary ideas of what Congress *could* do if it so deemed fit, by way of conferring *conditional* rewards upon inventors for their discoveries, it is interesting to note the following extract from a treatise by W. Phillips, *The Law of Patents* (Boston, 1837), at pp. 8–9: "Though *property* in a discovery, therefore, like that in land, originates in and is created by legislation, the *right* to such property exists to an imperfect degree, independently of the positive laws. In this view Mr. Rawle remarks, that upon the provisions of the Constitution of the United States on this subject, that it was not intended thereby to create rights, but merely to regulate those already existing. The inventor has a *right* to keep his secret,

Digitized by Google

(4) Finally we also know that just as at the introduction of a system of patents for invention in England, described above, so, as already indicated by the committee of the Continental Congress just quoted, and during the period of the formation, ratification and putting into effect of the Constitution itself, the whole urgent need of the patent system was to promote immediately, and not merely ultimately after a 17-year period of suspension, the concrete welfare of the People of the United States. Contemporary evidence stresses the need to increase both production and consumption, thereby not only making America a more livable country, but enabling both the Federal and State Governments to pay their debts. About 1788, in his Letters of an American Farmer, Crèvecoeur, the famous French observer of America, noted that—

"The farmer and the artisan have more to do than they can perform; scarcity of men makes labor very dear; to supply the want of labor and time the American is forced to invent, to think out new ways of augmenting his efficiency." [53]

Writing to Jefferson in the fall of 1788 on the problem of patents of monopoly, "as encouragement to * * * ingenious discoveries", James Madison, describing monopolies as "justly classed among the greatest nuisances in Government", even went so far as to inquire whether it would "not suffice to reserve in all cases a right to the public to abolish the privilege at a price to be specified in the (patent) grant * * * ?" [54] How important American inventions already appear in public estimation is well illustrated in the historian McMaster's description of the rejoicing in Philadelphia on the news of the ratification of the Constitution.

"The Manufacturers' Society", he writes; "delighted the crowd with the spectacle of a huge wagon drawn by 10 horses and neatly covered with cotton cloth of their own make. On the wagon were a lace loom, a printing mill, a carding and a spinning jenny of eighty spindles. Compared with the cunningly and exquisitely wrought machines now to be found in the mills and factories of New England, they would seem rude and illformed. But they were among the newest inventions of the age, and were looked on by your ancestors as marvels of mechanical ingenuity." [55]

---

and if he discloses it he has a just claim to remuneration and reward, according to the amount of his expenditure, and the importance of his improvement." And again, at pp. 204–206: "A patent once granted is not forfeited in the United States by the neglect of the patentee to put his invention into practical operation. Our law differs in this respect, from that of France, which provides that unless the patentee reduces his invention to use within two years from the granting of the patent, he forfeits his privilege. This provision is rather rigid, for a general rule, since some inventions, requiring extensive preparations and large outlays, cannot be brought into operation in that time. A law containing a provision of this description ought also to provide for lengthening the time in particular cases. But the laws of England and the United States, contain no provision on this subject. Mr. Justice Washington distinctly lays down the doctrine that no neglect of the patentee, to put his invention into practical operation, will be construed to be an abandonment of his patent right. And such is the language of all the cases. Our law appears to go upon the presumption that the public benefit may in this case be left wholly to the influence of the interest of the patentee and confides to him the absolute control and disposal of his invention for the period of his monopoly.

"There may be instances of inventions, the use of which are vitally material to the public safety, just as in some instances the appropriation of individual property to the public use is essential to the public defence. In the latter case the general safety is not subjected to the caprice or inordinate cupidity of the proprietor, for his property may be taken for the public use without his consent, and a reasonable compensation allowed. And such would be the rules, probably, in regard to the use of a patent right, which is no more sacred than other personal property. This provision of law is limited to the case of the use of property by the public as a corporate political body, and does not reach the case of an indirect benefit derived to the public by the use of a thing by individuals. In this respect the law leaves patent rights upon the same footing as other personal property, the proprietor of which may, by his own caprice or folly, deprive the public and himself of the benefit that would result from a reasonable use of it, and there does not seem to be any pressing "urgency for a different rule in regard to different species of property. There is, it is true, no absolute insurmountable objection to a regulation on this subject in relation to patents, for the public may grant patents or lands upon such conditions as may be deemed expedient, and for the general benefit; but as a general rule, unless the case is plain and urgent, it is the better policy to leave private rights to the discretion and interest of proprietors, where their interest evidently coincides with that of the public, since the inconveniences attendant upon an attempt by law to supply their want of reasonable discretion, would, in a majority of cases, be greater than those consequent upon their abuse of the discretion and control allowed by the law."

In *Woodbridge* v. *United States*, 263 U. S. 50, 55, 56 (1923), while following the holding in the *Paper Bag Patent Case* that a patentee "is not obliged either to make, use, or vend his invention during the period of his monopoly", Chief Justice Taft paradoxically further reasoned that: "Congress relies for the public benefit to be derived from the invention during the monopoly *on the natural motive for gain in the patentee* to exploit his invention and to make, use, and vend it or its products or to permit others to do so *for profit.*" (Italics mine.) *Cf.* cases cited in J. B. Waite, *Patent Law* (Princeton, 1920), p. 224, note 369.

In his very first annual address to Congress on January 8, 1790, President Washington urged the passage of a patent law, saying:

"I cannot forbear intimating to you the expediency of giving effectual encouragement, as well to the introduction of new and useful inventions from abroad as to the exertion of skill and genius at home."[56]

In the first patent Federal statute enacted in April 1790, it was provided that the "board of three members" to whom petitions for patents were referred "if they so deem the invention or discovery sufficiently useful and important" shall allow the applicant a grant of "the sale and exclusive right and liberty of making, constructing, using, and vending to others to be used, the said invention or discovery."[57]

CONCLUSION

We have come to the end of our—I fear—long journey into constitutional law and American and English history, in order to ascertain the meaning of four seemingly very simple terms, viz, "exclusive", "make", "use", and "vend." I wish that I could have curtailed this journey for you, but I can only plead that the law and the lawyers have made such curtailment impossible. Those of you who, in childhood—and subsequently—have properly studied their Gulliver's Travels will perhaps recall that when he went to the land of the giants, he found that "the learning of these people is very defective, consisting only of morality, history, poetry, and mathematics, wherein they must be allowed to excel", but of "abstractions and transcendentals" he could "never drive the least conception into their heads." Furthermore, as to their legal system, he records that:

"No law of that country must exceed in words the number of letters in their alphabet, which consists only in two and twenty. But indeed few of them extend even to that length. They are expressed in the most plain and simple terms, wherein those people are not mercurial enough to discover above one interpretation; and to write a comment upon any law is a capital crime."[58]

As we have seen in *Bauer* v. *O'Donnell*, the famous price-fixing case, the Supreme Court found nothing "occult" in the words "make, use, and vend", and the same Court, in construing the grant of "an exclusive right * * * for a period of 30 years of a system of water works" has held that "the term 'exclusive' is so plain that little additional light can be gained by resorting to the lexicons * * *."[59] With regard to the constitutionality of compulsory licensing provisions or the cancelation of patents for unjustifiable and indefensible nonuser—if this committee can, by evidence adduced before it, clearly and adequately establish that there is suppression or nonuser of patents which is unjustifiable and indefensible—the proof of which the Oldfield Committee did not seem to be able to gather in sufficiently impressive quantity and quality—then I believe that perhaps our historical quest into law, economics, and lexicography may not have been in vain, and the door which the Supreme Court left open in the *Paper Bag Patent case* may serve as an approach to the enactment of constitutional legislation affording the relief which this committee advocates "to promote the progress of science and useful arts." The rational basis of patent protection has been stated in no more crisp, comprehensive fashion than in the testimony of the most respected, former Commissioner of Patents James T. Newton, before the committees on patents of the Senate and House of Representatives in 1919. Discussing the basis of patent protection, he stated:

"And the value of the patent is right there; it enables the manufacturer to get an industry started. That is the value to the public, too. After the industry is started and the public gets the benefit of the invention, then the patent is beginning to perform the function that the framers of the Constitution intended it should perform, in making work easier for the general public, in giving them something they never had before and something that they wanted."[60]

[59] *Vicksburg* v. *Water Works Co.*, 202 U. S. 453 (1906), pp. 470–1. For an interesting discussion of the meaning of the language "the exclusive right to use", see T. R. Powell, "The Nature of a Patent Right" in (1917) (17 *Col. Law Rev.*, 663 at 678 ff.) Professor Powell states (p. 683), "The objects of the patent statute were practical objects", but it is difficult to determine from his discussion whether, if confronted now with an actual accumulation of proof convincingly establishing the suppression of patents, as against the public interest, he would regard a compulsory licensing legislation as constitutional.

EATON, BLAKEMORE, RUSSELL & COLBY,
27 State Street, Boston, Mass., January 28, 1936.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
Room 1015, New House Office Building, Washington, D. C.

DEAR SIR: I am handing you enclosed brief on suggested changes in the patent law requested by you and Representative Perkins in your committee.

From many years' experience both at law and in an industry greatly affected by the patent structure, I believe that if the suggestions I have made in this brief are adopted most of the bad situations in the patent structure will be eliminated.

I realize that the requirement of filing of assignments, licenses, and agreements and the making of an annual report on the use of patents would involve considerable work both on the part of the patent owner and the Patent Commissioner's office, but I do not believe the amount of effort required would be unreasonable.

The biggest thing which could be done for the industry and the public alike would be the successful setting up of industry cross-licensing arrangements similar to that now existing in the automobile industry. The main reason why this is not voluntarily done oftener is because some one organization in the industry feels that their patent structure is such that they overshadow all others.

As an inducement to set up such industry arrangements, it might be desirable in all such cases to waive the requirement as to those in such industries of requiring a report upon the use or making members of such industry subject to the cancelation of patents not used and devolving some plan whereby the Commissioner of Patents would maintain for each such industry a library of the patents affecting such industry which would be available for Government research and for reference by those in the industry.

Such a library is now maintained by the Automobile Chamber of Commerce, the organization handling the cross-licensing agreements in that industry.

The preparation of this brief has taken considerable time and effort on my part and I would be pleased to have you advise me whether I am expected to contribute my time and effort for the good of the cause, although this would mean no gain to me, or whether your committee has funds which would be applicable for the payment of a reasonable fee for the preparation of this brief; and if the latter, would appreciate your returning to me a voucher which I may make out for the same and forward to you.

Very truly yours,

CLARENCE C. COLBY.

SUGGESTED CHANGES IN THE PATENT LAW OF THE UNITED STATES

By Clarence C. Colby

PERSONAL

The writer was admitted to the Massachusetts Bar in 1908 and to practice in the Federal Courts in 1909 and is a member of the law firm of Eaton, Blakemore, Russell & Colby, 27 State Street, Boston, Mass. He was for 17 years president and general manager of the Samson Electric Co., a manufacturer of electrical equipment, located in Canton, Mass. From 1924–30, both inclusive, he was a director of the Radio Manufacturers Association. In 1927 he was chairman of the patents committee of this association. In 1927–28 he was president of the association and in 1928–30 he was chairman of the legislative committee of this association. In 1928 he organized and became president of the Audio Research Foundation, a national organization for the sound industry.

STATEMENT REQUESTED

On October 16, 1935, he was summoned to appear under authority of House Resolution 196 before the Committee on Patents of the House of Representatives at a hearing in New York and at the end of the hearing was requested by Representative Perkins of said Committee to file an additional statement which is herewith presented.

Digitized by Google

I. Present Status of the Patent Law

Before attempting to constructively criticize existing conditions it may be well to set up briefly the features of the Patent Law.

AUTHORITY

Congress, acting under authority given to it by Article I, Section 8 of the Federal Constitution, in 1790 and by various later revisions and amendments thereof has passed various acts, establishing the rights of inventors for limited periods to the exclusive use of their discoveries within the United States.

THE PATENT RIGHT

Under these laws the patentee is given the right to exclude others having knowledge of the invention from making, using or selling it, for a limited term. The right granted is property—property of the patentee and is subject to the general laws relating to such property, and is surrounded by the same rights and sanctions which attend all other property.

PATENTABILITY

Patents may be issued for any new and useful discovery, or any improvement thereof, which fall in the following classes:

1. Any new or useful art or process; that is, any method or means of producing a physical result which is independent of the mechanism or mechanical combination for producing it.
2. Any new or useful machine, not a mere principle or idea, but a concrete thing consisting of parts, or certain devices or combination of devices to accomplish a definite given result.
3. Any new or useful manufacture, an article made by the art or industry of man, not being a machine, a composition of matter, or a design, being distinguished from a machine by not having any rule of action, and from composition of matter by not involving the relation of ingredients.
4. Any new or useful composition of matter, which may be a compound produced or resulting from the intermixture of two or more specific ingredients, and possessing properties different from, or in addition to, those possessed by the several ingredients in common, and which may be produced by a mechanical or chemical operation or both.
5. Any new or useful design, applied to, or to be applied to, an article of manufacture.

NEW AND USEFUL

The test of novelty is that it must have not been known or used by others in this country before the invention or discovery thereof and not patented or described in any printed publication in this or any foreign country before the invention or discovery thereof. The test of usefulness is that it shall tend to promote in some substantial way the progress of science and the useful arts.

ASSIGNMENT AND LICENSE

Under the expressed terms of the patent law, patents or any interest therein are assignable, absolutely and without restriction, and an assignment vests in the assignee a title to so much of the patent itself. A patentee or his assigns may by instrument in writing, assign, grant, or convey,

1. The whole patent, comprising the exclusive right to make, use and vend the invention throughout the United States, or
2. An undivided part or share of that exclusive right, or
3. The exclusive right under the patent within and throughout a specified part of the United States.

The grant of rights, less than an undivided part interest in the patent itself, is a license, and gives the licensee no title in the patent.

RECORDING

The patent law does not require the recording of an assignment as a prerequisite to validity, but, as constructive notice, so as to protect against a subsequest purchaser for value it must be recorded in the Patent Office within 3 months from the date thereof, or prior to such subsequent purchase. The

Digitized by Google

law does not require that a license be recorded even as against a subsequent purchaser. It may even be made by parole.

VALIDITY AND INFRINGEMENT

The issuance of a patent by the Patent Office is only prima facie evidence of its validity, that is, that it is new and useful and that the invention falls within one of the classes set forth above. Validity and likewise, infringement can only be determined by a decision of the Federal courts having jurisdiction thereof. If a patent has been found valid and infringed the fact that the plaintiff is in an illegal combination in restraint of trade, and other equitable defenses, cannot be successfully pleaded in bar in mitigation of damages.

NONUSER

In the United States the nonuse of a patented article will not render the patent void. The inventor does not forfeit his patent or his right to exclude others from using his invention by his failure to make use of it himself, or his refusal to license others to use it upon reasonable terms. The question of licensing others to use his invention is one which the patentee alone has the right to answer, and the courts cannot compel him to make use of his invention or to permit others to use it against his will.

These are the main features of our patent law which has grown up through more than a century and a half of legislation and by interpretation of our courts in an effort to carry out the intent and purpose of the framers of the Constitution to reward inventors for their effort and success in promoting the progress of science and the useful arts.

II. Why New Legislation is Needed

There can be no doubt that the industrial progress of this country has been greatly benefited by our patent system, and that any legislation that would tend to break down or destroy it in principle would be unwise, but a development of our economic and industrial structure has reached a point where it is obvious that the object of the constitutional provision to reward inventors for their discoveries has been lost sight of, that the large organizations in our industrial life are using the patent system, to obtain control of industries and to prevent competition therein in a manner aimed to circumvent the prohibition of the Sherman and Clayton Acts and that new legislation should be enacted by Congress to stop the abuse of the patent system that threatens its destruction.

COMPARISONS

When the patent laws were established this country was in its infancy, the larger portion of our Nation was a wilderness, business was entirely local, transportation and communication in its present sense were unknown, and finance and initiative were matters largely in the control of the individual.

Today we are a Nation of approximately 130 million people covering the country from coast to coast, millions of whom are gathered in large centers, business is conducted on a national scale, our railroads, automobiles, shipping, and airplanes make transportation to any part of our country a matter of hours, our telephones, telegraph, and radio make communication substantially instantaneous, our press, our mails, and our publications spread knowledge of our doings and advertisements of our productions in a never-ending stream into every home, our financial structure has grown apace and business is conducted by corporations in which many hundreds of thousands are grouped together and act only through elected representatives.

The inventor today does not exploit his discovery alone but he is usually a paid employee of a large organization drawing a salary, while his company exploits his patents and takes the profits from his invention. If one be an independent inventor he must usually sell his patent to some similar organization and as a practical matter on whatever terms this organization shall fix.

Today the corporations are the large owners of patents, and compete in the industries of the country in the manufacture and sale of patented articles and strive to eliminate competition in their field of activity by putting themselves in such a patent position that their competitors are embarrassed and are often unable to obtain finances through fear of patent litigation and are thus forced from the field. This is done by buying up all available patents bearing upon the field of

Digitized by Google

operation. These patents are obtained not in most instances for use, but rather to prevent their use and for the purpose of blanketing an art and making competition difficult if not impossible.

PATENT MONOPOLIES

Of late years there has been in many industries an effort to combine groups of patents, secret pooling or cross-licensing agreements, covering both important and trivial patents, to a point at which the very multiplicity of patents has made competition impossible. Thus, monopolies have appeared in many of our large industries hiding behind the pretense of patent rights and have thus sought to avoid the antitrust law.

One of the most powerful of these patent combinations appeared in the radio industry in the pooling of patents by the Radio Corporation of America, the American Telephone & Telegraph Co., the General Electric Co., the Westinghouse Electric Co., and others, a group whose combined assets aggregated several billion dollars. This combination was made for the obvious purpose of controlling this new and important industry, eliminating competition among themselves and dividing the field.

It took 10 years to arouse public opinion to the point that Congress compelled action by the Department of Justice, to put an end to this illegal combination.

LACK OF RECORDS

Combinations of this sort act, so far as possible, secretly. Their license arrangements are not a matter of public record, and there is no place that a competitor may go and learn, with any assurance of obtaining a complete story, the exact standing of the equitable and legal rights regarding any patent, for the reason as we have shown, that assignments do not have to be recorded as a prerequisite of validity, and licenses and pooling agreements as a matter of practice, are not recorded at all.

CONCLUSION

Under the present conditions, the result largely of the revolution of our industrial system, the principle of the constitutional provision to reward the inventor for his discovery has become a matter of minor importance, the desire to promote the advance of the arts and sciences has been strangled by the failure to require the use of the patented invention, and the attempt by Congress to prevent monopolies of industries has been evaded by the attempt to hide behind patent rights. Congress should therefore consider what steps may or should be taken to amend the present law so that the patent rights granted by the United States may be more fairly administered and used in the interest of the individual, industry, and the public.

III. Suggested Amendments to the Patent Law

With the above object in view the following suggestions for changes in the patent law are submitted for consideration.

THERE SHOULD BE A COMPLETE PUBLIC RECORD OF PATENT RIGHTS

We have indicated above that the recording of a patent assignment is not required as a prerequisite to its validity and that the recording of a license or pooling agreement relating to patents is not required at all. It is evident therefor that the only records available are those of the issuance of the patents and such records of assignment as may have been voluntarily recorded.

The present record is, of course, suitable so far as to indicate the patents issued but as to affording one actively engaged in business, an index of how the patents issued in an industry are owned, what licenses or license agreements are in force, and by whom held, the record gives no information. Likewise the Government has no prompt and accurate method of discovering the manner in which these rights are being used, under pooling or cross-license agreements, whereby those involved are eliminating competition between themselves.

One of the great problems before the Government at the present time is the ipassage of laws which will keep open the right to compete in business and succeed tf success is based on ability, genius, or greater efficiency, and to stop the dominasion of any field by an organization whose policy is based on cunning and deceit, decret agreements, and a code of conduct free from all principles of fair and honest dealing.

Digitized by Google

The only way to accomplish this with relation to industries affected or controlled by patents is to make mandatory the recording of all agreements relating to patents and of all transfers of patent rights, so that the honest competitor may be forwarned and the Government informed with relation thereto.

I therefore suggest that Congress pass a suitable act requiring the recording of all assignments, licenses, and agreements relating to patents within 3 months of their execution.

PATENTS SHOULD BE USED OR BE MADE AVAILABLE TO THE PUBLIC

The purpose named in the Constitution as the basis of the granting of patents was "to promote the progress of science and useful arts", and the granting of patents for this purpose was to recompense the patentee for his effort and at the same time gain for the public the advance in science and art made thereby. Without the use of the patent the public is not getting the benefit which they have a right to expect in return for the right granted to the inventor.

It has been pointed out that under our patent law the patentee cannot be made to use his invention or to permit others to use it against his will. This situation has been taken advantage of in thousands of cases by the purchase of patents, not for the purpose of using them but for the purpose of preventing their use, in competition with the goods of the purchaser, enabling him thereby to control his field and thereby raising the price of his goods to the public. Thus the public has not only lost the benefit of its agreement with the patentee of the purchased patents but is made to pay a higher price for goods than it would have had to pay if the articles made under the competing patents were in free and open competition.

It is therefore suggested that a law be enacted requiring an annual report by owners and licensees of patents of the use of the patents held by them and that the Commissioner of Patents be authorized to declare abandoned and open to the public all patents which are not being used to the extent that they serve to promote the progress of science and the useful arts.

PREVENTION OF ILLEGAL POOLING OF PATENTS IN RESTRAINT OF TRADE

It has been apparent in recent years that the monopoly given to a patentee has been made the basis of an effort by holders of large groups of patents, to avoid the effect of our restraint of trade and antimonopoly laws, and the public interests sacrificed thereby. The experience of the radio industry cited above has been an outstanding example.

An act should be passed requiring all patents, cross-licensing and pooling agreements be made a matter of public record and providing a prompt and efficient method of correcting any such situation which in the opinion of the Government is against public interest. House Resolution 4523 of the first session of the Seventy-fourth Congress has been suggested for this purpose and in the writer's opinion would be effective in accomplishing this result.

PATENTS OF PUBLIC-SERVICE CORPORATIONS

Another problem has arisen under our patent system. It does not of itself concern the patent law, but in view of the fact that rights under patents are involved, it may properly be mentioned in this discussion.

Public-service corporations exist and maintain their business on the basis of a franchise from the people. Their business relates to the service of the people. Their income comes from the people in payment for such service.

In the normal development of the art relating to their particular field, they make many new and useful improvements that are covered by patents. The cost of these developments comes from the money received from the people, who pay for their services.

As long as these patents are used in serving the public under their franchise no question can be raised. Often however the service company enters into fields not covered by its franchise, and either directly or through subsidiary corporations uses the patents developed in the public interest and paid for by the public in its own interest.

The tremendous prominence and good will obtained from its public service and the patent control developed from the public funds place such a company in

Digitized by Google

a position to successfully prevent competition in such a field. An outstanding example of this is the American Telephone & Telegraph Co. which has spread beyond its service field of public telephone communication and today substantially controls the recording of motion pictures, the broadcast-station-equipment field, and other fields of electrical transmission. It substantially destroyed all competition in these fields through its control of patents, developed through the use of money received from the public and has driven out those who fought an unequal contest with them from industries which are entirely beyond the scope of its franchise.

This is another type, but no less a ruthless one, of unfair competition, which has grown up without national industrial development.

It is suggested that an act be passed prohibiting public-service corporations in interstate business from entering fields outside of its franchise, either directly or indirectly, and that patents received for new and useful improvements developed in the public service, be held in the public interest.

INDUSTRY CROSS-LICENSING OF PATENTS

There can be little question that the cross-licensing of patents in an entire industry is in the interest not only of the public but of the members of the industry itself. Those who have any doubts on this matter have only to study the automobile industry which for more than 20 years has worked under such an arrangement.

It is of value to the public, because they have the advantage of receiving in the products they buy all of the new and useful improvements in the art, which have proved to be desirable, irrespective of what make they buy or what concern made the improvement, and in addition the maintenance of free competition brings the goods to them at the minimum price.

It is of value to the manufacturer because it has been demonstrated that no one concern has all the brains of an industry, and the gain from the developments of all the others in the industry, far exceeds that arising from the efforts of any individual concern.

It is felt that similar cross-licensing agreements in other major industries would be of great advantage to the public and to those in these industries and it is therefore suggested that some Government authority be established or that the matter be referred to some authority now in being to negotiate, establish, ratify, and supervise cross-licensing agreements in other major industries.

CONCLUSION

It is submitted—

1. That the requirement of public record of patent assignments, licenses, and agreements will give to the public the full picture of patent rights affecting them or their business, to which they are entitled, and place before the Government authorities the necessary information to enable them to protect the public from monopolies and unfair competition, attempting to hide behind the patent grant.
2. That the requirement that a patent must be used or abandoned to the public will be of substantial assistance in preventing the "shelving" of many valuable patents purchased and held to prevent competition with other patented articles, and in preventing the building up of so-called defensive patent positions with no intention of using the patents obtained and further reduce the cost to the public by opening to competition many fields now so controlled that there is no competition, with a result that prices are exorbitant.
3. That restraining public-service corporations in interstate commerce from fields outside of their franchise will return to the public opportunities which have been unfairly taken from them and reduce the cost to the public in such fields by opening them to competition.
4. That an effort on the part of the Government be set up within the major industries of the country, cross-licensing agreements for such industries, will eliminate a great deal of the unfair competition in industries controlled by patents and create a situation of great advantage to the public and to the industries themselves.

Respectfully submitted.

CLARENCE C. COLBY.

JANUARY 28, 1936.

CHRYSLER CORPORATION,
Detroit, Mich., February 6, 1936.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
House of Representatives, Washington, D. C.

DEAR SIR: I take the liberty of informing the committee that in my opinion H. R. 4523, introduced on January 23, 1935, providing for the recording of patent pooling agreements and contracts with the Commissioner of Patents, would do more harm than good. The bill seems to require the recording in the Patent Office of every kind of cross-licensing agreement, as well as agreements intended to create patent pools. Whatever may be said about patent pools, there is a great distinction between them and cross-licenses. Patent cross-licenses of various kinds are common and usual. The most usual form is that by which one party grants certain rights to another and in return receives rights from the other under the other's patents. Many arrangements of this kind do not have cross-licensing as their principal purposes and would not ordinarily be considered cross-licensing agreements, but the fact that each party gives to the other some right to a patent would make them technically cross-license agreements and would bring them under the provisions of the bill.

Cross-licenses occur in many different business arrangements ranging from the case where two or more manufacture cross-license their respective patents, to a case where one party licenses another under his patents and the other gives back an agreement to license the first under improvements which the second may make to the licensed inventions. As a consequence a very large proportion of all licenses would have to be recorded under the terms of the bill. In the automotive industry, in addition to the usual granting of reciprocal rights when entering into conventional agreements, we have a cross-licensing arrangement which has worked out with great benefit to the manufacturers and to the public. This arrangement permits members of the Automobile Manufacturers Association to obtain free licenses under the patents owned by other members. The result of this is that law suits between the subscribers to the cross-license agreement are avoided and the public has the opportunity to purchase from any one of a number of manufacturers motor vehicles that embody inventions covered by patents of various subscribers to the agreement. No one can say that this arrangement is unfair to manufacturers who do not own important patents or that it is unfair to the buying public. It has benefited large and small manufacturer alike and has been a great factor in promoting peace in the industry and at the same time enabling all manufacturers to produce the finest vehicles at prices within the range of the great mass of the American people.

Whatever the committee may decide to do about pools, I venture to recommend that it modify the bill in such a way as not to impose upon manufacturers a requirement that in effect will cover most licensing agreements.

Very truly yours,

W. P. CHRYSLER,
Chairman of the Board.

WM. WRIGLEY, JR., CO.,
CHEWING GUM MANUFACTURERS,
Wrigley Building, Chicago, Ill., February 3, 1936.

MR. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
Fifth Avenue Hotel, New York City, N. Y.

DEAR SIR: Replying to your letter of November 12, 1935, response to which should have been made much sooner, but the writer has been abroad on business for the past 3 months, I wish to advise you as follows:

Wm. Wrigley, Jr., Co., is a manufacturer of chewing gum. This company is the owner of several detail patents relating largely to improvements upon mechanical devices, devised and built by it and used in its factory. It owns no so-called broad or basic patents and is not a member of any patent pool, nor has it entered into any agreement regarding patents, or otherwise, with its competitors.

The sole reason for this company taking out patents on improvements made in its machinery or factory equipment is purely for defensive purposes. It has never brought suit against any competitor, or anyone else for that matter, where the subject matter of the suit was based on its patents.

The sole object of this company in taking out patents is to give whatever patent protection is possible to its own business and to prevent someone else

Digitized by Google

from patenting that which we ourselves have improved and thereby subjecting our company to a patent suit. This policy has proven effective because, as yet, this company has never been sued for infringement of a patent.

Referring to your last question as to whether or not we have any suggestions regarding amendment to existing patent laws, we might remark that most patents issued to us seem to be of little value to us because they are so restricted and confined that there is always doubt in our mind as to whether or not there was any invention to begin with. In other words, if the Patent Office drew a tighter line distinguishing between ordinary mechanical skill and invention, it would probably be unnecessary for us to waste our money in taking out patents which we and our attorneys feel are merely defensive instruments having little, if any, merit, but which we are obliged to attempt to secure patent protection on for fear that some machinery manufacturer might secure limited protection and subject us to a lawsuit which would cost us more to defend than it does for us to take out innumerable patents.

We trust that this explanation has made our position perfectly clear.

Yours very truly,

WM. WRIGLEY, JR., CO.,
W. H. STANLEY, *Vice President.*

FRANK I. SCHECHTER,
COUNSELOR AT LAW,
Graybar Building, New York, January 29, 1936.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
House of Representatives, Washington, D. C.

DEAR DR. SIROVICH: I take pleasure in enclosing herewith two reprints of articles of mine that I believe you may find of some interest. The first of these, entitled "Would Compulsory Licensing of Patents be Unconstitutional?", is based upon the statement recently made, upon your kind invitation, to your committee sitting in New York.

The second of these papers, "Fog and Fiction in Trade-Mark Protection, Part I", involves a reconsideration and extension of my researches into the rationale of trade-mark protection and the basis of unfair competition generally, contained in my "Historical Foundations of Trade-Mark Law" (Columbia Legal Studies, Vol. I) and in "The Rational Basis of Trade-Mark Protection", 40 Harvard Law Review.

I know how bush you always are, but may I trouble you to let me have an up-to-date list of the names of the members of both the House Committee on Patents and the Senate Committee on Patents, as perhaps those gentlemen may also care to have copies of the enclosed papers, and particularly of the one with respect to compulsory licensing of patents.

With kindest regards, I am

Sincerely yours,

FRANK I. SCHECHTER.

WOULD COMPULSORY LICENSING OF PATENTS BE UNCONSTITUTIONAL?*

THE HISTORICAL RATIONALE OF PATENT PROTECTION

By Frank I. Schechter, New York

[Reprinted from *Virginia Law Review*, Volume XXII, No. 3, January, 1936]

The famous dictum of Dr. Samuel Johnson, uttered over 150 years ago, "that patriotism is the last refuge of a scoundrel" has, one is sorry to say, acquired—especially in view of the recent antics of eminent counsel—a popular corollary

*Based upon a paper read at the request of the Committee on Patents, House of Representatives, at a hearing on H. Res. 196 and H. R. 4523 (74th Cong., 1st sess.), held in New York City, Dec. 2, 1935. This paper was intended by the writer to deal solely with the constitutionality and the historical background of what has been aptly described by a subcommittee of the American Bar Association as "a hardy perennial" i. e., a proposal for some form of compulsory licensing of patents. (See American Bar Association, section of patent, trade-mark and copyright law. Committee Reports, July 15-16, 1935, pp. 29 ff.) In appearing before the House Committee on Patents the writer stated that he is not a member of the patent bar and was not speaking to the committee in the capacity of a patent attorney, but merely as a general practitioner interested in historical research and in problems of constitutional law.

The writer wishes to express his indebtedness to Mr. Leslie D. Taggart of the New York Bar for his assistance in the preparation of this paper, and to the authorities of the Law Library of Columbia University for their many courtesies and for permitting the use of their valuable collection of early American treatises concerning patent law.

in the vernacular of today that the Constitution of the United States is the last hide-out for desperate lawyers. This feeling is not, the author believes, directed against the motives or the logic of those attorneys and also those professors of law who are confronted with the interpretation of proposed legislation that is, for one reason or another, obviously and palpably unconstitutional.[1] However, there is another type of legislation, concerning which the plea of unconstitutionality is not received with equal equanimity. There are, from time to time, legal and social reforms advocated, the unconstitutionality of which is instinctively, vehemently and uncompromisingly challenged with, on the one hand, "an exquisite aloofness from the vulgarity of contemporary ideas" [2] and, on the other hand, a lack of historical perspective and of sound factual basis. The plea of unconstitutionality in such cases cannot and should not be successfully maintained by the mere and sheer process of reiteration.

Article I, section 8 of the Constitution of the United States provides that Congress "shall have the power * * * to promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries." At the hearings before the Congressional Committee on Patents in 1912 on the Oldfield Revision and Codification of the Patent Statutes, and also at other times and places when various proposals for compulsory licensing of patents, or for a refusal of a Court of Equity to protect the owner of a patent who has not used his patent has been discussed, such proposals have been denounced most emphatically as "unconstitutional", "unfair", and "un-American." [3] Any compulsory licensing system

[1] The duty of the court with regard to such statutes is quaintly reflected in an observation made by that great constitutional commentator, Associate Justice Joseph Story of the Supreme Court, nearly a hundred years ago to his colleague, Mr. Justice McLean: "There will not, I fear, ever in our day, be any case in which a law of a State or of Congress will be declared unconstitutional; for the old constitutional doctrines are fast fading away, and a change has come over the popular mind, from which I augur little good. Indeed, on my return home, I came to the conclusion to resign." W. W. Story, Life and Letters of Joseph Story (Boston, 1851) vol. II, p. 272. The reference of Judge Story is to *Charles River Bridge* v. *Warren Bridge* (11 Pet. 420 (1837), concerning which see under that title in Index to C. Warren, the Supreme Court in United States History, revised ed., vol. II (Boston, 1926), at p. 770; cf., C. B. Swisher, Roger B. Taney (New York, 1935), pp. 361 ff. See also Story's mournful lamentations as to the passing of "the doctrines and the opinions of the 'Old Court' " in C. Warren, loc. cit., vol. II, p. 129. By way of contrast, it is exceedingly interesting to note in the dissenting opinion of Mr. Justice Stone just handed down in the *A. A. A. case*, his impressive plea for the exercise of judicial "self-restraint" in declaring a statute unconstitutional (*United States* v. *William M. Butler, et al., Receivers of Hoosac Mills Corporation*, Jan. 6, 1936, reported the New York Times, Jan. 7, 1936, p. 11).

[2] P. Guedalla, Palmerston (New York, 1927), p. 26.

[3] For opposition on such grounds in Hearings on Oldfield Revision (1913), see testimony: in no. 12 by H. Pettit (p. 6); by S. E. Edmonds (loc. cit., pp. 8, 13–14); in no. 14, by L. Gifford (pp. 4–6); in no. 24, by F. F. Church (p. 12): "* * * the bill strikes at the very foundation of our patent system;" in no. 28, by F. F. Fish (pp. 6–7), in no. 27, by W. F. Rogers, president of the Patent Law Association of Washington, D. C., who was especially emphatic on this point: "Thus historically and traditionally * * * the spirit of our patent laws is that of an untrammeled grant of exclusion * * *. It would be an archaic and reactionary step to inject * * * compulsory license or * * * working." (Ibid., p. 11.) "It is not the Constitution we follow. It is not the law we adopted. It is not the bargain we made. It is not the policy which has studded every county, town, and hamlet with thriving independent shops and plants, with industries which never could have begun or lived but for the protection of the patent law." (Ibid., p. 12.) (See W. F. Rogers' testimony (ibid., p. 22) and, by P. T. Dodge (ibid., p. 35); by E. W. Bradford (ibid., p. 37).)

Belief in the constitutionality or historical justification of such legislation, although accompanied often by comment on the practical difficulties therein involved, was expressed by F. L. Dyer, president of Thomas A. Edison, Inc. (in no. 10, p. 38); by H. L. Ward, representing the Inventors' Guild (no. 3, pp. 20, 22; no. 4, p. 22); by F. Y. Gladney (in no. 16, pp. 22 ff.); by F. L. O. Wadsworth (in no. 21, pp. 10 ff.); by W. H. Chamberlin (in no. 23, p. 4); by the Commissioner of Patents in S. Doc. No. 555, 62d Cong., 2d sess., relative to bill S. 6273 recommending amendment to proposed Oldfield bill by District Court granting a license after 4 years: "It is believed that such a measure will have the effect of placing all valuable inventions in public use within a reasonable time and will also encourage the establishment in the United States of manufactories for the production of patented machines, devices, etc., which have been patented by persons who are not citizens of the United States.

The Oldfield Report on the Revision of the Patent Laws (H. Rept. 1161, 62d Cong., 2d sess., Aug. 8, 1912, to accompany H. R. 23, 417), recommending compulsory licensing, stated (pp. 6–7): "Nonuse or suppression in order to afford the basis for compelling the grant of a license must be for the purpose or with the result of suppressing competition between the specific articles protected by the patent suppressed and some other article made and sold by the owner of the patent. Anyone who objects to such a law must claim the right in the owner of a patent to suppress purely as a device to manipulate the market. Undoubtedly the framers of the patent law never contemplated such a use of patents * * *. What such a concern will pay for the patent will be determined by what it considers it worth to get the patent out of the way—its value in nonuse, not in active work. In such case the patent is valued for the protection that its ownership will give to a preexisting monopoly and not for the profits to be made from the manufacture and sale of the new commodity." The "Minority Report" (H. Rept. 1162, pt. 2, 62d Cong., 3d sess., Feb. 26, 1913), with equal emphasis opposed compulsory licensing, laying particular stress on the fact that in the Majority Report no concrete evidence of the suppression of patents was introduced and, it maintained, signatories of the report relied not upon testimony "but upon comments and complaints in the public press * * * and upon instances which they contend are to be found in Reports of Decisions of the Federal Courts" (pp. 1–2).

For the difficulty existing formerly, but presumably presently eliminated, of finding specific evidence of the suppression of patents. (See F. W. Vaughan, Suppression and Non-Working of Patents * * * in (1919) 9 American Economic Review, at pp. 693–4. Cf. testimony of F. Y. Gladney at Oldfield Hearings, no. 16, cited supra, at p. 23: "Another instance of suppressing patents we might call voluntary suppression, where a manufacturing concern buys up patents competitive with other patents that it owns

Digitized by Google

may have its difficulties and perplexities; some of these were brought out in the Oldfield Hearings of 1912;[4] some of these have been considered by Prof. Floyd L. Vaughan in his valuable work on Economics of Our Patent System;[5] some of these have recently been presented by a subcommittee of the American Bar Association in its 1935 meeting at Los Angeles;[6] and furthermore there is much illuminating material on the pros and cons of compulsory licensing in the most recent edition of Terrell's authoritative treatise on the law relating to patents in England, where the practical workings of that system of compulsory licensing may be watched both in legislation and in litigation.[7]

However, with the technique of a compulsory licensing system in the United States this article is not concerned; if such a system is constitutional, and if the testimony brought out at the hearings of this committee indicate it to be desirable, then there is no doubt that it can be worked out by the committee with the proper cooperation of the patent bar and also of the bench. The only phase of the problem treated here is the constitutional phase, the appropriate eludication of which necessitates an inquiry into the rationale and history of our patent system. This whole problem will be clarified if the proper distinction be at all times kept in mind between what Congress was empowered to do under article I, section 8 of the Constitution, and what Congress has, as evidenced in the present patent law, for the present, deemed it advisable to do in the exercise of that constitutional power. There is no question but that, as it has been consistently construed by the Supreme Court of the United States, the present statutory right of an inventor "to make, use, and vend the invention or discovery" includes the paradoxical right under his patent not to make, not to use, and not to vend his invention or his discovery during the term of his patent. Mr. Justice Brandeis has recently said for the Supreme Court that "if the patent is valid the owner can, of course, prohibit entirely the manufacture, sale, or use of such packages * * *."[8] As is well known, this whole doctrine of the right of nonuser was developed in 1908 by the Supreme Court in the *Paper Bag Patent case*.[9] In that case, involving a bill in equity to retain the infringement of a certain patent, it was contended for the defendent by the able author of Walker on Patents that—

"To permit the owner of a patent held in nonuse to invoke the aid of courts of equity to enjoin the use by others of an invention which he refuses to use himself, would defeat the very object of the patent laws and of the constitutional provision to which they owe their existence, and such a course, had it been pursued in the past, would have blocked the road along which the great historic inventions of the nineteenth century have proceeded to their present state of perfection."[10]

---

and deliberately suppresses them. We know that is done every day. The practice has a judicial history. The courts time and again have commented on the fact. In the *Thrashing Machine case* tried out in the court of appeals for the seventh circuit, the facts were that the thrashing machine combine owned 106 patents on a straw stacker. In the reports of the decisions of the Federal courts you will find statements like this: That the complainant indulges the common practice of buying up patents to get rid of them in competition with the patents that they own." See also T. C. Blaisdell, The Federal Trade Commission (New York, 1932) pp. 168–170, 229, 247, 257, for valuable references to patent pooling in various industries.)

For contemporary comments on the proposed Oldfield compulsory working legislation, see O. C. Bellman, the Compulsory Working of Patents (1912) 24 Green Bag 513, 517 (calling such legislation "detrimental to the just rights of manufacturers and inventors, and decidedly un-American"), O. R. Barnett, the Oldfield bill (1913) 22 Yale L. J. 383 (partly favorable to "remedial legislation"); G. H. Montague, the Proposed Patent Law Revision (1912) 26 Harv. L. Rev. 128, opposed to such legislation on the ground that patent owners' rights are neither greater nor less than those of owners of unimproved land [p. 153]. See also Case Note in (1907) 20 Harv. L. Rev. pp. 638–639, criticizing the decision, in favor of a patentee who had not used his patent, in the *Paper Bag Patent case* (150 Fed. 741, later affirmed, 210 U. S. 405 (1908)); cf. the Effect of Non-Use on a Patentee's Remedy against Infringement in (1908) 18 Yale L. J. 52, approving the decision of the Supreme Court in the *Paper Bag Patent case*, on the ground that art. I, sec. 8 of the Constitution obviously did not intend to give patentees "a narrower right than that which inheres in the absolute owners of property in general" (p. 53) (Walker on Patents, 6 ed., (1929) sec. 200).

Digitized by Google

The reasoning of the Court, in rejecting Mr. Walker's plea that an inventor may not invoke the protection of equity where there has been no commercial use of his patent, can be summarized in the Court's own language, as follows:

(1) "The patent law is the execution of a policy having its first expression in the Constitution, and it may be supposed that all that was deemed necessary to accomplish and safeguard it must have been studied and provided for." [11]

(2) "As to the suggestion that competitors were excluded from the use of the new patent, we answer that such exclusion may be said to have been of the very essence of the right conferred by the patent, as it is the privilege of any owner of the property to use or not use it, without the question of motive." [12]

(3) "In some foreign countries the right granted to an inventor is affected by nonuse. This policy, we must assume, Congress has not been ignorant of nor of its effects. It has, nevertheless, selected another policy; it has continued that policy through many years. We may assume that experience has demonstrated its wisdom and beneficial effect upon the arts and sciences." [13]

(4) "From the character of the right of the patentee we may judge of his remedies. It hardly needs to be pointed out that the right can only retain its attribute of exclusiveness by a prevention of its violation. Anything but prevention takes away the privilege which the law confers upon the patentee. * * * Whether, however, a case cannot arise where, regarding the situation of the parties in view of the public interest, a court of equity might be justified in withholding relief by injunction we do not decide." [14]

As thus summarized, the Paper Bag Patent decision would merely appear to have committed the Supreme Court to a finding that the present patent law then in effect may be interpreted to permit nonuse by an inventor during the term of his patent; it would not necessarily commit the Court to a further finding that, if the testimony now brought out by this Committee discloses clearly the urgent present necessity for a compulsory licensing system, nevertheless, the establishment now by Congress of such a system would not fall within the grant of power to Congress conveyed by article I, section 8 of the Constitution. It is a strange thing that within 3 years after the decision of the Supreme Court in the *Paper Bag Patent case*, the Court, in the famous case of *Baur* v. *O'Donnell*, holding that the grant under the patent law "of the exclusive right to make, use, and vend the invention or discovery", did not permit the patentee to limit the price of future retail sales of his patented product, stated in most emphatic language that, even if the patent law be most "liberally construed" in favor of the patentee, his patent rights under that law were exactly what they said, viz: "to make, use, and vend", and that these words have no less simple and more mystic connotation. Here is what the Court said:

"In framing the act and defining the extent of the rights and privileges secured to a patentee Congress did not use technical or occult phrases, but in simple terms gave an inventor the exclusive right to make, use, and vend his invention for a definite term of years. The right to make can scarcely be made plainer by definition, and embraces the construction of the thing invented. The right to use is a comprehensive term and embraces within its meaning the right to put into service any given invention. And Congress did not stop with the express grant of the rights to make and to use. Recognizing that many inventions would be valuable to the inventor because of sales of the patented machine or device to others, it granted also the exclusive right to vend the invention covered by the letters patent. To vend is also a term readily understood and of no doubtful import. Its use in the statute secured to the inventor the exclusive right to transfer the title for a consideration to others. In the exclusive rights to make, use, and vend, fairly construed, with a view to making the purpose of Congress effectual, reside the extent of the patent monopoly under the statutes of the United States." [15]

However, despite this seemingly specific construction by the Court of the language of the patent law, as indicated above, it still remains the doctrine of the Supreme Court, as enunciated by Mr. Justice Brandeis that the patentee, "can of course, prohibit entirely the manufacture, sale or use" of a patented article during the term of the patent.

Nevertheless, despite this present doctrine of the Supreme Court, one cannot help feeling that—

(1) The present holding of the Supreme Court on this point disregards the history, intent, and logic underlying the whole of any rational system and our system of rewards to inventors for their discoveries; and

(2) This present view of the law might well be reconsidered by the Court, if evidence of the nonuse and suppression of patents, and of the injury to public welfare occasioned thereby, gathered by your committee, is deemed sufficiently impressive and socially urgent by the Court.

From the historical data which are now submitted, it would seem that when the framers of the Constitution gave Congress the power "to promote the progress of science and the useful arts by securing * * * to * * * inventors the exclusive right to their respective * * * discoveries", they certainly did not contemplate that this promotion of such "progress" could be accomplished by legislation permitting an inventor receiving a patent to file that patent away in his safe for the patent term, or for an undue portion thereof, or to sell that patent to a purchaser engaged in the wholesale filing away and suppression of patents similarly acquired. Apart from the doctrine of the Supreme Court consistently followed for over a hundred years, that the main and primary purpose of our patent laws is not the creation of private fortunes for the owners of patents but "to promote the progress of science and useful arts",[16] there are two cardinal principles of constitutional interpretation justifying or even necessitating the historica-expedition to ascertain the nature of the reward which the framers of the Conl stitution intended to enable Congress to confer upon inventors. These two principles are as follows:

(1) In the first place, to a certain school of constitutional lawyers, it may be a rather startling although fairly obvious idea that when the framers of the Constitution used the words "to promote the progress of science and userul arts", they actually meant what they said. Those words, "to promote the progress of science and useful arts", would seem to fall within the category of those described, as early as 1793, by Chief Justice John Jay, as "express, positive, free from ambiguity", and accordingly to come within the rule he then enunciated that "words are to be understood in their ordinary and common acceptation. * * *"[17] From the evidence infra it will appear that the "ordinary and common acceptation" of the words used in article I, section 8 of the Constitution would prevent any express or implied implication of an intention to allow inventors to suppress or to assign for suppression the patents granted to them.

(2) However, there is a further rule of constitutional interpretation which may be applicable here, viz.: that if there is any doubt, any ambiguity, in the language of the constitutional grant of power to Congress in this respect, such doubt, and such ambiguity shall be resolved and decided by evidence not merely of practice contemporaneous with the framing of the Constitution, but also by evidence of Colonial and English experience on the point at issue long prior to the framing of the Constitution. There is hardly a single major clause of or important phrase or even word employed in the Constitution in the interpretation of which the Supreme Court had not gone back, not merely to the famous contemporary

---

meaning would seem not to be doubtful if we can avoid reading into them that which they really do not contain."

Mr. Justice Holmes' dissenting opinion is interesting for its comment upon the paper bag patent decision: "I suppose that a patentee has no less property in his patented machine than any other owner, and that in addition to keeping the machine to himself the patent gives him the further right to forbid the rest of the world from making others like it. In short, for whatever motive, he may keep his device wholly out of use. *Continental Paper Bag Co.* v. *Eastern Paper Bag Co.* (210 U. S. 405, 422 (p. 519)) * * *. Not only do I believe that the rule that I advocate is right under the *Paper Bag case*, but I think it has become a rule of property that law and justice require to be retained. For 15 years, at least since *Bement* v. *National Harrow Co.* (186 U. S. 70, 88–93), if not considerably earlier, the public has been encouraged by this court to believe that the law is as it was laid down in *Heaton-Peninsular Button-Fastener Co.* v. *Eureka Specialty Co.* (77 Fed. Rep. 288, 25 C. C. A. 267), and numerous other decisions of the lower courts (p. 520) * * *. I leave on one side the question of the effect of the Clayton Act, as the court has done, *and also what I might think if the Paper Bag Case were not upheld*, or if the question were upon the effect of a combination of patents such as to be contrary to the policy that I am bound to accept from the Congress of the United States." (At p. 521. Italics mine.)

writings compiled under the name of "The Federalist", or to the records of the Constitutional Convention, and of the State ratification conventions and to the private correspondence of the framers of the Constitution, but also to prior State and Colonial legislation, or even to the still earlier but often funda mental English experience reflecting or illuminating the particular Constitutional phraseology under consideration.[18]

If then we have indisputable judicial sanction for a search into the beginnings of the patent system in order to determine whether the promotion of "the progress of science and useful arts" is accomplished by nonuse of a patent, the answer of history on both sides of the Atlantic is a flat and emphatic no. An ancient Greek historian has recorded that the luxury-loving Sybarites, in what may perhaps be one of the first patent grants known (in the third century B. C.), encouraged a caterer or cook who had invented a dish "which was especially choice" by allowing no one else to "adopt the use of it before the lapse of a year, in order that the first man to invent the dish might possess the right of manufacture during that period. * * *" [19] Jumping from the Greece of Alexander the Great to the England of Queen Elizabeth, we find there an immediately significant point to be recalled here, namely that the whole institution of grants of patents for invention arose from the practical necessities of Great Britain in literally promoting "the progress of science and useful arts." In other words, patents for invention (as distinguished from the great trading monopoly patents) were granted with the ever-present thought of introducing into Great Britain new industries, and of improving those industries already there existent. In this connection it is interesting to note that the first exclusive patents for invention granted in Great Britain were given, not to Englishmen but to foreigners whose discoveries were regarded by the Crown as being of vital significance for British industry.[20]

II)); *U. S.* v. *Macintosh* (283 U. S. 605, 632–633 (1931, Mr. Chief Justice Hughes, dissenting, in construing the naturalization oath in the light of art. VI, sec. 3)); *Smiley* v. *Holm* (285 U. S. 355, 368 (1932, construing various words in art. I, sec. 4)); *O'Donoghue* v. *United States* (289 U. S. 516, 530 ff. (1933)) and *Williams* v. *U. S.* (289 U. S. 553–554 (1933)), both construing the judicial power under art. III; *Home Building & Loan Ass'n* v. *Blaisdell* (290 U. S. 398, 427–428 (1934, construing the "Contract Clauses" of art. I, sec. 10)); *Monaco* v. *Mississippi* (292 U. S. 313, 322–325 (1934, construing art. III, sec. 2, clause [1] and [2] and the eleventh amendment)); *Baldwin* v. *Seelig* (294 U. S. 511, 522 (1935, explaining original necessity for "Commerce Clauses", art. I, sec. 8)); *Gordon* v. *Washington* (295 U. S. 30, 36 (1935, construing meaning of phrase "Suits in Equity" in Judiciary Act of 1789)); *Humphrey's Executor* v. *U. S.* (295 U. S. 602, 626 ff. (1935, determining powers of removal from office under art. II)); *Clyde Mallop Lines* v. *State of Alabama* (56 S. Ct. 194 (1935, construing the term "tonnage" in art. I, sec. 10, clause [3])). C. Warren, Bankruptcy in United States History (Harvard University Press, 1935) pp. 4 ff., discusses the historical background of the phraseology "uniform laws on the subject of bankruptcies" as used in art. I, sec. 8, clause [4]). See also, R. P. Post, Constitutionality of Government Spending for General Welfare in 22 Va. L. Rev. (1935) 1, at pp. 2 ff., and authorities, articles, and brief there cited.

For cases specifically dealing with patent questions and going back to English precedents, see *Pennock* v. *Dialogue* (2 Peters 1, 18 (1829)); *Grant* v. *Raymond* (6 Pet. 218, 241–242, 247–248 (1832)); *Shaw* v. *Cooper* (7 Pet. 292, 319–320 (1833)); see also, the great steamboat case, *Livingston & Fulton* v. *Van Ingen* (9 Johns. 506, 577, 587 (decided by the New York Court of Errors in 1812, per James Kent, then Chief Justice); however, as to patent law, seemingly contra—perhaps due to the idolatry of the biographer for his subject; *cf.* W. W. Story, Life and Letters of Joseph Story (Boston, 1851) vol. i, pp. 236–237: "Cases began to arise involving all the principles applicable to patents; and to the adjudication of these, the existing rules were not only to be practically applied as they never before had been, but new rules and modifications were demanded. The questions were often so novel, that counsel were forced to argue, and the Court to decide, without chart and upon general principles. I have often heard my father relate, that in several of the early cases tried before him the gentlemen engaged in them apologized for the mode in which they had been conducted, saying that the law was so without precedent and forms, that they knew not how to proceed." And again: "The condition of the law relating to patents, when my father came to the bench, has already been adverted to. In its principles and practice it was nearly formless in America, and the English decisions were so contradictory and unsatisfactory as to afford little aid. The strong inventive genius of New England began to develop rapidly after the war, and his circuits were crowded with patent cases. It became his office, therefore, almost to construct the law on this subject, and the system which is now developed is mainly owing to his effort. This law then in England was a mere shuttlecock between equity, with its liberal doctrines, and the common law, with its fear of monopoly." (*Ibid.*, vol. II, p. 584). *Cf.* T. G. Fessenden, Essay on the Law of Patents (Boston, 1810), pp. 42 ff., 176 and note.

Cichorius 'Ein Patentgesetz aus dem griechischen Altertum' in Jahrbucher fur Nationalokonomie und Statistik, vol. 118, p. 46 (Jena 1922)." See also, note on "Ancient Monopolies" in (1935) 17 Journal of the Patent Office (Washington, D. C.) p. 344.

[20] See W. H. Price, The English Patents of Monopoly (Harvard Econ. Studies, I (1913)) pp. 7–8: "* * * The earliest recorded application for an exclusive patent for introducing a new art into England bears the date of 1558 and was presented jointly by an Englishman and an Italian. The petition was granted in 1562 as a reward of 'diligent travail' and to 'give encouragement to others.' Meanwhile two other patents had been granted for inventions of foreign origin. Before any one of these was conceded, another Italian, Giacopo Acontio, in a petition for a patent prefaced his application with the suggestion that 'nothing is more honest than that those who by searching have found out things useful to the public should have some fruit of their rights and labors, as meanwhile they abandon all other modes of gain, are at much expense in experiments, and often sustain much loss.' He then explained that he had invented certain furnaces and 'wheel-machines' which others would copy without remunerating him unless he were protected." See also *ibid.* pp. 62–63, 67.

The development of the British patent system is, of course, inextricably interwoven with the great struggle against monopolies resulting ultimately in the passing of the Statute of Monopolies which specifically exempted from its operation patents for invention. One thing is clear in all that early period of patents for invention in England, and that is the emphasis placed upon the social undesirability and the illegality of nonuse of a patent. Patents granted to Italians, Hollanders, Germans, etc., were all predicated upon their actual use for commercial purpose in Great Britain within a certain period, and patentees, whether foreigners or Englishmen, who failed to comply with this requirement of use, soon found themselves patentless. Thus is 1563, owing to a growing scarcity of wood fuel, Queen Elizabeth granted a license to George Gylpin and Peter Stoughberken to make ovens and furnaces for 10 years. The grant refers to the "growing scarcity of wood fuel owing to the large consumption in the brewing and baking trades" and "is void in case the patentees fail to come over (presumably from Germany) and put the grant into practice within 2 months. * * *" [21] Again, in 1571, in the grant for an engine for land drainage and water supply "the grant is void if the engine be not erected within 2 years." [22] The Crown, being fully aware of the hatred, in England, of monopoly, was careful to emphasize the fact that such monopolies were granted for use by the public. In Francis Bacon's Defense of the Royal Prerogative in the Grant of Patents (1601), he takes great care to distinguish between those patents which he avers, "truly in my own conscience are hateful to the subject as monopolies", and those patents for inventions which are useful to and usable by the public. Of these he says:

"If any man out of his own wit, industry, or endeavor find out anything beneficial for the commonwealth, or bring any new invention, which every subject of this realm may use; yet in regard of his pains, travail, and charge therein, Her Majesty is pleased (perhaps) to grant him a privilege to use the same only by himself, or his deputies, for a certain time: This is one kind of monopoly." [23]

Even the haughty Elizabeth, herself, in her "Golden Speech" to her last Parliament pleaded that any patents which she had granted and which had not been actually used for the public good, had been obtained from her by fraud: "Since I was queen", she said, "yet did I never put my pen to any grant but upon pretext and semblance made me, that it was for the good and avail of my subjects generally, though a private profit to some of my ancient servants, who have deserved well; but that my grants shall be made grievances to my people, and oppressions, to be privileged under color of our patents, our princely dignity shall not suffer it.

"When I heard it, I could give no rest unto my thoughts until I had reformed it, and those varlets, lewd persons, abusers of my bounty, shall know I will not suffer it." [24]

In 1611 a certain Simon Sturtevant filed a petition for a metallurgical patent which ended with a statement that "he was not tied to any time in the trial of his invention." However, he "was speedily undeceived for in the following year the patent was canceled on the ground of his * * * neglect to work the patent." [25] It is also of significance that in 1639, King Charles I, "fearing to meet the Parliament, which soon had to be called, with a grievance of the monopolies still unremedied", issued a proclamation in which, *inter alia*, he revoked and canceled "all patents for new inventions not to be in practice within 3 years next after the date of the said grant." [26]

PATENTS FOR INVENTION OR INDUSTRY IN THE AMERICAN COLONIES

In quest of the invention of the farmers of the Constitution who, in Article I, Section 8, authorized Congress "to promote the progress of science and useful arts by securing * * * to * * * inventors the exclusive right to their respective * * * discoveries", we now return from England to the New World. We find in the records of the American Colonies as strong, if not even more, impressive evidence that nonuser and the suppression of patents granted

were absolutely foreign to the Colonial concept of a patent for invention. A mere reading of some of these patents in chronological order clearly indicates the steady and general trend that they were granted either to foreigners who had already tried out the workability of their inventions, or to the colonists themselves, not merely for the general purpose of fostering trade among the Colonies and abroad, but to meet some specific emergency affecting the more or less immediate needs of the colonists. The spirit of these patent grants demanded, as Professor Vaughan states, "a concrete introduction, not a mere disclosure of the inventions." [27]

Thus, in 1652, the General Court of Massachusetts Bay granted to John Clarke a 3-year patent for an invention: "for saueing of firewood & warming of rooms wth little coste & charges, by which meanes great benefitt is like to be to the country, & especially to these populous places; & if any family or other pson doe with the consent & direction of the sd Mr. Joh Clarke, or without his consent, doth improue, or vse sajd experiment, they shall pay ten shillinge to the sd Mr Clarke, for which he may sue or implead any pson before any commissionor for the same, as the case shall require." [28]

Again, 4 years later the General Court of Massachusetts Bay dealt with the problem of "the vncertajntje of procuring salt amongst vs for our necessary vses" and whereas Mr. John Winthrop "proffereth to make salt for the colony after a new way", they granted him a 21 year patent for "making salt after his new way." [29]

In 1691 the legislature of the Province of South Carolina, having been approached by Peter Jacob Guerard, the inventor of a rice husking machine, and in order to encourage the said Guerard "& all other ingenious & industrious persons * * * to essay such other machines as may conduce to the better propagation of any commodityes of the produce of this Collony" granted the said Guerard a 2-year patent for his "Pendulum Engine" and forbade the manufacture of said "Pendulum Engine" by others "unlesse he or they shall first pay onto the said Peter Jacob Guerard forty shillings current money of this Province, for each such Engine he or they shall make, sett up or use as aforesaid." [30]

In 1733 the same legislature of the Province of South Carolina granted to Charles Lowndes a 4-year exclusive privilege for making "a new Engine for the pounding and beating of Rice" but specifically provided "That the said Charles Lowndes, his executor, administrators and assigns, shall not, during the term of four years aforesaid, receive or take any more than the just and full sum of sixty pounds current money from any person that shall apply for a lycence in writing from him the said Charles Lowdnes, his executors, administrators or assignes, for the making or using any such Engine. * * * " [31]

Four patents granted by the thriving industrial Colony of Connecticut from 1746 to 1753 involvlng a new art or industry are equally significant.

1. John and Stephen Jerom were granted (in 1746) "the sole liberty and privilege of making salt by the boiling of sea water" for 14 years, provided, however, that if the patentees "shall neglect or fail, to erect, set up and prepare suitable works and materials for the making of salt, as aforesaid, for the space of two years, or shall fail of making the quantity of five hundred bushels of good salt in any one of the remaining twelve years after the said two years, that then this grant and every part thereof shall be void and of none effect; anything therein before to the contrary in any wise contained notwithstanding." [32]

2. In the following year Thomas Darling of New Haven prayed for "the sole liberty of making glass in this Colony." This "sole liberty and privilege of making and manufacturing glass in this Colony" was granted to him for 20 years on the

[27] F. W. Vaughan, *supra* note 5, p. 20. For a thorough background of the relation of colonial industries to the necessity for inventive energy and protection by patents, see W. B. Weeden, Economic and Social History of New England (Boston 1890), in index to vol. II, *s. v.* "Inventions;" V. S. Clark, History of Manufactures in the United States (Washington, D. C. 1916), vol. I, pp. 48-53, chs. VIII and IX; J. L. Bishop, History of American Manufactures, vol. I (Philadelphia, 1864), pp. 96, 114, 186.

[28] Records of the Company and Governor of Massachusetts Bay (ed. N. B. Shurtleff), vol. III (1854), p. 283.

[29] *Ibid.*, vol. II, p. 259, May 14, 1656.

[30] South Carolina, Statutes at Large (edited by Thomas Cooper, Columbia, S. C., 1837), vol. II, p. 63, (No. 72, — 1691.)

[31] The Statutes at Large of South Carolina, ed. D. J. McCord, Vol. VI (Columbia, S. C., 1839), p. 620, (no. 6, 1733.)

[32] The Public Records of the Colony of Connecticut, ed. C. D. Hoadly (Hartford, 1876), p. 246, — (1746.) For the importance of salt to the colonists, see W. B. Weeden, *op. cit. supra* note 27; index to vol. II, *s. v.* "Salt;" V. S. Clark, *op. cit. supra* note 27; index to vol. I, *s. v.* "Salt." It is not always easy "to mark the transition from the monopolies of an earlier date to the patent rights which play so important a part in modern legislation, affecting manufactures" (V. S. Clark, *op. cit. supra* note 27, vol. I, p. 53); in this and the other Connecticut patents, whether for invention or introduction of an industry, the point to be noted is the condition that the public benefit be prompt and not unduly suspended.

Digitized by Google

condition, however, that "if the memorialist and his assigns shall neglect or fail to erect, set up and prepare suitable works and materials for the making of glass, as aforesaid, for the space of 4 years, or shall fail of making the quantity of five hundred feet of good window-glass in any one of the remaining sixteen years after the aforesaid four years, that then this grant and every part thereof shall be void and of none effect, anything thereinbefore to the contrary in anywise contained notwithstanding." [33]

3. In the same year (1747) Joseph Pitkin, of Hartford, was granted "the sole privilege of slitting iron within this Colony for the term of 14 years * * *" "*with this proviso only*, that he shall certify this Assembly in May next that he hath began to provide to building a slitting mill, and that the same be set on work within two years from the present sessions of this Assembly, and kept going as occasion shall be to the end of the said term." [34]

4. In 1753 Jabez Hamlin and Elihu Chauncey, of New Haven, were granted "the exclusive liberty and privilege" for 15 years of setting up and operating machines "for managing ye linnen manufactures," but with a reservation that "if the memorialists failed to set up one such machine in every town within 5 years, they should lose the privilege in that town." [35]

Returning momentarily to Massachusetts, in 1750 the legislature granted a 10-year patent to a manufacturer of sperm candles and other whale products "requiring him to teach at least five apprentices during that period, of whom two should be nominated by the General Court." [36]

In 1761, the Colony of Rhode Island granted James Jucena a 10-year patent for making castile soap, it being recited: " * * * that he proposes to set up the manufactory thereof in this colony; that the procuring one of the chief materials will employ many poor people, and the manufactory be otherwise highly beneficial to the public, by furnishing a great and valuable article of commerce, which may be exported to all parts of the continent, to the West Indies, &c;" [37]

POST-REVOLUTIONARY PATENTS FOR INVENTIONS GRANTED PRIOR TO THE ADOPTION OF THE CONSTITUTION

The post-revolutionary grants of patents are similarly significant in their insistence that an exclusive right of manufacture actually implies manufacture and not nonuse of the patent. Thus, in March 1780 the General Assembly of the Commonwealth of Pennsylvania, granted to Henry Guest "the sole and exclusive right, for the term of five years, of manufacturing oil and blubber from the materials he has discovered;" this exclusive right was, however, to become effective *only* "after the time at which the aforesaid Henry Guest shall erect a manufactory in this State, and produces oil and blubber therein for sale from the materials he has discovered, provided the same be done within the space of eight months from the time of passing this act. * * *" [38] In the same year, the New York Legislature granted the same Henry Guest "the sole and exclusive right of making and vending within the State for the space of five years the same species of oil and blubber,"—adding to this grant "*Provided* nevertheless that the grant hereby made shall not take effect until the said Henry Guest shall have filed in the secretary's office in this State, a writing containing the names and descriptions of the materials aforesaid, and the method and process of making such blubber and oyl, or a substitute for blubber and oyl; nor until the said Henry Guest shall have a manufactory erected for the purpose, and shall have made such blubber or oyl, or a substitute for blubber or oyl, of the materials aforesaid, within this State." [39]

In South Carolina, from which, as we shall see, hailed one of the two drafts of what ultimately became the patent clause of the Constitution, there was enacted in 1784 probably the first real general patent law, as distinguished from an individual legislative grant of a patent. In that statute entitled "An Act for the encouragement of Arts and Sciences", the major portion thereof dealt with the exclusive rights of copyright owners and provided that, if upon complaint to

the court and judges of the court of common pleas, it shall be found that the grantee has neglected to "furnish the public with sufficient editions thereof * * *", the grantee of such copyright shall furnish security that "a sufficient number of copies of such book or pamphlet" shall be published, and "if such author or proprietor shall, before said court, neglect or refuse to give such security as aforesaid, the said court are hereby authorized and empowered to give to such complainant a full and ample license to re-print and publish such book or pamphlet, in such numbers, and for such term, as said court shall judge just and reasonable: * * *." This principle of user in the same Statute was likewise extended to the inventors of machines in the following language:

"IV. And be it further enacted by the authority aforesaid, That, the inventors of useful machines shall have a like exclusive privilege of making or vending their machines for the like term of fourteen years, under the same privileges, and restrictions hereby granted to and imposed on the authors of books." [40]

Again, in 1788, the Legislature of South Carolina passed a special act granting to Samuel Knight "the sole and exclusive right and liberty of erecting, building, constructing and vending within this State" a machine for the pounding of rice "for and during the term of fourteen years", "*provided always*", however, "that if any person or persons shall tender or pay to the said Samuel Knight, his heirs or assigns, the sum of five pounds sterling, he or they shall and are obliged and required to grant each and every such person or persons, a license and permission, * * * authorizing him or them to construct or build such machine." [41]

THE CONSTITUTION AND THE PROTECTION OF PATENTS OF INVENTIONS

In advocating, in "The Federalist", to the people of the State of New York, the ratification of the Constitution, Madison, quoting the proposed power in Congress "to promote the progress of science and useful arts, by securing, for a limited time, to authors and inventors, the exclusive right to their respective writings and discoveries", stated:

"The utility of this power will scarcely be questioned. The copyright of authors has been solemnly adjudged, in Great Britain, to be a right of common law. The right to useful inventions seems with equal reason to belong to the inventors. The public good fully coincides in both cases with the claims of individuals. The States cannot separately make effectual provision for either of the cases, and most of them have anticipated the decision of this point, by laws passed at the instance of Congress." [42]

Just what State patent laws, "passed at the instance of Congress", Madison referred to is not altogether clear—we have already quoted the South Carolina Statute of 1784. From the standpoint of the immediate necessity and purpose of a general patent statute, implying an exclusive right of use in the patentee but not the right to suppress his patent, we do know that as early as 1783 a committee of the Continental Congress, to which had been referred a petition for a patent for the manufacture of steel, thus reported on the desirability of rewarding inventors:

"The Committee however considering that there are at this time many important manufactures in the different States and that others may be attempted which by proper attention and encouragement may be carried to great perfection by which our own Citizens may be employed and supported and large sums of money be saved which must otherwise be expended in foreign Countries, circumstances which deserve the most serious consideration at a Period when the United States are labouring under heavy debts both foreign and domestic; Wherefore the following Resolution is submitted:

"That it be recommended to the Legislatures of the several States to countenance and encourage the establishment of useful manufactures either by premiums or by such other means as they may find most effectual which are consistent with the Confederation and the Treaties subsisting between the United States and foreign powers." [43]

Again, in the same year, the Committee of the Continental Congress, expressing apprehension as to the workability of a mechanical boat, for which its inventor prayed for "a compensation in land on the west side of the Ohio", stated:

"That if the Boat proposed to be constructed by Mr. McMechen shall answer the valuable purposes that from his memorial he seems to expect, Congress,

Digitized by Google

when the situation of their affairs permit of it, will take the same into consideration; and notwithstanding that he may have published his discovery, they will grant such premium to the Projector as to them may seem an adequate compensation." [44]

Acting on another petition for a grant of land to an inventor of a mechanical boat, the Continental Congress resolved, in 1785:

"That 30,000 A[s] of land in the new Purchase to the West of the Ohio be given to James Rumsey provided he shall before the first day of May next produce good and sufficient Evidence that by means of certain Mechanism of his Invention wrought or aided by three men only, a Boat carrying ten Tons has been moved (sic) for six days in succession against the Stream of the R. Ohio at the rate of (sic) 50 miles (sic) pr. day." [45]

In arguing that the use of the term "exclusive right" referred to in article I, section 8 of the Constitution, would render a compulsory licensing system or cancelation of a patent for nonuse unconstitutional, stress has been laid on the fact that in Madison's draft, submitted to the Convention on August 18, 1787, the phrase used was "to encourage by premiums and provisions the advancement of useful knowledge and discovery", furthermore, that Charles Pinckney, on the same date, proposed "to grant patents for useful inventions", while the phraseology as finally adopted on September 5th, 1787, by Judge Brearley's Committee on Postponed Matters, read "by securing" for limited times to * * * inventors, the *exclusive* right to their respective * * * discoveries." [46] From this change in phraseology it has been argued by a very learned authority on patent law, Mr. Karl Fenning that:

"It is significant, therefore, that in framing the Constitution in its final form, the words 'Patent' and 'Copyright' were not used, possibly lest the power be limited to the particular forms of conditional exclusive rights which were at that time known as 'Copyrights and Patents.'"

From the "words finally chosen for the Constitution", Mr. Fenning deduces that "these seem to allow no limitations on the 'exclusive' right such as requirements for working or compulsory licensing." [47]

However, this reasoning, although ingenious is, the writer believes, purely surmise and unsupported as far as he can at present gather by contemporary evidence. On the contrary, he submits that (1) we do know that the final corrections of Judge Brearley's Committee and of the "Committee on Style and Correction" were not carefully or discriminately considered by the Delegates to the Convention, who, Mr. Charles Warren tells us "were now 'very impatient' to get through, and tolerated little debate"; the delegates were evidently tired and anxious to finish their labors and go home." [48] (2) We likewise know that the congressional grants to inventors and authors finally authorized under article I, section 8 of the Constitution represent the utmost limits to which the Framers of the Constitution, inheriting and raised in the fear of monopolies, were willing to go, and that the proposal of a broader power "to establish public institutions, rewards and immunities for the promotion of agriculture, commerce, trade and manufacture" was emphatically rejected.[49] (3) We also know from contemporary, as well as later evidence, that the sole encouragement to obtain, or the consideration for these limited patent and copyright grants, was regarded as the economic inducement of recurring profit through the constant use by the grantee of his constitutional monopoly. As James Iredell, later one of the first Associate Justices of the Supreme Court, wrote in defense of the Constitution in 1788, "the interest of the proprietor (of a copyright) will always induce him to publish a quantity fully equal to the demand." [50] In an early patent decision the Supreme Court likewise described the inventor's reward as "the profits arising from the sale of the thing invented." [51] (4) Finally we also know that just as at the

In this connection and on the question as to contemporary ideas of what Congress could do if it so deemed fit, by way of conferring conditional rewards upon the inventors for their discoveries, it is interesting to note the following extract from a treatise by Philips, The Law of Patents (Boston, 1837), at pp. 8–9: "Though property in a discovery, therefore, like that in land, originates in and is created by legislation, the right to such property exists to an imperfect degree, independently of the positive laws. In this view Mr. Rawle remarks, that upon the provisions of the constitution of the United States on this subject, that it was not intended thereby to create

introduction of a system of patents for invention in England, described above, so, as already indicated by the Committee of the Continental Congress just quoted, and during the period of the formation, ratification, and putting into effect of the Constitution itself, the whole urgent need of the patent system was to promote immediately, and not merely ultimately after a 17-year period of suspension, the concrete welfare of the people of the United States. Contemporary evidence stresses the need to increase both production and consumption, thereby not only making America a more livable country but enabling both the Federal and State Governments to pay their debts. About 1788, in his "Letters of an American Farmer", Crèvecoeur, the famous French observer of America, noted that:

"The farmer and the artisan have more to do than they can perform; scarcity of men makes labor very dear; to supply the want of labor and time the American is forced to invent, to think out new ways of augmenting his efficiency."[52]

Writing to Jefferson, in the fall of 1788, on the problem of patents of monopoly, "as encouragement to * * * ingenious discoveries", James Madison, describing monopolies as "justly classed among the greatest nuisances in Government", even went so far as to inquire whether it would "not suffice to reserve in all cases a right to the public to abolish the privilege at a price to be specified in the (patent) grant * * * ?"[53] How important American inventions already appear in public estimation is well illustrated in McMaster's description of the rejoicing in Philadelphia on the news of the ratification of the Constitution. "The Manufacturers' Society", he writes: "delighted the crowd with the spectacle of a huge wagon drawn by ten horses and neatly covered with cotton cloth of their own make. On the wagon were a lace loom, a printing mill, a carding and a spinning jenny of eighty spindles. Compared with the cunningly and exquisitely wrought machines now to be found in the mills and factories of New England, they would seem rude and ill-formed. But they were among the newest inventions of the age, and were looked on by your ancestors as marvels of mechanical ingenuity."[54]

---

rights, but merely to regulate those already existing. The inventor has a right to keep his secret, and if he discloses it he has a just claim to remuneration and reward, according to the amount of his expenditure, and the importance of his improvement." And again, at pp. 204-206: "A patent once granted is not forfeited in the United States by the neglect of the patentee to put his invention into practical operation. Our law differs in this respect, from that of France, which provides that unless the patentee reduces his invention to use within 2 years from the granting of the patent, he forfeits his privilege. This provision is rather rigid, for a general rule, since some inventions, requiring extensive preparations and large outlays, cannot be brought into operation in that time. A law containing a provision of this description ought also to provide for lengthening the time in particular cases. But the laws of England and the United States, contain no provision on this subject. Mr. Justice Washington distinctly lays down the doctrine that no neglect of the patentee, to put his invention into practical operation, will be construed to be an abandonment of his patent right. And such is the language of all the cases. Our law appears to go upon the presumption that the public benefit may in this case be left wholly to the influence of the interest of the patentee; and confides to him the absolute control and disposal of his invention for the period of his monopoly.

"There may be instances of inventions, the use of which are vitally material to the public safety, just as in some instances the appropriation of individual property to the public use is essential to the public defence. In the latter case the general safety is not subjected to the caprice or inordinate cupidity of the proprietor, for his property may be taken for the public use without his consent, and a reasonable compensation allowed. And such would be the rules, probably, in regard to the use of a patent right, which is no more sacred than other personal property. This provision of law is limited to the case of the use of property by the public as a corporate political body, and does not reach the case of an indirect benefit derived to the public by the use of a thing by individuals. In this respect the law leaves patent rights upon the same footing as other personal property, the proprietor of which may, by his own caprice or folly, deprive the public and himself of the benefit that would result from a reasonable use of it, and there does not seem to be any pressing "urgency for a different rule in regard to different species of property. There is, it is true, no absolute insurmountable objection to a regulation on this subject in relation to patents, for the public may grant patents or lands upon such conditions as may be deemed expedient, and for the general benefit; but as a general rule, unless the case is plain and urgent, it is the better policy to leave private rights to the discretion and interest of proprietors, where their interest evidently coincides with that of the public, since the inconveniences attendant upon an attempt by law to supply their want of reasonable discretion, would, in a majority of cases, be greater than those consequent upon their abuse of the discretion and control allowed by the law."

In *Woodbridge* v. *United States* (263 U. S. 50, 55, 56 (1923), while following the holding in the *Paper Bag Patent Case* that a patentee "is not obliged either to make, use, or vend his invention during the period of his monopoly," Chief Justice Taft paradoxically further reasoned that "Congress relies for the public benefit to be derived from the invention during the monopoly *on the natural motive for gain in the patentee* to exploit his invention and to make, use, and vend it or its products or to permit others to do so, *for profit.*" (Italics mine.) *Cf.* cases cited in J. B. Waite, Patent Law (Princeton, 1920), p. 224, note 369.

In his very first annual address to Congress on January 8, 1790, President Washington urged the passage of a patent law, saying:

"I cannot forbear intimating to you the expediency of giving effectual encouragement, as well to the introduction of new and useful inventions from abroad as to the exertion of skill and genius at home."[55]

In the first Patent Federal Statute enacted in April 1790, it was provided that the "Board of Three Members" to whom petitions for patents were referred "if they so deem the invention or discovery sufficiently useful and important" shall allow the applicant a grant of "the sale and exclusive right and liberty of making constructing, using, and vending to others to be used, the said invention or discovery."[56]

CONCLUSION

We have come to the end of a journey into constitutional law and American and English history in order to ascertain the meaning of four seemingly very simple terms, viz: "exclusive", "make", "use", and "vend". As we have seen in *Bauer* v. *O'Donnell*, the famous price-fixing case, the Supreme Court found nothing "occult" in the words "make, use, and vend", and the same Court, in construing the grant of "an exclusive right * * * for a period of thirty years of a system of water works" has held that "the term 'exclusive' is so plain that little additional light can be gained by resorting to the lexicons. * * *"[57] With regard to the constitutionality of compulsory licensing provisions or the cancelation of patents for unjustifiable and indefensible nonuser—if the Committee on Patents can, by evidence adduced before it, clearly and adequately establish that there is suppression or nonuser of patents which is unjustifiable and indefensible—the proof of which the Oldfield Committee did not seem to be able to gather in sufficiently impressive quantity and quality—then perhaps the door which the Supreme Court left open in the *Paper Bag Patent case* may serve as an approach to the enactment of constitutional legislation affording the relief which the committee advocates "to promote the progress of science and useful arts". The rational basis of patent protection has been stated in no more crisp, comprehensive fashion than in the testimony of the most respected, former Commissioner of Patents, James T. Newton, before the Committees on Patents of the Senate and House of Representatives in 1919. Discussing the basis of patent protection, he stated:

"And the value of the patent is right there; it enables the manufacturer to get an industry started. That is the value to the public, too. After the industry is started and the public gets the benefit of the invention, then the patent is beginning to perform the function that the framers of the Constitution intended it should perform, in making work easier for the general public, in giving them something they never had before, and something that they wanted."[58]

[57] *Vicksburg* v. *Water Works Co.* (202 U. S. 453 (1906) pp. 470–1). For an interesting discussion of the meaning of the language "the exclusive right to use," see T. R. Powell, The Nature of a Patent Right in (1917) 17 Col. Law Rev. 663, at 678 ff. Professor Powell states (p. 683) "The objects of the patent statute were practical objects"—but is is difficult to determine from his discussion whether, if confronted now with an actual accumulation of proof convincingly establishing the suppression of patents, as against the public interest, he would regard a compulsory licensing legislation as constitutional. FOG AND FICTION IN TRADE-MARK PROTECTION *

PART I

By Frank I. Schechter

(REPRINTED FROM COLUMBIA LAW REVIEW, VOL. XXXVI, NO. I (JANUARY 1936))

"The silent pirates of the shore
Eat and sleep soft, and pocket more
Than any red robustious ranger
Who picks his farthings hot from danger."
[From Robert Louis Stevenson's Moral Emblems]

I. INTRODUCTION

The marquise, Isabella d'Este, a great lady of the Renaissance, on a visit to Rome, wrote to her secretary as follows: "We are so busy with these right reverend cardinals that we have no time to recite the major office; take 3 ducats to the reverend mother of San Paolo and ask her to say it for us, while we are away." [1]

The members of the committee on trade-mark legislation of the American Bar Association have recently done themselves a grave injustice; despite their eminence in the field of trade-mark law, and the many years they have spent in studying and endeavoring to remedy the defects in trade-mark legislation, the bewildered reader of their report for 1935 would—quite groundlessly—jump at the conclusion that, like the marquise, Isabella d'Este, and the "right reverend cardinals," they had been much too busy or weary "to recite the major office." In that report they state:

"Thirty years' experience with the present statutes has shown that, as a whole, they have worked surprisingly well. While certain language in them was originally obscure, it has been clarified by interpretation. We have come to the conclusion, therefore, that the ideally perfect had better give way to the practically attainable." [2]

By a peculiar coincidence, this report of the American Bar Association committee is signed by the very distinguished and profoundly learned chairman, who was, at the same time, chairman of that committee on trade marks of the Association of the Bar of the city of New York, which disapproved of proposed New York State trade-mark legislation because "the bill copies, and would perpetuate, various provisions of the Federal statute which have been found, after many years, to be objectionable, and which bar associations have been attempting to have amended." [3]

By another strange paradox, the same signatory of these two reports is the author of one of the most scathing and effective indictments of our present Federal trade-mark legislation ever written, entitled "The Expensive Futility of the United States Trade-Mark Statute." [4] In that article the author has graphically and amusingly described the dismay which he, in common with all other practitioners in this field, has encountered when he has endeavored to explain to a client just what real and concrete advantage is to be gathered from an investment of money and time in obtaining a Federal trade-mark registration. That this article was no exaggeration of a long-existent situation may also, perhaps, be gathered from the fact that over 10 years ago another distinguished attorney—the ex-president of the American Bar Association—in paying tribute

* This paper was prompted by two recent utterances emanating from very different sources.—(1) an important technical report concerning the prospect, technique, and constitutional basis of Federal trade-mark legislation, and (2) a hotly critical, although not altogether illuminating philosophic comment on the rationale and the ethical and social utility of trade-mark protection. In this pt. I, I am dealing only with the first phase; pt. II will be dealt with subsequently. I intend to incorporate certain portions of this paper in my History of Trade Morals and Control, now in the writing, of which have appeared my A Study in Comparative Trade Morals and Control in (1933) 19 Va. L. Rev. 794–845, and The Law and Morals of Primitive Trade in Radin and Kidd, Legal Essays in Tribute to Orrin Kip McMurray (1935) 546–622.

I am indebted to Mr. Leslie D. Taggart of the New York Bar for his assistance in the preparation of this manuscript.

Digitized by Google

before a congressional committee to the disinterested work of the author of that article and his associates "during the last 4 or 5 years," nevertheless referred to pending trade-mark legislation as "what I consider the great American con fidence game on the public." [5]

From the foregoing remarks it may be gleaned that not all practitioners or students of trade-mark law are convinced that the present trade-mark legislation—even with a few amendments—furnishes adequate machinery for the protection, under modern conditions, of the trade marks and good will that have become so vital and integral a part of present day commerce.[6] Although the dissatisfaction often appears to extend merely to administrative features of Federal trade-mark legislation, actually it goes to the roots of the system. For instance, in a recent case, due to the present classification methods used in the Patent Office, a Federal court was compelled to take up its time in arriving at the seemingly obvious holding [7] that the defendant's trade mark "Swavel" was confusingly similar [8] to the plaintiff's "Suavelle" and that "silk and suede and other rainproof clothing" had "the same descriptive properties" [9] as a "waterproof garment having a silklike finish," remarking caustically:

"It is apparent that if the Trade Mark Division of the Patent Office had any sort of proper cross-indexing system, the registration of two such similar trade

[5] See testimony of Mr. O. R. Barnett in Joint Hearings Before the Committee on Patents on S. 2697, 68th Cong., 2d sess. (1925) 78. The witness further stated (id. at 80):

"A patent does not exist, except as Congress creates it, through the Patent Office, but a trade mark does, and when the Patent Office has spent its time handling all these contested matters and arriving at its conclusions as to infringement or noninfringement, the property rights are precisely the same as before, and that money has all been spent on a moot case. Simply to determine, what? Not whether the party has any rights or not, but whether or not the Patent Office will make a public record of the fact that John Jones is using this mark. Is it to the public interest to have that mark registered, or is it to the public interest to keep that fact off the register?

"A great many of our clients get into these matters not appreciating that it does not adjudicate anything. They come to the end of an interference and then find John Jones still doing what the Commissioner said he had not any right to do, and they say 'Can't you stop him?' We reply, 'Yes; you can start a fresh suit for infringement.' They ask, 'Does not that adjudication mean anything?' And we have to reply, 'Not a thing.' That is what I say is the confidence game. The result is that this system of registration not only keeps them off the record, because the Patent Office refuses to record it but the wise merchant will not attempt to register, because of the expense and the possibility of being involved in these opposition, interference, and cancellation proceedings."

See also statement of the American Bar Association Committee in 1925: "This is essentially a professional matter * * * The commercial community is interested in the results, not in the means by which they are arrived at. The criticism of the present statutes is that they are obscure, the procedure under them is slow and expensive, and the results uncertain." Id. at 5; cf. id. at 91.

[6] I am here discussing trade-mark legislation and rights from the functional and legal standpoints, on the assumption that competition is still extant in this country, irrespective of questions of a social desirability of competition and of the economic utility of trade marks. These latter aspects will be considered in the second part of this article.

[7] *J. A. Livingston, Inc.*, v. *Pocono Rubber Co.*, 8 F. Supp. 249 (D. N. J. 1933), modified and affirmed, *Pocono Rubber Cloth Co.* v. *J. A. Livingston, Inc.*, 79 F. (2d) 446 (C. C. A. 3d, 1935). The action was for trade-mark infringement and unfair competition and it concerned two manufacturers of a certain silk and suede leather-like rainproof cloth. The plaintiff used and registered the trade mark "Suavelle" for the material as well as the finished products. About a year after the plaintiff had begun to use this word, the defendant adopted for the same material the trade mark "Swavel." The plaintiff had registered his "Suavelle" trade mark in class 39 for clothing ("garments of silk material and the like"). Defendant first applied for the registration of its "Swavel" mark under class 42 ("knitted, netted, and textile fabrics"), the class the plaintiff applied for before obtaining the registration in class 39 for clothing. Defendant later amended its application and obtained registration in class 50 ("for merchandise not otherwise classified"), 2 months after the registration of plaintiff's "Suavelle" trade mark. (The facts are pieced together from the decisions of the two courts.)

[8] Under sec. 5 (b) of the Trade Mark Act of 1905, it is provided that:

"* * * trade marks which are identical with a registered or known trade mark owned and in use by another and appropriated to merchandise of the same descriptive properties, or which so nearly resemble a registered or known trade mark owned and in use by another and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the mind of the public or to deceive purchasers shall not be registered * * *" 33 Stat. 725, 15 U. S. C. A., sec. 85 (1927).

See *J. A. Livingston, Inc.* v. *Pocono Rubber Co.*, 8 F. Supp. 249, 250 (D. N. J. 1933). The Circuit Court of Appeals, per Davis, C. J., said:

"The selection of the word 'Swavel' by the defendant following so closely upon the selection of the word 'Suavelle' by the plaintiff would hardly seem a mere coincidence. A fair interpretation of the evidence rather indicates that the word was chosen by design. It is absolutely impossible for the defendant to control the pronunication which the trade would give to the word. It is apparent that the word so nearly resembles in sound, appearance, and spelling the plaintiff's trade mark that it will necessarily cause confusion or mistake in the public mind and will deceive purchasers who will think they are buying merchandise produced by the plaintiff when as a fact they are purchasing defendant's merchandise."

See *Pocono Rubber Cloth Co.* v. *J. A. Livingston, Inc.*, 79 F. (2d) 446, 448 (C. C. A. 3d, 1935).

[9] Under sec. 2 of the act of May 4, 1906:

"* * * the Commissioner of Patents shall establish classes of merchandise for the purpose of trade-mark registration, and shall determine the particular descriptions of goods comprised in each class * * *," 34 Stat. 169 (1906), 15 U. S. C. A. sec. 131 (1926).

For the classification of merchandise for registration purposes see Rules of the Patent Office (revised July 1, 1933, nos. 19, 22 (b), also p. 43).

Digitized by Google

marks would not have been permitted * * * that is the first totally unnecessary instance of human fallibility." [10]

The Court of Customs and Patent Appeals, which reviews the decisions of the Commissioner of Patents, in ascertaining whether articles are of the "same descriptive qualities", does not regard the Patent Office classification of trade-marked articles as controlling on it. "In fact", states the court, "we have many times held to the contrary." [11] The point here is not, however, a criticism of existing administrative practice, which may be attributable to an erroneous theory of law and to the parsimony of Congress in the allotment of funds.

The question whether Patent Office classifications of articles for the purpose of the registration of trade marks are sound, hinges upon the much broader question as to the whole basis and rationale of the framing and administration of any trade-mark registration law.

A condition precedent to any intelligible discussion of these probelms is the proper appraisal of the functional concept of a trade mark today. Under modern conditions of national and international distribution of goods, a trade mark no longer, strictly speaking, designates "ownership or origin of goods", since, to the consuming public, actually that ownership or origin may remain anonymous. The trade mark is a valuable, even though anonymous, link between the owner of the mark and the consumer. It is not merely his commercial signature but is a creative "silent salesman" through which direct contact between the owner of the mark and the consumer is obtained and maintained.[12] Nothing is to be gained, in determining the nature of a trade mark and the basis of its protection

---

[10] See *J. A. Livingston* v. *Pocono Rubber Co.*, 8 F. Supp. 249 (D. N. J. 1933).

The present writer has personally observed a similar situation regarding Patent Office classifications. *A*, who had used the trade mark "Aquaduk" for bathing suits since Nov. 12, 1930, applied for the registration thereof in class 39 (clothing) on Nov. 24, 1930, and a certificate of registration thereon was issued on Mar. 24, 1931. On Nov. 24, 1933, another firm B commenced the use of the trade mark "Aquadul" for knitted and textile fabrics and filed an application for the registration of this mark in class 42 (knitted, netted, and textile fabrics) on Dec. 7, 1933. This "Aquadul" registration was granted to *B* by the patent Office on May 8, 1934, despite the protest of *A*, the owner of the "Aquaduk" mark, on the ground (given by the Patent Office) that no search for "Aquadul" has been made by the Patent Office in class 39 (clothing) and that, as to class 42, the search shows that "no trade mark like applicant's has been registered for use on the same kind of goods." The matter was afterward amicably adjusted between the "Aquaduk" and "Aquadul" registrants.

Nims on unfair competition and trade marks (3d ed. 1929), speaking of the phrase "goods of the same descriptive properties," appropriately states, at 579: "To the lawyer it is the synonym of confusion; to the layman it is meaningless. The attempts of the Patent Office and of the courts to find a rule of thumb by which to classify commodities in this respect has been a complete failure, at least from the layman's standpoint."

[11] *Harlan-Wallins Coal Corp.* v. *Transcontinental Oil Co.*, 64 F. (2d) 122 (C. C. P. A. 1933), per Graham, P. J. This decision has recently been cited by the Commissioner of Patents in *Fruit Industries Limited* v. *Continental Distilling Corporation*, 457 O. G. 3, Aug. 6, 1935, wherein there was much grave consideration of the question whether whiskey and wine are "goods of the same descriptive qualities within the meaning of the Trade-Mark Act.' F'razer, A. C., in holding that wine and whiskey "possess the same descriptive properties * * * and are sold in similar containers, through the same dealers, to the same people, for the same uses", noted that "the classification of articles in the Patent Office has never been deemed of controlling importance by the courts." See 457 O. G. at 4.

Cf. Mantle Lamp Co. of America v. *Aladdin Mfg. Co.*, 78 F. (2d) 426, 429 (C. C. A. 7th, 1935) cert. denied, 56 Sup. Ct. 173 (1935) per Fitzhenry, C. J.: "The trial court apparently placed weight upon the fact that the trade marks registered by the defendant (appellant here) in the United States Patent Office were under class 34 'covering heating, lighting and ventilating apparatus, not including electrical apparatus.' The court said:

"The foregoing would indicate that defendant's trade marks did cover portable electric lamps, and that when the plaintiff began using the word 'Aladdin' on electric lamps it invaded no field that had previously been occupied by the defendant.

"With the conclusion which the trial court draws from the facts, we cannot agree. Persons desiring to register trade marks are required to use the wording of the Patent Office classification under which registration is desired. As appellant has so well argued in its briefs, any presumption that might have arisen from the words of the Patent Office classification as being a limitation upon the scope of the trade mark, has been overcome by the action of the Patent Office in determining between these parties that the rights of the appellant in its trade mark registration do extend beyond the words of the Patent Office classification and do include electric portable lamps. The Patent Office has decided, in litigation between the parties to this suit, that kerosene mantle lamps and electric lamps are goods possessing the same descriptive properties and while that decision is not controlling upon us here, it is entitled to great weight."

[12] See Crane, C. J., dissenting in *Gotham Music Service Co., Inc.* v. *Denton and Haskins Music Pub. Co.*, 259 N. Y. 86, 91, 181 N. E. 57, 59 (1932):

"When one buys Uneeda biscuits or Cremo cigars or talcum powder, no one has in mind the manufacturer; this legal phraseology is a mere fiction. The producer may change its corporate existence innumerable times and the public does not know or care. What they do know is that an ordinary bit of merchandise has, through advertising, become very popular, and they want the merchandise with that name. It is the name that counts and has been made a valuable asset. So with this old song which nobody wanted; a revised edition was given a new name; the name, through advertising, became popular, created the demand, and the sale of the song under this new name brought in much profit to the plaintiffs, until the defendant diverted it by making unfair use of the name."

Digitized by Google

by describing the trade mark as "property." [13] The real heart of the matter seems to be that a trade mark, both as a symbol and as a creative agency of its owner's goodwill, depends for its value upon its hold upon the public mind; this value may be diminished or even destroyed either by a diversion of trade from the owner of the mark (where it is used by another upon competing goods) or even in the case of its use upon noncompeting goods, and especially when the mark is coined or fanciful, by the gradual dilution or whittling away of its uniqueness—and hence of its selling power.[14]

The problem at hand resolves itself into two phases: i. e., (1) What sort of trade-mark registration act should we have? (2) Under our constitutional system, how far can Congress go in enacting such legislation? [15] In endeavoring to answer these questions, it is preferable that we deal with them in reverse order since, no matter how desirable any system of Federal trade-mark protection may be, it is unavailing if constitutional limits forbid.

---

[13] The writer pointed this out a decade ago in the Historical Foundations of Trade Mark Law (Columbia University Legal Studies, vol. I, 1935) at 156 et seq. "Delusive exactness," wrote Holmes, J., "is a source of fallacy throughout the law." See *Truax* v. *Corrigan*, 257 U. S. 312, 342 (1921). For the constant shifts and shadings of judicial opinion on the reason for trade mark protection, particularly with reference to the property concept, see the decisions of the Supreme Court (mainly per Holmes, J.) cited in Schechter, op. cit. supra. at 153–155; see also *Chattanooga Foundry* v. *Atlanta*, 203 U. S. 390, 399 (1906); *Hamilton-Browne Shoe Co.* v. *Wolf Bros. & Co.*, 240 U. S. 251, 259 (1916); *Du Pont de Nemours Powder Co.* v. *Masland*, 244 U. S. 100, 102 (1917). *Cf.* Holmes, J. in *Beechnut Co.* v. *Lorillard Co.*, 273 U. S. 629, 632 (1927): "A trade mark is not only a symbol of an existing good will, although it commonly is though of only as that. Primarily it is a distinguishable token devised or picked out with the intent to appropriate it to a particular class of goods and with the hope that it will come to symbolize goodwill. Apart from nice and exceptional cases, and within the limits of our jurisdiction, a trade mark and a business may start together, and in a qualified sense the mark is property, protected and alienable, although as with other property its outline is shown only by the law of torts, of which the right is a prophetic summary. Therefore the fact that the goodwill once associated with it has vanished does not end at once the preferential right of the proprietor to try it again upon goods of the same class with improvements that renew the proprietor's hopes."

[14] This point of view was first expressed, as far as I know, in this country by the present writer [The Rational Basis of Trade Mark Protection (1927) 40 Harv. L. Rev. 813, 831–832] and was fortified by a decision of a German court—the Landesgericht at Elberfeld—in the *Odol case* (involving the same trade mark on mouth-wash and steel railroad ties). It was later incorporated into the law of New York State. See *Tiffany & Co.* v. *Tiffany Products, Inc.*, 147 Misc. 679, 682–683, 264 N. Y. Supp. 459, 462 (Sup. Ct. 1932), affirmed, 237 App. Div. 801, 260 N. Y. Supp. 821 (1st Dept. 1932), affirmed, 262 N. Y. 482, 188 N. E. 30 (1933). In that case the owners of the famous "Tiffany" trade mark on jewelry were held entitled to restrain the use of "Tiffany" in connection with the motion picture industry. Cf. the suggestive paper on Pre-emption in Connection with Unfair Trade by Prof. G. Glenn in (1919) 19 Columbia Law Rev. 29, written when the doctrine of the protection of similar marks from misuse on dissimilar goods was still in its infancy.

The parallel functional development in Great Britain is most significantly summarized in the recent (1934) Report of the Board of Trade Departmental Committee on the Law * * * Relating to Trade Marks, Cmd. 4568, at 80. No. 286:

"We think that the evidence shows clearly the need for some protection for an advertised trade mark which as a result of such advertisement has been adopted by the public as a descriptive name of the article to an extent beyond the power of the trade mark proprietor to control. This tendency on the part of the public is no doubt due largely to the fundamental changes that have taken place in recent years in the function and use of trade marks. Under modern conditions it is customary to build up the business around the trade mark by advertisement, and it is beyond the control of the trader to prevent the public from identifying and ordering the goods by reference to the mark and from using the mark as the name of the article. *The common law rule appears therefore to be based upon obsolete conditions, and to be a source of embarrassment to traders, and we suggest that provision should be made by legislation for overcoming these difficulties by reversing the existing rule, but subject to the conditions which we specify.* We do not believe that such an alteration in the law will operate to confer on the proprietor of the mark any monopoly in the sale of the goods to which he has applied it. It may give him an initial advantage over his competitors, but not more, we think, than is due to him in respect of his being first in the field and of his expenditure in research, development, and advertising." (Italics inserted.)

The committee also states (*id.*, at 22, no. 77):

"We accordingly recommend that provision be made that where a registered trade mark consisting of an invented word or invented words has become identified with the proprietor to such an extent that the use of the mark by others *on goods other than those for which the mark is registered, and whether or not of the same description as such goods, would create the impression that there was a connection between the goods in question and the proprietor of the mark*, such mark should be registrable as a defensive trade mark for all or any of such other goods, and no application for such further registration be removed from the Register merely on the ground that the proprietor had no intention to use the mark and did not use or had not in fact used the mark in respect of any such other goods * * *" (Italics inserted.)

The views expressed above have been fairly roughly handled from the general standpoint of ethics and social utility by Felix S. Cohen, Transcendental Nonsense and the Functional Approach (1935) (35 Columbia Law Rev. 809, 814–817). To this article I shall have occasion to recur later in pt. II of this paper, but in the meantime as to the groundlessness of the fear that the innovation of so broad a doctrine as suggested above may be antisocial as creating monopolies, I would refer merely to E. S. Rogers, Good Will, Trade Marks, and Unfair Trading (Reprint, Chicago, 1919) at 99–100; see also the colloquy between witnesses and the House Committee on Patents on H. R., 72d Cong., 1st Sess. (1932) 38 ff.; 11 ff.: Schechter, op. cit. supra note 13, 158 ff.: Schechter, supra, 40 Harv. L. Rev., at 833; *Barton* v. *Rex-Oil Co.*, 2 F. (2d) 402, 404 (C. C. A. 3d, 1924); *Crystal Corp.* v. *The Manhattan Chemical Mfg. Co., Inc.*, 75 F.(2d) 506 (C. C. P. A., 1935); *Yellow Cab Corp.* v. *Korpeck*, 120 Misc. 499, 500–501, 198 N. Y. Supp. 864, 865–866 (Sup. Ct. 1923); *American Chain Co., Inc.* v. *Car Chain Works, Inc.*, 141 Misc. 303, 308, 252 N. Y. Supp. 860, 867 (Sup. Ct. 1931).

[15] The author has previously written on these problems in (1) Historical Foundations of Trade Mark Law (Columbia University Legal Studies, vol. I, 1925); (2) The Rational Basis of Trade Mark Protection (1927) 40 Harv. L. Rev. 813 and (3) Hearings Before Committee on Patents, H. R., 72d Cong., 1st Sess. (1932) subsequently reflected in his revision, at the request of the Committee on Patents, of the Trade Mark Act introduced by Representative Perkins on April 25, 1932, as H. R. 11592 at the first session of the 72d Congress.

II. Congressional Power with Regard to Trade Mark Protection

A. The Historical and Economic Background

It is most unfortunate that in evaluating the efficacy of any Federal trade-mark legislation, as well as in interpreting the present Federal trade-mark registration acts, so much stress has been laid upon the notion that because trade marks, as distinguished from patents and copyrights, were not specifically included in the constitutional enumeration of the powers of Congress, any Federal legislation concerning trade marks must be purely "procedural", [16] affording "merely a convenient privilege, * * * prima-facie protection", [17] and may not be "substantive." [18] This misconception is attributable to three distinct factors.

(1) It is occasionally forgotten that "Federal control over trade marks does not rest upon the patent and copyright provision * * * in the Constitution * * * but that power is found in the commerce clause." [19] (2) The classical *Trade Mark Cases* [20] are cited [21] as authority for the proposition that Congress has no power to enact "substantive" legislation on the subject of trade marks. But in those cases, the Supreme Court merely held that the statute there under consideration was not "on the face of the law, or from its essential nature" limited to interstate commerce, and was accordingly unconstitutional, since it might also affect intrastate commerce, of which the Court found "there still remains a very large amount, perhaps the largest." [22] There is no indication in the *Trade Mark Cases* that Congress might not properly enact a "substantive" law of trade marks in interstate commerce. [23] (3) In considering

[16] E. g., see Mr. Chief Justice Hughes in *American Trading Co.* v. *Heacock Co.*, 285 U. S. 247 (1932) "While the Congress, by virtue of the commerce clause, has no power to legislate upon the substantive law of trade marks * * *" (at 256) and "* * * the Federal statute did not attempt to create exclusive substantive rights in marks, or to afford a refuge for piracy through registration under the act, but to provide appropriate procedure and to give the described protection and remedies where property rights existed. The acquisition of such property rights in trade marks rested upon the laws of the several States (*United Drug Co.* v. *Rectanus Co.*, 248 U. S. 90, 98; *American Steel Foundries* v. *Robertson*, 269 U. S. 372, 381; *United States Printing & Lithograph Co.* v. *Griggs, Cooper & Co.*, 279 U. S. 156, 158)" (at 258.)

In *Beckwith* v. *Commissioner of Patents*, 252 U. S. 538, 543 (1920) it was said: "The Registration Act * * * *without changing the substantive law of trade marks*, provided, in the manner prescribed, for the registration of marks (subject to special exceptions) which, without the statute, would be entitled to legal and equitable protection * * *" (Italics added.) See also *May* v. *Goodyear Tire & Rubber Co.*, 10 F. Supp. 249, 256 (D. Mass. 1935), and E. S. Rogers, Hearings, supra note 15, at 36: "As far back as the trade mark cases in 100 U. S. ,and more recently in the *American Steel Foundries* v. *Robertson*, the Supreme Court has held that Congress has been given no authority under the Constitution to legislate on the substantive law of trade marks, and the result is that any trade-mark statute as long as that rule of law prevails in this country, must be procedural. It must be, as lawyers say, a practice act, and hardly anything else."

[17] See *Société Vinicole de Champagne* v. *The Mumm Champagne & Importation Co. Inc.*, 10 F. Supp. 289, 294 (S. D. N. Y. 1935).

[18] See supra note 16; also the dictum in *American Foundries* v. *Robertson*, 269 U. S. 372, 381 (1926) that Congress "has been given no power to legislate upon the substative law of trade marks."

[19] See *Ironite Co.* v. *Guarantee Waterproofing Co.*, 64 F. (2d) 608, at 610–611 (C. C. A. 8th, 1933); cf. *United Drug Co.* v. *Rectanus Co.*, 248 U. S. 90, 98 (1918); "The power of Congress to legislate on the subject [trade marks] being only such as arises from the authority to regulate commerce with foreign nations and among the several States and with the Indian tribes."

[20] 100 U. S. 82 (1879).

[21] E. g., *American Trading Co.* v. *Heacock Co.*, 285 U. S. 247, 256, note 2. (1932).

[22] See 100 U. S. 82, 96 (1879).

[23] On the question whether or not the regulation of trade marks comes within the commerce clause, the court specifically stated 100 (U. S. 82, 95 (1879)):

"The argument is that the use of a trade mark—that which alone gives it any value—is to identify a particular class or quality of goods as the manufacture, produce, or property of the person who puts them in the general market for sale; that the sale of the article so distinguished is commerce; that the trade mark is, therefore, a useful and valuable aid or instrument of commerce, and its regulation by virtue of the clause belongs to Congress, and that the act in question is a lawful exercise of this power.

"Every species of property which is the subject of commerce, or which is used or even essential in commerce, is not brought by this clause within the control of Congress * * *.

"The question, therefore, whether the trade mark bears such a relation to commerce in general terms as to bring it within congressional control, when used or applied to the classes of commerce which fall within that control, is one which, in the present case, we propose to leave undecided."

It appears to have been overlooked that in the case of *South Carolina* v. *Seymour*, 153 U. S. 353 (1894), decided only 15 years after the *Trade Mark Cases*, the Supreme Court explained that in those cases it had held the earlier legislation of Congress for the registration and protection of trade marks to be unconstitutional "because not limited to trade marks used in commerce with foreign nations, or among the several States, or with the Indian tribes" (at 353–354). See also *U. S. Printing Co.* v. *Griggs & Co.*, 279 U. S. 156, 158 (1929). It is true that immediately following the decision in the *Trade Mark Cases* there was agitation in Congress for an amendment to the Constitution, specifically giving Congress the power to grant and protect trade marks, but the joint resolution proposing such an amendment was rejected as entirely unnecessary if a proper statute on the subject were submitted to Congress. The House Committee on Manufactures reported that:

"*Trade marks are now universally regarded as necessary to business. They have grown into use with the growth of civilization and progressive trade.* All manufactures, all kinds of business adopt and use them. They are the ensigns of honor and popularity under which businessmen ship their goods from State to State and nation to nation. And now our commerce challenges the competition of the most prosperous countries. We are fast becoming the merchants; and our ingenious, industrious, and enterprising people, above all others, need this commercial proprietary protection.

"As to the second question, your *committee regard this as peculiarly the subject of national legislative control.*

"Nothing could be more detrimental to the interests of manufacture, trade, and commerce than the unharmonious local and conflicting legislation which would necessarily arise if this subject should be left

Digitized by Google

from both a functional and a legal standpoint whether or not Congress may now constitutionally enact so-called substantive trade-mark legislation, it should be remembered that under contemporaneous conditions distribution, and consequently trade-mark use, is essentially national or interstate and no longer intrastate. While in 1879, when the Supreme Court declared the Registration Act of 1870 unconstitutional, only 7,785 trade marks had been registered during the intervening 9 years,[24] by 1934, according to official estimate, "over 300,000 trade marks are registered in the United States Patent Office, and it has been estimated that only one out of five in actual use is registered."[25] National distribution is the goal of every large and of every small manufacturer.[26]

B. THE DESIRABILITY AND CONSTITUTIONALITY OF SUBSTANTIVE TRADE-MARK LEGISLATION

To the reader of the previous pages it may, prehaps, appear that the distinction between "procedural" and "substantive" trade-mark legislation has been unnecessarily stressed, but this distinction has been repeatedly drawn by the Supreme Court.[27] It is true that despite the Court's emphasis on the theory that "Congress has been given no power to legislate upon the substantive law of trade marks," it has itself impliedly, at least, sanctioned congressional substantive legislation, at any rate in its adjudications upon the so-called "10-year clause" of the Trade-Mark Act.[28] However, the line of demarcation between substantive

---

to the States. The interest and safety of all demand that it, along with the power of making war, peace, and treaties, of taxation, regulating commerce and coining money, of granting patents and copyrights, should be vested in the general Government." (Italics inserted.) See Report of the Commissioners, loc. cit. infra note 24.

[24] Considerable anxiety was expressed not only concerning the protection of these marks but as to the breach of treaty obligations which foreign countries might regard as arising from these decisions, and a further perplexing problem was whether or not the United States was not honor bound to refund to the registrants under the unconstitutional statute the sum of $211,750, which had been paid in registration fees. See Report of the Commissioners Appointed to Revise the Statutes Relating to Patents, Trade, and Other Marks * * * Under Act of Congress Approved June 4, 1898 (Washington, 1902) 392-393, 419 ff.

[25] See *Ashland Refining Company* v. *United Collieries, Incorporated*, 442 O. G. 257, 259 (Com Dec. 1934). In 1932 the Commissioner of Patents testified that, for the 5-year period ending in 1931, the Patent Office received annually an average of "about 18,000 applications." (Hearings, supra note 15, at 23.)

[26] Some of the statistics gathered from the decisions are amazing: for instance, between the years 1918 and 1934 the annual sales of a certain brand of baking powder "have averaged 21,000,000 cans" and, in the past 10 years, the same manufacturer has under its brand, "sold approximately 34,000,000 cans of * * * chocolate malted drink." *R. B. Davis Co.* v. *Julius J. Davis*, 11 F. Supp. 269 (E. D. N. Y. 1935), decree modified, 75 F. (2d), 499 (C. C. A. 2d, 1935). A manufacturer of wallboard, trade mark "Celotex", from 1922 to 1929 increased its production "from 18,000,000 square feet * * * to approximately 500,000,000 square feet per year; * * * its products are marketed in the United States through approximately 7,000 retail lumber dealers * * * ; its sales increased from $1,241,826.18 for the year 1923, to $10,311,569 for the year 1928 * * *; from the year 1923 to the year 1928 inclusive, [it] * * * had expended $3,579,059 in advertising its products and trade mark. * * *" *Celotex Co.* v. *Chicago Panelstone Co.*, 49 F. (2d) 1051 (C. C. P, A. 1931). A manufacturer of cereal breakfast food has, by advertising his trade mark and product over the radio and in magazines, caused its sales to rise "from 2,000,000 packages in 1925 to 31,000,000 packages in 1932," *Yeasties Products, Inc.* v. *General Mills*, 77 F. (2d) 523 (C. C. P. A. 1935). A more astonishing chronicle of expansion is found in the case of Dyanshine, a leather polish peddled during the first great World War at Camp MacArthur, Waco, Tex. In 1934 the court found that: "* * * there was no record of sales in 1918 and the early part of 1919, but beginning in 1919, the firm sold 1,198,600 bottles; in 1920, 3,371,320 bottles; in 1921, 3,964,784 bottles and in 1922 (to Oct. 1) 3,485,000 bottles. The largest sales were in the South but the business extended as far east as Boston, as far north as Pittsburgh and Chicago, as far west as Omaha, and the product, under the trade name of 'Dyanshine', later registered as a trade mark, is now handled through 2,374 jobbers supplying 186,722 retail dealers and serving a trade which, of course, is larger than the number of bottles sold." *Barton* v. *Rex-Oil Co.*, 2 F. (2d) 402, 405 (C. C. A. 3d, 1924). See also E. S. Rogers testimony, Joint Hearings, supra note 5, at 62.

The contrast between the essentially interstate nature of commerce today and the larger intrastate commerce which the Supreme Court found to exist in the trade-mark cases is of vital significance in the presentation of an argument in favor of the constitutionality of substantive trade-mark legislation by Congress and bears out the statement in the American Bar Association's Report above referred to that "trade marks which are not used in interstate commerce, and are therefore not subject to Federal registration, are relatively few * * *." (1935) Report, at 15. It may, perhaps, not be an exaggeration to state that intrastate commerce has, to a large extent, evolved from an industrial institution to a legal device for the purpose of avoiding Federal control in matters of wages, hours, child labor, etc., e. g., *Hammer* v. *Dagenhart*, 247 U. S. 251 (1918); *Heisler* v. *Thomas Colliery Co.*, 260 U. S. 245 (1922); *Utah Power & Light Co.* v. *Pfost*, 286 U. S. 165 (1932); *Schechter Corporation* v. *United States*, 295 U. S. 495 (1935); *United States* v. *Weirton Steel Co.*, 7 F. Supp. 255 (D. Del. 1934), 10 F. Supp. 55 (D. Del. 1935).

[27] See supra notes 16 and 18.

[28] For the 10-year clause see sec. 5b of the Trade-Mark Act of Feb. 20, 1905, as amended by the acts of Jan. 8, 1913, and Mar. 19, 1920, 33 Stat. 726 (1905), 15 U. S. C. A. sec. 85 (1927). Nowhere is the confusion between "procedural" and "substantive" law relating to trade marks so well illustrated as in the judicial construction of this clause. From a reading of the decisions, there can be little doubt, however, that despite much legalistic tight-rope walking on the subject, when Congress enacted the 10-year clause, "it granted a substantive right in a trade mark." See testimony of Mr. A. C. Paul, an eminent authority on trade-mark law, in Hearings. * * * Before the Committee on Patents on H. R. 2828, 71st Cong., 2d sess. (1930) 74-5: "It seems to have been assumed by those opposing this bill that Congress does not have authority to protect a mark used in interstate and foreign commerce that is not a trade mark at common law and which the registrant did not own before he applied for registration. That is not true. I haven't the slightest doubt but that Congress, under this clause of the Constitution, has authority to protect any mark not a trade mark at common law that is used in interstate and foreign commerce. In one instance this is done by the

Digitized by Google

and procedural law generally is still sharply drawn,[29] particularly with regard to the distinction between prima facie and irrebuttable or conclusive presumptions.[30] Since thus far that Court has admittedly not squarely and definitely set its seal of approval upon substantive trade-mark legislation,[31] I believe that the whole fabric of trade-mark law rests upon a shaky and insubstantial basis which, in fairness to all those engaged in the production, distribution and consumption of trade-marked goods, cannot be satisfactorily propped up by any device such as making the presumption of validity and ownership of a trade mark "conclusive" by claiming that this presumption "merely prescribes a rule of evidence" and is, therefore, constitutional.[32] We have already discussed the commercial chaos

---

act of 1905. * * * When Congress adopted that provision it did more than to authorize the registration of a common-law mark. It granted a substantive right in a mark that was not, under the common law, a valid trade mark. * * *

"In other words, here is a mark that is not a common-law trade mark, but by reason of this act of 1905 and its registration under that act it becomes a valid trade mark. And all because Congress has said it is a valid trade mark; and Congress can say, with proper limitations perhaps, that any mark that is used in interstate and foreign commerce, registered in accordance with provisions of a statute it passes, even though it never was a common-law trade mark, is a valid trade mark. There is no limitation on the authority of Congress to make valid trade marks that are used in interstate and foreign commerce."

And in *Planten* v. *Gedney*, 224 Fed. 382 (C. C. A. 2d, 1915), Judge Lacombe held squarely: "If the applicant satisfied the Patent Office that the conditions required in sec. 5 existed—10 years' exclusive use—he should get his registration, even though the mark were descriptive; and registration made his trade mark a valid one, although at common law its descriptiveness might make it invalid" (at 385).

In *Thaddeus Davids Co.* v. *Davids Manufacturing Co.*, 233 U. S. 461 (1913), Chief Justice Hughes (then an Associate Justice) said [at 466]: "Congress evidently had in mind the fact that marks, although not susceptible of exclusive appropriation at common law, frequently acquired a special significance in connection with particular commodities; and the language of the fourth proviso was carefully chosen in order to bring within the statute those marks which, while not being technical trade marks, had been in 'actual and exclusive use' as trade marks for 10 years next preceding the passage of the act." See also *Merriam Co.* v. *Syndicate Publishing Co.*, 237 U. S. 618, 622, (1915); cf. *Scandinavia Belting Co.* v. *Asbestos and Rubber Works*, 257 Fed. 937, 957 (C. C. A. 2d, 1919), cert. denied, 250 U. S. 644 (1919); *Hercules Powder Co.* v. *Newton*, 266 Fed. 169, 171 (C. C. A. 2d, 1920); *Chas. Broadway Rouss, Inc.* v. *Winchester*, 300 Fed. 706, 713 (C. C. A. 2d, 1924), cert. denied, 266 U. S. 607 (1924); *In re Plymouth Motor Corp.*, 46 F. (2d) 211, 212 (C. C. P. A. 1931); *In re California Perfume Co.*, 56 F. (2d) 885 (C. C. P. A. 1932); *Barber-Colman Co.* v. *Overhead Door*, 65 F. (2d) 147 (C. C. P. A. 1933); *Campana Corporation* v. *Glanzberg*, 10 F. Supp. 876 (E. D. Pa. 1935); *Ex parte Canada Dry Ginger Ale, Inc.*, 159 M. D. 437 (Com. Dec., 1935); 25 T. M. Rep. 574. See also Report of the New York Patent Law Association in Joint Hearings, supra note 5, at 97: "Our principal concern has been that the power of Congress should not be exercised to create trade-mark rights in words or marks that are not true trade marks, and the use of which should not be withdrawn from the public domain. It is necessary to recognize that Congress has the power to create trade-mark rights if limited to interstate or foreign commerce."

[29] For interesting recent illustrations see (1) as to the right of set-off, *Heiden* v. *Beutler*, 11 F. Supp. 290, 291 (N. D. Iowa 1935): "The right of set-off was originally an equitable right, but has been adopted by most of the States as statutory, giving a right at law; but, after all, it is an equitable right. The equitable rules of set-off are derived from the civil law and are founded upon principles of natural equity and justice. By the exercise of its equitable jurisdiction, the court is enabled to do justice between the parties. While the doctrine was originally a mere procedural convenience, it has now become 'really a requirement of substantive justice.' *First Nat. Bank, etc., et al.* v. *Malone*, 76 F. (2d) 251, 254, decided by the United States Circuit Court of Appeals, 8th Circuit, on March 9, 1935." (2) As to the Statute of Limitations, see *People* v. *Hagan*, 138 Misc. 771, 775, 247 N. Y. Supp. 374, 379 (Sp. Sess. 1931) aff'd, 235 App. Div. 784, 257 N. Y. Supp. 887 (1st Dept. 1932): "It is a general rule that statutes of limitation do not create vested or substantive rights; they deal merely with a remedy (*House* v. *Carr*, 185 N. Y. 453) and are available only as a defense. (*Kelly Asphalt B. Co.* v. *Brooklyn A. A. Co.*, 190 App. Div. 750, 757, 758.)" See also *Hopkins* v. *Trust Co.*, 115 Misc. 257, 258, 187 N. Y. Supp. 883, 884 (Sup. Ct., 1921) aff'd on other grounds, 233 N. Y. 213, 135 N. E. (1922): "Statutes of limitation are remedial only: they in no manner partake of the nature of substantive law; they regulate only the methods whereby such law is applied to the affairs of men. *Hulbert* v. *Clark*, 128 N. Y. 295; *House* v. *Carr*, 185 id. 453–458."

[30] See 5 Wigmore, Evidence (2d ed. 1923) sec. 2492; 2 Chamberlayne, Modern Law of Evidence (1911) secs. 1086 ff., 1160 ff.; cf. 9 Holdsworth, History of English Law (1926) 129 ff., 139 ff. For the decisions of the Supreme Court on this point, see infra note 32.

[31] See *U. S. Printing Co.* v. *Griggs & Co.*, 279 U. S. 156, 158 (1929); 2 Willoughby, The Constitutional Law of the United States (2d ed. 1929) 428; cf. *Ironite Co.* v. *Guarantee Waterproof Co.*, 64 F. (2d) 608 (C. C. A. 8th, 1923).

[32] The recommendation of the American Bar Association Committee on Trade-Mark Legislation is that sec. 16 of the Trade-Mark Act of 1905 [33 Stat. 728 (1905), 15 U. S. C. A. sec. 96 (1926)], which now provides that "registration of a trade mark under the provisions of this act shall be prima facie evidence of ownership" shall be amended so that "after 5 years from the date of registration the presumption of validity and ownership shall be conclusive, excepting only where the mark is calculated to deceive, in which cases there shall be no presumption of validity." The majority of the Committee "do not believe this can be attacked as unconstitutional because it merely prescribes a rule of evidence" (1935 Report, supra note 2, at 12).

This conclusive presumption of validity after 5 years from the date of registration is similar to that provided for in sec. 41 of the British Trade-Marks Act of 1905 (5 Edw. VII, c. 15), except that the period of prima facie ownership is 7 years. It was 5 years under the British Act of 1883, 46 & 47 Vict. c. 57; see Kerly, Trade Marks (6th ed. 1927) 384, 385, 706. Recently there has been considerable reaction of feeling there in favor of a return to a 5-year "prima facie" period [see Board of Trade, Minutes of Evidence * * * before the Departmental Committee on * * * Law * * * Relating to Trade Marks (London, 1934), Questions nos. 1585 ff.]. However the committee of the Board of Trade itself disapproved of this proposed reduction. [Report of * * * Departmental Committee, Cmd. 4568 (April 1934) 52, 53.] It should be remembered that in Great Britain, no constitutional problem arises as to this conclusive presumption of ownership. In the United States, however, while the Supreme Court has not yet squarely decided "whether * * * so-called irrebuttable presumptions are, in a more accurate sense, rules of substantive law" [*United States* v. *Provident Trust Co.*, 291 U. S. 272, 283 (1934)], and has found it "hard to see how a statutory rebuttable presumption is turned from a rule of evidence into a rule of substantive law as a result of a later statute making it conclusive" [*Heiner* v. *Donnan*, 285 U. S. 312, 328 (1932)], at the same time, in the latter decision it stated, "However, whether the latter presumption be treated as a rule of evidence

Digitized by Google

that resulted from the decision of the Supreme Court in the *Trade Mark cases* over half a century ago;[33] within the last 2 years all sections of industrial America have learned what complications may develop from adjudications of unconstitutionality under the commerce clause.[34]

Assuming, therefore, the importance of squarely meeting at this time the question of the constitutionality of Federal trade-mark legislation, and assuming, furthermore, the desirability of improving such legislation in many respects, may Congress, under the commerce clause, constitutionally enact substantive trade-mark legislation? Or, as the Supreme Court phrased it—and left it unanswered—over half a century ago, the question is "whether the trade mark bears such a relation to commerce in general terms as to bring it within the Congressional control, when used or applied to the classes of commerce which fall within that control * * *" [35] There seems to have been little doubt on this point when the Constitution was framed. As early as 1791 Thomas Jefferson, when the petition of a sale-cloth maker of Massachusetts for the registration of his mark was referred to him as Secretary of State, reported to the House of Representatives as follows:

"That it would, in his opinion, contribute to fidelity in the execution of manufactures, to secure to every manufactory, an exclusive right to some mark on its wares, proper to itself.

"That this should be done by general laws, extending equal right to every case to which the authority of the legislature should be competent.

"That these cases are of divided jurisdiction: Manufactures made and consumed within a State being subject to State legislation, while those which are exported to foreign nations, or to another State, or into the Indian Territory, are alone with the legislation of the general Government.

"That it will, therefore, be reasonable for the general Government to provide in this behalf by law for those cases of manufacture generally, and those only which relate to commerce with foreign nations, and among the several States, and with the Indian tribes." [36]

---

or of substantive law, it constitutes an attempt, by legislative fiat, to enact into existence a fact which here does not, and cannot be made to, exist in actuality, and the result is the same, unless we are ready to overrule the *Schlesinger case*, as we are not; for that case dealt with a conclusive presumption and the court held it invalid without regard to the question of its technical characterization. This court has held more than once that a statute creating a presumption which operates to deny a fair opportunity to rebut it violates the due process clause of the Fourteenth Amendment. For example, *Bailey* v. *Alabama*, 219 U. S. 219, 238 et seq. (1911); *Manley* v. *Georgia*, 279 U. S. 1, 5–6 (1928). 'It is apparent,' this court said in the *Bailey case* (p. 239), 'that a constitutional prohibition cannot be transgressed indirectly by the creation of a statutory presumption any more than it can be violated by direct enactment. The power to create presumptions is not a means of escape from constitutional restrictions.'" (Id., at 328–9.) Cf. *Morrison* v. *California*, 291 U. S. 82, 90 (1934) *Heiering* v. *City Bank Farmers Trust Co.*, 295 U. S. 123 (1935) (granting cert.) and the dissenting opinions of Holmes, J., in *Keller* v. *United States*, 213 U. S. 138, 149–150 (1909) and *Bailey* v. *Alabama*, 219 U. S. 219, 248 (1911) clearly regarding the creation of an "irrebuttable or" "conclusive" presumption as a change in substantive law.

[33] See supra note 24.

[34] E. g., *Schechter Corp.* v. *United States*, 295 U. S. 495 (1935) (involving the whole N. I. R. A. structure); *Panama Refining Co.* v. *Ryan*, 293 U. S. 388 (1935) (involving the control of the petroleum industry); *Railroad Retirement Board* v. *Alton Railroad Co.*, 295 U. S. 330 (1935) (holding unconstitutional the Railway Pension Act.) As to the chaotic situation resulting from the attack on the constitutionality of the processing taxes under the A. A. A., see the argument of the Solicitor-General (reported in the N. Y. Times, Oct. 24, 1935, at 2) before the Supreme Court in support of a motion to hasten the latter's hearing the case of the *United States* v. *Hoosac Mills;* the petition for certiorari in that case was granted by the Supreme Court, October 14, 1935 (353 C. C. H. paragraph 9000, p. 9018).

In the light of the foregoing decisions, rash indeed appears the professorial prophesy published in January 1935: "That the Supreme Court of the United States will uphold all the recovery legislation and most of the official action thereunder is the conclusion reached by those commentators whose writings reveal what I consider to be the view generally accepted by informed persons as to the relative importance, in the decision of constitutional cases, of the written Constitution, the doctrines of constitutional law, and the statesmanship of the judges." (D. B. Maggs, The Constitution and Recovery Legislation in Radin and Kidd, Legal Essays in Tribute to Orrin Kip McMurray (1935) 399. Compare H. L. McBain, To the Supreme Court: Vital New Deal Issues, in the N. Y. Times. Nov. 17, 1935, Magazine section, at 4, 5.

[35] See *Trade Mark Cases*, 100 U. S. 82, 95 (1879).

[36] See Report of the Commissioners Appointed to Revise the Statutes Relating to * * * Trade-Marks, etc., Sen. Doc. No. 20, 56th Cong., 2d Sess. (1902) 58. *Cf.* Letter from a Philadelphia manufacturer printed in the Columbian Sentinel of Boston, on December 24, 1791 [reprinted in Schechter, Historical Foundations of Trade-Mark Law, op. cit. supra, note 13, at 132, 133]:

"It is with real pleasure and satisfaction that I behold the application of the proprietors of the sail cloth manufactory in the town of Boston to the Congress of the United States, for an act to secure them against the losses they are likely to sustain by persons counterfeiting their marks on sail cloth of an inferior quality. * * *

"There is no greater check to this laudable spirit of enterprise, industry, and home manufacture, than that of imposters fraudulently counterfeiting of marks, and imposing and selling bad and spurious articles for good, real and genuine. It effectually cools the ambition of excelling and becoming serviceable to one's country, and is highly prejudicial to the good repute of our manufacturers instead of to increase our commerce. * * *

"A general act of Congress obviating these difficulties, and providing for the prevention of offenses of this kind, and for the due punishment of the perpetrators of such infamy and baseness, experience daily convinces me would be of universal utility, and is a very desirable thing in this country."

Digitized by Google

Jefferson's testimony, incidentally, is significant here not merely because he was Jefferson [37] but because by reason of his duties under the Patent Act of 1790, he was fully cognizant of the patent system then in vogue. Because he kept the patent records and examined personally every application filed during his term, he has appropriately been called "the first administrator of the patent system in this country." [38] If, as such administrator, he had felt that congressional trade-mark legislation was improper because trade-marks were not specifically enumerated under article 1, section 8, of the Constitution, which gives Congress power to legislate concerning copyrights and patents, he would undoubtedly have qualified his report to the House. But even apart from this historical background, it would seem that under the canons of interpretation of the commerce clause laid down by the Supreme Court, the present vital role of trade marks in interstate commerce should justify substantive legislation for their complete protection. Paraphrasing the language of Chief Justice Hughes in sustaining the power of Congress to regulate radio communications under the commerce clause, no State lines divide commerce in trade-marked articles and national regulation is not only appropriate, but it is essential to the efficient use of trade-marks.[39] Congress has repeatedly been held to have the power to enact "all appropriate legislation" for the "protection and advancement" of commerce; "to adopt measures to promote its growth and insure its safety"; to "foster, protect, control, and restrain" it.[40] Congress "has the power to go beyond the general regulations of commerce which it is accustomed to establish", and "to descend to the most minute directions if it shall be deemed advisable. * * *." [41] It may "adopt not only means necessary but convenient" to the exercise of this power "and the means may have the quality of police regulations." [42]

As far back as 1877 it was held that "The powers thus granted are not confined to the instrumentalities of commerce * * * known or in use when the Constitution was adopted, but they keep pace with the progress of the country and adapt themselves to the new developments of time and circumstances. * * * They were intended for the government of the business to which they relate, at all times and under all circumstances." [43] The underlying principle was succinctly reaffirmed in 1934 by Mr. Chief Justice Hughes, when, in sustaining the validity of the Minnesota Mortgage Moratorium Act, he stated:

"It is no answer to say that this public need was not apprehended a century ago, or to insist that what the provision of the Constitution meant to the vision of that day it must mean to the vision of our time. If by the statement that what the Constitution meant at the time of its adoption it means to-day, it is intended to say that the great clauses of the Constitution must be confined to the interpretation which the framers, with the conditions and outlook of their time, would have placed upon them, the statement carries its own refutation. It was to guard against such a narrow conception that Chief Justice Marshall uttered the

[37] In 1898 the comment on Jefferson's Report by the Commissioners appointed to Revise the Trade-Mark Act was:

"We deem the report of Jefferson conclusive on the question of the connection between the regulation of commerce under the Constitution and the securing 'to every manufactory an exclusive right to some marks on its wares proper to itself.' Jefferson was intimately acquainted with the causes, mainly commercial, which led to the adoption of the Constitution. * * *

"That there was not sufficient demand at the time of Jefferson's report or for seventy-nine years afterwards for a law to put into effect his recommendations does not at all modify the authority of the report on the subject of the power of the Congress." See Report of the Commissioners, cited supra, note 36, at 58–59.

[38] G. A. Weber, The Patent Office, Its History, Activities and Organization (Service Monographs of the U. S. Gov't. No. 31, 1924) 4.

[39] *Cf. Federal Radio Commission* v. *Nelson Bros. Co.*, 289 U. S. 266, 279 (1933).

[40] See *Houston & Texas Railway* v. *United States*, 234 U. S. 342, 351 (1914); *Texas & N. O. R. Co.* v. *Railway Clerks*, 281 U. S. 548, 570 (1930).

[41] See *Gloucester Ferry Co.* v. *Pennsylvania*, 114 U. S. 196, 215 (1885).

[42] *Hoke and Economides* v. *United States*, 227 U. S. 308, 323 (1913). In this, as in most of the modern decisions dealing with the powers of Congress under the commerce clause, the distinction between what is "incidental" and what is "necessary" to an effective exercise of these powers is rather vague. Indeed from recent legislation and the judicial interpretations thereof, it would appear that the terms "convenience" and "necessity" are used by legislative draftsmen alternatively or cumulatively and that such use of "convenience" has the sanction of constitutional law provided that the scope and test of convenience is not too arbitrary and unreasonable. Thus in *Federal Radio Commission* v. *Nelson Bros. Co.*, 289 U. S. 266 (1933), Chief Justice Hughes in upholding the constitutionality of the amended Radio Commission Act, and the requirement under the act that the Federal Radio Commission "from time to time, as public convenience, interest, or necessity requires" must grant licenses, remarked: "This criterion is not to be interpreted as setting up a standard so indefinite as to confer an unlimited power." Compare *N. Y. Central Securities Co.* v. *United States*, 287 U. S. 12, 24 (1932). This requirement is to be interpreted by its context, by the nature of radio transmission and reception, by the scope, character, and quality of services, and, where an equitable adjustment between States is in view, by the relative advantages in service which will be enjoyed by the public through the distribution of facilities.. For approval of the constitutionality of this practice of granting licenses "as public convenience, interest, or necessity requires," see also *Panama Refining Co.* v. *Ryan*, 293 U. S. 388, 428 (1935); *Schechter Corp.* v. *United States*, 295 U. S. 495, 540 (1935).

memorable warning,—'We must never forget that it is a Constitution we are expounding.' " [44]

Whether we describe trade-marks as "necessities", "instrumentalities", "facilitating agencies", or "police marks in aid" of interstate commerce, there should be little difficulty in sustaining Federal substantive legislation "in furtherance of a governmental purpose to secure fair and uniform business practices," [45] to assure to trade-mark owners the preservation of their identity, and to afford the public some guarantee that its wants will be satisfied.[46] Mr. Chief Justice Hughes has said that "The power of Congress extends not only to the regulation of transactions which are part of interstate commerce, but to the protection of that commerce from injury." [47] Therefore, even if trade-marks are not in and of themselves the objects of interstate commerce, their relation to the promotion, the production, the progress and the protection of commerce is of so vital and close a nature that any infringement or other misuse of or injury to them, like the issuance of fraudulent and fictitious bills of lading, would constitute such "obstructions to interstate commerce" as to lie clearly within the rule just stated.[48]

If Congress, under the commerce clause, can control the labelling and misbranding of food and drugs under the Pure Food Acts,[49] if it can, through an administrative body created by it, prevent unfair competition and the deception of the public generally through false or misleading labels,[50] if it can go further and generally, as the Supreme Court has said, "regulate commerce to the extent of forbidding and punishing the use of such commerce as an agency to promote immorality, dishonesty, or the spread of any evil or harm to the people of other States from the State of origin",[51] it would be strange indeed if Congress had to remain impotent

[44] See *Home Building & Loan Association* v. *Blaisdell*, 290 U. S. 398, 442–443 (1934).

[45] See *Federal Press Co.* v. *McLean*, 291 U. S. 17, 23 (1934), per Mr. Justice Stone.

[46] As to the psychological relation of a trade-mark to the wants of the public, even though the source or origin of the trade-marked article is anonymous, see *supra* p. 64, and Schechter, supra note 14, 40 Harv. L. Rev. at 814 ff. for an extended discussion. The stake of both the consuming public and of trade competitors in the prevention of misbranding in interstate commerce has recently been emphasized by the Supreme Court. Thus, in *Federal Trade Commission* v. *Algoma Lumber Co.*, 291 U. S. 67 (1934), the Court, per Mr. Justice Cardozo, said:

"The courts must set their faces against a conception of business standards so corrupting in its tendency. The consumer is prejudiced if upon giving an order for one thing, he is supplied with something else, *Federal Trade Comm.* v. *Royal Milling Co.*, 288 U. S. 212, 216; *Carlsbad* v. *W. T. Thackeray & Co.*, 57 Fed. 18. In such matters, the public is entitled to get what it chooses, though the choice may be dictated by caprice or by fashion or perhaps by ignorance. Nor is the prejudice only to the consumer. Dealers and manufacturers are prejudiced when orders that would have come to them if the lumber had been rightly named, are diverted to others whose methods are less scrupulous." (*Id.* at 78.)

Similarly, in *Federal Trade Commission* v. *Royal Milling Co.*, 288 U. S. 212 (1933) the court, distinguishing the facts in that case from those in *Federal Trade Commission* v. *Klesner*, 280 U. S. 19 (1929) (a small purely private controversy of questionable merit between two parties in the District of Columbia) said, per Mr. Justice Sutherland: "If consumers or dealers prefer to purchase a given article because it was made by a particular manufacturer or class of manufacturers, they have a right to do so, and this right cannot be satisfied by imposing upon them an exactly similar article, or one equally as good, but having a different origin. Here the findings of the commission, supported by evidence, amply disclose that a large number of buyers, comprising consumers and dealers, believe that the price or quality or both are affected to their advantage by the fact that the article is prepared by the original grinder of the grain. The result of respondents' acts is that such purchasers are deceived into purchasing an article which they do not wish or intend to buy, and which they might or might not buy if correctly informed as to its origin. We are of opinion that the purchasing public is entitled to be protected against that species of deception, and that its interest in such protection is specific and substantial." (*Id.* at 216, 217.)

[47] See *Schechter Corp.* v. *United States*, 295 U. S. 495, 544 (1935).

[48] In *United States* v. *Ferger*, 250 U. S. 199 (1919) White, C. J., in discussing the power of Congress to prohibit "obstructions to interstate commerce" and to punish the fraudulent makings of spurious interstate bills of lading, said:

"At the outset confusion in considering the issue may result unless obscurity begotten by the form in which the contention is stated be dispelled. Thus both in the pleadings and in the contention as summarized by the court below it is insisted that as there was and could be no commerce in a fraudulent and fictitious bill of lading, therefore the power of Congress to regulate commerce could not embrace such pretended bill. But this mistakenly assumes that the power of Congress is to be necessarily tested by the intrinsic existence of commerce in the particular subject dealt with, instead of by the relation of that subject to commerce and its effect upon it. We say mistakenly assumes, because we think it clear that if the proposition were sustained it would destroy the power of Congress to regulate, as obviously that power, if it is to exist, must include the authority to deal with obstructions to interstate commerce (*In re Debs*, 158 U. S. 564) and with a host of other acts which, because of their relation to and influence upon interstate commerce, come within the power of Congress to regulate, although they are not interstate commerce in and of themselves. It would be superfluous to refer to the authorities which, from the foundation of the Government have measured the exertion by Congress of its power to regulate commerce by the principle just stated, since the doctrine is elementary and is but an expression of the text of the Constitution, art I., sec. 8, clause 18" (at 202–203).

Digitized by Google

and helpless to create a system of trade-mark ownership and protection which would be effective to curb the unscrupulous and ingenious rapacity of trade-mark piracy.[52]

The insuperable obstacle to any Federal regulation of trade-marks has been thought to be the well-established doctrine [53] that trade-marks emanate from and exist solely by the grace of the sovereignty of the several States. It is argued that no substantive national legislation could constitutionally be enacted that would, in any way, affect these creations of the States. The answer to that objection would seem to have been unequivocally given in the *Minnesota Rate cases:* [54]

"There is no room in our scheme of government for the assertion of State power in hostility to the authorized exercise of Federal power. The authority of Congress extends to every part of interstate commerce, and to every instrumentality or agency by which it is carried on, and the full control by Congress of the subjects committed to its regulations is not to be denied or thwarted by the commingling of interstate and intrastate operations. This is not to say that the Nation may deal with the internal concerns of the State as such, but that the execution by Congress of its constitutional power to regulate interstate commerce is not limited by the fact that intrastate transactions may have become so interwoven therewith that the effective government of the former incidentally controls the latter. This conclusion necessarily results from the supremacy of the national power within its appointed sphere. * * *" [55]

We have seen [56] that, from the standpoint of actual commercial realities, commerce in the United States today is, or is consistently striving to become, national or interstate and not intrastate. If this be so, the mere fact that in the past trade-mark rights have emanated from the several States, should not, under a realistic system of trade-mark protection, permit whatever trade-marks of wholly intrastate businesses and whatever purely intrastate trade-mark rights have existed in the past, to prevent an adequate and effective Federal trade-mark statute from operating effectively, even though, in the course of operation of such Congressional legislation intrastate trade-marks or rights may incidentally be affected.[57] In enacting substantive trade-mark legislation with appropriate penalties for its violation, Congress would not only be protecting both trade-mark owners and the consuming public, but would also incidentally and legitimately be giving a severe jolt, if not a coup de grace, to the activity in the field of intrastate trade-mark legislation, much of which has been found to be "pernicious and misleading." [58]

---

[52] For the confusion arising out of a conflict in the use of the same trade-mark by different owners in different States, and for the factual and constitutional problems arising out of the protection of the projection of a trade mark beyond the State of its origin for the legitimate expansion of the owner's trade, see Schechter, supra, note 14, 40 Harv. L. Rev. at 824; *Hanover Star Milling Co.* v. *Metcalf*, 240 U. S. 403 (1916); *United Drug Co.* v. *Rectanus Co.*, 248 U. S. 90 (1918); *Sweet Sixteen Co.* v. *Sweet "16" Shop*, 15 F. (2d) 920 (C. C. A. 8th, 1926); *Buckspan* v. *Hudson's Bay Co.*, 22 F. (2d) 721 (C. C. A. 5th, 1927), *cert. denied*, 276 U. S. 628 (1928); *R. H. Macy & Co.* v. *Macys, Inc.*, 39 F. (2d) 186 (N. D. Okla. 1930).

Based upon the theory that registration can only be "procedural" there have been two solutions of this territorial problem offered, i. e., (1) so-called "plural registration", providing that by consent a mark may be registered by various applicants for limited portions of the territory of the United States. See proposed provision of the law and opposition thereto by United States Trade Mark Association, Joint Hearings before Committee on Patents on S. 2679, 68th Cong., 2d Sess. (1925) 23, 132–133. See also memoranda filed by other opponents thereto, id. at 100. (2) The other solution provides, as for instance in § 18 (h) of H. R. 2828, 71st Cong., 2d Sess. (1930) that:

"The remedy of injunction against infringement of a registered trade mark may extend throughout the United States or any lesser territory, as may be determined by the court according to the circumstances of the case, and need not be limited to be merely coextensive with the territory within which the owner has used such registered trade mark; and the court may give the plaintiff the benefit of all other remedies named in this section." See Hearings before the Committee on Patents on H. R. 2828, 71st Cong., 2d Sess. (1930) at 9. This same provision was included in the Vestal Bill for 1932, § 18 (h), and in the Perkins Bill, H. R. 11592, 62d Cong. 1st sess. (1932) § 18 (h). For a view opposing such registration see Hearings, supra, at 24–25.

III. What Congressional Legislation Concerning Trade-Marks Is Desirable?

It is thus highly desirable that any future congressional legislation dealing with trade marks be frankly and avowedly based upon the assumption that "substantive" and not merely "procedural" law is thereby being enacted. In construing the present "procedural" legislation, the courts are keenly aware of the paradox confronting them. On the one hand, they describe the function of the Commissioner of Patents in administering the Trade-Mark Act as purely "administrative in character" and the jurisdiction of the appellate court (the Court of Customs and Patent Appeals) as "purely statutory and * * * limited in the same way that the Commissioner is limited"; [59] any equitable jurisdiction in either of the tribunals is uniformly disavowed.[60] On the other hand, with equal emphasis, it is insisted that the trade-mark registration law should be construed in aid or furtherance of, and not in defeat of, the development of fair trade.[61] Even under a procedural registration act, holds the Supreme Court, "The law of trade marks is but a part of the broader law of unfair competition" and "to the extent that the contrary does not appear from the statute, the intention was to allow the registration of such marks as that law, and the general law of unfair competition, of which it is a part, recognized as legitimate."[62] Captain Gulliver, on his voyage to Brobdingnag, observed that: "No law of that country must exceed in words the number of letters in their alphabet, which consists only in two and twenty * * *. They are expressed in the most plain and simple terms, wherein those people are not mercurial enough to discover above one interpretation; and to write a comment upon any law is a capital crime."[63] Unfortunately such is the frailty of our civilization that few of our statutes can be so simplified. From the foregoing study, however, it may be briefly posited that if a registration statute (whether "procedural" or, a fortiori, "substantive") is concededly in furtherance of and not in defeat of, the general principles of equity applicable to the law of trade-marks, it is, of course, of fundamental importance that registration thereunder should only be permitted to trade marks which, in the contemporaneous opinion of courts of equity are not liable to cause confusion with previously existing trade-marks. By permitting registration Congress

[59] *B. F. Goodrich Co.* v. *Kennelworth Mfg. Co.*, 40 F. (2d) 121, 122 (C. C. P. A. 1930) per Garrett, Associate Judge, citing *Postum Cereal Company* v. *California Fig Nut Company*, 272 U. S. 693 (1927).

[60] Thus, in *Proctor & Gamble Company* v. *J. L. Prescott Co.*, 77 F. (2d) 98, 103 (C. C. P. A. 1935) the court said, per Bland, Associate Judge: "This Patent Office cancelation proceeding is governed by the terms of the statute, and its terms are not indefinite. It is intended to afford a means of canceling certain registrations, among them registrations which should not have been allowed. Registration is based upon the right of the registrant to the exclusive use of the mark sought to be registered. Equity frequently permits more than one person to use the same mark, since the conduct of the parties may affect the exclusive right to use. We have frequently pointed out this difference between our jurisdiction and that of the court of equity." *Cf. I. E. Palmer* v. *Nashua Mfg. Co.*, 34 F. (2d) 1002, 1004–5 (C. C. P. A. 1929); *Trustees etc.* v. *James McCreary & Co.*, 49 F. (2d) 1068, 1070 (C. C. P. A. 1931); *Leschen & Sons Rope Co.* v. *Am. Steel & Wire Co.*, 55 F. (2d) 455, 459 (C. C. P. A. 1932).

[61] See *American Trading Company* v. *Heacock*, 285 U. S. 247, 258 (1932) (per Mr. Chief Justice Hughes). The Court of Customs and Patent Appeals has repeatedly interpreted the statute in accordance with equitable principles. Thus, in the leading case of *California Packing Corporation* v. *Tillman & Bendel, Inc.*, 40 F. (2d) 108, 111 (C. C. P. A. 1930), the court said, per Bland, Associate Judge: "Congress, therefore, by the use of the words 'merchandise of the same descriptive properties', could not be presumed to have authorized the registration of a trade mark for public use which use could be prevented by resort to the common law. [See Hopkins, Trade-Marks, Trade-names and Unfair Competition (4th ed. 1924) 49.] While in courts of equity there may be principles of law applied in actions concerning unfair trade practices and unfair competition, growing out of trade-marks, which are not applicable in proceedings like that at bar, the law, nevertheless, must be the same in both jurisdictions regarding the question of the probability of confusion. It is inconceivable that Congress, in its efforts to lessen confusion, deceit, and mistake in connection with the use of trade-marks, which must be regarded by the courts as prima facie evidence of ownership, intended to authorize the registration of a trade-mark which was invalid at common law and thus arm the registrant with a weapon, impotent for good but virile for mischief." In *B. F. Goodrich Co.* v. *Hockmeyer*, 40 F. (2d) 99, 103 (C. C. P. A. 1930) the court said, per Hatfield, Associate Judge: "If, as the court said in the above case, citing *United Drug Co.* v. *Rectanus Co.*, 248 U. S. 90, 97, 39 S. Ct. 48, 63 L. Ed. 141; *Hanover Star Milling Co.* v. *Metcalf*, 240 U. S. 403, 413, 414, 36 S. Ct. 357, 60 L. Ed. 713, 'The law of trade marks is but a part of the broader law of unfair competition' (*id.*), the general purpose of which is to prevent one person from passing off his goods or his business as the goods or business of another, and, if the general principles of equity applicable to the law of trade-marks 'were in mind when Congress came to enact the registration statute,' it would seem to be obvious that the provisions of section 5 (15 U. S. C. A., Sec. 85), under consideration here, should not be given a literal construction, but, except where a contrary intention clearly appears from the statute, should be construed *in harmony with the general principles of equity applicable to the law of trade-marks.*" In *In re Plymouth Motor Corporation*, 46 F. (2d) 211 (C. C. P. A. 1931) the Court said: "To the extent that Congress undertook, in the registration act, specifically to define what marks 'shall not be refused registration' and what marks 'shall not be registered', it merely sought to embody in the statute the principles of the common law, largely as the same has been interpreted and applied by the courts throughout the centuries." (*Id.* at 212.) See also *Sunmaid Raisin Brewers* v. *American Grocer Co.*, 40 F. (2d) 116, 118 (C. C. P. A. 1930); *B. F. Goodrich Co.* v. *Kenilworth Mfg. Co.*, 40 F. (2d) 121, 122 (C. C. P. A. 1931); *The Celotex Company* v. *Chicago Panelstone Co.*, 49 F. (2d) 1051, 1052 (C. C. P. A. 1931); *Trustees, etc.* v. *James McCreary & Co.*, 49 F. (2d) 1068, 1070 (C. C. P. A. 1931)

has, in the past, desired and should, in the future, determine to curb and regulate, not to increase unfair competition. The rational test of the efficacy of a trade-mark statute is whether or not it limits registration to those trade marks which would be entitled to protection in equity.

The actual basis upon which trade marks are today protected in equity *is*, like so many other doctrines of a living and developing jurisprudence, not easily delimited or defined. The diversion of custom from the owner of the trade mark is no longer the sole criterion. Two epoch-making judicial utterances only 4 years apart stand out as milestones in the rapid development of this branch of law. In the *Vogue case* (1924) it was said that "there is no fetish in the word 'competition.' The invocation of equity rests more vitally upon the unfairness." [64] In 1928, although the liberal doctrine of the *Vogue case* appears to have been distinctly unpopular with important sections of the legal profession,[65] in the case of *Yale Elec. Corp.* v. *Robertson*,[66] Circuit Judge Learned Hand extended the doctrine of the *Vogue case*, in words which have become a classical enunciation of the prevailing modern judicial point of view:

"The law of unfair trade comes down very nearly to this—as judges have repeated again and again—that one merchant shall not divert customers from another by representing what he sells as emanating from the second. This has been, and perhaps even more now is, the whole law and the prophets on the subject, though it assumes many guises. Therefore it was at first a debatable point whether a merchant's goodwill, indicated by his mark, could extend beyond such goods as he sold. How could he lose bargains which he had no means to fill? What harm did it do a chewing gum maker to have an ironmonger use his trade mark? The law often ignores the nicer sensibilities.

"However, it has of recent years been recognized that a merchant may have a sufficient economic interest in the use of his mark outside the field of his own exploitation to justify interposition by a court. His mark is his authentic seal; by it he vouches for the goods which bear it; it carries his name for good or ill. If another uses it, he borrows the owner's reputation, whose quality no longer lies within his own control. This is an injury, even though the borrower does

[64] See *Vogue Co.* v. *Thompson-Hudson Co.*, 300 Fed. 509, 512 (C. C. A. 6th, 1924). It was held in this case that the use of the word "Vogue" and the letter "V" as a trade mark for hats constituted unfair competition with the publisher of the "Vogue" magazine. The theory of the Circuit Court of Appeals, in so holding, was stated to be: "In this case the reasonable probability of injury to plaintiff through defendants' misrepresentation is clear, even if it has not actually occurred. Plaintiff's magazine is so far an arbiter of style, and the use of plaintiff's trade mark upon defendants' hats so far indicates that the hats were at least sponsored and approved by the plaintiff, that the same considerations which make the misrepresentation so valuable to defendants make it pregnant with peril to plaintiff. It seems not extreme to say, as plaintiff's counsel do, that persistence in marking under this trade-mark articles of apparel which are unfit, undesirable, or out of style would drive away thousands of those who customarily purchase plaintiff's magazine." (*Ibid.*)

A recent case strikingly illustrates the importance of applying the equity rules governing trade marks and unfair competition to registration applications. In *Meredith Publishing Co.* v. *O. M. Scott & Sons Co.*, 458 O. G. 3 (Patent Office, June 14, 1935), the plaintiff sought to register the notation "Better Homes" for use on lawn grass and seeds. The granting of his application was opposed by the publishers of the magazine "Better Homes and Gardens." The mark was nevertheless registered, and the Patent Office, per Spencer F. A. C. in affirming the decision of the Examiner of Trade-Mark Interferences, said, on the question of whether the goods involved were of "the same descriptive properties"—"on the other hand, confusion can exist, as indeed it does in the case at bar, between goods that are entirely different where the notation is the same and is distinctive. For example, if collar buttons were put out under such names as 'Vaseline' or 'Coca Cola' some one would be led to believe that the proprietors of those well-known marks stood behind the new product. To repeat * * * I do not believe this is such confusion as was contemplated by the framers of the act and I further am of the opinion that in order for an opposition to be sustained both similarity in goods and similarity in notations are essential." (*Id.* at 4.) The *Vogue case* was not cited.

[65] As early as January 1925, in the Joint Hearings before the Committees on Patents on S. 2679, 68th Cong., 2d Sess. (the Vestal bill of that day) in discussing the advisability of a provision of that bill, evidently framed on the basis of the Vogue decision, the late Mr. A. W. Barber, representing the United States Trade-Mark Association and various clients, in denouncing the doctrine of the Vogue decision, said: "It might better be called the "vague" case. * * *" In discussing the meaning of the words "goods of the same descriptive character" he went on to say: "If it be true that the words 'goods of the same descriptive character' originally meant nothing, it is equally true of these words that they may mean anything, and I, Mr. Chairman, am very much afraid of those words. * * * I, * * * do not subscribe to the theory of legislation that has the theory of scrapping a term that has been the subject of adjudication for 20 years, and starting with a new word that is more ambiguous than the present one, and placing upon the courts and the applicants for trade marks the burden of saying what those words mean, and spending another 20 years in interpreting them." (*Id.* at 129–132.) In the following hearing the Boston Patent Law Association, opposing the provision of the Vestal bill of their day for the rejection of registration of a mark because a similar mark had been previously used on a different class of goods, and in arguing that there had only been two or three recent decisions on the point, stated:

"We much prefer to allow this phase of the law, which is of recent origin and has received consideration in only a very few cases, to be worked out and developed by the courts rather than to attempt to engraft it, before its limitations have been definitely worked out at common law, upon a trade-mark registration act, thus putting the development of the law into the hands of Patent Office tribunals, which are ill adapted to deal with such a subject and which have no authority to settle the question finally in any case." *Hearings* before Committee on Patents on H. R. 6248, 69th Cong., 1st Sess. (1926) 97.

[66] 26 F. (2d) 973 (C. C. A. 2d, 1928).

Digitized by Google

not tarnish it, or divert any sales by its use; for a reputation, like a face, is the symbol of its possessor and creator, and another can use it only as a mask. And so it has come to be recognized that, unless the borrower's use is so foreign to the owner's as to insure against any identification of the two, it is unlawful."[67]

This philosophy of the protection of trade-marks has recently been reconsidered by Judge Learned Hand in a case[68] where plaintiff had for more than 50 years made a continuous use of the name "Waterman" on fountain pens, and defendant, whose name was Gordon, advertised and sold his razor blades as Waterman blades. In affirming a decree for the plaintiff, Judge Hand set a limit to the doctrine of the *Vogue* and the *Yale cases*: "The goods," he wrote, "on which the supposed infringer puts the mark may be too remote from any that the owner would be likely to make or sell. It would be hard, for example, for the seller of a steam-shovel to find ground for complaint in the use of his trade mark on a lipstick."[69] Although in so ruling, Judge Hand did not go as far in the functional concept of a trade-mark as did the New York court in the *Tiffany case* or the German court in the *Odol case*[70] there remains a rationale of trade-mark protection which, if applied in congressional legislation and Patent Office administration would greatly aid in formulating a sound basis for trade-mark registration, or rather for refusing trade-mark registration on equitable principles.

The amendment to the Vestal bill recommended to the House Committee on Patents by the writer in 1932 endeavors to crystallize the contemporaneous equitable basis of preventing unfair competition and trade-mark piracy. It reads:

"When such previously used trade-mark (1) is applied to merchandise or services[71] of the same descriptive properties, or (2) is applied to merchandise

---

[67] *Id.* at 973-974.

[68] *L. E. Waterman & Co.* v. *Gordon*, 72 F. (2d) 272 (C. C. A. 2d, 1934.).

[69] Id. at 273.

[70] See supra, note 14. If, under the doctrine of the *Tiffany* and *Odol cases* the same trade mark may not be used on jewelry and motion pictures, or upon mouthwash and steel railroad ties, it would seem that the same would be true of steam shovels and lipsticks.

[71] The desirability of the registration of so-called "service marks" (i. e., trade-marks for services as distinguished from trade marks on goods) has long been recognized by the legal profession. Thus Nims [op. cit. supra note 10, at 601-602], in discussing the refusal to register a trade mark of a service corporation for repairing and dyeing fabrics, states: "A trade mark must be applied or affixed to goods. Mere use of the trade mark in connection with the owner's business will not be sufficient to entitle him to protection against infringement. * * * However, it is possible that, with the growth in importance of service marks, they may be accepted for registration. It seems possible fairly to construe this section [i. e., § 1 of the act of 1905, 33 Stat. 724, 15 U. S. C. A. § 81 (1927)] so as to permit such registration."

The Patent Office and the appellate tribunal, the Court of Customs and Patent Appeals, as well as its predecessor, the Court of Appeals of the District of Columbia, have, both prior and subsequent to the statement of Mr. Nims above quoted, steadily refused to recognize the registrability of service marks. These tribunals insist that "to establish a right to the registration of a trade mark * * * it must have been actually applied to vendible goods. * * *." *Gray* v. *Armand Co.*, 24 F. (2d) 878 (App. D. C., 1928); in re *Gregg & Son, Inc.*, 24 F. (2d) 898, 899 (App. D. C. 1928); in re *Toledo Porcelain Enamel Products Co.*, 58 F. (2d) 423, 425-6, C. C. P. A. (1923); cf. *Diedreich* v. *W. Schneider Wholesale Wine & Liquor Co.*, 195 Fed. 35 (C. C. A. 8th, 1912), cert. denied, 232 U. S. 726 (1914). For Patent Office decisions see ex parte *Dinks L. Parish Laundry Corp.*, 156 M. D. 246 (1929); ex parte *Western Union Telegraph Co.*, 146 M. D. 321, 15 T. M. Rep., 139 (1924); ex parte *Rex Agency*, (1929) C. D. 61; 389 O. G. 3; ex parte *The Union Deposit Co.*, 156 M. D. 500 (1930); *McBride's Theatre Ticket Offices, Inc.*, (1931) C. D. 1, 156 M. D. 634; ex parte *Corn Exchange National Bank & Trust Co.*, 156 M. D. 689 (1931); *American Bleached Goods Co., Inc.* v. *Defiance Mfg. Co.*, opposition number 10-315, briefly reported in United States Daily, Mar. 3, 1932, at 4; ex parte *Jerry C. Pugh*, 159 M. D. 444; 25 T. M. Rep. 629 (1935).

Various provisions in proposed legislation have included the registration of service marks and the protection thereof against infringement upon the same basis (rather than as being) as "trade marks used upon goods" [e. g., see American Bar Association Trade Mark bill, S. 2679, 68th Cong., 2d sess. (1925) § 24; H. R. 2828, 71st Cong., 2d sess. (1930) §23; H. R. 7118, 72d Cong. 1st sess. (1932) § 23]. In the 1935 American Bar Association report at 13, it is likewise recommended "that service marks should be included." It will be noted that in H. R. 11592, 72d Cong., 1st sess. (1932) the special § 23 of its predecessor, H. R. 7118, was eliminated, and instead of making special provision for the registration of service marks "subject to the same provisions as appear in sec. 2 thereof, relating to trade marks, so far as the same may be applicable * * *" and instead of stating that "when registered they shall be entitled to the same protection and remedies against infringement as provided herein in the case of trade marks used upon goods," service marks are placed in precisely the same category as trade marks and their registration provided for accordingly. Services are today designated or distinguished to as great a degree by trade marks or trade names as are goods. Broadcasting, news reporting, airplane transportation, stenography, theater ticket service, insurance and surety service, laundry, taxi, cleaning, dyeing and valet services are only a few of those services to which trade marks become affixed. Service marks are now protected in courts of equity from unfair competition; their owners should likewise be further protected by being permitted to register such marks as trade marks in the Patent Office. § 23 of H. R. 7118, mentioned above, by isolating the service marks, attempts to accomplish by indirection that which it seems to me can either be done directly or not at all. It is designed to permit the registration of service marks, but carefully describes a service mark as "any trade name or device"—not as a trade mark. In this connection see also the definition of the term "trade mark" in §30, 42, lines 7-14, of H. R. 7118, with which cf. H. R. 11592, § 30, p. 42, lines 12 ff. This matter of the registrability of service marks is but another instance, it seems to me, of the desirability of a frank recognition of the extension of congressional power to legislate "substantively" concerning trade marks.

Digitized by Google

or services of such other properties, quality, or reputation[72] or to merchandise or services so distributed or conveyed to the purchasing public, or (3) was at the time of its registration a coined or invented or fanciful or arbitrary mark,[73]

"so that the use of applicant's mark is likely to cause confusion or mistake or to deceive purchasers or users thereof as to their source or origin or otherwise to injure the good will, reputation, business, credit or securities[74] of the owner of the previously used trade mark,

"it shall constitute prima-facie grounds for refusing registration." [75]

IV. Conclusion

A recent and most readable decision[76] involves the misleading use by one William Gordon of the name Gordon (standing alone) in connection with the vending of gin—a product which the plaintiff, a British corporation, had been distilling and selling under the name Gordon since 1769. This was, it seems, the third time that the defendant had run afoul of the law of unfair competition. At the conclusion of his opinion enjoining the defendant's piracy of plaintiff's trade mark, District Judge Clark said:

"In conclusion, we record our surprise at counsel's apparent distaste for our suggestions from the bench that we intended to attempt 'the introduction of a little ethics in American business.' We should have supposed that the business history of the past 10 years made such an attempt rather appropriate. We do not feel that it is particularly harsh to question the ethical perceptions of an individual who seems unconscious of the misleading impression created by the use of the British coat-of-arms on an American product." [77]

From the standpoint of the author of Transcendental Nonsense and the Functional Approach, mentioned at the outset,[78] the question whether a trade mark on gin should or should not be permitted by the courts to be thus pirated would appear to be socially irrelevant or, if decided at all, to be determined in the negative. At worst, it would be only one of those "petty things, of lying, stealing * * * in their retail forms * * * of ugly manners." [79] However, this is a problem which, even if solvable, space will not permit an attempt to solve here. Its perplexities will be dealt with in the second part of this paper.

Frank I. Schechter.

New York City.

[72] E. g., *Northam Warren Corp.* v. *Universal Cosmetic Co.*, 18 F. (2d) 774 (C. C. A. 7th, 1927); *Duro Co.* v. *Duro Co.*, 27 F. (2d) 339 (C. C. A. 3d, 1928); *Kotabs, Inc.* v. *Kotex Co.*, 50 F. (2d) 810 (C. C. A. 3d, 1931), cert. denied, 284 U. S. 665 (1931); *Standard Oil Co. of New Mexico, Inc.* v. *Standard Oil Co. of California*, 56 F. (2d) 973 (C. C. A. 10th, 1932); *L. E. Waterman & Co.* v. *Gordon*, 72 F. (2d) 272 (C. C. A. 2d, 1934); *Holt* v. *Metropolitan Refining Co., Inc.*, 9 F. Supp. 662 (E. D. N. Y. 1935); *Long's Hat Stores Corp.* v. *Long's Clothes, Inc.*, 224 App. Div. 497, 231 N. Y. Supp. 107 (1st Sept. 1928).

[73] For typical decisions see cases cited in Schechter, supra note 14, at 828–830; *Mantle Lamp Co. of America* v. *Alladin Mfg. Co.*, 78 F. (2d) 426, 428–429 (C. C. A. 7th. 1935) cert. denied, 56 Sup. Ct. 173 (1935) (involving Alladin on lamps); *Holt* v. *Metropolitan Refining Co., Inc.*, 9 F. Supp. 662, 666 (E. D. N. Y. 1935), (involving Rust-I-Cide on rust removers) and the cases cited therein; cf. discussion of the *Tiffany* and *Odol cases*, and of the British proposed "defensive trade mark", supra, note 14.

[74] For decisions holding that, quite apart from diversion of trade, or other injury to the good will of the plaintiff, misuse of trade marks, resulting in injury to the credit or other financial standing of securities issued by the owner of the trade mark or in possible diminution of their value will be enjoined, see *British-American Tobacco Co., Ltd.* v. *British-American Cigar Stores Co.*, 211 Fed. 933, 935 (C. C. A. 2d, 1914); *Akron Overland Tire Co.* v. *Willys-Overland Co.*, 273 Fed. 674, 676 (C. C. A. 3d, 1921); *Buckspan* v. *Hudson Bay Co*, 22 F. (2d) 721, 723 (C. C. A. 5th, 1927), cert. denied, 276 U. S. 628 (1928); *Hudson Motor Car Co.* v. *Hudson Tire Co.*, 21 F. (2d) 453, 456 (D. N. J. 1927); *Armour & Co.* v. *Master Tire & Rubber Co.*, 34 F. (2d) 201, 203 (S. D. Ohio, 1925); *Lincoln Motor Co.* v. *Lincoln Automobile Co.*, 44 F. (2d) 812, 817 (N. D. Ill. 1930) *Standard Oil Co. of New Mexico* v. *Standard Oil Co. of California*, 56 F. (2d) 973 (C. C. A. 10th, 1932); *Standard Oil Co., of Colorado* v. *Standard Oil Co.*, 72 F. (2d) 524 (C. C. A. 10th, 1934), cert. denied, 293 U. S. 620 (1934); *Household Finance Co.* v. *Household Finance Co.*, 11 F. Supp. 3 (D. W. Va., 1935); *Yellow Cab Corporation* v. *Korpeck*, 120 Misc. 499, 198 N. Y. Supp. 864 (Sup. Ct. 1923); *F. W. Woolworth & Co., Ltd.*, v. *Woolworths Australasia, Ltd.*, 47 Rep. Pat. Cas. 337, 345 (Ch. Div. 1930); cf. *Certain-Teed Products Corp.* v. *Philadelphia & Suburban Mortgage Guarantee Co.*, 49 F. (2d) 114 (C. C. A. 3d, 1931) adopting the opinion of the lower court that the owner of "Certain-Teed" trade mark for roofing and building materials is not entitled to enjoin defendant whose business is buying and selling mortgages, from using the slogan "A guaranteed mortgage is a Certain-Teed income." The lower court held that defendant's use, of this slogan "is comparatively unobtrusive."

[75] See the Perkins bill, H. R. 11592, 72d Cong., 1st sess. (1932) § 2(d), p. 3, line 24, to p. 4, line 11. It will be observed that seemingly contrary to the constitutional views as to substantive as distinguished from merely procedural legislation, indicated above, the words "prima facie" grounds for refusing registration were there used by the writer. They were used intentionally because I did not then feel that the reasoning of the Odol decision would at that time be acceptable to either legislators or lawyers. The Tiffany decision, following the reasoning of the Odol case, had not as yet been handed down. If I were redrafting the above quoted section at this time I should be inclined to omit the "prima facie" modification.

[76] *Tanqueray Gordon & Co., Ltd.* v. *Gordon*, 10 F. Supp. 852 (D. N. J. 1935), appeal dismissed, 77 F. (2d) 998 (C. C. A. 3d, 1935).

FISH, RICHARDSON & NEAVE,
New York, January 13, 1936.

Hon. WILLIAM I. SIROVICH,
Committee on Patents, House of Representatives,
Washington, D. C.

DEAR SIR: Referring to my letter to you of December 23, 1935, and your reply of December 27, 1935, the information has now been collected which Mr. Swope, president of the General Electric Co., was asked to furnish when testifying before the Committee on Patents in New York on October 15, 1935.

Mr. Swope is now away and will not return for a month or more. You may wish the information before that time, so I am giving it to you in this letter.

The figures in parentheses refer to the pages of the typewritten report of his testimony.

"How many companies make up the General Electric system?" (P. 140.)

Attached is a list of the General Electric affiliates (companies of which General Electric Co. holds over 50 percent stock ownership) as of December 31, 1934; of these 77 companies, 40 were operating outside of the United States. This list is copied from a report furnished to the Securities and Exchange Commission.

"What is the total capitalization of all the companies in the system?" (P. 141.)

On December 31, 1934, it was $382,387,910.

The General Electric Co.'s annual report was asked for. (P. 141.)

The report of December 31, 1934, is furnished herewith.

"How many patents does it (General Electric Co.) own?" (P. 142.)

Between 8,000 and 9,000 patents.

"How many patents owned or controlled by the General Electric Co. are joined into a patent pool or cross-licensing agreement?" (P. 144.)

Between 500 and 2,000 patents.

The General Electric Co. has no list of its patents involved in patent pool or cross-licensing agreements, and it would be difficult to prepare any reasonably complete and accurate list. For example, the cross-license agreement with the Radio Corporation of America grants rights under General Electric Co. patents in the field of radio purposes, but the patents are not listed in the agreement. There are about 1,000 General Electric Co. patents which relate primarily to this field, but there are many patents not directed to radio purposes at all which may have some use in the radio purpose field which would come under the license.

Similarly, the cross-license agreement with the Babcock & Wilcox Co. relates to mercury boilers, without listing the patents of either company. There are between 25 and 30 General Electric patents particularly directed to inventions which clearly come under the agreement and others which may come under it.

In the license agreements relating to incandescent lamps and machines and processes for their manufacture, hereinafter referred to, about 250 existing patents were listed, and additional patents have issued since the list was printed, bringing the number to a little over 300.

"Under what patents do they (the incandescent-lamp licensees) pay you royalties?"

"Would you be willing to furnish copies of the licensing agreements?" (P. 155.)

A list of patents for incandescent lamps and machines and processes for their manufacture appears in the copies of the B license—large incandescent lamps, and B license—miniature incandescent lamps, furnished herewith. There is also furnished herewith a copy of the electric-lamp license between General Electric Co. and Westinghouse Electric & Manufacturing Co.

"What are the patents under which you are now manufacturing or licensing—do you know the total number of them?" (P. 160.)

The patents specified in license agreements that provide for payment of royalties to General Electric Co. (other than incandescent-lamp patents, which are listed as stated above) are set forth in a list furnished herewith.

A list is also furnished herewith of 2,485 patents, the numbers of which have been marked on apparatus made and sold by the General Electric Co.

"Which of those patents have ever been adjudicated in the higher court, as to their validity?" (P. 161.)

The following have been passed upon and sustained in the circuit court of appeals:

Abbott, 1367341, 6 F. (2d) 376; Sargent & DeReamer, 1567863, 63 F. (2d) 764; Rice, 1334118, 19 F. (2d) 290; Pacz, 1410499, decision by Court of Appeals for Ninth Circuit December 20, 1935, *General Electric* v. *Anraku et al.*, not yet reported.

NOTE.—The Mitchell & White patent 1423956 for the tipless incandescent lamp was before the court of appeals for the third circuit in *General Electric Co.*

Digitized by Google

v. *Eisler et al.* (20 F. (2d) 33), where the court held there was no infringement but said:

"But, as we view it, Jaeger did not anticipate and invalidate what Mitchell & White disclosed."

A list of licensees under General Electric Co. patents was asked for. (P. 164.)

The list is furnished herewith, which is not complete but is reasonably so. It is believed to include all licensees from whom any report may be required under the license.

There may be between 50 and 200 licensees, not listed, who were granted free, nonexclusive licenses under the issues of interferences in connection with the settlement of the interferences. There are a number of licensees who have been granted licenses by the Radio Corporation, in which licenses the General Electric Co. appears as one of the licensors and under which licenses the General Electric Co. collects no royalty. For example, there are a few over 200 radio broadcasting station licensees who make no reports and pay no royalties.

Respectfully submitted.

CHARLES NEAVE,
Counsel for General Electric Co.

AFFILIATED COMPANIES AS OF DECEMBER 31, 1934 (S. E. C. BASIS)

[Companies indented are direct subsidiaries of those companies under which they are indented]

Canadian General Electric Co., Ltd., Toronto, Canada.
Carboloy Co., Inc., Detroit, Mich.
East Erie Commercial Railroad, Erie, Pa.
Edison General Electric Appliance Co., Inc., Chicago, Ill.

Patents are not listed in the following licenses:

License granted to Cameron Surgical Specialty Co. under patents on cauterodyne apparatus—defined as "apparatus used for surgical operations comprising a source of high frequency oscillations and means for applying the high frequency oscillations developed by said source to the flesh of a patient to produce an incision therein." Does not include right to make vacuum tubes.

License granted to Burdick Corporation under patents on electromedical apparatus defined as "apparatus adapted to be used for medical and surgical purposes, comprising a source of high frequency oscillations and means for applying the high frequency oscillations developed by said source to human or animal flesh." Does not include right to make vacuum tubes.

License to Atlantic Precision Co. to manufacture apparatus for measuring or indicating variations in thickness during the process of manufacture of products such as pulp products, felt, paper and textiles, rubber, glass, celluloid products, artificial and natural leather, rope, cellophane, etc., etc.

License granted to Leeds and Northrup under patents covering vacuum tubes, and the use of vacuum tubes as amplifiers, detectors, and oscillators for use in electrical measuring instruments and devices particularly adapted for laboratory use, and uses for which instruments of high degree of precision are required.

License granted to Babcock & Wilcox Co. under patents covering Mercury Boiler Constructions and the like, sold and used for process purposes.

FORTY-THIRD ANNUAL REPORT, GENERAL ELECTRIC CO., 1934

General Electric Co., earnings and dividends per share of common stock, 1899–1934

Year	Earnings [1]	Cash dividends paid	Stock dividends declared
1899	$27.46	$3.00	
1900	30.99	7.50	
1901	44.80	8.00	
1902	30.02	8.00	66⅔ percent in common stock.[2]
1903	17.76	8.00	
1904	14.59	8.00	
1905	15.17	8.00	
1906	15.52	8.00	
1907	10.17	8.00	
1908	7.37	8.00	
1909 [3]	9.96	8.00	
1910	16.66	8.00	
1911	14.55	8.00	
1912	16.20	8.00	30 percent in common stock.
1913	12.88	8.00	
1914	11.03	8.00	
1915	11.56	8.00	
1916	18.31	8.00	
1917	26.50	9.00	2 percent in common stock.
1918	14.93	8.00	4 percent in common stock.
1919	20.93	8.00	Do.
1920	16.62	8.00	Do.
1921	12.92	8.00	Do.
1922	14.86	8.00	5 percent in special stock.[4]
1923	18.40	8.00	Do.[4]
1924	21.13	8.00	5 percent in special stock (d) and 1 share of Electric Bond & Share Securities Corporation stock.
1925	20.49	8.00	5 percent in special stock.[4]
1926:[5]			
Old		4.00	
New	6.14	1.50	$1 in special stock.[4]
1927	6.41	4.50	
1928	7.15	5.00	
1929	8.97	6.00	
1930:[5]			
Old		1.50	
New	1.90	1.20	
1931	1.33	1.60	
1932	.41	.85	1/6 share of Radio Corporation of America common stock.
1933	.38	.40	
1934	.59	[6].55	

[1] Profit available for dividends on common stock per share of average common stock outstanding.
[2] To restore a 40 percent reduction in common stock made in 1898.
[3] 11 months.
[4] Special stock, par value $10 per share, paying 6 percent annual dividends.
[5] Number of shares of common stock increased 4 for 1 in May 1926, and again in January 1930.
[6] Dividends declared amounted to 60 cents, that for the last quarter being paid Jan. 25, 1935.

Statement of income and earned surplus

	1934	1933
Net sales billed	$164,797,317.19	$136,637,268.03
Costs, expenses, and all charges except depreciation and interest	145,716,209.84	123,585,652.40

This and other contingent liabilities are covered by the general reserve.

PEAT, MARWICK, MITCHELL & CO.,
ACCOUNTANTS AND AUDITORS,
New York, March 4, 1935.

TO THE BOARD OF DIRECTORS OF THE GENERAL ELECTRIC CO.,
New York City.

DEAR SIRS: We have made an examination of the balance sheet of the General Electric Co. as at December 31, 1934, and of the statement of income and earned surplus for the year 1934. In connection therewith, we examined or tested accounting records of the company and other supporting evidence and obtained information and explanations from officers and employees of the company; we also made a general review of the accounting methods and of the operating and income accounts for the year, but we did not make a detailed audit of the transactions.

We have confirmed the cash and securities by count and inspection or by certificates which we have obtained from the depositaries. We have made independent examinations of the accounts of the International General Electric Co., Inc., G. E. Employees Securities Corporation, General Electric Realty Corporation and General Electric Contracts Corporation, on which we have separately reported. The accounts of Electrical Securities Corporation have been examined and reported upon by other public accountants. No examination has been made by us of other companies which are controlled through stock ownership, but balance sheets of these companies have been submitted to us. The amounts at which the Investments in affiliated companies (including advances) are carried are based on the accounts thus examined and the balance sheets submitted, and including Miscellaneous Investments, in our opinion, are conservatively stated.

We have scrutinized the accounts and notes receivable and believe that full provision has been made for probable losses through bad and doubtful debts.

Certified inventories of merchandise, work in progress, and materials and supplies have been submitted to us and we have satisfied ourselves that these inventories have been taken in a careful manner, that ample allowance has been made for inactive and obsolete stocks and that they are conservatively stated at not in excess of cost or market, whichever is lower. Provision has also been made for probable allowances or additional expenditures on completed contracts.

Digitized by Google

Expenditures capitalized in the plant and equipment accounts during the year were properly so chargeable as representing additions or improvements. Adequate provision has been made in the operating accounts for repairs, renewals, and depreciation.

In our opinion, based upon such examination, the accompanying balance sheet and related statement of income and earned surplus fairly present, in accordance with accepted principles of accounting consistently maintained by the company during the year under review, its position at December 31, 1934, and the results of its operations for the year.

Yours truly,

PEAT, MARWICK, MITCHELL & Co.

SCHENECTADY, N. Y., *March 25, 1935.*

To the Stockholders of the General Electric Co.:

Orders received amounted to $183,660,303 during 1934, compared with $142,770,791 during 1933, an increase of 29 percent.

Sales billed (representing shipments) amounted to $164,797,317 during 1934, compared with $136,637,268 during 1933, an increase of 21 percent.

Statistics compiled by the United States Department of Commerce indicate that your company continued to secure substantially the same proportion of the total business available to the industry.

CURRENT ASSETS

Cash and marketable securities.—Cash and marketable securities amounted to $107,949,999.42 on December 31, 1934, compared with $111,878,508.03 at the close of 1933. Marketable securities, valued at the lower of par or market, amounted to $49,282,533, and consisted of $30,900,533 of United States Government obligations or those guaranteed by the Government, and $18,382,000 of Federal Intermediate Credit Bank notes and high-grade State and municipal obligations. Approximately 99 percent of the entire portfolio comes due within 5 years.

Approximately $47,866,400 of cash will be required to retire the special stock, including the accrued dividend, on April 15, 1935.

Inventories.—Inventories in factories and warehouses and on consignment have been valued, in accordance with the custom of your company, at the lower of cost or market. After deducting reserves for slow moving and obsolete stocks and contingencies, they were carried at $51,313,973.01, compared with $45,467,409.19 at the end of 1933. The increase of 13 percent resulted from a 29 percent greater volume of orders received, and from a larger amount of unfilled orders at the end of the year.

OTHER ASSETS

Restricted balances in closed banks at the end of 1933 amounted to $2,750,326, against which reserves of $1,261,990 had been set up to cover possible ultimate losses. These balances were reduced by dividends and adjustments to $1,436,351 at the end of 1934, against which there were reserves of $713,539. Losses realized during 1934 amounted to $219,956.

Loans to employees have been substantially reduced, and all except $3,563 were fully secured. The unsecured portion was covered by a reserve of equal amount. There were no loans to officers or directors of the company.

INVESTMENTS

General.—Revaluation of investments resulted in a charge to earned surplus of $1,195,792.85 (p. 3), leaving a final valuation of $158,971,911.56, compared with $154,682,340.94 at the end of 1933.

Investments in and advances to affiliated companies (which are all companies controlled through stock ownership) are carried on the books at an amount which is adjusted annually by charges or credits to surplus to reflect changes in their net worth, determined on the same general basis of accounting as that followed by the General Electric Co.

All other securities of an investment character are adjusted either to market prices, where there is an established market, or to estimated fair values, where no market exists, but the principle is followed of not valuing any group in excess of its cost.

Foreign currencies are converted at or below the rates current on December 31, 1934, and not in excess of the par of exchange existing in March 1933. The

Digitized by Google

general principle followed is to convert gold currencies at former parity, and currencies not on a gold basis, or where exchange or transfer restrictions exist, at rates which are lower than the "nominal" rates, to provide a reasonable margin of safety.

Interest and dividends received from affiliated companies in the United States, from Canadian General Electric Co., Ltd., and from International General Electric Co., Inc., are included in the "Statement of income and earned surplus" as part of "Interest and dividends from affiliated companies and miscellaneous investments." Total income from affiliated companies and miscellaneous investments amounted to $5,608,910.72, which included dividends of $4,314,200.86 received from affiliated companies. Your company's proportionate share in the excess of losses over undistributed earnings of these companies for 1934 was approximately $75,000, and this amount has been provided for in the revaluation of investments.

Income from affiliated companies and miscellaneous investments was 3.6 percent of the average value of such investments at the beginning and end of the year, compared with 2.8 percent for 1933.

The companies reviewed in succeeding paragraphs represent 90 percent of the value of your company's investments in affiliated companies, and contributed 93 percent of the net income derived therefrom.

Foreign business.—International General Electric Co., Inc., which conducts the export and foreign business of your company outside of Canada, had a profit available for interest on capital advances and dividends of $2,263,549 for 1934 compared with $2,302,499 for 1933. Interest on capital advances and cash dividends paid in 1934 amounted to $2,143,986, compared with $1,500,000 in 1933. International General Electric Co.'s proportionate share in the excess of undistributed earnings over losses of its affiliated companies for 1934 was approximately $1,300,000.

Canadian General Electric Co., Ltd., reported a profit of $989,166 for 1934, compared with $635,176 for 1933. Cash dividends were paid at an annual rate of 7 percent ($3.50 a share) on the preference stock, and 6 percent ($3 a share) on the common stock.

G. E. Employees Securities Corporation.—Earnings of G. E. Employees Securities Corporation were $1,505,920 for 1934, compared with $1,724,680 for 1933. Cash dividends were paid at an annual rate of 8 percent ($8 a share) on the preferred stock, and in the amount of $800,000 on the common stock. Further information pertaining to this corporation appears on page 15.

United Electric Securities Co.—United Electric Securities Co. was liquidated in 1934. Electrical Securities Corporation purchased its more important assets, consisting principally of stocks, bonds and notes, at market prices where there was an established market, and at prices determined by an independent appraisal where there was no established market. The amount realized by your company from the liquidation was $16,658,884, which was $2,015,117 less than the amount at which the investment was valued on your company's books. This difference was taken into account in the revaluation of investments.

Electrical Securities Corporation.—Your company increased its permanent investment in Electrical Securities Corporation by taking 250,000 additional shares of its no par value common stock for $6,250,000, and by adding $6,000,000 to its paid in capital surplus. Your company also advanced $4,645,000, for which notes of Electrical Securities Corporation are held.

Earnings of Electrical Securities Corporation were $2,302,981 for 1934, compared with $2,250,551 for 1933. Cash dividends were paid at an annual rate of $5 a share on the preferred stock, and in the amount of $1,219,000 on the common stock.

General Electric Contracts Corporation.—Your Company advanced $6,675,000 to General Electric Contracts Corporation in 1934 to finance the growth of the installment financing business, making a total of $11,100,000 invested in this corporation at the end of the year.

Gross volume of contracts purchased was $17,034,153 during 1934, compared with $6,580,473 during 1933, and operations resulted in a net profit, after all charges except interest, of $217,879.

General Electric Realty Corporation.—The largest holding of the General Electric Realty Corporation is the General Electric Building in New York City, which houses the New York executive and sales offices and the New York offices of a number of affiliated companies. Rental for space occupied by your company is charged at market rates which are considerably below those previously paid in other locations. Other tenants bring the occupancy to a point where, in

Digitized by Google

1934, after full depreciation and other charges, there was a small return on the investment.

COLLECTIONS UNDER EMPLOYEES' PLANS

Collections under the unemployment emergency plan, formerly included in the balance sheet under this head, have been transferred to the General Electric employees' unemployment pension plan trust, thus accounting for most of the reduction from $3,904,690.80 to $2,759,859.96.

DEBENTURE BONDS

The board of directors voted, on December 28, 1934, to retire all outstanding bonded indebtedness of your company on August 1, 1935. This consists of $2,047,000 of 3½-percent gold debenture bonds, issued August 1, 1902, due August 1, 1942, and redeemable at 105 percent and accrued interest.

CAPITAL STOCK AND DIVIDENDS

There were no changes during the year in the special or common stock outstanding. Regular quarterly cash dividends of 15 cents a share on the special stock were declared. Four quarterly cash dividends of 15 cents each were declared on the common stock, that for the last quarter being paid on January 25, 1935.

The board of directors voted, on Devember 28, 1934, to retire all of the outstanding special stock of the company on April 15, 1935, at $11 a share and accrued dividends. Notice to this effect has been mailed to stockholders.

There are outstanding 4,292,963½ shares of special stock with a par value of $10 each. Payment of the retirement price of $11 a share and the accrued dividend of 15 cents will require approximately $47,866,400. This amount will be taken from current funds, and will leave sufficient cash for the operation of the business. Because of the prevailing low interest rates, and the absence of all interest on demand deposits, it is estimated that the company will save, by retirement of this special stock, the greater part of the dividends thereon, which amount annually to more than $2,575,000. The saving will accrue to the benefit of the holders of its common stock.

All of the special stock was originally distributed to holders of common stock as stock dividends. Approximately 65 percent of the outstanding shares of special stock are owned by holders of common stock.

STOCKHOLDERS

On December 28, 1934, there were 196,248 stockholders, compared with 188,316 on December 29, 1933. Of the 196,248 on December 28, 1934, 184,973 owned common stock and 11,275 owned special stock only.

Digitized by Google

ORGANIZATION CHANGES

George F. Baker requested that his name should not be presented for reelection as a director at the annual meeting on April 17, 1934.

Francis D. Bartow was elected a director on October 26, 1934, to fill an existing vacancy.

Robert Treat Paine, 2d, resigned as a director on November 23, 1934.

Theodore W. Frech resigned as vice president in charge of the incandescent lamp department on May 25, 1934. Mr. Frech remains with the company in an advisory capacity.

The following vice presidents were elected on May 25, 1934:

Hardage L. Andrews, in charge of activities connected with the electrification of steam railroads.

Joseph E. Kewley, in charge of the incandescent lamp department.

Roy C. Muir, in charge of the engineering department.

Earl O. Shreve, in association with Vice President John G. Barry, in charge of the commercial activities of the apparatus and supply business.

Charles E. Tullar, in charge of the patent department

William O. Batchelder, manager of the central district, was elected a commercial vice president on May 25, 1934, and will continue to have charge of commercial activities in that district.

EMPLOYEES AND PAY ROLL

The average number of employees of your company, not including those of affiliated companies, was 49,642 in 1934, compared with 41,560 in 1933. Total earnings of these employees amounted to $75,227,000 for 1934, and $55,287,000 for 1933, and average annual earnings per employee were $1,515 and $1,330 respectively, an increase of 13.9 percent.

Average annual earnings of employees for 1934 decreased 5.8 percent from 1923, compared with a decrease of 20.6 percent in the cost of living, according to the index of the National Industrial Conference Board.

Between March 1, 1933 (approximately the low), and December 31, 1934 (the high in 1934), the number of employees on the pay roll increased 36.7 percent, and the total annual pay-roll rate increased from $47,604,000 to $81,300,000, or 71 percent.

GENERAL PROFIT SHARING AND EXTRA COMPENSATION

The stockholders, at the annual meeting on April 17, 1934, authorized a supplementary compensation plan for employees in other than important and supervisory positions, now known as the general profit sharing plan, and approved the continuance of the extra compensation plans for employees in important and supervisory positions, including the executive officers.

Nothing was earned for 1934 under the general profit sharing plan. Under the extra compensation plans some departments earned in excess of 8 percent of the average investment. In these departments $854,627 is payable to 352 employees for 1934, compared with $824,696 payable to 295 employees for 1933. Nothing was earned for 1934 by any general executive not associated with a particular department.

EMPLOYEE PLANS

Group life and disability insurance.—At the close of 1934, approximately 49,200 employees were insured for $61,000,000 under the policy paid for by the company, and for $82,000,000 under the additional insurance plan paid for by employees, a total of $143,000,000.

Death and disability benefits paid during 1934 amounted to $1,124,508, consisting of $322,008 of company insurance and $802,500 of additional insurance. Since the inauguration of the first plan in 1920, payments aggregating $11,275,567 have been made, partly as death benefits to the families of 4,753 deceased employees, and partly as disability benefits to 716 employees.

Home ownership.—Three homes were acquired by employees under the home-ownership plan in 1934. During the past 11 years 2,735 homes, representing a value of $20,238,000, have been acquired or built by employees under the plan, which provides that second mortgages held by banks and other institutions may be guaranteed by the General Electric Co.

The total amount of mortgage guaranties was $5,280,474, which had been reduced by payments and adjustments to $837,800 at the close of 1934.

Total losses sustained by your company under this plan during its 11 years of operation have amounted to $112,365, of which $51,836 was incurred in 1934.

Digitized by Google

Savings.—During 1934 all of the outstanding 6-percent bonds of the G. E. Employees Securities Corporation were exchanged for 5-percent bonds or redeemed. The employee-owners of the 5-percent bonds will receive additional payments, up to a maximum of 2 percent, dependent upon and varying with the earnings of General Electric Co. when earnings reach or exceed 6 percent of its total common stock and earned surplus. No additional payment was earned or paid for 1934.

No offering of bonds has been made to employees since the enactment of the Securities Act of 1933. The savings of employees which were invested in bonds of the G. E. Employees Securities Corporation during its 11 years of existence have been of inestimable value, as they were utilized by many employees during the last few years. Despite substantial redemptions, 13,773 employees and former employees and their heirs, and the additional pension and stabilization of employment trusts, owned bonds on December 31, 1934, having a total value of $28,104,780, compared with 20,136 employees and $34,847,010, respectively, on December 31, 1933.

Pension and life retirement.—Company pension and life retirement payments aggregating $2,626,629 (the larger share of which was paid by the pension trust) were made during 1934 to 3,473 retired employees. Pension and life retirement payments, amounting to $13,041,666, have been made since the inauguration of the first plan in 1912. On December 31, 1934, there were 3,291 on the pension and life retirement rolls, whose average age was 67.1 years, whose average active service to date of retirement was 29.5 years, and whose average annual payment was $788.

The General Electric pension trust held assets of $23,021,649 on December 31, 1934, compared with $23,248,756 on December 31, 1933.

The additional pension plan has been established for 6½ years, during which period $273,795 has been added from this source to the amounts paid under the company pension plan. Payments made by employees to the additional pension trust, plus interest and less withdrawals, amounted to $6,000,812, which stood to the credit of 45,872 employees on December 31, 1934.

Assets of the General Electric pension trust and of the additional pension trust, title to which is vested in the respective trustees, are not included in the balance sheet of your company.

Employees unemployment pension plan.—The history of the General Electric employees unemployment pension plan and the unemployment emergency plan, since the inception of the original plan in 1930, has been given in former annual reports.

Administration of the plan is vested in boards of administrators, one-half of whose members are elected by and represent the employee participants, and the other half are appointed by the president and represent the company.

After months of study by the boards of administrators at the several works, the normal plan was amended to incorporate changes suggested by the experience of the past 4 years, and on November 1, 1934, the emergency was declared at an end and the amended normal plan became effective.

The fundamental principles of the original plan remain unchanged. One of the most important changes, urged by employees and adopted by the boards of administrators, provides for participation in the plan, as a mutual condition of employment, of all employees of the company except groups for which other protection against unemployment is provided by the company pursuant to law or otherwise, and salaried employees receiving more than $50 a week.

The company continues to give the plan its financial support, paying into the fund an amount equal to that paid by all employees. From the inauguration of the first plan in June 1930, to December 31, 1934, collections amounted to $6,047,000 as follows: $1,691,000 from employees eligible for benefits under the plan, $1,190,000 from other employees, $2,881,000 from the company, and $285,000 from retired employees, interest, etc. During the same period $3,288,000 was distributed as benefits, $646,000 was loaned (of which $279,000 has been repaid), and, on December 31, 1934, there was $2,392,000 in the trust fund.

Employment guarantee.—During 1934 the incandescent lamp department, under its stabilization of employment plan, guaranteed to employees compensated by hourly or piecework rates, and with 2 or more years of service, 62 percent of normal maximum hours prescribed by the code of the National Electrical Manufacturers Association, less time lost through illness and emergencies beyond

Digitized by Google

the control of the company. Approximately 3,000 employees were covered by this guarantee. During the 4 years that a guarantee of employment has been in effect, the employees have accumulated $116,733 in a trust fund for savings which is part of the plan. The plan has been renewed for 1935 with modifications making it available to all employees in the department with one or more years of service, except those receiving more than $50 a week

CHARLES A. COFFIN FOUNDATION

The following awards were made during 1934 under the provisions of the foundation:

The committee of the Edison Electric Institute awarded the Charles A. Coffin Medal to the Hartford (Conn.) Electric Light Co. for having made, during the previous year, distinguished contribution to the development of electric light and power for the convenience of the public and the benefit of the industry.

In addition to the medal, $1,000 was given to the Employees' Club of the Hartford Electric Light Co.

The committee representing the American Institute of Electrical Engineers, the Society for the Promotion of Engineering Education, and the National Academy of Sciences awarded Charles A. Coffin Fellowships to eight graduates of American colleges who desired to carry on postgraduate research work and who needed and were found worthy of assistance. Since the creation of the foundation 97 fellowships, aggregating $59,500, have been granted to 79 individuals (18 having received fellowships 2 years in succession).

A study of the fellowships granted has shown that of the 45 men to whom fellowships were awarded during the period 1923–29, the names of 27 appear in American Men of Science. Although the foundation has existed for only 12 years, many of the recipients of the fellowships have already made distinguished contributions in the field of research.

The advisory committee of your company awarded 32 Charles A. Coffin Foundation Certificates of Merit, accompanied by honorariums in cash, to employees for meritorious work and distinguished service. This group comprised 5 workmen in the shops, 1 tool designer, 9 foremen, 11 engineers, and 6 members of the commercial and administrative organizations.

The report of the independent auditors, attesting to the correctness of the financial statements, appears on page 6.

By order of the board of directors.

OWEN D. YOUNG, *Chairman.*
GERARD SWOPE, *President.*

BOARD OF DIRECTORS

Gordon Abbot, Charles F. Adams, Francis D. Bartow, Thomas Cochran, George P. Gardner, Francis L. Higginson, Jesse R. Lovejoy, Henry C. McElDowney, George F. Morrison, Marsden J. Perry, Seward Prosser, E. Wilbur Rice, Jr., Henry M. Robinson, Philip Stockton, Bernard E. Sunny, Gerard Swope, Burton G. Tremaine, Clarence M. Woolley, Owen D. Young.

OFFICERS

E. Wilbur Rice, Jr., honorary chairman of the board; Owen D. Young, chairman; Gerard Swope, president.

Honorary vice presidents: Cummings C. Chesney, Jesse R. Lovejoy, George Morrison, Burton G. Tremaine.

Vice presidents: Edwin W. Allen, Hardage L. Andrews, Charles W. Appleton, John G. Barry, William R. Burrows, Joseph E. Kewley, Roy C. Muir, Darius E. Peck, Theodore K. Quinn, Earl O. Shreve, Charles E. Tullar, Willis R. Whitney, Charles E. Wilson.

William D. Coolidge, director of the research laboratory; Samuel L. Whitestone, comptroller; Robert S. Murray, treasurer; William W. Trench, secretary.

Commercial vice presidents: Howel H. Barnes, Jr., William O. Batchelder, James A. Cranston, William J. Hanley, Charles K. West.

B. LICENSE—LARGE INCANDESCENT LAMPS

GENERAL ELECTRIC COMPANY, LICENSOR, AND _____ LICENSEE, _____, 193__

Agreement, made this first day of_____, 193__, between Electric Company, a New York Corporation, hereinafter referred to Licensor, and _____, a_____ poration, hereinafter referred to as the Licensee.

RECITALS

Whereas the Licensor is the owner of, or has the right to grant license the United States Letters Patent enumerated in Schedule A hereto attac made part hereof, and is also the owner of various applications for Patent, all of which relate to, or to the manufacture of, incandescent lamps (as hereinafter defined), and

Whereas the Large Tungsten Lamp License Agreement, dated _____ 19__, with all amendments thereto between the Licensor and Licensee wi terms, expire in the year 1934, (said License with the amendments there sometimes hereinafter referred to as the Large Tungsten Lamp License),

Whereas the Licensor for years has continuously expended effort ar sums of money in research and development work on incandescent lamp automatic machinery and processes for the manufacture of such lamps s stantial improvements have resulted therefrom, not only in better qua higher efficiency of the lamps themselves, but also in savings in the costs c facture and in lowered selling prices to the public; and certain Unite patents have been issued to, and are owned by, the Licensor on said impro in incandescent electric lamps, the inventions of which are embodied in the products now being manufactured and sold by both the Licensor Licensee, among which patents are:

1410499, March 21, 1922 (Pacz).
1423956, July 25, 1922 (Mitchell & White).
1498908, June 24, 1924 (Fink).
1621360, March 15, 1927 (Falge).
1687510, October 16, 1928 (Pipkin).

and certain United States patents have issued to, and are owned by, the I on said automatic machinery and processes, the inventions of which used by the Licensor, and some or all of which are now used by the Lice the manufacture of lamps, among which patents are:

And whereas, the Licensee desires definite assurance, by way of license may continue to make, use, and sell incandescent electric lamps under the Li patents after said Miniature Tungsten Lamp License expires; the Licensee such assurance at this time in order that it may more effectively make plan future conduct of its business, and

Digitized by Google

Whereas the Licensor is willing to accede to said requests of the Licensee, but without increasing the quantity of lamps which the Licensee has heretofore been licensed to make, use, and sell under said Large Tungsten Lamp License, and only upon and under the terms and conditions hereinafter set forth,

Now, therefore, it is agreed as follows:—

ART 1. TERMINATION OF PRIOR LICENSE

Said Large Tungsten Lamp License agreement dated_____, 19__, and all amendments thereto, shall terminate as of_____, 193__, and each party is hereby relieved of all obligations accruing thereunder after said date, except the payment of royalties and the purchase price of materials and parts accruing up to that date; and the rights and obligations of the parties hereto, with reference to incandescent lamps, shall from and after said date be those set forth in this agreement.

Each party does hereby release and discharge the other from all claims and demands whatever, to the date hereof, which in any manner arise or grow out of said Large Tungsten Lamp License Agreement between the parties hereto, except royalties owing thereunder by the Licensee to the Licensor, and except obligations for the purchase price of materials and parts purchased by the Licensee from the Licensor.

Provided, however, that contracts (other than said Large Tungsten Lamp License Agreement) heretofore made between the parties hereto for the sale of lamp-making machinery, appliances, and materials to the Licensee shall not be affected hereby, but the rights and obligations of the parties under such contracts shall remain and continue in full force and effect.

ART. 2. DEFINITIONS

(A) The Licensor uses and proposes to use, in the regular transaction of its business, schedules describing the Style, large or miniature, the Classification, vacuum or gas filled, and the Size, based on wattage or candle-power of the lamps manufactured and sold by it, which schedules are subject to change by the Licensor from time to time. The expression "lamp" or "incandescent lamp" when used in this agreement has reference only to the Miniature Style of the incandescent lamp of either Classification and varying sizes, for the manufacture and for the sale of which this license is granted by the Licensor to the Licensee. The Style and the Classification to which a lamp belongs shall be determined by the definitions or descriptions thereof in said schedules of the Licensor as they shall exist at the time when such lamp is sold.

(B) An incandescent lamp is defined for the purposes of this agreement and for the entire term thereof as any such so-called miniature Style lamp, the primary purpose of which is to convert electric energy into light by the passage of an electric current through a solid metallic or non-metallic filament, in a hermetically sealed enclosure, and is intended for use mainly as an illuminant, and provided that the light produced by the lamp is due to the resistance offered by such filament to the passage of electric current therethrough; and, provided further, this definition shall not include vaccum lamps of the ordinary carbon filament type and designed to give approximately 3.4 lumens per watt.

(C) The expression "patents" wherever used, includes patent applications and and patents to issue on such applications.

(D) The term "net sales" as used herein shall mean the amounts paid or owing to the parties hereto respectively, on account of incandescent lamps sold and shipped, after deducting the compensation, if any, paid to factors or other similar agents to whom lamps have been consigned for sale.

ART. 3. LICENSES

(A) This license and agreement relates to, and to machines and processes for the manufacture of, incandescent lamps as herein defined, and the rights herein granted under patents shall extend only so far as the patented inventions relate to incandescent lamps or are usable therein or in the manufacture thereof; and no rights are herein granted to use the patented inventions for any other purpose.

(B) The Licensor hereby grants to the Licensee, under all United States patents relating to or to the manufacture of incandescent lamps which it now or hereafter owns or controls or under which it has or may have the right to grant such license, subject to the herein contained provisions, exceptions, and limitations, all of which are conditions of such grant, a non-exclusive license to make large Style incandescent lamps in the territory covered by patents of the

Digitized by Google

United States, and to use the same in said territory, and to sell the lamps so made in and for use in said territory, but only to an amount not greater than that hereinafter specified.

(C) This license is limited to net sales of large Style incandescent lamps in and for use in the territory aforesaid in each calendar year to an amount expressed in dollars which shall not exceed an amount equal to _____ per cent (____%) of the net sales of the Licensor during that year in and for use in the United States of large Style incandescent lamps embodying or made in accordance with or by the use of any of the inventions with reference to which license is hereby granted by the Licensor.

This license is further limited to the manufacture in each calendar year of incandescent lamps to the number necessary to provide for such amount of sales.

The amount of sales hereby licensed is sometimes hereinafter referred to as licensed amount.

To enable the Licensee to observe this Section, the Licensor will, within forty (40) days after the end of each calendar month, mail a statement of the licensed amount for that month, to the Licensee and to an independent firm of certified public accountants (herein referred to as the accountants). Within forty (40) days after the end of each calendar year, the Licensor will similarly mail to the Licensee and to the accountants a statement of the licensed amount for that year.

The accountants shall, semiannually, inspect the Licensor's records and verify it statements of the licensed amount for the preceding six-month period, and shall promptly, by notice to both parties, correct any error, if any, which appears in Licensor's statement of said licensed amount. The reports of the Licensor, when verified and/or corrected by the accountants, shall be conclusive upon both parties hereto for all purposes hereof.

Whenever, by the expiration of patents or otherwise, any incandescent lamps are no longer licensed hereunder, and no machine, method, process, or appliance by the use of, or in accordance with which the same are made, is licensed hereunder, such lamps shall be omitted from the Licensor's and Licensee's computations and reports of sales for the purposes of this agreement.

In computing the licensed amount aforesaid, the export business of the Licensor shall be excluded. Domestic sales for export by the Licensor to its subsidiary or subsidiaries engaged in exporting shall also be excluded except where the lamps so sold are not actually exported.

In computing the net sales of the Licensee account shall be taken of all amounts paid or owing to the Licensee either directly or indirectly, as, for example, if its lamps are sold to or through a person, firm or selling company substantially controlling or controlled by or closely associated with the Licensee or in which the Licensee is interested, the amounts paid or owing to the person, firm or company so selling the Licensee's lamps shall be taken as those paid or owing to the Licensee.

The licensed amount for the calendar year 19__, shall be computed on the Licensor's net sales for the entire year; and the Licensee's sales during the entire year 19__ shall be regarded as having been made under this license.

Lamps shall be regarded as sold when they are billed out, or if not billed out, then when they are delivered, or when they are paid for, if they are paid for before delivery. Lamps shall also be regarded as sold if they are used, employed or disposed of in any manner other than by sale. In such case the lamps so used, employed or disposed of shall be taken as sold at the Licensee's average selling price for similar lamps during the month in which the lamps were reported as so used, employed or disposed

If, because of a general price reduction or reductions in the incandescent lamp industry, the Licensee shall make actual adjustments with merchandising customers with respect to the price of lamps previously sold by the Licensee to such customers, the amounts so paid or credited by the Licensee to such customers may be deducted from the Licensee's report of net sales for the month in which such adjustment is made; provided, however, that the foregoing shall not apply to adjustments with consuming purchasers.

If the Licensor shall make a change or changes in its schedules whereby lamps are transferred from its Large Style schedule to its Miniature Style schedule, the Licensor's net sales of the lamps so transferred shall thereafter be included in computing the Licensee's licensed amount, deducting therefrom, however, the Licensor's net sales of lamps which the Licensor shall have transferred from its Miniature Style schedule to its Large Style schedule. The Licensee's license to make and sell the lamps so transferred from the Licensor's Large Style schedule to the Licensor's Miniature Style schedule shall not be affected by such transfer.

Digitized by Google

If the net sales of the Licensee in any calendar year shall be less than its licensed amount for such year (exclusive of additions which may be made thereto because of a shortage in the preceding year as herein provided) the Licensee may in the next succeeding calendar year sell, under this license, an additional amount of incandescent lamps equal to the amount of such shortage (but not more than ten percent (10%) of the licensed amount for the calendar year in which the shortage occurred). The right to make such sales in addition to the licensed amount is not cumulative and may be exercised only in the calendar year immediately following the calendar year in which the shortage occurred. .

The Licensee agrees that it will endeavor to confine its yearly manufacture and sale of lamps, under this license, to the amount licensed for that year; and agrees that the sale by it in any calendar year of lamps to an amount ten percent (10%) in excess of its said licensed amount shall constitute a breach of this agreement for which this license may be cancelled by the Licensor as provided in Article VII, Section B. The Licensee agrees to pay additional royalty on all excess over five percent (5%) as provided in the paragraph marked "Second" Section C, Article V hereof, whether or not the Licensor shall cancel the License.

It is agreed that the provisions with respect to the limitation upon the amount of lamps licensed to be manufactured and sold hereunder are of the essence of this agreement, and that in the absence of such provisions and limitations the Licensor would not have granted this license.

(D) No license is granted to manufacture lamp bulbs, glass tubing or cane glass or lamp bases, but the Licensee shall be free to manufacture or purchase bulbs, tubing, cane glass or bases, provided that such manufacture or the bulbs, tubing, cane or bases, so manufactured or purchased do not infringe patent rights of the Licensor.

(E) No license is granted under foreign patents; no license is granted to export incandescent lamps or to sell lamps for export; and no license is granted to sell any part of an incandescent lamp (as distinguished from the complete lamp), or any machine, appliance, or material, or any part thereof, covered by or made in accordance with or by the use of any of the inventions with reference to which license is hereby granted by the Licensor.

(F) Except to the extent and except as otherwise herein provided, the Licensee is itself licensed to manufacture solely for its own use in the conduct of its business as a manufacturer of incandescent lamps under this License and not otherwise, any lamp-making machinery and/or appliance and/or materials covered by any patent and/or patents included in this license or to purchase the same in each case, solely for such use, but from such others only as are licensed by the Licensor to manufacture them for sale. If, as and when such manufacturers are licensed, their names will be communicated to the Licensee.

(G) The Licensee is licensed to refill burned out incandescent lamps and sell such refilled lamps treating them as new lamps for all the purposes of this license, provided that all trade-marks and names on the burned out lamps be completely obliterated and the word "Renewed" be plainly and conspicuously etched on the bulbs of such renewed lamps.

(H) As part consideration for the granting of this License, the Licensee hereby grants to the Licensor without further consideration a nonexclusive, divisible license, with the right to grant sublicenses, to make, use, and sell incandescent lamps of all kinds, types, and sizes, whether miniature or not, and machines, appliances and materials for the manufacture of such incandescent lamps, within and throughout the entire United States of America, its territories and possessions, under any and all patents or patent rights which the Licensee and/or its officers and directors now own or control or which it or they may hereafter own or control during the term of this agreement for the life of the patents respectively. This license from the Licensee shall not terminate with the termination of this Agreement, but shall extend to the end of the term of the patents respectively. The license thus granted may be extended by the Licensor to, and if so extended shall enure to the benefit of, any other licensee to the extent to which, and for the period for which, the said other licensee has granted or shall grant the Licensor a similar license of the same or less scope for the same territory or any portion thereof.

(I) In so far as the Licensor is required by contract to demand of the Licensee non-exclusive licenses, under foreign patents, the Licensee will grant such licenses under any foreign patent it may own.

(J) The Licensor shall be under no obligation to supply the Licensee with machinery, appliances, materials, information, or assistance of any sort except as specifically set forth herein.

Digitized by Google

(K) The admission of validity implied by the acceptance of the licenses herein granted is limited to the life of the licenses and to the fields of use for which said licenses are granted.

This admission shall not continue with respect to any claim which shall have been held invalid by a Court of final jurisdiction, or by a lower court from the decision of which no appeal or other proceeding is taken within the time provided by law, provided, however, that if the Licensor proceeds promptly and in good faith with further litigation designed and intended to sustain the validity of such claim and it is thereafter held valid, whether in the same or another circuit, such claim shall for the purpose of this agreement be regarded as valid.

ART. IV. PATENT MARKING, TRADE MARKS, ETC.

(A) The Licensee agrees to comply with the reasonable requirements of the Licensor as to marking on lamps manufactured under this license and on packages containing such lamps the dates and/or the numbers of the patents under which this license is granted and applicable to such lamps, and as to including in such packages notices, in form approved by the Licensor, relating to such patents. The Licensee agrees that neither the Licensor's name nor its marks "G. E.", "MAZDA", "Edison", or "National" nor any of its other trade-marks or brands nor the name of any of the trade-marks or brands of any of its other licensese, nor a simulation of any of these, shall be used in connection with the advertisement or sale of or be placed upon any lamps manufactured under this license. The Licensee further agrees that it will not handle or deal in lamps covered by any patents included herein which falsely bear or are sold under any name or trade-mark, or simulation thereof, either of the Licensor or any of its licensees. It is the intent of the parties that the Licensee's business shall rest entirely on its own good will and not in any part on the good will of others operating under the same patents. And to this end the Licensee covenants not to advertise or sell incandescent lamps bearing the mark "G. E.", "MAZDA", "Edison", "National", or any other mark or brand used by the Licensor, or any of its other licensees, in connection with or as a part of any entire order for or sale of the Licensee's lamps or as an inducement to obtain such order or to make such sale.

Provided, however, that the Licensee may describe its product on cartons and advertising matter as "Licensed under General Electric Company's Incandescent Lamp Patents" where all of said words are in type of the same size and face, and no part of said phrase appears more prominently than the rest, and where the name of the Licensee appears in full and in larger or more prominent type than is used in said phrase.

And provided, further, that lamps purchased by the Licensee from another Licensee (holding a License from the Licensor in the same form as this License) under Section E of Article V hereof may bear a trade-mark or brand of the Licensee by which such lamps were manufactured, if placed thereon by such other licensed manufacturer, and may be advertised and sold under such trade-mark or brand.

(B) The Licensee agrees to mark on every incandescent lamp manufactured by it hereunder, the word ---------- (and/or such other trade-mark or brand as the Licensee shall have given hereunder notice to the Licensor that it has adopted), by etching, stamping, or in some other permanent form, and no lamps shall be deemed to have been manufactured or sold by the Licensee hereunder, and no lamp shall be a licensed lamp, unless it bears one of said marks.

ARTICLE V

(A) The Licensee shall deliver to the Licensor reports when called for by the Licensor, on such forms as may be established from time to time by the Licensor, containing full information and description of the number of lamps of each Style and Classification and wattage or candle-power manufactured or sold by the Licensee, and also any other facts which may be helpful in determining whether the terms of this license have been carried out. The Licensee agrees that it will keep full and accurate books of account with reference to its manufacture, sale, use and shipment of all incandescent lamps covered by this License, and that such books shall, at all reasonable times during business hours, be open to the inspection of any certified public accountant selected by the Licensor for the purpose of verifying the statements to be made under this agreement, and that its manufacturing premises and storerooms shall likewise be open to any representative of the Licensor for the purpose of investigating and ascertaining the facts as to the Licensee's manufacture of lamps licensed hereunder and generally for investigating the Licensee's operations to the extent necessary to determine whether the Licensee is performing its obligations under this Agreement.

Digitized by Google

(B) The Licensee shall, on or before the last day of each month, deliver to the Licensor a sworn statement on forms provided by the Licensor, giving full information and description of the number, Style, Classification and wattage or candlepower of all lamps "sold" by it hereunder during the preceding calendar month. This report shall also give the net sales of such lamps by the Licensee, and the amounts which would have been received by it if such lamps had been sold at the Licensor's minimum net prices to purchasers under contract other than Central Station Lighting Companies less an additional five per cent (5%) discount, as ascertained from the regular schedules of the Licensor in force during the period and furnished to the Licensee as hereinafter provided. The Licensee shall, on or before the tenth of the following month, pay to the Licensor the amounts due for royalties for the month covered by said report.

Within ninety days from the first day of each January, beginning January, 193--, there shall be a final settlement for the preceding year of the royalties and amounts due or paid on lamps sold during the preceding year on the basis herein set forth, taking adjustments into consideration.

Lamps with respect to which no payments shall have been made by the customer, (or on which the full payment shall have been refunded) because they are lost or damaged in transit or are not accepted by the customer and which are actually returned as defective, may with the consent of the Licensor be deducted from the report of the month in which they are so returned, except in cases where they are returned in one month and the full payment is refunded in a later month, in which case they may be deducted from the report of the said later month.

(C) The amounts on which all royalties shall be computed (except the additional royalty provided for in paragraph marked Second, hereof), hereinafter called the "royalty amounts," shall be determined by applying to the Classifications of lamps sold hereunder by the Licensee, the Licensor's minimum net prices to purchasers under contract, other than Central Station Lighting Companies, applicable respectively to such Classifications as ascertained from the Licensor's regular schedules from time to time in force. Such schedules now in force are annexed hereto and marked Schedule B, and new schedules will be furnished to the Licensee from time to time as changes may be made therein, and when so furnished shall stand as Schedule B for the period during which they are in force by the Licensor. No restriction is placed on the prices at which the Licensee may sell lamps hereunder and it is agreed that the purpose of Schedule B is not to fix prices at which the Licensee shall sell lamps but to fix a basis for computing royalties to be paid by the Licensee.

The Licensee shall pay royalty with respect to all incandescent lamps "sold" as above defined which embody or are made in accordance with or by the use of any invention or any unexpired patent now or hereafter issued under which license is or may be acquired hereunder, as follows:

First, a royalty of three and one-third per cent (3⅓%) of the "royalty amounts" determined as above.

Second, an additional royalty of twenty per cent (20%) of the net sales of the Licensee in excess of five per cent (5%) over the Licensee's licensed amount for that calendar year.

Third, with respect only to patents, if any, hereafter acquired by the Licensor, and/or under which it has a right to grant licenses, under which royalties are payable by it, in addition to the above stipulated royalties, the amounts required to be paid out by the Licensor as royalties because of the Licensee's operations.

(D) If the royalties payable by the Licensee for any month are all actually received by the Licensor from the Licensee within the time specified, if proper reports are promptly made, and if this Agreement is observed in all other respects by the Licensee, the Licensor will accept ninety percent (90%) of said royalty "First", as above ascertained, as full payment with respect to such royalty for said month, but unless the royalties and reports are actually received by the Licensor on or before the day when the same are due, said royalty "First" will not be satisfied and discharged except on payment of the full amount thereof; provided, however, that a report or royalty remittance will be deemed to have been actually received by the Licensor if the post mark on the envelope containing same shows that said report or royalty payment was deposited in the United States mail, duly stamped and addressed, on or before the date when due.

(E) This license is intended to empower the Licensee to manufacture incandescent lamps itself and to use and sell the incandescent lamps so manufactured, in accordance with the various provisions hereof. If the Licensee purchases from other licensees of the Licensor licensed to make and sell such incandescent lamps, to an amount not exceeding ten percent (10%) of the net sales by the

Digitized by Google

Licensee of incandescent lamps in that calendar year, it shall report the same as a part of its licensed amount and pay royalty thereon, in all respects as though they had been manufactured by the Licensee itself under this Agreement, and the licensee from whom the purchases were made is not required to report such sales as a part of its licensed amount nor pay royalties thereon.

The foregoing limited exemption from reporting and paying royalties on sales to another licensee shall not be enlarged by indirect methods, such, for example, as (but without limiting the generality of the foregoing), by making a contract for the sale of lamps in the name of the Licensee but in part for the account of another Licensee as undisclosed principal, or by delivering, under a sale contract made by the Licensee, lamps manufactured by another licensee, the Licensee acting therein as agent for such other licensee.

ART. VI. NOTICES

Notices hereunder may be served on the Licensor by registered letter addressed to the Manager of the Incandescent Lamp Department of the General Electric Company, Nela Park, Cleveland, Ohio; and notices hereunder may be served on the Licensee by registered letter addressed to it at .....

Either party may be at any time by notice so served on the other change its address for this purpose, as given above, to any place in the United States where it maintains its principal office or principal lamp sales office.

ART. VII. TERM AND TERMINATION

(A) This Agreement shall continue in force until December 31, 1944, unless previously terminated as herein provided.

(B) If the Licensee fails to make reports or payments as provided for hereunder or violates any other covenant of this agreement on the part of the Licensee to be performed or observed (unless the Licensor has waived such breach in writing), the Licensor may serve notice of such breach or action upon the Licensee, and unless such breach is fully repaired or a demand for arbitration given as hereinafter provided within thirty days from the receipt of the notice by the Licensee, the Licensor (unless such breach has been waived by it in writing) may serve notice of cancellation. On service of such notice of cancellation this contract shall *ipso facto* terminate.

(C) The Licensee may at will cancel and terminate this agreement by giving the Licensor six months' notice in writing.

(D) If notice of the breach or action complained of be given by the Licensor to the Licensee under Section (B) of this Article VII, and if the question of such breach or action be thereafter submitted to arbitration as hereinafter provided, then the termination of this agreement shall await the award of the arbitrators. If the arbitrators, or a majority of them, shall determine that the Licensee has sold, in any calendar year, lamps of the character covered by this license to an amount ten percent or more in excess of its licensed amount for such year, and/or that the Licensee has failed to make reports and payments as provided for hereunder and/or otherwise violated any covenant of this agreement, then (unless the breach has been waived by the Licensor in writing) this agreement shall terminate *ipso facto* as of the date of such award. Provided, however, that if the breach or breaches so found and determined by the arbitrators shall not include the sale by the Licensee, in any calendar year, of lamps of the character covered by this license to an amount ten percent or more in excess of its licensed amount for such year, then the cancellation and termination of this agreement shall not take effect until the expiration of ten days after the date of such award. If during such period of ten days the Licensee shall fully repair each and every breach so determined by the arbitrators, then such award shall be deemed to have been fully performed and satisfied by the Licensee, and this agreement shall not terminate by reason of such breach.

(E) It is recognized that any termination of this agreement puts an end to the Licensee's license, and that thereupon the machines theretofore purchased or made hereunder by or for the Licensee become unlicensed. Lamps and parts on hand also become unlicensed.

(F) On any termination of this agreement the Licensee agrees promptly to make reports required hereunder to the date of such termination and to pay within thirty days after such termination all amounts due to the Licensor hereunder.

Digitized by Google

(G) No delay or omission of the Licensor to exercise or enforce any right or power, or seek a remedy accruing upon any default or upon any breach by the Licensee of any agreement, term or provision herein contained, shall impair any such right, power or remedy, or shall be construed to be a waiver of any such default or breach, or to be an acquiescence therein, and every right, power and remedy of the Licensor may be exercised from time to time as may be deemed expedient by the Licensor.

(H) If the Licensee shall sell, in any calendar year, lamps of the character covered by this license to an amount in excess of its licensed amount for that year, or shall fail to make reports or payments provided for or required hereunder, or otherwise violates any covenant of this agreement, then and in any such case the acceptance by the Licensor of any royalty from the Licensee and/or the furnishing by the Licensor of any parts or materials to the Licensee, and/or any failure of the Licensor to enforce its rights or seek its remedies, during such calendar year or during the first six months of the succeeding calendar year, shall not be deemed or held to be a waiver by the Licensor of its rights to cancel and terminate this agreement or to require arbitration under Article VIII hereof. Nor shall any such acceptance of royalty or furnishing of parts or materials by the Licensor during the pendency of any arbitration proceeding under said Article VIII, or within thirty (30) days after the award of the arbitrators therein, be deemed or held to be a waiver of any right or remedy of the Licensor growing out of the default or violation of this agreement submitted to such arbitration.

ART. VIII. ARBITRATION

Any controversy arising under or out of or concerning any term or covenant of this agreement, shall, at the option of either party hereto, be submitted to arbitration in the City of New York under and pursuant to the arbitration law of the State of New York and the provisions of the Civil Practice Act relative to arbitration and to the following conditions so far as consistent therewith:

Either party may give written notice of his desire for arbitration by registered mail sent to the other party at his last known address, and in such notice shall nominate an individual to act as arbitrator. Within ten days after the receipt of such notice the other party shall nominate another individual to act as arbitrator. Within five days thereafter the two arbitrators shall select a third arbitrator to act with them. In case of their failure to agree upon such a third arbitrator, either party may call upon the president or acting president for the time being of the Chamber of Commerce of the State of New York to name the third arbitrator, and if either party shall fail to name the arbitrator to be selected by him, the said president or acting president may also select such arbitrator, all such selections to have the same force and effect as if the parties had themselves agreed upon the nomination. All arbitrators shall be impartial and shall have no business connection with any of the parties. The power to designate arbitrators herein by the officer of the Chamber of Commerce shall be regarded as irrevocable.

Upon the selection of the three arbitrators they shall meet promptly, and take oaths, before a notary public or other officer authorized to administer oaths, faithfully to discharge their duties as such arbitrators; they shall give full and fair opportunity to each party to present its evidence in the presence of the others, to examine and cross-examine witnesses, and to be represented by counsel if desired. The procedure shall in all respects be in accordance with the law of the State of New York, but nothing herein contained shall prevent the arbitrators at their discretion, for the convenience of themselves or the parties or witnesses, from holding hearings at any point within or without the State of New York. They may, in their discretion, receive evidence in such form as they desire, including the form of affidavits or authenticated copies of documents, and may administer oaths to witnesses.

The arbitrators shall make their award promptly and in writing and signed by them or any two of them. The concurrence of any two in the award shall be sufficient. The award shall include the fixing and determination of the expense of arbitration, including the fees of the arbitrators and the determination of what proportion of the expense up to the entire amount shall be borne by either party. Duplicate copies of the award shall be furnished both parties.

Judgment upon the award may be entered in any court of record in the State of New York.

Each party does hereby irrevocably designate the secretary for the time being of the Chamber of Commerce of the State of New York as his agent within the State of New York to receive any notice or other paper relating to the enforcement of any of the provisions of this clause, including notice of application to

Digitized by Google

confirm, vacate, or modify any award which may be rendered, and/or to enter judgment thereon, or to enforce this provision for arbitration.

Notwithstanding the provision herein that the city of New York shall be the place and the laws of the State of New York shall govern the arbitration, if for any reason such provisions are not legally enforceable, nevertheless the agreement to arbitrate herein shall be regarded as substantial and, to the extent and in the form permitted by the rules of any jurisdiction in which it may be enforced, shall be made effective, the intention hereof being to make the said provision valid, irrevocable, and enforceable.

ARTICLE IX

This agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Licensor. This agreement shall not be assignable or divisible by the Licensee without the written consent of the Licensor. Any attempt on the part of the Licensee to assign or divide without such consent shall constitute a breach of the agreement within the meaning of Section (B) of Article VII. Similarly it shall constitute a breach if the Licensee without the written consent of the Licensor passes into the control of or assumes control of or is operated in the interest of any other manufacturer of incandescent lamps or any consumer of or dealer in incandescent lamps, or if the Licensee and any such manufacturer, dealer, or consumer become substantially owned or controlled by the same interests.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed and their seals to be hereto attached at New York, N. Y., on the day and year first above written.

1560936	Force	Nov. 10, 1925	Mercury Vapor Device.
1560981	De Graaf and Lely	do	Manufacture of Incandescent Lamps.
1566848	Fonda	Dec. 22, 1925	Incandescent Lamp.
1569095	Laise	Jan. 12, 1926	Body of High Electron and Light Emission and Process of Making Same.
1573601	Fuller	Feb. 16, 1926	Article Containing Visible Temperature Records and Method of Obtaining Records.
1575994	Laise	Mar. 9, 1926	Leading-in Wire and Gas Tight Seal and Method of Making Same.
1576221	Rippl	do	Machine for Making Flares.
1588179	Friederich	June 8, 1926	Leading-in Wire for Glass Vessels.
1591113	Buttolph	July 6, 1926	Method of and Apparatus for Electric Welding.
1591833	Jarman	do	Method of and Machine for Forming Filaments.
1591910	Burnap	do	Incandescent Lamp.
1591911	Halvorson	do	Do.
1594057	Fonda	July 27, 1926	Electric Incandescent Lamp Device.
1597439	Fagan et al	Aug. 24, 1926	Apparatus for Feeding Glass Parts.
1600072	Skaupy and Gaides	Sept. 14, 1926	Light Diffusing Glassware.
1600203	Campbell	do	Incandescent Lamp.
1601902	Bol	Oct. 5, 1926	Sealing Off Machine.
1610062	Lokker et al	Dec. 7, 1926	Electric Lamp.
1615666	Wright	Jan. 25, 1927	Method of and Apparatus for Forming Filaments.
1620447	Donovan	Mar. 8, 1927	Apparatus for Making Incandescent Lamps and Similar Articles.
1620523	De Jong et al	do	Hook Forming and Inserting Machine.
1621359	Fagan et al	Mar. 15, 1927	Glass Working Machine.
1621360	Falge	do	Incandescent Lamp.
1623784	Fonda	Apr. 5, 1927	Incandescent Filament.
1624762	Ruttenauer et al	Apr. 12, 1927	Reflector Lamp.
1628410	Koning	May 10, 1927	Exhausting Machine.
1628456	Foulke	do	Metal Filament.
1631377	Loebe and Grossmann	June 7, 1927	Sealing-off Device.
1631378	Martin	do	Do.
1631379	Maurer	do	Sealing-off Torch.
1632647	Fonda	June 14, 1927	Incandescent Lamp.
1632769	Severin	do	Filament for Incandescent Lamps or Similar Articles.
1635055	Paez	July 5, 1927	Alloy Filament.
1637034	Bergmans	July 26, 1927	Coiled Filament Incandescent Lamp.
1637037	De Jong	do	Wire Spool and Carrier.
1638369	Skaupy	Aug. 9, 1927	Colored Incandescent Lamp Bulb.
1640442	De Jong	Aug. 30, 1927	Stem Making Machine.
1640458	Ledig et al	do	Apparatus for Unfitting Tubing.
1641761	Ibele	Sept. 6, 1927	Cement for Incandescent Lamp Filaments.
1644712	De Graaff	Oct. 11, 1927	Electric Lamps.
1646258	Raus et al	Oct. 18, 1927	Stem Forming Machine.
1648677	De Boer	Nov. 8, 1927	Incandescent Electric Lamp.
1648679	Fonda	do	Incandescent Lamp.
1648690	Jacoby	do	Method of Making Long Crystal Tungsten Filaments.
1650602	Burnap	Nov. 29, 1927	Stem for Incandescent Lamp.
1650605	Campbell	do	Method of Mounting Filaments.
1651865	Blake and Geiger	Dec. 6, 1927	Apparatus for Making Incandescent Lamps and Similar Articles.
1655140	Fagan	Jan. 3, 1928	Stem Making Macine.
1655141	Fagan et al	do	Do.
1655279	McGowan	do	Mount Making Machine.
1655290	Phelps et al	do	Machine for Treating Hollow Glass Articles.
1655466	Inman	Jan. 10, 1928	Method and Apparatus for Treating Filaments.
1655488	Wolff	do	Electric Incandescent Lamp.
1655502	Holst	do	Incandescent Electric Lamp.
1659613	Phelps and Raus	Feb. 21, 1928	Method and Apparatus for Making Stems.
1659749	Skaupy	do	Electric Incandescent Lamp and Method of Manufacturing its Illuminating Body.
1661866	Zabel	Mar. 6, 1928	Apparatus for Cutting Wire Into Lengths.
1662027	Se Graaff	do	Tungsten Product and its Manufacture.
1662045	Patterson	do	Lamp Making Machine.
1667601	Maurer	Apr. 24, 1928	Exhaust-Tube Remover.
1670292	Blau et al	May 22, 1928	Tungsten Filament and Method of Making it.

ADDITION TO SCHEDULE A

In addition to the patents above listed in this Schedule A, the General Electric Company is licensed under United States Patents Nos. 1241512, 1330702, 1329639, and 1329640, and has a right to grant licenses thereunder except in the railway light signal field. The said license to General Electric Company contains the following provision:

"For the purpose of this agreement, a railway light signal is a railway signal of the type wherein an electric lamp together with optical projecting means constitutes the means for giving indications both in daylight and in darkness.

"The term railway light signal as used in this agreement is to include signals located at the intersection of railways and highways to warn highway traffic of the approach of railway cars or trains, but the said term does not include a signal used for the control of general traffic on public highways and streets."

Therefore, said Patents Nos. 1241512, 1330702, 1329639 and 1329640 may be regarded as a part of Schedule A, but no rights for the field of railway light signals as above defined are granted thereunder.

No.	Name	Date	Title
1640867	Workman	Aug. 30, 1927	Electric Incandescent Lamp.
1905791	Brown et al	Apr. 25, 1933	Apparatus for Sorting Rods and Tubes.
1906819	Severin	May 2, 1933	Incandescent Lamp and Similar Device.
1907532	Flaws, Jr	May 9, 1933	Mount Making Machine.
1907533	do	do	Method of and Apparatus for Mounting Filaments.
1911046	Wright	May 23, 1933	Apparatus for Basing Incandescent Lamps and Similar Articles.
1925857	Van Liempt	Sept. 5, 1933	Electric Incandescent Lamp.
1925986	Geiger et al	do	Electric Lamp or Similar Device.
1929294	Van Der Poel	Oct. 3, 1933	Apparatus for Feeding Filaments for Incandescent Lamps.
1929313	Illingworth	do	Apparatus for Tipping-off Incandescent Lamps and Similar Devices.
1930316	Ledig et al	Oct. 10, 1933	Method and Apparatus for Mounting Filaments on the Conductive Supports of Electric Incandescent Lamps.
1930326	Thomas	do	Cut-Out for Incandescent Lamps and Similar Articles.
1934435	Lessmann	Nov. 7, 1933	Cut-Out Device for Electric Lamps.
1934457	Van Liempt	do	Cut-Out.
1942069	Setoguchi et al	Jan. 2, 1934	Apparatus for Cutting Wire into Lengths.
1944825	Millner	Jan. 23, 1934	Electric Incandescent Lamp.
1946279	Friederich et al	Feb. 6, 1934	Cut-Out for Incandescent Electric Lamps and Similar Devices.
1947207	Lessmann	Feb. 13, 1934	Electric Incandescent Lamp.
1947243	Born	do	Electric Lamp.
1957242	Berger	May 1, 1934	Incandescent Lamp Filament.
1958243	Illingworth	May 8, 1934	Apparatus for Feeding Wires.
1958254	Van Der Poel	do	Apparatus for Separating a Single Cylindrical Article from a Quantity of Such Articles.
1960066	Rippl	May 22, 1934	Method of and Apparatus for Soldering Bases.
1960067	do	do	Method of and Apparatus for Applying Solder.
1962902	Kunath	June 12, 1934	Method of and Apparatus for Feeding Filaments.
Re: 19216	Pipkin	June 19, 1934	Colored or Diffusing Coating for Incandescent Lamps and Similar Articles.
1967852	Wright	July 24, 1934	Electric Lamp.
1967878	Geiger et al	do	Incandescent Lamp or Similar Device.
1969511	Herre et al	Aug. 7, 1934	Apparatus for Automatically Feeding Bulbs.
1980840	Wright et al	Nov. 13, 1934	Seal for Electric Lamps and Similar Articles.
1983362	Geiger et al	Dec. 4, 1934	Electric Incandescent Lamp.
1985075	Bird	Dec. 18, 1934	Packing Container for Various Articles.
1985915	Chelioti	Jan. 1, 1935	Electric Incandescent Lamp.
1987427	Watson	Jan. 8, 1935	Electric Lamp.
1988290	Wright	Jan. 15, 1935	Incandescent Lamp and Similar Device.
1988291	Yamashita	do	Leading-In Wire and Method of Making Same.
1988933	Asakawa	Jan. 22, 1935	Electric Safety Lamp.
1988955	Nehmert	do	Method of and Apparatus for Coating Incandescent Lamp Filaments and Similar Articles.
1990375	Hahn	Feb. 5, 1935	Apparatus for Cutting Glass.
1991223	Ledig et al	Feb. 12, 1935	Packing Machine.
1992037	Mulder	Feb. 19, 1935	Apparatus for Stamping Articles Having Curved Surfaces.
1992797	Zabel	Feb. 26, 1935	Method of and Apparatus for Treating Filaments.
1992798	do	do	Method of Treating Leading-In Wire.
1992844	Severin et al	do	Cut-Out for Electric Lamps.
1995148	Illingworth	Mar. 19, 1935	Precision Electric Lamp and Method of Manufacturing Thereof.
1995863	Prideaux	Mar. 26, 1935	Electric Lamp.
1998958	Flaws, Jr	Apr. 23, 1935	Connection for Filament and Lead Wires.
2005496	Donovan et al	June 18, 1935	Apparatus for Feeding Fragile Rods, Tubes, and Similar Articles.
2006140	Honing	June 25, 1935	Illumination.
2006155	Blake	do	Electric Lamp and the Like and its Mounting and Electrical Connection.
2006231	Malloy et al	do	Method of and Apparatus for Sealing Electric Lamps and Similar Articles.
2008503	Herre et al	July 16, 1935	Method of and Apparatus for Uniting Bases to the Glass Bulbs of Electric Incandescent Lamps and Similar Articles.
2009094	Peters	July 23, 1935	Electric Lamp or Similar Device.
2012825	Millner	Aug. 27, 1935	Production of Large Crystal Metal Bodies.

SCHEDULE B (Licensor's Prices)

ELECTRIC LAMP LICENSE

GENERAL ELECTRIC COMPANY AND WESTINGHOUSE ELECTRIC & MANUFACTURING COMPANY, JANUARY 1, 1927

Agreement made as of the 1st day of January 1927, but actually executed this _____ day of _____ 1928, between General Electric Company, a New York corporation (hereinafter called the Licensor), and Westinghouse Electric & Manufacturing Company, a Pennsylvania corporation (hereinafter called the Licensee);

Whereas the Licensor is the owner of, or has the right to grant licenses under, the United States Letters Patent enumerated in Schedules A and A-1 hereto attached, and is also the owner of various applications for Letters Patent, all of which relate to, or to the manufacture of, electric lamps (as hereinafter defined); and

Whereas the existing license dated March 1, 1912, from the Licensor to the Licensee relating to incandescent electric lamps will, by its terms, expire a few years hence; and

Whereas, during the past few years, not only have valuable improvements in electric lamps been made by the Licensor, but in addition thereto automatic machinery and new manufacturing processes, invented and developed by the Licensor, have resulted in substantial improvements including savings in the costs of manufacture of electric lamps and in lowered selling prices thereof to the public, and the Licensee desires definite assurance, by way of license, that it will not be deprived of the use and benefit of said improvements in electric lamps and said automatic machinery and new processes when said license of March 1, 1912, expires; the Licensee desiring such assurance at this time in order that it may more effectively make plans for the future conduct of its business; and

Whereas said license of March 1, 1912, is limited to those lamps in which the light-giving element is an incandescing filament, but the Licensor is now carrying on experimental and development work with electric lamps having light-giving elements of other kinds, and the Licensee desires rights with reference to such other electric lamps; and the Licensee also desires an increase in the quantity of lamps which it may sell at a royalty rate of one percent (1%); all of which said requests of the Licensee the Licensor is willing to grant, but only upon and under the terms and conditions hereinafter set forth,

Now, therefore, it is agreed as follows:

(1) All existing license agreements relating to electric lamps between the parties hereto (other than an agreement dated October 3, 1916, relating to so-called dumet wire) shall be cancelled and terminated as of January 1, 1927, and each party is hereby relieved of all obligations accruing thereunder after said date, except the payment of royalties due up to that date; and the rights and obligations of the parties hereto, with reference to electric lamps, shall from and after said date be those specified in this agreement.

DEFINITIONS

(2) This license and agreement relates to, and to machines and processes for the manufacture of, electric lamps as hereinafter defined, and the rights herein granted under patents shall extend only so far as the patented inventions relate to electric lamps or are usable therein or in the manufacture thereof; and no rights are herein granted to use the patented inventions for any other purpose.

(3) An electric lamp is for the purpose of this agreement defined as any device the primary purpose of which is to convert electric energy into light within the visible spectrum, not including, however, the so-called arc or enclosed arc lamps which do not have hermetically sealed containers. Electric lamps coming within this main definition are classified as follows:

Class A: All types of lamps coming within the foregoing main definition of electric lamps which are not included in Class B.

Class B: The Cooper-Hewitt mercury vapor lamp which has for the cathode a vaporizable reconstructing body of liquid mercury, the light coming from an arc springing from said cathode.

Digitized by Google

(4) The terms "Licensor" and "Licensee" as used herein refer to and include, for those companies, respectively, all controlled subsidiary or operating companies, branches, factories, and departments engaged in the manufacture or sale of electric lamps, and the terms and conditions hereof shall apply to any individuals, firms, associations, trustees, or corporations who may succeed to the business of either of the parties hereto.

(5) The term "net sales" as used herein means the amounts paid or owing to the parties hereto, respectively, on account of electric lamps sold and shipped, after deducting the compensation, if any, paid to agents, such sales being figured on the basis of the provisions of Schedule B which is hereto attached.

(6) The term "United States" as used herein means the United States of America, its territories and dependencies, including Alaska, the Hawaiian Islands, the Panama Canal Zone, Porto Rico, and the Virgin Islands, but not the Philippines.

LICENSES

(7) The Licensor hereby grants to the Licensee, subject to the hereinafter contained provisions, all of which are conditions of such grant, a non-exclusive license under

the United States patents specified in Schedules A and A-1 and any United States patents which may issue on the applications above referred to, and under any United States patents and applications which the Licensor may, now or during the term of this license, own or control or under which it has or may have the right to grant such license, for improvements in electric lamps and improvements in machines, appliances or processes for the manufacture of such lamps,

to make, use, and sell said electric lamps (and to refill burned out electric lamps and to sell such refilled lamps) in and for use in the United States (and for export, but only as hereinafter provided), and only to the extent specified in Article 8 hereof.

This license is nonassignable, indivisible, and nontransferable, except to successors to substantially the entire electric lamp business (including good will) of the Licensee.

No license is herein granted under foreign patents; and no license is granted to export electric lamps, or sell lamps for export, except to countries to which the Licensor would itself have a right to export them, and no license is granted to sell filaments or other parts of lamps, nor to manufacture lamp bulbs, tubing, or cane glass.

(8) This license is limited

(1) to the sale of Class A electric lamps in and for use in the United States in each calendar year to an amount expressed in dollars which shall not exceed the amount represented by the following percentages of the aggregate net sales during that year by the Licensor and the Licensee in and for use in the United States of Class A electric lamps (other than vacuum lamps of the ordinary carbon filament type as known to the trade at the date of this agreement, and designed to give approximately 3.4 lumens per watt) embodying or made in accordance with or by the use of any of the inventions with reference to which license is hereby granted by the Licensor, so long as patents for such inventions continue in force, namely:

Calendar Year	Percentage
1927	22.4421
1928	23.4421
1929	24.4421
1930 and each year thereafter	25.4421

(2) to the sale of Class B lamps in and for use in the United States in each calendar year to an amount expressed in dollars which shall not exceed the amount represented by percentages of the aggregate net sales during that year by the Licensor and Licensee in and for use in the United States, of Class B electric lamps embodying or made in accordance with or by the use of any of the inventions with reference to which license is hereby granted by the Licensor so long as patents for such inventions continue in force, such percentages to be numerically the same as the foregoing percentages applying to Class A electric lamps.

Digitized by Google

If in any calendar year during the period January 1, 1927 to December 31, 1930, the Licensee shall not have sold under this license Class A or Class B electric lamps up to the full amount herein licensed for that year (exclusive of additions which may be made thereto because of a shortage in the preceding year as herein provided), the Licensee may in the next succeeding calendar year sell, under this license, an additional amount of electric lamps of the class in which the shortage occurred equal to the amount of such shortage in that calendar year (but not more than five per cent (5%) of the licensed amount of such class of electric lamps for the calendar year in which the shortage occurred). If in any calendar year after 1930 during the term of this license there shall be a shortage of the kind mentioned, the Licensee may in the next succeeding calendar year sell, under this license, an additional amount of electric lamps of the class in which the shortage occurred equal to the amount of such shortage in that calendar year (but not more than three per cent (3%) of the licensed amount of such class of electric lamps for the calendar year in which the shortage occurred). The right to make such sales in addition to the licensed amount is not cumulative and may be exercised only in the calendar year immediately following the calendar year in which the shortage occurred.

(9) The Licensor agrees to use all reasonable efforts to prevent infringement of the patents under which royalties are payable under this license.

(10) The Licensee agrees to comply with the reasonable requirements of the Licensor as to marking, on lamps manufactured under this license and on packages containing such lamps, the dates and/or the numbers of the patents under which this license is granted, and applicable to such lamps and as to including in such packages notices, in form approved by the Licensor, relating to such patents.

(11) As a part consideration for the granting of the foregoing license, the Licensee hereby grants to the Licensor a nonexclusive license under

> the United States patents which the Licensee now owns or controls and under those which may issue on pending applications now owned or controlled by it, and under any United States patents and applications which the Licensee may, now or during the term of this license, own or control, or under which it has or may have the right to grant such license, for improvements in electric lamps and improvements in machines, appliances or processes for the manufacture of electric lamps,

to make, use and sell said electric lamps (and to refill burned out electric lamps and to sell such refilled lamps) in and for use in the United States (and for export but only as hereinafter provided).

This license is non-assignable, indivisible and non-transferable, except to successors to substantially the entire electric lamp business (including good will) of the Licensor, and except also as provided in Article 12 hereof. This license shall continue for the period during which the license from the Licensor to the Licensee remains in force.

No license is herein granted under foreign patents; and no license is granted to export electric lamps, or sell such lamps for export, except to countries to which the Licensee would itself have a right to export them, and no license is granted to sell filaments or other parts of lamps except to other lamp licensees of the Licensor, and then only to the extent such other licensees are licensed, or authorized to be licensed, hereunder. No license is granted to manufacture lamp bulbs, tubing or cane glass.

(12) The Licensee authorizes and empowers the Licensor to grant to the Licensor's present incandescent lamp Licensees (hereinafter designated "B Licensees") for the term of this License agreement (but only so long as they remain Licensees of the Licensor) non-exclusive sublicenses, subject to the limitation of Article 11 hereof, under the United States patents under which the Licensor receives licenses from the Licensee under Article 11 hereof, to make, use and sell electric lamps in and for use in the United States only up to an amount equal to the amount which each said "B Licensee" shall be on December 31, 1927, licensed to sell in each year under its existing license from the Licensor, and only if, and so long as, a license under the present and future patents (relating to, or to the manufacture of, electric lamps) of the "B Licensee" or "B Licensees" inures hereunder to the benefit of the Licensee. The Licensee reserves the right to cancel any such sub-licenses that may be granted by the Licensor in the event that such "B Licensee" shall exceed, by an amount exceeding 10% in any calendar year, the amount which it shall be on December 31, 1927, licensed to sell under its existing license from the Licensor during such calendar year, and the Licensor shall make each such sub-license subject to the foregoing reservation. No authority is conferred upon the Licensor to grant any sub-license to any new

Digitized by Google

Licensee of the Licensor, the authority aforesaid being limited to the granting of sub-licenses to the existing "B Licensees" of the Licensor (or their assignees) to the extent of the licensed amounts as of December 31, 1927, under their existing licenses. All sub-licenses granted under the foregoing authority shall terminate *ipso facto* upon any termination of this electric lamp license agreement, and all sub-licenses granted under said authority shall so provide.

(13) The admission of validity implied by the acceptance of the licenses herein granted is limited to the life of the licenses and to the fields of use for which such licenses are granted.

ROYALTIES

(14) The Licensee agrees to pay to the Licensor, as a royalty or license fee, an amount equal to one percent (1%) of the net sales of the Licensee of lamps of the kind covered by this license (other than vacuum lamps of the ordinary carbon filament type as known to the trade at the date of this agreement and designed to give approximately 3.4 lumens per watt) sold and shipped during the term of this agreement for use either in or outside of the United States and embodying or made in accordance with or by use of any of the inventions with reference to which license is herein granted by the Licensor, so long as patents for such inventions continue in force.

(15) It being recognized and agreed that sales by the Licensee in and for use in the United States in excess of the amount herein licensed would result not only in a loss to the Licensor of the profit which would have accrued to it had the sales been made by it, but also in a substantial and unascertainable loss to its business and good will, which total loss is believed to exceed thirty percent (30%) of the net sales so made, it is hereby agreed and provided that if during any calendar year, the sale of either Class A or Class B electric lamps by the Licensee shall be in excess of the amount of Class A or Class B electric lamps, respectively, herein licensed (including additions, if any, which may be made thereto because of a shortage in the year next preceding, as provided in Article 8) the Licensee shall, within forty-five days after the expiration of such calendar year, pay to the Licensor an amount equal to thirty percent (30%) of the net sales so made of either Class A or Class B electric lamps, or both, in excess of the amount licensed for that calendar year (including the additions thereto under Article 8, if any), as compensation to the Licensor for its loss. The foregoing provision shall not, however, be construed as authorizing or permitting the Licensee to sell or offer to sell electric lamps in excess of the amount licensed (including the additions thereto under Article 8, if any) on tender or payment of said amount; and it is agreed that neither the above provision for such payment of said amount, nor its payment, nor any suit or action to recover the same shall be a bar to an injunction in favor of the Licensor in the event of a breach or threatened breach by the Licensee by selling electric lamps in excess of the amount licensed (including the additions thereto under Article 8, if any).

(16) (*a*) Whenever, by the expiration of patents, or by the adjudication of their invalidity by a final appellate court or by a court of competent jurisdiction from which no appeal is taken, any electric lamps are no longer licensed hereunder, such lamps shall be omitted from the Licensee's and Licensor's computations and reports of sales for the purpose of this agreement, unless and until some other appellate court or the United States Supreme Court shall have held such patents, or any of them, to be valid, and no royalty shall be payable with respect to such sales, unless such lamps are manufactured by the use of processes or machinery covered by other subsisting patents hereunder and the Licensor requires (as it is hereby given the option to do) that such lamps shall therefore be reported and/or royalty paid thereon.

(*b*) Some of the electric lamps licensed hereunder and in which the light is produced by the flow of electric current through a gas vapor or other conductive atmosphere may constitute an integral part of a lighting apparatus or device sometimes sold as a unit at a single price for the whole device and consisting of the lamp (which is the light giving element and is sometimes called the bulb or tube) combined with auxiliary apparatus and equipment, which consists of the electrical apparatus permanently associated with and connected to the lamp and forming an integral part of said lighting device, which is essential to and takes part in the starting and maintenance of a flow of current through the lamp, said auxiliary apparatus and equipment being patented by and manufactured under or embodying the inventions of patents listed in Schedule A–1. It is agreed that the licenses granted in Articles 7 and 11 hereof shall extend to and include such patented auxiliary apparatus or equipment and shall be granted under the inventions and

Digitized by Google

patents listed in Schedule A–1 and corresponding inventions and patents of the Licensee, but the provisions of Articles 8, 14, 15, 17, 18, 19, and 22 of this agreement shall not apply to such patented auxiliary apparatus and equipment. Where an electric lamp (viz., a bulb or tube) is sold as an integral part of such lighting apparatus or device, at a single price for the whole, only the electric lamp shall be included, in the Licensee's and Licensor's computations and reports of sales for the purpose of this agreement, exclusive of the other parts of the lighting apparatus or device, and the price at which such electric lamp shall be included in such computations and reports shall be the price of such lamp in accordance with Schedule B.

REPORTS AND PAYMENT OF ROYALTIES

(17) Each party agrees that it will keep full and accurate books with reference to its manufacture, sales, and shipments of all electric lamps sold and shipped by it, and that such books shall, at all reasonable times in business hours, be open to the inspection of public accountants designated and employed by the other party or of representatives mutually agreed upon, so far as may be necessary for the purpose of verifying the statements to be made under this agreement. Each party shall make to a person to be designated by the Licensor the reports called for in attached Schedule "B" and such reports shall be open to the inspection of the other party. The reports received by the Licensor from sub-Licensees under the Licensee's patents under the authority hereof, shall also be open to the inspection of the Licensee's public accountants or of the said representatives mutually agreed upon.

(18) The Licensor and the Licensee shall on or before the last day of each month render to each other a sworn statement, on forms designated by the Licensor, showing the kinds and net selling prices of all electric lamps (other than vacuum lamps of the ordinary carbon filament type as known to the trade at the date of this agreement and designed to give approximately 3.4 lumens per watt) embodying or made in accordance with or by the use of any of the inventions with reference to which license is herein granted by the Licensor, sold and shipped for use in the United States, and the total net value of such lamps sold and shipped for use outside of the United States, during the next preceding calendar month. Within forty-five days after the first of January, April, July, and October in each year, the Licensor shall render to the Licensee a bill for the royalties or license fees due on the sales of electric lamps made by the Licensee during the three calendar months next preceding, which royalty or license fees the Licensee agrees to pay in each case within ten days from the date of rendering the bill.

(19) Within forty-five days from the first day of each January, there shall be a final settlement for the preceding year of the royalties or license fees due or paid on electric lamps sold and shipped during the year, on the basis hereinbefore set forth, taking adjustments into consideration.

PRICES, TERMS OF SALE, ETC.

(20) The license hereby granted by the Licensor is granted on the express condition that the Licensee's prices, terms, and conditions of sale for use in United States of the electric lamps (other than vacuum lamps of the ordinary carbon filament type as known to the trade at the date of this agreement and designed to give approximately 3.4 lumens per watt) made under the license herein granted to the Licensee, shall, as long as such lamps, respectively, or their processes of manufacture continue to be covered by patents, be those fixed from time to time and followed by the Licensor in making its sales, and the Licensee agrees to maintain such prices, terms and conditions of sale as to such lamps. The prices, terms, and conditions of sale, as at present in force, are those set forth in Schedule B, and the Licensee is licensed to sell such lamps only in accordance with said Schedule, and only under the Licensor's form of contract, i. e., the "Contract for Purchase of Incandescent Lamps" set forth in Schedule B (or another contract form containing equivalent provisions and no provisions inconsistent therewith) and in compliance with the General Sales Rules in said Schedule named, and upon making the reports called for in said Schedule B, and at prices not lower than those set forth in said Schedule, with the discounts not greater than those set forth on the discount sheet of said Schedule, and in all respects on terms and conditions no more favorable to the purchaser than those set forth in said Schedule.

(21) The said Schedule B may be changed by the Licensor from time to time, upon reasonable notice in writing to the Licensee, and, as changed, it shall be binding upon the Licensee. But not less than one year's written notice shall be

Digitized by Google

given before any change shall go into effect which shall change the discount schedule in Schedule B so as to change the relative differences, between the various discounts given to those purchasing in different volumes, or change the relative volumes of purchases upon which the various discounts are based; and not less than two years written notice shall be given before any change shall go into effect which shall change said discount schedule so as to increase the volume of the purchases upon which the maximum discount shall be based; and not less than thirty days written notice shall be given before any other change in Schedule B shall go into effect.

(22) The Licensor now appoints as agents, for the sale of a portion of its electric lamps (other than vacuum lamps of the ordinary carbon filament type as known to the trade at the date of this agreement and designed to give approximately 3.4 lumens per watt), persons, firms and companies who sell the Licensor's said lamps to consumers through their own salemen, and proposes to continue such agency appointments and sales. And this license is granted only upon and is subject to the condition that the Licensee shall not interfere with such portion of the Licensor's business in such lamps carried on in this manner by offering to allow or allowing the Licensee's agents greater compensation that that allowed by the Licensor to its agents, as specified in said Schedule B or by offering to allow or allowing the Licensee's agents terms and conditions more favorable to the agent than those set forth in said Schedule, or by appointing as agents persons or companies of whom the Licensor affirmatively disapproves as being irresponsible representatives for handling the type of electric lamps covered by this agreement that the Licensee distributes through agents.

EXCHANGE OF INFORMATION

(23) It is the intention of this agreement that the Licensee shall, during the term of this agreement or until the Licensee gives notice of its intention to surrender its license under the provisions of Article 28, be entitled to receive from the Licensor complete information as to new inventions and developments (after patent applications have been filed) and as to technical and manufacturing methods and costs, machinery and processes employed by the Licensor in the manufacture of electric lamps embodying or made in accordance with the inventions present and future with reference to which royalties are or may be payable under this agreement, and with respect to future improvements on such lamps, machinery and processes so that the Licensee may fully secure the benefits and advantages of the inventions which it is licensed to use in making such lamps; and the Licensor shall be entitled to receive corresponding information from the Licensee. To that end, the accredited representatives of each party shall be permitted to study in the factories of the other, the methods, machinery, and processes employed in practicing said inventions and in the development and manufacture of such lamps and there obtain the benefit of the other's experience in such development and manufacture of such lamps, and each party agrees to render to the other all reasonable assistance in securing the information to which the other is entitled under the provisions hereof, and will also exchange with the other statements of the cost of operating such machines and practicing said processes, and all other elements of cost relating to the development and manufacture of electric lamps. None of the information received by the Licensee under the provisions of this agreement shall be communicated to others except with the written consent of the Licensor, nor shall it be utilized by the Licensee or by others with its knowledge and consent outside the United States; provided, however, that the Licensee may, under like restrictions, disclose such information to the Canadian Westinghouse Company.

SETTLEMENT OF CONTROVERSIES AND ASCERTAINMENT OF DAMAGES

(24) In case there arises under this agreement any controversy which the parties are unable to adjust between themselves, it shall be settled by arbitration pursuant to the Arbitration Law of the State of New York, in the following manner:

Either party may, by notice in writing served on the other, appoint one arbitrator and call upon the other to appoint a second arbitrator within thirty days after the receipt of such notice; and each party agrees that upon receipt of any such notice it will so appoint an arbitrator. The two arbitrators thus appointed shall, within thirty days after the appointment of the one last appointed jointly, appoint a third arbitrator. In the event that a second arbitrator shall not be

Digitized by Google

appointed as above provided, or the two arbitrators first appointed shall fail to appoint a third arbitrator, either party may call upon the president or acting president of the New York State Chamber of Commerce to appoint an arbitrator or arbitrators, as the case may require, and any such appointment shall have the same force and effect as if the parties themselves had made it. The controversy shall be submitted to the three arbitrators in such manner as they shall direct, and they shall have the power to decide the matter in controversy and to determine what, if any, amount shall be paid by either party to the other as liquidated damages for any breach of this agreement, and each party agrees to pay to the other any damages that may be assessed by the arbitrators. The parties shall be entitled to be heard before the arbitrators who, in addition, shall have power to examine the books and records of both parties referred to in Article 17 hereof. The decision of the arbitrators or the decision of a majority of them rendered in writing shall be final, conclusive, and binding upon the parties. The award shall include the fixing and determination of the expense of arbitration, including the fees of the arbitrators and the determination of what proportion of the expense up to the entire amount shall be borne by either party.

(25) The damages for violation of the provisions of this agreement, requiring that the Licensee shall not sell or offer to sell within the United States, electric lamps of the types covered by and made under this license, at prices lower or on terms or conditions more favorable to the purchaser than those which are or may be from time to time established by the Licensor, shall be determined by the Arbitrators and the damages shall be an amount equal to twenty-five per cent (25%) of the total value, at the prices established under this agreement, of the lamps involved in each transaction. Similarly, the damages shall be determined by the Arbitrators in case of sales of lamps by the Licensor at prices lower or on terms and conditions more favorable to the purchaser than those established by the Licensor for sales by the Licensee, and the damages shall be an amount equal to 25% of the total value, at the prices established under this agreement, of the lamps involved in each transaction, but if the Licensor has made or makes, with others than the Licensee, agreements containing obligations similar to the foregoing, the Arbitrators may apportion among the several licensees the damages, payable by the Licensor, the intent being that the Licensor shall pay damages only once with reference to any one transaction. The foregoing provision shall not, however, be construed as permitting either party to sell or offer to sell lamps in violation of the provisions of this agreement, on tender or payment of liquidated damages so determined; but it is agreed that there being in such case no adequate remedy at law an injunction may be sought against further violation thereof.

The damages for violation by either party of the provisions of Article 22 of this agreement shall likewise be determined by the arbitrators and shall be an amount equal to twenty-five percent (25%) of the total value, at the prices established by this agreement, of the lamps sold by any agent who is allowed or offered greater compensation or more favorable terms and conditions than those set forth in the Licensor's Schedule.

TERM AND TERMINATION OF LICENSES

(26) This agreement is binding upon and shall inure to the benefit of the parties hereto and of their controlled companies and the successors and assigns of each of them, except as otherwise herein provided, and is to continue in full force until the date of expiration of the Licensor's patents listed in Schedule "A" and patents to issue upon applications of the Licensor now pending under which a license is granted hereunder, unless previously terminated as herein provided.

(27) If the Licensee shall wilfully violate or shall wilfully refuse or fail to substantially perform any of the provisions or conditions of this agreement, and in such manner as to show intentional disregard thereof, the Licensor may cancel and terminate this agreement by giving sixty days' notice in writing to the Licensee, provided, however, that the Licensee shall have the right within such sixty days to give notice of its desire to have submitted to arbitration the question of whether there has been such a breach, making its appointment of one arbitrator in such notice, and thereupon such question shall be submitted to arbitration under the arbitration provisions of this agreement, and the termination of this agreement shall await the award of the arbitrators. If the arbitrators, or a majority of them, shall determine that the Licensee has wilfully violated or has wilfully refused or failed to substantially perform any of the provisions or

Digitized by Google

conditions of this agreement, and in such manner or to such extent as to show intentional disregard thereof, then this agreement shall terminate *ipso facto* sixty days from the date of such report of the arbitrators.

The sale by the Licensee in any calendar year of electric lamps licensed hereunder to an amount equal to five per cent (5%) or more in excess of the amount licensed for such year (including additions, if any, which may be made thereto because of a shortage in the year next preceding as provided in Article 8) shall be deemed and held to be a wilful violation of this agreement and an intentional disregard thereof. If during any calendar year the reports of sales made by the Licensee to the Licensor, pursuant to Article 18 hereof, indicate that the Licensee is likely to exceed its licensed amount for such year, the Licensor shall, by written notice mailed to the Licensee, call the attention of the Licensee thereto, and the giving of such notice shall be a condition precedent to the right of cancellation provided for in this Article 27, because of sales in excess of the licensed amount.

(28) The License herein granted may be surrendered by the Licensee on two years' notice in writing, provided that such notice is not given earlier than eight years from January 1, 1927.

(29) If the Licensor grants to others licenses under its said patents, and patents to issue upon applications, to make, use, and sell electric lamps upon terms and conditions other than those herein specified, it shall advise the Licensee promptly thereof and shall give the Licensee full information as to the terms and conditions thereof and the Licensee shall have the option of surrendering this license and agreement and of taking a license in such other form and subject to the conditions therein named.

(30) The various remedies provided for in this license shall be construed as cumulative and none of them as exclusive of the others or of any remedies allowed by law. No delay or failure of the Licensor to exercise any right or power accruing in the event of any default or breach of the Licensee hereunder shall be construed to be a waiver of any such default or an acquiescence therein, nor a waiver of any subsequent default or an acquiescence therein.

In witness whereof, the parties hereto have caused this instrument to be executed by their officers thereunto duly authorized and their corporate seals to be hereunto attached, on the day and year first above written.

No.	Name	Date	Title
985386	Blau	Feb. 28, 1911	Production of Divided Metals.
985387	do	do	Method of Manufacturing Metallic Illuminating Bodies for Electric Incandescent Lamps.
985502	do	do	Apparatus for Making Metallic Filament for Incandescent Electric Lamps.
988148	Steinmetz	Mar. 28, 1911	Manufacturing of Filaments for Incandescent Lamps.
988329	Glaser	Apr. 4, 1911	Method of Connecting Incandescent Lamp Filaments with Metallic Current Supply Wires.
989549	Burrows	Apr. 11, 1911	Filament Mounting Machine.
991578	Whitney	May 9, 1911	Incandescent Electric Lamp .
994010	Langmuir	May 30, 1911	Method of and Apparatus for Producing Exhausted Vessels.
994425	Remane	June 6, 1911	Method of Anchoring Filaments.
994690	do	do	Electric Incandescent Lamp.
995077	Merritt	June 13, 1911	Incandescent Lamp.
996374	Swan	June 27, 1911	Soldering Machine.
996420	Marshall	do	Manufacturing of Lamp Filament.
996936	Massey	July 4, 1911	Apparatus for Evacuating Incandescent Lamp Bulbs.
997413	Remane	July 11, 1911	Electric Incandescent Lamp.
998067	Appleberg	July 18, 1911	Terminal for Incandescing Conductors.
1001382	Gardner	Aug. 22, 1911	Filament Mounting.
1001630	do	Aug. 29, 1911	Do.
1002662	Fagan	Sept. 5, 1911	Machine for Making Hooks.
1006198	Frech, Jr	Oct. 17, 1911	Seal for Sectional Leading-in Wires.
1006620	Appleberg	Oct. 24, 1911	Tungsten Furnace.
1008588	Coolidge	Nov. 14, 1911	Filament.
1008762	Whitney	do	Metal Working.
1010165	Merritt	Nov. 28, 1911	Incandescent Lamp.
1010295	do	do	Do.
1010456	Schaller	Dec. 5, 1911	Method of Evacuating Vacuum Apparatus.
1010866	Coolidge	do	Process of Making Composite Conductors.
1010914	Howell	do	Machine for Treating Filaments.
1011396	Abbott, Jr	Dec. 12, 1911	Method of and Apparatus for the Treatment of Lamp Filaments.
1011586	Criggal	do	Apparatus for Making Electric Lamp Bases.
1011523	Swan	do	Lamp Making Machine.
1011708	Appleberg	do	Treating Tungsten.
1011771	Glaser	do	Supporting Frame for Incandescent Lamps with Metal Filaments.
1013124	Burrows	Jan. 2, 1912	Machine for Making Incandescent Lamps.
1013572	Suman	do	Method of Shaping Filaments.
1013599	Hand	do	Incandescent Filament.
1013859	Burrows	Jan. 9, 1912	Filament Support.
1013914	Whitney	do	Attaching Filaments to Leading-in Wires.
1013915	do	do	Metal Filament Lamp.
1013958	Schroter	do	Shaping and Mounting Filaments.
1013962	Skaupy	do	Filament Connection.
1013965	Steinmetz	do	Filament Supports for Incandescent Lamps.
1017280	Von Bolton	Feb. 13, 1912	Process of Increasing the Ductility of Metallic Tungsten.
1017546	Howell	do	Filament Support.
1018502	Just & Hanaman	Feb. 27, 1912	Incandescent Bodies for Electric Lamps.
1019391	Weintraub	Mar. 5, 1912	Boronized Conductor & Method of Manufacturing.
1019457	Graybill	do	Automatic Stem Making Machine.
1022182	Dempster	Apr. 2, 1912	Method of Wire Drawing.
1022482	Howell	Apr. 9, 1912	Filament Connection.
1022543	Glaser	do	Holder for Lamp Filaments.
1022553	Howell	do	Method of Fusing Lamp Filament to Leading-in Wires.
1022554	do	do	Welding Filaments to Metal Wires.
1023290	Arsem	Apr. 6, 1912	Reduction of Oxids.
1023295	Bresler	Apr. 16, 1912	Manufacturing of Metallic Filaments for Incandescent Electric Lamps.
1023305	Ferguson	do	Filament Apparatus.
1023307	Glaser	do	Incandescent Lamp.
1023315	Hunter	do	Metal Filament.
1023316	Hurwitz	do	Apparatus for Drawing Wires.
1023357	Beckwith	do	Mounting Filaments.
1023371	Fuller	do	Electric Furnace.
1024185	Dempster	Apr. 23, 1912	Machine for Forming Filaments.
1024898	Howell	Apr. 30, 1912	Filament Support.
1024923	Bresler	do	Process of Drying Cement Clamps for Filaments of Electric Lamps.
1025469	Hunter	May 7, 1912	Tubular Metallized Filaments.
1025499	Whitney	do	Process of Making Incandescent Lamps.
1026343	Coolidge	May 14, 1912	Manufacturing of Refractory Conductors.
1026344	do	do	Binder for the Manufacturing of Refractory Conductors.
1026345	do	do	Apparatus for Treating Filaments.
1026382	do	do	Metal Filament.

WESTINGHOUSE ELECTRIC & MANUFACTURING COMPANY,
150 Broadway, New York, N. Y.

GENTLEMEN: Referring to the incandescent lamp license granted to you dated as of January 1, 1927, it is understood that the General Electric Company may appoint the Graybar Electric Company and the National Carbon Company, Incorporated, as Agents for the sale of its lamps on a basis of compensation somewhat different from that indicated in the Schedules attached to the above mentioned license, it being understood that the arrangement with the Graybar Electric Company relates and will relate solely to lamps sold under the "Sunbeam" trade mark and that the arrangement with the National Carbon Company,

Digitized by Google

Incorporated relates and will relate solely to lamps of the miniature and decorative types.

This letter forms part of said license agreement dated as of January 1, 1927.

Very truly yours,

GENERAL ELECTRIC COMPANY,
By ----------
Vice President.

Attest:

Asst. Secretary.

Received and Accepted as of January 1, 1927.

WESTINGHOUSE ELECTRIC & MANUFACTURING COMPANY,
By----------, *President.*

Attest:

Secretary.

June ____, 1928.

WESTINGHOUSE ELECTRIC & MANUFACTURING COMPANY,
150 Broadway, New York.

GENTLEMEN: In addition to the patents listed in Schedule A of the license agreement between General Electric Company and yourselves, dated as of January 1, 1927, we have a license from the Union Switch & Signal Company for certain fields under the following patents:

United States Patent 1241512 issued October 2, 1917, to C. O. Harrington.
United States Patent 1330702 issued February 19, 1917, to C. O. Harrington.
United States Patent 1329639 issued February 3, 1920, to C. S. Snavely.
United States Patent 1329640 issued February 3, 1920, to C. S. Snavely.

This license is dated August 31, 1927, and contains the following provision:

"The Union Company hereby grants and agrees to grant to the General Company, under all United States patents issued or to be issued covering the existing inventions above referred to, exclusive, transferable and divisible licenses for the terms of said patents with the right to grant sub-licenses, to practice the said inventions and to make, use and sell apparatus and devices embodying any of said inventions for all purposes and all fields of use except for use in railway light signals, which signals are hereinafter defined. It is expressly agreed that no rights are granted to the General Company under this agreement for use of said inventions in railway light signals as hereinafter defined.

For the purpose of this agreement, a railway light signal is a railway signal of the type wherein an electric lamp together with optical projecting means constitutes the means for giving indications both in daylight and in darkness.

The term railway light signal as used in this agreement is to include signals located at the intersection of railways and highways to warn highway traffic of the approach of railway cars or trains, but the said term does not include a signal used for the control of general traffic on public highways and streets."

By virtue of our license to you of January 1, 1927, you are entitled to a license under the above mentioned four patents to the extent that we have the right and power to extend the same to you.

Very truly yours,

GENERAL ELECTRIC COMPANY,
By ----------
Vice President.

AGREEMENT—AMENDING ELECTRIC LAMP LICENSE OF JANUARY 1, 1927

GENERAL ELECTRIC COMPANY AND WESTINGHOUSE ELECTRIC & MANUFACTURING COMPANY APRIL 28, 1931

Agreement made as of this first day of January 1931, but actually executed this 28th day of April 1931, between General Electric Company, a New York corporation, and Westinghouse Electric & Manufacturing Company, a Pennsylvania corporation.

Whereas the parties hereto entered into an agreement, dated as of the first day of January 1927, but actually executed the 15th day of June 1928, entitled "Electric Lamp License"; and

Digitized by Google

Whereas the parties desire to include certain ultra-violet ray devices among the electric lamps which are licensed by said agreement, and desire also to modify the provisions of said agreement with respect to the export of lamps or the sale thereof for export;

Now therefore, it is mutually agreed by and between the parties hereto that—

(*a*) the first sentence of Article 3 of said Electric Lamp License be and the same hereby is amended to read as follows:

"An electric lamp is for the purpose of this agreement defined as any device the primary purpose of which is to convert electric energy into light within the visible spectrum and/or into ultra-violet radiations of wave lengths not less than 1,000 Angstrom units; but not including the so-called arc or enclosed arc lamps which do not have hermetically sealed containers"; and

(*b*) The last sentence of Article 7 of said Electric Lamp License be and the same hereby is amended to read as follows:

"No license is herein granted under foreign patents; and no license is granted to export electric lamps, or sell lamps for export, except to countries to which the Licensor would itself have a right to export them (or to countries to which on May 1, 1931, the Licensor had such right to export or sell for export), and no license is granted to sell filaments or other parts of lamps, nor to manufacture lamp bulbs, tubing, or cane glass."

All the remaining provisions of said Electric Lamp License shall be and remain in full force and effect.

In witness whereof the parties hereto have caused this instrument to be executed by their officers thereunto duly authorized and their corporate seal to be hereto attached on the day and year first above written.

GENERAL ELECTRIC COMPANY,
By CHARLES W. APPLETON, *Vice President.*

Attest:
[SEAL] L. W. MOSHER, *Assistant Secretary.*

WESTINGHOUSE ELECTRIC & MANUFACTURING COMPANY,
By S. A. MERRICK, *President.*

Attest:
[SEAL] WARREN H. JONES, *Secretary.*

STANDARD OIL DEVELOPMENT CO., LINDEN, N. J.,
26 Broadway, New York, January 17, 1936.

COMMITTEE ON PATENTS,
Room 1015, New House Office Building, Washington, D. C.
(Attention of the chairman.)

GENTLEMEN: We regret that reply to your letter of November 6 was delayed, owing to the time required to review this subject, until after the investigation was formally closed. Nevertheless, as requested in your letter of January 13, we now reply to your questions seriatim:

1. Attached hereto are lists of patents owned by Standard Oil Co. (New Jersey) and this company, which we believe to be complete up to January 1, 1936. It should be understood that in addition to these lists a small number of patents are owned by other operating subsidiaries of Standard Oil Co. (New Jersey). To make the list absolutely complete as covering all of the operating subsidiaries would require considerable time and put us to some expense. We would prefer not to attempt to do this unless you consider its absolutely essential for your present purposes.

2. We regret that there is no way of determining the exact extent to which the total number of patents owned and controlled by the Standard Oil Co. (New Jersey) and its subsidiaries are used by any of them at any particular time. We can say that it is not the policy to take out or acquire patents except on inventions relating to our own business and in the expectation of using these inventions. No records are kept, however, corelating the actual use of the patented invention with the patent itself. In a rapidly advancing art, such as the refining of oil, many inventions which seem promising never get into practical use. Often inventions become obsolete before the patents issue and in a large proportion of cases the inventions are obsolete before expiration of the patents. We have no exact data which would permit us to answer the question any more definitely than the foregoing.

3. We enclose copy of the constitution and bylaws of Standard Oil Co. (New Jersey) and this company.

Digitized by Google

4 and 5. This company and other subsidiaries of Standard Oil Co. (New Jersey) are parties to a very large number of agreements relating to or referring to patent rights, or in which patent rights enter in one manner or another. So far as we know there are none of these agreements which would correspond to the definition of the term "patent pool" as this term is generally defined; that is, a complete merger of the ownership of patent rights of a group of patentees in a certain field of invention or industry. We attach copies of various forms of agreements, listed below, to which Standard Oil Co. (New Jersey) and Standard Oil Development Co. are parties, and which range from simple cross-licensing agreements involving only two parties, up to the Hydro Patents Co.'s agreements which involve the hydrogenation patent rights of a very large percentage of the United States oil refining industry.

Agreement dated July 22, 1935, with Chemical Construction Corporation.

Agreement dated July 1, 1933, with Cuno Engineering Corporation.

Agreement dated March 28, 1934, Petroleum Distillation Corporation.

Agreement dated September 1, 1935, Gas Polymerization Processes.

Agreement dated October 27, 1933, H. C. Technique.

Agreement dated July 27, 1933, escrow and licenses, Gray Processes Corporation.

Agreement dated July 1, 1935, mutual licensing plan, Hydro Patents Co.

We believe the agreements enclosed are sufficient in number and range to illustrate fully the various types of patent agreements to which Standard Oil Co. (New Jersey) and this company are parties.

By way of comment, we would say that our general policy has been to endeavor to maintain complete independence with regard to our right to license or enforce our own patent rights.

6. We regret that it is impossible to give a complete answer to this question and impossible to give even an approximately complete answer without a great deal of expense and delay.

7. So far as we know, no patent rights involved in any of the agreements to which we are parties are used as a basis for charter or corporation franchises.

8. The technical employees of this company and other operating subsidiaries of Standard Oil Co. (New Jersey) who are in positions which are likely to result in their working out improvements applicable to our business are quite generally employed under term agreements giving the company the option to purchase all rights in their inventions relating to the business of the company, for a small agreed-upon consideration and with additional provision for compensation to the employee for any services he may be called upon to perform in connection with the securing or enforcement of the assigned patent rights after he has left the employ of the company.

9. We regret that it is impossible to make a complete list, as required by this question, for the reason that in many cross license agreements the license passes automatically under all patent rights of the licensor within a defined field. In most instances the licensor does not provide or maintain a complete list of such patent rights and, therefore, we as licensees have no adequate way of determining the full extent of the protection afforded. The legal effect of most of these cross-license agreements is that of a covenant-not-to-sue, and there is no need for a complete list of all of the actionable rights under which suit might be brought, since the agreement avoids all litigation between the parties in the defined field.

10 and 11. We do not know of any agreements to which we are a party as to which these questions would be directly pertinent. The nearest example of which we can think is the set of agreements, enclosed, referring to the Hydro Patents Co. At the time this plan of passing control of the hydrogenation patent rights in the United States to the American oil industry was formulated, an invitation to join in the formation of the Hydro Patents Co. was extended by Standard I. G. Co. to all the oil-refining companies in the United States which were listed in the then latest Bureau of Mines Report as having 20,000 barrels per day or more of complete refining capacity. A total of 22 companies having that capacity were so listed. Of these companies 18 accepted the invitation and identified themselves with the Hydro Patents Co. Due to changed economic conditions which have made the general use of the hydrogenation process for the intended purposes of oil refining uneconomic in the United States up to the present time, there has been no application made by any additional companies to join the original companies in this group.

Digitized by Google

The decision to invite to participate in the original group only those companies having 20,000 barrels or more of complete refining capacity was based on the fact that an economical hydrogenation unit for general oil refining at that time was believed to be not less than 5,000 barrels per day and no refiner having less than 20,000 barrels per day capacity would have been justified in considering the installation of such a large unit. No restrictions were placed upon the original group which would have prevented changing the plan if subsequent developments indicated that the process could be used on a smaller scale.

12. We believe that consideration might profitably be given to an amendment enlarging the scope of the recording statute to permit or require the recording of all instruments under which any patent right or license other than a simple nonexclusive, nontransferable license passes.

Much can be said in favor of such legislation if it does not attempt to achieve impracticable ends but is limited strictly in its purpose of creating a reliable complete public record of the beneficial ownership or control of all rights under patents other than simple immunities from suit.

Very truly yours,

FRANK A. HOWARD.

Active patents in name of Standard Oil Co. (New Jersey) Nov. 22, 1935

Patent no.	Date	Inventor	Title
1300816	Apr. 15, 1919	E. B. Cobb	Process of desulfurizing petroleum oils.
1315623	Sept. 9, 1919	do	Process for treatment of petroleum oils.
1317372	Sept. 30, 1919	C. M. Husted	Apparatus for treating fuller's earth and similar materials.
1321281	Nov. 11, 1919	L. Burgess	Process for producing aluminum chloride.
1322762	Nov. 25, 1919	E. B. Cobb	Making low-boiling oil from higher boiling petroleum or related oil.
1322878	do	do	Do.
1357224	Nov. 2, 1920	do	Process of desulfurizing oils.
1357225	do	do	Process of desulfurizing petroleum oils.
1357559	do	R. A. Heilenday	Globe holder.
1378536	May 17, 1921	E. J. Flynn	Outage gage.
1379523	May 24, 1921	L. Burgess	Process of reducing aluminum oxide.
1386077	Aug. 2, 1921	E. A. Rudigier	Method of distillation of oil.
1387835	Aug. 16, 1921	E. B. Cobb	Process of purifying hydrocarbon oils.
1387868	do	C. I. Robinson	Purifying hydrocarbon oils.
1388517	Aug. 23, 1921	E. B. Cobb	Manufacture of viscous water-white oils and other decolorized products of petroleum.
1388832	do	do	Manufacture of medicinal oils and other viscous decolorized products of petroleum.
1391757	Sept. 27, 1921	H. E. Buc	Production of pentochlor acetone.
1391758	do	do	Art of chlorination.
1394921	Oct. 25, 1921	E. C. McKenzie-Martyn and F. A. Howard.	Priming Device.
1401113	Dec. 20, 1921	L. Burgess	Process for treating residues resulting from the treatment of hydrocarbon with aluminum chloride.
1403198	Jan. 10, 1922	C. I. Robinson	Treating spent Fuller's earth.
1405183	Jan. 31, 1922	L. Burgess	Process for the production of anhydrous aluminum chloride.
1405286	do	E. M. Clark	Art of Pressure Distillation.
1410797	Mar. 28, 1922	do	Do.
1413005	Apr. 18, 1922	E. B. Cobb	Process of desulfurizing petroleum oils.
1413260	do	E. M. Clark	Process of Distilling Crude Petroleum and Products Thereof.
1413864	Apr. 25, 1922	M. D. Mann, Jr.	Purifying alcoholic liquid.
1413899	do	E. M. Clark	Refining of petroleum oil.
1413907	do	H. L. Gerstenberger	Metallic Drums.
1415232	May 9, 1922	C. Ellis	Process of Cracking oils under pressure.
1415351	do	F. A. Howard, C. I. Robinson, and J. M. Jennings.	Prevention of evaporation of stored liquids.
1415352	do	F. A. Howard and J. M. Jennings.	Prevention of evaporation.
1422583	July 11, 1922	R. B. Lebo	Process of purifying higher secondary alcohols.
1423719	July 25, 1922	J. M. Jennings	Stable foam for preventing the evaporation of stored liquids.
1423720	do	do	Foam covering for preventing the evaporation of stored liquids.
1423721	do	do	Do.
1431259	Oct. 10, 1922	C. I. Robinson	Recovery of byproducts of petroleum refining.

STANDARD OIL DEVELOPMENT CO.,
26 Broadway, New York, January 7, 1936.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
House of Representatives, Washington, D. C.

DEAR SIR: I have just noted in today's copy of the Daily Oil Digest an announcement that your committee has closed its investigation of the patent pool without touching oil. At the time I read this notice, I was just reviewing a proposed answer to the questionnaire of your committee sent out on November 6. This

Digitized by Google

questionnaire was addressed to Standard Oil Co. (New Jersey), which, although formerly an operating company, has been for the last few years a holding company only.

At the request of Mr. Wellman, general counsel for the holding company, I prepared an answer in behalf of that company which was completed just before Christmas. On considering the matter with Mr. Wellman, however, it was apparent that this answer could not adequately serve the purposes of your committee because for several years past the holding company had not been directly involved in any patent agreements. Mr. Wellman and I, therefore agreed that it would better serve your purposes to disregard the formalities and to prepare an answer in behalf of the Standard Oil Development Co., which is the techincal unit of the Standard Oil Co. (New Jersey) interests and which operates the principal research, development, and patent departments used in the service of the Standard Oil Co. (New Jersey) operating subsidiaries. This last answer is now virtually completed and I would be glad to forward it to you if it can now serve any useful purpose.

I am giving you herewith, however, the only substantial contribution which I feel we can make to your investigation.

We believe that it would be constructive and helpful from every standpoint to amend the patent statutes to permit and require the recording of all instruments under which any patent right or license other than a simple, nonexclusive, nontransferable license passes. Much can be said in favor of such legislation if it does not attempt to achieve impracticable ends by way of purporting to require the recording of the full agreement between the parties connected with the transfer of the patent right or the full consideration therefor. The experience of centuries with real-estate recording statutes in all countries has shown that there is no adequate way of compelling parties who are making commercial trades to disclose to the outside world all of the real considerations which passed between them in connection with the sale or purchase of real estate. Means have always been found in all countries to evade requirements of this kind. I think it would be easier to enforce the prohibition law than to enforce the requirement that the full and true consideration for the purchase or sale of patent rights or any other property of such a speculative character should be recorded.

At first glance, my suggestion does not appear to cover the full scope of your proposal to require the recording of patent-pool agreements. Upon further consideration, however, I hope you will agree that in practice it will have about the same result. A patent pool is a merger in some form of rights or interests under patents. The requirement that all conveyances of rights or interests under patent rights should be publicly recorded will result in making a public record of the existence of the patent pool, the names of all of the parties interested as grantors or grantees and the extent of the control by each of all the patent rights involved. The only thing about the pool which will not be disclosed, therefore, will be the considerations, other than the patent rights, moving between the parties. I appreciate that an argument can be made in favor of the desirability of making a public record of all patent contracts. All these arguments, however, are met by the conclusive answer that it is not practical and never has been practical to achieve full publicity on commercial trades. If legislation is introduced aiming directly at a requirement for the recording of the full text of all patent agreements, all that will be accomplished, I fear, is that the resistance to the passage of such legislation will be greatly increased and, in the end, the practical result will be exactly the same as though the legislation were confined to the simple objective of requiring, under suitable penalty running against the patent itself, the recording of every instrument passing any right or license under a patent of the United States, except simple, nonexclusive licenses or covenants not to sue. It is not necessary to attempt to cover simple licenses because they cannot be instruments of oppression by any possibility, and it is not feasible to cover them because they arise by operation of law, growing out of the relation of parties such as vendor and vendee, lessor and lessee, agent and principal, employer and employee, by estoppel, and by implication under a wide variety of contracts which have nothing to do with patents per se.

I am sincerely desirous of being helpful and if it will be of any service to you to have us complete the details of the questionnaire which we have, or, if there is any further information we can give you, please feel free to call on us.

Very truly yours.

FRANK A. HOWARD.

BYLAWS—STANDARD OIL CO. (NEW JERSEY) AS REVISED MAY 25, 1934

ARTICLE I. MEETINGS OF STOCKHOLDERS

1. All meetings of stockholders shall be held at the principal office of the company in New Jersey, or at such other place in the same municipality in which its principal office may be located, or at the office of the company in the city of New York, or at the office of the Corporation Trust Co. in the city of New York, as may from time to time be designated by the board of directors. Unless and until otherwise determined by the board, meetings of stockholders shall be held at the principal office of the company in New Jersey.

2. The annual meeting of stockholders shall be held on the first Tuesday of June in each year if not a legal holiday and, if a legal holiday, then on the next succeeding business day, at which meeting the directors shall be elected.

3. Notice in writing of the annual meeting shall be given to each stockholder of record by mailing the same to him at his address as it appears on the stock books of the company, at least 10 days prior to the meeting.

4. There may be considered and transacted at any annual meeting, without special notice, any business which properly may be brought before a general meeting of stockholders and, if due notice be given, any business may be considered and transacted which, under any of the provisions of the laws of the State of New Jersey, may be considered and transacted at a special meeting of stockholders.

5. Special meetings of stockholders may be called by the board of directors at such times as the board may appoint. The board of directors shall call a special meeting of stockholders within 10 days after a written request to call such meeting, signed by a majority in interest of stockholders, has been filed with the board of directors.

6. Notice in writing of each special meeting, stating the object or objects thereof, shall be given by mailing the same to each stockholder of record at his address as it appears on the stock books of the company, at least 10 days prior to the date of such meeting. The business transacted at special meetings shall be confined to the objects specified in the notice.

7. At any meeting of stockholders, whether annual or special, a majority of stock issued and outstanding and represented by the persons entitled to vote thereon, either in person or by proxy, shall constitute a quorum for the transaction of business unless the representation of a larger number shall be required by law, and in that case the representation of the number so required shall constitute a quorum. If a quorum of stock shall not be so represented, a majority in interest of stockholders present in person or by proxy may adjourn, from time to time, without notice other than by announcement at the meeting, until holders of the amount of stock requisite to constitute a quorum shall attend. At any adjourned meeting at which a quorum shall be present, any business may be transacted which might have been transacted at the meeting as originally called.

8. The board of directors shall have power to close the stock transfer books of the company for a period not exceeding 30 days preceding the date of any meeting of stockholders or the date for payment of any dividend or the date for the allotment of rights or the date when any change or conversion or exchange of capital stock shall go into effect: or, in lieu of closing the stock transfer books as aforesaid, the board of directors may fix in advance a date, not exceeding 30 days preceding the date of any meeting of stockholders, or the date for the payment of any dividend, or the date for the allotment of rights, or the date when any change or conversion or exchange of capital stock shall go into effect, as a record date for the determination of the stockholders entitled to notice of and to vote at any such meeting, or entitled to receive payment of any such dividend, or any such allotment of rights, or to exercise the rights in respect to any such change, conversion or exchange of capital stock, and in such case stockholders of record on the date so fixed shall be exculsively entitled to such notice of and vote at such meeting, or to receive payment of such dividend, or allotment of rights, or exercise such rights, as the case may be, and notwithstanding any transfer of any stock on the books of the company after any such record date fixed as aforesaid.

9. At all elections, the presiding officer of the meeting shall appoint two inspectors who shall receive the proxies, be the judges of the qualifications of the voters, prescribe rules and regulations for voting, collect and count the votes, and report in writing the result of the ballot. Such inspectors shall be sworn to perform their duties faithfully. No candidate for election as director shall be appointed to act as inspector.

Digitized by Google

ARTICLE II. BOARD OF DIRECTORS

1. The business and affairs of the company, subject to the provisions of the statutes of New Jersey, the certificate of incorporation and these bylaws, shall be managed and controlled by a board of directors consisting of 10 members elected by ballot, who shall hold office for 1 year and until others are chosen and qualified in their stead. The number of directors may be increased or decreased from time to time by amendment of these bylaws, but shall never be decreased to less than three. If at any time, except at the annual meeting of the stockholders, the number of directors shall be increased, the additional director or directors may be elected by ballot by the board of directors, to serve until the next meeting of the stockholders or until their successors are elected and qualified. In case of any vacancy in the board of directors by death, resignation or otherwise, the board shall have the power to fill such vacancy for the unexpired term. All directors shall be shareholders in the company.

2. Meetings of the board of directors may be called at the direction of the chairman of the board, of the president or of any vice president whose authority so to do is not restricted, or in the absence of such officers, at the direction of any one of the directors, and may be held at such place or places within or without the State of New Jersey, as from time to time may be designated in the notice.

3. Five of the directors shall constitute a quorum for the transaction of business.

ARTICLE III. EXECUTIVE COMMITTEE

1. The board of directors, by resolution of a majority of the whole board, may appoint three or more directors to constitute an executive committee, which committee, to the extent provided in said resolution, and subject to the provisions of the certificate of incorporation and these bylaws shall have and may exercise during the intervals between the meetings of the board, the powers of the board of directors in the management of the business and affairs of the company and shall have the power to authorize the seal of the company to be affixed to all papers which may require it. Such committee shall meet at such time or times as it may designate and shall make its own rules of procedure. Three members of the committee shall constitute a quorum thereof.

ARTICLE IV. OFFICERS

1. The board of directors at the first meeting after the annual election of directors may elect a chairman of the board and shall elect a president, three or more vice presidents as the board may determine, a treasurer and a secretary. Any two or more of said offices, except the office of president and vice president, may be filled by the same person. The president shall be a director but the other officers need not be members of the board of directors.

2. The board of directors may from time to time appoint such assistant treasurers, assistant secretaries and such other officers or agents as it may deem necessary or advisable for the transaction of the business of the company, who shall perform such duties as may be designated or assigned to them by the board.

3. The chairman of the board shall preside at all meetings of stockholders and directors. He shall have general care and supervision of the affairs of the company and in the absence of the president shall exercise the powers and duties of the president.

4. The president, subject to the board of directors, shall be the chief executive officer of the company. In the absence of the chairman, he shall preside at meetings of the stockholders and directors and exercise the powers and duties of the chairman.

5. In the event of the death, absence or disability of the chairman of the board and the president, one of the vice presidents may be designated by the board of directors to exercise their powers and perform their duties.

6. The secretary, in addition to his statutory duties, shall give notice of all meetings of stockholders and of the board of directors. He shall attend such meetings when practicable; keep true records of the votes at elections and all other proceedings; attest such records by his signature after every meeting; safely keep all documents and papers which shall come into his possession; truly keep the books and accounts of the company appertaining to his office, and present statements thereof when required by the board. He shall perform from time to time such other duties as shall be assigned to him by the board of directors, chairman of the board, president or any vice president. He shall be sworn to the faithful discharge of his duties.

Digitized by Google

The assistant secretaries shall perform such of the duties of the secretary as the directors or the secretary may require.

7. The treasurer, in addition to his statutory duties, shall keep and account for all moneys, funds and property of the company which shall come into his hands, and he shall render such accounts and present such statements to the directors as may be required of him. He shall deposit or cause to be deposited all funds of the company which may come into his hands in such bank or banks as the directors may designate. He shall keep bank accounts in the name of the company and shall exhibit the books and accounts to any director upon application at the office during ordinary business hours. He shall endorse or cause to be endorsed in the name of the company for collection the bills, notes, checks, and other negotiable instruments received by the company. He shall sign, or cause to be signed, all bills, notes, checks, and other negotiable instruments of the company. He shall pay out or cause to be paid out money as the company may require, taking proper vouchers therefore; provided, however, that the directors shall have power by resolution to delegate any of the duties of the treasurer to other officers and to provide by what officers all bills, notes, checks, vouchers, orders, or other instruments shall be signed. The treasurer shall give bond in such sum and with such surety or sureties as may be required from time to time by the board of directors.

The assistant treasurers shall perform such of the duties of the treasurer as from time to time may be delegated to them by the treasurer, except that an assistant treasurer may be appointed to be head of the tax department of the company, in which event the powers and duties of such assistant treasurer shall be limited to tax matters.

8. If any elective office shall become vacant, the directors at any meeting may fill such vacancy.

9. All officers and agents chosen, elected, or appointed by the board of directors shall be subject to removal by the board at any time with or without cause.

ARTICLE V. TRANSFER OF SHARES

1. Shares of stock of the company shall be transferred on the books of the company only by the holder thereof in person or by his duly authorized attorney upon the surrender and cancelation of the certificate or certificates therefor; provided that in case of lost or destroyed certificates, transfer shall be made only after the receipt of a satisfactory bond, if required by the board of directors.

2. The board of directors may appoint a transfer agent and a registrar of transfers, and all stock certificates shall bear the signature of both.

ARTICLE VI. FISCAL YEAR

The fiscal year of the company shall be the calendar year.

ARTICLE VII. CORPORATE SEAL

1. The corporate seal is and until otherwise ordered by the board of directors shall be an impression upon paper or wax bearing the words "STANDARD OIL COMPANY, INCORPORATED UNDER THE LAWS OF NEW JERSEY".

2. The impression of the seal may be made and attested by either the secretary or an assistant secretary for the authentication of contracts and other papers requiring the seal and bearing the signature of the chairman, the president, or one of the vice presidents.

ARTICLE VIII. AMENDMENTS

The board of directors may make, alter, amend, or rescind the bylaws of the company at any meeting.

STATE OF NEW YORK,
County of New York, ss:

I, M. H. Eames, assistant secretary, do hereby certify that the foregoing is a true copy of the bylaws of Standard Oil Co. (New Jersey) as amended to date.

Witness my hand and the seal of the corporation at New York, N. Y., this 3d day of June 1935.

_____,
Assistant Secretary.

Digitized by Google

CERTIFICATE OF INCORPORATION—STANDARD OIL CO. (NEW JERSEY)

(As filed in the office of the Secretary of State of the State of New Jersey Aug. 5, 1882; and amended Mar. 19, 1892, June 16, 1899, Aug. 18, 1919, May 5, 1920, Dec. 20, 1920, Nov. 10, 1922, June 2, 1926, June 7, 1927, and June 5, 1928)

We, Henry M. Flagler, Thomas C. Bushnell, and James McGee, being desirous to form a company under and pursuant to the act of the Legislature of the State of New Jersey, entitled "An act concerning corporations" approved April 7, 1875, and the several acts amendatory thereof and supplemental thereto, do hereby certify:

First. The name of the corporation is Standard Oil Company.

Second. The location of the principal office in the State of New Jersey is at no. 185 Washington Street, in the city of Newark and county of Essex. The name of the agent therein and in charge thereof and upon whom process against this company may be served, is E. C. Haines.

Third. The objects for which this company is formed are: To do all kinds of mining, manufacturing, and trading business; transporting goods and merchandise by land or water in any manner; to buy, sell, lease, and improve lands; build houses, structures, vessels, cars, wharves, docks, and piers; to lay and operate pipe lines; to erect and operate telegraph and telephone lines and lines for conducting electricity; to enter into and carry out contracts of every kind pertaining to its business; to acquire, use, sell, and grant licenses under patent rights; to purchase or otherwise acquire, hold, sell, assign, and transfer shares of capital stock and bonds or other evidences of indebtedness of corporations, and to exercise all the privileges of ownership including voting upon the stocks so held; to carry on its business and have offices and agencies therefor in all parts of the world, and to hold, purchase, mortgage, and convey real estate and personal property outside the State of New Jersey.

Fourth. The total authorized capital stock of the corporation is seven hundred fifty million dollars ($750,000,000), divided into thirty million (30,000,000) shares of the par value of twenty-five dollars ($25) each, all of one class. From time to time such stock may be increased or decreased or one or more additional classes of stock may be created with such preferential, special, or qualified rights as may be determined by the board of directors and the stockholders having voting rights, to the extent and in the manner permitted by the General Corporation Act of the State of New Jersey.

Fifth. The following s a list of the names and residences of stockholders, and of the number of shares held by each: H. M. Flagler, of New York City, one share; Paul Babcock, Jr., of Jersey City, one share; James McGee, of Plainfield, N. J., one share; Thomas C. Bushnell, of Morristown, N. J., one share; John D. Rockefeller, of Cleveland, Ohio; William Rockefeller, of New York City; J. A. Bostwick, of New York City; John D. Archbold, of New York City; O. H. Payne, of Cleveland, Ohio; William G. Warden, of Philadelphia, Pa.; Benjamin Brewster, of New York City; Charles Pratt, of Brooklyn, N. Y.; and H. M. Flagler, of New York City; trustees of Standard Oil Trust, 29,906 shares, of which 21,724 shares are issued for property purchased and necessary for the business of this corporation.

Sixth. The duration of the corporation shall be unlimited.

Seventh. The corporation may use and apply its surplus earnings, or accumulated profits authorized by law to be reserved, to the purchase or acquisition of property, and to the purchase or acquisition of its own capital stock from time to time, to such extent and in such manner and upon such terms as its board of directors shall determine; and neither the property nor the capital stock so purchased or acquired, nor any of its capital stock taken in payment or satisfaction of any debt due to the corporation, shall be regarded as profits for the purpose of declaration or payment of dividends, unless otherwise determined by a majority of the board of directors, or a majority of the stockholders.

The corporation, in its bylaws, may prescribe the number necessary to constitute a quorum of the board of directors which may be less than a majority of the whole number.

The number of directors at any time may be increased or diminished by vote of the board of directors, and in the case of any such increase the board of directors shall have power to elect such additional directors, to hold office until the next meeting of stockholders, or until their successors shall be elected.

The board of directors shall have power to make, alter, amend, and rescind the bylaws of the corporation, to fix the amount to be reserved as working capital,

Digitized by Google

to authorize and to cause to be executed mortgages and liens upon the real and personal property of the corporation; and from time to time to sell, assign, transfer, or otherwise dispose of any or all of the property of the corporation, but no such sale of all of the property shall be made except pursuant to the votes of at least two-thirds of the board of directors.

The board of directors, by resolution passed by a majority of the whole board, may designate three or more directors to constitute an executive committee, which committee, to the extent provided in said resolution or in the by-laws of the corporation, shall have, and may exercise, the power of the board of directors in the management of the business and affairs of the corporation, and shall have power to authorize the seal of the corporation to be affixed to all papers which may require it.

The board of directors from time to time shall determine whether and to what extent, and at what times and places, and under what conditions and regulations, the accounts and books of the corporation, or any of them, shall be open to the inspection of the stockholders; and no stockholder shall have any right of inspecting any account or book or document of the corporation, except as conferred by statute or authorized by the board of directors, or by a resolution of the stockholders.

The board of directors shall have power to hold its meetings, to have one or more offices, and to keep the books of the corporation (except the stock and transfer books) outside of the State, at such places as may be from time to time designated by them.

Any meeting or meetings of stockholders of this corporation may be held outside of the State of New Jersey, but only at the office of the corporation in the city of New York or at the office of the Corporation Trust Co., in the city of New York.

In witness whereof, the said parties have hereunto set their hands and seals this first day of August, A. D. 1882.

H. M. FLAGLER. [SEAL]
T. C. BUSHNELL. [SEAL]
JAS. MCGEE. [SEAL]

STATE OF NEW YORK,
County of New York, ss:

Be it remembered that on this 1st day of August 1882, before the subscriber, a commissioner for the State of New Jersey for taking the acknowledgment and proof of deeds, personally came Henry M. Flagler, Thomas C. Bushnell, and James McGee, known as me to be the subscribers to the foregoing instrument, and the contents thereof being by me first made known to them severally, they and each of them acknowledged that they signed, sealed, and delivered the same as their voluntary act and deed, all of which I certify under my hand and official seal.

[SEAL] JAS. W. HALE.
Comr. for New Jersey in New York.

4 Hanover Street.

Endorsed: "Received in the Hudson County, N. J., clerk's office, August 2, 1882, in clerk's record, no. 3, page 85, &c.

"H. K. VAN HORN, *Clerk*

"Filed August 5, 1882, Henry C. Kelsey, secretary of state."

STATE OF NEW JERSEY,
Department of State,

I, ——— ———, secretary of state of the State of New Jersey, do hereby certify that the foregoing is a true copy of the certificate of incorporation of "Standard Oil Company," formerly the Standard Oil Company of New Jersey, as filed August 5, 1882, and amended March 19, 1892, June 16, 1899, August 18, 1919, May 5, 1920, December 20, 1920, November 10, 1922, June 2, 1926, June 7, 1927, and June 5, 1928, and the endorsements thereon, as the same is taken from and compared with the original now remaining on file in my office and of record therein.

In testimony whereof, I have hereunto set my hand and affixed my official seal at Trenton, this —— day of ———, A. D. 19—.

[SEAL] ——— ———, *Secretary of State.*

BY-LAWS OF STANDARD DEVELOPMENT CO.

OFFICES

1. The principal office shall be in the city of Wilmington, county of New Castle, State of Delaware, and the name of the resident agent in charge thereof is the Corporation Trust Co. of America.

The corporation may also have an office in the city of New York, State of New York, and also offices at such other places as the board of directors may from time to time appoint or in the business of the corporation may require.

SEAL

2. The corporate seal shall have inscribed thereon the name of the corporation, the year of its organization, and the words "Corporate Seal, Delaware".

STOCKHOLDERS' MEETINGS

3. All meetings of the stockholders shall be held at the office of the corporation in New York City, N. Y.

4. An annual meeting of stockholders, after the year 1922, shall be held on the 20th day of March in each year, if not a legal holiday, and if a legal holiday, then on the next secular day following, at 2:00 o'clock p. m., when they shall elect by a plurality vote, by ballot, a board of directors, and transact such other business as may properly be brought before the meeting.

5. The holders of a majority of the stock issued and outstanding, and entitled to vote thereat, present in person, or represented by proxy, shall be requisite and shall constitute a quorum at all meetings of the stockholders for the transaction of business except as otherwise provided by law, by the certificate of incorporation or by these bylaws. If, however, such majority shall not be present or represented at any meeting of the stockholders, the stockholders entitled to vote thereat present in person, or by proxy, shall have power to adjourn the meeting from time to time, without notice other than announcement at the meeting, until the requisite amount of voting stock shall be present. At such adjourned meeting at which the requisite amount of voting stock shall be represented any business may be transacted which might have been transacted at the meeting as originally notified.

6. At each meeting of the stockholders every stockholder having the right to vote shall be entitled to vote in person, or by proxy appointed by an instrument in writing subscribed by such stockholder and bearing a date not more than 3 years prior to said meeting, unless said instrument provides for a longer period. Each stockholder shall have one vote for each share of stock having voting power, registered in his name on the books of the corporation, except that no share of stock shall be voted on at any election for directors which has been transferred on the books of the corporation within 20 days next preceding such election. The vote for directors, and, upon the demand of any stockholder, the vote upon any question before the meeting, shall be by ballot. All elections shall be had and all questions decided by a plurality vote.

7. Written notice of the annual meeting shall be mailed to each stockholder entitled to vote thereat at such address as appears on the stock book of the corporation, at least 5 days prior to the meeting.

8. A complete list of the stockholders entitled to vote at the ensuing election, arranged in alphabetical order, with the residence of each, and the number of voting shares held by each, shall be prepared by the secretary and filed in the office where the election is to be held, at least 10 days before every election, and shall at all times, during the usual hours for business, and during the whole time of said election, be open to the examination of any stockholder.

9. Special meetings of the stockholders, for any purpose or purposes, unless otherwise prescribed by statute, may be called by the president, and shall be called by the president or secretary at the request in writing of a majority of the board of directors, or at the request in writing of stockholders owning a majority in amount of the entire capital stock of the corporation issued and outstanding and entitled to vote. Such request shall state the purpose or purposes of the proposed meeting.

10. Business transacted at all special meetings shall be confined to the objects stated in the call.

Digitized by Google

11. Written notice of a special meeting of stockholders, stating the time and place and object thereof, shall be mailed, postage prepaid, at least 3 days before such meeting, to each stockholder entitled to vote thereat at sudh address as appears on the books of the corporation.

DIRECTORS

12. The property and business of this corporation shall be managed by its board of directors, 18 in number. Directors need not be stockholders. They shall be elected at the annual meeting of the stockholders, and each director shall be elected to serve until his successor shall be elected and shall qualify.

13. The directors may hold their meetings and have one or more offices, and keep the books of the corporation, except the original or duplicate stock ledger, outside of Delaware, at the office of the corporation in the city of New York, N. Y., or at such other places as they may from time to time determine.

14. In addition to the powers and authorities by these bylaws expressly conferred upon them, the board may exercise all such powers of the corporation and do all such lawful acts and things as are not by statute or by the certificate of incorporation or by these bylaws directed or required to be exercised or done by the stockholders.

EXECUTIVE COMMITTEE

15. There may be an executive committee of two or more directors designated by resolution passed by a majority of the whole board. Said committee may meet at stated times, or on notice to all by any of their own number. During the intervals between meetings of the board such committee shall advise with and aid the officers of the corporation in all matters concerning its interests and the management of its business, and generally perform such duties and exercise such powers as may be directed or delegated by the board of directors from time to time. The board may delegate to such committee authority to exercise all the powers of the board, excepting power to amend the bylaws, while the board is not in session. Vacancies in the membership of the committee shall be filled by the board of directors at a regular meeting or at a special meeting called for that purpose.

16. The executive committee shall keep regular minutes of its proceedings and report the same to the board when required.

COMPENSATION OF DIRECTORS

17. Directors, as such, shall not receive any stated salary for their services, but by resolution of the board a fixed sum and expenses of attendance, if any, may be allowed for attendance at each regular or special meeting of the board; provided, that nothing herein contained shall be construed to preclude any director from serving the corporation in any other capacity and receiving compensation therefor.

18. Members of special or standing committees may be allowed like compensation for attending committee meetings.

MEETINGS OF THE BOARD

19. The newly elected board may meet at such place and time as shall be fixed by the vote of the stockholders at the annual meeting for the purpose of organization or otherwise, and no notice of such meeting shall be necessary to the newly elected directors in order legally to constitute the meeting; provided, a majority of the whole board shall be present; or they may meet at such place and time as shall be fixed by the consent in writing of all the directors.

20. Regular meetings of the board may be held without notice at such time and place as shall from time to time be determined by the board.

21. Special meetings of the board may be called by the president on 3 days' notice to each director, either personally or by mail or by telegram; special meetings shall be called by the president or secretary in like manner and on like notice on the written request of two directors.

22. At all meetings of the board a majority of the directors shall be necessary and sufficient to constitute a quorum for the transaction of business, and the act of a majority of the directors present at any meeting at which there is a quorum shall be the act of the board of directors, except as may be otherwise specifically provided by statute or by the certificate of incorporation or by these bylaws.

Digitized by Google

OFFICERS

23. The officers of the corporation shall be chosen by the directors and shall be a president, two vice presidents, secretary, and treasurer. The secretary and treasurer may be the same person, and the vice president may hold at the same time the office of secretary or treasurer.

24. The board of directors, at its first meeting after each annual meeting of stockholders shall choose a president and two vice presidents from their own number, and a secretary and a treasurer who need not be members of the board.

25. The board may appoint such other officers and agents as it shall deem necessary, who shall hold their offices for such terms and shall exercise such powers and perform such duties as shall be determined from time to time by the board.

26. The salaries of all officers and agents of the corporation shall be fixed by the board of directors.

27. The officers of the corporation shall hold office until their successors are chosen and qualify in their stead. Any officer elected or appointed by the board of directors may be removed at any time by the affirmative vote of a majority of the whole board of directors.

THE PRESIDENT

28. (*a*) The president shall be the chief executive officer of the corporation; he shall preside at all meetings of the stockholders and directors; he shall have general and active management of the business of the corporation, and shall see that all orders and resolutions of the board are carried into effect.

(*b*) He shall execute bonds, mortgages, and other contracts requiring a seal, under the seal of the corporation; shall keep in safe custody the seal of the corporation, and, when authorized by the board, affix the same to any instrument requiring it, and when so affixed it shall be attested by the signature of the secretary or the treasurer.

(*c*) He shall be ex officio a member of all standing committees and shall have the general powers and duties of supervision and management usually vested in the office of president of a corporation.

VICE PRESIDENT

29. The vice president shall, in the absence or disability of the president, perform the duties, and exercise the powers of the president, and shall perform such other duties as the board of directors shall prescribe.

THE SECRETARY

30. The secretary shall attend all sessions of the board and all meetings of the stockholders and record all votes and the minutes of all proceedings in a book to be kept for that purpose; and shall perform like duties for the standing committees when required. He shall give or cause to be given notice of all meetings of the stockholders, and of the board of directors, and shall perform such other duties as may be prescribed by the board of directors or president, under whose supervision he shall be.

THE TREASURER

31. (*a*) The treasurer shall have the custody of the corporate funds and securities and shall keep full and accurate accounts of receipts and disbursements in books belonging to the corporation and shall deposit all moneys and other valuable effects in the name and to the credit of the corporation, in such depositories as may be designated by the board of directors.

(*b*) He shall disburse the funds of the corporation as may be ordered by the board, taking proper vouchers for such disbursements, and shall render to the president and directors, at the regular meetings of the board, or whenever they may require it, on account of all his transactions as treasurer and of the financial condition of the corporation.

(*c*) He shall give the corporation a bond if required by the board of directors in a sum, and with one or more sureties satisfactory to the board, for the faithful performance of the duties of his office, and for the restoration to the corporation in case of his death, resignation, retirement, or removal from office, of all books, papers, vouchers, money, and other property of whatever kind in his possession or under his control belonging to the corporation.

Digitized by Google

VACANCIES

32. If the office of any director, or of any officer or agent, one or more, becomes vacant by reason of death, resignation, retirement, disqualification, removal from office, or otherwise, the directors then in office, although less than a quorum, by a majority vote, may choose a successor or successors, who shall hold office for the unexpired term in respect of which such vacancy occurred.

DUTIES OF OFFICERS MAY BE DELEGATED

33. In case of the absence of any officer of the corporation, or for any other reason that the board may deem sufficient, the board may delegate, for the time being, the powers or duties, or any of them, of such officer to any other officer, or to any director, provided a majority of the entire board concur therein.

CERTIFICATES OF STOCK

34. The certificates of stock of the corporation shall be numbered and shall be entered in the books of the corporation as they are issued. They shall exhibit the holder's name and number of shares and shall be signed by the president or a vice president and the treasurer or an assistant treasurer, or the secretary or an assistant secretary.

TRANSFERS OF STOCK

35. Transfers of stock shall be made on the books of the corporation only by the person named in the certificate or by attorney, lawfully constituted in writing, and upon surrender of the certificate therefor.

CLOSING OF TRANSFER BOOKS

36. The board of directors may close the transfer books in their discretion for a period not exceeding 30 days preceding any meeting, annual or special, of the stockholders, or the day appointed for the payment of a dividend.

REGISTERED STOCKHOLDERS

37. The corporation shall be entitled to treat the holder of record of any share or shares of stock as the holder in fact thereof and accordingly shall not be bound to recognize any equitable or other claim to or interest in such share on the part of any other person, whether or not it shall have express or other notice thereof, save as expressly provided by the laws of Delaware.

LOSS CERTIFICATES

38. Any person claiming a certificate of stock to be lost or destroyed shall make an affidavit or affirmation of that fact and advertise the same in such manner as the board of directors may require, and shall if the directors so require give the corporation a bond of indemnity, in form and with one or more sureties satisfactory to the board, in at least double the value of the stock represented by said certificate, whereupon a new certificate may be issued of the same tenor and for the same number of shares as the one alleged to be lost or destroyed.

INSPECTION OF BOOKS

39. The directors shall determine from time to time whether, and, if allowed, when and under what conditions and regulations the accounts and books of the corporation (except such as may by statute be specifically open to inspection) or any of them shall be open to the inspection of the stockholders, and the stockholders' rights in this respect are and shall be restricted and limited accordingly.

CHECKS

40. All checks or demands for money and notes of the corporation shall be signed by such officer or officers, person or persons as the board of directors may from time to time designate.

FISCAL YEAR

41. The fiscal year shall begin the first day of January in each year.

Digitized by Google

DIVIDENDS

42. Dividends upon the capital stock of the corporation, when earned, may be declared by the board of directors at any regular or special meeting.

Before payment of any dividend or making any distribution of profits, there may be set aside out of the surplus or net profits of the corporation such sum or sums as the directors from time to time, in their absolute discretion, think proper as a reserve fund to meet contingencies, or for equalizing dividends, or for repairing or maintaining any property of the corporation, or for such other purpose as the directors shall think conducive to the interests of the corporation.

DIRECTORS' ANNUAL STATEMENT

43. The board of directors shall present at each annual meeting, and when called for by vote of the stockholders at any special meeting of the stockholders, a full and clear statement of the business and condition of the corporation.

NOTICES

44. Whenever under the provisions of these bylaws notice is required to be given to any director, officer, or stockholder, it shall not be construed to mean personal notice, but such notice may be given in writing, by mail, by depositing the same in the post office or letter box, in a post-paid sealed wrapper, addressed to such stockholder, officer, or director at such address as appears on the books of the corporation, or, in default of other address, to such director, officer, or stockholder at the general post office in the city of Wilmington, Del., and such notice shall be deemed to be given at the time when the same shall be thus mailed.

Any stockholder, director, or officer may waive any notice required to be given under these bylaws.

AMENDMENTS

45. These bylaws may be altered or amended by the affirmative vote of a majority of the stock issued and outstanding and entitled to vote thereat, at any regular or special meeting of the stockholders if notice of the proposed alteration or amendment be contained in the notice of the meeting, or by the affirmative vote of a majority of the board of directors at any regular or special meeting of the board if notice of the proposed alteration or amendment be contained in the notice of the meeting.

AMENDMENTS ADOPTED DECEMBER 20, 1927

Resolved, That section12 of the bylaws of this corporation providing for 18 directors and for the election of directors at the annual meeting of the stockholders shall be, and the same is hereby, amended to increase the number of directors to such number as may be elected, not exceeding 21, and to provide for the election of directors at special as well as at annual meetings of the stockholders, so that section 12 of said bylaws will read as follows:

"12. The property and business of this corporation shall be managed by its board of directors, composed of such number as may be elected, not exceeding 21. Directors need not be stockholders. They shall be elected at the annual meeting of the stockholders, and resignations of directors may be accepted and vacancies filled at special meetings of the stockholders, and each director shall be elected to serve until his successor shall be elected and shall qualify."

Resolved, That section 19 of the bylaws of this corporation, requiring a majority of the whole board of directors to be present, shall be, and the same is hereby, amended to provide for a quorum instead of a majority, so that section 19 will read as follows:

"19. The newly elected board may meet at such place and time as shall be fixed by the vote of the stockholders at the annual meeting, for the purpose of organization or otherwise, and no notice of such meeting shall be necessary to the newly elected directors in order legally to constitute the meeting, provided a quorum of the whole board shall be present; or they may meet at such place and time as shall be fixed by the consent in writing of all the directors."

Resolved, That section 22 of the bylaws of this corporation providing that a majority of the directors shall constitute a quorum shall be, and the same is

Digitized by Google

hereby, amended to provide for a quorum of 7, so that said section will read as follows:

"22. At all meetings of the board of seven of the directors shall be necessary and sufficient to constitute a quorum for the transaction of business, and the act of a majority of the directors present at any meeting at which there is a quorum shall be the act of the board of directors, except as may be otherwise specifically provided by statute or by the certificate of incorporation or by these bylaws."

Resolved, That section 33 of the bylaws of this corporation providing that a majority of the entire board may authorize the delegation of the powers and duties of any officer shall be, and the same is hereby, amended to provide that a quorum of the board shall concur in such delegation, so that said section will read as follows:

"3. In case of the absence of any officer of the corporation, or for any other reason that the board may deem sufficient, the board may delegate, for the time being, the powers or duties, or any of them, of such officer to any other officer, or to any director, provided a quorum of the entire board concur therein."

AMENDMENTS ADOPTED NOVEMBER 29, 1929

Resolved, That section 23 of the bylaws of this corporation shall be, and the same is hereby, amended to read as follows:

"23. The officers of the corporation shall be chosen by the directors and shall be a president, one or more vice presidents, a secretary, and a treasurer. The secretary and treasurer may be the same person, and a vice president may hold at the same time the office of secretary or treasurer."

Resolved, That section 24 of the bylaws of this corporation shall be, and the same is hereby, amended to read as follows:

"24. The board of directors, at its first meeting after each annual meeting of stockholders, shall choose a president, one or more vice presidents from their own number, and a secretary and a treasurer who need not be members of the board."

Resolved, That section 29 of the bylaws of this corporation shall be, and the same is hereby, amended to read as follows:

"VICE PRESIDENT

"29. In the absence or disability of the president, a vice president shall perform the duties and exercise the powers of the president and shall perform such other duties as the board of directors shall prescribe."

AMENDMENTS ADOPTED MARCH 4, 1931

Resolved, That section 12 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"12. The property and business of this corporation shall be managed by its board of directors, composed of such number as may be elected, not exceeding 21. They shall be elected at the annual meeting of stockholders. Resignations of directors may be accepted, and vacancies caused either by resignation or otherwise may be filled by the directors as provided for in section 32 of the bylaws. Each director shall be elected to serve until his successor shall be elected and shall qualify. Directors need not be stockholders."

Resolved, That section 16 of the bylaws of this corporation be, and the same hereby is, amended to read as follows:

"16. The executive committee may keep regular minutes of its proceedings and shall report to the board of directors when required."

AMENDMENTS ADOPTED ON MARCH 20, 1931

Resolved, That section 12 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"12. The property and business of this corporation shall be managed by its board of directors, 15 in number. They shall be elected at the annual meeting of stockholders. Resignations of directors may be accepted, and vacancies caused either by resignation or otherwise may be filled by the directors as provided for in section 32 of the bylaws. Each director shall be elected to serve until his successor shall be elected and shall qualify. Directors need not be stockholders."

Digitized by Google

Resolved, That section 19 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"19. The newly elected board may meet at such place and time as shall be fixed by the vote of the stockholders at the annual meeting, for the purpose of organization or otherwise, and no notice of such meeting shall be necessary. However, a majority of the directors must be present and voting in order to designate the personnel of the executive committee for the ensuing year."

Resolved, That section 22 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"22. At all meetings of the board five of the directors shall be necessary and sufficient to constitute a quorum for the transaction of business, and the act of a majority of the directors present at any meeting at which there is a quorum shall be the act of the board of directors, except as may be otherwise specifically provided by statute or by the certificate of incorporation or by these bylaws."

AMENDMENT ADOPTED MARCH 21, 1932

Resolved, That section 12 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"12. The property and business of this corporation shall be managed by its board of directors, 14 in number. They shall be elected at the annual meeting of stockholders. Resignations of directors may be accepted, and vacancies caused either by resignation or otherwise may be filled by the directors as provided for in section 32 of the bylaws. Each director shall be elected to serve until his successor shall be elected and shall qualify. Directors need not be stockholders."

AMENDMENT ADOPTED DECEMBER 27, 1933

Resolved, That section 12 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"12. The property and business of this corporation shall be managed by its board of directors, 15 in number. They shall be elected at the annual meeting of stockholders. Resignations of directors may be accepted, and vacancies caused either by resignation or otherwise may be filled by the directors as provided for in section 32 of the bylaws. Each director shall be elected to serve until his successor sha l be elected and shall qualify. Directors need not be stockholders."

AMENDMENT ADOPTED APRIL 26, 1934

Resolved, That section 12 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"12. The property and business of this corporation shall be managed by its board of directors, 16 in number. They shall be elected at the annual meeting of stockholders. Resignations of directors may be accepted, and vacancies caused either by resignation or otherwise may be filled by the directors as provided for in section 32 of the bylaws. Each director shall be elected to serve until his successor shall be elected and shall qualify. Directors need not be stockholders."

AMENDMENT ADOPTED APRIL 26, 1934

Resolved, That section 16 of the bylaws of this corporation, as amended, be, and the same hereby is, further amended to read as follows:

"16. The executive committee may keep regular minutes of its proceedings and shall report to the board of directors when required. A quorum of this committee shall consist of not less than two representatives of the supporting interests and not less than one representative of the management group."

STATE OF NEW YORK,
County of New York, ss:

I, M. H. Eames, secretary, do hereby certify that the foregoing is a true and correct copy of the bylaws of Standard Oil Development Co. (name changed Oct. 28, 1927, from Standard Development Co.), as adopted by the incorporators on September 26, 1922, including all amendments to date.

Witness my hand and the seal of the company at New York City this_____ day of_____, 19__.

_____,
Secretary.

Sworn to before me this_____day of_____, 19__.

Certificate of Incorporation of Standard Development Co.

First. The name of this corporation is Standard Development Company.

Second. Its principal office in the State of Delaware is located at no. 7 West Tenth Street, in the city of Wilmington, county of New Castle. The name and address of its resident agent is the Corporation Trust Co. of America, no. 7 West Tenth Street, Wilmington, Del.

Third. The nature of the business, or objects or purposes proposed to be transacted, promoted, or carried on are:

To purchase, lease, acquire licenses or rights under, or otherwise obtain, and to hold, own, develop, use, exercise, operate, introduce, and otherwise utilize inventions, improvements, discoveries, devices, rights, formulas, processes, and the like and to secure therefor letters patent or other legal protection of the United States and of any foreign country or countries.

To sell, lease, grant licenses under or otherwise dispose of inventions, improvements, discoveries, devices, rights, formulas, process, and letters patent or other legal protection of the United States and any foreign country or countries.

To manufacture iron, steel, copper, lumber, and any other materials, and all or any articles consisting or partly consisting of iron, steel, copper, wood, or any other materials and all or any products thereof.

To produce, manufacture, buy, sell, deal in, construct, or erect any and all kinds of engines, machinery, tools, implements, motors, castings, and mechanical devices of every kind and character, and any and all materials and supplies of any kind or character connected therewith or a part thereof.

To acquire, print, publish, conduct, circulate, sell, distribute, deliver, or otherwise contract for, and deal in, or with books, magazines, periodicals, journals, pamphlets, and publications of any and every description whatsoever, or to cause the same or any of the above things to be done by others.

To procure in manuscript form from authors or others, scientific and technical works, all or any of them and to buy, sell, copyright, publish, cause to be published, distribute, or otherwise deal in, or with reference to, the same.

To acquire, purchase, hold, own, sell, and lease any land or lands and to construct, erect, operate, equip, produce, maintain, and use manufacturing plants, factories, machine shops, warehouses, office buildings, offices, stores, salesrooms, branch establishments, and all buildings and structures whatsoever, which may seem useful for or conducive to any of the company's objects, and to sell, lease, sublet, rent, or otherwise dispose of any of the aforesaid lands, premises, properties, appurtenances, and appliances, and the products, proceeds, use, or contents thereof.

To manufacture, purchase, or otherwise acquire, own, mortgage, pledge, sell, assign, and transfer, or otherwise dispose of, to invest, trade, deal in and deal with, goods, wares, and merchandise and real and personal property of every class and description.

To acquire, and pay for in cash, stock or bonds of this corporation or otherwise, the good will, rights, assets, and property, and to undertake or assume the whole or any part of the obligations or liabilities of any person, firm, association, or corporation.

To guarantee, purchase, hold, sell, assign, transfer, mortgage, pledge, or otherwise dispose of shares of the capital stock of, or any bonds, securities, or evidence of indebtedness created by any other corporation or corporations organized under the laws of this State or any other State, country, nation, or government, and while the owner thereof to exercise all the rights, powers, and privileges of ownership.

To issue bonds, debentures, or obligations of this corporation from time to time, for any of the objects or purposes of the corporation, and to secure the same by mortgage, pledge, deed of trust, or otherwise.

To purchase, hold, sell, and transfer the shares of its own capital stock; provided, it shall not use its funds or property for the purchase of its own shares of capital stock when such use would cause any impairment of its capital; and provided further, that shares of its own capital stock belonging to it shall not be voted upon directly or indirectly.

To have one or more offices, to carry on all or any of its operations and business and without restriction or limit as to amount to purchase or otherwise acquire, hold, own, mortgage, sell, convey, or otherwise dispose of real and personal property of every class and description in any of the States, Districts, Territories, or Colonies of the United States, and in any and all foreign countries, subject to the laws of such State, District, Territory, colony, or country.

Digitized by Google

In general, to carry on any other business in connection with the foregoing, whether manufacturing or otherwise, and to have and exercise all the powers conferred by the laws of Delaware upon corporations formed under the act hereinafter referred to, and to do any or all of the things hereinbefore set forth to the same extent as natural persons might or could do.

The foregoing clauses shall be construed both as objects and powers; and it is hereby expressly provided that the foregoing enumeration of specific powers shall not be held to limit or restrict in any manner the powers of this corporation.

Fourth. The total authorized capital stock is one million dollars ($1,000,000), divided into ten thousand (10,000) shares of the par value of one hundred dollars ($100) each.

Fifth. The amount of capital stock with which this corporation will commence business is one thousand dollars ($1,000).

Sixth. The names and places of residence of the subscribers to the capital stock and the number of shares subscribed for by each are as follows: T. L. Croteau, Wilmington, Del., 8 shares; M. A. Bruce, Wilmington, Del., 1 share; C. H. Blaske, Wilmington, Del., 1 share.

Seventh. This corporation is to have perpetual existence.

Eighth. The private property of the stockholders shall not be subject to the payment of corporate debts to any extent whatever.

Ninth. In furtherance, and not in limitation of the powers conferred by statute, the board of directors is expressly authorized:

To make and alter the bylaws of this corporation, to fix the amount to be reserved as working capital over and above its capital stock paid in, to authorize and cause to be executed mortgages and liens upon the real and personal property of this corporation:

From time to time to determine whether and to what extent, and at what times and places, and under what conditions and regulations, the accounts and books of this corporation (other than the stock ledger), or any of them, shall be open to inspection of stockholders; and no stockholder shall have any right of inspecting any account, book, or document of this corporation except as conferred by statute, unless authorized by a resolution of the stockholders or directors.

If the bylaws so provide, to designate two or more of its number to constitute an executive committee, which committee shall for the time being, as provided in said resolution or in the bylaws of this corporation, have and exercise any or all of the powers of the board of directors in the management of the business and affairs of this corporation, and have power to authorize the seal of this corporation to be affixed to all papers which may require it.

Pursuant to the affirmative vote of the holders of at least a majority of the stock issued and outstanding, having voting power, given at a stockholders' meeting duly called for that purpose, or when authorized by the written consent of at least a majority of the holders of the voting stock issued and outstanding, the board of directors shall have power and authority at any meeting to sell, lease, or exchange all of the property and assets of this corporation, including its goodwill and its corporate franchises, upon such terms and conditions as its board of directors deem expedient and for the best interests of the corporation.

This corporation may in its bylaws confer powers upon its directors in addition to the foregoing, and in addition to the powers and authorities expressly conferred upon them by the statute.

Both stockholders and directors shall have power, if the bylaws so provide, to hold their meetings, and to have one or more offices within or without the State of Delaware, and to keep the books of this corporation (subject to the provisions of the statutes), outside of the State of Delaware at such places as may be from time to time designated by the board of directors.

Tenth. This corporation reserves the right to amend, alter, change, or repeal any provision contained in this certificate of incorporation, in the manner now or hereafter prescribed by statute, and all rights conferred upon stockholders herein are granted subject to this reservation.

We the undersigned, being each of the original subscribers to the capital stock hereinbefore named for the purpose of forming a corporation to do business both within and without the State of Delaware, and in pursuance of the general corporation law of the State of Delaware, being chapter 65, of the Revised Code of Delaware, and the acts amendatory thereof and supplemental thereto, do make and file this certificate, hereby declaring and certifying that the facts herein stated are true, and do respectively agree to take the number of shares of stock

M. A. BRUCE. [SEAL]
C. H. BLASKE. [SEAL]

STATE OF DELAWARE,
County of New Castle, ss:

Be it remembered, that on this 23d day of September, A. D. 1922, personally came before me, Herbert E. Latter, a notary public for the State of Delaware, T. L. Croteau, M. A. Bruce, and C. H. Blaske, parties to the foregoing certificate of incorporation, known to me personally to be such, and severally acknowledged the said certificate to be the act and deed of the signers respectively and that the facts therein stated are truly set forth.

Given under my hand and seal of office the day and year aforesaid.

[SEAL] HERBERT E. LATTER, *Notary Public.*

STATE OF DELAWARE,
Office of Secretary of State:

I, A. R. Benson, Secretary of State of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of certificate of incorporation of the Standard Development Co., as received and filed in this office the 25th day of September, A. D. 1922, at 9 o'clock a. m.

In testimony whereof, I have hereunto set my hand and official seal at Dover this 25th day of September in the year of our Lord 1922.

[SEAL] A. R. BENSON, *Secretary of State.*

(Received for record Sept. 26, A. D. 1922. Darlington Flinn, recorder.)

STATE OF DELAWARE,
New Castle County, ss:

Recorded in the recorder's office at Wilmington, in certificate of incorporation, record G, vol. 17, page 125, &c., the 26th day of September, A. D. 1922.

Witness my hand and official seal.

[SEAL] DARLINGTON FLINN, *Recorder.*

CERTIFICATE OF AMENDMENT OF CERTIFICATE OF INCORPORATION OF STANDARD DEVELOPMENT CO.

Standard Development Co., a corporation organized and existing under and by virtue of the provisions of an act of the General Assembly of the State of Delaware, entitled "An act providing a general corporation law," approved March 10, 1899, and the acts amendatory thereof and supplemental thereto, the certificate of incorporation of which was filed in the office of the Secretary of State of Delaware on September 25, 1922, and recorded in the office of the recorder of deeds for New Castle County, State of Delaware, on September 26, 1922, does hereby certify:

First. That at a meeting of the board of directors of said Standard Development Co. duly held and convened, a resolution was duly adopted setting forth an amendment proposed to the certificate of incorporation of said corporation as follows:

That the certificate of incorporation of this corporation be amended by striking out article "First" thereof and by inserting in lieu thereof the following:

"First. The name of this corporation is Standard Oil Development Co.," and declaring said amendment advisable and calling a meeting of the stockholders of said corporation for consideration thereof.

Second. That thereafter, pursuant to the aforesaid resolution of its board of directors, a special meeting of the stockholders of said Standard Development Co. was duly called and held, in accordance with law and the bylaws of said corporation, at 26 Broadway, in the city of New York, State of New York, on the 27th day of October 1927, at 10 o'clock in the forenoon, at which meeting more than a majority of the voting stockholders of said corporation were present in person or by proxy; that at said meeting a vote of the stockholders by ballot in person or by proxy was taken for and against said proposed amendment, which vote was conducted by Wm. F. Quick and C. E. Hill, two judges appointed for that purpose by said meeting; and that at said meeting, by vote conducted

Digitized by Google

as aforesaid, said amendment was adopted pursuant to section 26 of the general corporation law of Delaware, as amended; the persons or bodies corporate holding the majority of the issued and outstanding voting stock of said corporation voting for said proposed amendment, to-wit: 2,500 shares out of the total issue of 2,500 shares were voted for said proposed amendment and no shares were voted against the same, as appears by the certificate made by said judges.

In witness whereof, said Standard Development Co. has caused its corporate seal to be hereunto affixed and this certificate to be signed by C. A. Straw, its vice president, and H. M. McLarin, its secretary, this 27th day of October 1927.

STANDARD DEVELOPMENT CO.,
By C. A. STRAW, *Vice President.*

Seal attest:
H. M. MCLARIN, *Secretary.*
[SEAL]

STATE OF NEW YORK,
County of New York, ss:

Be it remembered that on this 27th day of October A. D. 1927, personally came before me, Albert Abraham, Jr., a notary public in and for the county and State aforesaid, C. A. Straw, vice president of Standard Development Co., a corporation of the State of Delaware, the corporation described in and which executed the foregoing certificate, known to me personally to be such, and he, the said C. A. Straw as such vice president, duly executed said certificate before me and acknowledged the said certificate to be his act and deed and the act and deed of said corporation; that the signatures of the said vice president and of the secretary of said corporation to said foregoing certificate are in the handwriting of the said vice president and secretary of said company respectively and that the seal affixed to said certificate is the common or corporate seal of said corporation, and that his act of sealing, executing, acknowledging and delivering the said certificate was duly authorized by the board of directors and stockholders of said corporation.

In witness whereof, I have hereunto set my hand and seal of office the day and year aforesaid.

ALBERT ABRAHAM, Jr., *Notary Public.*

STATE OF DELAWARE, OFFICE OF SECRETARY OF STATE

I, Charles H. Grantland, Secretary of State of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of certificate of amendment of certificate of incorporation of the Standard Development Co., as received and filed in this office the 28th day of October A. D. 1927, at 1 p. m.

In testimony whereof, I have hereunto set my hand and official seal, at Dover, this 13th day of May in the year of our Lord, 1930.

[SEAL] CHARLES H. GRANTLAND,
Secretary of State.

Agreement, made as of the 22d day of July 1935, between Chemical Construction Corporation, a corporation of Delaware, having its principal place of business at 30 Rockefeller Plaza, New York City, hereinafter referred to as Chemical Construction, and Standard Oil Development Co., a corporation of Delaware, having a place of business at Linden, N. J., hereinafter referred to as Standard.

Whereas, an interference no. 70037 has been declared by the United States Commissioner of Patents between an application of Hechenbleikner and Bartholomew, serial no. 531004, filed April 17, 1931, for the process of recovering sulphuric acid from separated sludge acid, owned by Chemical Construction, and an application by Chester L. Read, serial no. 507786, filed January 10, 1931, owned by Standard: And,

Whereas it is the desire of both parties to this agreement that the interference be amicably settled: Now, therefore,

1. Standard hereby grants to Chemical Construction an exclusive license with rights to sublicense (except for the right by Standard to license Standard Oil Co., a corporation of New Jersey, and any of its subsidiaries) under any claim in said Read application, when it matures into a patent, for the full term thereof, and under any claim based on the disclosure of that application, but without granting by implication a license under any claim of any other application or any patent not based on the disclosure of said Read application.

Digitized by Google

2. Standard agrees to give Chemical Construction full information as to the operation of the process of the Read application as it has been practiced at the Bayway Refinery up to the present time.

3. Chemical construction will grant to Standard Oil Co., a corporation of New Jersey, and its subsidiaries, a nonexclusive, nontransferable, royalty-free license under any claim in said Heckenbleikner and Bartholomew application, when it matures into a patent, for the full term thereof, and under any claim based on the disclosure of that application, but without granting by implication a license under any claim of any other application or any patent not based on the disclosure of said Heckenbleikner and Bartholomew application.

4. For the purposes of this agreement, a subsidiary of Standard Oil Co., a corporation of New Jersey, is any company in which said Standard Oil Co. owns or controls, or may in the future own or control, directly or indirectly, fifty (50) percent or more of the stock having the power to vote for directors.

5. The above agreement with regard to licensing in paragraphs 1 and 3 shall be applicable to any Canadian applications corresponding to the applications of Read or Heckenbleikner and Bartholomew above referred to which may exist or which may be applied for.

6. Standard agrees to provide Chemical Construction, on demand, with a concession of priority of the above interference issue by the party Read to the party Heckenbleikner and Bartholomew, assented to by Standard. Chemical Construction agrees to file said concession of priority promptly after the termination of any motions to amend which, in the opinion of patent counsel for the respective parties, may be necessary or desirable.

7. The parties agree after the termination of the interference to proceed with due diligence in the endeavor to obtain United States letters patent based on their applications involved in said interference containing claims adequately protecting the inventions described therein. Each party shall furnish the other with copies of office actions and amendments which issue or are filed during said prosecution. It is agreed, however, that neither party shall be held liable in the event that it fails to obtain a patent as referred to above, or in the case that the patent is held to be invalid.

8. This agreement shall be assignable to the successors to the entire business of the parties but shall not be otherwise assignable.

In witness whereof, the parties have caused this agreement to be signed by their duly constituted officers as of the day and year first above written.

Attest:

[SEAL] W. P. STURTEVANT, *Secretary.*

This agreement, made as of July 1, 1933, by and between Standard Oil Development Co., a corporation organized and existing under the laws of the State of Delaware (hereinafter referred to as Development), party of the first part, Cuno Engineering Corporation, a corporation organized and existing under the laws of the State of Connecticut (hereinafter referred to as Cuno), party of the second part, and Atlas Supply Co., a corporation organized and existing under the laws of the State of Delaware (hereinafter referred to as Atlas), party of the third part.

Witnesseth, in consideration of the premises, the parties hereto have agreed as follows:

I. LICENSE TO CUNO

Development hereby grants to Cuno a license to manufacture and sell filters covered by Letters Patent of the United States No. 1914999, granted June 20, 1933, for improvements in method and composition for filtering used motor oil, or on any division or reissue thereof or on any application for improvements thereon, as follows:

A. The license hereby granted is nonexclusive, except that Cuno shall be offered the opportunity of obtaining exclusive rights before granting a license to others except for such licenses as may be granted for the production of filters by or for Atlas only, which licenses Development may grant at any time without consulting Cuno.

Digitized by Google

B. The term of license hereby granted is a period of five (5) years, but Cuno may cancel upon ninety (90) days' notice in writing to Development at end of any year. All accrued royalties up to effective date of cancelation to be paid by Cuno.

C. Cuno shall pay to Development a royalty of five percent (5%) of the net receipts received by Cuno from the sale of filters manufactured under this license (net after deducting losses, returns, and allowances) payable quarterly, as of the last days of March, June, September, and December, within thirty (30) days after the end of each quarter, but said royalty shall not be less than five cents ($0.05) per filter, except on sales (including sales of Atlas brand filters) to motor or vehicle manufacturers for use as original equipment as to which sales the royalty rate shall be a straight two and one-half percent (2½%) of net receipts, as above provided.

D. As long as Atlas shall purchase its requirements of filters of the type made under this license from Cuno, or from other manufacturers pursuant to the provisions of paragraph 21 of article II hereof:

1. Save for sales to Atlas, Cuno shall not sell filters made under this license except under a Cuno brand, which shall be the same brand for all filters made under this license, and with markings clearly identifying them as manufactured by Cuno, except that on request of Atlas Cuno may manufacture private-brand filters for others, including Atlas, upon terms to be agreed upon between Cuno and Atlas.

2. Cuno shall not, without consent of Atlas, sell comparable or similar filters to others at prices lower than to Atlas, except to motor or vehicle manufacturers for use as original equipment.

E. Development shall pay all patent and litigation costs so far as they pertain to said Letters Patent No. 1914999 or any division or reissue thereof or any application for improvements thereon.

F. Cuno shall keep true records of sales, allowances, returns, losses, etc., and allow Development's authorized representatives to inspect same at reasonable intervals during regular office hours.

G. If said Letters Patent No. 1914999 shall be declared invalid by any court of competent jurisdiction or of such limited scope as to afford no adequate protection to Cuno, royalties shall thereupon cease and the entire agreement terminate, except that Cuno shall complete all orders from Atlas which are at the time in process of production.

H. Changes in this agreement as regards article I may be made at any time by agreement in writing between Development and Cuno.

II. SALES TO ATLAS

Atlas agrees to purchase from Cuno during the term of this agreement its entire requirements of filters for sale in the United States made under the license herein granted (but not including its requirements for fittings or for filters of other types), and Cuno agrees to supply Atlas requirements for such period subject to the following conditions; *provided, however*, if Cuno shall cancel its license with Development pursuant to paragraph B of article I hereof, then Cuno shall give Atlas immediate notice in writing of such cancelation, and this agreement insofar as it provides for sales of filters to Atlas shall automatically terminate on the effective date of such cancelation.

A. Prices and terms to Atlas shall be:

1. Net base prices of filters, supplied to Atlas on orders received until and including January 1, 1934, boxed in corrugated paper cartons without any fittings shall be as as follows:

		Cents
Cuno print no. 2714, price	each	71
Cuno print no. 2715, price	do	75
Cuno print no. 2716, price	do	71
Cuno print no. 2717, price	do	75
Cuno print no. 2714, price	do	75
Cuno print no. 2733, price	do	77
Cuno print no. 2730, price	do	72
Cuno print no. 2731, price	do	75

2. Net prices for filters of different or changed construction supplied to Atlas to be agreed upon between Cuno and Atlas.

Digitized by Google

3. Net prices of fittings shall be:

	Each
⅛-inch steel pipe plugs	$0.004
⅛-inch close brass nipples	.01
⅛-inch brass street ells	.03½
Filler bands, black enameled	.03½

It is understood that Atlas shall have the right to purchase fittings from others at any time if offered by others at a lower price for similar quantity and quality.

4. For each one (1%) percent increase above the present base price of $2 per 100 pounds of cold rolled steel at the mill, add 0.8 percent to all filter base prices under clauses A (1) and A (2) and A (3) hereof.

5. All royalties payable to Development and sales, excise, or other special manufacturers' taxes to be added to billing prices to Atlas.

6. Atlas shall pay Cuno $265 as part cost of fitting up for making 4½-inch diameter filters, said payment will not convey ownership.

7. Terms of payment by Atlas shall be net cash 10th proximo f. o. b. Meriden, Conn.

8. Releases on orders: Except for occasional rush shipments, Atlas shall release shipments in minimum quantities of 50 assorted filters to one address at one time.

9. All costs for art work and cuts for decalcomanias, boxes, wall cards, etc., shall be paid for by Atlas.

10. All costs for printing or special advertising shall be paid for or supplied by Atlas.

11. Except for a secret Cuno designation, no Cuno markings or name shall appear on products made for Atlas' own use.

12. The billing price of filters furnished to Atlas on each order placed after January 1, 1934, shall be on the basis of 11 cents profit added to the then current cost, provided, however, that said billing price, plus all royalties payable to Development and sales, excise or other special manufactures taxes, as referred to in section A–5 hereof, and price of fittings, shall not exceed the lowest price for Cuno brand filters of similar types and sizes sold to others (except to motor and vehicle manufacturers for installation as original equipment) less 10 percent, said price restriction being in consideration of the fact that Cuno will not incur the usual advertising and sales expense incident to sales of Cuno brand filters on sales of Atlas filters hereunder. As of December 31 in each year during the term of this agreement and at the expiration or termination hereof Cuno shall compute the actual cost of all filters sold and delivered to Atlas (except Atlas brand filters sold and delivered to motor or vehicle manufacturers for installation as original equipment) during such year, said actual cost to be computed as hereinafter provided, and if said actual cost plus a profit thereon at the rates hereinafter set forth shall be less than the amount paid to Cuno by Atlas for all filters sold and delivered by Cuno during said year, or lesser period, as the case may be, Cuno will reimburse Atlas for the difference.

Profits shall be computed on the following basis: Add 10 cents per filter when total cost is over 50 cents per filter; add 11 cents per filter when total cost is over 45 cents but not exceeding 50 cents per filter; add 12 cents per filter when total cost is over 40 cents but not exceeding 45 cents per filter; add 13 cents per filter when total cost is under 40 cents per filter.

The billing prices to Atlas and the actual cost plus profit to be used in computing the adjustment above provided for shall be exclusive of items enumerated under section A–5 hereof.

The term cost as defined in this agreement shall mean the manufacturing cost determined by computing the component material, labor, and burden, in accordance with manufacturing specifications, for each type of filter, and an equitable proportion of certain general expenses included under the classification of administrative and selling expenses. The determination of filter costs, including the method of distributing manufacturing burden and general expenses, shall be in accordance with approved accounting principles. Material and labor shall be on the basis of actual prices or amounts paid. Manufacturing burden shall be applied on the basis of normal or standard burden rates according to the production centers through which the product passes; the standard burden thus absorbed being later adjusted to actual at the close of business for each calendar year. The adjustment of over- or under-absorbed manufacturing burden to be expressed as a percentage of the burden absorbed in actual production through the application of the standard burden rates in the proportion that Atlas bears to the total standard burden absorbed.

Digitized by Google

The allocation of general expenses (administrative and selling) after eliminating therefrom those expenses which are incurred solely for the benefit of Cuno, such as advertising, commissions, outward fright and express, credit and collection expenses, traveling expenses, selling expenses in connection with Cuno filters, etc., shall be on the basis which these total actual expenses bear to the relative cost of goods shipped to Atlas and the corresponding cost of all Cuno shipments during the year.

13. If Cuno's price to motor or vehicle manufacturers, for Cuno brand filters for installation as original equipment, shall be less than the price to Atlas hereunder (in force at the time) for Atlas brand filters of the same types and classes, Cuno agrees if requested by Atlas and said motor or vehicle manufacturers, to furnish Atlas brand filters on new and/or additional orders to such motor or vehicle manufacturers at such lower prices, Cuno to receive payment therefor direct from such motor or vehicle manufacturers, and Atlas to receive no compensation on such sales.

14. Cuno reserves the right to change or improve the design and/or construction of filters, from time to time, but as to filters supplied to Atlas such changes shall be subject to approval by Atlas.

15. Cuno reserves the right to reduce the price to Atlas of any model of filter or fitting at any time, and on any quantity without affecting the validity of this agreement.

16. Changes in clauses under II shall be permissible between Cuno and Atlas by agreement in writing.

17. A. Atlas agrees to accept complete deliveries of the first order for 10,000 filters, prior to December 31, 1933, and subsequent orders within 4 months from date of order. Cuno may require up to 4 weeks' notice before starting deliveries on any new order. Atlas shall furnish, upon request by Cuno, detailed manufacturing specifications covering types and quantities required, not less than 3 weeks before deliveries are wanted.

B. Atlas agrees that each order placed with Cuno for filters shall be for a minimum of 10,000 filters. Releases and shipments on these orders shall be in accordance with II A (8) and II A (17).

18. Orders from Atlas are not subject to cancelation without indemnifying Cuno against actual costs incurred plus 20 percent.

19. Cuno agrees that the filters supplied to Atlas shall be of equal quality, as regards materials and workmanship, as the filters sold under the Cuno brand and will replace, without charge, any filters found defective within 3 months after installation, provided same are returned to the factory at Meriden, Conn., transportation charges prepaid.

20. In the event of the cancelation or termination of this agreement for any cause, Cuno shall complete all orders for Atlas which are at the effective date of termination or cancelation in process of production, and Atlas agrees to accept shipment of same within 4 months and to pay for same within the regular terms.

21. If Atlas shall be offered by a reputable manufacturer other than Cuno lower prices for filters of the same construction and types and of equal quality as regards material and workmanship than the prices offered by Cuno for equal quantity and like delivery, Atlas will furnish written proof to Cuno of such offer, and Cuno shall within 30 days after receipt by it of such proof, notify Atlas that it will either supply Atlas with filters at no greater prices than such offered prices, or permit Atlas to purchase filters from such other manufacturer at such lower prices. Such lower prices of such other manufacturer shall be for the furnishing of lots of not less than 10,000 filters for delivery over a period of 4 months.

In the event Cuno shall fail to meet the offered price of such other manufacturer and Atlas shall purchase filters from such other manufacturer, the filters so purchased by Atlas shall be considered as part of Atlas' quantity commitment hereunder and such purchase shall not be considered as a cancelation of this agreement or relieve Cuno from the provisions hereof, provided, however, if Atlas shall order no filters from Cuno hereunder for a continuous period of 6 months, Cuno shall be relieved from the provisions hereof so far as Atlas is concerned

22. Any and all controversies arising under or out of or in connection with or relating to or for the breach of the agreement of which this paragraph is a part, shall be settled by arbitration in accordance with the rules then obtained of the American Arbitration Association, and a judgment of the highest court, State or

LICENSE AGREEMENT RE FRACTIONAL DISTILLATION—PETROLEUM DISTILLATION CORPORATION, THE ATLANTIC REFINING CO., ATLANTIC CO., STANDARD OIL CO. (INDIANA), STANDARD OIL DEVELOPMENT CO., STANDARD OIL CO. (NEW JERSEY), (EACH BEING BOTH LICENSOR AND LICENSEE)

(Executed Mar. 28, 1934)

This agreement, made and entered into as of the 1st day of January 1934, by and between Petroleum Distillation Corporation, a Delaware corporation, hereinafter referred to as Petroleum; the Atlantic Refining Co., a Pennsylvania corporation, and its subsidiary, Atlantic Co., a Maine Corporation, said corporations being hereinafter collectively referred to as Atlantic; Standard Oil Co., an Indiana corporation, hereinafter referred to as Indiana; Standard Oil Development Co., a Delaware corporation and its parent Standard Oil Co., a New Jersey corporation, said corporations being hereinafter collectively referred to as Jersey.

Witnesseth, whereas, each of the parties hereto except Petroleum owns letters patent covering valuable rights in respect of distillation processes and apparatus and,

Whereas, the distillation processes and apparatus used by Atlantic, Indiana, and Jersey respectively, are alleged to infringe letters patent of each of the other parties hereto, except Petroleum, and,

Whereas, each of the parties hereto except Petroleum, is desirous of procuring a release under the distillation patent rights of the other parties hereto for past infringement of their respective fractional distillation patents and Atlantic, Indiana, and Jersey are desirous of procuring licenses for the future use of the distillation patent rights of the other parties hereto, and,

Whereas, Atlantic, Indiana, and Jersey are willing to grant to Petroleum non-exclusive licensing rights under their respective distillation patent rights,

Now, therefore, in consideration of the premises and of the mutual covenants and agreements of the parties hereinafter set forth, the parties have covenanted and agreed and hereby do covenant and agree as follows:

ARTICLE I

Whenever used in this agreement, the following terms shall have the following meanings respectively:

A. The term "petroleum" shall refer and be limited to crude oil, shale oil, and asphalt and hydrocarbon products made therefrom and shall not include natural gas or products actually recovered therefrom except to the extent that such products shall have lost their separate identity by admixture with like products from crude oil, shale oil, or asphalt.

B. The term "fractional distillation" shall refer and be limited to the treatment of petroleum which consists in partial or complete vaporization and/or condensation thereof to obtain one or more products having a boiling range different from that of the starting material; provided that, for the purpose of this agreement, a distillatory operation conducted as an integral part of a pyrogenic process, a hydrogenation process or a process of absorbing and stripping of gases, shall not be regarded as an operation of fractional distillation.

Digitized by Google

C. The term "chemical treating process" shall mean the contacting of petroleum with solid, liquid, or gaseous substances having the property, under the operating conditions, of reacting with or causing interaction of constituents of petroleum.

D. The term "absorbing and stripping of gases" shall mean the segregation of higher boiling hydrocarbons from lower boiling hydrocarbons by contacting gaseous mixtures of the same with an absorption medium having the property, under the operating conditions, of dissolving or otherwise fixing the higher boiling hydrocarbons in such form that they may be subsequently recovered in a more concentrated form as by application of heat, reduced pressure, blowing, or the like.

E. The term "pyrogenic processes" shall mean processes such as cracking and polymerization wherein hydrocarbons are by the influence of the temperature employed essentially changed chemically.

F. The term "hydrogenation processes" shall mean processes involving or not involving pyrogenesis but in which the oil is subjected to the action of hydrogen in the presence or absence of a catalyst to a degree or extent or in a manner to secure definitely determinable hydrogenation.

G. The term "distillation patent rights" shall mean all claims of patents of the United States and foreign countries, and/or transferable rights thereunder, owned or controlled by any of the parties hereto prior to January 1, 1940 (including patents, whether or not applied for or issued prior thereto, for inventions owned or controlled prior to said date) insofar as said claims are limited to processes for or apparatus used in the practise of fractional distillation as hereinabove defined and specifically excluding claims which relate to chemical treating processes.

H. The term "subsidiaries" shall mean:

All corporations of which the parent company owns directly or indirectly more than 50 percent of the stock having the right to vote for directors.

For the purposes of the above definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned directly or indirectly by any of its subsidiaries as defined above.

I. The term "maintaining foreign distillation patents" used herein shall relate to patents granted by countries other than the United States of America, and any dependency to which the patent laws of the United States apply, and shall include the payment of all taxes, fees, assessments or other moneys, working the patents and taking any and all other steps necessary to satisfy the legal requirements of the granting countries and to insure, insofar as a patentee reasonably can, the enforcibility of said foreign patents.

ARTICLE II

Atlantic, Indiana, and Jersey each grants to Petroleum an irrevocable, nonexclusive, nontransferable fully paid right to grant licenses, releases for past infringement and/or immunities from suit, for fractional distillation under its distillation patent rights, such right being for the full term of each such patent, upon terms to be fixed by Petroleum.

ARTICLE III

Each of the parties agrees that, subject to the provisions of article VII hereof, it will at the request of Petroleum bring suits for infringement and/or to restrain the infringement of its distillation patent rights. The cost of such litigation shall be borne by Petroleum and the recoveries, if any, shall be paid to Petroleum.

ARTICLE IV

Atlantic, Indiana, and Jersey each agrees that it will not grant licenses or releases under any of its own distillation patent rights upon which litigation may have been instituted at the expense of Petroleum as herein provided, until it has repaid to Petroleum the amounts expended by Petroleum for such litigation. Except as to the defendant in the litigation in question, however, such restriction shall apply only where the license or release is granted for cash or the equivalent thereof as distinguished from a license or release granted in exchange for a cross-license, or as a part of an agreement relating principally to other matters, or in exchange for rights other than claims for money or securities or evidencies of indebtedness.

Digitized by Google

ARTICLE V

To the extent to which it is empowered to do so under article II hereof, Petroleum hereby releases Atlantic, Indiana, and Jersey and each of them from all claims arising out of past infringement of Petroleum's distillation patent rights and grants to Atlantic, Indiana, and Jersey and each of them an irrevocable, nonexclusive, nontransferable, fully paid license under its distillation patent rights.

ARTICLE VI

A. The responsibility for the filing and prosecution of all United States and foreign applications, present and future, for distillation patents, the claims of which relate primarily to the subject matter of this agreement, shall rest primarily upon the party owning such applications and the prosecution of such applications shall be at the discretion and under the direction and at the expense of said party. Likewise the cost and responsibility of maintaining such foreign distillation patents shall remain primarily upon the party having title thereto, and shall be at the discretion of said party.

B. None of the parties hereto shall be obliged to apply for or prosecute foreign distillation patents or to maintain any of its said foreign patents. But if any party shall decide not to apply for any such patent or prosecute any of said applications or shall desire to allow any of its foreign distillation patents to lapse, it shall give written notice to Petroleum of its intention at least 3 months before the last date upon which the application must be filed, or on which action must be taken in the prosecution thereof, or on which payment must be made without fine or act done to keep such patent valid and enforcible. Upon the receipt of such notice Petroleum, at its own expense, and in the name of the party having title thereto, shall then have the right, but shall not be obliged, to apply for and prosecute foreign distillation patents and to maintain any of said foreign distillation patents. Where any foreign distillation patents are obtained or maintained by Petroleum under this paragraph B licenses may not be granted under such patents by the party having title thereto until it has repaid to Petroleum the amounts expended by Petroleum in maintaining and obtaining such patents in the country or countries covered by the license granted. Thereafter the obligation of maintaining such foreign distillation patents in the country or countries for which such license is granted shall rest upon such party. This restriction, however, shall apply only where the license is granted for cash or the equivalent thereof as distinguished from a license granted in exchange for a cross-license, or as a part of an agreement relating principally to other matters, or in exchange for rights other than claims for money or securities or evidences of indebtedness.

Nothing contained in this Article shall affect the rights of the parties under articles II and V hereof.

ARTICLE VII

Subject to the provisions of article IV and paragraph B of article VI hereof nothing in this agreement shall prevent any of the parties hereto from licensing and/or granting releases or immunities from suit under its own distillation patent rights upon any terms and at any time that it deems fit.

ARTICLE VIII

Each party agrees to use its best efforts to secure compliance with the terms of this agreement by all of its present and future subsidiaries; those who do so comply shall be bound to grant and shall be entitled to receive the licenses granted hereunder, and releases for all operations prior to date of compliance. If notwithstanding such efforts any such subsidiary shall refuse or fail to comply with the terms of this agreement, said noncomplying subsidiary shall be deemed to have renounced the benefits of this agreement, and each party guarantees each other party and its complying subsidiaries against and agrees to hold each other party and its complying subsidiaries harmless from any loss or liability occurring by reason of such noncompliance by any noncomplying subsidiary, provided, however, that each party shall be entitled to offset against any such liability any recovery by any other party or any of its complying subsidiaries against such noncomplying subisidiary for infringement of their respective distillation patent rights; and provided, further, that if any future subsidiary of a party shall have, at the time it becomes a subsidiary, prior obligations which prevent it from complying with the terms of this agreement, it shall be deemed to be a stranger to this agreement, and the party of which it is a subsidiary shall be ipso facto released

Digitized by Google

from its obligation to hold the other parties harmless from resultant loss or liability.

ARTICLE IX

This agreement is binding upon and shall inure to the benefit of the parties hereto and their complying subsidiaries, as above defined, and the successors to and assigns of the distillation patent rights and/or business relating thereto of each of them.

In witness whereof the parties hereto have caused these presents to be signed on their behalves and their corporate seals affixed thereto by their respective officers thereunto duly authorized as of the day and year first above written in six counterpart originals.

AN AGREEMENT RE GAS POLYMERIZATION PROCESSES DATED SEPTEMBER 1, 1935, BY AND BETWEEN PHILLIPS PETROLEUM CO., THE M. W. KELLOGG CO., THE TEXAS CO., STANDARD OIL CO. (INDIANA), STANDARD OIL DEVELOPMENT CO.

First. *Parties.*—1. Phillips Petroleum Co., a corporation of the State of Delaware, having a place of business at 80 Broadway, New York, N. Y., on behalf of itself and its subsidiaries (said corporation and its subsidiaries being hereinafter referred to collectively as "Phillips").

2. The Texas Co., a corporation of the State of Delaware, having a place of business at 135 East Forty-second Street, New York, N. Y., on behalf of itself and all other subsidiaries of the Texas Corporation, a corporation of the State of Delaware (said the Texas Co. and said other subsidiaries being hereinafter referred to collectively as "Texas").

3. Standard Oil Co., a corporation of the State of Indiana, having a place of business at 910 South Michigan Ave, Chicago, Ill., on behalf of itself and its subsidiaries (said corporation and its subsidiaries being hereinafter referred to collectively as "Indiana").

4. Standard Oil Development Co., a corporation of the State of Delaware, having a place of business at Linden, N. J., on behalf of itself and all other subsidiaries of Standard Oil Co., a corporation of New Jersey (said Standard Oil Development Co. and said other subsidiaries being hereinafter referred to collectively as "Jersey").

5. The M. W. Kellogg Co., a corporation of the State of Delaware, having a place of business at foot of Danforth Avenue, Jersey City, N. J., on behalf of itself and its subsidiaries (said corporation and its subsidiaries being hereinafter referred to collectively "as Kellogg").

Second. *Recitals and warranties.*—6. Phillips warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions relating to gas polymerization as herein defined.

Digitized by Google

7. Texas warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions relating to gas polymerization as herein defined.

8. Indiana warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions relating to gas polymerization as herein defined.

9. Jersey warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions relating to gas polymerization as herein defined.

10. Kellogg warrants that it owns transferable licensing rights under certain patents, patent, applications and inventions relating to gas polymerization as herein defined.

11. The parties hereto believe that operations under their present patent rights relating to gas polymerization by any of the several parties hereto or by their licensees may constitute infringement of patent rights of some one or more of the other parties hereto and that it will be advantageous to the members of the petroleum refining industry to be able to acquire, without increase or duplication of royalties, a single license under all their patent rights relating to gas polymerization, whereby gas polymerization operations may be carried on under any or all of said patent rights. These parties would, therefore, compose their differences and avoid litigation and, at the same time, promote the art of gas polymerization.

12. Phillips, Texas, Indiana, and Jersey, respectively, desire to obtain licenses for gas polymerization under the patent rights of all of the other parties hereto.

Third. *The agreement.*—13. In consideration of the recitals and warranties hereinabove set forth and the mutual convenants hereinafter set forth, the parties hereto covenant and agree as follows:

14. For the purposes of this agreement: (*a*) The term "gas polymerization" shall mean the conversion by pyrogenesis and/or catalysis of hydrocarbons, which are gaseous at normal temperatures and pressures and which contain five (5) carbon atoms or less per molecule, to predominantly nonviscous hydrocarbons which are liquid at normal temperatures and pressures, but shall not include any hydrogenation process or any step in the manufacture of lubricating oil.

(*b*) The term "hydrogenation process" shall mean any process involving or not involving pyrolysis but in which the hydrocarbon is subjected to the action of hydrogen in the absence or presence of a catalyst to a degree or extent or in a manner to secure definitely determinable hydrogenation.

(*c*) The term "catalysis" shall not include reactions in which definitely determinable chemical combinations exist, such as those now known to be effected during the polymerization of olefins by or with sulphuric acid, aluminum chloride, or ferric chloride.

(*d*) The term "patent rights" shall mean all such but only such patents of the United States and all countries foreign thereto except Germany, and transferable rights thereunder, as cover processes of gas polymerization as above defined, or any apparatus for carrying out any such process, or products thereof, and based upon inventions made prior to July 1, 1947. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence which the party now has or shall have during the continuance of this agreement, and those to which it has the ownership or control in the sense of having the power to dispose of them or grant licensing rights thereunder.

(*e*) The term "subsidiaries" shall mean all corporations of which the parent company owns directly or indirectly more than 50 percent of the stock having the right to vote for directors.

For the purposes of the above definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned directly or indirectly by any of its subsidiaries as defined above.

15. Each party agrees to use its best efforts to secure compliance with the terms of this agreement by all of its present and future subsidiaries, but if notwithstanding such efforts any such subsidiary shall fail to comply with the terms of this agreement, said noncomplying subsidiary shall be deemed to have renounced the benefits of this agreement, and each party guarantees each other party and its subsidiaries against and agrees to hold each other party and its subsidiaries harmless from any loss or liability occurring by reason of such noncompliance by any of its noncomplying subsidiaries; provided, however, that each party shall be entitled to offset against any such liability any recovery by any other party or any of its subsidiaries against such noncomplying subsidiary

Digitized by Google

for infringement of their respective patent rights for gas polymerization; and, provided, further, that if any future subsidiary of a party shall have, at the time it becomes a subsidiary, prior obligations which prevent it from complying with the terms of this agreement, it shall be deemed to be a stranger to this agreement and the party of which it is a subsidiary shall be ipso facto released from its obligation to hold the other parties harmless from resultant loss or liability.

For the purposes of the foregoing provision, all subsidiaries of Standard Oil Co. (a corporation of New Jersey) shall be deemed to be subsidiaries of Standard Oil Development Co. and all subsidiaries of the Texas Corporation shall be deemed to be subsidiaries of the Texas Co.

16. Phillips agrees that immediately upon the execution of this agreement it will take steps to effect the formation of a new corporation to be organized under the laws of the State of Delaware, and hereinafter called the "New Corporation", with an authorized capital stock of one thousand (1,000) shares of no-par-value stock, and Phillips agrees that it will cause to be elected at the first meeting of the incorporators of the New Corporation a board of five directors, consisting of one director nominated by each of the five parties hereto. The incorporation papers shall preserve and secure to stockholders cumulative voting rights and pre-emptive right to subscribe to any new issues of capital stock in proportion to their holdings. In the event any one of the stockholders of the New Corporation at any time desires to sell, or otherwise dispose of, any part or all of the stock of the New Corporation held by said stockholder, such stock shall be first offered for sale to all of the other stockholders who are parties to this agreement in pro-rata amounts at a price not above that offered by a bona-fide prospective purchaser not a party to this agreement, and in the event that one or more of the parties hereto refuses to purchase the pro-rata amount of stock so offered or any portion thereof, then the remaining stock shall be offered in pro-rata amounts to the respective parties who have not so refused and this procedure shall be repeated until each and every party to this agreement shall have been given the opportunity to purchase or refuse to purchase the stock so offered it; and if permissible the articles of incorporation and bylaws of the New Corporation shall so provide.

17. The parties agree that, upon the formation of the New Corporation, as set forth in paragraph 16, they will respectively subscribe to one hundred (100) shares each of the capital stock of the New Corporation, at a price of one hundred dollars ($100) per share, the remaining five hundred (500) shares to remain unissued to provide future working capital if necessary.

18. Phillips, Texas, Indiana, Jersey, and Kellogg severally agree, upon the formation of the New Corporation as provided for in paragraph 16 above, and upon the distribution of the capital stock thereof as provided in paragraph 17 above, to grant to the New Corporation the right to grant nontransferable licenses for gas polymerization under their respective patent rights relating thereto without accounting for any royalty or other moneys received therefor, provided that such grant of licensing rights to the New Corporation under patent rights of countries foreign to the United States shall be expressly conditioned upon each of the parties hereto (in the absence of a waiver by each such party) receiving directly or indirectly from any licensee of the New Corporation, license or immunity under such licensee's foreign patent rights (if any) of substantially the same scope as the license or immunity to be obtained by such licensee under the foreign-patent rights of each of the parties hereto.

19. Nothing in this agreement shall prevent any party to this agreement from granting releases and licenses under its own patent rights upon such terms as it may choose to fix.

20. The parties shall cause the New Corportion to grant to Phillips, Texas, Indiana, and Jersey, respectively, fully paid, nonexclusive, nontransferable licenses under all patents and transferable interests therein, now or hereafter owned or acquired, of the New Corporation.

21. The parties agree that they will cause the New Corporation to contract with Phillips to pay Phillips, as the same shall accrue and be received.

(*a*) A continuing 10 percent of the gross cash receipts of the New Corporation from the grant of licenses; and

(*b*) In addition thereto, an amount or amounts corresponding to that which, but for this obligation, would be all of the net earnings of the New Corporation available for dividends thereof until Phillips shall have received one million three hundred thousand dollars ($1,300,000).

And both (*a*) and (*b*) shall be deemed fixed charges or deductions in determining net earnings of the New Corporation.

AN AGREEMENT RE "H. C. TECHNIQUE" BY AND BETWEEN STANDARD OIL CO. (NEW JERSEY) STANDARD OIL DEVELOPMENT CO., UNION OIL CO. OF CALIFORNIA, STANDARD OIL CO. (INDIANA), THE M. W. KELLOGG CO., DATED OCTOBER 27, 1933

(Conformed copy showing inked corrections in italic and line type)

This agreement, made as of the 27th day of October 1933 by and between Standard Oil Development Co., a Delaware corporation, and its parent, Standard Oil Co., a New Jersey corporation, on behalf of themselves and their respective subsidiaries, said corporations and their subsidiaries being hereinafter collectively referred to as Jersey, and Union Oil Co. of California, a California corporation, on behalf of itself and its subsidiaries, said corporation and its subsidiaries being hereinafter collectively referred to as Union, and Standard Oil Co., an Indiana corporation, said corporation and its subsidiaries being hereinafter collectively referred to as Indiana, and the M. W. Kellogg Co., a Delaware corporation, said corporation and its subsidiaries being hereinafter collectively referred to as Kellogg; all of said parties being hereinafter sometimes collectively referred to as JUIK;

Witnesseth:

Whereas Jersey, Union, and Indiana, operating separately and without knowledge of the others' activities, did each independenly develop in their respective research laboratories and plants certain refining processes for deasphalting, dewaxing, chemical treatment and solvent extraction; and

Whereas Jersey, Union, and Indiana is each operating or planning to operate processes of this type in connection with its refinery operations; and

Whereas numerous interference proceedings were declared in the United States Patent Office between the various applications of the separate parties; and

Whereas a survey of said interference proceedings has indicated that upon their termination each of the parties will have substantial patent rights in this field, and none of the parties will be able to operate their processes without infringing the patents of the others; and

Whereas it is the desire of the parties to cancel all prior agreements between the parties insofar as they relate to the field of "H. C. technique" as hereinafter defined in article I of this agreement and replace said canceled contracts with this present agreement;

Now therefore in consideration of the premises and of the mutual covenants and agreements of the parties hereinafter set forth, the parties have covenanted and agreed and hereby do covenant and agree as follows:

Digitized by Google

ARTICLE I. DEFINITIONS

A. *H. C. technique.*—The term "H. C. technique" shall mean and include processes for the treatment in liquid condition of petroleum oil to remove wax, asphalt, and/or other undesirable substances and/or to separate said oil or portions thereof into fractions of varying chemical and/or physical properties by procedures commonly described as deasphalting, dewaxing, chemical treatment and/or extraction by the use of selective solvents for said oil, in which processes "propane" and/or "hexane" is employed in effective quantity as a diluent, refrigerant or other agent, either alone or admixed with other diluents, refrigerants and/or other agents. By "effective quantity" is meant such quantity as will give definite technical advantage due to the presence of "propane" and/or "hexane" over and above the advantage obtained by any other substance used with the "propane" and/or "hexane." The term "H. C. technique" shall also mean and include an extraction process in which phenol is employed in the absence of an effective quantity of propane and/or hexane.

The term "propane" shall mean the hydrocarbon bearing that name and shall include other liquefied normally gaseous hydrocarbons having less than five carbons atom, and mixtures of said hydrocarbons, and shall also include other normally gaseous materials.

The term "hexane" shall mean the hydrocarbon bearing that name and shall also include other normally liquid hydrocarbons boiling below 500° F., and mixtures of said hydrocarbons.

By way of illustration and not of limitation, H. C. technique is deemed to include the following procedures:

(*a*) Processes in which petroleum oil is admixed with propane and/or hexane in the presence or absence of another diluent or agent and asphalt and/or other undesirable substances are precipitated from said admixture;

(*b*) Processes in which petroleum oil is admixed with propane in the presence or absence of another diluent or agent and in which the admixture is cooled by indirect refrigeration or by refrigeration caused by the evaporation of said propane or by combinations of said methods of refrigeration to cause the precipitation of wax or waxy substances from said admixture and processes for settling, precipitating, or otherwise removing said wax or waxy substances;

(*c*) Processes in which petroleum oil is admixed with propane and/or hexane in the presence or absence of another diluent or agent and in which said petroleum oil in said admixture is submitted to chemical treatment;

(*d*) Processes in which petroleum oil is separated into components of varying chemical and/or physical characteristics by means of the selective solvent action of propane and/or hexane at varying temperatures and pressures;

(*e*) Processes in which petroleum oil is separated into components of varying chemical and/or physical characteristics by subjecting said oil to the simultaneous solvent action of propane and/or hexane and of another solvent substance such as phenol, cresol, nitrobenzene, furfural, sulfur dioxide, B B′ dichlorethyl ether or the like or a mixture of said substances, including processes of a type in which said oil is dissolved in propane and/or hexane and subjected to the action of said other solvent in batch or countercurrent relation, and including, also, processes in which said oil is subjected to the double countercurrent flow of propane and/or hexane and said other solvent;

(*f*) Processes in which petroleum oil is separated into components of varying chemical and/or physical characteristics by sujecting the oil to the action of phenol; and

(*g*) Processes comprising combinations of (*a*), (*b*), (*c*), (*d*), (*e*), and/or (*f*) above.

By way of illustration and not of limitation, H. C. technique is deemed to exclude deasphalting, dewaxing, chemical treating, and/or solvent extraction processes (other than (*f*) above) for the treatment of petroleum oil in which processes propane and/or hexane is not employed in effective quantity as a diluent, refrigerant or other agent; as for example, any solvent extraction processes such as the "cholrex process" in cases in which propane and/or hexane is not employed therein.

B. *Finishing and finished lubricating oils.*—The term "finishing lubricating oils" shall mean that part of the treatment of lubricating oils which has for its purpose the correction of color, acidity or the like, such as acid treating, alkali treating, clay treating, or the like, except in propane, but shall not include processes such as dewaxing, deasphalting, solvent extraction, distillation, hydrogenation or the like.

Digitized by Google

The term "finished lubricating oil" shall mean any oil adapted, either as such or after blending with other oils, for commercial lubrication of any kind.

The term "product claims covering finished lubricating oils" shall mean claims in patents of the United States and countries foreign thereto which claim, as new compositions of matter, or products, finished lubricating oils as defined by the physical or chemical characteristics of said oils; provided however, that this definition shall not include any claims for processes for producing such products; and provided further that this definition shall not include such product claims as depend for their novelty upon the presence of or addition of special agents, for example pour point depressors, viscosity-index improvers, color stabilizers, etc.

The term "process claims for finishing lubricating oils" shall mean claims in patents of the United States and countries foreign thereto covering processes of finishing lubricating oil stocks; provided however, that this definition shall not include process claims which depend, for their novelty, upon the addition of special agents, for example pour point depressors, viscosity-index improvers, color stabilizers, etc., nor shall it include claims for processes of manufacturing lubricating oil by chemical synthesis.

C. *Petroleum oil.*—The term "petroleum oil" shall mean, by way of inclusion and not exclusion, all mineral oils, including oils derived from shale, coal, lignite, and other carbonaceous minerals, and products thereof.

D. *Chemical treatment.*—The term "chemical treatment" of petroleum oil shall mean refining operations such as the treatment of the oil with clay, caustic, acid, or the like, and shall not include any operation, the object of which is to modify propane and/or hexane chemically, nor any process of chemical synthesis in which petroleum oil is radically modified to produce new chemical products.

By way of illustration and not of limitation, a process whereby a lubricating stock in propane and/or hexane solution is treated with an acidic substance to improve the quality of the stock is deemed to fall within the definition of chemical treatment, whereas a process of producing synthetic oil by the interaction of olefinic substances in propane and/or hexane solution in the presence of a catalyst does not fall within said definition.

E. *Patent rights for H. C. technique.*—The term "patent rights for H. C. technique" shall mean and include all patents of the United States and/or foreign countries, and transferable rights thereunder, now or hereafter owned or controlled, in the sense that the corporation designated has the right to grant licenses thereunder, and based on an invention conceived prior to January 1, 1940, *for the full duration of said patent rights* insofar as the claims of said patents cover:

(1) Any process of H. C. technique;

(2) Any process involving a process of H. C. technique as a step in combination with other steps;

(3) Any apparatus designed for or of special application in a process of H. C. technique;

(4) Any composition of matter used in solution or suspension as an aid in a process of H. C. technique;

(5) Product claims covering finished lubricating oils, but only insofar as said claims cover oils produced by processes of H. C. technique;

(6) Process claims for finishing lubricating oils, but only insofar as said claims cover oils produced by processes of H. C. technique.

By way of clarification it is understood that patent rights for H. C. technique include claims for a process of solvent extraction (cf. article I, A (e)) or a composition of matter employed as a solvent, but, except as to phenol, only to such extent as such claims are used in (—i. e.—infringed by) processes of H. C. technique. For example a claim for "a process comprising treating oil with B B' dichlorethyl ether" is licensed, but only in a process of H. C. technique.

By way of clarification it is understood that the clause "insofar as the claims of said patent cover * * * (2) any process involving a process of H. C. technique as a step in combination with other steps" includes only such claims as cover the combination per se and shall not include any claims which separately cover the steps of said combination, other than (1) and (6) above, it being the intent of the parties that no process is included in said clause which does not include H. C. technique as one element.

It is understood, by way of illustration and not of limitation, that (4) above is intended to include wax-settling aids, and the like, for example "Paraflow" or "Pourex", insofar as such compositions are used in processes of H. C. technique, but not to the extent that such products are retained by the finished lubricating oil in quantities sufficient to benefit the properties of said oil.

Digitized by Google

By way of clarification it is understood that (5) above does not include product claims insofar as they cover stocks charged to a process or processes of H. C. technique.

F. *Subsidiaries.*—The term "subsidiaries" shall mean—

All corporations of which the parent company owns directly or indirectly more than 50 percent of the stock having the right to vote for directors.

For the purposes of the above definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned directly or indirectly by any of its subsidiaries as defined above.

ARTICLE IA

Each party agrees to use its best efforts to secure compliance with the terms of this agreement by all of its present and future subsidiaries, but if notwithstanding such efforts any such subsidiary shall fail to comply with the terms of this agreement, said noncomplying subsidiary shall be deemed to have renounced the benefits of this agreement, and each party guarantees each other party and its subsidiaries against and agrees to hold each other party and its subsidiaries harmless from any loss or liability occurring by reason of such noncompliance by any noncomplying subsidiary; provided, however, that each party shall be entitled to offset against any such liability any recovery by any other party or any of its subsidiaries against such noncomplying subsidiary for infringement of their respective patent rights for H. C. technique; and provided, further, that if any future subsidiary of a party shall have, at the time it becomes a subsidiary, prior obligations which prevent it from complying with the terms of this agreement, it shall be deemed to be a stranger to this agreement, and the party of which it is a subsidiary shall be ipso facto released from its obligation to hold the other parties harmless from resultant loss or liability.

ARTICLE II. CANCELATION OF PRIOR CONTRACTS

Jersey, Union, Indiana, and Kellogg hereby revoke and cancel as of October 27, 1933, all prior contracts between themselves insofar as said contracts relate to their patent rights for H. C. technique said contracts being between Union and Indiana, dated April 18, 1932, May 14, 1932, and June 26, 1933; and between Union, Indiana, and Kellogg, dated June 26, 1933, and as modified by negotiators' agreement of September 7, 1933; and a negotiators' agreement between Jersey, Union, Indiana, and Kellogg, dated October 26, 1933, as ratified by their respective boards of directors.

ARTICLE III. EXCHANGE OF OPERATING LICENSES

A. *Exchange as to H. C. technique.*—Jersey grants to Union and to Indiana each an irrevocable nonexclusive royalty-free right and license under Jersey's patent rights for H. C. technique. Union grants to Jersey and to Indiana each an irrevocable nonexclusive royalty-free right and license under Union's patent rights for H. C. technique. Indiana grants to Jersey and to Union each an irrevocable nonexclusive royalty-free right and license under Indiana's patent rights for H. C. technique.

B. *Exchange as to "finishing claims".*—Jersey, Union, and Indiana each grants to each of the other parties an irrevocable nonexclusive royalty-free right and license under its "product claims for finished lubricating oils" and under its "process claims for finishing lubricating oils" to the extent that said claims cover finishing processes applied to oils produced by solvent extraction processes as defined in article I paragraph A (*e*) of this contract whether or not operating in the presence of propane or hexane and to the extent that said claims cover products produced by said solvent extraction processes insofar as said claims appear in patents of the United States and/or foreign countries, which patents are based on inventions conceived prior to January 1, 1940, and which are owned or controlled by Jersey, Union, or Indiana in the sense that the corporation designated has the right to grant licenses thereunder.

ARTICLE IV. GRANT OF LICENSES AND PAYMENT OF ROYALTIES

A. Jersey, Union, and Indiana agree, each with the others, that they will grant nonexclusive licenses under their respective patent rights for H. C. technique to any refiner applicant who may seek such a license either directly or through Kellogg or through such other representative for the sale of licenses as may be agreed upon by Jersey, Union, and Indiana.

Digitized by Google

B. *Licenses granted in settlements.*—It is agreed by Jersey, Union, Indiana, and Kellogg that Jersey, Union, or Indiana may each, without obligation to the other parties, or to Kellogg, grant royalty-free, nonexclusive licenses under their respective patent rights for H. C. technique to a party foreign to this agreement under any patent application or patent now or hereafter involved in an interference proceeding with said foreign party; provided however that the license thereby granted shall be limited to the claims involved in said interference. It is further agreed that Jersey, Union, and Indiana may each, without obligation to the other parties or to Kellogg, grant royalty-free, nonexclusive licenses under their respective patent rights in settlement of bona-fide suits for infringement directed at operations within the field of H. C. technique but each agrees not to do so except after consultation with the other parties hereto in an attempt to arrive at a joint cooperative action to protect their respective operating rights.

C. *Repayment of royalties collected by mistake.*—In the event a party hereto is required to pay any royalty to a party foreign to this agreement on account of the operation by said first party of any process of H. C. technique, the several parties to this agreement hereby agree to and hereby do transfer and assign to the party obligated to pay said royalty all of their rights in and to said royalty, should any portion of it revert to them, and each agrees to reimburse the party paying said royalties in the amount of said royalties actually received by each of them, respectively.

D. *Provision concerning A. G. E. F. C. I.*—The licenses granted and agreed to be granted by Union hereunder are limited by Union's license to Allgemeine Gesellschaft für Chemische Industrie m. b. h., a German company (A. G. E. F. C. I.) relative to solvent extraction processes employing sulfur dioxide; and Union shall not be obligated to account hereunder to Jersey, Indiana, or Kellogg as to such license.

E. *Provision concerning hydrogenation of coal.*—The licenses granted and agreed to be granted by Jersey and Indiana hereunder are limited by the licenses granted by both Jersey and Indiana to Hydro Patents Co., a Delaware corporation, and International Hydro Patents Co., a Liechtenstein corporation, relative to the treatment of oils produced by the hydrogenation of coal and Jersey and Indiana shall not be obligated to account to Union and Kellogg as to such licenses. ~~*and Jersey shall not be obligated to account to Indiana, Union and Kellogg as to such licenses.*~~

F. *Reservations.*—The licenses herein granted and agreed to be granted by Jersey are limited by the rights granted by Jersey to I. G. Farbenindustrie Aktiengeselischaft, a German company, hereinafter referred to as I. G., for operations of that company in Germany *and Jersey shall not be obligated to account to Indiana, Union, and Kellogg as to such licenses.*

In every case specified in articles IV D, E, and F where a party hereto has granted a license prior to the date of this agreement for operations under its patent rights for H. C. technique, the other parties hereto may grant like licenses to such prior licensee, without accounting to the other parties hereto.

G. *Rights of Standard of California.*—Jersey, Union, Indiana, and Kellogg each agree that they will, upon request by Standard Oil Co. of California (hereinafter called "California") grant a nonexclusive license to California under their respective patent rights for H. C. technique at the rates specified in this agreement. Jersey, Union, and Kellogg agree that upon Indiana's request Jersey and Union will, together with Indiana, grant to California a nonexclusive license under their respective patent rights for H. C. technique for the processes specified in article I A, subparagraphs (*a*), (*b*), and (*c*) but not of (*d*), (*e*), (*f*), and (*g*) of this agreement at the royalty rates specified in a certain Union-Indiana agreement of June 26, 1933, and will accept in full satisfaction of all their claims to said royalties, the proportions of said royalties specified in article IV hereof. Indiana represents and warrants that it has made an agreement with California by virtue of which California is entitled to acquire such a license and Indiana is obligated to refund to California the gross royalty share to which Indiana is entitled should California acquire said license. Kellogg waives any claim to a share of such royalty money as might otherwise be due it in the event that Kellogg does not construct "California's" plants for H. C. technique. It is agreed by the parties that, the provisions of article XI B and XII B to the contrary notwithstanding, royalties received by JUIK from California shall be divided in the gross amount in the proportions specified in article XII D hereof.

The licenses herein granted and agreed to be granted by Indiana are limited by the above-mentioned Indiana-California agreement, which agreement, it is understood and agreed, also grants to California a free license under Indiana's patents for solvent extraction processes employing a single solvent such as phenol.

Digitized by Google

ARTICLE V. MAINTENANCE OF PATENT SITUATION

Jersey, Union, and Indiana agree, each with the others, as follows:

A. *Prosecution of United States applications.*—Each of the parties to this article shall bear the entire cost of the preparation and filing of United States patent applications on inventions relative to H. C. technique made by its employees, the ex-parte prosecution of said applications, the conduct of interference proceedings involving said applications and the filing of reissue applications and disclaimers, final fees, etc.

B. *Settlement of interferences.*—In the event the United States Patent Office shall institute an interference proceeding involving patent rights for H. C. technique owned or controlled by the parties hereto, the parties prior to the testing of such issue in the Patent Office shall exercise their best efforts in good faith to achieve a settlement as between themselves of such proceedings based pon an agreement of counsel as to the inventor properly entitled to priority under the rules of practice of the United States Patent Office.

C. *Filing and maintenance of foreign patents.*—Each of the parties shall cooperate with the others in obtaining and maintaining in countries foreign to the United States, patent rights for H. C. technique and each party agrees to consult with the other parties relative to the filing of applications for such patents and the maintenance of such patents. The direct cost of filing and maintaining such foreign patent applications and patents as shall have been agreed upon by all the parties shall be borne equally by the parties specified in article V–I hereof. By "direct cost" is meant the out-of-pocket expense and fees paid foreign patent attorneys, official fees, taxes, etc., relative to the filing and prosecution of patent applications in countries foreign to the United States, the maintenance of said patents when issued and the cost, including foreign patent attorney's fees, of necessary defensive or offensive procedure for opposition or cancelation in foreign patent offices but shall not include cost of time spent on these matters by the United States patent and other counsel of the parties hereto.

In the event the parties shall not agree as to the advisability of filing a specific foreign patent application or of maintaining a specific foreign patent, the party or parties desiring that such action be taken may at their option incur the entire expense for their own account, in which event the other party or parties shall not be entitled to any share of the royalties obtained as a result of licensing said patent; provided further that in the event royalties are obtained as the result of an operation licensed in a country in which one of the parties has the entire ownership of one or more patent rights for H. C. technique and the other patents relative to H. C. technique in said country are held for the joint benefit of all of the parties, then, and in that event, the parties shall endeavor to agree as to a fair division of royalties with respect to said licensed operation and, failing such agreement, the parties agree to submit the question of a fair division of the royalties to a board of five arbitrators, one of whom shall be slected by each of the parties and the other two shall be selected by the said three arbitrators. The expense of said arbitration shall be borne by the parties in a ratio to be decided by the arbitrators.

D. *Defense of licensees.*—Should an action for patent infringement be brought by a party foreign to this contract against a licensee of Jersey, Union, or Indiana, arising out of a licensed operation of H. C. technique of a design and character approved by authorized representatives of Jersey, Union, and Indiana or against Kellogg for the construction of an approved plant for H. C. technique, with which licensee Jersey, Union, and Indiana have by agreement covenanted to defend against said patent infringement suits, then, in that event, the parties hereto shall share equally in the entire expenses of defending against said suit, including fees of counsel, expenses, expert witnesses, tests, traveling expenses, legal fees, and other legitimate expenses as specified in article V–I hereof, and each party agrees to pay over to the other parties its share of said expenses. Jersey, Union, and Indiana neither undertake nor assume any liability or responsibility whatsoever for the payment in whole or in part of any judgment entered into as the result of such suit or for holding licensees or Kellogg harmless against any injunction, order or decree which may result from such suit, or from any loss, damage, claim, or demand resulting therefrom or the conduct thereof or from any settlement or other disposition of said suit.

E. *Defense of operating rights.*—Should suit for patent infringement be brought by a party foreign to this article of this agreement against any of the parties hereto as a result of said party's operation of a process of H. C. technique, the other parties hereto shall not be obligated to share in the expense of defending

Digitized by Google

such suit, but each party hereby agrees that in such event it will extend to the party undergoing suit a full measure of cooperation in assisting in the defense of such suit by supplying, without cost, available technical and legal data, advice, and testimony of its employees.

F. *Restraint of infringement.*—In the event any of the parties hereto shall seek to restrain the infringement of its patent rights for H. C. technique, each of the other parties hereto, upon its agreement at the time given to pay one-third of the costs of such litigation, shall be entitled to one-third of the net recovery.

G. *Prosecution of patent rights acquired from others.*—Jersey, Union, and Indiana agree that they will share, in the proportions specified in subparagraph C of this article, the cost of filing and prosecuting such patent applications in the United States and in countries foreign thereto as may in the agreed opinion of their counsel be advisable to patent inventions assigned to Indiana by Kellogg under the provisions of Article IX ~~B~~ *C* of this agreement and to patent such inventions in the field of H. C. technique as they or any of them shall acquire from parties foreign to this contract.

H. *Purchase of patents.*—Jersey, Union, and Indiana agree that they will share, in the proportions specified in subparagraph C of this article, the cost of acquiring by any of the parties hereto such patent rights for H. C. technique the acquisition of which is mutually agreed upon, and Kellogg's patent rights assigned to Indiana in accordance with the provisions of article IX C, and the cost of filing, prosecuting, and maintaining said patent rights. The procedure in the case where one or more of the parties does not desire to participate shall be the same as specified in the last paragraph of article V C hereof. The parties acquiring title to or an interest in such patent rights shall not convey or encumber the said title or interest without the consent of the other parties to this article V. The parties holding such title or interest may however license said patent rights upon the same terms and conditions as their patent rights for H. C. technique, making the required accounting to the other parties therefor.

I. *Equalization of expense.*—Jersey, Union, and Indiana agree that on or before March 1 of each year during the life of this agreement they will make such cash payments, one to the other, as may be necessary to divide equally between said three parties the costs incurred by each of the parties in the calendar year immediately preceding in carrying out the provisions of this article.

J. Kellogg shall bear the entire cost of the filing, prosecution, and maintenance of its United States and foreign patent rights licensed to Indiana under Article IX ~~C~~ *D* hereof, and including the cost of oppositions, interferences, Government fees, and attorneys' fees.

ARTICLE VI. SCOPE OF JERSEY PATENT RIGHTS

Jersey represents that by reason of contracts now in force between Jersey and I. G. Farbenindustrie Aktiengesellschaft, a German company, hereinafter referred to as I. G., Jersey has licensing rights for the world outside of Germany under I. G.'s patent rights for H. C. technique. Jersey agrees, but for the purpose of this agreement only, that such licensing rights as it may acquire from I. G. as the result of contracts now in force between Jersey and I. G. and with respect to I. G.'s patent rights which come within the definition of patent rights for H. C. technique, are for the purpose of this agreement included in Jersey's patent rights for H. C. technique.

ARTICLE VII. POUR POINT DEPRESSORS

Jersey, Union, and Indiana grant, each to each of the others, a nonexclusive royalty-free right and license to manufacture pour point depressor materials (such, by way of illustration but not of limitation, as Jersey's Paraflow and Indiana's Pourex) useful as aids to the removal of wax in processes of H. C. technique but only for their own use in such processes; and further grant, each to each of the others, a nonexclusive royalty-free right and license to sell pour point depressor materials to each other, but only for their own use as aids to wax removal in processes of H. C. technique.

Jersey, Union, and Indiana grant, each to each of the others, the right to grant, without accounting to the others, nonexclusive royalty-free license to their respective licensees under their respective patent rights for H. C. technique for the manufacture of said pour point depressor materials but only for use by said licensees as aids to wax removal in processes of H. C. technique.

No right or license is granted or implied by this article to permit any beneficial amount of said materials to remain in finished lubricating oil. Jersey, Union,

Digitized by Google

and Indiana agree to give, each to the other parties and to their respective licensees under patent rights for H. C. technique, reasonable assistance and advice in manufacturing said materials.

ARTICLE VIII. SUSTAINED CHARACTER OF THIS AGREEMENT

Jersey, Union, and Indiana agree, each with the others, that the withdrawal of Kellogg from this agreement as provided in article IX and X hereof or in some other manner shall in no way affect the obligations, benefits or duties arising between Jersey, Union, and Indiana as the result of this contract.

ARTICLE IX. KELLOGG'S PATENT RIGHTS

A. Kellogg hereby grants to Jersey, Union, and Indiana, separately and not collectively, irrevocable royalty-free rights and licenses under such of Kellogg's patent rights for H. C. technique as are based on inventions conceived on or prior to June 26, 1933.

B. Kellogg agrees that so long as this agreement remains in force it will use its best efforts to secure from all of its technical employees, whose duties relate to any phase of the oil refining business, the execution of contracts, in the form now used by Kellogg, to assign to Kellogg inventions made by them during the period of their employment.

C. Kellogg assigns and agrees to assign to Indiana, all of its right, title and interest in and to all inventions conceived subsequent to June 26, 1933, and during the term of this agreement which relate to H. C. technique and all letters patent therefor or applications for letters patent filed thereon, which Kellogg now owns or may hereafter acquire during the term of this present agreement, reserving for itself an exclusive irrevocable royalty-free license and an exclusive irrevocable royalty-free right to grant licenses under said letters patent and patent applications, insofar as said letters patent and patent applications are not included in the definition of patent rights for H. C. technique as defined in article I E hereof. Kellogg and Indiana agree to execute all proper and necessary documents to vest more completely in Indiana or Kellogg the titles, interests or licenses herein conveyed or reserved or agreed to be conveyed or reserved. Subject to the conditions of article V G, Indiana agrees to direct its attorneys to file applications for patent covering the inventions and improvements agreed to be assigned hereunder. The termination of this agreement as provided in article X A shall not affect assignments made and licenses granted in pursuance of subarticles A, B, and C of this article IX.

D. Kellogg further grants to Indiana during the term of this agreement with Kellogg an exclusive right to grant licenses under such of Kellogg's patent rights for H. C. technique as are based on inventions conceived on or prior to June 26, 1933, title to which was acquired by Kellogg prior to said date, without the payment of any royalty to Kellogg other than the royalty shares provided in this agreement.

ARTICLE X. APPOINTMENT OF KELLOGG

A. Jersey, Union, and Indiana each hereby appoints Kellogg as its agent for the sale of nonexclusive licenses and the collection of royalties under its patent rights for H. C. technique and Jersey, Union, and Indiana each agrees that it will not, without the consent of Kellogg, appoint any other such agent for the sale of such licenses and the collection of such royalties during the life of this present appointment. Jersey, Union, and Indiana each hereby appoints Kellogg as an authorized constructor of plants for processes of H. C. technique. It is agreed that said appointments or any of them may be canceled by Jersey, Union, and Indiana, acting jointly, on the one hand, or by Kellogg on the other, with or without cause at any time subsequent to January 1, 1937, upon written notice served 6 months in advance of the date set in said notice for termination.

B. Kellogg accepts the appointment as specified in paragraph A and agrees to use its best efforts to sell licenses under said patent rights for H. C. technique and to induce said licensees to install apparatus under their respective licenses and to aid and advise all such licensees in the construction, maintenance, and operation of the apparatus installed. Kellogg agrees, at its own expense, to maintain an adequate and efficient organization, including engineering and technical staff, salesmen, and operators necessary to perform its duties hereunder. Kellogg agrees to pay the expenses properly chargeable to the performance of its duties hereunder, including specifically, the cost of making tests on oils for licensees and prospective licensees to determine yields on ordinary methods of

Digitized by Google

operation, and also agrees to render, without charge to Jersey, Union, or Indiana, reasonable services to licensees in connection with installations, such as consultation and the furnishing of data from time to time as to improvements in the apparatus or process employed by such licensees where such improvements are applicable. If a licensee shall undertake to construct an installation without employing Kellogg for that purpose, then Kellogg shall be under no obligation to furnish engineering or drafting services or the services of operators in connection with such construction, but Kellogg shall be under obligation to communicate improvements as hereinabove set forth.

C. Jersey, Union, and Indiana severally and jointly agree as provided in and subject to all of the limitations expressed in article V D hereof to defend any and all suits for contributory patent infringement which may be brought against Kellogg as a result of Kellogg's acts in constructing and selling to licensees under the patent rights for H. C. technique, plants for H. C. technique, the design of which has been approved by Jersey, Union, and Indiana, but not to hold Kellogg harmless or otherwise to indemnify Kellogg. Kellogg agrees to cooperate with Jersey, Union, and Indiana in the said defense of said suits and to supply Jersey, Union, and Indiana with all information and data at their command, useful in said defense, and to instruct its employees to assist and testify in said defense, free of all expense or cost to Jersey, Union, or Indiana.

D. It is further agreed that Kellogg shall not build any plant for H. C. technique except such plants as are approved as to design and mode of operation by authorized representatives of Jersey, Union, and Indiana; and it is further understood and agreed that said approval shall not constitute any guarantee as to the engineering or operating features of the plant, but shall be directed primarily to the approval of the patent features thereof. Jersey, Union, and Indiana severally agree not to withhold said approval unreasonably and agree to communicate said approval or disapproval promptly.

ARTICLE XI. DEVELOPMENT OF H. C. TECHNIQUE

A. With the purpose of providing adequate facilities whereby various phases of H. C. technique may be rapidly and economically developed or perfected, Jersey, Union, Indiana, and Kellogg hereby agree to advise each of the other parties currently as to their respective developements in the field of H. C. technique; and the parties further agree to cooperate in a joint program of research and development, to be carried on under the supervision of a steering committee comprising one committeeman designated by each of the parties, by donating the advisory services of their technical executives and specialists and by contributing to the cost of such a program as hereinafter specified:

(1) *Construction cost.*—Kellogg shall build a demonstration plant at Jersey City complete to deasphalt, dewax, chemically treat, and solvent extract lubricating oil stocks and shall build such further apparatus as may be approved by the steering committee. Indiana agrees to construct a pilot plant at Whiting at a minimum cost of $24,000. The parties will make the following contributions to the construction cost of the plant already constructed by Kellogg and any other apparatus approved by the committee for construction by Kellogg, and to the cost of constructing the Indiana plant at Whiting.

Kellogg	$26, 425. 60
Union	20, 524. 80
Jersey	20, 524. 80
Indiana	20, 524. 80
Total cost	88, 000. 00

(2) *Cost of operation.*—The parties agree to contribute to the cost of operation of the plant at Jersey City during the year 1934 in proportions hereafter indicated and in sums not to exceed the amounts hereinafter specified:

Union	$12, 828
Indiana	12, 828
Kellogg	21, 516
Jersey	12, 828
Total cost	60, 000

Digitized by Google

The parties agree to contribute to the cost of operating said plant, in years subsequent to 1934 and during the life of this agreement, such sums as may be decided upon by the steering committee; provided, however, that unless otherwise agreed the total sum thus expended shall not exceed thirty thousand dollars ($30,000.00) per annum, and provided that the contributions of the parties shall be in the proportions hereinabove specified.

The parties further agree that the steering committee may at its option by a unanimous vote of the whole committee reallocate the expenditures provided in this article XI A to finance research work at points other than Jersey City and Whiting and to reallocate the division of expense between "Construction cost" and "Cost of operation"; provided, however, that such reallocation shall not in any way bind the parties to contribute greater sums than those in this article provided.

(3) The parties agree to make such cash payments one to the other on or before September 15, 1934, as may be required to prorate, in the proportions above specified, such authorized expense as shall have been incurred prior to July 1, 1934, and they further agree to make such cash payments on or before February 15, 1935, as may be required to prorate such of said expense as shall have been incurred during the last 6 months of 1934.

B. The expenditures specified in paragraph A of this article shall constitute a first charge against 20 percent (20%) of any royalties received by Kellogg, Jersey, Union, and/or Indiana from the licensing of their patent rights for H. C. technique and each of the parties contributing to said expenditures shall be entitled to recover the same in the proportion of their contributions out of said 20 percent of royalties.

C. Kellogg agrees to bear all costs of the authorized construction at Jersey City in excess of $64,000.

Indiana agrees to bear all costs of the Whiting plant in excess of $24,000.

Kellogg agrees to bear all yearly operating costs of the Jersey City plants in excess of the amounts provided in this article.

Indiana agrees to bear all operating costs of the Whiting plant.

D. It is understood and agreed that, nothwithstanding the provisions of this article, Kellogg shall bear the entire cost of service testing work for licensees, as provided in article X B of this agreement.

ARTICLE XII. ROYALTIES

A. *Collection of royalties.*—Jersey, Union, and Indiana hereby, severally, and not jointly, authorize Kellogg to collect and to receive for their respective accounts, royalties paid by licensees under their respective patent rights for H. C. technique.

Kellogg agrees to receive or collect royalties as hereinabove set forth, to hold the specified sums in trust for Jersey, Union, and Indiana until disbursed as herein provided and to disburse said funds due Jersey, Union, and Indiana received by Kellogg at the times provided for accounting between Jersey, Union, and Indiana as hereinbelow specified: It is understood and agreed that Kellogg shall be obliged to pay to Jersey, Union, and Indiana only out of those sums actually received by Kellogg, and that the parties shall bear any taxes levied against Kellogg as the result of Kellogg's acts, herein authorized, in collecting and dividing said royalty sums, and any expenses, excluding normal office overhead, which may be incurred by Kellogg in collecting said royalty sums.

B. *Overriding royalties*—(1) *Kellogg's overriding royalties.*—It is agreed that Kellogg shall be entitled to first deduct from the royalties received in respect of a license granted for a plant for the operation of a process of H. C. technique, which Kellogg does not construct, other than plants licensed by Max B. Miller & Co., a sum equal to 10 percent of the amount remaining after the deductions provided for in article XI B hereof (i. e., for development expense).

(2) *Jersey's overriding royalty.*—For the purposes of this article a phenol process shall mean a process in which phenol is employed as a selective solvent either alone or in admixture with other diluents and/or agents; provided that said other diluents and/or agents shall not be propane and/or hexane. In the event that said other agents are themselves selective solvents they shall be present in a proportion by weight of less than 60 percent of the total selective solvent present in said admixture. However, the term shall not include a phenol process step in combination with a process of H. C. technique of the type illustrated in article I A (*e*), in which the apparatus for the phenol process step is constructed and equipped throughout in a manner necessary for operation in the presence of

Digitized by Google

effective quantities of propane and in which oil from the two-solvent step is cycled into the phenol process step.

In the event Jersey, Union, or Indiana, directly or through Kellogg, grant any licenses for the operation of a phenol process, then and in that event, and after deductions specified in article XI B and article XII B and prior to the payments hereinafter specified to be made, Union and Indiana agree to pay, or to authorize Kellogg to pay, to Jersey, and Jersey may reserve or authorize Kellogg to reserve and pay to Jersey, the following percentages for the years stated, and distribute the remaining royalty sums in the ratio hereinafter in paragraph D of this article specified.

For phenol process plants completed during the period ending December 31 of each year specified below, the following percentages of the paid-up royalties collected on account of the licensing of said plants:

	Percent		Percent
1934	50	1937	30
1935	50	1938	20
1936	40	1939	10

Thereafter no overriding royalty from paid-up licenses shall be due. If however the licensee elects to pay barrelage royalties instead of paid-up royalties, Jersey is to receive or may reserve the same percentages of the barrelage royalties for a period of 4½ years after the date of completion of the plant that would have obtained if licensee had paid the paid-up royalty.

In the event a phenol process is licensed in combination with any other process of H. C. technique at a royalty rate less than the sum of the individual royalty rates specified for said processes, if each were operated separately, each process will bear its proportionate share of the royalty reduction.

C. *Special royalties.*—It is further agreed that in case Kellogg receives, on behalf of Jersey, Union, Indiana, and Kellogg, royalties paid by Max B. Miller & Co. on account of licenses granted by said company for processes of H. C. technique (except royalties paid by Miller on account of licenses granted by Miller prior to Jan. 1, 1934, to Gulf Refining Co. and Socony Vacuum Corporation) Kellogg shall be entitled to receive and retain three hundred and seventy-nine three thousandths (379/3,000) of said royalties (subject to the provisions of article XI B of this agreement), and shall pay over the remainder to Jersey, Union, and Indiana in equal proportions.

It is further understood and agreed that in the event Max B. Miller & Co. pays over to Kellogg, for the account of Jersey, Union, Indiana, and Kellogg, royalties on account of licenses for processes of H. C. technique granted prior to January 1, 1934, by Max B. Miller & Co. to Gulf Refining Co. for the production of 1,000 (50-gallon) barrels of finished lubricating oil per 24-hour day and to Socony Vacuum Corporation for 3,000 (50-gallon) barrels of finished lubricating oil per 24-hour day, Kellogg shall be entitled, subject to the provisions for the liquidation of development expense as provided in article XI B of this agreement, to receive and retain seven hundred and seventy-nine three thousandths (779/3,000) of the amount of said royalties available for distribution and shall pay over the remainder to Jersey, Union, and Indiana, each, thirty-three and one-third percent (33⅓).

It is further understood that in the event Shell Petroleum Corporation and/or Shell Development Co. (which corporations are hereinafter referred to as "Shell") should purchase a license under JUIK's patent rights for H. C. technique under such terms and conditions that Indiana assigns to Shell its rights under United States patents 1792146 and 1838338 issued to Vanderveer Voorhees (subject to the retention of certain free licenses by Indiana), and Shell assigns to Indiana its rights under United States patents 1713888, 1739750, and 1755810 issued to Samuel C. Carney (subject to the receipt by Shell of a free license under patent 1739750) certain further adjustments shall be made between the parties as follows:

(1) Indiana shall be entitled to receive out of the royalties paid by Shell to Kellogg for the account of JUIK the sum of $20,000 in advance of the distribution of said royalties in the manner provided in article XII D hereof;

(2) Indiana shall hold said United States patents 1713888, 1739750, and 1755810 for the joint benefit of JUIK.

D. *Distribution of residual royalties.*—After payment of the over-riding royalties and the special royalties as provided in this article XII–B and XII–C, the parties hereto agree as follows:

Jersey agrees with respect to such licenses as it may grant under its patent rights for H. C. technique it will pay to Kellogg a sum equivalent to three and seventy-nine hundredths percent (3.79%) and to Union and Indiana each, a sum equivalent

Digitized by Google

to thirty-two and seven-hundredths percent (32.07%) of the royalty amounts provided in schedule A hereof;

Union agrees with respect to such licenses as it may grant under its patent rights for H. C. technique it will pay to Kellogg a sum equivalent to three and seventy-nine hundredths percent (3.79%) and to Jersey and Indiana a sum equivalent to thirty-two and seven-hundredths percent (32.07%) of the royalty amounts provided in schedule A hereof;

Indiana agrees with respect to such licenses as it may grant under its patent rights for H. C. technique it will pay to Kellogg a sum equivalent to three and seventy-nine hundredths percent (3.79%) and to Jersey and Union each a sum equivalent to thirty-two and seven-hundredths percent (32.07%) of the royalty amounts provided in schedule A hereof.

Jersey, Union, Indiana, and Kellogg further agree, each with the others:

(1) That the payments hereinabove provided shall be due and payable, without interest, at monthly intervals during the life of this agreement within 10 days after the close of each month with respect to any and all royalties received during said month.

(2) That default by a licensee in any payment due shall relieve the licensing party, to the extent of said default, from the necessity of making such payments until such time as the default is remedied.

(3) That in the event royalties with respect to such licenses are collected for the licensors by Kellogg or such other representative for the sale of licenses as may be agreed upon, the parties hereto agree to authorize Kellogg or such other representative to make the payments on their respective behalves to the end that no further accounting shall be necessary or required of the parties:

(4) That payments made pursuant to this article shall be made only once with respect to any particular royalty revenue, it being intended that there shall be no duplication of such payments.

ARTICLE XIII

Notice and communications hereunder shall be directed as follows:
Standard Oil Co. (New Jersey), 30 Rockefeller Plaza, New York, N. Y.;
Standard Oil Development Co., Linden, N. J.;
Union Oil Co. of California, Union Oil Building, Los Angeles, Calif.;
Standard Oil Co. (Indiana), 910 South Michigan Avenue, Chicago, Ill.;
The M. W. Kellogg Co., 225 Broadway, New York, N. Y.;
and shall be deemed fully communicated and served when deposited in the United States mail, registered and postage fully prepaid.

ARTICLE XIV. TERMINATION

A. Jersey, Union, and Indiana agree that upon the termination of this agreement they will make a fair and reasonable apportionment of the rights, titles, and interests acquired from Kellogg or from others insofar as said rights, titles, and interests relate to patent rights for H. C. technique.

B. Jersey and Kellogg agree that Union and Indiana acting jointly may by written notice to Jersey and Kellogg substitute for the phenol process any other single solvent extraction process, and thereby limit the scope of the agreement by excluding the phenol process from, and introducing said other single solvent process within the scope of the agreement. In that event, the over-riding royalty provisions of article XII shall terminate and may, at the option of Union and Indiana, acting jointly, be applied to said other single solvent for no longer period and for no greater percentage. In the event said substitution occurs after July 1, 1937, the equal royalty distribution between Jersey, Union, and Indiana provided for in article XII D shall be altered to be 4 percent to Kellogg, 33.6 percent to Indiana, 33.6 percent to Union, and 28.8 percent to Jersey, and all contributions by Jersey, Union, and Indiana to expenses other than Indiana's expense with regard to the Whiting plant, shall be adjusted proportionately. In the event of such substitution of another single solvent the division of expense provided in article V hereof shall be thereafter modified to the following proportions: Indiana and Union each, thirty-five percent (35%); and Jersey, thirty percent (30%).

ARTICLE XV

This agreement expresses the relationships between, and the terms and conditions affecting, the parties hereto, notwithstanding any and all agreements, communications, correspondence, and conversations between the parties hereto prior to this agreement.

Digitized by Google

ARTICLE XVI

This agreement shall not be assignable by any of the parties hereto without the express consent of the other parties to the agreement, given in writing.

In witness whereof the parties hereto have hereunto set their hands and affixed their seals as of the day and year in this document first above written.

[SEAL] STANDARD OIL CO. (NEW JERSEY),
By CHRISTY PAYNE,

(JUIK Contract)

SCHEDULE A. ROYALTY RATES FOR PROCESSES OF H. C. TECHNIQUE

A. *Basic rates for fully paid licenses.*—The rates for fully paid licenses shall be based on the average 24-hour daily operation of the licensed plant. The initial paid-up royalty shall be based upon the rated capacity of the plant, making allowances for the varying character of the oils to be processed and assuming not less than 320 days' operating time per year. Fifty percent (50%) of the amount thus calculated shall be due and payable within 10 days after the plant starts into operation, and the other fifty percent (50%) within 10 days after the plant has been accepted by the licensee. Not later than February 1 of the ensuing year the licensee shall report the actual average daily quantities charged to and produced by each operation of H. C. technique from the time the plant went into operation until the end of the year and the licensee shall also render a similar report of the preceding year's operation not later than February 1 of each subsequent year. If during any such period the fully-paid royalty corresponding to said quantities exceed the amount of fully-paid royalty which has been paid by the licensee, the licensee shall make a further royalty payment to make up said deficiency. Such payment, if any, shall be due and payable not later than March 1 of each year, and may be made on either a barrelage or fully-paid basis at the option of licensee. No payment of barrelage royalties shall be credited against a fully paid license.

All barrels referred to herein are barrels of 42 United States gallons each (measured at 60° F.).

Insofar as the rates hereinbelow specified are pertinent to dewaxing, they apply only to processes involving batch chilling. The rates for processes involving rapid continuous chilling and filtration shall be set by mutual agreement.

Insofar as the rates hereinbelow specified are pertinent to processes of solvent extraction, they shall apply only to operations in which one grade of high V. I. oil is produced. The rates for processes involving the concurrent production of high V. I. oil and intermediate V. I. oil shall be set by mutual agreement:

No royalty charge shall be levied upon a recycling or returning of oil to a process of H. C. technique, which oil has previously been treated by the same

Digitized by Google

process; provided, however, that royalty shall be charged upon any additional finished oil obtained by such recycling.

The rates for fully-paid licenses shall be as follows:

(1) *For a deasphalting process,* ten dollars ($10) per barrel of stock charged, plus eighty dollars ($80) per barrel of asphaltic material separated;

(2) *For a dewaxing process* or a process of acid treating in propane; or a combination of either of these processes with deasphalting, eighty dollars ($80) per barrel of stock charged to the process;

(3) *For a process combining dewaxing and acid treating in propane* with or without the step of deasphalting, One hundred and twenty dollars per barrel of stock charged to the process;

(4) *For a solvent extraction process* or a combined solvent extraction and deasphalting process sixty dollars ($60) per barrel of stock charged plus one hundred and sixty dollars ($160) per barrel of finished oil obtained from the process, but not less than two hundred fifty dollars ($250) nor more than three hundred dollars ($300) per barrel of finished oil. The term "finished oil" in this paragraph may be applied by the licensee to the final marketable oil produced after other finishing operations such as clay treating or dewaxing, but no deduction shall be made for the oil removed in subsequent dewaxing operations unless it can be definitely shown that such oil is not sold as a marketable product either before or after subsequent separation from the wax;

(5) *For a combination process* including either dewaxing and solvent extraction or a combination of these processes with deasphalting, eighty dollars ($80) per barrel of oil charged to the process plus one hundred and sixty dollars ($160) per barrel of finished dewaxed oil produced by the process; provided that the sum of said charges shall in no case be less than $280 nor more than $360 per barrel of dewaxed raffinate produced;

(6) *For a process of chemical treatment* in propane solution other than acid treatment, the rates shall be set by mutual agreement. The process of acid treating in propane solution may be included in processes (4) and (5) without additional cost.

B. *Rate for barrelage licenses.*—The running royalty rate per barrel actually charged into or obtained from the plant shall be computed by dividing the fully-paid rate per barrel per day for the same operation, as provided in paragraph A hereof, by fourteen hundred sixty (1460), i e., the number of days in 4 years, less one day.

For example, the maximum fully-paid rate for a combination process is specified in paragraph A (5) hereof as $360 per barrel of dewaxed raffinate per day and the equivalent barrelage rate is $0.2465 per barrel.

In case the licensee elects to pay barrelage rather than fully-paid royalties on any installation, reports and payments shall be made quarterly within 30 days of the end of each quarter.

C. *Sliding scale for royalty rates.*—After any licensee has paid a total royalty of $300,000 under this contract, said licensee shall be entitled to a 10 percent reduction on the next $300,000 of royalty calculated as above indicated.

After said licensee has paid a total royalty of $570,000 under this contract, he shall be entitled to a 20 percent reduction on the next $300,000 of royalty calculated as above indicated.

After said licensee has paid a total royalty of $810,000 under this contract, he shall be entitled to a 30 percent reduction on any additional royalty calculated as above indicated.

Escrow Agreement, Dated July 27, 1933

Parties: The Texas Co., The Texas Corporation, Standard Oil Co. (Indiana), Standard Oil Development Co., the Pure Oil Co., the Gray Processes Corporation, the Gray Processes Corporation Committee, Fidelity Union Trust Co.

I. PARTIES

1. Theodore S. Kenyon, Charles H. Marshall, and Walter Miller, as the committee constituted and acting under a certain deposit agreement dated the 27th day of April 1933, of which a copy if annexed hereto marked "Exhibit A" (hereinafter called the deposit agreement) and referred to in a certain purchase and cross-license agreement dated the 27th day of July 1933, of which a copy is annexed the exhibit A marked "Exhibit I" (hereinafter called the purchase agree-

Digitized by Google

ment), and the respective successors of said persons acting in such capacity (hereinafter called the committee).

2. The Gray Processes Corporation, a Delaware corporation, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

3. The Texas Co., a Delaware corporation and its parent the Texas Corporation, a Delaware corporation, each having a place of business at 135 East Forty-second Street, New York, N. Y., and their respective subsidiaries (hereinafter referred to collectively as Texas).

4. Standard Oil Co., an Indiana corporation, having a place of business at 910 South Michigan Avenue, Chicago, Ill., and its subsidiaries (hereinafter referred to collectively as Indiana).

5. Standard Oil Development Co., a Delaware corporation, having a place of business at Linden, N. J. (hereinafter referred to as Development).

6. The Pure Oil Co., an Ohio corporation, having a place of business at 35 East Wacker Drive, Chicago, Ill., and its subsidiaries (hereinafter referred to collectively as Pure).

7. Fidelity Union Trust Co., a corporation of the State of New Jersey having its principal office at 755 Broad Street, in the city of Newark, N. J. (hereinafter called the Depositary).

II. RECITALS

8. The Committee, Gray, Texas, Indiana, Development, and Pure, have under date of July 27, 1933, entered into the purchase agreement and have in said agreement provided for the execution, delivery and performance of this escrow agreement and all of said parties have, in accordance with the provisions of the purchase agreement, approved of the form of this escrow agreement prior to the execution thereof and request Fidelity Union Trust Co. to act as Depositary hereunder and to carry out the terms and provisions hereof.

9. Upon the execution of this agreement the Committee has delivered to the Depositary stock certificates, endorsed in blank for transfer or accompanied by valid instruments for the transfer thereof in blank, representing all of the 100,000 shares of outstanding capital stock of Gray.

III. COVENANTS OF THE PARTIES

In consideration of the recitals and the mutual covenants hereinafter set forth, each party hereto covenants and agrees with each other party hereto as follows:

10. The deposited stock certificates representing all of the 100,000 shares of the capital stock of Gray (hereinafter called the deposited shares) have been deposited with the Depositary hereunder pursuant to the provisions of the purchase agreement and of the deposit agreement and in order to provide convenient means for the delivery thereof to Texas, Indiana, Development, and Pure respectively, or for the return thereof to the Committee, as in said agreements provided

11. The committee hereby irrevocably authorizes and directs Gray, Texas, Indiana, Development, and Pure to pay to the depositary, for account of the committee, all sums required by the provisions of subparagraph (d) of paragraph 27 of the purchase agreement, or permitted by the provisions of subparagraph (g) of paragraph 22 of the purchase agreement, to be paid by them or any of them to the committee, and the committee further authorizes and directs the depositary, for the account and in the name of the committee, to accept and receipt for all such payments. All sums so paid to the depositary shall be held by it to the order of the committee. The depositary shall promptly notify each of the other parties hereto, in writing, of the receipt and payment over of each sum received by it pursuant to the provisions of this paragraph. The receipts of the depositary for such payments, or canceled checks or drafts evidencing the making of such payments and the receipt thereof by the depositary, shall be conclusive evidence of the making of the payments specified in such receipts and/or such canceled checks or drafts and of the dates of such payments, but shall not conclude the committee as to the sufficiency of such payments.

12. If, while this agreement remains in force, Gray desires to set off against an amount payable by it pursuant to the provisions of subsparagraph (d) of paragraph 27 of the purchase agreement a specified amount on account of liabilities of Gray as permitted by the provisions of subparagraph (b) of paragraph 21 of the purchase agreement, Gray shall give written notice to the committee and to the depositary specifying the amount so claimed in set-off and the basis therefor. Within 10 days after receipt of such written notice the committee shall notify Gray and the depositary in writing whether and to what extent it approves such

Digitized by Google

set-off, and if any part of such set-off is disapproved, stating the basis for such disapproval. To the extent of any set-off so approved in writing by the committee, Gray shall be relieved of the obligation of making such payment and the amount of set-off so approved shall be credited against the sum of $500,000 payable by Gray to the committee pursuant to the provisions of said subparagraph (d) of paragraph 27 of the purchase agreement, with the same effect as if such amount had been paid in cash to the depositary for the account of the committee. To the extent of the amount by which the committee shall by notice in writing disapprove any such claim of set-off, the time of Gray to make the payment to the committee against which such right of set-off is asserted shall be extended until final determination as to whether or not Gray is entitled to make such set-off. If Gray and the committee are unable to agree as to any such set-off disapproved in whole or in part by the committee, the dispute shall be settled by three arbitrators, one to be appointed by Gray, one to be appointed by the committee, and the third to be selected by the two so appointed, or if the two cannot agree within 10 days after their appointment then by the then president of the depositary. The award of the majority of such arbitrators shall be filed with the depositary and shall be final and binding upon all parties to this agreement. The expenses of such arbitration, including the fees of the arbitrators shall be borne by the losing party.

13. When the depositary shall have received for account of the committee from Gray, Texas, Indiana, Development, and/or Pure, pursuant to the provisions of subparagraph (d) of paragraph 27 of the purchase agreement (including as if so paid all set-offs against such payments theretofore approved by the committee or allowed by arbitrators pursuant to paragraph 12 of this agreement) and/or pursuant to the provisions of subparagraph (g) of paragraph 22 of the purchase agreement, payments aggregating the sum of $500,000, the depositary shall make delivery of the deposited shares to Texas, Indiana, Development, and Pure, or their respective nominees designated in writing, in the respective amounts of 25,000 shares each against the written receipts of Texas, Indiana, Development, and Pure, respectively, or of their respective nominees. Such written receipts shall fully discharge and release the depositary of and from any and all further responsibility and liability hereunder with respect to the deposited shares.

14. Upon the delivery of the deposited shares to Texas, Indiana, Development, and Pure, respectively, and/or to their respective nominees, as provided in paragraph 13 hereof, indefeasible title to the deposited shares so delivered shall forthwith vest in Texas, Indiana, Development, and Pure, respectively, or in their respective nominees.

15. If, within a period of 3 years from the date of this agreement, the payments made by Gray to the depositary for the account of the committee pursuant to the provisions of subparagraph (d) of paragraph 27 of the purchase agreement (including as if so paid all set-offs against such payments theretofore approved by the committee or allowed by arbitrators pursuant to paragraph 12 of this agreement) shall have amounted in the aggregate to less than the sum of $500,000, the depositary shall within three (3) days thereof give to each of the parties hereto written notice by registered mail of the amount of such deficiency and if within 60 days after receipt of such written notice Gray, Texas, Indiana, Development, and Pure shall fail to pay or cause to be paid to the depositary, for the account of the committee, the amount of such deficiency, the depositary shall, upon the day after the expiration of said 60-day period, deliver the deposited shares to the depositary then acting under the deposit agreement; provided, however, that in the event that within said 60-day period any of the parties hereto files with the depositary a notice in writing stating that there is a dispute as to the amount of such deficiency, said 60-day period shall be extended, and said delivery of the deposited shares by the depositary hereunder to the depositary under the deposit agreement shall be postponed for a sufficient time to permit the determination of such deficiency by an independent audit by accountants agreed upon by the parties hereto, and in the event of such dispute such deficiency, in the amount determined by such audit, may be paid to the depositary for the account of the committee within a period of 5 days after the giving of written notice of the results of such audit to Gray, Texas, Indiana, Development, and Pure and to the depositary, and if such deficiency so determined is paid to the depositary for the account of the committee within said 5-day period, the depositary shall thereupon deliver the deposited shares to Texas, Indiana, Development, and Pure, or their respective nominees designated in writing, as in paragraph 13 hereof provided, and if such deficiency shall not be paid within said 5-day period, the

Digitized by Google

depositary hereunder shall deliver the deposited shares to the depositary then acting under the deposit agreement against its written receipt. Upon the delivery of the deposited shares by the depositary in accordance with the provisions of this paragraph, the depositary shall be fully discharged and released of and from any and all further responsibility and liability hereunder with respect to the deposited shares.

16. The provisions of subparagraphs (b), (c), (d), (e), (h), and (i) of paragraph 22 of the purchase agreement are hereby confirmed and adopted with the same force and effect as if fully set forth in this agreement. The committee has deposited with the depositary written substitutions under proxies held by the committee authorizing the voting of the deposited shares in accordance with the provisions of said subparagraph (c) of paragraph 22 of the purchase agreement.

17. The parties hereto agree that if Gray or Texas, Indiana, Development, or Pure shall fail to make any payment to the depositary, for the account of the committee, required by the purchase agreement, Texas, Indiana, Development, and Pure, or any one or more of them, shall have the right to make such payment and thereupon become subrogated to the claim of the committee against the defaulting party for the amount of the defaulted payment.

18. This escrow agreement may be amended by supplemental agreements in writing executed by the committee and by Gray, Texas, Indiana, Development, and Pure, respectively, and filed with the depositary; provided, however, that the rights, duties, and obligations of the depositary shall not be affected adversely without its consent.

19. Texas, Indiana, Development, and Pure and Gray agree that if the committee assigns its interest in the purchase agreement to a new corporation, association, or trust in accordance with the provisions of the purchase agreement and of the deposit agreement, the committee may assign its interest in this agreement to such new corporation, association, or trust, but only upon the assumption by such new corporation, association, or trust of all obligations or liabilities and undertakings of the committee hereunder to the extent that the same remain unperformed and thereupon the committee shall be released and discharged of and from all obligations, liabilities, and undertakings so assumed. Any such assignment by the committee shall vest in such new corporation, association, or trust all of the privileges, powers, and rights conferred on the committee under this agreement as fully though it, and not the committee, were the original party hereto.

20. The depositary shall be entitled to reasonable compensation for its services hereunder and shall have a lien for such compensation and for its expenses incurred in connection herewith upon any property or funds at any time held by it hereunder. Such compensation and expenses of the depositary shall be paid by Gray. The depositary assumes no liability or obligation to the parties hereto under this agreement excepting only to receive and to dispose of the deposited shares and any other property or funds coming into its possession as depositary hereunder in the manner herein provided. The depositary assumes no responsibility for the recitals to this agreement. The depositary may rely and shall be protected in acting upon the opinion of Messrs. Pitney, Hardin, and Skinner or of its own counsel, as to any legal questions arising in connection with its duties hereunder and shall be absolutely protected from any and all liability for any action taken or omitted by it in good faith hereunder. The depositary at any time acting hereunder may resign and in such event a successor depositary may be appointed by a writing signed by the committee and by Texas, Indiana, Development, and Pure. Any successor depositary so appointed shall have and may exercise all the rights and powers of the depositary designated herein.

21. The addresses of the parties hereto for all purposes specified in this escrow agreement shall be as follows:

The Gray Processes Corporation Committee, care of Fidelity Union Trust Co., Newark, N. J.

The Gray Processes Corporation, 961 Frelinghuysen Avenue, Newark, N. J.

The Texas Co. and the Texas Corporation, 135 East Forty-second Street, New York, N. Y.

Standard Oil Co. (Indiana), 910 South Michigan Avenue, Chicago, Ill.

Standard Oil Development Co., Linden, N. J.

The Pure Oil Co., 35 East Wacker Drive, Chicago, Ill.

Fidelity Union Trust Co., depositary, 755 Broad Street, Newark, N. J.

All payments provided for in this agreement shall be made, and all notices provided for herein shall be directed to, the respective parties, at the above addresses, provided, however, that any party shall have the right to change such

Digitized by Google

address by notice in writing directed to each of the other parties. All deliveries of capital stock of Gray provided for in this agreement shall be made at the above office of the depositary.

22. The committee, as such, has become a party to this escrow agreement as agent and representative of the stockholders of Gray by virtue of the power and authority conferred upon the committee by the deposit agreement; and no provision of this agreement shall have the effect or be construed to impose any individual obligation or liability whatsoever upon the several members of the committee.

23. This escrow agreement shall be executed in several counterparts, each of which shall be an original, and all of which shall together constitute one and the same instrument.

In witness whereof, the committee, Gray, Texas, Indiana, Development, and Pure have respectively executed this agreement and deposited the same with Fidelity Union Trust Co., and said Fidelity Union Trust Co. has executed the same to evidence its acceptance of the trusts hereby created, as of the day and year first above written.

EXHIBIT A. DEPOSIT AGREEMENT—THE GRAY PROCESSES CORPORATION

Agreement dated the 27th day of April 1933 between such holders of capital stock of The Gray Processes Corporation (hereinafter called the corporation) and/or voting trust certificates for such capital stock as shall become parties to this agreement in the manner hereinafter provided (hereinafter referred to as the depositors), parties of the first part, and Theodore S. Kenyon, Charles H. Marshall, and Walter Miller, as a committee and their respective successors in such capacity (hereinafter called the committee), parties of the second part, witnesseth:

Whereas the depositors desire that the committee, as agent of the depositors, enter into, and carry out the terms and provisions of, an agreement, either in the form hereto annexed, entitled "Purchase and Cross License Agreement", marked "Exhibit I" and made a part hereof, or in such form with such changes, modifications, or additions therein and thereto as the committee is authorized by the provisions hereof to make, approve, or accept (such agreement whether in the form of exhibit I or in such other form being hereinafter referred to as the purchase agreement) providing, among other things, for a sale to purchasers therein designated of the shares of the capital stock and/or voting trust certificates therefor of the corporation which shall be deposited hereunder.

Now, therefore, in consideration of the premises and of the mutual promises herein contained, the depositors, each for himself and not for the others or any of them, agree with each other and with the committee and the depositary, and the committee agrees with the depositors and the depositary, as follows:

1. This agreement, when duly executed by all members of the committee, shall be lodged with Fidelity Union Trust Co. (hereinafter called the depositary),

Digitized by Google

which is hereby appointed the depositary, at its office, no. 755 Broad Street, Newark, N. J.

Any holder of capital stock of the corporation and/or voting trust certificates therefor may become a party hereto by delivering to the committee, at the office of the depositary, a proxy and power of attorney in the form hereto annexed, marked "Schedule A" and made a part hereof, and by depositing with the depositary, as the agent of the committee, within such period or periods as the committee may from time to time limit for that purpose, the certificates and/or voting trust certificates held by him and representing shares of such capital stock, duly endorsed in blank, and by complying with such regulations governing such deposit as the committee shall prescribe and thereupon shall become a depositor hereunder and a party hereto with the same force and effect as though the depositor had subscribed this agreement and, if the committee shall so require, the depositor shall so subscribe. By becoming a party hereto each depositor approves the terms and provisions of the purchase agreement and agrees that it shall be deemed a part of this agreement with the same force and effect as though set forth at length herein.

Upon the deposit hereunder of any capital stock of the corporation or voting trust certificate therefor, the depositor shall be entitled to receive from the depositary a certificate or certificates of deposit in such form as may be approved by the committee. Certificates of deposit shall be registered in the names of the respective depositors and the depositary shall keep a record of the addresses furnished to it by the depositors. The registered owner of any certificate of deposit or certificates of deposit, upon surrender thereof for cancelation at the office of the depositary and duly endorsed "for division" or "for consolidation", shall be entitled, upon the payment of any and all taxes required by law and upon payment of such reasonable charges as shall be fixed by the committee, to receive certificates of deposit or a certificate of deposit, registered in the same name, and representing in the aggregate the same number of shares of capital stock of the corporation or voting trust certificates therefor, as the certificate or certificates of deposit surrendered, all as may be requested by said registered owner or his duly authorized attorney, provided that certificates of deposit will not be issued, unless the committee shall otherwise permit, representing fractional shares or voting trust certificates therefor. Certificates of deposit shall be transferable subject to the terms and conditions hereof and thereof upon the books of the committee at the office of the depositary by the registered owners in person or by their duly authorized attorneys upon surrender of said certificates of deposit properly endorsed and upon payment of any and all tranfser taxes required by law. Upon any transfer of a certificate of deposit being so made, the transferee shall become a party hereto as a depositor and shall for all purposes be substituted for and shall be entitled to all the rights and shall be subject to all the obligations of the prior holder and the registered owners for the time being of the respective certificates of deposit may be treated by the committee and the depositary for all purposes as the absolute owners thereof, and neither the committee nor the depositary shall be affected by any notice to the contrary.

The committee may, in its discretion, from time to time cause the transfer books of the certificates of deposit to be closed for any purpose deemed by the committee advisable, whether in connection with any payment or distribution upon or in respect of the certificates of deposit or otherwise, for such period or periods as the committee may deem expedient, and upon termination of this agreement for whatsoever cause may, upon reasonable notice to the registered holders of certificates of deposit then outstanding, terminate the right to transfer the same.

The committee may limit the time or times within which deposits may be made hereunder, and may, in its discretion, either generally or in special instances, extend, change, vary, or renew the time or times so fixed or limited upon such terms and conditions and under such penalties as it may, in its discretion, prescribe. Anything herein contained to the contrary notwithstanding, it may on such terms and conditions as it deems proper give to any owner of such capital stock or voting trust certificates therefor who signs this agreement all the benefits hereof without the actual deposit of his securities hereunder.

No depositor shall have any right or be permitted to withdraw any securities deposited hereunder except as the right of such withdrawal may be expressly conferred by the provisions hereof or except with the consent of the committee.

2. No title or beneficial interest to the capital stock or voting trust certificates deposited hereunder shall pass to the committee and no endorsement or deposit of any such securities shall be or become effective for the vesting of title or bene-

Digitized by Google

ficial interest thereto in the committee, such title and beneficial interest remaining vested in the several depositors until such securities shall be sold by the committee as provided herein and in the purchase agreement; such securities shall be deemed and treated as having been deposited hereunder solely for the purpose of enabling the committee as the attorneys, agents, and proxies of the depositors more effectively to carry out the powers herein conferred upon the committee.

Each depositor, by becoming a party hereto, requests and orders the corporation and the voting trustees who shall have issued or caused to be issued any of the deposited voting trust certificates to pay to the committee or its nominee any and all dividends which may be or become payable upon his deposited securities prior to the delivery of said securities to purchasers thereof, out of escrow, as provided in the purchase agreement.

The committee shall distribute dividends (but without interest) out of the funds so paid to it or its nominee among the holders of record of the certificates of deposit within 15 days after the receipt of funds for distribution, all in accordance with the respective interests of such holders. Such distributions shall be made to holders of certificates of deposit of record at the respective dates constituting the record dates of the corporation of the voting trustees, as the case may be, for the determination of security holders entitled to share in such dividend. In lieu of making such distribution the committee may issue to the corporation and/or to the voting trustees and order or orders for the payment of any and all such dividends to the holders of record of certificates of deposit respectively entitled thereto.

3. The committee is authorized and empowered to take or cause to be taken all such steps, actions and proceedings, and to do and perform all such acts and things, as it shall deem necessary or proper for carrying out the provisions hereof and the provisions of the purchase agreement.

The depositors hereby constitute the committee, as the same may at any time be constituted, their true and lawful attorneys, agents and proxies, and the attorneys, agents and proxies of each depositor, with full powers and exculsively and irrevocably for the purpose of carrying out this agreement, hereby ratifying and confirming each and every act and thing that said attorneys, agents, and proxies, or any of them, may lawfully do or cause to be done by virtue hereof or pursuant hereto. By way of amplification, and without limitation of the foregoing general authority, the committee, as such exclusive and irrevocable attorneys, proxies, and agents, shall have full power and authority as follows:

(*a*) In the name, place and stead of the respective record owners of the deposited capital stock, or otherwise, to vote upon or consent with respect to the deposited stock at any and all meetings of the stockholders of the corporation, called or appointed to be held at any time prior to January 1, 1938, and prior to the delivery of the deposited securities to the purchasers thereof out of escrow as provided in the purchase agreement or prior to the earlier termination of this agreement, and at any and all adjournments thereof, according to the number of votes such record owners of such deposited capital stock would be entitled to cast, as fully as such record owners could do if personally present at such meeting, and/or from time to time to substitute (with full power of revocation) one or more persons (who, during any period when the deposited stock is held in escrow as provided in the purchase agreement, may be the nominee or nominees of any purchaser thereof not in default under the purchase agreement) with like full power. All former proxies heretofore given by any such record owner are hereby revoked. Without restricting the generality of the foregoing, such attorneys, agents, and proxies and their substitute or substitutes are authorized to vote for the election of directors of the corporation and for any necessary or advisable authorization in connection with the corporation's entering into the purchase agreement or any agreement referred to therein.

(*b*) In the name, place and stead of the respective record owners of the deposited voting trust certificates, or otherwise, to vote upon or consent with respect to such deposited voting trust certificates upon any and all matters upon which holders of such voting trust certificates may vote or with respect to which they may consent and, without restricting the generality of the foregoing, to request the voting trustees to vote for the election of directors of the corporation and for any such necessary or advisable authorization as aforesaid and to terminate any existing voting trust agreement and/or to consent that any existing voting trust agreement be terminated.

(*c*) In the name, place, and stead of the depositors or in the name of the committee, as such, but on behalf of the depositors to enter into, execute, and deliver the purchase agreement, either in the form hereto attached or in such form with such changes, modifications, or additions therein and thereto as the committee

Digitized by Google

in its uncontrolled discretion shall determine do not substantially and adversely affect the interests of the depositors and shall make, approve, or accept; and after execution and delivery by the committee of the purchase agreement, to perform and carry out the terms and provisions thereof; and, after as well as before the execution and delivery of the purchase agreement or the consummation of the sale of the capital stock of the corporation provided for therein, to negotiate and agree to further or other provisions, amendatory of and/or supplemental to and/or in furtherance of the purchase agreement as may be required in negotiations and/or dealings with the purchasers of the deposited stock; including (but without limitation thereto) all such modifications of the purchase agreement as, in the opinion of the committee, may be appropriate for the sale of the shares of the capital stock of the corporation and/or voting trust certificates therefor deposited hereunder, in the event that less than all of such capital stock and/or voting trust certificates shall be so deposited.

(*d*) In case any existing voting trust agreement shall be terminated, to deliver and surrender to the voting trustees thereunder the deposited voting trust certificates and to instruct such voting trustees appropriately with reference to the delivery of the capital stock represented by such surrendered voting trust certificates and as to the name or names in which the certificates representing such capital stock shall be registered, and to deposit said stock certificates hereunder.

(*e*) In the same manner as though the committee were a party to the purchase agreement in its own interest, to demand, collect, and receive all amounts that may at any time be or become due or owing to the committee under the purchase agreement and to give all necessary or proper receipts or acquittances in respect of sums received by it thereunder; to receive, examine, and approve or disapprove all accounts rendered or provided to be rendered to the committee under or pursuant to the purchase agreement; to waive any default under the purchase agreement or the exercise of any right of the committee consequent thereon; to institute, maintain, and prosecute all or any such suits, actions, or other legal proceedings of any kind or character and in any court or courts or other tribunal, whether against any party or parties to the purchase agreement or against others, which the committee shall deem necessary or appropriate for the protection of the rights and interests of the depositors in the premises, and to direct and control the conduct thereof and/or to intervene and participate in any suits or proceedings in any court or tribunal instituted or maintained by others which, in the judgment of the committee, may affect the rights and interests of the depositors in the premises; to compromise or settle any controversy; to borrow money to any extent necessary in the judgment of the committee for the carrying out of the purposes of this agreement, whether for the enforcement of the purchase agreement or otherwise, upon such terms and conditions and with such security as the committee may determine; and to determine in its discretion to what extent it is expedient or advisable at any time for the corporation to enter into litigation or to effect compromises or settlements in connection with any matter or thing connected with the conduct of the business of the corporation, whether in respect of the enforcement and collection of any notes or accounts receivable now or hereafter owned by the corporation or any license agreements to which the corporation now is or may be hereafter a party or suits now pending or which may hereafter be commenced for infringement of any of the patent rights as the term "patent rights" is defined in the purchase agreement, or otherwise, and appropriately, in the committee's judgment, to make requests upon the corporation and to give directions and instructions to the corporation in regard thereto.

(*f*) To approve the legal procedure and instruments required or used in carrying out this agreement, the purchase agreement, the formation of the new corporation, if any, and the delivery of its securities or certificates of interest.

(*g*) To take over from the corporation any or all of the cash, receivables, securities, and other assets of the corporation which, under the terms of the purchase agreement, are to be retained by the depositors or paid by the corporation to the depositors or to the committee in their behalf; to collect, realize upon, or sell and dispose of the same in such manner, at such times and for such considerations as the committee in its uncontrolled discretion shall determine and, subject to the committee's rights in respect of compensation and reimbursement as hereinafter provided, to distribute the net proceeds thereof to the depositors in the manner hereinafter provided and/or to distribute the same in kind so far as the same may be susceptible of such distribution.

No depositor shall have any right to vote upon, consent with respect to, or otherwise to deal in or with any deposited stock or voting trust certificates; every depositor, and each person, firm or corporation who shall ever become a

Digitized by Google

depositor hereunder, agrees, however, that upon the request of the committee he or it will execute and deliver to the committee all such proxies and other instruments and documents, including duly executed stock powers in blank, as the committee shall deem needful to enable it effectively to carry out the purposes of this agreement and to deal with the deposited securities hereunder.

Any question arising hereunder or relating to any action taken or contemplated by the committee with respect to the subject matter of this agreement may, in the uncontrolled discretion of the committee, be referred by the committee to the depositors; and instructions, consent or authorization with respect to any such question given by a majority in interest of the depositors shall be conclusive and binding upon all of the depositors in favor of the committee. For the purpose of referring any such question to the depositors, the committee may call a meeting of the depositors, and such meeting may be held at such time and place, upon such notice and under such regulations as to voting and otherwise as may be prescribed by the committee; provided, however, that at least 10 days' notice of any such meeting shall be given to the depositors in the manner provided by section 13 of this agreement. The instructions, consent or authorization of the depositors with respect to any such question may be given either by vote at a meeting called as aforesaid or in writing without a meeting.

Any and all amounts of money which may at any time be received by the committee under the purchase agreement or this agreement shall be disposed of as follows:

(*a*) First to the payment of the compensation of the committee and to reimbursement for all of its disbursements and expenses and to the satisfaction of its obligations and liabilities incurred to the date of any particular application of funds, or to the provision for the payment or satisfaction thereof;

(*b*) To the creation of such reserves for such purposes as the committee shall in its absolute discretion determine to be necessary, advisable, or proper, such reserves not to exceed, however, in the aggregate at any one time, the sum of $10,000;

(*c*) To the payment of the balance to the registered owners of the certificates of deposit at a date fixed by the committee pro rata in accordance with their respective interests.

4. The committee shall be the sole and final judge as to when and whether sufficient assents to this agreement, either through the deposit of securities hereunder or otherwise, shall have been received or shall be assured, and when other conditions shall have happened to justify the execution and delivery of the purchase agreement and/or the sale and delivery of the securities deposited hereunder, provided that no securities deposited hereunder shall be sold or delivered by the committee except pursuant to the terms of the purchase agreement.

5. This agreement shall terminate unless the purchase agreement shall have been executed and delivered on or before October 1, 1933, provided that the committee may, in its discretion, from time to time prior to any such termination extend the date for such termination, but no such extension shall be made beyond a period of 3 months from and after said date unless any such extension shall be authorized in writing by the registered owners, at the time of such authorization, of a majority in interest of the certificates of deposit then outstanding. In the event that for any reason the committee shall determine in its discretion that it is impracticable or inadvisable to enter into the purchase agreement, either in the form hereto attached or in any amended form, the committee may file with the depositary a written statement to that effect and declaring this agreement terminated, and upon such filing this agreement shall be terminated.

The committee may in its discretion at any time, either before or after the execution and delivery of the purchase agreement, terminate this agreement if, in the absolute discretion of the committee, it is advisable so to do, by filing with the depositary a written statement to that effect and delaring this agreement terminated, and upon such filing, this agreement shall be terminated. In the event that this agreement shall be terminated, as above provided, prior to the execution and delivery of the purchase agreement, the committee shall proceed as rapidly as may be possible, or in the discretion of the committee advisable and expedient (subject to the committee's rights in respect of reimbursement of its expenses, as hereinafter provided) to redeliver to the depositors the securities to which they shall then be respectively entitled. In the event that this agreement shall be terminated as above provided after the purchase agreement shall have been executed and delivered, the committee shall, simultaneously with such termination, or as soon thereafter as may be possible, or in the discretion of the committee advisable, assign, transfer and set over to a corporation, association, or trust, to be

Digitized by Google

organized under the laws of such State, with such name and capitalization and with such powers and otherwise constituted in such manner, as the committee shall determine (such corporation, association, or trust being hereinafter for convenience called the "new corporation"), all properties and assets of whatsoever nature at the time held hereunder by the committee, including without limitation the purchase agreement, upon such new corporation's assuming and agreeing to pay and discharge all liabilities and obligations of the committee and upon the new corporation's issuing and delivering to or upon the direction of the committee, as provided herein, all of its authorized capital stock and/or other securities or certificates of beneficial interest. The committee is authorized, if in its uncontrolled discretion such course be advisable, to make such provision as it shall deem appropriate for the establishment of a voting trust in respect of the capital stock or of any class of the capital stock of the new corporation, and the term of any such voting trust may be the maximum period then authorized by law or any shorter period, as the committee may determine. The committee shall distribute or cause the new corporation to distribute its said capital stock and/or other securities or certificates of beneficial interest or voting trust certificates to and among the owners of the certificates of deposit then outstanding hereunder ratably in accordance with their respective interests upon surrender to the depositary for cancelation of certificates of deposit in exchange therefor, each depositor hereby agreeing to accept such securities or certificates (and/or voting trust certificates) of the new corporation as aforesaid in exchange for the certificates of deposit owned by him, and further agreeing forthwith upon the request of the committee so to surrender his certificates of deposit for cancelation against delivery of securities or certificates (and/or voting trust certificates) of the new corporation as above provided. It is understood and agreed, however, that the committee shall be under no duty or obligation to organize the new corporation or to make any transfer of properties to the new corporation or to receive or distribute any securities or certificates (and/or voting trust certificates) of the new corporation if at the time of the termination of this agreement no further payments will, in the judgment of the committee, which shall be final and conclusive, ever be received under, upon, or in respect of the purchase agreement and if either (a) no properties or assets of any substantial value shall at the time be held by the committee hereunder, or (b) all properties and assets of any substantial value at the time held hereunder by the committee are in the form of cash or properties which in the judgment of the committee can be readily converted into cash; and in either of said events the committee shall proceed, notwithstanding the termination of this agreement, to liquidate and turn into cash, in such manner as the committee shall in its absolute discretion determine to be most practical and advisable, any and all such properties and assets held hereunder and, after making payment of provision for payment of the compensation, expenses and liabilities of the committee, shall distribute or cause to be distributed the remaining proceeds of the said properties and assets and all other cash held by the committee hereunder to and among the owners of the certificates of deposit then outstanding hereunder in accordance with their respective interests upon surrender to the depositary for cancelation of certificates of deposit in exchange therefor, each depositor hereby agreeing to accept the same in full satisfaction and further agreeing forthwith upon the request of the committee to surrender his certificates of deposit for cancelation against payment, as above provided, if any distribution is to be made, or without any payment, if there shall be no cash held by the committee to be distributed.

6. At least once in each calendar year the committee shall file with the depositary a statement of the committee's accounts and transactions and shall notify the depositors that such statement has been so filed, and such statement shall conclusively and finally be taken to be a true and correct statement of the committee's accounts and transactions for the period covered by said statement, unless any one or more depositors shall, within 30 days after the mailing of said notice file with the depositary written objections to said statement, specifying the grounds of his or their objections, and unless also legal proceedings on the basis of such objections shall be commenced by the objecting depositor or depositors within 60 days after the date of such mailing of notice by the committee, and such statement shall in any event be deemed and treated as true and correct, unless the committee shall voluntarily admit an error therein, as to all depositors not filing objections as aforesaid and as to all matters covered by said statement not specified as grounds of objection. Any legal proceedings impeaching the good faith of such statement must be duly commenced within 60 days after the mailing of such notices by the committee.

Digitized by Google

After the accomplishment of the purposes of this agreement or other termination hereof, the committee shall file with the depositary a statement of the committee's accounts and transactions and shall notify the depositors that such statement has been so filed, and thereupon the committee and each and every member thereof shall be released and discharged from all liability and accountability of every kind and description arising out of this agreement or any action taken by the committee, except only such liabilities as are expressly admitted in said statement, unless any one or more depositors shall, within 30 days after the mailing of said notice, file with the depositary written objections to said statement, specifying the grounds of his or their objections and unless also legal proceedings on the basis of such objections shall be commenced by the objecting depositor or depositors within 60 days after the date of such mailing of notice by the committee. Any legal proceedings impeaching the good faith of such statement must be duly commenced within 60 days after the mailing of such notices by the committee. The committee shall in any event be released and discharged from all liability and accountability of every kind and description arising out of this agreement or any action taken by the committee, except as admitted by the committee, and except as to depositors filing objections as aforesaid and except as to the particulars specified by objecting depositors in the notices filed by them with the depositary. Any holder of a certificate of deposit issued hereunder, by the surrender of his certificate of deposit and the receipt by him of any securities or other properties, if any, distributed to him by the committee upon the termination of this agreement or allotted to him upon his withdrawal herefrom, shall by such surrender and receipt release and discharge the committee and the depositary from all liability and accountability of every kind, character, and description whatsoever.

Process in legal proceedings commenced by any depositor in compliance with the provisions of this section 6 may be served upon any member or members of the committee at the office of the depositary at the time acting as such under this agreement; and the several members of the committee, for themselves and their respective successors in office, hereby constitute and appoint said depositary their agent and attorney in fact to receive service of process in any such proceedings on their behalf. The depositary shall have no duty with respect to process so served, except to forward the same or a true copy thereof by registered mail addressed to the several members of the committee at their respective post-office addresses last known to the depositary.

7. The committee may elect a chairman from its number and may appoint a secretary who may, but need not, be one of the committee and who, if appointed, shall keep a record of the committee's acts and proceedings. Any member of the committee may resign by giving notice of his resignation in writing to the depositary or to the secretary, and the remaining members of the committee may settle any account or transaction with such retiring member and give a full release and discharge to him upon such resignation. Any such resignation shall be effective upon its receipt by the depositary or the secretary unless otherwise expressed. Any member or members of the committee may be removed at any time by a writing filed with the depositary or the secretary and signed by the registered owners, at the time of such filing, of a majority in interest of the depositors. Any vacancy or vacancies at any time existing in the membership of the committee may be filled by appointment in writing filed with the depositary or the secretary and signed by the registered owners, at the time of such filing, of a majority in interest of the depositors, or, until such appointment shall be so made by the depositors, by vote of a majority of the then members of the committee; any such interim appointment to a vacancy by the committee shall be automatically rescinded and vacated by a subsequent appointment made by the depositors in the manner aforesaid. The members of the committee for the time being notwithstanding any vacancy shall have and may exercise all of the powers and be entitled to all of the rights and privileges of the committee originally formed and shall constitute the committee hereunder.

Any member of the committee may authorize in writing or by cable or telegram any person who may but need not be another member of the committee to act or vote generally or in particular instances in his place and as his proxy or attorney. All powers of the committee may be exercised by a majority of its number for the time being, either at a meeting or in writing or by cable or telegram without a meeting. Any action taken by an agent of the committee, duly authorized thereto, shall be the action of the committee, and the certificate of the chairman or secretary, or any two members of the committee as to any action taken by the committee shall be conclusive as to all acts and things so certified to have been done.

Digitized by Google

The committee may from time to time make, alter, or rescind rules and regulations for the transaction of its business as to the committee may seem advisable.

8. The committee may appoint such counsel, attorneys, agents, and employees as it shall see fit, upon such terms as the committee shall fix, and may discharge the same, and their reasonable fees, charges, and expenses shall be part of the committee's expenses. The committee's expenses shall also include all disbursements, expenses, liabilities, and obligations made or incurred by the committee.

The members of the committee shall be entitled to receive compensation for their services hereunder, to be computed as follows:

The compensation for all members of the committee shall for any period of 12 consecutive calendar months be an amount equal to 4 percent of the gross amount received and disbursed by the committee during said period; provided, however that the aggregate amount of the compensation of all members of the committee for the period from the date of this agreement to April 30, 1934, or for any one period of 12 consecutive calendar months thereafter shall not exceed the sum of $10,000. Such compensation shall be divided between the several members of the committee as shall be agreed upon by the members of the committee entitled to be compensated out of the same; provided, however, that the committee shall not receive any compensation unless the purchase agreement be executed and delivered.

The committee's expenses (compensation of the committee not being included within the term "expenses") voluntarily by the committee incurred shall not, unless the purchase agreement shall be executed and delivered, exceed the aggregate sum of $15,000 unless the incurring of expenses in excess of said sum shall previously have been authorized by the registered owners at the time of such authorization of a majority in interest of the certificates of deposit. The committee shall be paid its compensation as above provided from and out of, and only from and out of, sums received by the committee under the purchase agreement. The committee shall be reimbursed for all its disbursements, expenses, or liabilities made or incurred, within the limitation if any fixed in this agreement, from and out of any and all sums received by the committee from whatsoever source. As security for its compensation and reimbursement as aforesaid, the committee shall have a lien upon the deposited securities, upon any and all properties and assets at any time held hereunder and the proceeds thereof, and upon the purchase agreement and all proceeds and revenues thereof and shall be under no duty or obligation to make any payment or distribution to the depositors unless and until its compensation then owing shall have been paid and provision satisfactory to the committee shall have been made for the making of such reimbursement.

9. The committee is fully authorized and empowered to construe this agreement and the purchase agreement, and its construction hereof and thereof and its action hereunder and thereunder in good faith shall be final and conclusive. It is the intent of the parties hereto that this agreement shall be liberally construed so as to afford the committee freedom of action in effecting the purposes of this agreement. The committee may supply any defect or omission or reconcile any inconsistency herein or in the purchase agreement. The committee may amend this agreement or the purchase agreement in such manner and to such extent as it shall be authorized to do by the registered owners, at the time of such authorization, of a majority in interest of the then outstanding certificates of deposit and any such amendment made pursuant to such authorization shall be binding upon all holders of certificates of deposit.

The terms "agreement" or "purchase agreement" whenever used herein shall include, respectively, any and all changes, modifications and additions made in or to this agreement or the purchase agreement as anywhere authorized in this agreement.

10. Nothing contained in this agreement or in the purchase agreement shall be construed as a representation or warranty or as a condition or inducement to the participation herein by any depositor. No member of the committee shall be personally liable for any act or omission of another member or for any act or omission of any agent, attorney, or employee selected in good faith, or for any error of judgment or mistake of law, or for any action taken in good faith in the belief that any document or paper or any signature is genuine, or what it purports to be, or for anything under or in connection with this agreement or the purchase agreement other than for his own wilfull malfeasance; and any loss or liability of the committee other than such as may be caused by bad faith shall be conclusively deemed to be part of the expenses of the committee. Any action or failure or refusal to act of the committee based upon the advice of its counsel shall be conclusively deemed to have been in good faith.

Digitized by Google

Neither the committee nor the depositary assumes any obligation to distribute any securities or properties or money unless and until and only to the extent that the same shall have been delivered to the committee or such depositary, as the case may be, for such purpose, and then only in accordance with the provisions of this agreement. Neither the committee nor the depositary assumes any responsibility as to the genuineness, validity, or legality of any of the deposited capital stock or voting trust certificates or the endorsements thereon or assignments or transfers thereof or as to the validity or sufficiency of any corporate proceedings or acts of the corporation or the new corporation, or as to the validity or sufficiency of any securities or certificates of the new corporation or as to the validity or legality of the purchase agreement or any provision thereof, or otherwise.

11. The depositary shall be and be deemed to be the agent of the committee solely and subject only to its directions and instructions. The depositary shall be entitled to such compensation for its services as shall be fixed by the committee and to reimbursement for any and all expenses and disbursements incurred by it hereunder, all of which compensation, expenses, and disbursements shall be deemed expenses of the Committee. All directions and instructions given by the committee to the depositary or powers conferred upon it by the committee or acts done by the depositary hereunder shall be binding upon the depositors. The depositary may accept without proof all statements filed with it by the committee and may act thereon, and shall be fully protected in any and all action or failure or refusal to act in pursuance of the instructions of the committee. The depositary may advise with its own counsel or with counsel for the committee and shall be fully protected in any action taken or omitted in accordance with the advice of such counsel.

The depositary may at any time resign or be removed by the committee. Any such removal shall become effective by the delivery to such depositary of a written certificate of removal signed by a majority of the committee. The resignation of the depositary shall become effective by notice of the desire of such depositary to resign given to the secretary of the committee or to any two members thereof or to the depositors, at least 15 days before said resignation is to become effective, unless the committee shall waive such notice and accept a shorter notice. Any successor by merger, consolidation, or otherwise to the depositary hereunder shall be the depositary hereunder without any further act or appointment. A successor depositary, in the event of the resignation or removal of the depositary, may be appointed by the committee; provided, however, that any successor depositary so appointed shall be a trust company or bank having trust powers, having its principal office and doing business within the State of New Jersey. Any successor depositary shall be vested with all the powers, rights, duties, and obligations of the depositary originally appointed.

Any depositary which shall resign or be removed shall, as directed by the committee, deliver to the new depositary all property held by it hereunder and such new depositary shall receive the property so delivered and shall hold the same under the terms hereof and shall have the same rights, powers, and duties as if such new depositary were the depositary named herein and had issued any and all certificates of deposit theretofore issued hereunder.

12. Any member of the committee, its attorneys, agents, and employees, and any firm or corporation of which he or they may be a member or officer, or members or officers, and the depositary, its officers or agents, may become a depositor hereunder and a party hereto and shall be entitled to all the rights and benefits accruing hereunder the same as any other depositor.

13. The committee may, whenever it deems it desirable, give or cause the depositary to give notice to the depositors with respect to any matter under or affecting this agreement or the purchase agreement. Any notice to depositors shall be sufficiently given if mailed postage prepaid, addressed to holders of record of certificates of deposit at their respective addresses, as the same appear on the records of the committee.

14. Nothing in this agreement shall be deemed, construed, or held to confer any right or benefit upon any person, firm, or corporation not a party hereto.

15. The committee undertakes to use its best endeavors to carry out the purposes of this agreement, but it is expressly agreed that the committee shall be held to no responsibility or obligation in performing the same or for failing so to do or for the result of any steps taken or acts done hereunder or under the purchase agreement.

This agreement may be executed in any number of counterparts with the same effect as if all parties executing said counterparts had executed the same instrument, and all counterparts hereof, though separately signed, shall be taken together as constituting one instrument. This agreement shall inure to the benefit of and be binding upon the parties hereto, the personal representatives, successors, and assigns of the respective depositors and upon the committee as at any time constituted.

In witness whereof, the members of the committee have hereunto affixed their signatures as of the day and year first above written and the depositors have become parties hereto in the manner herein provided.

THEODORE S. KENYON,
CHARLES H. MARSHALL,
WALTER MILLER,
Committee.

Depositor	Address	Shares of—	
		Capital stock	Voting trust certificates

SCHEDULE A

TO THEODORE S. KENYON, CHARLES H. MARSHALL, AND WALTER MILLER, AND THEIR SUCCESSORS, AS THE COMMITTEE CONSTITUTED BY THE DEPOSIT AGREEMENT HEREINAFTER MENTIONED:

The undersigned stockholder and/or holder of voting trust certificates for stock of the Gray Processes Corporation (hereinafter called the "corporation") having deposited or agreed to deposit all stock certificates and/or voting trust certificates for stock of the corporation now or hereafter owned by or registered in the name of the undersigned under and pursuant to the provisions of a certain agreement (hereinafter called the "deposit agreement") dated_____, 1933, between the committee above-named and such stockholders and/or holders of voting trust certificates for stock of the corporation as have or may become parties thereto in the manner therein provided, does hereby assent to and agree to be bound by all the terms and provisions of the deposit agreement.

And the undersigned hereby constitutes and appoints you and each of you the true and lawful attorneys or attorney, agents or agent, of the undersigned for and in the name, place, and stead of the undersigned:

A. Unless and until the stock of the corporation now or hereafter owned by or registered in the name of the undersigned shall be delivered to a purchaser or purchasers thereof as provided in the deposit agreement or in any agreement for the sale thereof made by the committee as authorized by the deposit agreement, to vote upon or consent with respect to said stock at any and all meetings of the stockholders of the corporation called or appointed to be held at any time or times prior to January 1, 1938, for any purpose or purposes whatsoever, and at any and all adjournments of such meeting or meetings, according to the number of votes the undersigned would be entitled to cast as fully as the undersigned might or could do if then personally present; and/or, subject to the terms and provisions of the deposit agreement, from time to time to substitute (with full power of revocation) one or more persons (who, during any period when said stock shallbe held in escrow for delivery to a purchaser or purchasers thereof, may be a nominee or nominees of any such purchaser or purchasers; provided, that such purchaser or purchasers be not then in default with respect to the purchase of said stock) with like full power.

B. To exercise all and from time to time any of the powers, authorities, and discretions conferred upon the committee by the deposit agreement.

C. To sign the deposit agreement in the name and on behalf of the undersigned.

D. To assign and transfer any and all stock of the corporation represented by stock certificates and/or voting trust certificates now or hereafter registered in the name of the undersigned and at any time subject to the deposit agreement, and for that purpose to make, execute, and deliver all such endorsements or other in-

Digitized by Google

struments of assignment and transfer as the committee under the deposit agreement shall determine to be necessary or appropriate in furtherance of the purposes of the deposit agreement.

E. To do and perform all and every such further acts and things on behalf of the undersigned as may be necessary or, in the opinion of the committee under the deposit agreement, desirable in order to carry out the provisions of the deposit agreement and of the purchase agreement contemplated thereby, and to consummate the transaction provided for in such purchase agreement, and to effect the general purposes of the deposit agreement and of such purchase agreement.

And the undersigned does hereby ratify and confirm all that you or any of you, or your substitute or substitutes or the substitute or substitutes of any of you (full power of substitution and revocation, subject to the terms and provisions of the deposit agreement, being given to each of you) shall do or cause to be done by virtue hereof, and hereby agrees that this instrument shall be binding upon the personal representatives and/or successors in interest of the undersigned.

In witness whereof, the undersigned has signed and sealed these presents.

Dated----------

In the presence of—

EXHIBIT I. PURCHASE AND CROSS LICENSE AGREEMENT

Agreement dated the _____ day of _____, 1933.

I. PARTIES

1. Charles H. Marshall, Walter Miller, and Theodore S. Kenyon as the Gray Processes Corporation Committee constituted under a certain deposit agreement dated as of April 27, 1933, and the respective successors of said persons in such capacity (hereinafter called the committee).

2. The Gray Processes Corporation, a corporation of the State of Delaware, having its principal office at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

3. The Texas Co., a Delaware corporation and The Texas Corporation, a Delaware corporation, each having a place of business at 135 East Forty-second Street, New York, N. Y., and their respective subsidiaries (hereinafter referred to collectively as Texas).

4. Standard Oil Co., a corporation of the State of Indiana, having a place of business at 910 South Michigan Avenue, Chicago, Ill., and its subsidiaries (hereinafter referred to collectively as Indiana).

5. Standard Oil Development Co., a corporation of the State of Delaware, having a place of business at Linden, N. J. (hereinafter referred to as Development).

6. The Pure Oil Co., a corporation of the State of Ohio, having a place of business at 35 East Wacker Drive, Chicago, Ill., and its subsidiaries (hereinafter referred to collectively as Pure).

II. RECITALS AND WARRANTIES

7. Gray has been active in the commercial development of a process for treating and purifying hydrocarbon distillate oils including cracked naphthas which comprises passing such oils while in substantially vapor phase through a bed of solid catalytic material such as fuller's earth, ordinarily known as the Gray process, and Gray and the committee warrant that Gray is the owner of the entire title and interest in and to certain patents, patent applications, and inventions, and of licensing rights under certain other patents, patent applications, and inventions, covering clay treating as herein defined, all as listed in exhibit A attached hereto and made a part hereof and that Gray has granted licenses to oil refiners under said patents, patent applications, and inventions in the United States and in countries foreign thereto, in accordance with the license agreements, and only the license agreements, listed in exhibit B attached hereto and made a part hereof and not otherwise.

8. Texas warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions, as listed in exhibit C attached hereto and made a part hereof, all covering clay treating as herein defined.

Digitized by Google

9. Indiana warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions, as listed in exhibit D attached hereto and made a part hereof, all covering clay treating as herein defined.

10. Development warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions, as listed in exhibit E attached hereto and made a part hereof, all covering clay treating as herein defined.

11. Pure warrants that it owns transferable licensing rights under certain patents, patent applications, and inventions, as listed in exhibit F attached hereto and made a part hereof, all covering clay treating as herein defined.

12. Texas, Indiana, Development, and Pure desire to obtain licenses under all of the aforesaid patents, patent applications, and inventions.

13. The parties hereto believe that operations, under their present patent rights concerning clay treating by any of the individual parties hereto or by their licensees may constitute infringement of patent rights owned or controlled by some one of the other parties, and that it will be advantageous to the members of the petroleum refining industry, including the present licensees of Gray, to be able to acquire, without increase or duplication of royalties, a single license under all the aforesaid patents, patent applications, and inventions whereby clay treating operations may be carried on under any of said patent rights.

14. Gray and the committee represent that the entire issued and outstanding capital stock of Gray consists of one hundred thousand (100,000) shares without par value, all of which shares have been issued as fully paid and nonassessable, and the committee represents that there has been deposited with it under the deposit agreement all of said one hundred thousand (100,000) shares of capital stock of Gray, or voting trust certificates therefor, with authority to the committee to vote the same in favor of all necessary action on the part of Gray to effectuate the covenants on its part to be performed under this agreement, and also with power to terminate the voting trust, and to sell and dispose of all of said one hundred thousand (100,000) shares of stock, free and clear of any claims, liens, or encumbrances thereon, upon the terms and conditions hereinafter stated.

In consideration of the recitals and warranties hereinbefore set forth, and the mutual covenants hereinafter set forth, each party hereto covenants and agrees with each other party hereto as follows:

III. DEFINITIONS

15. (*a*) As used in this agreement, the term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays, and the like.

(*b*) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

16. The term "subsidiaries" shall mean all corporations of which the parent company owns directly or indirectly more than 50 percent of the stock having the right to vote for directors. For the purposes of this definition the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned directly or indirectly by any of its subsidiaries as defined above.

17. (*a*) The term "closing date" shall mean and refer to the date fixed by this agreement or otherwise agreed upon by all of the parties hereto for the purpose of making the several payments, assignments, grants, and deliveries hereinafter covenanted to be made on the closing date.

(*b*) The terms "present stockholders of Gray" and "the present owners" of the capital stock of Gray shall mean and refer to the persons having the entire beneficial ownership of all of the one hundred thousand (100,000) shares of capital stock of Gray immediately preceding the execution of this agreement by the committee.

Digitized by Google

IV. COVENANTS OF THE PARTIES

18. The committee, on behalf of the present owners of the 100,000 shares of issued and outstanding capital stock of Gray, hereby agrees to sell to Texas, Indiana, Development, and Pure, respectively, and Texas, Indiana, Development, and Pure each agrees to purchase, 25,000 shares of said capital stock upon the terms and conditions hereinafter provided. The committee agrees that in the event said sale shall be consummated, the voting trust under which certain of said shares are deposited shall be terminated and all of said 100,000 shares shall be represented by stock certificates in deliverable form.

19. (*a*) Texas, Indiana, Development, and Pure hereby severally and respectively agree to deliver to Gray on the closing date instruments in the form annexed hereto marked Exhibits G, H, I, and J, granting to Gray the irrevocable right to grant licenses for clay treating under their respective patent rights.

(*b*) Texas, Indiana, Development, and Pure, respectively, agree, subject, however, to the provisions of subparagraph (*h*) of paragraph 22 hereof, to pay to Gray the gross royalties derived from licenses which they may, after the date of this agreement, grant under their respective patent rights and the net recoveries from infringers thereof: *Provided, however*, That Texas, Indiana, Development, and Pure shall not be obligated to account to Gray in respect of any license granted by any of them under its patent rights, in exchange for a cross license for its own operations [or, in the case of Development, for the operations of any of the subsidiaries of Standard Oil Co. (New Jersey)], where such license is granted in settlement of a Patent Office interference or patent infringement suit involving clay treating and where such license is confined to the operations of the licensee.

20. (*a*) The committee and Gray covenant and agree that prior to the closing date no additional stock or securities convertible into stock shall be issued or agreed to be issued, or options for stock granted or agreed to be granted, by Gray, and no dividends or distributions of any kind shall be paid or distributed or agreed to be distributed by Gray, in any manner or form, except as hereinafter expressly provided with respect to the reserved assets. There shall be reserved for the benefit of the present stockholders of Gray the following-described assets of Gray, hereinafter referred to as "reserved assets", which shall be segregated and disposed of by sale, distribution, or otherwise prior to the closing date, in such manner as the committee shall determine:

(1) All cash on hand and in bank including, but without limitation thereto, call loans, together with interest accrued thereon to the closing date;

(2) All stocks, bonds, and other securities held in the treasury of Gray, except securities of any character representing the ownership of rights in or to inventions and letters patent or rights therein or thereunder;

(3) All payments due or to become due for royalties actually accrued in respect of operations of licensees of Gray up to the closing date, and all bills, notes, and accounts receivable and evidences of indebtedness in any form payable to Gray in respect of transactions, other than licensing, actually completed up to the closing date; and

(4) The specific assets of Gray listed in exhibit K annexed hereto and made a part hereof, whether or not such assets fall within any of the general classifications defined in the foregoing clauses (1), (2), and (3) of subparagraph (*a*) of this paragraph 20;

and the committee will, or prior to the closing date, cause to be transferred to the committee, or as it may direct, such reserved assets, after payment therefrom of all ascertained liabilities of Gray, in the manner and with the exceptions provided in subparagraph (*b*) of paragraph 21 hereof.

(*b*) Texas, Indiana, Development, and Pure assume no liability or obligation for the collection of reserved assets other than to cause Gray to account for the same to the committee from time to time upon the collection or other realization thereof. The committee shall have, and is hereby given, full power in the name of Gray or otherwise, but at the expense of the committee, to take such action as may be necessary or appropriate for the collection of such reserved assets and/or for the settlement or compromise of any claims therefor and to commence and to control any suits or other proceedings which may be necessary or appropriate for the purpose; provided, however, that no action shall be taken or settlement made by the committee of any such claim, suit, or proceeding which may affect the continuing rights after the closing date of Gray or of Texas, Indiana, Development, and Pure, under contract or otherwise, without the written consent of Texas, Indiana, Development, and Pure.

Digitized by Google

21. (*a*) Gray and the committee represent that the balance sheet of Gray attached hereto marked "Exhibit P" and made a part hereof is a true, full, and correct balance sheet of Gray as of the close of business on January 31, 1933, and that said balance sheet discloses all liabilities, whether actual or contingent, of Gray on said date known to Gray or to the committee, except such liabilities as are excluded under items (4) and (5) of subparagraph (*b*) of this paragraph 21. Gray and the committee have furnished to Texas, Indiana, Development, and Pure, prior to the execution of this agreement, copies of, or have permitted them to examine, all license agreements and other contracts, leases, or obligations of every kind and character to which Gray was a party on January 31, 1933, and have permitted Texas, Indiana, Development, and Pure to make an aduit of the books and record of Gray relating to the conduct of its business. Said audit is embodied in the report entitled "Audit and Survey of Gray Processes Corporation—January 31, 1933" and the document referred to therein entitled "Brief of License Agreements and Operating Data of the Licensees of Gray Processes Corporation", originals whereof have been identified by the signatures of all of the parties to this agreement, and Gray and the committee represent that said report refers to all license agreements, contracts, leases, and obligations of every kind and character to which Gray was a party on January 31, 1933. Texas, Indiana, Development, and Pure agree that they have knowledge of all facts disclosed by said report of audit and of all of the provisions of all license agreements and other contracts, leases, or obligations of Gray referred to therein.

(*b*) The committee, on behalf of the present stockholders of Gray, covenants and agrees that all liabilities of Gray disclosed on said balance sheet or by said audit and investigation shall be paid and discharged, or a reserve fund established therefor, on or before the closing date either from the reserved assets or from the moneys to be received by the committee on the closing date, pursuant to paragraph 26 hereof; and further covenants and agrees that Gray, Texas, Indiana, Development, and Pure may set off any amounts payable to the committee after the closing date by Gray, Texas, Indiana, Development, and Pure pursuant to any of the provisions of this agreement or under the licenses granted by Gray to Texas, Indiana, Development, and Pure, respectively, pursuant to this agreement, against any and all liabilities of Gray existing on the closing date whether or not then disclosed or ascertained, when and if said liabilities are established to the satisfaction of the committee or by judgment. If any such claim of set-off is approved by the committee in writing, or, if not so approved, is sustained by arbitration or by final decision of a court of competent jurisdition, the obligation against which such set-off is asserted shall be deemed to have been satisfied in the amount so allowed on such set-off, with the same effect as if paid in cash by the party asserting such set-off. If the liabilities of Gray on the closing date shall amount to more than the sum of One Million Dollars ($1,000,000.00) Texas, Indiana, Development, and Pure shall have the right to terminate this agreement. The term "liabilities" as used in this subparagraphn (*b*) of this paragraph 21 shall, however, be construed to exclude (1) capital-stock liabilities; (2) any liability heretofore disclosed to Texas, Indiana, Development, and Pure, in respect of uncompleted licensing transactions entered into by Gray in the ordinary course of business; (3) any liability in respect of other contracts entered into in the ordinary course of business and heretofore disclosed to Texas, Indiana, Development, and Pure, except employment contracts and the liabilities described in exhibit Q annexed hereto; (4) any liability accuring in respect of or arising out of acts or defaults of Gray occurring subsequent to the closing date; and (5) any liability arising out of infringement or contributory infringement of patents. within the definition of patent rights, owned by others than the parties hereto,

(c) The committee will deliver to Texas, Indiana, Development, and Pure, on the closing date, the resignations in writing of all officers and directors of Gray, effective upon acceptance, and provide for the termination, as of the closing date, of all existing contracts of employment running beyond the closing date, and the committee, on behalf of the present stockholders of Gray, agrees to exonerate, indemnify, and save harmless Gray and Texas, Indiana, Development, and Pure from any and all claims and demands of, or liability to, all such persons excepting only for the salaries and compensation due to such persons for services rendered pursuant to an employment entered into after the closing date.

(d) The Committee and Gray also covenant and agree that Gray shall not, prior to the closing date, enter into any contracts or license agreements, or incur any obligations other than in the ordinary course of business, except with the consent of Texas, Indiana, Development, and Pure.

Digitized by Google

22. The committee agrees that, on the closing date, it will deposit with Fidelity Union Trust Co., of Newark, N. J., or some other depositary approved by Texas, Indiana, Development, and Pure (hereinafter referred to as the "depositary"), stock certificates, duly endorsed in blank for transfer or accompanied by valid instruments for the transfer thereof in blank, representing all of the 100,000 shares of outstanding capital stock of Gray, free and clear of any claims, liens, or encumbrances thereon, such stock to be held by the depositary pursuant to the provisions of an escrow agreement, to be approved by the parties hereto on or before the closing date, providing in substance as follows:

(*a*) Such deposited stock certificates (herein referred to as the "deposited shares") shall be held by the depositary for the purpose of delivery to Texas, Indiana, Development, and Pure in the respective amounts of 25,000 shares each in case the sale is consummated as herein provided, or for return to the Committee in the event hereinafter in subparagraph (*g*) of this paragraph 22 specifically provided;

(*b*) So long as the deposited shares remain on deposit the same shall not be assigned or transferred nor subjected to any pledge, mortgage, or other lien by any of the parties hereto;

(*c*) So long as the deposited shares remain on deposit they shall be voted by Texas, Indiana, Development, and Pure in the amounts of 25,000 shares each unless and until said parties, or any of them, shall fail to make any payment required by this agreement, when due or within a grace period of 60 days thereafter, and in the event of any such default either by Texas, Indiana, Development, or Pure, or by Gray, and the continuance thereof beyond the grace period, the committee shall have the right to vote the shares of the party in default, or in case of default by Gray, all of the deposited shares, until in each case such default shall have been made good; and it is the intention of the parties hereto to provide in the bylaws of Gray for proportional representation of Texas, Indiana, Development, and Pure, respectively, on the board of directors of Gray, and Texas, Indiana, Development, and Pure each agrees that in case it shall be in default hereunder and such default shall continue throughout the grace period of 60 days the director or directors representing the defaulting party shall immediately resign as such, and Texas, Indiana, Development, and Pure agree to cause any such vacancy or vacancies to be filled immediately by the election of a director or directors nominated by the committee; *provided, however*, That such shares shall always be voted in such manner as not to conflict with any of the provisions of this agreement;

(*d*) So long as the deposited shares remain on deposit they shall be voted for the election, as one member of the board of directors of Gray, of a person designated by the committee;

(*e*) So long as the deposited shares remain on deposit Gray shall not sell, assign, or otherwise dispose of or encumber any of its patent rights, or other patent property, except by the granting of licenses thereunder as here contemplated, unless such sale or other disposition shall be assented to in writing by all the parties hereto;

(*f*) Upon the completion of the payments aggregating $500,000 to be made to the committee on the closing date pursuant to paragraph 26 hereof, and the completion of the payment to the committee of sums aggregating the additional sum of $500,000 pursuant to the provisions of subparagraph (*d*) of paragraph 27 hereof (including as payments all set-offs claimed and allowed against such payments pursuant to sub-pargaraph (*b*) of paragraph 21 hereof, in respect whereof there shall have been filed with the depositary proof satisfactory to it as to such allowance), the depositary shall deliver to Texas, Indiana, Development, and Pure, respectively, stock certificates representing 25,000 shares each of the capital stock of Gray, and upon such delivery of stock certificates to Texas, Indiana, Development, and Pure respectively indefeasible title to the shares of stock represented thereby shall forthwith vest in Texas, Indiana, Development, and Pure, respectively, or in their nominee or nominees;

(*g*) In the event that the aggregate sum of all payments to the committee made by Gray under subparagraph (*d*) of paragraph 27 hereof (including as payments all set-offs claimed and allowed against such payments pursuant to subparagraph (*b*) of paragraph 21 hereof, in respect whereof there shall have been filed with the depositary proof satisfactory to it as to such allowance), within a period of 3 years from the closing date, shall amount to less than $500,000, the depositary shall give written notice to the Committee and to Gray, Texas, Indiana, Development, and Pure as to the amount of such deficiency, and Texas, Indiana, Development, and Pure ahall have the right, at any time within

Digitized by Google

60 days after receipt of such written notice, to pay to the committee in New York funds (each contributing one-quarter of such amount) the amount of such deficiency, the sum then so paid to be credited against the $500,000 required to be paid by Gray to the committee under subparagraph (*d*) of paragraph 27 hereof, and if Texas, Indiana, Development, and Pure shall fail, within said 60-day period after receipt of such notice, to make such payment to the committee, then the depositary under the escrow agreement shall be and hereby is authorized, upon the sixty-first day after the delivery of such notice to it and upon the filing with it by the committee of proof satisfactory to the depositary that such payment has not been made to the committee within said period, to redeliver to the committee all of the deposited shares, and upon such delivery all further obligation of the respective parties hereto under this agreement, except that arising under subparagraph (*h*) of this paragraph 22 hereof, shall cease and determine (without prejudice, however, to the right of any party hereto to demand, collect, sue for, and receive from any other party or parties hereto any sum or sums of money theretofore due and payable to such party by such other party or parties); provided, however, that the committee may retain all payments theretofore made to it hereunder, and that Texas, Indiana, Development (and Standard Oil Co. (New Jersey) and subsidiaries), and Pure may retain the licenses and releases granted to them respectively hereunder, and that Gray may retain the grants of licensing rights to be made to it on the closing date by Texas, Indiana, Development, and Pure; and in the event that there should be any dispute as to the portion of said sum of $500,000 remaining unpaid at the termination of the period of 3 years from the closing date, under said subparagraph (*d*) of paragraph 27 hereof (including as payments all set-offs claimed and allowed against such payments pursuant to subpar. (*b*) of par. 21 hereof, in respect whereof there shall have been filed with the depositary proof satisfactory to it as to such allowance), said 60-day period shall be extended for a sufficient time to permit the determination of the amount so remaining unpaid, by an independent audit by accountants agreed upon by the parties hereto;

(*h*) In the event that the deposited stock is returned by the depositary to the committee in accordance with subparagraph (*g*) of this paragraph 22, then Texas, Indiana, Development, and Pure respectively agree to account for and pay over to Gray, after the date of such election, the gross royalties derived from licenses which they may, after the date of this agreement, grant under their respective patent rights, provided that for the purpose of this subparagraph patent rights shall not include patent rights based upon inventions conceived subsequent to January 1, 1938;

(*i*) So long as the deposited shares remain on deposit Gray shall confine its activities to the general type and character of licensing business now conducted by it, and during said period Gray shall not assign or transfer, or subject to any pledge, mortgage or other lien, any of its capital assets, or engage in any unusual business transaction, except with the consent in writing of the committee and of Texas, Indiana, Development, and Pure.

23. Texas, Indiana, Development, and Pure, respectively, irrevocably release and discharge Gray, and Gray irrevocably releases and discharges Texas, Indiana, Development, Standard Oil Co. (New Jersey) and its subsidiaries, and Pure respectively, of and from any and all claims for infringement of the patent rights owned by them respectively on account of acts of infringement occurring prior to the closing date.

24. The parties hereto agree that Gray shall diligently prosecute the licensing of its patent rights to the refining industry in the United States and foreign countries and Texas, Indiana, Development, and Pure, respectively, agree to assist Gray in developing and improving clay treating, and extending the licensed use thereof in the United States and in foreign countries.

25. Gray shall keep proper books of account and shall enter therein full and complete particulars of all receipts and disbursements of every kind. On or before the last day of January, April, July, and October in each year, after the closing date, Gray shall deliver to the committee, and to Texas, Indiana, Development, and Pure, respectively, a written statement showing the total amount of all receipts for the preceding quarterly periods ending on the last days of December, March, June, and September, respectively, last preceding, and the total amounts received on account of each of the following categories, naming the persons, firms, or corporations making the payments included therein and the amounts received from each:

Digitized by Google

(*a*) Royalties and/or license fees received on account of present installed treating capacity of present licensees of Gray, as listed in exhibit B;

(*b*) Royalties and/or license fees received from present licensees of Gray on account of capcaity in excess of their present installed capacity as shown by exhibit B;

(*c*) Royalties and/or license fees received from others than present licensees of Gray;

(*d*) Amounts paid by Texas, Indiana, Development, and Pure pursuant to paragraph 19 hereof;

(*e*) Amounts recovered from infringers of patent rights, or any of them, and all other amounts actually received by Gray arising out of its business from and after the closing date.

The amounts reported shall be in each case the gross amounts received, without any deduction whatsoever. Such quarterly statements shall be verified by the affidavit of the president, vice president, secretary, or treasurer of Gray. Each of the parties hereto or their respective attorneys or accountants thereunto duly authorized in writing shall have the right at all reasonable business hours to inspect and take extracts from the books of account of Gray, its license contracts and other contracts, the data and records relating to its income, the data relating to the operations of its licensees, and the payments and/or other benefits received by it.

26. Texas, Indiana, Development, and Pure respectively agree to pay to the committee on the closing date the sum of $125,000 each, in New York funds.

27. Texas, Indiana, Development and Pure severally agree that Gray shall, and Gray hereby agrees that it will, pay to the committee, at the time of rendering the quarterly reports provided for in paragraph 25 hereof, amounts equal to the following percentages of the amounts actually collected by Gray in each calendar quarterly period, as reported in the quarterly statements hereinbefore provided for, to wit:

(*a*) Fifty percent (50%) of the amounts reported under subparagraph (*a*) of paragraph 25;

(*b*) Twenty percent (20%) of the amounts reported under subparagraphs (*b*), (*c*), and (*d*) respectively of paragraph 25;

(*c*) Twenty percent (20%) of the amounts reported under subparagraph (*e*) of paragraph 25, after deducting therefrom all costs of collection;

(*d*) In addition to the payments provided for in subparagraphs (*a*), (*b*), and (*c*) of this paragraph 27, amounts representing the total estimated net income of Gray for each quarterly period, remaining after making said payments pursuant to subparagraphs (*a*), (*b*), and (*c*) and after paying or making due allowance for the current operating expenses (including taxes but excluding depreciation and obsolescence) of Gray for said quarterly period, subject to an annual adjustment when the books of Gray are closed and its net income determined for tax purposes; provided that on such annual adjustment, for the purpose of computing the net income of Gray for the calendar year, there shall not be deducted as operating expenses (which for this purpose shall be deemed to exclude taxes) an amount in excess of 30 percent of the gross income of Gray during such calendar year from all sources; and further provided that the amounts payable under this subparagraph (*d*) shall be payable only until Gray shall have paid the committee pursuant to the provisions of this subparagraph (*d*) the aggregate sum of $500,000;

(*e*) Texas, Indiana, Development, and Pure further agree that if the royalty rates payable by Gray's licensees (other than Texas, Indiana, Development, and Pure) under the terms of their respective license agreements (except royalty rates prescribed by license agreements in effect on the closing date) shall in any case be less than the scale set forth in paragraph 28 hereof, Gray shall be obligated, and Gray hereby agrees, to pay to the committee, in addition to the above specified percentages of royalties and license fees actually collected from its licensees in any quarterly period prior to July 1, 1940, additional amounts equal to the difference between the amounts collected and the percentages above specified of a theoretical royalty computed upon the scale set forth in paragraph 28 hereof, and in addition to the above specified percentages of royalties and license fees actually collected from its licensees in any quarterly period from July 1, 1940, to July 1, 1947, additional amounts equal to the difference between the amounts collected and the percentages above specified of a theoretical royalty computed upon two-thirds of the scale set forth in paragraph 28 hereof; provided, however, that Gray shall not be obligated to make any payments under this subparagraph (*e*) on account of royalties or license fees in respect of which the particular licensee is in default;

Digitized by Google

(*f*) The payments specified in subparagraphs (*a*), (*b*), and (*c*) of this paragraph 27 shall continue so long as Gray is in receipt of any amount specified in said subparagraphs (*a*), (*b*), and (*c*), respectively, of this paragraph 27.

28. The scale to be used for the purpose of computing the quarterly payments, if any, to be made by Gray to the committee pursuant to the provisions of subparagraph (*e*) of paragraph 27 hereof is as follows:

(*a*) Paid-up royalty rates based on daily average throughput separately computed for each licensee upon the basis of the total number of barrels (of 42 U. S. gallons) of material treated under license by the licensee during a period of not exceeding one calendar quarter divided by the number of days in such period as follows:

For the first 5,000 barrels daily average throughput, at the rate of $43 per barrel;

For the next 1,000 barrels daily average throughput, i. e., 5,001–6,000 barrels daily average throughput total, at the rate of $35 per barrel;

For the next 3,000 barrels daily average throughput, i. e., 6,001–9,000 barrels daily average throughput total, at the rate of $28.33 per barrel;

For the next 3,000 barrels daily average throughput, i. e., 9,001–12,000 barrels daily average throughput total, at the rate of $21.66 per barrel;

For the next 3,000 barrels daily average throughput, i. e., 12,001–15,000 barrels daily average throughput total, at the rate of $15 per barrel;

For all over 15,000 barrels daily average throughput, at the rate of $10 per barrel.

(*b*) Throughput royalty rates, applicable in all cases where paid-up royalty rates in subparagraph (*a*) of this paragraph 28 are not applicable, four cents (4c) per barrel (of 42 U. S. gallons) of material treated under license by the licensee; except that for the purposes of such computation, (1) for operations in Canada the rate shall be three cents (3c) per barrel (of 42 U. S. gallons) of material treated under license by the licensee; and (2) for licensees of Gray who have paid royalties totaling $56,000 for a paid-up license, the rate shall be three cents (3c) per barrel (of 42 U. S. gallons) of material treated under license by the licensee;

provided that Gray shall have the right to exempt from royalty payment by licensees, the content, if any, in the material treated, of naphthas not made by cracking or subjected to cracking temperatures.

29. It is agreed that Gray shall not grant any licenses containing a right or privilege to grant sublicenses except with the written consent of the committee and of Texas, Indiana, Development, and Pure, respectively, provided, however, that this is not intended to prohibit the inclusion in any license of a right to the licensee to grant sublicenses to any of its subsidiaries as hereinbefore defined upon the assumption by such licensee of the obligation to pay, or cause to be paid, to Gray, all royalties or license fees accruing on account of the operations of such subsidiaries.

30. The parties hereto agree that upon the closing date Gray shall grant to Texas, Indiana, Development, and Pure, respectively, and Texas, Indiana, Development, and Pure, respectively shall accept, nontransferable licenses in the forms respectively annexed hereto marked "exhibits L, M, N, and O."

31. Texas, Indiana, Development, and Pure each agrees from time to time to lend to Gray on usual commercial terms one quarter of such sums as may reasonably be required by Gray for working capital so as to permit Gray to make the payments provided for in paragraph 27 hereof. Interest accruing on the amounts so loaned shall constitute a deduction in determining the net income of Gray for the purposes of subparagraph (*d*) of paragraph 27 hereof.

32. Texas, Indiana, and Pure, respectively, agree to use their best efforts to secure compliance with the terms of this agreement by all of their respective present and future subsidiaries. Subsidiaries that do so comply shall be bound by all the provisions of this agreement and shall be entitled to receive the licenses granted hereunder, and releases for all operations for a period of 90 days prior to the date of compliance (in addition to the releases received pursuant to par. 23 of this agreement). If, notwithstanding such efforts, any such subsidiary shall refuse or fail to comply with the terms of this agreement, said noncomplying subsidiary shall be deemed to have renounced the benefits of this agreement (except the release received pursuant to par. 23 of this agreement) and the parent company of such noncomplying subsidiary shall be deemed to have guaranteed the other parties to this agreement against and to have agreed to hold the other parties to this agreement harmless from any loss or liability occurring by reason of such noncompliance by any such noncomplying subsidiary, provided,

Digitized by Google

however, that any party shall be entitled to offset against any such loss or liability any recovery by the other parties hereto against its non-complying subsidiary for infringement of their respective patent rights; and provided further that if any future subsidiary of Texas, Indiana, or Pure shall have, at the time it becomes a subsidiary, prior obligations which prevent it from complying with the terms of this agreement, it shall be deemed to be a stranger to this agreement, and the parent company of such future subsidiary shall be ipso factor released from its obligation to hold the other parties hereto harmless from resultant loss and liability.

33. Development agrees to use its best efforts to secure compliance with the terms of this agreement by all of the present and future subsidiaries of Development and of Standard Oil Co. (New Jersey). Those that do so comply shall be bound by all the provisions of this agreement and shall be entitled to receive the licenses granted hereunder, and releases for all operations for a period of 90 days prior to the date of compliance (in addition to the release received pursuant to par. 23 of this agreement). If notwithstanding such efforts any such subsidiary shall refuse or fail to comply with the terms of this agreement, said noncomplying subsidiary shall be deemed to have renounced the benefits of this agreement (except the release received pursuant to par. 23 of this agreement) and Development guarantees the other parties to this agreement against and agrees to hold the other parties to this agreement harmless from any loss or liability occurring by reason of such noncompliance by any noncomplying subsidiary of Development or of Standard Oil Co. (New Jersey), provided, however, that Development shall be entitled to offset against any such liability any recovery by the other parties to this agreement against such noncomplying subsidiary for infringement of their respective patent rights; and provided further, that if any future subsidiary of Development or of Standard Oil Co. (New Jersey) shall have at the time it becomes a subsidiary prior obligations which prevent it from complying with the terms of this agreement, it shall be deemed to be a stranger to this agreement, and Development shall be ipso facto released from its obligation to hold the other parties to this agreement harmless from resultant loss or liability.

34. The parties hereto agree that if Gray or Texas, Indiana, Development, or Pure shall fail to make any payment to the committee required by this agreement, Texas, Indiana, Development, or Pure, or any one or more of them, shall have the right to make such payment to the committee and thereupon become subrogated to the claim of the committee against the defaulting party for the amount of the defaulted payment.

35. It is expressly understood and agreed that all acts, payments, and deliveries in this agreement provided to be consummated on the closing date shall be consummated simultaneously and no party shall be under any obligation to perform any of such acts or make any of such payments or deliveries except upon the simultaneous performance by all of the other parties hereto of the acts, payments, and deliveries by them then to be performed and made. The closing date shall be June 30, 1933, or such other date as may be agreed upon in writing by all the parties hereto. The actual closing shall take place at 12 o'clock noon on the closing date at the office of the depositary, in the city of Newark, N. J. Any party hereto failing to perform, on the closing date, the acts on its part to be performed shall be deemed to have breached this agreement and to be liable to all of the other parties hereto respectively for the actual damages caused to such other parties by said breach. Each party hereby expressly waives any damages for loss of anticipated profits.

36. This agreement shall benefit and be binding upon the respective parties hereto and their respective successors and assigns; provided, however, that no party hereto may, by any such assignment, be relieved of its obligations hereunder except with the express consent in writing of all of the other parties hereto. Texas, Indiana, Development, and Pure, and Gray agree that the committee may assign its interest in this agreement, and in the licenses granted by Gray to Texas, Indiana, Development, and Pure pursuant hereto, to the new corporation, association, or trust provided for in the deposit agreement above mentioned, but only upon the assumption by such new corporation, association, or trust of all obligations or liabilities and undertakings of the committee hereunder to the extent that the same remain unperformed and thereupon the committee shall be released and discharged of and from all obligations, liabilities, and undertakings so assumed. Any such assignment by the committee shall vest in such new corporation, association, or trust all of the privileges, powers, and rights conferred on the committee under this agreement as fully as though it and not the committee were the original party hereto.

Digitized by Google

37. The making, execution, and delivery of this agreement by the parties hereto have been induced by no representations, statements, warranties, or agreements other than those herein expressed. This agreement embodies the entire understanding of the parties and there are no further or other agreements or understandings, written or oral, in effect between the parties, relating to the subject matter hereof. This agreement may be amended or modified but only by an instrument of equal formality signed by the duly authorized officers of the respective parties and by the committee.

38. The addresses of the parties hereto and of the depositary for all purposes specified in this agreement shall be as follows: The Gray Processes Corporation Committee, care of Fidelity Union Trust Co., Newark, N. J.; The Gray Processes Corporation, 961 Frelinghuysen Avenue, Newark, N. J.; The Texas Co. and The Texas Corporation, 135 East Forty-second Street, New York, N. Y.; Standard Oil Co. (Indiana), 910 South Michigan Avenue, Chicago, Ill.; Standard Oil Development Co., Linden, N. J.; The Pure Oil Co., 35 East Wacker Drive, Chicago, Ill.; Fidelity Union Trust Co., depositary, 755 Broad Street, Newark, N. J.

All payments provided for in this agreement shall be made, and all notices provided for herein shall be directed to, the respective parties, at the above addresses, provided, however, that any party shall have the right to change such address by notice in writing directed to each of the other parties. All deliveries of capital stock of Gray provided for in this agreement shall be made at the above office of the depositary.

39. The committee, as such, has become a party to this agreement, as agent and representative of the present stockholders of Gray by virtue of the power and authority conferred upon the committee by the deposit agreement; and no provision hereof shall have the effect or be construed to impose any individual obligation or liability whatsoever upon the several members of the committee.

40. This agreement shall be executed in several counterparts, each of which shall be an original, and all of which shall together consittute one and the same instrument.

In witness whereof the members of the committee have hereunto set their hands and seals as committee as aforesaid, and the corporate parties hereto have caused these presents to be duly executed and their corporate seals to be hereunto affixed, duly attested by their respective officers thereto duly authorized the day and year first above written.

IV. APPLICATIONS FOR FOREIGN PATENTS OWNED BY GRAY

Country	Serial No.	Filing date	Inventor
Germany	62290	Sept. 26, 1924	T. T. Gray.
Russia	41944	Mar. 2, 1929	Do.

Digitized by Google

Patents and patent applications owned by Gray and patents and patent applications under which Gray has the right to grant licenses—Continued

V. UNITED STATES PATENTS AND APPLICATIONS FOR UNITED STATES PATENTS UNDER WHICH GRAY HAS LICENSING RIGHTS PURSUANT TO GRANT FROM CROSS DEVELOPMENT CORPORATION, WALTER CROSS AND ROY CROSS, DATED AS OF DEC. 9, 1926; RECORDED U. S. PATENT OFFICE, JULY 3, 1930, IN LIBER T 144, P. 231, OF TRANSFERS OF PATENTS

Patent No.	Granted	Inventor
1515733	Nov. 18, 1924	R. Cross.
1587491	June 1, 1926	Do.
1782808	Nov. 25, 1930	Do.
1816827	Aug. 4, 1931	Do.
1836577	Dec. 15, 1931	Do.
1840158	Jan. 5, 1932	Do.
1882000	Oct. 11, 1932	Do.

Application, Serial No.	Filed	Inventor
673370	Nov. 7, 1923	R. Cross.

Abandoned Scofield letter May 18, 1927.

VI. APPLICATION FOR UNITED STATES PATENT UNDER WHICH GRAY HAS LICENSING RIGHTS PURSUANT TO GRANT FROM CROSS DEVELOPMENT CORPORATION DATED JUNE 4, 1930, AND RECORDED IN U. S. PATENT OFFICE, JULY 3, 1930, IN LIBER T 144, P. 231, OF TRANSFERS OF PATENTS

Serial No.	Filed	Inventor
28640	May 7, 1925	Guy N. Harcourt.

VII. BRITISH PATENT UNDER WHICH GRAY HAS LICENSING RIGHTS PURSUANT TO GRANT FROM THE CROSS DEVELOPMENT CORPORATION, WALTER CROSS AND ROY CROSS, DATED AS OF DEC. 9, 1926, AND RECORDED IN THE U. S. PATENT OFFICE, JULY 3, 1930, IN LIBER T 144, P. 231, OF TRANSFERS OF PATENTS

Patent No.	Date	Inventor
227084	Dec. 31, 1925	R. Cross.

Corresponds to United States Patent No. 1515733.

VIII. UNITED STATES PATENTS UNDER WHICH GRAY HAS LICENSING RIGHTS PURSUANT TO LICENSE AGREEMENT WITH SINCLAIR REFINING CO., DATED JAN. 13, 1928

Patent No.	Granted	Inventor	License dated	License recorded
1735988	Nov. 19, 1929	F. A. Apgar	Feb. 5, 1931	Not recorded.
1736022	do	T. DeC. Tifft et al	do	Do.
1795124	Mar. 3, 1931	E. C. Herthel	Apr. 20, 1931	Do.
1797255	Mar. 24, 1931	F. A. Apgar	July 30, 1931	P 149, p. 219; Aug. 7, 1931.
1797262	do	E. C. Herthel	Apr. 20, 1931	Not recorded.
1812426	June 30, 1931	F. A. Apgar	July 23, 1931	N 149, p. 357; Aug. 1, 1931.
1812446	do	Wm. Mendius	do	Do.

IX. UNITED STATES PATENT UNDER WHICH GRAY HAS LICENSING RIGHTS PURSUANT TO AGREEMENT WITH THE ATLANTIC REFINING CO., DATED SEPT. 17, 1929. (SEE PAR. (5) OF THAT AGREEMENT)

Patent No.	Granted	Inventor
1752455	Apr. 1, 1930	A. G. Peterkin.

X. APPLICATION FOR UNITED STATES PATENT UNDER WHICH GRAY HAS LICENSING RIGHTS PURSUANT TO AGREEMENT, DATED JUNE 30, 1930, BETWEEN GRAY AND FILTROL CO. OF CALIFORNIA

Serial No.	Filed	Inventor
188119	May 2, 1927	W. S. Baylis.

EXHIBIT B

Licensees of Gray

Licensee	Date of license	Present installed capacity
Alamo Refining Co., Amarillo, Tex. (now a subsidiary of Phillips Petroleum Co., and capacity included with that of Phillips, see below).	June 22, 1926	
American Refining Properties, Wichita, Falls, Tex	Feb. 13, 1930	900 bbls./d.
Atlantic Refining Co., Philadelphia, Pa	Sept. 17, 1929	
See supplemental agreements and licenses reserved in assignments of Atlantic patents to Gray.	Sept. 24, 1929 Feb. 11, 1930 Oct. 30, 1930 Sept. 29, 1931 Oct. 31, 1932	5,000 bbls./d.
License under Nisson and Mandelbaum application 160361 (Patent 1836183 of Dec. 15, 1931).	Sept. 8, 1931	None.
Barnsdall Refining Co. of Delaware, Barnsdall, Okla	Feb. 18, 1925	1,500 bbls./d.
Barnsdall Refineries, Inc., Okmulgee, Okla	Apr. 17, 1926	1,950 bbls./d.
Beckett Co., Inc., Tulsa, Okla	July 31, 1928	200 bbls./d.
The Argentine Government (through Bethlehem Steel Co.)	do	14 towers; 104 tons clay capacity.
La Campagnie Belge du Gaz Catalytique, Lte., Brussels, Belgium.	July 17, 1925	25 bbls./d.
Bolene Refining Co. (Eason Oil Co.), Enid, Okla	June 13, 1927	850 bbls./d,
Compania Ferrocarrilera de Petroleo, S. A. Buenos Aires, Argentina.	Nov. 17, 1926	600 bbls./d.
Do	Mar. 5, 1928	Do.
Continental Oil Co. (See Marland Refining Co. below.)		
Deep Rock Oil Corporation, Tulsa, Okla. (See Shaffer Oil & Refining Co. agreement dated Jan. 17, 1929.)	July 20, 1932	2,900 bbls./d.
Ellas Refining Corporation, Wichita Falls, Tex	Apr. 24, 1930	450 bbls./d.
Emlenton-Refining Co., Emlenton, Pa. (See Quaker State agreement accepting benefits and obligations, Jan. 22, 1932.)	Dec. 8, 1930	700 bbls./d.
Fairfax Gasoline Co., Kansas City, Kans	Apr. 1, 1929	800 bbls./d.
Filtrol Co., of California, 650 South Spring Street, Los Angeles, Calif., see agreement dated.	June 30, 1930	
Frontenac Oil Refineries, Ltd., Montreal, P. Q. (See McColl-Frontenac Oil Co., Ltd., agreement dated Sept. 3, 1930.)	Nov. 16, 1928	
Galicyjskie Towarzystwo Naftowe "Galicja" Spolka Akcyjna, Drohobycz, Poland.	Oct. 17, 1930	Free license. No installation.
Golden Rule Refining Co., a copartnership consisting of Elbert S. Rule and Minnie Kemp, Wichita, Kans.	May 14, 1928	400 bbls./d.
Iowa Park Producing & Refining Co., Iowa Park, Tex	Feb. 3, 1930	700 bbls./d.
The Kanotex Refining Co., Arkansas City, Kans	Mar. 29, 1926	1,700 bbls./d.
Kendall Refining Co., Bradford, Pa	July 14, 1931	2,200 bbls./d.
The Lubrite Refining Co., St. Louis, Mo	Feb. 6, 1925	
See Vacuum Oil Co. agreement	May 1, 1932	
Magnolia Petroleum Co., Dallas, Tex	Oct. 16, 1930	1,700 bbls./d.
Marland Refining Co.:		
Ponca City, Okla	Dec. 21, 1925	
Supplemental agreement	do	
See Continental Oil Co. agreement	Jan. 20, 1930	8,400 bbls./d.
McColl Bros., Ltd., Toronto, Canada	Apr. 27, 1925	2,250 bbls./d.
McColl-Frontenac Oil Co., Ltd., Montreal, P. Q. (see below).	Mar. 18, 1929	
McColl-Frontenac Oil Co., Ltd., Montreal, P. Q. (This capacity includes that contracted for under Frontenac Oil Refineries, Ltd., agreement dated Nov. 16, 1928 and McColl-Frontenac Oil Co., Ltd., agreement dated Mar. 18, 1929.)	Sept. 3, 1930	2,200 bbls./d.
Motor Fuel Products Co., Laredo, Tex	Mar. 14, 1928	400 bbls./d.
Ohio Valley Refining Co., St. Marys, W. Va	Dec. 22, 1930	850 bbls./d.
Orient Petroleum Co. of Illinois (Federal Reserve Bank Bldg., Kansas City, Mo.), also Elgin, Ill., and Wichita Falls, Tex.	June 30, 1930	400 bbls./d.
Panhandle Refining Co., Wichita Falls, Tex	June 4, 1929	950 bbls./d.

Licensees of Gray—Continued

Licensee	Date of license	Present installed capacity
Compagnie Financiere Belge des Petroles, Brussels, Belgium	Jan. 12, 1931	100 bbls./d.
Phillips Petroleum Co., Bartlesville, Okla. (Includes Alamo Refining Co.)	Feb. 24, 1930	11,450 bbls./d.
Public Utilities Gas Co., c/o Stevens & Wood, 120 Broadway, New York, N. Y., also 95 Duffield Ave., Jersey City, N. J.	Nov. 12, 1927	Experimental.
The Pure Oil Co., 35 East Wacker Drive, Chicago, Ill. See letters Gray to Pure dated.	May 22, 1930 July 18, 1932 May 22, 1930	4,148 bbls./d.
Quaker State Oil Refining Corporation, Oil City, Pa.	Jan. 22, 1932	
See Emlenton agreement dated	Dec. 8, 1930	
Residuum Reclamation Corporation, 1 East 42d St., New York, N. Y.	Dec. 14, 1928	
See Tri-State Refining Co. agreement below	July 1, 1932	
Shaffer Oil & Refining Co., Tulsa, Okla. (now, by change of name, Deep Rock Oil Corporation, see agreement of July 20, 1932, above).	Jan. 17, 1929	
Shell Oil Co. of Canada, Toronto, Canada	Oct. 19, 1932	2,000 bbls./d.
Sinclair Refining Co., 45 Nassau St., New York, N. Y.	Jan. 13, 1928	1,666 bbls./d.
Snow Cap Oil Co., Sunburst, Mont.	Mar. 5, 1929	150 bbls./d.
Standard Oil Co. of Cuba, 26 Broadway, New York, N. Y.	Sept. 14, 1928	Experimental.
Standard Oil Co. of New York, 26 Broadway, New York, N. Y.	Apr. 29, 1926	2,950 bbls./d.
Steaua Romana, Bucharest, Rumania	May 1, 1929	2,350 bbls./d.
Supplemental agreement	June 7, 1932 July 1, 1932	
Sun Oil Co., Philadelphia, Pa	Nov. 14, 1925	Limited to use at Marcus Hook, Toledo, Yale, etc.
Modified by agreement of	Dec. 15, 1927	
Texas Pacific Coal & Oil Co., Fort Worth, Tex.	Sept. 7, 1926	750 bbls./d.
Tri-State Refining Co., Ashland, Ky.	July 1, 1932	550 bbls./d.
United Refining Co., Warren, Pa.	May 1, 1931	Do.
Vacuum Oil Co., 61 Broadway, New York, N. Y.	July 30, 1926	
Supplemental agreement	Oct. 11, 1929	
Supplemental agreement bringing in Lubrite and White Star.	May 1, 1932	5,950 bbls./d.
Vapor Phase Oils, Inc., 107 Liberty St., New York, N. Y.	June 29, 1932	50 bbls./d.
Waverly Oil Works Co., Pittsburgh, Pa.	Apr. 15, 1927	1,850 bbls./d.
White Oak Gasoline Co., Tulsa, Okla.	Feb. 20, 1929	650 bbls./d.
White Star Refining Co. (of West Virginia), Detroit, Mich., Wood River Refinery.	July 15, 1925	
Supplemental agreement	Oct. 18, 1929	See Vacuum Oil Co. agreement of May 1, 1932.
White Star Refining Co. (of Delaware), Detroit, Mich., Trenton Refinery.	July 1, 1929

EXHIBIT G

License agreement dated the —— day of —— 1933.

I. PARTIES

1. The Texas Co., a Delaware corporation, and the Texas Corporation, a Delaware corporation, each having a place of business at 135 East Forty-second Street, New York, N. Y., and their respective subdidiaries (hereinafter referred to collectively as Texas).

2. The Gray Processes Corporation, a corporation of the State of Delaware, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

II. RECITALS

3. Gray, Texas, Standard Oil Co., an Indiana corporation; Standard Oil Development Co., a Delaware corporation; the Pure Oil Co., an Ohio corporation; and the Gray Processes Corporation Committee have entered into a certain purchase and cross-license agreement, dated ——, 1933, and Gray and the committee have performed all of the obligations to Texas by them to be performed on the closing date pursuant to the provisions of said purchase and cross-license agreement.

4. Texas is the owner of and entitled to grant licenses for clay treating under certain patent rights (as herein defined) and has agreed to grant to Gray licensing rights under all of its said patent rights.

5. In consideration of the premises and of the covenants and grants made by Gray to Texas pursuant to the purchase and cross-license agreement, and the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually covenant and agree as follows:

Digitized by Google

III. DEFINITIONS

6. Whenever used in this agreement, the following terms shall have the following meanings, respectively:

(a) The term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid, contact catalysts, such as fuller's earth, decolorizing clays, and the like.

(b) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating, and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence, of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

(c) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

IV. COVENANTS

7. Texas grants to Gray an irrevocable nonexclusive, nontransferable right to grant nonexclusive licenses, releases for past infringement and/or immunity from suit, for clay treating under the patent rights of Texas, upon terms to be fixed by Gray and without any obligation on the part of Gray to account to Texas for the consideration received for any such grants; provided, however, that such licenses, releases and/or immunity shall be conditioned upon and the acceptance thereof shall itself operate as a grant by the releasee or licensee to Texas of full immunity from suit for clay treating under its patent rights. Gray agrees to grant no license, release, or immunity from suit under the patent rights of Texas to one who has previously recovered under its patent rights against Texas, without the consent of Texas. Texas shall consent to such grant if and when it is made whole for such prior recovery.

8. Gray shall have the right, in any license granted by it for clay treating under the patent rights of Texas, to authorize the licensee to grant sublicenses to its subsidiaries, but only upon the express condition that the licensee shall be obligated to pay or cause to be paid to Gray all royalties or license fees becoming due on account of the operations of such subsidiaries. Except as provided in the case of subsidiaries, no license granted by Gray under the patent rights of Texas shall authorize the licensee to grant sublicenses thereunder unless Texas shall expressly consent thereto in writing.

9. Texas agrees that it will, when requested in writing by Gray and satisfactorily indemnified against all expenses of the litigation, bring suits for infringement of the patent rights of Texas. Such litigation shall be directed and controlled by Gray and the entire expense thereof shall be borne by Gray and the recoveries, if any, shall be paid to Gray.

10. Texas agrees promptly to disclose to Gray all information available to it in respect of clay treating which will be useful or convenient in connection with the licensing business of Gray, and further agrees to use its best efforts to induce its respective officers, agents, and employees to assign to it any inventions, in respect of which letters patent issued thereon would come within its patent rights, heretofore or hereafter made by such officers, agents, and/or employees. If in any case, Texas shall not desire to apply for or continue to apply for letters patent in the United States or in foreign countries upon any such invention, it shall, if requested in writing by Gray and satisfactorily indemnified against the expense thereof, apply for and prosecute applications for letters patent on such invention in such country or countries as shall be designated by Gray.

11. The rights hereby granted shall not be assigned by Gray except in their entirety and then only with the written consent of Texas.

12. The making, execution, and delivery of this agreement by Texas have been induced by no representations, statements, warranties, or agreements other than those expressed or mentioned herein.

EXHIBIT H

License agreement dated the day of ——, 1933.

I. PARTIES

1. Standard Oil Co., a corporation of the State of Indiana, having a place of business at 910 South Michigan Avenue, Chicago, Ill., and its subsidiaries (hereinafter referred to collectively as Indiana).

2. The Gray Processes Corporation, a corporation of the State of Delaware, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

II. RECITALS

3. Gray, Indiana, the Texas Co., a Delaware corporation, and the Texas Corporation, a Delaware corporation, Standard Oil Development Co., a Delaware corporation, the Pure Oil Co., an Ohio corporation, and the Gray Processes Corporation committee have entered into a certain purchase and cross license agreement, dated ——, 1933, and Gray and the committee have performed all of the obligations to Indiana by them to be performed on the closing dated pursuant to the provisions of said purchase and cross-license agreement.

4. Indiana is the owner of and entitled to grant licenses for clay treating under certain patent rights (as herein defined) and has agreed to grant to Gray licensing rights under all of its said patent rights.

5. In consideration of the premises and of the covenants and grants made by Gray to Indiana pursuant to the purchase and cross-license agreement, and the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually covenant and agree as follows:

III. DEFINITIONS

6. Whenever used in this agreement, the following terms shall have the following meanings, respectively:

(a) The term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays, and the like.

(b) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

(c) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having

Digitized by Google

the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

IV. COVENANTS

7. Indiana grants to Gray an irrevocable, nonexclusive, nontransferable right to grant nonexclusive licenses, releases for past infringement and/or immunity from suit, for clay treating under the patent rights of Indiana, upon terms to be fixed by Gray and without any obligation on the part of Gray to account to Indiana for the consideration received for any such grants; provided, however, that such licenses, releases, and/or immunity shall be conditioned upon and the acceptance thereof shall itself operate as a grant by the releasee or licensee to Indiana of full immunity from suit for clay treating under its patent rights. Gray agrees to grant no license, release, or immunity from suit under the patent rights of Indiana to one who has previously recovered under its patent rights against Indiana, without the consent of Indiana. Indiana shall consent to such grant if and when it is made whole for such prior recovery.

8. Gray shall have the right, in any license granted by it for clay treating under the patent rights of Indiana, to authorize the licensee to grant sublicenses to its subsidiaries, but only upon the express condition that the licensee shall be obligated to pay or cause to be paid to Gray all royalties or license fees becoming due on account of the operations of such subsidiaries. Except as provided in the case of subsidiaries, no license granted by Gray under the patent rights of Indiana shall authorize the licensee to grant sublicenses thereunder unless Indiana shall expressly consent thereto in writing.

9. Indiana agrees that it will, when requested in writing by Gray and satisfactorily indemnified against all expenses of the litigation, bring suits for infringement of the patent rights of Indiana. Such litigation shall be directed and controlled by Gray and the entire expense thereof shall be borne by Gray and the recoveries, if any, shall be paid to Gray.

10. Indiana agrees promptly to disclose to Gray all information available to it in respect of clay treating which will be useful or convenient in connection with the licensing business of Gray, and further agrees to use its best efforts to induce its respective officers, agents, and employees to assign to it any inventions, in respect of which letters patent issued thereon would come within its patent rights, heretofore or hereafter made by such officers, agents, and/or employees. If in any case Indiana shall not desire to apply for or continue to apply for letters patent in the United States or in foreign countries upon any such invention, it shall, if requested in writing by Gray and satisfactorily indemnified against the expense thereof, apply for and prosecute applications for letters patent on such invention in such country or countries as shall be designated by Gray.

11. The rights hereby granted shall not be assigned by Gray except in their entirety and then only with the written consent of Indiana.

12. The making, execution, and delivery of this agreement by Indiana have been induced by no representations, statements, warranties, or agreements other than those expressed or mentioned herein.

In witness whereof, the parties hereto have caused this instrument to be executed on the day and year first above written.

II. RECITALS

3. Gray, Development, Standard Oil Co., an Indiana corporation, the Texas Co., a Delaware corporation, and the Texas Corporation, a Delaware corporation, the Pure Oil Co., an Ohio corporation, and the Gray Processes Corporation Committee have entered into a certain purchase and cross-license agreement, dated ——, 1933, and Gray and the committee have performed all of the obligations to Development by them to be performed on the closing date pursuant to the provisions of said purchase and cross-license agreement.

4. Development is the owner of and entitled to grant licenses for clay treating under certain patent rights (as herein defined) and has agreed to grant to Gray licensing rights under all of its said patent rights.

5. In consideration of the premises and of the covenants and grants made by Gray to Development pursuant to the purchase and cross-license agreement, and the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually covenant and agree as follows:

III. DEFINITIONS

6. Whenever used in this agreement, the following terms shall have the following meanings, respectively:

(a) The term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays and the like.

(b) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

(c) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

IV. COVENANTS

7. Development grants to Gray an irrevocable, nonexclusive, nontransferable right to grant nonexclusive licenses, releases for past infringement, and/or immunity from suit, for clay treating under the patent rights of Development, upon terms to be fixed by Gray and without any obligation on the part of Gray to account to Development for the consideration received for any such grants provided, however, that such licenses, releases, and/or immunity shall be conditioned upon and the acceptance thereof shall itself operate as a grant by the releasee or licensee to Development of full immunity from suit for clay treating under its patent rights. Gray agrees to grant no license, release, or immunity from suit under the patent rights of development to one who has previously recovered under its patent rights against Development or any of the subsidiaries of Standard Oil Co. (New Jersey), without the consent of Development. Development shall consent to such grant if and when it or any such subsidiary of Standard Oil Co. (New Jersey) is made whole for such prior recovery.

8. Gray shall have the right, in any license granted by it for clay treating under the patent rights of Development, to authorize the licensee to grant sublicenses to its subsidiaries, but only upon the express condition that the licensee shall be obligated to pay or cause to be paid to Gray all royalties or license fees becoming due on account of the operations of such subsidiaries. Except as provided in the case of subsidiaries, no license granted by Gray under the patent rights of Development shall authorize the licensee to grant sublicenses thereunder unless Development shall expressly consent thereto in writing.

9. Development agrees that it will, when requested in writing by Gray and satisfactorily indemnified against all expenses of the litigation, bring suits for infringement of the patent rights of Development. Such litigation shall be

directed and controlled by Gray and the entire expense thereof shall be borne by Gray and the recoveries, if any, shall be paid to Gray.

10. Development agrees promptly to disclose to Gray all information available to it in respect of clay treating which will be useful or convenient in connection with the licensing business of Gray, and further agrees to use its best efforts to induce its respective officers, agents, and employees to assign to it any inventions, in respect of which letters patent issued thereon would come within its patent rights, heretofore or hereafter made by such officers, agents, and/or employees. If in any case Development shall not desire to apply for or continue to apply for letters patent in the United States or in foreign countries upon any such invention, it shall, if requested in writing by Gray and satisfactorily indemnified against the expense thereof, apply for and prosecute applications for letters patent on such invention in such country or countries as shall be designated by Gray.

11. The rights hereby granted shall not be assigned by Gray except in their entirety and then only with the written consent of Development.

12. The making, execution, and delivery of this agreement by Development have been induced by no representations, statements, warranties, or agreements other than those expressed or mentioned herein.

In witness whereof, the parties hereto have caused this instrument to be executed on the day and year first above written.

License agreement dated the —— day of ——, 1933.

I. PARTIES

1. The Pure Oil Co., a corporation of the State of Ohio, having a place of business at 35 East Wacker Drive, Chicago, Ill., and its subsidiaries (hereinafter referred to collectively as Pure).

2. The Gray Processes Corporation, a corporation of the State of Delaware, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

II. RECITALS

3. Gray, Pure, the Texas Co., a Delaware corporation, and the Texas Corporation, a Delaware corporation, Standard Oil Co., an Indiana corporation, Standard Oil Development Co., a Delaware corporation, and the Gray Processes Corporation committee have entered into a certain purchase and cross-license agreement dated ——, 1933, and Gray and the committee have performed all of the obligations to Pure by them to be performed on the closing date pursuant to the provisions of said purchase and cross-license agreement.

4. Pure is the owner of and entitled to grant licenses for clay treating under certain patent rights (as herein defined) and has agreed to grant to Gray licensing rights under all of its said patent rights.

5. In consideration of the premises and of the covenants and grants made by Gray to Pure pursuant to the purchase and cross-license agreement, and the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually covenant and agree as follows:

III. DEFINITIONS

6. Whenever used in this agreement, the following terms shall have the following meanings, respectively:

(a) The term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays, and the like.

(b) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable

Digitized by Google

rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

(c) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

IV. COVENANTS

7. Pure grants to Gray an irrevocable, nonexclusive, nontransferable right to grant nonexclusive licenses, releases for past infringement and/or immunity from suit, for clay treating under the patent rights of Pure, upon terms to be fixed by Gray and without any obligation on the part of Gray to account to Pure for the consideration received for any such grants: *Provided, however*, That such licenses, releases, and/or immunity shall be conditioned upon and the acceptance thereof shall itself operate as a grant by the releasee or licensee to Pure of full immunity from suit for clay treating under its patent rights. Gray agrees to grant no license, release, or immunity from suit under the patent rights of Pure to one who has previously recovered under its patent rights against Pure, without the consent of Pure. Pure shall consent to such grant if and when it is made whole for such prior recovery.

8. Gray shall have the right, in any license granted by it for clay treating under the patent rights of Pure, to authorize the licensee to grant sublicenses to its subsidiaries, but only upon the express condition that the licensee shall be obligated to pay or cause to be paid to Gray all royalties or license fees becoming due on account of the operations of such subsidiaries. Except as provided in the cases of subsidiaries, no license granted by Gray under the patent rights of Pure shall authorize the licensee to grant sublicenses thereunder unless Pure shall expressly consent thereto in writing.

9. Pure agrees that it will, when requested in writing by Gray and satisfactorily indemnified against all expenses of the litigation, bring suits for infringement of the patent rights of Pure. Such litigation shall be directed and controlled by Gray and the entire expense thereof shall be borne by Gray and the recoveries, if any, shall be paid to Gray.

10. Pure agrees promptly to disclose to Gray all information available to it in respect of clay treating which will be useful or convenient in connection with the licensing business of Gray, and further agrees to use its best efforts to induce its respective officers, agents, and employees to assign to it any inventions, in respect of which letters patent issued thereon would come within its patent rights, heretofore or hereafter made by such officers, agents, and/or employees. If in any case Pure shall not desire to apply for or continue to apply for letters patent in the United States or in foreign countries upon any such invention, it shall, if requested in writing by Gray and satisfactorily indemnified against the expense thereof, apply for and prosecute applications for letters patent on such invention in such country or countries as shall be designated by Gray.

11. The rights hereby granted shall not be assigned by Gray except in their entirety and then only with the written consent of Pure.

12. The making, execution, and delivery of this agreement by Pure have been induced by no representations, statements, warranties, or agreements other than those expressed or mentioned herein.

In witness whereof, the parties hereto have caused this instrument to be executed on the day and year first above written.

EXHIBIT K

SPECIFIC ASSETS RESERVED FOR THE BENEFIT OF THE PRESENT STOCKHOLDERS OF GRAY REFERRED TO IN ITEM (4) OF SUBPARAGRAPH (A) OF PARAGRAPH 20

1. Account and/or notes receivable from Atlantic Refining Co. in the amount of $100,000 (or balance thereof unpaid on the closing date) due June 30, 1933.

2. Monthly royalty payments of $1,500 payable to Gray by Steaua Romana, up to and including monthly payment due September 1, 1933, on account of royalty for operation of 1,200 barrels daily average throughout.

3. Notes receivable from H. S. Bell, Inc., Petroleum Engineers, Woolworth Building, New York, N. Y., as follows:

Notes dated—	*Amount*
Aug. 19, 1931	$12,000
Oct. 2, 1931	3,000
Feb. 26, 1932	2,000
Apr. 29, 1932	1,500
June 29, 1932	1,500

4. All sums payable by Deep Rock Oil Corporation to Gray pursuant to paragrah (1) of letter agreement between Gray and Deep Rock dated July 20, 1932, in repayment of advances by Gray to Deep Rock pursuant to said agreement and unpaid on the closing date.

5. Account receivable from Beckett Co., Inc., in the amount of $300 on account of equipment installed (or balance thereof unpaid on the closing date).

6. All sums payable by Magnolia Petroleum Co. to Gray in repayment of advances made by Gray to Magnolia for the installation of Gray treating apparatus pursuant to the agreement dated October 16, 1930.

7. Portable storage building erected June 1932, on property of Gray Industrial Laboratories, Inc.

8. Nash automobile purchased July 1931.

9. Office furniture and equipment as follows: 1 blueprint cabinet, 8 filing cabinets, 4 transfer cases, 7 storage cabinets, 1 drawing table, 13 card cabinets, 2 chair pads, 1 telephone table, 2 typewriters, 2 desks, 1 chair, 2 safes, 1 sofa, 1 check writer, 1 duplicator, 1 electric clock, 1 lamp.

10. Laboratory equipment as follows: 1 tank and cover, 1 A. S. T. M. distillation apparatus, 1 C. F. R. unit and installation, 2 electric hot plates, 6 pressure-recording gauges (Foxboro), 1 1/50 horsepower motor with stirring equipment, 4 gas regulators; 1 steam boiler—3 horsepower (Kane), 6 oxygen bombs and installation, 2 blowers (ventilators), 1 electric stop watch, 4 tables, 1 sink, 1 fire extinguisher (carbon dioxide), 1 autoclave with stirrer, 1 constant-temperature bath and equipment.

EXHIBIT L

License agreement dated the _____ day of _____, 1933.

I. PARTIES

1. The Gray Processes Corporation, a corporation of the State of Delaware, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

2. The Texas Co., a Delaware corporation, and the Texas Corporation, a Delaware corporation, each having a place of business at 135 East Forty-second Street, New York, N. Y., and their respective subsidiaries (hereinafter referred to collectively as Texas).

3. The Gray Processes Corporation Committee, being the persons for the time acting as such under the purchase and cross-license agreement hereinafter mentioned (hereinafter called the Committee).

II. RECITALS

4. Gray, Texas, and the committee have entered into a certain purchase and cross-license agreement dated _____, with Standard Oil Co., an Indiana corporation (hereinfter called Indiana), Standard Oil Development Co., a Delaware corporation (hereinafter called Development) and the Pure Oil Co., an Ohio corporation (hereinafter called Pure), and Texas has made the grants and payments and has otherwise performed all of its obligations to Gray and to the committee by it to be made and performed on the closing date pursuant to the provisions of said purchase and cross-license agreement.

Digitized by Google

5. Gray is the owner of certain United States and foreign letters patent and applications for letters patent listed in exhibit A annexed to said purchase and cross-license agreement. Gray has agreed to grant the within license to Texas under its patent rights, as hereinafter defined, which include the patent rights acquired by it from Texas, Indiana, Development, and Pure pursuant to said purchase and cross-license agreement.

6. In consideration of the premises and of the covenants, grants, and payments made by Texas pursuant to the purchase and cross-license agreement, and in further consideration of the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually covenant and agree as follows:

III. DEFINITITIONS

7. Whenever used in this agreement, the following terms shall have the following meanings, respectively:

(*a*) The term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays and the like.

(*b*) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

(*c*) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

(*d*) The term "throughput" shall mean the number of barrels of hydrocarbon oil treated by Texas pursuant to the license hereby granted, collected in purified liquid form from the treating apparatus, excluding therefrom all straight-run naphtha (i. e., naphtha which has not been exposed to cracking temperatures) subjected to treatment while mixed with the hydrocarbon oil treated, and excluding further any oil which has previously been treated pursuant to the license hereby granted.

(*e*) The term "daily average throughput" shall mean the aggregate throughput during any accounting period of 6 calendar months divided by the total number of days in such accounting period. In the case of new installations which are placed in operation during an accounting period, the "daily average throughput" thereof shall be based upon the number of days remaining in such period after such operation commences.

(*f*) The term "barrel" shall mean 42 gallons at 60° F. and the term "gallon" shall mean 231 cubic inches.

IV. COVENANTS

8. Gray grants to Texas, upon the terms and conditions hereinafter stated, an irrevocable, nonexclusive license for clay treating under its patent rights.

9. (*a*) Texas agrees, as additional consideration for the license hereby granted, to pay the committee additional lump-sum royalties based on the daily average throughput of Texas, in accordance with the following schedule:

For the first 5,000 barrels daily average throughput, at the rate of $8.80 per barrel;

For the next 1,000 barrels daily average throughput, i. e., 5,001–6,000 barrels daily average throughput total, at the rate of $7 per barrel;

For the next 3,000 barrels daily average throughput, i. e., 6,001–9,000 barrels daily average throughput total, at the rate of $5.66 per barrel;

For the next 3,000 barrels daily average throughput, i. e., 9,001–12,000 barrels daily average throughput total, at the rate of $4.33 per barrel;

For the next 3,000 barrels daily average throughput, i.e., 12,001–15,000 barrels daily average throughput total, at the rate of $3 per barrel;

For all over 15,000 barrels daily average throughput, at the rate of $2 per barrel;

and in accordance with the following provisions:

Digitized by Google

(*b*) Texas agrees to pay the committee, upon the execution of this agreement the sum of $72,310, as payment in full of the additional lump sum royalty in respect of the first 10,000 barrels daily average throughput in accordance with the above schedule.

(*c*) Texas agrees to keep accurate and complete records and accounts of all operations under this license, and Gray and the committee and their agents, attorneys, or accountants thereunto duly authorized in writing shall have the right at reasonable business hours to inspect and take extracts from said records and accounts; and Texas agrees at its own expense to equip each of its treating installations operated under this license with means, to be approved by Gray in writing, for accurately measuring the number of barrels of hydrocarbon oil treated therein, and where deduction for straight-run naphtha content is claimed, to conduct and record adequate standard Engler distillation tests to determine the straight-run naphtha contained in the oil treated; and Texas further agrees to render to Gray and to the committee semiannual statements, certified by an officer of Texas, on or before the fifteenth days of February and August of each year, showing the operations of Texas hereunder for the 6 months' periods from July 1st to January 1st and from January 1st to July 1st next preceding such accounting dates, containing the following information:

(*aa*) The total amount of hydrocarbon oil treated during the accounting period pursuant to this license, specifying the amount of oil so treated, if any, at each refinery of the licensee;

(*bb*) The total amount of straight-run naphtha contained in the hydrocarbon oil reported under paragraph (*aa*);

(*cc*) The total throughput for the accounting period, being the amount reported under paragraph (*aa*) less the amount reported under paragraph (*bb*);

(*dd*) The daily average throughput for the accounting period;

(*ee*) The excess of the daily average throughput reported under paragraph (*dd*) over the daily average throughput in respect of which Texas has theretofore paid the additional lump sum royalties as provided in this paragraph 9.

(*d*) Texas agrees at the time of rendering each semi-annual statement t · pay the committee the additional lump sum royalty prescribed in the scale set forth in subparagraph (*c*) of this paragraph 9 in respect of the excess of the daily average throughput for the accounting period covered by such semiannual statement over the daily average throughput in respect of which Texas has theretofore paid the additional lump sum royalties as provided in this paragraph 9 (and in the case of the first semiannual statement rendered hereunder, in respect of the excess, if any, of the daily average throughput reported therein over 10,000 barrels).

(*e*) Texas agrees to notify Gray and the committee promptly in writing of the completion of each new treating installation installed by it for operation under this license and agrees that if the operation of such installation increases the daily average throughput of Texas for the accounting period in which such installation is completed, beyond the daily average throughput in respect of which Texas has theretofore paid the additional lump-sum royalties as provided in this paragraph 9, Texas will pay to the committee the additional lump-sum royalties in respect of such increase as in subparagraph (*d*) above provided, and with interest thereon to the date of payment at the rate of 6 percent from and after 30 days from the date when such additional installation is placed in commercial operation.

(*f*) All payments by Texas on account of additional lump-sum royalties shall be made to the committee in New York funds, free of exchange charges, and shall complete payment in full for the license granted hereby in respect of the number of barrels of daily average throughput in respect of which such payments are made.

10. In the event of the institution of any suit against Texas alleging that its employment of any apparatus or processes for clay treating covered by the patent rights licensed hereunder and approved in writing by Gray, and/or the manufacture and/or sale by Texas of any products produced thereby, infringes any letters patent, Gray agrees, if promptly advised in writing by Texas of the institution of any such suit, to undertake at Gray's expense the defense thereof, provided Texas shall furnish to Gray such information or testimony as may be reasonably needed by Gray in connection with such suit, but such expense shall be limited to all proper compensation and expenses of counsel and witnesses, and expenses necessarily incurred in procuring and furnishing information and testimony, including cost of expert advice and testimony.

11. Notices and payments provided for herein shall be sent to the following addresses: The Gray Processes Corporation, 961 Frelinghuysen Avenue, Newark, N. J.; The Texas Co., and The Texas Corporation, 135 East 42nd Street, New York, N. Y.; The Gray Processes Corporation Committee, c/o Fidelity Union Trust Co., Newark, N. J.

12. Texas agrees to use its best efforts to secure compliance with the terms of this license by all of its present and future subsidiaries. Those that do so comply shall be bound by all the provisions and entitled to all the rights granted under this license. If notwithstanding such efforts any such subsidiary shall refuse or fail to comply with the terms of this license, said noncomplying subsidiary shall be deemed to have renounced the benefits of this license and Texas guarantees Gray and the committee against and agrees to hold Gray and the committee harmless from any loss or liability occurring by reason of such noncompliance by any noncomplying subsidiary or Texas: *Provided however*, That Texas shall be entitled to offset against any such loss or liability any recovery by Gray or the committee against such noncomplying subsidiary for infringement of its patent rights: *And provided further*, That if any future subsidiary of Texas shall have, at the time it becomes a subsidiary, prior obligations which prevent it from complying with the terms of this license it shall be deemed to be a stranger to this license and Texas shall be *ipso facto* released from its obligation to hold Gray and the committee harmless from resultant loss or liability.

13. This agreement shall benefit and be binding upon the respective parties hereto and their respective successors and assigns: *Provided however*, That no party hereto may, by any such assignment, be relieved of its obligations hereunder except with the express consent in writing of the other parties hereto. It is agreed that this license, and all rights of Texas thereunder, may be assigned, without further payment, to the successors in ownership of the whole of the manufacturing business of Texas. Gray further agrees, in the event of the sale or other disposition by Texas of any installation in which the clay-treating operations licensed hereunder are conducted, to grant to the purchaser or other transferee of such installation a license in standard form upon payment by such purchaser or transferee to Gray of the standard royalties of Gray then applicable to new licenses granted by Gray in the ordinary course of business.

14. Texas shall have the right at any time after January 1, 1950, upon 3 months' written notice to Gray and the committee, to terminate its obligation for the payment of any further royalties of any kind or character pursuant to this agreement in respect of installations for the use of the process and apparatus licensed hereunder installed after such date of termination, but it is expressly understood and agreed that the service of such notice of termination shall not affect any rights theretofore acquired by Texas pursuant to this agreement and the purchase and cross-license agreement herein referred to.

15. The making, execution and delivery of this agreement by the parties hereto have been induced by no representations, statements, warranties or agreements other than those expressed or mentioned herein.

In witness whereof, the parties hereto have caused this instrument to be executed on the day and year first above written.

THE GRAY PROCESSES CORPORATION COMMITTEE,

---------- *(As the Committee and not individually)*,

---------- *Witness as to Charles H. Marshall.*

---------- *Witness as to Walter Miller.*

---------- *Witness as to Theodore S. Kenyon.*

EXHIBIT M

(License agreement dated the ------ day of ------, 1933)

I. PARTIES

1. The Gray Processes Corporation, a corporation of the State of Delaware, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

2. Standard Oil Co., a corporation of the State of Indiana, having a place of business at 910 South Michigan Avenue, Chicago. Ill., and its subsidiaries (hereinafter referred to collectively as Indiana).

3. The Gray Processes Corporation committee, being the persons for the time acting as such under the purchase and cross-license agreement hereinafter mentioned (hereinafter called the committee).

II. RECITALS

4. Gray, Indiana, and the committee have entered into a certain purchase and cross-license agreement dated ----------, with the Texas Co., a Delaware corporation, and the Texas Corporation, a Delaware corporation (hereinafter collectively called Texas), Standard Oil Development Co., a Delaware corporation (hereinafter called Development) and the Pure Oil Co., an Ohio corporation (hereinafter called Pure), and Indiana has made the grants and payments and has otherwise performed all of its obligations to Gray and to the committee by it to be made and performed on the closing date pursuant to the provisions of said purchase and cross-license agreement.

5. Gray is the owner of certain United States and foreign letters patent and applications for letters patent listed in exhibit A annexed to said purchase and cross-license agreement. Gray has agreed to grant the within license to Indiana under its patent rights, as hereinafter defined, which include the patent rights acquired by it from Texas, Indiana, Development, and Pure pursuant to said purchase and cross-license agreement.

6. In consideration of the premises and of the covenents, grants, and payments made by Indiana pursuant to the purchase and cross-license agreement, and in further consideration of the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually covenant and agree as follows:

III. DEFINITIONS

7. Whenever used in this agreement, the following terms shall have the following meanings respectively:

(*a*) The term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays, and the like.

(*b*) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

Digitized by Google

(*c*) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

(*d*) The term "throughput" shall mean the number of barrels of hydrocarbon oil treated by Indiana pursuant to the license hereby granted, collected in purified liquid form from the treating apparatus, excluding therefrom all straight-run naphtha (i. e., naphtha which has not been exposed to cracking temperatures) subjected to treatment while mixed with the hydrocarbon oil treated, and excluding further any oil which has previously been treated pursuant to the license hereby granted.

(*e*) The term "daily average throughput" shall mean the aggregate throughput during any accounting period of 6 calendar months divided by the total number of days in such accounting period. In the case of new installations which are placed in operation during an accounting period, the "daily average throughput" thereof shall be based upon the number of days remaining in such period after such operation commences.

(*f*) The term "barrel" shall mean 42 gallons at 60° F. and the term "gallon" shall mean 231 cubic inches.

IV. COVENANTS

8. Gray grants to Indiana, upon the terms and conditions hereinafter stated, an irrevocable, nonexclusive license for clay-treating under its patent rights.

9. (*a*) Indiana agrees, as additional consideration for the license hereby granted, to pay the committee additional lump-sum royalties based on the daily average throughput of Indiana, in accordance with the following schedule:

For the first 5,000 barrels daily average throughput, at the rate of $8.80 per barrel;

For the next 1,000 barrels daily average throughput, i. e., 5,001–6,000 barrels daily average throughput total, at the rate of $7 per barrel;

For the next 3,000 barrels daily average throughput, i. e. 6,001–9,000 barrels daily average throughput total, at the rate of $5.66 per barrel;

For the next 3,000 barrels daily average throughput, i. e. 9,001–12,000 barrels daily average throughput total, at the rate of $4.33 per barrel;

For the next 3,000 barrels daily average throughput, i. e. 12,000–15,000 barrels daily average throughput total, at the rate of $3 per barrel;

For all over 15,000 barrels daily average throughput, at the rate of $2 per barrel;

and in accordance with the following provisions:

(*b*) Indiana agrees to pay the committee, upon the execution of this agreement, the sum of $51,000, as payment in full of the additional lump-sum royalty in respect of the first 6,000 barrels daily average throughput in accordance with the above schedule.

(*c*) Indiana agrees to keep accurate and complete records and accounts of all operations under this license, and Gray and the committee and their agents, attorneys or accountants thereunto duly authorized in writing shall have the right, at reasonable business hours, to inspect and take extracts from said records and accounts; and Indiana agrees at its own expense to equip each of its treating installations operated under this license with means, to be approved by Gray in writing, for accurately measuring the number of barrels of hydrocarbon oil treated therein and, where deduction for straight-run naphtha content is claimed, to conduct and record adequate standard Engler distillation tests to determine the straight-run naphtha contained in the oil treated; and Indiana further agrees to render to Gray and to the committee semiannual statements, certified by an officer of Indiana, on or before the 15th days of February and August of each year, showing the operations of Indiana hereunder for the 6-month periods from July 1 to January 1 and from January 1 to July 1 next preceding such accounting dates, containing the following information:

(*aa*) The total amount of hydrocarbon oil treated during tne accounting period pursuant to this license, specifying the amount of oil so treated, if any, at each refinery of the licensee;

(*bb*) The total amount of straight-run naphtha contained in the hydrocarbon oil reported under paragraph (*aa*);

(*cc*) The total throughput for the accounting period, being the amount reported under paragraph (*aa*) less the amount reported under paragraph (*bb*);

(*dd*) The daily average throughput for the accounting period;

Digitized by Google

(*ee*) The excess of the daily average throughput reported under paragraph (*dd*) over the daily average throughput in respect of which Indiana has theretofore paid the additional lump-sum royalties as provided in this paragraph 9.

(*d*) Indiana agrees at the time of rendering each semiannual statement to pay the committee the additional lump-sum royalty prescribed in the scale set forth in subparagraph (*c*) of this paragraph 9 in respect of the excess of the daily average throughput for the accounting period covered by such semiannual statement over the daily average throughput in respect of which Indiana has theretofore paid the additional lump-sum royalties as provided in this paragraph 9 (and in the case of the first semiannual statement rendered hereunder, in respect of the excess, if any, of the daily average throughput reported therein over 6,000 barrels).

(*e*) Indiana agrees to notify Gray and the committee promptly in writing of the completion of each new treating installation installed by it for operation under this license and agrees that if the operation of such installation increases the daily average throughput of Indiana for the accounting period in which such installation is completed, beyond the daily average throughput in respect of which Indiana has theretofore paid the additional lump-sum royalties as provided in this paragraph 9, Indiana will pay to the committee the additional lump-sum royalties in respect of such increase as in subparagraph (*d*) above provided, and with interest thereon to the date of payment at the rate of 6 percent from and after 30 days from the date when such additional installation is placed in commercial operation.

(*f*) All payments by Indiana on account of additional lump-sum royalties shall be made to the committee in New York funds, free of exchange charges, and shall complete payment in full for the license granted hereby in respect of the number of barrels of daily average throughput in respect of which such payments are made.

10. In the event of the institution of any suit against Indiana alleging that its employment of any apparatus or processes for clay treating covered by the patent rights licensed hereunder and approved in writing by Gray, and/or the manufacture and/or sale by Indiana of any products produced thereby, infringes any letters patent, Gray agrees, if promptly advised in writing by Indiana of the institution of any such suit, to undertake at Gray's expense the defense thereof, provided Indiana shall furnish to Gray such information or testimony as may be reasonably needed by Gray in connection with such suit, but such expense shall be limited to all proper compensation and expenses of counsel and witnesses, and expenses necessarily incurred in procuring and furnishing information and testimony, including costs of expert advice and testimony.

11. Notices and payments provided for herein shall be sent to the following addresses: The Gray Processes Corporation, 961 Frelinghuysen Avenue, Newark, N. J.; Standard Oil Co. (Indiana), 910 South Michigan Avenue, Chicago, Ill.; The Gray Processes Corporation committee, c/o Fidelity Union Trust Co., Newark, N. J.

12. Indiana agrees to use its best efforts to secure compliance with the terms of this license by all of its present and future subsidiaries. Those that do so comply shall be bound by all the provisions and entitled to all the rights granted under this license. If notwithstanding such efforts any such subsidiary shall refuse or fail to comply with the terms of this license, said noncomplying subsidiary shall be deemed to have renounced the benefits of this license and Indiana guarantees Gray and the committee against and agrees to hold Gray and the committee harmless from any loss or liability occurring by reason of such noncompliance by any noncomplying subsidiary of Indiana, provided, however, that Indiana shall be entitled to offset against any such loss or liability any recovery by Gray or the committee against such noncomplying subsidiary for infringement of its patent rights; and provided further that if any future subsidiary of Indiana shall have, at the time it becomes a subsidiary, prior obligations which prevent it from complying with the terms of this license it shall be deemed to be a stranger to this license and Indiana shall be *ipso facto* released from its obligation to hold Gray and the committee harmless from resultant loss or liability.

13. This agreement shall benefit and be binding upon the respective parties hereto and their respective successors and assigns; provided, however, that no party hereto may, by any such assignment, be relieved of its obligations hereunder except with the express consent in writing of the other parties hereto. It is agreed that this license, and all rights of Indiana thereunder, may be assigned, without further payment, to the successors in ownership of the whole of the manufacturing business of Indiana. Gray further agrees, in the event of the sale or other disposition by Indiana of any installation in which the clay treating operations licensed hereunder are conducted, to grant to the purchaser or other

Digitized by Google

transferee of such installation, a license in standard form upon payment by such purchaser or transferee to Gray of the standard royalties of Gray then applicable to new licenses granted by Gray in the ordinary course of business.

14. Indiana shall have the right at any time after January 1, 1950, upon 3 months' written notice to Gray and the committee, to terminate its obligation for the payment of any further royalties of any kind or character pursuant to this agreement in respect of installations for the use of the process and apparatus licensed hereunder installed after such date of termination, but it is expressly understood and agreed that the service of such notice of termination shall not affect any rights theretofore acquired by Indiana pursuant to this agreement and the purchase and cross-license agreement herein referred to.

15. The making, execution, and delivery of this agreement by the parties hereto have been induced by no representations, statements, warranties, or agreements other than those expressed or mentioned herein.

In witness whereof, the parties hereto have caused this instrument to be executed on the day and year first above written.

EXHIBIT N

License agreement dated the _____ day of _____, 1933.

I. PARTIES

1. The Gray Processes Corporation, a corporation of the State of Delaware, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (hereinafter called Gray).

2. Standard Oil Development Co., a Delaware corporation, having a place of business at Linden, N. J. (hereinafter called Development).

3. The Gray Processes Corporation committee, being the persons for the time acting as such under the purchase and cross-license agreement hereinafter mentioned (hereinafter called the committee).

II. RECITALS

4. Gray, Development, and the committee have entered into a certain purchase and cross-license agreement dated _____, with Standard Oil Co., an Indiana corporation (hereinafter called Indiana), the Texas Co., a Delaware corporation, and the Texas Corporation, a Delaware corporation (hereinafter referred to collectively as Texas), and the Pure Oil Co., an Ohio corporation (hereinafter called Pure), and Development has made the grants and payments and has otherwise performed all of its obligations to Gray and to the committee by it to be made and performed on the closing date pursuant to the provisions of said purchase and cross-license agreement.

5. Development represents that Imperial Oil Limited, a Canadian company, and a subsidiary of Standard Oil Co. (New Jersey), has installed and is operating

Digitized by Google

in the Dominion of Canada certain equipment for a treating process known as the Stratford process.

6. Gray is the owner of certain United States and foreign letters patent and applications for letters patent listed in exhibit A annexed to said purchase and cross-license agreement. Gray has agreed to grant the within license to Development under its patent rights, as hereinafter defined, which include the patent rights acquired by it from Texas, Indiana, Development, and Pure pursuant to said purchase and cross-license agreement.

7. In consideration of the premises and of the covenants, grants, and payments made by Development pursuant to the purchase and cross-license agreement, and in further consideration of the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually covenant and agree as follows:

III. DEFINITIONS

8. Whenever used in this agreement, the following terms shall have the following meanings respectively:

(*a*) The term "clay treating" shall mean polymerizing the undesirable constituents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays, and the like.

(*b*) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

(*c*) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

(*d*) The term "throughput" shall mean the number of barrels of hydrocarbon oil treated by Development and its sublicensees pursuant to the license hereby granted, collected in purified liquid form from the treating apparatus, excluding therefrom all straight-run naphtha (i. e., naphtha which has not been exposed to cracking tempertaures) subjected to treatment while mixed with the hydrocarbon oil treated, and excluding further any oil which has previously been treated pursuant to the license hereby granted.

(*e*) The term "daily average throughput" shall mean the aggregate throughput during any accounting period of 6 calendar months divided by the total number of days in such accounting period. In the case of new installations which are placed in operation during an accounting period, the "daily average throughput" thereof shall be based upon the number of days remaining in such period after such operation commences.

(*f*) The term "barrel" shall mean 42 gallons at 60° F. and the term "gallon" shall mean 231 cubic inches.

IV. COVENANTS

9. Gray grants to Development, upon the terms and conditions hereinafter stated, an irrevocable, nonexclusive license for clay treating under its patent rights.

10. (*a*) Development agrees, as additional consideration for the license hereby granted, to pay the committee additional lump-sum royaltics based on the daily average throughput of Development and its sublicensees, in accordance with the following schedule:

For the first 5,000 barrels daily average throughput, at the rate of $8.80 per barrel;

For the next 1,000 barrels daily average throughput, i. e., 5,001–6,000 barrels daily average throughput total, at the rate of $7 per barrel;

For the next 3,000 barrels daily average throughput, i. e., 6,001–9,000 barrels daily average throughput total, at the rate of $5.66 per barrel;

For the next 3,000 barrels daily average throughput, i. e., 9,001–12,000 barrels daily average throughput total, at the rate of $4.33 per barrel;

Digitized by Google

For the next 3,000 barrels daily average throughput, i. e., 12,001–15,000 barrels daily average throughput total, at the rate of $3 per barrel;

For all over 15,000 barrels daily average throughput, at the rate of $2 per barrel;

and in accordance with the following provisions:

(*b*) Development agrees to keep, or cause to be kept, accurate and complete records and accounts of all operations under this license, and Gray and the committee and their agents, attorneys, or accountants thereunto duly authorized in writing shall have the right at reasonable business hours to inspect and take extracts from said records and accounts; and Development agrees at its own expense to equip or cause to be equipped each of the treating installations in which the operations licensed hereunder are conducted with means, to be approved by Gray in writing, for accurately measuring the number of barrels of hydrocarbon oil treated therein and, where deduction for straight-run naptha content is claimed, to conduct and record or cause to be conducted and recorded adequate standard Engler distillation tests to determine the straight-run naptha contained in the oil treated; and Development further agrees to render to Gray and to the committee, when commercial operations are commenced under this license, semiannual statements, certified by an officer of Development, on or before the 15th day of February and August of each year, showing the operations of Development and its sublicensees hereunder for the 6 months' periods from July 1 to January 1 and from January 1 to July 1 next preceding such accounting dates, containing the following information:

(*aa*) The total amount of hydrocarbon oil treated during the accounting period pursuant to this license, specifying the amount of oil so treated, if any, at each refinery of the licensee and its sublicensees;

(*bb*) the total amount of straight-run naphtha contained in the hydrocarbon oil reported under paragraph (*aa*);

(*cc*) the total throughput for the accounting period, being the amount reported under paragraph (*aa*) less the amount reported under paragraph (*bb*);

(*dd*) the daily average throughput for the accounting period;

(*ee*) the excess of the daily average throughput reported under paragraph (*dd*) over the daily average throughput in respect of which Development has theretofore paid the additional lump-sum royalties as provided in this paragraph 10.

(*c*) Development agrees at the time of rendering each semiannual statement to pay the committee the additional lump-sum royalty prescribed in the scale set forth in paragraph 10 in respect of the excess of the daily average throughput for the accounting period covered by such semiannual statement over the daily average throughput in respect of which Development has theretofore paid the additional lump-sum royalties as provided in this paragraph 10 (and in the case of the first semiannual statement rendered hereunder, in respect of the excess, if any, of the daily average throughput reported therein over the number of barrels of daily average throughput for which additional lump-sum royalties have been paid).

(*d*) Development agrees to notify Gray and the committee promptly in writing of the completion of each new treating installation installed for operation under this license and agrees that if the operation of such installation increases the daily average throughput of Development and its sublicensees for the accounting period in which such installation is completed, beyond the daily average throughput in respect of which Development has theretofore paid the additional lump sum royalties as provided in this paragraph 10, Development will pay to the committee the additional lump sum royalties in respect of such increase as in subparagraph (c) above provided, and with interest thereon to the date of payment at the rate of 6 percent from and after 30 days from the date when such additional installation is placed in commercial operation.

(*e*) All payments by Development on account of additional lump-sum royalties shall be made to the committee in New York funds, free of exchange charges, and shall complete payment in full for the license granted hereby in respect of the number of barrels of daily average throughput in respect of which such payments are made.

(*f*) There shall be no obligation on the part of Development or the refining interests of Standard Oil Co. (New Jersey) to install equipment for clay treating under this license within any specified time. Payment of the additional consideration specified in subparagraph (*a*) of paragraph 10 hereof on account of operations under this license shall be made within 30 days from the time equipment for clay treating under this license is put into commercial operation.

Digitized by Google

11. Development shall have the right to grant sublicenses under this license to any of the subsidiaries of Standard Oil Co. (New Jersey) engaged in the refining of hydrocarbon oils. Development agrees to pay, or cause to be paid, to the committee all royalties or license fees accruing on account of the operations of any of the subsidiaries of Standard Oil Co. (New Jersey) hereunder.

12. Gray agrees that it will not sue, or request Indiana, Texas, or Pure to sue, Imperial Oil Limited or any of its subsidiaries for infringement of their respective patent rights on account of the operation and use by Imperial Oil Limited or any of its subsidiaries of their equipment of an aggregate capacity equal to that of their present installed equipment (30,000 barrels per day) for the practice of the Stratford process, or for the practice of the Stratford process provided such practice be limited to the use and operation of equipment of an aggregate capacity equal to that of the present installed equipment. Development shall not be required to account to Gray for the use and operation by Imperial Oil Limited and its subsidiaries of said equipment for the practice of the Stratford process and the present capacity of said equipment shall not be included in determining the rate under paragraph 10 hereof at which Development shall pay for licensed treating capacity.

13. In the event of the institution of any suit against Development or any of its sublicensees alleging that the employment of any apparatus or processes for clay treating covered by the patent rights licensed hereunder and approved in writing by Gray, and/or the manufacture and/or sale by Development or any of its sublicensees of any products produced thereby, infringes any letters patent, Gray agrees, if promptly advised in writing by Development of the institution of any such suit, to undertake at Gray's expense the defense thereof, provided Development shall furnish to Gray such information or testimony as may be reasonably needed by Gray in connection with such suit, but such expense shall be limited to all proper compensation and expenses of counsel and witnesses, and expenses necessarily incurred in procuring and furnishing information and testimoney, including costs of expert advice and testimony.

14. Notices and payments provided for herein shall be sent to the following addresses: The Gray Processes Corporation, 961 Frelinghuysen Avenue, Newark, N. J.; Standard Oil Development Co., Linden, N. J.; The Gray Processes Corporation Committee, care of Fidelity Union Trust Co., Newark, N. J.

15. Development agrees to use its best efforts to secure compliance with the terms of this license by all of the present and future subsidiaries of Development and of Standard Oil Co. (New Jersey). Those that do so comply shall be bound by all the provisions and entitled to all the rights granted under this license. If notwithstanding such efforts any such subsidiary shall refuse or fail to comply with the terms of this license, said noncomplying subsidiary shall be deemed to have renounced the benefits of this license and Development guarantees Gray and the committee against and agrees to hold Gray and the committee harmless from any loss or liability occurring by reason of such noncompliance by any noncomplying subsidiary of Development or of Standard Oil Co. (New Jersey) provided, however, that Development shall be entitled to offset against any such loss or liability any recovery by Gray or the committee against such noncomplying subsidiary for infringement of its patent rights; and provided further that if any future subsidiary of Development or of Standard Oil Co. (New Jersey) shall have at the time it becomes a subsidiary prior obligations which prevent it from complying with the terms of this license it shall be deemed to be a stranger to this license and Development shall be ipso facto released from its obligation to hold Gray and the committee harmless from resultant loss or liability.

16. This agreement shall benefit and be binding upon the respective parties hereto and their respective successors and assigns; provided, however, that no party hereto may, by any such assignment, be relieved of its obligations hereunder except with the express consent in writing of the other parties hereto. It is agreed that this license, and all rights of Development thereunder, may be assigned, without further payment, to the successors in ownership of the whole of the manufacturing business of the refining subsidiaries of Standard Oil Co. (New Jersey). Gray further agrees, in the event of the sale or other disposition by any refining subsidiary of Standard Oil Co. (New Jersey) of any installation in which the clay treating operations licensed hereunder are conducted, to grant to the purchaser or other transferee of such installation, a license in standard form upon payment by such purchaser or transferee to Gray of the standard royalties of Gray then applicable to new licenses granted by Gray in the ordinary course of business.

Digitized by Google

17. Development shall have the right at any time after January 1, 1950, upon 3 months' written notice to Gray and the committee, to terminate its obligation for the payment of any further royalties of any kind or character pursuant to this agreement in respect of installations for the use of the process and apparatus licensed hereunder installed after such date of termination, but it is expressly understood and agreed that the service of such notice of termination shall not affect any rights theretofore acquired by Development pursuant to this agreement and the purchase and cross-license agreement herein referred to.

18. The making, execution, and delivery of this agreement by the parties hereto have been induced by no representations, statements, warranties or agreements other than those expressed or mentioned herein.

In witness whereof, the parties hereto have caused this instrument to be executed on the day and year first above written.

EXHIBIT O

License agreement dated the day of ------, 1933.

I. PARTIES

1. The Gray Processes Corporation, a corporation of the State of Delaware, having a place of business at 961 Frelinghuysen Avenue, Newark, N. J. (herein after called Gray).

2. The Pure Oil Co., a corporation of the State of Ohio, having a place of business at 35 East Wacker Drive, Chicago, Ill., and its subsidiaries (hereinafter referred to collectively as Pure).

3. The Gray Processes Corporation committee, being the persons for the time acting as such under the purchase and cross license agreement hereinafter mentioned (hereinafter called the committee).

II. RECITALS

4. Gray has granted to Pure pursuant to a license agreement dated May 22, 1930, a license for the treatment of oil under the vapor phase treating patents of Gray and Pure has made payment in full to Gray of the lump sum royalties prescribed in said license agreement in respect of 2,200 barrels daily average throughput.

5. Pure has been active in the development of a process for the treatment of oils with solid contact catalysts, such as fuller's earth, in the liquid phase at elevated temperatures and under pressures of the order of 1,000 pounds per square inch and represents that it has a present installed capacity for the treatment of 27,400 barrels daily average throughout by said liquid phase treating process.

6. Gray, Pure, and the committee have entered into a certain purchase and cross license agreement dated ----------, with the Texas Co., a Dela-

Digitized by Google

ware corporation, and the Texas Corporation, a Delaware corporation (hereinafter collectively called Texas), Standard Oil Co., an Indiana corporation (hereinafter called Indiana), and Standard Oil Development Co., a Delaware corporation, (hereinafter called Development), and Pure has made the grants and payments and has otherwise performed all of its obligations to Gray and to the committee by it to be made and performed on the closing date pursuant to the provisions of said purchase and cross license agreement.

7. Gray is the owner of certain United States and foreign letters patent and applications for letters patent listed in exhibit A annexed to said purchase and cross license agreement. Gray has agreed to grant the within license to Pure under its patent rights, as hereinafter defined, which include the patent rights acquired by it from Texas, Indiana, Development, and Pure pursuant to said purchase and cross license agreement.

8. In consideration of the premises and of the covenants, grants, and payments made by Pure pursuant to the purchase and cross license agreement, and in further consideration of the mutual covenants and agreements hereinafter set forth, the parties hereto do mutually convenant and agree as follows:

III. DEFINITIONS

9. Whenever used in this agreement, the following terms shall have the following meanings respectively:

(*a*) The term "clay treating" shall mean polymerizing the undesirable constitutents of naphthas and/or kerosenes in vapor and/or liquid phase at elevated temperatures with solid contact catalysts, such as fuller's earth, decolorizing clays and the like.

(*b*) The term "patent rights" shall mean all such, but only such claims of patents of the United States and countries foreign thereto, and transferable rights thereunder, as cover processes for, or apparatus primarily designed for, the practice of clay treating and based upon inventions made prior to January 1, 1950. The patent rights of a granting party shall mean those patent rights as defined in the preceding sentence of which the party now has or shall have prior to January 1, 1950, the ownership or control in the sense of having the power to dispose of them or grant licenses for clay treating thereunder, insofar as it is not bound to account to others for so doing by contracts with others in force on the date of execution of this agreement.

(*c*) The term "subsidiaries" shall mean all corporations of which the parent company owns, directly or indirectly, more than 50 percent of the stock having the right to vote for directors. For the purpose of this definition, the stock owned by the parent company shall be deemed to include all stock having the right to vote for directors and owned, directly or indirectly, by any of its subsidiaries as defined above.

(*d*) The term "throughput" shall mean the number of barrels of hydrocarbon oil treated by Pure pursuant to the license hereby granted, collected in purified liquid form from the treating apparatus, excluding therefrom all straight-run naptha (i. e., naphtha which has not been exposed to cracking temperatures) subjected to treatment while mixed with the hydrocarbon oil treated, and excluding further any oil which has previously been treated pursuant to the license hereby granted.

(*e*) The term "daily average throughput" shall mean the aggregate throughput during any accounting period of 6 calendar months dvided by the total number of days in such accounting period. In the case of new installations which are placed in operation during an accounting period, the "daily average throughput" thereof shall be based upon the number of days remaining in such period after such operation commences.

(*f*) The term "barrel" shall mean 42 gallons at 60° F. and the term "gallon" shall mean 231 cubic inches.

IV. COVENANTS

10. Gray grants to Pure, upon the terms and conditions hereinafter stated, an irrevocable, nonexclusive license for clay treating under its patent rights.

11. (*a*) Pure agrees, as additional consideration for the license hereby granted, to pay to the commtitee:

(1) Additional lump sum royalties based on the daily average throughput of Pure treated by its liquid phase treating process pursuant to this license for all amounts in excess of 27,400 barrels daily average throughput at the rate of $2 per barrel daily average throughput; and

Digitized by Google

(2) Additional lump sum royalties based on the daily average throughput of Pure treated pursuant to this license otherwise than by its liquid phase process for all amounts in excess of 2,200 barrels daily average throughput in accordance with the following scale:

For the first 2,800 barrels daily average throughput (in excess of its present paid-up daily average throughput of 2,200 barrels) at the rate of $8.80 per barrel;

For the next 1,000 barrels daily average throughput, i. e. 5,001–6,000 barrels daily average throughput total, at the rate of $7 per barrel;

For the next 3,000 barrels daily average throughput, i. e. 6,001–9,000 barrels daily average throughput total, at the rate of $5.66 per barrel;

For the next 3,000 barrels daily average throughput, i. e. 9,001–12,000 barrels daily average throughput total, at the rate of $4.33 per barrel;

For the next 3,000 barrels daily average throughput, i. e. 12,001–15,000 barrels daily average throughput total, at the rate of $3 per barrel;

For all over 15,000 barrels daily average throughput, at the rate of $2 per barrel;

and in accordance with the following provisions:

(b) Pure agrees to keep accurate and complete records and accounts of all operations under this license, and Gray and the committee and their agents, attorneys or accountants thereunto duly authorized in writing shall have the right at reasonable business hours to inspect and take extracts from said records and accounts; and Pure agrees at its own expense to equip each of its treating installations operated under this license with means, to be approved by Gray in writing, for accurately measuring the number of barrels of hydrocarbon oil treated therein and, where deduction for straight-run naphtha content is claimed, to conduct and record adequate standard Engler distillation tests to determine the straight-run naphtha contained in the oil treated; and Pure further agrees to render to Gray and to the committee semiannual statements, certified by an officer of Pure, on or before the fifteenth days of February and August of each year, showing the operations of Pure hereunder for the six months' periods from July first to January first and from January first to July first next preceding such accounting dates, containing the following information:

(*aa*) The total amount of hydrocarbon oil treated hereunder by its liquid phase treating process and the total amount of hydrocarbon oil treated hereunder otherwise than by its liquid phase treating process during the accounting period pursuant to this license, specifying the amount of oil so treated, if any, at each refinery of the licensee;

(*bb*) The total amounts of straight-run naphtha contained in the amounts of hydrocarbon oil reported under paragraph (*aa*);

(*cc*) The total throughput treated in the liquid phase and otherwise treated hereunder for the accounting period, being the amounts reported under paragraph (*aa*) less the respective amounts reported under paragraph (*bb*);

(*dd*) The daily average throughput treated in the liquid phase and the daily average throughput otherwise treated hereunder for the accounting period;

(*ee*) The excess of the daily average throughputs reported under paragraph (*dd*) over the daily average throughputs in respect of which Pure has theretofore paid royalties in full as provided in this paragraph 11.

(c) Pure agrees at the time of rendering each semiannual statement to pay to the committee the additional lump sum royalties prescribed in subparagraph (*a*) of this paragraph 11 in respect of the excess, if any, of its daily average throughput treated by its liquid phase process, and of its daily average throughput otherwise treated hereunder, for the accounting period covered by such semiannual statement over the daily average throughputs of oil treated in the liquid phase and otherwise treated hereunder respectively, in respect of which Pure has theretofore paid lump sum royalties in full as provided in this paragraph 11 (and in the case of the first semiannual statement rendered hereunder, in respect of the excess, if any, of its daily average throughput treated by its liquid phase process in excess of 27,400 barrels, and of its daily average throughput otherwise treated hereunder in excess of 2,200 barrels).

(*d*) Pure agrees to notify Gray and the committee promptly in writing of the completion of each new treating installation installed by it for operation under this license and agrees that if the operation of such installation increases the daily average throughput of Pure for the accounting period in which such installation is completed, beyond the daily average throughput in respect of which Pure has theretofore paid the additional lump-sum royalties as provided in this para-

Digitized by Google

graph 11, Pure will pay to the committee the additional lump-sum royalties in respect of such increase as in subparagraph (*c*) above provided, and with interest thereon to the date of payment at the rate of 6 percent from and after 30 days from the date when such additional installation is placed in commercial operation.

(*e*) All payments by Pure on account of additional lump-sum royalties shall be made to the committee in New York funds, free of exchange charges, and shall complete payment in full for the license granted hereby in respect of the number of barrels of daily average throughput in respect of which such payments are made.

12. In the event of the institution of any suit against Pure alleging that its employment of any apparatus or processes for clay treating covered by the patent rights licensed hereunder and approved in writing by Gray, and/or the manufacture and/or sale by Pure of any products produced thereby, infringes any letters patent, Gray agrees, if promptly advised in writing by Pure of the institution of any such suit, to undertake at Gray's expense the defense thereof, provided Pure shall furnish to Gray such information or testimony as may be reasonably needed by Gray in connection with such suit, but such expense shall be limited to all proper compensation and expenses of counsel and witnesses, and expenses necessarily incurred in procuring and furnishing information and testimony, including costs of expert advice and testimony.

13. Notices and payments provided for herein shall be sent to the following addresses: The Gray Processes Corporation, 961 Frelinghuysen Avenue, Newark, N. J.; The Pure Oil Co., 35 East Wacker Drive, Chicago, Ill.; The Gray Processes Corporation Committee, care of Fidelity Union Trust Co., Newark, N. J.

14. Pure agrees to use its best efforts to secure compliance with the terms of this license by all of its present and future subsidiaries. Those that do so comply shall be bound by all the provisions and entitled to all the rights granted under this license. If notwithstanding such efforts any such subsidiary shall refuse or fail to comply with the terms of this license, said noncomplying subsidiary shall be deemed to have renounced the benefits of this license and Pure guarantees Gray and the committee against and agrees to hold Gray and the committee harmless from any loss or liability occurring by reason of such noncompliance by any noncomplying subsidiary of Pure, provided, however, that Pure shall be entitled to offset against any such loss or liability any recovery by Gray or the committee against such noncomplying subsidiary for infringement of its Patent rights; and provided further that if any future subsidiary of Pure shall have, at the time it becomes a subsidiary, prior obligations which prevent it from complying with the terms of this license it shall be deemed to be a stranger to this license and Pure shall be *ipso facto* released from its obligation to hold Gray and the committee harmless from resultant loss or liability.

15. This agreement shall benefit and be binding upon the respective parties hereto and their respective successors and assigns; provided, however, that no party hereto may, by any such assignment, be relieved of its obligations hereunder except with the express consent in writing of the other parties hereto. It is agreed that this license, and all rights of Pure thereunder, may be assigned, without further payment, to the successors in ownership of the whole of the manufacturing business of Pure. Gray further agrees, in the event of the sale or other disposition by Pure of any installation in which the clay-treating operations licensed hereunder are conducted, to grant to the purchaser or other transferee of such installation, a license in standard form upon payment by such purchaser or transferee to Gray of the standard royalties of Gray then applicable to new licenses granted by Gray in the ordinary course of business.

16. Pure shall have the right at any time after January 1, 1950, upon 3 months' written notice to Gray and the committee, to terminate its obligation for the payment of any further royalties of any kind or character pursuant to this agreement in respect of installations for the use of the process and apparatus licensed hereunder installed after such date of termination, but it is expressly understood and agreed that the service of such notice of termination shall not affect any rights theretofore acquired by Pure pursuant to this agreement and the purchase and cross-license agreement herein referred to.

17. The making, execution, and delivery of this agreement by the parties hereto have been induced by no representations, statements, warranties, or agreements other than those expressed or mentioned herein.

DOCUMENTS AND AGREEMENTS DEFINING AND RELATING TO THE MUTUAL LICENSING PLAN OF HYDRO PATENTS CO. FOR THE HYDROGENATION PROCESS

(As amended, effective July 1, 1935)

INTRODUCTION

The following statement is made to avoid possible confusion in reviewing the documents relating to the Hydro Patents mutual licensing plan.

The original book was entitled "Documents and Agreements Defining and Relating to the Mutual Licensing Plan of Hydro Patents Co. for the Hydrogenation Process" and appeared in 1930. This book was revised and reprinted with the same title, qualified by "as amended prior to the time the plan became permanently effective." The revised book appeared in 1932 and includes the amendments shown in the pamphlet entitled "Amendments to the Mutual Licensing Plan of Hydro Patents Co.", which was forwarded to the Hydro Patents stockholders in that year with an explanatory pamphlet Memorandum re Amendments to the Mutual Licensing Plan of Hydro Patents Co. The present book supersedes those referred to above.

In 1932 also there was sent to the stockholders an agreement for the purchase of one share of stock of Hydro Patents Co. The purchase of this share of stock qualified the stockholders to receive a license in the form of contract C as amended, for 501 barrels per day of hydrogenation capacity, corresponding to the number of shares held by each stockholder.

There remained a further stage, that of acquiring full participation in the mutual licensing plan. At the meeting of the board of directors of the Hydro Patents Co. on March 4. 1935, it was decided that the purchase of 499 additional shares of Hydro Patents stock by a stockholder licensee should be accepted as meeting the requirements for full participation, instead of the 5,000 shares originally required in contract A of the mutual licensing plan. This was accepted by 13 companies. Standard Oil Development Co. had already acquired more than sufficient shares for full participation (10,000 shares). The remaining four stockholder licensees elected not to take full participation.

The present book contains all the agreements in their amended form and also an appendix composed of the agreements to amend which became effective as of July 1, 1935.

CONTRACT A—OFFER TO PURCHASE HYDRO PATENTS' STOCK

(Amended as of July 1, 1935)

HYRDO PATENTS CO., and
STANDARD-I. G. Co.,
26 Broadway, New York City.

DEAR SIRS: It has been represented to us that Hydro Patents Co., a Delaware corporation, hereinafter called Hydro Patents, proposes to enter into the agreements copies of which appear as contracts B, D, F, G, H of the series of agreements bound herewith, which agreements, entitled contracts A to I, are referred to in this offer and in the agreements themselves as this series of agreements, and that Hydro Engineering & Chemical Co. and Standard Oil Development Co. propose to enter into an agreement copy of which appears as contract I of this series of agreements.

On condition that the said agreements B, D, F, G, H, and I shall be entered into we desire to purchase stock of Hydro Patents and therefore make to you the following offer:

I. We, _____ hereinafter referred to as Company, offer to acquire 500 shares of Hydro Patents stock at a price of fifty-three (53) dollars per share, payable in cash upon receipt of notification of acceptance of this offer, such purchase and sale to be subject to the following conditions:

II. At any time during the period of ten months after a certain date which shall be named later by Hydro Engineering & Chemical Co., which date however shall be not earlier than September 1, 1930, and not later than September 1, 1931, Company may acquire any number of additional shares of stock of Hydro Patents provided that Company shall enter into a nonexclusive license contract with Hydro Patents in the form of contract C of this series of agreements, limited to a specified daily capacity which capacity, measured by barrels of oil charged to the

Digitized by Google

hydrogenation process and of liquefied coal, all as defined in said contract C, shall be equal to the total number of shares of stock of Hydro Patents held by Company, and further provided that Company shall enter into a contract in the form of contract E of this series of agreements with Hydro Engineering & Chemical Co. The price of such additional shares shall be fifty-three (53) dollars per share, payable in cash on the exercise of the option, or if Company shall so elect, payable one-fifth in cash with the balance payable in four equal annual installments with interest at 5 percent per annum.

It is understood that this option to purchase additional stock of Hydro Patents Co. is conditioned upon like options being exercised by companies having an aggregate daily refining capacity of 937,350 barrels as defined in paragraph VI (a) hereof.

The entering into of such contracts by Company will be accepted by Hydro Patents as evidence of a desire and intention on the part of Company to practice the licensed process, but shall not be understood to imply any definite obligation to install equipment of the specified or any lesser capacity, or to practice the licensed process on any scale at any definite time.

III. If and when Company exercises the option set forth in paragraph II hereof, Hydro Patents shall grant to Company a further and additional option to purchase any number of shares of common stock of Hydro Patents; provided, however, that upon the exercise of such additional option, Company shall enter into a further nonexclusive license contract with Hydro Patents, in the form of said contract C, for a specified daily capacity equal to the number of shares of stock of Hydro Patents acquired by Company under this paragraph III. The price and terms of purchase of said shares shall be the same as is provided in paragraph II hereof. This option shall extend only for three (3) years after the expiration of the option period specified in paragraph II hereof.

IV. If Company shall under paragraph I hereof and the options granted in paragraphs II and III, purchase a total of one thousand (1,000) shares of stock of Hydro Patents it shall be deemed to have taken a full participation in Hydro Patents' mutual plan for licensing the hydrogenation process and Hydro Patents shall grant to Company the right and option to take further licenses in the form of said contract C at any time or times prior to December 31, 1947, for any additional hydrogenation capacity it desires, said licenses to be granted only upon the actual completion of the additional hydrogenation equipment to which they relate. Company shall be obligated to purchase from Hydro Patents and Hydro Patents shall be obligated to sell to Company at the time of grant of any such license, one share of Hydro Patents stock for each barrel of daily capacity specified in the license. The price of said stock shall be fifty-three (53) dollars per share.

V. At all times during the 6 months following the date fixed by Hydro Engineering & Chemical Co. under paragraph II hereof, Hydro Patents and Standard-I. G. Co. will afford to Company reasonable opportunity to acquaint itself with the general nature of the patent situation and the general nature of the hydrogenation process and equipment, of some of the typical costs and results obtainable and the right to visit experimental and commercial installations for the practice of the hydrogenation process both in the United States and Germany. It is understood that it is your desire and intention to afford stockholders under this paragraph the fullest possible privileges of investigation consistent with such limitations as Standard-I. G. Co. may deem necessary as to withholding certain information from all save actual licensees.

VI. The shares of Hydro Patents acquired by Company under the provisions of paragraph I hereof shall immediately, upon issuance, be endorsed in blank by Company and deposited with and held by Standard-I. G. Co. upon the following terms and conditions:

(*a*) Unless companies having an aggregate daily refining capacity, as listed in the Bureau of Mines circular of April 1930, I. C. 6292, of 937,350 barrels, exercise the option granted by paragraph II hereof, Company shall be required to sell, and Standard-I. G. Co. shall be required to purchase for cash within 30 days from the expiration of said option period all shares of Company in Hydro Patents at fifty-three (53) dollars per share and upon payment of the purchase price the said shares shall become the sole property of Standard-I. G. Co. and thereupon all obligations of Standard-I. G. Co. and Hydro Patents to Company shall cease and be terminated.

(*b*) If companies having an aggregate daily refining capacity, as listed in the said Bureau of Mines circular, of 937,350 barrels, exercise the option granted by paragraph II hereof, then: (1) if Company fails or refuses to exercise said option,

Digitized by Google

Company shall be required to sell, and Hydro Patents shall be required to purchase, all the shares of Company in Hydro Patents at one (1) dollar per share, and upon payment of this purchase price, the said shares shall be delivered to and become the sole property of Hydro Patents; (2) if Company shall exercise said option, it shall be entitled to receive, and Standard-I. G. Co. shall be bound to deliver, the shares of Company deposited with Standard-I. G. Co.

VII. Company consents to the amendment of any contract of this series of agreements by the parties thereto, provided that such amendment shall be also consented to by both Hydro Patents and Standard-I. G. Co., and further provided, that Hydro Patents shall not give its consent until at least seventy percent (70%) of its issued stock shall have passed to the ownership of Company and other corporations by acceptance of offers to purchase the same in the form of this offer.

VIII. Contracts C and E contemplated herein shall be entered into by Company and/or by other corporation or corporations of adequate responsibility which shall be in effect the sole property of Company. Affiliated corporations not coming within the above classification but which are subsidiaries, or subsidiaries of subsidiaries, of one or more corporations coming within said classification, shall have the option of ratifying said contracts in the form provided thereon under the caption "Ratifying subsidiaries" or of remaining strangers thereto in all respects. Such option shall be exercisable only within 60 days after the date of said contracts, or 60 days after the subsidiary relationship is established, whichever is the later.

We are executing and delivering this offer to you in duplicate, and request that upon its acceptance you return to us one duly signed copy.

Very truly yours,

By ----------
President.

Accepted: ----------, 1930.

CONTRACT B—AGREEMENT BETWEEN STANDARD-I. G. AND HYDRO PATENTS

AMENDED AGREEMENT BETWEEN STANDARD-I. G. AND HYDRO PATENTS

(Effective as of July 1, 1935. See amending agreement, p. 95)

ARTICLE I. PARTIES

The parties to this agreement are Hydro Patents Co., a Delaware corporation hereinafter referred to as Patents and Standard-I. G. Co., a Delaware corporation, hereinafter referred to as S.-I. G.

ARTICLE II. DEFINITIONS

A. Wherever the expression "patent rights relating to the hydrogenation process", is used in this agreement its meaning is:

(a) Any United States patents, renewals, reissues, extensions of patents and transferable interests in any of the foregoing relating to the hydrogenation process as hereinafter defined, of which S.-I. G., Standard Oil Co., a New Jersey corporation, or I. G. Farbenindustrie Aktiengesellschaft, a German corporation, the two last named being hereinafter referred to as the companies, now have or may before November 9, 1947 have the ownership or control in the sense of having the power to dispose of them or grant licenses thereunder insofar as they are not precluded from so doing or bound to account to others for so doing by contracts with others in force on November 9, 1929, nor shall either of the said companies be deemed to have ownership or control of any patent right relating to the hydrogenation process because such patent right is owned or controlled by a corporation which is not in effect the sole property of one or both of said companies.

In the case of patent rights relating to the hydrogenation process originating with one of the companies as through the assignment of inventions of its em-

Digitized by Google

ployees, the date of acquisition shall be assumed to be the date of the first application for patent thereon.

In the case of patent rights, which would otherwise come within the definition of patent rights relating to the hydrogenation process hereafter purchased from others by one of the companies, it is understood that the same are to be included within said definition only by agreement between S.-I. G. and the purchasing company as provided in paragraph 4 of article IV hereof and as to such patent rights the date of acquisition shall be either the actual date upon which that company obtains control of such patent rights, or the date of such agreement, whichever is the later.

The expression patent rights relating to the hydrogenation process shall include both—

(1) Those patent rights which relate wholly or principally to that process, and to products of that process, and

(2) Those which are useful in that process and also are useful to a substantial degree in other processes, but in the latter case only insofar as they are useful in that process.

Both (1) and (2) supra shall also include those patent rights in which the real invention is only the substitution of products obtained by the practice of said process and which are specified in subparagraphs 1, 2, and 3 of subdivision B of this article II, for similar products not obtained by the practice of said process even though said patent rights in form purport to cover a new process or product not within said field or not so specified.

The expression patent rights relating to the hydrogenation process shall be interpreted to include patent rights for processes of making aluminum chlorid and other metallic halids for use in the hydrogenation process as hereinbelow defined and interpreted, and not otherwise.

The expression patent rights relating to the hydrogenation process shall be interpreted to include rights under all apparatus and product patents incident to the processes included in this license, but only as hereinbelow defined and interpreted, and shall not otherwise include rights under such apparatus and product patents.

The companies shall include Standard Oil Co. (New Jersey), I. G. Farbenindustrie Aktiengesellschaft, together with all corporations which are in effect the sole property of one or both of the companies.

S.-I. G. will supply to Patents on request from time to time, lists or schedules of all patents coming within this paragraph and including also all applications for patents of the United States then owned by it or then known to it as to which the resultant patents will come within this paragraph when and as issued.

B. Wherever the term hydrogenation process is used in this agreement its meaning is:

Any process coming within the hydrocarbon field (as hereafter described), which is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts, to a degree or extent or in a manner to secure definitely determinable hydrogenation or which is used in conjunction with the hydrogenation step for the preparation of raw materials for hydrogenation, including hydrogen, or for such immediate separation and special or limited refining of the products produced directly by the hydrogenation step itself as may be required to fit such products for handling by regular refinery procedure, but the term "hydrogenation" shall not be interpreted to cover interaction of hydrocarbons if such interaction is not substantially influenced by the presence of free hydrogen.

The term hydrogenation process shall be interpreted to include processes involving the use of aluminum chlorid or other metallic halids when such process is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts (or other catalysts), to a degree or extent or in a manner to secure definitely determinable hydrogenation, and shall not otherwise include processes involving the use of aluminum chlorid or metallic halids having like effect in said process.

The term hydrocarbon field, as used in the preceding paragraph, means:

The treatment of crude petroleum, natural or manufactured bitumens (solid or liquid), peats, shales, lignites, coals, other solid and liquid carbonaceous materials, and/or solid and liquid products made therefrom or contained therein to produce:

1. Those marketable major products which are now commonly produced in the oil industry. The marketable major products here referred to are, for the purposes of this agreement, the following:

(1) Crude petroleum.

(2) Intermediate hydrocarbon mixtures forming the class known as naphthas.

Digitized by Google

(3) Gasoline.
(4) Kerosene.
(5) Gas oil.
(6) Fuel oil.
(7) Lubricat ng oil.
(8) Paraffine wax.
(9) Highly purified viscous involatile hydrocarbon oils.
(10) Saturants, binders, and road oils.
(11) Roofing and paving asphalts.
(12) Petroleum greases and petrolatum.
(13) Sulphuric acid hydrocarbon sludges.
(14) Petroleum coke.

2. Those marketable major products which shall hereafter be commonly produced in the oil industry and shall be of a commercial importance corresponding to the present commercial importance of a present major product as listed in subparagraph 1.

3. Other products which, though different in chemical structure from said major products of subparagraphs 1 and 2 have the same properties to a degree which permits their use for the same purpose or purposes, but to produce said other products only to the extent that they are used for such purpose or purposes.

(Example: Accordingly processes for the production of aromatic hydrocarbons come within the field so far as these products are used as antiknock substances or as motor fuel. They do not come within the field when intended for use as raw materials for dyestuffs and explosives.)

C. Wherever the term barrel is used in this agreement its meaning is:

Forty-two (42) United States standard gallons of 231 cubic inches, each, measured at 60° Fahrenheit.

ARTICLE III. SCOPE OF GRANT

S.-I. G., warranting that it has full power to do so, grants to Patents the exclusive right to issue licenses under the patent rights relating to the hydrogenation process in and for the United States of America, this grant being subject to the following conditions:

1. Patents agrees that except as provided in paragraph I of contract A of this series of agreements it will not sell its capital stock save to those who shall accept licenses from it in the form of contract C of this series of agreements, nor grant to a stockholder any license except one in the form of contract C.

2. Patents agree that it will not grant any licenses to nonstockholders prior to the expiration of the subscription option of paragraph II of contract A, and that it will not thereafter grant any licenses to nonstockholders which differ in form from the said contract C save in the following respects:

(*a*) Without the consent of S.-I. G., Patents shall not make any charge to the licensee on account of the grant of the license but Patents may impose running royalties in addition to those set forth in article VI of contract C, provided that such additional running royalties shall not in themselves exceed 125 percent of the royalties specified in said article VI. Patents may prescribe for such additional running royalties imposed by it, any terms of computation or payment coming within one of the three following paragraphs:

a. Based solely on oil charged to the hydrogenation process (as the same is defined in paragraph C of article II of contract C of this series of agreements) and/or on some or all of the products obtained;

b. Based solely on some or all of the liquid products obtained from liquefied coal (as the same is defined in paragraph D of article II of said contract C);

c. Based solely on any combination of *a* and *b* above; but it may not vary the method of computation or payment of the royalties provided in said article VI. In the event Patents desires to prescribe terms of computation or payment for such additional running royalties in form so different from that prescribed in article VI as to make direct comparison uncertain, it shall give to S.-I. G. reasonable notice of its intentions before putting them into effect.

(*b*) Patents may extend the term over which the capacity limitations shall be effective and the term over which royalties shall be paid to it beyond December 31, 1947.

(*c*) Patents may omit article X and appropriately amend article XI of contract C.

As a condition precedent to acquiring a license from Patents, all licensees shall be required to enter into an agreement with Hydro Engineering & Chemical Co. in the form of contract E of this series of agreements.

Digitized by Google

3. Subject to the provisions of paragraphs I, II, III, and IV of contract A of this series of agreements, Patents shall have the sole right to determine to whom and at what price it will sell its capital stock, such sales being always subject to paragraph 1 of this article III.

Patents agrees that its policy shall be to grant licenses on a nonstockholder basis to all applicants, without discrimination, upon uniform and reasonable terms.

ARTICLE IV. ASSISTANCE BY S.-I. G.

1. S.-I. G. agrees that until December 31, 1947, it will join with and assist Patents in the performance of its obligations under articles IV and V of contract C of this series of agreements, and will reimburse Patents to the extent of one-half of its expenditures made in the performance of said articles IV and V before December 31, 1947.

2. In any litigation in which it shall be necessary for S.-I. G. to join as a party in order to protect a licensee of Patents, S.-I. G. hereby agrees to join in such litigation as a party thereto and to permit such suit to be prosecuted in its name.

3. In the event Patents shall fail or refuse to perform its obligations under articles IV and V of contract C of this series of agreements, then S.-I. G. may undertake the performance of such obligations and wherever necessary may sue on behalf of or in the name of Patents or join Patents as a party to such suit. All expenses of such suit shall be borne equally by S.-I. G. and Patents.

4. If prior to December 31, 1947, patent rights of the United States which appear to be of importance to Patents in connection with the hydrogenation process are hereafter offered for purchase to the said companies or either of them, S.-I. G. represents that the purchasing company or companies will, if it be practicable to do so, seek the cooperation of S.-I. G. in advance of making the purchase, and will offer to bring the purchased right within the scope of the term patent rights relating to the hydrogenation process upon such fair distribution of the cost thereof as between the purchasing company or companies and S.-I. G. as may be then agreed upon, having regard to any value which the purchased patent right may have outside of its value in connection with the practice of the hydrogenation process within the United States. S.-I. G. agrees in turn that it will cooperate with and be controlled by the advice of Patents with reference to its action concerning such purchased rights. If S.-I. G. shall, upon the advice of Patents, contribute to such purchase, Patents shall pay to S.-I. G. one-half of the amount contributed by S.-I. G. toward the purchase price. If S.-I. G. shall, upon the advice of Patents, fail to agree with the purchasing company or companies as to the assumption of its fair proportion of the cost of such purchase of patent rights, neither S.-I. G. nor Patents shall have any rights thereunder, but S.-I. G. may, at any later time, acquire rights under the patent rights in question to the extent that the purchasing company still has the power to grant the same, by payment of its equitable share of the purchase price; and S.-I. G. agrees to make such payment at any time upon the request of Patents and upon reimbursement by Patents to the extent of one-half of the cost to it.

ARTICLE V. ROYALTIES

(*a*) Patents shall pay and agrees to pay to S.-I. G. on account of all licenses to employ the hydrogenation process which it grants up to and including the date of expiration of the subscription option of paragraph II of contract A of this series of agreements the following fixed royalties:

First bracket. For the first 25,000 barrels of aggregate daily capacity licensed to all of its licensees, or any part thereof, $50 per barrel.

Second bracket. For the second 25,000 barrels of aggregate daily capacity licensed to all of its licensees, or any part thereof, $40 per barrel.

Third bracket: For the third 25,000 barrels of aggregate daily capacity licensed to all of its licensees, or any part thereof, $30 per barrel.

Fourth bracket. For all additional capacity licensed to all of its licensees, $20 per barrel.

The capacity licensed under Article VII hereof shall be excepted from the above schedule in determining the fixed royalties payable by Patents to S.-I. G., that is, Patents shall have no obligation to make payment of fixed royalties on account of such license, nor shall the capacity actually installed under such license be counted as within any bracket of said schedule.

For all licenses granted by Patents after the expiration of said subscription option the fixed royalties to be paid by Patents to S.-I. G. shall be according to this same schedule, plus additional amounts equal to 4 percent per annum on said fixed royalties, compounded annually from the expiration of said subscription

Digitized by Google

option to the date when such license is granted, provided, however, that the total of said fixed royalties plus said additional amounts shall not be in excess of fifty (50) dollars per barrel of daily capacity licensed. All payments to S.-I. G. specified in paragraph (a) of this article shall be due at the date of the license or of the obligation to grant the license, but if Patents shall so elect, may be paid: In the case of all stockholder licensees, one-fifth (⅕) in cash and the balance in four equal annual installments with interest at 4 percent per annum; in the case of all nonstockholder licensees, qut of 50 percent of the royalties collected from each such licensee, when and as such royalties are collected, with interest at 4 percent per annum.

(*b*) Patents shall also pay and agrees to pay to S.-I. G. as running royalties on account of all operations of each of its licensees, all of the royalties specified in article VI of contracts C and H of this series of agreements.

The fixed and running royalties specified in paragraphs (*a*) and (*b*) of this article V shall be payable by Patents on account of all licenses granted and on account of all operations of its licensees up to and including December 31, 1947, but not thereafter.

ARTICLE VI. ACCOUNTING

A. For the purpose of determining the amount of such running royalties due and payble to S.-I. G., Patents shall keep accurate and true books of account in which shall be entered for each licensee the amount of royalty accruing from that licensee, itemized in accordance with the provisions of article VI of contract C.

S.-I. G. shall have at all reasohable times the right to inspect such books of account in which such records are kept and such accounts shall at all times be kept up to date.

B. Patents shall make and send to S.-I. G. at Linden, N. J., by mail quarterly on or before the tenth day of February, May, August, and November of each year a statement in writing taken from its said books showing the total royalties due it from its licensees on account of operations during the preceding quarter ending the last day of December, March, June, and September, respectively, and each such statement shall be accompanied by payment in full of the royalties herein agreed to be paid by Patents on account of operations of all such licensees for such preceding quarter.

ARTICLE VII. LICENSE TO STANDARD OIL DEVELOPMENT CO.

Patents may and shall, upon request of Standard Oil Development Co., enter into an agreement with said company in the form of contract H of this series of agreements, without liability for payment to S.-I. G. of the specified amounts per barrel payable on account of the grant of other licenses, i. e., the amounts of fifty (50) dollars to twenty (20) dollars per barrel as set forth in article V (*a*) hereof and designated herein as "fixed royalties."

ARTICLE VIII. APPOINTMENT OF HYDRO ENGINEERING AS AGENT

S.-I. G. represents that Hydro Engineering & Chemical Co., hereinafter referred to as Engineering, has been appointed agent for the purpose of communicating to licensees of Patents the technical knowledge of S.-I. G.'s stockholders and the grantors of its patent rights, Standard Oil Co. (New Jersey) and I. G. Farbenindustrie Aktiengesellschaft relating to the hydrogenation process.

Patents hereby agrees on request of Engineering to enter into a contract with Engineering in the form of contract D of this series of agreements.

S.-I. G. agrees to accept Engineering as its own agent for the purpose of checking the accounts of all licensees of Patents.

S.-I. G. agrees to credit to the account of Patents one-half (1/2) of the amount charged by Engineering for checking the accounts of Patents' licensees under contract D, which credit shall be in lieu of direct payment of S.-I. G. to said agent.

ARTICLE IX. PRIVILEGE OF INVESTIGATING HYDROGENATION PROCESS

During the period of 6 months after a certain date which shall be named by Engineering, which date, however, shall be not earlier than September 1, 1930, or later than January 1, 1932, S.-I. G. agrees that Patents may afford to those who subscribe to its stock under paragraph 1 of contract A of this series of agreements reasonable opportunity to acquaint themselves with the general nature of the patent situation and the general nature of the hydrogenation process and equipment, of some of the typical costs and results obtainable, and the right to visit experimental and commercial installations for the practice of the hydrogenation process both in the United States and Germany. It is understood that

Digitized by Google

it is the desire and intention of S.-I. G. to enable Patents to afford to such stockholders under this article the fullest possible privileges of investigation consistent with such limitations as S.-I. G. may deem necessary as to withholding certain information from all save actual licensees.

ARTICLE X. CROSS LICENSING

Patents agrees to extend to I. G. Farbenindustrie Aktiengesellschaft and to foreign licensees of S.-I. G. the licenses which it is empowered so to extend by its licensees under paragraphs (b) and (c) of article VII of contracts C and H of this series of agreements.

Patents hereby grants and agrees to grant to S.-I. G. or its nominee, the right to take out patents in all countries of the world outside of the United States in respect of inventions of Patents relating to the hydrogenation process as to which Patents shall have the right to take out patents, and the right to grant licenses under such patents.

ARTICLE XI. RIGHT OF PATENTS TO TERMINATE LICENSES

Patents shall have full right to terminate any or all licenses granted by it to nonstockholders for breach of any of the terms and conditions thereof, or by consent of the parties. Patents shall likewise have the right to terminate, but only for breach, any licenses granted to its stockholders, but only to an aggregate daily capacity equal to 25 percent of the aggregate daily capacity of all licenses which have been granted to stockholders. Patents shall secure the written consent of S.-I. G. before terminating any stockholder licenses, the daily licensed capacity of which when added to the daily licensed capacity of stockholder's licenses theretofore or simultaneously terminated by Patents shall exceed 25 percent of the aggregate daily capacity of all licenses theretofore issued to stockholders, provided that if S.-I. G. refuses such consent, Patents shall be relieved of its obligation to pay to S.-I. G. royalties accruing and payable under such license or licenses proposed to be terminated (except to the extent that the same shall be actually collected by Patents) and S.-I. G. shall have the right to proceed in the name of Patents to collect such royalties from the licensee or licensees in question.

ARTICLE XII. EXPORTS

S.-I. G. agrees that upon the request of Patents it will waive such right as it may have to enforce its exclusive patent rights of foreign countries or any of them for the hydrogenation process against products sold for export by licensees of Patents, and imported into the territory or any part thereof which is covered by said exclusive patent rights.

Patents agrees that at the request of S.-I. G. it will waive such right as it may have to enforce it rights hereunder against products made in foreign countries under license from S.-I. G. and imported into the United States.

ARTICLE XIII. ASSIGNABILITY

This agreement shall not be assignable by either party.

ARTICLE XIV

A certain agreement between the parties hereto dated July 12, 1930, shall be and the same hereby is canceled.

This agreement shall be effective as of July 12, 1930. (Note: Amendments become effective July 1, 1935.)

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this_____ day of _____, 1932.

CONTRACT C—LICENSE CONTRACT BETWEEN HYDRO PATENTS AND LICENSEE.

(See amending agreement, p. 97)

ARTICLE I. PARTIES

The parties to this agreement are Hydro Patents Co., a Delaware corporation, hereinafter referred to as licensor, and the affiliated corporations, hereinafter referred to as licensee, and defined below.

ARTICLE II. DEFINITIONS

A. Wherever the expression "patent rights relating to the Hydrogenation Process", is used in this agreement its meaning is:

Any United States patents, renewals, reissues, extensions of patents and transferable interests in any of the foregoing relating to the hydrogenation process as hereinafter defined, of which licensor now has or may at any time hereafter have the ownership or control in the sense of having the power to grant licenses thereunder.

The expression patent rights relating to the hydrogenation process shall include both—

(1) Those patent rights which relate wholly or principally to that process, and to products of that process, and

(2) Those which are useful in that process and also are useful to a substantial degree in other processes, but in the latter case only insofar as they are useful in that process.

Both (1) and (2) supra shall also include those patent rights in which the real invention is only the substitution of products obtained by the practice of said process and which are specified in subparagraphs 1, 2, and 3 of subdivision B of this article II, for similar products not obtained by the practice of said process even though said patent rights in form purport to cover a new process or product not within said field or not so specified.

The expression patent rights relating to the hydrogenation process shall be interpreted to include patent rights for processes of making aluminum chlorid and other metallic halids for use in the hydrogenation process as hereinbelow defined and interpreted, and not otherwise.

The expression patent rights relating to the hydrogenation process shall be interpreted to include rights under all apparatus and product patents incident to the processes included in this license, but only as hereinbelow defined and interpreted, and shall not otherwise include rights under such apparatus and product patents.

Licensor will supply to licensee upon execution of this license and thereafter from time to time upon request, lists or schedules of all patents coming within this paragraph.

B. Wherever the term "hydrogenation process" is used in this agreement its meaning is:

Any process coming within the hydrocarbon field, as hereafter described, which is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts, to a degree or extent or in a manner to secure definitely determinable hydrogenation or which is used in conjunction with the hydrogenation step for the preparation of raw materials for hydrogenation, including hydrogen, or for such immediate separation and special or limited refining of the products produced directly by the hydrogenation step itself as may be required to fit such products for handling by regular refinery procedure, but the term "hydrogenation" shall not be interpreted to cover interaction of hydrocarbons if such interaction is not substantially influenced by the presence of free hydrogen.

The term Hydrogenation Process shall be interpreted to include processes involving the use of aluminum chlorid or other metallic halids when such process is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts (or other catalysts), to a degree or extent or in a manner to secure definitely determinable hydrogenation, and shall not otherwise include processes involving the use of aluminum chlorid or metallic halids having like effect in said process.

Licensor represents and warrants that I. G. Farbenindustrie Aktiengesellschaft, International Hydrogenation Patents Co., Ltd., and Standard-I. G. Co., agree with and approve of the interpretation of the term hydrogenation process as set forth in the preceding paragraph.

Digitized by Google

The term "hydrocarbon field", as used in the preceding paragraph means:

The treatment of crude petroleum, natural or manufactured bitumens (solid or liquid), peats, shales, lignites, coals, other solid and liquid carbonaceous materials, and/or solid and liquid products made therefrom or contained therein to produce:

1. Those marketable major products which are now commonly produced in the oil industry. The marketable major products here referred to are, for the purposes of this agreement, the following:

1. Crude petroleum.
2. Intermediate hydrocarbon mixtures forming the class known as napthas.
3. Gasoline.
4. Kerosene.
5. Gas oil.
6. Fuel oil.
7. Lubricating oil.
8. Paraffine wax.
9. Highly purified viscous involatile hydrocarbon oils.
10. Saturants, binders, and road oils.
11. Roofing and paving asphalts.
12. Petroleum greases and petrolatum.
13. Sulphuric acid hydrocarbon sludges.
14. Petroleum coke.

2. Those marketable major projects which shall hereafter be commonly produced in the oil industry and shall be of a commercial importance corresponding to the present commercial importance of a present major product as listed in subparagraph 1.

3. Other products, which, though different in chemical structure from said major products of subparagraphs 1 and 2 have the same properties to a degree which permits their use for the same purpose or purposes, but to produce said other products only to the extent that they are used for such purpose or purposes.

(Example.—Accordingly, processes for the production of aromatic hydrocarbons come within the field so far as these products are used as antiknock substances or as motor fuel. They do not come within the field when intended for use as raw materials for dyestuffs and explosives.)

C. Wherever the term "oil charged to the hydrogenation process" is used in this agreement its meaning is: All liquid materials submitted to treatment by the hydrogenation process regardless of origin or of the products produced therefrom, except such materials as may be currently returned, i. e., recycled, in whole or in part, to the hydrogenation apparatus after having been treated therein and without having left the site of the hydrogenation plant or having been subjected to processes other than physical separation and the hydrogenation process itself.

D. Wherever the term "liquefied coal" is used in this agreement its meaning is: All crude liquid products (paraffine included, gases and unconverted carbon and ash excluded) obtained by the hydrogenation of coal, i. e., all solid materials.

E. Wherever the term "barrel" is used in this agreement its meaning is:

Forty-two (42) United States standard gallons of 231 cubic inches, each, measured at 60° Fahrenheit.

F. Wherever the expression "licensee" is used in this agreement it means: Jointly and severally the corporations signing this agreement under the captions "subscribing companies" and "ratifying subsidiaries" appearing at the end hereof.

ARTICLE III. SCOPE OF LICENSE

Licensor, warranting that it has full power to do so, hereby gives and grants unto licensee the nonexclusive right and license to make, use, and sell all arts, machines, manufacturers or compositions of matter coming within said patent rights relating to the hydrogenation process, provided that

1. Licensee shall at no time have a right to sell catalyst material covered by said patent rights relating to the hydrogenation process and shall have no right to manufacture said catalyst material until July 1, 1938;

2. Licensee shall have no right to sell equipment or parts thereof covered by said patent rights relating to the hydrogenation process, except as a part of a sale of the plant of licensee to one licensed by licensor to use said plant;

3. Until after December 31, 1947, licensee shall have no right to employ the inventions herein licensed or any of them for the treatment of an amount of oil charged to the hydrogenation process, or for the production of an amount of liquefied coal totaling for both, more than .... barrels daily average for a quarterly accounting period, except that licensee may treat an amount of oil charged

Digitized by Google

to the hydrogenation process and produce an amount of liquefied coal, totaling for both up to fifty percent in excess of ..... barrels, upon payment to licensor of the regular royalties as hereinafter provided in article VI, and upon payment of an additional royalty of 2 cents per barrel on the excess.

ARTICLE IV. PROTECTION AGAINST UNLICENSED COMPETITION

Licensor agrees that it will, upon the request of licensee, and to the best of licensor's ability, endeavor to protect licensee from competition carried on in infringement of any of the said patent rights relating to the hydrogenation process, by bringing and diligently prosecuting suit against infringers, provided that licensee shall furnish to licensor satisfactory proof of the fact and nature of the infringement, such proofs to be of the character required to substantiate a bill of complaint for patent infringement.

ARTICLE V. OBLIGATION TO DEFEND

(*a*) In the event that licensee is made a defendant in any suit for patent infringement in which the alleged act or acts of infringement involve the conduct by licensee of the operations licensed hereunder, licensee shall immediately notify licensor of such suit, by notice in writing. If within 10 days after receipt of such notice in writing licensor notifies licensee that it will take over the defense of said suit, licensee shall thereupon turn over the entire conduct of such defense to licensor, and licensor shall vigorously prosecute such defense at its own expense; licensee, however, shall have the privilege of being represented therein by counsel of its own selection, and at its own expense.

If licensor fails within the time prescribed to notify licensee that it will take over such defense, licensee shall conduct such defense through counsel of its own selection, in which case licensor shall have the privilege of nominating one member of defense counsel, to be paid by licensor, and if the essence of the alleged infringement lies, for practical commercial purposes, in the conduct of the operations licensed hereunder in a manner, and by the use of apparatus and catalysts having the approval of Hydro Engineering & Chemical Co., licensor shall reimburse licensee for all reasonable expenses incurred by licensee in the conduct of such defense.

(*b*) Licensor neither undertakes nor assumes any liability or responsibility whatsoever, for the payment in whole or in part of any judgment entered as a result of such litigation, or for holding licensee in any way harmless against any injunction, order, or decree which may result from such litigation, the sole obligation of licensor herein being that stated in the preceding paragraph (*a*).

ARTICLE VI

A. *Royalties.*—Licensee agrees to pay as royalty to licensor the 2 cents per barrel special royalty for runs in excess of ..... barrels as provided in paragraph 3 of article III hereof, and as regular running royalties a sum to be determined as follows:

Basic scale.—(*a*) For all liquefied coal produced under this license, 8 cents per barrel.

(*b*) For all oil charged to the hydrogenation process under this license (except liquefied coal on which royalty has been paid under paragraph (*a*) of this article), 5 cents per barrel.

(*c*) For all final products made under this license from either liquefied coal or oil, an amount based upon the quantity and quality of such final products, before treatment by processes other than those licensed hereunder, as follows:

Thirty-eight cents per barrel upon the total lubricating oil content.

Five cents per barrel upon the gasoline content.

Three cents per barrel upon the kerosene content.

Two cents per barrel upon the content of all other products.

The quantity and quality of all final products shall be determined in accordance with schedule A hereto annexed.

Actual scale.—The actual royalties payable to licensor on account of all operations under this license shall be related to the basic scale above given in the following manner: In the case of oil, the quantity unit shall be taken as the oil charged to the hydrogenation process; in the case of coal, as the liquefied coal produced. The actual scale of royalties payable shall be:

For the first 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 104 percent of the basic scale.

Digitized by Google

For the second 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 102 percent of the basic scale.

For the third 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 99 percent of the basic scale.

For the fourth 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 95 percent of the basic scale.

For the fifth 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 90 percent of the basic scale.

For the sixth 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 85 percent of the basic scale.

For the seventh 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 80 percent of the basic scale.

For the eighth 5,000 barrels average per day, or any part thereof, over a quarterly acoounting period, 75 percent of the basic scale.

For all over 40,000 barrels average per day over a quarterly accounting period, 70 percent of the basic scale.

B. *Accounting.*—Licensee shall keep accurate and true books of account in which shall be entered the number of barrels of oil charged to the hydrogenation process under this license and all liquefied coal produced hereunder, and all final products of the licensed process, and the results of the assay of final products of the licensed process in accordance with schedule A hereof. For the purpose of keeping such accurate accounts licensee shall establish, maintain, and operate proper facilities for separately accumulating each class of liquid products in definite batches, upon delivery to and before removal from the hydrogenation plant site. Initial production of liquefied coal shall be separately accumulated. All such batches shall be accurately measured upon delivery to the hydrogenation plant site (in the case of liquefied coal on initial production), and in the case of final products before removal from the site, and a sample of each batch of final products shall be taken in accordance with schedule A, which samples shall be subjected to assay by licensee according to said schedule A. Licensor and its agent, Hydro Engineering & Chemical Co., shall have the right of entry to licensee's plant at any reasonable time for the purpose of checking the maintenance and operation of such facilities and the accuracy of the same, including the right to take and assay samples for purposes of comparison. Licensor and its said agent shall have at all reasonable times the right to inspect such books of account. Such accounts shall at all times be kept up to date, complete entries therein to be made currently as the figures become available.

As soon as licensee shall have undertaken the practice of the licensed operation licensee shall make and send to licensor at Linden, N. J., by mail quarterly on or before the 20th day of January, April, July, and October of each year up to and including January 1948, but not thereafter a statement in writing taken from its said books showing the total quantity of all materials on which royalties are payable, and each such statement shall be accompanied by payment in full, in gold coin of the United States of America of or equal to the standard of weight and fineness as of June 1, 1930, of the royalties herein agreed upon on account of the operation of the licensed process during the preceding quarter; provided that if licensee shall submit with such statement a declaration under seal of licensee together with satisfactory evidence supporting the same to the effect that some specified part or all of the final producted account for and classified as lubricating oil in such accounting was in fact or must be put into consumption as a product of value materially lower than lubricating oil, then licensee may include proffered payment for such product so put into consumption or necessarily to be put into consumption, at the rate of two (2) cents per barrel in lieu of the rate of thirty-eight (38) cents per barrel, and if upon investigation by licensor's said agent, Hydro Engineering & Chemical Co., such evidence or any additional evidence made available by licensee within 30 days shall fully support said declaration, then said proffered payment shall be accepted. If in the judgment of licensor's said agent the evidence made available to it within thirty (30) days after said proffer of payment, shall not fully support said declaration, licensee shall be obligated to make immediate payment for the product in question at the rate of thirty-eight (38) cents per barred upon receipt of written notice as to said decision of licensor's said agent. Following such payment licensor agrees that it will upon request of licensee submit to arbitration the question whether the said declaration was fully supported by said evidence made available. Such arbitration shall be by three arbitrators, one appointed by licensee, one appointed by licensor's said agent, and the third selected by the two first named. The decision of the majority of said arbitrators shall be final and shall become immediately

Digitized by Google

effective and the cost of such arbitration shall be borne by the parties in such proportion as shall be fixed by the majority of the arbitrators. If in the judgment of the majority of the arbitrators it would be equitable to place upon such product as to which the dispute arose a royalty less than thirty-eight (38) cents per barrel and greater than two (2) cents per barrel, the majority of the arbitrators shall have full power to fix such intermediate rate.

ARTICLE VII. CROSS LICENSING

(*a*) Licensee hereby grants and agrees to grant to licensor the right to extend to all other licensees of licensor royalty free, nonexclusive licenses under any patents of the United States the inventions of which are used in the hydrogenation process, which patents or the inventions covered thereby are now or hereafter within the term of this license owned by licensee, or as to which licensee within said term shall be empowered to grant such royalty free right, such nonexclusive license to run for the full term of such patents but to be limited to the practice of the hydrogenation process.

Licensee also grants and agrees to grant to licensor the right to grant to Hydro Engineering & Chemical Co., a nonexclusive license under all patents of the United States covering catalysts the inventions of which are used in the hydrogenation process, which patents or the inventions covered thereby are now or hereafter within the term of this license owned by licensee, or as to which licensee within said term shall be empowered to grant such royalty free right, to manufacture and to sell, for the full term of such patents but only to licensees of licensor, for use in the licensed process, and to use for experimental purposes only, all catalysts covered by said patents.

(*b*) Licensee hereby grants and agrees to grant to licensor the right to extend to I. G. Farbenindustrie Aktiengesellschaft a royalty free, exclusive license, including the right to license others, for Germany under any German patents the inventions of which are used in the hydrogenation process, which patents or the the inventions covered thereby are now or hereafter within the term of this license owned by licensee or as to which licensee within said term shall be empowered to grant such royalty free right, such exclusive license to run for the full term of such patents but to be limited to the practice of the hydrogenation process.

The right of I. G. Farbenindustrie Aktiengesellschaft to license others for Germany under the foregoing shall be subject to the condition that such licenses may be granted only to those who cause to be granted to licensee a similar license under their United States patents (if any) relating to the hydrogenation process.

(*c*) Subject to the exclusive license granted in paragraph (*b*) of this article, licensee hereby grants and agrees to grant to licensor the right to extend to any licensee of the foreign patents of Standard-I. G. Co. relating to the hydrogenation process, royalty-free, nonexclusive licenses under any foreign patents, the inventions of which are used in the hydrogenation process, which foreign patents or the inventions covered thereby, are now or hereafter within the term of this license owned by licensee, or as to which licensee within said term shall be empowered to grant such royalty-free right; provided that such licensee of such foreign patents shall cause to be granted to licensee a license under its patents of the United States relating to the hydrogenation process of the same scope and terms as this agreement.

(*d*) In the event the license herein granted shall be terminated by licensee as provided in article VIII hereof, or by licensor as provided in article XI hereof, nothing contained in this article VII shall be deemed to grant to licensor, or Hydro Engineering & Chemical Co. or I. G. Farbenindustrie Aktiengesellschaft, or an licensee of the foreign patents of Standard-I. G. Co., rights under any future patents of licensee.

ARTICLE VIII. TERM OF AGREEMENT AND LICENSE

This agreement shall be effective as of and shall, unless terminated as provided in article XI hereof, continue in force so long as licensor shall have the right to extend to licensee any rights and licenses under patent rights relating to the hydrogenation process, provided that licensee may terminate this agreement upon two (2) years' written notice served upon licensor at any time after December 31, 1945, but no such termination shall affect any rights acquired by licensor under article VII hereof during the term of such license.

Digitized by Google

ARTICLE IX. ASSIGNABILITY

All of the terms and conditions contained in this agreement shall be binding upon and shall inure to the benefit of the parties hereto and the successors, assigns, and legal representatives of substantially the entire assets or businesses of the respective parties insofar as the said business and assets directly relate to the operation of this agreement, but this agreement shall not be assignable otherwise.

ARTICLE X. COVENANT AGAINST ALIENATION OF STOCK

Licensee agrees that it will not alienate any stock of licensor which it now holds or may hereafter acquire so long as this agreement shall remain in force, and that upon any termination of this agreement prior to December 31, 1947, it will sell to licensor its stock of licensor at one (1) dollar per share.

ARTICLE XI. TERMINATION BY LICENSOR

In case licensee shall breach this agreement by failing to comply with and fulfill any of the promises, covenants, agreements, and stipulations thereof, then in such event licensor may at its option terminate this agreement and all the rights of licensee hereunder, and require licensee to sell to licensor the stock of licensor which it holds at one (1) dollar per share, provided that whenever licensor shall have the right to terminate this agreement as herein specified and shall desire to do so, the procedure shall be as follows, to wit:

(*a*) Licensor shall cause a written notice to be served on licensee, or at the latter's place of business, by registered mail, specifying the breach complained of.

(*b*) Thereupon licensee shall have 30 days after the service of such notice by registered mail in which to remedy the breach stated in said notice, and if within said period of 30 days licensee does so remedy said breach and fully indemnify licensor for any and all consequences thereof, then such notice shall be withdrawn and this agreement shall continue in full force and effect; but if within said period of 30 days licensee does not remedy said breach and fully indemnify licensor for any and all consequences thereof, then licensor shall have the right to declare this agreement to have been terminated as of the date of service of such notice. Such right may be exercised at any time within 2 years thereafter, by service of a second notice to licensee by registered mail declaring licensor's exercise of said right.

In case of termination of this agreement by reason of notice served as above stated, nothing herein contained shall be construed to release licensee from the obligation to pay the royalty accrued up to the date of such termination, or to affect any rights acquired by licensor under article VII hereof during the term off such license or to relieve licensee in any way from the position of infringer if licensee shall have continued after such termination to employ the inventions of said patent rights relating to the hydrogenation process or any of them, unless licensee shall acquire a new license, which new license it shall be the privilege of licensor to grant or refuse.

ARTICLE XII. PROTECTION OF CONFIDENTIAL INFORMATION

Licensee agrees to take reasonable precautions to prevent publication or disclosure, except to licensor and its said agent, Hydro Engineering & Chemical Co., other licensees of licensor, Standard-I. G. Co., and I. G. Farbenindustrie Aktiengesellschaft, the United States Patent Office, and the patent office of any foreign country in which licensee may apply for a patent or patents, of any technical or patent information relating to the hydrogenation process or the production of catalysts therefor, and especially, but without limiting the generality of the foregoing, any technical instruction, knowledge, or information it may obtain from licensor's said agent, Hydro Engineering & Chemical Co.

ARTICLE XIII. LIMITATION ON OBLIGATION TO ACCOUNT

Nothing in this agreement shall be construed as giving licensor the right to call upon licensee to account for the manufacture, use, or sale of catalyst material or equipment, or for the conduct of any operation when these are wholly outside the scope of all exclusive patent rights of licensor.

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this_____day of_____, 193__. In so doing, the corporations signing under the captions "Subscribing Companies" and "Ratifying Subsidiaries" agree jointly and severally with licensor that in the event any

Digitized by Google

corporation or corporations, which, within the term of this agreement shall be at any time, in effect, the sole property of, or the sole owner of, or the sole property of the sole owner of (any one or more of) companies so signing, shall fail to subscribe hereto as joint and several parties with the companies so signing, the companies so signing will indemnify and hold harmless licensor against any and all consequences of such failure.

SCHEDULE A. METHOD FOR ASSAY OF HYDROGENATED OIL AND PREMIUM ROYALTY SCHEDULE

Sampling.—Samples of the final products of the licensed process shall be drawn from the batches in which the same are accumulated according to procedure prescribed in Tentative Methods of Sampling Petroleum and Petroleum Products, A. S. T. M. designation D 270–27T. Specific details shall be agreed upon by the parties concerned, after giving consideration to the physical conditions of the operations in question.

Analysis—(*a*) *Gasoline content.*—A representative sample of oil shall be tested for gasoline content in accordance with Tentative Method of Test for Distillation of Crude Petroleum, A. S. T. M. designation D 285–29T. The temperature at which the naphtha fraction shall be separated shall be 392° F. (200° C.). The percentage by volume thus determined shall be taken as the gasoline content of the oil, and no allowance shall be made for volatility of the naphtha fraction as determined by paragraph 10 of the method in question.

Digitized by Google

(*b*) *Kerosene content.*—The distillation which is in progress when the temperature of 392° F. is reached, as prescribed in the preceding paragraph, shall be continued until a temperature of 482° F. (250° C.) is reached. The fraction distilling between these limits shall be collected in a clean, dry graduate and after cooling to a temperature between 55° F. and 65° F. its volume shall be read and recorded. From this the percentage yield on a water-free basis shall be calculated. The gravity of this fraction shall be determined, and if it is 41.0° A. P. I. (60° F./60° F.) or lighter, it shall be classified as kerosene.

(*c*) *Content of lubricating oil.*—The residue in the distillation flask after removal of fractions boiling below 482° F. (250° C.) at atmospheric pressure shall be allowed to cool and shall then be subjected to vacuum distillation according to the method outlined in Bureau of Mines Bulletin No. 207, pages 19–35. Apparatus and procedure may be simplified by the elimination of details not required in the present assay. The distillation shall be continued until the residue in the flask has a Saybolt Universal viscosity at 100° F. of not less than 245 seconds nor more than 255 seconds. The percentage by volume of this residue shall be classified as lubricating oil. In case the residue from the distillation up to 482° F. at atmospheric pressure has a viscosity of 250 seconds or higher, no vacuum distillation shall be made, and the difference between 100 percent and the total percentage distilling up to 482° F. shall be taken as lubricating oil.

The parties interested (including Hydro Engineering & Chemical Co. and Standard-I. G. Co.) may, if desired, agree on some other method of determining the percentage of "bottoms" having a viscosity of approximately 250 seconds Saybolt Universal at 100° F. provided such method indicates a quantity identical with what would have been determined by rigid adherence to the directions prescribed in Bureau of Mines Bulletin No. 207.

If the percentage of bottoms boiling above 482° F. is less than 10 percent, it shall be assumed that under ordinary conditions no lubricating oil will be recovered from the hydrogenated product and such bottoms may therefore be reported as "other products" without vacuum distillation, but Hydro Patents Co. shall have the right, on notice, to exact full compliance with the vacuum distillation method in any individual cases in which it elects so to do.

(*d*) *Content of other products.*—The difference between 100 percent and the sum of the percentages of gasoline (if any), kerosene (if any), and lubricating oil (if any), shall be classified as other products.

CONTRACT D—AGREEMENT BETWEEN HYDRO PATENTS AND HYDRO ENGINEERING

AMENDED AGREEMENT BETWEEN HYDRO PATENTS AND HYDRO ENGINEERING

(Effective as of July 1, 1935. See amending agreement, p. 102)

ARTICLE I

The parties to this agreement are Hydro Patents Co., a Delaware corporation hereinafter referred to as Patents, and Hydro Engineering & Chemical Co., a Delaware corporation, hereinafter referred to as Engineering.

ARTICLE II

Engineering agrees that it will enter into a contract which shall be effective up to and including December 31, 1947, with each licensee of Patents, such contract to be in the form of contract E of this series of agreements, and Patents agrees that it will require each of its licensees to enter into such a contract as a condition precedent to the grant of the license.

ARTICLE III

Patents hereby grants to Engineering the exclusive right to manufacture and the exclusive right to sell, but only to licensees of Patents, and the nonexclusive right to use for experimental purposes only, all catalysts covered by the patents as to which and to the extent to which Patents is now or shall be during the term of this agreement empowered to grant such right. The said exclusive license to manufacture and sell above granted shall end July 1, 1938, but Engineering shall have a nonexclusive license to manufacture and to sell as aforesaid for the full term of any of said patents.

Digitized by Google

Patents also agrees to extend to Engineering the licenses which it is empowered so to extend by its licensees under the second paragraph of paragraph (*a*) of article VII of contracts C and H of this series of agreements. Engineering hereby grants to Patents a nonexclusive, nontransferable right to grant licenses under its patent rights relating to the hydrogenation process, without accounting to Engineering. The term "patent rights relating to the hydrogenation process" shall always have the same meaning in this agreement as in contract B of this series of agreements.

ARTICLE IV

Engineering represents that it is in possession of or has and will have available to it all of the present and future (until Dec. 31, 1947) experience, technical information, and knowledge of I. G. Farbenindustrie Aktiengesellschaft and Standard Oil Co. (New Jersey) and all corporations which are in effect the sole property of either or both of them in respect of the hydrogenation process, as the same is defined in contract B of this series of agreements, and is authorized to and will acquaint the licensees of Patents with such technical knowledge and experience upon request, in performance of its obligations under contract E of this series of agreements.

ARTICLE V

For the term of this agreement Patents hereby irrevocably appoints Engineering its sole agent for the purposes of inspecting and checking the operations of its licensees. In such capacity, and also as agent of Standard-I. G. Co., Engineering shall have the right to examine the books, records, accounts, and measuring, sampling, and testing facilities and to take and assay samples of final products of each licensee bearing upon the accounting for the licensed operation which each licensee is obligated to make to Patents. Engineering shall send reports of all its activities under this article to Patents and to Standard-I. G. Co.

ARTICLE VI

Engineering shall submit to Patents for approval with reference to all questions of patent infringement, all plans submitted to it by licensees of Patents as to which such questions appear to arise and shall endeavor to keep Patents advised as to all operations of its licensees insofar as the same appear to it to involve new questions of possible patent infringement. Engineering will submit the same information to Standard-I. G. Co., and it is agreed that Engineering shall not approve any plan or practice of a licensee which is objected to by either Patents or Standard-I. G. Co. on the ground of possible patent infringement until the said two parties have discussed the point of difference. If there be no agreement following such discussion, the decision then rests with Patents alone.

ARTICLE VII

Patents agrees to pay to Engineering as compensation in full to it for the services rendered by Engineering to Patents and Standard-I. G. Co. under articles V and VI hereof, the cost of said service plus 10 percent of such cost.

ARTICLE VIII

This agreement shall remain in effect up to and including December 31, 1947.

ARTICLE IX

This agreement shall not be assignable by either party.

ARTICLE X

A certain agreement between the parties hereto dated July 12, 1930, shall be and the same hereby is, canceled.

This agreement shall be effective as of July 12, 1930.

(NOTE.—Amendments become effective July 1, 1935.)

Digitized by Google

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this day of , 1932.

CONTRACT E—AGREEMENT BETWEEN HYDRO ENGINEERING AND LICENSEE

ARTICLE I. PARTIES

The parties to this agreement are Hydro Engineering & Chemical Co., a Delaware corporation, hereinafter referred to as Engineering, and the affiliated corporations, hereinafter referred to as Licensee, and defined below.

ARTICLE II. ENGINEERING SERVICES

(*a*) Licensee agrees to submit to Engineering for examination and technical criticism any and all plans, lists, and specifications for the construction, enlargement, or alteration of equipment for carrying on any part I the operation licensed between licensee and Hydro Patents Co., hereinafter referred to as the licensed operation, and to invite and permit Engineering to inspect all new construction including that incident to alteration or enlargement before such construction is put into use. Licensee agrees that it will not put into use any new construction, including that incident to alteration or enlargement of old construction, for carrying on any part of the licensed operation, until it has been inspected by Engineering. Engineering shall consider, comment upon, and as to questions of patent infringement only shall specifically approve or disapprove all plans, specifications, and lists submitted and shall inspect and report on and similarly approve or disapprove all equipment it is invited to inspect hereunder with reasonable promptness.

Nothing herein contained shall prevent Licensee from carrying on repairs without notice to Engineering or from constructing or operating equipment unfavorably commented upon from a technical standpoint or disapproved from the standpoint of possible patent infringement by Engineering.

(*b*) Engineering will upon request of Licensee render such services as it is able to render in connection with the design and construction of new plants, enlargements, and alterations in addition to the minimum services above provided. For example, upon request of Licensee, Engineering will provide the services of designing and construction engineers (but not construction contractors) for Licensee in connection with the installation of all equipment for practicing the licensed operation and will submit complete plans, estimates, specifications, and lists and supervise the construction of new plants including alterations and enlargements of existing plants, either by Licensee's construction forces or by outside contractors, as Licensee may elect.

(*c*) For all services specified in paragraphs (*a*) and (*b*) of this article which are rendered by Engineering, Licensee agrees to pay as an engineering fee the direct cost of the services rendered plus 4 percent of the cost of the completed installation in the case of entirely new construction or 4 percent of the cost of the enlargement or alteration of existing construction. Payment on account of such services shall be made quarterly on the basis of all expenditures on the construction in question during the current quarter.

(*d*) For the purpose of this article the completed installation shall be understood to mean all construction, improvements, and equipment in the area in which the licensed operation is conducted put in directly for, or as an aid or incident to, the practice of the licensed operation, except the following items which are specifically excluded:

A. Preparation, clearing, grading, draining, or piling of site.

B. Trunk or main sewers.

Digitized by Google

C. Water-supply mains.
D. Boiler plants and steam mains.
E. Electric power generating plants.
F. Storage tanks.

ARTICLE III. CATALYSTS

Engineering agrees to manufacture and maintain stocks of catalysts for use in connection with the licensed operation and upon the request of Licensee will enter into a separate contract in respect of such catalysts including the reclaiming thereof, where practical, such contract to be upon reasonable terms as to quantity and time. The price of all catalysts furnished by Engineering under such contract shall be cost plus 10 percent.

ARTICLE IV. TECHNICAL ASSISTANCE

Engineering represents and warrants that it is in possession of or has and will have available to it the present and future (until Dec. 31, 1947) experience and technical information and knowledge of I. G. Farbenindustrie Aktiengesellschaft and Standard Oil Co., (New Jersey) and all corporations which are in effect the sole property of either or both of them, relating to the licensed operation, and is authorized to transmit such experience and technical information to all licensees of Hydro Patents Co. Engineering agrees to give Licensee technical assistance requested in connection with the maintenance, operation, and repair of equipment and will endeavor upon request from time to time to keep Licensee informed as to all technical developments and experience known to Engineering and of use to Licensee in connection with the carrying on of the licensed operation.

For any services rendered at Licensee's request under the terms of this article, Licensee agrees to pay Engineering the cost thereof plus 10 percent.

ARTICLE V. INSPECTION OF PLANT, EQUIPMENT, ETC.

Engineering shall have access to any and all parts of plants belonging to Licensee in which parts any part of the licensed operation is conducted at all reasonable hours for the purpose of inspecting the equipment used and the operations conducted therein and Licensee agrees to supply to Engineering, for the benefit of all licensees of Hydro Patents Co., any information in its possession concerning the performance of such equipment and the nature and results and all technical details of the operations conducted.

As the agent of Standard-I. G. Co., and Hydro Patents Co., Engineering shall have the right to examine the books, records, accounts, and measuring, sampling, and product-testing facilities, equipment, and methods, and to take and assay samples of final products of Licensee bearing upon the accounting for the licensed operation which it is obligated to make to its licensor, Hydro Patents Co., and may send copies of all its reports respecting such examinations and samples to Hydro Patents Co., and to Standard-I. G. Co.

ARTICLE VI. PROTECTION AND EXCHANGE OF INFORMATION

Licensee agrees to take all reasonable precautions to prevent publication or other disclosure of any technical instruction, knowledge, and information it may obtain from Engineering. Licensee further agrees to communicate to Engineering, for the benefit of all licensees of Hydro Patents Co., any inventions or improvements relating to the licensed operation and any technical or patent information relative thereto of which it may obtain knowledge.

ARTICLE VII. TERM OF AMENDMENT

This agreement shall remain in effect up to and including December 31, 1947.

ARTICLE VIII. LICENSEE

Wherever the expression Licensee is used in this agreement it means: Jointly and severally the corporations signing this agreement under the captions "Subscribing Companies" and "Ratifying Subsidiaries" appearing at the end hereof.

ARTICLE IX. ASSIGNABILITY

This agreement shall not be assignable by either party.

In witness whereof the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this _____ day of _____, 193__. In so

Digitized by Google

doing the corporations signing under the captions "Subscribing Companies" and "Ratifying Subsidiaries" agree jointly and severally with Engineering that in the event any corporation or corporations, which, within the term of this agreement shall be at any time, in effect, the sole property of, or the sole owner of, or the sole property of the sole owner of (anyone or more of) companies so signing, shall fail to subscribe hereto as joint and several parties with the companies so signing, the companies so signing will indemnify and hold harmless Engineering against any and all consequence of such failure.

CONTRACT F—AGREEMENT BETWEEN HYDRO PATENTS AND STANDARD OIL DEVELOPMENT, RESALE OF STOCK

Agreement made this -------- day of ----------, 1930, between Hydro Patents Co., a Delaware corporation, hereinafter referred to as Patents, and Standard Oil Development Co., a Delaware corporation, hereinafter referred to as Development.

1. In addition to the three hundred and thirty-four (334) shares of Patents' stock now owned and held by Development, Patents hereby sells and Development hereby purchases 2,976 shares of Patents' stock. Said 2,976 shares of Patents' stock shall be delivered to Development upon payment of the purchase price thereof, which purchase price shall be three (3) dollars per share.

Digitized by Google

2. Patents agrees with Development that at all times hereafter (until Dec. 31, 1947), it will sell additional shares of its stock to Development at the rate of one share thereof for each barrel of daily capacity of hydrogenation equipment which the refining interests of Standard Oil Co. (New Jersey) complete within the United States, after the completion of 3,310 barrels, corresponding to the 3,310 shares referred to in paragraph 1 hereof. The daily capacity of hydrogenation equipment referred to shall be the nominal or rated daily capacity, as fixed by Hydro Engineering & Chemical Co., provided that this figure is consistent with the ratings made by Hydro Engineering & Chemical Co. in other cases and is not unreasonable. The expression "refining interest of Standard Oil Co. (New Jersey)" as used in this agreement shall mean that company (including any company which is in effect its sole property), together with any and all subsidiary corporations.

3. The price of such stock sold under paragraph 2 hereof shall be the difference between fifty-three (53) dollars per share and the amount which Patents would have been obligated to pay Standard-I. G. Co. under contract B of this series of agreements for and on account of the grant at that time of the simultaneous license which would have accompanied the sale of such stock to any stockholder save Development.

4. Development agrees with Patents that in the future it will purchase on the terms specified in paragraphs 2 and 3 of this agreement, the stock of Patents which Patents is therein obligated to sell to Development. Development represents that the United States refining interests of Standard Oil Co. (New Jersey) are now engaged in constructing hydrogenation equipment to the extent of at least 10,000 barrels of daily capacity.

5. This agreement shall not be assignable by either party.

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested the day and year first above written.

CONTRACT G—AGREEMENT BETWEEN HYDRO PATENTS AND STANDARD OIL DEVELOPMENT—OPTION ON ENGINEERING STOCK

AMENDED AGREEMENT BETWEEN HYDRO PATENTS AND STANDARD OIL DEVELOPMENT

(Effective as of July 12, 1930)

Agreement made this_____day of_____1932, between Hydro Patents Co., a Delaware corporation, hereinafter referred to as Patents, and Standard Oil Development Co., a Delaware corporation, hereinafter referred to as Development.

In consideration of the sum of one (1) dollar and other good and valuable considerations, the receipt and sufficiency whereof is hereby acknowledged, Development hereby grants to Patents an option which may be exercised at any time within the period of 3 years next following the installation in the United States of a total of 50,000 barrels per day of capacity of hydrogenation equipment, to purchase up to but not in excess of forty-five percent (45%) of the then outstanding capital stock of Hydro Engineering & Chemical Co. from Development, the purchase price to be the book value of such stock at the time said option is exercised. The daily capacity of hydrogenation equipment referred to shall be the nominal or rated daily capacity as fixed by Hydro Engineering & Chemical Co.

This option is granted on condition that at the time it is exercised Patents shall enter into an agreement that it will not dispose of any stock of Hydro Engineering & Chemical Co. which it so purchases until it has offered to sell the same to

Digitized by Google

Development at the book value thereof, and Development has had a period of thirty (30) days within which to consider such offer.

This option is not assignable.

A certain agreement between the parties hereto relating to the same subject matter and dated July 12, 1930, shall be, and the same hereby is, canceled.

This agreement shall be effective as of July 12, 1930.

In witness whereof, Development has caused this agreement to be executed by its proper officers thereunto duly authorized, and its corporate seal to be affixed and attested the day and year first above written.

CONTRACT H—LICENSE FROM HYDRO PATENTS TO STANDARD OIL DEVELOPMENT

AMENDED LICENSE CONTRACT BETWEEN HYDRO PATENTS AND STANDARD OIL DEVELOPMENT

(Effective as of July 1, 1935. See amending agreement, p. 103)

ARTICLE I. PARTIES

The parties to this agreement are Hydro Patents Co., a Delaware corporation, hereinafter referred to as licensor, and the affiliated corporations, hereinafter referred to as licensee and defined below.

ARTICLE II. DEFINITIONS

A. Wherever the expression "patent rights relating to the hydrogenation process" is used in this agreement its meaning is:

Any United States patents, renewals, reissues, extensions of patents, and transferable interests in any of the foregoing relating to the hydrogenation process as hereinafter defined, of which licensor now has or may at any time hereafter have the ownership or control in the sense of having the power to grant licenses thereunder.

The expression "patent rights" relating to the hydrogenation process shall include both—

(1) Those patent rights which relate wholly or principally to that process, and to products of that process; and

(2) Those which are useful in that process and also are useful to a substantial degree in other processes, but in the latter case only insofar as they are useful in that process.

Both (1) and (2), supra, shall also include those patent rights in which the real invention is only the substitution of products obtained by the practice of said process and which are specified in subparagraphs 1, 2, and 3 of subdivision B of this article II, for similar products not obtained by the practice of said process even though said patent rights in form purport to cover a new process or product not within said field or not so specified.

The expression "patent rights" relating to the hydrogenation process shall be interpreted to include patent rights for processes of making aluminum chloride and other metallic halides for use in the hydrogenation process as hereinbelow defined and interpreted, and not otherwise.

The expression "patent rights" relating to the hydrogenation process shall be interpreted to include rights under all apparatus and product patents incident to the processes included in this license, but only as herein below defined and interpreted, and shall not otherwise include rights under such apparatus and product patents.

Digitized by Google

Licensor will supply to licensee upon execution of this license, and thereafter from time to time upon request, lists or schedules of all patents coming within this paragraph.

B. Wherever the term "hydrogenation process" is used in this agreement its meaning is:

Any process coming within the hydrocarbon field, as hereafter described, which is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts, to a degree or extent or in a manner to secure definitely determinable hydrogenation or which is used in conjunction with the hydrogenation step for the preparation of raw materials for hydrogenation, including hydrogen, or for such immediate separation and special or limited refining of the products produced directly by the hydrogenation step itself as may be required to fit such products for handling by regular refinery procedure; but the term "hydrogenation" shall not be interpreted to cover interaction of hydrocarbons if such interaction is not substantially influenced by the presence of free hydrogen.

The term "hydrogenation process" shall be interpreted to include processes involving the use of aluminum chloride or other metallic halides when such process is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts (or other catalysts), to a degree or extent or in a manner to secure definitely determinable hydrogenation, and shall not otherwise include processes involving the use of aluminum chloride or metallic halides having like effect in said process.

The term "hydrocarbon field," as used in the preceding paragraph means:

The treatment of crude petroleum, natural or manufactured bitumens (solid or liquid), peats, shales, lignites, coals, other solid and liquid carbonaceous materials, and/or solid and liquid products made therefrom or contained therein to produce:

1. Those marketable major products which are now commonly produced in the oil industry. The marketable major products here referred to are, for the purposes of this agreement, the following:

(1) Crude petroleum.
(2) Intermediate hydrocarbon mixtures forming the class known as naphthas.
(3) Gasoline.
(4) Kerosene.
(5) Gas oil.
(6) Fuel oil.
(7) Lubricating oil.
(8) Paraffine wax.
(9) Highly purified viscous involatile hydrocarbon oils.
(10) Saturants, binders and road oils.
(11) Roofing and paving asphalts.
(12) Petroleum greases and petrolatum.
(13) Sulphuric acid hydrocarbon sludges.
(14) Petroleum coke.

2. Those marketable major products which shall hereafter be commonly produced in the oil industry and shall be of a commercial importance corresponding to the present commercial importance of a present major product as listed in subparagraph 1.

3. Other products which, though different in chemical structure from said major products of subparagraphs 1 and 2 have the same properties to a degree which permits their use for the same purpose or purposes, but to produce said other products only to the extent that they are used for such purpose or purposes.

(Example: Accordingly, processes for the production of aromatic hydrocarbons come within the field so far as these products are used as antiknock substances or as motor fuel. They do not come within the field when intended for use as raw materials for dyestuffs and explosives.)

C. Wherever the term "oil charged to the hydrogenation process" is used in this agreement its meaning is: All liquid materials submitted to treatment by the hydrogenation process regardless of origin or of the products produced therefrom, except such materials as may be currently returned, i. e., recycled, in whole or in part, to the hydrogenation apparatus after having been treated therein and without having left the site of the hydrogenation plant or having been subjected to processes other than physical separation and the hydrogenation process itself.

D. Wherever the term "liquefied coal" is used in this agreement its meaning is: All crude liquid products (paraffine included, gases and unconverted carbon and ash excluded) obtained by the hydrogenation of coal, i. e., all solid materials.

E. Wherever the term "barrel" is used in this agreement its meaning is:

Forty-two United States standard gallons of 231 cubic inches, each, measured at 60° Fahrenheit

Digitized by Google

F. Wherever the expression "licensee" is used in this agreement it means: Jointly and severally the corporations signing this agreement under the captions "Subscribing companies" and "Ratifying subsidiaries" appearing at the end hereof.

ARTICLE III. SCOPE OF LICENSE

Licensor, warranting that it has full power to do so, hereby gives and grants unto the Licensee the nonexclusive, unlimited right and license to make, use and sell, all arts, machines, manufactures, or compositions of matter coming within said patent rights relating to the hydrogenation process, provided that—

1. Licensee shall at no time have a right to sell catalyst material covered by said patent rights relating to the hydrogenation process and shall have no right to manufacture said catalyst material until July 1, 1938.

2. Licensee shall have no right to sell equipment or parts thereof covered by said patent rights relating to the hydrogenation process, except as a part of a sale of the plant of licensee to one licensed by licensor to use said plant.

ARTICLE IV. PROTECTION AGAINST UNLICENSED COMPETITION

Licensor agrees that it will, upon the request of licensee, and to the best of licensor's ability, endeavor to protect licensee from competition carried on in infringement of any of the said patent rights relating to the hydrogenation process by bringing and diligently prosecuting suit against infringers, provided that licensee shall furnish to licensor satisfactory proof of the fact and nature of the infringement, such proofs to be of the character required to substantiate a bill of complaint for patent infringement. The expense of all such litigation shall be borne by licensee.

ARTICLE V. NO OBLIGATION TO DEFEND

It is understood that licensor assumes no obligation to defend licensee in the event licensee is made a defendant in any suit for patent infringement in which the alleged act or acts of infringement involve the conduct by licensee of the operations licensed hereunder. Also, licensor neither undertakes nor assumes any liability or responsibility whatsoever for the payment in whole or in part of any judgment entered as a result of such litigation, or for holding licensee in any way harmless against any injunction, order, or decree which may result from such litigation. However, within 10 days after any such suit shall have been commenced, licensee shall notify licensor of such suit by notice in writing. While the defense of such suit shall be conducted and controlled by licensee, licensor shall have the privilege of being represented therein by counsel of its own selection, and at its own expense.

ARTICLE VI

A. *Royalties.*—Licensee agrees to pay as regular running royalties to licensor a sum to be determined as follows:

Basic scale.—(*a*) For all liquefied coal produced under this license, 8 cents per barrel.

(*b*) For all oil charged to the hydrogenation process under this license (except liquefied coal on which royalty has been paid under par. (*a*) of this article), 5 cents per barrel.

(*c*) For all final products made under this license from either liquefied coal or oil, an amount based upon the quantity and quality of such final products, before treatment by processes other than those licensed hereunder, as follows:

Thirty-eight cents per barrel upon the total lubricating-oil content.

Five cents per barrel upon the gasoline content.

Three cents per barrel upon the kerosene content.

Two cents per barrel upon the content of all other products.

The quantity and quality of all final products shall be determined in accordance with schedule A hereto annexed.

Actual scale.—The actual royalties payable to licensor on account of all operations under this license, shall be related to the basic scale above given in the following manner: In the case of oil, the quantity unit shall be taken as the oil charged to the hydrogenation process; in the case of coal, as the liquefied coal produced. The actual scale of royalties payable shall be:

For the first 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 104 percent of the basic scale.

For the second 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 102 percent of the basic scale.

Digitized by Google

For the third 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 99 percent of the basic scale.

For the fourth 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 95 percent of the basic scale.

For the fifth 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 90 percent of the basic scale.

For the sixth 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 85 percent of the basic scale.

For the seventh 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 80 percent of the basic scale.

For the eighth 5,000 barrels average per day, or any part thereof, over a quarterly accounting period, 75 percent of the basic scale.

For all over 40,000 barrels average per day over a quarterly accounting period, 70 percent of the basic scale.

B. *Accounting.*—Licensee shall keep accurate and true books of account in which shall be entered the number of barrels of oil charged to the hydrogenation process under this license and all liquefied coal produced hereunder, and all final products of the licensed process, and the results of the assay of final products of the licensed process in accordance with schedule A hereof. For the purpose of keeping such accurate accounts licensee shall establish, maintain, and operate proper facilities for separately accumulating each class of liquid products in definite batches, upon delivery to and before removal from the hydrogenation plant site. Initial production of liquefied coal shall be separately accumulated. All such batches shall be accurately measured upon delivery to the hydrogenation plant site (in the case of liquefied coal on initial production) and in the case of final products before removal from the site and a sample of each batch of final products shall be taken in accordance with schedule A, which samples shall be subjected to assay by licensee according to said schedule A. Licensor and its agent, Hydro Engineering & Chemical Co., shall have the right of entry to licensee's plant at any reasonable time for the purpose of checking the maintenance and operation of such facilities and the accuracy of the same, including the right to take and assay samples for purposes of comparison. Licensor and its said agent shall have at all reasonable times the right to inspect such books of account. Such accounts shall at all times be kept up to date, complete entries therein to be made currently as the figures become available.

As soon as licensee shall have undertaken the practice of the licensed operation licensee shall make and send to licensor at Linden, N. J., by mail quarterly on or before the 20th day of January, April, July, and October of each year up to and including January 1948, but not thereafter, a statement in writing taken from its said books showing the total quantity of all materials on which royalties are payable, and each such statement shall be accompanied by payment in full, in gold coin of the United States of America of or equal to the standard weight and fineness as of June 1, 1930, of the royalties h rein agreed upon on account of the operation of the licensed process during the preceding quarter; provided that if licensee shall submit with such statement a declaration under seal of licensee together with satisfactory evidence supporting the same to the effect that some specified part or all of the final product accounted for and classified as lubricating oil in such accounting was in fact or must be put into consumption as a product of value materially lower than lubricating oil, then licensee may include proffered payment for such product so put into consumption or necessarily to be put into consumption, at the rate of 2 cents per barrel in lieu of the rate of 38 cents per barrel, and if upon investigation by licensor's said agent, Hydro Engineering & Chemical Co., such evidence or any additional evidence made available by licensee within 30 days shall fully support said declaration, then said proffered payment shall be accepted. If in the judgment of licensor's said agent the evidence made available to it within 30 days after said proffer of payment, shall not fully support said declaration, licensee shall be obligated to make immediate payment for the product in question at the rate of 38 cents per barrel upon receipt of written notice as to said decision of licensor's said agent. Following such payment licensor agrees that it will upon request of licensee submit to arbitration the question whether the said declaration was fully supported by said evidence made available. Such arbitration shall be by three arbitrators, one appointed by licensee, one appointed by licensor's said agent, and the third selected by the two first named. The decision of the majority of said arbitrators shall be final and shall become immediately effective, and the cost of such arbitration shall be borne by the parties in such proportion as shall be fixed by the majority of the arbitrators. If in the judgment of the majority of the abritrators it

Digitized by Google

would be equitable to place upon such products as to which the dispute arose a royalty less than 38 cents per barrel and greater than 2 cents per barrel, the majority of the arbitrators shall have full power to fix such intermediate rate.

ARTICLE VII. CROSS LICENSING

(*a*) Licensee hereby grants and agrees to grant to licensor the right to extent to all other licensees of licensor royalty-free, nonexclusive licenses under any patents of the United States, the inventions of which are used in the hydrogenation process, which patents or the inventions covered thereby are now or hereafter within the term of this license owned by licensee, or as to which licensee within said term shall be empowered to grant such right, such nonexclusive license to run for the full term of such patents but to be limited to the practice of the hydrogenation process.

Licensee also grants and agrees to grant to licensor the right to grant to Hydro-Engineering & Chemical Co., a nonexclusive license under all patents of the United States covering catalysts, the inventions of which are used in the hydrogenation process, which patents or the inventions covered thereby are now or hereafter within the term of this license owned by licensee, or as to which licensee within said term shall be empowered to grant such right, to manufacture and to sell for the full term of such patents but only to licensees of licensor, for use in the licensed process, and to use for experimental purposes only, all catalysts covered by said patents.

(*b*) Licensee hereby grants and agrees to grant to licensor the right to extend to I. G. Farbenindustrie Aktiengesellschaft a royalty-free, exclusive license, including the right to license others, for Germany under any German patents, the inventions of which are used in the hydrogenation process, which patents or the inventions covered thereby are now or hereafter within the term of this license owned by licensee or as to which licensee within said term shall be empowered to grant such right, such exclusive license to run for the full term of such patents but to be limited to the practice of the hydrogenation process.

The right of I. G. Farbenindustrie Aktiengesellschaft to license others for Germany under the foregoing shall be subject to the condition that such licenses may be granted only to those who cause to be granted to licensee a similar license under their United States patents (if any) relating to the hydrogenation process.

(*c*) Subject to the exclusive license granted in paragraph (*b*) of this article, licensee hereby grants and agrees to grant to licensor the right to extend to any licensee of the foreign patents of Standard-I. G. Co. relating to the hydrogenation process, royalty-free, nonexclusive licenses under any foreign patents, the inventions of which are used in the hydrogenation process, which foreign patents or the inventions covered thereby, are now or hereafter within the term of this license owned by licensee, or as to which licensee within said term shall be empowered to grant such right; provided, that such licensee of such foreign patents shall cuase to be granted to licensee a license under its patents of the United States relating to the hydrogenation process of the same scope and terms as this agreement.

(*d*) In the event the license herein granted shall be terminated by licensee as provided in article VIII hereof, or by licensor as provided in article XI hereof, nothing contained in this article VII shall be deemed to grant to licensor, or Hydro-Engineering & Chemical Co. or I. G.-Farbenindustrie Aktiengesellschaft, or any licensee of the foreign patents of Standard-I. G. Co., rights under any future patents of licensee.

ARTICLE VIII. TERM OF AGREEMENT AND LICENSE

This agreement shall be effective as of July 12, 1930, and shall, unless terminated as provided in article XI hereof, continue in force so long as licensor shall have the right to extend to licensee any rights and licenses under patent rights relating to the hydrogenation process, provided that licensee may terminate this agreement upon 2 years' written notice served upon licensor at any time after December 31, 1945, but no such termination shall affect any rights acquired by licensor under article VII hereof during the term of such license.

ARTICLE IX. ASSIGNABILITY

All of the terms and conditions contained in this agreement shall be binding upon and shall inure to the benefit of the parties hereto and the successors, assigns, and legal representatives of substantially the entire assets or businesses of the

Digitized by Google

respective parties insofar as the said business and assets directly relate to the operation of this agreement, but this agreement shall not be assignable otherwise.

ARTICLE X. COVENANT AGAINST ALIENATION OF STOCK

Licensee agrees that it will not alienate any stock of licensor which it now holds or may hereafter acquire so long as this agreement shall remain in force, and that upon any termination of this agreement prior to December 31, 1947, it will sell to licensor its stock of licensor at $1 per share.

ARTICLE XI. TERMINATION BY LICENSOR

In case licensee shall breach this agreement by failing to comply with and fulfill any of the promises, covenants, agreements, and stipulations thereof, then in such event licensor may at its option terminate this agreement and all of the rights of licensee hereunder, and require licensee to sell to licensor the stock of licensor which it holds at $1 per share, provided that whenever licensor shall have the right to terminate this agreement as herein specified and shall desire to do so, the procedure shall be as follows, to wit:

(*a*) Licensor shall cause a written notice to be served on licensee, or at the latter's place of business, by registered mail, specifying the breach complained of.

(*b*) Thereupon licensee shall have 30 days after the service of such notice by registered mail in which to remedy the breach stated in said notice, and if within said period of 30 days licensee does so remedy said breach, and fully indemnify licensor for any and all consequences thereof, then such notice shall be withdrawn and this agreement shall continue in full force and effect; but if within said period of 30 days licensee does not remedy said breach and fully indemnify licensor for any and all consequences thereof, then licensor shall have the right to declare this agreement to have been terminated as of the date of service of such notice. Such right may be exercised at any time within 2 years thereafter, by service of a second notice to licensee by registered mail declaring licensor's exercise of said right.

In case of termination of this agreement by reason of notice served as above stated, nothing herein contained shall be construed to release licensee from the obligation to pay the royalty accrued up to the date of such termination, or to affect any rights acquired by licensor under article VII hereof, during the term of such license, or to relieve licensee in any way from the position of infringer if licensee shall have continued after such termination to employ the inventions of said patent rights relating to the hydrogenation process or any of them, unless licensee shall acquire a new license which new license it shall be the privilege of licensor to grant or refuse.

ARTICLE XII. PROTECTION OF CONFIDENTIAL INFORMATION

Licensee agrees to take reasonable precautions to prevent publication or disclosure, except to licensor and its said agent, Hydro Engineering & Chemical Co., other licensees of licensor, Standard-I. G. Co. and I. G. Farbenindustrie Aktiengesellschaft, the United States Patent Office, and the patent office of any foreign country in which licensee may apply for a patent or patents, of any technical or patent information relating to the hydrogenation process or the production of catalysts therefor, and especially, but without limiting the generality of the foregoing, any technical instruction, knowledge or information it may obtain from licensor's said agent, Hydro Engineering & Chemical Co.

ARTICLE XIII. LIMITATION ON OBLIGATION TO ACCOUNT

Nothing in this agreement shall be construed as giving licensor the right to call upon licensee to account for the manufacture, use, or sale of catalyst material or equipment or for the conduct of any operation when these are wholly outside the scope of all exclusive patent rights of licensor.

ARTICLE XIV. TERMINATION OF PRIOR LICENSE

A certain license agreement between the parties hereto dated July 12, 1930, shall be and the same hereby is canceled.

This agreement shall be effective as of July 12, 1930. (Note.—Amendments become effective July 1, 1935.)

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this ———— day of ————————, 1932. In so

Digitized by Google

doing, the corporations signing under the captions "Subscribing companies" and "Ratifying subsidiaries" agree jointly and severally with licensor that in the event any corporation or corporations, which, within the term of this agreement shall be at any time, in effect, the sole property of, or the sole owner of, or the sole property of the sole owner of (any one or more of) companies so signing, shall fail to subscribe hereto as joint and several parties with the companies so signing, the companies so signing will indemnify and hold harmless licensor against any and all consequences of such failure.

SCHEDULE A. METHOD FOR ASSAY OF HYDROGENATED OIL AND PREMIUM ROYALTY SCHEDULE

Sampling.—Samples of the final products of the licensed process shall be drawn from the batches in which the same are accumulated according to procedure prescribed in "Tentative Methods of Sampling Petroleum and Petroleum Products" A. S. T. M. Designation D 270–27T. Specific details shall be agreed upon by the parties concerned, after giving consideration to the physical conditions of the operations in question.

Analysis—(*a*) *Gasoline content.*—A representative sample of oil shall be tested for gasoline content in accordance with "Tentative Method of Test for Distillation of Crude Petroleum" A. S. T. M. Designation D 285–29T. The temperature at which the naphtha fraction shall be separated shall be 392° F. (200° C.). The percentage by volume thus determined shall be taken as the gasoline content

Digitized by Google

of the oil and no allowance shall be made for volatility of the naphtha fraction as determined by paragraph 10 of the method in question.

(*b*) *Kerosene content.*—The distillation which is in progress when the temperature of 392° F. is reached, as prescribed in the preceding paragraph, shall be continued until a temperature of 482° F. (250° C.) is reached. The fraction distilling between these limits shall be collected in a clean, dry graduate and after cooling to a temperature between 55° F. and 65° F. its volume shall be read and recorded. From this the percentage yield on a water-free basis shall be calculated. The gravity of this fraction shall be determined and if it is 41.0° A. P. I. (60° F./60° F.) or lighter, it shall be classified as kerosene.

(*c*) *Content of lubricating oil.*—The residue in the distillation flask after removal of fractions boiling below 482° F. (250° C.) at atmospheric pressure shall be allowed to cool and shall then be subjected to vacuum distillation according to the method outlined in Bureau of Mines Bulletin No. 207, pages 19–35. Apparatus and procedure may be simplified by the elimination of details not required in the present assay. The distillation shall be continued until the residue in the flask has a saybolt universal viscosity at 100° F. of not less than 245 seconds nor more than 255 seconds. The percentage by volume of this residue shall be classified as lubricating oil. In case the residue from the distillation up to 482° F. at atmospheric pressure has a viscosity of 250 seconds or higher, no vacuum distillation shall be made and the difference between 100 percent and the total percentage distilling up to 482° F. shall be taken as lubricating oil.

The parties interested (including Hydro Engineering & Chemical Co. and Standard-I. G. Co.) may if desired, agree on some other method of determining the percentage of "bottoms" having a viscosity of approximately 250 seconds saybolt universal at 100° F. provided such method indicates a quantity identical with what would have been determined by rigid adherence to the directions prescribed in Bureau of Mines Bulletin No. 207.

If the percentage of bottoms boiling above 482° F. is less than 10 percent, it shall be assumed that under ordinary conditions no lubricating oil will be recovered from the hydrogenated product and such bottoms may therefore be reported as "other products" without vacuum distillation, but Hydro Patents Co. shall have the right, on notice, to exact full compliance with the vacuum distillation method in any individual cases in which it elects so to do.

(*d*) *Content of other products.*—The difference between 100 percent and the sum of the percentages of gasoline (if any), kerosene (if any), and lubricating oil (if any), shall be classified as other products.

CONTRACT I—AGREEMENT BETWEEN HYDRO ENGINEERING AND STANDARD OIL DEVELOPMENT

AMENDED AGREEMENT BETWEEN HYDRO ENGINEERING AND STANDARD OIL DEVELOPMENT

(Effective as of July 12, 1930)

ARTICLE I. PARTIES

The parties of this agreement are Hydro Engineering & Chemical Co., a Delaware corporation, hereinafter referred to as "Engineering", and the affiliated corporations, hereinafter referred to as "Licensee" and defined below.

ARTICLE II. ENGINEERING SERVICES

(*a*) Licensee agrees to submit to engineering for examination and technical criticism any and all plans, lists, and specifications for the construction, enlargement, or alteration of equipment for carrying on any part of the operation licensed by agreement between licensee and Hydro Patents Co., hereinafter referred to as the "Licensed operation," and to invite and permit engineering to inspect all new construction, including that incident to alteration or enlargement before such construction is put into use. Licensee agrees that it will not put into use any new construction, including that incident to alteration or enlargement of old construction, for carrying on any part of the licensed operation, until it has been inspected by engineering. Engineering shall consider, comment upon, and as to questions of patent infringement only, shall specifically approve or disapprove all plans, specifications, and list submitted and shall inspect and report on and similarly approve or disapprove all equipment it is invited to inspect hereunder with reasonable promptness.

Digitized by Google

Nothing herein contained shall prevent licensee from carrying on repairs without notice to engineering, or from constructing or operating equipment unfavorably commented upon from a technical standpoint or disapproved from the standpoint of possible patent infringement by engineering.

(*b*) Engineering will upon request of licensee render such services as it is able to render in connection with the design and construction of new plants, enlargements, and alterations in addition to the minimum services above provided. For example, upon request of licensee, engineering will provide the services of designing and construction engineers (but not construction contractors) for licensee in connection with the installation of all equipment for practicing the licensed operation and will submit complete plans, estimates, specifications, and lists and supervise the construction of new plants, including alterations and enlargements of existing plants, either by licensee's construction forces or by outside contractors, as licensee may elect.

(*c*) For all services specified in paragraphs (*a*) and (*b*) of this article which are rendered by engineering, licensee agrees to pay as an engineering fee the direct cost of the services rendered plus 4 percent of the cost of the completed installation in the case of entirely new construction or 4 percent of the cost of the enlargement or alteration of existing construction. Payment on account of such services shall be made quarterly on the basis of all expenditures on the construction in question during the current quarter.

(*d*) For the purpose of this article the completed installation shall be understood to mean all construction, improvements, and equipment in the area in which the licensed operation is conducted put in directly for, or as an aid or incident to, the practice of the licensed operation, except the following items which are specifically excluded:

A. Preparation, clearing, grading, draining, or piling of site.
B. Trunk or main sewers.
C. Water-supply mains.
D. Boiler plants and steam mains.
E. Electric power generating plants.
F. Storage tanks.

ARTICLE III. CATALYSTS

Engineering agrees to manufacture and maintain stocks of catalysts for use in connection with the licensed operation and upon the request of licensee will enter into a separate contract in respect of such catalysts, including the reclaiming thereof, where practical, such contract to be upon reasonable terms as to quantity and time. The price of all catalysts furnished by engineering under such contract shall be cost plus 10 percent.

ARTICLE IV. TECHNICAL ASSISTANCE

Licensee represents that it is in possession of or has and will have available to it the present and future (until Dec. 31, 1947,) experience and technical information and knowledge of I. G. Farbenindustrie Aktiengesellschaft and Standard Oil Co. (New Jersey) and any corporations which are in effect the sole property of either or both of them relating to the licensed operation and is authorized to and will make available such experience and technical information, as well as any experience and technical information relating to the licensed operation originating with it, to engineering without charge.

Engineering agrees to make available to licensee, without charge, upon request, all technical experience and information which it may hereafter possess relating to the design, maintenance, operation, and repair of equipment, for the practice of the licensed process and upon request of licensee it will cooperate directly with any foreign organization occupying a position in respect of foreign licenses of the patent rights of Standard-I. G. Co. relating to hydrogenation similar to the position of engineering in respect of the services to such patent licensees within the United States.

Nothing herein contained shall be construed to relieve licensee of the payments required under paragraph (*c*) of article II hereof.

ARTICLE V. INSPECTION OF PLANT, EQUIPMENT, ETC.

Engineering shall have access to any and all parts of plants operated under this license in which parts any part of the licensed operation is codnucted at all reasonable hours for the purpose of inspecting the equipment used and the operations conducted therein.

Digitized by Google

As the agent of Standard-I. G. Co. and Hydro Patents Co. engineering shall have the right to examine the books, records, accounts, and measuring, sampling and product testing facilities, equipment and methods, and to take and assay samples of final products of licensee bearing upon the accounting for the licensed operation which it is obligated to make to its licensor, Hydro Patents Co., and may send copies of all its reports respecting such examinations and samples to Hydro Patents Co. and to Standard-I. G. Co.

ARTICLE VI. TERM OF AGREEMENT

This agreement shall remain in effect up to and including December 31, 1947.

ARTICLE VII. LICENSEE

Wherever the expression licensee is used in this agreement it means: Jointly and severally the corporations signing this agreement under the captions "Subscribing companies" and "Ratifying subsidiaries" appearing at the end hereof.

ARTICLE VIII. ASSIGNABILITY

This agreement shall not be assignable by either party.

ARTICLE IX. TERMINATION OF PRIOR AGREEMENT

A certain agreement between the parties hereto relating to the same subject matter and dated July 12, 1930, shall be and the same hereby is canceled.

This agreement shall be effective as of July 12, 1930.

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this_____day of_____, 1932. In so doing, the corporations signing under the captions "Subscribing companies" and "Ratifying subsidiaries" agree jointly and severally with licensor that in the event any corporation or corporations, which, within the term of this agreement shall be at any time, in effect, the sole property of, or the sole owner of, or the sole property of the sole owner of (any one or more of) companies so signing, shall fail to subscribe hereto as joint and several parties with the companies so signing, the companies so signing will indemnify and hold harmless licensor against any and all consequences of such failure.

APPENDIX

(Amendments to contracts A, B, C, D, and H)

AGREEMENT TO AMEND CONTRACTS A AND B OF THE MUTUAL LICENSING PLAN CONTRACTS

The parties to this agreement, made as of the 1st day of July 1935, are Hydro Patents Co., a Delaware corporation, hereinafter referred to as "patents", and Standard-I. G. Co., a Delaware corporation, hereinafter referred to as "Standard-I. G."

The parties entered into an agreement with others, designated contract A of the Hydro Patents Mutual Licensing Plan, and also entered into an agreement between themselves, effective as of July 12, 1930, designated contract B of the Hydro Patents Mutual Licensing Plan.

The parties agree to amend said contracts in the following manner:

I. AMENDMENT TO CONTRACT A

Article IV, line 2, cancel "five" and insert "one"; line 3, cancel "5,000" and insert "1,000".

II. AMENDMENTS TO CONTRACT B

1. Article II, paragraph A–(1), at the end add "to products of that process, and".

2. Article II, after paragraph A–(2) add the following three paragraphs:

"Both (1) and (2), supra, shall also include those patent rights in which the real invention is only the substitution of products obtained by the practice of said process and which are specified in subparagraphs 1, 2, and 3 of subdivision B of this article II, for similar products not obtained by the practice of said process even though said patent rights in form purport to cover a new process or product not within said field or not so specified.

"The expression 'patent rights relating to the hydrogenation process' shall be interpreted to include patent rights for processes of making aluminum chlorid and other metallic halids for use in the hydrogenation process as hereinbelow defined and interpreted, and not otherwise.

"The expression 'patent rights relating to the hydrogenation process' shall be interpreted to include rights under all apparatus and product patents incident to the processes included in this license, but only as hereinbelow defined and interpreted, and shall not otherwise include rights under such apparatus and product patents."

Digitized by Google

3. Article II, paragraph B, at the end of the second subparagraph and following the words "refinery procedure," insert:
"but the term 'hydrogenation' shall not be interpreted to cover interaction of hydrocarbons if such interaction is not substantially influenced by the presence of free hydrogen.

"The term 'hydrogenation process' shall be interpreted to include processes involving the use of aluminum chlorid or other metallic halids when such process is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts (or other catalysts), to a degree or extent or in a manner to secure definitely determinable hydrogenation, and shall not otherwise include processes involving the use of aluminum chlorid or metallic halids having like effect in said process.

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested.

AGREEMENT TO AMEND CONTRACT C OF THE MUTUAL LICENSING PLAN CONTRACTS

The parties to this agreement, made as of the 1st day of July, 1935, are Hydro Patents Co., a Delaware corporation, hereinafter referred to as licensor, and the corporation or corporations defined below, hereinafter referred to as licensee.

The parties entered into an agreement designated contract C of the Mutual Licensing Plan of Hydro Patents Co., whereby licensee obtained a license for 501 barrels daily average capacity of oil charged to the Hydrogenation Process or of liquefied coal.

In consideration of the purchase of 499 additional shares of Hydro Patents stock at $53 per share by licensee and of the amendment of said contract C as herein stated, the parties agree as follows:

I. AMENDMENTS TO CONTRACT C

1. Article II, paragraph A–(1), at the end add "to products of that process, and".

2. Article II, paragraph A–(2), at the end add the following three paragraphs:
"Both (1) and (2), supra, shall also include those patent rights in which the real invention is only the substitution of products obtained by the practice of said process and which are specified in subparagraphs 1, 2, and 3 of subdivision B of this article II, for similar products not obtained by the practice of said process even though said patent rights in form purport to cover a new process or product not within said field or not so specified.

"The expression 'patent rights relating to the hydrogenation process' shall be interpreted to include patent rights for processes of making aluminum chlorid and other metallic halids for use in the hydrogenation process as hereinbelow defined and interpreted, and not otherwise.

"The expression 'patent rights relating to the hydrogenation process' shall be interpreted to include rights under all apparatus and product patents incident to the processes included in this license, but only as hereinbelow defined and interpreted, and shall not otherwise include rights under such apparatus and product patents."

3. Article II, paragraph B, at the end of the second subparagraph and following the words "regular refinery procedure," insert:
"but the term "hydrogenation" shall not be interpreted to cover interaction of hydrocarbons if such interaction is not substantially influenced by the presence of free hydrogen.

Digitized by Google

"The term 'hydrogenation process' shall be interpreted to include processes involving the use of aluminum chlorid or other metallic halids when such process is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts (or other catalysts), to a degree or extent or in a manner to secure definitely determinable hydrogenation, and shall not otherwise include processes involving the use of aluminum chlorid or metallic halids having like effect in said process.

"Licensor represents and warrants that I. G. Farbenindustrie Aktiengesellschaft, International Hydrogenation Patents Co., Ltd., and Standard-I. G. Co. agree with and approve of the interpretation of the term 'hydrogenation process' as set forth in the preceding paragraph."

4. Article VI, paragraph A, subparagraph (c), cancel the sentence "5 cents per barrel upon the gasoline content and in addition the premium royalties for premium quality antiknock gasoline as provided in schedule A hereto annexed" and insert in lieu thereof "5 cents per barrel upon the gasoline content."

5. Article VI, paragraph B, cancel the third subparagraph beginning "in the case of products * * *", and ending "such intermediate rate."

6. Article VII, paragraph (a), line 7 of the first subparagraph, after "such" insert "royalty free"; line 7 of the second subparagraph, line 8 of paragraph (b), and line 9 of paragraph (c), make the same insertion.

7. Article VII, cancel paragraph (d), and insert:

"(d) In the event the license herein granted shall be terminated by licensee as provided in article VIII hereof, or by licensor as provided in article XI hereof, nothing contained in this article VII shall be deemed to grant to licensor, or Hydro Engineering & Chemical Co. or I. G. Farbenindustrie Aktiengesellschaft, or any licensee of the foreign patents of Standard-I. G. Co., rights under any future patents of licensee."

8. Schedule A, cancel paragraph (e).

II. AMENDMENTS TO RELATED CONTRACTS

Licensee hereby assents to the inclusion of the amendments indicated above in all the other contracts of the mutual licensing plan where subject matter corresponding to that in contract C necessitates their insertion.

III. CAPACITY LICENSED

The licensed capacity is increased from 501 barrels to 1,000 barrels daily average capacity of oil charged to the hydrogenation process or of liquefied coal.

IV. CONTINUANCE OF FORMER AGREEMENT

All the provisions of said contract C remain in full force and effect except as they are modified by the foregoing.

In witness whereof, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this _____ day of _____ 1935.

AGREEMENT TO AMEND CONTRACT D OF THE MUTUAL LICENSING PLAN CONTRACTS

The parties to this agreement, made as of the 1st day of July 1935, are Hydro Patents Co., a Delaware corporation, hereinafter referred to as "Patents", and Hydro Engineering & Chemical Co., a Delaware corporation, hereinafter referred to as "Engineering."

The parties entered into an agreement effective as of July 12, 1930 designated contract D of the mutual licensing plan of Hydro Patents Co.

The parties agree to amend said contract in the following manner:

Article III, at the end insert:

"Engineering hereby grants to Patents, a nonexclusive, nontransferable right to grant licenses under its patent rights relating to the Hydrogenation process, without accounting to Engineering. The term "patent rights relating to the hydrogenation process" shall always have the same meaning in this agreement as in contract B of this series of agreements."

AGREEMENT TO AMEND CONTRACT H OF THE MUTUAL LICENSING PLAN CONTRACTS

The parties to this agreement, made as of the 1st day of July, 1935, are Hydro Patents Co., a Delaware corporation, hereinafter referred to as "licensor", and Standard Oil Development Co., a corporation of Delaware, and affiliated corporations, hereinafter referred to as "licensee" and defined below.

The parties entered into an agreement effective as of July 12, 1930, designated contract H of the mutual licensing plan of Hydro Patents Co.

The parties agree to amend said contract in the following manner:

1. Article II, paragraph A-(1), at the end add "to products of that process, and."

2. Article II, after paragraph A-(2), add the following three paragraphs:

"Both (1) and (2) supra shall also include those patent rights in which the real invention is only the substitution of products obtained by the practice of said process and which are specified in subparagraphs 1, 2, and 3 of subdivision B of this article II, for similar products not obtained by the practice of said process even though said patent rights in form purport to cover a new process or product not within said field or not so specified.

"The expression patent rights relating to the hydrogenation process shall be interpreted to include patent rights for processes of making aluminum chlorid and other metallic halids for use in the hydrogenation process as hereinbelow defined and interpreted, and not otherwise.

"The expression patent rights relating to the hydrogenation process shall be interpreted to include rights under all apparatus and product patents incident to the processes included in this license, but only as hereinbelow defined and interpreted, and shall not otherwise include rights under such apparatus and product patents."

3. Article II, paragraph B, at the end of the second subparagraph, and following the words "refinery procedure", insert:

"but the term "hydrogenation" shall not be interpreted to cover interaction of hydrocarbons if such interaction is not substantially influenced by the presence of free hydrogen.

"The term hydrogenation process shall be interpreted to include process involving the use of aluminum chlorid or other metallic halids when such process is carried out by or in the presence of added hydrogen or hydrogen carriers, with or without catalysts (or other catalysts), to a degree or extent or in a manner to secure definitely determinable hydrogenation, and shall not otherwise include processes involving the use of aluminum chlorid or metallic halids having like effect in said process."

4. Article VI, paragraph A, subparagraph (c), cancel the sentence "5 cents per barrel upon the gasoline content and in addition the premium royalties for premium quality anti-knock gasoline as provided in schedule A hereto annexed" and insert in lieu thereof "5 cents per barrel upon the gasoline content."

5. Article VI, paragraph B, cancel the third subparagraph beginning "In the case of products" and ending "such intermediate rate."

6. Article VII, cancel paragraph (d), and insert:

"(d) In the event the license herein granted shall be terminated by licensee as provided in article VIII hereof, or by licensor as provided in article XI hereof, nothing contained in this article VII shall be deemed to grant to licensor, or

Digitized by Google

Hydro Engineering & Chemical Co. or I. G. Farbenindustrie Aktiengesellschaft, or any licensee of the foreign patents of Standard-I. G. Co., rights under any future patents of licensee.

7. Schedule A, cancel paragraph (e).

In witness whereof, the parties hereto have cause this agreement to be executed by their proper officers thereunto duly authorized, and their corporate seals to be affixed and attested this _____ day of 1935.

SOCONY-VACUUM OIL CO., INC.,
New York, January 15, 1936.

Hon. WILLIAM E. SIROVICH,
Chairman United States, Committee on Patents,
House of Representatives, New York, N. Y.

SIR: This will reply to your letters dated November 6, 1935, addressed, respectively, to Standard Oil Co. of New York, and Socony Vacuum, Inc. Our company was formerly named Standard Oil Co. of New York and is now named Socony-Vacuum Oil Co., Inc., the corporation being the same in both instances.

We give below such information as we can respecting the several items listed in your letter upon which you request information:

Item 1.—Attached hereto is a list of unexpired United States patents owned by Socony-Vacuum Oil Co., Inc., and its subsidiaries, as of January 1, 1936, said list being identified as enclosure 1.

This company is not a member of a patent pool or a party to any patent pooling agreement. We have from time to time acquired licenses under patents owned by others, and have paid very substantial amounts of money in acquiring such license rights. We have issued licenses to others under some of our patents. In

Digitized by Google

acquiring some of our licenses, we have issued licenses under some of our own patents as part consideration for the licenses which we acquired.

It is impossible to furnish a list of patents now being used by us under our licenses. This would involve an opinion as to whether any one of our extensive refining and other operations comes within the scope of any claim of any patent under which we have a license. Further, such a question is determinable only by the courts. Also, our licenses ordinarily do not enumerate particular patents but rather cover rights in certain subject matter, for example, pyrolytic cracking. Our object of acquiring such licenses in certain fields is to give us the right to use improvements in such fields which have been developed by others, to give us greater freedom in design and operation in such fields,to give us greater freedom from threat of patent litigation, and to obviate the impossible task of trying to determine what particular patents owned by others might be infringed by each one of our extremely large number of almost constantly changing operations.

Item 2.—Our patent policy is to obtain patents covering meritorious inventions originating in our laboratories, refineries, etc. Our research laboratories and refineries are constantly striving to improve our present operations, equipment, and products, and to develop new products and processes, and we try to obtain patent protection of scope which will cover these improvements. Most of such improvements and inventions are actually used. Frequently the use of patented inventions is discontinued because they have become outmoded. Sometimes two or more alternative improvements or solutions of a problem are made, one of which is used but the others are also made the subject of patent applications. Sometimes long-range inventions are made which have no practicable immediate use but which have potential value for future use. Our policy is to patent new developments, not keep them secret. It is not our policy to patent new inventions or to purchase patents in an effort to keep them out of use. It is our policy to use our new inventions wherever possible. It is ordinarily our policy, not only to use our new inventions for ourselves, but to make them available for use by other responsible interests at reasonable terms.

Item 3.—We are not members of any organization or association dealing with patents, and therefore have no constitution or bylaws or articles of agreement relating thereto.

Items 4 and 5.—This company is not a member of a patent pool or a party to any patent-pooling agreement. As above stated, we have acquired licenses in certain fields in which we have granted licenses under some of our patents as part consideration for the licenses which we acquired. The most important of these fields is cracking. In the field of pyrolytic cracking, for example, we have a license under the cracking patents of Gasoline Products Co., Inc., the Texas Co., Standard Oil Co. (Indiana), Standard Oil Co., a corporation of New Jersey, and the Atlantic Refining Co., for which we have paid very substantial sums of money. Under this cracking license we also have certain immunities from suit under the cracking patents of United Gasoline Corporation, Universal Oil Products Co., Shell Union Oil Corporation, Standard Oil Co. of California, and the Gulf Oil Corporation of Pennsylvania. In addition to the fees which we have paid for these licenses and immunities, we have granted a license under our own pyrolytic cracking patents to Gasoline Products Co., Inc., and its licensees. We have not shared and do not share in any license fees or royalties paid by other licensees under these pyrolytic cracking patents; we are free to grant licenses to others under our own pyrolytic-cracking patents and are willing to do so at reasonable terms; no other company, interest, or group has any authority to determine or influence our policy with respect to our own patents; we have no authority to grant licenses under cracking patents other than our own or to control or influence the policy of any other company as to whether it shall or shall not grant licenses under its pyrolytic-cracking patents, or to whom, or upon what terms. Other fields in which we have patent license rights from others are hydrogenation, catalytic cracking and refining, solvent refining, and dewaxing, and miscellaneous smaller fields. The only major fields in which we have issued a license under our own patents in consideration for the license which we received are cracking and hydrogenation. Our hydrogenation license was acquired to insure us a position in this field for the future; we are not conducting hydrogenation operations at the present time. We have issued certain licenses under our own patents in the field of special chemical products and processes. We do not have any forms of licensing or other agreements; each license is drafted independently to define the terms of that particular agreement.

Item 6.—As stated, this company is not a member of a patent pool or a party to any patent-pooling agreement. The issued unexpired United States patents under which we have granted licenses are included in the attached list designated

Digitized by Google

enclosure 1, which list gives the date, number, and inventor of each patent. In substantially all of these patents the inventor was an employee of the company at the time he made the invention. Assignment from employee to company is ordinarily made at or about the time of filing the application for patent. It is impossible to state or estimate the individual value of these patents; our patents are carried on our books at a relatively nominal valuation, less than $100,000.

Item 7.—We do not own or control any patents which are used as a basis for charter or corporation franchise.

Item 8.—As stated above, the inventors of substantially all of our patents were employees of assignee at the time their respective inventions were made, and most of them still are employees of the company. The company has assignment of invention contracts with its employees who are employed in a capacity where they are expected to make inventions as a part of their regular work, these contracts being limited to inventions along the line of the company's business. The employees with whom the company has such contracts are principally research and laboratory men, together with some additional technical men and engineers. No assignemnt of invention contract is entered into between the company and its general run of employees; i. e., employees whose work is not of such nature that they are expected to make inventions as a part of their regular work. The company has a system of payments or rewards for certain classes of suggestions and inventions, and in certain instances has released rights in inventions to the individual inventor. With respect to men employed in capacities where they are expected to make improvements and inventions, the accomplishments of each man along this line are considered by the company in determing salary.

Item 9.—Such information as can be given on this item has already been given under the preceding items, particularly items 1, 4, and 5.

Item 10.—We are not a party to a patent pool and in no wise do we conduct a patent licensing policy with reference to members or nonmembers of any patent pool. Our general patent policy is to issue licenses under our patents whenever and to whatever parties it is in our judgment to do so as a desirable transaction in the ordinary course of business, and upon such terms as in our judgment are fair and reasonable in any particular case, the same as we do with respect to other contracts in the ordinary conduct of our business. Sometimes we deem it advisable to issue licenses with the exclusive provisions, as for example, we have done with chemical companies in the case of chemical specialties, and sometimes we deem it advisable to issue only a nonexclusive license, retaining full rights to license others, as we have done in the case of cracking.

Item 11.—We are not members of any patent pool, and have no commitments or policy involving eligibility requirements respecting patent licenses. We consider it essential in the regular course of our business to maintain an active program of research, development, and patents, and it is our policy to utilize the results of this program as best we can in furthering the legitimate interests of the company, in such ways as improve our own products and processes, protecting ourselves against attacks of patent infringement by others, deriving income, and protecting ourselves against lawless appropriation by others of new developments which we have made as the result of costly research.

Item 12.—In general we are in accord with the improvements in Patent Office practice which have been put into effect during the term of the present Commissioner. We would favor consideration of further changes in the patent laws and rules which would further the following objects: (1) Expediting and reducing the expense of adjudication of patents by the courts, (2) expediting patent prosecution before the Patent Office, particularly in interference proceedings, (3) preventing patent applications pending for excessively long periods in the Patent Office before issuance, (4) preventing expansion or revision in any substance of claims in pending applications to cover growing commercial practices in industry or to cover inventions of other applicants, (5) prohibiting addition or modification of claims by amendment in patent applications to cover subject matter which the application as originally filed does not clearly indicate was intended to be claimed as invention, (6) restricting class claims in chemical applications to breadth which is clearly justified upon the basis of the specific examples disclosed in the application as originally filed, (7) refusing class claims in chemical cases where it is shown that certain members of the class are inoperative or devoid of utility for the purpose stated, (8) requiring in chemical product claims a restrictive statement of the utility of the product unless the product is the result of chemical reaction and is thereby a new composition of matter, (9) limitation of the term of patents to 17 years from the date of issuance or 20 years from the

Digitized by Google

date of filing, whichever term first expires, (10) refusing to permit, in applications which have been pending before the Patent Office for more than 3 years, claims which are not based in their entirety upon explicit statements of inventions contained in the application before expiration of said 3 years, (11) a single final court of patent appeals consisting of judges having technical and scientific qualifications, (12) continuance of adequate salaries for Patent Office examining staff and progressive increase in salary level to make Patent Office positions as attractive as possible to high-class men for long term employment.

Respectfully,

DALLAS R. LAMONT.

Unexpired United States patents owned by Socony-Vacuum Oil Co., Inc., and its subsidiaries, as of Jan. 1, 1936

INCANDESCENT LAMP MANUFACTURERS' ASSOCIATION,
New York, August 26, 1935.

Mr. ROBERT ROBINS,
Fifth Avenue Hotel, Fifth Avenue and Ninth Street, New York City.

DEAR MR. ROBINS: We beg to acknowledge you letter of August 24 and thank you very much for the same.

Owing to the fact that this is a holiday week, if convenient for you, we would like to make an appointment for some time next week. Will you kindly set a date and if you like, you may telephone us at Algonquin 4–6737 when it will be convenient for you to see us.

Thanking you in advance for an early reply, we remain

Very truly yours,

INCANDESCENT LAMP MANUFACTURERS' ASSOCIATION,
By LOUIS KLEIN, *Secretary.*

Digitized by Google

INCANDESCENT LAMP MANUFACTURERS' ASSOCIATION,
Newark, N. J., August 10, 1935.

Hon. WILLIAM I. SIROVICH,
Member of Congress from New York City, Congressional Office Building, Washington, D. C.

DEAR DR. SIROVICH: We are an association of independent incandescent lamp manufacturers, ordinarily known as electric light bulbs.

Our industry is one which is dominated entirely by a monopoly group consisting of the General Electric Co. and its licensees and the Westinghouse Lamp Co. This monopoly group manufacture and control about 93 percent of all electric incandescent lamps manufactured in this country.

Since the inception of this industry, they have maintained a patent monopoly and by constant intimidation, threats of suits and actual suits instituted against small independent manufacturers, jobbers, and dealers, are today still continuing their monopoly.

At the time that the N. R. A. was inaugurated, we filed a vigorous protest complaining of the unfair practice of the monopoly group, in that they unfairly maintained a patent monopoly and we prepared a very comprehensive brief giving the entire history of the patent situation in the incandescent lamp industry. We will be glad to forward a copy of this brief to you, as it clearly sets forth the unfair methods used by the monopoly group to maintain their patent monopoly.

Due to the fact that they are such a large and powerful corporation with unlimited financial means, it is very easy for them to maintain this patent monopoly, as the small independent manufacturers cannot fight against such unfair odds.

We heartily approve of your bill calling for an investigation of patent racketeering and pooling and the members of our association will be glad to give you any assistance and information which you may require. Many of our members are thoroughly familiar with the methods of the monopoly group as regards their patent racketeering practices and at the present time, there are several suits pending which have been instituted by the monopoly group against independent manufacturers. In one suit a decision was rendered in favor of the independent manufacturer against the monopoly group, but which is now on appeal.

We would be glad, if given an opportunity, to talk to you personally at sometime when you are in New York, as we feel that we can give you some valuable information at such an interview. We place at your disposal any and all assistance which we can render and trust that you will acknowledge this communication and let us hear from you at a very early date.

Very truly yours,

INCANDESCENT LAMP MANUFACTURERS' ASSOCIATION.
By LOUIS KLEIN, *Secretary.*

INCANDESCENT LAMP MANUFACTURERS' ASSOCIATION,
New York, August 20, 1935.

Hon. WILLIAM I. SIROVICH,
Member of Congress from New York City,
Congressional Office Building, Washington, D. C.

DEAR DR. SIROVICH: We were pleased to receive your letter of August 12 and in reply to the same, we are mailing you under separate cover via parcel post a copy of the brief which was submitted by our association to the National Recovery Administration at the time that we filed our protest.

At that time we took the position that the N. R. A. was inaugurated to promote codes of fair competition protecting the large manufacturer against the unfair competition of the small manufacturer. What we wanted was a code of fair competition to protect the small manufacturer against the unfair competition of the large manufacturer.

We have a great mass of correspondence on file covering this situation, and at that time Senator Nye had some correspondence on this subject with Gen. Hugh S. Johnson and Donald Richberg.

We also respectfully refer you to the Congressional Record of Tuesday, May 22, 1934, volume 78, number 113, pages 9507 to 9514 inclusive, covering the comments of Senator Nye on this very situation; also the report of the findings of the National Recovery Review Board headed by Clarence Darrow who reported that while there was a monopolistic control, this was not due as a result of the code, but they nevertheless agreed that there was a monopolistic control.

Digitized by Google

The copy of the brief which we are sending you was prepared by Willis B. Rice, a patent attorney of long experience who is an instructor of patent law at New York University. He is probably more conversant with the patent activities of the General Electric Co., its licensees, and the Westinghouse Lamp Co., than anyone else in this country, and he would no doubt be very glad to supply you with any other information which you may require.

We trust that the information submitted will be of value to you, and if we can be of further assistance please do not hesitate to call on us.

Very truly yours,

INCANDESCENT LAMP MANUFACTURERS' ASSOCIATION.
By LOUIS KLEIN, *Secretary.*

AUGUST 24, 1935.

INCANDESCENT LAMP MANUFACTURERS' ASSOCIATION,
45 East Seventeenth Street, New York, N. Y.

(Attention Louis Klein, Secretary.)

GENTLEMEN: Your letter of August 20 has been referred to me for my attention. I accordingly acknowledge receipt of the brief covering the patent activities of the General Electric Co. in the incandescent lamp field. I would like to discuss this matter in greater detail and can be reached at the committee's offices, room 230-A, Fifth Avenue Hotel, New York City, sometime during the middle of next week.

Very truly yours,

ROBERT ROBINS,
Economic Advisor, Patent Committee
Investigating Patent Pooling Agreements.

BEFORE THE ADMINISTRATOR OF THE NATIONAL INDUSTRIAL RECOVERY ACT RE HEARING OF NEMA CODE

BRIEF IN SUPPORT OF THE PROPOSED SUPPLEMENTARY CODE FOR LAMP MANUFACTURE

I. DEFINITION

The Independent Manufacturers making this petition for a code of fair practice comprise those persons who are manufacturing incandescent electric lamps in the United States in both household and miniature sizes without paying patent royalty to the General Electric Company. The term "monopoly" or "monopoly group" is used herein to comprise the General Electric Company who have been the owners of the patents under which the patent monopoly was enforced, together with its licensees.

II. CONDITIONS IN THE INDUSTRY WHICH DEMAND A SPECIAL ANTI-MONOPOLY CODE

Lamp manufacture has been the subject of a monopoly that has dominated the entire industry and has been extremely profitable. It was originally created under the patent law in 1880, but on expiration of the original patents in 1899, a very considerable competition came in until, as we are informed, the monopoly control fell in a few years to 51% in 1903. To stop this landslide and regain control, the monopoly secretly bought a controlling interest in the majority of its competitors, and the National Lamp Association was formed which reached price fixing agreements with substantially all of the remaining companies. These consolidations and agreements then were as illegal as they are now. Soon thereafter the Just and Hanamann patent was acquired and patent licenses were use to take the place of the price fixing agreements, and the monopoly was thus maintained until 1933 when the last lamp patent expired.

As we shall show hereinafter, it is the purpose and meaning of the patent law that the right to exclude others from the invention for seventeen years is granted to the inventor *in exchange* for the complete surrender of the monopoly when the patents have expired.

The Independents do not challenge the right of any patent owner to use any valid patent in any proper way and the assertion that we are making an attack upon the patent law or upon patent rights or that we are seeking to deprive anyone of property of any kind or prevent the legitimate and proper use of it can best be explained as an attempt to prejudice the petition of the Independents by the

Digitized by Google

suggestion that we want to appropriate some one else's property. There is no foundation whatsoever for such a claim. The Independents seek to have all rights respected *including their own*. For that purpose they want to prevent the illegal and unfair use of powers and property to maintain the monopoly, and they want this restraint to go only so far as those practices are illegal and unfair.

SUMMARY OF THE MONOPOLISTIC PRACTICES

The matters complained of form a plan to maintain a lamp monopoly, and comprise certain acts coordinated to handicap manufacture by independent manufacturers and take away their customers. These, which will be given in detail later, include:

(a) Certain contracts and agreements in restraint of trade to control the supply of materials and equipment.

(b) Threatening of customers with suits without establishing the right to make such threats knowing that such practice gives the independent manufacturer no chance to assert his rights.

(c) The maintenance of the lamp monopoly by commercial monopolies on certain raw materials and supplies contrary to law.

(d) The indirect maintenance of the lamp monopoly by suits on patents which do not cover lamps.

(e) The deliberate and false disparagement of the quality of goods made by the Independents, to destroy their good-will.

The specific provisions to cure these evils will be discussed at a later point.

This is not the time nor the tribunal in which to challenge the validity of any patents of the monopoly, when properly used, but we do content that these patents do not even pretend to cover the lamp industry, and that the use made of them is illegal, and unfair and for the purpose of maintaining a monopoly not granted by the patents and not warranted by any law. It is only insofar as these patents are improperly and illegally used that we ask their restraint.

III. The National Recovery Administration Is the Proper Source of Relief

THE PRESIDENT'S INTERPRETATION

It is the purpose of NIRA, as we understand it, to bring about a forward step in our industrial economy, curtailing where necessary unbridled individualism to bring it into coordination with modern social conditions and to eliminate any existing habits and practices which may no longer be allowed to undermine or work against the public welfare.

The President of the United States is quoted as stating in his Poughkeepsie address:

"* * * Here and there, in spots that are altogether too rare, there is a town or a city or a county or even a State that has through its own interest—the interest of its own citizenship—become conscious of the fact that under the old order, the social or the economic or the political life of the community was drifting downhill through lack of action or because of adherence to old rules that have been promulgated to fit conditions of a bygone age.

"In such individual cases aroused citizens have chosen new servants or have changed the form of conducting their local affairs to the advantage of the community without destroying the principles of self-government, that are inherent in our American civilization.

"You and I know that in a sense this arousing of people's interest is what has occurred throughout the country in this year 1933, and has made itself felt in the national capital. I think it is the first time in our history that the nation as a whole regardless of party has approved drastic changes in the methods and forms of the functions of government without destroying the basic principles.

"Perhaps I can best illustrate the change that I am talking about by putting it this way—that we have been extending to our national life the old principle of the local community, the principle that no individual man, woman, or child, has a right to do things that hurt their neighbors. And on this Neighbors Day I think we can properly emphasize that word. * * *

* * * * * * *

"As this principle was extended it became unfair to our neighbors if we—any individual or association of individuals—sought to make unfair profits from monopolies in things that everybody had to use such as gas, electric lights and railroad tickets and freight rates and things of that kind.

* * * * * * *

Digitized by Google

"Now the extension of the idea of not hurting our neighbors is recognized today as no infringement on the guarantee of personal liberty—personal liberty to the individual. * * *

"We are engaged today, as you know—not just the Government in Washington, but groups of citizens everywhere, in reviewing all kinds of human relationships and in these reviews we are asking an old question in a new form. We are saying *'Is this practice, is this custom, something which is being done at the expense of the many?'* and the many are the neighbors. * * *"

This speech as quoted in the public press for August 26th, 1933, suggests that many things which are tolerated in one state of society become antisocial as society advances. It may be inferred from that speech that it is the President's interpretation of N. R. A. that such a revaluation must now be taken to eliminate antisocial acts, whether or not in fact they be illegal acts as the laws heretofore have been interpreted.

That the codes are not confined to remedying abuses which have been held heretofore illegal is clear. Under the codes established under N. R. A., many acts have been condemned which have heretofore been legal, for example in the matter of Child Labor alone. Many decades of agitation had produced no tangible result but this result was accomplished in short order under the Recovery Administration. Even though Child Labor was legal, it was so distinctively antisocial that its abolition by a code has met with universal approval. It is clear that the Recovery Act contemplates that acts shall now be forbidden which previously were not illegal.

The monopoly in electric lights, which is one of the ones chosen by the President as an example of the kind of monopoly to which the public should not be subjected, is the monopoly which the abuses herein complained of are designed to foster, and which is now so nearly complete.

IMPORTANCE OF QUESTIONS INVOLVED

The importance of the questions herein involved is very great and the correct answer may determine whether our industrial system shall pass permanently into the hands of huge monopolies through monopolistic practices falsely excused under the cloak of the Patent Law, with the ultimate effect of destroying democratic government altogether, or whether, on the other hand, we shall return to the democratic principles on which our government was founded, and maintain a substantial measure of individualism consonant with the maintenance of public welfare.

As we read the Recovery Act the improvement of immediate conditions was only part of the problem. It was clearly intended that such relief should not itself carry the seeds of still greater disasters.

The former requires a new conception of the relation of capital to labor by which the purchasing power shall be built up; but the latter requires a new conception of the relation of capital to the public. The thought that monopolies shall not be permitted dominates the Act.

To achieve the increased purchasing power momentarily at the expense of giving monopoly an intrenchment is to feed the stomach and to create a malignant cancer. The price is too high to pay.

We believe the Administration has rightfully up to this point laid stress first upon an increase of purchasing power, but this must not blind the Administration to the still more important point that depressions are temporary disasters, while monopolies are themselves the very roots of disaster. And this the Recovery Act recognizes.

The principles here involved do not concern alone the welfare of a few Independent Lamp Manufacturers whose welfare might, if necessary, conceivably be sacrificed to the public good. *These principles concern the right of the public to be free from economic slavery* or, on the contrary, the right of the Monopoly Group to crush all Independent Manufacturing through misuse of the Law.

The Monopoly Group controls 93% of the Industry. It has already almost completely achieved its result. But it is no argument that this protest should be set aside because of the small volume of manufacture of the Independent Manufacturers. On the contrary, that fact in itself shows the crucial need of immediate administrative relief. It is no defense of a tyranny in its suppression of liberty that it has been nearly successful.

The General Electric Company's defense of its monopoly on the grounds of the patent law is without legal foundation. The principle has been repeatedly stated by the Supreme Court. The acts complained of are plain violations of the Anti-Trust laws and of other laws, and without defense.

Digitized by Google

Patent law is not a thing apart, having a peculiar code of conduct; it follows the ordinary principles of our law, of which it is but a part. We need to discuss it here because the General Electric Company are attempting to use it as a smoke screen for their monopoly. We wish to show that it is only a smoke screen. We wish further to show that so far from justifying these monopolistic practices, the patent law places even heavier obligations upon the General Electric Company to surrender their monopoly.

The Patent law has not been substantially changed since its foundation in 1790 and during that time our industrial system has met a complete revolution, and selfish interests have been zealous to expand and distort the Law to their own advantage.

If the principles of the Law as originally adopted are adhered to, we will find ourselves on safe ground, but if the new deal is to restore liberty and bring about a new orientation of selfish interests around the public good, it will be necessary to see these original principles with a clear eye through the fog which has been raised to obscure them for private gain.

OTHER REMEDIES ARE INADEQUATE IN THE EMERGENCY

The contention has been put forward that the Independent Manufacturers are seeking relief from the wrong source. That they should apply to the Federal Trade Commission or to the Courts or to Congress. We suspect that whatever relief we sought, the contention would be the same; that the present practical relief should not be granted, but instead that we should seek some other more distant or more difficult relief. If they could finally drive us to seek relief from the King of England or from the Wizard of Oz, their victory would be complete.

We submit that the NRA, under NIRA, has the power and the duty and the machinery for relief and that no other form of relief would be adequate or complete or sufficiently prompt.

The remedy of suing for unfair competition in the Courts has long been available. It has accomplished good results in proper cases. It is doubtful, however, whether such a suit could be brought by a group of manufacturers such as this to prevent unfair competition against them as a class. The question might depend upon whether there was a sufficient community of interest to join them together in a single action such as would be necessary to cover all of the transactions.

The Federal Trade Commission has not been authorized to administer NIRA and on that account a petition to it would also possess serious limits. The courts and the Federal Trade Commission in General have felt at liberty to condemn only practices which are along well established lines, leaving new problems to be met by legislation. Congress has in general given attention only to those evils which disturb large volumes of business and then the relief must be in such form that it will apply to all persons similarly situated. The conditions in business, however, vary greatly, and practices which are essential to the establishment of sound business in one industry may be grossly unfair and discriminatory in another.

The NRA affords an ideal solution to this very problem. It gives each industry a chance to determine what the standard of unfair practices shall be and that standard is applied only to the particular industry in which it arose. The NRA, moreover, gives a far greater flexibility of procedure and of relief so that an industry does not need to be strangled by red tape.

It is true that certain of the practices complained of are violations of the Anti-Trust Laws. One of them is a violation of the libel laws and certain others of them are violations of existing standards of fair practice. It is possible, therefore, to propose for each of these an alternative form of relief. Some of them would be at least a partial defense against unlawful suits. Others would not. But no other form of relief could consider the illegality of the plan as a whole and grant complete relief.

Some of these acts are not in themselves illegal when considered individually. They become illegal only as a part of an illegal plan so that the questions here raised could not be considered except in a tribunal having complete jurisdiction over the entire field.

It is said to have been a motto of a great general to "divide and conquer." To separate the questions here involved from N. I. R. A., on which it is founded, would divide the separate parts of the plan from each other and separate them into individual acts so that the illegality of the plan would be lost sight of. In part also, it would divide the causes of action presented by the individual manufacturers, comprising the association, from each other, in part at least, compelling each to stand alone to be suppressed with ease.

Digitized by Google

The Independents, however, are not seeking relief only from certain individual acts, but rather from the entire plan and conspiracy, of which all of these acts are integral parts. It is a unitary plan and requires a unitary remedy which only N. R. A. can give.

No other agency has such broad powers to define unfair competition and no other agency can grant relief before the patient dies.

IV. THE ESTABLISHMENT OF A CODE OF FAIR COMPETITION UNDER N. I. R. A. SEEMS TO PRECLUDE ALL OTHER REMEDIES AGAINST UNFAIR COMPETITION EXCEPTING AS AGAINST SUCH PRACTICES AS ARE EXPRESSLY INCLUDED IN THE CODE

Section 3 (b) of N. I. R. A. provides:

"After the President shall have approved any such code, the provisions of such code shall be *the standards* of fair competition for such trade or industry or subdivision thereof." (Italics ours.)

The Act does not purport to state that when a code condemns certain acts, these acts shall be deemed unfair *in addition to all acts* which have been otherwise heretofore considered unfair. On the contrary, it wipes the slate clean and starts afresh. It establishes a *new standard* complete and absolute in itself: The code itself shall establish the standards. If this be true, it is just as clear that no normal practice which is not condemned in that code, is unfair, as it is clear that those practices which are condemned shall be deemed unfair. A new standard of fair competition is set up by the code which replaces all existing standards, however, they may have been established.

The phraseology at the end of Paragraph 3 (b) "but nothing in this title shall be construed to impair the powers of the Federal Trade Commission under such act as amended" relates to the *powers* of the Federal Trade Commission and not to the *standards of fair competition which have been established.* The powers of the Federal Trade Commission are to investigate and determine whether unfair practices exist but the statute itself now states what those unfair practices are, namely, they are those practices which are expressly condemned by the codes and no others.

Not content, however, with the provision expressly establishing the new standard of fair competition, by reason of the codes, Section 5 of N. I. R. A. expressly states:

"While this title is in effect, any code, agreement or license approved, prescribed, or issued and in effect under this title and *any action complying with the provisions thereof* taken during such period shall be exempt from the provisions of the Anti-Trust laws of the United States."

Clearly if the General Electric Company has adopted a code which tolerates these practices and that code is approved by the President, any act complying with the provisions thereof shall be exempt from the provisions of the Anti-Trust Laws.

This does not refer solely to those practices which are directly referred to and expressly authorized by name by the code. This is clearly evidenced by the fact that the code establishes a *standard of fair competition*, and any act which *does not violate that standard complies with that code.*

It follows, therefore, that since the acts of which we complain are not violations of the NEMA Code, then these acts comply with that code and hence all such actions are free from the Anti-Trust Laws of the United States. Thus it appears that once the NEMA code has been adopted by the General Electric Company, the independent lamp manufacturers are without recourse to the Courts for action, and must seek relief from NRA.

At the oral hearing, Mr. Richberg suggested that this line of reasoning seems to go too far in that a competitor should still be allowed a defense against deliberate fraud even though not forbidden by the code. There is a very great difference between fraudulent practices which are malum per se and monopolistic practices which are more in the nature of malum prohibitum. We would not contend that NIRA reverses the moral code, but we do contend that by its own wording *it establishes a new code of fair competition, which must be full and complete in itself, particularly with regard to monopolistic practices.*

Digitized by Google

V. THE NEMA CODE ALONE AND OF ITSELF IS NOT A PROPER CODE FOR THE LAMP INDUSTRY BECAUSE IT WORKS TO THE PREJUDICE OF SMALL MANUFACTURERS, IT PROMOTES MONOPOLY AND PERMITS MONOPOLISTIC PRACTICES

The Code has been approved by the President and accepted by the monopoly. As we see it, therefore, the question is no longer open whether the monopoly shall be subject to a code in their lamp business. That question has already been answered "yes" both by the Administration and by the monopoly. The only remaining question, therefore, is whether that code, as applied to the lamp industry, properly protects shall manufacturers or permits monopolistic practices, and whether otherwise it carries out the intent of the Statute.

If the Code does promote monopoly and if it does permit monopolistic practices, it is not in accordance with the Statute and it is the duty of NRA to correct it.

THE CODE HAS INCREASED COSTS WITH NO CORRESPONDING BENEFIT TO SMALL MANUFACTURERS

The NEMA Code has raised the wages of the employees of small manufacturers. It has also decreased the weekly hours of labor. To the extent that this latter means new help, it means inexperienced help; to the extent that it means a decreased production, it means greater proportionate overhead. Both of these mean increased costs. These are of great economic advantage to the country and are proper in themselves but it was not the purpose of the law that they should cost the lives of small manufacturers.

Added to the above increased costs is the increased costs of materials resulting from the application of the new principles to the basic manufacturers, including raw materials and parts.

The harassing tactics of the monopoly have heretofore imposed upon independents an additional and artificial increase of expenses, including losses of orders, increased cost of selling, return and cancellation of orders, difficulty of raising capital, expenses of meeting unfair competition, and paying unnecessary legal fees, which have reduced their margn of profit to a minimum in spite of their low overhead. It has seemed to us that the General Electric have used the cost of defending patent suits as a commercial weapon.

Now, however, they are faced by a serious situation when new increased costs are imposed upon them. They cannot materially raise prices because the upper price limit is fixed by the Monopoly, and they must undersell to counterbalance the heavy advertising. They, therefore, face extinction if the Monopoly is permitted to continue to place obstacles in their path.

The increased costs are a result of acts of NRA. It is proper, therefore, for the Independents to seek from NRA that relief which will make compliance possible.

THE N. E. M. A. CODE LACKS THE SAFEGUARDS AGAINST MONOPOLY, WHICH THE STATUTE REQUIRES

The NIRA places as the condition for approval of a code by the President: "provided that such code or codes shall not *permit* monopolies or monopolistic practices".

This provision is in addition to the express provision that the code shall not be designed to promote monopolies and that it shall not discriminate against small manufacturers. If, therefore, any practices exist which promote monopolies and the code *permits* those practices to continue, the Code does not contain those safeguards which are expressly required by the Statute.

We note that the law does not limit the prohibition to "illegal monopolies." We do not believe that the wording is intended to interfere with those monopolies expressly created by Statue under the patent law and we believe the true meaning to be a new "rule of reason" as though the Statute included the word illegal.

The monopoly to which we object, however, is not a monopoly of any patented article, *it is a monopoly not granted by patent* and not warranted by law.

The practices we object to are both designed to promote and clearly do "promote monopoly", and that monopoly is an *illegal monopoly*. NEMA Code places no restrictions on them, hence the NEMA Code clearly "permits monopolies and monopolistic practices". In the *lamp industry* the NEMA Code *does not meet with the basic essentials which the Recovery Act requires.*

VI. The Independents are not Attacking any Property Rights Whatsoever

The Code provisions do not deprive the General Electric Company of any patent rights. They may still use every valid patent, in every way warranted by existing law, except for the provision that they may not harass customers without giving the manufacturer a chance to defend. This latter practice is obviously oppressive.

The Code does not attempt to make any finding of facts. It lays down certain rules which are based upon established law and it leaves to the Administrator, in particular cases, the finding of fact as to whether any particular contract, invention or patent comes within those established rules.

For example, if the inside frost patent or the Mitchell & White patent or the Pacz patent has in fact been identified by the General Electric Company with the monopoly, as they have heretofore emjoyed it, and *if* it be found that the switch from clear bulbs to inside frost bulbs was achieved by the General Electric Company *for the purpose* of enabling them to continue illegally to maintain their monopoly on the tungsten lamp as the independents charge, then that particular invention clearly becomes a part of the public domain under the doctrine established in the *June Manufacturing case*, 163 U. S. 181. For the legal argument on this point see a later page.

Under such circumstances, the inside frost patent is not in any sense confiscated. It has been enjoyed by its owner much more fully if it had been held alone, and the remainder of its term has been dedicated to the public by the General Electric Company under their own act. Presumably they have determined that by using the patent as a part of the greater monopoly, they could secure the maximum return from it.

The right to contract ordinarily a fundamental right is a violation of the law, particularly the Anti-Trust Laws, when used as the General Electric Company have used it. It has been firmly established in our law that any manufacturer has a right to sell his goods when and where he pleases, whether he cares to give a reason or not, selecting his customers either with or without reason. That right was expressly affirmed by the Supreme Court in the *United States* v. *Colgate*, 250 U. S. 300. The code of fair competition proposed by the Independents makes no challenge to that right whatsoever.

It is equally clearly established, however, that a manufacturer may not use the right to contract as a means to promote monopoly. (*Sanitary Mfg. Co. case*, 226 U. S. 20; *Carbice case*, 283 U. S. 27; *Morgan Envelope case*, 152 U. S. 425; *Motion Pictuce Patents case*, 243 U. S. 502).

The doctrine of the free right to contract presupposes conditions of fair competition. It grants no right to any person to utilize the power to contract directly or intentionally to defeat his own public obligations, or to create monopolies, or in any other manner to act contrary to law.

Under the foregoing circumstances, we believe that no provision of the code violates any provision of the Constitution.

We shall devote a special section of this brief to the legal aspects of these clauses, after a more detailed history of the industry to show their necessity.

VII. The Independents Have Endeavored to Cooperate to Set Up or Cause to be Set Up a Code for All Lamp Manufacturers But Cannot Get Cooperation From the Monopoly Group Without Government Aid

The Independent Manufacturers have endeavored to persuade the Monopoly Group to form a code of fair practice for the lamp industry, to which they could adhere, and their efforts to that end have been substantially ignored. They have also invited the Monopoly Group to cooperate with them in the formation of a code for the lamp industry and such invitations have not been accepted.

The unfair practices herein complained of comprise a definite policy deliberately adopted by the Monopoly Group. It is not surprising, therefore, that that Group are unwilling to cooperate with independent manufacturers in the establishment of a code of fair competition, to destroy those practices and it is not surprising that they are unwilling to enter into any code which might challenge their right to the monopoly they so strongly attempt to maintain, however illegal it may be.

The Independents then created and submitted a proposed code for criticism and comment and sent a copy to every company in the Monopoly. They have received, however, no assistance from any member of that group.

VIII. THE HISTORY OF THE LAMP INDUSTRY INSOFAR AS IT AFFECTS THIS PETITION

The first significant use of incandescent lighting seems to have been by Grove in England, who used incandescent filaments of platinum, the only high melting point metal available to him. He placed his filaments both in a vacuum and in the best neutral gas he could get—nitrogen. His light was very satisfactory in its quality and lasted for hours. This step was revolutionary. There were two factors which prevented the immediate introduction of the invention, the first was the source of power and the second was the filament.

At the time of Grove there was no commercial production of electric power and he was dependent on chemical batteries. Such batteries were extremely expensive when used as a primary source of power and could not be so used commercially No lighting system with such limitations could go into extensive use until the development of commercial electric power, and that did not occur until several decades after Grove's work.

Then the light of an incandescent filament increases very fast with each increase in temperature. To get a bright light, Grove used his filament at a bright white heat, which is near the melting point of platinum. The length of life of such a lamp at such temperature was, therefore, limited.

Swan later produced a lamp with a filament of carbon which has a higher melting point. This went into extensive use in England.

Edison made two contributions to this industry. He found, after many experiments, a source of carbon from which an improved filament could be made, and he enclosed the filament completely in glass.

More important than either of these lamp improvements, however, were his contributions which improved the practical production of electric power. These two lamp improvements were the original Edison patents, #205,144 and #223,498. They came into possession of the Edison Electric Light Company, and commenced the monopoly of the electric-lamp industry in 1880. For several years subsequent to 1880 the Edison Electric Light Company and the United States Electric Light Company were "the only manufacturers of incandescent lighting apparatus in this country doing any considerable business." (See *Edison Elec. Light Co.* v. *Sawyer Mann Elec. Co.*, 53 Fed. 592.) A few years later the Edison Electric Co. successfully brought suit against the United States Electric Light Co. (44 Fed. 295, 47 Fed. 454, and 52 Fed. 300).

During the period of the monopoly, they appear to have controlled not only the manufacture of electric lights, but also, in part at least, the installation of such lights in buildings and the furnishing of electric power for sue with such lights.

The Edison Electric Light Company appears to have become the General Electric Company about the middle nineties (see 53 F. R. 592). The research laboratories were formally organized in 1900.

The history of the monopoly, as we are informed of it, is illuminating. Necessarily many of the facts are within their own exclusive possession.

After the beginning of the century, the basic Edison patents had expired. The monopoly thereupon partly lost its hold and a large number of competitors arose which left to the General Electric Company, as we are informed, only about 51% of the business for themselves.

The General Electric Company secretly purchased a majority stock interest in a large number of its competitors, but continued to operate them in apparent competition, until restrained from doing so.

The General Electric Company entered into a combination with its competitors, known as the National Electric Lamp Association. The meetings of this association were held at their own private Island, called Association Island, in the St. Lawrence River, outside of the jurisdiction of the United States, and price-fixing agreements were reached.

Thus, if these facts be true, we may look through the whitewash of the General Electric publicity department. The monopoly was not regained by them through the "research work" on which Mr. Swope lays such stress. It was regained by secret purchase of competitors, and by agreements with those they could not control. In complete harmony with this policy, it continued to acquire patents, which might serve as an excuse for price fixing, as in the *Standard Sanitary Mfg. Co. case.*

The company then acquired, by purchase from others as well as from their own employees, a large number of patents, mostly on constructural details, which naturally arose in the course of manufacture, which the monopoly alone controlled.

Digitized by Google

These patents were not acquired in an open competitive market. On the contrary, during their monopoly, that company was the only substantial market to whom lamp patents or improvements could be sold. Through their original lamp monopoly, therefore, and as a part of it, they thus acquired substantially every improvement patent in the lamp industry, and they used each patent, not for its own individual monopolistic power, but to add to the strength of the whole.

Under these circumstances, with a coordinated desire for price fixing which included all but a very few independents, there was no competitive market for the sale of lamp inventions. As a result, any inventor, if he desired to market his invention at all, was compelled to accept the terms of the monopoly.

It thus came that the invention of the tungsten lamp came into the hands of the General Electric Company and the Coolidge and Langmuir patents resulted from the actual work of manufacture of tungsten lamps.

Concerning these three patents, the Supreme Court stated (*U. S.* v. *G. E.*, 272 U. S. 475–481):

"The General Electric Company is the owner of three patents—one of 1912 to Just & Hanaman, the basis patent for the use of tungsten filaments in the manufacture of electric lamps; the Coolidge patent of 1913, covering a process of manufacturing tungsten filaments by which their tensile strength and endurance is greatly increased; and, third, the Langmuir patent of 1916, which is for the use of gas in the bulb, by which the intensity of the light is substantially heightened. These three patents *cover completely the making of the modern electric lights with the tungsten filaments* and secure to the General Electric Company the monopoly of their making, using, and vending."

NATURE OF THE LAMP MONOPOLY—THE INDUSTRY HAS NOT BEEN A NATURAL MONOPOLY

This industry has not been a natural monopoly or one secured by superior business ability. On the contrary it was only attained through frequent resort to the United States Courts under the patent law. Upon the original Edison patents, the following cases are reported: 53 Fed. 592, 54 Fed. 504, 56 Fed. 496, 57 Fed. 616, 57 Fed. 642, 58 Fed. 573, 58 Fed. 878, 59 Fed. 358, 59 Fed. 691, 60 Fed. 276, 60 Fed. 397, 61 Fed. 834, 62 Fed. 397, 64 Fed. 229, 65 Fed. 212, 65 Fed. 551.

Subsequently, the three basic tungsten lamp patents were sustained in numerous other decisions, of which the following are reported: 233 F. R. 96, 267 F. R. 824, 280 F. R. 856, 261 F. R. 606, 277 F. R. 290, 286 F. R. 175, 266 F. R. 994, 280 F. R. 852, 292 F. R. 562. 298 F. R. 579, 10 Fed. R. (2d) 159, 10 Fed. R. (2d) 851, 17 Fed. R. (2d) 90, 28 Fed. R. (2d) 64.

These lists, of course, take no account of the very large number of cases in which threats were successful without suit or published report.

Particularly during the latter part of this period, the monopoly was very effective, and notwithstanding the fact that the earlier lamp patents had long expired, the General Electric Company and its licensees in the year 1921 controlled 93% of the entire lamp business of the country and that business amounted to $68,300,000. (See *U. S.* v. *G. E.*, 272 U. S. 476, at 481.)

The profits from this business were stated by a witness in the case of *G. E.* v. *Mallory*, to have been many million dollars per year, which was several times as great as all the profits from all the other manifold activities of that great corporation combined, and a report of the New York State Legislative Committee after investigation showed that the marginal profit for the lamp industry of the General Electric Company was several times as great as from the other sources of its business.

Coupling these enormous profits, this high margin of profit, and the great preponderance of this profit over any other business done by the General Electric Company, and the necessity of frequent recourse to the courts to sustain it, it is fair to assume that the magnitude of this business and the dominant position assumed by the General Electric Company and the consequent power attained are a direct result of the patent law and of the power of the United States courts to enforce that law.

We cannot assume that this preponderance is the result of superior business acumen or general business efficiency, since there is no reason to believe that the business efficiency of the company in its other activities was any less than its business activities in the lamp industry; the only apparent difference being that in the lamp industry the monopoly was fostered by the United States courts.

The expiration of these patents, however, made no material change in the commercial situation. During the term of the patents, the General Electric Company and its licensees made in 1921, 93% of domestic manufacture and the

Digitized by Google

figures of Mr. Reed at the hearing, when corrected to exclude imports, give the exact same percentage of 93% today.

Still more interesting is the fact that the division between the General Electric Company and its licensees is almost the same. Mr. Reed's figures, as we remember them, were General Electric 49%, licensees 22%, imports 24%, independents 5%, which on the basis of domestic manufacture would work out:

	1921, under basic patents	1933, after patents expired
	Percent	*Percent*
General Elec. Co	69	64
Licensees	24	29
Independents	7	7

The General Electric Company contends that the monopoly is now a proper one under other patents. We will show that this is not true and that the monopoly has been and remains a single indivisible unit. The General Electric Company *make no defense* of the monopolistic practices. Their answer will be taken up in detail in a separate portion of this brief.

IX. Purpose, Limits, and Obligations of a Patent Grant

1. A patent is not a natural right but is a special privilege granted for the public benefit.

No inventor had any right to his invention at common law. His only remedies were against fraud and breach of trust. If an inventor used an invention publicly or if anybody honestly came into possession of it, the public had the full right to use it, for the inventor had no right of ownership.

On the other hand, the right of the public to do business freely without restraint was a common law right recognized as early as the case of the Cloth Workers of Ipswich (1 Abbot patent cases, p. 6), in which the court stated:

"The King * * * may make ordinances for the Government of any trade but thereby he cannot make a monopoly for that is to take away free trade and *that is the birth right* of every subject."

The early patents in England were not granted as a matter of right but by the King's favor and then they were sustained only under express conditions and limits similar to those imposed today in this country. Even the Statute of Monopolies granted no rights to inventors in this respect.

The patent owner, therefore, asserts a statutory right granted for a limited time for a specific purpose in derogation of a common law right of free men. Clearly the patent right must be extended only insofar as its purpose and intent demand.

The right to grant patents in the United States comes from article I, section 8, of the Constitution, which provides:

"The Congress shall have power * * * to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries."

This clause places two important constitutional limits upon the grant. First, it shall be to promote the progess of science and the useful arts. Second, the monopoly shall be for a limited time. Congress acting under this clause has deemed a period of 17 years to be a fair reward to the inventor upon the express condition that the inventor shall fully and freely instruct the public how to use the invention after the expiration of the patent term.

Patent rights are not granted solely for private gain. The primary purpose is to secure to the public the full benefit of the invention at the end of the term.

In *Kendall* v. *Winsor* (62 U. S. 322, 327) the court states:

"It is undeniably true, that the limited and temporary monopoly granted to inventors *was never designed for their exclusive profit or advantage;* the benefit to the public or community at large was another and doubtless the primary object in granting and securing that monopoly. This was at once the equivalent given by the public for benefits bestowed, by the genius and meditations and skill of individuals and the incentive to further efforts for the same important objects. The true policy and ends of the patent law enacted under this Government are disclosed in that article of the Constitution the source of all these laws, viz: 'to

Digitized by Google

promote the progress of science and the useful arts', contemplating and necessarily implying their extention and increasing adaptation to the uses of society. * * * By correct induction from these truths, it follows, that *the inventor who designedly, and with the view of applying it indefinitely and exclusively for his own profit, withholds his invention from the public, comes not within the policy or objects of the Constitution or Acts of Congress.* He does not promote, and, *if aided in his design, would* impede, the progress of science and the useful arts. And with a very bad grace could he appeal for favor or protection to that society which, if he had not injured, he certainly had neither benefited nor intended to benefit. * * * The rights and interests whether of the public or of individuals can never be made to yield to schemes of selfishness or cupidity: * * *. Whilst the remuneration of genius and useful ingenuity is a duty incumbent upon the public, the rights and welfare of the community must be fairly dealt with and effectually guarded. Considerations of individual emolument can never be permitted to operate to the injury of these." (Italics ours.)

Sixty years later, in 1917, in the *Motion Picture Patents Case* (243 U. S. 502, 510) the court stated:

"Since *Pennock* v. *Dialogue* (2 Pet. I) was decided in 1829 this Court has consistently held that the primary purpose of our patent law is not the creation of private fortunes for the owners of patents, but is 'to promote the progress of science and useful arts'."

And again in *Dr. Miles Medical Co.* v. *Park & Sons Co.* (220 U. S. 373, 401) quoting from *Grant* v. *Raymond* (6 Pet. 241):

"The great object and intention of the act (The Patent Act) is to secure to the public the advantages to be derived from the discoveries of individuals, and the means it employes are the compensation made to those individuals for the time and labor devoted to these discoveries by the exclusive right to make, use, and sell the things discovered for a limited time."

2. A patent is in fact a bargain between the public and the inventor. The public grants a right of exclusion for 17 years and in exchange the inventor agrees to make a complete disclosure and a complete surrender of the monopoly when the patent expires (*Cent. Elec. Co.* v. *Westinghouse*, 191 F. R. 350, Walker on Patents, 6th d., p. 18).

The complete disclosure and complete surrender of the monopoly at the earliest possible moment are the consideration to the public for the grant of the monopoly. In fact this disclosure is of value only in order to surrender the invention when the term is ended.

Any act by the inventor designed to prolong the effective period of the monopoly is inconsistent with the acceptance of the monopoly in good faith, as stated in *Woodbridge* v. *U. S.* (263 U. S. 50, 55–61):

"It was the legislative intention that the term should run from the date of the issue of the patent, and that, at the end of that time, the public might derive from the full specifications required in the application accompanying the patent, knowledge sufficient to enable it freely to make and use the invention. The Court quotes with approval from *McBeth Evans Glass Co.* v. *General Electric* (246 Fed. 695, p. 61):

" 'The policy of the patent law to secure to the public the full benefit of inventions after expiration of the fixed term deemed sufficient reasonably to stimulate invention, would be defeated if an inventor could withhold his invention from the public for an indefinite time for his own profit, and *that the right to preserve it a monopoly in an invention by keeping it a trade secret and the right to secure its protection under the patent law were inconsistent and could not both be exercised by an inventor.*' (Italics ours.)

"The gist of the reason for the conclusion there was the same as here, that the purpose and result of the conduct of the inventor were unduly to postpone the time when the public could enjoy the free use of the invention, page 60.

"And the Court quotes from in re Mower, 15 App. D. C. 144–152, p. 61:

" 'The patent laws are founded on a large public policy to promote the progress of science and the useful arts. The public, therefore, is a most material party to, and should be duly considered in, every application for patent. * * * ' "

The use of the invention by the inventor or the public during the existence of the monopoly and any incidental benefit derived is no part of the consideration for which the patent is granted, and the inventor has the full right to withhold the invention altogether from use for the entire period if he so desires.

As quoted by the Supreme Court from the *Button Fastener case* (47 U. S. App. 146):

"If he sees fit, he may reserve to himself the exclusive use of his invention or discovery. If he will neither use his device nor permit others to use it, he had

Digitized by Google

but suppressed his own * * *. A suppression can endure but for the life of the patent and the disclosure he has made will enable all to enjoy the fruit of his genius." (*Bement* v. *National Harrow Co.*, 186 U. S. 70–90.)

See also *Paper Bag Case* (210 U. S. 405, 425); *Bloomer* v. *McQuewan* (14 How. 539 at 549); *Crown Co.* v. *Nye* (261 U. S. 24).

Some phases of the *Button Fastener case* have been overruled, but this phase has been approved.

Any act which tends to defeat the prompt and complete surrender of the monopoly will forfeit the patentee's rights. If the patentee tries to prolong the patent or postpone the end of the term, the patent will be void; if he attempts by some other act to prolong the monopoly those acts meet with condemnation, and the purpose defeated as the particular facts demand.

Any such act or subterfuge of the inventor to extend the period of monopoly beyond the statutory period is inconsistent with the acceptance of a patent in good faith and if brought to the attention of the courts, will void the patent, as was stated by the Supreme Court in *Pennock* v. *Dialogue* (27 U. S. 1 at 19):

"While one great object was, by holding out a reasonable reward to inventors and giving them an exclusive right to their inventions for a limited period, to stimulate the efforts of genius, the main object was 'to promote the progress of science and useful arts', and this could be done best by giving the public at large a right to make, construct, use, and vend the thing invented at as early a period as possible, having due regard to the rights of the inventor.

"If an inventor should be permitted to hold back from the knowledge of the public the secrets of his invention, if he should for a long period of years retain the monopoly and make and sell his invention publicly, and thus get the whole profits of it, relying upon his superior skill and knowledge of the structure; and then and then only, when the danger of competition should force him to secure the exclusive right, he should be allowed to take out a patent, and thus exclude the public from any further use than what should be derived under it during his 14 years; it would materially retard the progress of science and the useful arts and give a premium to those who should be least prompt to communicate their discoveries."

The patent owner who has enjoyed a patent monopoly for the statutory period may not extend that period even in part, and may not defeat the complete surrender by identifying with that original monopoly another monopoly having a longer period to run with the intent that after expiration of the first monopoly he may still control substantially the same subject matter through the second monopoly in defiance of the rights of the public. Such a case was clearly set forth in the *Singer Manufacturing Co.* v. *June* (163 U. S. 169 at 181). In that case the plaintiff having enjoyed a monopoly of sewing machines under the various Singer patents and having advertised these machines as made by the Singer Co., registered the word "Singer" as its trade mark for the purpose of keeping a partial control over the business after the patents had expired. Concerning this phase of the transaction, the Supreme Court stated (at p. 181):

"The omission of the name, indicating the origin of manufacture and the substitution of the word 'Singer', just before the expiration of the patents, suggest a coincident relation of purpose which is not explained by any testimony in the record. *This coincidence between the expiration of the patents and the appearance of the trade mark on the machines and the use of the word 'Singer' alone tends to create a strong implication that the company, with the knowledge that the patents, which covered their machines, were about to expire, substituted the trade mark for the plain designation of the source of manufacture* theretofore continuously used and added the word 'Singer', which had become the designation by which the public knew the machine, as a distinctive and separate mark, *in order thereby to retain in the company the real fruits of the monopoly when that monopoly had passed away.*" (Italics ours.)

The Supreme Court in the *June Manufacturing case* established a doctrine that where the patentee has so identified the later monopoly with the former one that the later one would interfere with the rights of the public to take full advantage of the expiration of the expired patent, the interfering monopoly must fail. By identifying this trade mark monopoly, with the patent monopoly, which he was bound to surrender, the patent owner places himself in the position of having dedicated his trade mark to the public.

Concerning this procedure, the Court stated (p. 185):

"It is self evident that on the expiration of a patent the monopoly created by it ceases to exist, and the right to make the thing formerly covered by the patent becomes public property. It is upon this condition that the patent is granted.

Digitized by Google

It follows, as a matter of course, that on the termination of the patent there passes to the public the right to make the machine in the form in which it was constructed during the patent. * * * It equally follows from the cessation of the monopoly and the falling of the patented device into the domain of things public, that along with the public ownership of the device there must also necessarily pass to the public the generic designation of the thing which has arisen during the monopoly, in consequence of *the designation having been acquiesed in by the owner, either tacitly by accepting the benefits of the monopoly* or *expressly by his having so connected the name with the machine as to lend countenance to the resulting dedication.* * * * To say otherwise would be to hold * * * *that the patentee or manufacturer could take the benefit and advantage of the patent upon the condition that at its termination the monopoly should cease, and yet when the end was reached, disregard the public dedication and practically perpetuate indefinitely an exclusive right.*" (Italics ours.)

This farseeing doctrine was announced by the Supreme Court in 1895 without dissent. It was shortly after the Sherman Law had been passed when the country was in its first organized struggle against an uncontrolled "rugged individualism" which was placing the mass of the people at the mercy of the exploiting class. That case announced a doctrine fully sustaining the present petition of the independent lamp manufacturers.

We have now moved on. The whole course of development under the present administration has shown that uncontrolled "rugged individualism" is an anachronism in modern society. It is a contradiction in itself; it is a plea of the exploiting class for the right to suppress all individualism but their own; it is inconsistent with the preservation of human liberty.

To ignore that principle now, or to curtail it, would be a step backward instead of forward; it would place the public again at the mercy of predatory wealth against which we have been struggling for 43 years, and it would defeat the very policies of the present administration which have given such hope to the Nation.

In the *Singer case* the patentee made no attempt to stop the public from using the inventions which had been incorporated in the combined monopoly—what it did was much less serious. All that it did attempt to do was to reserve for itself a portion of the prestige which the previous ownership of the patent had given to it.

The Court was so zealous to insure that the public should have the *full and complete right to enter into the entire monopoly without any strings attached to it,* that it held that the patentee should not even preserve to himself that prestige.

The instant case is far stronger because the General Electric Company is actually attempting to hold back *a very material portion of the inventions comprising the monopoly itself, which they protected by the patent*—that is, to withhold from the public the very inventions which gave the monopoly value.

There might be some dispute as to whether the Court was too strict in the *June case,* but in the present case the General Electric Company is trying to steal the very heart out of the monopoly and keep it for itself.

The principle established is clear: that when the public has the right to the monopoly, it must be *a full and complete right with no strings attached to it and no limits placed upon it by the patent owner.*

To accomplish the same end of defeating the patent law, the General Electric Company has acquired patents on articles and processes auxiliary to lamp manufacture and are now endeavoring by these patents to prolong the lamp monopoly in the same manner that the Singer Company did.

It is true that in the *Singer Company case* the right involved was a trade mark and not a patent but there is no inherent distinction between the monopoly granted under a trade mark and the monopoly granted under a patent which would alter the reasoning of that case in any detail. A trade-mark right is established by exclusive use of the mark and the Singer Company had unquestionably the complete right to that mark except for the general principle herein before referred to, namely, that by identifying the one monopoly with the other they by their own act dedicate the second monopoly to the public on expiration of the first.

It is true that mention is made in the *Singer case* that a certain special screw was still covered by an unexpired patent and was referred to by the Court as not being free to the public on that account, but it is obvious from the decision that this was a minor detail which had not in fact been identified with the Singer monopoly. The fact that this detail was not an inherent part of the former monopoly was evidenced by the fact that *the defendant did not use it or claim any*

Digitized by Google

right to use it and made and sold competitive machines without it. The actual knob that the defendant did put on the machines it made, intended to look like the operative screw of the Singer machine, was not an operative element but was a dummy which was in *fact deceptive and misleading* and constituted an attempt to infringe on the plaintiff's good will. Even, therefore, if the defendant has had a right to use the invention involved, it had no excuse to use a device which served no purpose but to mislead the public as to the origin of the goods.

Whether the defendant would have been held to have the right to use this invention in good faith was not involved in the *Singer case,* as the defendant made no claim of such right.

Upon this point the statement of the General Electric Company on page 3 contains the following (G. E. Formal Statement):

"The holding in the *Singer case* cannot be explained away on the ground that the screw was a 'minor detail', not 'identified' with the original monopoly. If a patent on a 'minor detail' did not expire with the fundamental patents, in the *Singer case,* surely patents on important and valuable lamp improvements such as the inside frost, the non-sag wire, and the Mitchell and White, as well as the recent machinery patents, were not dedicated to the public, namely by reason of the expiration of earlier fundamental patents. * * *"

No one would contend, of course, that the expiration of one patent necessarily results in the dedication of another patent to the public. The broad principle has no bearing upon this case. The question here is whether the public shall have the right to use the invention which the patentee protected by his monopoly, and to use those things which gave that monopoly its sole value, or whether, on the other hand, the General Electric Company can maintain its monopoly for 17 years on a patent from which even they themselves learned nothing, according to the testimony of Dr. Whitney, the head of the Research Laboratories, and then when the patent expires, will retain the same monopoly by keeping all the essential data necessary to make it a practical success to themselves.

This subject will be discussed at greater length under a subsequent heading concerning the General Electric Company's principle of keeping as much information secret as possible in breach of good faith with the public.

In any event, however, *even if we concede the General Electric Company's outstanding patents being valid* to their fullest scope and enforceable in full against every defendant in every legitimate way. Yet they offered no justification for the maintenance of a monopoly on an unpatented article, even directly.

A PATENT RIGHT IS QUITE LIMITED IN MANY WAYS AND IS NOT A LICENSE TO VIOLATE THE LAW

It has been repeatedly held by the Supreme Court that a patent monopoly is an instrument of the public in promoting the progress of science and the useful arts, and it under no circumstances gives the patentee a right to utilize it for the accomplishment of unlawful ends. The cases on this point are numerous but sufficient here to refer to the following:

In the *Sanitary Mfg. Co. case* (226 U. S. 20–49), the patentee had a patent on an apparatus for manufacture of bath tubs and licensed it to the various manufacturers, placing limitations upon their manufacture and fixing prices. In that case the contention of the bath tub monopoly was the same as the contention of the General Electric Company here namely, that they were entitled to violate the antitrust laws because of their ownership of the patents, and that their agreements were in fact patent licenses and lawful.

The Supreme Court swept this contention aside, saying:

"The added element of the patent in the case at Bar cannot confer immunity from a like condemnation, for the reasons we have stated. * * * Rights conveyed by patents are indeed very definite and extensive, but they do not give any more than other rights an universal license against positive prohibitions. The Sherman Law is a limitation of rights which may be pushed to evil consequences and, therefore, restrained."

ONE OF THE EXPRESS LIMITATIONS OF THE PATENT GRANT IS THAT IT MAY BE USED TO MONOPOLIZE ONLY THE EXPRESS ARTICLE CLAIMED IN THE PATENT AND MAY NOT BE USED TO CONTROL ANOTHER ARTICLE

The right of a patent owner to use a patent for one article to secure a monopoly upon another article has been expressly denied in emphatic terms by the Supreme Court in a number of cases. Patent owners have been ingenious to find some pretense of evading this plain doctrine of the Supreme Court and they have

Digitized by Google

advanced sophistical reasoning why each case should be deemed an exception to the express policy of the Supreme Court.

In the early patent law, (*Bement* v. *National Harrow*, 186 U. S. 70; *The Button Fastener case*, supra, and *Henry* v. *Dick*, 224 U. S. I), the Courts held that a patent owner could control absolutely the use of the patented device but this has been expressly repudiated in modern times, a typical instance being the case of *Motion Picture Patents* v. *Universal* (243, U. S. 502).

In the *Motion Picture case* the patentees, having a patent on a film feeding mechanism, attempted to control the films to be used with that mechanism by a license restriction, in order to monopolize the sale of films. This was held to be beyond the power of the patentee, the Court stating (243 U. S. 516):

"It is argued as a merit of this system of sale under a license notice that the public is benefited by the sale of the machine at what is practically its cost and by the fact that the owner of the patent makes its entire profit from the sale of the supplies with which it is operated. This fact, if it be a fact, instead of commending, is the clearest possible condemnation of the practice adopted, *for it proves that under color of its patent the owner intends to and does derive its profit not from the invention on which the law gives it a monopoly, but from the unpatented supplies with which it is used and which are wholly without the scope of this patent monopoly*, thus in effect extending the power to the owner of the patents to fix the price to the public of the unpatented supplies as effectively as he may fix the price on the patented machine." (Italics ours.)

In the *Morgan Envelope* v. *Albany Paper Co. case* (152 U. S. 425), the patent owner had a patent for a combination of a fixture with a roll of paper which cooperated in a novel manner. It attempted to use this combination patent to control the sale of the rolls of paper and that practice met with a strong condemnation of the Court who affirmed the dismissal of the bill upon this point.

More recently the Dryice Company attempted the same result by refusing to grant licenses unless the licensee purchased supplies from that company (*Carbice Corp.* v. *Amer. Patents Corp.*, 283 U. S. 27). There the patent related to a combination package involving a carton of ice cream with a small container of frozen carbon dioxide embodied inside of it. The Dryice Company endeavored to secure a monopoly of frozen carbon dioxide by granting with the sale of the carbon dioxide a license to use it in making the patented package; and it refrained from granting any license to persons who did not use their dryice in the patented package.

There could be no objection to the licensing by the patent owner. The real legal objection lay in their *refusing to grant* licenses *for the purpose of creating an illegal* monopoly.

The Court held that this *refusal* to grant licenses for the purpose of creating a monopoly in an unpatented article was so serious an offense against the laws of the United States that it denied any relief in the Courts to the patent owner, thereby in effect destroying its patent, notwithstanding the fact that this patent was clearly infringed. The Court stated (Page 33):

"Control over the supply of such unpatented material is beyond the scope of the patentee's monopoly; *and this limitation, inherent in the patent grant is not dependent upon the peculiar function or character of the unpatented material or on the way in which it is used.* Relief is denied because the Dryice Corp. is attempting without sanction of law, to employ its patent to secure a limited monopoly of unpatented material used in applying the invention. * * * They (the plaintiff) supply merely one of the several materials entering into the combination and on that commodity they have not been granted a monopoly. Their attempt to secure one cannot be sanctioned." (Italics ours.)

The Court makes it clear that it condemns the refusal to grant licenses where the refusal is for the purpose of securing a monopoly not warranted by the patent. After stating that the patentee may prohibit the use of the invention, or may grant licenses, it continues (Page 31):

"But it *may not exact as a condition of a license* that unpatented materials used in connection with the invention shall be purchased only from the licensor." [Italics ours.]

In the Motion Picture case and other like cases, the Court could defeat the unlawful object of the patent owner by holding the license restriction void. In the Dryice case the suit was not brought to enforce patent restrictions, but for patent infringement. The Court had no power to grant licenses so it denied relief to the plaintiff altogether upon the sole and express ground that the plaintiff's plan of use of its patent was unlawful.

Digitized by Google

These cases can easily be reconciled and can only be reconciled on the ground that the Court will not pay too much attention to legal artifices, but it will take whatever action is necessary to *keep the patentee from using his patent monopoly to help in controlling any other article.*

It is clear, therefore, that a patentee may control only the thing patented to him, and he violates the law when he seeks to control some other article. The General Electric Company holds no present patent for a lamp, and all such patents have expired. It violates the law when it still seeks to control the lamp through patents for other things.

X. The Lamp Monopoly Today is the Same Monopoly as That Protected by the Basic Patents

We have already called attention to the fact that today, after the Just & Hanamann, Coolidge & Langmuir patents have expired, the control of the monopoly group is the same exact percentage of the business that it was in 1921 during the term of the patents. The Supreme Court states (undoubtedly from General Electric sources), that under the patents it then controlled 93% of domestic production and they now give figures to NRA which shows 93%. The General Electric Company's "licensees" are the same group that were licensed before, and it would be interesting to know whether even the royalties and quotas were not the same.

Mr. Reed, of the General Electric Company, in order to minimize the importance of the expiration of these three patents suggested at the hearing that there were no such things as basic patents. He called attention to the fact that the General Electric Company has a large number of patents of which some expired and some are acquired each year so that there was no basic monopoly to expire. This present contention of the General Electric Company *after* the expiration of the three patents, is in marked contrast with the statement from the Supreme Court previously quoted (*U. S.* v. *G., supra*):

"* * * These three patents cover completely the making of the modern electric lights with the tungsten filaments, and secure to the General Electric Company the monopoly of their making, using, and vending."

That the Supreme Court statement undoubtedly represented at that time the contention of the General Electric Company, but then the patents had not expired. They have had their dance and would now like to cheat the piper of his fee.

The General Electric Company for some years regarded their lamp monopoly as a single monopoly. They treated it as such and represented it to the public as such.

The lamp licenses granted by the General Electric Company were of the blanket variety in which they granted the right to manufacture lamps under a long list of patents, in which the three basic patents were included. Whenever improvements were made, the General Electric Company would automatically include these as a part of the general monopoly.

When suing lamp infringers during this patent term, it was these basic lamp patents on which reliance was placed. When they brought suits for infringement of the *machinery* patents, it was against machinery manufacturers for the sole purpose of preventing them from helping independent lamp manufacturers.

We can find no record of their ever having sued a manufacturer for infringement for selling machinery to the General Electric Company's lamp licensees. They have never used any of these patents except directly or indirectly *to control lamp manufacture.*

The General Electric Company itself stated at the time that it was a single monopoly

As clear evidence of the identity of the present monopoly with the basic monopoly, we call attention to the suit brought by the General Electric Company against the Hofmann Company in the Court of Chancery of New Jersey in the year 1931.

We had intended to submit an affidavit of the attorney for the Hofmann Co., giving the facts in this case, but the attorney has since withdrawn his offer and has stated that his commercial situation was such that he would not be able to give an affidavit until July. We do not know what form of intimidation was employed, but counsel for the independent lamp manufacturers has found strange difficulty in getting persons to give any evidence against this monopoly, no matter how aggrieved they may be, placing their refusals on the ground of fear of commercial retaliation, such as was visited on Mr. Glasgow.

Digitized by Google

We have, therefore, in lieu of such a statement of attorney, attached certain portions of the record which speak for themselves.

In that controversy it appears from the pleadings that in the year 1924 the General Electric Company entered into a contract with the Hofmann Company granting them a license to manufacture machinery for lamp manufacture under eighteen patents which included substantially all of their important lamp machinery patents. That contract had several important phases.

Manufacturing and selling rights were granted *without royalty of any kind* by the Hofmann Company, showing clearly that it was the intention of the General Electric Company to *make its profit out of the lamp business* and not out of its machinery.

Moreover, the license authorized the Hofmann Company to make such machinery and to sell it *only to persons who had licenses from the General Electric Company, to manufacture lamps.*

The contract directly stated:

"* * * it being the intention of the parties hereto that it shall be publicly known that the only purpose of granting of this license is to afford said domestic licensees (for lamp manufacture) an opportunity to obtain the licensed machinery" for use in making lamps in accordance with their license. This contract was breached by the General Electric Company and on February 24, 1930, a new settlement agreement was reached, including the payment to the Hofmann Company of $65,000 in cash, and releasing both sides of all breaches of the early contract.

Subsequently in 1931, the General Electric Company brought the bill of complaint (the basis of the *General Electric Company* v. *Hofmann* suit above referred to) and in the bill stated the following:

"The business of the Incandescent Lamp Department of the General Electric Company *is the manufacture and sale of incandescent lamps.* Upwards of millions of dollars have been expended by said incandescent lamp department in the development of new and improved machinery and equipment *for the manufacture of incandescent lamps*, all of which was done for the primary purpose *of improving the quality of incandescent lamps* made and sold by the General Electric Company and in reducing the cost of their manufacture. *It was not done for the purpose of engaging in the business of manufacture for sale of lamp machinery.*

"Paragraph 7: The new and improved lamp making machinery developed by the incandescent lamp department from time to time was *not intended for the use of other lamp manufacturers.* Complainant (The General Electric) decided to make an arrangement whereby its (lamp) licensees could have a source of supply where they could purchase lamp making equipment substantially identical with that used by the General Electric, said source of supply to be in addition to the one theretofore provided.

"Paragraph 8: For the purpose stated in Paragraph 7, a written contract was entered into on April 26, 1926, * * * in which the defendant, The Hofmann Co. * * * was licensed to manufacture and sell *only to specific domestic lamp licensees of the General Electric Company*, the lamp making machinery and equipment heretofore described. In order to enable the defendants to build *for said licensees* standard lamp making machinery substantially identical to the standard lamp making machinery manufactured by the General Electric for its own use, the complainant agreed in said contract to furnish to defendants drawings of said standard lamp making machinery."

Incidentally it is interesting to note that of those 18 patents under which the license was granted, four were for the alleged Mitchell-White invention, which were therefore licensed without royalty to serve the lamp licensees. They now seek to use this invention to extend the lamp monopoly.

Today they are still making the same lamps by the same machines and processes, obtaining royalty from the same licensees and still control the same proportion of the business and are still making just as strenuous efforts to wreck the business of all lamp competitors they cannot control, as they did during the existence of the patent monopoly. Not one important factor has been added, and the basic patents have expired. Of its lamp monopoly we may say with Tennyson:

"But men may come and men may go,
But I go on forever,"

The General Electric Company did not then, while the patents lasted, make and sell or license the making of any bulbs under the Pipkin patent except for the manufacturing needs of itself and its licensees *in making lamps.* The same situation exists today.

Digitized by Google

It did not then make and sell tungsten wire alleged to be under the Pacz patent except for the manufacturing needs of itself and its licensees *in making lamps*. The same is true today.

It did not then license the use of Mitchell & White constructions to anyone except for the manufacturing needs of its licensees *in making lamps*. And the same policy exists today.

It has never made any attempt to take any profit from any of those except as a part of the "business of making incandescent lamps."

XI. We Do Not Depend on Any Interpretation of the Patent Law. The Acts Complained of Are Illegal and Unfair and the Remedial Provisions Proposed Are Appropriate and Just

This petition of the Independents is not dependent upon any construction of the patent law. The acts complained of are unfair and illegal without involving any construction of the patent law whatsoever.

Some of these acts such as the deliberate libel of a competitor's goods required no comment to show their illegality once the use of such tactics is proved. All of them are monopolistic in character, in violation of the Antitrust laws and for the purpose of creating an illegal monopoly.

We want strongly to emphasize the fact that *we are making no complaint of the patent law*. We are making complaint of the *monopolistic practices* which are clearly contrary to law.

The patent law comes into this picture only in two respects. First, the General Electric Company, unable to deny the monopoly, are pleading justification on the ground of the patent law. A discussion of the patent law is thus essential to show that such a plea is utterly without foundation.

Second, the privileges which the General Electric Company has received under the patent law have placed it under *still more emphatic obligations* to abandon this monopoly, so that what otherwise might be a *mere violation of the Antitrust laws*, becomes in addition a *breach of good faith or even fraud*.

We have already stated that the rights we desire to have protected are not dependent on the patent law. In approaching the problem, however, it will be clearer to discuss the "inventions" now claimed by them first. This will make the illegality of the monopoly more clear.

PARTICULAR INVENTIONS NOW MISUSED—THE PIPKIN OR INSIDE FROST PATENT

It has long been known that a concentrated point of brilliant light is hard on the eyes and it has been known that grinding or frosting the surface of a piece of glass will distribute that brilliance over a large area so that it is no longer objectionable.

Up to July 1, 1925, the standard electric lamp had a clear bulb, and lamps of the diffusing type were considered as special lamps and effected the diffusion by frosting, opal glass, and spray tinting of glass. In 1924, clear lamps constituted 85 to 90% of the total lamp production, while diffusing lamps constituted only 10 to 15% of such total, not including those of the type known as miniature lamps, such as used on Christmas trees.

There is a very definite reason why the frosting of bulbs came out at the time it did. The early lamps having the filament looped back and forth did not require a frosted glass and frosting when not desired is objectionable because it absorbs some of the light and it makes it possible for inferior lamps to pass inspection for the inside of the lamp is not visible.

In the early twenties, the General Electric Company introduced the large-size lamp with a closely coiled filament in a neutral gas and the independents introduced the small-size lamp with the coiled filament in vacuum. Such a lamp would present a very brilliant point of light which is painful to the eyes. This resulted, therefore, in the adoption of the frosted globe.

In 1924 Marvin Pipkin of the General Electric Co. was working upon the frosting of glass bulbs and he frosted some bulbs on the inside in a manner which produced a very fragile bulb and then frosted other bulbs in a slightly different manner to produce a much stronger bulb. As a result, he claimed to have discovered that bulbs frosted on the inside had always been fragile until he developed a process of overcoming that difficulty.

We may here state parenthetically that the Independents have produced evidence which they believe conclusive that Dr. Pipkin set up a straw man to knock him down. That the process which produces the fragile bulb was an artificial process and not the normal process in use. They believe they have

Digitized by Google

established that the frosting of bulbs by the normal commercial process used at the time did not produce a fragile bulb. If this be true, his contention of having met a problem and solved it, that is, of having made any invention, is without foundation. This position is clearly sustained by the opinion of Judge Jones which was offered in the record. The correctness of either of these two positions, however, has no direct bearing on this petition.

Application for patent was filed on February 4, 1924, for this Pipkin method and included claims both to the method and to the article produced. The claims were repeatedly rejected by the Patent Office on references, and the application finally abandoned.

A second application for patent, with some additional features and a more elaborate description of the method, was filed on June 29, 1925, and eventually resulted in patent No. 1687510, issued October 16, 1928. While this application, as filed, included both article and method claims the method claims, some of which were allowed, were cancelled, so that the article claims of the patent, as stated by the applicant, *might not be limited in any way by the method described for producing the article*. The claims were skillfully drawn to include any inside frosted lamp having brightness reduction and strength suitable and desirable for commercial requirements. The patent contains two claims, claim 1, for example, reading as follows:

"*Claim 1.* A glass electric lamp bulb having its interior surface frosted by etching so that the maximum brightness of an ordinary incandescent lamp comprising such a bulb will be less than 25 percent of that of said lamp with a clear bulb, said interior bulb surface being characterized by the presence of rounded as distinguished from sharp angular crevices to such an extent that the strength to resist breakage by impact is greater than 20 percent of that of the clear bulb."

The scope and indefiniteness of this claim are apparent.

The phrase in this claim concerning the maximum brightness being less than 25% refers to the fact that the pin point of light as you gaze directly at the filament, will be so spread out over a larger area that the maximum intensity of illumination will be reduced. It does not mean that the amount of light coming from the lamp is reduced to 25%.

INSIDE FROSTING LAMPS WERE MADE THE STANDARD TO TAKE THE PLACE OF THE CLEAR LAMPS

In 1924, twelve years of the Just & Hanamann patent had expired, and the General Electric Company were faced with the possibility of surrender of their monopoly. In the few following years and before Just & Hanamann expired, the research and development committee for the General Electric Company decided to make inside frosted lamps the standard type. Dr. Jeffries of the General Electric Company testified that this was for the purpose of "standardizing and reducing the number of styles", but it is significant that the "standardization" led them directly into the type of lamp on which they hoped to continue to maintain patent protection and away from the lamp which was to be surrendered to the public.

Automatic machinery for the inside frosting of bulbs, according to the Pipkin method, was then developed and the commercial production and sale of these lamps was commenced on a large scale July 1, 1925.

These inside frosted lamps at first sold for slightly more than the clear lamps and within a short time were reduced in price to less than that of the clear lamps, thus inducing the public to purchase the inside frosted instead of the clear lamps. For example, the inside frosted 40-watt lamp, starting with its first production on July 1, 1925, sold for 30¢ as against 27¢ for the same clear lamp, and 32¢ for outside frosted; on January 1, 1926, the price of inside frosted dropped to 27¢, the price of the clear lamp; on September 1, 1926, both clear and inside frosted lamps were reduced to 25¢; the clear lamp then continued to sell for 25¢ and the inside frosted on April 1, 1927, was reduced to 23¢, and on July 1, 1928, to 20¢, thus making inside frosted lamps 5¢ cheaper than clear lamps and 10¢ cheaper than outside frosted. On July 1, 1928, the clear lamps were placed on a special list, being considered as special lamps.

It is significant that notwithstanding the inside frosted lamp was the same as the clear lamp, except that it required an additional operation to effect the frosting, it sold for less than the clear lamp. This was apparently done to establish the inside frosted lamp, on which application for broad patent protection was then pending, as the standard lamp in lieu of the clear lamp on which broad patent protection was about to expire. That this worked is shown by the following statement by Dr. Jeffries in the suit of the *General Electric Co.* v. *Save Sales Co.*, brought under the Pipkin inside frosted lamp patent (rec. p. 22):

Digitized by Google

"Whereas prior to its introduction the amount of the business relating to frosted bulbs was some 10 to 15 percent of the total, when the Pipkin invention went into use, the percentage jumped to something like 25 to 90 percent of the total number of large lamps sold, and since that time the inside frost has maintained the position as practically the universal type of lamp, and even sme of the larger wattage lamps now are put out with the inside frosted bulb. In general, I may say that the General Electric Company has made hundreds of millions of the inside frosted lamps."

THIS PATENT WAS PLANNED AND USED AS PART OF A PLAN TO DEFEAT THE SURRENDER OF THE MONOPOLY

Through this transaction it appears clear that the purpose of the General Electric Company was the same as the purpose of the Singer Co. in the *June Manufacturing case*, namely, to secure a new monopoly which would hold over after the expiration of the basic patents. If the patent had merely been introduced on a competitive basis, this purpose would not be so clear, but where its advertising concentrated upon it and it was given a price differential to push its introduction, to replace the other, it clearly forms its part in this scheme to maintain the monopoly.

The General Electric Company is in the position of having deliberately sought to destroy (and with considerable success) the value of the clear-lamp monopoly it had enjoyed before returning it to the public.

The General Electric Company has not made any attempt to make any profit from this alleged inside frost invention patented to it. It has not sold bulbs or licensed them for manufacture or sale with any attempt to make its profit from them. Instead it has licensed them for manufacture and sale only to the Corning Glass Works, without royalty, for sale only to persons licensed by the General Electric to make lamps. The Corning Glass Works has refused to sell such bulbs to independents, giving as a reason that their contract with the General Electric Co. forbids it.

The General Electric Company has sold them for the deliberate and express purpose of *taking its profit not from the bulb which was patented to it, but from the lamp on which the patent had expired*, in direct conflict with the decision of the Supreme Court in the Dryice and similar cases.

THE MITCHELL AND WHITE PATENT

(Because of the nature of the drawings referred to they are held in the files of the Committee on Patents, House of Representatives, Washington, D. C.)

The original tungsten lamps were made, See Figure 1, by putting two electric wires, called "leading in" wires, and if desired, a filament support through a glass tube, marked in Figures 1, 2, and 3 as the "press tube", and thereafter heating this tube at one end and pressing the glass into a solid mass or "press" around the wires (see fig. 2) thus sealing the tube and holding the wires in place. The filament was then attached to the projecting ends of the leading in wires. The element so formed comprises the inside portion of an electric lamp.

This press is then inserted into the neck of a glass bulb (see fig. 2) and the glass neck is melted and fused to the flared end of the press tube completely sealing the bulb (see fig. 3), cutting off the surplus end of the neck.

It was necessary to have some method of exhausting the air. This was done commercially by making a hole in the outer side of the bulb and fusing a glass "exhaust tube" to the hole. (See fig. 2.) The air was exhausted through this tube, after which the bulb was sealed by melting the walls of the tube together close to the bulbs (see fig. 3) and removing the projecting portion of the tube. This left a tip on the end of the bulb where the tube had been. A base was then put on the bottom.

In 1903 Jaeger (Jaeger Patent #729182), not connected with the General Electric Company, devised a lamp in which the tip was eliminated and the bulb was exhausted through a tube within the press tube. This is shown in figure 4. The construction of the lamp is the same as before except that the exhaust tube is inserted into and sealed to the inside wall of the press tube instead of to the end of the bulb. (See fig. 4.) This lamp was exhausted and the tube was sealed close enough to the lamp so that the tip of the exhaust tube after it was sealed would be completely concealed by the base of the lamp. This was a considerable improvement over the older practice.

Apparently the General Electric Company never adopted this construction in that form, which they could not monopolize. As soon, however, as Mitchell & White made a variation of the construction some fifteen or twenty years later they

Digitized by Google

claimed to have originated the entire idea, and claimed it in their patent application. This Mitchell & White variation is shown in figures 5 and 6.

In this form the exhaust tube is inserted through the press tube before the press tube is pressed together around the wires, so that the exhaust tube is firmly sealed into the press. When the press tube was closed around the wires, it also closed the exhaust tube. To remedy this a small hole was blown through the press while the glass was still hot.

Otherwise the invention was the same as Jaeger's. The General Electric Company has repeatedly claimed that this invention gave the tipless lamp to the world although they already knew of the Jaeger patent. When they tried to get away with this in the Courts, the claim was flatly repudiated in the following terms.

"In view of these facts we are of the opinion that to holdjthe defendants structure and infringement would logically result in holding that, embodying as it does Jaeger's device, the later anticipates Mitchell and White, but as we view it, Jaeger did not anticipate Mitchell and White." (*G. E.* v. *Eisler*, 20 Fed. 2.)

The Court thereupon proceeds to sustain its specific construction as a patentable improvement for that detail.

Notwithstanding this holding, Mr. Reed still says that the invention "resulted in the elimination of the unsightly tip at the end of the bulb". To us it seems like a futile attempt to steal credit which is in fact due to Jaeger.

It thus appears clear that there is no possible validity in this patent except a specific alternative process of making the Jaeger lamp.

This invention was included with Just and Hanamann in the list of patents under which its lamp licensees were licensed to make lamps. So far as we can ascertain, no severable charge was made for it and no reduction in royalty was allowed if this patent was not used.

The invention was among those directly included in the license to the Hofmann Machinery Company to be manufactured by them without royalty, as a part of the General Electric Company's service to its lamp licensees.

Certainly in any such procedure there as no attempt to get any profit from this invention as distinguished from making the profit from lamps. At that time the lamps were patented and it was legal to monopolize them. Now the lamps are not patented and it is not legal, and yet the same practice continues.

The General Electric Company has never, so far as we can ascertain licensed anyone separately under this patent, nor has it ever made any difference in license fee when this invention was used or not. The "standard machinery" furnished to its licensees contained this invention and no extra charge was made on that account as a license fee.

It is only now after the basic patents, under which the licensees were protected, have expired that the General Electric Company shifts its ground and attempts to exact royalty for that which was formerly regarded as a free part of the monopoly

This invention covers the inside portion of a lamp and it is now usually completely concealed in a frosted bulb. The manufacturer, of course, knows what process of manufacture has been employed, but the dealers and users cannot see from the outside and cannot determine the construction of the interior without destroying the lamp. The General Electric Company have made a practice to bring suits against such dealers and users.

Since no purchaser can destroy every lamp he buys, to test its infringement, there is no way he can purchase independent lamps and avoid the danger of this vicious and unfair attack.

THE PACZ PATENT

The manufacture of drawn tungsten wire, from the beginning proved an uncertain thing. The metal in the form of a powder is softened by intense heat and pressed into a rod, then with special heat treatments it is drawn into wire. The result, however, is not uniform. (See Affi. of Dr. Laise in the record.)

When the manufacture of lamps, having the filament in the form of a fine coil spring was introduced, it was found that with some wire there was a tendency for the spring to sag between supports. This changed the distance between adjacent turns of the spring and destroyed the proper effectiveness of the lamp. At the beginning a large proportion of the wire was subject to this defect, perhaps one-quarter to two-thirds, the remainder being substantially free from this difficulty. As the technique improved, the proportion was materially lowered.

Dr. Pacz of the General Electric Laboratories found that by using the better heat treatment and by combining with the metal certain other substances, such as silicates, that the proportion of non-sag wire could be increased. The coiled filament lamps which were made standard, were the cause of the work on the

Digitized by Google

non-sagging, and the non-sag wire was regulaly furnished to the General Electric Company's licensees to manufacture lamps, and was regularly incoporated in the lamps of the General Electric Company and its licensees after that time. No special licensee fee was charged for the use of this alleged invention. No such wire was generally sold to the public but it was confined to the General Electric Company and its lamp licensees.

The Pacz patent in its terms is not fined to wire made in accordance with processes devised by him, but is in terms to the physical wire. It is in such broad language that the General Electric Company contends that it covers every commercial form of wire, which does not sag in use.

THE USE OF THESE PATENTS BY THE GENERAL ELECTRIC COMPANY TO MAINTAIN THE LAMP MONOPOLY IS CONTRARY TO LAW

The General Electric Company is not making any attempt to use any of these three patents to make any profit out of the article patented, but instead is seeking to make its entire profit from the unpatented lamp. This practice is contary to a clear line of Supreme Court decisions:

Motion Picture Patents (243 U. S. 502), *Heyer* v. *Duplicator* (263 U. S. 100), *Morgan Envelope* v. *Albany* (152 U. S. 425), *Carbice case* (283 U. S. 27), and numerous lower Court decisions.

Moreover, since these patents were definitely used as an essential part of the basic monopoly, and were responsible for a very important part of the profit of that monopoly, because they were so indentified, they cannot now be withheld from the public. The public is entitled to make what the patentee made, to get his profit where the patentee got it: in short, to enter fully into the monopoly the patentee enjoyed under the basic patents in the form he enjoyed it.

Furthermore, since they are under obligation to surrender the monopoly and are instead conspiring and planning to prevent that surrender, these acts becc me a fraud upon the public and a breach of good faith. (*Singer* v. *June; Pennock* v. *Dialogue; Woodbridge* v. *U. S.;* and *Kendall* v. *Winsor;* all cited supra.

To remedy these evils, we have proposed the following clauses:

Code VIII: "No manufacturer having commercial control of any particular art and having any patent right relating thereto shall use said control and patent right to secure or maintain a partial or complete monopoly over articles not specifically claimed in said patent."

Code X: "If the Code Authority for the Incandescent Lamp Industry shall find that any employer has enjoyed a substantial monopoly of any product by reason of a United States patent, and that the said patent has expired and that the said employer used in the commercial manufacture, use and sale of the said product in the form that the said product was manufactured, used or sold by him under the protection of said patent, any auxiliary inventions or patents, and if the Code Authority shall further find that the said inventions were so used by said employer or were used to such an extent, that they became an intimate integral or important part of the operations of said employer under the protection of said patent monopoly, then the said auxiliary inventions or patents shall be deemed to be a part of the monopoly protected under the said patent monopoly and it shall be deemed to have been dedicated to the public with the expiration of the dominating patent, and the said Code Authority shall so declare. Any use of any such patent to discriminate against Independent employers or to prolong the monopoly over the product, either in whole or in part, as that monooply was previously enjoyed by the said employer, shall be deemed unfair competition."

Paragraph VIII places no limits whatever upon the use of any patent to control the invention claimed, but it does prevent the patent being used as a cloak or alibi for illegal monopolies.

Manufacturers have always tried to secure monopolies and patents have offered an inviting field because it suggests a plausible excuse that monopolies based on patents are legal. As we have shown, however, the decisions of the Supreme Court speak in no uncertain terms to the contrary. (*Sanitary Mfg. Co. case* cited supra.)

There is no warrant in law for any kind of "monopoly based on patents", except the exact and specific monopoly recited in the claims of the patent itself. Any attempt to use a patent for one thing to secure a monopoly of something else is illegal and gets no support whatsoever from the patent law. A monopoly from patents must be, therefore, either the exact monopoly granted or it has no legality at all.

Digitized by Google

The law was once more complaisant to extend the inventor's rights (*Bement* v. *Harrow*, 186 U. S. 70; *Paper Bag case*, 210 U. S. 405; *Henry* v. *Dick*, 224 U. S. 1). Those doctrines have now been directly repudiated in a greater recognition of the public interest in many decisions, for example, *Motion Picture Patents case* (243 U. S. 402); *Morgan Envelope* v. *Albany Paper case* (152 U. S. 425); *Carbice case* (283 U. S. 24). The proposed section VIII, however, does not go as far as the law. It is limited only to cases where the patent owner has commercial control and under such circumstances misuses his patent rights.

Proposed Section X is limited to cases in which the Code Authority shall find as a matter of fact that certain patents have been dedicated to the public and says such patents may no longer be enforced.

With a proper definition of "dedicated to the public" such a clause cannot be questioned.

The phrase chosen to define "dedicated to the public" is in accordance with the reasoning of the *June Manufacturing case*. It rests upon the principles there established that the public is entitled to the things that made the monopoly worth while to the patentee, and any attempt to defeat that right is wrongful.

THE USE OF COMMERCIAL MONOPOLIES TO PROLONG THE LAMP MONOPOLY—TUNGSTEN WIRE

There was no commercial market for tungsten wire except for the manufacture of tungsten lamps, of which the General Electric Company hold 93% of the business. The manufacture of this wire is a difficult thing. To be made uniform, it must be made in large quantities. The General Electric Company, having the monopoly of the sale of lamps, kept a monopoly of the manufacture of the wire and now use the monopoly of the wire to maintain the monopoly of the lamp.

Independents manufacture wire of high quality, but its characteristics are necessarily less uniform and certain because of the smaller volume manufactured. This imposes on the independent manufacturers a higher wire cost which discriminates in favor of the monopoly.

Ordinarily a manufacturer may choose his customers at will (*U. S.* v. *Colgate*, 250 U. S. 300). But there are peculiar factors in this case which demand a different marked article in competition with other equivalent articles; it is a commercial monopoly of an important commercial product, having no commercial rival. Moreover, that monopoly was acquired as a part of a patent monopoly which is now expired; and it is so tied up with that lamp monopoly that it assists in maintaining that lamp monopoly now after it is illegal.

The situation demands a remedy because it is creating an illegal monopoly in lamps and it demands a remedy because it is a part of the patent monopoly which must now be surrendered.

The General Electric Company today refuses to sell tungsten wire for lamp manufacture except to its own lamp licensees, and it is using this refusal to prolong its lamp monopoly.

LAMP MACHINERY

We stated in our former brief that there are no important patents on lamp machinery today.

The General Electric Company has challenged the statement, citing by inference, certain fully automatic lamp machines, and certain machines for frosting bulbs. The first are not important to this discussion for no independent manufacturer has a volume of production which would warrant the use of such machinery. The frosting machine does not make lamps but bulbs. This latter machine has already been discussed under the headline "Inside Frost Patents".

The statement, therefore, that there are no important lamp patents, so far as this discussion is concerned, still stands as a fact.

Some machinery is manufactured by the General Electric Company or by concerns commercially dominated by the General Electric. Some equipment is made by other manufacturers. In both cases, the General Electric Company has endeavored to restrict or prevent the acquisition of such machinery and equipment by independent lamp manufacturers. This is done by contracts in restraint of trade and by intimidation.

Any attempt to bring patents into this discussion is but an attempt to confuse the issue by a smoke screen.

For the life of the lamp patents, the machinery patents were used to support that lamp monopoly. Now, however, that the lamp and machinery patents have expired, they resort to contracts in restraint of trade and coercion to retain the monopoly.

Digitized by Google

Considering first the machinery of the General Electric Company's expired patents, this was always regarded by that company as a part of its lamp monopoly. It never licensed the manufacture of any of its machines while the patents existed, except for the use of itself and its lamp licensees. When it did grant a license to Hofmann Company it did not even ask for royalty. It said itself that its business was to make lamps and that the machinery was to assist in making lamps in its own plants.

The General Electric denied that it was attempting to prevent independents from getting lamp machinery, and in the denial it seems to us that they misrepresented the Hofmann Case. The facts, as will be seen from the record, are:

In 1926, the original contract was entered into between the General Electric Company and the Hofmann Company, which was a straight patent license on eighteen patents. Its purpose was "to provide a source of machinery for its lamp licensees." In this contract the General Electric Company agreed to loan to the Hofmann Company the "drawings of its licensed machinery", together with blue prints and instructions, and the Hofmann Company agreed "to take and cause to be taken reasonable care to insure that said drawings and said property shall be kept confidential."

Subsequently, on February 24, 1930, a disagreement arose and a new agreement of settlement was entered into containing a complete release on both sides of all claims of breach of the former agreement and cancellation of the license, the General Electric Company paying Sixty-Five Thousand Dollars. By this second agreement, the Hofmann Company agreed to return all drawings and blue prints, and then follows the paragraph:

"The Hofmann Co. has on hand certain patterns which it has made up at its own expense from the blue prints and other information furnished to it by the General Electric Co., which said patterns are capable of use by the Hofmann Co. in the manufacture of machinery other than lamp-making machinery, covered by the patents of the General Electric, and the Hofmann Co. agrees that no license is to be implied to it under any patent of the General Electric Co. by reason of its retention of said patterns."

By this it is clear intent that the Hofmann Co. shall keep on using the information embodied in the patterns after returning the drawings, *except insofar as it might be stopped by patents.* Meantime, all the important patents expired.

Then the General Electric Company brought suit, praying:

"Wherefore, Petitioner respectfully prays that this Honorable Court will make an order directing the defendants to show cause why they should not be restrained from making or manufacturing any machinery of the National, Edison, or General Electric types."

This prayer contains no reference to patents, and the machine patents had expired, except Mitchell and White, which had been declared invalid.

There can be no substantial contention that this suit was a suit to prevent patent infringement because it is brought in a state court having no patent jurisdiction and makes no prayer for patent relief.

The contention of Mr. Reed at the hearing on January 4th, 1934, that this suit was to prevent the pirating of confidential data is in direct conflict with the facts shown by the foregoing quotations. The settlement agreement wipes out the original agreement and all breaches of it, granting complete release to both sides and the settlement agreement clearly shows that the Hofmann Company are *free* to use the unpatented data and information.

Of still greater importance, however, is the fact that Mr. Reed's contention would itself convict the General Electric Company of bad faith. The machinery had all been patented to the General Electric Company and this fact alone *is inconsistent with there being any important secret information in regard to it.* As quoted by the Supreme Court from McBeth Evans Glass Case in *Woodbridge* v. *U. S.* supra:

"The right to preserve a monopoly in an invention by keeping it a secret and the right to secure its protection under the patent law *were inconsistent and could not* both be exercised by an inventor."

If this suit was brought to prevent Hofmann from making standard machinery after patents on it had expired, how does Mr. Reed reconcile this with his reply:

"* * * The General Electric Company has no agreement with any manufacturer of machinery which prevents the latter from selling unpatented machinery to anyone. * * *"

It seems clear either that the statement by Mr. Reed is false on an important and material issue, for the General Electric Company's contention in the Hofmann suit is directly to the contrary, or else the General Electric Company brought

Digitized by Google

the Hofmann suit knowing that the Hofmann contract did not support the contention they were making.

In either case, it is clear that the fact of bringing the suit does emphatically constitute an attempt on the part of the General Electric Company to embarrass the Hofmann Company and thereby to harass independent lamp manufacturers and prevent them from getting lamp machinery even when the machinery is not patented.

CONTRACTS BY GENERAL ELECTRIC IN RESTRAINT OF TRADE

The General Electric Company has pursued a corresponding policy with regard to machinery made by other concerns. Mr. Rosenthal, himself a lamp manufacturer and a man who has had a long connection with the industry, states in his affidavit:

"It has been a frequent experience of independent manufacturers to be told that they could not purchase machinery, materials, or apparatus because the sellers had made exclusive contracts with General Electric Company, which prevented such sales. * * *

"I attach the following letters as examples of this type of refusal but by far the largest number of these refusals have been by word of mouth so that no written evidence is available.

"In general these have included the control of tungsten, the metal from which filaments are made; the gas which is used in filling lamps, frosted bulbs from which the frosted bulb lamp is made, as well as many patented and unpatented pieces of apparatus, machinery and minor materials and supplies."

Exclusive contracts are not necessarily vicious in effect if there be other adequate sources of supply, or if there be substitutable articles, but such contracts are plain violations of the Anti-Trust Laws, when designed to promote monopoly or to restrain trade, and are particularly vicious when used to defeat the surrender of the lamp monopoly.

We believe we have shown that these contracts are to promote the lamp monopoly and to restrain the trade of the independents. They are serious factors toward that end because as in many cases such as the case of the DeVilbiss Co., the products are not made elsewhere, and in the case of lamp machinery there are but two independent lamp machinery companies of which they are already attempting to suppress one.

The type of violation of the Anti-Trust Laws here involved has nothing to do with those cooperative efforts which are necessary to prevent cut-throat competition by NRA. In fact these monopolistic contracts are one of the worst phases of cut-throat competition by the monopoly.

If it was the object of NIRA to ease off the Anti-Trust Laws to permit the achievements of the public objects of that Act, it was certainly not the purpose to grant immunity for contracts which are solely to crush independent competition that cannot be met in a fair field.

This is an excellent illustration, therefore, of the fact that clause 5 of NIRA places a corresponding duty on NRA, to prohibit unfair practices in restraint of trade. If the codes give leeway to achieve a good end, they must expressly prevent that same leeway being used against the public interest, and contrary to law.

We are proposing two clauses of fair competition which are submitted as substitutes for provisions suggested, by NEMA.

We shall discuss them at this point because we feel that they are so closely related to the problems here discussed that they should not be separated and partly because such clauses originated with us, and the clauses worded by NEMA are so worded as to be worthless. We shall leave discussion of the NEMA provisions to a special consideration. We shall here present the necessity of the two clauses we propose.

THE GENERAL ELECTRIC UNFAIRLY THREATENS CUSTOMERS OF COMPETITORS TO CREATE MONOPOLY

The section proposed on this point reads as follows:

Code V. "No employer or person handling the products of an employer shall in any manner threaten with suit for infringement of patent or trade marks any person dealing in or using the products of another employer until he first shall have established his patent and its infringement by the product specified in a suit against the employer manufacturing said product."

The patent law grants to a patentee the right to exclude others from making, selling and using, but these three rights are not of equal force. The Supreme Court has determined that the right to control the use is limited and is incidental

Digitized by Google

only to giving the inventor a proper profit from the invention (*Morgan Envelope case; Motion Picture Patents case; Dryice case, supra*).

In a proper case, the right to sue a defendant for the unlawful use of an invention is not questioned. For example, when the invention is a process, the use of it is the only thing the inventor can tax. This is clearly not intended, however, to give the patentee any right to use the patent unfairly, or to stretch it beyond the legitimate collection of a royalty or profit from the inventor, and especially not to create other monopolies.

THE GENERAL ELECTRIC THREATENS DEALERS AND USERS WHO DO NOT HAVE SUFFICIENT FINANCIAL INTEREST TO DEFEND THEIR RIGHTS

The independent lamp manufacturers make and sell lamps as they believe they have a right to do. These lamps are sold through dealers and to buyers throughout the country who in general have no great commercial interest as to what lamp they use, except for the differences in quality or price. A large number of such dealers and buyers have been threatened with suits for patent infringement.

Mr. Rosenthal attaches twelve letters from prospective buyers showing the direct loss of orders of importance because of such threats and in addition, he states, what must be apparent any way, that the number of orders lost without such letters being available is many more.

The effect of such threats can easily be understood. The inside frost patent has just been declared invalid in the first suit brought against a lamp manufacturer, but before that time a number of the threats made by the General Electric Company have been made upon this patent. No dealer or buyer could face with comfort the threats of supplying the costs of such a patent suit. If this invalidity is sustained on appeal, every threat made on this patent was without justification. Mr. Freeman and Mr. Thomashower show that they were put out of the lamp business by such unfounded threats. Mr. Reed says that they sold imported lamps, but as a fact, these gentlemen also sell domestic lamps.

A PATENT OWNER CAN PROTECT EVERY VALID RIGHT TO HIS INVENTION WITHOUT THREATS AGAINST USERS

If it be the desire of the patent owner to maintain his patent, common sense and common fairness demands that he stop infringement at the source, by proceedings against the manufacturer. The policy of cutting off the customers is dictated by a desire to shoot the independent in the back. It is the same motive that actuates the machine-gun gangster.

The provision suggested places the only limitation upon the patent owner, that he shall not threaten the public generally until he has established the validity of his threats.

The Code provision would not destroy any fair value of any patent. If a patent is valid and infringed, it might still be enforced even against a user or dealer, but to do so, the patentee must first play fair and show that his patent is valid and infringed.

THE GENERAL ELECTRIC COMPANY FOR PERSONAL ADVANTAGE HAS REPEATEDLY SPREAD FALSE AND MISLEADING STATEMENTS ABOUT INDEPENDENT LAMPS

The other code provision suggested as a substitute for a corresponding NEMA provision is:

"No employer shall defame a competitor by words or acts imputing to him dishonorable conduct, inability to perform contracts, questionable credit standing, or by disparagement of the grade or quality of his goods."

This clause is identical with the Clause XII (b) proposed by NEMA, except that the words "false or deceptive" have been omitted before the word "disparagement."

This clause would seem to require little argument.

As shown by the affidavits attached, the General Electric Company has repeatedly made false and misleading statements about competitors' goods which have very seriously damaged the independents as a whole, as well as the particular independents concerned.

To summarize some of these facts:

The General Electric Company sent out a report of the Better Business Bureau of Columbus (see Bernstein affidavit), which purported to show that lamps of the Sun-Glo Company were grossly inferior to General Electric lamps. This report was widely distributed and did great damage.

Digitized by Google

The General Electric Company does not now contend that the report represented the true facts and it clearly appears that it does not.

The Sun-Glo Lamp Company sued the General Electric Co. in Court and the defense of the General Electric Co. was that it, the General Electric Co., had been so gullible that it had swallowed the statement of the Better Business Bureau, apparently without investigation. (See extracts from records hereto attached.) The plea of gullibility is supported by the fact that in spite of the public disclosures by the Senate Committee and Senator Brookhart, which clearly showed that the "Reputable citizens" were but figureheads and that the Better Business Bureau itself was maintained to pander to stock jobbing, yet the General Electric Co. still represents them as an organization of reputable citizens, to prevent fraud.

Still it is difficult to believe the defense of gullibility in this case where the matter at issue was the testing of certain lamps about which the Better Business Bureau knew little or nothing, whereas the General Electric Company itself is equipped with the best of testing laboratories and lamp experts and has itself evolved rules of procedure necessary to give value to the results.

The General Electric Co. claims that the United States Bureau of Standards tested the lamps, but they do not say that that Bureau selected the method of testing or approved the conclusions. The tests were direct violations of the rules of procedure which the General Electric Co. had established. That bulletin expressly states that a test of six lamps or so would be more apt to be misleading than helpful, and yet the test upon which they based their contention of the Sun-Glo lamp was a test of five lamps which had apparently been sold as defective or seconds. The actual tests made were, therefore, of a kind on which the General Electric Company's own testing rules state no fair comparison can be based. (See affidavit of Mr. Bernstein.) The tests were inadequate, the conclusions unwarranted and contrary to fact and the pamphlet grossly misleading. The lamps of the Sun-Glo Manufacturing Co. are substantially equal to the best lamps made.

This Sun-Glo suit apparently taught the General Electric Co. caution, but not fair play.

The next attack was against International lamps. (See affidavit of Mr. Glasgow.) It purported to be based on tests, but here the tests were still more faulty. This statement was sent to all the important buyers of the Carolinas. The attack was vicious and false, and it was anonymous and without date.

In spite of its annymity, however, there can be no real doubt of its origin.

The document on its face is clearly a sales pamphlet in behalf of General Electric lamps. It is marked upon its title page:

"Actual Tests Made Comparing The Value of General Electric Mazda Lamps with non Mazda Lamps.

"The Results Speak For Themselves—BUY General Electric Mazda Always."

It is incredible that such a statement could have been so made and distributed except on behalf of the General Electric Co., and it will be remembered as brought out in *U. S.* v. *G. E.*, *supra*, the persons selling General Electric lamps are *direct agents*, as distinguished from mere jobbers. This agency system was adopted for the express purpose of enabling it to fix retail prices. Even if this statement was made by an agent, therefore, it can hardly absolve the General Electric Co.

Again the affidavit of Mr. Glasgow shows that Mr. Thomas of the Mill Supply Co., the local General Electric agent, "had taken up with him (Mr. Perry who made the tests) and he (Mr. Perry) authorized the distribution to all of his mills." If Mr. Thomas thus got permission to send it out, and it was in fact sent out, it is hard to believe it was not sent out by him.

Moreover, Mr. Glasgow sent broadcast a pamphlet copy of which is attached to his affidavit, carrying in the front page in huge red letters:

"A REPLY TO GENERAL ELECTRIC'S ANONYMOUS PROPAGANDA PAMPHLET ATTACKING INTERNATIONAL HYGRADE AND ALL NON MAZDA LAMPS."

This reply pamphlet clearly stated the facts above outlined and contained the proof showing the General Electric pamphlet to be false.

But there is no evidence we can find of *any denial* by General Electric Company that they send out the document, and no claim that the General Electric pamphlet was true.

They have gotten the full benefit of this libelous statement and have made no effort at reparation, correction, or retraction. On the contrary, the General Electric instead of making retraction or correction, dropped the matter of the

Digitized by Google

pamphlet and within sixty days brought suit against Mr. Glasgow, for patent infringement. The General Electric Co. well know that International Lamps are made by the lamp company of that name, and well know that Mr. Glasgow had no financial interest in the matter warranting a defense. Such procedure reminds one of the tactics of any other bully who will argue so long as he wins, but if the argument goes against him, he uses brass knuckles.

The third consecutive assault upon the independents was directed upon the Jewel Company. As shown by Mr. Herzberg's affidavit, a very similar statement was issued purporting to be based on tests made:

"JEWEL INCANDESCENT LAMPS"

"READINGS TAKEN BY OHIO STATE UNIVERSITY"

Then follows certain data with the conclusion:

"On the average, these lamps consume 38% more watts than that marked on the bulb and are 19% less efficient than lamps of standard make."

On investigation, the facts disclose:

1. The tests were not made by Ohio State University, which University knew nothing of them, the University states:

"You will be interested to know that the Ohio State University has never tested the lamps you mention. In fact the University does not undertake such work for outside concerns for any commercial purpose; furthermore, the University does not allow its name to be used in connection with any commercial venture of advertising or sales promotion.

"I find, however, that Dr. K. Y. Tang, who is a professor in this department, did some sort of testing on such lamps. He did this as a private consultant inasmuch as he is an Illumination Engineer and takes work on his own time, and the University has nothing to do with his tests or results as long as he or his clients do not use the name of the Ohio State University."

2. Mr. Tang, who made certain tests, made them on the understanding they would not be so used "as it was used" and he had *no evidence whether the lamps were Jewel Lamps or not*—in his own words:

"Last Spring I made some efficiency tests on 'Jewel' mushroom lamps. At the time of test, I was given the understanding that the data would not be used as it was used and, hence, did not check very closely whether these lamps were etched or stamped with the 'Jewel' brand on the bulb."

Every one of these three manufacturers have had tests made under conditions which are recognized as fair, and these tests show that all of the brands of lamps are of high quality, comparing favorably with any lamps made.

The attacks are thus shown to be false, damaging, and without excuse.

The meaning and purpose of the Code clause proposed are self evident. The libel laws without any code afford a certain measure of relief against such vicious attacks when and after the victim *proves* them false and *proves* actual damages. This by no means rectifies the evil—it takes so long to litigate the truth in a Court of law that the damages to the victim may be irreparable and the actual provable damages, even though in themselves serious, are so slight compared to the intangible damages which cannot be proved. The manufacturer loses possible customers, and also prospects that he hasn't even heard of. Orders are withheld or cancelled where no reason or motive are assigned.

In actual practice a manufacturer may be put out of business without hope of regaining his trade.

The Code provision makes the mere issuance of such a pamphlet unfair competition thereby eliminating the evil at its source.

These attacks on Independent Head Lamps affect all independents. The Glasgow pamphlet contained the phrase in large letters on the title page "comparing G. E. with *Non-Mazda Lamps*." That is not an attack alone on International lamps, but is a libel of all *non-Mazda Lamps*.

The Better Business Bureau pamphlet contained photographs of a number of lamps among which Sun-Glo lamps were included, with the clear inference that unless you brought Mazda lamps you were buying fraudulent lamps.

The Ohio State University Bulletin was headed "A Racket in Incandescent Lamps" and stated:

"Agents for various brands of so-called Mushroom lamps are making a door to door canvas with a product which is often inferior to lamps of recognized standard quality."

The rest of the pamphlet compares "Non G. E." lamps as though they were one class with "Standard" lamps by which they obviously mean their own lamps.

Digitized by Google

The general advertising of the General Electric Company distinguishes between General Electric lamps and "Liar" lamps, between General Electric lamps and leaky faucets, so that the public has been led to classify all non-G. E. lamps together. For this reason every independent is adversely affected by each libelous statement issued by the monopoly against any of them.

REFILLED LAMPS

This provision should not meet with opposition. Some concerns take old lamps, open up the glass, insert a new filament and again seal the lamp. Such a lamp is not a new lamp nor the equal of a new lamp but that fact is not apparent to the buyer. On this account it may be sold and it is sold to persons who believe it to be a new lamp. We do not believe it can be questioned that such lamps should be so marked as to let the buyer know what he is purchasing.

THE GENERAL ELECTRIC COMPANY HAVE CONCEALED CRITICAL INFORMATION IN FRAUD OF THE PUBLIC

The Patent Statute provides (section 4888):

"Before any inventor or discoverer shall receive a patent * * * he * * * shall file in the Patent Office a written description of the same and of the manner and process of making, constructing, compounding and using it *in such full, clear, concise and in the art of science to which it pertains or with which it is most nearly connected to make, construct, compound and use the same* and in case of a machine, he shall explain the principle thereof *and the best mode* in which he has contemplated applying that principle * * *."

Such a description has been a requirement from the inventor from the beginning of our patent law. The wording was adopted at a time when inventions were substantially independent of each other and inventions in a given field did not follow each other in rapid sequence.

The obligation upon the patent owner to surrender its monopoly after the patents expire carries with it the obligation in *good faith to surrender it fully and freely in the form in which it was enjoyed by it under the patent.* (See *Singer Mfg. Co.* v. *June, supra: Kendall* v. *Winsor, supra: Dr. Miles Medical Co.* v. *Park & Sons, supra; Pennock* v. *Dialogue* (27 U. S. 1); *Woodbridge* v. *U. S.* (263 U. S. 50).)

This complete surrender of the monopoly of which the disclosure is a part is the only consideration passing to the public for the grant. If the patent owner could avoid the disclosure and still get the grant he would be able to eat his cake and still have it. Tnis policy was emphatically condemned in *U. S.* v. *Woodbridge* (263 U. S. 54).

Patentees have frequently skated on pretty thin ice in this respect, and the defense has been raised in many suits.

We know of no company heretofore which has been so brazen or contemptuous as to admit this charge and even *claim it in Court*, except the General Electric Company in the Hofman suit.

THE GENERAL ELECTRIC SYSTEM OF PATENTS WITH A STRING ATTACHED

The excerpts from the record attached hereto show that when the General Electric Company originally granted the license under its 18 machine patents to the Hofman Company it gave also certain data, blue prints and instructions. At that time the machines were patented and the license contained a provision that this data was to be kept confidential. As to the nature of this data, the General Electric Company states:

"In order to enable the defendants to build for said licensees standard lamp making machinery substantially identical to the standard lamp making machinery manufactured by the General Electric for its own use, the complainant agreed in said contract to furnish the defendants drawings of said standard lamp making machinery.

"Paragraph 10. If the defendant had not been furnished with the drawings and blue prints of the General Co., above referred to, it would have been necessary for the defendants to expend very large amounts of money, time and effort to make detailed drawings and group assemblies before it could manufacture such lamp making machinery.

"Paragraph 11. Complainant further says that all of the blue prints, drawings and other data hereinbefore referred to were of strictly confidential nature and are closely guarded (kept under lock and key) with the greatest care by complainant."

Digitized by Google

Here we see the General Electric Company admitting its system of patents with a string attached. During the patent period, while the Courts will protect the monopoly this system gives every appearance of complying with the law, but when the patent expires the whole substance of the invention is retained by pulling on the string. The public has possession of the patent disclosure, but that disclosure is no good. The General Electric keeps the important part of the information " under lock and key."

In the early days, when the law was formed, it was assumed that the description contained in the patent would be enough to enable the public to take the monopoly at the expiration of the patent. Since that time our economic life has so changed that the best known method of working out the invention today may be completely superceded or discarded tomorrow, and it follows that a basic protection obtained upon a nebulous idea with a wholly impractical background may be supplemented by subsequent improvement and developments which alone make it of great value. Under such circumstances, the monopoly is obtained on a patent which describes a substantially useless invention, useless so far as the disclosure is concerned, but value is given to it by subsequent information to which the public may be strangers. The inventor is thus able to divorce the document which gives him the monopoly from the information which gives that monopoly value, and thus completely defeat the object of the patent law.

No better illustration of this principle could be given than that of the lamp industry. The basic patent for the tungsten lamp which protected that lamp from 1912 to 1929 was the Just & Hannamann patent. Incandescent lamps having filaments of platinum and of carbon were well known before 1890.

The validity of the Just & Hannamann patent is now no concern. It has been repeatedly sustained and it has now expired. Let that rest in peace.

We are, however, very much concerned with determining just what value the surrender of this monopoly is to the public. We have seen that the surrender is intended to be commensurate with the monopoly enjoyed by the patentees. It was to be a quid pro quo. The General Electric admit the surrender of the matter disclosed in the patent, but does their obligation end there? To answer this we must look at the situation as it was, to see what the patent discloses.

The suitability of a wire for a filament in an incandescent lamp is determined by its ability to stand up at high temperature and one of the foremost workers in the field predicted that the coming filament must therefore be made from one of the seven or eight metals whose melting point was higher than we were then able to measure, for there were no other possibilities. Among those high melting point metals were osmium, tantalum, molybdenum and tungsten. No one then knew how to determine the melting point of any of these and no one could tell until a filament was in fact made which would prove most suitable. Just & Hannamann had no greater knowledge than anyone else. They filed the application for a molybdenum filament and only included tungsten as a possible alternative because it was chemically closely related. The higher melting point of tungsten was not known not for several years and *it was not discovered by Just and Hannamann.*

The only difficulty of making lamps of these high-melting-point metals lay in the fact that these metals, including the metal tungsten, were intractable and no practical process for handling them was known, and so far as the record shows, no practical process was ever discovered by Just & Hannamann.

THE BASIC JUST & HANNAMANN PATENT LAID HEAVY TRIBUTE ON THE ART, BUT IN ITSELF IT GAVE THE WORLD NOTHING, IT TAUGHT THE WORLD NOTHING AND ITS SURRENDER ALONE WOULD SURRENDER NOTHING

Just & Hannamann filed that application shortly after the beginning of the century and the only credit which can be attributed to them is that they disclosed in an application in the United States Patent Office a theoretical process alleged to be for the manufacture of a molybdenum or tungsten filament and, therefore, in theory they were the first to enable the public to make such a lamp. We say in theory because they did not in fact disclose *any practical process or any process which has ever been useful to anyone, and they did not in fact enable anyone ever to make a lamp.*

The patent disclosed a large number of processes all but one of which are concededly inoperative. The one remaining process was sustained by the Court not on the ground that it was *operative,* for its operativeness was directly challenged by numerous witnesses, and it was supported only by the testimony of an expert on the permanent salaried staff of the General Electric Company. It

Digitized by Google

was sustained on the ground that the defendants had not clearly *proved* that it was *inoperative*. It was, in fact, but a theoretical guess and it was a bad guess since it placed molybdenum above tungsten. It was made without practical knowledge or experience behind it.

If the patentees had been limited to what they added to the store of human knowledge, that is their alleged processes, *they would have received no reward*, but the patent in the hands of General Electric's attorneys, did not claim the process only: the patent claimed every kind of tungsten filament *itself* even when made by practical operative processes discovered by others; in fact by whatever process manufactured.

It was a typical example of a practice all too frequent, of seeking a monopoly based on guess work. If the guess is bad it does not cost the guesser anything but if it turns out to have any possibilities of even doubtful value it at once gives the guesser a stranglehold on all the real development work of the industry.

It was a deliberate scheme to stand at the crossroads and levy tollon all successful rivals.

The process disclosed by the patentee was so useless that no lamp has ever been made in accordance with it. Certain experimental lamps were made by the General Electric Company for the purpose of litigation long years after the alleged invention, and long after commercial lamps had been made by practical processes. These were made at great expense or almost regardless of expense, and when made there was grave doubt as to whether they were made in accordance with the processes disclosed and grave doubt as to whether they constituted lamps made in accordance with the patent.

It was concerning this patent that the Head of the Research Department of the General Electric Company stated:

From Dr. Whitney's testimony:

Q. "So far as your knowledge goes as electric company research director, you do not know and cannot state that any such information or experience, useful and used in the commercial manufacture of tungsten filaments and tungsten lamps are so acquired from Just & Hannamann or their representatives?"

A. "From my knowledge I cannot.

Q. "So far as you know, did the General Electric ever utilize for any purpose any practical or scientific knowledge gained from Just & Hannamann as is distinguished from other sources, insofar as relates to the manufacture of tungsten filaments or lamps." (G. E. v. Mallory Record Exhibit.)

A. "I do not know of any."

The General Electric Company owned this patent for several years; but when they determined to manufacture tungsten lamps on a commercial scale, the process of the patent was so ineffective that it taught them nothing of how to make such lamps. When practical lamp manufacture was intended, they were compelled to seek their information from other sources.

Auer Von Welsbach of Germany was the first person ever practically to make tungsten lamps—

Testimony of Howell:

"The Auer Company were the first company in the world to successfully make tungsten filament lamps. They made and sold them. They were using them commercially in the Spring of 1906 before anybody else did. * * * They had no patents * * * We did get their factory processes of manufacture and learned from them to make pressed filament tungsten lamps". (G. E. v. Mallory Record Exhibit.)

and before the General Electric Company succeeded in manufacturing them commercially, it sent experts to Germany to learn the art from him and then brought one of his experts to the United States and finally imported his machinery. Even then the lamps made were of relatively poor quality and the General Electric Company was compelled to spend large sums for research and development work in order to make a practical commercial lamp on which its success depended.

The point of this argument lies here: The surrender of the processes of Just & Hannamann surrenders nothing of value. The shell disclosed to the public by the expiration of the Just & Hannamann patent was completely empty and if the General Electric Company had depended upon the knowledge disclosed in that patent, its monopoly would not have been worth the paper the patent was printed upon, yet now that that patent has expired, it is endeavoring, insofar as possible, to surrender only that useless information of Just & Hannamann and to retain secret to itself all the practical information upon which the successful lamp depends.

Digitized by Google

In this connection it should be remembered that the Tungsten lamp came from Europe and Just & Hannamann were not the ones who invented the lamp first in Europe. But by a freak of our patent law an applicant for patent in the United States *from abroad* is not anticipated by prior use abroad, no matter how extensive unless that first inventor filed an application for patent or published his work.

We are reminded of the statement of the Supreme Court in Atlantic Works v. Brady, 107 U. S. 199.

"Such an indiscriminate creation of exclusive privileges tends rather to obstruct than to stimulate invention. It creates a class of speculative schemers who make it their business—to watch the advancing wave of improvement and gather its foam in the form of patented monopolies which enable them to lay a heavy tax upon the industry of the country without contributing anything to the real advancement of the arts.

"It embarrasses the honest pursuit of business with fear and apprehension of concealed liens and unknown liabilities to lawsuits and vexatious accountings for profits made in good faith."

We think it highly important to remember that the value of the Just & Hannamann monopoly lay, not at all in what the patentees disclosed to the world, but solely upon the work of subsequent and other inventors which they monopolized through it.

A situation such as this arises because the change in our industrial system and the capacity of patent owners has distorted the patent law from its true meaning with the many collective legislations.

Where a patent describes an invention completely in the form the patentee uses it under his monopoly, the public may at once enter into the monopoly at the expiration of the patent. This was true with practically all the early patents. In modern times, however, where patent after patent is taken out upon different phases of the same device, a new situation arises which the patent law did not contemplate.

A patent is intended to give a monopoly of a single invention for a limited time, and after such it is a property right; but there is no more legal justification for a monopoly of patents than for a monopoly of other commodities. Unless this principle is clearly understood and rigidly enforced, the patent ceases to be beneficial and becomes a menace.

The public has not been niggardly in its reward to these inventors and their assignees, and it would be difficult to find a patent monopoly in the entire world that has been more lavishly profitable during its life. The efforts of the General Electric Company, therefore, to maintain this monopoly after its legal term has expired, are not only base ingratitude for favors received, but a direct attempt to cheat the public of the purchase price after it has enjoyed the purchased article to the full. It is a "taking advantage of the patent upon the condition that at its termination the monopoly should cease and yet when the end was reached, disregard the dedication and practically perpetuate indefinitely the exclusive right", as expressly condemned in the Singer Case, supra.

It savors of the old bowery song:

"I went into an auction store,
I will never go there any more.
The Auctioneer he showed some socks,
'Now', said he, 'who'll put up for the box?'
Someone said 'Two Dollars', I paid three,
He *emptied the box*, and he gave it to me.
'I sold you the box, not the socks', said he,
And I'll never go there any more."

The General Electric Company following this noble precedent, have emptied the box before delivering it to the public.

XIII. The Answer of the General Electric Is Ambidexterous and Evasive

There are contradictions in the General Electric's position which we ourselves cannot explain in any reasonable way. We think it useful to call attention to these. If they of themselves call for deductions, the deductions will not be ours.

The General Electric have endeavored to obscrure the real issue by distorting the question.

The answer formally filed with the NRA on behalf of the General Electric says:

"The substance of the present petition appears to be that there should be a code which would order the General Electric to place its patents at the disposal

Digitized by Google

of the petitioners (its competitors) and to furnish them with lamp making machinery and with the materials from which lamps are fabricated."

There is no resemblance that we can discover between this "substance" and any request we have made. We contend that certain acts have occurred which as a matter of law have given certain things to the public. The General Electric Company do not deny the acts and do not seriously challenge the law. By what sense of fairness do they paraphrase our request in such a manner as to omit the whole point at issue?

We have never suggested that *all* patents were dedicated to the public, but have left the decision to the Code Authority. Evidently either the paraphrase of the General Electric is grossly deceptive or it concedes that all the patents have been illegally used. We have no present reason to believe the latter, but we can see no fair and honorable reason and no possibility of honest mistake in a summary so misleading on so important a point.

The same type of gross misleading occurs in all the résumés made by the General Electric of the various points we have requested. We will not prolong this brief by taking up this point on every code provision, since one is illustrative of all. The paraphrase of our request 1–A is as follows:

"To require the General Electric Company and the manufacturers licensed under its patents to place at the disposal of Petitioners the materials, elements, and parts from which lamps are fabricated. In other words, to compel the General Electric to deal with the Petitioners."

This paraphrase leaves out the following limitation which qualifies the demand and forms the entire basis for it. It was worded *at that time* in the following language:

"1. No person or company, who has had any interest in any patent, shall, after the expiration of said patent, *with the intent* or *with the effect* wholly or in part to *prolong the monopoly secured by said patent*, or to prevent or interfere with or handicap the public in the free exercise of said invention in every form and to the full extent that said monopoly was exercised by him during the life of the patent."

There are questions for legitimate difference of opinion in this matter, such, for example, as to the limits of the monopoly the General Electric is bound to surrender, but the General Electric does not raise any of these; instead it tries to obscure the issue by raising false issues that we are attacking property rights.

THE GENERAL ELECTRIC HAS DISTORTED THE FACTS

We have called attention to the fact that the General Electric's formal statement before the NRA states they "have no contracts to prevent independent lamp manufacturers from getting unpatented machinery", whereas in the Hoffman case they asked a State Judge having no jurisdiction over patents to restrain the Hoffman Company from "making any machinery" of certain types. This conflict is no mere matter of words, it is a direct and false or misleading denial by the General Electric of a major point at issue.

We have already shown that the General Electric answer is misleading in its claim that the tipless lamp was the result of their research and that the frosted lamp came from their laboratories. Neither of these misrepresentations could be an innocent error. Both matters are well known to them. These statements are only parts of the "build-up" to create the impression, wholly unwarranted by the facts, that independents are trying to ride on the research work of the General Electric. On the contrary, it is the General Electric that for years has levied tribute on an art which was the creation of others.

MR. SWOPE'S LETTER

When the General Electric President conferred with the Independents, Mr. Swope listened courteously to our position and subsequently wrote us a letter, copy of which is in the record. This letter is a denial of any intention to remedy any of these evils. More than half of the letter is taken up by praise of the General Electric Research laboratories with the inference that progress had come only from them and that outsiders were attempting to reap where they did not sow. The General Electric Publicity Department are responsible for this impression. They have christened the Research laboratories as the "House of Magic", and have built up its prestige by heavy advertising.

To an attorney, the effect of such an action by a company dependent on patents presents sinister possibilities, and apprehension is justified by the facts. In the case of *General Electric* v. *Mallory* (294 Fed. 562), nearly a score of exhibits were

Digitized by Google

introduced to build up this prestige and to build up the prestige of one of the patentees in that suit who, on the permanent salaried staff of the General Electric, acted as a patent expert before the court.

No such "build-up" was available to the defendants.

In view of these facts with their possibilities of perverting justice, it is important to see what these laboratories have brought forth.

Remembering that 90% of the General Electric's profits is from the lamp manufacture, we may well measure the importance of their work by their contribution to lamp manufacture. What then are the important steps forward in lamp manufacture?

These facts come from the Court records of *General Electric* v. *Mallory*, supra, and *General Electric* v. *Eisler*, supra.

The origin of the incandescent lamp was Grove in England.

The origin of the Carbon lamp was Swan in England.

The origin of the idea of a high melting point metal (osmium, tungsten, or the like) was Moisant in France.

The first actual osmium lamp was from Auer Gesellshaft in Germany.

The first actual Tantalum lamp was from Semens & Halske of Germany.

The first use of a neutral gas as a filling was from Grove in England.

The first tipless lamp was from Jaeger, a German in the United States.

Not one of these inventions came from the House of Magic, and nothing that has come from that House of Magic, so far as the lamp industry is concerned, ranks with any of them.

All of these were the work of "outsiders", and yet all but one or two of these inventions were used by the General Electric Company, and many of them by virtue of the expiration of other peoples' patents.

It hardly becomes the General Electric Company to lay too much stress on the origin of the development of the electric lamp, or to base its case on its own research contributions.

Perhaps we should rather apply the term House of Magic to the General Electric publicity department.

SUMMARY

We find no denial, therefore, that the General Electric are using their patents to prolong the lamp monopolies, although no lamp patents exist today; no denial that they have libeled independents; no denial that they have deliberately tried to drive competitors from business by threats against customers; no denial that the monopoly they now maintain by these methods is the same monopoly they maintained under the patents.

What is their defense?

Practically none. Their attitude was most clearly shown at the hearing toward the manufacturers of Christmas tree lighting outfits, and stripped of its camouflage it amounts to this: The lamp business is their own personal possession, even in those fields where they have a one hundred percent monopoly, and they intend to keep it so. They have no obligation to serve the public impartially or without discrimination.

They fail to appreciate that the right to be served fairly is a paramount right of society.

We believe that we have shown that the General Electric Company and its licensees are maintaining an illegal monopoly in electric lamps of unusually dominant proportions, being now about 93% of all of the domestic manufacture.

This monopoly has proved so profitable that substantially all of the profits of that corporation (about 90%) came from it. This would permit that corporation to undermine all independent manufacture in all other electrical fields, for even if they determined to sell their other products at cost to keep out competitors it would have but slight effect upon the profits of the General Electric Company.

The acts of the General Electric Company which have been used to maintain this monopoly have been illegal and unfair. The plea that this monopoly is justified by patents is wholly without foundation, and should meet the same treatment that the same plea received in the Sanitary Manufacturing Company case. The bringing in of the Patent Law into this question as a justification is a smoke screen to protect an illegal monopoly.

Every code provision is within some degree a curtailment of "rights" formerly exercised: a curtailment for the public good. Where the performance of the Recovery Act requires it is intended that such practices or "rights" shall be curtailed. The making of unfair contracts, the unfair coercion of a competitor or the unfair bribing of a competitor's employees, stand on no different footing

Digitized by Google

than the unfair use of any other propriety or "right." There is nothing sacrosanct in patents which makes them override the law or places any patent owner above the law. A patent gives him no rights whatsoever except the legal monopolization of the particular thing claimed within statutory limits.

We believe we have therefore shown that the express requirement of the Recovery Act is that it shall not permit monopolies or monopolistic practices, and especially since the Anti-Trust Laws are set aside, requires that the Code itself shall contain sufficient provision to prevent monopoly. Any code, therefore, which does not contain such provisions, has no legal standing, and the President has no legal authority for approving it.

The NEMA Code contains no such provisions, and hence is not a proper code under the law.

The increased costs to which manufacturers are subjected under the New Deal make the unfair practices of the General Electric Company more disastrous. We do not complain that the increased costs are unduly burdensome because *these are for the public good*, but we do complain that because of these increased costs the General Electric's unfair practices become an intolerable burden, and *these practices are contrary to the public welfare.*

The General Electric Company, controlling 93% of the industry, can completely control the retail prices. Subjecting the independents further to the harassment, handicaps, and threats that they have heretofore subjected them, will force the independents out of business in view of the increased costs of the NEMA code, unless these practices are ameliorated. Since, therefore, the increased costs are imposed by the NEMA Code, the NEMA Code itself will produce monopoly if these practices are not remedied.

The elimination of situations of this kind was one of the clear and evident purposes of the passage of the Recovery Act. This is a clear situation of monopoly by unfair practices, and if this situation is not remedied it is a travesty to speak of a code of fair competition, and the NRA have not performed the duties which the statutes have placed upon them.

Wherefore, we believe that it is the duty of the NRA to revise the NEMA Code, or in the alternative to provide a special code, to prohibit the illegal use of patents to produce monopolies not intended by the patents and to prohibit the monopolistic practices hereinbefore outlined.

WILLIS B. RICE, *Counsel.*

EXTRACTS FROM THE RECORD IN THE CASE OF GENERAL ELECTRIC COMPANY VS. HOFMANN MANUFACTUING CO. IN COURT OF CHANCERY OF NEW JERSEY

QUOTATIONS FROM THE ORIGINAL AGREEMENT OF APRIL 26, 1924, ATTACHED TO THE BILL AS AN EXHIBIT

"and Whereas the Hofmann Company desires to obtain a license under said U. S. patents to manufacture in the United States patented lamp making machinery and appliances embodying the inventions of said patents, and to supply said domestic licensees with said patented lamp making machinery and appliances for use in the manufacture of tungsten lamps. * * * Now, Therefore, * * * the General Electric Company hereby grants to the Hofmann Company under the U. S. patents listed in the annexed Schedule B and such other U. S. patents as may from time to time be added to said Schedule by the General Electric Company subject to the provisions, terms, and limits herein contained * * * a free non-exclusive * * * license without royalty to make lamp making machinery and appliances embodying the inventions of any of the said U. S. Patents * * * or any invention on which the General Electric has made application for U. S. Patent, and to sell said lamp making machinery and appliances to said domestic licensees of the General Electric listed in Schedule A, but only for their own use in the manufacture and refilling of tungsten lamps within the U. S. and for no other purpose.

"The Hofmann Company is not licensed to sell licensed machinery to purchasers * * * other than those who are listed in Schedule A at the time the order for said machinery is received * * *, it being the intention of the parties hereto that it shall be publicly known that the only purpose in the granting of this license is to afford said domestic licensees an opportunity to obtain licensed machinery for use in making lamps in accordance with their license.

"In order that the Hofmann Company may be in a position to build for any licensee listed in Schedule A standard licensed lamp making machinery, which

Digitized by Google

said licensee is entitled to under its license and which shall be similar to standard licensed machinery manufactured by the General Electric Company, and in regular use in its factories in the commercial production of tungsten lamps, the General Electric will * * * loan to the Hofmann Company drawings of its standard licensed machinery.

"All drawings, blue prints, and written instructions, if any * * * shall remain the property of the General Electric Company, and be returned to it upon demand. (The Hofmann Company agree) to take and cause to be taken all reasonable care to insure that said drawings and said property shall be kept confidential. * * *"

LIST OF PATENTS UNDER WHICH LICENSE WAS GIVEN

(The patents 1423956 and 7, and 1453594 are Mitchell & White patents.)

G. E. v. HOFMANN

EXTRACTS FORM THE BILL OF COMPLAINT ITSELF

Paragraph 5: The business of the incandescent lamp department of the General Electric is the manufacture and sale of incandescent lamps. Upwards of millions of dollars have been expended by said incandescent lamp department in the development of new and improved machinery and equipment for the manufacture of incandescent lamps, all of which was done for the primary purpose of improving the quality of incandescent lamps made and sold by the General Electric and in reducing the cost of their manufacture. It was not done for the purpose of engaging in the business of manufacturing for sale of lamp machinery.

Paragraph 7: The new and improved lamp making machinery developed by the incandescent lamp department from time to time was not intended for the use of other lamp manufacturers. Complainant decided to make an arrangement whereby its licensees could have a source of supply where they could purchase lamp making equipment substantially identical with that used by the General Electric, said source of supply to be in addition to the one theretofore provided.

Paragraph 8: For the purpose stated in Paragraph 7, a written contract was entered into on April 26, 1926 * * * in which the defendant, the Hofmann Company * * * was licensed to manufacture and sell only to specific domestic lamp licensees of the General Electric Company, the lamp making machinery and equipment heretofore described.

In order to enable the defendants to build for said licensees standard lamp making machinery substantially identical to the standard lamp making machinery manufactured by the General Electric for its own use, the complainant agreed in said contract to furnish to defendants drawings of said standard lamp making machinery.

Paragraph 10: If the defendant had not been furnished with the drawings and blue prints of the General Electric Company above referred to, it would have been necessary for the defendants to expend very large amounts of money, time, and effort to make detailed drawings and group assemblies before it could manufacture such lamp making machinery.

Paragraph 11: Complainant further says that all of the blue prints, drawings, and other data hereinbefore referred to were of strictly confidential nature and are closely guarded (kept under lock and key) with the greatest care by complainant.

Paragraph 16: This agreement was terminated February 4, 1930.

Paragraph 35: Subsequent to the date when they were no longer licensed or authorized by the complainant to manufacture or offer for sale electric lamp making machinery or parts therefor, of the General Electric, National, or Edison types, said Alfred Hofmann and Company did manufacture and sell in a sum exceeding $200,000, electric lamp making machinery, appliances, and parts thereof of the General Electric, National, and Edison types.

Digitized by Google

G. E. v. HOFMANN

EXTRACTS FROM THE AGREEMENT OF FEBRUARY 24TH, 1930, CANCELLING THE FORMER AGREEMENT—ATTACHED TO BILL OF COMPLAINT AS EXHIBIT

The consideration is the payment by the General Electric Company to the Hofmann Company of $65,000 in cash. The companies agree completely to cancel the former agreement and any claims for damages arising out of it or out of its breach by either party, completely and absolutely.

The Hofmann Company agrees to return all drawings and blue prints but then follows this paragraph:

"The Hofmann Company has on hand certain patterns which it has made up at its own expense from the blue prints and other information furnished to it by the General Electric, which said patterns are capable of use by the Hofmann Company in the manufacture of machinery other than lamp making machinery covered by the patents of the General Electric, and the Hofmann Company agrees that no license is to be implied to it under any patent of the General Electric Company by reason of its retention of said patterns."

Quotation from the Motion for Preliminary Injunction:

"Wherefore, Petitioner respectfully prays that this Honorable Court will make an order directing the defendants to show cause why they should not be restrained from making or manufacturing any machinery of the National, Edison, or General Electric types."

From Mr. Walsheim's brief on Preliminary Injunction:

"Alfred Hofmann commenced making lamp machinery in 1912 and put out a complete line of automatic lamp making machinery prior to 1924. Hofmann had designed, made, and sold to the General Electric Company in 1920, $25,000 worth of lamp making machinery together with working drawings of some of this machinery and that machinery was adopted and used by the General Electric Company. During 1912 and 1914 Hofmann had frequently repaired and reconditioned lamp making machinery manufactured by the General Electric and prior to 1924 he had become fully familiar with the incandescent lamp making machinery manufactured and used by the General Electric Company.

EXTRACTS FROM THE RECORD OF GENERAL ELECTRIC COMPANY *vs.* P. R. MALLORY (294 FED. 562) SOUTHERN DISTRICT, NEW YORK

From the plaintiff's reply in a brief on a motion for preliminary injunction:

"If the intelligence, learning, skill, or moral character of Just & Hannamann were in issue of this suit, doubtless some of the material the defendant has brought together would be interesting (page 9) * * *. Where Just & Hannamann signed anything that an incompetent patent solicitor put before them, and of the fact that the Austrian patent solicitor was stupid, defendant furnishes ample proof, or whether they were subject to fits of temporary aboration, we do not know, but we do know that no such palpable absurd statements as that referred to, no matter who made them, can alter the facts, which facts the Court has already carefully and authoritatively found."

The statements referred to were made under oath by Just & Hannamann at a time when the General Electric owned their application.

From testimony of Dr. Whitney, Head of Research Department of General Electric:

Q. "So far as your knowledge goes as electric company, you do not know and cannot state that any such information or experience, useful and used in the commercial manufacture of tungsten filaments and tungsten lamps, was so acquired from Just & Hannamann or their representatives?

A. "From my knowledge I cannot.

Q. "So far as you know, did the General Electric ever utilize for any purpose any practical or scientific knowledge gained from Just & Hannamann as is distinguished from other sources, insofar as relates to the manufacture of tungsten filaments or lamps?

A. "I do not know of any."

From testimony of Mr. Howell, Head of Lamp Production Department of the General Electric Co.:

"The Auer Company were the first company in the world to successfully make tungsten-filament lamps. They made and sold them. They were using them commercially in the Spring of 1906 before anybody else did. * * * They had no patents * * *. We did get their factory processes of manufacture and learned from them to make pressed filament tungsten lamps. * * * The

Digitized by Google

nitrogen lamp should always be used shaded from the direct vision (these were concentrated filament lamps)."

Howell states that many details were necessary to make tungsten lamps that had to be worked out in the factory.

Siemens & Halske were making drawn filament tantalum in 1906. The General Electric laboratories were founded in 1900. Dr. Fink states, relative to the part about 1906 and 1907, "practically all our work was commercially adoption. If there was any purely scientific investigation going on at that time I did not know of it."

The following is an extract from the record of a letter Dr. Whitney wrote on September 3, 1904:

"In 1903 we were led to the conclusion that an element should, in general, be preferred to the compounds for filament materials. * * * There were then perhaps nine of these (elements) which, because of their other properties, might make useful filaments. * * * Tantanium, vanadium, zirconium, molybdenum, tantalum, tungsten, thorium, and uranium. * * * We seem by our own knowledge to be forced to consider tantalum and tungsten as the most promising of all metallic elements. No one knows the melting point of either of them."

There were 17 exhibits in the Mallory suit of publicity laudatory of the General Electric Company.

BEECH-NUT PACKING CO.,
Canajoharie, N. Y., February 26, 1936.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
Fifth Avenue Hotel, 24 Fifth Avenue, New York, N. Y.

DEAR SIR: Referring to our letter to you of December 3, we are pleased to now be able to furnish the information requested in your letter of November 12.

We are not at the present time, and so far as we are able to recall have never been, a party to any cross-licensing or patent-pooling agreements of any kind.

We enclose what we believe to be a complete list of all letters patent of the United States which are owned by Beech-Nut Packing Co.

The patents marked with an asterisk (*) on the list before the patent number are those that we are using at the present time. Substantially all of the other patents, we believe, we have used at some time. The best reason we can give for not using those other patents at the present time is that the subject matters have been superseded by improvements, or for other reasons present conditions in our business do not warrant the use of the subject matters of the patents.

Referring to paragraph 8 of your letter, the inventors of the subject matters of most of the patents have been, or are, employees of Beech-Nut Packing Co., and the inventions were made in the course of their employment. The employees in most instances make out-and-out assignments of the inventions and resulting patents to Beech-Nut Packing Co.

In the case of the patents marked with a double asterisk (**) before the name of the inventor on the list, the inventors are still employed by Beech-Nut Packing Co.

In the case of the patents marked with a triple asterisk (***) before the name of the inventor on the list, the inventors were employed by Beech-Nut Packing Co. at the time of filing of the patent applications, but they have since left our employ or have retired or are deceased.

In the case of the patents marked with a quadruple asterisk (****) before the name of the inventor, the inventions were developed outside of our organization and have been purchased by us.

Referring to paragraph 3 of your letter, we enclose copies of incorporation papers as follows:

1. Bylaws of Beech-Nut Packing Co.
2. Copy of certificate of incorporation.
3. Copy of amendment to certificate.
4. Certificate of increase of capital stock.
5. Certificate of increase of capital stock of Beech-Nut Packing Co.
6. Certificate authorizing preferred stock and the classification of stock of Beech-Nut Packing Co.
7. Certificate to increase the number of directors of Beech-Nut Packing Co.
8. Certificate to increase the number of directors of Beech-Nut Packing Co.
9. Certificate on increase of capital stock.

Digitized by Google

10. Certificate of increase of capital stock of Beech-Nut Packing Co.
11. Certificate of change in par value of shares of the common stock of Beech-Nut Packing Co.
12. Certificate of increase of authorized common stock and increase in number of shares of common stock.
13. Certificate of reduction of capital stock by reduction in the number of its shares of preferred stock.
14. Certificate of increase of capital stock and number of shares of Beech-Nut Packing Co.

We have carefully considered paragraph 12 of your letter but are unable to suggest any amendments to existing patent laws of the United States. So far as we are concerned, we have the greatest respect for the patent laws and believe that they in their present form are of great benefit to the country as a whole and far superior to the patent laws of any foreign country.

If we can be of further assistance, please advise.

Respectfully yours,

BEECH-NUT PACKING CO.,
F. E. BARBOUR, *Vice President.*

BYLAWS OF BEECH-NUT PACKING CO.

ARTICLE I. DIRECTORS

1. Directors of the company shall be elected by ballot at the annual meeting of stockholders of the corporation, or at any special meeting of stockholders called for that purpose, and shall be chosen by a plurality of the votes, either in person or by proxy, of the stockholders entitled to vote at such meeting.

Digitized by Google

2. Vacancies in the board of directors occurring during the year may be filled by a majority vote of the remaining members of the board, at any regular meeting of the board or at any special meeting called for the purpose.

3. The board of directors shall hold regular meetings at the office of the company in Canajoharie, N. Y., on the third Thursday of each month, at 10 a. m. Special meetings may also be called by the president or any two of the directors and held upon 1 day's notice.

4. A majority of the members of the board, at any time in office, shall constitute a quorum for the transaction of business.

ARTICLE II. OFFICERS

1. The officers of the company shall be a president, one or more vice presidents, secretary, assistant secretary, treasurer, and assistant treasurer, all of whom shall be elected by the board of directors at the meeting to be held subsequent to the annual meeting of the stockhlders. The president, vice presidents, secretary, and treasurer shall be directors of the company, but the assistant secretary and assistant treasurer need not be either directors or stockholders.

2. The president shall preside at all meetings of the board of directors and shall act as chairman at the meetings of stockholders. He shall, under the control and supervision of the directors, have general management of the company's affairs, and shall generally superintend the business of the company.

3. The vice president, first elected, in the absence or incapacity of the president, shall have and may exercise the powers and duties of the president.

4. The treasurer shall have the custody of and be responsible for the moneys of the corporation, subject always to the control and supervision of the board of directors. He shall deposit all funds of the company in such banks or trust companies as the directors may designate. He shall keep his bank accounts in the name of the company. He shall exhibit his books and accounts to the directors upon application at the office of the company in Canajoharie, N. Y. At each each annual meeting of the stockholders he shall present a full statement of the financial affairs of the company. He shall exhibit his books and accounts, whenever required by the president, to such auditors as may be in the employ of the company and shall furnish to such auditors the aid and assistance that will enable them to properly audit and state the financial affairs of the company. He shall generally perform all the duties appertaining to his office.

5. The secretary shall have the custody of and be responsible for the papers books, and records of the corporation, subject always to the control and supervision of the board of directors. He shall keep a record, in proper books provided for the purpose, of all meetings and proceedings of the board of directors and also the minutes of all stockholders' meetings. He shall record the votes of the corporation and shall keep such other records and shall attend to such correspondence of the company as the board of directors shall direct. He shall notify the directors and stockholders of their respective meetings, and shall in general do and perform all the duties appertaining to his office.

6. The assistant treasurer, in the absence or incapacity of the treasurer, shall have and may exercise the powers and duties of the treasurer. He shall have and perform such other duties as may be from time to time imposed upon him by the board of directors.

7. The assistant secretary, in the absence or incapacity of the secretary, shall have and may exercise the powers and duties of the secretary. He shall have and perform such other duties as may be from time to time imposed upon him by the board of directors.

8. Vacancies among the officers of the company occurring during the year shall be filled by a majority vote of the whole number of directors in office, at any regular meeting of the board, or at any special meeting called for the purpose.

9. No officer, as such, shall have power to sign on behalf of the company any check, draft, or note unless he be authorized thereto by resolution of the board of directors.

ARTICLE III. MEETINGS

1. The annual meeting of the stockholders of the company shall be held at the office of the company in Canajoharie, N. Y., on the first Tuesday after the 10th of March of each year, at 11 in the forenoon. The secretary or assistant secretary shall send through the post office, at least 10 days before such meeting, a notice thereof addressed to each stockholder entitled to vote at such meeting at his address as it appears upon the books of the corporation. No publication of such notice shall be required.

Digitized by Google

2. Special meetings of the stockholders may be called by the president, or a majority of the board of directors, upon 10 days' notice to each stockholder of record entitled to vote upon the question or proposition to be submitted at such meeting, such notice to contain a statement of the business to be transacted at such meeting, and shall be served personally or sent through the post office addressed to each stockholder so entitled to vote at his address as it appears upon the books of the corporation, and no publication shall be required except publication of notice be required by statute. No business other than that specified in the call for the meeting shall be transacted at any such special meeting.

3. At all meetings of the stockholders, except as may be otherwise provided by law, it shall be necessary that stockholders representing, in person or by proxy, a majority of the issued common capital stock shall be present to constitute a quorum.

4. The board of directors may close the transfer books in their discretion for a period not exceeding 30 days preceding any meeting, annual or special, of the stockholders, or the day appointed for the payment of a dividend.

ARTICLE IV. STOCK

1. All certificates of stock shall be signed by the president or a vice president, and by the treasurer or secretary, and the seal of the company shall be affixed thereto; provided, however, that if such certificates are countersigned by a transfer agent and by a registrar the signatures of said officers and the seal of the corporation upon such certificate may be facsimiles, engraved or printed thereon.

2. Transfers of shares of stock shall be made upon the books of the company by the holder in person or by attorney duly authorized and on surrender of the certificate or certificates for such shares.

ARTICLE V. SEAL

1. The seal of the corporation shall be circular in form, with the words "Beech-Nut Packing Co." on the circumference and the words and figures "Incorporated 1899" in the center.

ARTICLE VI. INSPECTORS OF ELECTION

1. Two inspectors of election shall be chosen at each annual meeting of the stockholders of the company to serve for the ensuing year. If any inspector shall refuse to serve or shall not be present at the time his services are required the meeting may appoint an inspector in his place.

ARTICLE VII. AMENDMENTS

1. These bylaws may be altered or amended at any regular meeting of the board of directors, or at any special meeting called for the purpose, in either case upon the affirmative votes of two thirds of the directors in office at the time.

2. These bylaws may also be altered or amended at any annual or special meeting of the stockholders, called in conformity with article III hereof, upon a majority vote of the stockholders entitled to vote at such meeting.

CERTIFICATE OF INCORPORATION

We, the undersigned, all being persons of full age and at least two-thirds being citizens of the United States and at least one of us a resident of the State of New York, desiring to form a stock corporation, pursuant to the provisions of the business corporations, law of the State of New York, do hereby make, sign, acknowledge, and file this certificate for that purpose as follows:

First. The name of the proposed corporation is Beech-Nut Packing Company.

Second. The purposes for which it is to be formed are to purchase or otherwise acquire, sell, trade in, cure, pack, smoke, treat, and prepare for the market all kinds of animal and food products and goods, wares, and merchandise of every class and description; to conduct the business of slaughtering animals or a general abattoir and cold-storage business; to conduct a general trading and manufacturing business; to apply for, register, purchase, or otherwise acquire, and to hold, own, use, and operate, and to sell, assign, grant licenses in respect of and otherwise dispose of and deal with and turn to account, any and all inventions, improvements, formulas, processes, trade names and trade marks, copyrights, letters patent of the United States, and of any and all foreign countries, and patent rights of all kinds relating to the business above mentioned; to enter into,

Digitized by Google

make, perform, and carry out contracts of every kind and for any lawful purpose with any person, firm, association, or corporation relating to the business aforesaid; and in general to do any and all acts necessary and convenient for the most ample exercise of all the purposes and objects above expressed or connected therewith.

Third. The amount of the capital stock is one hundred and fifty thousand (150,000) dollars.

Fourth. The number of shares of which the capital stock shall consist is fifteen hundred (1,500) of the par value of one hundred (100) dollars per share and the amount of capital with which the company shall begin business is five hundred (500) dollars.

Fifth. Its principal business office is to be located in the town of Canajoharie, in the county of Montgomery, in the State of New York.

Sixth. Its duration is to be one hundred (100) years.

Seventh. The number of its directors is to be three.

Eighth. The names and post-office addresses of the directors for the first year are as follows: Edward B. Burnap, Canajoharie, N. Y.; Frederick J. Winston, 32 Nassau Street, New York; and William J. Arkell, Canajoharie, N. Y.

Ninth. The names and post-office addresses of the subscribers and a statement of the number of shares of stock which each agrees to take in the corporation, are as follows:

	Number of shares
Edward B. Burnap, Canajoharie, N. Y	1
Frederick J. Winston, 32 Nassau St., New York	1
William J. Arkell, Canajoharie, N. Y	3
Total	5

In witness whereof, we have made, signed, acknowledged, and filed this certificate in duplicate. Dated this 27th day of December 1899.

BARTLETT ARKELL.
WALTER H. LIPE.

Sworn to before me this 10th day of January 1900.

W. M. MURRAY, *Notary Public.*

We, the undersigned, Bartlett Arkell, president, and Walter H. Lipe, secretary, respectively, of the Beech-Nut Packing Co., a domestic stock corporation, do hereby make the following certificate of the proceedings of the meeting of the stockholders of said company, held pursuant to section 47 of the stock corporation law of the State of New York, for the purpose of obtaining consent to classify the capital stock into preferred and common as follows, to wit:

A special meeting of the stockholders of the Beech-Nut Packing Co. was held at the office of the company in the village of Canajoharie, in the county of Montgomery, and the State of New York, on the 7th day of February 1903, at 10:30 o'clock in the forenoon of that day for the purpose of voting on a proposition to classify into common and preferred stock the authorized increase of capital stock of the company, amounting to $100,000.

A meeting was called for that purpose upon notice such as is required for the annual meeting of the corporation, viz, a notice outlining the business to be transacted at the meeting is required to be published for two successive weeks next preceding the meeting in some newspaper published in the county in which the principal office of the company is located, and notice mailed or served personally upon each stockholder at least 10 days before the meeting. The following is a true copy of said notice:

"NOTICE

"A special meeting of the stockholders of the Beech-Nut Packing Co. will be held on the 7th day of February 1903, at 10:30 a. m., at the office of such company, in the village of Canajoharie, Montgomery County, N. Y., for the purpose of voting upon a proposition to increase its capital stock from $150,000 to $250,000, the increase to consist of 1,000 shares of the par value of $100 each, and to make such increase preferred stock, cumulative, with 7 percent per annum dividend thereon, to be paid before any dividend is paid upon the common stock, and in the event of a dissolution of the corporation such preferred stock to be paid from the assets of the company in full before the application of any proceeds of the corporation is made upon the common stock; also to amend, or authorize the amendment of the bylaws of the company, so as to carry into effect any resolution adopted respecting the increase of the capital stock of the company, if increase be authorized.

"Canajoharie, N. Y., January 22, 1903.

"BARTLETT ARKELL, *President.*
"WALTER H. LIPE, *Secretary.*"

At the time and place specified in said notice stockholders of record appeared in person or by proxy owning at least two-thirds of the capital stock of the company, and organized by electing from the number Bartlett Arkell as chairman of the meeting and Walter H. Lipe as secretary thereof. Upon a call of the roll of the stockholders of record the following were found to be present in person, or by proxy, viz:

	Shares
Bartlett Arkell	599
Walter H. Lipe	304
E. B. Burnap	1
Sarah H. Arkell, by Bartlett Arkell, proxy	130

Digitized by Google

	Shares
Bertelle Gillam, by Bartlett Arkell, proxy	140
L. T. Hallett	5
Total	1,179

Upon motion duly made and carried, the proxies presented were ordered to be placed on file.

Proof that the meeting was called upon notice such as is required for the annual meeting of the corporation was read, and ordered placed on file.

Upon motion, a vote was then taken of those present in person, or by proxy, upon the following preamble and resolution, to wit:

Whereas the stockholders of this corporation have at this meeting authorized an increase of the capital stock from $150,000, the present amount, to the sum of $250,000 the increase to consist of 1,000 shares of the par value of $100 each, the entire capital stock to consist of $250,000 of 2,500 shares of the par value of $100 each,

Whereas the present capital stock of the corporation consists wholly of one class of stock, and it has been found desirable to classify the stock of the corporation into common and preferred, so that the $150,000 of the original capital stock shall be common, consisting of 1,500 shares of the par value of $100 each, and so that the increased capital stock of $100,000 consisting of 1,000 shares of the par value of $100 each, shall be preferred stock, and that said preferred stock shall be entitled to preference and priority over the common stock.

ON MOTION

Voted: That the capital stock of the corporation as increased this day and now amounting to $250,000 be classified so that $150,000 thereof consisting of 1,500 shares of the par value of $100 each shall be common stock, and so that $100,000 thereof being the authorized increase of capital stock consisting of 1,000 shares of the par value of $100 each shall be preferred stock, and that said preferred stock shall be entitled to preference and priority over the common stock in manner following: The holders of the preferred stock shall be entitled to receive, annually, all net earnings of the company determined and declared as dividends in each fiscal year up to, but not exceeding, 7 percent per annum upon all outstanding preferred stock before any dividend shall be set apart or paid upon the common stock; and the dividends upon the preferred stock shall be cumulative, but the preferred stock shall not be entitled to participate in any additional earnings or profits. All money determined applicable to dividends in excess of the amount payable upon the preferred stock shall be declared payable, and be paid, on the common stock. In case of liquidation or dissolution of the company, the holders of preferred stock shall be entitled to receive cash to the amount of their preferred stock at par before any payment is made upon the common stock but shall not thereafter participate in any of the property of the company or proceeds realized on liquidation or dissolution. The preferred stock shall have no voting rights or power.

Resolved further, That the president and secretary of this corporation be, and they are hereby, authorized and directed to execute and file proper certificates of the proceedings of this meeting in the offices, respectively, of the secretary of state and the county clerk of the county of Montgomery, and to take all proceedings and do all acts and things that may be necessary to comply with the provisions of sections 42 and 47 of the stock corporation law of the State of New York as amended, and applicable to and regulating the issuing of preferred and common stock, and increasing capital stock."

A sufficient number of votes, to wit, the votes of stockholders owning 1,179 shares of stock of the corporation out of a total of 1,500 shares of stock issued and outstanding, having been cast in favor of the foregoing resolutions, the same were declared duly adopted.

On motion duly made and carried, the meeting was then adjourned.

In witness whereof, we have made, signed and sworn to this certificate in duplicate.

BARTLETT ARKELL,
President.
WALTER H. LIPE,
Secretary.

STATE OF NEW YORK,
County of Montgomery, ss:

Bartlett Arkell and Walter H. Lipe, being duly sworn, do depose and say, and each for himself deposes and says that said Bartlett Arkell is the president of the Beech-Nut Packing Co., the corporation above named, and said Walter H. Lipe is the secretary thereof; that he has read the foregoing certificate of the proceedings of the meeting and the stockholders of said corporation, and that the same is true.

BARTLETT ARKELL.
WALTER H. LIPE.

Sworn to before me this 7th day of February 1903.

L. T. HALLETT,
Notary Public, Montgomery County, N. Y.

We, the undersigned, Bartlett Arkell, chairman, and Walter H. Lipe, secretary, respectively, at a special meeting of the stockholders of the Beech-Nut Packing Co., a domestic corporation, held for the purpose of increasing its capital stock, do hereby certify that prior to such meeting a notice stating the time, place, and object thereof, and the amount of the increase proposed, signed by the president and secretary, was published once a week for at least 2 successive weeks in the Canajoharie Radii, a newspaper in the county where the principal office of said corporation is located.

"NOTICE

"A special meeting of the stockholders of Beech-Nut Packing Co. will be held on the 7th day of February, 1903, at 10:30 a. m., at the office of such company, in the village of Canajoharie, Montgomery County, N. Y., for the purpose of voting upon a proposition to increase its capital stock from $150,000 to $250,000, the increase to consist of 1,000 shares of the par value of $100 each, and to make such increase preferred stock, cumulative, with 7 percent per annum dividend thereon, to be paid before any dividend is paid upon the common stock, and in the event of a dissolution of the corporation such preferred stock to be paid from the assets of the company in full before application of any proceeds of the corporation is made upon the common stock; also to amend, or authorize the amendment of the bylaws of the company, so as to carry into effect any resolution adopted respecting the increase of the capital stock of the company, if increase be authorized.

"Canjoharie, N. Y., January 22, 1903.

"BARTLETT ARKELL,
"*President.*
"WALTER H. LIPE,
"*Secretary.*"

That a copy of such notice was duly mailed, postage prepaid, to each stockholder of such corporation at his or her last known post-office address, at least 2 weeks before the meeting; that at the time and place in such notice named, stockholders appeared in person or by proxy in numbers representing at least two-thirds of all the shares of stock of such corporation, to wit: 1,179 shares, and organized such meeting by choosing from their number the undersigned, Bartlett Arkell, as chairman, and Walter H. Lipe, secretary, thereof; that the notice of the meeting and proof of the proper publishing and mailing thereof was presented; that upon motion, a vote was then taken by those present in person, or by proxy, upon the following resolution:

"*Resolved*, That the capital stock of the Beech-Nut Packing Co. be increased from the present amount, to wit: $150,000, consisting of 1,500 shares of the par value of $100 each, to $250,000 to consist of 2,500 shares of the par value of $100 each."

That stockholders owning 1,179 shares of stock, being at least two-thirds of all the stock of the corporation, voted in favor of such resolution; no stockholder voted against its adoption.

That a sufficient number of votes having been cast in favor of such increase, such resolution was declared duly adopted.

That the amount of capital of the said corporation heretofore authorized is $150,000, and the whole thereof has been actually issued; and that the amount of the increased capital stock is $100,000, making the entire capital stock $250,000.

In witness whereof, we have made, signed, verified, and acknowledged this certificate in duplicate, dated this 7th day of February 1903.

L. T. HALLETT, *Notary Public.*

AMENDMENT TO CERTIFICATE

At a special term of the supreme court held at the county courthouse in the village of Ballston Spa, N. Y., on the 3d day of October 1910.

Present: Hon. H. T. Kellogg, justice.

In the matter of application of Beech-Nut Packing Co. for an order amending its certificates of incorporation.

On reading and filing the petition of Beech-Nut Packing Co., verified by its president on September 12, 1910, and notice of motion for this time and place based thereon, with proof of timely service upon the attorney general of a copy of said petition, notice of motion and of this order as proposed, and on motion of J. S. L'Amoreaux of counsel for said petitioner, moving, it is

Ordered that the prayer of said petition be granted and the original certificate of incorporation of said Beech-Nut Packing Co., filed and recorded in the office of the secretary of state and in the office of the clerk of Montgomery County, N. Y., on or about December 29, 1899, be and it is amended by adding the following provision at the end of paragraph second thereof, so as to truly set forth all the objects and purposes for which it was intended to incorporate said corporation, to wit:

"Also to purchase, acquire, own, and hold real estate for every purpose, and erect houses and buildings thereon and otherwise improve the same; to act as landlord in respect to any property it may own at any time; to sell, mortgage, pledge, lease, or otherwise dispose of any property it may own at any time; and it may purchase, acquire, hold, and dispose of the stocks, bonds, and other evidences of indebtedness of any corporation, domestic, or foreign, and issue in exchange therefor its stock, bonds, or other obligations, subject, however, to the provisions of law."

But said amendment is made without prejudice to any pending action or proceeding, or to any rights accrued previously hereto.

And permission is given said petitioner to file and record such amended certificate with the secretary of state and the clerk of Montgomery County.

Enter in Montgomery County.

H. T. KELLOGG, J. S. C.

CERTIFICATE OF INCREASE OF CAPITAL STOCK

We, the undersigned, Bartlett Arkell, chairman and Walter H. Lipe, secretary, respectively, of a special meeting of the stockholders of Beech-Nut Packing Co., a domestic stock corporation, held for the purpose of increasing its capital stock, do hereby certify—

That prior to such meeting a notice stating the time, place, and object thereof, and the amount of the increase proposed, signed by the president and the secretary, was published once a week fo at least 2 successive weeks in the Canajoharie Radii, a newspaper in the county where the principal business office of such corporation is located. That the following is a true copy of such notice:

"A special meeting of the stockholders of Beech-Nut Packing Co. will be held on the 29th day of November 1913, at 11 o'clock a. m. at the office of said company at Canajoharie, Montgomery County, N. Y., for the purpose of voting

Digitized by Google

upon a proposition to increase its capital stock from $250,000, consisting of 1,000 shares of preferred and 1,500 shares of common stock, each of the par value of $100, to $1,000,000, to consist of 1,000 shares of preferred and 9,000 shares of common stock, each of the par value of $100.

"Dated, November 8, 1913.

"BARTLETT ARKELL, *President.*
"F. E. BARBOUR, *Secretary.*"

That a copy of such notice was also duly mailed, postage prepaid, to each stockholder of such corporation at his last known post-office address, at least 2 weeks before the meeting.

That at the time and place specified in such notice stockholders appeared in person or by proxy, the number representing a majority of all the shares of stock of such corporation, and organized said meeting by choosing from their number the undersigned Bartlett Arkell as chairman and Walter H. Lipe as secretary thereof.

That the notice of the meeting and proof of the proper publication and mailing thereof was presented.

That upon motion a vote was then taken of those present in person or by proxy upon the following resolutions:

"*Resolved*, That the capital stock of Beech-Nut Packing Co. be increased from the present amount thereof, to wit, $250,000, consisting of 1,000 shares of preferred and 1,500 shares of common stock, each of the par value of $100, to $1,000,000 to consist of 1,000 shares of preferred and 9,000 shares of common stock, each of the par value of $100.

"*Resolved*, That the chairman and secretary of this meeting be and the yare hereby authorized and directed to make, sign, verify, and acknowledge the certificates of proceedings required by statute, and cause one of such certificates to be filed and recorded in the office of the clerk of Montgomery County, and a duplicate thereof in the office of the Secretary of State, and to do all acts and things that may be necessary to comply with the provisions of law, applicable to and regulating such increase of capital stock."

That stockholders owning more than a majority in amount of all the stock of the corporation voted in favor of the adoption of said resolutions, and no stockholder voted against their adoption, to wit, stockholders owning 1,590 shares of common stock and stockholders owning 13 shares of preferred stock voted in favr of such resolutions.

That a sufficient number of votes having been cast in favor of such increase of capital stock, such resolutions were declared duly adopted.

That the amount of capital stock of said corporation heretofore authorized is $250,000, and the proportion thereof actually issued is $250,000. That the amount to which the capital stock is increased is $1,000,000. The amount of increase is $750,000, all common stock.

In witness whereof, we have made, signed, verified, and acknowledged this certificate in duplicate. Dated the 29th day of November 1913.

BARTLETT ARKELL, *Chairman.*
WALTER H. LIPE, *Secretary.*

STATE OF NEW YORK,
County of Montgomery, ss:

Bartlett Arkell, chairman, and Walter H. Lipe, secretary, respectively, of the aforesaid meeting being severally duly sworn, do depose and say, and each for himself deposes and says that he has read the foregoing certificate subscribed by him, and knows the contents thereof and that the same is true.

BARTLETT ARKELL.
WALTER H. LIPE.

Sworn to before me this 29th day of November 1913.

E. W. SHINEMAN, *Notary Public.*

STATE OF NEW YORK,
County of Montgomery, ss:

On this 29th day of November 1913, before me personally came Bartlett Arkell and Walter H. Lipe, to me personally known to be the persons described in and who made, signed, and verified the foregoing certificate and severally duly acknowledged to me that they made, signed, and verified the same for the uses and purposes therein set forth.

CERTIFICATE OF INCREASE OF CAPITAL STOCK OF BEECH-NUT PACKING CO.

We, the undersigned, Walter H. Lipe, chairman, and Frank E. Barbour, secretary, respectively, of a special meeting of the stockholders of Beech-Nut Packing Co., a domestic stock corporation, held for the purpose of increasing its capital stock, do hereby certify:

That prior to such meeting a notice, stating the time, place, and object thereof, and the amount of the increase proposed, signed by the president and the secretary, was published once a week, for at least 2 successive weeks, in the Canajoharie Courier, a newspaper in the county where the principal business office of such corporation is located.

That the following is a true copy of such notice:

NOTICE TO STOCKHOLDERS

CANAJOHARIE, N. Y., *August 27, 1919.*

Notice is hereby given that a special meeting of the stockholders of Beech-Nut Packing Co. will be held on the 12th day of September 1919, at 9 o'clock in the forenoon, at the office of said company in the village of Canajoharie, N. Y., for the purpose of voting upon a proposition to increase the capital stock of said corporation from $1,000,000, consisting of 10,000 shares of the par value of $100 each, to $2,900,000, to consist of 29,000 shares of the par value of $100 each; to authorize the issuance of $1,900,000 in amount of new preferred stock, to be known as preferred stock class B and to have the preferances and be subject to the limitations in favor of the common stock below stated; to classify the total authorized capital stock of said corporation, amounting to $2,900,000, so that $900,000 thereof, to consist of 9,000 shares of the par value of $100 each, shall be common stock and so that $2,000,000 thereof, to consist of 20,000 shares of the par value of $100 each, shall be preferred stock; to classify said preferred stock so that 19,000 shares thereof, being the said authorized new issue of preferred, shall be designated as preferred stock class B, and 1,000 shares thereof, being that which is now outstanding, shall be designated as "preferred stock class A"; to authorize and fix the preferences which said preferred stock class B shall have and the rights which it shall have and those which it shall be subject to; to authorize the sale of said new preferred stock when issued; to authorize the exchange of said preferred stock class A for preferred stock class B, share for share; and to vote upon the following resolutions which will be offered for adoption at said meeting, to wit:

Resolved, That the capital stock of Beech-Nut Packing Co. be increased from the present amount thereof, to wit: $1,000,000, consisting of 10,000 shares of the par value of $100 each, to $2,900,000, to consist of 29,000 shares of the par value of $100 each.

Further resolved, That the issuance of $1,900,000 in amount of new preferred stock to be authorized.

Further resolved, That the total authorized capital stock of said corporation, amounting to $2,900,000, be classified so that $900,000 thereof, to consist of 9,000 shares of the par value of $100 each, shall be common stock and so that $2,000,000 thereof to consist of 20,000 shares of the par value of $100 each, shall be preferred stock; that 19,000 shares of said preferred stock, being the said authorized new issue of preferred, are hereby designated and classified as preferred stock class B, and 1,000 shares of said preferred stock, being the old issue which is outstanding at the date of this classification, are hereby designated and classified as preferred stock class A. Preferred stock of class A may be converted into preferred stock of class B and exchanged therefor, share for share. The issuance of shares of class B stock required for such exchange are hereby authorized, as they may be required for that purpose, but only upon surrender for exchange of a corresponding number of shares of class A stock, and as such conversion and exchange of shares occurs the outstanding number of shares of class B stock will be automatically increased and the number of outstanding shares of class A stock will be decreased and the latter will become automatically extinguished in such process of conversion. Such right of conversion and exchange shall be applicable to the shares of said old preferred issue that have been already purchased with funds of the company and are being held in the name of its treasurer. The rights of the holders of preferred stock class A, in respect of any shares that are at any time outstanding, shall be superior to the rights of the holders of preferred stock class B in all things that have attached thereto by reason of issuance.

Digitized by Google

Preferred stock class B shall have the preferences over and be subject to the limitations in favor of the common stock following: It shall be entitled to dividends in each year, payable quarterly on the 15th days of January, April, July, and October, at the rate of 7 percent per annum. Such dividends are to be paid or provided for in each year before any dividends are paid on the common stock in that year, and such preferred dividends shall be cumulative. It shall be entitled to no further dividends. In case of dissolution or total liquidation of the corporate assets such preferred stock shall be paid in full at par, with accrued dividends, before any payment is made on common stock, but it shall be entitled to no further distribution or payment. It shall have no vote at any meeting for the election of directors, and shall not be entitled to notice of any such meeting, unless the accumulated dividends to which it is entitled, at the time notice of such meeting is required to be given, amount to 7 percent or more, and when any such right to vote shall have accrued it shall cease to be operative whenever such dividend default is cured. The stock of the corporation may be increased or reduced without reference to the present proportion of common or preferred as to each other. Said preferred stock shall have no right to vote on a proposition to increase or reduce common stock, but shall be entitled to vote on increase or reduction of preferred stock. If the common stock be increased at any time, the holders of said preferred stock shall have no subscription rights or other rights which would entitle them to any of the new or increased common stock. After January 1, 1925, said preferred stock may be redeemed and retired, in whole or in part, on any dividend payment date, on the basis of $115 per share and accrued dividends, provided the corporation shall at least 30 days before the time affixed for redemption notify the holders in writing, mailed to their addresses appearing upon the books of the transfer agency, that it will be redeemed or partially redeemed at the time named upon presentation of the certificates at a bank in the city of New York to be also named. Partial redemption may occur from time to time, and in each instance shall be upon a percentage and pro-rata basis of the total outstanding issue and the notice of redemption shall specify what percentage of the same will be redeemed. Such notice having been given, payment by the corporation to the bank so designated of the money required to redeem shall operate as a redemption either in whole or to the extent of the percentage for which payment is made, as the case may be, and the oustanding certificates may be endorsed or stamped to show the amount or percentage redeemed. No further dividends shall accrue upon that portion or percentage of the stock which is to redeemed.

Further resolved, That the present holders of common stock shall have the right to exchange their holdings, share for share, for a like number of shares of the new issue so classified as common stock. The price at which shares of said preferred stock class B shall be sold may be fixed by the board of directors but shall be not less than par.

Also a resolution authorizing the proper officer to execute and file certificates of the proceedings of the meeting agreeably to the provisions of the statute.

BARTLETT ARKELL, *President*,
FRANK E. BARBOUR, *Secretary*.

That a copy of such notice was also duly mailed, postage prepaid, to each stockholder of such corporation, at his last known post-office address, at least 2 weeks before the meeting.

That at the time and place specified in such notice, stockholders appeared in person or by proxy, in numbers representing at least a majority of all the shares of stock of such corporation, and organized said meeting by choosing from their number the undersigned Walter H. Lipe, as chairman and Frank E. Barbour as secretary thereof.

That the notice of the meeting and proof of the proper publishing and mailing thereof was presented.

That there were also presented at said meeting, and filed with the corporation, the written authorizations and consents of the owners and holders of 9,000 shares, out of a total outstanding issue of 10,000 shares of capital stock, that the capital stock of the corporation be increased from $1,000,000, the present amount, to $2,900,000 to consist of 29,000 shares of the par value of 100 each.

That, upon motion, a vote was then taken of those present in person or by proxy upon the following resolution:

"*Resolved*, That the capital stock of Beech-Nut Packing Co. be increased from the present amount thereof, to-wit: $1,000,000, consisting of 10,000 shares of the par value of $100 each, to $2,900,000, to consist of 29,000 shares of the par value of $100 each.

Digitized by Google

"*Further resolved*, That the chairman and secretary of this meeting be, and they are hereby authorized and directed to make, sign, verify, and acknowledge the certificates of proceedings required by statute on increase of capital stock, and cause one of such certificates to be filed and recorded in the office of the clerk of Montgomery County, and a duplicate thereof in the office of the Secretary of State, and to do all acts and things that may be necessary to comply with the provisions of law applicable to and regulating such increase of capital stock."

That stockholders, owning 9,940 shares of stock, being at least a majority of all the stock of the corporation, voted in favor of such resolution; and stockholders voted against its adoption.

That a sufficient number of votes having been cast in favor of such increase, such resolution was declared duly adopted.

That the amount of capital stock of said corporation heretofore authorized is $1,000,000 and the proportion thereof actually issued is $1,000,000; and that the amount of the increased capital stock is $2,900,000.

In witness whereof, we have made, signed, verified, and acknowledged this certificate in duplicate.

Dated this 12th day of September 1919.

WALTER H. LIPE, *Chairman*,
FRANK E. BARBOUR, *Secretary*.

STATE OF NEW YORK,
County of Montgomery, ss:

Walter H. Lipe, chairman, and Frank E. Barbour, secretary, respectively, of the aforesaid meeting, being severally duly sworn, do depose and say, and each for himself deposes and says, that he has read the foregoing certificate subscribed by him and knows its contents, and that the same is true.

WALTER H. LIPE, *Chairman*,
FRANK E. BARBOUR, *Secretary*.

CERTIFICATE AUTHORIZING PREFERRED STOCK AND THE CLASSIFICATION OF STOCK OF BEECH-NUT PACKING CO.

We, the undersigned, Walter H. Lipe, vice president, and Frank E. Barbour, secretary, respectively, of Beech-Nut Packing Co., a domestic stock corporation, do hereby make the following certificate of the prodeedings of a meeting of the stockholders of said company held, pursuant to section 61 of the Stock Corporation Law, for the purpose of obtaining consent to issue preferred stock and to classify into preferred and common stock the total authorized capital stock of said company, amounting to $2,900,000.

A special meeting of the stockholders of said company was held at the office of the company in the village of Canajoharie, county of Montgomery, State of New York, on the 12th day of September 1919, at 9 o'clock in the forenoon of that day, for the purpose of voting upon a proposition to authorize the issuance of $1,900,000 in amount of new preferred stock and to classify into common and preferred stock the total authorized capital stock, which previously and at the same meeting had been increased to $2,900,000.

The meeting was called for that purpose upon notice such as is required for the annual meeting of the corporation, namely: Publication of notice once a week for at least 2 successive weeks in a newspaper published in the county of Montgomery and mailing of notice at least 10 days prior to the meeting to each stockholder at his last known post-office address.

NOTICE TO STOCKHOLDERS

CANAJOHARIE, N. Y., *August 27, 1919.*

Notice is hereby given that a special meeting of the stockholders of Beech-Nut Packing Co. will be held on the 12th day of September 1919, at 9 o'clock in the forenoon, at the office of said company in the village of Canajoharie, N. Y., for the purpose of voting upon a proposition to increase the capital stock of said corporation from $1,000,000, consisting of 10,000 shares of the par value of $100 each, to $2,900,000, to consist of 29,000 shares of the par value of $100 each; to authorize the issuance of $1,900,000 in amount of new preferred stock, to be known as preferred stock class B and to have the preferences and be subject to the limitations in favor of the common stock below stated; to classify the total authorized capital stock of said corporation, amounting to $2,900,000, so that $900,000 thereof, to consist of 9,000 shares of the par value of $100 each, shall be common stock and so that $2,000,000 thereof, to consist of 20,000 shares of the par value of $100 each, shall be preferred stock; to classify said preferred stock so that 19,000 shares thereof, being the said authorized new issue of preferred, shall be designated as preferred stock class B, and 1,000 shares thereof, being that which is now outstanding, shall be designated as preferred stock class A; to authorize and fix the preferences which said preferred stock class B shall have and the rights which it shall have and those which it shall be subject to; to authorize the sale of said new preferred stock when issued; to authorize the exchange of said preferred stock class A for preferred stock class B, share for share; and to vote upon the following resolutions which will be offered for adoption at said meeting, to wit:

Resolved, That the capital stock of Beech-Nut Packing Co. be increased from the present amount thereof, to wit: $1,000,000, consisting of 10,000 shares of the par value of $100 each, to $2,900,000, to consist of 29,000 shares of the par value of $100 each.

Further resolved, That the issuance of $1,900,000 in amount of new preferred stock to be authorized.

Further resolved, That the total authorized capital stock of said corporation, amounting to $2,900,000, be classified so that $900,000 thereof, to consist of 9,000 shares of the par value of $100 each, shall be common stock and so that $2,000,000 thereof, to consist of 20,000 shares of the par value of $100 each, shall be preferred stock; that 19,000 shares of said preferred stock, being the said authorized new issue of preferred, are hereby designated and classified as preferred stock class B, and 1,000 shares of said preferred stock, being the old issue which is outstanding at the date of this classification, are hereby designated and classified as preferred stock class A. Preferred stock of class A may be converted into preferred stock of class B and exchanged therefor, share for share. The issuance of shares of class B stock required for such exchange are hereby authorized, so they may be required for that purpose, but only upon surrender for exchange of a corresponding number of shares of class A stock, and as such conversion and exchange of shares occurs the outstanding number of shares of class B stock will be automatically increased and the number of outstanding shares of class A stock will be decreased and the latter will become automatically extinguished in such process of conversion. Such right of conversion and exchange shall be applicable to the shares of said old preferred issue that have been already purchased with funds of the company and are being held in the name of its treasurer. The rights of the holders of preferred stock class A, in respect of any shares that are at any time outstanding, shall be superior to the rights of the holders of preferred stock class B in all things that have attached thereto by reason of issuance.

Preferred stock class B shall have the preferences over and be subject to the limitations in favor of the common stock following: It shall be entitled to dividends in each year payable quarterly on the 15th days of January, April, July, and October, at the rate of 7 percent per annum. Such dividends are to be paid or provided for in each year before any dividends are paid on the common stock in that year, and such preferred dividends shall be cumulative. It shall be entitled to no further dividends. In case of dissolution or total liquidation of the corporate assets such preferred stock shall be paid in full at par, with accrued dividends, before any payment is made on common stock, but it shall be entitled to no further distribution or payment. It shall have no vote at any meeting for the election of directors, and shall not be entitled to notice of any such meeting,

unless the accumulated dividends to which it is entitled, at the time notice of such meeting is required to be given, amount to 7 percent or more, and when any such right to vote shall have accrued it shall cease to be operative whenever such dividend default is cured. The stock of the corporation may be increased or reduced without reference to the present proportion of common or preferred as to each other. Said preferred stock shall have no right to vote on a proposition to increase or reduce common stock, but shall be entitled to vote on increase or reduction of preferred stock. If the common stock be increased at any time, the holders of said preferred stock shall have no subscription rights or other rights which would entitle them to any of the new or increased common stock. After January 1, 1925, said preferred stock may be redeemed and retired, in whole or in part, on any dividend payment date, on the basis of $115 per share and accrued dividends, provided the corporation shall at least 30 days before the time affixed for redemption notify the holders in writing, mailed to their addresses appearing upon the books of the transfer agency, that it will be redeemed or partially redeemed at the time named upon presentation of the certificates at a bank in the city of New York to be also named. Partial redemption may occur from time to time, and in each instance shall be upon a percentage and prorata basis of the total outstanding issue and the notice of redemption shall specify what percentage of the same will be redeemed. Such notice having been given, payment by the corporation to the bank so designated of the money required to redeem shall operate as a redemption either in whole or to the extent of the percentage for which payment is made, as the case may be, and the outstanding certificates may be endorsed or stamped to show the amount or percentage redeemed. No further dividend shall accrue upon that portion or percentage of the stock which is so redeemed.

Further resolved, That the present holders of common stock shall have the right to exchange their holdings, share for share, for a like number of shares of the new issue so classified as common stock. The price at which shares of said preferred stock class B shall be sold may be fixed by the board of directors but shall be not less than par.

Also a resolution authorizing the proper officers to execute and file certfiicates of the proceedings of the meeting agreeably to the provisions of the statute.

BARTLETT ARKELL,
Pcesident.
FRANK E. BARBOUR,
Secretary.

At the time and place specified in such notice, stockholders of record appeared in person or by proxy owning at least two-thirds of the capital stock of the company and organized by electing from their number Walter H. Lipe as chairman of the meeting and Frank E. Barbour as secretary thereof.

Upon a call of the roll of stockholders of record, the following were found to be present, in person or by proxy, viz:

	Number of shares owned and held
Bartlett Arkell	4,080
William Clark Arkell	416
Bertelle Gillam Barbour	960
Frank E. Barbour	100
Mattie M. Brumley	30
Edward B. Burnap	6
Col. W. Davis	12
John S. Ellithorp	186
Edwin D. Greene	12
Bertha V. Hallett	42
Lyell T. Hallett	174
Christina G. Lipe	1,400
Walter H. Lipe	1,000
Walter H. Lipe, treasurer	940
Raymond P. Lipe	270
Stafford Mosher	50
Celestia J. Mosher	10
Laura Arkell Platt	150
Marie E. Tompkins	30
Fred G. Waner	12
Birdsey Warner (estate)	60
Stock represented	9,940

Digitized by Google

Upon motion, duly made and carried, the proxies presented were ordered to be placed on file.

Proof that the meeting was called upon notice such as is required for the annual meeting of the corporation was read and ordered placed on file. Such proof was in affidavit form and showed that said notice (a copy of which is above set out) was published once a week for three successive weeks in the Canajoharie Courier, a newspaper published in said county of Montgomery, to wit on the dates August 27, September 3, and September 10, 1919, and that the secretary of the corporation on the 27th day of August 1919 mailed a copy of such notice, postage prepaid, to each stockholder of record of said corporation at his last known post-office address.

There were also presented at said meeting, and filed with the corporation, the written authorizations and consents of the owners and holders of all the common capital stock of the corporation, to wit, 9,000 shares, that $1,900,000 in amount of new preferred stock be issued, and that the total capital stock of the corporation, $2,900,000 in amount, be classified into $2,000,000 of preferred stock and $900,000 of common stock, the par value of the shares in each class to be $100 each.

A resolution having been first adopted at said meeting increasing the capital stock of said corporation from $1,000,000 to $2,900,000 and directing the chairman and secretary of the meeting to make and file the proper certificates showing such increase.

Upon motion, a vote was then taken of those present, in person or by proxy, upon the following resolutions and the adoption thereof, to wit:

"*Resolved*, That the issuance of $1,900,000 in amount of new preferred stock be authorized.

"*Further resolved*, That the total authorized capital stock of said corporation, amounting to $2,900,000, be classified so that $900,000 thereof, to consist of 9,000 shares of the par value of $100 each, shall be common stock and so that $2,000,000 thereof, to consist of 20,000 shares of the par value of $100 each, shall be preferred stock; that 19,000 shares of said preferred stock, being the said authorized new issue of preferred, are hereby designated and classified as preferred stock, class B, and 1,000 shares of said preferred stock, being the old issue which is outstanding at the date of this classification, are hereby designated and classified as preferred stock, class A. Preferred stock of class A may be converted into preferred stock of class B and exchanged therefor, share for share. The issuance of shares of class B stock required for such exchange are hereby authorized, as they may be required for that purpose, but only upon surrender for exchange of a corresponding number of shares of class A stock, and as such conversion and exchange of shares occurs the outstanding number of shares of class B stock will be automatically increased and the number of outstanding shares of class A stock will be decreased and the latter will become automatically extinguished in such process of conversion. Such right of conversion and exchange shall be applicable to the shares of said old preferred issue that have been already purchased with funds of the company and are being held in the name of its treasurer. The rights of the holders of preferred stock, class A, in respect of any shares that are at any time outstanding, shall be superior to the rights of the holders of preferred stock, class B, in all things that have attached thereto by reason of issuance. Preferred stock, class B, shall have the preferences over and be subject to the limitations in favor of the common stock following: It shall be entitled to dividends in each year, payable quarterly on the 15th day of January, April, July, and October, at the rate of 7 percent per annum. Such dividends are to be paid or provided for in each year before any dividends are paid on the common stock in that year, and such preferred dividends shall be cumulative. It shall be entitled to no further dividends. In case of dissolution or total liquidation of the corporate assets, such preferred stock shall be paid in full at par, with accrued dividends, before any payment is made on common stock, but it shall be entitled to no further distribution or payment. It shall have no vote at any meeting for the election of directors and shall not be entitled to notice of any such meeting, unless the accumulated dividends to which it is entitled, at the time notice of such meeting is required to be given, amount to 7 percent or more, and when any such right to vote shall have accrued it shall cease to be operative whenever such dividend default is cured. The stock of the corporation may be increased or reduced without reference to the present proportion of common or preferred as to each other. Said preferred stock shall have no right to vote on a proposition to increase or reduce common stock but shall be entitled to vote on increase or reduction of preferred stock. If the common stock be increased at any time, the

Digitized by Google

holders of said preferred stock shall have no subscription rights or other rights which would entitle them to any of the new or increased common stock. After January 1, 1925, said preferred stock may be redeemed and retired, in whole or in part, on any dividend payment date, on the basis of $115 per share and accrued dividends, provided the corporation shall, at least 30 days before the time fixed for redemption, notify the holders in writing, mailed to their addresses appearing upon the books of the transfer agency, that it will be redeemed or partially redeemed at the time named upon presentation of the certificates at a bank in the city of New York to be also named. Partial redemption may occur from time to time, and in each instance shall be upon a percentage and pro-rata basis of the total outstanding issue, and the notice of redemption shall specify what percentage of the same will be redeemed. Such notice having been given, payment by the corporation to the bank so designated of the money required to redeem shall operate as a redemption either in whole or to the extent of the percentage for which payment is made, as the case may be, and the outstanding certificates may be endorsed or stamped to show the amount or percentage redeemed. No further dividends shall accrue upon that portion or percentage of the stock which is so redeemed.

"*Further resolved*, That the present holders of common stock shall have the right to exchange their holdings, share for share, for a like number of shares of the new issue so classified as common stock. The price at which shares of said preferred stock, class B, shall be sold may be fixed by the board of directors but shall be not less than par.

"*Further resolved*, That the president or vice president, and the secretary or assistant secretary, of this corporation be, and they are hereby, authorized and directed to execute and file proper certificates of the foregoing proceedings of this meeting in the offices, respectively, of the secretary of State and the county clerk of the county of Montgomery, and to take all proceedings and do all acts and things that may be necessary to comply with the provisions of section 61 of the stock corporation law of the State of New York, as amended and applicable to and regulating the issuing of preferred and common stock."

A sufficient number of votes, to wit, the votes of stockholders owning 9,940 shares of stock of the corporation out of a total of 10,000 shares of stock issued and outstanding, having been cast in favor of the foregoing resolutions, the same were declared duly adopted; that every stockholder owning and holding common capital stock of the corporation voted in favor of the adoption of said resolutions.

On motion, duly made and carried, the meeting was then adjourned.

In witness whereof, we have made, signed, and sworn to this certificate in duplicate.

Dated, September 12, 1919.

WALTER H. LIPE,
Vice President.
FRANK E. BARBOUR,
Secretary.

STATE OF NEW YORK,
County of Montgomery, ss:

Walter H. Lipe and Frank E. Barbour, being duly sworn, do depose and say, and each for himself deposes and says, that said Walter H. Lipe is the vice president of Beech-Nut Packing Co., the corporation above mentioned, and said Frank E. Barbour is the secretary thereof; that he has read the foregoing certificate of the proceedings of the meeting of stockholders of said corporation, and that the same is true.

WALTER H. LIPE.
FRANK E. BARBOUR.

Sworn to before me this 12th day of September 1919.

CERTIFICATE TO INCREASE THE NUMBER OF DIRECTORS OF BEECH-NUT PACKING CO.

We, the undersigned, do hereby certify that the following is a correct transcript of the minutes of proceedings of a meeting of the stockholders of Beech-Nut Packing Co., held pursuant to section 26 of the stock corporation law, to wit:

CANAJOHARIE, N. Y., *September 12, 1919.*

A special meeting of the stockholders of Beech-Nut Packing Co., a stock corporation, was held this day at 9:30 a. m. to determine whether the number of its directors shall be increased.

Digitized by Google

Such meeting was held at the office of the company on 2 weeks' notice in writing to each stockholder of record; such notice having been served personally, or by mail, postage prepaid, directed to each stockholder at his last known post-office address.

Pursuant to such notice the meeting was held at the time and place mentioned, stockholders owning more than a majority of the stock of the corporation being present in person or by proxy.

Such meeting was duly organized by choosing Walter H. Lipe as president and Frank E. Barbour as secretary thereof. The notice of the meeting and proof of the due service thereof were read and filed in the office of the corporation at the time of such meeting. There were also presented and filed the consents in writing of the owners and holders of 9,000 shares, out of a total outstanding issue of 10,000 shares of capital stock, that the number of directors of the corporation be increased from three to six. On motion of William Clark Arkell, duly seconded, the following resolution was offered for adoption and was voted upon by stockholders:

"*Resolved*, That the number of directors of Beech-Nut Packing Co. be increased from three, the present number, to six."

Upon a canvass of the votes cast upon said resolution, it was found that stockholders owning 9,940 shares of stock of the corporation, being more than a majority of the stock thereof, voted in favor of said resolution, and no stockholders voted against its adoption.

Such resolution was thereupon declared duly adopted, and the meeting adjourned.

In witness whereof, we have made, signed, and verified this certificate in duplicate this 12th day of September 1919.

WALTER H. LIPE,
President.
FRANK E. BARBOUR,
Secretary.

STATE OF NEW YORK,

CERTIFICATE OF INCREASE OF CAPITAL STOCK

We, the undersigned, Frank E. Barbour, chairman, and William Clark Arkell, secretary, respectively, of a special meeting of the stockholders of Beech-Nut Packing Co., a domestic corporation, held for the purpose of increasing its capital stock, do hereby certify:

That prior to such meeting a notice, stating the time, place, and object thereof, and the amount of the increase proposed signed by the president and the secretary, was published once a week, for at least 2 successive weeks, in the Canajoharie Courier, a newspaper in the county where the principal business office of such corporation is located.

That the following is a true copy of such notice:

NOTICE TO STOCKHOLDERS

CANAJOHARIE, N. Y., *July 13, 1921.*

Notice is hereby given that a special meeting of the stockholders of Beech-Nut Packing Co. will be held on the 2d day of August 1921, at 10 a. m. at the office of said company in the village of Canajoharie, N. Y., for the purpose of voting upon a proposition to increase the capital stock of said corporation from $2,900,000 consisting of 20,000 shares of preferred stock and 9,000 shares of common stock, of the par value of $100 each, to $3,000,000, to consist of 20,000 shares of preferred stock and 10,000 shares of common stock, of the par value of $100 each; to authorize the issuance of $100,000 in amount of new common capital stock, and to vote upon the following resolutions which will be offered for adoption at said meeting, to wit:

Resolved, That the capital stock of Beech-Nut Packing Co. be increased from the present amount thereof, to wit: $2,900,000, consisting of 20,000 shares of preferred stock and 9,000 shares of common stock, of the par value of $100 each, to $3,000,000, to consist of 20,000 shares of preferred stock and 10,000 shares of common stock, of the par value of $100 each.

Further resolved, That the issuance of $100,000 in amount of new common capital stock be authorized.

Further resolved, That all of the said $100,000 in amount of new common stock be issued to employees of said corporation, at a price per share to be fixed by the board of directors but not less than $200, and that the proper officers are authorized to make allotment thereof, from time to time, and to issue the shares therefor and deliver the same upon receipt for the treasury of such purchase price.

Digitized by Google

Also a resolution authorizing the proper officers to execute and file certificates of the proceedings of the meeting agreeably to statute.

BARTLETT ARKELL, *President.*
WILLIAM C. ARKELL, *Secretary.*

That a copy of such notice was also duly mailed, postage prepaid, to each stockholder of such corporation, at his last known post-office address, at least 2 weeks before the meeting.

That at the time and place specified in such notice, stockholders appeared in person or by proxy, in numbers representing at least a majority of all the shares of stock of such corporation, and organized said meeting by choosing from their number the undersigned Frank E. Barbour as chairman and William Clark Arkell as secretary thereof.

That the notice of the meeting and proof of the proper publishing and mailing thereof was presented.

That upon motion a vote was then taken of those present in person or by proxy upon the following resolutions:

"*Resolved,* That the capital stock of Beech-Nut Packing Co. be increased from the present amount thereof, to wit: $2,900,000, consisting of 20,000 shares of preferred stock and 9,000 shares of common stock, of the par value of $100 each, to $3,000,000, to consist of 20,000 shares of preferred stock and 10,000 shares of common stock, of the par value of $100 each.

"*Further resolved,* That the issuance of $100,000 in amount of new common stock be issued to employees of said corporation, at a price per share to be fixed by the board of directors but not less than $200 and that the proper officers are authorized to make allotment thereof, from time to time, and to issue the shares therefor and deliver the same upon receipt for the treasury of such purchase price.

"*Further resolved,* That the chairman and secretary of this meeting be, and they are hereby authorized and directed to make, sign, verify, and acknowledge the certificates of proceedings required by statute on increase of capital stock, and cause one of such certificates to be filed and recorded in the office of the clerk of Montgomery County, and a duplicate thereof in the office of the secretary of state, and to do all acts and things that may be necessary to comply with the provisions of law applicable to and regulating such increase of capital stock."

That stockholders owning 14,295 shares of stock, being at least a majority of all the stock of the corporation, voted in favor of such resolutions; and no stockholders voted against their adoption.

That a sufficient number of votes having been cast in favor of such increase, such resolutions were declared duly adopted.

That the amount of capital stock of said corporation heretofore authorized is $2,900,000 and the proportion thereof actually issued is $2,024,500.

That the amount of the increased capital stock is $3,000,000.

The amount of increase is $100,000, all common stock.

In witness whereof we have made, signed, verified, and acknowledged this certificate in duplicate.

Dated this 2d day of August 1921.

FRANK E. BARBOUR, *Chairman.*
WILLIAM CLARK ARKELL, *Secretary.*

STATE OF NEW YORK,
County of Montgomery, ss:

Frank E. Barbour, chairman, and William Clark Arkell, secretary, respectively, of the aforesaid meeting, being severally duly sworn, do depose and say, and each for himself deposes and says, that he has read the foregoing certificate subscribed by him, and knows its contents, and that the same is true.

FRANK E. BARBOUR, *Chairman.*

STATE OF NEW YORK,
Department of State, ss:

I certify that I have compared the preceding copy with the original certificate to increase the capital stock of Beech-Nut Packing Co., filed in this department on the 9th day of August 1921, and that such copy is a correct transcript therefrom and of the whole of such original.

Witness my hand and the official seal of the department of state, at the city of Albany, this 25th day of June 1930.

FRANK S. SHARP,
Deputy Secretary of State.

CERTIFICATE OF INCREASE OF CAPITAL STOCK OF BEECH-NUT PACKING CO.

We, Bartlett Arkell, chairman, and W. C. Arkell, secretary, of a special meeting of stockholders of Beech-Nut Packing Co., a domestic corporation organized and existing under and pursuant to the laws of the State of New York, which meeting was duly called and held pursuant to the stock corporation law of the State of New York, for the purpose of increasing the capital stock of said company, do hereby certify, pursuant to the stock corporation law:

(*a*) That said meeting was called for said purpose in the manner provided by law and by the bylaws of the company, to wit, by the board of directors of said company at a meeting of said board duly called and held on the 17th of April 1922, by resolutions duly passed by said board, which resolutions are as follows:

"*Resolved*, that it is advisable for this company to increase the amount of its authorized capital stock from the present amount thereof, namely, $3,000,000 divided into 30,000 shares of the par value of $100 each, of which $2,000,000, consisting of 20,000 shares of $100 each is preferred stock (class A and class B), and the remaining $1,000,000 consisting of 10,000 shares of $100 each is common stock, to $7,000,000 divided into 70,000 shares of the par value of $100 each, of which $2,000,000, consisting of 20,000 shares of $100 each shall be preferred stock (class A and class B) and the remaining $5,000,000 consisting of 50,000 shares of $100 each shall be common stock; being an increase of $4,000,000 consisting of 40,000 shares of common stock of $100 each (the preferred stock, both class A and class B, to remain as at present authorized); and

"*Resolved*, that the president and secretary are hereby directed to call a special meeting of stockholders of the company, to be held at the principal office of the company in the village of Canajoharie, State of New York, at 11 a. m. on Wednesday, May 3, 1922, for the purpose of voting upon the increase of capital stock (to consist of $4,000,000 additional common stock) hereby proposed and for the purpose, if such increase is authorized, of changing the par value of the common stock as so increased from $100 per share to $20 per share."

(*b*) That as appears by the affidavits of publication and mailing herein set forth, a notice of the meeting stating the time, place and object, and the amount of the increase proposed, signed by the president and the secretary, was published once a week for at least 2 successive weeks, in the Canajoharie Courier, a newspaper published in the village of Canajoharie, county of Montgomery, the county where the principal business office of the said company is located, and a copy of said notice was duly mailed to each stockholder at his last known post-office address at least 2 weeks before the meeting.

(*c*) That at the time and place specified in said notice, the stockholders appeared in person or by proxy in numbers representing 5 shares of preferred stock class A, 5,750 shares of preferred stock class B, and 9,692 shares of common stock, being more than two-thirds of all the shares of stock of said company, and organized by choosing from their number Bartlett Arkell as chairman and W. C. Arkell as secretary.

(*d*) That the secretary produced and read the original notice of meeting signed by the president and the secretary of the company, and also produced and read affidavits of publication and of the mailing of the notice of meeting, as required by section 63 of the stock-corporatoin law. That copies of said notice and said affidavits of publication and mailing thereof were, on motion duly made, seconded, and unanimously carried, ordered spread upon the minutes of the meeting, and the originals in duplicate of affidavits were ordered to be included in the certificates of the proceedings of said meeting showing a compliance with the provisions of law to be made by the chairman and secretary of the meeting under section 64 of the stock-corporation law.

Digitized by Google

(*e*) That said affidavit of mailing reads as follows:

STATE OF NEW YORK,
County of New York, ss:

F. B. Watkins, being duly sworn, deposes and says that he is an employee of the New York Trust Co., the transfer agent of the preferred stock class B of Beech-Nut Packing Co., a New York corporation; that on the 18th day of April 1922, in accordance with the provisions of law and the bylaws of the said Beech-Nut Packing Co., he mailed to each stockholder owning preferred stock class A and class B, and common stock, at his last known post-office address, a notice of the special meeting of stockholders of the said Beech-Nut Packing Co., called to be held on the 3d day of May 1922 at the principal office of the company in the village of Canajoharie, county of Montgomery, State of New York, a copy of which notice is hereby annexed and made a part hereof by depositing in the Hudson Terminal Station of the Post Office, Borough of Manhattan, city of New York, on the said 18th day of April 1922, being at least 2 weeks before the meeting, a copy of said notice securely enclosed in a postpaid envelope addressed to such stockholders at the last known post-office address thereof.

F. B. WATKINS.

Sworn to before me this 1st day of May 1922.

CHARLES H. PECK,
Notary Public, New York County.

(*f*) That said notice to the stockholders reads as follows:

BEECH-NUT PACKING CO., CANAJOHARIE, N. Y.

A special meeting of stockholders of Beech-Nut Packing Co. is called to be held at the principal office of the company, in the village of Canajoharie, N. Y., on Wednesday, May 3, 1922, at 11 o'clock in the forenoon, for the purpose of voting upon a proposition to increase the capital stock of said company from $3,000,000, the present amount, consisting of 20,000 shares of preferred stock, classes A and B, of the par value of $100 each, and 10,000 shares of common stock, of the par value of $100 each, to $7,000,000, to consist of 20,000 shares of preferred stock, classes A and B, of the par value of $100 each (being the present authorized amount of preferred stock), and 50,000 shares of common stock, of the par value of $100 each; and, provided such increase of stock is authorized, to vote upon a further proposition to change the par value of the common stock, as so increased from $100 to $20, so that the authorized common stock will then consist of 250,000 shares of the par value of $20 each; and for the transaction of such other business as may properly come before the meeting.

By order of the board of directors.

Dated, April 18, 1922.

BARTLETT ARKELL, *President.*
W. C. ARKELL, *Secretary.*

(*g*) That said affidavit of publication reads as follows:

STATE OF NEW YORK,
Montgomery County, ss:

William B. Forman, being duly sworn, saith that he is one of the editors and proprietors of the Canajoharie Courier, a weekly newspaper printed and published in the village of Canajoharie, county and State aforesaid; and that an advertisement, of which the annexed is a copy (cut from the columns of said paper), has been regularly published in said paper once in each week for 3 successive weeks, commencing on the 19th day of April in the year of our Lord 1922 and ending on the 3d day of May 1922.

WILLIAM B. FORMAN.

Subscribed and sworn to before me this 3d day of May 1922.

[SEAL] FRED M. GEORTNER, *Notary Public.*

(*h*) That the chairman thereupon appointed Edward W. Shineman and Clifford E. Smith inspectors of election. The inspectors of election thereupon entered upon the performance of their duties and took and subscribed the following oath:

Digitized by Google

STATE OF NEW YORK,
County of Montgomery, ss:

We, the undersigned inspectors of election, duly appointed to act at a special meeting of the stockholders of Beech-Nut Packing Co., held at the principal office of the company at Canajoharie, N. Y., on the 3d day of May 1922, being severally duly sworn, do depose and say, and each for himself deposes and says, that he will faithfully execute the duties of inspector at such meeting with strict impartiality and according to the best of his ability.

EDWARD W. SHINEMAN.
CLIFFORD E. SMITH.

Subscribed and sworn to before me this 3d day of May 1922.

FRED M. GEORTNER, *Notary Public.*

That the following resolutions were offered and duly seconded by stockholders of the company:

"*Resolved*, that an increase of the capital stock of Beech-Nut Packing Co. from $3,000,000 divided into 30,000 shares of the par value of $100 each of which $2,000,000 consisting of 20,000 shares of the par value of $100 each is preferred stock (class A consisting of 50 shares of the par value of $100 each and class B consisting of 19,950 shares of the par value of $100 each, subject to increase in class B and decrease in class A, as provided by the certificate of incorporation, as amended) and the remaining $1,000,000 consisting of 10,000 shares of the par value of $100 each is common stock to $7,000,000 divided into 70,000 shares of the par value of $100 each, of which $2,000,000 consisting of 20,000 shares of par value of $100 each shall be preferred stock (class A consisting of 50 shares of the par value of $100 each and class B consisting of 19,950 shares of the par value of $100 each, subject to increase in class B and decrease in class A, as provided by the certificate of incorporation, as amended) and the remaining $5,000,000 consisting of 50,000 shares of the par value of $100 each, shall be common stock, being an increase of $4,000,000 consisting of 40,000 shares of common stock of the par value of $100 each, be, and the same hereby is, authorized; and further

"*Resolved*, that the chairman and secretary of this meeting be, and they hereby are, authorized and directed to make, sign, verify and acknowledge the certificates of proceedings required by statute and cause one of said certificates to be filed and recorded in the office of the clerk of Montgomery County, and a duplicate thereof in the office of the secretary of state and to do all acts and things necessary to comply with the provisions of law applicable to and regulating such increase of capital stock."

The polls were thereupon declared to be open for the reception of votes upon the said resolutions. All of the votes having been received, the polls were declared closed and the votes canvassed by the inspectors of election.

The result of the vote taken at such meeting upon the resolutions authorizing the increase in the capital stock of said company was as follows:

In favor of said resolutions and of the proposed increase of capital stock 5 shares of preferred stock class A, 5,750 shares of preferred stock class B, 9,692 shares of common stock.

Opposed to said resolutions and increase, no shares of preferred stock class A, no shares of preferred stock class B, and no shares of common stock. Said vote in favor of said resolutions and the proposed increase were more than two-thirds of the capital stock of said Beech-Nut Packing Co.

The chairman thereupon declared the said resolutions duly adopted and the proposed increase of said capital stock authorized by the owners of 15,447 shares of the capital stock of Beech-Nut Packing Co., being two-thirds of all of the outstanding stock of Beech-Nut Packing Co., to wit, the vote of 15,447 shares out of 21,245 shares issued and outstanding.

On motion duly made and carried the meeting adjourned.

(*i*) That the amount of capital theretofore authorized is $3,000,000; that the proportion thereof actually issued is $2,124,500; that the amount of increased capital is $7,000,000, consisting of 70,000 shares of the par value of $100 each divided into 20,000 shares of the par value of $100 each of preferred stock (50 shares being class A preferred stock and 19,950 shares being class B preferred stock) and 50,000 shares of the par value of $100 of common stock being an

Digitized by Google

increase of $4,000,000 of common stock divided into 40,000 shares at the par value of $100 each.

In witness whereof, we have signed, verified, and acknowledged this certificate in duplicate this 3d day of May 1922.

BARTLETT ARKELL,
Chairman.

W. C. ARKELL,
Secretary.

STATE OF NEW YORK,
County of Montgomery, ss:

On this 3d day of May 1922, before me personally came Bartlett Arkell and W. C. Arkell to me severally known and known to me to be the individuals described in and who executed the foregoing certificate, and they severally acknowledged to me that they executed the same.

[SEAL] FRED M. GEORTNER,
Notary Public.

CERTIFICATE OF CHANGE IN PAR VALUE OF SHARES OF THE COMMON STOCK OF BEECH-NUT PACKING CO.

We, Bartlett Arkell, chairman and W. C. Arkell, secretary, of a special meeting of stockholders of Beech-Nut Packing Co., a domestic corporation organized and existing under and pursuant to the laws of the State of New York, which meeting was duly called and held pursuant to the stock corporation law of the State of New York for the purpose of increasing the number of shares into which its capital stock is divided, do hereby certify pursuant to the stock corporation law:

(*a*) That said meeting was called for the purpose and in the manner provided by law and the bylaws of the said company, to wit, by the board of directors of said company, at a meeting of said board duly called and held on the 17th day of April 1922 by resolutions duly passed by said board, which resolutions read as follows:

"*Resolved*, That upon such increase being authorized by the stockholders it is advisable that the par value of the shares of common stock be reduced from $100 to $20 so that the amount of common stock, as so increased and changed, will be $5,000,000, consisting of 250,000 shares of the par value of $20 each (the shares of preferred stock, class A and class B, to remain shares of the par value of $100); and

"*Resolved*, That the president and secretary are hereby directed to call a special meeting of stockholders of the company, to be held at the principal office of the company, in the village of Canajoharie, State of New York, at 11 a. m. on Wednesday, May 3, 1922, for the purpose of voting upon the increase of capital stock (to consist of $4,000,000 additional common stock) hereby proposed and for the purpose, if such increase is authorized, of changing the par value of the common stock as so increased from $100 per share to $20 per share."

(*b*) That as appears by the affidavits of publication and mailing herein set forth, a notice of the meeting stating the time, place, and object and the amount of the increase proposed, signed by the president and the secretary, was published once a week for at least 2 successive weeks, in the Canajoharie Courier, a newspaper published in the village of Canajoharie, county of Montgomery, the county where the principal business office of the said company is located, and a copy of said notice was duly mailed to each stockholder at his last known post-office address at least 2 weeks before the meeting.

(*c*) That at the time and place specified in said notice, the stockholders appeared in person or by proxy in numbers representing 5 shares of preferred stock class A, 5,750 shares of preferred stock class B, and 9,692 shares of common stock, being more than two-thirds of all the shares of stock of said company, and organized by choosing from their number Bartlett Arkell as chairman and W. C. Arkell as secretary.

(*d*) That the secretary produced and read the original notice of meeting signed by the president and the secretary of the company, and also produced and read affidavits of publication and of the mailing of the notice of meeting, as required by section 63 of the stock corporation law. That copies of said notice and said affidavits of publication and mailing thereof were, on motion duly made, seconded and unanimously carried, ordered spread upon the minutes of the meeting, and the originals in duplicate of said affidavits were ordered to be included in the certificates of the proceedings of said meeting showing a compliance with the provisions of law to be made by the chairman and secretary of the meeting under section 64 of the stock corporation law.

County of New York, ss:

F. B. Watkins, being duly sworn, deposes and says, that he is an employee of the New York Trust Co., the transfer agent of the preferred stock class B of Beech-Nut Packing Co., a New York corporation; that on the 18th day of April 1922 in accordance with the provisions of law and the bylaws of the said Beech-Nut Packing Co., he mailed to each stockholder owning preferred stock class A and class B, and common stock, at his last known post-office address, a notice of the special meeting of stockholders of the said Beech-Nut Packing Co. called to be held on the 3d day of May 1922 at the principal office of the company in the village of Canajoharie, county of Montgomery, State of New York, copy of which notice is hereby annexed and made a part hereof by depositing in the Hudson Terminal Station of the post office, Borough of Manhattan, city of New York, on the said 18th day of April 1922, being at least 2 weeks before the meeting, a copy of said notice securely enclosed in a post-paid sealed envelope addressed to such stockholders at the last known post office address thereof.

F. B. WATKINS.

Sworn to before me this 1st day of May 1922.

CHARLES H. PECK,
Notary Public.

Certificate filed in New York.

(*f*) That said notice to the stockholders reads as follows:

BEECH-NUT PACKING CO.,
Canajoharie, N. Y.

A special meeting of stockholders of Beech-Nut Packing Co. is called to be held at the principal office of the company, in the village of Canajoharie, N. Y., on Wednesday, May 3, 1922, at 11 o'clock in the forenoon, for the purpose of voting upon a proposition to increase the capital stock of said company from $3,000,000, the present amount, consisting of 20,000 shares of preferred stock, classes A and B, of the par value of $100 each and 10,000 shares of common stock, of the par value of $100 each, to $7,000,000 to consist of 20,000 shares of preferred stock, classes A and B, of the par value of $100 each (being the present authorized amount of preferred stock) and 50,000 shares of common stock, of the par value of $100 each; and, provided, such increase of stock is authorized, to vote upon a further proposition to change the par value of the common stock, as so increased from $100 to $20, so that the authorized common stock will then consist of 250,000 shares of the par value of $20 each; and for the transaction of such other business as may properly come before the meeting.

By order of the board of directors.
Dated April 18, 1922.

BARTLETT ARKELL, *President.*
W. C. ARKELL, *Secretary.*

(*g*) That said affidavit of publication reads as follows:

STATE OF NEW YORK,
Montgomery County, ss:

William B. Forman being duly sworn saith that he is one of the editors and proprietors of the Canajoharie Courier, a weekly newspaper printed and published in the village of Canajoharie, county and State aforesaid; and that an advertisement, of which the annexed is a copy (cut from the columns of said paper) has been regularly published in said paper once in each week, for three successive weeks, commencing on the 19th day of April in the year of our Lord, 1922, and ending on the 3d day of May 1922.

WILLIAM B. FORMAN.

Subscribed and sworn to before me this 3d day of May, 1922.

[SEAL] FRED M. GEORTNER, *Notary Public.*

(*h*) That the chairman thereupon appointed Edward W. Shineman and Cliffrod E. Smith, inspectors of election. The inspectors of election thereupon entered upon the performance of their duties and took and subscribed the following oath:

STATE OF NEW YORK,
County of Montgomery, ss:

We, the undersigned inspectors of election, duly appointed to act at a special meeting of the stockholders of Beech-Nut Packing Co., held at the principal office

Digitized by Google

of the Company at Canajoharie, N. Y., on the 3d day of May, 1922, being severally duly sworn, do depose and say, and each for himself deposes and says, that he will faithfully execute the duties of inspector at such meeting with strict impartiality and according to the best of his ability.

EDWARD W. SHINEMAN.
CLIFFORD E. SMITH.

Subscribed and sworn to before me this 3d day of May 1922.

FRED M. GEORTNER, *Notary Public.*

That the following resolutions were offered and duly seconded by stockholders of the company:

"Whereas, pursuant to resolutions previously adopted at this meeting, the authorized capital has been increased from $3,000,000 to $7,000,000.

"*Resolved*, That the par value of the common stock of this company be reduced from $100 per share to $20 per share and that the number of shares of common stock of the company be increased from 50,000 shares to 250,000 shares, so that the present capital stock of the company, to wit, 70,000 shares, of which 20,000 shares consist of preferred stock of the par value of $100 each (50 shares being class A preferred stock and 19,950 shares being class B preferred stock) and 50,000 shares of the par value of $100 each being common stock shall consist of 270,000 shares of which 20,000 shares shall be preferred stock of the par value of $100 each (class A consisting of 50 shares of the par value of $100 each and class B consisting of 19,950 shares of the par value of $100 each), and 250,000 shares shall be common stock of the par value of $20 each; and further

"*Resolved*, That the holders of the present outstanding common stock shall be entitled to receive in exchange for each such share of $100 par value, five shares of $20 par value; and further

"*Resolved*, That the chairman and secretary of this meeting be, and they hereby are, authorized and directed to make, sign, verify, and acknowledge the certificates of proceedings required by statute and cause one of said certificates to be filed and recorded in the office of the clerk of Montgomery County, and a duplicate thereof in the office of the secretary of state, and to do all acts and things necessary to comply with the provisions of law applicable to and regulating such increase of capital stock and change of par value thereof."

The polls were thereupon declared to be open for the reception of votes upon the said resolution. All of the votes having been received, the polls were declared closed and the votes canvassed by the inspectors of election.

The result of the vote taken at such meeting upon the resolutions authorizing the change in the par value of the shares of the common stock was as follows:

In favor of said resolutions of the proposed increase of the number of shares and change of par value of the capital stock 5 shares of preferred stock class A, 5,750 shares of preferred stock class B, 9,692 shares of common stock.

Opposed to said resolutions and increase, no shares of preferred stock class A, no shares of preferred stock class B, and no shares of common stock. Said vote in favor of said resolutions and the proposed increase of the number of shares of capital stock were more than two-thirds of the capital stock of the said Beech-Nut Packing Co.

In witness whereof, we have signed, verified, and acknowledged this certificate in duplicate this 3d day of May 1922.

BARTLETT ARKELL, *Chairman.*
W. C. ARKELL, *Secretary.*

STATE OF NEW YORK,
County of Montgomery, ss;

On this 3d day of May 1922, before me personally came Bartlett Arkell and W. C. Arkell to me severally known and known to me to be the individuals described in and who executed the foregoing certificate, and they severally acknowledged to me that they executed the same.

FRED M. GEORTNER, *Notary Public.*

CERTIFICATE OF INCREASE OF CAPITAL STOCK OF BEECH-NUT PACKING CO. PURSUANT TO SECTION 36 OF THE STOCK CORPORATION LAW

Beech-Nut Packing Co. does hereby file this certificate for the purpose of increasing the amount of its capital stock, pursuant to section 36 of the stock corporation law of the State of New York, and states:

That it is a stock corporation incorporated under the name "Beech-Nut Packing Co." by a certificate of incorporation filed in the office of the Secretary of State of the State of New York on December 29, 1899.

Digitized by Google

That the total amount of its authorized capital stock previously to the the filing of this certificate was $7,000,000, divided into shares having a par value.

That the total number of shares which it is already authorized to issue is 270,000, all of which have a par value, to wit, 20,000 having a par value of $100 each and 250,000 having a par value of $20 each.

That the said shares already authorized are classified as follows, with the number of shares in each class and the designations, preferences, privileges, and voting powers, or restrictions or qualifications thereof, as here stated:

Forty-five shares outstanding, of an authorized issue of 1,000 shares, having a par value of $100 each, are classified as preferred stock, class A, and are entitled yearly to 7 percent cumulative dividends before any dividends are set apart or paid upon the other stock, and in case of dissolution or liquidation shall be paid at par before any payment is made on the other stock. They have no voting rights or power as was stated in the resolution authorizing their issuance. They may be converted into preferred stock, class B, and exchanged therefor, share for share, and when and as so exchanged become automatically extinguished.

Twenty thousand shares, having a par value of $100 each, are classified as preferred stock, class B (of which only 11,195 shares have been issued). They are entitled yearly to 7 percent cumulative dividends before any dividends are paid on common stock, and in case of dissolution or liquidation shall be paid at par before any payment is made on account of common stock. They have no vote for election of directors unless dividends thereon be unpaid to the amount of 7 percent or more, nor right to vote on a proposition to increase or reduce common stock (as stated in the resolution authorizing their issuance), and common stock may be increased or reduced without reference to the proportion of common or preferred to each other. The holders have no subscription rights or other rights in new or increased common stock. The whole or any part may be redeemed after January 1, 1925, on any dividend payment date by payment of $115 per share upon 30 days' redemption notice mailed to holders; 45 of the unissued shares are subject to issue to the holders of the 45 shares outstanding of preferred stock, class A, and can be issued only in exchange therefor in the process of conversion.

Two hundred and fifty thousand shares, having a par value of $20 each, are classified as common stock, and subject to the preferences, privileges and rights attaching to the Preferred stock, as above set out, the holders thereof have all the rights in respect thereof that are given by law to the holders of common capital stock.

The number of shares of stock of each class issued and outstanding is: Preferred, class A, 45 shares; preferred, class B, 11,195 shares; common stock, 250,000 shares.

The amount to which the capital stock is increased is $9,500,000. The increase is an increase of the common stock from 250,000 shares, having a par value of $20 each, to 375,000 shares, having a par value of $20 each.

The total number of shares, including those previously authorized, which the corporation may henceforth have, all of which have a par value, together with the par value of each, is as follows:

Forty-five shares of preferred stock, class A, having a par value of $100 each, which are convertible into a like number of shares of preferred stock, class B;

Nineteen thousand nine hundred and fifty-five shares of preferred stock, class B, having a par value of $100 each, which may be automatically increased up to 20,000 shares by conversion, share for share, of the outstanding 45 shares of preferred stock, class A;

And 375,000 shares of common stock, having a par value of $20 each.

None of the shares previously authorized are to be reclassified and none of those authorized hereby are to be classified. The authorization is to increase the common stock (already classified as such) by the issuance of $125,000 new shares of the par value of $20 each, and this certificate does not alter the preferences of any outstanding shares nor authorize shares having preferences which are in any respect superior to those of any outstanding shares.

In witness whereof, this certificate is subscribed and acknowledged in duplicate by the president and secretary of said corporation, this 14th day of November 1923.

BARTLETT ARKELL, *President.*
WILLIAM CLARK ARKELL, *Secretary.*

STATE OF NEW YORK,
County of Montgomery, ss;

On this 14th day of November 1923 before me personally came Bartlett Arkell and William Clark Arkell, to me known and known to me to be the president

and secretary, respectively, of Beech-Nut Packing Co., and known to me to be the individuals described in and who executed the foregoing instrument, and they severally acknowledged to me that they executed the same.

E. W. SHINEMAN, *Notary Public.*

STATE OF NEW YORK,
County of Montgomery, ss;

Bartlett Arkell and William Clark Arkell being severally duly sworn, each for himself deposes and says that the said Bartlett Arkell is the president of Beech-Nut Packing Co., the corporation described in the foregoing certificate, and the said William Clark Arkell is the Secretary thereof; that they have been authorized to execute and file such certificate by the votes, cast in person or by proxy, of the holders of record of two-thirds of the outstanding shares of the capital stock of said corporation entitled to vote to increase the amount of the capital stock of said corporation, Beech-Nut Packing Co., and that such votes were cast at a stockholders' meeting held on the 14th day of November 1923 upon notice pursuant to section 45 of the stock corporation law of the State of New York.

BARTLETT ARKELL.
WILLIAM CLARK ARKELL.

Sworn to before me this 14th day of November 1923.

E. W. SHINEMAN, *Notary Public.*

CERTIFICATE OF INCREASE OF AUTHORIZED COMMON STOCK AND INCREASE IN NUMBER OF SHARES OF COMMON STOCK OF BEECH-NUT PACKING CO.

Pursuant to section 36 of the stock corporation law, we, F. E. Barbour and W. C. Arkell, being respectively the vice president and secretary of Beech-Nut Packing Co., do hereby certify:

(1) The name of the corporation is Beech-Nut Packing Co.

(2) The certificate of incorporation was filed in the office of the secretary of state of New York on the 29th day of December 1899, and a duplicate original thereof was filed in the office of the clerk of Montgomery County on the 28th day of December 1899.

(3) The total amount of the previously authorized capital stock is nine million five hundred thousand dollars ($9,500,000).

(4) The total number of shares which the corporation is already authorized to issue is three hundred nine-five thousand (395,000) shares, of which twenty thousand (20,000) shares have a par value of one hundred dollars ($100) each and three hundred seventy-five thousand (375,000) shares have a par value of twenty dollars ($20) each.

(5) The number of shares in each class already authorized and the designations, preferences, privileges, and voting powers or restrictions or qualifications thereof are as follows:

Forty-five (45) shares of preferred stock, class A, having a par value of one hundred dollars ($100) each, which are convertible into a like number of shares of preferred stock, class B;

Nineteen thousand nine hundred fifty-five (19,955) shares of preferred stock, class B, having a par value of one hundred dollars ($100) each, which may be automatically increased up to twenty thousand (20,000) shares by conversion, share for share, of the outstanding forty-five (45) shares of preferred stock class A;

Three hundred seventy-five thousand (375,000) shares of common stock having a par value of twenty dollars ($20) each.

Shares of preferred stock, class A, are entitled yearly to 7 percent cumulative dividends before any dividends are set apart or paid upon the other stock, and in case of dissolution or liquidation shall be paid at par before any payment is made on the other stock. They have no voting rights or power as was stated in the resolution authorizing their issuance. They may be converted into preferred stock, class B, and exchanged therefor, share for share, and when and as so exchanged become automatically extinguished.

Shares of preferred stock, class B, are entitled yearly to 7 percent cumulative dividends before any dividends are paid on common stock, and in case of dissolution or liquidation shall be paid at par before any payment is made on account of common stock. They have no vote for election of directors unless dividends thereon be unpaid to the amount of 7 percent or more, nor right to vote on a proposition to increase or reduce common stock (as stated in the resolution

Digitized by Google

authorizing their issuance), and common stock may be increased or reduced without reference to the proportion of common or preferred to each other. The holders have no subscription rights or other rights in new or increased common stock. The whole or any part of said preferred stock, class B, may be redeemed after January 1, 1925, on any dividend payment date by payment of one hundred fifteen dollars ($115) per share upon 30 days' redemption notice mailed to holders. Forty-five (45) of the unissued shares are subject to issue to the holders of the forty-five (45) shares outstanding of preferred stock, class A, and can be issued only in exchange therefor in the process of conversion.

The common stock is subject to the preferences, privileges, and rights attaching to the preferred stock, as above set out, and the holders thereof have all the rights in respect thereof that are given by law to the holders of common capital stock.

(6) The total number of shares of each class issued and outstanding is forty-five (45) shares of preferred stock, class A, nine thousand nine hundred fifty-five (9,955) shares of preferred stock, class B, and three hundred seventy-five thousand (375,000) shares of common stock.

(7) The amount of the capital stock, which the corporation shall henceforth have, is ten million five hundred thousand dollars ($10,500,000).

(8) The total number of shares, including those previously authorized, which the corporation may henceforth have, is four hundred forty-five thousand (445,000), of which twenty thousand (20,000) shares are to have a par value of one hundred dollars ($100) each, and four hundred twenty-five thousand (425,000) shares are to have a par value of twenty dollars ($20) each.

(9) The total number of shares, including those previously authorized, are to be classified so as to consist of forty-five (45) shares of preferred stock, class A, nineteen thousand nine hundred fifty-five (19,955) shares of preferred stock, class B, and four hundred twenty-five thousand (425,000) shares of common stock, having the same designations, preferences, privileges, and voting powers, or restrictions or qualifications thereof as are set forth in paragraph no. 5 above.

In witness whereof, the undersigned corporation has caused this certificate to be executed this 9th day of November 1927.

BEECH-NUT PACKING CO.,
By FRANK E. BARBOUR, *Vice President.*

Attest:

W. C. ARKELL, *Secretary.*

STATE OF NEW YORK,
County of Montgomery, ss:

On the 9th day of November 1927 before me came F. E. Barbour and W. C. Arkell, to me known and known to me to be respectively the vice president and secretary of Beech-Nut Packing Co., and to be the persons described in and who executed the foregoing instrument, and they severally acknowledged to me that they executed the same.

FRED M. GEORTNER, *Notary Public.*

STATE OF NEW YORK,
County of Montgomery, ss:

F. E. Barbour and W. C. Arkell, being severally duly sworn, say that he, the said F. E. Barbour, is a vice president of Beech-Nut Packing Co., a corporation of the State of New York, and he, the said W. C. Arkell, is secretary thereof; that they have been authorized to execute and file the foregoing certificate by the votes cast in person or by proxy of the holders of record of a majority of the outstanding shares of the corporation entitled to vote thereon; and that said votes were cast at a atockholders' meeting held on the 9th day of November 1927, upon notice pursuant to section 45 of the stock corporation law.

FRANK E. BARBOUR.
W. C. ARKELL.

Sworn to before me this 9th day of November 1927.

CERTIFICATE OF REDUCTION OF CAPITAL STOCK BY REDUCTION IN THE NUMBER OF ITS SHARES OF PREFERRED STOCK OF BEECH-NUT PACKING CO., PURSUANT TO SECTION 36 OF THE STOCK CORPORATION LAW

We, W. C. Arkell and G. W. Sharpe, being respectively a vice president and assistant secretary of Beech-Nut Packing Co., do hereby certify—

(1) The name of the corporation is Beech-Nut Packing Co.

(2) The certificate of incorporation was filed in the office of the secretary of state of New York on the 29th day of December 1899, and a duplicate original thereof was filed in the office of the clerk of Montgomery County on the 28th day of December 1899.

(3) The total amount of the previously authorized capital stock is ten million five hundred thousand dollars ($10,500,000).

(4) The total number of shares which the corporation is already authorized to issue is four hundred forty-five thousand (445,000), of which twenty thousand (20,000) shares have a par value of one hundred dollars ($100) each and four hundred twenty-five thousand (425,000) shares have a par value of twenty dollars ($20) each.

(5) The number of shares of each class already authorized and the designations, preferences, privileges, and voting powers or restrictions or qualifications thereof, are as follows:

Forty-five (45) shares of preferred stock, class A, having a par value of one hundred dollars ($100) each, which are convertible into a like number of shares of preferred stock, class B:

Nineteen thousand nine hundred fifty-five (19,955) shares of preferred stock, class B, having a par value of one hundred dollars ($100) each, which may be automatically increased up to twenty-thousand (20,000) shares by conversion, share for share, of the outstanding forty-five (45) shares of preferred stock, class A:

Four hundred twenty-five thousand (425,000) shares of common stock having a par value of twenty dollars ($20) each.

Shares of preferred stock, class A, are entitled yearly to 7 percent cumulative dividends before any dividends are set apart or paid upon the other stock, and in case of dissolution or liquidation shall be paid at par before any payment is made on the other stock. They have no voting rights or power as was stated in the resolution authorizing their issuance. They may be converted into preferred stock, class B, and exchanged therefor, share for share, and when and as to exchanged become automatically extinguished.

Shares of preferred stock, class B, are entitled yearly to 7 percent cumulative dividends before any dividends are paid on common stock, and in case of dissolution or liquidation shall be paid at par before any payment is made on account of common stock. They have no vote for election of directors unless dividends thereon be unpaid to the amount of 7 percent or more, nor right to vote on a proposition to increase or reduce common stock (as stated in the resolution authorizing their issuance), and common stock may be increased or reduced without reference to the proportion of common or preferred to each other. The holders have no subscription rights or other rights in new or increased common stock. The whole or any part of said preferred stock, class B, may be redeemed after January 1, 1925, on any dividend payment date by payment of one hundred fifteen dollars ($115) per share upon thirty days' redemption notice mailed to holders. Forty-five (45) of the unissued shares are subject to issue to the holders of the forty-five (45) shares outstanding of preferred stock, class A, and can be issued only in exchange therefor in the process of conversion.

The common stock is subject to the preferences, privileges, and rights attaching to the preferred stock, as above set out, and the holders thereof have all the rights in respect thereof that are given by law to the holders of common capital stock.

(6) The total number of shares of each class issued and outstanding is forty-five (45) shares of preferred stock, class A, and four hundred twenty-five thousand (425,000) shares of common stock.

(7) The amount of the capital stock which the corporation shall henceforth have is eight million five hundred nine thousand dollars ($8,509,000).

(8) The total number of shares, including those previously authorized, which the corporation may henceforth have, is four hundred twenty-five thousand ninety (425,090) shares, of which ninety (90) shares are to have a par value of one hundred dollars ($100) each and four hundred twenty-five thousand (425,000) shares are to have a par value of twenty dollars ($20) each.

Digitized by Google

(9) The total number of shares, including those previoulsy authorized, are to be classified so as to consist of forty-five (45) shares of preferred stock, class A, forty-five (45) shares of preferred stock, class B, and four hundred twenty-five thousand (425,000) shares of common stock, having the same designations, preferences, privileges, and voting powers, or restrictions or qualifications thereof as are set forth in paragraph numbered 5 above.

In witness whereof, the corporation has caused this certificate to be executed this 13th day of March 1928.

CERTIFICATE OF INCREASE OF CAPITAL STOCK AND NUMBER OF SHARES OF BEECH-NUT PACKING CO.

Pursuant to section 36 of the stock corporation law, we, the undersigned, being the vice president and secretary, respectively, of Beech-Nut Packing Co., do hereby certify:

1. The name of the corporation is Beech-Nut Packing Co.

2. The certificate of incorporation was filed in the office of the secretary of state of New York on the 29th day of December 1899.

3. The total amount of the previously authorized capital stock is eight million five hundred and nine thousand dollars ($8,509,000).

4. The total number of shares which the corporation is already authorized to issue is four hundred and twenty-five thousand and ninety shares (425,090) of which ninety (90) shares have a par value of one hundred dollars ($100) each, and four hundred and twenty-five thousand (425,000) shares have a par value of twenty dollars ($20) each.

5. Of the shares already authorized, forty-five (45) shares are preferred stock, class A; forty-five (45) shares are preferred stock, class B, and four hundred and twenty-five thousand (425,000) shares are common stock, the designations, preferences, privileges, and voting powers, or restrictions or qualifications thereof, of said preferred stock, classes A and B, and said common stock are as follows:

Shares of preferred stock, class A, are entitled yearly to 7 percent cumulative dividends before any dividends are set apart or paid upon other stock, and in case of dissolution or liquidation shall be paid at par before any payment is made on the other stock. They have no voting rights or power, as was stated in the resolution authorizing their issuance. They may be converted into preferred stock, class B, and exchanged therefor, share for share, and when and as so exchanged become automatically extinguished.

Shares of preferred stock, class B, are entitled yearly to 7 percent cumulative dividends before any dividends are paid on common stock, and in case of dissolution of liquidation shall be paid at par before any payment is made on account of common stock. They have no vote for election of directors unless dividends thereon be unpaid to the amount lf 7 percent or more, nor right to vote on a proposition to increase or reduce common stock (as stated in the resolution authorizing their issuance), and common stock may be increased or reduced without reference to the proportion of common or preferred to each other. The holders have no subscription rights or other rights in new or increased common stock. The whole or any part of said preferred stock, class B, may be redeemed after January 1, 1925, or any dividend payment date by payment of one hundred and fifteen dollars ($115) per share upon 30 days' redemption notice mailed to the holders. Forty-five (45) of the unissued shares are subject to issue to the holders of the 45 shares outstanding of preferred stock, class A, and can be issued only in exchange therefor in the process of conversion.

The common stock is subject to the preferences, privileges, and rights attaching to the preferred stock as above set out, and the holders thereof have all the rights in respect thereof that are given by law to the holders of common capital stock.

6. The total number of shares of each class issued and outstanding is forty-five (45) shares of preferred stock, class A, and four hundred and twenty-five thousand (425,000) shares of common stock.

7. The amount of the capital stock which the corporation shall henceforth have is nine million five hundred and nine thousand ($9,509,000) dollars.

8. The total number of shares, including those previously authorized, which the corporation may henceforth have is four hundred and seventy-five thousand and ninety (475,090) shares, of which ninety (90) shares shall have a par value of one hundred ($100) dollars each, and four hundred and seventy five thousand (475,000) shall have a par value of twenty ($20) dollars each.

9. Of the four hundred and seventy-five thousand and ninety (475,090) shares which the corporation may henceforth have, forty-five (45) shares shall be preferred stock, class A, forty-five (45) shares shall be preferred stock, class B, and four hundred and seventy-five thousand (475,000) shares shall be common stock. The designations, preferences, privileges, and voting powers or restrictions or qualifications of said preferred stock, classes A and B, and said common stock shall be as set forth in paragraph 5 hereof.

In witness whereof, the undersigned have executed this certificate this 21st day of November 1929.

F. E. BARBOUR, *Vice President.*
W. C. ARKELL, *Secretary.*

STATE OF NEW YORK,
County of Montgomery, ss:

On the 21st day of November 1929 before me came F. E. Barbour and W. C. Arkell, to me known, and known to me, to be respectively, the vice president and secretary of Beech-Nut Packing Co., and to be the persons described in and who executed the foregoing instrument, and they severally acknowledged to me that they executed the same.

FRED M. GEORTNER,
Notary Public.

STATE OF NEW YORK,
County of Montgomery, ss:

F. E. Barbour and W. C. Arkell, being severally duly sworn, say: That he, the said F. E. Barbour, is a vice president of Beech-Nut Packing Co., a corporation of the State of New York, and he, the said W. C. Arkell, is secretary thereof; that they have been authorized to execute and file the foregoing certificate by the votes cast in person or by proxy of the holders of record of a majority of the outstanding shares of the corporation entitled to vote thereon; and that said votes were cast at a stockholders' meeting held on the 21st day of November 1929, upon notice pursuant to section 45 of the stock corporation law.

F. E. BARBOUR.
W. C. ARKELL.

Sworn to before me this 21st day of November 1929.

FRED M. GEORTNER,
Notary Public.
