POOLING OF PATENTS

INVENTOR CARROLL'S STATEMENT

NEW YORK CITY.

HOUSE PATENTS COMMITTEE,
Washington, D. C.

DEAR SIRS: If you are investigating patents, here is something should interest you as showing the Navy's policy of utter hostility to intelligence. I worked for them as a draftsman three times. The first time, over 20 years ago and the second time during the war, and resigned. The third time, in 1931, on the new cruisers, I was discharged for pointing out mistakes in plans—which were proven—and kicking at the inefficiency of the office, which held up work while five shipyards were idle, waiting for plans. This office was abandoned and the work of designing cruisers turned back to private concerns. I was offered rentention if I would promise not to write more letters listing mistakes to the Secretary of the Navy, Adams. The Democrats were coming in and I preferred to force the issue.

The cruisers are hamstrung by cutting holes through the sides, below waterline, and admitting sea water into reserve fuel-oil spaces. This cuts speeds, cuts cruising radius and weakens the ships, and adds hundreds of tons weight, utterly useless weight, to ships where aluminum has been used to conserve weight. This was to correct antirolling. I objected to the General Board. I filed a patent—means for stabilizing ships with fuel oil, serial 584,970, January 6, 1932—showing how the oil should and could be used for the same purpose with no added weight or loss of fuel capacity and no structural changes. This has some claims allowed, but I think the Navy is preventing its issuance. The patent lawyer, Townsend, got a one-third assignment on misrepresentation that it did not allow him to sell separately—I found it does and presume he is in cahoots with the Navy. It was used on the *Manhattan* and *Washington*, the Navy denying, and Mr. Bardo admitting, it was by their direction.

The above patent is important as evidence of the sabotage by the Navy itself. It is wholly out of my hands, as I cannot revoke power of attorney, since he holds an interest, and have no funds for lawing. But if you want to know what ails your Navy, it is important to you.

I offered the Navy many other important ideas and improvements. After my discharge, I wrote repeatedly, describing a new-type Diesel I had designed and sold the Russian Government in 1930, the features of which are through scavenging and upper exhaust and welded steel construction. Two-cycle. At the time I invented these, no manufacturer in the United States was at all interested in two-cycle. I had to go to Russia to get rid of it, and on my return, offered these features for a few hundred dollars to the Bendix Research Co., of East Orange, N. J., a subsidiary of General Motors. The reason I went to them is, I had sold them an aviation patent in 1928 or 1929. They rejected my offers after I divulged most features, but retained the head, as the design was useless without it.

The Navy was building an "experimental" 4-cycle, high-pressure air-injection Diesel at the Brooklyn Yard in 1930-31. To understand what utter stupidity this implies, think that Bermeister & Wain, who had the greatest success with this type and built more of it than all the world together, abandoned it in 1927 for 2-cycle. Krupp has built no four-cycle, except for American yacht owners, for 10 years, etc. And high-pressure air injection has been abandoned for at least 8 years. I could not credit the Navy with willful stupidity all the way up, or expected Roosevelt to change things. So I sent Roosevelt, before he took office, particulars of my engine designs, also to the Navy.

I was astonished in the summer of 1933 to read of the Winton Diesels "greatest and most revolutionary advance in Diesels in a decade", being built and

686170

Digitized by Google

exhibited at Chicago. A Diesel man told me there were two embodying my features under construction by the Winton Co. for the Navy. I protested to Roosevelt and Swanson of the Navy, the Naval Affairs Committee, and President Roosevelt—also to General Motors. No results except dodging—even to the point of lying. Assistant Secretary of the Navy Roosevelt denied to Park Trammell that the Navy was interested in the new-type Winstons. The Navy had previously turned me down on the plea that it had no money for "new and untried features." I offered the correct and full design for $2,000.

This is the engine going into the submarines, into the trains built by Public Works Administration funds, like the *Zephyr*. Through the permission of the Navy and by Navy aid, the Winton subsidiary of General Motors has been allowed to get patents on features that it in turn collected millions for inventing and will collect hundreds of millions for, if allowed to stand, as this is the ony Diesel applicable for airplane, cruiser, and railway work.

I think that Kettering, of General Motors, or who is named as inventor of these features, should be compelled to prove how he developed them, that he did in fact invent them. My letters are on file in the Navy patent office describing these features. "Uniflow scavenging and welded steel construction" applied to two-cycle. I thought, in my naive innocence, that revealing to the President or Navy was equivalent to a patent.

I offer that Kettering and Sloan of General Motors built yachts in 1929 with Winton old-style four-cycle, and I know positively they were not interested in two-cycle at that time, for I tried to sell the ideas before I went to Russia. They would never adapt these ideas without promise of financial support from the Navy. Now, Bessemer and others are going two-cycle and I have not been paid a cent by anyone. My Russian experience cost me ten thousand.

The Winton engines are defective as they are like a lot of kids and depend on ballyhoo and don't know or care what they are doing. I omitted revealing my type head which requires no valves, and they substituted four poppet valves for exhaust in the head. These are impossible to cool and warp and gave trouble even in the administration building at the fair, they have caused the *Zephyr* to be towed in by a steam engine, and I have repeatedly warned the Navy that they will give trouble in the subs.

The *Macon* and *Akron* and *Chicago* disasters, all under Roosevelt, are only the high spots that become public. There are a thousand minor mishaps that are covered up to the one the public knows of. The Navy is far below any other great power in efficiency per ton of ship. It is sure to be knocked over if it has to fight soon. I thought for a long time that this was just stupidity, due to the insularity of our naval men, lack of pressure on them, etc., and never having lost a war, overconfidence. But some things point to deliberateness.

The Navy is hostile to anyone of overaverage intelligence, in their ranks as officers as well as civilian employees. I have known several naval constructors forced to resign and draftsmen forced out. All were the best brains. I never knew the Navy to discharge anyone for stupidity. If you cover them they will cover you.

I know nothing of your committee, and my experiences with the House and Senate Naval Affairs Committees leaves me very skeptical of the power or desire of Congress to influence or reform the Navy. But I think that task will shortly be efficiently performed by outsiders, and I expect that Congress will cease to exist. If so, blame yourselves.

You would learn a lot by putting Mr. Kettering on the stand and asking the president of General Motors Research and the National Research Council to tell, under oath, just how he invented the Diesels he is so fortunate as to sell the Public Works Administration and the Navy. You might also be surprised if you put Admirals Land or Rock on the stand, and asked them a list of questions which I would be delighted to furnish you. I think you might learn about navies from them.

If I wanted an efficient Navy, I would make it a felony to be the head of a bureau under whose authority a major disaster took place. I would make the head primarily responsible, not the immediate commander on the ship or fleet.

But the Navy boys know their stuff. They get by. Go along for years and years, surviving all disasters and retiring on pension and all by keeping pesky fellows with brains out. They know that Congressmen are saps who wilt at "technicalities"—though anyone who can drive a car can understand a battleship.

Digitized by Google

Get Kettering and show him one of the two-page spread ads he is running in the Saturday Evening Post and ask him if every single statement in those ads is not a bare lie.

It is a lie that General Motors Research invented uniflow scavenging or welded steel applied to Diesels.

It is a lie that they were the first to build Diesels giving a horsepower for 30 pounds of weight or less. The M. A. N. Diesels in the German pocket battleships, dating back to 1927 are 17 pounds per horsepower. Junkers airplane Diesel is 3–4 pounds per horsepower. The Danish state railways had Bermeister & Waln Diesel locomotives "with through or uniflow scavenging back in 1928", these exhausted through the head, though I improved on it. I admit, and always did admit, it was from them I got the ideas of uniflow scavenging and upper exhaust. My invention is making these practical for ships by doing away with the upper cross head and connecting rods. Krupp had a good Diesel locomotive here in the United States in 1930 and in 1929, I believe. It was better than Wintons.

Over radio, in newspapers, and trade papers, and at the fair, Mr. Kettering has broadcasted his "inventions." The theft is of no moment except as an added cost to us in Diesel designs; if it were a good design, if Kettering actually knew what he was about. He knows absolutely nothing about Diesels; the Winton organization does not know what it is doing. The result will be crippled submarines when we need them. But do Admiral Robinson or Mr. Kettering lose sleep over it? Will they lose money over it? Will they go to jail if the subs limp, or get shot if we lose a war?

What is going to be done to the chaps who built the *Macon?*

Sincerely,

E. R. CARROLL.

NEW YORK, N. Y., *February 15, 1935.*

Chairman SIROVICH,
House Patents Committee, Washington, D. C.

DEAR SIR: I gather from newspaper reports that your committee is in charge of the inquiry concerning the *Macon* disaster. For this reason I wish to call your attention to the fact that in 1931, Mr. Glenn Wasson Parrish, registered architect, informed me that the present-day design of dirigibles was structurally weak. His prediction of structural weakness was confirmed by the *Akron* in 1933, and now by the *Macon.*

Since 1931, he has sought to inform the Goodyear Zeppelin Corporation of his deductions and calculations. The corporation would not send an engineer to New York to interview Mr. Parrish, nor would they pay expenses for him to come to Akron.

Mr. Parrish has invented a rigid type dirigible in which the present structural weaknesses are eliminated. The story of Mr. Parrish is contained on page 2 of Invention and Finance, a copy of which is enclosed herewith.

Mr. Parrish has requested me to inform you that he is willing to go to Washington to testify before your committee.

Very truly yours,

INVENTION AND FINANCE MAGAZINETTE.
EDWARD GOTTLIEB, *Publisher.*

DIRIGIBLE PIONEERING AND FALLACIES

(By Glenn Wasson Parrish)

(An article of constructive criticism. Upon request, permission may be obtained for reprinting)

The *Shenandoah* had been broken in two in mid-air as if struck by a giant hammer. The shriek of the tortured metal girders as they were torn asunder by the merciless savage forces of the maddened elements had echoed in the saddened hearts of millions of patriotic Americans. "It must not be again" was the cry that arose everywhere. The huge bulk of the first American-built lighter-than-air rigid airship lay like a fallen giant upon the Ohio countryside.

It was almost 8 years later when the second American-built airship, the famous *Akron*, pronounced by Admiral Moffet, "the safest airship ever built",

Digitized by Google

was caught in a storm off Barnegat Light on the Atlantic coast, and fell into the sea, carrying to their doom 73 officers and men of the United States Navy, including Admiral Moffett himself

What will be the fate of the new airship *Macon*? Is it not but a question of time until she also meets the tragic destiny of the *Shenandoah* and *Akron*? The history of American and foreign airship construction leads to the conclusion that only by the most careful maneuvering, and the most happy combination of circumstances can she escape this tragic end.

I was convinced when the *Shenandoah* disaster occurred and still am convinced that a radical departure from conventional methods of airship construction was and is now urgently necessary. Going deep into the technological problems involved, it will be seen how pitifully inadequate is the scope of the mental concept of present airship psychology. The bulky, clumsy, akwardness of this monstrous Frankenstein which has devoured the lives of the pride of the navies of the world, became so much more and more absurdly apparent as to strengthen my already deepening conviction that airship plans as at present applied to the problem must be completely junked. That conviction has become firmly cemented on the bedrock of hard uncompromising and uncontrovertible facts of science.

THE NAVY

The "finest traditions of the Navy" so heroically upheld by the stalwart officers and men, who perished in the saddest disaster of our time, the destruction of the ill-fated airship *Akron*, can best be maintained not by romantic lamentations of badly informed critics, but by a thorough debunking of claims, a frank exposure of popular fallacies, and a high patriotic and firm resolve that, as Lincoln has said, "These dead shall not have died in vain."

Glamorous traditions do not win battles; thrilling stunt flights do not pay dividends, nor ring up records for passengers carried and miles flown in safety and comfort. There are two kinds of traditions—those based on fundamental and basic truths of human, political, and social relationships, and those which have become mere archaic forms, existing by virtue of human sufferance, though based on false assumptions, which time has proven inadequate, and which are completely out of harmony with irrevocable laws, the existence of which is now known, but the presence of which past generations were ignorant.

Great popular fallacies live long and die hard. Of such nature are the methods of constructing lighter-than-air ships of which the United States Navy airship *Shenandoah* and the *Akron* were lamentable examples.

ZEPPELIN DESIGN

It is utterly absurd that these gangling unwieldy almost uncontrollable mammoths of the air can serve any reliable purpose except that of sporting dirigible power balloons designed for training daredevil and Navy aeronauts in the useful art of flirting with death and tempting fate.

So delicately constructed are these clumsy monsters that any ordinary summer thunderstorm accompanied by a little playful or prankish wind may rip open their thin and flimsy canvas backs and send them reeling and tottering like a half-intoxicated idiot, running wild and out of control.

Painful as the task may be, it is time that the utter fallacy of present airship philosophy should be exposed to the public view, not only for the good of the defense agencies of the United States but for the good of commercial aeronautics.

It is astounding that rational men should trust their lives to material that has, comparatively speaking, the strength of a paper bag. The flimsy gas bags of cotton, cloth, rubber, cement, etc., weighing not more than 5 ounces per square yard, and could be easily punctured by a small boy's rule, yet they are presented to the Nation as formidable instruments of warfare, capable of engaging an enemy fleet. One shrapnel shell from an antiaircraft gun, even if poorly placed, would end forever the career of any airship such as the *Akron* or *Macon*.

AKRON DESTRUCTION

C. E. Rosendahl, a former commander of the *Akron*, in a published article on the destruction of the *Akron* tries to present the argument that structural failure did not take place in the ship causing her fall, stern first, into the sea, but that down draft air currents in the center of the storm area forced her

Digitized by Google

descent. According to his account she was traveling with a forward engine speed of about 70 miles per hour, and this added to a tail wind of about 30 miles an hour caused her stern to strike the water with an impact of 100 miles an hour, which broke her back. This was the report of an inquiry by Congress at which only naval officers testified, and at which no disinterested testimony was offered. Would these naval officers have a credulous public believe that downward air currents continue indefinitely downward into the sea, carrying anything with them to destruction?

A German airship expert expressed astonishment at this lame explanation of the event, remarking that in all his long experience in flying ships he had not encountered air currents so peculiar as to be capable of driving a ship right down to the ground. This explanation even if true, discloses a most fatal weakness of this type of ship in that they are wholly incapable of landing on water areas, and are soon hopelessly swamped by an ordinarily disturbed sea Heaver-than-air ships or airplanes, designed to fly over large water areas are equipped to land safely on the surface in any moment of emergency.

There is no other logical explanation of the fall of the *Akron* except that her stern was damaged, thus releasing gas that made it impossible to rise again. Either explanation reveals the absurd folly of this system that has become outmoded and should be outlawed.

(Picture, aerial view showing wreckage of the U. S. S. *Shenandoah* which crashed in Ohio in September 1925, on file with the committee.)

Do the American people wish to offer any more lives on the altar of the "finest traditions of the Navy"? Do American taxpayers wish to continue to spend fabulous fortunes in treasure for these flying sepulchers that have been the doom of some of the best minds in aeronautical science? Not if they are apprised of the facts. Enlightened public opinion will demand something more than a mere structural gas bag that is so utterly lacking in those air-worthy characteristics that modern air travel requires.

PARRISH DESIGN

Over 2 years ago, I proposed to the Navy a practical plan for the construction of an airship that, facing a situation such as the *Akron* encountered would have been able to land on the sea more easily than a seaplane, and ride safely there while repairs were made to the damaged functions which caused the descent.

This plan called for a type of structural frame work and cell structure that could not be damaged under such circumstances by freak air currents. Such a ship would be waterproof and fireproof, would need no dock or hangar of any kind, and would not need a regiment of marines to haul it to safety every time Mother Nature indicated a coming fit of temperament. It was designed to carry seven times the load of the *Akron* and provided for a cell system that allowed for wide fluctuations in gas pressure under the varying conditions of flight.

Added to these advantages were increased lateral stability, axial propeller thrust, a great inherent longitudinal stability, compactness, and simplicity of construction and a simple and safe method of landing, without man power that completely eliminates this hazard from airship operation. However, Navy admirals with pet baby airship designs "Made in Germany" look askance at upstart hopefuls not in the social register. My plans were referred by the Navy to the National Advisory Committee for Aeronautics, that dreary graveyard of progressive inventive science. The letter intimated that an impartial view of the project would be given by this committee but the letter head of the committee stationery was emblazoned with the gold-braided names of Navy admirals who walk out of the die-hard counsels of hard-shell military matters, into the unbiased open-minded atmosphere of the committee rooms, in the same building, shed lightly the memory of their former loves and render a snap judgment without even bothering to thoroughly study one's plans. That is a model of ponderous, dignified, and weightily judicial fairness.

COMMITTEE RESPONSE

Imagine my amazement when I received a letter from the National Advisory Committee for Aeronautics containing statements that were cut cold, word for word from a book entitled, "Airship Design", by Prof. C. P. Burgess, of Massachusetts Institute of Technology, accusing me of proposing to control the

Digitized by Google

weight of airships by compressing air in containers and increasing weight to balance loss of weight by fuel consumption. Needless to say I had not proposed anything of the kind, but the letter plainly indicated that neither the Navy Department nor the National Advisory Committee had bothered themselves to examine the plans and specifications carefully but had tossed off a form letter in reply, much as a gesture of one brushing off a fly.

Pestiferous inventors have brought to the world a fabulous mountain of wealth in endless mechanical inventions of many kinds. Yet endless patience and persistence is required to overcome the dead inertia of men who resent any outside attempts to have a thing done today differently than it was done yesterday. I urged that I did not propose to compress air or gas in tanks in my specifications sent to the Navy Department. The form letter did not quite fulfill the need in this case. I did propose control of buoyancy by heating and controlling temperature of gases in the gas cells of the airship. This called forth another choice excerpt from Professor Burgess' book.

Reaching for a book and referring to chapter and page is the neat method by which the National Advisory Committee for Aeronautics disposes of troublesome questions, problems, and incidentally, cranky inventors. It seems to me a function of the Advisory Committee to advise the American public regarding the nature and contents of technical works, since they apparently have little first-hand information or experience of their own that may form the basis of conclusions. They cited the weight of the apparatus required to heat the gas, using Prof. C. P. Burgess' argument. I pointed out that more than three times the necessary heat required for the purpose was available from waste heat in the exhaust and jacketing of the engines. But nothing disturbs the smug self-complacency of Government bureaus; figures and facts mean nothing where traditions must be upheld and a false prestige maintained.

AERONAUTICAL EXPERT

Imagine my surprise when upon presenting my proposals to an aeronautical expert of national reputation, I was told he could not pass judgment without going into technical questions involved very thoroughly. He immediately invited me to cooperate with him in experiments to prove the aerodynamic efficiency of my proposed design. Surely this great aeronautic authority, with many years of experience in design and research work, has much to learn from Navy admirals, who can dismiss these trifling matters with a snap of the fingers.

Can an intelligent and enlightened public opinion be aroused to a realization of the tragedy of the modern lighter-than-air ship, and brought to play against an absurd traditional policy of Government agencies, that persist in squandering public moneys on a type of aircraft which has long since been dismissed from consideration by every leading nation in the world?

Will Navy admirals see the light, or must we wait for another repetition of the *Akron* horror, before an enraged public forces the hand of a recalcitrant minority and relegates these man-killing monsters to the scrap heap?

I hope the awakening, which must eventually come, will precede another shocking disaster such as befell the brave men of the airships *Shenandoah* and *Akron*.

FRANCOIS MARCEL,
Brooklyn, N. Y., February 26, 1935.

HOUSE PATENTS COMMITTEE,
Washington, D. C.

GENTLEMEN: I have read the article of Roy W. Knabenshue, manufacturer of balloons, this day, February 26, in the New York Journal, page 24, and evidently he is trying to blame a dead man.

I wish to bring to your attention that I have written to our dear President, Franklin D. Roosevelt, April 10, 1933, outlining to him exactly what would happen to the *Macon*. It did happen just exactly as I had foretold it. The letter was transferred over to the Navy Department from whom I received an answer from Commander A. C. Read, thanking me for the information and I presume this is just as far as it went. However, in my letter of April 10 I was very anxious and told the President, by no means to go up in the *Macon*, nor Mrs. Roosevelt. If upon your request, you wish me to send you a copy of the letter of April 10 to President Franklin D. Roosevelt I will do so, which

Digitized by Google

outlines in detail the cause of the disaster as I predicted, which was the same cause for the *Akron*, but even if I had written to the President on that occasion I presume it would have received the same attention as for the *Macon*. I also suggested in my letter that a piece from the *Los Angeles* and a piece from the *Macon* be examined by chemists which is so necessary in all kinds of engineering and the real cause is actually the metal that has been used in the construction of the airship.

To my mind an airship is quite plausible, but should be made of an entire different construction as those made heretofore. It would answer all purposes of transportation and safety.

I have had several captains of the police department to whom I have demonstrated just exactly how the metal would vary in my laboratory and machine shop at the above premises and Captain Walsh questioned me if it is possible to write to the Government in regard to same which I did. It is very lucky that only a few men lost their lives and not the entire crew of the ship and it is surprising that they would not listen to someone that warned them in advance.

Yours very truly,

FRANCOIS MAROEL.

AERONAUTICAL PROGRESS AND THE MACON TRAGEDY

HEMPSTEAD, N. Y., *February 16, 1935.*

To the Chairman of the Patent Committee, House of Representatives, Washington, D. C.

Senator JOSEPH ROBINSON,
House of Representatives, Washington, D. C.

DEAR SENATOR ROBINSON: The United States Treasury has been and is traveling in a dark dirigible circle, led by superengineers insisting upon reckless aeronautical sacrifice.

I believe it is about time aeronautical progress and the *Akron* tragedy receives intelligent consideration.

I believe it is about time the Krammer separable safety device received practical consideration.

I believe it is about time the Krammer separable aircraft receives useful consideration.

I believe it is about time to consider a new useful means in place of an old destructive one.

Very often national matters never reach the right man.

Respectfully yours,

H. E. KRAMMER.

(Photograph of the U. S. Navy's dirigible *Macon*, which met with disaster is on file with committee.)

LEHMANN LAYS "MACON" COLLAPSE TO CONSTRUCTIONAL FAILURE

BERLIN, February 14.—Capt. Ernst Lehmann, commander of the *Graf Zeppelin* on many of its voyages, stated today that, in his opinion, the collapse of the *Macon* was due solely to a "constructional failure."

He said that both the *Akron* and the *Macon* had been constructed by Dr. Karl Arnstein of the Goodyear.

HENRY E. KRAMMER,
Hempstead, N. Y., May 8, 1933.

To the honorable Committee Investigating the "Akron" Disaster, House of Representatives, Washington, D. C.

GENTLEMEN: I herewith wish to take the liberty of extending to you my sincere sympathy for the great loss of the honorable and brave men who went under with the *Akron*. New ships can be produced, but not leaders and men like the 73.

During my 25 years of aeronautical interest I have seen many ships going up and many of them going down—the airplane type and the dirigible type—and do know at this time from my own study and experience that each success and each tragedy in aviation is an individual element each one by itself—so was the *Akron* tragedy, the *Shenandoah* tragedy and all other tragedies in England, France, Italy, and Germany.

Digitized by Google

Dirigible bridge engineering and helium transportation, while a perfect success mechanically and mathematically, is still an infant art.

Dirigible transportation is in the same stage of development as marine transportation was 20 years ago. Dirigible transportation shall continue to follow the road of development the ocean steamer followed.

Development of dirigible transportation depends on time, experience, and knowledge accumulated for building better and safer ships.

Dirigible transportation cannot be condemned without proper analysis, justice, and wisdom.

The lesson learned and knowledge gained from past history justifies me to write to the honorable committee investigating the *Akron* tragedy.

The *Akron*, while a mechanical and mathematical structural success, was far from perfection; the *Akron* represented and was an experimental ship, following a new road in dirigible engineering.

The *Akron* was, and the *Macon* is, a successfutl United States production.

As a matter of fact, the Navy accepted the *Akron* and operated the ship successfully 18 months.

As a matter of fact, the *Akron* could have never delivered 18 months of successful service structurally defective.

As a matter of fact the *Akron* could not have withstood the severe punishment fully 6 hours on the night of the tragedy, structurally defective.

As a matter of fact, the three survivors could never tell the tale, had there been any structural weakness.

As a matter of fact, the three survived men told the naval court with their own lips that not alone did they consider the *Akron* structurally perfect, but they also testified in open court that the lights were on the *Akron* and visible up to the time the ship went under.

THE NAVAL COURT REPORT

WASHINGTON, May 1.—The cause of the Akron disaster will ever remain in the "realm of conjecture", Judge Advocate Ralph G. Pennoyer today told a naval court of inquiry.

In his summation of the case he said:

"I believe the evidence shows that the officers and men of the *Akron* were well trained and skilled in the operation of this type of craft, and they performed their duties to the full limit of their abilities. In the light of hindsight, some may say that a certain course of procedure might have saved the ship.

"It may be accepted in the case of the loss of any craft at a certain place at a certain time that any change of action on the part of any individual directly or indirectly connected with the movement of such craft might have averted such loss. In this sense, and in this sense only, can allegation of direct or indirect individual responsibility for the loss of the *Akron* and the loss of life consequent thereon be supported.

"If any action taken in the light of hindsight be termed 'errors of judgment', clearly they were without negligence or culpability. This disaster is part of the price which must inevitably be paid in the development of any new and hazardous art.

"As someone has said, the minds of men have projected a fleet of such craft in the air and some day it must fly there."

"One important lesson was learned from the *Akron* tragedy, and that is, thunder storms must be avoided", concluded Mr. Maguire, counselor for the judge advocate.

I regard the counselor for the judge advocate with high respect, and while I agree with Mr. Maguire on some of his conclusions, I cannot help but disagree to a certain measure on some of the others.

Mr. Maguire stated in open court that the *Akron* disaster is part of the price which must unavoidably be paid in the development of the art.

The history of dirigible transportation goes way back to the early days of Count Zeppelin; the count was one of the first leaders on rigid dirigibles. Some of his ships went up and some of them went down, and while the *Akron* and the *Macon* type is a successful United States production, yet this type is far from a commercial or military success.

Engineers in the United States and Germany forge their way on one road, building giant ships with speed and comfort.

Digitized by Google

All the wonderful aeronautical equipment and speed the *Akron* possessed did not mean any more during the crash than does the finest traveling steamer having a cargo of human freight without the proper life-saving equipment in a disaster.

Emergency equipment is compulsory with marine transportation, why not with a flying experimental laboratory?

It is reckless to permit the transportation of passengers over land or water without the proper emergency equipment.

To transport human bodies without the proper emergency equipment is the equivalent of housing men, women, and children in one building without the proper life protection.

The superengineer insists on going through a steel wall, building giant ships, fast ships, and ships with smoking facilities, although all speed and comfort put together doesn't mean a thing in the world when life hangs at the edge of jumping overboard or sinking in deep sea.

It is not clear why a tragedy like the *Shenandoah* or the *Akron* must be the unavoidable price for developing the art. It is also not clear why everything went under in 30 years of dirigible engineering.

The lesson for detouring thunderstorms is old; there is nothing new about that, and is a poor defense for continuous aeronautical disasters.

Engineers right down to this very day strive for speed and comfort, while nothing effective or constructive has been accomplished to save life and property in a disaster, and so the future hope for protecting life during an emergency still rests on the realm of conjecture, which is the equivalent of other aeronautical tragedies.

The Navy declared that the *Akron* tragedy takes its place with other tragedies and it was a necessary risk.

Development of all scinetific military weapons is a national necessary risk, but there is one important element overlooked, and that is—each time a ship goes under without the proper emergency equipment, nothing effective or constructive is gained. Without it dirigible sacrifice is a perpetual aeronautical wound.

PROGRESS CANNOT BE ACCOMPLISHED IN THE DARK

I trust this letter will prove of useful service to the honorable committee of inquiry, I am,

Very sincerely yours,

HENRY E. KRAMMER.

DR. HENRY W. WALDEN,
New York, December 27, 1935.

Dr. WILLIAM I. SIROVICH,
24 Fifth Avenue, New York City.

MY DEAR DR. SIROVICH: I acknowledge your letter of December 19, enclosing for my inspection and comment the letter of the Commissioner of Patents referring to my cases. I herewith return the letter in accordance with your request.

The Commissioner's letter is correct except that he does not refer to the fact that the four applications starting with March 5, 1929, were all directed to the same broad invention, and have been part of a continuous attempt by me to obtain patent protection on this invention. These various new applications were filed to comply with the technicalities of Patent Office proceedure.

The present application was filed as a continuation of the prior application because the examiner was limited by Patent-Office proceedure from granting me claims commensurate with my invention. Claims had been allowed in the prior application covering the invention as applied to a machine using two-bladed propellers, and when this omitation was noted and the claims were inserted to cover the same invention with a three-bladed propeller, the examiner was unable to allow them without again searching the art, and this made it necessary to file the application over again.

The examiner in the new case now rejected all the claims, even those which had been allowed, so that 6 years after filing of an invention regarded by the important engineers in the industry as of great merit, I am still without any protection at all. I shall shortly enter my response to the latest Patent Office action, and shall have to await their future action which will likely take, as is usual, several months.

Digitized by Google

The routine delays have caused me great hardship, the effects of which I am still suffering and, if my request is proper, I will greatly appreciate your kind intervention so that I may receive prompt action, in my case, from the Patent Office.

Yours respectfully,

HENRY W. WALDEN.

DEPARTMENT OF COMMERCE,
UNITED STATES PATENT OFFICE,
Washington, December 17, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, House Committee on Patents,
Fifth Avenue Hotel, New York, N. Y.

MY DEAR DR. SIROVICH: I am in receipt of your letter of December 10, 1935, asking that you be advised of the facts in connection with certain applications for patent filed by Dr. Henry W. Walden, who recently testified before the Committee on Patents at the hearings held in New York.

Although Dr. Walden has filed other applications relating to photography and to the packing of coffee, the following are the only cases under his name which relate to the field of aviation:

On March 5, 1929, application, serial no. 344325, was filed in the Patent Office. The examiner made two actions in the case in which all of the claims were rejected as lacking novelty over the prior art or on the ground of new matter. After the second action the application was permitted to become abandoned on May 6, 1931.

On July 1, 1929, Dr. Walden presented application, serial no. 375228. This application was finally rejected on the ground that the claims presented were not patentable over the prior art. No appeal being taken, as provided by law, the applicant permitted this case to become abandoned on December 11, 1930.

A third application was filed on December 24, 1930, serial no. 504615. The examiner held that four claims in this case were patentable, and on January 29, 1934, the case was passed to issue. The applicant might have received his patent by paying the final fee of $30. After the allowance, the applicant endeavored to file a further amendment under the provisions of rule 78, but the amendment was not accepted for the reason that it would require a complete reopening of the prosecution. The final fee was not paid by the applicant, and the case became abandoned on January 29, 1935.

The fourth application, serial no. 2290, was filed on January 17, 1935. This application is still pending and is awaiting applicant's response to the official action of November 9, 1935, in which claims were rejected as lacking novelty in view of the prior art.

I shall be glad to supply any further information upon request.

Cordially yours,

CONWAY P. COE, *Commissioner.*

H. O. CHUTE, CHEMICAL ENGINEER,
New York, June 26, 1935.

WILLIAM I. SIROVICH,
Chairman, House Committee on Patents,
Washington, D. C.

DEAR SIR: Please accept thanks for hearings on patent pooling sent as we requested on June 20. We think this bill quite necessary. We note that the "may" in recording agreements is now a "must."

Section 3 might be changed as follows: "Each agreement referred to in section shall contain names", etc., and "previously recorded agreements shall be amended by a supplementary statement containing", etc.

Section 6 might be improved by the following: "If complaints * * * are filed with the Federal Trade Commission or the Commission" add also "the Commissioner of Patents shall send the Federal Trade Commission an abstract of all such agreements with names of patentees, assignees of; and numbers of patents held by each."

On page 21 you say: "The Federal Trade Commission could investigate the pooling", and Mr. Langham said: "They have that right now." While we believe they should, we think both the courts, Congress, and the people feel

Digitized by Google

that there is a special sacred right of patents above all other property and beyond what the Constitution gives. We have never heard of the Federal Trade Commission issuing a "cease-and-desist" order, based on a monopoly formed by patent pooling, nor can we recall any court action taken against such by any Federal court. We therefore suggest that perhaps another paragraph be added recognizing the "exclusive right" to the invention given by the Constitution, but asserting that any "patent-pooling" agreements will have no more rights than that of other property affected by the antitrust laws.

We hope you will find that there is merit in these suggestions.

Yours truly,

H. O. CHUTE.

JUNE 27, 1935.

Mr. H. O. CHUTE,
New York, N. Y.

DEAR SIR: In answer to your letter of June 26, relating to hearings on "patent pooling", the suggestions contained therein will be brought to the attention of the Committee on Patents at its next meeting on this subject.

Very truly yours,

EDWIN FAIRFAX NAULTY, *Secretary.*

AUGUST 3, 1929.

Memorandum for The Assistant Secretary of War.
Subject: Construction of paragraphs (k) and (t), section 10, act of July 2, 1926.

1. You have referred to me, informally, two memoranda, dated July 10, 1929, and addressed to you, in which the Chief of the Air Corps presents his views concerning the construction of paragraphs (k) and (t), section 10, of the act of July 2, 1926 (44 Stat. 787, 788), with reference to quantity procurement of Air Corps matériel in view of section 3709, Revised Statutes.

2. From an opinion, dated May 17, 1929 (JAG 163), in which this office considered the construction of paragraph (k), section 10, of the act of July 2, 1926, the Chief of the Air Corps, in one of the two memoranda in reference, after quoting—

"The quantity procurement, however, must be as the result of advertising pursuant to Revised Statute 3709"—

expresses the opinion that that conclusion is not consistent with the language of the act, and then continues, in paragraph 5:

"According to the view of this office, if this provision of the law does not mean that quantity procurement subsequent to and as a result of the experimental procurement cannot be made without advertising at the discretion of the Secretary, then it is mere surplusage and means nothing at all, for the law already authorizes such procurement after competitive bidding in Revised Statute 3709, as well as in paragraphs (a) to (e) of this act. The inclusion of the words 'without regard to the provisions of paragraphs (a) to (e)', in the opinion of this office, is subject alone to the construction that Congress intended to confer upon the Secretary the right, in his discretion, to purchase in quantity with or without competition if, as a result of experimental purchase, new or suitable designs considered to be the best kind for the Army or the Navy, as the case may be, are developed."

3. Paragraph (k), section 10, of the act of July 2, 1926 (44 Stat. 787), reads as follows:

"The Secretary of War or the Secretary of the Navy may at his discretion purchase abroad or in the United States, with or without competition, by contract, or otherwise, such designs, aircraft, aircraft parts, or aeronautical accessories as may be necessary in his judgment for experimental purposes in the development of aircraft or aircraft parts or aeronautical accessories of the best kind for the Army or the Navy, as the case may be, and if, as a result of such procurement, new and suitable designs considered to be the best kind for the Army or the Navy are developed, he may enter into contract, subject to the requirements of paragraph (j) of this section, for the procurement in quantity of such aircraft, aircraft parts, or aeronautical accessories without regard to the provisions of paragraphs (a) to (e), inclusive, hereof."

4. I find myself unable to concur in the reasoning outlined by the Chief of the Air Corps in his paragraph 5 quoted above. The provision, which he

Digitized by Google

suggests, is merely surplusage if it does not mean that quantity procurement after experimental procurement may be made without advertising, provides for quantity procurement subject to the requirements of paragraph (j) (as to citizenship) without regard to the methods of procurement presented by paragraphs (a) to (e), inclusive (i. e., competition among designers of equipment, followed by announcement of winners, and procurement from winners at prices fixed by agreement with them, or purchase of design, followed by construction of the equipment by the United States or by others for the United States). So construed, the provision has a purpose entirely apart from the matter of advertising in connection with quantity procurement.

5. Section 3709, Revised Statutes, stands as a distinct legislative enactment, and paragraph (k) must be construed in connection with that section, which provides that all purchases and contracts for supplies or services, excepting personal services, shall be made after advertising when the public exigencies do not require immediate delivery of the articles or performance of the services. Compliance with that section is mandatory, unless some other provision of law specifically provides to the contrary. Such a provision is found in the first portion of paragraph (k) authorizing procurement for experimental purposes "with or without competition." Such a provision is not found in the latter portion of paragraph (k) authorizing quantity procurement following experimental procurement. If it had been the intent of Congress that such quantity procurement should be made without reference to the mandatory provision of section 3709, Revised Statutes, as to advertising, the words "with or without competition" would similarly have been there inserted.

6. I am constrained to adhere to the opinion, expressed in the opinion addressed to you under date of May 17, 1929, that quantity procurement authorized in the later portion of paragraph (k), section 10, of the act of July 2, 1926 (44 Stat. 787), must be made after advertising pursuant to section 3709, Revised Statutes.

7. In paragraph 4 of the other of the two memoranda in reference, the Chief of the Air Corps, referring to the opinion of this office previously mentioned (J. A. G. 163, May 17, 1929), says:

"In the opinion of the Judge Advocate General, above referred to, approving the general method of establishing an approved list under procurement policies, the Judge Advocate General held that even though the known trade or sources of supply had been previously circularized as to service-test requirements when bids are invited 'the time of opening of bids should be set sufficiently far away so as to afford an opportunity for manufacturers to attempt to comply with the necessary requirements should they so desire.'"

8. The foregoing quotation from the opinion of this office, dated May 17, 1929, is incomplete in that it does not make clear that the matter quoted pertains, not to the procurement policy submitted by the Chief of Air Corps but to the hypothetical case stated by the Chief of Air Corps following his statement of the general policy proposed. The entire paragraph, from which the quotation was taken, reads as follows:

"In the hypothetical submitted case in basic memorandum it appears that the only contemplated circularization or advertisement is the giving of notice of the policy as a preliminary to securing samples for the service test. It is the opinion of this office that such a circularization could not be considered as an advertisement and request for bids. In the event that but one manufacturer submitted a satisfactory sample and it is decided to purchase a quantity of the articles, then notification should be sent to all known manufacturers that the department is in the market for the desired article in specified quantities, that no bids will be considered except from such manufacturers as have complied with the requirements set forth in the announced policy, and that opportunity is hereby afforded for those who desire to bid to submit samples and meet the other requirements of the policy. The time of opening of bids should be set sufficiently far away so as to afford an opportunity for manufacturers to attempt to comply with the necessary requirements should they so desire. Should there then be but one bid received from a manufacturer whose compliance with the requirements has placed him on the approved list, then, in the opinion of this office, it would be legal to award the contract to him, in the discretion of the Secretary of War."

Upon the general policy, it had been previously stated in that opinion:

"The notification that bids will be considered only from those whose names appear on the approval list is merely a restatement of the requirement necessary to secure a place on said list; and since they themselves are reasonable,

Digitized by Google

such a direction is reasonable. The authority to invite proposals implies an authority to prescribe reasonable terms and conditions. To announce under this authority that no bid will be considered which does not comply with certain direction is a proper exercise of such authority (13 Op. Atty. Gen. 510). It is the opinion of this office, therefore, that there is no legal objection to the submitted procurement policy."

It follows from the above that the necessity for setting the time for opening bids sufficiently far away to permit the submission and test of samples exists only when but one manufacturer has secured approval of a sample submitted in accordance with the policy. When two or more manufacturers have submitted and secured approval of a sample of a particular article, the requirements of section 3709, Revised Statutes, will have been satisfied if the circular proposal requesting bids affords the usual time for submission of bids without affording further time for presentation and test of new samples.

It is understood, of course, the circularization, or advertising, to the industry, or trade, inviting the submission of samples for test, will be comprehensive, so as to reach substantially the entire industry, or trade, and will be supplemented from time to time, at proper intervals, in order that new units may be advised of the opportunity to submit samples for laboratory and service tests.

9. In paragraph 6 of the memorandum last referred to, the Chief of the Air Corps suggests a form to be used by the Secretary of War in approving the award:

"The award in this case was made under the provisions of paragraph (t) of section 10 of the act of Congress approved July 2, 1926 (44 Stat 788), the contractor being the lowest bidder who has submitted an article that has satisfactorily passed the specified performance requirement of the Government and is the lowest responsible bidder that can, as far as is known, satisfactorily perform the work or services required to the best advantage of the Government."

That form is identical with the form of certificate to be signed by the contracting officer, proposed by the Chief of Air Corps in his memorandum of May 6, 1929, which was the subject of the previous opinion of this office dated May 17, 1929 (JAG 163). In that opinion this office made the following comment upon the form suggested:

"It is assumed that this certificate is not suggested in lieu of any of the requirements of R. S. 3744 and 3745, 41 U. S. C. A. 16 and 17, but is in addition thereto. It is suggested that the certificate take the following form instead of the proposed form:

" 'The award of the contract in this case was made under the provisions of subparagraph (t), section 10 (44 Stat. 788), approved July 2, 1926; 10 U. S C. A. 310 (t) the contractor in this case being the lowest responsible bidder that can satisfactorily perform the work or the services required to the best advantage of the Government.' "

The modified form thus suggested conforms to the statute and is, in my judgment, to be preferred over the form originally proposed. In order, however, to correct the inadvertent departure from the usual form of citation of a statute it is suggested that the form be made to read as follows:

The award of the contract in this case was made under the provisions of paragraph (t), section 10, act of July 2, 1926 (44 Stat. 788, 10 U. S. C. A. 310 (t)), the contractor in this case being the lowest responsible bidder that can satisfactorily perform the work or the service required to the best advantage of the Government.

E. A. KREGER,
Major General,
The Judge Advocate General.

MAY 17, 1929.

Memorandum for The Assistant Secretary of War.

Subject: Memorandum from Chief of Air Corps, dated May 6, 1929, re Construction of paragraph (t) of section 10 of Air Corps Act, and enclosing proposed policy in connection with purchase of goggles.

1. The Chief of the Air Corps, in basic memorandum to the Secretary of War submits questions as to a proposed procurement policy for aeronautical supplies as well as requesting opinions on the proper procedure to be followed in case such policy be approved. As an enclosure to the memorandum there is submitted a copy of the proposed policy relative to the procurement of aviators' goggles as well as a copy of a letter from the Comptroller General

Digitized by Google

(A 26201, Apr. 4, 1929), in which the Comptroller expresses the opinion that in quantity purchases the requirements of section 3709, Revised Statutes, as to advertising should be strictly observed and that in such advertising the needs of the United States, as ascertained by tests, be set forth in specifications that stipulate only the essential features necessary to meet the actual requirements so that there may be opportunity for full competition. The Comptroller further states that if the Government's requirements in the matter of goggles cannot be otherwise covered by specifications describing the needs, the requests for bids could specify the particular make or equal.

2. The proposed procurement policy briefly stated appears to be substantially as follows:

An announcement to all known responsible manufacturers of the particular part desired stating in effect that bids will only be received from such manufacturers as have submitted samples which have been subjected to actual service tests and been found satisfactory; that any manufacturer may submit samples to the Matériel Division to be subjected to experimental tests in accordance with existing performance specifications; that if as a result of the experimental tests, the sample appears to meet the Air Corps' requirements, then the Matériel Division may purchase for actual service test a quantity not to exceed (in the case of goggles) 10 pairs which will then be tested under actual service conditions; that manufacturers whose samples successfully pass this service test will be placed on the approved list for production procurement provided they satisfy the Matériel Division as to their manufacturing and financial capacity and technical skill; that quantity procurement will then be made from the manufacturers on such approved list, and bids from other concerns will be rejected.

3. It is assumed that the Chief of the Air Corps has in mind the procurement of aircraft parts and aeronautical accessories which do not fall within the provisions of subparagraphs (a) to (e), both inclusive, section 10 (44 Stat. 780) approved July 2, 1926, since the basic memorandum states that the contemplated policy is proposed to be enunciated under authority of subparagraphs (k) and (t) of section 10.

4. As to the procurement, without advertising, of samples for service testing there can be no legal objection in view of the express authority granted the Secretary of War in subparagraph (k) of section 10.

5. The quantity procurement, however, must be as the result of advertising pursuant to R. S. 3709. The Comptroller General expresses the opinion that such advertisements must be based on specifications which would not require purchases from a particular manufacturer; specifications that stipulate only the essential features necessary to meet the actual requirements so that there may be full opportunity for full competition. Or if such cannot be done, that the specifications in describing the needs of the Government specify a particular make or equal.

The Air Corps apparently believes such procedure impracticable and proposes instead to hold actual tests of samples, place the successful contestants on an approved list and draw specifications which, in effect, refused consideration of bids from others than the manufacturers on such proposed list.

Subparagraph (t) of section 10 authorizes the Secretary to award contract for aircraft, aircraft parts, or aeronautical accessories—

"* * * to the bidder that said Secretary shall find to be the lowest responsible bidder that can satisfactorily perform the work or the service required to the best advantage of the Government; and the decision of the Secretary of the department concerned as to the award of such contract, * * * shall not be reviewable, otherwise than as may be therein provided for, by any officer or tribunal of the United States except the President and the Federal courts."

It is apparent from the above that the Congress intended to place on the Secretary the sole responsibility for selecting the bidders who could satisfactorily perform the work or the service required to the best advantage of the Government, and that the only limitation placed on his power is that if there be more than one who can satisfactorily perform the work and who can perform it of equal advantage to the Government, then that the contract be entered into with the lowest responsible one of such two or more bidders.

It is equally apparent that the secretary personally cannot conduct the necessary investigation. The issuance by him of general regulations which will govern his subordinates is the proper exercise of his authority. It remains, therefore, to consider whether the proposed regulations or policy is a reasonable

Digitized by Google

exercise of the discretion vested in the Secretary and whether it will result in determining who are the responsible ones who can satisfactorily perform the work or service required and the relative degree of advantage to the Government. If the regulations will do this, then the bids themselves will determine who is the lowest and the intent of Congress will be effectuated.

The actual testing of the parts was contemplated by the Congress (subpar. (k), sec. 10), and therefore is a proper requirement in this policy. The requirement that manufacturers show satisfactorily their manufacturing and financial capacity and technical skill is a necessary element for the Secretary's consideration and is therefore a reasonable requirement of the policy. No time limits are set for submission of samples, therefore the approved list contemplated is not final but is subject to change as manufacturers comply with the prerequisite condition. Since the preparation of the list is predicated merely on said compliance with reasonable requirements, the list itself is merely an announcement that those whose names are contained thereon have met the basic requirements and is a reasonable administrative method of announcing such fact to procurement officers.

The notification that bids will be considered only from those whose names appear on the approved list is merely a restatement of the requirement necessary to secure a place on said list, and since they themselves are reasonable, such a direction is reasonable. The authority to invite proposals implies an authority to prescribe reasonable terms and conditions. To announce under this authority that no bid will be considered which does not comply with certain direction is a proper exercise of such authority. (13 Opin. Atty. Gen., 510.) It is the opinion of this office, therefore, that there is no legal objection to the submitted procurement policy.

6. The basic memorandum further asks whether—

"In the event this proposed policy is approved by you, and all known responsible manufacturers of goggles are advised of the same but only one manufacturer complies by submitting the required sample, your opinion is requested as to whether or not, under the provisions of the above-mentioned paragraph of the Air Corps Act, the circularizing of the known trade with the announcement of the policy referred to would be sufficient advertisement in compliance with the law so as to place the contract with the only manufacturer who complied with the provisions of the policy without further advertisement."

The answer to this involves a consideration of R. S. 3709. That provision was written into law for the protection of the Government (259 U. S. 75) in line with the wise public policy insuring to the Government the advantage of competition in making contracts for its supplies (22 Opin., Atty. Gen. 1). There is no express method of advertising described therein. The manner of advertising is left by the law to the discretion of the department advertising (15 Opin., Atty. Gen. 226) and he is justified in advertising to those who are able to do the work or furnish the supplies which he needs in his department. In such a matter he may exercise his own discretion as to that which shall be for the best interest of the public, and will carry out the policy of the statute by thus limiting his advertisements, when he shall deem it expedient to do so. (Id.)

In the hypothetical submitted case in basic memorandum it appears that the only contemplated circularization or advertisement is the giving of notice of the policy as a preliminary to securing samples for the service test. It is the opinion of this office that such a circularization could not be considered as an advertisement and request for bids. In the event that but one manufacturer submitted a satisfactory sample and it is decided to purchase a quantity of the article, then notification should be sent to all known manufacturers that the department is in the market for the desired article in specified quantities, that no bids will be considered except from such manufacturers as have complied with the requirements set forth in the announced policy, and that opportunity is hereby afforded for those who desire to bid to submit samples and meet the other requirements of the policy. The time of opening of bids should be set sufficiently far away so as to afford an opportunity for manufacturers to attempt to comply with the necessary requirements should they so desire. Should there then be but one bid received from a manufacturer whose compliance with the requirements has placed him on the approved list then, in the opinion of this office, it would be legal to award the contract to him, in the discretion of the Secretary of War.

Digitized by Google

7. In paragraph 5 of basic memorandum there is submitted a suggested certificate to be signed by the contracting officer awarding the contract reading as follows:

"The award in this case was made under the provisions of paragraph (t) of section 10 of the act of Congress approved July 3, 1926 (44 Stat. 788), the contractor being the only manufacturer in a position to satisfactorily perform the contract in that he is the only manufacturer who has submitted an article that passed the specified performance requirements of the Government and is the only dealer able to furnish satisfactory supplies that, as far as is known, have no counterpart in the commercial world."

It is assumed that this certificate is not suggested in lieu of any of the requirements of R. S. 3744 and 3745, 41 U. S. C. A. 16 and 17, but is in addition thereto. It is suggested that the certificate take the following form instead of the proposed form:

"The award of the contract in this case was made under the provisions of subparagraph (t), section 10, 44 Stat. 788, approved July 2, 1926; 10 U. S. C. A. 310 (t) the contractor in this case being the lowest responsible bidder that can satisfactorily perform the work or the services required to the best advantage of the Government."

For the Judge Advocate General:

HUGH C. SMITH,
Lieutenant Colonel, J. A. G. D.,
Chief, Civil Affairs Section No. 1.

UNITED STATES STEEL CORPORATION,
New York, December 9, 1935.

FAIRFAX NAULTY, Esq.,
Care of Congressman William I. Sirovich,
24 Fifth Avenue and Ninth Street, New York, N. Y.

DEAR SIR: In response to your request by telephone several weeks ago we have written a brief treatise on the alloy steels, along the lines you suggested. The article was not prepared and sent to you immediately after our discussion of the subject, as we understood that you intended to write us more in detail about your wants, and we were awaiting the receipt of your communication. A telephone call from Mr. Martin a few days ago indicated that there might be some misunderstanding about this, so we are sending you at once what we think covers the points you had in mind.

After these many years, allow me to assure you that it was a delightful surprise to come into touch with you again.

Yours very truly,

R. E. ZIMMERMAN, *Vice President.*

ALLOY STEEL

The progressive importance of the alloy steels is recognized by those who are interested in the products of the steel industry, either as producers or consumers. Twenty-five years ago the production of alloy steels in the United States amounted to 500,000–600,000 gross tons, or approximately 2 percent of the total, while at the present time, based on the figures for 1934, alloy steels account for roughly 6 percent of the total. Last year there were produced in this country more than 1,600,000 gross tons of alloy steel, and it is estimated that the figure for 1935 will be close to 2,000,000 gross tons. This will not equal, in tonnage, the high point reached in 1929, when 3,957,000 tons of alloy steel out of a total of 56,443,000 set a record ratio for the material, but it will represent a proportion which compares favorably with the percentage for that year.

In thinking generally of the alloy steels, those who are not well acquainted with the subject are prone to consider them a wholly different species of material, not closely related to the better known carbon or so-called ordinary steels. There is thus some danger of securing a distorted impression, and one must realize that except for a few special cases, such as the stainless steels and some of the magnetic and heat-resistant alloys, most of the alloy steels

Digitized by Google

contain more than 90-percent iron. Various, but relatively small, percentages of alloying elements are added to molten carbon steel to form the commercial alloy steels in use today; this is because small proportions of such elements exert the necessary effects in a specific way.

There are almost innumerable grades of alloy steel on the market today, although 15 or 20 classes will account for the major portion of the tonnage. Sometimes only one special alloying element is added to the carbon steel composition, as, for example, in the well-known 3.5 percent nickel steel; or there may be two, three, or more elements, such as chromium and molybdenum, or chromium, nickel, and vanadium. Most steels these days are tailor-made for particular requirements; thus a composition best adapted for armour plate would not be most suitable for trench hats, and spring steel would not be good for parts of truck bodies. Notwithstanding the many elements and combinations from which to choose in making alloy steel, there are certain guiding principles, based upon metallurgical research, which serve to lead the steel maker into the right field, so that the final choice for a particular requirement may be made from possibly six rather than a hundred compositions.

Alloy steels are produced mainly by two methods—the open hearth and the electric furnace, the latter accounting for approximately 20 percent of the tonnage. Sometimes economic and sometimes metallurgical conditions dictate the choice of the process, but in certain instances the electric furnace must be used. For example, the highly alloyed stainless steels, containing usually more than 12 percent chromium, with or without nickel, are always made by the electric-furnace process. This is generally true, also, of the high-grade tool steels which are highly alloyed with such metals as chromium and tungsten.

Metallurgical research serves the field of alloy steels not only by searching out and deciding upon suitabe compositions or formulas, but also by devising proper methods of subsequent heat treatment, so that full advantage may be taken of the inherent qualities of the various grades. Different procedures may be necessary to accentuate different characteristics. For instance, in one case ductility may be the principal requirement, in another hardness is more important, in a third the resistance to shock or impact, and so on through the long list of specifications with which the steel maker is confronted.

The uses to which alloy steels are put are legion. One of the largest consumers is the automobile industry, because shafts, springs, connecting rods, valves, gears, axles, and other important parts are made of such materials. High-speed tool steels constitute another class of alloy steel used by practically all of the industries. In the manufacture of electrical equipment such as generators, motors, and transformers, silicon alloy steel is a prime necessity, and its quality profoundly influences the economy with which electric power may be used. Armour plate is a very special grade of heat-treated alloy steel. The same is true for turbine blades, propeller shafts, axles for electric locomotives, parts of airplanes, tractor shoes, harrow disks, tubes for superheaters and petroleum stills, and steam piping for modern naval vessels. Workable alloy steels of high strength and resistance to corrosion are now available for the construction of lightweight freight cars, and are being utilized for such purposes in the interest of ultimate economy. Parts of bridges are built of alloy structural steel. In the chemical and foodstuffs industries, the stainless steels are performing signal service, and in another direction the special heat-resistant steels are making new processes possible. All of the foregoing illustrate, but only in part, the extent to which industrial activities are aided by the application of alloy steel.

In view of the service rendered by these materials, it is evident that both producers and consumers are deeply interested in them. New processes and products are made possible by their availability, and they support in a multitude of ways the services of their cheaper relatives, the carbon steels.

Developments in the field of alloy steels are usually based upon systematic technical research, and may result from the efforts of either individuals or groups of individuals. It is almost impossible to dissociate most of the significant modern advances from the united efforts of the industries and their technologists, regardless of whether or not a composition or a process constitutes patentable invention.

R. E. ZIMMERMAN.

ALLOY OF METALS

QUESTIONS TO BE ASKED BY CHAIRMAN AND MEMBERS OF THE COMMITTEE ON PATENTS TO WITNESSES APPEARING BEFORE THE SPECIAL HEARING

1 (By the chairman). I am informed that the earliest use of alloys was by the ancient Greeks of the time of Homer, and that bronze was the metal in which, with copper as a base, the Greeks, by the addition of other meals, produced a new metal more suitable for arms and armor than copper in its natural state. With this as a start, other alloys were used as metals, and during the succeeding centuries followed still later by coating of metals for appearance sake, by electroplating.

In the last few decades, the amalgamation of various metals used as alloys with basic metals, notably with iron, has progressed to such a state that the present might be called the age of alloys.

2. Will you be good enough to give us a brief summary of the alloys used in combination with basic metals to improve the utility of a given metal. You might start with iron and steel. Then copper, tin, zinc, silver, gold, and other metals, with particular emphasis on such metals which are alloyed, used in the industrial arts and in household ware.

3. (NOTE.—After witness has finished his answer to number 2, ask him if the control of the metal used as alloy through ownership of its source of production, or control of the patent for process enables the owner of the source of production, or the owner of the process patent, to set up a monopoly extralegal from that granted by the control of source of supply, or control of basic patent.)

Will you give us such information as you may have concerning aluminum and duralumin? The committee would like to know particularly what elements are used to (*a*) reduce the degradation of aluminum by exposure to salt air or salt water (*b*) harden aluminum by use of any alloy, or (*c*) other metals commercially used for changing the nature of basic aluminum.

4. What proportion of the total output of basic aluminum is outside of the United States of America? How much bauxite is produced in the United States?

5. Does the American Aluminum Co. have a virtual monopoly of plate and ingot aluminum, and if so, how is this monopoly sustained, since whatever patents Hall may have have developed or acquired have now expired.

(NOTE.—Depending upon the answers of the witness, questions may be asked according to his testimony.)

6. What can you tell us about alloys used with copper? And do you know of any patents granted for the process of such alloys that give control to individuals or organizations of the resultant alloyed product?

7. What can you tell us about tin used as an alloy or plating?

8. What can you tell us about zinc used as an alloy or plating?

9. Besides its use for plating other metals and for flat and hollow domestic ware, is silver used as an alloy with any other metal. Please explain just what is German silver.

10. What proportion of control of the output of any alloyed metal is obtained (*a*) by control of source of supply; (*b*) by secret formula; (*c*) by process patents.

11. Please name and describe the new metals which have been developed through the use of alloys to form metals used in the industries which are not found in the state of nature?

LIBRARY OF CONGRESS,
Washington, December 2, 1935.

Hon. W. D. MCFARLANE. M. C.,
Fifth Avenue Hotel, New York City.

DEAR MR. MCFARLANE: We enclose herewith the requested study of "Patent Pools" which we promised on Saturday to send today.

Very truly yours,

FRED. W. ASHLEY,
Chief Assistant Librarian
(*For the Librarian*).

PATENT POOLS

Conflict of patent rights and the desire to avoid litigation has led to the formation of patent pools in a number of large industries. These pools take

Digitized by Google

a variety of forms; the simplest type is an agreement between two or more companies to permit the use of all patents held by any of them. Such a combination was formed by the Singer Sewing Machine Co., Howe and others in 1856, and continued until the expiration of the patents in 1877. The International Harvester Co., formed in 1902, was a combination of five manufacturing companies.[1]

The Standard Oil Co. of Indiana, the Galena Signal Oil Co. of Texas, and the Standard Oil Co. of New Jersey each developed methods of cracking gasoline independently and were involved in litigation when they came to an agreement whereby each company recognized the validity of the patents held by the other, and granted the other irrevocable and nonexclusive license to use its patents in its plants or those of subsidiary companies.[2]

The purchase of a competitor has offered an effective means of acquiring patent rights and of eliminating competition. This was the plan employed by the National Cash Register Co., which was able by this and other means to eliminate 153 of its 158 competitors in a period of 15 years. The predominance of the Singer Sewing Machine Co. was owing to the purchase of a competing company.[3]

Companies may form a merger in order to acquire rights to patents held by others. The Republic Iron & Steel Co. merged with the Steel & Tubes Corporation in order to get an electric welding process held by the latter. The National Rubber Machinery Co. is a merger of five companies formed for the purpose of giving the corporation rights to patents held by one company.[4]

It is a common practice for a company holding patents to lease the patents to other manufacturing companies on a royalty basis. The terms of such licenses often include an agreement not to bring suit for infringement of patents or for loss of profits owing to such alleged infringements during the term of the license. The manufacture of chromium ware is conducted under license from the owner of the patent who is not, himself, a manufacturer. The American Rolling Mill Co. has licensed many companies to make metal sheets by its patented mechanical process. The Onyx Hosiery Co. licensed about 50 companies to use its patent for the pointex heel. Glass manufacturing and many of the decorative arts are carried on under the license system.[5] Lieutenant Colonel McMullen, judge advocate, United States Army, stated on February 20, 1928, before the Senate Commitee on Patents that the United States Government is licensed for the use of a thousand radio patents.[6]

Another form of license directly related to patent pools is the licensing of patented machines. The United Shoe Machinery Co. did not sell its machines to shoe manufacturers but leased them on such terms as to maintain a virtual monopoly in the manufacture of shoe machinery. Under the terms of the lease the manufacturer was required to lease all the numerous machines used in the manufacture of shoes from the United Shoe Machinery Co. While this was not an absolute condition of the lease, manufacturers who did lease all their machines were given so much more favorable terms that it amounted to a monopoly, and an injunction against the company was obtained in the United States Supreme Court in 1922.[7]

Motion-picture equipment is leased by the Electrical Research Products Corporation, a subsidiary of the American Telephone & Telegraph Co. The contract of lease binds the theater operator not to use the equipment of any other manufacturer during the terms of the lease, which is for 10 years. The company holds title to the equipment while the operator pays the taxes and assumes liability for any injury to workmen employed in installing or operating the equipment.[8]

Suit for injunction was brought by the United States against the International Business Machine Corporation and others on March 26, 1932. The

companies involved in the suit are charged with leasing machines at prices agreed upon and of requiring the lessees not to use any tabulating cards not purchased from the company leasing the machine.[9]

Another type of patent pool is formed through trade associations. One of the earliest of these was the Selden Patent Association, which was succeeded by the National Automobile Chamber of Commerce in 1914. The patent pool covers all patent rights to automobiles but not designs or accessories. No royalties are paid except when they are due a company not a member of the association. The patent pool has not given any manufacturer an advantage over the others. Each company turned into the pool about as many patents as it received.[10]

The Manufacturers' Aircraft Association was formed on the advice of the War and Navy Departments to administer patents covering airplane manufacture. The industry was in such confusion that the Government was unable to supply its needs for war without such an arrangement. Attorney General T. W. Gregory, in a letter of October 6, 1917, informed the Secretary of War that the Aircraft Association and the license agreements under which it operated were not in contravention of the antitrust laws. Without the license agreement it was almost impossible for any company to manufacture an airplane without infringing some patent.[11]

The Vacuum Cleaner Manufacturers' Association was organized in 1919 by manufacturers licensed under the Kenney patent. When this basic patent expired in 1924 the members of the association decided to pool their other patents. The plan was never carried out.[12]

The most complex form of patent pool is the holding company whose function is the holding and leasing of patents. The Iowa Washing Machine Co., formed in 1907, continued to license manufacturers until its basic patents expired in 1921. The National Household Devices Co. was organized by 25 manufacturers of washing machines, as a holding company to lease patents and defend the company from infringement suits. In 1921 this company came into conflict with a similar company, the Maytag Co. The suit ended in a compromise by which all the patents of both companies were pooled.[13]

The Radio Corporation of America was organized in 1919 under a Delaware charter to acquire patents and patent rights by purchase in cash, property, shares, or obligations of the corporation and to act as a selling company for products made under the patents held by it. The formation of this company was an incident in the development of radio communication in this country. The General Electric Co. was about to sell to the Marconi Co. of America, a subsidiary of an English company, one of its basic patents which would have made the British the leaders in radio communication. The Navy Department raised objections to the sale of this patent outside of the United States. The General Electric Co. offered to refuse to sell to the Marconi Co. if the Navy Department would sanction the formation of an American company to buy the Marconi interests in America. Secretary Daniels withheld his consent on the ground that he favored Government ownership and control of radio communication; but the Radio Corporation of America has repeatedly stated that the company was organized with the approval of the Navy Department.[14]

On May 13, 1930, the United States filed a petition in the district court of Delaware charging the Radio Corporation of America with forming a combination in restraint of trade. A consent decree was entered November 21, 1932, by which the agreements between the companies having contracts with the Radio Corporation of America were modified to the satisfaction of the Government.[15]

In defense of patent pools, the argument most often advanced is that under conditions of modern industry with rapid developments and frequent improvements it is impossible to conduct manufacturing without infringing some patent. Moreover, one company may develop one patent but need rights to

Digitized by Google

use patents held by other companies to perfect the invention and put the commodity on the market. Maj. E. H. Armstrong, radio inventor and adviser to the Radio Corporation of America, in his testimony before the Federal Trade Commission stated that it would have been absolutely impossible to manufacture any kind of workable apparatus without the licenses owned by competing companies. Commander E. H. Loftin, who had made a special study of cross-license agreements for the purpose of disclosing their effect upon radio activities of the United States Government, also testified that without access to the patents of rival companies radio apparatus could not have been developed by any one company. One patent by itself may be worthless but in combination with other patents it may be of great value. The necessity of combining patents to meet a war emergency have already been pointed out in the aircraft industry.[16]

Patent pools offer many opportunities for abuse. The alleged protection of patent rights may be made a cover for other practices not related to patents. Contracts for license to use patents often contain provisions not directly related to patents. Price-fixing arrangements and conditions of sales are frequently included in such license agreements. A patent monopoly often exists after the patents have expired. This was true of the International Harvester Co. The Singer Sewing Machine Co. continued its virtual monopoly in the manufacture of sewing machines after its patents had expired. Agreements for the division of territory were included in the Standard Oil Co. contracts and in the General Electric Co.'s foreign contracts though they have since been modified. Patent contracts have been used to cover unpatented articles. Threats for suits for infringement of patents are brought for purpose of intimidation of competitors who cannot afford the cost of defending themselves although they may be certain that their title to their patents is clear. Smaller companies have been forced to take out licenses and pay royalties rather than face the cost of suit. When threats against a company fail, there may be resort to threats against the company's customers. A company may prefer to take out a license rather than lose a valuable customer.[17]

There is considerable difference of opinion as to the effect of patent pools on the price of patented commodities to the consumer. On the one hand it is contended that the high cost of royalties makes sales prices high; on the other it is contended that without patent agreements the cost of constant litigation would eventually be borne by the consumer in higher prices of commodities. Royalties may be regarded by the manufacturer as an insurance against suits, and with this security he can lower his prices and improve his plant. It was found that the airplane manufacturers were selling aircraft at a margin of profit intended to take care of any future infringement suits. The security offered by the pooling of airplane patents permitted the manufacturers to lower their prices. Royalties required by the Aircraft Association were actually lower than those demanded by the Wright-Martin Corporation alone..[18]

Companies operating under American Rolling Mill Co. licenses reduced the price of rolled metal from $6 to $10 a ton. Eleven vacuum-cleaner manufacturers made an average profit of 36.2 percent in 1920, a fact which is attributed to patent monopoly. It was charged that the American Telephone & Telegraph Co. had levied a tribute of upward of $25,000,000 on the theaters for equipment and $50,000,000 for service and inspection, above the cost if they had been able to get their equipment from independent companies.[19]

The organization of a patent pool does not always imply a lessening of competition. Manufacturers who feel that competition is inevitable will adopt a liberal license policy in order to enjoy the royalties. The license system enables the small manufacturer to compete with the large firms because he is privileged to use the best and latest inventions, whereas if he were dependent upon his own patents or those he is able to buy he would be restricted by the amount of capital available for the development of new patents.[20]

Digitized by Google

The General Electric Co. and the Westinghouse Co. were able to eliminate competition in the manufacture of watt-hour meters as long as their patents were valid and there has been no effective competition in that field since the patents expired.[31]

When the patent pool is held by an association of manufacturers, competition can be eliminated by not admitting new members to the association. The Vacuum Cleaner Manufacturers' Association did not admit new members and the only way of acquiring a license under the association patents was to buy out the entire business of a member of the association.[32]

It has been said that the Radio Corporation of America buys up new patents which it does not develop, but which are valuable only as a means of maintaining a monopoly.[33]

The formation of a patent pool in the airplane industry opened the way to free competition by all manufacturers, who had equal use of all patents held by the association on equal terms.[34]

DECEMBER 14, 1935.

HARRY L. HOPKINS,
Works Progress Administrator, Washington, D. C.

DEAR MR. HOPKINS: Your recent interpretation of the Works Progress Administration in terms of increased national wealth prompts my reopening with you an effort at relief organization made by me several years ago.

In December 1933, I wrote the President urging consideration of a relief program for inventors comparable to the one established for artists. I submitted—

1. That inventors as a group represent a considerable percentage of our population.
2. That they are a representative cross section of our population and our occupational activities.
3. That the type of man and mind engaged in this exacting and often discouraging work is of economic value and worth sustaining.
4. That the economic loss of arrested invention may be incalculably great and that while idleness in a depression appears to increase the number of patents, it does bring inconceivable obstacles into the path of serious research and invention.
5. That penury attents the inventor in the same degree that it does the artist, although it is not publicly dramatized.
6. That aside from subsistance, the costs of research, experiment, model building, and patent application far exceed the costs of paint and canvas.
7. That compensation for their labors, i. e., returns from their patents are obstructed by economic pressure, particularly the cost of legal protection.
8. That invention is the fountain of tomorrow's national wealth (your theme). It is invention that releases the potentialities of raw materials, creates new products for the expanding appetite of our consumers, and provides new and productive labor for our people in all the steps required to bring a product from the mine to the sales counter.

My purpose, as you see, is at some variance with the recent recommendation by the Science Advisory Board, which proposed limiting patents with a working tax. This apparently ingenious view of Messrs. Compton, Kettering, etc., would curb inventive effort and put a premium on "soldiering" progress as practiced by big business.

It would be in keeping with the expressed views of the present Government for its agencies to encourage and foster every creative thought that might bring with it new enrichment in the planning of town or house, in transmitting message or experience to the senses, that would increase health and comfort, leisure, and cultural pursuits.

Obviously, for an inventor program under Works Progress Administration there would have to be an administration with its geographic subdivisions and competent administrative boards made up of engineers, heads of technical colleges, and public figures of unquestioned integrity—

1. To provide a hearing for applicants.
2. To select plausable projects.
3. To determine capacity and diligence of applicants for developing the projected inventions.

---

[32] House Furnishings Industry, vol. III, pp. 7–9.
[33] Federal Trade Commission Report, Radio Industry, p. 24.
[34] National Advisory Committee for Aeronautics, Annual Report, 1917, p. 18.

Digitized by Google

4. To determine and assign subsistence means and period to give patent council access to experimental shops, etc.
5. To serve as a central clearing house through which patents would be brought to the attention of potential users in established industry.

I submit, if we believe as Lewis Mumford says, "The age of invention is the age of man", then support and encouragement of the inventor and his labors at this time would contribute some of history's brightest pages in the twentieth century.

Very truly yours,

NATHAN GEORGE HORWITT.

WORKS PROGRESS ADMINISTRATION,
Washington, D. C., December 17, 1935.

MR. NATHAN GEORGE HORWITT,
745 Fifth Avenue, New York.

DEAR MR. HORWITT: Thank you very much for the ideas submitted in your letter of December 14 to Mr. Hopkins.

To receive the fullest consideration for them, I should say they should be submitted to the appropriate congressional committee.

Yours very sincerely,

JACOB BAKER, *Assistant Administrator.*

DEPARTMENT OF COMMERCE,
UNITED STATES PATENT OFFICE,
Washington, December 27, 1935.

MR. NATHAN GEORGE HORWITT,
745 Fifth Avenue, New York City.

DEAR MR. HORWITT: It is suggested, by way of response to your inquiry of December 22, 1935, that you consult Hon. William I. Sirovich, chairman of the Patents Committee of the House of Representatives. Dr. Sirovich's committee has recently conducted important hearings in New York with the purpose of investigating alleged pooling of patents, etc. A number of witnesses were summoned or invited to testify.

Dr. Sirovich is the highest authority on the work of his committee and undoubtedly would be glad to receive from you any facts or recommendations likely to be of assistance to the investigation. He lives at the Fifth Avenue Hotel in New York. It is believed that he can be reached in New York this week. He had not yet returned to his hotel in Washington when called there today.

Very cordially,

GRATTAN KERANS,
Administrative Assistant to the Commissioner.

(This letter leading to my phone call.)

QUESTIONNAIRE TO BE SENT TO CURTISS-WRIGHT CORPORATION, R. C. A. BUILDING, ROCKEFELLER CENTER, NEW YORK, N. Y. IN RE: H. R. 4523

1. Give date and place of incorporation.
2. Furnish list of companies entering into the Curtiss-Wirght combine.
3. Furnish copy of organization plan submitted to the stockholders of the various companies desired as members of the combine.
4. Names and addresses of the organization group.
5. Furnish business affiliations of the individuals forming the organization group.
6. What was the paid-in capital as of the date of organization? (Not the paid-in capital of the individual companies being merged.)
7. What banks were represented in the organization group?
8. What financial companies other than banks were represented in the organization group?
9. Furnish copy of public statement issued at the formal incorporation of the Curtiss-Wright Corporation in 1929.

Digitized by Google

10. Is the Curtiss-Wright Corporation essentially a holding company or is it a merger of the companies entering into the group?

11. Was the statement published in the Wall Street Journal of August 13, 1929, and attributed to the officers of the company, correct in stating that companies entering into the Curtiss-Wright Corporation would not be pooled but each would retain its own financial set-up?

12. What assets, if any, have been transferred from the individual companies to the Curtiss-Wright Corporation?

13. Furnish names and addresses of stockholders of the Curtiss-Wright Corporation, owning 5,000 or more shares of stock of the corporation.

14. What part, if any, did the Curtiss Aeroplane & Motor Co. have in the formation of the Manufacturers Aircraft Association?

15. To what extent has the Curtiss-Wright Corporation benefited from the $200 per plane royalty required to be paid into the Manufacturers Aircraft Association?

16. Of what subsidiary companies of the Curtiss-Wright Corporation is F. H. Russell, president of the Manufacturers Aircraft Association—an officer or director?

17. Has the Curtiss-Wright or its subsidiaries opposed the purchase and pooling of airplane patents by the Federal Government?

18. What patents, if any, have been secured from individual inventors by the Curtiss-Wright Corporation or subsidiary companies since 1929?

19. Furnish a list of patents belonging to patentees not connected in any way with the Manufacturers Aircraft Association which are being used regularly by the Curtiss-Wright subsidiary companies without the payment of royalties, for the period 1929–35.

20. What amounts, if any, have been paid by the Curtiss-Wright Corporation or its subsidiaries since 1929?

21. What amounts have been paid to the Curtiss-Wright Corporation by the Manufacturers Aircraft Association since 1929?

22. Furnish a list of important inventions or developments, if any, made by the Curtiss-Wright Corporation or its subsidiaries during the past 5 years.

23. Does the Curtiss-Wright Corporation procure patent rights from independent inventors or does it use any patents or devices desired, and trust to the Manufacturers Aircraft Association to defend it from infringement suits?

24. What amounts, if any, have been paid to independent inventors or patentees by the Curtiss-Wright Corporation or its subsidiary companies since 1929?

25. Does the Curtiss-Wright Corporation enter into negotiations or submit bids to Government agencies on airplanes and engines, or are such transactions carried on entirely by the subsidiary companies?

26. To what extent are the operation policies of the subsidiary companies dictated by the Curtiss-Wright Corporation.

27. What percentage of Government contracts are secured by the Curtiss-Wright Corporation, by means of:

(*a*) Competitive bids.

(*b*) Negotiated contracts without competition.

28. Does the Curtiss-Wright Corporation or its subsidiaries arrange with independent inventors for the use of their patents on a royalty basis or purchase such patents outright?

29. On Government contracts does the Curtiss-Wright Corporation or its subsidiaries agree to stand between the Government and any claims for infringement on patents of independent inventors?

30. Has the officers and directors of the subsidiary companies of the Curtiss-Wright Corporation any actual authority in determining the busiuess and operating policies of their respective companies?

31. Are any of the officers or directors of the Curtiss-Wright Corporation or its subsidiaries, officers or directors of the Manufacturers Aircraft Association?

32. Has the Curtiss-Wright Corporation or its subsidiaries and predecessors received the $4,000,000 agreed to be paid to the Curtiss-Aeroplane & Motor Co., and the Wright-Martin Aircraft Corporation, by the Manufacturers Aircraft Association?

33. What is the attitude of the Curtiss-Wright Corporation toward the question of the purchase and pooling of airplane patents by the Government for the general benefit of the public?

34. Would not such an arrangement tend to stimulate the progress of developments in aircraft and aircraft engines?

Digitized by Google

35. Does not the Curtiss-Wright Corporation, and the United Aircraft & Transport Corporation exercise a virtual monopoly of the airplane-engine business in this country?

36. What officers and directors, if any, are former officers of the Army and Navy?

37. Furnish copies of annual reports to stockholders for the period 1929–35, inclusive.

38. Furnish copies of prospectuses prepared and used for the sale of securities of the Curtiss-Wright Corporation since August 9, 1929.

39. Does the Curtiss-Wright Corporation or its subsidiaries have contracts or agreements with foreign countries whereby the airplane patents and developments made by virtue of Government funds, are open to such countries?

40. Does the Curtiss-Wright Corporation operate as a holding company or as an investment trust?

41. If the subsidiary companies forming the Curtiss-Wright Corporation handle their own operations and deal with their finances, what function has the Curtiss-Wright Corporation other than that of an investment trust?

42. Furnish a satement showing present officers and directors of the Curtiss-Wright Corporation and subsidiary companies, and state their business and financial connection.

HARTOL PRODUCTS CORPORATION,
New York, N. Y., March 26, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
Washington, D. C.

(Attention Mr. Edwin Fairfax Naulty, clerk.)

SIR: As president of one of the largest, if not the largest, independent oil-marketing companies of its type in the United States, I should like to outline below briefly a situation which, while of direct interest to this company, is more particularly a matter of such paramount public interest as to require, in my opinion, the careful, thorough, and complete consideration by the Committee on Patents of the House of Representatives, of which you are chairman.

The Ethyl Gasoline Corporation, commonly understood to be owned one-half by the Standard Oil Co. of New Jersey and one-half by the General Motors Corporation through a patent monopoly, exercises absolute control of tetraethyl lead, a product used to control and regulate antiknock value of motor fuels for internal-combustion motors.

I believe such an investigation as I have in mind will disclose that:

(1) Ninety-five percent or more of all the so-called premium motor fuels consumed in the United States contain tetraethyl lead.

(2) That the General Motors Corporation in conjunction with the Standard Oil Co. of New Jersey have for some years progressively changed internal-combustion motor design to require motor fuels of progressively higher antiknock or octane rating, thereby requiring the public to purchase tetraethyl lead compounds in progressively increasing amounts.

(3) That the same group of interests simultaneously dominating the control of certain petroleum-refining patents through the device of the commonly referred to cracking patents pools in the exercise of control of these patents along with control of ethyl franchises discriminate against independent oil refiners and marketers to the unfair advantage of themselves.

(4) That the unreasonable restraint of trade and substantial lessening of free and open competition resulting therefrom:

(*a*) Imposes an inequitable and unfair burden upon the independent units in the industry.

(*b*) Exacts enormous tribute from the public for premium prices ranging from 1 to 4 cents per gallon of motor fuel as purchased by the public directly or by the Federal, State, and other political subdivisions.

(*c*) Eliminates the independent refiner and marketer as bidders on all public contracts for the so-called premium gasolines.

(*d*) Places the successful and efficient operation of aircraft, tanks, and other forms of transport in the interests of national defense in the hands of the Ethyl Gasoline Corporation and its affiliates.

(*e*) Represents interest inimical to the welfare of the United States through possible agreements with foreign governments and foreign interests.

Digitized by Google

(5) That this so-called premium gasoline probably constitutes 80 percent of all gasoline now currently consumed in the United States.

For these and other reasons, I believe it the duty of your committee to hold public hearings on this subject, and I am confident that if you agree and will publicly announce a definite time for such hearings sufficiently in advance of the hearings, say at least 10 days, to permit witnesses from California and Texas and other distant parts of the country to be heard from, sufficient factual data will be developed not only which will astound the country with its very nature but will provide sufficient material for the consideration of your committee and the Congress as to point the way for new and constructive legislation of most decided benefit to the American people.

I have authorized our Washington representative, Mr. John H. Nelson, 721 Southern Building, Washington, D. C., to supply you or obtain for you such further information as may be pertinent to this request for the indicated public hearing.

Respectfully yours,

FRANK C. HART, *President.*

EXCELSIOR SPRINGS, MO., *April 4, 1935.*

Hon. WM. I. SIROVICH,
Congressman, Chairman, Patent Committee.

Commend you your resolution investigate Ethyl Gasoline Corporation; urge you solicit Department of Justice assistance.

DICKEY REFINING CO., *Wichita, Kans.*
SUNRAY OIL CO., *Tulsa, Okla.*
CUSHING REFINING & GASOLINE CO., *Cushing, Okla.*
SHAMROCK OIL & GAS CO., *Amarillo, Tex.*

KILGORE, TEX., *April 5, 1935.*

WILLIAM I. SIROVICH,
Chairman of Committee of Patents, House of Representatives.

With reference to your investigation into the activities of the Ethyl Gasoline Corporation, for your information we have endeavored to obtain a license for the use of ethyl lead compound. The only reply we get from the Ethyl Gasoline Corporation is that they are sold up. We have since found that this is their reply to every refiner that is not fortunate enough to be included in the major group of refiners or as a member of the so-called "patent club." Their activities are, in our opinion, clearly in restraint of trade. They have further so misinformed the public as to the qualities that tetra ethyl lead imparts to gasoline, and even though he can manufacture a product without lead that will be equal in an automobile, we cannot sell in competition with lead since the test that they have developed, namely the Octane number, is misleading in that the Octane number is measured at 900 revolutions per minute of the motor instead of 2,200 revolutions per minute, which is the average turnover of an automobile motor and at which speed the leaded gasoline drops off as compared to a straight-cracked petroleum product.

SOUTHPORT PETROLEUM CO.

UNITED STATES SENATE,
COMMITTEE ON AGRICULTURE AND FORESTRY,
February 7, 1935.

Hon. WM. I. SIROVICH,
Chairman, Committee on Patents,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN: I enclose herewith a letter from one of my close friends in Kansas, Mr. Charles G. Yankey, lawyer of Wichita, Kans., making certain suggestions with reference to amendments to one of your bills.

I would appreciate it very much if you would give consideration to Mr. Yankey's suggestions and let me know what would be your reaction relative to the amendments proposed by him.

Thanking you for this courtesy, I am

Sincerely yours,

GEO. MCGILL.

Senator GEORGE MCGILL,
Washington, D. C.

DEAR SENATOR MCGILL: This will serve to acknowledge receipt of your letter of recent date inclosing communication from Charles G. Yankey, of Wichita, Kans. I note with very keen interest the suggestions set forth in Mr. Yankey's letter and shall avail myself of his information.

With every good and kind wish to you, I beg to remain,

Very sincerely yours,

W. I. SIROVICH.

LAW OFFICES OF YANKEY, OSBORNE & SEARS,
Wichita, Kans., February 4, 1935.

Hon. GEORGE MCGILL,
United States Senate Building,
Washington, D. C.

DEAR SENATOR: I have been advised that the Hon. William I. Sirovich, chairman of the Committee on Patents in the House, has introduced a bill requiring the recording of patent-pool agreements and contracts. I have seen a copy of the bill, and its general purpose is good, though it seems to me that some severer penalty should be attached to it for failure to record the pooling agreements.

It seems to me that the penalties ought to be in the nature of some provision affecting infringement suits of the patents involved or even cancelation of the patents while not recorded in accordance with the requirements of the act. I rather assume that the bill was filed with the idea of introducing the subject matter into Congress so that it could be amended and made effective.

The idea to be accomplished, and which to my mind is a very worthy idea, is that through these pooling arrangements the companies in the pooling arrangements can maintain combinations and trusts, and there is no way to get at this situation, because the arrangements are so secret that you cannot know or find out the true facts. The recording of these instruments will bring to light all of these combinations and will be particularly effective if the right to bring infringement suits was barred upon failure to record these pooling arrangements.

I am also suggesting, at least as a matter worthy of consideration, that, in patent-infringement cases where the patents are owned by pooling combinations, it would be a good, valid defense against infringement that the patents were owned or controlled by combinations in restraint of trade and were maintained for the purpose of creating monopolies.

I am particularly interested in this matter, because, as I told you in the talk that I had with you about the patent situation, particularly in the gasoline-cracking industry, this situation has become a mere racket, and the time has come for some legislation which will straighten up the present racket going on.

I am writing more particularly to call your attention to this and to invite your interest in the general situation. The bill as proposed, in my opinion, does not go far enough. I believe your energetic support of some measure of this kind will meet with hearty approval of your constituents.

I am going to write to Jack Houston along these same lines.

With very kind regards, I am,

Yours truly,

CHAS. G. YANKEY.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., February 8, 1935.

Hon. WILLIAM I. SIROVICH,
House of Representatives, Washington, D. C.

DEAR COLLEAGUE: I am enclosing herewith for your information copy of the letter I received from Mr. Charles G. Yankey, Wichita, Kans., a part of my congressional district, which is self-explanatory.

Digitized by Google

This is the matter about which I spoke to you this morning. I have written Mr. Yankey that I had referred his letter to you for attention when a hearing is held on the bill mentioned in his letter.

Will await your reply in this matter.

Very sincerely yours,

JOHN M. HOUSTON.

LAW OFFICES OF YANKEY, OSBORNE & SEARS,
Wichita, Kans., February 4, 1935.

Hon. JACK HOUSTON,
Member of Congress, House of Representatives Office Building,
Washington, D. C.

DEAR MR. HOUSTON: There has been introduced in the House, which has been referred to the Committee on Patents, a proposed bill entitled: "Providing for the recording of patent-pooling agreements and contracts with the Commissioner of Patents", by Hon. William I. Sirovich, Chairman of the Committee on Patents. This bill is of special interest to the oil business and to the refineries. Its purpose is to bring out from under cover the many patent-pooling agreements by which some of the larger interests are trying to make it tough on the smaller companies.

The bill, in my opinion, is not far-reaching enough and not severe enough in its penalties. As it is now written, it only provides for money penalties for failure to comply with the bill.

The primary object to be reached is to expose combinations and monopolies in restraint of trade, so as to subject them to prosecution and also to give the injured party an opportunity to ascertain these contracts so that private suits for damages can be brought.

I am not writing particularly to make suggestions in regard to the bill but more particularly to enlist your interest and your favorable attitude toward the general purpose sought to be accomplished. I intend to write a letter to the Honorable William I. Sirovich, making some suggestions as to what the bill might contain, but in writing you and in enlisting your support, I believe your activity in this respect would meet with the hearty approval of all of your district interested in the oil business.

The pooling of patents, more particularly those relating to processes of cracking gasoline, have become an instrument by which a regular racket is being perpetrated. The larger companies are interested in these pooling arrangements, and through their united effort it becomes virtually impossible for the smaller companies to defend against alleged infringement, and some legislation with respect to this matter is becoming a very pressing necessity.

I have written Senator McGill enlisting his support. In writing you, as I am, I am not only expressing my own ideas but the ideas of a substantial number of the smaller companies interested in the oil business. With kind regards, I am

Yours truly,

CHAS. G. YANKEY.

FEBRUARY 13, 1935.

Hon. JOHN M. HOUSTON,
House of Representatives, Washington, D. C.

MY DEAR COLLEAGUE: This will serve to acknowledge receipt of your letter of recent date, enclosing a communication from Charles G. Yankey, Wichita, Kans., relative to H. R. 4523.

The Patent Committee will resume hearings on this bill Thursday morning, February 14, and if Mr. Yankey can arrange to appear before the committee, we would be very glad to hear what he has to say. These hearings will doubtless be continued next week. In the event Mr. Yankey cannot appear in person his suggestions shall be given appropriate consideration.

With every good and kind wish to you, I beg to remain,

Very sincerely yours,

W. I. SIROVICH.

GREENLAWN, LONG ISLAND, N. Y.,
February 16, 1935.

Hon. WILLIAM I. SIROVICH,
United States Congress, Washington, D. C.

DEAR SIR: Learning from the press about your interest in airships, I take the liberty of submitting to you for your consideration, and also for the committee headed by you, a blue print and a photograph of a model of the long-range autonomous airship, on the project of which I am working for quite a number of years.

It is my contention that by merely changing the shape of airship's envelope it would be possible to add greatly to its lifting force, which will permit the construction of ships that would be no more like a floating cobweb, readily destroyed by the ordinary wind.

The additional lift in this case would appear merely as a function of speed or motion of the ship through the air, or its byproduct, which in itself would not require any great increase in the power required.

In other words it would mean a more rational use of this engine power, and, with it, generally speaking, of the entire airship, which at present has an almost ridiculously low pay load, as compared with its size and cost, in addition to having an entirely insufficient factor of safety.

Besides this it also has a hundred other improvements in the construction of the ship and its operation, among which is a principle of vacuum or suction anchorage, which is another valuable feature, peculiar to this form of the airship's envelope, which will permit almost entirely to dispense with the ground crew and any other special landing and mooring facilities, the airship having a waterproof outer rigid covering, will become much like an ordinary sea vessel.

Believing that this, my project, has wonderful possibilities, I am submitting it to you, as its development may mean much to the country and its defense, and it might help the Congress in selecting and pursuing the right course in its future policy toward rigid airships.

Very respectfully,

NICHOLAS D. BELL.

(Photographs accompanying letter are on file with committee.)

FEBRUARY 14, 1935.

Congressman SIROVICH,
House Office Building, Washington, D. C.

HONORABLE SIR: Having noticed an item in the newspapers that you were interested in the patent features in connection with the construction of the *Macon*, I am herewith enclosing a copy of a decision of the United States Court of Customs and Patent Appeals, being patent appeal no. 3095, patent calendar no. 84, serial no. 57,586, *Hall* v. *Stahl*. Hall is the American inventor and president of the Hall Engineering & Aircraft Construction Co. Stahl is the German inventor whose claims are owned by the Goodyear-Zeppelin Corporation.

As you will note, the decision sustains Hall's claims to priority rights in the patents involved, which cover thermostatic control of the gas in dirigibles. I have marked in red pencil, some of the most important clauses, both in the majority and minority opinions. You will also note that the German patent claims cover only when the gas bag is empty and full, while the Hall claims cover and record the pressure at all times, and even the dissenting opinion admits that the Hall's device is "admittedly more substantial and probably more accurate."

The probabilities are that the Goodyear-Zeppelin Corporation used the patents and devices which they claimed to own, i. e., the Stahl devices. At least, we are led to believe that this was done in the construction of the *Akron* and *Macon*. Why was this when there are admittedly more substantial and more accurate devices obtainable?

Digitized by Google

I am informed that in the argument before the court in the case above referred to, the attorneys for the Goodyear Co. argued that their company should be granted priority as they were a going concern and should be permit ed to use these Hall devices. That could easily be arranged for and should have been required in the specifications. During the building of the *Akron*, bo h the Goodyear-Zeppelin Corporation and the Navy Department were notified that the Hall Engineering & Aircraft Construction Co. held such paten s, among others. I also enclose herewith a partial list of patents held by said company.

Hoping that this may be of some assistance to you, I am,

Yours very truly,

HENRY J. MERDINK,
Attorney for Hall Engineering & Aircraft Construction Co.

United States Court of Customs and Patent Appeals. Charles S. Hall, appellant, v. *Karl Stahl, appellee.* October term, 1932, Patent Appeal No. 3095, Patent Cal. No. 84, Serial No. 57586

GRAHAM, Presiding Judge: An interference proceeding was instituted and declared by the United States Patent Office on December 1, 1928, between the patent of the appellant, Charles S. Hall, no. 1682961, of September 4, 1928, granted on an application filed March 6, 1926, and the application of the appellee, Karl Stahl, filed June 28, 1920. The subject matter at issue is improvements in mechanism for recording the pressure and volume of gas cells in lighter-than-air aircraft, of the type ordinarily known as rigid or semirigid. There are two counts in the interference, which are as follows:

"1. An aircraft having a gas-holding compartment therein, automatic pressure responsive means associated with said compartment, a station remote from said means and electrically operated means at said station connected with said first-mentioned means for indicating the pressure in said compartment.

"2. An aircraft having a gas-holding compartment therein, said compartment, including a movable portion, a member automatically responsive to movement of said portion, a station remote from said member and electrically operated

Digitized by Google

means at said station connected with said member for indicating the changes in volume of said compartment."

These correspond with claims 16 and 17 of the Hall patent, and are copied therefrom by the appellee.

The appellee claims the benefit of the so-called Nolan Act of March 3, 1921, 41 Stat. 1313, by virtue of a patent granted to him in Germany on August 8, 1918, and published there on March 28, 1922, covering the same subject matter. If he is given this date, his disclosure antedates that of Hall by a considerable period.

After the declaration of the interference, Stahl moved to dissolve, claiming a statutory bar because of his German patent aforesaid, and moved for judgment. Hall also moved to dissolve on several grounds, to wit: On unpatentability of the Stahl disclosure, inoperativeness, and because the counts of the interference to not read upon the Stahl disclosure.

The law examiner denied both motions. An order to show cause was thereupon entered, and the party, Hall, abiding by his motion, a decision awarding priority to Stahl was rendered by the examiner of interferences, which, on appeal to the Board of Appeals, was affirmed as to count 1 and reversed as to count 2. A request for reconsideration was filed by Stahl, and, upon reconsideration, the Board of Appeals changed its decision and awarded priority to Stahl on both counts. In this decision the board held that both counts of the interference read upon the Stahl disclosure. Hall has brought the matter here, and urges, in this court, that the Board of Appeals was in error in holding that the counts of the interference read upon the Stahl disclosure. This seems to be the only question involved.

Hall's disclosure shows an outside frame, with an interior rigid gas container attached to said outside frame. The bottom of this gas container is vertically movable, and is so arranged, with flexible gas-proof fabric connections, that, as the volume of gas in the gas container varies, the bottom portion will rise and fall accordingly. As the volume decreases, the bottom will rise; as it increases it will be lowered, and these successive changes in volume are indicated by means of electrical connections on an indicator in the pilot's car, so that, at all times, the pilot is able to observe the exact condition of the volume of gas in his gas container.

There is also arranged within the gas container a pressure actuated diaphragm, connected with which is an operating rod. By means of this operating rod, electrical contacts are made, and the changes in pressure within the gas container are shown on an indicator in the pilot's car. The pressure diaphragm is so arranged that any change in the pressure of the gas in the container is recorded automatically. By this means, the pilot is constantly advised of the pressure within his gas container.

There is no doubt or uncertainty of the meaning of these counts, as applied to Hall's disclosure. Hall provides a means whereby the pilot may, at all times, be advised of the state of pressure and volume of his gas.

Stahl's application, and the showing made by his drawings and specifications, are, to a considerable degree, ambiguous. The foreign patent upon which he relies cannot be aided by presumption or implication, but can only be given weight according to the matters which are therein actually disclosed. *In re Gillam*, 17 C. C. P. A. (Patents) 877, 37 F. (2d) 959; *In re Dann*, 18 C. C. P. A. (Patents) 1031, 47 F. (2d) 356.

Stahl shows the round rigid frame of an airship, within which is shown a flexible bag or gas container. Whether the gas bag is attached to the rigid frame or not, does not appear. It also is now shown whether the gas container is elastic or not. Stahl's drawings are as follows:

Stahl provides a method of recording volume by means of a wire dependent from the point a2 of his gas container. This wire passes over a series of pulleys to an indicator in the pilot's car, where it is supposed to register the volume of gas in the gas container. Stahl's pressure recording device is a plate which, by pressure thereon, operates certain electrical contacts, and by which a bell, or alarm, is sounded in the pilot's car. Neither the specification nor drawings are explicit as to the location of this pressure recording plate. It seems probable, from figure 1 and from appellee's specification, that this plate is located in the bottom of the rigid frame of the airship between the frame and the gas container. Stahl admits, by his statements in connection with his amendment of July 19, 1931, the following:

Digitized by Google

"* * * Although this movement is transferred unto the plate of the indicating device by pressure, there is no registration of variations in pressure, but merely of variation of form, the gas bag on coming to bear unto the plate causing a contact to be closed, thus indicating the moment where the gas bag is 'full.'"

It is also manifest, from his specification, that Stahl does not pretend to give the various degrees of pressure within his gas container from time to time, but only provides such apparatus as will indicate when the bag is full and bears against the pressure plate. He states, in his specification, that "the transmission by means of the plate takes place only in the case of a completely charged cell, when it permits a careful supervision of its condition."

He also states that his device will record "the excess pressure", and this seems to be the entire object of his pressure-indicating means.

In this respect, as has been noted, whether the device will or will not record excess pressure is entirely conjectural, as the airship moves and inclines from side to side, and it is quite apparent that such pressure on the plate will vary according to the weight of the gas container which rests upon it.

As to the volume-registering device, it is quite apparent, from Stahl's specification, that he does not expect this device to register all changes of volume in his gas container, but only "certain variations of form." This device also apparently is intended to advise the pilot or operator when the bag is full of gas, because it is stated: "In its deepest position, which corresponds to the taut condition of the cell the weight E closes a switch *n* of an electric circuit, thereby operating an alarm."

Here, again, the operation of this device must be conjectural. Whether the bag or gas container, when deflated, will cause the tip a2 to be lowered, and thus lower the indicating device, is uncertain, and depends, to a considerable degree, upon the fixation of the gas bag in the rigid frame. Even the tribunals of the Patent Office were somewhat at a loss to appreciate just what effect would be caused by a filling or deflation of this gas container, so far as the recording is concerned. This condition also must certainly be influenced by the oscillations of the gas container, and of its fabric, as the aircraft moves through the air.

The most that can be said for the Stahl disclosure, as it appears to the court, is that he has provided means by which the pilot or operator may be warned of certain conditions at what may be deemed the most important time, viz, of full pressure and complete inflation or deflation of the gas container.

As we view it, the counts of the interference, while given their broadest possible construction, if ambiguous, must be read in the light of Hall's patent. Stahl contends that the counts, when reasonably read, are satisfied by a disclosure which shows that the pressure and volume of the gas containers are shown at certain critical or essential periods. On the other hand, Hall contends that the counts ought to be so read as to require a construction that such pressure and volume recording means show the pressure and volume at all times.

After carefully considering the disclosures involved, we are of the opinion that the appellant's contentions on this subject should be upheld. Count 1, it will be observed, calls for "automatic pressure responsive means", connected with the gas container for indicating "the pressure" in the compartment. It will be observed the count states *the* pressure, and not merely *pressure*. This language, to our minds, means a device for recording the pressure at all times. We are unable to conclude that this language is satisfied by a structure which at one possible time, which may or may not occur, according to conditions, records pressure. Especially is this true in view of the disclosure in Hall's patent, where all variations in pressure are recorded.

Count 2 also recites that the gas compartment includes a "movable portion" and a member automatically responsive to the movement of this portion. This language might be satisfied by the gas bag of Stahl, the lower end of which will move upward or downward, or from side to side, according to conditions. However, the succeeding language of the count recites that this automatic means will indicate "the changes in volume of said compartment." Here, again, we find the language *the changes*, and not *a change*.

We cannot escape the conclusion that this language intends a device which will indicate, not along the instant when the bag becomes full and taut, but other changes, and manifestly such changes as occur from time to time in the inflation or deflation of the gas container. This is essential knowledge for

Digitized by Google

the operator to possess. It is stated in Stahl's specification: "For this reason, it is of great importance for the pilot to be *constantly* informed with regard to the changing condition of the gas-cells." (Italics ours.)

Being of opinion that the counts of the interference to not read upon Stahl's disclosure, the decision of the Board of Appeals must be, and it is hereby, reversed.

Reversed.

United States Court of Customs and Patent Appeals. *Charles S. Hall, appellant, v. Karl Stahl, appellee.* October term, 1932, Patent Appeal No. 3095, Patent Calendar No. 84, Serial No. 57,586

BLAND, J., Dissenting.

This interference involves the mode of operation of a highly technical indicating device used on aircraft and balloons. It is not a subject matter with which there is much familiarity except by those skilled in the art. The opinion of the majority reverses the concurring decisions of the tribunals below upon highly technical questions passed upon by such tribunals.

The structures of the two contending parties, while they accomplish substantially the same result (which is called for in the counts) do it by entirely different methods. No doubt appellant has been allowed, or is entitled to the allowance of, a number of claims directed to his specific structure. In the two counts involved he has broadly asked for more than he is entitled to because, in my judgment, the broad subject matter of the counts is sufficiently disclosed in the application of the first inventor.

The majority opinion states that the Stahl application is ambiguous. It may be ambiguous or it may totally fail to disclose certain features not concerned with the involved counts, some of which features have been suggested in the opinion of the majority. Concerning the Stahl disclosure the majority opinion states:

"It is also manifest, from his specification, that Stahl does not pretend to give the various degrees of pressure within his gas container from time to time, but only provides such apparatus as will indicate when the bag is full and bears against the pressure plate. He states, in his specification, that 'The transmission by means of the plate takes place only in the case of a completely charged cell, when it permits a careful supervision of its condition.'

* * * * * * *

"This device also apparently is intended to advise the pilot or operator when the bag is full of gas, because it is stated: 'In its deepest position, which corresponds to the taut condition of the cell, the weight E closes a switch *n* of an electric circuit, thereby operating an alarm.'

"Here, again, the operation of this device must be conjectural. *Whether the bag or gas container, when deflated, will cause the tip a2 to be lowered, and thus lower the indicating device, is uncertain, and depends, to a considerable degree upon the fixation of the gas bag in the rigid frame.* Even the tribunals of the Patent Office were somewhat at a loss to appreciate just what effect would be caused by a filling or deflation of this gas container, so far as the recording is concerned. This condition also must certainly be influenced by the oscillations of the gas container, and of its fabric, as the aircraft moves through the air." (Italics mine.)

It is stated by the applicant Stahl in substance that the lower part of the bag to which the wire is attached will move up and down depending on the degree of inflation of depression of the gas bag. The Patent Office tribunals concurred in this view, but the majority opinion is to the effect that this is "conjectural." The device of Hall, although admittedly *more substantial* and *probably more accurate* in its reaction to the *pressure* in the gas bag, nevertheless moves up and down in proportion to such pressure.

Again, the following is found in the majority opinion:

"* * * Stahl contends that the counts, when reasonably read, are satisfied by a disclosure which shows that the pressure and volume of the gas containers are shown at certain critical or essential periods. On the other hand, Hall contends that the counts ought to be so read as to require a construction that such pressure and volume recording means show the pressure and volume at all times.

"After carefully considering the disclosures involved, we are of the opinion that the appellant's contentions on this subject should be upheld, Count 1, it will be observed, calls for "automatic pressure responsive means", connected

Digitized by Google

with the gas container for indicating "the pressure" in the compartment. It will be observed the count states *the* pressure, and not merely *pressure*. This language, to our minds, means a device for recording the pressure at all times. We are unable to conclude that this language is satisfied by a structure which at one possible time, which may or may not occur, according to conditions, records pressure. Especially is this true in view of the disclosure in Hall's patent, where all variations in pressure are recorded." (Italics quoted.)

In my view the above quoted part of the majority opinion involves error. The counts do not call for a means which will indicate a pressure *at all times*, although I am not satisfied that it will not do so. To say the least, it cannot be denied that there are times, during the inflation and deflation of a gas bag, that the Stahl device will indicate the condition of the bag by sounding an alarm or otherwise, as is shown in the application. It seems obvious that at such times it will indicate the pressure or lack of pressure occasioned by such inflation or deflation, and that the volume of the compartment occupied by the gas will thereby be indicated.

To invent a device which at any critical time during such process could cause an alarm bell to right, and thus indicate the gas pressure or the volume of the compartment taken up by the gas, would be a useful invention and would satisfy the counts at issue.

With due respect for the views of the majority, I know of no decision, either by the Patent Office or by any court, which gives the importance to the word "the" that is given to it by the majority. In effect, the majority holds that the statement in the count "indicating the pressure" is equivalent to a statement such as "indicting all of the pressure all of the time." This conclusion, I think, the majority is not warranted in making.

If the Stahl application does not disclose the subject matter of the counts involved, it would be difficult to state what patentable subject matter it does disclose. The effect, therefore, of the decision of the majority is to hold that appellee's application and German patent would be invalid. In this holding, I do not wish to participate.

Hatfield, J., concurs with the dissenting opinion.

SINGMASTER & BREYER,
METALLURGISTS AND CHEMICAL ENGINEERS,
420 Lexington Avenue, New York, April 19, 1935.

Hon. WM. I. SIROVICH,
United States House of Representatives,
Washington, D. C.

DEAR MR. SIROVICH: Thanks for your letter of the 17th, and the accompaning record of the hearings that have been held on H. R. 4523. My interest in this matter is disclosed in the attached tear-out from the American Paint Journal, which should interest you.

The 1,500 or more medium- and small-sized paint companies in the United States generally applaud the position, on this matter, taken by Beck, Koller, and set forth in the attached copy of their house organ, "By Gum."

Yours very truly,

FRANK G. BREYER.

BREYER COMMENTS ON PENDING ALKYD RESIN LITIGATION

EDITOR, AMERICAN PAINT JOURNAL:

A patent suit of great interest to all paint, varnish, and lacquer manufacturers is scheduled to be tried in Brooklyn next month before the Federal Court for the Eastern District of New York. The General Electric Co. is suing the Paramet Chemical Co. for infringement of the Kienle Patent No. 1,893,873.

The Kienle patent is one of a group of patents which have been pooled by General Electric, du Pont, American Cyanamid, and Ellis Foster. The pooled patents are the basis for a patent-license plan covering modified alkyd resins, which is similar in many respects to the licensing agreement which du Pont has established under the Duco patents for low viscosity nitrocellulose lacquers.

Mr. Charles Neave, assisted by Mr. Maxwell Barus, of Fish, Richardson & Neave, who tried the *Duco case* for du Pont, will handle this case for General Electric. Mr. George F. Scull and Mr. Newton A. Burgess, of Gifford, Scull & Burgess, will represent Paramet. Mr. William M. Grosvenor, assisted by

Digitized by Google

Mr. Glenn Pickard, are General Electric's technical experts. Mr. Charles L. Mantell has been retained for this purpose by Paramet.

The Kienle patent is only one of a number of patents in this field, the commercial development of which has been the result of contributions by many people. Besides determining the validity or invalidity of the Kienle patent, the trial and decision in this suit will most likely determine the scope of the patent, that is, whether it is sufficiently broad and sufficiently basic to control present-day manufacture and sale of alkyd resins and paints, varnishes, and lacquers, made with alkyd resins.

Coming so soon after the settlement of the *Duco case*, the outcome of the alkyd resin litigation will have an important effect in determining the further development of the paint industry. If the Kienle patent is sustained or a settlement favorable to the patent is effected, another important group of paint products may be controlled by patents, and those paint manufacturers who in the past have been satisfied to let others develop their raw materials while they concentrated their own attention on formulating and selling will find their activities further restricted. The natural result may well be the consolidation of smaller companies into groups large enough to develop their own new raw materials and to bargain on an equal basis with other large, combined raw-material and paint-manufacturing competitors.

Those interested in patent law will also watch this case closely, since it is likely to throw further light upon the relative importance of technical and legal points as compared with commercial development and success in patent litigation. This was the principal point involved in the *Duco case*, which was settled without a decision from the Supreme Court.

The case may also develop a considerable political importance since, as pointed out, its decision will have a powerful influence in determining whether the paint industry will remain, as at present, largely decentralized and composed of a great number of moderate- to small-sized, independent companies, or whether it will be concentrated in a few large groups. The tendency toward concentration of business into large units is causing some concern and has been the subject of considerable discussion in public print. The Federal Trade Commission has already asked Congress for power to stop the concentration of American business in the hands of large corporations.

SINGMASTER & BREYER.

NEW YORK, *January 9, 1935.*

PATENTS

Are they serving, as was intended, as protectors of individual development? Or have they degenerated to a mere method by which the strong are lawfully enabled to inflict hardships on the weak?

Does patent litigation, often a case of the large against the small or many against one, represent the modern attitude of the broad and fair-minded business executive? Does it express his feeling toward his fellow man? Or is it the culmination of a cleverly conceived plot * * * the brainchild of a legal mind * * * mentioned with malice aforethought, agitated through selfishness, and executed primarily for private financial gain?

We wonder.

It so happens that quite an imposing list of patents are registered under the Beck-Koller name, but this institution is inclined to look upon its registrations only as certificates of achievement and protectors of its customers—never as weapons with which to attack—or stumbling blocks to be placed in the path of progress.

THE SHENANDOAH, AKRON, AND MACON DISASTERS

MILWAUKEE JOURNAL,
Milwaukee, Wis.

DEAR SIR: Since you published my letter suggesting that the hydrochloric acid of salt sea air might have damaged the aluminum alloy structure of the

Digitized by Google

Macon, causing the fatigue mentioned by Lieutenant Bolster; I received reply from Department of Aeronautics of the Navy Department, stating that careful tests of the metal had been conducted in the design and construction of the dirigibles, and citing that the *Graf Zeppelin* and *Los Angeles* had stood up for a considerable time as evidence that the metal was safe. These two dirigibles were both of German production, and in the China Weekly Review of February 23, last, a Japanese naval commander, who made the transpacific trip in the *Graf*, was quoted as being sorry for the United States of America in the loss of the *Macon*, stating that Germany was more careful in the construction of their dirigibles, evidently, than the United States of America, and that the *Graf* had made 50 trips between Germany and South America, and that Japan is preparing to import German dirigibles to commence commercial aviation. Brig. Gen. William Mitchell, testifying before the House Patents Committee (on the very same day that the Japanese naval commander made his statement, Feb. 14), strongly supported the argument for dirigibles, saying that "with a fleet of 50 Zeppelins properly manned and equipped, we could go straight to any Asiatic power and destroy it."

I have noticed in a recent news reel that the *Los Angeles* has been taken out of its hangar for a long voyage to nowhere. It is to be subjected to the elements to determine its resistance to weathering. I suggest it should be moored close to the sea to get the effect of the salt air.

There is one thing to be said for dirigible construction, it requires so much aluminum that the purchase has a beneficial effect on the aluminum market.

It is my inexpert opinion that, if those aeronautical experts connected with the construction and operation of heavier-than-air ships, felt free to voice their opinion of the fighting efficiency of the dirigibles, they would state that—

1. Dirigibles are only effective for surprise attacks at night, and the German attacks on London during the World War did not cause much harm except to the morale of the folks at home.

2. They are so slow compared to planes, and offer such large targets that they are helpless against modern plane attacks; even a war ship might plug one with its largest rifles.

3. The loss of men and equipment, including aeronautical experts, and the huge monetary loss due to the destruction of a dirigible by one vital hit would constitute great damage to the morale of the owners.

4. While able to travel great distances, the delicacy of its buoyancy adjustment is such that the dropping of several bombs sends the dirigible upward. It must release valuable gas to maintain its effective range.

A very illuminating article in the Atlantic for March, entitled "Breath of Life", by Stewart, explains the physical mechanism by which a fish maintains its depth in water. If the fish starts to go up, the tendency to rise is increased, and if it starts down, the tendency to descend is increased. It is the same with a dirigible.

In regard to the *Graf ueppelin*, I think that Dr. Eckener would be more appropriately named "Luckner." I wonder if Lloyd's offers reasonable rates of insurance on the lives of its passengers. That ship was nearly lost in the Rhone Valley of France, and again in a storm as it approached our Atlantic seaboard from South America; and I saw motion pictures of the transit of the Atlantic when Eckener Jr., was obliged, at the risk of his life, to attend to repairs to one of its elevating fins on the outside of its envelope, an ocean freight steamer appearing nearby in that gale.

If Japan wishes to buy 50 Zeppelins, as awkward as a white elephant, and playthings of the elements during a tantrum, and Japan has those periodical typhoons in season, I say let her go to it. We have our "balloon busters", as the World War displayed.

Three times, in connection with dirigibles, our pride has gone before a fall. Aeronautical experts of several nations have been killed in order to exploit Zeppelin's hobby.

The coming universal weapon of peace and war is the amphibious airplane, which will soon span the Pacific regularly. Let our enthusiasm be controlled by the weight of sad experience.

Very truly yours,

T. E. Brewster,
1019 East Lyon Street, Milwaukee, Wis.

I saw Knabenshue at Milwaukee State Fair guiding his first dirigible by walking forward and back on bamboo "cat-walk" years ago.

122 FOURTH STREET, SE.,
Washington, D. C., April 4, 1935.

DR. CHARLES G. ABBOT,
Secretary, Smithsonian Institution, Washington, D. C.

DEAR DR. ABBOT: I note a press comment (News) of yesterday which states that a phamplet has been prepared by the Smithsonian Institution which will be placed on the files and in which "students will be able to read the complete history of the early development of aeronautics, with due credit to the Wrights."

I am writing to urge you not to allow any publication to issue which adds to the long list of misleading documents regarding the actual facts of early aviation pioneering in the United States.

The American public, I believe, will not take kindly, when they learn the truth, to the many official and semiofficial publications which favor one or two pioneers through stressing their achievements while neglecting or ignoring their contemporaries' contributions. The completion of past histories has savored strongly of propaganda for certain aviation companies interested in selling stock to the American public.

Naturally your own high sense of honor and justice will lead you to eschew any such propaganda, but the methods and persuasion of the Air Trust proponents are very insidious and, unless we are on our guard, we may contribute to the delay of a real fact-finding effort which should now be made to correct the current mistatements respecting aviation history.

I shall always advocate due recognition for the Wright brothers, and will welcome any corrective statement which, while true to history, will tend to obtain for the Smithsonian Institution the original Wright plane. I believe I was one of those to aid the Wrights materially in the early days when, in 1910, I paid them (by recollection) about $12,000 for their participation in the Harvard-Boston aero meet; never shall I be numbered among their detractors, but I want also to see fair recognition come to Herring, Janin, and Fauber, heroes whose names have not been exploited for private gain as the Air Trust has exploited the name of the Wright brothers and, in doing so, deceived and defrauded the American public more fully than the famous Teapot Dome scandal ever threatened to swindle our people.

Enclosed please find (separate cover) copy of recent hearings on the Air Trust subject, and I ask you before issuing any statemnt as to who made the first actual heavier-than-air flights in the United States to allow me to present the facts of Herring's October 1898 flights. Also, will you join me in asking Congress for a special commission to hear and set out a true and authoritative report on this important matter?

Yours very truly,

JAMES V. MARTIN.

(Copy to Dr. William I. Sirovich, chairman, Patent Committee of the House of Representatives.)

APRIL 12, 1935.

Representative SIROVICH,
Washington, D. C.:

Because of your interest in the patent situation, I am submitting the suggestion that a Federal research institute be created, to educate and maintain "likely" inventors. The institution would own the patents secured by its workers.

Two possible advantages would be (1) the education of brilliant young men who can perform scientific work, and (2) the additional control over corporations.

[Post-Intelligencer, Seattle, Wash., Apr. 12, 1935]

MOVE TO PROBE "PATENT POOLS" HELD ILL-TIMED—DEMAND FOR ARBITRARY CHANGE DECLARED REPRESSIVE; MORE ECONOMIC ACTIVITY URGED

(By M. S. Rukeyser)

NEW YORK, April 11.—America's preeminent need is more economic activity, more employment, more business volume.

Digitized by Google

In that direction lies the remedy for impaired family living standards and for chronic Federal budgetary deficits.

Yet well-meaning politicians and reformers continue to search their brains for arbitrary changes which will repress, rather than expand, business.

At this stage of recuperation, it would be socially desirable to postpone further operations on the body economic.

Even surgical treatment, which may be eminently desirable in itself, can be harmful if given in connection with too many other simultaneous remedies.

When the doctor fails to show restraint and patience in timing, the result is frequently that, though the operation has been successful, the patient dies.

In the spirit of complying with the popular demand for change, a movement has been started to investigate "patent pools" and Representative Sirovich has introduced a bill in Congress providing for the "recording of patent-pool agreements and contracts."

A newly formed organization, the American Economic Foundation, has been launched to give the public "the facts regarding present-day abuses of patent monopolies in restraint of trade" and "to assist and inform public opinion in remedying these abuses, and thus to secure for the American people the economic benefits of science and invention in history."

Doubtless the movement is well intentioned and high-minded, and over the long pull may be advantageous.

But at this juncture it is ill-timed, for, if successful, it would impose fresh barriers on enterprise and would intensify the forces making for hesitation rather than venturesomeness.

It seems to me that it is another expression of the rampant economic Puritanism which thrives on the illusion that business itself is a gigantic racket.

Only the astigmatic would argue that the handling of patents by business, large and small, had been free of abuses, but, if there are still monopolistic patent agreements, which result in unfair practices, there are means of correcting them under the existing antitrust statutes.

It would be a libel on organized business to assume that in the past the American people, with their superior living standards, had not received the "benefits of science and invention in industry."

Imperfect as business operations have been, they have nevertheless resulted in unprecedented productivity, and, in normal times, in an unparalleled diffusion of wealth.

LUBLUM STEEL CO.,
Watervliet, N. Y., February 27, 1935.

Mr. J. A. B. MCELVENEY,
Secretary to Hon. Parker Corning,
Washington, D. C.

DEAR MR. MCELVENEY: Thank you for your letter of February 25 addressed to Mr. Batcheller.

I appreciate very much your getting in touch with Doctor Sirovich about bill H. R. 4523.

The main thing about this bill that we are concerned with is section 2 which provides that copies of agreements can be furnished to anyone at 10 cents per hundred words. This is a feature which would be exceedingly bad as it would provide information to our competitors and others who have no right to the information.

I am attaching herewith a copy of the bill for your convenience.

Yours very truly,

COOLIDGE SHERMAN,
Assistant General Sales Manager.

GEORGE BAEKELAND,
New York, February 26, 1935.

Hon. WILLIAM I. SIROVICH,
United States House of Representatives,
Washington, D. C.

DEAR SIR: Referring to H. R. 4523 relating to registering patent agreements, the bill appears to serve no useful purpose and will create such great confusion as to be practically unworkable.

There may be no valid objection to recording patent agreements and contracts with the Commissioner of Patents, but to attempt to do this in the

Digitized by Google

manner outlined in the proposed bill is a thing which will cause an enormous amount of work and expense on the part of everybody concerned, since it relates to every conceivable kind of license or agreement affecting patents. Nor is it at all clear who in the complicated chain of licenses is to be responsible for keeping the record up to date. Grants of licenses and sublicenses in industry are so numerous and the contracts which convey rights under groups of patents or under patents which may be held in some particular field are so varied, that it seems to me that whoever drew the bill must be largely ignorant of the complexities of modern industry.

Take, for example, the matter of employees' patent contracts, which would seem to fall within the terms of the bill. These cannot specify in advance inventions yet unmade and yet after an initial filing it would appear that they must all be kept currently up to date by subsequent filings.

Very truly yours,

GEORGE BAEKELAND,
Scarsdale, N. Y.

COLGATE-PALMOLIVE-PEET CO.,
105 Hudson Street, Jersey City, N. J., February 14, 1935.

COMMITTEE ON PATENTS,
House of Representatives, Washington, D. C.

(Attention chairman of committee.)

DEAR SIRS: Our attention has been called to H. R. 4523 introduced by Mr. Sirovich and entitled "A bill providing for the recording of patent pooling agreements and contracts with the Commissioner of Patents."

We wish to protest vigorously against this bill. It proposes to throw out a dragnet for all agreements by which rights in a plurality of patented inventions are rendered subject to common ownership, etc., for no other apparent purpose than to enable anybody who chooses to go over the filed copies of such agreements to find out whether among the untold thousands which will have to be filed there are any which might be against the public interest. To put industry to the enormous expense and trouble which would be involved, and to require the disclosure of thousands of confidential business agreements which are perfectly lawful, is an utterly unwarranted method of obtaining the end sought. When we speak of expense we are not merely referring to the filing fees, though that may be no small item, but to the expense in time and money involved in assembling, copying, and certifying the papers required to be filed, and in supplying the supplemental statements which would probably, in most cases, have to accompany them.

Yours very truly,

COLGATE-PALMOLIVE-PEET CO.,
By MASON TROWBRIDGE,
General Counsel.

---

43 SHEFFIELD AVENUE, PAWTUCKET, R. I., *April 1, 1935.*

DR. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
House of Representatives Annex Building, Washington, D. C.

DEAR MR. SIROVICH: I take great pleasure in writing you relating to the Air Trust scandal.

I fully believe that a new investigation should be opened up and brought to a conclusion, not so much to punish the men behind it all, but to right the wrong that still exists and which is unfair to open competition and which has and still is costing the citizens of the United States millions in money and hundreds of lives. The air-trust proved during the World War that our air service was very inefficient, due principally to the fact that they absolutely refused to build machines that were capable of war service.

I also feel that men like Mr. Martin and General Mitchell, also others, have been crucified when they could have rendered valuable service to their country, but the Air Trust did not want men of that type, who would block their way. Lives did not concern those devils who wanted to control the aircraft industry for their greed for gold, and to hell with the people as long as they gained this gold and power, and lo! behold the man that would step in their way,

Digitized by Google

but I am one man who is not afraid of telling the truth concerning the most damnable affair that still exists in our country today.

I do hope you will open a new investigation and fight it to finish before it is too late, because if this wrong is not righted soon it will bring chaos and catastrophe to our Nation in the near future.

The writer held an executive position with the Standard Aircraft Corporation for 5 years and 1 year in an executive capacity with the United States Army marine base at Hoboken, N. J., and in those positions I made a close study of the whole aircraft industry. I knew at the beginning, when we entered the World War, what was wrong with aircraft production and why we could not get production going, but my hands were tied, and when I continued to battle they tried to send me over in the trenches. Why? Because I was doing my duty as an American citizen to get production going and get real ships for the boys instead of those coffins they demanded us to build, when they knew they were useless for war service.

D'Annunzio, of the Italian Air Service, came over here with his personal and 50 expert airplane mechanics to show us how to build the Caproni bomber, a machine very efficient for war service; but, did they want that machine? No! They delayed him in every possible way till he became so disgusted with the whole affair that he told the officials at Washington, "I did not come over here to spend your money." I think he is in New York at the present time.

The Standard Aircraft Corporation was owned and operated by the Japanese and 20 planes were shipped to Japan marked household furniture; they also had access to all airplane plans and also learned how an aircraft plant should be conducted.

If the new investigation should materialize, specific stress should be brought out—why was production delayed and why were men that knew and could produce airplanes muzzled? I do know this, that if the men that I came in contact with during the war were in charge and full power to act, they could not have made such a miscarriage as the air trust made, and I say these facts should be known by the people of this country.

I stand ready to aid you in any way I may be of service, as a witness against the air trust.

I am a poor man, the same as the rest that try to tell the truth, and there should be an appropriation made to pay the expenses of the men that would testify and bring results and who are not afraid to testify for their country.

You have my heartiest wishes for the success of such an undertaking. I am.

Very truly yours,

WILLIAM J. DORMAN.

ANTITRUST LAWS WITH AMENDMENTS, 1890–1923

1. SHERMAN ACT—2. CLAYTON ACT—3. FEDERAL TRADE COMMISSION ACT—4. EXPORT TRADE ACT—5. BANKING CORPORATIONS AUTHORIZED TO DO FOREIGN BANKING BUSINESS

Compiled by Elmer A. Lewis, Superintendent Document Room, House of Representatives

[PUBLIC—No. 190]

AN ACT To protect trade and commerce against unlawful restraints and monopolies

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding five thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be

Digitized by Google

punished by fine not exceeding five thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 3. Every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and any State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding five thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 4. The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 5. Whenever it shall appear to the court before which any proceeding under section four of this act may be pending, that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 6. Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in section one of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law.

SEC. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act, may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

SEC. 8. That the word "person," or "persons," wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country.

Approved, July 2, 1890.

[PUBLIC LAW No. 227—53D CONGRESS]

(Extract from)

SEC. 73. That every combination, conspiracy, trust, agreement, or contract is hereby declared to be contrary to public policy, illegal, and void, when the same is made by or between two or more persons or corporations either of whom is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade, or free competition in lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any manufacture into which such imported article enters or is intended to enter. Every person who is or shall hereafter be engaged in the importation of goods or any commodity from any foreign country in violation of this section of this Act, or who shall combine or conspire with

Digitized by Google

another to violate the same, is guilty of a misdemeanor, and, on conviction thereof in any court of the United States, such person shall be fined in a sum not less than one hundred dollars and not exceeding five thousand dollars, and shall be further punished by imprisonment, in the discretion of the court, for a term not less than three months nor exceeding twelve months.

SEC. 74. That the several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of section seventy-three of this Act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petitions setting forth the case and praying that such violations shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 75. That whenever it shall appear to the court before which any proceeding under the seventy-fourth section of this Act may be pending, that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 76. That any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in section seventy-three of this Act, and being in the course of transportation from one State to another, or to or from a Territory, or the District of Columbia, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law.

SEC. 77. That any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this Act may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

Received by the President, August 15, 1894.

[NOTE BY THE DEPARTMENT OF STATE.—The foregoing act having been presented to the President of the United States for his approval, and not having been returned by him to the house of Congress in which it originated within the time prescribed by the Constitution of the United States, has become a law without his approval.]

[PUBLIC LAW NO. 11—55TH CONGRESS]

(Extract from)

And provided further, That nothing in this Act shall be construed to repeal or in any manner affect the sections numbered seventy-three, seventy-four, seventy-five, seventy-six, and seventy-seven of an Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," which became a law on the twenty-eighth [1] day of August, eighteen hundred and ninety-four.

Approved, July 24, 1897.

[PUBLIC—NO. 82]

AN ACT TO expedite the hearing and determination of suits in equity pending or hereafter brought under the Act of July second, eighteen hundred and ninety, entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," "An Act to regulate commerce," approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that may be hereafter enacted

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in any suit in equity pending or hereafter brought in any circuit court of the United States under the Act

[1] Date is incorrect. It should read August 27, 1894. See Supp. Rev. Stat., vol. 2, p. 334.

Digitized by Google

entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety, "An Act to regulate commerce", approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that hereafter may be enacted, wherein the United States is complainant, the Attorney General may file with the clerk of such court a certificate that, in his opinion, the case is of general public importance, a copy of which shall be immediately furnished by such clerk to each of the circuit judges of the circuit in which the case is pending. Thereupon such case shall be given precedence over others and in every way expedited, and be assigned for hearing at the earliest practicable day, before not less than three of the circuit judges of said circuit, if there be three or more; and if there be not more than two circuit judges, then before them and such district judge as they may select. In the event the judges sitting in such case shall be divided in opinion, the case shall be certified to the Supreme Court for review in like manner as if taken there by appeal as hereinafter provided.

SEC. 2. That in every suit in equity pending or hereafter brought in any circuit court of the United States under any of said Acts, wherein the United States is complainant, including cases submitted but not yet decided, an appeal from the final decree of the circuit court will lie only to the Supreme Court and must be taken within sixty days from the entry thereof: *Provided*, That in any case where an appeal may have been taken from the final decree of a circuit court to the circuit court of appeals before this Act takes effect, the case shall proceed to a final decree therein, and an appeal may be taken from such decree to the Supreme Court in the manner now provided by law.

Approved, February 11, 1903.

[PUBLIC LAW No. 87—57TH CONGRESS]

(Extract from)

SEC. 6. That there shall be in the Department of Commerce and Labor a bureau to be called the Bureau of Corporations, and a Commissioner of Corporations, who shall be the head of said bureau, to be appointed by the President, who shall receive a salary of five thousand dollars per annum. There shall also be in said bureau a deputy commissioner, who shall receive a salary of three thousand five hundred dollars per annum, and who shall, in the absence of the Commissioner, act as and perform the duties of the Commissioner of Corporations, and who shall perform such other duties as may be assigned to him by the Secretary of Commerce and Labor or by the said Commissioner. There shall also be in the said bureau a chief clerk and such special agents, clerks, and other employees as may be authorized by law.

The said Commissioner shall have power and authority to make, under the direction and control of the Secretary of Commerce and Labor, diligent investigation into the organization, conduct, and management of the business of any corporation, joint stock company, or corporate combination engaged in the commerce among the several States and with foreign nations, excepting common carriers subject to "An act to regulate Commerce," approved February fourth, eighteen hundred and eighty-seven, and to gather such information and data as will enable the President of the United States to make recommendations to Congress for legislation for the regulation of such commerce, and to report such data to the President from time to time as he shall require; and the information so obtained or as much thereof as the President may direct shall be made public.

In order to accomplish the purposes declared in the foregoing part of this section, the said Commissioner shall have and exercise the same power and authority in respect to corporations, joint stock companies, and combinations subject to the provisions hereof, as is conferred on the Interstate Commerce Commission in said "Act to regulate commerce" and the amendments thereto in respect to common carriers so far as the same may be applicable, including the right to subpœna and compel the attendance and testimony of witnesses and the production of documentary evidence and to administer oaths. All the requirements, obligations, liabilities, and immunities imposed or conferred by said "Act to regulate commerce" and by "An Act in relation to testimony before the Interstate Commerce Commission," and so forth, approved February eleventh, eighteen hundred and ninety-three, supplemental to said "Act to

Digitized by Google

regulate commerce," shall also apply to all persons who may be subpœnaed to testify as witnesses or to produce documentary evidence in pursuance of the authority conferred by this section.

It shall also be the province and duty of said bureau, under the direction of the Secretary of Commerce and Labor, to gather, compile, publish, and supply useful information concerning corporations doing business within the limits of the United States as shall engage in interstate commerce or in commerce between the United States and any foreign country, including corporations engaged in insurance, and to attend to such other duties as may be hereafter provided by law.

Approved, February 14, 1903.

[PUBLIC RESOLUTION—No. 8]

JOINT RESOLUTION Instructing the Interstate Commerce Commission to make examinations into the subject of railroad discriminations and monopolies in coal and oil, and report on the same from time to time

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Interstate Commerce Commission be, and is hereby, authorized and instructed immediately to inquire, investigate, and report to Congress, or to the President when Congress is not in session, from time to time as the investigation proceeds—

First. Whether any common carriers by railroad, subject to the interstate-commerce Act, or either of them, own or have any interest in, by means of stock ownership in other corporations or otherwise, any of the coal or oil which they, or either of them, directly or through other companies which they control or in which they have an interest, carry over their or any of their lines as common carriers, or in any manner own, control, or have any interest in coal lands or properties or oil land or properties.

Second. Whether the officers of any of the carrier companies aforesaid, or any of them, or any person or persons charged with the duty of distributing cars or furnishing facilities to shippers are interested, either directly or indirectly, by means of stock ownership or otherwise in corporations or companies owning, operating, leasing, or otherwise interested in any coal mines, coal properties, or coal traffic, oil, oil properties, or oil traffic over the railroads with which they or any of them are connected or by which they or any of them are employed.

Third. Whether there is any contract, combination in the form of trust, or otherwise, or conspiracy in restraint of trade or commerce among the several States, in which any common carrier engaged in the transportation of coal or oil is interested, or to which it is a party; and whether any such common carrier monopolizes, or attempts to monopolize, or combines or conspires with any other carrier, company or companies, person or persons to monopolize any part of the trade or commerce in coal or oil, or traffic therein among the several States or with foreign nations, and whether or not, and if so, to what extent, such carriers, or any of them, limit or control, directly or indirectly, the output of coal mines or the price of coal and oil fields or the price of oil.

Fourth. If the Interstate Commerce Commission shall find that the facts or any of them set forth in the three paragraphs above do exist, then that it be further required to report as to the effect of such relationship, ownership, or interest in coal or coal properties and coal traffic, or oil, oil properties, or oil traffic aforesaid, or such contracts or combinations in form of trust or otherwise, or conspiracy or such monopoly or attempt to monopolize or combine or conspire as aforesaid, upon such person or persons as may be engaged independently of any other persons in mining coal or producing oil and shipping the same, or other products, who may desire to so engage, or upon the general public as consumers of such coal or oil.

Fifth. That said Commission be also required to investigate and report the system of car supply and distribution in effect upon the several railway lines engaged in the transportation of coal or oil as aforesaid, and whether said systems are fair and equitable, and whether the same are carried out fairly and properly; and whether said carriers, or any of them, discriminate against

Digitized by Google

shippers or parties wishing to become shippers over their several lines, either in the matter of distribution of cars or in furnishing facilities or instrumentalities connected with receiving, forwarding, or carrying coal or oil as aforesaid.

Sixth. That said Commission be also required to report as to what remedy it can suggest to cure the evils above set forth, if they exist.

Seventh. That said Commission be also required to report any facts or conclusions which it may think pertinent to the general inquiry above set forth.

Eighth. That said Commission be required to make this investigation at its earliest possible convenience and to furnish the information above required from time to time and as soon as it can be done consistent with the performance of its public duty.

Approved, March 7, 1906.

[PUBLIC LAW No. 105—59TH CONGRESS]

(Extract from)

To enable the Interstate Commerce Commission to give effect to the provisions of the Act to regulate commerce and all Acts and amendments supplementary thereto, including the joint resolution "instructing the Interstate Commerce Commission to make examinations into the subject of railroad discriminations and monopolies in coal and oil, and report on the same from time to time," approved March seventh, nineteen hundred and six, the sum of forty-five thousand dollars is hereby transferred to said Commission, and made available for the remainder of the fiscal year nineteen hundred and six, from the balance of the appropriation of five hundred thousand dollars for the enforcement of "An Act to regulate commerce" and all Acts amendatory thereof or supplemental thereto, and other Acts mentioned in said appropriation, made in the legislative, executive, and judicial appropriation Act for the fiscal year nineteen hundred and four, and reappropriated for the fiscal year nineteen hundred and six by the sundry civil appropriation Act, under the Department of Justice: *Provided*, That the total amount that may be expended in the employment of counsel by the Interstate Commerce Commission shall not exceed the sum of forty-five thousand dollars during the fiscal year nineteen hundred and six.

Approved, April 16, 1906.

[PUBLIC—No. 389]

AN ACT Defining the right of immunity of witnesses under the Act entitled "An Act in relation to testimony before the Interstate Commerce Commission," and so forth, approved February eleventh, eighteen hundred and ninety-three, and an Act entitled "An Act to establish the Department of Commerce and Labor," approved February fourteenth, nineteen hundred and three, and an Act entitled "An Act to further regulate commerce with foreign nations and among the States," approved February nineteenth, nineteen hundred and three, and an Act entitled "An Act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June thirtieth, nineteen hundred and four, and for other purposes," approved February twenty-fifth, nineteen hundred and three

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That under the immunity provisions in the Act entitled "An Act in relation to testimony before the Interstate Commerce Commission," and so forth, approved February eleventh, eighteen hundred and ninety-three, in section six of the Act entitled "An Act to establish the Department of Commerce and Labor," approved February fourteenth, nineteen hundred and three, and in the Act entitled "An Act to further regulate commerce with foreign nations and among the States," approved February nineteen, nineteen hundred and three, and in the Act entitled "An Act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June thirtieth, nineteen hundred and four, and for other purposes," approved February twenty-fifth, nineteen hundred and three, immunity shall extend only to a natural person who, in obedience to a subpœna, gives testimony under oath or produces evidence, documentary or otherwise, under oath.

Approved, June 30, 1906.

[PUBLIC—No. 310]

(H. R. 26233)

AN ACT To amend an Act entitled "An Act to expedite the hearing and determination of suits in equity pending or hereafter brought under the Act of July second, eighteen hundred and ninety, entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies,' 'An Act to regulate commerce,' approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that may be hereafter enacted," approved February eleventh, nineteen hundred and three

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section one of the Act entitled "An Act to expedite the hearing and determination of suits in equity pending or hereafter brought under the Act of July second, eighteen hundred and ninety, entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies,' 'An Act to regulate commerce,' approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that may be hereafter enacted," approved February eleventh, nineteen hundred and three, be, and the same is hereby, amended so as to read as follows:

"That in any suit in equity pending or hereafter brought in any circuit court of the United States under the Act entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies,' approved July second, eighteen hundred and ninety, 'An Act to regulate commerce,' approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that hereafter may be enacted, wherein the United States is complainant, the Attorney General may file with the clerk of such court a certificate that, in his opinion, the case is of general public importance, a copy of which shall be immediately furnished by such clerk to each of the circuit judges of the circuit in which the case is pending. Thereupon such case shall be given precedence over others and in every way expedited, and be assigned for hearing at the earliest practicable day, before not less than three of the circuit judges of said court, if there be three or more; and if there be not more than two circuit judges, then before them and such district judge as they may select; or, in case the full court shall not at any time be made up by reason of the necessary absence or disqualification of one or more of the said circuit judges, the justice of the Supreme Court assigned to that circuit or the other circuit judge or judges may designate a district judge or judges within the circuit who shall be competent to sit in said court at the hearing of said suit. In the event the judges sitting in such case shall be equally divided in opinion as to the decision or disposition of said cause, or in the event that a majority of said judges shall be unable to agree upon the judgment, order, or decree finally disposing of said case in said court which should be entered in said cause, then they shall immediately certify that fact to the Chief Justice of the United States, who shall at once designate and appoint some circuit judge to sit with said judges and to assist in determining said cause. Such order of the Chief Justice shall be immediately transmitted to the clerk of the circuit court in which said cause is pending, and shall be entered upon the minutes of said court. Thereupon said cause shall at once be set down for reargument and the parties thereto notified in writing by the clerk of said court of the action of the court and the date fixed for the reargument thereof. The provisions of this section shall apply to all causes and proceedings in all courts now pending, or which may hereafter be brought.

AN ACT To amend section seventy-three and section seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes"

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section seventy-three and section seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," be, and the same are hereby, amended to read as follows:

"SEC. 73. That every combination, conspiracy, trust, agreement, or contract is hereby declared to be contrary to public policy, illegal, and void when the same is made by or between two or more persons or corporations either of whom, as agent or principal, is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any manufacture into which such imported article enters or is intended to enter. Every person who is or shall hereafter be engaged in the importation of goods or any commodity from any foreign country in violation of this section of this Act, or who shall combine or conspire with another to violate the same, is guilty of a misdemeanor, and on conviction thereof in any court of the United States such person shall be fined in a sum not less than one hundred dollars and not exceeding five thousand dollars, and shall be further punished by imprisonment, in the discretion of the court, for a term not less than three months nor exceeding twelve months."

"SEC. 76. That any property owned under any contract or by any combination, or pursuant to any conspiracy, and being the subject thereof, mentioned in section seventy-three of this Act, imported into and being within the United States or being in the course of transportation from one State to another, or to or from a Territory or the District of Columbia, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law."

(H. R. 15613)

AN ACT To create a Federal Trade Commission, to define its powers and duties, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a commission is hereby created and established, to be known as the Federal Trade Commission (hereinafter referred to as the commission), which shall be composed of five commissioners, who shall be appointed by the President, by and with the advice and consent of the Senate. Not more than three of the commissioners shall be members of the same political party. The first commissioners appointed shall continue in office for terms of three, four, five, six, and seven years, respectively, from the date of the taking effect of this Act, the term of each to be designated by the President but their successors shall be appointed for terms of seven years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the commissioner whom he shall succeed. The commission shall choose a chairman from its membership. No commissioner shall engage in any other business, vocation, or employment. Any commissioner may be removed by the President for inefficiency, neglect of duty or malfeasance in office. A vacancy in the commission shall not impair the right of the remaining commissioners to exercise all the powers of the commission.

The commission shall have an official seal, which shall be judicially noticed.

SEC. 2. That each commissioner shall receive a salary of $10,000 a year, payable in the same manner as the salaries of the judges of the courts of the United States. The commission shall appoint a secretary, who shall receive a salary of $5,000 a year, payable in like manner, and it shall have authority to employ and fix the compensation of such attorneys, special experts, examiners, clerks, and other employees as it may from time to time find necessary for the proper performance of its duties and as may be from time to time appropriated for by Congress.

With the exception of the secretary a clerk to each commissioner, the attorneys and such special experts and examiners as the commission may from time to time find necessary for the conduct of its work, all employees of the commission shall be a part of the classified civil service, and shall enter the service under such rules and regulations as may be prescribed by the commission and by the Civil Service Commission.

All of the expenses of the commission, including all necessary expenses for transportation incurred by the commissioners or by their employees under their orders, in making any investigation, or upon official business in any other places

Digitized by Google

than in the city of Washington, shall be allowed and paid on the presentation of itemized vouchers therefor approved by the commission.

Until otherwise provided, by law, the commission may rent suitable offices for its use.

The Auditor for the State and Other Departments shall receive and examine all accounts of expenditures of the commission.

SEC. 3. That upon the organization of the commission and election of its chairman, the Bureau of Corporations and the offices of Commissioner and Deputy Commissioner of Corporations shall cease to exist; and all pending investigations and proceedings of the Bureau of Corporations shall be continued by the commission.

All clerks and employees of the said bureau shall be transferred to and become clerks and employees of the commission at their present grades and salaries. All records, papers, and property of the said bureau shall become records, papers, and property of the commission, and all unexpended funds and appropriations for the use and maintenance of the said bureau, including any allotment already made to it by the Secretary of Commerce from the contingent appropriation for the Department of Commerce for the fiscal year nineteen hundred and fifteen, or from the departmental printing fund for the fiscal year nineteen hundred and fifteen, shall become funds and appropriations available to be expended by the commission in the exercise of the powers, authority, and duties conferred on it by this Act.

The principal office of the commission shall be in the city of Washington, but it may meet and exercise all its powers at any other place. The commission may, by one or more of its members, or by such examiners as it may designate, prosecute any inquiry necessary to its duties in any part of the United States.

SEC. 4. That the words defined in this section shall have the following meaning when found in this Act, to wit:

"Commerce" means commerce among the several States or with foreign nations, or in any Territory of the United States or in the District of Columbia, or between any such Territory and another, or between any such Territory and any State or foreign nation, or between the District of Columbia and any State or Territory or foreign nation.

"Corporation" means any company or association incorporated or unincorporated, which is organized to carry on business for profit and has shares of capital or capital stock, and any company or association, incorporated or unincorporated, without shares or capital stock, except partnerships, which is organized to carry on business for its own profit or that of its members.

"Documentary evidence" means all documents, papers, and correspondence in existence at and after the passage of this Act.

"Acts to regulate commerce" means the Act entitled "An Act to regulate commerce," approved February fourteenth, eighteen hundred and eighty-seven, and all Acts amendatory thereof and supplementary thereto.

"Antitrust acts" means the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety; also the sections seventy-three to seventy-seven, inclusive, of an Act entitled "An Act to reduce taxation to provide revenue for the Government, and for other purposes," approved August twenty-seventh, eighteen hundred and ninety-four; and also the Act entitled "An Act to amend sections seventy-three and seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled 'An Act to reduce taxation, to provide revenue for the Government, and for other purposes,'" approved February twelfth, nineteen hundred and thirteen.

SEC. 5. That unfair methods of competition in commerce are hereby declared unlawful.

The commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, and common carriers subject to the Acts to regulate commerce, from using unfair methods of competition in commerce.

Whenever the commission shall have reason to believe that any such person, partnership, or corporation has been or is using any unfair methods of competition in commerce, and if it shall appear to the commission that a proceeding by it in respect thereof would be to the interest of the public, it shall issue and serve upon such person, partnership, or corporation a complaint stating its charges in that respect, and containing a notice of a hearing upon a day and at a place therein fixed at least thirty days after the service of said com-

Digitized by Google

plaint. The person, partnership, or corporation so complained of shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the commission requiring such person, partnership, or corporation to cease and desist from the violation of the law so charged in said complaint. Any person, partnership, or corporation may make application, and upon good cause shown may be allowed by the commission, to intervene and appear in said proceeding by counsel or in person. The testimony in any such proceeding shall be reduced to writing and filed in the office of the commission. If upon such hearing the commission shall be of the opinion that the method of competition in question is prohibited by this Act, it shall make a report in writing in which it shall state its findings as to the facts, and shall issue and cause to be served on such person, partnership, or corporation an order requiring such person, partnership, or corporation to cease and desist from using such method of competition. Until a transcript of the record in such hearing shall have been filed in a circuit court of appeals of the United States, as hereinafter provided, the commission may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section.

If such person, partnership, or corporation fails or neglects to obey such order of the commission while the same is in effect, the commission may apply to the circuit court of appeals of the United States, within any circuit where the method of competition in question was used or where such person, partnership, or corporation resides or carries on business, for the enforcement of its order, and shall certify and file with its application a transcript of the entire record in the proceeding, including all the testimony taken and the report and order of the commission. Upon such filing of the application and transcript the court shall cause notice thereof to be served upon such person, partnership, or corporation and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to make and enter upon the pleadings, testimony, and proceedings set forth in such transcript a decree affirming, modifying, or setting aside the order of the commission. The findings of the commission as to the facts, if supported by testimony, shall be conclusive. If either party shall apply to the court for leave to adduce additional evidence, and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the commission, the court may order such additional evidence to be taken before the commission and to be adduced upon the hearing in such manner and upon such terms and conditions as to the court may seem proper. The commission may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, which, if supported by testimony, shall be conclusive, and its recommendation, if any, for the modification or setting aside of its original order, with the return of such additional evidence. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certiorari as provided in section two hundred and forty of the Judicial Code.

Any party required by such order of the commission to cease and desist from using such method of competition may obtain a review of such order in said circuit court of appeals by filing in the court a written petition praying that the order of the commission be set aside. A copy of such petition shall be forthwith served upon the commission, and thereupon the commission forthwith shall certify and file in the court a transcript of the record as hereinbefore provided. Upon the filing of the transcript the court shall have the same jurisdiction to affirm, set aside, or modify the order of the commission as in the case of an application by the commission for the enforcement of its order, and the findings of the commission as to the facts, if supported by testimony, shall in like manner be conclusive.

The jurisdiction of the circuit court of appeals of the United States to enforce, set aside, or modify orders of the commission shall be exclusive.

Such proceedings in the circuit court of appeals shall be given precedence over other cases pending therein, and shall be in every way expedited. No order of the commission or judgment of the court to enforce the same shall in any wise relieve or absolve any person, partnership, or corporation from any liability under the antitrust acts.

Complaints, orders, and other processes of the commission under this section may be served by anyone duly authorized by the commission, either (a)

Digitized by Google

by delivering a copy thereof to the person to be served, or to a member of the partnership to be served, or to the president, secretary, or other executive officers or a director of the corporation to be served; or (b) by leaving a copy thereof at the principal office or place of business of such person, partnership, or corporation; or (c) by registering and mailing a copy thereof addressed to such person, partnership, or corporation at his or its principal office or place of business. The verified return by the person so serving said complaint, order, or other process setting forth the manner of said service shall be proof of the same, and the return post-office receipt for said complaint, order, or other process registered and mailed as aforesaid shall be proof of the service of the same.

SEC. 6. That the commission shall also have power—

(a) To gather and compile information concerning, and to investigate from time to time the organization, business, conduct, practices, and management of any corporation engaged in commerce, excepting banks and common carriers subject to the Act to regulate commerce, and its relation to other corporations and to individuals, associations, and partnerships.

(b) To require, by general or special orders, corporations engaged in commerce, excepting banks, and common carriers subject to the Act to regulate commerce, or any class of them, or any of them, respectively, to file with the commission in such form as the commission may prescribe annual or special, or both annual and special, reports or answers in writing to specific questions, furnishing to the commission such information as it may require as to the organization, business, conduct, practices, management, and relation to other corporations, partnerships, and individuals of the respective corporations filing such reports or answers in writing. Such reports and answers shall be made under oath, or otherwise, as the commission may prescribe, and shall be filed with the commission within such reasonable period as the commission may prescribe, unless additional time be granted in any case by the commission.

(c) Whenever a final decree has been entered against any defendant corporation in any suit brought by the United States to prevent and restrain any violation of the antitrust Acts, to make investigations, upon its own initiative, of the manner in which the decree has been or is being carried out, and upon the application of the Attorney General it shall be its duty to make such investigation. It shall transmit to the Attorney General a report embodying its findings and recommendations as a result of any such investigation and the report shall be made public in the discretion of the commission.

(d) Upon the direction of the President or either House of Congress to investigate and report the facts relating to any alleged violations of the antitrust Acts by any corporation.

(e) Upon the application of the Attorney General to investigate and make recommendations for the readjustment of the business of any corporation alleged to be violating the antitrust Acts in order that the corporation may thereafter maintain its organization, management, and conduct of business in accordance with law.

(f) To make public from time to time such portions of the information obtained by it hereunder, except trade secrets and names of customers, as it shall deem expedient in the public interest; and to make annual and special reports to the Congress and to submit therewith recommendations for additional legislation; and to provide for the publication of its reports and decisions in such form and manner as may be best adapted for public information and use.

(g) From time to time to classify corporations and to make rules and regulations for the purpose of carrying out the provisions of this Act.

(h) To investigate, from time to time, trade conditions in and with foreign countries where associations, combinations, or practices of manufacturers, merchants, or traders, or other conditions, may affect the foreign trade of the United States, and to report to Congress thereon, with such recommendations as it deems advisable.

SEC. 7. That in any suit in equity brought by or under the direction of the Attorney General as provided in the antitrust Acts, the court may, upon the conclusion of the testimony therein, if it shall be then of opinion that the complainant is entitled to relief, refer said suit to the commission, as a master in chancery, to ascertain and report an appropriate form of decree therein. The commission shall proceed upon such notice to the parties and under such rules of procedure as the court may prescribe, and upon the coming in of such report such exceptions may be filed and such proceedings had in relation thereto as upon the report of a master in other equity causes, but the court may

Digitized by Google

adopt or reject such report, in whole or in part, and enter such decree as the nature of the case may in its judgment require.

SEC. 8. That the several departments and bureaus of the Government when directed by the President shall furnish the commission, upon its request, all records, papers, and information in their possession relating to any corporation subject to any of the provisions of this Act, and shall detail from time to time such officials and employees to the commission as he may direct.

SEC. 9. That for the purposes of this Act the commission, or its duly authorized agent or agents, shall at all reasonable times have access to, for the purpose of examination, and the right to copy any documentary evidence of any corporation being investigated or proceeded against; and the commission shall have power to require by subpœna the attendance and testimony of witnesses and the production of all such documentary evidence relating to any matter under investigation. Any member of the commission may sign subpœnas, and members and examiners of the commission may administer oaths and affirmations, examine witnesses, and receive evidence.

Such attendance of witnesses, and the production of such documentary evidence, may be required from any place in the United States, at any designated place of hearing. And in case of disobedience to a subpœna the commission may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of documentary evidence.

Any of the district courts of the United States within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpœna issued to any corporation or other person, issue an order requiring such corporation or other person to appear before the commission, or to produce documentary evidence if so ordered, or to give evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof.

Upon the application of the Attorney General of the United States, at the request of the commission, the district courts of the United States shall have jurisdiction to issue writs of mandamus commanding any person or corporation to comply with the provisions of this Act or any order of the commission made in pursuance thereof.

The commission may order testimony to be taken by deposition in any proceeding or investigation pending under this Act at any stage of such proceeding or investigation. Such depositions may be taken before any person designated by the commission and having power to administer oaths. Such testimony shall be reduced to writing by the person taking the deposition, or under his direction, and shall then be subscribed by the deponent. Any person may be compelled to appear and depose and to produce documentary evidence in the same manner as witnesses may be compelled to appear and testify and produce documentary evidence before the commission as hereinbefore provided.

Witnesses summoned before the commission shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken and the persons taking the same shall severally be entitled to the same fees as are paid for like services in the courts of the United States.

No person shall be excused from attending and testifying or from producing documentary evidence before the commission or in obedience to the subpœna of the commission on the ground or for the reason that the testimony or evidence, documentary or otherwise, required of him may tend to criminate him or subject him to a penalty or forfeiture. But no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may testify, or produce evidence, documentary or otherwise, before the commission in obedience to a subpœna issued by it: *Provided*, That no natural person so testifying shall be exempt from prosecution and punishment for perjury committed in so testifying.

SEC. 10. That any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry, or to produce documentary evidence, if in his power to do so, in obedience to the subpœna or lawful requirement of the commission, shall be guilty of an offense and upon conviction thereof by a court of competent jurisdiction shall be punished by a fine of not less than $1,000 nor more than $5,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

Any person who shall willfully make, or cause to be made, any false entry or statement of fact in any report required to be made under this Act, or

Digitized by Google

who shall willfully make, or cause to be made, any false entry in any account, record, or memorandum kept by any corporation subject to this Act, or who shall willfully neglect or fail to make, or to cause to be made, full, true, and correct entries in such accounts, records, or memoranda of all facts and transactions apertaining to the business of such corporation, or who shall willfully remove out of the jurisdiction of the United States, or willfully mutilate, alter, or by any other means falsify any documentary evidence of such corporation, or who shall willfully refuse to submit to the commission or to any of its authorized agents, for the purpose of inspection and taking copies, any documentary evidence of such corporation in his possession or within his control, shall be deemed guilty of an offense against the United States, and shall be subject, upon conviction in any court of the United States of competent jurisdiction, to a fine of not less than $1,000 nor more than $5,000, or to imprisonment for a term of not more than three years, or to both such fine and imprisonment.

If any corporation required by this Act to file any annual or special report shall fail so to do within the time fixed by the commission for filing the same, and such failure shall continue for thirty days after notice of such default, the corporation shall forfeit to the United States the sum of $100 for each and every day of the continuance of such failure, which forfeiture shall be payable into the Treasury of the United States, and shall be recoverable in a civil suit in the name of the United States brought in the district where the corporation has its principal office or in any district in which it shall do business. It shall be the duty of the various district attorneys, under the direction of the Attorney General of the United States, to prosecute for the recovery of forfeitures. The costs and expenses of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States.

Any officer or employee of the commission who shall make public any information obtained by the commission without its authority, unless directed by a court, shall be deemed guilty of a misdeameanor, and, upon conviction thereof, shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by fine and imprisonment, in the discretion of the court.

SEC. 11. Nothing contained in this Act shall be construed to prevent or interfere with the enforcement of the provisions of the antitrust Acts or the Acts to regulate commerce, nor shall anything contained in the Act be construed to alter, modify, or repeal the said antitrust Acts or the Acts to regulate commerce or any part or parts thereof.

Approved, September 26, 1914.

[PUBLIC—No. 212—63D CONGRESS]

(H. R. 15657)

AN ACT To supplement existing laws against unlawful restraints and monopolies, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That "antitrust laws," as used herein, includes the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety; sections seventy-three to seventy-seven, inclusive, of an Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," of August twenty-seventh, eighteen hundred and ninety-four; an Act entitled "An Act to amend sections seventy-three and seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled 'An Act to reduce taxation, to provide revenue for the Government, and for other purposes,'" approved February twelfth, nineteen hundred and thirteen; and also this Act.

"Commerce," as used herein, means trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State

Digitized by Google

or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession or other place under the jurisdiction of the United States: *Provided*, That nothing in this Act contained shall apply to the Philippine Islands.

The word "person" or "persons" wherever used in this Act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country.

SEC. 2. That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities, which commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce: *Provided*, That nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of differences in the grade, quality, or quantity of the commodity sold, or that makes only due allowance for differences in the cost of selling or transportation, or discrimination in price in the same or different communities made in good faith to meet competiton: *And provded further*, That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade.

SEC. 3. That it shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies or other commodities, whether patented or unpatented, for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods, wares, merchandise, machinery, supplies, or other commodity of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

SEC. 4. That any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

SEC. 5. That a final judgment or decree hereafter rendered in any criminal prosecution or in any suit or proceeding in equity brought by or on behalf of the United States under the antitrust laws to the effect that a defendant has violated said laws shall be prima facie evidence against such defendant in any suit or proceeding brought by any other party against such defendant under said laws as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto: *Provided*, This section shall not apply to consent judgments or decrees entered before any testimony has been taken: *Provided further*, This section shall not apply to consent judgments or decrees rendered in criminal proceedings or suits in equity, now pending, in which the taking of testimony has been commenced but has not been concluded, provided such judgments or decrees are rendered before any further testimony is taken.

Whenever any suit or proceeding in equity or criminal prosecution is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws, the running of the statute of limitations in respect of each and every private right of action arising under said laws and based in whole or in part on any matter complained of in said suit or proceeding shall be suspended during the pendency thereof.

SEC. 6. That the labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of

Digitized by Google

such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws.

SEC. 7. That no corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of another corporation engaged also in commerce, where the effect of such acquisition may be to substantially lessen competition between the corporation whose stock is so acquired and the corporation making the acquisition, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce.

No corporation shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of two or more corporations engaged in commerce where the effect of such acquisition, or the use of such stock by the voting or granting of proxies or otherwise, may be to substantially lessen competition between such corporations, or any of them, whose stock or other share capital is so acquired, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce.

This section shall not apply to corporations purchasing such stock solely for investment and not using the same by voting or otherwise to bring about, or in attempting to bring about, the substantial lessening of competition. Nor shall anything contained in this section prevent a corporation engaged in commerce from causing the formation of subsidiary corporations for the actual carrying on of their immediate lawful business, or the natural and legitimate branches or extensions thereof, or from owning and holding all or a part of the stock of such subsidiary corporations, when the effect of such formation is not to substantially lessen competition.

Nor shall anything herein contained be construed to prohibit any common carrier subject to the laws to regulate commerce from aiding in the construction of branches or short lines so located as to become feeders to the main line of the company so aiding in such construction or from acquiring or owning all or any part of the stock of such branch lines, nor to prevent any such common carrier from acquiring and owning all or any part of the stock of a branch or short line constructed by an independent company where there is no substantial competition between the company owning the branch line so constructed and the company owning the main line acquiring the property or an interest therein, nor to prevent such common carrier from extending any of its lines through the medium of the acquisition of stock or otherwise of any other such common carrier where there is no substantial competition between the company extending its lines and the company whose stock, property, or an interest therein is so acquired.

Nothing contained in this section shall be held to affect or impair any right heretofore legally acquired: *Provided*, That nothing in this section shall be held or construed to authorize or make lawful anything heretofore prohibited or made illegal by the antitrust laws, nor to exempt any person from the penal provisions thereof or the civil remedies therein provided.

SEC. 8. That from and after two years from the date of the approval of this Act no person shall at the same time be a director or other officer or employee of more than one bank, banking association or trust company, organized or operating under the laws of the United States, either of which has deposits, capital, surplus, and undivided profits aggregating more than $5,000,000; and no private banker or person who is a director in any bank or trust company, organized and operating under the laws of a State, having deposits, capital, surplus, and undivided profits aggregating more than $5,000,000, shall be eligible to be a director in any bank or banking association organized or operating under the laws of the United States. The eligibility of a director, officer, or employee under the foregoing provisions shall be determined by the average amount of deposits, capital, surplus, and undivided profits as shown in the official statements of such bank, banking association, or trust company filed as provided by law during the fiscal year next preceding the date set for the annual election of directors, and when a director, officer, or employee has been elected or selected in accordance with the provisions of this Act it shall be lawful for him to continue as such for one year thereafter under said election or employment.

No bank, banking association or trust company, organized or operating under the laws of the United States, in any city or incorporated town or village of more than two hundred thousand inhabitants, as shown by the last preceding

Digitized by Google

decennial census of the United States, shall have as a director or other officer or employee any private banker or any director or other officer or employee of any other bank, banking association or trust company located in the same place: *Provided*, That nothing in this section shall apply to mutual savings banks not having a capital stock represented by shares: *Provided further*, That a director or other officer or employee of such bank, banking association, or trust company may be a director or other officer or employee of not more than one other bank or trust company organized under the laws of the United States or any State where the entire capital stock of one is owned by stockholders in the other: *And provided further*, That nothing contained in this section shall forbid a director of class A of a Federal reserve bank, as defined in the Federal Reserve Act, from being an officer or director or both an officer and director in one member bank.

That from and after two years from the date of the approval of this Act no person at the same time shall be a director in any two or more corporations, any one of which has capital, surplus, and undivided profits aggregating more than $1,000,000, engaged in whole or in part in commerce, other than banks, banking associations, trust companies and common carriers subject to the Act to regulate commerce, approved February fourth, eighteen hundred and eighty-seven, if such corporations are or shall have been theretofore, by virtue of their business and location of operation, competitors, so that the elimination of competition by agreement between them would constitute a violation of any of the provisions of any of the antitrust laws. The eligibility of a director under the foregoing provision shall be determined by the aggregate amount of capital, surplus, and undivided profits, exclusive of dividends declared but not paid to stockholders, at the end of the fiscal year of said corporation next preceding the election of directors, and when a director has been elected in accordance with the provisions of this Act it shall be lawful for him to continue as such for one year thereafter.

When any person elected or chosen as a director or officer or selected as an employee of any bank or other corporation subject to the provisions of this Act is eligible at the time of his election or selection to act for such bank or other corporation in such capacity his eligibility to act in such capacity shall not be affected and he shall not become or be deemed amenable to any of the provisions hereof by reason of any change in the affairs of such bank or other corporation from whatsoever cause, whether specifically excepted by any of the provisions hereof or not, until the expiration of one year from the date of his election or employment.

SEC. 9. Every president, director, officer or manager of any firm, association or corporation engaged in commerce as a common carrier, who embezzles, steals, abstracts or willfully misapplies, or willfully permits to be misapplied, any of the moneys, funds, credits, securities, property or assets of such firm, association or corporation, arising or accruing from, or used in, such commerce, in whole or in part, or willfully or knowingly converts the same to his own use or to the use of another, shall be deemed guilty of a felony and upon conviction shall be fined not less than $500 or confined in the penitentiary not less than one year nor more than ten years, or both, in the discretion of the court.

Prosecutions hereunder may be in the district court of the United States for the district wherein the offense may have been committed.

That nothing in this section shall be held to take away or impair the jurisdiction of the courts of the several States under the laws thereof; and a judgment of conviction or acquittal on the merits under the laws of any State shall be a bar to any prosecution hereunder for the same act or acts.

SEC. 10. That after two years from the approval of this Act no common carrier engaged in commerce shall have any dealings in securities, supplies or other articles of commerce, or shall make or have any contracts for construction or maintenance of any kind, to the amount of more than $50,000, in the aggregate, in any one year, with another corporation, firm, partnership or association when the said common carrier shall have upon its board of directors or as its president, manager or as its purchasing or selling officer, or agent in the particular transaction, any person who is at the same time a director, manager, or purchasing or selling officer of, or who has any substantial interest in, such other corporation, firm, partnership or association, unless and except such purchases shall be made from, or such dealings shall be with, the bidder whose bid is the most favorable to such common carrier, to be ascertained by competitive bidding under regulations to be prescribed by rule or otherwise by the Interstate Commerce Commission. No bid shall be received unless the name and address

Digitized by Google

of the bidder or the names and addresses of the officers, directors, and general managers thereof, if the bidder be a corporation, or of the members, if it be a partnership or firm, be given with the bid.

Any person who shall, directly or indirectly, do or attempt to do anything to prevent anyone from bidding or shall do any act to prevent free and fair competition among the bidders or those desiring to bid shall be punished as prescribed in this section in the case of an officer or director.

Every such common carrier having any such transactions or making any such purchases shall within thirty days after making the same file with the Interstate Commerce Commission a full and detailed statement of the transaction showing the manner of the competitive bidding, who were the bidders, and the names and addresses of the directors and officers of the corporations and the members of the firm or partnership bidding; and whenever the said commission shall, after investigation or hearing, have reason to believe that the law has been violated in and about the said purchases or transactions it shall transmit all papers and documents and its own views or findings regarding the transaction to the Attorney General.

If any common carrier shall violate this section it shall be fined not exceeding $25,000; and every such director, agent, manager or officer thereof who shall have knowingly voted for or directed the act constituting such violation or who shall have aided or abetted in such violation shall be deemed guilty of a misdemeanor and shall be fined not exceeding $5,000, or confined in jail not exceeding one year, or both, in the discretion of the court.

SEC. 11. That authority to enforce compliance with sections two, three, seven and eight of this Act by the persons respectively subject thereto is hereby vested: in the Interstate Commerce Commission where applicable to common carriers, in the Federal Reserve Board where applicable to banks, banking associations and trust companies, and in the Federal Trade Commission where applicable to all other character of commerce, to be exercised as follows:

Whenever the commission or board vested with jurisdiction thereof shall have reason to believe that any person is violating or has violated any of the provisions of sections two, three, seven and eight of this Act, it shall issue and serve upon such person a complaint stating its charges in that respect, and containing a notice of a hearing upon a day and at a place therein fixed at least thirty days after the service of said complaint. The person so complained of shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the commission or board requiring such person to cease and desist from the violation of the law so charged in said complaint. Any person may make application, and upon good cause shown may be allowed by the commission or board, to intervene and appear in said proceeding by counsel or in person. The testimony in any such proceeding shall be reduced to writing and filed in the office of the commission or board. If upon such hearing the commission or board, as the case may be, shall be of the opinion that any of the provisions of said sections have been or are being violated, it shall make a report i nwriting in which it shall state its findings as to the facts, and shall issue and cause to be served on such person an order requiring such person to cease and desist from such violations, and divest itself of the stock held or rid itself of the directors chosen contrary to the provisions of sections seven and eight of this Act, if any there be, in the manner and within the time fixed by said order. Until a transcript of the record in such hearing shall have been filed in a circuit court of appeals of the United States, as hereinafter provided, the commission or board may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section.

If such person fails or neglects to obey such order of the commission or board while the same is in effect, the commission or board may apply to the circuit court of appeals of the United States, within any circuit where the violation, complained of was or is being committed or where such person resides or carries on business, for the enforcement of its order, and shall certify and file with its application a transcript of the entire record in the proceeding, including all the testimony taken and the report and order of the commission or board. Upon such filing of the application and transcript the court shall cause notice thereof to be served upon such person and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to make and enter upon the pleadings, testimony, and proceedings set forth in such transcript a decree affirming, modifying, or setting

Digitized by Google

aside the order of the commission or board. The findings of the commission or board as to the facts, if supported by testimony, shall be conclusive. If either party shall apply to the court for leave to adduce additional evidence, and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the commission or board, the court may order such additional evidence to be taken before the commission or board and to be adduced upon the hearings in such manner and upon such terms and conditions as to the court may seem proper. The commission or board may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, which, if supported by testimony, shall be conclusive, and its recommendation, if any, for the modification or setting aside of its original order, with the return of such additional evidence. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certiorari as provided in section two hundred and forty of the Judicial Code.

Any party required by such order of the commission or board to cease and desist from a violation charged may obtain a review of such order in said circuit court of appeals by filing in the court a written petition praying that the order of the commission or board be set aside. A copy of such petition shall be forthwith served upon the commission or board, and thereupon the commission or board forthwith shall certify and file in the court a transcript of the record as hereinbefore provided. Upon the filing of the transcript the court shall have the same jurisdiction to affirm, set aside, or modify the order of the commission or board as in the case of an application by the commission or board for the enforcement of its order, and the findings of the commission or board as to the facts, if supported by testimony, shall in like manner be conclusive.

The jurisdiction of the circuit court of appeals of the United States to enforce, set aside, or modify orders of the commission or board shall be exclusive.

Such proceedings in the circuit court of appeals shall be given precedence over other cases pending therein, and shall be in every way expedited. No order of the commission or board or the judgment of the court to enforce the same shall in any wise relieve or absolve any person from any liability under the antitrust Acts.

Complaints, orders, and other processes of the commission or board under this section may be served by anyone duly authorized by the commission or board, either (a) by delivering a copy thereof to the person to be served, or to a member of the partnership to be served, or to the president, secretary, or other executive officer or a director of the corporation to be served; or (b) by leaving a copy thereof at the principal office or place of business of such person; or (c) by registering and mailing a copy thereof addressed to such person at his principal office or place of business. The vertified return by the person so serving said complaint, order, or other process setting forth the manner of said service shall be proof of the same, and the return post-office receipt for said complaint, order, or other process registered and mailed as aforesaid shall be proof of the service of the same.

SEC. 12. That any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found.

SEC. 13. That in any suit, action, or proceeding brought by or on behalf of the United States subpœnas for witnesses who are required to attend a court of the United States in any judicial district in any case, civil or criminal, arising under the antitrust laws may run into any other district: *Provided*, That in civil cases no writ of subpœna shall issue for witnesses living out of the district in which the court is held at a greater distance than one hundred miles from the place of holding the same without the permission of the trial court being first had upon proper application and cause shown.

SEC. 14. That whenever a corporation shall violate any of the penal provisions of the antitrust laws, such violation shall be deemed to be also that of the individual directors, officers, or agents of such corporation who shall have authorized, ordered, or done any of the acts constituting in whole or in part such violation, and such violation shall be deemed a misdemeanor, and upon

Digitized by Google

conviction therefor of any such director, officer, or agent he shall be punished by a fine of not exceeding $5,000 or by imprisonment for not exceeding one year, or by both, in the discretion of the court.

SEC. 15. That the several district courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this Act, and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition, and before final decree, the court may at any time make temporary restraining order or prohibition as shall be deemed just in the premises. Whenever it shall appear to the court before which any such proceeding may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned whether they reside in the district in which the court is held or not, and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 16. That any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, including sections two, three, seven and eight of this Act, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue: *Provided*, That nothing herein contained shall be construed to entitle any person, firm, corporation, or association, except the United States, to bring suit in equity for injunctive relief against any common carrier subject to the provisions of the Act to regulate commerce, approved February fourth, eighteen hundred and eighty-seven, in respect of any matter subject to the regulation, supervision, or other jurisdiction of the Interstate Commerce Commission.

SEC. 17. That no preliminary injunction shall be issued without notice to the opposite party.

No temporary restraining order shall be granted without notice to the opposite party unless it shall clearly appear from specific facts shown by affidavit or by the verified bill that immediate and irreparable injury, loss, or damage will result to the applicant before notice can be served and a hearing had thereon. Every such temporary restraining order shall be indorsed with the date and hour of issuance, shall be forthwith filed in the clerk's office and entered of record, shall define the injury and state why it is irreparable and why the order was granted without notice, and shall by its terms expire within such time after entry, not to exceed ten days, as the court or judge may fix, unless within the time so fixed the order is extended for a like period for good cause shown, and the reasons for such extension shall be entered of record. In case a temporary restraining order shall be granted without notice in the contingency specified, the matter of the issuance of a preliminary injunction shall be set down for a hearing at the earliest possible time and shall take precedence of all matters except older matters of the same character; and when the same comes up for hearing the party obtaining the temporary restraining order shall proceed with the application for a preliminary injunction, and if he does not do so the court shall dissolve the temporary restraining order. Upon two days' notice to the party obtaining such temporary restraining order the opposite party may appear and move the dissolution or modification of the order, and in that event the court or judge shall proceed to hear and determine the motion as expeditiously as the ends of justice may require.

Section two hundred and sixty-three of an Act entitled "An Act to codify, revise, and amend the laws relating to the judiciary," approved March third, nineteen hundred and eleven, is hereby repealed.

Nothing in this section contained shall be deemed to alter, repeal, or amend section two hundred and sixty-six of an Act entitled "An Act to codify, revise, and amend the laws relating to the judiciary," approved March third, nineteen hundred and eleven.

SEC. 18. That, except as otherwise provided in section 16 of this Act, no restraining order or interlocutory order of injunction shall issue, except upon

Digitized by Google

giving of security by the applicant in such sum as the court or judge may deem proper, conditioned upon the payment of such costs and damages as may be incurred or suffered by any party who may be found to have been wrongfully enjoined or restrained thereby.

SEC. 19. That every order of injunction or restraining order shall set forth the reasons for the issuance of the same, shall be specific in terms, and shall describe in reasonable detail, and not by reference to the bill of complaint or other document, the act or acts sought to be restrained, and shall be binding only upon the parties to the suit, their officers, agents, servants, employees, and attorneys, or those in active concert or participating with them, and who shall, by personal service or otherwise, have received actual notice of the same.

SEC. 20. That no restraining order or injunction shall be granted by any court of the United States, or a judge or the judges thereof, in any case between an employer and employees, or between employers and employees, or between employees, or between persons employed and persons seeking employment, involving, or growing out of, a dispute concerning terms or conditions of employment, unless necessary to prevent irreparable injury to property, or to a property right, of the party making the application, for which injury there is no adequate remedy at law, and such property or property right must be described with particularly in the application, which must be in writing and sworn to by the applicant or by his agent or attorney.

And no such restraining order or injunction shall prohibit any person or persons, whether singly or in concert, from terminating any relation of employment, or from ceasing to perform any work or labor, or from recommending, advising, or persuading others by peaceful means so to do; or from attending at any place where any such person or persons may lawfully be, for the purpose of peacefully obtaining or communicating information, or from peacefully persuading any person to work or to abstain from working; or from ceasing to patronize or to employ any party to such dispute, or from recommending, advising, or persuading others by peaceful and lawful means so to do; or from paying or giving to, or withholding from, any person engaged in such dispute, any strike benefits or other moneys or things of value; or from peaceably assembling in a lawful manner, and for lawful purposes; or from doing any act or thing which might lawfully be done in the absence of such dispute by any party thereto; nor shall any of the acts specified in this paragraph be considered or held to be violations of any law of the United States.

SEC. 21. That any person who shall willfully disobey any lawful writ, process, order, rule, decree, or command of any district court of the United States or any court of the District of Columbia by doing any act or thing therein, or thereby forbidden to be done by him, if the act or thing so done by him be of such character as to constitute also a criminal offense under any statute of the United States or under the laws of any State in which the act was committed, shall be proceeded against for his said contempt as hereinafter provided.

SEC. 22. That whenever it shall be made to appear to any district court or judge thereof, or to any judge therein sitting, by the return of a proper officer on lawful process, or upon the affidavit of some credible person, or by information filed by any district attorney, that there is reasonable ground to believe that any person has been guilty of such contempt, the court or judge thereof, or any judge therein sitting, may issue a rule requiring the said person so charged to show cause upon a day certain why he should not be punished therefor, which rule, together with a copy of the affidavit or information, shall be served upon the person charged, with sufficient promptness to enable him to prepare for and make return to the order at the time fixed therein. If upon or by such return, in the judgment of the court, the alleged contempt be not sufficiently purged, a trial shall be directed at a time and place fixed by the court: *Provided, however,* That if the accused, being a natural person, fail or refuse to make return to the rule to show cause, an attachment may issue against his person to compel an answer, and in case of his continued failure or refusal, or if for any reason it be impracticable to dispose of the matter on the return day, he may be required to give reasonable bail for his attendance at the trial and his submission to the final judgment of the court. Where the accused is a body corporate, an attachment for the sequestration of its property may be issued upon like refusal or failure to answer.

Digitized by Google

In all cases within the purview of this Act such trial may be by the court, or, upon demand of the accused, by a jury; in which latter event the court may impanel a jury from the jurors then in attendance, or the court or the judge thereof in chambers may cause a sufficient number of jurors to be selected and summoned, as provided by law, to attend at the time and place of trial, at which time a jury shall be selected and impaneled as upon a trial for misdemeanor; and such trial shall conform, as near as may be, to the practice in criminal cases prosecuted by indictment or upon information.

If the accused be found guilty, judgment shall be entered accordingly, prescribing the punishment, either by fine or imprisonment, or both, in the discretion of the court. Such fine shall be paid to the United States or to the complainant or other party injured by the act constituting the contempt, or may, where more than one is so damaged, be divided or apportioned among them as the court may direct, but in no case shall the fine be paid to the United States exceed, in case the accused is a natural person, the sum of $1,000, nor shall such imprisonment exceed the term of six months: *Provided*, That in any case the court or a judge thereof may, for good cause shown, by affidavit or proof taken in open court or before such judge and filed with the papers in the case, dispense with the rule to show cause, and may issue an attachment for the arrest of the person charged with contempt; in which event such person, when arrested, shall be brought before such court or a judge thereof without unnecessary delay and shall be admitted to bail in a reasonable penalty for his appearance to answer to the charge or for trial for the contempt; and thereafter the proceedings shall be the same as provided herein in case the rule had issued in the first instance.

SEC. 23. That the evidence taken upon the trial of any persons so accused may be preserved by bill of exceptions, and any judgment of conviction may be reviewed upon writ of error in all respects as now provided by law in criminal cases, and may be affirmed, reversed, or modified as justice may require. Upon the granting of such writ of error, execution of judgment shall be stayed, and the accused, if thereby sentenced to imprisonment, shall be admitted to bail in such reasonable sum as may be required by the court, or by any justice, or any judge of any district court of the United States or any court of the District of Columbia.

SEC. 24. That nothing herein contained shall be construed to relate to contempts committed in the presence of the court, or so near thereto as to obstruct the administration of justice, nor to contempts committed in disobedience of any lawful writ, process, order, rule, decree, or command entered in any suit or action brought or prosecuted in the name of, or on behalf of, the United States, but the same, and all other cases of contempt not specifically embraced within section twenty-one of this Act, may be punished in conformity to the usages at law and in equity now prevailing.

SEC. 25. That no proceeding for contempt shall be instituted against any person unless begun within one year from the date of the act complained of; nor shall any such proceeding be a bar to any criminal prosecution for the same act or acts; but nothing herein contained shall affect any proceedings in contempt pending at the time of the passage of this Act.

SEC. 26. If any clause, sentence, paragraph, or part of this Act shall, for any reason, be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

Approved, October 15, 1914.

AN ACT To amend section eight of an Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October fifteenth, nineteen hundred and fourteen

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section eight of an Act entitled "An Act to supplement existing laws against unlawful restraint and monopolies, and for other purposes," approved October fifteenth, nineteen hundred and fourteen, be, and the same is hereby, amended by striking out the period at the end of the second clause of said section, inserting in lieu thereof a colon, and adding to said clause the following:

"*And provided further*, That nothing in this Act shall prohibit any officer, director, or employee of any member bank or class A director of a Federal reserve bank, who shall first procure the consent of the Federal Reserve Board, which board is hereby authorized, at its discretion, to grant, withhold, or revoke such consent, from being an officer, director, or employee of not more than two other banks, banking associations, or trust companies, whether organized under the laws of the United States or any State, if such other bank, banking association, or trust company is not in substantial competition with such member bank.

"The consent of the Federal Reserve Board may be procured before the person applying therefor has been elected as a class A director of a Federal reserve bank or as a director of any member bank."

That all pending cases in the courts of the United States affecting railroads or other transportation systems brought under the Act to regulate commerce, approved February fourth, eighteen hundred and eighty-seven as amended and supplemented including the commodities clause so called or under the Act to protect trade and commerce against unlawful restraints and monopolies, approved July second, eighteen hundred and ninety, and amendments thereto, shall proceed to final determination as soon as may be, as if the United States had not assumed control of transportation systems; but in any such case the court having jurisdiction may, upon the application of the United States, stay execution of final judgment or decree until such time as it shall deem proper.

Approved, March 21, 1918.

[PUBLIC—No. 126—65TH CONGRESS]

[H. R. 2316]

AN ACT To promote export trade, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the words "export trade" wherever used in this Act mean solely trade or commerce in goods, wares, or merchandise exported, or in the course of being exported from the United States or any Territory thereof to any foreign nation; but the words "export trade" shall not be deemed to include the production, manufacture, or selling for consumption or for resale, within the United States or any Territory thereof, of such goods, wares, or merchandise, or any act in the course of such production, manufacture, or selling for consumption or for resale.

That the words "trade within the United States" wherever used in this Act mean trade or commerce among the several States or in any Territory of the United States, or in the District of Columbia, or between any such Territory and another, or between any such Territory or Territories and any State or States or the District of Columbia, or between the District of Columbia and any State or States.

That the word "association" wherever used in this Act means any corporation or combination, by contract or otherwise, of two or more persons, partnerships, or corporations.

SEC. 2. That nothing contained in the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety, shall be construed as declaring to be illegal an association entered into for the sole purpose of engaging in export trade and actually engaged solely in such export trade, or an agreement made or act done in the course of export trade by such association, provided such association, agreement, or act is not in restraint of trade within the United States, and is not in restraint of the export trade of any domestic competitor of such association: *And provided further*, That such association does not, either in the United States or elsewhere, enter into any agreement, understanding, or conspiracy, or do any act which artificially or intentionally enhances or depresses prices within the United States of commodities of the class exported by such association, or which substantially lessens competition within the United States or otherwise restrains trade therein.

Digitized by Google

SEC. 3. That nothing contained in section seven of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October fifteenth, nineteen hundred and fourteen, shall be construed to forbid the acquisition or ownership by any corporation of the whole or any part of the stock or other capital of any corporation organized solely for the purpose of engaging in export trade, and actually engaged solely in such export trade, unless the effect of such acquisition or ownership may be to restrain trade or substantially lessen competition within the United States.

SEC. 4. That the prohibition against "unfair methods of competition" and the remedies provided for enforcing said prohibition contained in the Act entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September twenty-sixth, nineteen hundred and fourteen, shall be construed as extending to unfair methods of competition used in export trade against competitors engaged in export trade, even though the acts constituting such unfair methods are done without the territorial jurisdiction of the United States.

SEC. 5. That every association now engaged solely in export trade, within sixty days after the passage of this Act, and every association entered into hereafter which engages solely in export trade, within thirty days after its creation, shall file with the Federal Trade Commission a verified written statement setting forth the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members, and if a corporation, a copy of its certificate or articles of incorporation and by-laws, and if unincorporated, a copy of its articles or contract of association, and on the first day of January of each year thereafter it shall make a like statement of the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members and of all amendments to and changes in its articles or certificate of incorporation or in its articles or contract of association. It shall also furnish to the commission such information as the commission may require as to its organization, business, conduct, practices, management, and relation to other associations, corporations, partnerships, and individuals. Any association which shall fail so to do shall not have the benefit of the provisions of section two and section three of this Act, and it shall also forfeit to the United States the sum of $100 for each and every day of the continuance of such failure, which forfeiture shall be payable into the Treasury of the United States, and shall be recoverable in a civil suit in the name of the United States brought in the district where the association has its principal office, or in any district in which it shall do business. It shall be the duty of the various district attorneys, under the direction of the Attorney General of the United States, to prosecute for the recovery of the forfeiture. The costs and expenses of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States.

Whenever the Federal Trade Commission shall have reason to believe that an association or any agreement made or act done by such association is in restraint of trade within the United States or in restraint of the export trade of any domestic competitor of such association, or that an association either in the United States or elsewhere has entered into any agreement, understanding, or conspiracy, or done any act which artificially or intentionally enhances or depresses prices within the United States of commodities of the class exported by such association, or which substantially lessens competition within the United States or otherwise restrains trade therein, it shall summon such association, its officers, and agents to appear before it, and thereafter conduct an investigation into the alleged violations of law. Upon investigation, if it shall conclude that the law has been violated, it may make to such association recommendations for the readjustment of its business, in order that it may thereafter maintain its organization and management and conduct its business in accordance with law. If such association fails to comply with the recommendations of the Federal Trade Commission, said commission shall refer its findings and recommendations to the Attorney General of the United States for such action thereon as he may deem proper.

For the purpose of enforcing these provisions the Federal Trade Commission shall have all the powers, so far as applicable, given it in "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes."

Approved, April 10, 1918.

AN ACT To amend the Act approved December 23, 1913, known as the Federal Reserve Act.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act approved December 23, 1913, known as the Federal Reserve Act, as amended be further amended by adding a new section as follows:

Digitized by Google

"BANKING CORPORATIONS AUTHORIZED TO DO FOREIGN BANKING BUSINESS

"SEC. 25 (a). Corporations to be organized for the purpose of engaging in international or foreign banking or other international or foreign financial operations, or in banking or other financial operations in a dependency or insular possession of the United States, either directly or through the agency, ownership, or control of local institutions in foreign countries, or in such dependencies or insular possessions as provided by this section, and to act when required by the Secretary of the Treasury as fiscal agents of the United States, may be formed by any number of natural persons, not less in any case than five.

"Such persons shall enter into articles of association which shall specify in general terms the objects for which the association is formed and may contain any other provisions not inconsistent with law which the association may see fit to adopt for the regulation of its business and the conduct of its affairs.

"Such articles of association shall be signed by all of the persons intending to participate in the organization of the corporation and, thereafter, shall be forwarded to the Federal Reserve Board and shall be filed and preserved in its office. The persons signing the said articles of association shall, under their hands, make an organization certificate which shall specifically state:

"First. The name assumed by such corporation, which shall be subject to the approval of the Federal Reserve Board.

"Second. The place or places where its operations are to be carried on.

"Third. The place in the United States where its home office is to be located.

"Fourth. The amount of its capital stock and the number of shares into which the same shall be divided.

"Fifth. The names and places of business or residence of the persons executing the certificate and the number of shares to which each has subscribed.

"Sixth. The fact that the certificate is made to enable the persons subscribing the same, and all other persons, firms, companies, and corporations, who or which may thereafter subscribe to or purchase shares of the capital stock of such corporation, to avail themselves of the advantages of this section.

"The persons signing the organization certificate shall duly acknowledge the execution thereof before a judge of some court of record or notary public, who shall certify thereto under the seal of such court or notary, and thereafter the certificate shall be forwarded to the Federal Reserve Board to be filed and preserved in its office. Upon duly making and filing articles of association and an organization certificate, and after the Federal Reserve Board has approved the same and issued a permit to begin business, the association shall become and be a body corporate, and as such and in the name designated therein shall have power to adopt and use a corporate seal, which may be changed at the pleasure of its board of directors; to have succession for a period of twenty years unless sooner dissolved by the act of the shareholders owning two-thirds of the stock or by an Act of Congress or unless its franchises become forfeited by some violation of law; to make contracts; to sue and be sued, complain, and defend in any court of law or equity; to elect or appoint directors, all of whom shall be citizens of the United States; and, by its board of directors, to appoint such officers and employees as may be deemed proper, define their authority and duties, require bonds of them, and fix the penalty thereof, dismiss such officers or employees, or any thereof, at pleasure and appoint others to fill their places; to prescribe, by its board of directors, by-laws not inconsistent with law or with the regulations of the Federal Reserve Board regulating the manner in which its stock shall be transferred, its directors elected or appointed, its officers and employees appointed, its property transferred, and the privileges granted to it by law exercised and enjoyed.

"Each corporation so organized shall have power, under such rules and regulations as the Federal Reserve Board may prescribe:

"(a) To purchase, sell, discount, and negotiate, with or without its indorsement or guaranty, notes, drafts, checks, bills of exchange, acceptances, including bankers' acceptances, cable transfers, and other evidences of indebtedness; to purchase and sell, with or without its indorsement or guaranty, securities, including the obligations of the United States or of any State thereof but not including shares of stock in any corporation except as herein provided; to accept bills or drafts drawn upon it subject to such limitations and restrictions as the Federal Reserve Board may impose; to issue letters of credit; to purchase and sell coin, bullion, and exchange; to borrow and to lend money; to issue debentures, bonds, and promissory notes under such general

Digitized by Google

conditions as to security and such limitations as the Federal Reserve Board may prescribe, but in no event having liabilities outstanding thereon at any one time exceeding ten times its capital stock and surplus; to receive deposits outside of the United States and to receive only such deposits within the United States as may be incidental to or for the purpose of carrying out transactions in foreign countries or dependencies or insular possessions of the United States; and generally to exercise such powers as are incidental to the powers conferred by this Act or as may be usual, in the determination of the Federal Reserve Board, in connection with the transaction of the business of banking or other financial operations in the countries, colonies, dependencies, or possessions in which it shall transact business and not inconsistent with the powers specifically granted herein. Nothing contained in this section shall be construed to prohibit the Federal Reserve Board, under its power to prescribe rules and regulations, from limiting the aggregate amount of liabilities of any or all classes incurred by the corporation and outstanding at any one time. Whenever a corporation organized under this section receives deposits in the United States authorized by this section it shall carry reserves in such amounts as the Federal Reserve Board may prescribe, but in no event less than 10 per centum of its deposits.

"(b) To establish and maintain for the transaction of its business branches or agencies in foreign countries, their dependencies or colonies, and in the dependencies or insular possessions of the United States, at such places as may be approved by the Federal Reserve Board and under such rules and regulations as it may prescribe, including countries or dependencies not specified in the original organization certificate.

"(c) With the consent of the Federal Reserve Board to purchase and hold stock or other certificates of ownership in any other corporation organized under the provisions of this section, or under the laws of any foreign country or a colony or dependency thereof, or under the laws of any State, dependency, or insular possession of the United States but not engaged in the general business of buying or selling goods, wares, merchandise or commodities in the United States, and not transacting any business in the United States except such as in the judgment of the Federal Reserve Board may be incidental to its international or foreign business: *Provided, however,* That, except with the approval of the Federal Reserve Board, no corporation organized hereunder shall invest in any one corporation an amount in excess of 10 per centum of its own capital and surplus, except in a corporation engaged in the business of banking, when 15 per centum of its capital and surplus may be so invested: *Provided further,* That no corporation organized hereunder shall purchase, own, or hold stock or certificates of ownership in any other corporation organized hereunder or under the laws of any State which is in substantial competition therewith, or which holds stock or certificates of ownership in corporations which are in substantial competition with the purchasing corporation.

"Nothing contained herein shall prevent corporations organized hereunder from purchasing and holding stock in any corporation where such purchase shall be necessary to prevent a loss upon a debt previously contracted in good faith; and stock so purchased or acquired in corporations organized under this section shall within six months from such purchase be sold or disposed of at public or private sale unless the time to so dispose of same is extended by the Federal Reserve Board.

"No corporation organized under this section shall carry on any part of its business in the United States except such as, in the judgment of the Federal Reserve Board, shall be incidental to its international or foreign business: *And provided further,* That except such as is incidental and preliminary to its organization no such corporation shall exercise any of the powers conferred by this section until it has been duly authorized by the Federal Reserve Board to commence business as a corporation organized under the provisions of this section.

"No corporation organized under this section shall engage in commerce or trade in commodities except as specifically provided in this section, nor shall it either directly or indirectly control or fix or attempt to control or fix the price of any such commodities. The charter of any corporation violating this provision shall be subject to forfeiture in the manner hereinafter provided in this section. It shall be unlawful for any director, officer, agent, or employee of any such corporation to use or to conspire to use the credit, the funds, or the power of the corporation to fix or control the price of any such commodities, and any such person violating this provision shall be liable to a fine of not

Digitized by Google

less than $1,000 and not exceeding $5,000 or imprisonment not less than one year and not exceeding five years, or both, in the discretion of the court.

"No corporation shall be organized under the provisions of this section with a capital stock of less than $2,000,000, one-quarter of which must be paid in before the corporation may be authorized to begin business, and the remainder of the capital stock of such corporation shall be paid in installments of at least 10 per centum on the whole amount to which the corporation shall be limited as frequently as one installment at the end of each succeeding two months from the time of the commencement of its business operations until the whole of the capital stock shall be paid in. The capital stock of any such corporation may be increased at any time, with the approval of the Federal Reserve Board, by a vote of two-thirds of its shareholders or by unanimous consent in writing of the shareholders without a meeting and without a formal vote, but any such increase of capital shall be fully paid in within ninety days after such approval; and may be reduced in like manner, provided that in no event shall it be less than $2,000,000. No corporation, except as herein provided, shall during the time it shall continue its operations, withdraw or permit to be withdrawn, either in the form of dividends or otherwise, any portion of its capital. Any national banking association may invest in the stock of any corporation organized under the provisions of this section, but the aggregate amount of stock held in all corporations engaged in business of the kind described in this section and in section 25 of the Federal Reserve Act as amended shall not exceed 10 per centum of the subscribing bank's capital and surplus.

"A majority of the shares of the capital stock of any such corporation shall at all times be held and owned by citizens of the United States, by corporations the controlling interest in which is owned by citizens of the United States, chartered under the laws of the United States or of a State of the United States, or by firms or companies, the controlling interest in which is owned by citizens of the United States. The provisions of section 8 of the act approved October 15, 1914, entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes,' as amended by the acts of May 15, 1916, and September 7, 1916, shall be construed to apply to the directors, other officers, agents, or employees of corporations organized under the provisions of this section: *Provided, however,* That nothing herein contained shall (1) prohibit any director or other officer, agent or employee of any member bank, who has procured the approval of the Federal Reserve Board from serving at the same time as a director or other office, agent or employee of any corporation organized under the provisions of this section in whose capital stock such member bank shall have invested; or (2) prohibit any director or other officer, agent, or employee of any corporation organized under the provisions of this section, who has procured the approval of the Federal Reserve Board, from serving at the same time as a director or other officer, agent or employee of any other corporation in whose capital stock such first-mentioned corporation shall have invested under the provisions of this section.

"No member of the Federal Reserve Board shall be an officer or director of any corporation organized under the provisions of this section, or of any corporation engaged in similar business organized under the laws of any State, nor hold stock in any such corporation, and before entering upon his duties as a member of the Federal Reserve Board he shall certify under oath to the Secretary of the Treasury that he has complied with this requirement.

"Shareholders in any corporation organized under the provisions of this section shall be liable for the amount of their unpaid stock subscriptions. No such corporation shall become a member of any Federal reserve bank.

"Should any corporation organized hereunder violate or fail to comply with any of the provisions of this section, all of its rights, privileges, and franchises derived herefrom may thereby be forfeited. Before any such corporation shall be declared dissolved, or its rights, privileges, and franchises forfeited, any noncompliance with, or violation of such laws shall, however, be determined and adjudged by a court of the United States of competent jurisdiction, in a suit brought for that purpose in the district or territory in which the home office of such corporation is located, which suit shall be brought by the United States at the instance of the Federal Reserve Board or the Attorney General. Upon adjudication of such noncompliance or violation, each director and officer who participated in, or assented to, illegal act or acts, shall be liable in his personal or individual capacity for all damages which the said corporation

Digitized by Google

shall have sustained in consequence thereof. No dissolution shall take away or impair any remedy against the corporation, its stockholders, or officers for any liability or penalty previously incurred.

"Any such corporation may go into voluntary liquidation and be closed by a vote of its shareholders owning two-thirds of its stock.

"Whenever the Federal Reserve Board shall become satisfied of the insolvency of any such corporation, it may appoint a receiver who shall take possession of all of the property and assets of the corporation and exercise the same rights, privileges, powers, and authority with respect thereto as are now exercised by receivers of national banks appointed by the Comptroller of the Currency of the United States: *Provided, however*, That the assets of the corporation subject to the laws of other countries or jurisdictions shall be dealt with in accordance with the terms of such laws.

"Every corporation organized under the provisions of this section shall hold a meeting of its stockholders annually upon a date fixed in its by-laws, such meeting to be held at its home office in the United States. Every such corporation shall keep at its home office books containing the names of all stockholders thereof, and the names and addresses of the members of its board of directors, together with copies of all reports made by it to the Federal Reserve Board. Every such corporation shall make reports to the Federal Reserve Board at such times and in such form as it may require; and shall be subject to examination once a year and at such other times as may be deemed necessary by the Federal Reserve Board by examiners appointed by the Federal Reserve Board, the cost of such examinations, including the compensation of the examiners, to be fixed by the Federal Reserve Board and to be paid by the corporation examined.

"The directors of any corporation organized under the provisions of this section may, semiannually, declare a dividend of so much of the net profits of the corporation as they shall judge expedient; but each corporation shall, before the declaration of a dividend, carry one-tenth of its net profits of the preceding half year to its surplus fund until the same shall amount to 20 per centum of its capital stock.

"Any corporation organized under the provisions of this section shall be subject to tax by the State within which its home office is located in the same manner and to the same extent as other corporations organized under the laws of that State which are transacting a similar character of business. The shares of stock in such corporation shall also be subject to tax as the personal property of the owners or holders thereof in the same manner and to the same extent as the shares of stock in similar State corporations.

"Any corporation organized under the provisions of this section may at any time within the two years next previous to the date of the expiration of its corporate existence, by a vote of the shareholders owning two-thirds of its stock, apply to the Federal Reserve Board for its approval to extend the period of its corporate existence for a term of not more than twenty years, and upon certified approval of the Federal Reserve Board such corporation shall have its corporate existence for such extended period unless sooner dissolved by the act of the shareholders owning two-thirds of its stock, or by an Act of Congress or unless its franchise becomes forfeited by some violation of law.

"Any bank or banking institution, principally engaged in foreign business, incorporated by special law of any State or of the United States or organized under the general laws of any State or of the United States and having an unimpaired capital sufficient to entitle it to become a corporation under the provisions of this section may, by the vote of the shareholders owning not less than two-thirds of the capital stock of such bank or banking association, with the approval of the Federal Reserve Board, be converted into a Federal corporation of the kind authorized by this section with any name approved by the Federal Reserve Board: *Provided, however*, That said conversion shall not be in contravention of the State law. In such case the articles of association and organization certificate may be executed by a majority of the directors of the bank or banking institution, and the certificate shall declare that the owners of at least two-thirds of the capital stock have authorized the directors to make such certificate and to change or convert the bank or banking institution into a Federal corporation. A majority of the directors, after executing the articles of association and the organization certificate, shall have power to execute all other papers and to do whatever may be required to make its organization perfect and complete as a Federal corporation. The shares of any such corporation may continue to be for the same amount each as they were before the conversion, and the directors may continue to be directors of

Digitized by Google

the corporation until others are elected or appointed in accordance with the provisions of this section. When the Federal Reserve Board has given to such corporation a certificate that the provisions of this section have been complied with, such corporation and all its stockholders, officers, and employees, shall have the same powers and privileges, and shall be subject to the same duties, liabilities, and regulations, in all respects, as shall have been prescribed by this section for corporations originally organized hereunder.

"Every officer, director, clerk, employee, or agent of any corporation organized under this section who embezzles, abstracts, or willfully misapplies any of the moneys, funds, credits, securities, evidences of indebtedness or assets of any character of such corporation; or who, without authority from the directors, issues or puts forth any certificate of deposit, draws any order or bill of exchange, makes any acceptance, assigns any note, bond, debenture, draft, bill of exchange, mortgage, judgment, or decree; or who makes any false entry in any book, report, or statement of such corporation with intent, in either case, to injure or defraud such corporation or any other company, body politic or corporate, or any individual person, or to deceive any officer of such corporation, the Federal Reserve Board, or any agent or examiner appointed to examine the affairs of any such corporation; and every receiver of any such corporation and every clerk or employee of such receiver who shall embezzle, abstract, or willfully misapply or wrongfully convert to his own use any moneys, funds, credits, or assets of any character which may come into his possession or under his control in the execution of his trust or the performance of the duties of his employment; and every such receiver or clerk or employee of such receiver who shall, with intent to injure or defraud any person, body politic or corporate, or to deceive or mislead the Federal Reserve Board, or any agent or examiner appointed to examine the affairs of such receiver, shall make any false entry in any book, report, or record of any matter connected with the duties of such receiver; and every person who with like intent aids or abets any officer, director, clerk, employee, or agent of any corporation organized under this section, or receiver or clerk or employee of such receiver as aforesaid in any violation of this section, shall upon conviction thereof be imprisoned for not less than two years nor more than ten years, and may also be fined not more than $5,000, in the discretion of the court.

"Whoever being connected in any capacity with any corporation organized under this section represents in any way that the United States is liable for the payment of any bond or other obligation, or the interest thereon, issued or incurred by any corporation organized hereunder, or that the United States incurs any liability in respect of any act or omission of the corporation, shall be punished by a fine of not more than $10,000 and by imprisonment for not more than five years."

Approved, December 24, 1919.

GENERAL PROVISIONS APPLICABLE TO COAL, PHOSPHATE, SODIUM, OIL, OIL SHALE, AND GAS LEASES.

SEC. 26. That the Secretary of the Interior shall reserve and may exercise the authority to cancel any prospecting permit upon failure by the permittee to exercise due diligence in the prosecution of the prospecting work in accordance with the terms and conditions stated in the permit, and shall insert in every such permit issued under the provisions of this Act appropriate provisions for its cancellation by him.

SEC. 27. That no person, association, or corporation, except as herein provided, shall take or hold more than one coal, phosphate, or sodium lease during the life of such lease in any one State; no person, association, or corporation shall take or hold, at one time, more than three oil or gas leases granted hereunder in any one State, and not more than one lease within the geologic structure of the same producing oil or gas field; no corporation shall hold any interest as a stockholder of another corporation in more than such number of leases; and no person or corporation shall take or hold any interest or interests as a member of an association or associations or as a stockholder of a corporation

(H. R. 13138)

AN ACT To amend section 8 of an Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended May 15, 1916

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8 of an Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended by the Act of May 15, 1916, be further amended by inserting in the proviso at the end of the second clause of said section after the word "prohibit" the words "any private banker or," so that the proviso as amended shall read:

"*And provided further*, That nothing in this Act shall prohibit any private banker or any officer, director, or employee of any member bank or class A director of a Federal reserve bank, who shall first procure the consent of the Federal Reserve Board, which board is hereby authorized, at its discretion, to grant, withhold, or revoke such consent, from being an officer, director, or employee of not more than two other banks, banking associations, or trust companies, whether organized under the laws of the United States or any State, if such other bank, banking association, or trust company is not in substantial competition with such banker or member bank.

"The consent of the Federal Reserve Board may be procured before the person applying therefor has been elected as a class A director of a Federal reserve bank or as a director of any member bank."

Approved, May 26, 1920.

AMERICAN TELEPHONE & TELEGRAPH CO.,
195 Broadway, New York, November 29, 1935.

Dr. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
24 Fifth Avenue, New York, N. Y.

DEAR DR. SIROVICH: I am sending you herewith copy of the statement which you requested of me in your letter of the 19th instant.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

The COMMITTEE ON PATENTS,
House of Representatives, Washington, D. C.

GENTLEMEN: Your committee has invited me to prepare a brief statement presenting my views on the subject of patent pools and cross-licensing agreements and including my opinion on H. R. 4523. I might well plead lack of information or experience so far as patent pools are concerned, but I shall give my views for what they are worth.

In considering the subject of so-called patent pools, and cross-license agreements it is important first, to observe that the very purpose of the patent laws and of the constitutional provision under which they have been enacted is the creation of a monopoly for a limited time in the new thing as a reward to the inventor for bringing it into existence. The reward is admirably suited to the purpose; because if the invention is of large value, the 17-year monopoly is of corresponding large value; and if the invention is of small value, the 17-year monopoly is correspondingly of small value. In any case, the rights of the patentee extend only to the new thing created and do not deprive the public of anything which it had enjoyed before the invention was made. Judging this system of rewards by its results upon the industrial development of this country, it seems safe to say that it is highly effective and beneficial, and that this sort of monopoly is not adverse to the public interest, but on the contrary is, in the language of the Constitution, well adapted "to promote the progress of science and the useful arts."

Second, it is important to observe that though the patent purports to grant to the patentee "the exclusive right to make, use, and vend" the invention or discovery, the thing actually granted by the patent is not in fact the right to make, use, and vend the invention—that right is a common-law right—but is merely the right to exclude others from so doing. As the Supreme Court puts it in the early case of *Bloomer* v. *McQuewan* (14 How. 539–549), and reiterates in numerous cases:

"The franchise which the patent grants consists altogether in the right to exclude everyone from making, using, or vending the thing patented without the permission of the patentee. This is all he obtains by the patent."

Since by far the larger number of patents are merely for improvements on previous devices covered by unexpired patents, it is obvious that we have in the nature of the case a situation where no one of the patentees is in a position to produce and sell a thing of the most improved form without a license under the patent of someone else; that is, the person holding the improvement or specific patent cannot make, use, and sell his invention, because of the fact that he is excluded by the earlier basic or generic patent covering the device; and the person holding the basic patent cannot make, use, and sell the improved and commercially desirable form of the invention, because of the fact that he is excluded by the improvement patents of one or more other patentees. Obviously the interest of the patentees, as well as the best interest of the public in general, requires that the various patentees shall be free to enter into arrangements by which their inventions may be utilized to the best advantage of the patentees and the public. That the framers of the patent law understood this is clear from the fact that from early times provision was made for the assignment of patent rights. Section 4898 of the Revised Statutes (U. S. C., title 35, sec. 47) provides that:

Digitized by Google

"Every patent or any interest therein shall be assignable in law by an instrument in writing, and the patentee or his assigns or legal representatives may in like manner grant and convey an exclusive right under his patent to the whole or any specified part of the United States."

Under this beneficient provision of the law the situation I have just referred to, where no one is free to make and sell to the public some desirable commercial product, is taken care of; for one or more of the patentees can assign his rights to one or more of the others in a way which will permit them to make and sell to the public the best embodiment of the invention. Nonexclusive licenses under all of the needed patents granted to one or more individuals may also serve this same purpose. A nonexclusive license is in effect merely a right not to be sued under the patent. The granting of such a right or license is an obvious corollary of the patent grant itself and perhaps of the law permitting assignments, to which I have just referred.

The expression "patent pool" has been used in a variety of senses and often very loosely. If we suppose a condition where there are a considerable number of patents—basic patents and improvement patents relating to an industry—and if a number of individuals or companies who hold such patents get together and group their patents under a common control for their mutual benefit, and especially if they agree not to license anyone else to make, use, or sell the product in question, we have a situation which might perhaps properly be called a "patent pool." On the other hand, if we have a situation, such as I mentioned earlier, where basic patents and improvement patents are preventing the making and selling of desirable devices to the public, and the holders of these patents merely extend to each other nonexclusive licenses under their several patents, without making any agreement not to license others, so that it results that any one of those concerned may make and sell to the public the devices in question, it seems to me altogether a misnomer to refer to the arrangement as a patent pool. It is an arrangement quite distinct in character from the patent pool just referred to. But whatever it is called, it is, it seems to me, distinctly in the interest of the public as well as the patentees.

No real reason is seen for drawing a distinction, so far as the public is concerned, between a unilateral patent agreement such as an assignment or license on the one hand, and a cross-license agreement which is sometimes condemned as a "pool." In each case diversely controlled patent rights may be combined or transferred from one party to another. The mere fact that they are so combined by pools or cross-license agreements of such nature as to give rights to two or more parties, does not make it iniquitous, or against the public interest, any more than would be the combination of the patent rights in a single party brought about by assignments.

In short, patent pools and cross-license agreements are not bugbears to be frowned down on as such. They have their proper place and are capable of being of real value not only to the parties in interest but to the public in general. It would be unjust to condemn them indiscriminately. I do not mean to be understood as condoning or attempting to justify any arrangement, whether by assignment, license, cross-license, or otherwise, the purpose or effect of which is injuriously to lessen competition in commerce or to create a monopoly other than that which rightly arises from the grant of a patent. Throughout any consideration of patent pools and patent agreements, it should, however, be borne in mind that a patent is a lawful monopoly, and designedly a monopoly. To lose sight of this fundamental concept is likely to cause wandering on unsound ground.

I recognize, of course, the fact that a monopoly arising out of a patent may be quite a different thing from a monopoly arising out of an agreement relating to patents. Laws, other than patent laws, deal with the latter. The Supreme Court commented on this distinction in the Motion Pictures Patent Case (243 U. S. 502, 514) in the following language:

"The defect in this thinking springs from failure to distinguish between the rights which are given to the inventor by the patent laws * * * and the rights which he may create for himself by private contract, which, however, are subject to the rules of general, as distinguished from those of the patent law."

The existing Federal antitrust laws apply to a monopoly of patent monopolies as well as to any other monopoly. They are generally believed to be adequate to prevent any combination against the public interest. The Federal

Trade Commission is charged with the duty of investigating unfair methods of competition in commerce. It is empowered to issue an order to cease and desist from violation of the law, if such violation is found to be existent. The Federal Trade Commission may apply to the Federal courts for the enforcement of its orders. Furthermore, prosecution for violation of the anti-trust laws can be made in the Federal courts under the direction of the Attorney General. In addition, a party injured by such violation of the law has his own remedy by action for injunctive relief as well as an action for damages treble the amount actually sustained.

In the hearings thus far had by this committee it seems to be the consensus of opinion that the present laws are adequate and the methods of enforcement are likewise adequate. The sole thing needed seems to be some provision for throwing the light of publicity upon patent combinations, so that the parties charged with the enforcement of the law and the parties injured by its violation can more readily discover the violation. An attempt in that direction is House bill 4523, the purpose of which I endorse, that is to make a violation of the law readily ascertainable by requiring that all agreements effecting the transfer of rights under patents shall be recorded in the Patent Office.

Section 4898 of the Revised Statutes provides that:

"Every patent or an interest therein shall be assignable in law by an instrument in writing."

That act further provides that:

"An assignment, grant, or conveyance shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice unless it is recorded in the Patent Office within three months from the date thereof or prior to such subsequent purchase or mortgage."

An assignment of a patent conveys the entire title to that patent, or an undivided part of that title. It is a document of this nature that must be recorded to prevent the possibility of its becoming void. Such is not the requirement with respect to other patent agreements, for example, with respect to mere licenses. While section 4898 does not compel the recording of an assignment, grant, or conveyance, it does make such instrument void as against a bona fide purchaser for value without notice unless the instrument is recorded within the time specified. The object, of course, is to prevent fraud, and it seems equally desirable to prevent fraud in the case of other instruments which might affect the value of patent rights acquired by an innocent purchaser. As it is now, the patent owner can grant licenses which it is not necessary to record and which will be valid against a subsequent purchaser even though he had no notice of such license. The bill in question, H. R. 4523, in addition to furthering the main objects thereof, would partly remedy this situation.

The objects sought to be obtained by the bill therefore seem desirable. There are, however, some objectionable features in it as now drafted to which attention is called, though no doubt your committee is already aware of them.

Section 1 of H. R. 4523: This section provides for the recording of "every agreement by which rights in a plurality of patented inventions, rendered subject to common ownership, control or enjoyment", are involved. The language is too narrow in that the recording is required only in cases where a "plurality of patented inventions" is involved. It would seem, as above stated, that every document afecting an interest or a right under a patent should be recorded, if for no other reason than a deterrent to fraud. The language, on the other hand, is too broad in that it is capable of an interpretation requiring the recording of many documents that it would be useless or undesirable to record, as for example employee contracts, or supplementary agreements merely setting forth the real monetary consideration or license fee consideration.

Section 1 is further open to the objection that it does not specify by whom the recording shall be made. Perhaps the party receiving the grant should be the one having the duty to record; and in the case of a cross-license, where each party receives a grant, provision should be such that one recording of the agreement will suffice, though both parties may be held liable in case neither records the agreement.

It is to be noted that this section makes it mandatory to record, among other agreements, an assignment. Attention is called to the fact that section 4898, above referred to, also makes provision for the recording of an assignment, and provides quite a different penalty for the failure to record from that given in section 5 of H. R. 4523.

Digitized by Google

Section 2 specifies the Patent Office fees for recording. The fees specified are, as far as they go, identical with those now prescribed in section 4934, Revised Statutes, for the identical subject matter. Said section 4943 makes provisions for fees:

"For recording every assignment ,agreement, power of attorney, or other paper."

The language quoted is identical with that of section 2 of 4523. This section is therefore already the law and it is unnecessary to reenact it.

Said section 4934 specifies additional fees as follows:

"For each additional patent or application included or involved in one writing, where more than one is so included or involved, 50 cents additional."

This last mentioned requirement as to fees would also apply to the additional instruments required to be recorded under H. R. 4523, and should be taken into consideration in connection with section 3, which will now be discussed.

Section 3 requires that, "each agreement" shall contain a list of the patents to which such agreement relates or shall be accompanied by a supplemental statement containing such information. This, if literally complied with, would require a company which grants licenses under all of its unenumerated patents to record in each instance a complete list of such patents. The company of which I am an employee (American Telephone & Telegraph Co.) owns or controls approximately 9,000 patents and has granted approximately 200 licenses, most of which are under all of its patents, for the reason that the licensee, in securing his grant, naturally wishes to be protected against any of the company's present or future patents that might apply to the apparatus which he desires to manufacture. That company has also granted licenses under all of its patents to approximately 700 broadcasting stations. It seems that a single recording in the Patent Office of the list of such patents would suffice. Unless that be done, the very expense of recording the document would be a real deterrent to the granting of a license, whoever may have to pay the recording fee. Under the Patent Office fees above specified of 50 cents for each patent, each recording would require approximately $4,500 in recording fees. Of course this section should be rephrased so as to remove the objection referred to. Undoubtedly the practice of having agreements cover all patents of the grantor is quite general, and not peculiar to the American Telephone & Telegraph Co.

Section 4. Most licensees acquire by the license agreement rights under future patents of the grantor. Here, again, such addition of patents to the agreement already recorded would require, under the provisions of this section 4, the recording each 3 months with respects to each of the various agreements. A provision by which a single list of patents involved in a plurality of agreements is brought up to date every 3 months would suffice and would be practicable, whereas the section as now drafted would be unduly onerous and impracticable.

Section 5 provides a pecuniary penalty for failure to record a patent agreement, irrespective of its character. Section 4898 Revised Statutes, as above noted, provides quite a different penalty for the failure to record a particular kind of patent agreement, namely "an asignment, grant or conveyance." Thus, with respect to the latter, two forms of penalties would apply; whereas to the other types of patent agreements, only the penalties provided for in section 5 would apply.

There are undoubtedly thousands of persons who, during the life of existing patents, that is, the last 17 years, have acquired some kind of right under as many as two or three patents. The bill, apparently, is not aimed at such agreements and at such small holders of patent rights. Nevertheless, such persons, who would probably never know of this requirement, would by reason of it, be rendered subject to a penalty for failure to record.

Instead of having two penalties for failure to record "an assignment, grant or conveyance" and a single penalty for failure to record every other form of patent agreement, perhaps it would be preferable to provide that the penalty now applicable to assignments should be applicable to all patent agreements, and that, in addition to that penalty, the court may adjudge a civil penalty as provided in section 5. This would make the penalty for failure to record the same with respect to all patent agreements and would leave it to the discretion of the court as to whether or not a pecuniary penalty should be imposed.

Digitized by Google

Section 6 specifies four contingencies under which the Commissioner of Patents is required to file a certified copy of such agreement or agreements with the Federal Trade Commission. The second contingency is "if any of the agreements herein specified are against the public interest or the public welfare." The bill does not specify, as to this second contingency, who is to determine whether the agreements are against the public interest or the public welfare. The third contingency is: "If in the judgment of the Commissioner of Patents such agreements are against the public interest or the public welfare." Considering the thousands of instruments now on record and the many more thousands required to be recorded under the provisions of this bill, this section will apparently place upon the Commissioner of Patents a new type of duty with which he should not be burdened. It would seem that this entire section 6 might be omitted in view of the fact that the Federal Trade Commission, or the Attorney General, would have access to the Patent Office records, or copies thereof, for such consideration as they might wish to give to such agreements.

From the foregoing it would seem that the apparent objects attempted to be accomplished by the bill are desirable, but that there are numerous features thereof which should be carefully scrutinized and the objectionable features removed.

It would seem that more laws are not needed with respect to patent agreements. Enforcement of existing laws will suffice. It would seem that your committee will have done all that is needed by getting a bill enacted along the general lines of 4523 H. R., which will facilitate the endeavors of those charged with the enforcement of existing laws.

Yours very truly,

GEORGE E. FOLK.

J. I. CASE CO.,
Racine, Wis., January 10, 1936.

COMMITTEE ON PATENTS, HOUSE OF REPRESENTATIVES,
New York City.

(Attention of Mr. William I. Sirovich, chairman.)

GENTLEMEN: We have your letter of November 9 relative to cross-licensing and patent-pooling agreements. The company does not have any patent-pooling or cross-licensing agreements, therefore we take it that it is unnecessary to answer your questions in detail.

Yours very truly,

J. I. CASE CO.,
THEO. JOHNSON, *Secretary.*

PROPOSAL TO ESTABLISH AS A FEDERAL INDEPENDENT OFFICE IN WASHINGTON, D. C. A BUREAU OF INDUSTRIAL RESEARCH AND INVENTION FOR THE MUTUAL BENEFIT OF INVENTORS, PRODUCERS, AND THE GENERAL PUBLIC

From the four elements interested, that is, inventors, manufacturers of products, sellers of such products, and the general public, there have been growing demands for some sort of an official clearing house to meet present industrial conditions which are not cared for by present national institutions in such manner as to meet the conditions developed under technological advance and their application in the so-called machine age.

A privately endowed institution, the Mellon Institute of Research, established in Pittsburgh, Pa., has been quite successful in meeting certain conditions of the problem giving to manufacturers improved operation through new invention, while at the same time finding a market for the inventor's development. The purpose of this organization is set forth as follows: "The Mellon Institute is primarily an industrial station but the nature of its investigation procedure enables broad training to young scientists in research methods and in special subjects of technology. The institute recognizes the need of fundamental scientific research as a background and source of stimulus for industrial research."

The idea set forth is not new. Prior to 1617 Francis Bacon of England planned a palace of invention, a great temple of science where the pursuit of natural knowledge and its principals was to be organized on principles of

Digitized by Google

the highest efficiency. In 1906 Dr. Robert Kennedy Duncan, inspired by the thought of putting the proposal of Francis Bacon to practical test, interested Andrew W. Mellon and Richard B. Mellon, of Pittsburgh, in the establishment of "a palace of invention, a great temple of science", proposed by Bacon. In that year cooperation had begun in Europe and was just started in the United States between science and technology intended to function for the mutual advancement of both technology and science. Dr. Duncan's idea was to assist the manufacturers who desired to break away from traditional methods of production and to make more scientific that production already started on the road from tradition of science to practice.

By the systematic study of manufacturing problems under suitable conditions and by training young men for technical service, the Mellon Institute proposed a practical, partial solution of the general problem under the auspices of the University of Pittsburgh.

Eighty-five percent of the problems accepted for study, 1911–35, have been solved satisfactorily, and many chemists and chemical engineers have been trained in research methods and then placed in useful industrial positions.

Notable investigations have been carried out by the Mellon Institute on subjects in the following fields: Bread, byproduct coking, carbon dioxide, cellulose, citrus products, composition flooring, corrosion, dental products, edible gelatin, electrical precipitation, enameled ware, fertilizers, fiber containers, fish products, flotation of ores, food and beverage flavors, fuels, galvanizing, garment cleaning, glass, glue, heat insulation, hydrometallurgy of copper, inks, insecticides, laundering, magnesia products, matches, natural gas, nickel, olefine gases, organic synthesis, petroleum, protected metals, refractories, roofing materials, rubber compounding, smoke abatement, sodium silicate, stove enamels, sulfur, synthetic resins, vitamins, vitrified tile, wood chemicals, wrought iron, and zinc.

In addition to the work done by the Mellon Institute there has grown up a new profession in the United States for which there is yet no definitely accepted name, but it is generally referred to under the term "patent policy" under which are engaged a number of technical experts, some of whom are patent attorneys with practical experience, some of whom are practical inventors with patent law experience from the inventor's point of view. These individuals are the Mellon Institute and this individual method did splendid work but it does not quite meet the demands of present scientific technological production of manufacturers.

By an act of Congress approved March 3, 1901, a National Bureau of Standards was established in Washington, D. C. The functions of the bureau are exercised for the Federal Government, for State governments and, subject to reasonable fees, the general public. Its research and testing facilities are used to discover and evaluate standards of materials and to solve, if possible, basic technical problems and to establish improved bases for scientific experiment and designed for the improvement and great efficiency of technical control of industrial processes. The subjects handled by the National Bureau of Standards, include electricity, heat and power, optics, chemistry, mechanics and sound, fibrous material, metallurgy, clay and silicate products, weights and measures, simplified practice, trade standards, standardization of Government specifications for manufacturing articles.

The United States Patent Office recently absorbed into the Department of Commerce has behind it the history of the development of invention beginning with the first patent signed by President Washington and continued, uninterruptedly and expansively, to the present day to the issuing of 2 million patents for inventions. Out of this 2 million inventions a certain percentage embraces discoveries in the mechanical arts which radically changed the methods of production of old devices and brought into practice many new elements of mechanical manufacture and production by process of combination.

If the facilities of the National Bureau of Standards and those of the United States Patent Office were combined in some satisfactory manner so that the material elements of inventions, mechanical, process, method, or combination could be given practical tests and if, for the purpose of a clearing house for such inventions, a Bureau of Inventions could be established, many inventors of moment, with whom I have talked, think this new bureau would serve excellently in bringing out inventions that although patent are really latent.

The idea would have to be worked out in definite detail but I feel that it is the germ of an excellent method.

EDWIN FAIRFAX NAULTY.

AMERICAN TELEPHONE & TELEGRAPH CO.,
195 Broadway, New York, September 17, 1935.

Mr. O. A. WELSH, Jr.,
Investigator for the Committee on Patents of the House of Representatives,
Fifth Avenue Hotel, New York, N. Y.

DEAR SIR: This is to acknowledge receipt of your letters dated September 12, 1935, and September 13, 1935.

At our conference of September 11 I handed you a printed copy of "Substitute License Agreement B2 Between General Electric Co. and American Telephone & Telegraph Co. and Agreements Relating Thereto, Dated July 1, 1932." This printed copy includes the basic agreement between the American Telephone & Telegraph Co. and the Radio Corporation of America called for by paragraph 1 of your letter of September 12, 1935.

At your conference with Mr. Rose on September 12, he handed you a "Chronological List of Patents Owned and Controlled by the American Telephone & Telegraph Co. and its associate companies." This list includes all of the Bell System patents called for by paragraph 1 (*a*). As we do not have available any complete list of the patents owned by the Radio Corporation of America, we do not know precisely what patents of that corporation are covered by the basic agreement. You can doubtless obtain a list of the patents owned by the Radio Corporation of America, the General Electric Co., the Westinghouse Electric Manufacturing Co., etc., by applying to the owners of the patents. Such lists, together with the list of our patents which we have given you, will give you the information requested under paragraph 1 (*a*) of the letter of September 12, 1935.

With reference to paragraph 2 of your letter of September 12, there is no agreement between the American Telephone & Telepraph Co. and the Bell Laboratories, Inc. Consequently, there is no inventory of patents under this agreement as called for by paragraph 2 (*a*) nor any correspondence, memoranda, data, and records of accounts concerning this agreement as called by paragraph 2 (*b*) or any list of licensees as called for by paragraph 2 (*c*).

At our conference of September 11, I handed you a copy of the agreement between the American Bell Telephone Co. and the Western Electric Co. of Illinois, dated February 6, 1882, together with a copy of a modifying agreement of April 8, 1908, entered into between the American Bell Telephone Co. and the Western Electric Co. of Illinois. The copy of the 1882 agreement shows the changes made by the 1908 agreement in red ink. As the American Telephone & Telegraph Co. has succeeded to the rights of the American Bell Telephone Co. and the Western Electric Co., Inc., has succeeded to the rights of the Western Electric Co. of Illinois, the copies of the above agreements satisfy the requirements of paragraph 3 of your letter of September 12, 1935.

With regard to paragraph 3 (*a*), the list of patents handed you by Mr. Rose, as above referred to, includes all of the patents under the modified 1882 agreement.

With regard to paragraph 4 of the letter of September 12, 1935, we have already informed you orally that there is no basic agreement between the American Telephone & Telegraph Co. and the Electrical Research Products, Inc. We understand that under this paragraph you now want the agreement between the Western Electric Co., Inc., and the Electrical Research Products, Inc. With this understanding I have turned this matter over to Mr. E. J. Moriarty, general attorney of the Western Electric Co., Inc., who will communicate with you with reference to furnishing a copy of this agreement and the correspondence, memoranda, data, and records of accounts called for by paragraph 4 (*b*) as well as the list of licenses called for by paragraph 4 (*c*). As to the inventory of patents called for by paragraph 4 (*b*), the list of patents above referred to, which was handed to you by Mr. Rose, includes all of the patents under the agreement between the Western Electric Co. and Electrical Research Products, Inc.

With regard to the correspondence, memoranda, data, and records of accounts called for by paragraphs 1 (*b*) and 3 (*b*) in the letter of September 12, 1935, since copies of these documents are all to be found within the files of the Western Electric Co., Inc., or the Electrical Research Products, Inc., I have turned this matter over to Mr. Moriarty, who will advise you in due time as to furnishing the information requested.

As to the list of licensees called for by paragraphs 1 (*c*) and 3 (*c*), Mr. Moriarty is preparing these lists and will send them to you as soon as they

Digitized by Google

have been prepared. I understand that the work on the preparation of these lists is well under way.

Coming now to your letter of September 13, 1935, I am sending you herewith a photostat copy of a compilation entitled "Adjudicated Patents Owned or Controlled by the American Telephone & Telegraph Co." and also a photostat copy of a compilation entitled "Patents Owned or Controlled by the American Telephone & Telegraph Co. Which Are in the Process of Adjudication." These photostats are copies of documents already in our files which give you all of the information which we now have concerning suits for patent infringements filed by the American Telephone & Telegraph Co. as plaintiff or co-plaintiff since January 1, 1925. Insofar as the information called for does not appear in these documents, it is because we do not have the information at hand. As you will note, the information given in these documents is given with respect to individual patents sued upon and not with respect to individual suits. We are giving you the information in this form because it is immediately available. To compile this information under separate suits would involve certainly some considerable time and labor. Every suit to which we have been a party complainant will be covered under some one or another of the patents as listed in these photostats.

As to the notices of patent infringement sent out by the American Telephone & Telegraph Co., or in its name since January 1, 1925, I am sending you typewritten copies of the following letters:

G. E. Folk, general patent attorney, to General Radio Co., Cambridge, Mass., July 30, 1928.

G. E. Folk, General patent attorney, to Lemert Engineering Corporation, Wilmington, Calif., November 21, 1928.

G. E. Folk, general patent attorney, to Northern Electric Co., 908 Weston Avenue, Seattle, Wash, April 16, 1929.

G. E. Folk, general patent attorney, to Heintz and Kaufman, 219-223 Natoma Street, San Francisco, Calif., April 16, 1929.

G. E. Folk, general patent attorney, to General Industries, 63 Gorham Street, West Somerville, Mass., May 27, 1929.

G. E. Folk, general patent attorney, to Theodore H. Beard, supervising engineer, Dictaphone Corporation, Bridgeport, Conn., May 25, 1931.

G. E. Folk, general patent attorney, to Communication Equipment & Engineering Co., 2626 West Washington Boulevard, Chicago, Ill., May 13, 1932.

G. E. Folk, general patent attorney, to Brownlefone Co., 18 Napier Street, Oakland, Calif., April 5, 1933.

G. E. Folk, general patent attorney, to Radio Engineering Laboratories, Inc., 100 Wilbur Avenue, Long Island City, N. Y., May 18, 1933.

G. E. Folk, general patent attorney, to Leich Electric Co., Genoa, Ill., March 27, 1934.

G. E. Folk, general patent attorney, to Kellogg Switchboard & Supply Co., 1066 West Adams Street, Chicago, Ill., March 27, 1934.

G. E. Folk, general patent attorney, to C. C. Cole, 20 North Thorton Street, Orlando, Fla., October 8, 1934.

G. E. Folk, general patent attorney, to Van C. Norwood, 10 NW. Second Street, Evansville, Ind., November 7, 1934.

G. E. Folk, general patent attorney, to J. W. Miller Co., 5917 South Main Street, Los Angeles, Calif., November 12, 1934.

G. E. Folk, general patent attorney, to Lear Developments, Inc., 125 West Seventeenth Street, New York, N. Y., June 17, 1935.

G. E. Folk, general patent attorney, to Southern Electric & Transmission Co., 3513 Cleveland Street, Dallas, Tex., June 18, 1935.

G. E. Folk, general patent attorney, to Communication Equipment & Engineering Co., 2626 West Washington Boulevard, Chicago, Ill., June 19, 1935.

G. E. Folk, general patent attorney, to Kellogg Switchboard & Supply Co., 1066 West Adams Street, Chicago, Ill., June 19, 1935.

G. E. Folk, general patent attorney, to R. A. Clark, Jr., president, the Communication Equipment & Engineering Co., 2626 West Washington Boulevard, Chicago, Ill., July 12, 1935.

So far as I am aware, the above list comprises all of the notices of patent infringement sent out by the American Telephone & Telegraph Co. or in its name since January 1, 1925.

Very truly yours,

G. E. FOLK, *General Patent Attorney.*

3519 T
Contract No.____

This agreement made in triplicate at New York, New York, this _____ day of _____, 193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____ a _____ corporation of No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Theatre"):

Witnesseth, That in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric Sound Reproducing Equipment (hereinafter called the "Equipment") and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any electrical circuits or parts or any mechanical parts of the Equipment, or break any seal which may be placed thereon. The Equipment, or any parts thereof, which may have been previously used shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is: _____

_____

2. *Charges.*—(*a*) On the first Saturday of the term hereof as fixed by the provisions of Section 12 and on each Saturday thereafter during the term, except as otherwise provided in Section 12, the Exhibitor will pay Products the total of the following amounts:—

(1) The sum of _____ ($_____) Dollars.
for the lease and license to use the Equipment granted under Section 1.

(2) The sum of _____ ($_____) Dollars.
for the services to be rendered by Products pursuant to the provisions of paragraph (*a*), Section 7 and the schedule referred to therein.

(3) The sum of _____ ($_____) Dollars.
in consideration of Products' obligation to furnish repair and replacement parts in accordance with the provisions of paragraph (*b*), Section 7 and the schedule referred to therein.

The total amount to be paid weekly is _____ ($_____) Dollars.

(*b*) In addition to the charges referred to in paragraph (*a*) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of said equipment and parts to the Theatre.

3. *Abatement of Charges.*—(*a*) If during the term hereof the Exhibitor, not then being in default, shall close the Theatre temporarily for a continuous period of not less than one (1) week and shall have given Products not less than one (1) week's prior written notice thereof, Products shall abate the charges payable under paragraph (*a*), Section 2 for each full calendar week of the continuous period that the Theatre is thus inoperative, but such abatement shall not be effective for more than thirteen (13) weeks during any twelve (12) month period. The exhibitor shall give Products at least one (1) week's written notice of intention to resume the operation of the Theatre. In the event of any abatement of charges as referred to above, upon resumption of operation of the Theatre, the Exhibitor will pay Products a reconnection charge of Ten ($10.00) Dollars.

(*b*) Products, at its option, may seal the Equipment during any period for which the Exhibitor shall request any abatement of charges. If after such

Digitized by Google

sealing the Equipment shall be unsealed without authority from Products, the Theatre shall be deemed to have been in operation at all times for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

4. *Shipment of Equipment.*—The Equipment will be furnished f. o. b. Products' warehouse at Chicago, Illinois, or from such other point as Products may designate. If shipment shall be made from a point other than Chicago, Illinois, Products will assume any transportation charges in excess of those which would have applied had shipment been made to the Exhibitor from Chicago, Illinois. The Equipment will be shipped on or about _____, 193__. Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

5. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

6. *Installation of Equipment.*—(*a*) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(*b*) Products shall provide a service inspector and if deemed necessary by Products a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its service inspector at the Theatre on said date. Products will furnish the services of the service inspector and of the projectionist, if required, for a continuous period not to exceed three (3) days' services of one (1) man, without additional cost to the Exhibitor. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the service inspector shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of the period hereinabove referred to, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof, for any time in excess of the period during which the supervisory services are to be furnished without additional charge, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. During the period that Products' service inspector shall supervise the installation of the Equipment, Products will instruct the motion-picture operators of the Exhibitor in the manner and method of operating the Equipment.

7. *Inspection of Equipment and Furnishing of Parts.*—(*a*) Products shall inspect and service the Equipment in accordance with the provisions of Schedule _____ attached hereto. All of the terms and conditions of said schedule are made a part hereof.

(*b*) Provided that a charge shall have been inserted in subparagraph (3), paragraph (*a*), Section 2, Products shall furnish repair and replacement parts

Digitized by Google

for the Equipment in accordance with the provisions of Schedule R–R attached hereto, and in that event all of the terms and conditions of said schedule are made a part hereof.

8. *Title.*—Products shall retain title to all equipment, repair and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

10. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make the total weekly payments specified in paragraph (*a*), Section 2 hereof, or failure to pay taxes in accordance with Section 9 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing by or against the Exhibitor of any petition in bankruptcy or for reorganization under the Bankruptcy Act or any amendment thereto, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of the Theatre, or upon the Exhibitor ceasing to operate the Theatre (except as provided in Section 3), or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of, any apparatus or equipment furnished hereunder. The Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

11. *Surrender of equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts, tools and other accessories therefor which shall have been furnished by Products.

12. *Term.*—(*a*) This agreement shall be effective for an original term of three (3) years and a period equivalent to any period or periods of abatement of charges hereunder which may have occurred during said years, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performance, whichever date to be the earlier; provided however, that the term hereof and the payments to Products hereunder shall commence not later than thirty (30) days after the date of shipment of the Equipment.

(*b*) At the time specified in subparagraphs (1), (2) and (3) respectively of this paragraph, the Exhibitor may exercise the options referred to in paragraph (*c*) of this section if there shall have been paid to Products all charges then due hereunder and all charges due and to become due for any additional equipment supplied by Products for use in the Theatre and the specific sum set forth in subparagraphs (1) or (2) respectively in anticipation and discharge of the then unmatured payments specified in subparagraph (1), paragraph (*a*), Section 2. The said options shall be available:

(1) When fifty-two (52) payments shall have been made of the amounts specified in paragraph (*a*) Section 2, together with the sum of ---------- ($--------) Dollars; or

(2) When one hundred and four (104) payments shall have been made of the amounts specified in paragraph (*a*), Section 2, together with the sum of ---------- ($--------) Dollars; or

(3) When one hundred and fifty-six (156) payments shall have been made of the amounts specified in paragraph (*a*), Section 2.

(*c*) Upon complying with the conditions set forth in paragraph (*b*), the Exhibitor shall have the option to:—

(1) Terminate its obligation to make further payments under subparagraph (3), paragraph (*a*), Section 2, in which event Products' obligation to furnish

Digitized by Google

repair and replacement parts under paragraph (*b*), Section 7 shall also terminate; or,

(2) Terminate its obligation to make further payments under both subparagraphs (2) and (3), paragraph (*a*), Section 2, in which event Products' obligation to inspect and service the Equipment and to supply repair and replacement parts under paragraphs (*a*) and (*b*), Section 7 shall also terminate.

(*d*) The Exhibitor may also exercise either of the options referred to in subparagraphs (1) and (2) of paragraph (*c*) at the expiration of any subsequent term; provided that all charges hereunder and all charges due and to become due for any additional equipment shall have been paid on the date of termination. The phrase "subsequent term" shall mean any period of one (1) year subsequent to the original term (or subsequent to the prior termination of the obligations of paragraph (*b*) or of paragraphs (*a*) and (*b*), Section 7, as provided in paragraph (*c*)), plus a period equivalent to the period or periods of abatement of charges which may have occurred during said year. Products may also terminate the provisions of paragraph (*b*), Section 7, or the provisions of paragraphs (*a*) and (*b*), Section 7, and the payments related thereto at the expiration of the original term or at the expiration of any subsequent term. If either party shall desire to terminate the provisions of paragraph (*b*), Section 7, or the provisions of paragraphs (*a*) and (*b*), Section 7, as aforesaid, the other party shall be given written notice of such intention not less than sixty (60) days prior to the date of such termination. Notwithstanding the service of a notice by the Exhibitor as above provided, the exercise of any option above referred to shall be ineffective if the Exhibitor shall have failed to make payments to Products as above referred to, or shall otherwise be in default hereunder upon the stated date of termination. The provisions of Section 7 and the payments for services to be rendered thereunder shall continue in effect during subsequent terms until terminated in the manner hereinabove set forth.

(*e*) The lease and license to use the Equipment granted in Section 1 hereof shall continue in effect for a period of fifteen (15) years, commencing upon the date of expiration of the original term, or upon the termination of the obligations of paragraph (*b*) or of paragraphs (*a*) and (*b*), Section 7, as provided in paragraphs (*c*) or (*d*) of this section. During the said fifteen (15) year period, the Exhibitor shall not be obligated to make payment of that portion of the total weekly charges referred to in subparagraph (1), paragraph (*a*), Section 2, but in lieu thereof will pay for the lease and license to use the Equipment during said period the sum of One ($1.00) Dollar per annum in advance.

13. *Special Provisions.*—If this lease shall continue in force after the obligations of the parties under paragraph (*a*) of Section 7 have been terminated pursuant to Section 12:

(*a*) The Exhibitor shall hold and operate the Equipment during the remainder of the term hereof subject to the provisions of Sections 1, 8, 9, 10, 11, and 13, and of paragraphs (*e*) of Section 12 and (*d*) and (*e*) of Section 14 and Products shall have no obligation or responsibility except to permit use of the Equipment subject to the provisions of said sections.

(*b*) The Exhibitor shall carry such insurance covering the Equipment as it shall deem requisite.

(*c*) Products shall not be liable to defend or indemnify the Exhibitor on account of any infringement or claim of infringement of any patent relating to the Equipment or the use thereof. In the event, however, that any action or suit shall be brought against the Exhibitor alleging infringement of any patent by reason of the use of said Equipment by the Exhibitor, the Exhibitor shall immediately notify Products thereof (with written confirmation) and Products at its option shall have the right to take over and conduct at its own expense the defense of such action or suit.

14. *General Provisions.*—(*a*) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by

Digitized by Google

Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(*b*) Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment. Products shall not be responsible for any interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre (except for injury to Products' employees) arising from any cause whatsoever, for any damages resulting from delay or failure to deliver parts hereunder, or for any consequential damages whatsoever.

(*c*) Products shall provide facilities and personnel for performing the services herein referred to under normal operating conditions. Products shall not be liable for failure to perform said services if the Exhibitor shall fail to make the Theatre and theatre personnel available or when such failure to perform is due to other conditions beyond the control of Products, whether or not similar to the foregoing.

(*d*) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(*e*) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein, and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

This agreement made in triplicate at New York, New York, this _____ day of _____, 193__, by ELECTRICAL RESEARCH PRODUCTS INC., a Delaware corporation of No. 250 West 57th Street, New York, New York

Digitized by Google

(hereinafter called "Products"), and _____ a _____ corporation of No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Theatre"):

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of equipment and grant of license.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric Sound Reproducing Equipment (hereinafter called the "Equipment") and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any electrical circuits or parts or any mechanical parts of the Equipment, or break any seal which may be placed thereon. The Equipment, or any parts thereof, which may have been previously used shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is: _____

2. *Charges.*—(*a*) On the first Saturday of the term hereof as fixed by the provisions of Section 12 and on each Saturday thereafter during the term, except as otherwise provided in Section 12, the Exhibitor will pay Products the total of the following amounts:—

(1) The sum of _____ ($_____) Dollars for the lease and license to use the Equipment granted under Section 1.

(2) The sum of _____ ($_____) Dollars for the services to be rendered by Products pursuant to the provisions of paragraph (*a*), Section 7 and the schedule referred to therein.

(3) The sum of _____ ($_____) Dollars in consideration of Products' obligation to furnish repair and replacement parts in accordance with the provisions of paragraph (*b*), Section 7 and the schedule referred to therein.

The total amount to be paid weekly is _____ ($_____) Dollars.

(*b*) In addition to the charges referred to in paragraph (*a*) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of said equipment and parts to the Theatre.

3. *Abatement of Charges.*—(*a*) If during the term hereof the Exhibitor, not then being in default, shall close the Theatre temporarily for a continuous period of not less than one (1) week and shall have given Products not less than one (1) week's prior written notice thereof, Products shall abate the charges payable under paragraph (*a*), Section 2 for each full calendar week of the continuous period that the Theatre is thus inoperative, but such abatement shall not be effective for more than thirteen (13) weeks during any twelve (12) month period. The Exhibitor shall give Products at least one (1) week's written notice of intention to resume the operation of the Theatre. In the event of any abatement of charges as referred to above, upon resumption of operation of the Theatre, the Exhibitor will pay Products a reconnection charge of Ten ($10.00) Dollars.

(*b*) Products, at its option, may seal the Equipment during any period for which the Exhibitor shall request any abatement of charges. If after such sealing the Equipment shall be unsealed without authority from Products the Theatre shall be deemed to have been in operation at all times for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

Digitized by Google

4. *Shipment of Equipment.*—The Equipment will be furnished f. o. b. Products' warehouse at Chicago, Illinois, or from such other point as Products may designate. If shipment shall be made from a point other than Chicago, Illinois, Products will assume any transportation charges in excess of those which would have applied had shipment been made to the Exhibitor from Chicago, Illinois. The Equipment will be shipped on or about _____, 193__. Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

5. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

6. *Installation of Equipment.*—(*a*) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(*b*) Products shall provide a service inspector and if deemed necessary by Products a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its service inspector at the Theatre on said date. Products will furnish the services of the service inspector and of the projectionist, if required, for a continuous period not to exceed three (3) days' services of one (1) man, without additional cost to the Exhibitor. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the service inspector shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of the period hereinabove referred to, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof, for any time in excess of the period during which the supervisory services are to be furnished without additional charge, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. During the period that Products' service inspector shall supervise the installation of the Equipment, Products will instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment.

7. *Inspection of Equipment and Furnishing of Parts.*—(*a*) Products shall inspect and service the Equipment in accordance with the provisions of Schedule _____ attached hereto. All of the terms and conditions of said schedule are made a part hereof.

(*b*) Provided that a charge shall have been inserted in subparagraph (3), paragraph (a), Section 2, Products shall furnish repair and replacement parts for the Equipment in accordance with the provisions of Schedule R R attached hereto, and in that event all of the terms and conditions of said schedule are made a part hereof.

8. *Title.*—Products shall retain title to all equipment, repair and replacement parts, tools, drawings, and printed or written data applicable thereto.

Digitized by Google

All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

10. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make the total weekly payments specified in paragraph (*a*), Section 2 hereof, or failure to pay taxes in accordance with Section 9 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing by or against the Exhibitor of any petition in bankruptcy or for reorganization under the Bankruptcy Act or any amendment thereto, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of the Theatre, or upon the Exhibitor ceasing to operate the Theatre (except as provided in Section 3), or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to or right to possession of, any apparatus or equipment furnished hereunder. The Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

11. *Surrender of equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts, tools and other accessories therefor which shall have been furnished by Products.

12. *Term.*—(*a*) This agreement shall be effective for an original term of two (2) years and a period equivalent to any period or periods of abatement of charges hereunder which may have occurred during said years, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performance, whichever date be the earlier; provided however, that the term hereof and the payments to Products hereunder shall commence not later than thirty (30) days after the date of shipment of the Equipment.

(*b*) At the time specified in subparagraphs (1) and (2) respectively of this paragraph, the Exhibitor may exercise the options referred to in paragraph (*c*) of this section if there shall have been paid to Products all charges then due hereunder and all charges due and to become due for any additional equipment supplied by Products for use in the Theatre and the specific sum set forth in subparagraph (1) in anticipation and discharge of the then unmatured payments specified in subparagraph (1), paragraph (*a*), Section 2. The said options shall be available:

(1) When fifty-two (52) payments shall have been made of the amounts specified in paragraph (*a*), Section 2, together with the sum of_____ ($_____) Dollars; or

(2) When one hundred and four (104) payments shall have been made of the amounts specified in paragraph (*a*), Section 2.

(*c*) Upon complying with the conditions set forth in paragraph (*b*), the Exhibitor shall have the option to:—

(1) Terminate its obligation to make further payments under subparagraph (3), paragraph (*a*), Section 2, in which event Products' obligation to furnish repair and replacement parts under paragraph (*b*), Section 7, shall also terminate; or,

(2) Terminate its obligation to make further payments under both subparagraphs (2) and (3), paragraph (*a*), Section 2, in which event Products' obligation to inspect and service the Equipment and to supply repair and replacement parts under paragraphs (*a*) and (*b*), Section 7, shall also terminate.

(*d*) The Exhibitor may also exercise either of the options referred to in subparagraphs (1) and (2) of paragraph (*c*) at the expiration of any subse-

Digitized by Google

quent term; provided that all charges hereunder and all charges due and to become due for any additional equipment shall have been paid on the date of termination. The phrase "subsequent term" shall mean any period of one (1) year subsequent to the original term (or subsequent to the prior termination of the obligations of paragraph (*b*) or of paragraphs (*a*) and (*b*), Section 7, as provided in paragraph (*c*)), plus a period equivalent to the period or periods of abatement of charges which may have occurred during said year. Products may also terminate the provisions of paragraph (*b*), Section 7, or the provisions of paragraphs (*a*) and (*b*), Section 7, and the payments related thereto at the expiration of the original term or at the expiration of any subsequent term. If either party shall desire to terminate the provisions of paragraph (*b*), Section 7, or the provisions of paragraphs (*a*) and (*b*), Section 7, as aforesaid, the other party shall be given written notice of such intention not less than sixty (60) days prior to the date of such termination. Notwithstanding the service of a notice by the Exhibitor as above provided, the exercise of any option above referred to shall be ineffective if the Exhibitor shall have failed to make payments to Products as above referred to, or shall otherwise be in default hereunder upon the stated date of termination. The provisions of Section 7 and the payments for services to be rendered thereunder shall continue in effect during subsequent terms until terminated in the manner hereinabove set forth.

(*e*) The lease and license to use the Equipment granted in Section 1 hereof shall continue in effect for a period of fifteen (15) years, commencing upon the date of expiration of the original term, or upon the termination of the obligations of paragraph (*b*) or of paragraphs (*a*) and (*b*), Section 7, as provided in paragraphs (*c*) or (*d*) of this section. During the said fifteen (15) year period the Exhibitor shall not be obligated to make payment of that portion of the total weekly charges referred to in subparagraph (1), paragraph (*a*), Section 2, but in lieu thereof will pay for the lease and license to use the Equipment during said period the sum of One ($1.00) Dollar per annum in advance.

13. *Special Provisions.*—If this lease shall continue in force after the obligations of the parties under paragraph (*a*) of Section 7 have been terminated pursuant to Section 12:

(*a*) The Exhibitor shall hold and operate the Equipment during the remainder of the term hereof subject to the provisions of Sections 1, 8, 9, 10, 11, and 13, and of paragraphs (*e*) of Section 12 and (*d*) and (*e*) of Section 14 and Products shall have no obligation or responsibility except to permit use of the Equipment subject to the provisions of said sections.

(*b*) The Exhibitor shall carry such insurance covering the Equipment as it shall deem requisite.

(*c*) Products shall not be liable to defend or indemnify the Exhibitor on account of any infringement or claim of infringement of any patent relating to the Equipment or the use thereof. In the event, however, that any action or suit shall be brought against the Exhibitor alleging infringement of any patent by reason of the use of said Equipment by the Exhibitor, the Exhibitor shall immediately notify Products thereof (with written confirmation) and Products at its option shall have the right to take over and conduct at its own expense the defense of such action or suit.

14. *General Provisions.*—(*a*) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(*b*) Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment. Products shall not be responsible for any interruption in the operation of the Theatre or any equipment therein, or for any injury, loss or damage to persons or property in the Theatre

Digitized by Google

(except for injury to Products' employees) arising from any cause whatsoever, for any damages resulting from delay or failure to deliver parts hereunder, or for any consequential damages whatsoever.

(c) Products shall provide facilities and personnel for performing the services herein referred to under normal operating conditions. Products shall not be liable for failure to perform said services if the Exhibitor shall fail to make the Theatre and theatre personnel available, or when such failure to perform is due to other conditions beyond the control of Products, whether or not similar to the foregoing.

(d) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns and legal representatives.

(e) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

This agreement made in triplicate at New York, New York, this _____ day of _____, 193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____ a _____ corporation of No. _____ Street/Avenue, City of _____, State of _____ (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Avenue/Street, City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric

Digitized by Google

Sound Reproducing Equipment (hereinafter called the "Equipment"), and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time, and shall not, without Products' approval, or otherwise than under its supervision, change or modify any electrical circuits or parts or any mechanical parts of the Equipment, or break any seal which may be placed thereon. The Equipment, or any parts thereof, which may have been previously used shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is:

---

2. *Charges.*—(*a*) On the first Saturday of the term hereof as fixed by the provisions of Section 12, and on each Saturday thereafter during the term, except as otherwise provided in Section 12, the Exhibitor will pay Products the total of the following amounts:—

(1) The sum of _____ ($_____) Dollars for the lease and license to use the Equipment granted under Section 1.

(2) The sum of _____ ($_____) Dollars for the services to be rendered by Products pursuant to the provisions of paragraph (*a*), Section 7, and the schedule referred to therein.

(3) The sum of _____ ($_____) Dollars in consideration of Products' obligation to furnish repair and replacement parts in accordance with the provisions of paragraph (*b*), Section 7, and the schedule referred to therein.

The total amount to be paid weekly is _____ ($_____) Dollars.

(*b*) In addition to the charges referred to in paragraph (*a*) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder, and shall arrange for any trucking and handling necessary to effect delivery of said equipment and parts to the Theatre.

3. *Abatement of Charges.*—(*a*) If, during the term hereof, the Exhibitor, not then being in default, shall close the Theatre temporarily for a continuous period of not less than one (1) week and shall have given Products not less than one (1) week's prior written notice thereof, Products shall abate the charges payable under paragraph (*a*), Section 2 for each full calendar week of the continuous period than the Theatre is thus inoperative, but such abatement shall not be effective for more than thirteen (13) weeks during any twelve (12) month period. The Exhibitor shall give Products at least one (1) week's written notice of intention to resume the operation of the Theatre. In the event of any abatement of charges as referred to above, upon resumption of operation of the Theatre, the Exhibitor will pay Products a reconnection charge of Ten ($10.00) Dollars.

(*b*) Products, at its option, may seal the Equipment during any period for which the Exhibitor shall request any abatement of charges. If after such sealing the Equipment shall be unsealed without authority from Products, the Theatre shall be deemed to have been in operation at all times for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

4. *Shipment of Equipment.*—The Equipment will be furnished f. o. b. Products' warehouse at Chicago, Illinois, or from such other point as Products may designate. If shipment shall be made from a point other than Chicago, Illinois, Products will assume any transportation charges in excess of those which would have applied had shipment been made to the Exhibitor from Chicago, Illinois. The Equipment will be shipped on or about _____, 193__. Products

shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

5. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment, and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

6. *Installation of Equipment.*—(*a*) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products, and Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(*b*) Products shall provide a service inspector, and if deemed necessary by Products, a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date, shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its service inspector at the Theatre on said date. Products will furnish the services of the service inspector and of the projectionist, if required, for a continuous period not to exceed three (3) days' services of one (1) man, without additional cost to the Exhibitor. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the service inspector shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of the period hereinabove referred to, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof, for any time in excess of the period during which the supervisory services are to be furnished without additional charge, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. During the period that Products' service inspector shall supervise the installation of the Equipment, Products will instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment.

7. *Inspection of Equipment and Furnishing of Parts.*—(*a*) Products shall inspect and service the Equipment in accordance with the provisions of Schedule _____ attached hereto. All of the terms and conditions of said schedule are made a part hereof.

(*b*) Provided that a charge shall have been inserted in subparagraph (3), paragraph (*a*), Section 2, Products shall furnish repair and replacement parts for the Equipment in accordance with the provisions of Schedule R R attached hereto, and in that event all of the terms and conditions of said schedule are made a part hereof.

8. *Title.*—Products shall retain title to all equipment, repair and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the

Digitized by Google

Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

10. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make the total weekly payments specified in paragraph (*a*), Section 2, hereof, or failure to pay taxes in accordance with Section 9 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing by or against the Exhibitor of any petition in bankruptcy or for reorganization under the Bankruptcy Act or any amendment thereto, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of the Theatre, or upon the Exhibitor ceasing to operate the Theatre (except as provided in Section 3), or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of, any apparatus or equipment furnished hereunder. The Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

11. *Surrender of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment, together with all repair and replacement parts, tools, and other accessories therefor which shall have been furnished by Products.

12. *Terms.*—(a) This agreement shall be effective for an original term of one (1) year and a period equivalent to any period or periods of abatement of charges hereunder which may have occurred during said year, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder shall commence not later than thirty (30) days after the date of shipment of the Equipment.

(*b*) If total weekly charges set forth in paragraph (*a*), Section 2, shall have been paid for fifty-two (52) weeks, and if all other charges hereunder and all charges due or to become due for any additional equipment supplied by Products for use in the Theatre, shall have been paid to Products, the Exhibitors may, at the expiration of the original term;

(1) Terminate its obligation to make further payments under subparagraph (3), paragraph (*a*), Section 2, in which event Products' obligation to furnish repair and replacement parts under paragraph (*b*), Section 7, shall also terminate; or

(2) Terminate its obligation to make further payments under both subparagraphs (2) and (3), paragraph (*a*), Section 2, in which event Products' obligation to inspect and service the Equipment and to supply repair and replacement parts under paragraphs (*a*) and (*b*), Section 7, shall also terminate.

The Exhibitor may also exercise either of the rights of termination referred to in paragraph (1) or (2) above at the expiration of any subsequent term; provided, that all charges hereunder and all payments for additional equipment shall have been paid on the date of termination. The phrase "subsequent term" shall mean any period of one (1) year subsequent to the original term plus a period equivalent to the period or periods of abatement of charges which may have occurred during said year. Products may also terminate the provisions of paragraph (*b*), Section 7, or the provisions of paragraphs (*a*) and (*b*), Section 7 and the payments related thereto at the expiration of the original term or at the expiration of any subsequent term. If either party shall desire to terminate the provisions of paragraph (*b*), Section 7, or the provisions of paragraphs (*a*) and (*b*), Section 7, as aforesaid, the other party shall be given written notice of such intention not less than sixty (60) days prior to the date of such termination. Notwithstanding the service of a notice by the Exhibitor as above provided, the exercise of any right of termination above referred to shall be ineffective if the Exhibitor shall have failed to make the

Digitized by Google

payments to Products as above referred to, or shall otherwise be in default hereunder upon the stated date of termination. The provisions of Section 7 and the payments for services to be rendered thereunder shall continue in effect during subsequent terms until terminated in the manner hereinabove set forth.

(*c*) The lease and license to use the Equipment granted in Section 1 hereof shall continue in effect for a period of fifteen (15) years, commencing upon the date of expiration of the original term. During the said fifteen (15) year period the Exhibitor shall not be obligated to make payment of that portion of the total weekly charges referred to in subparagraph (1), paragraph (*a*), Section 2, but in lieu thereof will pay for the lease and license to use the Equipment during said period the sum of One ($1.00 Dollar per annum in advance.

13. *Special Provisions.*—If this lease shall continue in force after the obligations of the parties under paragraph (*a*) of Section 7 have been terminated pursuant to Section 12:

(*a*) The Exhibitor shall hold and operate the Equipment during the remainder of the term hereof subject to the provisions of Sections 1, 8, 9, 10, 11, and 13, and of paragraphs (*c*) of Section 12 and (*d*) and (*e*) of Section 14 and Products shall have no obligation or responsibility except to permit use of the Equipment subject to the provisions of said sections.

(*b*) The Exhibitor shall carry such insurance covering the Equipment as it shall deem requisite.

(*c*) Products shall not be liable to defend or indemnify the Exhibitor on account of any infringement or claim of infringement of any patent relating to the Equipment or the use thereof. In the event, however, that any action or suit shall be brought against the Exhibitor, alleging infringement of any patent by reason of the use of said Equipment by the Exhibitor, the Exhibitor shall immediately notify Products thereof (with written confirmation) and Products at its option shall have the right to take over and conduct, at its own expense, the defense of such action or suit.

14. *General Provisions.*—(*a*) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(*b*) Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment. Products shall not be responsible for any interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre (except for injury to Products' employees) arising from any cause whatsoever, for any damages resulting from delay or failure to deliver parts hereunder, or for any consequential damages whatsoever.

(*c*) Products shall provide facilities and personnel for performing the services herein referred to under normal operating conditions. Products shall not be liable for failure to perform said services if the Exhibitor shall fail to make the Theatre and theatre personnel available or when such failure to perform is due to other conditions beyond the control of Products, whether or not similar to the foregoing.

(*d*) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(*e*) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

WAIVER

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment by Electrical Research Products, Inc., of the sum of One ($1.00) Dollar, receipt of which is hereby acknowledged, the undersigned parties having an interest in the Theatre referred to in said agreement as owner or lessor thereof, hereby consent(s) to the installation of said Equipment and waive(s) any and all rights or claims thereto of whatsoever kind or nature which I/we have or may hereafter acquire as landlord(s) of said Theatre, which might or could in any manner interfere with any rights of Electrical Research Products, Inc., in or to said Equipment.

Dated this _____ day of _____, 193__.

_____
Owner of Theatre.

_____
Lessor of Theatre (other than Owner).

Attach proper schedule or schedules before this agreement is signed by the Exhibitor.

Contract No._____

This agreement, made in triplicate at New York, New York, this_____day of_____193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and_____, a _____ corporation, of No._____Street/Avenue, City of_____, State of_____ (hereinafter called the "Exhibitor"), the operator of the_____Theatre at No._____Street/Avenue, City of_____, State of _____ (hereinafter called the "Theatre");

WITNESSETH

Whereas, under a certain agreement dated_____, 19__, between Products and the Exhibitor, or an assignor of the Exhibitor (hereinafter referred to as the "Original Agreement"), Products furnished for use in the Theatre a Western Electric Sound Reproducing Equipment which is now installed in the Theatre and is owned by Products; and

Whereas, the Exhibitor desires to terminate the Original Agreement and all Agreements supplemental thereto relating to the use in the Theatre of said sound reproducing equipment or additional equipment or parts which may have

Digitized by Google

been furnished to the Exhibitor by Products prior to the date referred to in Section 1 hereof (all of said equipment, additional equipment and parts being hereinafter collectively referred to as the "Equipment") and to enter into a new agreement with respect to the Equipment upon the terms and conditions hereinafter set forth;

Now therefore, in consideration of the premises and of the covenants and conditions herein set forth, the parties agree as follows:

1. The Original Agreement and all agreements supplemental thereto heretofore entered into between the parties with respect to the Equipment, shall terminate in all respects on_____, 193__. On or before said date the Exhibitor will pay to Products all sums accruing to Products under said agreements to and including said date. The Exhibitor hereby releases and discharges Products may be required to pay, but nothing herein contained shall be deemed respect to any existing or future infringement or claim of infringement of any patent relating to said equipment or the use thereof under said agreements.

2. Subject to the provisions of Section 1 hereof, Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products the Equipment for a term of fifteen (15) years commencing on the date of termination of the Original Agreement and agreements supplemental thereto, as referred to in Section 1 hereof. Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive license to use the Equipment in the Theatre solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents relating to said Equipment or to such use thereof, in respect of which Products now has the right to grant such license. The Equipment shall be held and operated by the Exhibitor without responsibility of any character on the part of Products for the functioning of or damage to the Equipment, or damage to the Theatre or its contents, or to persons, growing out of the possession or use of the Equipment, and the Exhibitor shall hold Products harmless from all such risks. The Exhibitor shall carry such insurance covering the Equipment as it shall deem requisite. Products shall not be liable to defend or indemnify the Exhibitor on account of any infringement or claim of infringement of any patent relating to the Equipment, or the use thereof. In the event, however, that any action or suit shall be brought against the Exhibitor alleging infringement of any patent by reason of the use of said Equipment by the Exhibitor, the Exhibitor shall immediately notify Products thereof (with written confirmation) and Products at its option shall have the right to take over and conduct at its own expense the defense of such action or suit.

3. The Exhibitor shall pay to Products as rental for the Equipment on the first day of each year of the term hereof, the sum of One ($1.00) Dollar, shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with, or which may apply to the Equipment, and shall reimburse Products promptly for any such taxes which Products may be required to pay, but nothing herein contained shall be deemed to prevent the Exhibitor from contesting, or litigating, any such taxes to the extent deemed desirable, before paying the same.

4. Products shall retain full title to the Equipment, and upon any termination of this agreement (which may be terminated by Products in the event of failure of the Exhibitor to pay the charges and taxes referred to in Section 3 hereof, or upon the insolvency, or bankruptcy of the Exhibitor), the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear only excepted, together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photo-electric cells and exciting lamps), and all tools and other accessories which shall have been furnished by Products.

5. This agreement shall be binding upon the parties and their respective successors, assigns, and legal representatives, but may not be assigned either voluntarily or involuntarily by the Exhibitor without the written consent of Products. The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

_____

This agreement made in triplicate at New York, New York, this _____ day of _____, 193__, by Electrical Research Products, Inc., a Delaware corporation, of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____, a _____ _____ corporation, of No. _____ Street/Avenue, City of _____, State of _____ (hereinafter called the "Exhibitor"), the operator of the _____ Theatre, at No._____ _____ Street/Avenue, City of _____, State of _____ _____ (hereinafter called the "Theatre");

Witnesseth, That in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric Sound Reproducing Equipment (hereinafter called the "Equipment"), and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products approval, or otherwise than under its supervision, change or modify any electrical circuits or parts or any mechanical parts of the Equipment, or break any seal which may be placed thereon. The Equipment, or any parts thereof, which may have been previously used shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is:

---

2. *Charges.*—(a) The Exhibitor will pay Products the following sums:

(1) _____ ($_____) Dollars upon submission of this agreement for acceptance;

(2) _____ ($_____) Dollars upon the date the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performance, whichever date be the earlier, or in any event not later than thirty (30) days after shipment of the Equipment; and

(3) The sum of One ($1.00) Dollar per year, payable in advance, commencing with the second year of the term hereof.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of said equipment and parts to the Theatre.

3. *Shipment of Equipment.*—The Equipment will be furnished f. o. b. Products' warehouse at Chicago, Illinois, or from such other point as Products may designate. If shipment shall be made from a point other than Chicago, Illinois, Products will assume any transportation charges in excess of those which would

Digitized by Google

have applied had shipment been made to the Exhibitor from Chicago, Illinois. The Equipment will be shipped on or about _____, 193__. Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

4. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment, and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

5. *Installation of Equipment.*—(a) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products, and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection wth the installation of the Equipment.

(b) Products shall provide a service inspector, and if deemed necessary by Products, a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its service inspector at the Theatre on said date. The services of the service inspector, and projectionist, if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the premilinary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the service inspector shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. At the time of installation Products shall instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period not to exceed three (3) days.

6. *Title.*—Products shall retain title to all equipment, repair and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

7. *Patent Protection.*—Products, at its own expense, shall defend any and all actions and suits alleging infringement during the first year of the term hereof of any United States patent by reason of the use of the Equipment, as and for the purposes furnished, which may be brought against the Exhibitor during said first year or within one year after said first year, and will pay and satisfy all judgments or decrees for profits, damages, or costs which may be finally awarded against the Exhibitor in any such action or suit on account of such infringement by the court of last resort to which any such action or suit is taken, and if such use shall be prevented by an injunction in such suit, Products, at its option, may replace said equipment with suitable non-infringing equipment or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if within thirty (30) days from the date any such injunction becomes effective, Products does not thus replace or modify the Equipment or procure for the Exhibitor the right to

Digitized by Google

continue to use the same, either party may upon thirty (30) days' written notice terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore, or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided, however, that the obligations of Products referred to in this section, shall not apply to uses of the Equipment or any part or parts thereof in combination with other apparatus or parts not furnished by Products therefor, if the alleged infringement results directly or indirectly from such combination or use of apparatus or parts not furnished by Products, and that the liability of Products hereunder shall in no event exceed the aggregate amount paid to Products hereunder. If at the time of, or after the commencement of, any such action or suit, the Exhibitor is in default, or should default in its obligations to Products hereunder, or shall have assigned this agreement without the consent of Products, or removed the Equipment from its installed location in the Theatre without the written consent of Products, or if in respect of, or because of any such action or suit, or any threat thereof, the Exhibitor shall, without Products' written consent, make an independent settlement with the owner or owners of the patent or patents alleged to be infringed, Products shall not be subject to the obligations referred to in this section, but may, at its option, undertake or continue the defense of any such action or suit at its own expense. The Exhibitor shall give Products immediate notice (with written confirmation) of all claims of such infringement and of all such actions or suits and full opportunity and authority to assume the sole defense thereof, including appeals; shall not in any manner prejudice Products' defense of any such action or suit, and shall furnish Products, upon request, all information and assistance available to the Exhibitor for such defense, and in all other respects cooperate fully with Products in the defense of any such action or suit. The liability of Products to the Exhibitor for any infringement by reason of the use of the Equipment shall be limited to the agreements herein contained.

8. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be requred to pay.

9. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make payment of charges referred to in Section 2 hereof or failure to pay taxes in accordance with Section 8 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing by or against the Exhibitor of any petition in bankruptcy or for reorganization under the Bankruptcy Act or any amendment thereto, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhbitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or upon the Exhibitor ceasing to operate the Theatre, or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt or assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of, any apparatus or equipment furnished hereunder.

10. *Surrender of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools, and other accessories which shall have been furnished by products.

11. *Term.*—This agreement shall be effective for a term of fifteen (15) years from the date hereof.

12. *General Provisions.*—(a) The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's

Digitized by Google

employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(b) Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment. Products shall not be responsible for any interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre (except for injury to Products' employees) arising from any cause whatsoever, for any damages resulting from delay or failure to deliver parts hereunder, or for any consequential damages whatsoever.

(c) Products shall provide facilities and personnel for performing the services herein referred to under normal operating conditions. Products shall not be liable for failure to perform said services if the Exhibitor shall fail to make the Theatre and theatre personnel available or when such failure to perform is due to other conditions beyond the control of Products, whether or not similar to the foregoing.

(d) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(e) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

Digitized by Google

1. *Lease of Equipment.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric Sound Reproducing Equipment (hereinafter called the "Equipment") and subject to the terms, conditions, and limitations herein contained, Products grants to the Exhibitor a non-exclusive, non-assignable license to use the Equipment in the Theatre solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures, and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any electrical circuits or parts or any mechanical parts of the Equipment or break any seal which may be placed thereon. The Equipment or any parts thereof which may have been previously used shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is:

---

2. *Charges.*—(a) The Exhibitor will pay Products the sum of _____ ($_____) Dollars upon submission of this agreement for Products' acceptance. On the first Saturday of the term hereof, as fixed by the provisions of Section 15, and on each and every Saturday thereafter during said term, the Exhibitor will pay Products the sum of _____ ($_____) Dollars.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor will pay all transportation and handling charges on all equipment and parts therefor (other than repair and replacement parts furnished in accordance with the provisions of Section 8) which may be furnished hereunder and will arrange for any trucking and handling necessary to effect delivery of said equipment and parts to the Theatre.

3. *Abatement of Charges.*—(a) If during the term hereof the Exhibitor, not then being in default, shall close the Theatre temporarily for a continuous period of not less than one (1) week and shall have given Products not less than one (1) week's prior written notice thereof, Products shall abate the charges payable hereunder for each full calendar week of the continuous period that the Theatre is thus inoperative, but such abatement shall not be effective for more than thirteen (13) weeks during any twelve (12) month period. The Exhibitor shall give Products at least one (1) week's written notice of intention to resume the operation of the Theatre. In the event of any abatement of charges as referred to above, upon resumption of operation of the Theatre, the Exhibitor will pay Products a reconnection charge of Ten ($10.00) Dollars.

(b) Products, at its option, may seal the Equipment during any period for which the Exhibitor shall request any abatement of charges. If after such sealing the Equipment shall be unsealed without authority from Products the Theatre shall be deemed to have been in operation at all times for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

4. *Shipment of Equipment.*—The Equipment will be furnished f. o. b. Products' warehouse at Chicago, Illinois, or from such other point as Products may designate. If shipment shall be made from a point other than Chicago, Illinois, Products will assume any transportation charges in excess of those which would have applied had shipment been made to the Exhibitor from Chicago, Illinois. The Equipment will be shipped on or about _____, 193__. Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

5. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space, properly ventilated, for the installation of storage batteries and charging equipment or other power equipment, and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

Digitized by Google

6. *Installation of Equipment.*—(a) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products, and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(b) Products shall provide a service inspector, and if deemed necessary by Products, a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its service inspector at the Theatre on said date. Products will furnish the services of the service inspector and of the projectionist, if required, for a continuous period not to exceed three (3) days' services of one (1) man, without additional cost to the Exhibitor. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the service inspector shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of the period herein above referred to, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five (35) Dollars per man per day or fraction thereof, for any time in excess of the period during which the supervisory services are to be furnished without additional charge, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. During the period that Products' service inspector shall supervise the installation of the Equipment, Products will instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment.

7. *Inspection of Equipment.* (a) At the time of installation, Products will adjust the Equipment to obtain the best quality, in Products' opinion, of sound reproduction in the Theatre under average audience conditions. Products will then determine by a transmission test the normal limits of gain, frequency response, and maximum undistorted power output level of the Equipment so adjusted, and will furnish the Exhibitor a transmission test report setting forth these operating characteristics and stating the normal limits within which the Equipment should function. This transmission test report shall become the standard of performance of the Equipment in the Theatre. If alterations, modifications, or additions shall be made to the Equipment under Products' direction and in accordance with its specifications, Products will readjust the Equipment and furnish the Exhibitor with a revised transmission test report which shall then become the standard of performance of the Equipment in the Theatre.

(b) Products shall make _____ (_____) regular service calls during each fifty-two (52) weeks of the term hereof that the Theatre shall be in operation, for the purpose of inspecting and testing the electrical and mechanical components of the Equipment and its operation to assist the Exhibitor to keep the Equipment operating within the normal limits of performance as specified above.

(c) In addition to the regular service calls, upon request of the Exhibitor, or a representative of the Exhibitor, Products shall furnish emergency service for the Equipment, subject to the limitations of its normal facilities and personnel available for rendering the services referred to in this section. Upon receipt of a communication from the Exhibitor requesting emergency service required by any emergency arising with respect to the operation of the Equipment, Products will send a service inspector to examine the Equipment and advise respecting corrective action. Products' obligation to render emergency service without additional cost to the Exhibitor shall be limited to two (2) such emergency service calls during each fifty-two (52) weeks of the term

Digitized by Google

hereof that the Theatre shall be in operation. Upon request of the Exhibitor, Products will furnish additional emergency service at a charge of Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services. The charges for such emergency services shall be payable upon rendition of billing therefor.

8. *Repair and Replacement Parts.*—(a) During the term of this agreement Products will furnish repair and replacement parts (including vacuum tubes, photoelectric cells, exciting lamps, and rectifier bulbs, but excluding storage batteries) for the sound heads, faders, amplifiers, loudspeakers, motors, control cabinets, and drives of the Equipment, as from time to time shall be required for the normal maintenance and operation of the Equipment, but Products shall not be obligated to furnish repair or replacement parts which may be required by reason of misuse, abuse, or negligence in the operation of the Equipment.

(b) All parts furnished hereunder (other than those regularly carried in the Theatre as spare parts) shall be installed by the Exhibitor under Products' supervision and in accordance with Products' directions. All used parts removed from the Equipment shall be delivered to Products by the Exhibitor, and Products shall not be required to replace any parts unless the Exhibitor so delivers the equivalent used parts. Products shall not be required to repair or replace any parts or equipment other than parts or equipment which it shall have furnished for use in the Theatre.

(c) Parts furnished by Products hereunder shall be used only as spare or replacement parts for the Equipment, and shall be deemed a part of said Equipment and subject to all of the terms and conditions of this agreement with the same effect as if said parts had been incorporated in the equipment as originally furnished hereunder.

(d) Products will pay all transportation charges on parts furnished hereunder and on the return of replaced parts to it at Chicago, Illinois, or such other location as Products may designate.

9. *Damage or Destruction of Equipment.*—If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided that at the time of the occurrence of such damage or destruction the Exhibitor shall not be in default in respect of the terms of this agreement, and shall continue to operate the Theatre, or shall resume the operation thereof at its original location during the term of this agreement, upon written request of the Exhibitor, Products at its own expense shall repair the Equipment or, at its option, furnish replacing Western Electric sound reproducing equipment equally suitable for the Theatre as was the equipment thus damaged or destroyed: provided, however, that if the Theatre shall be totally destroyed or if it shall be damaged and repairs shall not be completed and operation resumed within a period of six (6) months from the date of such damage, Products at its option may terminate this agreement by giving the Exhibitor ten (10) days' written notice, in which event the Exhibitor shall make payment of all charges hereunder to the date of such destruction. The Exhibitor, at its own expense, shall furnish all necessary facilities and labor and shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section. Such parts and replacing equipment shall be installed under Products' supervision and in the event that the supervisory services of Products' service inspector, or service inspector and projectionist, are required for a period in excess of three (3) days' services of one (1) man, the Exhibitor shall pay Products' charge for any services thus rendered at the rate of Thirty-five ($35.00) Dollars per man per day or fraction thereof, including time consumed in transit, together with any additional expenses which Products may incur by reason of said services being required otherwise than for a continuous period. In the event of damage or destruction of the Equipment as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until repair or replacing equipment shall have been furnished by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, the Exhibitor shall provide facilities for the installation of such equipment in the same manner as provided in Section 5 and all of the provisions of this agreement shall apply to such replacing equipment. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

10. *Title.*—Products shall retain title to all equipment, repair and replace-

Digitized by Google

ment parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

11. *Patent Protection.*—Products, at its own expense, shall defend any and all actions and suits alleging infringement during the term hereof, of any United States patent by reason of the use of the Equipment, as and for the purposes furnished, which may be brought against the Exhibitor during the term hereof, or within one year after the termination of this agreement and will pay and satisfy all judgments or decrees for profits, damages, or costs which may be finally awarded against the Exhibitor in any such action or suit on account of such infringement by the court of last resort to which any such action or suit is taken, and if such use shall be prevented by an injunction in such suit, Products at its option may replace said equipment with suitable non-infringing equipment or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if within thirty (30) days from the date any such injunction becomes effective, Products does not thus replace or modify the Equipment or procure for the Exhibitor the right to continue to use the same, either party may upon thirty (30) days' written notice terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore, or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided, however, that the obligations of Products referred to in this section shall not apply to uses of the Equipment or any part or parts thereof in combination with other apparatus or parts not furnished by Products therefor, if the alleged infringement results directly or indirectly from such combination or use of apparatus or parts not furnished by Products, and that the liability of Products hereunder shall in no event exceed the aggregate amount paid to Products hereunder. If at the time of, or after the commencement of, any such action or suit, the Exhibitor is in default, or should default in its obligations to Products hereunder, or shall have assigned this agreement without the consent of Products, or removed the Equipment from its installed location in the Theatre without the written consent of Products, or if In respect of, or because of any such action or suit, or any threat thereof, the Exhibitor shall without Products' written consent make an independent settlement with the owner or owners of the patent or patents alleged to be infringed, Products shall not be subject to the obligations referred to in this section, but may at its option undertake or continue the defense of any such action or suit at its own expense. The Exhibitor shall give Products immediate notice (with written confirmation) of all claims of such infringement and of all such actions or suits and full opportunity and authority to assume the sole defense thereof, including appeals; shall not in any manner prejudice Products' defense of any such action or suit and shall furnish Products, upon request, all information and assistance available to the Exhibitor for such defense and in all other respects cooperate fully with Products in the defense of any such action or suit. Products shall not be liable to defend or indemnify the Exhibitor on account of any infringement or claim of infringement of any patent relating to the said sound reproducing equipment or the use thereof, except as herein specifically provided.

12. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

13. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make payment of charges referred to in Section 2 hereof or failure to pay taxes in accordance with Section 12 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing by or against the Exhibitor of any petition in bankruptcy or for reorganization under the Bankruptcy Act or any amendment thereto, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to or right to possession of the Theatre, or (except as provided in Section 3) upon the Exhibitor ceasing to operate the

Digitized by Google

Theatre, or upon the removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of, any apparatus or equipment furnished hereunder. The Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

14. *Surrender of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment, together with all repair and replacement parts, tools, and other accessories therefor, which shall have been furnished by Products.

15. *Term.*—The original term of this agreement shall be one (1) year and a period equivalent to any period or periods of abatement of charges hereunder which may have occurred during said year, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performances, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon submission of this agreement for execution by Products) shall commence not later than thirty (30) days after the date of shipment of the Equipment. The agreement shall continue in effect during subsequent terms until terminated as hereinafter set forth. The phrase "subsequent term" shall mean any period of one (1) year subsequent to the original term, plus a period equivalent to the period or periods of abatement of charges which may have occurred during said year. Either party may terminate this agreement at the end of the original term or at the end of any subsequent term by giving to the other not less than thirty (30) nor more than sixty (60) days' prior written notice of intention to terminate; provided, however, that if the Exhibitor shall be indebted to Products at the expiration of the original or a subsequent term of this agreement for any equipment or parts for equipment which the Exhibitor may have procured from Products for use in the Theatre, the Exhibitor shall not have the right to terminate this agreement on notice until any balance of such indebtedness shall have been paid.

16. *General Provisions.*—(*a*) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or break-down. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(*b*) Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment. Products shall not be responsible for any interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre (except for injury to Products' employees) arising from any cause whatsoever, for any damages resulting from delay or failure to deliver parts hereunder, or for any consequential damages whatsoever.

(*c*) Products shall provide facilities and personnel for performing the services herein referred to under normal operating conditions. Products shall not be liable for failure to perform said services if the Exhibitor shall fail to make the Theatre and theatre personnel available or when such failure to perform is due to other conditions beyond the control of Products, whether or not similar to the foregoing.

(*d*) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor,

Digitized by Google

it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(*e*) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

WAIVER

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment by Electrical Research Products, Inc., of the sum of One ($1.00) Dollar, receipt of which is hereby acknowledged, the undersigned parties having an interest in the Theatre referred to in said agreement as owner or lessor thereof, hereby consent(s) to the installation of said Equipment and waive(s) any and all rights or claims thereto of whatsoever kind or nature which I/we have or may hereafter acquire as landlord(s) of said Theatre, which might or could in any manner interfere with any rights of Electrical Research Products, Inc., in or to said Equipment.

Dated this _____ day of _____, 193__.

_____,
Owner of Theatre.
_____,
Lessor of Theatre (other than Owner).

3431 T—REV.
Contract No._____

This agreement, made in triplicate at New York, New York, this _____ day of _____, 193__, by Electrical Research Products, Inc., a Delaware corporation, of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____, a _____ _____ corporation, of No. _____ Street, City of _____ _____, State of _____ (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Street, City of _____, State of _____ (hereinafter called the "Theatre");

WITNESSETH

Whereas under a certain agreement date _____, 19__, between Products and the Exhibitor, or an assignor of the Exhibitor (hereinafter referred to as the "Original Agreement"), Products furnished for use in the Theatre, a Western Electric Sound Reproducing Equipment, which is now installed in the Theatre and is owned by Products; and

Whereas the parties hereto desire to terminate the Original Agreement and all agreements supplemental thereto relating to the use of said Western Electric Sound Reproducing Equipment in the Theatre and to enter into a new agreement with respect thereto upon the terms and conditions hereinafter set forth;

Now, therefore, in consideration of the premises and of the covenants and conditions herein set forth, the parties agree as follows:

1. The Original Agreement and all agreements supplemental thereto heretofore entered into between the parties with respect to the aforementioned Western Electric Sound Reproducing Equipment, shall terminate in all respects

Digitized by Google

on _____, 193__; provided, however, that such termination shall not become effective unless all payments due and to become due to Products under said agreements to and including said date shall have been received by Products on or before said date. If said payments shall not have been received by Products by the aforementioned date, the Original Agreement and all agreements supplemental thereto shall continue in force and this agreement shall be void and of no effect.

2. Subject to the provisions of Section 1 hereof, Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products for a term of fifteen (15) years commencing on the date of termination of the Original Agreement and agreements supplemental thereto, as referred to in Section 1 hereof, the Sound Reproducing Equipment furnished by Products under the Original Agreement and any additional equipment which may have been furnished by Products to the Exhibitor prior to the date of commencement of the term hereof under agreements or additional orders supplemental to the Original Agreement (all of said equipment being hereinafter collectively referred to as the "Equipment"), which Equipment shall be held and operated by the Exhibitor without responsibiliay of any character on the part of Products for the functioning of or damage to the Equipment, or damage to the Theatre or its contents, or to persons, growing out of the possession or use of the Equipment, and the Exhibitor shall hold Products harmless from all such risks. Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive license to use the Equipment in the Theatre solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents relating to said Equipment or to such use thereof, in respect of which Products now has the right to grant such license.

3. The Exhibitor shall pay to Products as rental for the Equipment on the first day of each year of the term hereof, the sum of One ($1.00) Dollar, shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to the Equipment, and shall reimburse Products promptly for any such taxes which Products may be required to pay, but nothing herein contained shall be deemed to prevent the Exhibitor from contesting or litigating any such taxes to the extent deemed desirable, before paying the same.

4. Subject to the conditions and limitations hereinafter set forth, Products, at its own expense, shall defend all actions and suits which may be brought against the Exhibitor with respect to patent infringement and subject likewise to the conditions and limitations set forth below, will pay and satisfy all judgments or decrees for profits, damages, or costs which may be finally awarded against the Exhibitor in any such action or suit by the court of last resort to which any such action or suit is taken:

(*a*) The obligation of Products as above referred to in this section shall apply only to infringement or alleged infringement of United States patents by reason of past or future use by the Exhibitor as and for the purposes furnished and in accordance with Products' instructions or recommendations, of the Equipment or any part or parts thereof furnished to the Exhibitor by Products prior to the date hereof for use in the Theatre.

(*b*) The said obligation of Products shall apply only to actions or suits which may be brought against the Exhibitor during the term hereof.

(*c*) Products shall have no obligation as aforesaid with respect to any infringement or alleged infringement arising out of uses of said Equipment or any part or parts thereof, in combination with other apparatus or parts not furnished by Products therefor, or arising out of changes in circuits used in or in connection with said Equipment or other changes therein or thereto, not made or specifically approved in writing by Products; if the alleged infringement results directly or indirectly from any combination or use of apparatus or parts not furnished by Products, or from any such changes in or to said Equipment, circuits, or parts.

(*d*) If use of the Equipment or parts in accordance with the provisions of paragraph (*a*) of this section shall be prevented by injunction in any action or suit alleging infringement, or if Products shall deem it advisable in order to avoid infringement or to minimize its liability hereunder, Products, at its option, shall have the right to replace said Equipment or any part thereof with

Digitized by Google

suitable non-infringing equipment or parts or to modify the same so that it will not infringe (and for those purposes Products shall have access to the Theatre at all reasonable times) or to secure for the Exhibitor the right to continue to use the same and, in the event of such use being prevented by any such injunction, if Products does not replace or modify the Equipment or parts, or procure for the Exhibitor the right to continue to use the Equipment or parts, within thirty (30) days from the date any such injunction becomes effective, either party may terminate this agreement upon thirty (30) days' written notice.

(*e*) Termination of this agreement on notice as referred to in the preceding paragraph (*d*) shall not relieve the Exhibitor of any of its obligations which accrued prior to the date of termination, nor relieve Products of its obligations hereunder with respect to infringements alleged to have occurred prior to said date.

(*f*) The Exhibitor shall give Products immediate notice of all claims of such infringement and of all such actions or suits (which advices shall be confirmed in writing); shall give Products full opportunity and authority to assume the sole defense thereof, including appeals; shall not in any manner prejudice Products' defense of any action or suit or Products' liability hereunder, or under any agreement with others relating to the use of sound reproducing equipment in theatres; shall furnish Products, upon request, with all information and assistance available to the Exhibitor for such defense, and in all other respects shall cooperate fully with Products in the defense of any such action or suit.

(*g*) If at the time of or after the commencement of any action or suit against the Exhibitor alleging infringement as aforesaid, the Exhibitor is in default or should default in its obligations to Products hereunder or under any other agreement with Products relating to the Equipment, or shall have assigned this agreement, except as herein provided, or removed the Equipment from its installed location in the Theatre without the written consent of Products, Products shall not be subject to the obligations to defend the Exhibitor or pay or satisfy judgments or decrees, but at its option, may undertake to continue the defense of any such action or suit at its own expense.

(*h*) The liability of Products to the Exhibitor with respect to patent infringement shall in no event exceed the aggregate amount paid to Products under the Original Agreement and under any agreement supplemental thereto entered into by the parties hereto prior to the date hereof.

The liability of Products to the Exhibitor with respect to patent infringement shall be limited to the agreements herein contained.

5. Products shall retain full title to the Equipment, and upon any termination of this agreement (which may be terminated by Products in the event of failure of the Exhibitor to pay the charges and taxes referred to in Section 3 hereof, or upon the insolvency or bankruptcy of the Exhibitor), the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear only, excepted, together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photo-electric cells, and exciting lamps) and all tools and other accessories which shall have been furnished by Products.

6. This agreement shall be binding upon the parties and their respective successors, assigns, and legal representatives, but may not be assigned either voluntarily or involuntarily by the Exhibitor without the written consent of Products. The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein, and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

3431 T

Contract No. ------

This agreement, made in triplicate at New York, New York, this ------ day of ---------- 193--, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and----------, a ---------- corporation, of No. ---------- Street, City of ----------, State of ----------, (hereinafter called the "Exhibitor"), the operator of the ---------- Theatre at No. ---------- Street, City of ----------, State of ----------, (hereinafter called the "Theatre");

WITNESSETH:

Whereas, under a certain agreement dated ----------, 19--, between Products and the Exhibitor, or an assignor of the Exhibitor (hereinafter referred to as the "Original Agreement"), Products furnished for use in the Theatre a Western Electric Sound Reproducing Equipment which is now installed in the Theatre and is owned by Products; and

Whereas the parties hereto desire to terminate the Original Agreement and all agreements supplemental thereto relating to the use of said Western Electric Sound Reproducing Equipment in the Theatre and to enter into a new agreement with respect thereto upon the terms and conditions hereinafter set forth:

Now therefore, in consideration of the premises and of the covenants and conditions herein set forth, the parties agree as follows:

1. The Original Agreement and all agreements supplemental thereto heretofore entered into between the parties with respect to the aforementioned Western Electric Sound Reproducing Equipment, shall terminate in all respects on ----------, 193--; provided however, that such termination shall not become effective unless all payments due and to become due to Products under said agreements to and including said date shall have been received by Products on or before said date. If said payments shall not have been received by Products by the aforementioned date, the Original Agreement and all agreements supplemental thereto shall continue in force and this agreement shall be void and of no effect.

2. Subject to the provisions of Section 1 hereof, Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products for a term of fifteen (15) years commencing on the date of termination of the Original Agreement and agreements supplemental thereto, as referred to in Section 1 hereof, the Sound Reproducing Equipment furnished by Products under the Original Agreement and any additional equipment which may have been furnished by Products to the Exhibitor prior to the date of commencement of the term hereof under agreements or additional orders supplemental to the Original Agreement (all of said equipment being hereinafter collectively referred to as the "Equipment"), which Equipment shall be held and operated by the Exhibitor without responsibility of any character on the part of Products for the functioning of or damage to the Equipment, or damage to the Theatre or its contents, or to persons, growing out of the possession or use of the Equipment, and the Exhibitor shall hold Products harmless from all such risks. Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive license to use the Equipment in the Theatre solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents relating to said Equipment or to such use thereof, in respect of which Products now has the right to grant such license.

3. The Exhibitor shall pay to Products as rental for the Equipment on the first day of each year of the term hereof, the sum of One ($1.00) Dollar, shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to the Equipment, and shall reimburse Products promptly for any such taxes which Products may be required to pay, but nothing herein contained shall be deemed to prevent the Exhibitor from contesting or litigating any such taxes to the extent deemed desirable, before paying the same.

4. Subject to the conditions and limitations hereinafter set forth, Products, at its own expense, shall defend all actions and suits which may be brought against the Exhibitor with respect to patent infringement and subject likewise to the conditions and limitations set forth below, will pay and satisfy all

Digitized by Google

judgments or decrees for profits, damages, or costs which may be finally awarded against the Exhibitor in any such action or suit by the court of last resort to which any such action or suit is taken:

(*a*) The obligation of Products as above referred to in this section shall apply only to infringement or alleged infringement of United States patents by reason of past or future use by the Exhibitor as and for the purposes furnished and in accordance with Products' instructions or recommendations, of the Equipment or any part or parts thereof furnished to the Exhibitor by Products prior to the date hereof for use in the Theatre;

(*b*) The said obligation of Products shall apply only to actions or suits which may be brought against the Exhibitor during the term hereof.

(*c*) Products shall have no obligation as aforesaid with respect to any infringement or alleged infringement arising out of uses of said Equipment or any part or parts thereof, in combination with other apparatus or parts not furnished by Products therefor, or rising out of changes in circuits used in or in connection with said Equipment or other changes therein or thereto, not made or specifically approved in writing by Products; if the alleged infringement results directly or indirectly from any combination or use of apparatus or parts not furnished by Products, or from any such changes in or to said Equipment, circuits, or parts.

(*d*) If use of the Equipment or parts in accordance with the provisions of paragraph (*a*) of this section shall be prevented by injunction in any action or suit alleging infringement, Products, at its option, may replace said Equipment or any part thereof with suitable non-infringing equipment or parts or modify the same so that it will not infringe or secure for the Exhibitor the right to continue to use the same and if Products does not replace or modify the Equipment or parts, or procure for the Exhibitor the right to continue to use the Equipment or parts, within thirty (30) days from the date any such injunction becomes effective, either party may terminate this agreement upon thirty (30) days' written notice.

(*e*) Termination of this agreement on notice as referred to in the preceding paragraph (*d*) shall not relieve the Exhibitor of any of its obligations which accrued prior to the date of termination, nor relieve Products of its obligations hereunder with respect to infringements alleged to have occurred prior to said date.

(*f*) The Exhibitor shall give Products immediate notice of all claims of such infringement and of all such actions or suits (which advices shall be confirmed in writing); shall give Products full opportunity and authority to assume the sole defense thereof, including appeals, shall not in any manner prejudice Products' defense of any action or suit or Products' liability hereunder, or under any agreement with others relating to the use of sound reproducing equipment in theatres; shall furnish Products, upon request, with all information and assistance available to the Exhibitor for such defense and in all other respects shall cooperate fully with Products in the defense of any such action or suit.

(*g*) If at the time of or after the commencement of any action or suit against the Exhibitor alleging infringement as aforesaid, the Exhibitor is in default or should default in its obligations to Products hereunder or under any other agreement with Products relating to the Equipment, or shall have assigned this agreement, except as herein provided, or removed the Equipment from its installed location in the Theatre without the written consent of Products, Products shall not be subject to the obligations to defend the Exhibitor or pay or satisfy judgments or decrees, but at its option, may undertake to continue the defense of any such action or suit at its own expense;

(*h*) The liability of Products to the Exhibitor with respect to patent infringement shall in no event exceed the aggregate amount paid to Products under the Original Agreement and under any agreement suplemental thereto entered into by the parties hereto prior to the date hereof.

The liability of Products to the Exhibitor with respect to patent infringement shall be limited to the agreements herein contained.

5. Products shall retain full title to the Equipment, and upon any termination of this agreement (which may be terminated by Products in the event of failure of the Exhibitor to pay the charges and taxes referred to in Section 3 hereof, or upon the insolvency or bankruptcy of the Exhibitor), the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear only excepted, together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric

Digitized by Google

cells, and exciting lamps) and all tools and other accessories which shall have been furnished by Products.

6. This agreement shall be binding upon the parties and their respective successors, assigns, and legal representatives, but may not be assigned either voluntarily or involuntarily by the Exhibitor without the written consent of Products. The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

3435 T.-R.W.

This agreement made in triplicate at New York, New York, this _____ day of _____, 193 __, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____ a _____ _____ corporation of No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Theatre");

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products the present Western Electric Sound Reproducing Equipment heretofore supplied by Products and now installed in the Theatre, together with any supplemental equipment described in this section.

The present equipment consists of:—

_____

The supplemental equipment consists of:—

_____

The supplemental equipment shall be furnished by Products f. o. b. its warehouse at _____, on or before _____, 193 __ (provided that Products shall not be responsible for any inconvenience or damage resulting from failure to ship the supplemental equipment on or before said date), and shall be installed by the Exhibitor at its own expense under Products' supervision, in the same manner and subject to all the provisions respecting the installation of repair and replacing equipment which are set forth in paragraphs (b) and (c) of Section 6.

All of the aforementioned equipment is hereinafter collectively referred to as the "Equipment." Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States Patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon.

Digitized by Google

2. *Charges.*—(*a*) The charges payable by the Exhibitor shall be the following: (Strike out inapplicable payment plan.)

Plan One.—The term of this agreement shall commence at close of business of the Exhibitor on _____, 193 __. On each and every Saturday thereafter during said term, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Option A, B, or C set forth in Section 13.

Plan Two—First Period.—The term of this agreement shall commence at close of business of the Exhibitor on _____, 193 __. On each and every Saturday thereafter the Exhibitor shall pay Products the sum of _____ ($_____) Dollars until _____ (__) such weekly payments shall have been made, which payments include a sum to be applied to payments required to be made under a prior agreement or agreements between the parties respecting the Equipment, in consideration of which payments Products agrees to the cancellation of said prior agreements as more particularly provided in Section 14.

Second Period.—Commencing on the Saturday following the last Saturday on which a payment is due in accordance with the preceding paragraph and on each and every Saturday thereafter during the remainder of the terms hereof, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Option A, B, or C set forth in Section 13.

(*b*) In addition to the charges referred to in paragraph (*a*) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of all such equipment and parts to the Theatre.

3. *Inspection of Equipment.*—(*a*) Promptly following the commencement of the term hereof, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(*b*) From time to time during the term of this agreement (except as provided in Section 13), Products shall inspect, test, and adjust the equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (*a*). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

(*c*) If Products shall be called upon by the Exhibitor to make special service calls or otherwise provide service and inspection facilities beyond the service and inspection provided for in paragraphs (*a*) and (*b*) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of misuse or abuse of the Equipment or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor in addition to the weekly charges referred to in Section 2, for any services thus rendered Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services.

4. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre, or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

5. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any

Digitized by Google

other charges the due date of which is not definitely fixed, either at the time of delivery of said parts, or at Products' option, upon rendition of billing.

6. *Damage or Destruction of Equipment.*—(*a*) If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect of the terms of this agreement, upon written request of the Exhibitor, Products (excepts as provided in Section 13), will at its own expense repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed.

(*b*) The Exhibitor, at its own expense, shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section, in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character; shall furnish all necessary labor and facilities, including but not by way of limitation, a suitable source of electric power supply with outlets conveniently located for the equipment, supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment, and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the equipment. Replacing equipment and major replacement parts furnished under the provisions of this section, shall be installed under Products' supervision and all equipment and parts thus furnished shall be installed in accordance with instructions furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of replacing equipment and parts.

(*c*) In the event that the Equipment or a major portion thereof shall be replaced by Products as provided in this section, Products shall provide an engineer, and if deemed necessary by Products, a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the replacing equipment. Notice from the Exhibitor that the replacing equipment has been received and that the Theatre will be ready for installation of said equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer, and projectionists if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work done by the Exhibitor is not ready for inspection, or said work is not advanced sufficiently to permit the installation of the equipment upon the date that the engineer shall arrive at the Theatre, or if supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expenses which Products may have incurred by reason of said services being required otherwise than for a continuous period. In the event of damage or destruction of the Equipment as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until repair or replacing equipment shall have been furnished by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, all of the provisions of this agreement shall apply to such replacing equipment. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

7. *Title.*—Products shall retain title to all equnpment, repair, and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

Digitized by Google

8. *Patent Protection.*—Products shall defend at its own expense any and all actions and suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purposes furnished, and will pay and satisfy all judgments and decrees for profits, damages, or costs which may be finally awarded against the Exhibitor on account of such infringement by the court of last resort in any such action or suit, and if such use shall be prevented by injunction in such suit, Products at its option may replace said apparatus or material with suitable non-infringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if within thirty (30) days from the date any such injunction becomes effective, Products does not thus replace or modify the apparatus or material, or procure for the Exhibihibitor the right to continue to use the same, either party may upon thirty (30) days' written notice, terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided however, that the obligation to Products referred to in this section shall not apply to uses of said apparatus or material or any part or parts thereof in combination with other apparatus or parts not furnished by Products therefor, if the alleged infringement results directly or indirectly from such combination or use of apparatus or parts not furnished by Products, and that the liability of Products hereunder shall in no event exceed the amount paid hereunder to Products. If at the time of commencement of any such action or suit against the Exhibitor, the Exhibitor is in default or shall thereafter default in any of its obligations to Products hereunder, or shall have assigned this agreement without the written consent of Products, Products shall not be subject to any of the obligations referred to in this section, but at its option, may undertake or continue the defense of any such action or suit at its own expense. The Exhibitor shall give Products immediate notice (with written confirmation) of all claims of infringement and of all such actions and suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall furnish Products, upon request, all information and assistance available to the Exhibitor for such defense. The liability of Products for any infringement shall be limited to the agreements herein contained.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder and the Exhibitor shall reimburse Products upon rendition of billing for any such taxes which Products may be required to pay.

10. *Abatement of Charges.*—(*a*) If during any annual period of the term hereof, the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week and shall give Products not less than ten (10) days' prior written notice of intention to cease using the Equipment and a similar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

(*b*) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York; Chicago, Illinois; or Los Angeles, California, whichever office is nearest the Exhibitor.

11. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make payment of charges referred to in Section 2 hereof or failure to pay taxes in accordance with Section 9 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to

Digitized by Google

possession of, the Theatre or (except as provided in Section 10) upon the Exhibitor ceasing to operate the Theatre, or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of, any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment, patent protection, and abatement of charges, as referred to in Sections 6, 8, and 10, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

12. *Surrender of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products in good order and condition reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools, and other accessories which shall have been furnished by Products.

13. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods within which charges were abated hereunder during the first three (3) years of the term hereof, commencing on the date of commencement referred to in paragraph (*a*), Section 2.

The following options shall be available to the Exhibitor, provided however, that if payments hereunder are to be made in accordance with Plan 2 of Section 2, then the said options shall be available only at such time as all of the payments required to be made during the *First Period* of said Plan 2, shall have been paid in full.

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option C.—At the expiration of the third year of term hereof, but if there shall have been an abatement of charges during the first three (3) years, only at such time as One hundred and fifty-six (156) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Option A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any of such options shall be exercised, Products shall be under no further obligation to inspect, test, or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, or to fulfill any other obligations hereinabove set forth respecting said Equipment (except the obligation to furnish patent protection subject to the provisions of Section 8), whether or not similar to the foregoing. Notwithstanding the service of a sixty (60) day notice by the Exhibitor as provided in this paragraph, the foregoing options shall not be

Digitized by Google

available to the Exhibitor if the Exhibitor shall be in default hereunder upon the effective date of any option which it may desire to exercise.

If upon the expiration of the original term the Exhibitor shall not have exercised Option A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate and such notice may be served by either party at any time after the expiration of the original term.

14. *General Provisions.*—(*a*) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(*b*) The time of all payments herein provided for shall be of the essence of this agreement.

(*c*) Upon any termination of this agreement Products shall retain and may enforce any and all claims and rights of action against the Exhibitor, which it may then possess arising out of any default by the Exhibitor hereunder or any indebtedness then due to Products which accrued under the provisions of this agreement.

(*d*) The agreement originally entered into between the Exhibitor and Products with respect to the furnishing and use of the Equipment and all agreements supplemental and amendatory thereto shall terminate as of the date of commencement of the term of this agreement and all obligations of said parties under said agreements are hereby released and forever discharged.

(*e*) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(*f*) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

WAIVER

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment by Electrical Research Products, Inc., of the sum of One ($1.00) Dollar, receipt of which is hereby acknowledged, the undersigned parties having an interest in the Theatre referred to in said agreement as owner or lessor thereof, hereby consent(s) to the installation of said Equipment and waive(s) any and all rights or claims thereto of whatsoever kind or nature which I/we have or

Digitized by Google

may hereafter acquire as landlord(s) of said Theatre, which might or could in any manner interfere with any rights of Electrical Research Products, Inc., in or to said Equipment.

Dated this _____ day of _____, 193__.

_____,
Owner of Theatre.

_____,
Lessor of Theatre (other than Owner).

3428 T—U. E.

This agreement made in triplicate at New York, New York, this_____day of_____193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and_____, a _____ _____corporation of No._____Street/Avenue, City of _____State of_____, hereinafter called the "Exhibitor"), the operator of the_____ Theatre at No_____ Street/Avenue, City of_____, State of _____, hereinafter called the "Theatre");

Witnesseth, That in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric Sound Reproducing Equipment (hereinafter called the "Equipment") and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon. The Equipment or any parts thereof which may have been previously leased for use in the Theatre or elsewhere shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is:

---

2. *Charges.*—(a) The Exhibitor shall pay to Products the sum of_____ _____ ($_____) Dollars upon submission of this agreement for acceptance and a like sum on each and Every Saturday commencing on the first Saturday of the term hereof as fixed by the provisions of Section 16. The foregoing charges shall be paid by the Exhibitor subject only to the abatements hereinafter provided for and to curtailment of such charges in the event that the Exhibitor shall elect to continue to use the Equipment at an annual rental of One ($1.00) Dollar in accordance with Option A, B, or C, referred to in Section 16.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of said equipment and parts to the Theatre.

3. *Shipment of Equipment.*—The Equipment shall be furnished f. o. b. Products' warehouse at_____, and shall be shipped on or before _____, 193__, Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

4. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment and shall make such other alterations and

Digitized by Google

modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

5. *Installation of Equipment.*—(a) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(b) Products shall provide an engineer, and if deemed necessary by Products a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer, and projectionist if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. At the time of installation Products shall instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period not to exceed three (3) days.

6. *Inspection of Equipment.*—(a) At the time of installation, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(b) From time to time during the term of this agreement (except as provided in Section 16), Products shall inspect, test, and adjust the Equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (a). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

(c) If Products shall be called upon by the Exhibitor to make special service call or otherwise provide service and inspection facilities beyond the service and inspection provided for in paragraphs (a) and (b) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of misuse, or abuse of the Equipment, or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor in addition to the weekly charges referred to in Section 2, for any services thus rendered Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services.

7. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the

Digitized by Google

Equipment and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

8. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any other charges the due date of which is not definitely fixed, either at the time of delivery of said parts, or at Products' option, upon rendition of billing.

9. *Damage or Destruction of Equipment.*—If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect of the terms of this agreement, and shall continue to operate the Theatre, or shall resume the operation thereof at its original location during the term of this agreement, upon written request of the Exhibitor, Products (except as provided in Section 16), will at its own expense repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed. The Exhibitor, at its own expense, shall furnish all necessary facilities and labor and shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section. Such parts and replacing equipment shall be installed under Products' supervision and in the event of Products' supervisory services being required for a period in excess of three (3) days, the Exhibitor shall pay Products' charge for any services thus rendered at the per diem rate plus the additional expenses referred to in paragraph (b), Section 5 hereof. In the event of damage or destruction of the Equipment as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until repair or replacing equipment shall have been furnished by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, the Exhibitor shall provide facilities for the installation of such equipment in the same manner as provided in Section 4 and all of the provisions of this agreement shall apply to such replacing equipment. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

10. *Title.*—Products shall retain title to all equipment, repair and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

1. *Patent Protection.*—Products shall defend at its own expense any and all actions and suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purposes furnished and will pay and satisfy all judgments and decrees for profits, damages, or costs which may be finally awarded against the Exhibitor on account of such infringement by the court of last resort in any such action or suit, and if such use shall be prevented by injunction in such suit, Products at its option may replace said apparatus or material with suitable non-infringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if within thirty (30) days from the date any such injunction becomes effective, Products does not thus replace or modify the apparatus or material, or procure for the Exhibitor the right to continue to use the same, either party may upon thirty (30) days' written notice, terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided however, that the obligations of Products referred to in this section shall not apply to uses of said apparatus or material or any part or parts thereof in combination with other apparatus or parts not furnished by Products therefor, if the alleged infringement results directly or indirectly from such combination or use of apparatus or parts not furnished by Products, and that the liability of Products hereunder shall in no event exceed the amount paid

Digitized by Google

hereunder to Products. If at the time of commencement of any such action or suit against the Exhibitor, the Exhibitor is in default or shall thereafter default in any of its obligations to Products hereunder, or shall have assigned this agreement without the written consent of Products, Products shall not be subject to any of the obligations referred to in this section, but at its option, may undertake or continue the defense of any such action or suit at its own expense. The Exhibitor shall give Products immediate notice (with written confirmation) of all claims of infringement and of all such actions and suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall furnish Products, upon request, all information and assistance available to the Exhibitor for such defense. The liability of Products for any infringement shall be limited to the agreements herein contained.

12. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

13. *Abatement of Charges.*—(a) If during any annual period of the term hereof, the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week and shall give Products not less than ten (10) days' prior written notice of intention to cease using the Equipment and a similiar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

(b) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' offices at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

14. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make payment of charges referred to in Section 2 hereof or failure to pay taxes in accordance with Section 12 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 13) upon the Exhibitor ceasing to operate the Theatre, or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangement satisto Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of, any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment, patent protection, and abatement of charges, as referred to in Section 9, 11 and 13, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

15. *Surrender of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools and other accessories which shall have been furnished by Products.

16. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods within which charges were abated hereunder during the first three (3) years

Digitized by Google

of the term hereof, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performances, whichever date be the earlier; provided however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon submission of this agreement) shall commence not later than thirty (30) days after the date of shipment of the Equipment.

The following options shall be available to the Exhibitor:

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of ($) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of ($) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option C.—At the expiration of the third year of the term hereof, but if there shall have been an abatement of charges during the first three (3) years, only at such time as One hundred and fifty-six (156) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Option A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any such options shall be exercised, Products shall be under no further obligation to inspect, test or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, or to fulfill any other obligations hereinabove set forth respecting said Equipment (except the obligation to furnish patent protection subject to the provisions of Section 11), whether or not similar to the foregoing. Notwithstanding the service of a sixty (60) day notice by the Exhibitor as provided in this paragraph, the foregoing options shall not be available to the Exhibitor if the Exhibitor shall be in default hereunder upon the effective date of any option which it may desire to exercise.

If upon the expiration of the original term the Exhibitor shall not have exercised Option A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate and such notice may be served by either party at any time after the expiration of the original term.

17. *General Provisions.*—(a) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances and regulations relating to the maintenance, operation and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

Digitized by Google

(b) The time of all payments herein provided for shall be of the essence of this agreement.

(c) Upon any termination of this agreement Products shall retain and may enforce any and all claims and rights of action against the Exhibitor, which it may then possess arising out of any default by the Exhibitor hereunder or any indebtedness then due to Products which accrued under the provisions of this agreement.

(d) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns and legal representatives.

(e) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

WAIVER

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment by Electrical Research Products, Inc., of the sum of One ($1.00) Dollar, receipt of which is hereby acknowledged, the undersigned parties having an interest in the Theatre referred to in said agreement as owner or lessor thereof, hereby consent(s) to the installation of said Equipment and waive(s) any and all rights or claims thereto of whatsoever kind or nature which I/we have or may hereafter acquire as landlord(s) of said Theatre, which might or could in any manner interfere with any rights or Electrical Research Products, Inc., in or to said Equipment.

Dated this _____ day of _____, 193__.

_____

Owner of Theatre.

_____

Lessor of Theatre (other than Owner).

3410 T—U. E.-REV.

This agreement made in triplicate at New York, New York, this_____day of_____193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and_____ a _____ corporation of No._____ Street/Avenue, City of_____, State of_____, (hereinafter called the "Exhibitor"), the operator of the_____Theatre at No_____Street/Avenue, City of_____, State of_____, hereinafter called the "Theatre");

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric Sound Reproducing Equipment (hereinafter called the "Equipment") and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use

Digitized by Google

the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon. The Equipment or any parts thereof which may have been previously leased for use in the Theatre or elsewhere shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is:

2. *Charges.*—(a) The Exhibitor shall pay to Products the sum of_____ _____ ($_____) Dollars upon submission of this agreement for acceptance and a like sum on each and every Saturday commencing on the first Saturday of the term hereof as fixed by the provisions of Section 16. The foregoing charges shall be paid by the Exhibitor subject only to the abatements hereinafter provided for and to curtailment of such charges in the event that the Exhibitor shall elect to continue to use the Equipment at an annual rental of One ($1.00) Dollar in accordance with Options A, B, or C, referred to in Section 16.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all Equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of the Equipment to the Theatre.

3. *Shipment of Equipment.*—The Equipment shall be furnished f. o. b. Products' warehouse at_____, and shall be shipped on or before _____, 193__. Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

4. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

5. *Installation of Equipment.*—(a) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(b) Products shall provide an engineer, and if deemed necessary by Products a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer, and projectionist if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation

Digitized by Google

of the Equipment upon the date that the engineer shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. At the time of installation Products shall instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period not to exceed three (3) days.

6. *Inspection of Equipment.*—(a) At the time of installation, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(b) From time to time during the term of this agreement (except as provided in Section 16), Products shall inspect, test, and adjust the Equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (a). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

(c) If Products shall be called upon by the Exhibitor to make special service calls or otherwise provide service and inspection facilities beyond the service and inspection provided for in paragraphs (a) and (b) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of misuse or abuse of the Equipment or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor in addition to the weekly charges referred to in Section 2, for any services thus rendered, Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expense and transportation charges incurred in furnishing such services.

7. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

8. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any other charges the due date of which is not definitely fixed, either at the time of delivery of said parts or, at Products' option, upon rendition of billing.

9. *Damage or Destruction of Equipment.*—If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect of the terms of this agreement, and shall continue to operate the Theatre, or shall resume the operation thereof at its original location during the term of this agreement, upon written request of the Exhibitor, Products (except as provided in Section 16), will at its own expense repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed. The Exhibitor, at its own expense, shall furnish all necessary facilities and labor and shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section. Such parts and replacing equipment shall be installed under Products' supervision and in the event of Products' supervisory services being required for a period in excess of three (3) days, the Exhibitor shall pay Products' charge for any services thus rendered at the per diem rate plus the additional expenses referred to in para-

Digitized by Google

graph (b), Section 5 hereof. In the event of damage or destruction of the Equipment as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until the Equipment shall have been repaired or replaced by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, the Exhibitor shall provide facilities for the installation of such equipment in the same manner as provided in Section 4; all of the provisions of this agreement shall apply to such replacing equipment and the original term of this agreement shall be extended for an interval equivalent to the period or periods of abatement. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

10. *Title.*—Products shall retain title to all equipment, repair, and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

11. *Patent Protection.*—Products shall defend at its own expense all suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purposes furnished, and will save the Exhibitor harmless from all expenses of defending said suits and from all payments which by final judgment the Exhibitor may be required to pay to the complainant as damages, profits, or costs on account of such infringement; and if such use shall be prevented by injunction in such suit, Products may, within thirty (30) days from the date of any such injunction becomes effective, at its option, replace said apparatus or material with suitable noninfringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if Products does not within said thirty (30) days thus replace or modify the apparatus or material or procure for the Exhibitor the right to continue to use the same, either party may upon thirty (30) days' written notice terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringement alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided, however, and all of the obligations of Products in this paragraph contained are upon condition that Products shall be given immediate written notice of all claims of such infringement and of all such suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall be furnished (at Products' request) all information and assistance available to the Exhibitor for such defense; and provided further, that the obligations of Products referred to in this section shall not apply to uses of said apparatus in combination with other apparatus or parts not furnished by Products and that the liability of Products hereunder shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. If, at the time of commencement of any suit against the Exhibitor alleging patent infringement, the Exhibitor is in default hereunder, Products shall not be subject to the obligations referred to in this section, but the obligations of the Exhibitor to notify Products and to furnish information and assistance shall continue in effect, notwithstanding such default of the Exhibitor, and Products at its option may undertake the defense of any such suit at its own expense, but without obligation to indemnify the Exhibitor. The liability of Products for any infringement shall be limited to the agreements herein contained.

12. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

13. *Abatement of Charges.*—(a) If during any annual period of the term hereof, the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week and shall give Products not less than ten (10) days' written notice of intention to cease using the Equipment and a similar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

Digitized by Google

(b) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

14. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make payment of charges referred to in Section 2 hereof or failure to pay taxes in accordance with Section 12 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor, in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 13) upon the Exhibitor ceasing to operate the Theatre, or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment, patent protection, and abatement of charges, as referred to in Sections 9, 11, and 13, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

15. *Repossession of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools and other accessories which shall have been furnished by Products.

16. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods of abatement of charges hereunder, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performances, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon submission of this agreement) shall commence not later than thirty (30) days after the date of shipment of the Equipment.

The following options shall be available to the Exhibitor:

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Digitized by Google

Option C.—At the expiration of the third year of the term hereof, but if there shall have been an abatement of charges during the first three (3) years, only at such time as One Hundred and fifty-six (156) weekly payments shall have been made to Products, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1,00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Options A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any of such options shall be exercised, Products shall be under no further obligation to inspect, test, or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, to furnish any patent protection, or to fulfill any other obligations hereinabove set forth respecting said Equipment, whether or not similar to the foregoing.

If upon the expiration of the original term the Exhibitor shall have exercised Options A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate and such notice may be served by either party at any time after the expiration of the original term.

17. *General Provisions.*—(a) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(b) The time of all payments herein provided for shall be of the essence of this agreement.

(c) Upon any termination of this agreement Products shall retain and may enforce any and all claims and rights of action against the Exhibitor, which it may then possess arising out of any default by the Exhibitor hereunder or any indebtedness then due to Products which accrued under the provisions of this agreement.

(d) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(e) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

WAIVER

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment by Electrical Research Products, Inc., of the sum of One ($1.00) Dollar, receipt of which is hereby acknowledged, the undersigned parties having an interest in the theatre referred to in said agreement as owner or lessor thereof, hereby consent(s) to the installation of said Equipment and waive(s) any and all rights or claims thereto of whatsoever kind or nature which I/we haye or may hereafter acquire as landlord(s) of said Theatre, which might or could in any manner interfere with any rights of Electrical Research Products, Inc., in or to said Equipment.

Dated this _____ day of _____, 193____.

_____
Owner of Theatre.

_____
Lessor of Theatre (other than Owner).

THIS AGREEMENT made in triplicate at New York, New York, this _____ day of _____ 193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____ a _____ _____ corporation of No. _____ Street/Avenue, City of _____ State of_____, (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Theatre");

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric Sound Reproducing Equipment (hereinafter called the "Equipment") and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a nonexclusive, nonassignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon. The Equipment or any parts thereof which may have been previously leased for use in the Theatre or elsewhere shall be put in efficient operating condition by Products prior to or at the time of installation. The Equipment to be furnished hereunder is:

---

2. *Charges.*—(a) The Exhibitor shall pay to Products the sum of _____ _____ ($_____) Dollars upon submission of this agreement for acceptance and a like sum on each and every Saturday commencing on the first Saturday of the term hereof as fixed by the provisions of Section 16. The foregoing charges shall be paid by the Exhibitor subject only to the abatements hereinafter provided for and to curtailment of such charges in the event that the Exhibitor shall elect to continue to use the Equipment at an annual rental of One ($1.00) Dollar in accordance with Options A, B, or C, referred to in Section 16.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of the Equipment to the Theatre.

Digitized by Google

3. *Shipment of Equipment.*—The Equipment shall be furnished f. o. b. Products' warehouse at ----------, and shall be shipped on or before ----------, 193--. Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

4. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment, and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

5. *Installation of Equipment.*—(a) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(b) Products shall provide an engineer, and if deemed necessary by Products a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer, and projectionist if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. At the time of installation Products shall instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period not to exceed three (3) days.

6. *Inspection of Equipment.*—(a) At the time of installation, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(b) From time to time during the term of this agreement (except as provided in Section 16), Products shall inspect, test, and adjust the Equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (a). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

(c) If Products shall be called upon by the Exhibitor to make special service calls or otherwise provide service and inspection facilities beyond the service and inspection provided for in paragraphs (a) and (b) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of

Digitized by Google

misuse or abuse of the Equipment or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor in addition to the weekly charges referred to in Section 2, for any services thus rendered Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services.

7. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

8. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any other charges the due date of which is not definitely fixed, either at the time of delivery of said parts, or at Products' option, upon rendition of billing.

9. *Damage or Destruction of Equipment.*—If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect of the terms of this agreement, and shall continue to operate the Theatre, or shall resume the operation thereof at its original location during the term of this agreement, upon written request of the Exhibitor, Products (except as provided in Section 16), will at its own expense repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed. The Exhibitor, at its own expense, shall furnish all necessary facilities and labor and shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section. Such parts and replacing equipment shall be installed under Products' supervision and in the event of Products' supervisory services being required for a period in excess of three (3) days, the Exhibitor shall pay Products' charge for any services thus rendered at the per diem rate plus the additional expenses referred to in paragraph (b), Section 5 hereof. In the event of damage or destruction of the Equipment as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until the Equipment shall have been repaired or replaced by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, the Exhibitor shall provide facilities for the installation of such equipment in the same manner as provided in Section 4; all of the provisions of this agreement shall apply to such replacing equipment and the original term of this agreement shall be extended for an interval equivalent to the period or periods of abatement. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

10. *Title.*—Products shall retain title to all equipment, repair, and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

11. *Patent Protection.*—Products shall defend at its own expense all suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purposes furnished, and will save the Exhibitor harmless from all expenses of defending said suits and from all payments which by final judgment the Exhibitor may be required to pay to the complainant as damages, profits, or costs on account of such infringement; and if such use shall be prevented by injunction in such suit, Products may, within thirty (30) days from the date any such injunction becomes effective, at its option, replace said apparatus or material with suitable noninfringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if Products does not within said thirty (30) days thus replace or modify the apparatus or material or procure for the Exhibitor the right to continue to use the same, either party may upon thirty (30) days' written notice terminate

Digitized by Google

this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided, however, and all of the obligations of Products in this paragraph contained are upon condition that Products shall be given immediate written notice of all claims of such infringement and of all such suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall be furnished (at Products' request) all information and assistance available to the Exhibitor for such defense; and provided further, that the obligations of Products referred to in this section shall not apply to uses of said apparatus in combination with other apparatus or parts not furnished by Products, and that the liability of Products hereunder shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. If, at the time of commencement of any suit against the Exhibitor alleging patent infringement, the Exhibitor is in default hereunder, Products shall not be subject to the obligations referred to in this section, but the obligations of the Exhibitor to notify Products and to furnish information and assistance shall continue in effect, notwithstanding such default of the Exhibitor, and Products at its option may undertake the defense of any such suit at its own expense, but without obligation to indemnify the Exhibitor. The liability of Products for any infringement shall be limited to the agreements herein contained.

12. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

13. *Abatement of Charges.*—(a) If during any annual period of the term hereof, the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week, and shall give Products not less than ten (10) days' written notice of intention to cease using the Equipment and a similar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

(b) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

14. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of any breach or default on the part of the Exhibitor, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor or upon the making of an assignment of any of the Exhibitors' assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 13), upon the Exhibitor ceasing to operate the Theatre, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment, patent protection and abatement of charges, as referred to in Section 9, 11, and 13, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

15. *Repossession of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment together with all repair and re-

Digitized by Google

placement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools, and other accessories which shall have been furnished by Products.

16. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods of abatement of charges hereunder, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performances, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon submission of this agreement) shall commence not later than thirty (30) days after the date of shipment of the Equipment.

The following options shall be available to the Exhibitor:

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of ---------- ($----------) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of ---------- ($--------) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option C.—At the expiration of the third year of the term hereof, but if there shall have been an abatement of charges during the first three (3) years, only at such time as One hundred and fifty-six (156) weekly payments shall have been made to Products, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Options A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any of such options shall be exercised, Products shall be under no further obligation to inspect, test, or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, to furnish any patent protection, or to fulfill any other obligations hereinabove set forth respecting said Equipment, whether or not similar to the foregoing.

If upon the expiration of the original term the Exhibitor shall not have exercised Options A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate and such notice may be served by either party at any time after the expiration of the original term.

17. *General Provisions.*—(a) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

Digitized by Google

(b) The time of all payments herein provided for shall be of the essence of this agreement.

(c) Upon any termination of this agreement Products shall retain and may enforce any and all claims and rights of action against the Exhibitor, which it may then possess arising out of any default by the Exhibitor hereunder or any indebtedness then due to Products which accrued under the provisions of this agreement.

(d) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(e) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

347 T.-R.W.—Rev.

This agreement, made in triplicate at New York, New York, this _____ day of _____, 193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____, a _____ _____ corporation of No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Street/Avenue, City of _____, State of _____, (hereinafter called the "Theatre");

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products the present Western Electric Sound Reproducing Equipment heretofore supplied by Products and now installed in the Theatre, together with any supplemental equipment described in this section.

The present equipment consists of—

_____

The supplemental equipment consists of—

_____

Digitized by Google

The supplemental equipment shall be furnished by Products f. o. b. its warehouse at _____ on or before _____, 193__, (provided that Products shall not be responsible for any inconvenience or damage resulting from failure to ship the supplemental equipment on or before said date); shall be installed by the Exhibitor at its own expense and under Products' supervision, in the same manner and subject to all of the provisions respecting the installation of repair and replacing equipment which are set forth in paragraphs (b) and (c) of Section 5.

All of the aforementioned equipment is hereinafter collectively referred to as the "Equipment." Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon.

2. *Charges.*—(a) The charges payable by the Exhibitor shall be the following: (Strike out inapplicable payment plan.)

Plan One.—The term of this agreement shall commence at close of business of the Exhibitor on _____ 193__. On each and every Saturday thereafter during said term, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Options A, B, or C, set forth in Section 13.

Plan Two—First Period.—The term of this agreement shall commence at close of business of the Exhibitor on _____ 193__. On each and every Saturday thereafter the Exhibitor shall pay Products the sum of _____ ($_____) Dollars until _____ (_____) such weekly payments shall have been made, which payments include a sum to be applied to payments required to be made under a prior agreement or agreements between the parties respecting the Equipment, in consideration of which payments Products agrees to the cancellation of said prior agreements as more particularly provided in Section 14.

Second Period.—Commencing on the Saturday following the last Saturday on which a payment is due in accordance with the preceding paragraph and on each and every Saturday thereafter during the remainder of the term hereof, the Exhibitor shall pay Products the sum of _____ ($ _____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Options A, B, or C, set forth in Section 13.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of all such equipment and parts to the Theatre.

3. *Inspection of Equipment.*—(a) Promptly following the commencement of the term hereof, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(b) From time to time during the term of this agreement (except as provided in Section 13), Products shall inspect, test, and adjust the Equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (a). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

Digitized by Google

(c) Products shall be called upon by the Exhibitor to make special service calls or otherwise provide service and inspection facilities beyond the service and inspection provided for in paragraphs (a) and (b) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of misuse or abuse of the Equipment or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor in addition to the weekly charges referred to in Section 2, for any services thus rendered Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services.

4. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre, or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

5. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any other charges the due date of which is not definitely fixed, either at the time of delivery of said parts, or at Products' option, upon rendition of billing.

6. *Damage or Destruction of Equipment.*—(a) If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect of the terms of this agreement, upon written request of the Exhibitor, Products (except as provided in Section 13), will at its own expense repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed.

(b) The Exhibitor, at its own expense, shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section, in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of such equipment; shall furnish all necessary labor and facilities, including but not by way of limitation, a suitable source of electric power supply with outlets conveniently located for the equipment, supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment, and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment. Replacing equipment and major replacement parts furnished under the provisions of this section, shall be installed under Products' supervision and all equipment and parts thus furnished shall be installed in accordance with instructions furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of replacing equipment and parts.

(c) In the event that the Equipment or a major portion thereof shall be replaced by Products as provided in this section, Products shall provide an engineer, and if deemed necessary by Products, a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the replacing equipment. Notice from the Exhibitor that the replacing equipment has been received and that the Theatre will be ready for installation of said equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said

Digitized by Google

engineer, and projectionist if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work done by the Exhibitor is not ready for inspection, or said work is not advanced sufficiently to permit the installation of the equipment upon the date that the engineer shall arrive at the Theatre, or if supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expenses which Products may have incurred by reason of said services being required otherwise than for a continuous period. In the event of the Equipment being damaged or destroyed as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until the Equipment shall have been repaired or replaced by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, all of the provisions of this agreement shall apply to such replacing equipment and the original term of this agreement shall be extended for an interval equivalent to the period or periods of abatement. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

7. *Title.*—Products shall retain title to all equipment, repair, and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

8. *Patent Protection.*—Products shall defend at its own expense all suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purpose furnished, and will save the Exhibitor harmless from all expenses of defending said suits and from all payments which by final judgment the Exhibitor may be required to pay to the complainant as damages, profits, or costs on account of such infringement; and if such use shall be prevented by injunction in such suit, Products may, within thirty (30) days from the date any such injunction becomes effective, at its option, replace said apparatus or material with suitable non-infringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if Products does not within said thirty (30) days thus replace or modify the apparatus or material or procure for the Exhibitor the right to continue to use the same, either party may upon thirty (30) days' written notice terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided, however, and all of the obligations of Products in this paragraph contained are upon condition that Products shall be given immediate written notice of all claims of such infringement and of all such suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall be furnished (at Products' request) all information and assistance available to the Exhibitor for such defense; and provided further, that the obligations of Products referred to in this section shall not apply to uses of said apparatus in combination with other apparatus or parts not furnished by Products and that the liability of Products hereunder shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. If, at the time of commencement of any suit against the Exhibitor alleging patent infringement, the Exhibitor is in default hereunder, Products shall not be subject to the obligations referred to in this section, but the obligations of the Exhibitor to notify Products and to furnish information and assistance shall continue in effect, notwithstanding such default of the Exhibitor, and Products at its option may undertake the defense of any such suit and in such event Products' liability shall be limited to the obligations set forth in the first sentence of this paragraph. The liability of Products for any infringement shall be limited to the agreements herein contained.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

Digitized by Google

10. *Abatement of Charges.*—(a) If during any annual period of the term hereof, the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week and shall give Products not less than ten (10) days' written notice of intention to cease using the Equipment and a similar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

(b) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

11. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in event of failure of the Exhibitor to make payment of charges referred to in Section 2 hereof or failure to pay taxes in accordance with Section 9 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 10) upon the Exhibitor ceasing to operate the Theatre, or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of, any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damage or destroyed equipment, patent protection, and abatement of charges, as referred to in Sections 6, 8, and 10, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

12. *Repossession of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools, and other accessories which shall have been furnished by Products.

13. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods of abatement of charges hereunder, commencing on the date of commencement referred to in paragraph (a), Section 2.

The following options shall be available to the Exhibitor, provided however, that if payments hereunder are to be made in accordance with Plan 2 of Section 2, then the said option shall be available only at such time as all of the payments required to be made during the *First Period* of said Plan 2, shall have been paid in full.

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment, and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Digitized by Google

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option C.—At the expiration of the third year of term hereof, but if there shall have been an abatement of charges during the first three (3) years, only at such time as One hundred and fifty-six (156) weekly payments shall have been made to Products, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Option A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any of such options shall be exercised, Products shall be under no further obligation to inspect, test, or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, to furnish any patent protection, or to fulfill any other obligations hereinabove set forth respecting said Equipment, whether or not similar to the foregoing.

If upon the expiration of the original term the Exhibitor shall not have exercised Options A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate, and such notice may be served by either party at any time after the expiration of the original term.

14. *General Provisions.*—(a) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment, and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Producers' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(b) The time of all payments herein provided for shall be of the essence of this agreement.

(c) Upon any termination of this agreement Products shall retain and may enforce any and all claims and rights of action against the Exhibitor, which it may then possess arising out of any default by the Exhibitor hereunder or any indebtedness then due to Products which accrued under the provisions of this agreement.

(d) The agreement originally entered into between the Exhibitor and Products with respect to the furnishing and use of the Equipment and all agreements supplemental and amendatory thereto shall terminate as of the date of commencement of the term of this agreement and all obligations of said parties under said agreements are hereby released and forever discharged.

(e) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(f) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein, and the construction and performance thereof shall be governed by the laws of the State of New York.

347 T.-R. W.—Rev.

This agreement made in triplicate at New York, New York, this _____ day of _____, 193 _____, by Electrical Research Products, Inc., a Delaware corporation, of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____, a _____ corporation, of No. _____ Street/Avenue, City of _____, State of _____ (hereinafter called the "Exhibitor"), the operator of the _____ Theatre, at No. _____ Street/Avenue, City of _____, State of _____ (hereinafter called the "Theatre");

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease and Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products the present Western Electric Sound Reproducing Equipment heretofore supplied by Products and now installed in the Theatre, together with any supplemental equipment described in this section.

The present equipment consists of:

_____

The supplemental equipment consists of:

_____

The supplemental equipment shall be furnished by Products f. o. b. its warehouse at _____, on or before _____, 193__ (provided that Products shall not be responsible for any inconvenience or damage resulting from failure to ship the supplemental equipment on or before said date); shall be installed by the Exhibitor at its own expense and under Products' supervision, in the same manner and subject to all of the provisions respecting the installation of repair and replacing equipment which are set forth in paragraphs (b) and (c) of Section 6.

All of the aforementioned equipment is hereinafter collectively referred to as the "Equipment." Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical re-

Digitized by Google

production of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon.

2. *Charges.*—(a) The charges payable by the Exhibitor shall be the following: (Strike out inapplicable payment plan).

Plan One.—The term of this agreement shall commence at close of business of the Exhibitor on _____, 193__. On each and every Saturday thereafter during said term, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Options A, B, or C, set forth in Section 13.

Plan Two—First Period.—The term of this agreement shall commence at close of business of the Exhibitor on _____, 193__. On each and every Saturday thereafter the Exhibitor shall pay Products the sum of _____ ($_____) Dollars until _____ (_____) such weekly payments shall have been made, which payments include a sum to be applied to payments required to be made under a prior agreement or agreements between the parties respecting the Equipment, in consideration of which payments Products agrees to the cancellation of said prior agreements as more particularly provided in Section 14.

Second Period.—Commencing on the Saturday following the last Saturday on which a payment is due in accordance with the preceding paragraph and on each and every Saturday thereafter during the remainder of the term hereof, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Options A, B, or C, as set forth in Section 13.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder, and shall arrange for any trucking and handling necessary to effect delivery of all such equipment and parts to the Theatre.

3. *Inspection of Equipment.*—(a) Promptly following the commencement of the term hereof, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(b) From time to time during the term of this agreement (except as provided in Section 13), Products shall inspect, test, and adjust the Equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (a). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

(c) If Products shall be called upon by the Exhibitor to make special service calls or otherwise provide service and inspection facilities beyond the service and inspection provided for in paragraphs (a) and (b) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of misuse or abuse of the Equipment or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor in addition to the weekly charges referred to in Section 2, for any services thus rendered Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services.

4. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the

Digitized by Google

Equipment, and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre, or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever, and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

5. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any other charges the due date of which is not definitely fixed, either at the time of delivery of said parts, or at Products' option, upon rendition of billing.

6. *Damage or Destruction of Equipment.*—(a) If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect of the terms of this agreement, upon written request of the Exhibitor, Products (except as provided in Section 13), will, at its own expense, repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed.

(b) The Exhibitor, at its own expense, shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section, in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of such equipment; shall furnish all necessary labor and facilities, including but not by way of limitation, a suitable source of electric power supply with outlets conveniently located for the equipment, supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment, and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment. Replacing equipment and major replacement parts furnished under the provisions of this section, shall be installed under Products' supervision, and all equipment and parts thus furnished shall be installed in accordance with instructions furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of replacing equipment and parts.

(c) In the event that the Equipment or a major portion thereof shall be replaced by Products as provided in this section, Products shall provide an engineer, and, if deemed necessary by Products, a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the replacing equipment. Notice from the Exhibitor that the replacing equipment has been received and that the Theatre will be ready for installation of said equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer, and projectionist, if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work done by the Exhibitor is not ready for inspection, or said work is not advanced sufficiently to permit the installation of the equipment upon the date that the engineer shall arrive at the Theatre, or if supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expenses which Products may have incurred by reason of said services being required otherwise than for a continuous period. In the event of the Equipment being damaged or destroyed as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until the Equipment shall have been repaired or replaced by Products. Upon any repair or replacing equipment being furnished by

Digitized by Google

Products in accordance with the provisions of this section, all of the provisions of this agreement shall apply to such replacing equipment, and the original term of this agreement shall be extended for an interval equivalent to the period or periods of abatement. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

7. *Title.*—Products shall retain title to all equipment, repair and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

8. *Patent Protection.*—Products shall defend at its own expense all suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purposes furnished, and will save the Exhibitor harmless from all expenses of defending said suits and from all payments which by final judgment the Exhibitor may be required to pay to the complainant as damages, profits, or costs on account of such infringement; and if such use shall be prevented by injunction in such suit, Products may, within thirty (30) days from the date any such injunction becomes effective, at its option, replace said apparatus or material with suitable non-infringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if Products does not within said thirty (30) days thus replace or modify the apparatus or material or procure for the Exhibitor the right to continue to use the same, either party may, upon thirty (30) days' written notice, terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided, however, and all of the obligations of Products in this paragraph contained are upon condition that Products shall be given immediate written notice of all claims of such infringement and of all such suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall be furnished (at Products' request) all information and assistance available to the Exhibitor for such defense; and provided further, that the obligations of Products referred to in this section shall not apply to uses of said apparatus in combination with other apparatus or parts not furnished by Products and that the liability of Products hereunder shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. If, at the time of commencement of any suit against the Exhibitor alleging patent infringement, the Exhibitor is in default hereunder, Products shall not be subject to the obligations referred to in this section, but the obligations of the Exhibitor to notify Products and to furnish information and assistance shall continue in effect, notwithstanding such default of the Exhibitor, and Products at its option may undertake the defense of any such suit and in such event Products' liability shall be limited to the obligations set forth in the first sentence of this paragraph. The liability of Products for any infringement shall be limited to the agreements herein contained.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

10. *Abatement of Charges.*—(a) If during any annual period of the term hereof, the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week and shall give Products not less than ten (10) days' written notice of intention to cease using the Equipment and a similar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

(b) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York; Chicago, Illinois; or Los Angeles, California; whichever office is nearest the Exhibitor.

Digitized by Google

11. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of any breach or default on the part of the Exhibitor, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 10), upon the Exhibitor ceasing to operate the Theatre, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment, patent protection, and abatement of charges, as referred to in Sections 6, 8, and 10, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

12. *Repossession of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition, reasonable wear and tear only excepted, the Equipment, together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools, and other accessories which shall have been furnished by Products.

13. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods of abatement of charges hereunder, commencing on the date of commencement referred to in paragraph (a), Section 2.

The following options shall be available to the Exhibitor; provided, however, that if payments hereunder are to be made in accordance with Plan 2 of Section 2, then the said options shall be available only at such time as all of the payments required to be made during the *First Period* of said Plan 2, shall have been paid in full.

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option C.—At the expiration of the third year of term hereof, but if there shall have been an abatement of charges during the first three (3) years, only at such time as One hundred and fifty-six (156) weekly payments shall have been made to Products, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Option A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any of such options shall be exercised, Products shall be under no further obligation to inspect, test, or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, to furnish any patent protection, or to fulfill any other

Digitized by Google

obligations hereinabove set forth respecting said Equipment, whether or not similar to the foregoing.

If upon the expiration of the original term the Exhibitor shall not have exercised Options A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate and such notice may be served by either party at any time after the expiration of the original term.

14. *General Provisions.*—(a) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(b) The time of all payments herein provided for shall be of the essence of this agrement.

(c) Upon any termination of this agreement Products shall retain and may enforce any and all claims and rights of action against the Exhibitor, which it may then possess arising out of any default by the Exhibitor hereunder or any indebtedness then due to Products which accrued under the provisions of this agreement.

(d) The agreement originally entered into between the Exhibitor and Products with respect to the furnishing and use of the Equipment and all agreements supplemental and amendatory thereto shall terminate as of the date of commencement of the term of this agreement and all obligations of said parties under said agreements are hereby released and forever discharged.

(e) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(f) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

347 T.-R. W.

This agreement made in triplicate at New York, New York, this _____ day of _____, 193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and _____, a _____ corporation of No. _____ Street/Avenue, City of _____, State of _____ (hereinafter called the "Exhibitor"), the operator of the _____ Theatre at No. _____ Street/Avenue, City of _____, State of _____ (hereinafter called the "Theatre");

Witnesseth, that in consideration of the covenants and conditions herein set forth the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products the present Western Electric Sound Reproducing Equipment heretofore supplied by Products and now installed in the Theatre, together with any supplemental equipment described in this section.

The present equipment consists of:—

The supplemental equipment consists of:—

The supplemental equipment shall be furnished by Products f. o. b. its warehouse at _____, on or before _____, 193__ (provided that Products shall not be responsible for any inconvenience or damage resulting from failure to ship the supplemental equipment on or before said date); shall be installed by the Exhibitor at its own expense and under Products' supervision, in the same manner and subject to all of the provisions respecting the installation of repair and replacing equipment which are set forth in paragraphs (b) and (c) of Section 6.

All of the aforementioned equipment is hereinafter collectively referred to as the "Equipment." Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon.

2. *Charges.*—(a) The charges payable by the Exhibitor shall be the following: (Strike out inapplicable payment plan).

Plan One.—On _____, 193__, which shall be the date of commencement of the term of this agreement, and on each and every Saturday thereafter during said term, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Options A, B, or C set forth in Section 13.

Plan Two—First Period.—On _____, 193__, which shall be the date of commencement of the term of this agreement, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars and shall pay a like sum on each and every Saturday thereafter until _____ (_____) such weekly payments shall have been made, which payments include a sum to be applied to payments required to be made under a prior agree-

Digitized by Google

ment or agreements between the parties respecting the Equipment, in consideration of which payments Products agree to the cancellation of said prior agreements as more particularly provided in Section 14.

Second Period.—Commencing on the Saturday following the last Saturday on which a payment is due in accordance with the preceding paragraph and on each and every Saturday thereafter during the remainder of the term hereof, the Exhibitor shall pay Products the sum of _____ ($_____) Dollars, subject only to the abatements hereinafter provided for and to the exercise of Options A, B, or C set forth in Section 13.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of all such equipment and parts to the Theatre.

3. *Inspection of Equipment.*—(a) Promptly following the commencement of the term hereof, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(b) From time to time during the term of this agreement (except as provided in Section 13), Products shall inspect, test, and adjust the Equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (a). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

(c) If Products shall be called upon by the Exhibitor to make special service calls or otherwise provide service and inspection facilities beyond the service and inspection provided in paragraphs (a) and (b) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of misuse or abuse of the Equipment or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor, in addition to the weekly charges referred to in Section 2, for any services thus rendered Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services.

4. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre, or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

5. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any other charges the due date of which is not definitely fixed, either at the time of delivery of said parts, or at Products' option, upon rendition of billing.

6. *Damage or Destruction of Equipment.*—(a) If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect to the terms of this agreement, upon written request of the Exhibitor, Products (except as provided in Section 13) will at its own expense repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed.

(b) The Exhibitor, at its own expense, shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section, in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of such equipment; shall furnish

Digitized by Google

all necessary labor and facilities, including, but not by way of limitation, a suitable source of electric power supply with outlets conveniently located for the equipment, supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment. Replacing equipment and major replacement parts furnished under the provisions of this section shall be installed under Products' supervision and all equipment and parts thus furnished shall be installed in accordance with instructions furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of replacing equipment and parts.

(c) In the event that the Equipment or a major portion thereof shall be replaced by Products as provided in this section, Products shall provide an engineer, and, if deemed necessary by Products, a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the replacing equipment. Notice from the Exhibitor that the replacing equipment has been received and that the Theatre will be ready for installation of said equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer, and projectionist if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work done by the Exhibitor is not ready for inspection, or said work is not advanced sufficiently to permit the installation of the equipment upon the date that the engineer shall arrive at the Theatre, or if supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expenses which Products may have incurred by reason of said services being required otherwise than for a continuous period. In the event of the Equipment being damaged or destroyed as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until the Equipment shall have been repaired or replaced by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, all of the provisions of this agreement shall apply to such replacing equipment and the original term of this agreement shall be extended for an interval equivalent to the period or periods of abatement. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

7. *Title.*—Products shall retain title to all equipment, repair and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property, notwithstanding the manner or method of its attachment to any real property.

8. *Patent Protection.*—Products shall defend at its own expense all suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purposes furnished, and will save the Exhibitor harmless from all expenses of defending said suits and from all payments which by final judgment the Exhibitor may be required to pay to the complainant as damages, profits, or costs on account of such infringement; and if such use shall be prevented by injunction in such suit, Products may, within thirty (30) days from the date any such injunction becomes effective, at its option, replace said apparatus or material with suitable non-infringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if Products does not within said thirty (30) days thus replace or modify the apparatus or material or procure for the Exhibitor the right to continue to use the same, either party may upon thirty (30) days' written notice terminate this agreement, but such termination shall not relieve Products of its obligations

Digitized by Google

hereunder with respect to infringements alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided however, and all of the obligations of Products in this paragraph contained are upon condition that Products shall be given immediate written notice of all claims of such infringement and of all such suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall be furnished (at Products' request) all information and assistance available to the Exhibitor for such defense; and provided further, that the obligations of Products referred to in this section shall not apply to uses of said apparatus in combination with other apparatus or parts not furnished by Products and that the liability of Products hereunder shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. If, at the time of commencement of any suit against the Exhibitor alleging patent infringement, the Exhibitor is in default hereunder, Products shall not be subject to the obligations referred to in this section, but the obligations of the Exhibitor to notify Products and to furnish information and assistance shall continue in effect, notwithstanding such default of the Exhibitor, and Products at its option may undertake the defense of any such suit and in such event Products' liability shall be limited to the obligations set forth in the first sentence of this paragraph. The liability of Products for any infringement shall be limited to the agreements herein contained.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

10. *Abatement of Charges.*—(a) If during any annual period of the term hereof, the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week and shall give Products not less than ten (10) days' written notice of intention to cease using the Equipment and a similar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

(b) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

11. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of any breach or default on the part of the Exhibitor, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 10), upon the Exhibitor ceasing to operate the Theatre, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment, patent protection and abatement of charges, as referred to in Sections 6, 8, and 10, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

12. *Repossession of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition reasonable wear and tear only excepted, the Equipment together with all repair and

Digitized by Google

replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools, and other accessories which shall have been furnished by Products.

13. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods of abatement of charges hereunder, commencing on the date of commencement referred to in paragraph (a), Section 2.

The following options shall be available to the Exhibitor, provided however, that if payments hereunder are to be made in accordance with Plan 2 of Section 2, then the said options shall be available only at such time as all of the payments required to be made during the *First Period* of said Plan 2, shall have been paid in full.

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of ($) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of ($) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option C.—At the expiration of the third year of term hereof, but if there shall have been an abatement of charges during the first three (3) years, only at such time as One hundred and fifty-six (156) weekly payments shall have been made to Products, the Exihibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Option A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any of such options shall be exercised, Products shall be under no further obligations to inspect, test or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, to furnish any patent protection, or to fulfill any other obligations hereinabove set forth respecting said Equipment, whether or not similar to the foregoing.

If upon the expiration of the original term the Exhibitor shall not have exercised Options A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate and such notice may be served by either party at any time after the expiration of the original term.

14. *General Provisions.*—(a) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

Digitized by Google

(b) The time of all payments herein provided for shall be of the essence of this agreement.

(c) Upon any termination of this agreement Products shall retain and may enforce any and all claims and rights of action against the Exhibitor, which it may then possess arising out of any default by the Exhibitor hereunder or any indebtedness then due to Products which accrued under the provisions of this agreement.

(d) The agreement originally entered into between the Exhibitor and Products with respect to the furnishing and use of the Equipment and all agreements supplemental and amendatory thereto shall terminate as of the date of commencement of the term of this agreement and all obligations of said parties under said agreements are hereby released and forever discharged.

(e) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(f) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

WAIVER

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment by Electrical Research Products Inc. of the sum of One ($1.00) Dollars, receipt of which is hereby acknowledged, the undersigned partles having an interest in the Theatre referred to in said agreement as owner or lessor thereof, hereby consent(s) to the installation of said Equipment and waive(s) any and all rights or claims thereto of whatsoever kind or nature which I/we have or may hereafter acquire as landlord(s) of said Theatre, which might or could in any manner interfere with any rights of Electrical Research Products, Inc. in or to said Equipment.

Dated this_____day of_____, 193__.

_____

Owner of Theatre.

_____

Lessor of Theatre (other than Owner).

This agreement made in triplicate at New York, New York, this_____ day of_____193__, by Electrical Research Products, Inc., a Delaware corporation of No. 250 West 57th Street, New York, New York (hereinafter called "Products"), and_____ a _____ _____corporation of No_____ Street/Avenue, City of_____, State of _____ (hereinafter called the "Exhibitor"), the operator of the_____ Theatre at No_____ Street/Avenue, City of_____, State of _____ (hereinafter called the "Theatre");

Witnesseth, that in consideration of the covenants and conditions herein set forth, the parties agree as follows:

1. *Lease of Equipment and Grant of License.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products a Western Electric

Digitized by Google

Sound Reproducing Equipment (hereinafter called the "Equipment") and Products hereby grants to the Exhibitor, subject to the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre, solely for the electrical reproduction of sound in connection with or incidental to the exhibition of motion pictures and to employ to the extent necessarily involved in such use of said Equipment, the methods and systems of Products covered by all United States patents and applications for United States patents relating to said Equipment or to such use thereof, in respect of which Products now has, or during the term of this agreement may acquire, the right to grant such license. The Exhibitor shall operate the Equipment in manner approved by Products from time to time and shall not, without Products' approval, or otherwise than under its supervision, change or modify any circuits, or electrical or mechanical features of the Equipment, or break any seal which may be placed thereon. The Equipment to be furnished hereunder is:_____

_____

2. *Charges.*—(a) The Exhibitor shall pay to Products the sum of_____ _____($_____) Dollars upon submission of this agreement for acceptance and a like sum on each and every Saturday commencing on the first Saturday of the term hereof as fixed by the provisions of Section 16. The foregoing charges shall be paid by the Exhibitor subject only to the abatements hereinafter provided for and to curtailment of such charges in the event that the Exhibitor shall elect to continue to use the Equipment at an annual rental of One ($1.00) Dollar in accordance with Options A, B, or C, referred to in Section 16.

(b) In addition to the charges referred to in paragraph (a) of this section, the Exhibitor shall pay all transportation and handling charges on all equipment and parts therefor which may be furnished hereunder and shall arrange for any trucking and handling necessary to effect delivery of the Equipment to the Theatre.

3. *Shipment of Equipment.*—The Equipment shall be furnished f. o. b. Products' warehouse at_____, and shall be shipped on or before _____, 193__. Products shall not be responsible for any inconvenience or damage resulting from failure to ship the Equipment on or before the aforementioned date.

4. *Facilities for Installation.*—Prior to the installation of the Equipment, the Exhibitor shall make available a suitable source of electric power supply, with outlets conveniently located for the Equipment, shall provide supports for horns, a screen satisfactory to Products as to its acoustic properties, suitable space properly ventilated for the installation of storage batteries and charging equipment or other power equipment and shall make such other alterations and modifications in and to the Theatre, including furnishing of drapes for acoustic purposes, as may be necessary for the proper installation and operation of the Equipment.

5. *Installation of Equipment.*—(a) The Exhibitor shall install the Equipment at its own expense in such manner as to comply with all laws, rules, ordinances, and regulations pertaining to electrical installations of this character. The installation shall be made in accordance with instructions furnished by Products and under Products' supervision. All preliminary and installation work done and material furnished by the Exhibitor and its agents or servants shall be subject to approval by Products and the Equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to responsibility or liability of any kind or nature. Except as herein otherwise specifically provided, the Exhibitor shall provide and pay for all material and services required in preparation for and in connection with the installation of the Equipment.

(b) Products shall provide an engineer, and if deemed necessary by Products a projectionist, to inspect the preliminary work done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer, and projectionist if required, will be furnished without additional cost to the Exhibitor for a continuous period not to exceed three (3) days. If the preliminary work to be done by the Exhibitor is not ready for-

Digitized by Google

inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of three (3) days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per man per day or fraction thereof for any period in excess of three (3) days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period. At the time of installation Products shall instruct the motion pictures operators of the Exhibitor in the manner and method of operating the Equipment for a period not to exceed three (3) days.

6. *Inspection of Equipment.*—(a) At the time of installation, Products will determine by tests and adjustments of the Equipment as installed, the normal limits of gain, frequency response, and output power level within which the Equipment will, in its judgment, give the best quality of sound reproduction in the Theatre under average audience conditions, and shall furnish to the Exhibitor a transmission test report setting forth such normal limits.

(b) From time to time during the term of this agreement (except as provided in Section 16), Products shall inspect, test, and adjust the Equipment and furnish the Exhibitor with transmission test reports for comparison with the standards established under paragraph (a). When such inspection shows any material deviation in the performance of the Equipment from the established standards, Products shall inform the Exhibitor's employees regularly engaged in the operation of the Equipment of the steps that should be taken to obtain the standards of quality which have been established as normal.

(c) If Products shall be called upon by the Exhibitor to make special service calls or otherwise provide service and inspection facilities beyond the service and inspection provided for in paragraphs (a) and (b) above, and such services shall be found to have been required because of faulty operation of the Equipment occasioned by the use of parts not furnished by Products, or by reason of misuse or abuse of the Equipment or failure of the Exhibitor to safeguard the Equipment properly, or to operate it in the manner approved by Products, Products may charge the Exhibitor in addition to the weekly charges referred to in Section 2, for any services thus rendered Five ($5.00) Dollars per man per hour or fraction thereof, including time consumed in transit, together with any expenses and transportation charges incurred in furnishing such services.

7. *Liability for Interruption, Injuries, Etc.*—Nothing herein contained shall be construed as a guaranty by Products of uninterrupted functioning of the Equipment and Products shall not be responsible in any manner for any damage to or interruption in the operation of the Theatre or any equipment therein, or for any injury, loss, or damage to persons or property in the Theatre, arising from any cause whatever and the Exhibitor shall save Products harmless from any such liability, except for injury to Products' employees.

8. *Additional Parts, Etc.*—Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any parts thus furnished and any other charges the due date of which is not definitely fixed, either at the time of delivery of said parts or, at Products' option, upon rendition of billing.

9. *Damage or Destruction of Equipment.*—If the Equipment while installed in the Theatre shall be damaged or destroyed by extraneous fire, or by earthquake, tornado, or other act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not, at the time of the occurrence of such damage or destruction, be in default in respect of the terms of this agreement, and shall continue to operate the Theatre, or shall resume the operation thereof at its original location during the term of this agreement, upon written request of the Exhibitor, Products (except as provided in Section 16), will at its own expense repair the Equipment or, at its option, furnish replacing Western Electric sound equipment then available to Products equivalent in type and condition to the Equipment thus damaged or destroyed. The Exhibitor, at its own expense, shall furnish all necessary facilities and labor and shall install all parts and replacing equipment furnished by Products in accordance with the provisions of this section. Such parts and replacing equipment shall be installed under Products' supervision and in the event of Products' supervisory services being required for a period in

Digitized by Google

excess of three (3) days, the Exhibitor shall pay Products' charge for any services thus rendered at the per diem rate plus the additional expenses referred to in paragraph (b), Section 5 hereof. In the event of damage or destruction of the Equipment as aforesaid, the weekly charges payable hereunder shall abate pro rata from the date of the damage or destruction until the Equipment shall have been repaired or replaced by Products. Upon any repair or replacing equipment being furnished by Products in accordance with the provisions of this section, the Exhibitor shall provide facilities for the installation of such equipment in the same manner as provided in Section 4; all of the provisions of this agreement shall apply to such replacing equipment and the original term of this agreement shall be extended for an interval equivalent to the period or periods of abatement. Except as herein otherwise provided, the Equipment shall be held at the sole risk of the Exhibitor.

10. *Title.*—Products shall retain title to all equipment, repair, and replacement parts, tools, drawings, and printed or written data applicable thereto. All such equipment and accessories shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

11. *Patent Protection.*—Products shall defend at its own expense all suits alleging infringement of any United States patent by reason of the use of any apparatus or material furnished hereunder, as and for the purposes furnished, and will save the Exhibitor harmless from all expenses of defending said suits and from all payments which by final judgment the Exhibitor may be required to pay to the complainant as damages, profits, or costs on account of such infringement; and if such use shall be prevented by injunction in such suit, Products may, within thirty (30) days from the date any such injunction becomes effective, at its option, replace said apparatus or material with suitable noninfringing apparatus or material, or modify it so that it will not infringe, or procure for the Exhibitor the right to continue to use the same, and if Products does not within said thirty (30) days thus replace or modify the apparatus or material or procure for the Exhibitor the right to continue to use the same, either party may upon thirty (30) days' written notice terminate this agreement, but such termination shall not relieve Products of its obligations hereunder with respect to infringements alleged to have occurred theretofore or relieve the Exhibitor of any of its obligations which accrued prior to such termination; provided, however, and all of the obligations of Products in this paragraph contained are upon condition that Products shall be given immediate written notice of all claims of such infringement and of all such suits and full opportunity and authority to assume the sole defense thereof, including appeals, and shall be furnished (at Products' request) all information and assistance available to the Exhibitor for such defense; and provided further, that the obligations of Products referred to in this section shall not apply to uses of said apparatus in combination with other apparatus or parts not furnished by Products and that the liability of Products hereunder shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. If, at the time of commencement of any suit against the Exhibitor alleging patent infringement, the Exhibitor is in default hereunder, Products shall not be subject to the obligations referred to in this section, but the obligations of the Exhibitor to notify Products and to furnish information and assistance shall continue in effect, notwithstanding such default of the Exhibitor, and the defense of any such suit and in such event Products' liability shall be limited to the obligations set forth in the first sentence of this paragraph. The liability of Products for any infringement shall be limited to the agreements herein contained.

12. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property and license taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

13. *Abatement of Charges.*—(a) If during any annual period of the term hereof the Exhibitor shall close the Theatre temporarily and cease to use the Equipment for a continuous period of not less than one (1) week and shall give Products not less than ten (10) days' written notice of intention to cease using the Equipment and a similar notice of intention to resume the use thereof, Products will abate the weekly charges payable hereunder during the continuous period that the Equipment is thus inoperative, commencing with the

Digitized by Google

first full week following the week in which the Theatre is closed, but such abatement shall not be effective for more than thirteen (13) weeks during any annual period.

(b) Products, at its option, may seal the Equipment during any period that it is inoperative. If Products shall have sealed the Equipment and it shall be unsealed other than by authority of Products, it shall be deemed to have been in use for the purpose of determining charges payable hereunder. Notices referred to in this section shall be mailed to Products' office at New York, New York, Chicago, Illinois, or Los Angeles, California, whichever office is nearest the Exhibitor.

14. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of any breach or default on the part of the Exhibitor, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor or upon the making of an assignment of any of the Exhibitors' assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 13), upon the Exhibitor ceasing to operate the Theatre, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Products' title to, or right to possession of any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment, patent protection, and abatement of charges, as referred to in Section 9, 11, and 13, are conditional upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

15. *Repossession of Equipment.*—Upon any termination of this agreement the Exhibitor shall surrender to Products, in good order and condition reasonable wear and tear only excepted, the Equipment together with all repair and replacement parts (other than exhausted consumable parts such as vacuum tubes, photoelectric cells, and exciting lamps), tools, and other accessories which shall have been furnished by Products.

16. *Term.*—The original term of this agreement and the license herein granted shall be three (3) years and a period equal to any period or periods of abatement of charges hereunder, commencing on the day upon which the Equipment is first used for a public performance, or the day which Products shall certify to the Exhibitor that the Equipment is available for public performances, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon submission of this agreement) shall commence not later than thirty (30) days after the date of shipment of the Equipment.

The following options shall be available to the Exhibitor:

Option A.—At the expiration of the first year of the term hereof, but if there shall have been an abatement of charges during said first year, only at such time as Fifty-two (52) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option B.—At the expiration of the second year of the term hereof, but if there shall have been an abatement of charges during the first two (2) years, only at such time as One hundred and four (104) weekly payments shall have been made to Products hereunder, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* pay Products the sum of _____ ($_____) Dollars, in addition to the other charges payable hereunder prior to the date of such payment and thereafter continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

Option C.—At the expiration of the third year of the term hereof, but if there shall have been an abatement of charges during the first three (3) years,

Digitized by Google

only at such time as One hundred and fifty-six (156) weekly payments shall have been made to Products, the Exhibitor may *either* terminate this agreement and surrender the Equipment to Products *or* continue the lease of the Equipment for a period of fifteen (15) years at an annual rental of One ($1.00) Dollar, subject to the conditions hereinafter set forth.

If the Exhibitor shall desire to exercise Options A, B, or C, it shall give Products written notice of intention so to do, not less than sixty (60) days prior to the effective date of any of said options. If any of such options shall be exercised, Products shall be under no further obligation to inspect, test, or adjust the Equipment, to repair or replace the Equipment in the event of any damage or destruction, to furnish any patent protection, or to fulfill any other obligations hereinabove set forth respecting said Equipment, whether or not similar to the foregoing.

If upon the expiration of the original term the Exhibitor shall not have exercised Options A, B, or C, this agreement shall continue in effect after the original term until either party shall serve upon the other a sixty (60) day written notice of intention to terminate and such notice may be served by either party at any time after the expiration of the original term.

17. General Provisions.—(a) None of the provisions of this agreement shall be construed as prohibiting the Exhibitor from taking any reasonable action to protect or repair the Equipment in the event of an accident or breakdown. The Exhibitor shall notify Products immediately by registered mail of any unsatisfactory functioning of the Equipment and the absence of such notification shall be conclusive as to the Equipment functioning satisfactorily. The Exhibitor, at its own expense, shall obtain all necessary permits and do all other acts and things required by all laws, ordinances, and regulations relating to the maintenance, operation, and use of the Equipment, or any part thereof, and comply with any fire insurance underwriters' requirements relating thereto. Upon proper identification, the Exhibitor shall provide access for Products' representatives at all reasonable hours for all purposes referred to herein which may require such access. If in connection with any operation conducted by Products hereunder, it shall be necessary for any of the Exhibitor's employees to be in attendance at the Theatre, any charges for the services of such employees shall be borne by the Exhibitor.

(b) The time of all payments herein provided for shall be of the essence of this agreement.

(c) This agreement shall not be assigned by the Exhibitor without Products' written consent. Subject to such restriction upon assignment by the Exhibitor, it shall be binding upon the parties and their respective successors, assigns, and legal representatives.

(d) The entire understanding of the parties with respect to the subject matter of this agreement is expressed herein and the construction and performance thereof shall be governed by the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or agents in their behalf, the day and year first above written.

WAIVER

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment by Electrical Research Products, Inc., of the sum of One ($1.00) Dollar, receipt of which is hereby acknowledged, the undersigned parties having an interest in the Theatre referred to in said agreement as owner or lessor thereof, hereby consent(s) to the installation of said Equipment and waive(s) any and all rights or claims thereto of whatsoever kind or nature which I/we have or may hereafter acquire as landlord(s) of said Theatre, which might or could

Digitized by Google

in any manner interfere with any rights of Electrical Research Products, Inc., in or to said Equipment.

Dated this _____ day of _____, 193__.

_____,
Owner of Theatre.

_____,
Lessor of Theatre (other than Owner).

3310 S. T. R.

This agreement, made in triplicate at New York, N. Y., this _____ day of _____, 193__, by Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware corporation, having its principal place of business at 250 West 57th Street, New York, N. Y. (hereinafter called "Products"), and _____ a _____ corporation having its principal place of business at No. _____ Street/Avenue, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), the operator of the _____ Theatre, at No. _____ Street/Avenue, in the city of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that, for and in consideration of the covenants and conditions herein set forth, the parties hereto agree as follows:

1. (a) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a used Western Electric Sound Equipment (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, and limitations herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in connection with or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said Equipment the methods and systems of Products, under all United States patents and applications for United States patents, relating to said Equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license. The Equipment to be furnished hereunder is as follows:

_____

(b) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. _____ and Products will ship the Equipment on or about _____, 193__. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment. Products shall not be liable for damages resulting from failure to ship the Equipment at the time stipulated herein.

2. *Rental.*—(a) As rental for the first week or part thereof of the term of this agreement the Exhibitor shall pay to Products herewith _____ ($_____) Dollars. Thereafter the Exhibitor shall pay to Products as rental throughout the term hereof the sum of _____ ($_____) Dollars per week, provided, however, that rental payable for the weeks falling within the period commencing with the _____ Sunday of _____ of each year and ending with the Saturday of the thirteenth (13th) week thereafter shall be the sum of _____ ($_____) Dollars per week. The charges above referred to, other than the payment tendered herewith, shall be payable for each week in advance on Saturday of the preceding week. The term "week" as used herein shall be deemed to mean a period of seven (7) days, commencing at midnight on Saturday and ending at midnight on the following Saturday.

(b) If the Theatre shall be closed for a minimum period of four (4) weeks and if the Equipment shall have been sealed for shut-down by Products pursuant to the written request of the Exhibitor, the rental payable hereunder shall be reduced, commencing with the second full week of the shut-down period and ending on the Saturday prior to the last full week of said shut-down period, to sixty-six and two-thirds (66⅔%) percent of the rental which would otherwise be payable during said period; provided, however, that the Exhibitor

Digitized by Google

shall not be entitled to the benefit of the reduced rental above referred to during any shut-down period or periods exceeding in the aggregate six (6) months during any year of the term hereof. If the Exhibitor desires Products to seal the Equipment for shut-down, it shall give Products not less than fourteen (14) days' written notice, which shall specify the date when the Equipment is to be shut-down, and upon the date so specified, or as soon thereafter as it can conveniently do so, Products shall seal the Equipment and may take such steps for the protection of the Equipment during the shut-down period as it may deem desirable. When the Exhibitor desires to resume the use of the Equipment it shall give Products not less than fourteen (14) days' written notice, specifying the date upon which it desires that the Equipment be unsealed, and if the Exhibitor shall not be in default under the terms of this agreement, Products shall unseal the Equipment on or prior to the date specified by the Exhibitor, and restore it to operating condition insofar as it may have been affected by any steps taken by Products for the protection of the Equipment while in shut-down condition. If any of the Equipment which has been sealed by Products shall be unsealed other than by authority of Products, the Equipment shall be deemed not to have been placed in a shut-down condition for the purpose of determining rentals payable hereunder. Products shall not be obligated to inspect the Equipment while it is in a shut-odwn condition, but may do so at its option. Notices referred to in this section shall be mailed to Products' office at New York, N. Y., Chicago, Ill., or Los Angeles, Cal., whichever office is nearest the exhibitor.

3. *Installation and use of Equipment.*—(a) The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications, which will be furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products, and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor, except as herein otherwise specifically provided, shall provide and pay for all services, material, and expenses required in preparation for and in connection with the installation of the Equipment.

Products shall provide an engineer and, if deemed necessary by Products a projectionist, to inspect the preliminary work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for the installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer and projectionist, if required, will be furnished without additional cost to the Exhibitor for a period of two (2) days, and for such additional continuous period not exceeding _____ (____) days as Products shall deem requisite. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, or in the event that supervisory services shall be required for a period in excess of the aforementioned maximum number of days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per day per man for any period in excess of said maximum number of days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period.

(b) The Exhibitor recognizes that the Equipment is furnished by Products as a complete assemblage of mechanisms, electrical apparatus, and circuits, the construction and operation of which are highly technical, and that any changes or modifications may result in seriously impairing the quality of sound reproduction, thus injuring both the reputation of Products and the business of the Exhibitor. Therefore, in order to secure and insure satisfactory functioning of the Equipment the Exhibitor shall at all times during the term of this agreement operate the Equipment in the manner approved by Products from time to time and keep and maintain the Equipment in good condition and repair, and shall not, without the written consent of Products, or otherwise than under its supervision, move, alter, change, or modify the Equipment. The Exhibitor shall not, without the written consent of Products, add anything to

Digitized by Google

the Equipment or take anything therefrom, or break the seal upon any part or collection of parts which is or may be sealed by Products, except that nothing herein contained shall be construed as prohibiting the Exhibitor from taking any reasonable steps consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, or as preventing the Exhibitor from replacing defective or worn-out parts. If the Exhibitor shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action thus taken. If at any time the Equipment fails to function satisfactorily the Exhibitor shall notify Products immediately by registered mail, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment. The Exhibitor shall use and employ the Equipment only in the Theatre, and shall at its own expense obtain all necessary permits, and comply with all laws and ordinances in effect throughout the term of this agreement relating to the maintenance, use, and operation of the Equipment or any part thereof, and with any fire insurance underwriters' requirements relating thereto.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees to instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period of _____ (_____) days and for such additional continuous period not exceeding_____ (_____) days as Products shall deem requisite. Products shall from time to time, during the term of this agreement, inspect the Equipment furnished by it, and make minor adjustments thereto. The character and frequency of such inspection shall accord with such practice as shall from time to time have been found to be required for the maintenance and normal operation of similar installations leased for the same general purposes as those referred to in Section 1 hereof. Products shall make no charge for such service and inspection in addition to the rental specifically provided for in this agreement, provided, however, that if the service and inspection facilities of Products are required by reason of misuse or abuse of the Equipment, or by reason of the Exhibitor's failure to safeguard the Equipment properly, or to use the same in a reasonably careful and prudent manner, the Exhibitor, upon receipt of billing therefor, shall pay to Products Thirty-five ($35.00) Dollars per day per man plus any expenses and transportation charges incurred for any services thus required.

5. *Transportation Charges.*—The Exhibitor shall pay direct to the carrier, truckman, or other transportation agency, all freight, express, trucking, and handling charges on all equipment or parts therefor which may be furnished hereunder.

6. *Additional Parts, Special Service, etc.*—Products shall render to the Exhibitor such special services relating to the Equipment or the Theatre as Products is in a position to render, and as the Exhibitor may order. Products shall furnish such repair and replacement parts as it is in a position to furnish, and as the Exhibitor may order, at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any special services thus rendered, for any parts thus furnished, and any other charges the due date of which is not definitely fixed, either at the time of rendition of the services or delivery of said parts, or at Products' option, upon rendition of billing therefor by it. The time of payments herein provided for shall be of the essence of this agreement.

7. *Facilities for Installation and Operation.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed, will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply for the Equipment; suitable space, properly ventilated, for the installation of storage batteries and charging equipment or other power equipment; a screen having proper acoustic properties; drapes for acoustic purposes, and suitable horn supports. The Exhibitor shall make at its own expense such reasonable changes, alterations, and modifications in and to the Theatre as may be necessary for the proper installation of the Equipment.

8. *Title to Equipment.*—Title to and ownership of all equipment, repair, and replacement parts, tools, drawings, prints, and written descriptions and instructions furnished hereunder shall at all times be and remain vested in Products. All equipment furnished in accordance with the terms of this agreement shall at all times be and remain personal property, notwithstanding the manner or method of its attachment to any real property.

Digitized by Google

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

10. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre at all reasonable hours, for the purpose of examining and inspecting the Equipment from time to time and for all other purposes referred to herein which may require such access.

11. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss, injury, or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor shall indemnify Products for and save it harmless from any liability for injury to persons handling, installing, or operating the Equipment (other than Products' employees) and from any liability to others resulting from negligence of such persons. The Exhibitor shall use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment leased hereunder and shall discharge promptly any such liens which may be filed.

12. *Default.*—At the option of Products, this agreement and the rights of the Exhibitor hereunder shall terminate and come to and end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor or upon the filing of any petition in bankruptcy or upon any assignment of any of the Exhibitor's assets for the benefit of creditors, or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit or proceeding against the Exhibitor in the nature of ejectment, distress for rent, summary dispossession of any other action, suit or proceeding in respect of the title to or right to possession of the Theatre, or upon the issue or levy of any attachment or the filing of or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment leased hereunder. The Exhibitor shall indemnify Products for any loss or damage suffered by Products as a result of the commencement or final determination of any action, suit or proceeding against the Exhibitor respecting the title to or right to possession of the Theatre, or the issue or levy of any attachment or the filing of, or attempt to assert or enforce any lien above referred to.

In the event of a default under any of the provisions of this agreement at any time during the term hereof, the rights and license herein granted to the Exhibitor may thereupon be suspended by Products serving a written notice of suspension on the Exhibitor or by depositing such notice in the United States mail, addressed to the Exhibitor at the Theatre; provided however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

13. *Destruction of Theatre or Equipment.*—In the event of the total destruction of the Theatre by fire, earthquake, tornado or other act of God, the rental payable hereunder shall be paid to the time of such destruction and this agreement shall cease and terminate as of the date of such destruction. If the Theatre be damaged as a result of the happening of any of the aforementioned events and the damage thereto is such that the Theatre is temporarily unavailable for use for the exhibition of motion pictures, but can be repaired or reconditioned, the rental payable hereunder shall abate during such period of time as is reasonably required for the reconstruction or reconditioning of the Theatre (but not to exceed thirteen (13) weeks in any event) and thereafter rental shall be payable at the stipulated weekly rate.

If the Equipment be partially or totally destroyed (except total destruction of the Equipment incidental to total destruction of the Theatre) during the term of this agreement by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and shall continue to operate the Theatre, or shall resume the operation of the Theatre after any necessary repairs thereto have been made, Products will at its own expense either repair the Equipment, or, if in the judgment of Products the destruction is so extensive as to render repair of the Equipment impracticable, furnish replacing Western Electric equipment then available to Products as nearly

Digitized by Google

similar as possible in type and conditon to the Equpment so destroyed. In the event of partial or total destruction of the Equipment occurring in the manner referred to in this paragraph, the rental payable hereunder shall abate until the Equipment shall have been repaired by Products, or until replacing equipment shall have been furnished by Products. Except as herein otherwise provided the Equipment shall at all times be held at the sole risk of the Exhibitor. If Products shall provide replacing equipment in accordance with the foregoing provisions, such equipment shall be installed by the Exhibitor at its own expense, under Products' supervision and the equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. The Exhibitor shall pay all transportation charges on replacing equipment so furnished.

14. *Repossession of Equipment.*—Upon termination or expiration of this agreement by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products, together with all repair and replacement parts therefor and all tools, drawings, prints and written descriptions and instructions which shall have been furnished by Products. Said Equipment and parts shall be surrendered in good order and condition, reasonable wear and tear due to the proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this agreement shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre, or any other premises whatever, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights of the Exhibitor under the provisions of Section 12 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events it will not claim damages on account of such action or otherwise, and the Exhibitor shall hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of any action taken by Products pursuant to this agreement. In the event of termination or expiration of this agreement by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any indebtedness then due to Products hereunder.

15. *Patent Protection.*—Subject to the provisions hereof Products will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment leased by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner for which it is herein licensed and Products will pay or satisfy all judgments and decrees for profits, damages and costs which may be finally awarded against the Exhibitor by the court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of each claim of any such infringement and of each such action or suit together with full information and all reasonable cooperation in connection therewith and full opportunity to defend the same and to compromise or settle the same at Products' expense if Products shall so elect, and provided further, that this agreement shall not extend to any infringement or

Digitized by Google

claim of infringement relating to any apparatus or thing not furnished by Products or relating to any combination of said Equipment or any part or parts thereof with any apparatus or thing not furnished by Products, except sound records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products; and the liability of Products under this agreement shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it.

16. *Term.*—This agreement shall be for a term of one (1) year from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor as to the date that the Equipment was made available for public performance, whichever date be the earlier; provided however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. The agreement shall continue in effect thereafter from year to year, subject to the provisions herein contained, until either party shall serve upon the other by registered United States mail a notice of intention to terminate this agreement at the end of any annual period dating from the commencement of the term hereof, which notice shall be served not less than thirty (30) nor more than sixty (60) days prior to the end of any annual period.

17. *General Provisions.*—This agreement expresses the entire understanding of the parties in respect of the subject matter hereof. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement, or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement, or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

18. *Construction.*—The construction and performance of this agreement shall be governed by the laws of the State of New York.

19. *Assignment.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers or authorized agents in their behalf, the day and year first above written.

GUARANTY

In consideration of the furnishing and leasing of the Equipment covered by the foregoing agreement to the Exhibitor therein named and of the payment to me by Electrical Research Products Inc. of the sum of One ($1.00) Dollar, I, _____, of the City of _____, State of _____, do hereby covenant and agree to and with the said Electrical Research Products Inc. that if default shall at any time be made by said Exhibitor in the payment of any monies which shall become due to said Electrical Research Products Inc. under said agreement or in the performance of the covenants contained therein on the part of said Exhibitor to be paid or performed, that I will well and truly pay the said sums which may become due thereunder to said Electrical Research Products Inc. or any arrears thereof, and also all damages which may arise in consequence of the nonperformance of the covenants of said agreement, or any of them, upon written notice of any such default being forwarded to me at the address above indicated.

As an additional inducement to Electrical Research Products Inc. to furnish and lease the aforementioned equipment I further agree that the foregoing obligations assumed by me shall not be affected or prejudiced by any extension of the time for payment of the obligations of the Exhibitor or by waiver of any other provisions set forth in said agreement to be kept or performed by the Exhibitor, or by any other modification of said agreement whereby the obligations herein assumed by me would, but for this provision, be discharged.

Signed and sealed this _____ day of _____, 1933.

_____(L. S.)

Lease No. _____

This agreement, made in triplicate in the City of New York, State of New York, this _____ day of _____, 193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), lessor, and _____, a _____ corporation having its principal place of business at No. _____ Street/Avenue, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), lessee, and operating the _____ Theatre, at No. _____ Street/Avenue, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that, for, and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. *Equipment Leased.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products the Western Electric Sound Equipment now installed in the Theatre (hereinafter called the "Equipment") for use

Digitized by Google

solely in the Theatre for the electrical reproduction of sound in connection with, or, as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, said Equipment being:

---

2. *Rental.*—(a) The Exhibitor shall pay to Products as rental throughout the term hereof the sum of _____ ($_____) Dollars per week, provided, however, that rental payable for the weeks falling within the period commencing with the _____ Sunday of _____ of each year and ending with the Saturday of the thirteenth (13th) week thereafter shall be the sum of _____ ($_____) Dollars per week. In consideration of the termination of all prior agreements between Products and the Exhibitor referred to in Section 15 hereof and of Products' release of the Exhibitor from obligations thereunder as provided in said Section, and as rental for the first week or part thereof of the term of this lease, the Exhibitor pays to Products herewith the sum of _____ ($_____) Dollars. In addition to the above rental the Exhibitor shall pay to Products each week for the first consecutive _____ (_____) weeks of the term hereof, the sum of _____ ($_____) Dollars in liquidation of indebtedness of the Exhibitor to Products existing on the date hereof, which said indebtedness the Exhibitor hereby acknowledges. The charges above referred to, other than the payment tendered herewith, shall be payable for each week in advance on Saturday of the preceding week. The term "week" as used herein shall be deemed to mean a period of seven (7) days commencing at midnight on Saturday and ending at midnight on the following Saturday.

(b) If the Theater shall be closed for a minimum period of four (4) weeks and if the Equipment shall have been sealed for shut-down by Products pursuant to the written request of the Exhibitor, the rental payable hereunder (but not the additional payments above provided in liquidation of pre-existing indebtedness) shall be reduced, commencing with the send full week of the shut-down period and ending on the Saturday prior to the last full week of said shut-down period, to sixty-six and two-thirds (66⅔%) percent of the rental which would otherwise be payable during said period; provided, however, that the Exhibitor shall not be entitled to the benefit of the reduced rental above referred to during any shut-down period or periods exceeding in the aggregate six (6) months during any year of the term hereof. If the Exhibitor desires Products to seal the Equipment for shut-down, it shall give Products not less than fourteen (14) days' written notice which shall specify the date when the Equipment is to be shut down and upon the date so specified or as soon thereafter as it can conveniently do so, Products shall seal the Equipment and may take such steps for the protection of the Equipment during the shut-down period as it may deem desirable. When the Exhibitor desires to resume the use of the Equipment it shall give Products not less than fourteen (14) days' written notice specifying the date upon which it desires that the equipment be unsealed, and if the Exhibitor shall not be in default under the terms of this lease, Products shall unseal the Equipment on or prior to the date specified by the Exhibitor, and restore it to operating condition insofar as it may have been affected by any steps taken by Products for the protection of the Equipment while in shut-down condition. If any of the Equipment which has been sealed by Products shall be unsealed other than by authority of Products, the Equipment shall be deemed not to have been placed in a shut-down condition for the purpose of determining rentals payable hereunder. Products shall not be obligated to inspect the Equipment while it is in a shut-down condition, but may do so at its option. Notices referred to in this section shall be mailed to Products' office at New York, N. Y., Chicago, Ill., or Los Angeles, Cal., whichever office is nearest the Exhibitor.

3. *Use of Equipment.*—The Exhibitor recognizes that the Equipment is furnished by Products as a complete assemblage of mechanisms, electrical apparatus, and circuits, the construction and operation of which are highly technical, and that any changes or modifications may result in seriously impairing the quality of sound reproduction, thus injuring both the reputation of Products and the business of the Exhibitor. Therefore, in order to secure and insure satisfactory functioning of the Equipment the Exhibitor shall at all times during the term of this lease operate the Equipment in the manner approved by Products from time to time and keep and maintain the Equipment in good condition and repair, and shall not, without the written consent of Products, or otherwise than under its supervision, move, alter, change, or modify the Equipment. The Exhibitor shall not, without the written consent of Products, add

Digitized by Google

anything to the Equipment or take anything therefrom, or break the seal upon any part or collection of parts which is or may be sealed by Products. Nothing herein contained shall be construed as prohibiting the Exhibitor from taking any reasonable steps consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, or as preventing the Exhibitor from replacing defective or worn-out parts. If the Exhibitor shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action thus taken. The Exhibitor shall use and employ the Equipment only in the Theatre, and shall at its own expense obtain all necessary permits and comply with all laws and ordinances in effect throughout the term of this lease relating to the maintenance, use, and operation of the Equipment or any part thereof and with any fire insurance underwriters' requirements relating thereto. If at any time the Equipment fails to function satisfactorily the Exhibitor shall immediately notify Products by registered mail and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

4. *Inspection of Equipment.*—Products shall from time to time, during the term of this lease, inspect the Equipment furnished by it and make minor adjustments thereto. The character and frequency of such inspection shall accord with such practice as shall from time to time have been found to be required for the maintenance and normal operation of similar installations leased for the same general purposes as those referred to in Section 1 hereof, and Products shall maintain facilities for rendering such service and inspection. Products shall make no charge for such service and inspection in addition to the rental specifically provided for in this lease, provided, however, that if the service and inspection facilities of Products are required by reason of misuse or abuse of the Equipment, or by reason of the Exhibitors' failure to safeguard the Equipment properly or to use the same in a reasonably careful and prudent manner, the Exhibitor upon receipt of billing therefor, shall pay to Products Thirty-five ($35.00) Dollars per day per man plus any expenses and transportation charges incurred for any services thus required.

5. *Payment for Additional Parts, Special Services, etc.*—Products shall render to the Exhibitor such special services relating to the Equipment or the Theatre as Products is in a position to render and as the Exhibitor may order. Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order at its rental charges in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any special services thus rendered, for any parts thus furnished, and any other charges the due date of which is not otherwise definitely fixed, either upon rendition of billing by Products or at the option of Products at the time of rendition of the services or delivery of said parts. The time of payments herein provided for shall be of the essence of this lease.

6. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment leased in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

7. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment leased hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

8. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of examining and inspecting the Equipment from time to time, and for all other purposes referred to herein which may require such access.

9. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever, or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor shall indemnify Products for and save it harmless from any liability for injury to persons handling or operating the Equipment (other than Products' employees) and from any liability to others resulting from negligence of such persons. The Exhibitor shall use every reasonable effort to

Digitized by Google

prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment leased hereunder and shall discharge promptly any such liens which may be filed.

10. *Default.*—This lease and the rights of the Exhibitor hereunder shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor, or upon the filing of a voluntary or involuntary petition in bankruptcy, or upon the voluntary or involuntary assignment of any of the Exhibitor's assets for the benefit of creditors, or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in the nature of ejectment, distress for rent, summary dispossesion, or any other action, suit, or proceeding in respect of the title to or right to possession of the Theatre, or upon the issue or levy of any attachment or the filing of or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment leased hereunder. The Exhibitor shall indemnify Products for any loss or damage suffered by Products as a result of the commencement or final determination of any action, suit, or proceeding against the Exhibitor respecting the title to or right to possession of the Theatre, or the issue or levy of any attachment or the filing of, or attempt to assert or enforce any lien above referred to.

In the event of a default under any of the provisions of this lease at any time during the term hereof, the rights herein granted to the Exhibitor may thereupon be suspended by Products personally serving a written notice of suspension on the Exhibitor or by depositing such notice in the United States mail, addressed to the Exhibitor at the Theatre; provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

11. *Destruction of Theatre or Equipment.*—In the event of the total destruction of the Theater by fire, earthquake, tornado, or other act of God, the rental payable hereunder shall be paid to the time of such destruction and this lease shall cease and terminate as of the date of such destruction. If the Theatre be damaged as a result of the happening of any of the aforementioned events and the damage thereto is such that the Theatre is temporarily unavailable for use for the exhibition of motion pictures, but may be repaired or reconditioned, the rental payable hereunder shall abate during such period of time as is reasonably required for the reconstruction or reconditioning of the Theatre (but not to exceed thirteen (13) weeks in any event) and thereafter rental shall be payable at the stipulated weekly rate.

If the Equipment be partially or totally destroyed (except total destruction of the Equipment incidental to total destruction of the Theatre) during the term of this lease by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not be in default in respect of any of the terms of this lease and shall continue to operate the Theatre, or shall resume the operation of the Theatre after any necessary repairs thereto have been made, Products will at its own expense either repair the Equipment, or, if in the judgment of Products, the destruction is so extensive as to render repair of the Equipment impracticable, furnish replacing Western Electric equipment then available to Products as nearly similar as possible in type and condition to the equipment so destroyed. In the event of partial or total destruction of the Equipment occurring in the manner referred to in this paragraph, the rental payable hereunder shall abate until the Equipment shall have been repaired by Products, or until replacing equipment furnished by Products, as aforesaid, shall have been placed in operation in the Theatre; provided, however, that there shall be no abatement of rental in any event subsequent to the second week after replacing equipment shall have been furnished by Products. Except as herein otherwise provided, the Equipment shall at all times be held at the sole risk of the Exhibitor. If Products shall provide replacing equipment in accordance with the foregoing provisions, such equipment shall be installed by the Exhibitor at its own expense, under Products' supervision and the equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. The Exhibitor shall pay all transportation charges on replacing equipment so furnished.

12. *Repossession of Equipment.*—Upon termination or expiration of this lease by lapse of time or otherwise, the Exhibitor shall surrender to Products the

Digitized by Google

Equipment, together with all repair and replacement parts therefor which shall have been furnished by Products. Said Equipment and parts shall be surrendered in good order and condition, reasonable wear and tear due to proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this lease shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this lease, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre, or any other premises whatever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this lease. In the event of the suspension of the rights of the Exhibitor under the provisions of Section 10 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damages on account of such action or otherwise, and the Exhibitor shall hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of such action. In the event of termination or expiration of this lease by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this lease.

13. *Patent Protection.*—Subject to the provisions hereof Products will at its own expense, defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment leased by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this lease and Products will pay or satisfy all judgments and decrees for profits, damages, and costs which may be finally awarded against the Exhibitor by the court of last resort in any such action or suit on account of any such infringement; provided, that the Exhibitor shall give Products prompt notice (with written confirmation) of each claim of any such infringement and of each such action or suit together with full information and all reasonable cooperation in connection therewith and full opportunity to defend the same and to compromise or settle the same at Products' expense, if Products shall so elect; and provided further, that this agreement shall not extend to any infringement or claim of infringement relating to any apparatus or thing not furnished by Products or relating to any combination of said Equipment or any part or parts thereof with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it.

14. *Term.*—This lease shall be for a term of one (1) year commencing on the date hereof, and shall continue in effect thereafter from year to year,

Digitized by Google

subject to the provisions herein contained, until either party hereto shall serve upon the other by registered United States mail a written notice of intention to terminate this lease at the end of any annual period dating from the commencement of the term hereof, which notice shall be served not less than thirty (30) nor more than sixty (60) days prior to the end of any annual period; provided, however, that the Exhibitor shall not terminate this lease while any of the payments designated in section 2 (a) hereof as in liquidation of prior indebtedness are unpaid.

15. *General Provisions.*—(a) The parties expressly stipulate that this lease contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding agreement or representation, express or implied, in any way limiting, extending, defining or otherwise relating to the provision hereof or any of the matters to which this lease relates. No waiver by either party, whether express or implied, of any of the provisions of this lease shall be construed as constituting a waiver of any other provision or provisions of this lease or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

(b) This lease shall terminate all prior agreements between Products and the Exhibitor relating to the installation and licensing of Western Electric sound equipment in the Theatre and all rights and obligations of said parties under said agreements are hereby released and forever discharged, except as to past indebtedness to be liquidated as provided in section 2 (a) hereof.

16. *Construction.*—The construction and performance of this lease shall be governed by the laws of the State of New York.

17. *Assignment.*—This lease shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

In witness whereof, the parties hereo have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

Lease No._____

This agreement, made in triplicate in the City of New York, State of New York, this_____day of_____193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), lessor, and _____a_____corporation having its principal place of business at No._____Street/Avenue, in the City of_____, State of_____(hereinafter called the "Exhibitor"), lessee, and operating the_____Theatre, at No._____Street/Avenue, in the City of_____, State of_____(hereinafter called the "Theatre"):

Witnesseth, that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. *Equipment Leased.*—Products hereby leases to the Exhibitor and the Exhibitor hereby hires from Products the Western Electric Sound Equipment now installed in the Theatre (hereinafter called the "Equipment") for use solely in the Theatre for the electrical reproduction of sound in connection with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith.

2. *Rental.*—(*a*) The Exhibitor agrees to pay to Products as rental throughout the term hereof the sum of_____ ($_____) Dollars per week, provided however, that rental payable for the weeks falling within the period commencing with the_____Sunday of_____of each year and ending with the Saturday of the thirteenth (13th) week thereafter shall be the sum of_____($_____) Dollars per week. In consideration of Products' execution of this agreement, and as rental for the first week or part thereof of the term of this lease, the Exhibitor tenders to Products herewith the sum of_____($_____) Dollars. In addition to the above rental, the Exhibitor agrees to pay to Products each week for the first consecutive_____(_____) weeks of the term hereof the sum of _____($_____) Dollars in liquidation of indebtedness incurred by the Exhibitor to Products under the terms of a prior agreement relating to the installation and licensing of Western Electric Sound Equipment in the Theatre, which said indebtedness the Exhibitor hereby acknowledges. The charges above referred to, other than the payment tendered herewith, shall

Digitized by Google

be payable in advance on Saturday of each week. The term "week" as used herein shall be deemed to mean a period of seven (7) days commencing at midnight on Saturday and ending at midnight on the following Saturday.

(*b*) If the Theatre shall be closed for a minimum period of four (4) weeks and if the Equipment shall have been sealed for shut-down by Products pursuant to the written request of the Exhibitor, the rental payable hereunder (but not the additional payments above provided in liquidation of pre-existing indebtedness) shall be reduced, commencing with the second full week of the shut-down period and ending on the Saturday prior to the last full week of said shut-down period, to sixty-six and two-thirds (66⅔%) percent of the rental which would otherwise be payable during said period; provided however, that the Exhibitor shall not be entitled to the benefit of the reduced rental above referred to during any shut-down period or periods exceeding in the aggregate six (6) months during any year of the term hereof. If the Exhibitor desires Products to seal the Equipment for shut-down, it shall give Products not less than fourteen (14) days' written notice which shall specify the date when the Equipment is to be shut down and upon the date so specified or as soon thereafter as it can conveniently do so, Products shall seal the Equipment and may take such steps for the protection of the Equipment during the shut-down period as it may deem desirable. When the Exhibitor desires to resume the use of the Equipment it shall give Products not less than fourteen (14) days' written notice specifying the date upon which it desires that the Equipment be unsealed, and if the Exhibitor shall not be in default under the terms of this lease, Products shall unseal the Equipment on or prior to the date specified by the Exhibitor, and restore it to operating condition insofar as it may have been affected by any steps taken by Products for the protection of the Equipment while in shut-down condition. If any of the Equipment which has been sealed by Products shall be unsealed other than by authority of Products, the Equipment shall be deemed not to have been placed in a shut-down condition for the purpose of determining rentals payable hereunder. Products shall not be obligated to inspect the Equipment while it is in a shut-down condition, but may do so at its option. Notices referred to in this section shall be mailed to Products' office at New York, N. Y., Chicago, Ill., or Los Angeles, Cal., whichever office is nearest the Exhibitor.

3. *Use of Equipment.*—(*a*) The Exhibitor recognizes that the Equipment is furnished by Products as a complete unit and that the inventions and construction of the same involve highly technical mechanism and art. Therefore, in order to secure and insure satisfactory functioning of the Equipment the Exhibitor shall at all times during the term of this lease, keep, maintain, and operate the Equipment in the manner approved by Products from time to time and in no other manner and shall not, without the written consent of Products or otherwise than under its supervision, move, alter, change, or modify the Equipment. The Exhibitor shall not, without the written consent of Products, add anything to the Equipment or take anything therefrom; or break the seal upon any part or collection of parts which is or may be sealed by Products; or cause any repairs to be made to the Equipment, except by Products or as specified by Products; provided that nothing herein contained shall be construed as prohibiting the Exhibitor from taking any reasonable steps consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. If the Exhibitor shall itself take any action with respect to correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action thus taken. The Exhibitor shall use and employ the Equipment only in the Theatre and shall at its own expense obtain all necessary permits and comply with all laws and ordinances in effect throughout the term of this lease relating to the maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

(*b*) In the event of the Exhibitor violating any of the provisions of paragraph (*a*) of this section 3, or using spare, additional, or renewal parts not supplied by Products, or causing the Equipment to be repaired in a manner otherwise than as herein provided, the Exhibitor expressly waives any claim against Products in respect of the operation of the Equipment.

(*c*) If at any time the Equipment fails to function satisfactorily the Exhibitor shall immediately notify Products by registered mail and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

Digitized by Google

4. *Inspection of Equipment.*—Products shall, from time to time, during the term of this agreement, inspect the Equipment and make minor adjustments thereto. The character and frequency of such inspection shall accord with such practice as shall from time to time have been found to be required for the maintenance and normal operation of similar installations leased for the same general purposes as those referred to in Section 1 hereof and Products shall maintain facilities for rendering such service and inspection. Products shall make no charge for such service and inspection in addition to the rental specifically provided for in this lease, provided, however, that if the service and inspection facilities of Products are required by reason of the use by the Exhibitor of any parts for or attachments to the Equipment, other than those furnished by Products, or by reason of violation of Products' instructions relating to the use and operation of the Equipment, the Exhibitor upon receipt of billing therefor, shall pay to Products Thirty-five ($35.00) Dollars per day per man plus any expenses and transportation charges incurred for any services thus required.

5. *Payment for Additional Parts, Special Services, etc.*—Products shall render to the Exhibitor such special services relating to the Equipment or the Theatre as Products is in a position to render and as the Exhibitor may order in writing. Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order in writing at its rental charges in effect at the time of receipts of orders therefor. The Exhibitor shall pay Products' charges for any special services thus rendered, for any parts thus furnished, and any other charges the due date of which is not otherwise definitely fixed, either upon rendition of billing by Products or at the option of Products at the time of rendition of the services or delivery of said parts. The time of payments herein provided for shall be of the essence of this agreement.

6. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment leased in accordance with the term of this agreement shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real propery.

7. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment leased hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

8. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of examining and inspecting the Equipment from time to time and for all other purposes referred to herein which may require such access.

9. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor shall indemnify Products for and save it harmless from any liability or injury to workmen handling or operating the Equipment and from any liability to others resulting from negligence of such workmen. The Exhibitor shall use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment leased hereunder and shall discharge promptly any such liens which may be filed.

10. *Default.*—This lease and the rights of the Exhibitor hereunder shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor, or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the voluntary or involuntary assignment of any of the Exhibitor's assets for the benefit of creditors, or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in the nature of ejection, distress for rent, summary dispossession, or any other action, suit, or proceeding in respect of the title to or right to possession of the

Digitized by Google

Theatre, or upon the issue or levy of any attachment or the filing of or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment leased hereunder. The Exhibitor shall indemnify Products for any loss or damage suffered by Products as a result of the commencement or final determination of any action, suit, or proceeding against the Exhibitor respecting the title to or right to possession of the Theatre, or the issue or levy of any attachment, or the filing of, or attempt to assert or enforce, any lien above referred to.

In the event of a default under any of the provisions of this lease at any time during the term hereof, the rights herein granted to the Exhibitor may thereupon be suspended by Products' personally serving a written notice of suspension on the Exhibitor or by depositing such notice in the United States mail, addressed to the Exhibitor at the Theatre; provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

11. *Destruction of Theatre or Equipment.*—In the event of the total destruction of the Theatre by fire, earthquake, tornado, or other act of God, the rental payable hereunder shall be paid to the time of such destruction and this lease shall cease and terminate as of the date of such destruction. If the Theatre be damaged as a result of the happening of any of the aforementioned events and the damage thereto is such that the Theatre is temporarily unavailable for use for the exhibition of motion pictures, but may be repaired or reconditioned, the rental payable hereunder shall abate during such period of time as is reasonably required for the reconstruction or reconditioning of the Theatre (but not to exceed thirteen (13) weeks in any event) and thereafter rental shall be payable at the stipulated weekly rate.

If the Equipment be partially or totally destroyed (except total destruction of the Equipment incidental to total destruction of the Theatre) during the term of this lease by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not be in default in respect of any of the terms of this lease and shall continue to operate the Theatre, or shall resume the operation of the Theatre after any necessary repairs thereto have been made, Products will at its own expense either repair the Equipment, or, if in the judgment of Products, the destruction is so extensive as to render repair of the Equipment impracticable, furnish replacing Western Electric equipment then available to Products as nearly similar as possible in type and condition to the equipment so destroyed. Except as herein otherwise provided the Equipment shall at all times be held at the sole risk of the Exhibitor. If Products shall provide replacing equipment in accordance with the foregoing provisions, such equipment shall be installed by the Exhibitor at its own expense, under Products' supervision, and the equipment shall not be used for a public performance until the installation thereof shall have been approved by Products. The Exhibitor shall pay all transportation charges on replacing equipment so furnished.

12. *Repossession of Equipment.*—Upon termination or expiration of this lease by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear due to proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this lease shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this lease, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or any other premises whatever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this lease. In the event of the suspension of the rights of the Exhibitor under the provisions of Section 10 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the

Digitized by Google

said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damages on account of such action or otherwise, and the Exhibitor shall hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of such action. In the event of termination or expiration of this lease by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this lease.

13. *Patent Protection.*—Subject to the provisions hereof Products will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment leased by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this lease and Products will pay or satisfy all judgments and decrees for profits, damages, and costs which may be finally awarded against the Exhibitor by the court of last resort in any such action or suit on account of any such infringement provided that the Exhibitor shall give Products prompt notice (with written confirmation) of each claim of any such infringement and of each such action or suit together with full information and all reasonable cooperation in connection therewith and full opportunity to defend the same and to compromise or settle the same at Products' expense, if Products shall so elect, and provided further, that this agreement shall not extend to any infringement or claim of infringement relating to any apparatus or thing not furnished by Products or relating to any combination of said Equipment or any part or parts thereof with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no event exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it.

14. *Terms.*—This lease shall be for a term of one (1) year commencing on the date hereof, and shall continue in effect from year to year, subject to the provisions herein contained, until either party hereto shall serve upon the other by registered United States mail a written notice of intention to terminate this lease at the end of any annual period dating from the commencement of the term hereof, which notice shall be served not less than thirty (30) nor more than sixty (60) days prior to the end of any annual period; provided however, that the Exhibitor shall not terminate this lease while any of the payments designated in section 2 (*a*) hereof as in liquidation of prior indebtedness are unpaid.

15. *General Provisions.*—(*a*) The charges to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like equipment or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer, or for any other reason.

(*b*) The parties expressly stipulate that this lease contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which this lease relates. No waiver by either party, whether express or implied, of any of the provisions of this lease shall be construed as constituting a waiver of any other provision or provisions of this lease, or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

Digitized by Google

(*c*) This agreement shall terminate all prior agreements between Products and the Exhibitor relating to the installation and licensing of Western Electric Sound Equipment in the Theatre.

16. *Construction.*—The construction and performance of this lease shall be governed by the laws of the State of New York.

17. *Assignment.*—This lease shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

AGREEMENT FOR WESTERN ELECTRIC SOUND SYSTEM IN ——— (THEATRE), ——— (LOCATION)

PLAN A-%-B. O. P. P.

321 T S

Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound Equipment of the type set forth in Item One of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in connection with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said Equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said Equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse and Products will endeavor to ship the Equipment on or before the date set forth in Item Two of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. (a) *Installation and Use of Equipment.*—The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor, except as herein otherwise specifically provided, shall provide and pay for all services, material, and expenses required in preparation for and/or in connection with the installation of the Equipment.

Products shall provide an engineer and/or projectionist to inspect the preliminary work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for the installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior

Digitized by Google

to said date and Products shall make every reasonable effort to have its engineer and/or projectionist at the Theatre on said date. The services of said engineer and/or projectionist will be furnished without additional cost to the Exhibitor for a period of two (2) days and for such additional continuous period not exceeding _____ (____) days as Products shall deem requisite. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer and/or projectionist shall arrive at the Theatre, or in the event that their services shall be required for a period in excess of the aforementioned maximum number of days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per day per man for any period in excess of said maximum number of days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period.

(b) The Exhibitor recognizes that the Equipment is furnished by Products as a complete unit and that the inventions and construction of the same, and the making of sound records in any form for use therewith, involve highly technical mechanism and art, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment and that the use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor agrees that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products, and in no other manner, and will not, without the written consent of Products or otherwise than under its supervision, move, alter, change, or modify the Equipment. The Exhibitor shall not, without the written consent of Products, add anything thereto nor take anything therefrom; or break the seal upon any part or collection of parts which is or may be sealed by Products; or operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to produce sound from such sound record with accuracy, quality, and adequacy of volume; or cause any repairs to be made to the Equipment, except by Products or as specified by Products; provided, that nothing herein contained shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that if it shall itself take any action with respect to the correction or repair of the Equipment, it will immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor shall use and employ the Equipment only in the Theatre, unless Products shall consent to its removal in accordance with the provisions of Section 3 hereof.

(c) In the event of the Exhibitor violating any of the provisions of paragraph (b) of this Section 2, or using spare, additional, or renewal parts not supplied by Products, or causing the Equipment to be repaired in a manner otherwise than as herein provided, the Exhibitor expressly waives any claim against Products in respect to the operation of the Equipment.

(d) The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre, and shall either make provision for the assumption of this agreement by the successor exhibitor of the Theatre, provided such successor exhibitor is satisfactory to Products (the Exhibitor hereunder hereby guaranteeing the performance by the successor exhibitor of the agreement so assumed by it), or shall make provision satisfactory to Products for the care and custody of the Equipment (the Exhibitor

Digitized by Google

hereby agreeing to assume full responsibility for the safekeeping of the Equipment), and if such care and custody shall involve the removal of the Equipment from the Theatre, Products will consent thereto provided such removal is made under Products' supervision and provided the Exhibitor shall agree to pay Products' then standard charges therefor.

If the Exhibitor shall cease to operate the Theatre or shall dispose of its interest therein, and shall desire to install the Equipment in another theatre (which other theatre shall first be approved by Products), Products shall agree thereto, provided such removal and the installation in such other theatre is made under Products' supervision and provided the Exhibitor shall agree to pay Products' then standard charges therefor and shall enter into a new agreement on Products' then standard form for the unexpired term of the license herein granted.

The Exhibitor shall, at its own expense, perform all of the work required with respect to any removal of the Equipment and shall provide all of the material mentioned in Section 2 (a) hereof which may be required for any reinstallation of the Equipment.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees to instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period of _____ (____) days and for such additional continuous period not exceeding _____ (____) days as Products shall deem requisite. Products shall from time to time, during the term of this agreement, inspect the Equipment and make minor adjustments thereto. The character and frequency of such inspection shall accord with such practice as shall from time to time have been found to be required for the maintenance and normal operation of similar installations licensed for the same general purposes as those referred to in Section 1 hereof and Products shall maintain facilities for rendering such service and inspection. Products shall make no charge for such service and inspection in addition to the consideration specifically provided for in this agreement; provided, however, that if the service and inspection facilites of Products are required by reason of the use by the Exhibitor of any parts for or attachments to the Equipment, other than those furnished by Products, or by reason of violation of Products' instruction relating to the use and operation of the Equipment, the Exhibitor upon receipt of billing therefor, shall pay to Products Thirty-five ($35.00) Dollars per day per man plus any expenses and transportation charges incurred for any services thus required.

5. *Products' Charges.*—During the term of this license the Exhibitor agrees to pay to Products the charges more particularly hereinafter referred to in Section 22 hereof.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting all equipment or parts therefor which may be furnished hereunder from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor shall also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and shall directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—Products shall render to the Exhibitor such special services relating to the Equipment or the Theatre as Products is in a position to render and as the Exhibitor may order in writing. Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order in writing, at its list price in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any special services thus rendered, for any parts thus furnished, and any other charges the due date of which is not otherwise definitely fixed, upon rendition of billing by Products. The time of payments herein provided for shall be of the essence of this agreement.

8. *Facilities for Installation and Operation.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment or other power equipment; a screen, satisfactory to Products as to its acoustic properties; drapes for acoustic purposes, and suitable supports for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to

Digitized by Google

the extent and in the manner prescribed by Products. The Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment furnished in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment and for all other purposes referred to herein which may require such access.

12. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen who shall assist in the handling, installing, or operation of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Exhibitor hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the voluntary or involuntary assignment of any of the Exhibitor's assets for the benefit of creditors, or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in the nature of ejectment, distress for rent, summary dispossession, or any other action, suit, or proceeding in respect of the title to or right to possession of the Theatre, or upon the issue or levy of any attachment or the filing of or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment furnished hereunder. The Exhibitor shall indemnify Products for any loss or damage suffered by Products as a result of the commencement or final determination of any action, suit, or proceeding against the Exhibitor respecting the title to or right to possession of the Theatre, or the issue or levy of any attachment or the filing of, or attempt to assert or enforce any lien above referred to.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, the right and/or license herby granted may thereupon be suspended by Products' personally serving a written notice of suspension on the Exhibitor or by depositing such notice in the United States mail, addressed to the Exhibitor at the Theatre; provided however that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license, by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear due to proper use thereof in the manner and place and for the purposes set forth in

Digitized by Google

this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right, without notice and without any legal proceedings whatever, to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found, and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any paries whomsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, and shall continue to operate the Theatre, or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment or, if in the sole judgment of Products such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. Except as herein otherwise provided, it is agreed that the Equipment shall at all times subsequent to shipment thereof by Products to the Exhibitor, be held at the sole risk of the Exhibitor. If replacing equipment be provided by Products in the manner hereinabove indicated, the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Section 2 (a) hereof. The foregoing obligation of Products to repair or replace Equipment shall not apply to partial or total destruction of said Equipment while it is in the cutsody of a common carrier.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement, and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information, and all reasonable cooperation in connection therewith, and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any apparatus or thing not furnished by Products, or of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and

Digitized by Google

records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods of apparatus for producing the same specifically prescribed by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor, and with the least possible inconvenience to it or interruption of its business.

17. *License Nonexclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor as the date that the Equipment was made available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. If this agreement be terminated at any time prior to the expiration of ten (10) years from the date of commencement of the term hereof, in accordance with any of the provisions contained in this agreement, all sums paid hereunder to Products prior to the effective date of such termination shall be retained in full by Products, and no part thereof shall be deemed to apply to any portion of the ten (10) year term subsequent to the effective date of termination.

19. *General Provisions.*—(a) The sums to be paid by the Exbibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like licenses or equipment or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer, or for any other reason.

(b) Products shall not be liable for consequential damages arising by reason of failure to make delivery of the Equipment at the time contemplated herein, nor for consequential damages arising from any other cause whatsoever, whether or not similar to the foregoing.

(c) The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President, a Vice President, or the Treasurer of Products, or by such representatives as may from time to time be designated in writing by any of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

(d) This agreement shall not become binding upon Products by reason of the acceptance, use, or negotiation of any currency, check, draft, or other instrument for the payment of money.

20. *Construction.*—The construction and performance of this agreement shall be governed by the laws of the State of New York.

21. *Assignment.*—This agreement shall not be assigned by the Exhibitor, without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment

Digitized by Google

plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

(1) *Payment Plan.*—(a) The Exhibitor hereby represents and warrants to Products that he/it has had box office receipts of an average weekly amount of not less than _____ ($_____) Dollars during the period of _____ (_____) weeks prior to the execution of this agreement by the Exhibitor; it being understood and agreed that said representation and warranty is made for the purpose of inducing Products to enter into this agreement and that Products has based the percentages and amounts referred to in the second paragraph of this section upon such representation and warranty of the Exhibitor.

(b) The Exhibitor agrees to furnish to Products not later than Tuesday of each week, a statement in the form prescribed by Products, certified to by the Exhibitor, setting forth the total box office receipts of the Theatre for the previous calendar week, and hereby grants to Products their right to check the box office receipts by whatever means and at whatever time or times Products may deem appropriate, and for that purpose will provide Products with full information respecting said box office receipts and permit access to all accounts and records relating thereto.

(c) If the representation and warranty of the Exhibitor respecting box office receipts prior to the execution of this agreement, or any statement as to box office receipts required to be furnished hereunder, shall be found to have been false, the Exhibitor shall be deemed in default and Products shall be entitled to resort to any remedies it may have under the terms of this agreement in the event of default on the part of the Exhibitor.

(2) On each and every Tuesday, beginning with the Tuesday of the week succeeding the week during which the term of the license herein granted shall commence, as fixed by the provisions of Section 18 hereof, the Exhibitor shall pay to Products a sum which shall be based upon the total box office receipts of the Theatre for the preceding calendar week, and which shall be equal to ____% of the first $_____ of such box office receipts and ____% of the remainder of said box office receipts for said week, provided, however, that the total amount so payable by the Exhibitor to Products shall not in any consecutive 13 weeks, be less than $_____ and shall not, in any consecutive 26 weeks, be less than $_____ and that any deficiency in the total of the weekly payments for either of such periods shall be payable by the Exhibitor to Products upon Products' demand therefor. Payments upon this basis shall continue to be made by the Exhibitor until the amount so paid in excess of $_____ per week shall have equalled the total sum of $_____.

(3) For the balance of the term of this license the Exhibitor shall pay to Products on each and every Saturday a weekly charge of $_____.

(4) In the event of the failure of the Exhibitor to make any of the payments provided for in Paragraph 2 of this Section, or if any representation, warranty or report of the Exhibitor made pursuant to the provisions of this Section shall be found to have been false, it would be difficult and impracticable to prove the exact damage to Products resulting from such default. Therefore, in case this agreement shall be terminated by Products by reason of any such default, the Exhibitor shall pay to Products, not as a penalty but as agreed or liquidated damages, all sums accrued to Products hereunder (including a pro rata amount of the minimum charges specified in this Section), to and including the date when Products removes the Equipment or renders it inoperative, and in addition thereto twenty (20%) percent of an amount obtained by adding the amount last mentioned in Paragraph 2 of this Section to an amount arrived at by multiplying the amount set forth as a weekly payment in Paragraph 3 of this Section by the number of weeks which have elapsed from the beginning of the term of this license to the effective date of termination thereof by Products, and deducting from the sum obtained the aggregate amount of payments theretofore paid by the Exhibitor to Products based upon percentages of box office receipts, to gether with any deficiencies paid to make up the minimum charges referred to in this Section. The rights of Products contained in this Paragraph shall apply irrespective of whether Products elects to or does repossess the Equipment or any part thereof.

Provided that the payments called for in Paragraph 2 of this Section shall have been fully paid and provided the Exhibitor shall not be and shall not have

Digitized by Google

been in default in respect of any of the terms of this agreement, the Exhibitor may terminate this agreement at any time after the expiration of the first three (3) years of the term hereof upon six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate, which notice shall indicate the effective date of termination.

(5) The above special terms of payment are in consideration of the right on the part of Products to furnish for installation in the Theatre in whole or in part reconditioned and/or special equipment and the Exhibitor agrees to accept such equipment subject to all the terms and conditions of this agreement.

23. *Description of Equipment and Date of Shipment—Item One.*—Description of Equipment:

AGREEMENT FOR WESTERN ELECTRIC SOUND SYSTEM IN _____ (THEATRE), _____(LOCATION)

PLAN X

321 T S

Contract No. _____

This Agreement made in triplicate in City of New York, State of New York, this ____ day of _____ 193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____ State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of _____ State of _____ (hereinafter called the "Theatre"):_____

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

(Pars. 1-21, inclusive, are the same as Plan A-⅝-B. O. P. P.)

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

Plan X.—(1) The sum of _____ ($_____) Dollars, upon submission of this agreement for acceptance.

(2) _____

(3) The following amounts on each and every Saturday during the term of this license, as fixed by the provisions of Section 18 hereof:

The sum of _____ ($_____) Dollars per week for the first twenty-six (26) weeks of the term of this license;

The sum of _____ ($_____) Dollars per week for the second twenty-six (26) weeks of said term; and

The sum of _____ ($_____) Dollars per week for the balance of said term.

(4) In the event of failure of the Exhibitor to make any of the payments provided for in Paragraph 2 of this Section, it would be difficult and impracticable to prove the exact damage to Products resulting from such default. Therefore, in case this agreement shall be terminated by Products by reason of any such default the Exhibitor shall pay to Products, not as a penalty but as agreed or liquidated damages, all sums accrued to Products hereunder to and including the date when Products removes the Equipment or renders it inoperative, and in addition thereto twenty (20%) percent of all sums set forth in Paragraph 2 of this Section which would otherwise accrue thereafter and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of said Paragraph shall, to the extent necessary to enable Products to collect said twenty (20%) percent of the aforementioned balance, become due and payable immediately. The rights of Products contained in this Paragraph shall apply irrespective of whether Products elects to or does repossess the Equipment or any part thereof.

Provided that the payments called for in Paragraph 2 of this Section shall have been fully paid and provided the Exhibitor shall not be and shall not

AGREEMENT FOR WESTERN ELECTRIC SOUND SYSTEM IN _____ (THEATRE), _____ (LOCATION)

PLAN B–N.D.P.–XW–F.R.

321 T S

Contract No_____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of _____ _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound Equipment of the type set forth in Item One of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in connection with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said Equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said Equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse and Products will endeavor to ship the Equipment on or before the date set forth in Item Two of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. (a) *Installation and Use of Equipment.*—The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor, except as herein otherwise specifically provided, shall provide and pay for all services, material, and expenses required in preparation for and/or in connection with the installation of the Equipment.

Products shall provide an engineer and/or projectionist to inspect the preliminary work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for the installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer and/or projectionist at the Theatre on said date. The services of said engineer and/or projectionist will be furnished without additional cost to the Theatre for a period of two (2) days and for such additional continuous period not exceeding _____ (_____) days as Products shall deem requisite. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer and/or projectionist shall arrive at the Theatre, or in the event that their services shall be required for

Digitized by Google

a period in excess of the aforementioned maximum number of days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per day per man for any period in excess of said maximum number of days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period.

(b) The Exhibitor recognizes that the Equipment is furnished by Products as a complete unit and that the inventions and construction of the same, and the making of sound records in any form for use therewith, involve highly technical mechanism and art, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment and that the use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor agrees that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products, and in no other manner, and will not, without the written consent of Products or otherwise than under its supervision, move, alter, change, or modify the Equipment. The Exhibitor shall not, without the written consent of Products, add anything thereto nor take anything therefrom; or break the seal upon any part or collection of parts which is or may be sealed by Products. The Exhibitor agrees that if it shall itself take any action with respect to the correction or repair of the Equipment, it will immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor shall use and employ the Equipment only in the Theatre, unless Products shall consent to its removal in accordance with the provisions of Section 3 hereof.

(c) In the event of the Exhibitor violating any of the provisions of paragraph (b) of this Section 2, or using spare, additional or renewal parts not supplied by Products, the Exhibitor expressly waives any claim against Products in respect to the operation of the Equipment.

(d) The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre, and shall either make provision for the assumption of this agreement by the successor exhibitor of the Theatre, provided such successor exhibitor is satisfactory to Products (the Exhibitor hereunder hereby guaranteeing the performance by the successor exhibitor of the agreement so assumed by it), or shall make provision satisfactory to Products for the care and custody of the Equipment (the Exhibitor hereby agreeing to assume full responsibility for the safekeeping of the Equipment), and if such care and custody shall involve the removal of the Equipment from the Theatre, Products will consent thereto provided such removal is made under Products' supervision and provided the Exhibitor shall agree to pay Products' then standard charges therefor.

If the Exhibitor shall cease to operate the Theatre or shall dispose of its interest therein, and shall desire to install the Equipment in another theatre (which other theatre shall first be approved by Products), Products shall agree thereto, provided such removal and the installation in such other theatre is made under Products' supervision and provided the Exhibitor shall agree to pay Products' then standard charges therefor and shall enter into a new agreement on Products' then standard form for the unexpired term of the license herein granted.

The Exhibitor shall, at its own expense, perform all of the work required with respect to any removal of the Equipment and shall provide all of the material mentioned in Section 2 (a) hereof which may be required for any reinstallation of the Equipment.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees to instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period

Digitized by Google

of_____(_____) days and for such additional continuous period not exceeding_____(_____) days as Products shall deem requisite. Products shall from time to time, during the term of this agreement, inspect the Equipment and make minor adjustments thereto. The character and frequency of such inspection shall accord with such practice as shall from time to time have been found to be required for the maintenance and normal operation of similar installations licensed for the same general purposes as those referred to in Section 1 hereof and Products shall maintain facilities for rendering such service and inspection. Products shall make no charge for such service and inspection in addition to the consideration specifically provided for in this agreement; provided, however, that if the service and inspection facilities of Products are required by reason of the use of the Exhibitor of any parts for or attachments to the Equipment, other than those furnished by Products, or by reason of violation of Products' instruction relating to the use and operation of the Equipment, the Exhibitor upon receipt of billing therefor, shall pay to Products Thirty-five ($35.00) Dollars per day per man plus any expenses and transportation charges incurred for any services thus required.

5. *Products' Charges.*—During the term of this license the Exhibitor agrees to pay to Products the charges more particularly hereinafter referred to in Section 22 hereof.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting all equipment or parts therefor which may be furnished hereunder from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor shall also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and shall directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—Producers shall render to the Exhibitor such special services relating to the Equipment or the Theatre as Products is in a position to render and as the Exhibitor may order in writing. Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order in writing, at its list prices in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any special services thus rendered, for any parts thus furnished, and any other charges the due date of which is not otherwise definitely fixed, upon rendition of billing by Products. The time of payments herein provided for shall be of the essence of this agreement.

8. *Facilities for Installation and Operation.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment or other power equipment; a screen, satisfactory to Products as to its acoustic properties; drapes for acoustic purposes, and suitable supports for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products. The Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions shall at all times be and remain vested in Products. Any and all equipment furnished in accordance with the terms of this agreement shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof

Digitized by Google

where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment and for all other purposes referred to herein which may require such access.

12. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen who shall assist in the handling, installing, or operation of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such lien be filed it will promptly discharge the same.

13. *Default.*—At the option of Products this agreement and the rights of the Exhibitor hereunder shall terminate in the event of failure of the Exhibitor to make payment of charges referred to in Section 22 hereof or failure to pay taxes in accordance with Section 10 hereof, as said charges and taxes shall become due, or upon the insolvency of the Exhibitor, or upon the filing of any petition in bankruptcy by or against the Exhibitor, or upon the making of an assignment of any of the Exhibitor's assets for the benefit of creditors, or upon any application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in respect of the title to, or right to possession of, the Theatre, or (except as provided in Section 3) upon the Exhibitor ceasing to operate the Theatre, or upon removal of the Equipment from the Theatre unless prior to such removal the Exhibitor shall have made arrangements satisfactory to Products for the care and custody of the Equipment, or upon the issue or levy of any attachment or the filing of, or attempt to assert or enforce, any lien which might in any manner affect Producers' title to, or right to possession of, any apparatus or equipment furnished hereunder. The provisions respecting repair and replacement of damaged or destroyed equipment and patent protection, as referred to in Sections 15 and 16, are conditioned upon the Exhibitor not being in default at the time of an occurrence which would normally make the provisions of said sections operative. Without limitation of the provisions of this section, the Exhibitor shall be deemed in default at any time that payments hereunder shall be in arrears for a period of two (2) weeks or more.

In the event of a default under any of the provisions of this agreement at any time during the term hereof the rights and license hereby granted may thereupon be suspended by Products' personally serving a written notice of suspension on the Exhibitor or by depositing such notice in the United States mail, addressed to the Exhibitor at the Theatre; provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear due to proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or

Digitized by Google

license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment or, if in the sole judgment of Products such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. Except as herein otherwise provided, it is agreed that the Equipment shall at all times subsequent to shipment thereof by Products to the Exhibitor, be held at the sole risk of the Exhibitor. If replacing equipment be provided by Products in the manner hereinabove indicated the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Section 2 (a) hereof. The foregoing obligation of Products to repair or replace Equipment shall not apply to partial or total destruction of said Equipment while it is in the custody of a common carrier.

16. *Patent Protection.*—Products agree that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any apparatus or thing not furnished by Products, or of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equip-

Digitized by Google

ment in any particular City, Town, zone or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor as the date that the Equipment was made available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. If this agreement be terminated at any time prior to the expiration of ten (10) years from the date commencement of the term hereof, in accordance with any of the provisions contained in this agreement, all sums paid hereunder to Products prior to the effective date of such termination shall be retained in full by Products and no part thereof shall be deemed to apply to any portion of the ten (10) year term subsequent to the effective date of termination.

19. *General Provisions.*—(a) The sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like licenses or equipment or on account of any change in the type, character or quantity of equipment which Products may hereafter offer, or for any other reason.

(b) Products shall not be liable for consequential damages arising by reason of failure to make delivery of the Equipment at the time contemplated herein, nor for consequential damages arising from any other cause whatsoever, whether or not similar to the foregoing.

(c) The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President, a Vice-President, of the Treasurer of Products or by such representative as may from time to time be designated in writing by any of such officers. No waiver by either party, whether express of implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as to estopping either party from its right to enforce any provision or all provisions hereof, other than the provisions or provisions specifically waived.

(d) This agreement shall not become binding upon Products by reason of the acceptance, use or negotiation of any curency, check, draft or other instrument for the payment of money.

20. *Construction.*—The construction and performance of this agreement shall be governed by the laws of the State of New York.

21. *Assignment.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth, said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

Payment Plan.—(1) The sum of _____ ($_____) Dollars upon submission of this agreement for acceptance.

(2) The sum of _____ ($_____) Dollars on the Saturday next succeeding the date of commencement of the term of the license herein granted, as fixed by the provisions of Section 18, and a like amount on each and every Saturday thereafter for a period of _____ weeks.

(3) Thereafter and for the balance of the term of this license the sum of _____ ($_____) Dollars on each and every Saturday commencing with the Saturday next succeeding the final payment made in accordance with Paragraph 2 above.

(4) In the event of failure of the Exhibitor to make any of the payments provided for in Paragraph 2 of this Section, it would be difficult and impracticable

Digitized by Google

to prove the exact damage to Products resulting from such default. Therefore, in case this agreement shall be terminated by Products by reason of any such default, the Exhibitor shall pay to Products, not as a penalty but as agreed or liquidated damages, all sums accrued to Products hereunder to and including the date when Products removes the Equipment or renders it inoperative, and in addition thereto twenty (20%) percent of all sums set forth in Paragraph 2 of this Section which would otherwise accrue thereafter. The rights of Products contained in this Paragraph shall apply irrespective of whether Products elects to or does repossess the Equipment or any part thereof.

Provided that the payments called for in Paragraph 2 of this Section shall have been fully paid and provided the provided the Exhibitor shall not be and shall not have been in default in respect of any of the terms of this agreement, the Exhibitor may terminate this agreement at any time after the expiration of the first three (3) years of the term hereof upon six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate, which notice shall indicate the effective date of termination.

AGREEMENT FOR WESTERN ELECTRIC SOUND SYSTEM IN ——— (THEATRE), ——— LOCATION

PLAN RW

Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 193.., by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation, having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation, having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of _____, State of_____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound Equipment of the type set forth in Item One of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in connection with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said Equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said Equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse, and Products will endeavor to ship the Equipment on or before the date set forth in Item Two of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. (a) *Installation and Use of Equipment.*—The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All preliminary and installation work done and material furnished by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products, and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor, except as herein otherwise specifically provided, shall provide and pay for all services, material, and expenses required in preparation for and/or in connection with the installation of the Equipment.

Digitized by Google

Products shall provide an engineer and/or projectionist to inspect the preliminary work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for the installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its engineer and/or projectionist at the Theatre on said date. The services of said engineer and/or projectionist will be furnished without additional cost to the Exhibitor for a period of two (2) days and for such additional continuous period not exceeding _____ (_____) days as Products shall deem requisite. If the preliminary work to be done by the Exhibitor is not ready for inspection, or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer and/or projectionist shall arrive at the Theatre, or in the event that their services shall be required for a period in excess of the aforementioned maximum number of days, or otherwise than for a continuous period, the Exhibitor shall pay to Products its standard charge of Thirty-five ($35.00) Dollars per day per man for any period in excess of said maximum number of days, including time consumed in transit, together with any additional expense which Products may have incurred by reason of said services being required otherwise than for a continuous period.

(b) The Exhibitor recognizes that the Equipment is furnished by Products as a complete unit and that the inventions and construction of the same, and the making of sound records in any form for use therewith, involve highly technical mechanism and art, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that the use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor agrees that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products, and in no other manner, and will not, without the written consent of Products or otherwise than under its supervision, move, alter, change, or modify the Equipment. The Exhibitor shall not, without the written consent of Products, add anything thereto nor take anything therefrom, or break the seal upon any part or collection of parts which is or may be sealed by Products. The Exhibitor agrees that if it shall itself take any action with respect to the correction or repair of the Equipment, it will immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor shall use and employ the Equipment only in the Theatre, unless Products shall consent to its removal in accordance with the provisions of Section 3 hereof.

(c) In the event of the Exhibitor violating any of the provisions of paragraph (b) of this Section 2, or using spare, additional, or renewal parts not supplied by Products, the Exhibitor expressly waives any claim against Products in respect to the operation of the Equipment.

(d) The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre, and shall either make provision for the assumption of this agreement by the successor exhibitor of the Theatre, provided such successor exhibitor is satisfactory to Products (the Exhibitor hereunder hereby guaranteeing the performance by the successor exhibitor of the agreement so assumed by it), or shall make provision satisfactory to Products for the care and custody of the Equipment (the Exhibitor hereby agreeing to assume full responsibility for the safekeeping of the Equipment), and if such care and custody shall involve the removal of the Equipment from the Theatre, Products will consent thereto, provided such removal is made under Products' supervision and provided the Exhibitor shall agree to pay Products' then standard charge therefor.

Digitized by Google

If the Exhibitor shall cease to operate the Theatre or shall dispose of its interest therein, and shall desire to install the Equipment in another theatre (which other theatre shall first be approved by Products), Products shall agree thereto, provided such removal and the installation in such other theatre is made under Products' supervision and provided the Exhibitor shall agree to pay Products' then standard charges therefor and shall enter into a new agreement on Products' then standard form for the unexpired term of the license herein granted.

The Exhibitor shall, at its own expense, perform all of the work required with respect to any removal of the Equipment and shall provide all of the material mentioned in Section 2 (a) hereof which may be required for any reinstallation of the Equipment.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees to instruct the motion picture operators of the Exhibitor in the manner and method of operating the Equipment for a period of _____ (_____) days and for such additional continuous period, not exceeding _____ (_____) days as Products shall deem requisite. Products shall, from time to time, during the term of this agreement, inspect the Equipment and make minor adjustments thereto. The character and frequency of such inspection shall accord with such practice as shall from time to time have been found to be required for the maintenance and normal operation of similar installations licensed for the same general purposes as those referred to in Section 1 hereof, and Products shall maintain facilities for rendering such service and inspection. Products shall make no charge for such service and inspection in addition to the consideration specifically provided for in this agreement; provided, however, that if the service and inspection facilities of Products are required by reason of the use by the Exhibitor of any parts for or attachments to the Equipment, other than those furnished by Products, or by reason of violation of Products' instruction relating to the use and operation of the Equipment, the Exhibitor, upon receipt of billing therefor, shall pay to Products Thirty-five ($35.00) Dollars per day per man plus any expenses and transportation charges incurred for any services thus required.

5. *Products' Charges.*—During the term of this license the Exhibitor agrees to pay to Products the charges more particularly hereinafter referred to in Section 22 hereof.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting all equipment or parts therefor which may be furnished hereunder from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor shall also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and shall directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—Products shall render to the Exhibitor such special services relating to the Equipment or the Theatre as Products is in a position to render and as the Exhibitor may order in writing. Products shall furnish such repair and replacement parts as it is in a position to furnish and as the Exhibitor may order in writing, at its list prices in effect at the time of receipt of orders therefor. The Exhibitor shall pay Products' charges for any special services thus rendered, for any parts thus furnished, and any other charges, the due date of which is not otherwise definitely fixed, upon rendition of billing by Products. The time of payments herein provided for shall be of the essence of this agreement.

8. *Facilities for Installation and Operation.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment or other power equipment; a screen, satisfactory to Products as to its acoustic properties; drapes for acoustic purposes, and suitable supports for horns; and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products. The Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

Digitized by Google

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder, and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment furnished in accordance with the terms of this agreement shall at all times be and remain personal property, notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment and for all other purposes referred to herein which may require such access.

12. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever, or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnity Products for, and save it harmless from, any liability or injury to workmen who shall assist in the handling, installing, or operation of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment furnished hereunder, and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Exhibitor hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the voluntary or involuntary assignment of any of the Exhibitor's assets for the benefit of creditors, or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in the nature of ejectment, distress for rent, summary dispossession, or any other action, suit, or proceeding in respect of the title to or right to possession of the Theatre, or upon the issue or levy of any attachment, or the filing of or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment furnished hereunder. The Exhibitor shall indemnify Products for any loss or damage suffered by Products as a result of the commencement or final determination of any action, suit, or proceeding against the Exhibitor respecting the title to or right to possession of the Theatre, or the issue or levy of any attachment, or the filing of or attempt to assert or enforce any lien above referred to.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, the right and/or license hereby granted may there upon be suspended by Products' personally serving a written notice of suspension on the Exhibitor or by depositing such notice in the United States mail, addressed to the Exhibitor at the Theatre; provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such defaults.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear due to proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right

Digitized by Google

without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Producers shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this Agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment or, if in the sole judgment of Products such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. Except as herein otherwise provided, it is agreed that the Equipment shall at all times subsequent to shipment thereof by Products to the Exhibitor be held at the sole risk of the Exhibitor. If replacing equipment be provided by Products in the manner hereinabove indicated, the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Section 2 (a) hereof. The foregoing obligation of Products to repair or replace Equipment shall not apply to partial or total destruction of said Equipment while it is in the custody of a common carrier.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement, and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith, and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any apparatus or thing not furnished by Products, or of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Ex-

Digitized by Google

hibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of license.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor as the date that the Equipment was made available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. If this agreement be terminated at any time prior to the expiration of ten (10) years from the date of commencement of the term hereof, in accordance with any of the provisions contained in this agreement, all sums paid hereunder to Products prior to the effective date of such termination shall be retained in full by Products and no part thereof shall be deemed to apply to any portion of the ten (10) year term subsequent to the effective date of termination.

19. *General Provisions.*—(a) The sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like licenses or equipment or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer, or for any other reason.

(b) Products shall not be liable for consequential damages arising by reason of failure to make delivery of the Equipment at the time contemplated herein, nor for consequential damages arising from any other cause whatsoever, whether or not similar to the foregoing.

(c) The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President, a Vice-President, or the Treasurer of Products, or by such representative as may from time to time be designated in writing by any of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

(d) This ageement shall not become binding upon Products by reason of the acceptance, use, or negotiation of any currency, check, draft, or other instrument for the payment of money.

20. *Construction.*—The construction and performance of this agreement shall be governed by the laws of the State of New York.

21. *Assignment.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

Plan RW.—(1) The sum of _____ ($_____) Dollars, due and payable upon submission of this agreement for acceptance.

Therefore, in case this agreement shall be terminated by Products by reason of any such default, the Exhibitor shall pay to Products, not as a penalty but as agreed or liquidated damages, all sums accrued to Products hereunder to and including the date when Products removes the Equipment or renders it inoperative, and in addition thereto twenty (20%) percent of all sums set forth in Paragraph 2 of this Section which would otherwise accrue thereafter. The rights of Products contained in this Paragraph shall apply irrespective of whether Products elects to or does repossess the Equipment or any part thereof.

23. *Equipment—Item One.*—Description of Equipment:

Item Two.—(a) The Equipment having been installed and used in the Theatre prior to the execution of this agreement, the provisions of Sections 1 (a), 1 (b), 2 (a), the first sentence of Section 4 and the first sentence of Section 8, shall be deemed to have been complied with by the parties hereto. The provisions contained in the first sentence of Section 18 are amended so as to provide that the license herein granted shall be for a period of ten (10) years from the date hereof.

(b) This agreement shall terminate all prior agreements between Products and the Exhibitor relating to the installation and licensing of Western Electric Sound Equipment in the Theatre.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf the day and year first above written.

AGREEMENT FOR WESTERN ELECTRIC SOUND SYSTEM IN _____ THEATRE, _____ LOCATION

PLAN 315%–B. O. P. P.

315 T S

Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation, having its principal place of business in the City, County, and State of New York (hereinafter called "Products), licensor, and _____, a _____ Corporation, having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the_____ Theatre, at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for, and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound System of the type set forth in Item One of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations and agreements herein contained, a non-exclusive non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said Equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse and Products will endeavor to ship the Equipment on or before the date set forth in Item Two of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. (*a*) *Installation and Use of Equipment.*—The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All installation work done and material furnished by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor, except as herein otherwise specifically provided, shall provide and pay for all services, material and expenses required in connection with the installation of the Equipment.

Digitized by Google

Products shall provide an engineer to inspect said installation work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for the installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer will be furnished without additional cost to the Exhibitor for such continuous period as Products shall deem requisite, not to exceed_____ days. If the installation work to be done by the Exhibitor is not ready for inspection or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, and/or in the event that his services shall be required for a continuous period in excess of_____ days, the Exhibitor shall pay to Products its standard per diem charges for any period in excess of said_____ consecutive days and any additional expense incurred by Products by reason of said services being required for other than a continuous period or for more than_____ days.

(*b*) The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound records (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products and that all repairs to the Equipment shall be made as specified by Products. Products may from time to time at the expense of the Exhibitor, supply and install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it will immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interests therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre and shall make provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided such successor operator is satisfactory to Products. If the notice hereinabove

Digitized by Google

required shall have been given to Products, Products will supervise the removal of the Equipment and its installation in another theatre designated by the Exhibitor; provided, however, that Products' standard charge as from time to time established for removal of the Equipment shall first be paid by the Exhibitor, and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. The Exhibitor also agrees to pay to Products upon rendition of invoice therefor its standard per diem charges for engineering or other services in connection with such removal and reinstallation, and the transportation charges of all employees of Products furnished in connection therewith. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement. The exhibitor operating the theatre to which the Equipment may be removed shall at its own expense perform all of the work and provide all of the material set forth in Section 2 (*a*) hereof required for the installation of the Equipment in said theatre.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees, to the extent deemed necessary by it, and for a continuous period not exceeding four (4) days, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. Products also agrees to inspect the Equipment from time to time after it shall have been installed.

5. *Products' Charges.*—During the term of this license the Exhibitor agrees to pay to Products, as rental for the Equipment including an initial set of spare parts therefor in accordance with Products' standard list thereof (but exclusive of any additional or renewal parts or equipment) the charges more particularly hereinafter referred to in Section 22 hereof.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting all equipment or parts therefor which may be furnished hereunder from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor shall also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and shall directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—The Exhibitor agrees to pay to Products upon rendition of invoices therefor its standard charges as from time to time established for any repairs to the Equipment and for any additional equipment or spare or renewal parts, furnished or supplied by Products and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, other than the inspection of Equipment provided for in Section 4 hereof. The time of the payments herein provided for shall be of the essence of this agreement.

8. *Facilities for Installation and Operation.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; a screen, satisfactory to Products as to its acoustic properties; drapes for acoustic purposes, and suitable supports for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor, and when and to the extent and in the manner prescribed by Products. The Exhibitor further agrees, at its own expense, to obtain all necessary permits and to comply with all laws and ordinances in effect from the date hereof and throughout the term of this license relating to the iustallation, maintenance, use, and operation of the Equipment, or any part thereof, and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment furnished in accordance with the terms of this agreement shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

Digitized by Google

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment, and shall grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

12. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen who shall assist in the handling, installing, or operation of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Exhibitor hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the voluntary or involuntary assignment of any of the Exhibitor's assets for the benefit of creditors, or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in the nature of ejectment, distress for rent, summary dispossession, or any other action, suit, or proceeding in respect of the title to or right to possession of the Theatre, or upon the issue or levy of any attachment or the filing of or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment furnished hereunder.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the rights granted and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended, provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equip-

Digitized by Google

ment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. If replacing equipment be provided by Products in the manner hereinabove indicated the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Section 2 (*a*) hereof. The provisions of this section shall not apply to partial or total destruction of the Equipment while same is in the custody of a common carrier.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor, and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor as the date that

Digitized by Google

the Equipment was made available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months written notice given by the Exhibitor to Products of its intention so to terminate.

19. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event the Exhibitor makes any default under the terms of this agreement and if this agreement be terminated by Products, Products shall retain all sums theretofore paid to it by the Exhibitor, and the Exhibitor shall pay to Products, not as a penalty, but as agreed and/or liquidated damages, all sums accruing to Products hereunder to and including the date when Products removes the Equipment or renders it inoperative, and in addition thereto twenty (20%) percent of all sums set forth in Paragraph 2 of the payment plan indicated in Section 22 hereof, which would otherwise accrue thereafter, and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of the aforementioned Plan, shall, to the extent necessary to enable Products to collect said twenty (20%) percent of the aforementioned unpaid balance, become immediately due and payable.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and shall apply whether or not it elects to or does repossess the said Equipment, or any part thereof.

20. *General Provisions.*—(*a*) The sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like licenses or equipment or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer for installation in any theatre, or for any other reason.

(*b*) Products shall not be liable for consequential damages arising by reason of failure to make delivery of the Equipment at the time contemplated herein, nor for consequential damages arising from any other cause whatsoever, whether or not similar to the foregoing.

(*c*) The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President, a Vice-President, or the Treasurer of Products, or by such representative as may from time to time be designated in writing by any of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

(*d*) This agreement shall not become binding upon Products by reason of the acceptance, use, or negotiation of any currency, check, draft, or other instrument for the payment of money.

(*e*) The construction and performance of this agreement shall be governed by the laws of the State of New York.

21. *Assignment.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

Payment Plan.—(1) The Exhibitor shall furnish to Products not later than Tuesday of each week, a statement in the form prescribed by Products, certified to by the Exhibitor, setting forth the total box office receipts of the theatre for

Digitized by Google

the previous calendar week, and hereby grants to Products the right to check the box office receipts by whatever means and at whatever time or times Products may deem appropriate, and for that purpose will provide Products with full information respecting said box office receipts and permit access to all accounts and records relating thereto.

The Exhibitor shall be deemed in default and Products, in addition to any other remedies provided for herein, may terminate this agreement and remove the Equipment and shall be entitled to the liquidated damages provided for elsewhere herein, if any statement furnished hereunder shall be found to be false or if the Exhibitor's representation of having had box office receipts of an average weekly amount of not less than $_____ for _____ weeks prior to the execution of this agreement by the Exhibitor shall be found to have been false.

(2) On each and every Tuesday beginning with the Tuesday of the week succeeding the week during which the equipment is first used for a public performance, or the Tuesday succeeding the week which Products certifies to the Exhibitor as the date that the equipment was made available for public performance, whichever date is the earlier, and in no event later than thirty (30) days after the date of shipment, the Exhibitor shall pay to Products a sum which shall be based upon the total box office receipts of the theatre for the preceding calendar week, and which shall be equal to _____% of the first $_____ of such box office receipts and _____% of the remainder of said box office receipts for said week, provided, however, that the total amount so payable by the Exhibitor to Products shall not in any consecutive 13 weeks, be less than $_____ and shall not, in any consecutive 26 weeks, be less than $_____, and that any deficiency in the total of the weekly payments for either of such periods shall be payable by the Exhibitor to Products upon Products' demand therefor.

The 20% mentioned in Section 19 hereof shall be applied in liquidation of damages only in the event of termination of this agreement by Products pursuant to the provisions of paragraph (1) of this Section 22 and shall then apply to the difference between the sum secondly mentioned in paragraph (3) of this Section 22 and the total amount in excess of $_____ per week paid by the Exhibitor to Products prior to the effective date of such termination.

(3) Subsequent to the date when the total amount paid by the Exhibitor to Products under the provisions of paragraph 2 above in excess of $_____ per week shall have equalled the total sum of $_____ and for the balance of the term of this license, the Exhibitor shall pay to Products on each and every Saturday a weekly rental charge of $_____.

(4) The above special terms of payment are in consideration of the right on the part of Products to furnish for installation in the theatre in whole or in part reconditioned and/or special equipment and the Exhibitor agrees to accept such equipment subject to all the terms and conditions of this agreement.

(5) The right of the Exhibitor to terminate this agreement at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months' written notice to Products of Exhibitor's intention to so terminate as provided in Section 18 of this agreement shall not become effective unless during the first three (3) years of the term hereof the total sum secondly mentioned in paragraph 3 of this section shall have been fully paid by the Exhibitor.

23. *Description of Equipment and Date of Shipment—Item One.*—Description of Equipment: _____

1. (a) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound System of the type set forth in

Digitized by Google

Item One of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said Equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' Warehouse, and Products will endeavor to ship the Equipment on or before the date set forth in Item Two of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. *Installation and Use of Equipment.*—(a) The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All installation work done and material furnished by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products, and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor, except as herein otherwise specifically provided, shall provide and pay for all services, material and expenses required in connection with the installation of the Equipment.

Products shall provide an engineer to inspect said installation work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Equipment has been received and that the Theatre will be ready for the installation of the Equipment on a definite date shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer will be furnished without additional cost to the Exhibitor for such continuous period as Products shall deem requisite, not to exceed one week. If the installation work to be done by the Exhibitor is not ready for inspection or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, and/or in the event that his services shall be required for a continuous period in excess of one week, the Exhibitor shall pay to Products its standard per diem charges for any period in excess of said one week and any additional expense incurred by Products by reason of said services being required for other than a continuous period or for more than one week.

(b) The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound records (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and effi-

Digitized by Google

ciently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products and that all repairs to the Equipment shall be made as specified by Products. Products may from time to time at the expense of the Exhibitor, supply and install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it will immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to the satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interests therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre and shall make provisions, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided such successor operator is satisfactory to Products. If the notice hereinabove required shall have been given to Products, Products will supervise the removal of the Equipment and its installation in another theatre designated by the Exhibitor; provided, however, that Products' standard charge as from time to time established for removal of the Equipment shall first be paid by the Exhibitor, and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. The Exhibitor also agrees to pay to Products upon rendition of invoice therefor its standard per diem charges for engineering or other services in connection with such removal and reinstallation, and the transportation charges of all employees of Products furnished in connection therewith. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement. The exhibitor operating the theatre to which the Equipment may be removed shall at its own expense perform all of the work and provide all of the material set forth in Section 2 (a) hereof required for the installation of the Equipment in said theatre.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees, to the extent deemed necessary by it, and for a continuous period not exceeding one (1) week, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. Products also agrees to inspect the Equipment from time to time after it shall have been installed.

5. *Products' Charges.*—During the term of this license the Exhibitor agrees to pay to Products, as rental for the Equipment, including an initial set of spare parts therefor in accordance wtih Products' standard list thereof (but exclusive of any additional or renewal parts or equipment) the charges more particularly hereinafter referred to in Section 22 hereof.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting all equipment or parts therefor which may be furnished hereunder from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor shall also arrange for any neces-

Digitized by Google

sary loading, trucking, and unloading to put the Equipment down inside the Theatre, and shall directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—The Exhibitor agrees to pay to Products upon rendition of invoices therefor its standard charges as from time to time established for any repairs to the Equipment and for any additional equipment or spare or renewal parts, furnished or supplied by Products and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, other than the inspection of Equipment provided for in Section 4 hereof. The time of the payments herein provided for shall be of the essence of this agreement.

8. *Facilities for Installation and Operation.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; a screen, satisfactory to Products as to its acoustic properties; drapes for acoustic purposes, and suitable supports for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products. The Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment furnished in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor shall reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor shall provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment, and shall grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

12. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen who shall assist in the handling, installing, or operation of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Exhibitor hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the voluntary or involuntary assignment of any of the Exhibitor's assets for the

Digitized by Google

benefit of creditors, or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in the nature of ejectment, distress for rent, summary dispossession, or any other action, suit, or proceeding in respect of the title to or right to possession of the Theatre, or upon the issue or levy of any attachment or the filing of or attempt to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment furnished hereunder.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended, provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purposes set forth in this agreement only accepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. If replacing equipment be provided by Products in the manner hereinabove indicated the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Section 2 (a) hereof. The provisions of this section shall not apply

Digitized by Google

to partial or total destruction of the Equipment while same is in the custody of a common carrier.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparaus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular city, Town, zone, or neighborhood, or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor as the date that the Equipment was made available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months written notice given by the Exhibitor to Products of its intention so to terminate.

19. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event the Exhibitor makes any default under the terms of this Agreement and if this agreement be terminated by Products, Products shall retain all sums theretofore paid to it by the Exhibitor and the Exhibitor shall pay to Products, not as a penalty, but as agreed and/or liquidated damages, all sums accruing to Products hereunder to and including the date when Products removes the Equipment or renders it inoperative, and in addition thereto twenty (20%) percent of all sums set forth in Paragraph 2 of the payment plan indicated in Section 22 hereof, which would otherwise accrue thereafter, and any note or notes made by the Exhibitor and delivered to Products in accordance with the provision of the aforementioned Plan, shall, to the extent necessary to enable Products to collect said twenty (20%) percent of the aforementioned unpaid balance, become immediately due any payable.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and shall apply whether or not it elects to or does reposses the said Equipment, or any part thereof.

Digitized by Google

20. *General Provisions.*—(a) The sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like licenses or equipment or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer for installation in any theatre or for any other reason.

(b) Products shall not be liable for consequential damages arising by reason of failure to make delivery of the Equipment at the time contemplated herein, nor for consequential damages arising from any other cause whatsoever, whether or not similar to the foregoing.

(c) The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President, a Vice-President, or the Treasurer of Products or by such representative as may from time to time be designated in writing by any of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

(d) This agreement shall not become binding upon Products by reason of the acceptance, use, or negotiation of any currency, check, draft, or other instrument for the payment of money.

(e) The construction and performance of this agreement shall be governed by the laws of the State of New York.

21. *Assignment.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

AGREEMENT FOR WESTERN ELECTRIC SOUND SYSTEM

PLAN D1-10-15-156W

315 TS
Contract_____

This agreement made in triplicate in the City of New York, State of New York, this_____day of_____, 193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and_____ a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of_____, State of_____ (hereinafter called the "Exhibitor"), licensee, and operating the_____ _____ Theatre, at No._____ Avenue/Street, in the City of_____ _____, State of_____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

(Pars. 1-21, inclusive, same as Plan X.)

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

Payment Plan.—(1) The sum of_____($_____) Dollars, due and payable upon submission of this agreement for acceptance.

(2) (*a*) A demand promissory note for the sum of_____ ($_____) Dollars in form satisfactory to Products made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, which note shall bear no interest prior to the date of presentation. Products agrees not to present said note for payment prior to the day upon which the Equipment is first used for a public performance or the day which Products certifies to the Exhibitor as the date upon which the Equipment was made available for a public performance, whichever date is the earlier; provided, however, that Products may present said note at any time after thirty (30) days following the date of shipment.

(*b*) A promissory note in form satisfactory to Products made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, and payable as follows:

The sum of_____($_____) Dollars on the Saturday next succeeding the day upon which the Equipment is first used for a public performance, or the day which Product certifies to the Exhibitor as the date that the Equipment was made available for a public performance, whichever date is the earlier, and in no event later than thirty (30) days after the date of shipment, and a like amount on each and every Saturday thereafter for a period of Twenty-five (25) weeks; the sum of_____($_____) Dollars on each and every Saturday thereafter for a period of twenty-six (26) weeks; the sum of_____($_____) Dollars on each and every Saturday thereafter for a period of Fifty-two (52) weeks; and the sum of_____ ($_____) on each and every Saturday thereafter for a period of Fifty-two (52) weeks.

The Exhibitor hereby expressly authorizes Products to enter upon the face of the note referred to herein, the maturity date of the first payment thereunder as above defined.

(3) Thereafter and for the balance of the term of this license the Exhibitor agrees to pay to Products a weekly rental charge of_____($_____) Dollars, which shall be payable on each and every Saturday commencing with the Saturday next succeeding the final payment made in accordance with paragraph 2(*b*) above.

23. *Description of Equipment and Date of Shipment.—Item One.*—Description of Equipment:

Item Two.—The proposed date of shipment is_____, 193__.

AGREEMENT FOR WESTERN ELECTRIC SOUND SYSTEM

PLAN X

3010 T S

Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 193__, by and between Electrical Research Products, Inc., (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____, (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

Digitized by Google

1. (*a*) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound System of the type set forth in Item One of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse and Products will endeavor to ship the Equipment on or before the date set forth in Item Two of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. *Installation and Use of Equipment.*—(*a*) The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All installation work done and material furnished by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor shall provide and pay for all services, material and expenses, except as herein otherwise specifically provided, required in connection with the installation of the Equipment.

Products shall provide an engineer to inspect said installation work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Theatre will be ready for the installation of the Equipment on a definite date and that the Equipment has been received shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer will be furnished without additional cost to the Exhibitor for such continuous period as Products shall deem requisite, not to exceed one week. If the installation work to be done by the Exhibitor is not ready for inspection or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, and/or in the event that his services shall be required for a continuous period in excess of one week, the Exhibitor shall pay to Products its standard per diem charges for any period in excess of said one week and any additional expenses incurred by Products by reason of said services being required for other than a continuous period or for more than one week.

(*b*) The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound records (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce interior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of

Digitized by Google

such character that the Equipment will operate, properly, reliably and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Products may from time to time at the expense of the Exhibitor, supply and install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interests therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre and shall make provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided such successor operator is satisfactory to Products. If the notice hereinabove required shall have been given to Products, Products will supervise the removal of the Equipment and its installation in another theatre designated by the Exhibitor; provided, however, that Products' standard charge as from time to time established for removal of the Equipment shall first be paid by the Exhibitor, and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. The Exhibitor also agrees to pay to Products upon rendition of invoice therefor its standard per-diem charges for engineering or other services in connection with such removal and reinstallation, and the transportation charges of all employees of Products furnished in connection therewith. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement. The exhibitor operating the theatre to which the Equipment may be removed shall at its own expense perform all of the work and provide all of the material set forth in Section 2 (*a*) hereof required for the installation of the Equipment in said theatre.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees, to the extent deemed necessary by it, and for a continuous period not exceeding one (1) week, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. Products also agrees to inspect the Equipment from time to time after it shall have been installed.

5. *Products' Charges.*—During the term of this license the Exhibitor agrees to pay to Products, as rental for the Equipment including an initial set of spare parts therefor in accordance with Products' standard list thereof (but exclusive of any additional or renewal parts or equipment) the charges more particularly hereinafter referred to in Section 22 hereof.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting all equipment or parts therefor which may be furnished hereunder from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

Digitized by Google

7. *Payment for Additional Parts, Special Service, etc.*—The Exhibitor agrees to pay to Products upon rendition of invoices therefor its standard charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, other than the inspection of Equipment provided for in Section 4 hereof. The time of the payments herein shall be of the essence of this agreement.

8. *Facilities for Installation and Operation.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; a screen, satisfactory to Products as to its acoustic properties; drapes for acoustic purposes, and suitable supports for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products. The Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all local laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment furnished in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor will reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor will provide access for Products' representatives, engineers, and mechanics to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

12. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen who shall assist in the handling, installing, or operation of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Exhibitor hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Exhibitor with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Exhibitor or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the voluntary or involuntary assignment of any of the Exhibitor's assets for the benefit of creditors or upon the application for the appointment of a receiver of the property and assets of the Exhibitor, or upon the commencement of any action, suit, or proceeding against the Exhibitor in the nature of ejectment, distress for rent, summary dispossession or any other action, suit, or proceeding

Digitized by Google

in respect of the title to or right to possession of the Theatre, or upon the issuing or levying of any attachment or the filing or attempting to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment furnished hereunder.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the rights granted and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended, provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor shall surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whomsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. If replacing equipment be provided by Products in the manner hereinabove indicated the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Section 2 (*a*) hereof. The provisions of this section shall not apply to partial or total destruction of the Equipment while same is in the custody of a common carrier.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of any United States patent or patents relating to the apparatus or equipment

Digitized by Google

furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor as the date that the Equipment was made available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months written notice given by the Exhibitor to Products of its intention so to terminate.

19. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be impracticable to prove and difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event the Exhibitor makes any default under the terms of this agreement and if this agreement be terminated by Products, Products shall retain all sums theretofore paid to it by the Exhibitor, and the Exhibitor shall pay to Products, not as a penalty but as agreed and/or liquidated damages, all sums accruing to Products hereunder to and including the date when Products renders the Equipment inoperative or removes same, and in addition thereto twenty percent (20%) of all sums set forth in Paragraph 2 of the payment plan indicated in Section 22 hereof, which would otherwise accrue thereafter, and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of the aforementioned Plan, shall, to the extent necessary to enable Products to collect said twenty percent (20%) of the aforementioned unpaid balance, become immediately due and payable.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and shall apply whether or not it elects to or does repossess the said Equipment or any part thereof.

20. *General Provisions.*—(*a*) The sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like licenses or equipment or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer for installation in any theatre, or for any other reason.

(*b*) Products shall not be liable for consequential damages arising by reason of failure to make delivery of the Equipment at the time contemplated herein,

Digitized by Google

nor for consequential damages arising from any other cause whatsoever, whether or not similar to the foregoing.

(c) The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President, a Vice-President, or the Treasurer of Products or by such representative as may from time to time be designated in writing by any of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

(d) This agreement shall not become binding upon Products by reason of the acceptance, use, or negotiation of any currency, check, draft, or other instrument for the payment of money.

21. *Assignment.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be construed according to the laws of the State of New York.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

Plan X.—_____

23. *Description of Equipment and Date of Shipment—Item One.*—Description of Equipment:_____

Item Two.—The proposed date of shipment is_____, 193__.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, the Exhibitor agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

Payment Plan.—(1) The sum of _____ ($_____) Dollars, representing the first weekly payment hereunder, the receipt of which is hereby acknowledged.

(2) A promissory note in form satisfactory to Products made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, and payable as follows: The sum of _____ ($_____) Dollars on the Saturday next succeeding the day upon which the Equipment is first used for a public performance, or the day with which Products certifies to the Exhibitor as the date that the Equipment was made available for a public performance, whichever date is the earlier and in no event later than thirty (30) days after the date of shipment, and a like amount on each and every Saturday thereafter for a period of Twenty-four (24) weeks; the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of Twenty-six (26) weeks; the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of Fifty-two (52) weeks; and the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of Fifty-two (52) weeks.

The Exhibitor hereby expressly authorizes Products to enter upon the face of the note referred to herein, the maturity date of the first payment thereunder as above defined.

(3) Thereafter and for the balance of the term of this license the Exhibitor agrees to pay to Products a weekly rental charge of _____ ($_____) Dollars, which shall be payable on each and every Saturday commencing with the Saturday next succeeding the final payment made in accordance with paargraph 2 above.

23. *Description of Equipment and Date of Shipment.—Item One.*—Description of Equipment:

Item Two.—The proposed date of shipment is _____, 193 .

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

Contract No.____

This Agreement made in triplicate in the City of New York, State of New York, this____day of_____, 193__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and_____a_____Corporation having its principal place of business at No._____Avenue/Street, in the City of_____State of_____(hereinafter called the "Licensee"), and operating a motion picture projection room at _____No._____Avenue/Street, in the City of _____State of_____(hereinafter called the "Projection Room"):

Witnesseth that, for, and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

---

1. *Grant of License and Furnishing of Equipment.*—(a) Products hereby agrees to furnish a Western Electric Sound System of the type set forth in Item One of Section 23 (hereinafter called the "Equipment") and hereby grants to Licensee, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive, non-assignable license to use the Equipment in the Projection Room for the electrical reproduction of sound in synchronism with, or as incidental to, the projection of motion pictures for the purpose of testing motion picture film and/or sound records, and to employ to the extent necessarily involved in such use of said Equipment the methods and/or systems of Products under all United States patents and applications for United States patents, relating to said Equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

2. *Installation of Equipment.*—The Equipment shall be installed by Licensee at its own expense in strict accordance with installation specifications which will be furnished by Products. All installation work done and material furnished by Licensee or its agents or servants shall be subject to inspection and approval by Products and the Equipment shall not be used by Licensee until the installation thereof shall have been approved by Products. Approval of installation work or material shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. Licensee shall provide and pay for all services, material, and expenses, except as herein otherwise specifically provided, required in connection with the installation of the Equipment.

Products shall provide an engineer to inspect said installation work to be done by Licensee and to supervise the installation of the Equipment. Notice from Licensee that the Projection Room will be ready for the installation of the Equipment on a definite date and that the Equipment has been received shall be delivered to Products not less than three (3) days prior to said date, and Products shall make every reasonable effort to have its engineer at the Projection Room on said date. The services of said engineer will be furnished without additional cost to Licensee for such continuous period as Products shall deem requisite, not to exceed one week. If the installation work to be done by Licensee is not ready for inspection or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Projection Room, and/or in the event that his services shall be required for a continuous period in excess of one week, Licensee shall pay to Products its standard per diem charges for any period in excess of said one week and any additional expense incurred by Products by reason of said services being required for other than a continuous period or for more than one week.

Digitized by Google

3. *Use of Equipment.*—Licensee agrees that it will use and employ the Equipment only in the Projection Room, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. Licensee recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment and that the use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, Licensee shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom, nor break the seal upon any part or collection of parts which is or may be sealed by Products. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Products may from time to time, at the expense of Licensee, supply and install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment. Nothing herein contained, however, shall be construed as prohibiting the Licensee from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but Licensee agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. Licensee expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

4. *Instruction of Operators and Inspection of Equipment.*—At the time of installation Products agrees, to the extent deemed necessary by it and for a continuous period not exceeding one (1) week, to instruct the motion picture machine operators of Licensee in the manner and method of operating the Equipment. Products also agrees to inspect the Equipment from time to time after it shall have been installed.

5. *Products' Charges.*—During the term of this license Licensee agrees to pay to Products, as rental for the Equipment including an initial set of spare parts therefor in accordance with Products' standard list thereof (but exclusive of any additional or renewal parts or equipment) the charges more particularly hereinafter referred to in Section 22 hereof.

6. *Transportation Charges.*—Licensee agrees to pay the cost of transporting all equipment or parts therefor which may be furnished hereunder from the place of shipment to the Projection Room, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. Licensee will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Projection Room, and will directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—Licensee agrees to pay to Products upon rendition of invoices therefor in standard charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products and to pay the transportation charges thereon. Licensee also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Licensee, other than the inspection of Equipment provided for in Section 4 hereof. The time of the payments herein shall be of the essence of this agreement.

8. *Facilities for Installation and Operation.*—The Licensee warrants that the Projection Room is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity, with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; a screen, satisfactory to Products as to its acoustic properties; suitable supports for horns, and agrees to make such other reasonable changes, alterations and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of Licensee and when and to the extent and in the manner prescribed by Products. Licensee fur-

Digitized by Google

ther agrees at its own expense to obtain all necessary permits and to comply with all local laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment furnished in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—Licensee shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and Licensee will reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—Licensee will provide access for Products' representatives, engineers, and mechanics to the Projection Room and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

12. *Liability for Interruption, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Projection Room or of any equipment therein arising from any cause whatsoever, or for any loss or damage to persons or property in or upon the premises embracing the Projection Room for any reason whatsoever. Licensee agrees to indemnify Products for, and save it harmless from any liability or injury to workmen who shall assist in the handling, installing, or operation of the Equipment, and from any liability to any persons resulting from negligence of such workmen. Licensee agrees to use every reasonable effort to prevent the filing of any liens for rent or material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of Licensee hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of Licensee with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of Licensee or upon the filing of a voluntary or involuntary petition in bankruptcy, or upon the voluntary or involuntary assignment of any of Licensee's assets for the benefit of creditors or upon the application for the appointment of a receiver of the property and assets of Licensee, or upon the commencement of any action, suit, or proceeding against Licensee in the nature of ejectment, distress for rent, summary dispossession, or any other action, suit, or proceeding in respect of the title to or right to possession of the premises embracing the Projection Room upon the issuing or levying of any attachment or the filing or attempting to assert or enforce any lien which might in any manner affect Products' title to or right to possession of any apparatus or equipment furnished hereunder.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the rights granted and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended; provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, Licensee will surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purposes set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Projection Room or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and Licensee agrees to cooperate in such removal. If this license shall be terminated by default, or if Licensee permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement,

Digitized by Google

Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Projection Room or other premises of Licensee and such place or places whatsoever, whether belonging to Licensee or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of Licensee under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. Licensee expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and Licensee further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whatsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against Licensee which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—Licensee agrees to advise Products promptly of any injury or damage to the Equipment or to any parts thereof, and will permit Products, at Licensee's expense, to repair any such injury or damage, or to replace the Equipment if totally destroyed.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will, at its own expense, defend any and all actions and suits which may during the term hereof be brought against Licensee for infringement of any United States patent or patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by Licensee for the purpose and in the manner contemplated by this agreement, and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against Licensee by the court of last resort in any such action or suits on account of any such infringement, provided that Licensee shall give Products prompt notice (with written confirmation) of such action or suit, full information, and all reasonable cooperation in connection therewith and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by Licensee to Products. To the end that Products may protect itself and Licensee from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to Licensee hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to Licensee and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to Licensee an exclusive right or license to operate the Equipment or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in other projection rooms.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used by Licensee, or from the day which Products shall certify to Licensee as the date that the Equipment was made available for use, whichever date be the earlier; provided, however,

Digitized by Google

that the term hereof and the payments to Products hereunder (other than the payment tendered upon the submission of this agreement) shall begin not later than thirty (30) days after the date of shipment. It may, however, provided Licensee shall not be in default in respect of any of the terms of this agreement, be terminated at the option of Licensee at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months written notice given by Licensee to Products of its intention so to terminate.

19. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that Licensee makes default in any of the terms of this agreement it would be impracticable to prove and difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event Licensee makes any default under the terms of this agreement and if this agreement be terminated by Products, Products shall retain all sums theretofore paid to it by Licensee and Licensee shall pay to Products, not as a penalty, but as agreed and/or liquidated damages, all sums accruing to Products hereunder to and including the date when Products renders the Equipment inoperative or removes same, and in addition thereto twenty (20%) percent of all sums set forth in Paragraph 2 of Section 22 hereof, which would otherwise accrue thereafter, and any note or notes made by Licensee and delivered to Products in accordance with the provisions of the aforementioned Paragraph 2 of Section 22, shall, to the extent necessary to enable Products to collect said twenty (20%) percent of the aforementioned unpaid balance, become immediately due and payable.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and shall apply whether or not it elects to or does repossess the said Equipment, or any part thereof.

20. *General Provisions.*—(a) The sums to be paid by Licensee are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like licenses or equipment or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer for installation in any other projection room, or for any other reason.

(b) Products shall not be liable for consequential damages arising by reason of failure to make delivery of the Equipment at the time contemplated herein nor for consequential damages arising from any other cause whatsoever, whether or not similar to the foregoing.

(c) The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President, a Vice-President or the Treasurer of Products or by such representative as may from time to time be designated in writing by any of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof, other than the provision or provisions specifically waived.

(d) This agreement shall not become binding upon Products by reason of the acceptance, use, or negotiation of any currency, check, draft, or other instrument for the payment of money.

21. *Assignment.*—This agreement shall not be assigned by Licensee without the written consent of Products. It shall, however, subject to such restriction upon assignment by Licensee, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be construed according to the laws of the State of New York.

22. *Payments.*—In accordance with the provisions of Section 5 hereof, Licensee agrees to pay to Products the charges provided for in the payment plan hereinafter set forth; said payments to be made at the time and in the manner provided herein, which time and manner shall be of the essence of this agreement.

(1) The sum of _____ ($_____) Dollars, due and payable upon submission of this agreement for acceptance.

(2) A demand promissory note for the sum of _____ ($_____) Dollars, in form satisfactory to Products made by Licensee and delivered to Products upon the submission of this agreement for acceptance, which note shall bear no interest prior to the date of presentation. Products agrees not to present said note for payment prior to the day upon which the Equipment is first used by Licensee or the day which Products certifies to Licensee as the date upon which the Equipment was made available for use, whichever date is the earlier; provided, however, that Products may present said note at any time after thirty (30) days following the date of shipment.

(3) In addition to the foregoing charges Licensee agrees to pay to Products throughout the term of this license, as fixed by the provisions of Section 18 hereof, a rental charge of Fifty ($50.00) Dollars per month, the first monthly payment thereof to be made upon the date of commencement of the term of this license, and thereafter through the balance of said term, monthly in advance.

Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 19__, by and between Electrical Research Products, Inc., (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____, (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of _____ _____, State of _____, (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1.(a) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound System of the type set forth in Item Three of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse, consigned to the Exhibitor and Products will endeavor to ship the Equipment on or before the date set forth in Item Four of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. *Installation and Use of Equipment.*—2. (a) The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All installation work done by the Exhibitor or its agent or servants shall be subject to inspection and approval by Products and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor shall provide and pay for all services, material, and expenses, except as herein otherwise specifically provided, required in connection with the installation of the Equipment.

Products shall provide an engineer to inspect said installation work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Theatre is ready for the installation of the Equipment and that the equipment has been received shall be delivered to Products not less than three (3) days prior to the date when the Theatre will be ready for such installation, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer will be furnished without additional cost to the Exhibitor for such period as Products shall deem requisite, not to exceed one week. If the installation work to be done by the Exhibitor is not ready for inspection or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, and/or in the event that his services shall be required for a period in excess of one week, the Exhibitor shall pay to Products its standard per diem charges for any period in excess of said one week and any additional expense incurred by Products by reason of said services being required for more than one week.

Digitized by Google

(b) The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre and shall make provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided such successor operator is satisfactory to Products. If the notice hereinabove required shall have been given to Products, Products will supervise the removal of the Equipment and its installation in another theatre designated by the Exhibitor; provided, however, that Products' standard charge as from time to time established for removal of the Equipment shall first be paid by the Exhibitor, and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. The Exhibitor also agrees to pay to Products upon rendition of invoice therefor its standard per diem charges for engineering or other services in connection with such removal and reinstallation, including the transportation charges of all employees of Products furnished in connection therewith. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement. The exhibitor operating the theatre to which the Equipment may be removed shall at its own expense perform all of the work set forth in Section 2 (a) hereof required for the installation of the Equipment in said theatre.

4. *Instruction and Inspection Service.*—At the time of installation Products agrees, to the extent deemed necessary by it, and for a period, not exceeding

Digitized by Google

one (1) week, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. Products also agrees to make periodical inspection of the Equipment after it shall have been installed.

5. *Products' Charges.*—The Exhibitor agrees to pay to Products the sums set forth in Items One and Two of Section 23 hereof; said payments to be made at the time and in the manner provided therein, which time and manner shall be of the essence of this agreement. The payments above mentioned cover the furnishing of Equipment, an initial set of spare parts in accordance with Products' standard list thereof and Products' service, inspection, and rental charges. After the time limited for the completion of said payments and for the balance of the term of this license the Exhibitor agrees to pay to Products a weekly charge covering service, inspection, and rental, which shall be payable on each and every Saturday commencing with the Saturday next succeeding the time limited for the completion of the payments first mentioned in this Section 5, which charge shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule the amount of such charge shall be in accordance with the sums set forth in Item Five of Section 23 and such charge to the Exhibitor shall not be increased during the term of this agreement. The time of such payments shall be of the essence of this agreement.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—Products may from time to time at the expense of the Exhibitor, supply and install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment. The Exhibitor agrees to pay to Products its standard installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, other than the regular periodical inspection service hereinbefore provided for. The time of the payments herein shall be of the essence of this agreement.

8. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; a screen, satisfactory to Products as to its acoustic properties, drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products, and the Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all local laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment installed in the Theatre in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to, any equipment furnished hereunder, and the Exhibitor

Digitized by Google

will reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre and all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

12. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Licensee hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Licensee with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the License or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the assignment of any of the Licensee's assets for the benefit of creditors or upon the application for the appointment of a receiver of the property and assets of the Licensee.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the rights granted and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended, provided however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter the said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any

Digitized by Google

and all claims for damages by any parties whatsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. If replacing equipment be provided by Products in the manner hereinabove indicated the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Paragraph 2 (a) hereof.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipments or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor that the Equipment is available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder shall begin not later than thirty (30) days after the date of shipment. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate.

19. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contain the entire understanding of the respective

Digitized by Google

parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or of any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

20. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be impracticable to prove and difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event that the Exhibitor makes any default under the terms of this agreement, Products shall retain all sums theretofore paid to it by the Exhibitor and the Exhibitor shall pay to Products, not as a penalty but as agreed and/or liquidated damages, the note mentioned in subdivision B of Item One of Section 23 hereof, if unpaid, and all sums accruing to Products hereunder up to the date Products renders the Equipment inoperative, and in addition thereto twenty (20%) percent of all sums set forth in subdivisions A or B of Item Two thereof, whichever is applicable, accruing thereafter, and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of said Item Two of Section 23 shall, to the extent necessary to enable Products to collect said twenty (20%) percent of the aforementioned unpaid balance, become immediately due and payable.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and whether or not it elects to or does repossess the said Equipment, or any part thereof, under the terms of Section 14.

21. Except as otherwise expressly provided in this agreement, any and all sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like installations or on account of any change in the type, character or quantity of equipment which Products may hereafter offer for installation in any theatre, nor for any other reason.

22. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be construed according to the laws of the State of New York.

23. *Item One.*

A. The sum of _____ ($_____) Dollars, due and payable upon submission of this agreement for acceptance.

B. A demand promissory note for the sum of _____ ($_____) Dollars, in form satisfactory to Products made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, which note shall bear no interest prior to the date of presentation. Products agrees not to present said note for payment prior to the day upon which the Equipment is first used for public performance or the day which Products certifies to the Exhibitor as being the day upon which the Equipment is available for public performance, whichever date is the earlier, provided, however, that Products may present said note at any time after thirty (30) days following the date of shipment.

Item Two. (A or B—strike out whichever is inapplicable.)

A. A series of _____ promissory notes, each in the principal amount of _____($_____) Dollars in form satisfactory to Products, made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, the first of said notes maturing one month after the day upon which the Equipment is first used for public performance or the day which Products certifies to the Exhibitor as being the day upon which the Equipment is available for public performance, whichever date is earlier, but in no event later than thirty (30) days after the date of shipment, and the remaining notes at monthly intervals thereafter, and bearing

Digitized by Google

interest at the rate of six (6%) percent per annum from and after one month prior to the maturity date of said first note.

B. A promissory note in form satisfactory to Products, made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, and payable as follows:

The sum of _____ ($_____) Dollars, on the Saturday next succeeding the day upon which the Equipment is first used for public performance or the day which Products certifies to the Exhibitor as being the day upon which the Equipment is available for public performance, whichever date is the earlier and in no event later than thirty (30) days after the date of shipment and a like amount on each and every Saturday thereafter for a period of twenty-five (25) weeks; the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of twenty-six (26) weeks; the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of fifty-two (52) weeks; and the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of fifty-two (52) weeks.

The Exhibitor hereby expressly authorizes Products to enter upon the face of the note or notes delivered as herein provided, the maturity date of the first payment thereunder as above defined.

Item Three.—Description of Equipment:

Item Four.—The proposed date of shipment is_____, 19__.

Item Five.—Present schedule of service, inspection, and rental charge, pursuant to Section 5 is as follows:

The sum of _____ ($_____) Dollars per week for the first twenty-six (26) weeks of the term of this agreement;

The sum of _____ ($_____) Dollars per week for the second twenty-six (26) weeks of said term; and,

The sum of _____ ($_____) Dollars per week for the balance of said term.

In witness where of, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

ELECTRICAL RESEARCH PRODUCTS, INC.,

303 TS—N. D. P.
Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 19____, by and between Electrical Research Products Inc., (subsidiary of Western Electric Company, Incorporated), a Delaware Coporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____ _____ State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ _____ Avenue/Street, in the City of _____ State of _____ _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

---

1. (a) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound System of the type set forth in Item Three of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor, subject to all the terms, conditions, limitations, and agreements herein contained, a non-exclusive, non-assignable license to use the Equipment in the Theatre for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any

Digitized by Google

performance given in conjunction therewith, and to employ to the extent necessarily involved in such use of said equipment the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse, consigned to the Exhibitor and Products will endeavor to ship the Equipment on or before the date set forth in Item Four of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. *Installation and Use of Equipment.*—(a) The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All installation work done by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products, and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work shall in no event subject Products to any responsibility or liability of any kind or nature, not specifically assumed by it in this agreement. The Exhibitor shall provide and pay for all services, material, and expenses, except as herein otherwise specifically provided, required in connection with the installation of the Equipment.

Products shall provide an engineer to inspect said installation work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Theatre is ready for the installation of the Equipment and that the Equipment has been received shall be delivered to Products not less than three (3) days prior to the date when the Theatre will be ready for such installation, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer will be furnished without additional cost to the Exhibitor for such period as Products shall deem requisite, not to exceed one week. If the installation work to be done by the Exhibitor is not ready for inspection or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, and/or in the event that his services shall be required for a period in excess of one week, the Exhibitor shall pay to Products its standard per diem charges for any period in excess of said one week and any additional expense incurred by Products by reason of said services being required for more than one week.

(b) The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent

Digitized by Google

hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre, and shall make provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided such successor operator is satisfactory to Products. If the notice hereinabove required shall have been given to Products, Products will supervise the removal of the Equipment, and its installation in another theatre designated by the Exhibitor; provided, however, that Products' standard charge as from time to time established for removal of the Equipment shall first be paid by the Exhibitor, and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. The Exhibitor also agrees to pay to Products upon rendition of invoice therefor its standard per diem charges for engineering or other services in connection with such removal and reinstallation, including the transportation charges of all employees of Products furnished in connection therewith. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement. The exhibitor operating the theatre to which the Equipment may be removed shall at its own expense perform all of the work set forth in Section 2 (a) hereof required for the installation of the Equipment in said theatre.

4. *Instruction and Inspection Service.*—At the time of installation Products agrees, to the extent deemed necessary by it, and for a period not exceeding (1) week, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. Products also agrees to make periodical inspection of the Equipment after it shall have been installed.

5. *Products' Charges.*—During the first three (3) years of the term of this license the Exhibitor agrees to pay to Products the sums set forth in Items One and Two of Section 23 hereof; said payments to be made at the time and in the manner provided therein, which time and manner shall be of the essence of this agreement. The payments above mentioned cover the furnishing of Equipment, an initial set of spare parts in accordance with Products' standard list thereof, and Products' service, inspection, and rental charges. Thereafter and for the balance of the term of this license the Exhibitor agrees to pay to Products a weekly charge covering service, inspection, and rental, which shall be payable on each and every Saturday commencing with the Saturday next succeeding the expiration of the first three (3) years of the term of said license, which charge shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule the amount of such charge shall be the sum set forth in Item Five of Section 23, and such weekly charge to the Exhibitor shall not be increased during the term of this agreement. The time of such payments shall be of the essence of this agreement.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

Digitized by Google

7. *Payment for Additional Parts, Special Service, etc.*—Products may from time to time, at the expense of the Exhibitor, supply and install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment. The Exhibitor agrees to pay Products its standard installation charges as from time to time established for any additional equipment or spare or renewal parts furnished or supplied by Products, upon delivery thereof, and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and any expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, other than the regular periodical inspection service hereinbefore provided for. The time of the payments herein shall be of the essence of this agreement.

8. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; a screen satisfactory to Products as to its acoustic properties; drapes for acoustic purposes; and suitable support for horns; and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor, and when and to the extent and in the manner prescribed by Products, and the Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all local laws and ordinances in effect from the date hereof and throughout the terms of this license relating to installation, maintenance, use, and operation of the Equipment, or any part thereof, and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder, and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment installed in the Theatre in accordance with the terms of this agreement shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal-property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder, and the Exhibitor will reimburse Products for any such taxes which Products may be required to pay.

11. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

12. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Licensee hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Licensee with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Licensee or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the assignment of any of the Licensee's assets for the benefit of creditors or upon the application for the appointment of a receiver of the property and assets of the Licensee.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate

Digitized by Google

this agreement and/or the rights granted and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended, provided, however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescene due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever, possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and/ such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whtsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. If replacing equipment be provided by Products in the manner hereinabove indicated the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Paragarph 2 (a) hereof.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information, and all reasonable cooperation

Digitized by Google

in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor that the Equipment is available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder shall begin not later than thirty (30) days after the date of shipment. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate.

19. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

20. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be impracticable to prove and difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event that the Exhibitor makes any default under the terms of this agreement, the Exhibitor shall pay to Products, not as a penalty, but as agreed and/or liquidated damages all sums accruing to Products hereunder up to the date when Products renders the Equipment inoperative, and in addition thereto twenty (20%) per cent of all sums set forth in Item 2 of Section 23 accruing thereafter, and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of said Item Two of Section 23 shall, to the extent necessary to enable Products to collect said twenty (20%) per cent of the aforementioned unpaid balance, become immediately due and payable, and Products shall retain all sums theretofore paid to it by the Exhibitor.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and whether or not it elects to or does repossess the said Equipment, or any part thereof, under the terms of Section 14.

21. Except as otherwise expressly provided in this agreement, any and all sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like

Digitized by Google

installations or on account of any change in the type, character or quantity of equipment which Products may hereafter offer for installation in any theatre, nor for any other reason.

22. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restrictions upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives, and shall be construed according to the laws of the State of New York.

23. *Item One.*—The sum of _____ ($_____) Dollars, representing the first weekly payment hereunder, the receipt of which is hereby acknowledged.

Item Two.—A promissory note in form satisfactory to Products, made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, and payable as follows:

The sum of _____($_____) Dollars, on the Saturday next succeeding the day upon which the Equipment is first used for public performance or the day which Products certifies to the Exhibitor as being the day upon which the Equipment is available for public performance, whichever date is the earlier and in no event later than thirty (30) days after the date of shipment, and a like amount on each and every Saturday thereafter for a period of twenty-four (24) weeks; the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of twenty-six (26) weeks; the sum of _____($_____) Dollars on each and every Saturday thereafter for a period of fifty-two (52) weeks; and the sum of _____ ($_____) Dollars on each and every Saturday thereafter for a period of fifty-two (52) weeks.

The Exhibitor hereby expressly authorizes Products to enter upon the face of the note referred to herein, the maturity date of the first payment thereunder as above defined.

Item Three.—Description of Equipment:—

Item Four.—The proposed date of shipment is _____, 19____.

Item Five.—Present schedule of service, inspection, and rental charge for the term of the license hereof after the first three (3) years, pursuant to Section 5 is the sum of _____ ($_____) Dollars per week.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

Contract No._____

This agreement made in triplicate in the City of New York, State of New York, this_____day of_____, 19__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation, having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and_____, a_____Corporation having its principal place of business at No._____Avenue/Street, in the City of_____State of_____(hereinafter called the "Exhibitor"), licensee, and operating the_____Theatre, at No._____Avenue/Street, in the City of_____ State of_____(hereinafter called the "Theatre"):

Witnesseth, that for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Furnishing of Equipment.*—Products hereby agrees to furnish a Western Electric Sound System of the type set forth in

Digitized by Google

Item Three of Section 23 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor a nonexclusive non-assignable license to use (subject to all the terms, conditions, limitations, and agreements herein contained) the Equipment in the Theatre for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Shipment of Equipment.*—Said Equipment shall be furnished f. o. b. Products' warehouse, consigned to the Exhibitor and Products will endeavor to ship the Equipment on or before the date set forth in Item Four of Section 23 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to ship the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure expeditiously the manufacture and shipment of the Equipment.

2. *Installation and Use of Equipment.*—(*a*) The Equipment shall be installed by the Exhibitor at its own expense in strict accordance with installation specifications which will be furnished by Products. All installation work done by the Exhibitor or its agents or servants shall be subject to inspection and approval by Products and the Equipment shall not be used for public performances until the installation thereof shall have been approved by Products. Approval of installation work shall in no event subject Products to any responsibility or liability of any kind or nature not specifically assumed by it in this agreement. The Exhibitor shall provide and pay for all labor, material, and expenses, except as herein otherwise specifically provided, required in connection with the installation of the Equipment, and will also provide and pay for the services of one or more projectionists during the installation period, or any part thereof, if the services of projectionists shall be required by Products.

Products shall provide an engineer to inspect said installation work to be done by the Exhibitor and to supervise the installation of the Equipment. Notice from the Exhibitor that the Theatre is ready for the installation of the Equipment shall be delivered to Products not less than three (3) days prior to the date when the Theatre will be ready for such installation, and Products shall make every reasonable effort to have its engineer at the Theatre on said date. The services of said engineer will be furnished without additional cost to the Exhibitor for such period as Products shall deem requisite, not to exceed one week. If the installation work to be done by the Exhibitor is not ready for inspection or said work is not sufficiently advanced to permit the installation of the Equipment upon the date that the engineer shall arrive at the Theatre, and/or in the event that his services shall be required for a period in excess of one week, the Exhibitor shall pay to Products its standard per diem charges for any period in excess of said one week and any additional expense incurred by Products by reason of said services being required for more than one week.

(*b*) The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the invention and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound rec-

Digitized by Google

ord not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such film and/or sound record to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory function of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre and shall make provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided such successor operator is satisfactory to Products. If the notice hereinabove required shall have been given to Products, Products will supervise the removal of the Equipment and its installation in another theatre designated by the Exhibitor; provided, however, that Products' standard charge as from time to time established for removal of the Equipment shall first be paid by the Exhibitor, and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. The Exhibitor also agrees to pay to Products upon rendition of invoice therefor its standard per diem charges for engineering or other services in connection with such removal and reinstallation, including the transportation charges of all employees of Products furnished in connection therewith. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement. The exhibitor operating the theatre to which the Equipment may be removed shall at its own expense perform all of the work set forth in Section 2 (*a*) hereof required for the installation of the Equipment in said theatre.

4. *Instruction and Inspection Service.*—At the time of installation Products agrees, to the extent deemed necessary by it, and for a period, not exceeding one (1) week, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. Products also agrees to make periodical inspection of the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Products' Charges.*—During the first three (3) years of the term of this license, the Exhibitor agrees to pay to Products the sums set forth in Items One and Two of Section 23 hereof; said payments to be made at the time and in the manner provided therein, which time and manner shall be of the essence of this agreement. The payments above mentioned cover the furnishing of Equipment, an initial set of such spare parts therefor as shall be deemed necessary by Products and Products' service, inspection, and rental charges. Thereafter and for the balance of the term of this license the Exhibitor agrees to pay to Products a weekly charge covering service, inspection, and rental, which shall be payable on each and every Saturday commencing with the Saturday next succeeding the expiration of the first three (3) years of the term of said

Digitized by Google

license, which charge shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule the amount of such charge shall be the sum set forth in Item Five of Section 23 and such weekly charge to the Exhibitor shall not be increased during the term of this agreement. The time of such payments shall be of the essence of this agreement.

6. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

7. *Payment for Additional Parts, Special Service, etc.*—The Exhibitor agrees to pay to Products its standard installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, other than the regular periodical inspection service hereinbefore provided for. The time of the payments herein shall be of the essence of this agreement.

8. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products, and the Exhibitor further agrees at its own expense to obtain all necessary permits and to comply with all local laws and ordinances in effect from the date hereof and throughout the term of this license relating to the installation, maintenance, use, and operation of the Equipment or any part thereof and with any Fire Insurance Underwriters' requirements relating thereto.

9. *Title to Equipment.*—Title to and ownership of all equipment, including spare or renewal parts, at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all equipment installed in the Theatre in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

10. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with or which may apply to any equipment furnished hereunder.

11. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre and to all parts thereof where any of the Equipment may be, at all reasonable hours, for the purpose of supervising the installation and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

12. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen. The Exhibitor agrees to use every reasonable effort to prevent the filing of any liens for material or for work, labor, or services which might in any manner affect equipment furnished hereunder and further covenants that if any such liens be filed it will promptly discharge the same.

13. *Default.*—This agreement and/or the rights of the Licensee hereunder and/or the license hereby granted shall, at the option of Products, terminate

Digitized by Google

and come to an end in the event of any breach or default on the part of the Licensee with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Licensee or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the assignment of any of the Licensee's assets for the benefit of creditors or upon the application for the appointment of a receiver of the property and assets of the Licensee.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the rights granted and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended, provided however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

14. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to coperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 13 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whatsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurrence of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

15. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if, in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, furnish to the Exhibitor equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed. If replacing equipment be provided by Products in the manner hereinabove indicated the obligations of Products and the Exhibitor respecting the installation thereof shall be as set forth in Paragraph 2 (*a*) hereof.

16. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may,

Digitized by Google

during the term hereof be brought against the Exhibitor for infringement of patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Produts will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith, and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

17. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

18. *Period of License.*—This license shall be for a term of ten (10) years from the day upon which the Equipment is first used for a public performance, or from the day which Products shall certify to the Exhibitor that the Equipment is available for public performance, whichever date be the earlier; provided, however, that the term hereof and the payments to Products hereunder shall begin not later than thirty (30) days after the date of shipment. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate.

19. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

20. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be impracticable to prove and difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event that the Exhibitor makes any default under the terms of this agreement, the Exhibitor shall pay to Products, not as a penalty, but as agreed and/or liquidated damages all sums accruing to Products hereunder up to the date when Products renders the Equipment inoperative, and in addition thereto twenty (20%) per cent of all sums set forth in Item 2 of Section 23 accruing thereafter, and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of said Item Two of Section 23 shall, to the extent necessary to enable Products to collect said twenty (20%) per cent

Digitized by Google

of the aforementioned unpaid balance, become immediately due and payable, and Products shall retain all sums theretofore paid to it by the Exhibitor.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and whether or not it elects to or does repossess the said Equipment, or any part thereof, under the terms of Section 14.

21. Except as otherwise expressly provided in this agreement, any and all sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like installations or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer for installation in any theatre, nor for any other reason.

22. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be construed according to the laws of the State of New York.

23. *Item One.*—The sum of_____($_____) Dollars, representing the first weekly payment hereunder, the receipt of which is hereby acknowledged.

Item Two.—A promissory note in form satisfactory to Products, made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, and payable as follows:

The sum of_____($_____) Dollars, on the Saturday next succeeding the day upon which the Equipment is first used for public performance or the day upon which Products certifies to the Exhibitor that the Equipment is available for public performance, whichever date is the earlier and in no event later than thirty (30) days after the date of shipment, and a like amount on each and every Saturday thereafter for a period of twenty-four (24) weeks; the sum of_____($_____) Dollars on each and every Saturday thereafter for a period of twenty-six (26) weeks; the sum of_____($_____) Dollars on each and every Saturday thereafter for a period of fifty-two (52) weeks; and the sum of_____($_____) Dollars on each and every Saturday thereafter for a period of fifty-two (52) weeks.

The Exhibitor hereby expressly authorizes Products to enter upon the face of the note referred to herein, the maturity date of the first payment thereunder as above defined.

Item Three.—Description of Equipment:—

Item Four.—The proposed date of shipment is _____, 19__.

Item Five.—Present schedule of service, inspection, and rental charge for the term of the license hereof after the first three (3) years, pursuant to Section 5, is the sum of _____ ($_____) Dollars per week.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

PROPOSAL FOR INSTALLATION OF WESTERN ELECTRIC SOUND SYSTEM

Whereas Electrical Research Products, Inc. (a subsidiary of Western Electric Company, Incorporated), a Delaware corporation, having its principal place of business in the City, County, and State of New York (hereinafter called "Products") is engaged in the business of leasing and installing in theatres, Western Electric Sound System (hereinafter called the "Equipment"); and,

Digitized by Google

Whereas _____, a _____ corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor") and operating the _____ Theatre at No. _____ Street in the City of _____, State of _____ (hereinafter called the "Theatre") is desirous of installing in said Theatre a Western Electric Sound System; and

Whereas the Exhibitor proposes to make arrangements with Exhibitor's Reliance Corporation (hereinafter called "Reliance"), whereby Reliance will extend its credit facilities to the Exhibitor for the purpose of enabling the Exhibitor to have installed a Western Electric Sound System;

Now, therefore, the Exhibitor proposes to enter into an agreement with Products in the manner and form hereinafter fully set forth covering the installation in the Theatre of said Equipment, and in consideration therefor, Products agrees to make a survey of the Theatre, to the extent deemed necessary by Products, for the purpose of determining the type and character of equipment suitable for proper reproduction of sound in the Theatre.

It is understood and agreed between the Exhibitor and Products that this proposal is submitted for the consideration of Products and that Products may, at its sole option within a period of thirty (30) days from the date hereof, either accept or reject the same and that within such period, the Exhibitor may not withdraw or cancel this proposal but in the event of rejection thereof by Products, Products shall be under no obligation to assign any reason for such rejection. In the event of Products declining to accept this proposal, the initial charge paid by the Exhibitor to Products upon the execution of this proposal shall be promptly refunded to the Exhibitor but without interest; however, it is understood and agreed that Products, in making a survey of the Theatre and in preparing otherwise to install the Equipment and grant the Exhibitor a license to use the same, will incur various expenses, and in the event of the failure or refusal of the Exhibitor, prior to the acceptance of this proposal by Products, to carry out the terms hereof, it is hereby agreed that Products shall retain as reimbursement for such expenses so much of the amount referred to in Item One of Section 22 hereinafter set forth as shall constitute such reimbursement. It is further understood and agreed that the banking, negotiation, or other use by Products of any cash, check, draft, or other negotiable instrument delivered to Products in payment of the initial charges, shall in no event be construed to constitute an acceptance of this proposal by Products.

The agreement between Products and the Exhibitor relating to the installation of said Equipment in said Theatre, shall, upon acceptance of this proposal by Products, as hereinafter provided, be as follows:

1. *Grant of License and Installation of Equipment.*—(a) Products, in consideration of the mutual agreements herein contained and of the payment by the Exhibitor to Products of the sums referred to at the time and in the manner prescribed in Section 22 hereof, and of the procuring by the Exhibitor of an agreement between Reliance and Products, wherein Reliance shall agree to pay to Products on the day on which the Equipment is made available for public exhibition in the Theatre (hereinafter referred to as the "Service Day"), the balance of Products' standard installation charge in effect on the date of the above proposal for the Equipment set forth in Item Three of Section 22, hereby agrees to install a Western Electric Sound System of the type set forth herein and hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) Products agrees to install the Equipment as specified in Item Three of Section 22 hereof and will endeavor to complete such installation on or before the Service Day set forth in Item Four of Section 22 hereof. Nothing herein

Digitized by Google

contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the Service Day, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound records (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained only from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to Another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees, to the extent deemed necessary by it, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and, in order to perfect such instruction, and also in order to superintend the initial operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours and for such period, not exceeding one (1) week, as it may deem necessary, an engineer or other person skilled in such operation. Products also agrees to make periodical inspection of the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Service, Inspection, and Rental Charge.*—In addition to all other payments herein required to be made, the Exhibitor also agrees to pay to Products

Digitized by Google

throughout the term of the license hereby granted, a service, inspection, and rental charge, payable weekly, the first payment thereof to be due and payable on the Saturday next succeeding the Service Day, and thereafter throughout the balance of the term on each and every Saturday. The amount of such charge shall be in accordance with Products' regular schedule of such charges as from time to time established.

6. *Present Schedule.*—Under Products' present schedule, the amount of the weekly charge referred to in Section 5 hereof shall be the sums set forth in Item Five of Section 22 hereof and such weekly charge to the Exhibitor shall not be increased during the term of this agreement.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for parts, etc.*—The Exhibitor agrees to pay to Products its standard installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery theerof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all Equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all Equipment installed in the Theatre in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and/or the rights of the Exhibitor hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(a) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors, or in the event of the appointment of a Receiver of the property and asse'ts of the Exhibitor.

Digitized by Google

(b) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note hereinabove provided for when presented for payment.

(c) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(d) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after mailing notice thereof to the Exhibitor by Products by registered United States mail.

(e) Upon the removal of the Equipment or any part thereof, without the consent of Products from the location and position in which it was installed by Products.

(f) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the term of this license, the license hereby granted and all obligations imposed upon Products by virtue of this agreement shall, at the option of Products and whether or not it removes the Equipment as hereinafter provided, be suspended during the continuance of such default.

15. *Repossession of Equipment.*—(a) Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same of its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal. In the event of termination or expiration of this license by lapse of time, the happening of any event of default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

(b) The Exhibitor agrees that if in accordance with the terms of the agreement between the Exhibitor and Reliance, Reliance shall take action to gain possession of the Equipment installed in the Theatre, the possession thereof may be accomplished by persons whose services are supplied to Reliance by Products. In such event any such person or persons shall be deemed to be solely the agent or employee of Reliance and the Exhibitor agrees to make no claim or claims of any nature whatsoever, legal or otherwise, against Products by reason of any act or thing done by any person or persons who shall thus be engaged in work for and on behalf of Reliance, and the Exhibitor further agrees to hold Products harmless from any claim, cost, damage, or expense arising

Digitized by Google

from the performance of any work or of any act by any such person or persons thus acting on behalf of Reliance.

(c) It is agreed that the obligations herein assumed by Products shall cease and terminate in the event that Reliance shall take any action with respect to removal of the Equipment from the Theatre, in accordance with the terms of its agreement with the Exhibitor but such removal of said Equipment by Reliance shall not affect any rights of Products to enforce its rights against the Exhibitor with respect to any sum or sums which may then be owing to Products.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that, subject to the provisions hereof, it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information, and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non Exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten (10) years from the Service Day. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice-President of Products or by such representative as may from time to time be designated in writing by either of such officers. No

Digitized by Google

waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products; provided, however, that the Exhibitor may assign to Reliance all rights to the license herein granted to it to possess and use the Equipment, but such assignment by the Exhibitor shall not be valid until Products shall have given its consent thereto in writing, which consent shall be forwarded to Reliance by Products, and such consent shall be deemed to have been given upon the acceptance of this proposal by Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be construed according to the laws of the State of New York.

22. *Item One.*—The sum of _____ ($_____) Dollars shall be due and payable upon the submission of the proposal.

Item Two.—A demand promissory note for the sum of _____ ($_____) Dollars shall be executed by the Exhibitor and delivered to Products upon the submission of the proposal. Such note shall be in form satisfactory to Products and shall bear no interest prior to the date of presentation. Such note shall not be presented by Products for payment prior to the Service Day.

Item Three.—Description of Equipment:

Item Four.—The Service Day upon which Products expects to have the Equipment available for public exhibition is _____, 19__.

Item Five.—Present schedule of service, inspection, and rental charge, pursuant to Section 6: The sum of _____ ($_____) Dollars per week for the first twenty-six (26) weeks of the term of this agreement; the sum of _____ ($_____) Dollars per week for the second twenty-six (26) weeks of said term; and the sum of _____ ($_____) Dollars per week for the balance of said term.

This agreement shall become binding upon Products upon its acceptance thereof at its office in New York City, New York.

294 T S—N. D. P.
Contract No_____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 19__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of_____ _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby agrees to install a Western Electric Sound System of the type set forth in Item Three of Section 22 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the

Digitized by Google

Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the Equipment for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Service Day.*—Products will endeavor to make the Equipment available for use in the Theatre on or before the date set forth in Item Four of Section 22 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which the Equipment is made available for use in the Theatre is hereinafter referred to as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre and shall make provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided

Digitized by Google

such successor operator is satisfactory to Products. If the notice hereinabove required shall have been given to Products, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor; provided however, that Products' standard charges as from time to time established for such removal and installation shall first be paid by the Exhibitor and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement.

4. *Instruction and Inspection Service.*—Products agrees, to the extent deemed necessary by it, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment for a period, not exceeding one (1) week, immediately following the Service Day. Products also agrees to make periodical inspection of the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange the sums set forth in Items One and Two of Section 22 hereof at the time and in the manner provided therein (which time and manner shall be of the essence of this agreement).

6. *Service, Inspection, and Rental Charge.*—In addition to all other payments herein required to be made, the Exhibitor also agrees to pay to Products throughout the term of the license hereby granted, a service, inspection, and rental charge which, for the first three (3) years of the term of the license hereby granted is included in the sums set forth in Items One and Two of Section 22 hereof. Thereafter and for the balance of said term, said weekly charge, which shall be payable on each and every Saturday commencing with the Saturday next succeeding the expiration of the first three (3) years of the term of said license, shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule, the amount of such charge shall be the sum set forth in Item Five of Section 22 hereof and such weekly charge to the Exhibitor shall not be increased during the term of this agreement. The time of such payment shall be of the essence of this agreement.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, Special Service, etc.*—The Exhibitor agrees to pay to Products its standard installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, except for the regular periodical inspection service hereinbefore provided for. The time of the payments herein shall be of the essence of this agreement.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products, and agrees to comply with all local laws and ordinances relating to the

Digitized by Google

use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all Equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all Equipment installed in the Theatre in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal-property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Default.*—This agreement and/or the rights of the Licensee hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Licensee with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Licensee or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the assignment of any of the Licensee's assets for the benefit of creditors or upon the application for the appointment of a receiver of the property and assets of the Licensee.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the rights granted and/or the license hereby granted, the rights and/or the license hereby granted shall thereupon be suspended, provided however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 14 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises

Digitized by Google

and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whatsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurance of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products argees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten (10) years from the Service Day. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate.

20–A. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is

Digitized by Google

no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

20–B. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be impracticable to prove and difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event that the Exhibitor makes any default under the terms of this agreement, the Exhibitor shall pay to Products, not as a penalty, but as agreed and/or liquidated damages, twenty percent (20%) of the existing unpaid balance of the total amount required to be paid in accordance with Item Two of Section 22, which would otherwise become due and payable after the date of said default and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of said Item Two of Section 22 shall, to the extent necessary to enable Products to collect said twenty percent (20%) of the aforementioned unpaid balance, become immediately due and payable, and Products shall retain all sums theretofore paid to it by the Exhibitor.

The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and whether or not it elects to or does repossess the said Equipment, or any part thereof, under the terms of Section 15.

20–C. Except as otherwise expressly provided in this agreement, any and all sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like installations or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer for installation in any theatre, nor for any other reason.

21. *Not assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives, and shall be construed according to the laws of the State of New York.

22. *Item One.*—The sum of _____ Dollars ($_____), representing the first weekly payment hereunder, the receipt of which is hereby acknowledged.

Item Two.—A promissory note in form satisfactory to Products, made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, and payable as follows:

The sum of _____ Dollars ($_____) on the Saturday next succeeding the Service Day, and a like amount on each and every Saturday thereafter for a period of twenty-four (24) weeks; the sum of _____ Dollars ($_____) on each and every Saturday thereafter for a period of twenty-six (26) weeks; the sum of _____ Dollars ($_____), on each and every Saturady thereafter for a period of fifty-two (52) weeks; and the sum of _____ Dollars ($_____) on each and every Saturday thereafter for a period of fifty-two (52) weeks, which payments include the regular service, inspection, and rental charge, referred to in Section 6 hereof, for the first three (3) years of the term of the license.

The Exhibitor hereby expressly authorizes Products to enter upon the face of the note referred to herein the maturity date of the first payment thereunder, when the Service Day has been determined by Products.

Item Three.—Description of Equipment:

_____

Item Four.—The Service Day is expected to be _____, 19__.

Item Five.—Present schedule of service, inspection, and rental charge for the term of the license hereof after the first three (3) years, pursuant to Section 6, is the sum of _____ Dollars ($_____) per week.

Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 19__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Avenue/Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby agrees to install a Western Electric Sound System of the type set forth in Item Three of Section 22 (hereinafter called the "Equipment"), and hereby grants to the Exhibitor a non-exclusive, non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained), the Equipment for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Sevice Day.*—Products will endeavor to make the Equipment available for use in the Theatre on or before the date set forth in Item Four of Section 22 hereof. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which the Equipment is made available for use in the Theatre is hereinafter referred to as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights.

Digitized by Google

Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown, but the Exhibitor agrees that in the event that it shall itself take any action with respect to the correction or repair of the Equipment, it shall immediately notify Products in writing, giving full details of the action taken to correct or remedy any unsatisfactory condition of the Equipment. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Change of Theatre or Management.*—In the event that the Exhibitor shall contemplate a sale of the Theatre or its interest therein, or shall contemplate ceasing to operate the Theatre, it shall notify Products in writing of such contemplated action not less than fourteen (14) days prior to the date upon which it will cease to own or operate the Theatre and shall make provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre, provided such successor operator is satisfactory to Products. If the notice hereinabove required shall have been given to Products, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor; provided however, that Products' standard charges as from time to time established for such removal and installation shall first be paid by the Exhibitor and that a new agreement on Products' then standard form for the unexpired term of this license shall first be executed by the Exhibitor operating such other theatre; and provided further, that such exhibitor and the theatre designated shall be satisfactory to Products. If the exhibitor operating such other theatre is not the Exhibitor hereunder, the latter shall become a guarantor to Products for the performance by the former of such new agreement.

4. *Instruction and Inspection Service.*—Products agrees, to the extent deemed necessary by it, to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment for a period, not exceeding one (1) week, immediately following the Service Day. Products also agrees to make periodical inspection of the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange the sums set forth in Items One and Two of Section 22 hereof at the time and in the manner provided therein (which time and manner shall be of the essence of this agreement).

6. *Service Inspection and Rental Charge.*—In addition to all other payments herein required to be made, the Exhibitor also agrees to pay to Products throughout the term of the license hereby granted, a service, inspection, and rental charge, payable weekly, the first payment thereof to be due and payable on the Saturday next succeeding the Service Day, and thereafter throughout the balance of the term on each and every Saturday. The amount of such charge shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule, the amount

Digitized by Google

of such charge shall be the sums set forth in Item Five of Section 22 hereof and such weekly charge to the Exhibitor shall not be increased during the term of this agreement. The time of such payment shall be of the essence of this agreement.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, Special Service, etc.*—The Exhibitor agrees to pay to Products its standard installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products in connection with the Equipment or its operation or for the benefit of the Exhibitor, except for the regular periodical inspection service hereinbefore provided for. The time of the payments herein shall be of the essence of this agreement.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products, and agrees to comply with all local laws and ordances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all Equipment at any time furnished hereunder and also all tools of all kinds, drawing, prints, and written descriptions and instructions, shall at all times be and remain vested in Products. Any and all Equipment installed in the Theatre in accordance with the terms of this agreement, shall at all times be and remain personal property notwithstanding the manner or method of its attachment to any real property.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption in the operation of the Theatre or of any equipment therein arising from any cause whatsoever or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Default.*—This agreement and/or the rights of the Licensee hereunder and/or the license hereby granted shall, at the option of Products, terminate and come to an end in the event of any breach or default on the part of the Licensee with respect to any of the covenants and conditions herein contained on its part to be performed, or upon the insolvency of the Licensee or upon the filing of a voluntary or involuntary petition in bankruptcy or upon the assignment of any of the Licensee's assets for the benefit of creditors or upon the application for the appointment of a receiver of the property and assets of the Licensee.

In the event of a default under any of the provisions of this agreement at any time during the term of this license, and if Products does not elect to terminate this agreement and/or the rights granted and/or the license hereby

Digitized by Google

granted, the rights and/or the license hereby granted shall thereupon be suspended, provided however, that such suspension shall not operate in any way to void or restrict Products' right of termination on account of such default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any default hereunder to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice and without any legal proceedings whatever to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. In the event of the suspension of the rights and/or license under the provisions of Section 14 hereof, Products shall also have the right in like manner to enter said premises and to render the Equipment inoperative by whatever means may, in the opinion of Products, be necessary or expedient. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any of such events no claim will be made for damage on account of such action or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products and its agents from and against any and all claims for damages by any parties whatsoever on account of such action. In the event of termination or expiration of this license by lapse of time, the occurance of any default, or otherwise, and irrespective of whether Products shall remove and repossess the Equipment in accordance with the provisions contained in this section, Products shall retain and may enforce any and all claims or rights of action against the Exhibitor which it may then possess in respect of any sum or sums then due to Products in accordance with the terms and conditions of this agreement.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by extraneous fire, or act of God, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents relating to the apparatus or equipment furnished by Products hereunder, on account of any use of said apparatus or equipment by the Exhibitor for the purpose and in the manner contemplated by this agreement and Products will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice (with written confirmation) of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement on account of the use of any of said equipment in combination with any apparatus

Digitized by Google

or thing not furnished by Products, except films and records produced under licenses from Products where the alleged infringement resides in characteristics thereof or in methods or apparatus for producing the same specifically prescribed by Products and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall determine to be suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten (10) years from the Service Day. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first three (3) years of the term hereof upon not less than six (6) months' written notice given by the Exhibitor to Products of its intention so to terminate.

20–A. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

20–B. *Liquidated Damages.*—It is recognized by the parties hereto that in the event that the Exhibitor makes default in any of the terms of this agreement it would be impracticable to prove and difficult to determine the exact damage to Products resulting from such default. It is therefore agreed that in the event that the Exhibitor makes any default under the terms of this agreement, Products shall retain, and the Exhibitor shall pay to Products, not as a penalty, but as agreed and/or liquidated damages, the following amounts:

1. If such default occurs prior to the date on which installation shall have begun, Products shall retain the down payment designated in Item One of Section 22 and the demand note referred to in paragraph A, Item Two, Section 22 shall thereupon immediately become due and payable.

2. If such default occurs subsequent to the date on which installation shall have begun, Products shall retain all payments theretofore made to it by the Exhibitor; the demand note designated in paragraph A of Item Two of Section 22, if unpaid, shall thereupon immediately become due and payable; and the Exhibitor shall pay to Products a sum equal to twenty (20%) per cent. of the existing unpaid balance of all sums designated in paragraphs B or C (whichever is applicable) of Item Two of Section 22, which would otherwise become due and payable after the date of said default and any note or notes made by the Exhibitor and delivered to Products in accordance with the provisions of said paragraph B of Item Two of Section 22 shall, to the extent necessary to enable Products to collect said twenty (20%) per cent. of the aforementioned unpaid balance, become immediately due and payable.

The day upon which installation of the Equipment shall have begun is hereby defined to be the day on which Products' installation representative appears at the Theatre for the purpose of beginning said installation or the day upon which Products shall have entered into any commitment with an independent contractor for the performance of any work deemed necessary by Products in connection with such installation, whichever day is the earlier. It is agreed that a

Digitized by Google

duly certified statement from one of Products' officers of either of the above facts shall be accepted for all purposes hereunder as conclusive evidence of the day on which installation shall have begun, as herein defined. The rights of Products contained in this section shall be in addition to all other rights reserved to it under the terms of this agreement and whether or not it elects to or does repossess the said Equipment, or any part thereof, under the terms of Section 15.

20–C. Except as otherwise expressly provided in this agreement, any and all sums to be paid by the Exhibitor are not subject to any reduction on account of any change which hereafter may be made in Products' charges for like installations or on account of any change in the type, character, or quantity of equipment which Products may hereafter offer for installation in any theatre, nor for any other reason.

21. This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives, and shall be construed according to the laws of the State of New York.

22. *Not Assignable.—Item One.*—The sum of _____ ($_____) Dollars, due and payable upon submission of this agreement for acceptance.

Item Two.—A. A demand promissory note for the sum of _____ ($_____) Dollars in form satisfactory to Products, made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, which note shall bear no interest prior to the date of presentation, and in the absence of default by the Exhibitor shall not be presented by Products for payment prior to the Service Day.

(B or C—strike out whichever is inapplicable.)

B. A series of _____ promissory notes, each in the principal amount of _____ ($_____) Dollars in form satisfactory to Products, made by the Exhibitor and delivered to Products upon the submission of this agreement for acceptance, the first of said notes maturing one month after the Service Day and the remaining notes at monthly intervals thereafter, and bearing interest at the rate of six percent (6%) per annum from the Service Day. Products is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the Service Day is determined by Products, the respective maturity dates thereof and the dates from which interest shall run.

C. The sum of _____ ($_____) Dollars weekly throughout a period of _____ weeks of the license herein granted, which sum shall be first due and payable on the Saturday next succeeding the Service Day, and thereafter, throughout the balance of said period, a like amount on each and every Saturday.

Item Three.—Description of Equipment:

_____

Item Four.—The Service Day is expected to be _____, 19__

Item Five.—Present schedule of service, inspection, and rental charge, pursuant to Section 6, is as follows:

The sum of _____ ($_____) Dollars per week for the first twenty-six (26) weeks of the term of this agreement; the sum of _____ ($_____) Dollars per week for the second twenty-six (26) weeks of said term; and the sum of _____ ($_____) Dollars per week for the balance of said term.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

Contract No. ------

This Agreement made in triplicate in the City of New York, State of New York, this -------- day of ---------- 192--, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and ---------- a ---------- Corporation having its principal place of business at No. ---------- Street, in the City of ----------, State of ---------- (hereinafter called the "Exhibitor"), licensee, and operating a motion picture projection room at No. ---------- Street, in the City of ----------, State of ---------- (hereinafter called the "projection room"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Projection Room and for the purpose of testing motion picture film (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound from sound records intended to be reproduced in synchronism with, or as incidental to the projection of motion pictures, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Service Day.*—Products agrees to install in the Projection Room sound reproducing equipment (herein referred to as "Equipment"), as follows:

---

and will endeavor to complete such installation on or before ---------- 192--, which shall be known as the "Tentative Service Day." Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which installation of the Equipment shall be made available to the Exhibitor as ready for use whether prior or subsequent to the "Tentative Service Day", shall be known as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the projection room, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to

Digitized by Google

the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Instruction and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the projection room at such hours as may be necessary an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is made available for use. Products also agrees to make necessary inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

4. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an installation charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the sum of _____ Dollars ($_____) upon the day the Equipment is made available for use.

5. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the projection room and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the projection room, and will directly defray the cost thereof.

6. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, including the inspection and minor adjustment service hereinbefore provided for.

7. *Projection Room Changes.*—The Exhibitor warrants that the projection room is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

8. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions remains vested in Products.

9. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

10. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the projection room at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

Digitized by Google

11. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the projection room or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from, any liability or injury to workers whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

12. This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) *Events of Default.*—Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*d*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*e*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the term of this license the license hereby granted, and all obligations imposed upon Products by virtue of this agreement, shall, at the option of Products, and whether or not it terminates this license or removes the Equipment as hereinafter provided, be suspended during the continuance of such default.

13. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter any premises where said Equipment may be and, without any legal proceedings whatever, possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default hereinbefore enumerated to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right, without notice, to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found, and may enter, with the aid and assistance of any person or persons, the premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

14. *Replacement of Equipment in the Event of Destruction.*—The Exhibitor agrees to advise Products promptly of any injury or damage to the Equipment or to any parts thereof, and will permit Products, at the Exhibitor's expense, to repair any such injury or damage or to replace the Equipment if totally destroyed.

15. *Patent Protection.*—Products agrees that, subject to the provisions hereof, it will at its own expense defend any and all actions and suits which may during

Digitized by Google

the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

16. *Period of License.*—This license shall be for a term of ten years from the day upon which the Equipment is made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

17. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products, or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

18. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives, and shall be construed according to the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

292 T S—12 M
Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Co., Inc.), a Delaware Corporation having its principal place of business in the city, county, and State of New

Digitized by Google

York (hereinafter called "Products", licensor; and a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that for and in consideration of the covenants, stipulations, and representations herein set forth the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a nonexclusive nonassignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with or as incidental to the exhibition of motion pictures or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents relating to said equipment or to such use thereof which are now owned or controlled or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Service Day.*—Products agrees to install in the Theatre sound-reproducing equipment (herein referred to as "Equipment"), as follows:

_____

and will endeavor to complete such installation on or before _____ 19__, which shall be known as the "Tentative Service Day." Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which installation of the Equipment shall be completed and the Equipment made available to the Exhibitor as ready for public exhibition, whether prior or subsequent to the "Tentative Service Day", shall be known as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph,

Digitized by Google

and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the sum of _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the "Service Day", and the balance by a Series of _____ (___) promissory notes, each in the principal amount of _____ Dollars ($_____) satisfactory to Products made by the Exhibitor and delivered to Products on or before the execution of this instrument, the first of said notes maturing one month after the "Service Day" and the remaining notes at monthly intervals thereafter, and all bearing interest at the rate of 6% per annum from the "Service Day." Products is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined by it the respective maturity dates thereof and the date from which interest shall run. Upon the failure of the Exhibitor to pay any of the said notes as and when the same become due all of the said notes shall forthwith become due and payable.

6. *Service Inspection Charge.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay to Products throughout the term of the license hereby granted a service and inspection payment, payable weekly, which for the first two weeks of said term shall be payable on the Saturday next succeeding the day upon which the installation shall have been made available to the Exhibitor as ready for use, and thereafter throughout the balance of the term on each and every Saturday in advance. The amount of such payment shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule which shall not be exceeded during the term of this agreement the amount of such weekly payment shall be the sum of $_____ per week for the first twenty-six weeks of the term of said license, the sum of $_____ per week for the second twenty-six weeks of said term, and the sum $_____ per week for the balance of said term.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor

Digitized by Google

will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes; and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor, and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(a) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(b) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of any of the notes provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(c) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(d) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(e) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

Digitized by Google

(f) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the term of this license, the license hereby granted and all obligations imposed upon Products by virtue of this Agreement shall, at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided, be suspended during the continuance of such default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor, and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further; that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed

Digitized by Google

that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Nonexclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement or representation, express or implied, in any way limiting, extending, defining or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be construed according to the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

291 T S—X W
Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the

Digitized by Google

Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Service Day.*—Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

---

and will endeavor to complete such installation on or before _____ 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion-picture-machine operators of the Exhibitor in the manner and method of oper-

Digitized by Google

ating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement, and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6A. *Weekly Payments.*—The Exhibitor further agrees to pay to Products throughout the first period of _____ weeks of the license hereby granted a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been made available to the Exhibitor as ready for use, and throughout the balance of said _____ weeks on each and every Saturday in advance. The amount of such weekly payment shall be the sum of _____ Dollars ($_____).

6B. *Service Inspection Charge.*—In addition to the weekly payments required to be made by the Exhibitor under the terms of Section 6A hereof, the Exhibitor also agrees to pay to Products throughout the term of the license hereby granted a service and inspection payment, payable weekly, which for the first two weeks of said term shall be payable on the Saturday next succeeding the day upon which the installation shall have been made available to the Exhibitor as ready for use, and thereafter throughout the balance of the term on each and every Saturday in advance. The amount of such payment shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule, which shall not be exceeded during the term of this agreement, the amount of such weekly payment shall be the sum of $_____ per week for the first twenty-six weeks of the term of said license, the sum of $_____ per week for the second twenty-six weeks of said term, and the sum of $_____ per week for the balance of said term.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof, and to pay the transportation charges thereon. The Exhibitor also agrees, upon rendition of invoices, to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes,

Digitized by Google

and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the equipment continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first period of _____ weeks of the term of this license, the entire balance of weekly payments for the said period shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment, and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said

Digitized by Google

Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor, and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement, and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment or, if in the sole judgment of Products such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information, and all reasonable cooperation in connection therewith and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement,

Digitized by Google

be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof, or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be construed according to the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

ELECTRICAL RESEARCH PRODUCTS, INC.,
By _____

In presence of—

_____
(as to E. R. P. I.)

By _____

_____
(as to Exhibitor)

_____

---

290 T N–24W
Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the unsynchronized electrical reproduction of sound incidental to the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Service Day.*—Products agrees to install in the Theatre sound-reproducing equipment (herein referred as "Equipment"), as follows: Non-synchronous Western Electric Sound Projector System Type _____ for reproduction from disc records and will use its best endeavor to complete such installation on or before _____, 192__. Nothing herein contained shall be considered

Digitized by Google

as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to Another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the operators of the Exhibitor in the manner and method of operating the Equipment and to make periodical inspection of and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____) payable as follows:

The sum of_____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the

Digitized by Google

first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be _____ Dollars ($_____) per week for the first two years (104 weeks), and thereafter for the balance of the term of said license such weekly payment shall be in accordance with Product's then current schedule of weekly payments for similar licenses, but not exceeding one-fourth of the weekly payment hereinabove agreed upon to be paid for the first two years. The Exhibitor agrees, however, that the payment for the twenty-four weeks' period, inclusive of the eighty-first to the one hundred and fourth week, in the amount of $_____ shall be paid by it to Products in advance upon arrival of the Equipment at the town of destination and presentation of Bill of Lading therefor.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Spare Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric-power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor, and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

Digitized by Google

(a) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(b) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(c) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(d) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(e) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(f) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, the entire balance of weekly payments for the first two years shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premise where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre of after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

Digitized by Google

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by he Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Extension.*—Products agrees that it will, if called upon to do so by the Exhibitor and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, extend the license hereby granted to include the right to use and employ in the Theatre the methods, systems, and equipment of Products for the electrical reproduction of sound in synchronism with motion pictures, and will convert the Equipment to a type suitable for synchronized reproduction in the Theatre. The Exhibitor agrees that if it shall exercise this option it will enter into the standard form of license agreement then used by Products embodying the terms then obtaining for the type of Equipment to be installed, and in that event Products agrees that it will credit upon the installation charge for such new equipment the amount then regularly allowed by it for the type of Equipment hereby leased.

21. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice-President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

22. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and

Digitized by Google

their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf the day and year first above written.

By _____

_____
(as to Exhibitor)

289 T N
Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitation, and agreements herein contained) the equipment hereinafter described for the unsynchronized electrical reproduction of sound incidental to the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Service Day.*—Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows: Non-synchronous Western Electric Sound Projector System Type _____ for reproduction from disc records and will use its best endeavor to complete such installation on or before _____ 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal

Digitized by Google

upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to Another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the operators of the Exhibitor in the manner and method of operating the Equipment and to make periodical inspection of and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be _____ Dollars ($_____) per week for the first two years (104 weeks), and thereafter for the balance of the term of said license such weekly payments shall be in accordance with Product's then current schedule of weekly payments for similar licenses, but not exceeding one-fourth of the weekly payment hereinabove agreed upon to be paid for the first two years.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier, and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Spare Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor

Digitized by Google

also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor, and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment, and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing, and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or opeating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(a) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(b) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(c) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(d) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(e) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(f) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, the entire balance of weekly payments for the first two years shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted

Digitized by Google

and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediae possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Nonexclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment

Digitized by Google

in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Extension.*—Products agrees that it will, if called upon to do so by the Exhibitor, and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, extend the license hereby granted to include the right to use and employ in the Theatre the methods, systems, and equipment of Products for the electrical reproduction of sound in synchronism with motion pictures, and will convert the Equipment to a type suitable for synchronized reproduction in the Theatre. The Exhibitor agrees that if it shall exercise this option it will enter into the standard form of license agreement then used by Products embodying the terms then obtaining for the type of Equipment to be installed, and in that event Products agrees that it will credit upon the installation charge for such new equipment the amount then regularly allowed by it for the type of Equipment hereby leased.

21. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or Vice-President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

22. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives, and shall be interpreted according to the laws of the State of New York.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf the day and year first above written.

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Digitized by Google

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive, non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Service Day.*—Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

---

and will endeavor to complete such installation on or before _____, 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor in that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor

Digitized by Google

hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____), by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be _____ Dollars ($_____) per week for the first two years (104 weeks), and thereafter for the balance of the term of said license such weekly payment shall be in accordance with Products' then current schedule of weekly payments for similar licenses, but not exceeding one-fourth of the weekly payment hereinabove agreed upon to be paid for the first two years. The Exhibitor agrees, however, that the payment for the twenty-four weeks' period inclusive of the eighty-first to the one hundred and fourth week, in the amount of $_____, shall be paid by it to Products in advance upon arrival of the Equipment at the town of destination and presentation of Bill of Lading therefore.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof, and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustments service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed, will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the

Digitized by Google

proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal-property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as. in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall, previous to its ceasing to own or operate the Theatre, have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, the entire balance of weekly payments for the first two years shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose

Digitized by Google

of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Nonexclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided

Digitized by Google

the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement or representation, express or implied, in any way limiting, extending, defining or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

ELECTRICAL RESEARCH PRODUCTS, INC.,
By _____

In presence of—

_____
(as to E. R. P. I.)

_____
By _____

_____
(as to Exhibitor)

287 T S—12 M
Contract No_____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between ELECTRICAL RESEARCH PRODUCTS, INC. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ _____ Theatre, at No _____ Street, in the City of _____ _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that for and in consideration of the covenants, stipulations, and representations herein set for, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive, non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the method and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

Digitized by Google

(*b*) *Service Day.*—Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

---

and will endeavor to complete such installation on or before _____ 192__, which shall be known as the "Tentative Service Day." Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which installation of the Equipment shall be completed and the Equipment made available to the Exhibitor as ready for public exhibition, whether prior or subsequent to the "Tentative Service Day", shall be known as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products, and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an acciden or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the equipment fails to function satisfactorily it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products; provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance

Digitized by Google

and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an Installation charge of _____ Dollars ($_____) payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the sum of _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the "Service Day", and the balance by a Series of _____(__) promissory notes, each in the principal amount of _____ Dollars ($_____) satisfactory to Products made by the Exhibitor and delivered to Products on or before the execution of this instrument, the first of said notes maturing one month after the "Service Day" and the remaining notes at monthly intervals thereafter, and all bearing interest at the rate of 6% per annum from the "Service Day." Products is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined by it the respective maturity dates thereof and the date from which interest shall run. Upon the failure of the Exhibitor to pay any of the said notes as and when the same become due all of the said notes shall forthwith become due and payable.

6. *Service Inspection Charge.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay Products throughout the term of the license hereby granted a service and inspection payment, payable weekly, which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the "Service Day" and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule, the service and inspection payment shall be $_____ per week, which charge shall not be exceeded during the first two years of the period of said license and thereafter for the balance of the term of said license shall not exceed the sum of $_____ per week.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances

Digitized by Google

relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of any of the notes provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall, previous to its ceasing to own or operate the Theatre, have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the term of this license, the license hereby granted and all obligations imposed upon Products by virtue of this Agreement shall, at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided, be suspended during the continuance of such default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement,

Digitized by Google

Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective

Digitized by Google

parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives, and shall be interpreted according to the laws of the State of New York.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf the day and year first above written.

5. The Exhibitor agrees to pay to Products in New York Exchange an installation charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____), on or before the execution of this instrument, receipt of which (with interest) is hereby acknowledged.

The sum of _____ Dollars ($_____), on the "Service Day."

The balance of the installation charge shall be evidenced by a series of thirteen (13) promissory notes made by the Exhibitor and delivered to Products on or before the execution of this instrument, which said notes are to be dated as hereinafter provided as of the fifteenth day of the month during which the "Service Day" occurs and are to bear interest at the rate of 6% per annum from said date. One-half of said balance shall be evidenced by twelve of said notes of equal principal amount which shall mature monthly beginning one month after the date thereof; the remaining half of said balance shall be evidenced by the thirteenth note which shall bear even maturity date with the twelfth note of the series. Products is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined by it, the date of the said notes, and the date from which interest shall run. Upon the failure of the Exhibitor to pay any of the said notes as and when the same become due, all of the said notes shall forthwith become due and payable.

6. 286 TS–104W
Contract No. _____

This agreement made in trplicate in the City of New York, State of New York, this _____ day of _____ 19__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ _____ a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1.(*a*) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive, non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Service Day.*—Products agrees to install in the Theatre sound-reproducing equipment (herein referred to as "Equipment") as follows:

_____

and will endeavor to complete such installation on or before _____, 193__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom, nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record it will cause such films and/or sound records to be run privately upon the Equip-

Digitized by Google

ment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products; provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion-picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satsfactorily completed a course of instruction in the operation of the Equipment a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____) payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be _____ Dollars ($_____) per week for the first two years (104 weeks), and thereafter for the balance of the term of said license such weekly payment shall be in accordance with Product's then current schedule of weekly payments for similar licenses, but not exceeding one-fourth of the weekly payment hereinabove agreed upon to be paid for the first two years.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred

Digitized by Google

by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall, previous to its ceasing to own or operate the Theatre, have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, the entire balance of weekly payments for the first two years shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

Digitized by Google

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be, and without any legal proceedings whatever, possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whasoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may, during the term hereof, be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement; provided, that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arisng from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or pro-

Digitized by Google

hibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of _____ years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restrictions upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

286 T S–X W
Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____ State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive, non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained), the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may, during the term of this

Digitized by Google

agreement, be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Service Day.*—Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

---

and will endeavor to complete such installation on or before _____ 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instructions and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available

Digitized by Google

to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____) payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be _____ Dollars ($_____) per week for the first _____ weeks, and thereafter for the balance of the term of said license such weekly payment shall be in accordance with Products' then current schedule of weekly payments for similar licenses, but not exceeding _____ Dollars ($_____) per week.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished, or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary, or desirable.

Digitized by Google

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(a) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(b) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(c) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall, previous to its ceasing to own or operate the Theatre, have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(d) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(e) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(f) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first period of _____ weeks of the terms of this license, the entire balance of weekly payments for the said period shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and

Digitized by Google

the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *Licensee Nonexclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its rights to enforce any provision or all provisions hereof.

Digitized by Google

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

285 T S–12 M

Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ _____ Theatre, at No. _____ Street, in the City of _____ _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the premises and of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Service Day.*—In pursuance of the license hereinabove granted, Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

_____

and will endeavor to complete such installation on or before _____ 192__, which shall be known as the "Tentative Service Day." Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacure and delivery of the Equipment and to installing the same expeditiously. The day on which installation of the Equipment shall be completed and the Equipment made available to the Exhibitor as ready for public exhibition whether prior or subsequent to the "Tentative Service Day" shall be known as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of records of sound (in

Digitized by Google

any form) for use therewith, that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any record of sound or with any other device or combination of devices in any way related to the production or reproduction of sound, unless said records, devices, and combinations of devices (other than those made under license from Products for such use) shall have been first tested by Products and found by it to operate properly, reliably, and efficiently and to reproduce sound with accuracy of quality and adequacy of volume, and approved by the legal counsel of Products as to freedom from infringement of patents. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for said Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or record, it will cause such films and/or records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts and accessories as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an installation charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the sum of _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the "Service Day", and the balance by a

Digitized by Google

Series of twelve (12) promissory notes, each in the principal amount of _____ Dollars ($_____), satisfactory to Products made by the Exhibitor and delivered to Products on or before the execution of this instrument, the first of said notes maturing one month after the "Service Day" and the remaining notes at monthly intervals thereafter, and all bearing interest at the rate of 6% per annum from the "Service Day." Products is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined by it the respective maturity dates thereof and the date from which interest shall run. Upon the failure of the Exhibitor to pay any of the said notes as and when the same become due all of the said notes shall forthwith become due and payable.

6. *Service and Inspection Charge.*—In addition to any other payments required to be made by the Exhibitor hereunder the Exhibitor agrees to pay to Products throughout the term of the license hereby granted a weekly service and inspection payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the "Service Day", and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be in accordance with Products' regular schedule of such charges from time to time established, Products reserving the right, in its sole judgment, to increase or decrease its schedule of such charges to accord with increases or decreases in the cost of labor or material involved or in the character of services to be rendered. Under Products present schedule the weekly service charge shall be _____ Dollars.

This charge shall be payable for each week during which, or during any part of which the Equipment shall have been operated, and shall be payable for a minimum of forty weeks out of each fifty-two weeks following the Service Day.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, Etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds drawings, prints, and written descriptions and instructions, is and shall at all times be and remain vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all taxes, license fees, and any and all other municipal, county, state, or other governmental charges that may be charged or levied against the Equipment or against Products by reason of its ownership of the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, including hours of performance, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

Digitized by Google

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever, and the Exhibitor agrees to indemnify Products and save it harmless on account of any such loss or damage. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor or any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of any of the notes provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use of maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to permit access to the Equipment by Products for the uses and purposes herein set forth.

(*g*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the term of this license, the license hereby granted and all obligations imposed upon Products by virtue of this agreement shall, at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided, be suspended during the continuance of such default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment

Digitized by Google

in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice of such action or suit full information and all reasonable cooperation in connection therewith and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from the use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licenses) not furnished by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products.

18. *License Nonexclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions or any of the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, be subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives, and shall be interpreted according to the laws of the State of New York.

284 T S—104 W
Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____ a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the premises and of the covenants, stipulations and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Service Day.*—In pursuance of the license hereinabove granted, Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:
and will endeavor to complete such installation on or before _____ 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of records of sound (in any form) for use therewith, that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ

Digitized by Google

the equipment in any manner in conjunction with any record of sound or with any other device or combination of devices in any way related to the production or reproduction of sound, unless said records, devices, and combinations of devices (other than those made under license from Products for such use) shall have been first tested by Products and found by it to operate properly, reliably, and efficiently and to reproduce sound with accuracy of equality and adequacy of volume, and approved by the legal counsel of Products as to freedom from infringement of patents. Also, in order further to secure proper functioning of the Equipment, as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for said Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or record, it will cause such films and/or records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion-picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts and accessories as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of_____Dollars ($_____) payable as follows:

The sum of_____Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely,_____Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The

Digitized by Google

amount of such payment shall be_____Dollars ($_____) per week for the first two years (104 weeks), and thereafter for the balance of the term of said license, such weekly payment shall be in accordance with Products' then current schedule of weekly payments for similar licenses, but not exceeding one-fourth of the weekly payment hereinabove agreed upon to be paid for the first two years.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading, to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, Etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, is and shall at all times be and remain vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all taxes, license fees, and any and all other municipal, county, state, or other governmental charges that may be charged or levied against the Equipment or against Products by reason of its ownership of the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, including hours of performance, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever, and the Exhibitor agrees to indemnify Products and save it harmless on account of any such loss or damage. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted, shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(a) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(b) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

Digitized by Google

(c) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment.

(d) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(e) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(f) Upon the failure of the Exhibitor to permit access to the Equipment by Products for the uses and purposes herein set forth.

(g) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, the entire balance of weekly payments for the first two years shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment or, if in the sole judgment of Products such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre Equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the

Digitized by Google

manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from the use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either or such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

and _____, a Corporation, having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____, (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the premises and of the covenants, stipulations and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(b) *Service Day.*—In pursuance of the license hereinabove granted, Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

_____

and will endeavor to complete such installation on or before _____, 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of records of sound (in any form) for use therewith, that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as therein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use or employ the Equipment in any manner in conjunction with any record of sound or with any other device or combination of devices in any way related to the production or reproduction of sound, unless said records, devices, and combinations of devices (other than those made under license from Products for such use) shall have been first tested by Products and found by it to operate properly, reliably, and efficiently, and to reproduce sound with accuracy of quality and adequacy of volume, and approved by the legal counsel of Products as to freedom from infringement of patents. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for said Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or record, it will cause such films and/or records to be run privately upon the Equipment for the purpose of ascertaining that the

Digitized by Google

Equipment is in satisfactory condition and adjustment for the particular film and/or record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts and accessories as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____) payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be _____ Dollars ($_____) per week for the first two years (104 weeks), and thereafter for the balance of the term of said license, such weekly payments shall be in accordance with Product's then current schedule of weekly payments for similar licenses, but not exceeding one-fourth of the weekly payment hereinabove agreed upon to be paid for the first two years. The Exhibitor agrees however, that the payment for the twenty-four weeks' period inclusive of the eighty-first to the one hundred and fourth week, in the amount of $_____ shall be paid by it to Products in advance upon arrival of the Equipment at the town of destination and presentation of Bill of Lading therefor.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, Etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equip-

Digitized by Google

ment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, is and shall at all times be and remain vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all taxes, license fees, and any and all other municipal, county, state, or other governmental charges that may be charged or levied against the Equipment or against Products by reason of its ownership of the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, including hours of performance, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever, and the Exhibitor agrees to indemnify Products and save it harmless on account of any such loss or damage. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre, and shall have made provision satisfactory to Products for the care and custody of the Equipment.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to permit access to the Equipment by Products for the uses and purposes herein set forth.

Digitized by Google

(g) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, the entire balance of weekly payments for the first two years shall be due and payable forthwith at the option of Products and whether or not it terminates the license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from the use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products.

Digitized by Google

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restricton upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

In Witness Whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

(as to E. R. P. I.)

_____

By_____

_____
(as to Exhibitor)

---

282 T N

Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre").

Witnesseth, that for and in consideration of the premises and of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby grants and agrees to grant to the Exhibitor, subject to all the terms and conditions hereof, the non-exclusive, non-assignable license to use and employ in the Theatre the Equipment hereinafter referred to, and such of the methods

Digitized by Google

and systems of Products as are necessarily involved in the use of said Equipment as herein contemplated, for the unsynchronized electrical reproduction of sound from records thereof made by licensees of Products, under any and all United States patents and applications for patents applicable thereto now or during the term hereof owned or controlled by Products or under which Products has the right to grant such license.

(*b*) *Service Day.*—In pursuance of the license hereinabove granted, Products agrees to install in the Theatre sound reproducing equipment (hereinafter referred to as "Equipment"), as follows: Non-synchronous Western Electric Sound Projector System Type _____ for reproducing from disc records, and will use its best endeavor to complete such installation on or before _____, 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and are involved in the inventions and construction of the Equipment and in the making of records of sound (in any form) for use therewith; that the prestige and business reputation of Products might be seriously affected by its imperfect operation or by its use with records not suited to the Equipment or which are of such a nature as to produce inferior results when used with the Equipment; and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor agrees that it will not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any record of sound or with any other device or combination of devices in any way related to the production or reproduction of sound, unless said records, devices, and combinations of devices shall have been first tested by Products and found by it to operate properly, reliably, and efficiently and to reproduce sound with accuracy of quality and adequacy of volume, and approved by the Legal Counsel of Products as to freedom from infringement of patents. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for said Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily it will immediately notify Products by registered mail or telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to any install the same in another theatre designated by the Exhibitor and satisfactory to Products; provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the operators of the Exhibitor in the manner and method of operating the Equipment and to make periodical inspection of and minor adjustments in the Equipment after it shall have been installed. Products may from time to time, but at the expense of the Exhibitor, supply or install such spare and renewal parts and accessories as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

Digitized by Google

5. *Installation charge.*—The Exhibitor agrees to pay to Products in New York Exchange an installation charge of _____ Dollars ($_____), payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____), on the day on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition, which said balance shall be evidenced by a demand promissory note satisfactory to Products made by the Exhibitor and delivered to Products on or before the execution of this instrument, and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the day on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Rental.*—The Exhibitor agrees to pay to Products, throughout the term of the lease hereby granted a weekly rental, which shall be payable in advance beginning with the first Saturday preceding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. The amount of such rental shall be _____ Dollars per week for the first two years (104 weeks), and thereafter for the balance of the term of said license, such weekly rental shall be in accordance with the Company's then current schedule of such weekly rentals but not exceeding one fourth of the weekly rental hereinabove agreed upon to be paid for the first two years.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Spare Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon, title to such equipment and parts, however, to remain in Products. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is, or before said Equipment is installed will be, supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, is and shall at all times be and remain vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all taxes, license fees and any and all other municipal, county, state, or other governmental charges that may be charged or levied against the Equipment or against Products by reason of its ownership of the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, including hours of performance, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such ad-

Digitized by Google

justments therein and repairs thereto as, in the opinion of Products, are neessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever, and the Exhibitor agrees to indemnify Products and save it harmless on account of any such loss or damage. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre, and shall have made provision, satisfactory to Products, for the care and custody of the Equipment.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment.

(*e*) Upon the removal of the Equipment or any part theerof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to permit access to the Equipment by the Company for the uses and purposes herein set forth.

(*g*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

Except as to the provisions of sub-divisions (*a*), (*b*), (*c*), (*f*), and (*g*) of this section the foregoing provisions for the termination of this license in the event of default shall not be effective until Products shall have notified the Exhibitor by registered mail that it is in default and specifying in what particular, and until a period of fourteen days shall have been given to the Exhibitor to remove or correct such default. In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, at the option of Products, and whether or not it terminates this license or removes the Equipment as hereinafter provided, the entire unpaid rental for the first two years shall be due and payable forthwith. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever, possess and remove said Equipment, and the Exhibitor will cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, and for that purpose may pursue the same wherever it or any part thereof may be found, and may enter with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor, and such place or places whatsoever, whether belonging to the Exhibitor or not in which

Digitized by Google

the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, Products will install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such intringement, provided that the Exhibitor shall give Products prompt notice of such action or suit, full information and all reasonable cooperation in connection therewith, and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from the use of any of said equipment in combination with any apparatus or thing not furnished by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

20. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

21. *Extension.*—Products agrees that it will, if called upon to do so by the Exhibitor and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, extend the license hereby granted to include the right to use and employ in the Theatre the methods, systems and equipment of Products for the electrical reproduction of sound in synchronism with motion pictures, and will convert the Equipment to a type suitable for synchronized reproduction in the Theatre. The Exhibitor agrees that if it shall exercise this option it will enter into the standard form of license agreement then used by Products embodying the terms then obtaining for the type of Equipment to be installed, and in that event Products agrees that it will credit upon the installation charge for such new equipment the amount then regularly allowed by it for the type of Equipment hereby leased.

Digitized by Google

22. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre").

Witnesseth, that for, and in consideration of the premises and of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby grants and agrees to grant to the Exhibitor, subject to all the terms and conditions hereof, the non-exclusive, non-assignable license to use and employ in the Theatre the Equipment hereinafter referred to, and such of the methods and systems of Products as are necessarily involved in the use of said Equipment as herein contemplated, for the unsynchronized electrical reproduction of sound from records thereof made by licensees of Products, under any and all United States patents and applications for patents applicable thereto now or during the term hereof owned or controlled by Products or under which Products has the right to grant such license.

(*b*) *Service Day.*—In pursuance of the license hereinabove granted, Products agrees to install in the Theatre sound reproducing equipment (hereinafter referred to as "Equipment"), as follows: Non-synchronous Western Electric Sound Projector System Type _____ for reproduction from disc records and will use its best endeavor to complete such installation on or before _____ 192__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of records of sound (in any form) for use therewith, that the prestige and business reputation of Products might be seriously affected by its imperfect operation or by its use

Digitized by Google

with records not suited to the Equipment or which are of such a nature as to produce inferior results when used with the Equipment, and that the use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor agrees that it will not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any record of sound or with any other device or combination of devices in any way related to the production or reproduction of sound, unless said records, devices, and combinations of devices shall have been first tested by Products and found by it to operate properly, reliably, and efficiently, and to reproduce sound with accuracy of quality and adequacy of volume, and approved by the Legal Counsel of Products as to freedom from infringement of patents. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for said Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail or telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the operators of the Exhibitor in the manner and method of operating the Equipment and to make periodical inspection of and minor adjustments in the Equipment after it shall have been installed. Products may from time to time, but at the expense of the Exhibitor, supply or install such spare and renewal parts and accessories as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an installation charge of _____ Dollars ($_____) payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) on the day on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition, which said balance shall be evidenced by a demand promissory note satisfactory to Products made by the Exhibitor and delivered to Products on or before the execution of this instrument and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the day on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Rental.*—The Exhibitor agrees to pay to Products throughout the term of the lease hereby granted a weekly rental, which shall be payable in advance beginning with the first Saturday preceding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. The amount of such rental shall be _____ _____ Dollars per week for the first two years (104 weeks) and thereafter for the balance of the term of said license, such weekly rental shall be in accordance with the Company's then current schedule of such weekly rentals but not exceeding one fourth of the weekly rental hereinabove agreed upon to be paid for the first two years. The Exhibitor agrees, however, that the rental for the twenty-four weeks' period, inclusive of the eighty-first to the one

Digitized by Google

hundred and fourth week, in the amount of $_____ shall be paid by it to Products in advance upon arrival of the Equipment at the town of destination and presentation of Bill of Lading therefor.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Spare Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon, title to such equipment and parts, however, to remain in Products. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor, and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder, and also all tools of all kinds, drawings, prints, and written descriptions and instructions, is and shall at all times be and remain vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all taxes, license fees, and any and all other municipal, county, state, or other governmental charges that may be charged or levied against the Equipment or against Products by reason of its ownership of the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, including hours of performance, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever, and the Exhibitor agrees to indemnify Products and save it harmless on account of any such loss or damage. The Exhibitor agrees to indemnify Products for and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have

Digitized by Google

notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to permit access to the Equipment by the Company for the uses and purposes herein set forth.

(*g*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

Except as to the provisions of sub-divisions (a), (b), (c), (f), and (g) of this section the foregoing provisions for the termination of this license in the event of default shall not be effective until Products shall have notified the Exhibitor by registered mail that it is in default and specifying in what particular, and until a period of fourteen days shall have been given to the Exhibitor to remove or correct such default. In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided, the entire unpaid rental for the first two years shall be due and payable forthwith. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license, by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor will cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter with the aid and assistance of any person or persons the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, Products will install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof, it will, at its own expense, defend any and all actions and suits which may, during the term hereof, be brought against the Exhibitor for infringement of

Digitized by Google

patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products prompt notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from the use of any of said equipment in combination with any apparatus or thing not furnished by Products, and that the liability of Products under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to Products.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone or neighborhood or as preventing or prohibiting Products from entering into similar agreements of granting licenses for the installation and use of similar equipment in competing theatres.

19. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

20. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

21. *Extension.*—Products agrees that it will, if called upon to do so by the Exhibitor and provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, extend the license hereby granted to include the right to use and employ in the Theatre the methods, systems, and equipment of Products for the electrical reproduction of sound in synchronism with motion pictures, and will convert the Equipment to a type suitable for synchronized reproduction in the Theatre. The Exhibitor agrees that if it shall exercise this option it will enter into the standard form of license agreement then used by Products embodying the terms then obtaining for the type of Equipment to be installed and in that event Products agrees that it will credit upon the installation charge for such new equipment the amount then regularly allowed by it for the type of Equipment hereby leased.

22. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

In witness whereof the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

Contract No.....

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York, hereinafter called the "Company", licensor, and _____ a Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____, hereinafter called the "Exhibitor", licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____, hereinafter referred to as the "Theatre",

Witnesseth that for, and in consideration of the premises and of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Company grants license and will install Equipment.*—The Company hereby grants and agrees to grant to the Exhibitor, subject to all the terms and conditions hereof, the non-exclusive, non-assignable right and license to use and employ in the Theatre the methods, systems, and equipment of the Company for the electrical reproduction of sound independently of and in synchronism with motion pictures under any and all United States patents, applications for patents, and licenses applicable thereto now or during the term hereof owned or controlled by the Company and under which the Company has the right to grant such license.

(b) *Service Day.*—In pursuance of the license hereinabove granted, the Company agrees to install in the Theatre sound reproducing equipment (hereinafter referred to as "(Equipment") as follows:

_____

and will use its best endeavor to complete such installation on or before _____, 192__, which shall be known as the "Tentative Service Day." Nothing herein contained shall be considered as a firm agreement on the part of the Company to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of the Company in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which installation of the Equipment shall be completed and the Equipment made available to the Exhibitor as ready for public exhibition whether prior or subsequent to the "Tentative Service Day" shall be known as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees to use and employ the Equipment only in the Theatre, and when the same is used for the purpose of reproducing synchronized productions (i. e., recordings of sound in synchronism with co-ordinated or co-related motion pictures produced in synchronism) no recordings shall be used except those produced by licensees of the Company.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, the Company will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre satisfactory to the Company, not theretofore so equipped, of similar character, in the same zone or neighborhood and managed or operated by the same or an affiliated corporation, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to the Company of the performance of such new agreement).

4. *Instruction.*—The Company agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. The Company will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. The Company further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance, and at such additional hours as may be necessary, an engineer or other person skilled in such operation, for a period of one week following the Service Day.

Digitized by Google

5. *Inspection Service.*—The Company agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. The Company agrees to keep on hand and in stock a line of spare parts and accessories. The Company may from time to time install such spare and renewal parts and accessories as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

6. *Installation Fee.*—The Exhibitor agrees to pay to the Company in New York exchange an installation fee of_____Dollars ($_____) payable as follows:

---

the sum of_____Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged;

---

the sum of_____Dollars ($_____) on the "Service Day" to be evidenced by a demand promissory note satisfactory to the Company, made by the Exhibitor and delivered to the Company on or before the execution of this instrument and bearing no interest prior to presentation, which demand note the Company agrees not to present for payment prior to the "Service Day", and the balance

---

in_____equal monthly installments of_____ Dollars ($_____) each, all to be evidenced by a series of promissory notes satisfactory to the Company, corresponding to the amounts of the respective payments, made by the Exhibitor and delivered to the Company on or before the execution of this instrument, the first of said notes maturing one month after the "Service Day" and the remaining notes serially thereafter, and all bearing interest at the rate of 6% per annum from the "Service Day." The Company is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined, the respective maturity dates thereof and the date from which interest shall run. It is understood an dagreed that the giving and acceptance of said promissory notes is for convenience and as evidence, that they shall not be construed to constitute payment nor a waiver of any term, provision, or condition of this agreement, and that the Company shall have the privilege of endorsing or discounting them without such endorsement or discount being construed as an acceptance of the same as a payment hereon. Upon the failure of the Exhibitor to pay any of the said notes as and when the same becomes due all of the said notes shall forthwith become due and payable.

7. *Service and Inspection Charge.*—The Exhibitor agrees to pay to the Company a weekly service and inspection charge in accordance with the Company's regular schedule of such charges from time to time established, the Company reserving the right, in its sole judgment, to increase or decrease its schedule of such charges to accord with increases or decreases in the cost of labor or material involved or in the character of services to be rendered. Under the Company's present schedule, the weekly service charge shall be_____ Dollars. Payment thereof shall be made on Saturday of each week, starting with the Saturday following the Service Day. This charge shall be payable for each week during which, or during any part of which the Equipment shall have been operated, and shall be payable for a minimum of forty weeks out of each fifty-two weeks following the Service Day, provided that said weekly charge shall not be payable unless there be available to the Exhibitor records adapted for reproduction by, and/or in conjunction with the equipment.

8. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof. Similarly, upon the termination of this agreement, the Exhibitor agrees to pay the cost of disconnecting and removing the Equipment from the Theatre and of transporting it to such place as may then be designated by the Company which said place shall not be more distant from the Theatre than the place from which shipment was originally made.

9. *Projection Equipment of Theatre.*—The Exhibitor agrees that the Theatre is or will be equipped with not less than two projection machines which are or will be machines in good order and condition, and of a type with which the

Digitized by Google

Equipment has been designed to operate and that the Theatre is or will be supplied with suitable electric current. Prior to the service day, the Company will cause the Theatre to be inspected by its engineers and will notify the Exhibitor as to the general character and extent of the changes which will be necessary for the proper installation and accommodation of the Equipment.

Changes in Theatre.—The Exhibitor agrees to make such reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, including, among other things, the possible enlargement and sound proofing of the booth, the provision of suitable space, properly ventilated, for the installation of the storage batteries and charging equipment, provision of suitable supports for horns, and provision of drapes for acoustic purposes, all at the expense of the Exhibitor and to the extent and in the manner prescribed by the Company or its engineers, provided, however, that if the necessary changes involve such major structural modifications in the building or are otherwise so extensive as to inflict an unreasonable hardship, the Exhibitor, at its election, may, by immediate written notification to the Company and by the payment of the expenses incurred by the Company in connection with such inspection and installation (including repacking and return transportation charges), forthwith terminate this contract.

10. *Payment for Spare Parts, etc.*—The Exhibitor agrees to pay to the Company its list charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by the Company upon delivery thereof to the Theatre and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by the Company's employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

11. *Manner of using Equipment.*—The Exhibitor agrees that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by the Company and in no other manner; that it will not, without the written consent of the Company, alter, change, or modify the Equipment in any particular, nor add anything thereto or take anything therefrom; that all additional or renewal parts shall be obtained from the Company and that it will not break the seal upon any part or collection of parts which is or may be sealed upon the delivery or installation thereof, but nothing herein contained shall be construed as prohibiting the Exhibitor from taking all reasonable steps to correct or repair the Equipment in the event of an accident or breakdown.

12. *Private Trial of Films and Records.*—The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or record. If at any time any defect or faulty adjustment in the Equipment develops, which cannot be immediately corrected by the Exhibitor, the Exhibitor shall notify the Company by telegraph or telephone, and shall refrain from further use of the Equipment until such defect or faulty adjustment has been corrected. In the absence of such notification it shall be assumed that the Equipment is in satisfactory condition.

13. *Insurance.*—The Exhibitor agrees that upon and after the arrival of the Equipment at the town of destination (commencing immediately upon receipt of information from the common carrier that it has so arrived), it shall be kept insured at the expense of the Exhibitor against loss or damage by fire to the amount of at least the aggregate installation payments herein stipulated, loss, if any, to be adjusted with and payable to the Company as the owner of the Equipment, and, in the event of loss, the Company will apply any moneys recovered by it towards the repair or replacement of the leased equipment either in the same theatre or, in the event of the Exhibitor ceasing to operate the said theatre, then in another theatre of similar character, in the same zone or neighborhood, not theretofore so equipped, satisfactory to the Company, and managed by the Exhibitor or an affiliated corporation or concern. Unless the Exhibitor shall promptly effect and maintain insurance satisfactory to the Company and shall lodge with the Company the policies or certificates therefor, the Company may at its option, and so long as any of the installation charges remain unpaid, effect and maintain such insurance as it may deem advisable and arrange for the premiums to be billed directly to the Exhibitor who shall promptly pay the same. The Exhibitor agrees to comply with all

Digitized by Google

local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements. It is mutually understood and agreed that after shipment of said equipment, all risk of loss thereof or damage thereto shall be borne by the Exhibitor.

14. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all taxes, license fees, and any and all other municipal, county, state, or other public charges that may be charged or levied against the Equipment or against the Company by reason of its ownership of the Equipment.

15. *Access to Equipment.*—The Exhibitor will permit the Company, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, including hours of performance, for the purpose of examining and inspecting the Equipment and for the purpose also of instructing motion picture operators, not employed by the Exhibitor, in the operation thereof (but only in such manner and at such times as not to interfere with regular performances) and will grant to the Company full opportunity to make such adjustments therein and repairs thereof as, in the opinion of the Company, are necessary or desirable. The Exhibitor will, through its operators, electricians, and other employees, facilitate such examinations, inspections, adjustments, and repairs, and at all reasonable hours and times have available and supply electric current of suitable voltage and character therefor. The Exhibitor will grant similar access to the Theatre to representatives and employees of the Company for a reasonable length of time (depending on the size and situation of the Theatre), prior to the "Service Day", for the purpose of installing and testing the Equipment and will also grant such access, after the expiration or termination of this license to permit representatives of the Company to disconnect, pack, and remove the Equipment.

16. *Liability for Interruptions, Injuries, etc.*—The Company shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever, and the Exhibitor agrees to indemnify the Company and save it harmless on account of any such loss or damage. The Exhibitor agrees to indemnify the Company for, and save it harmless from, any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment and from any liability to any persons resulting from negligence of such workmen.

17. *Title to Equipment.*—All of the sums agreed to be paid by the Exhibitor to the Company by any of the provisions hereof, however designated, calculated, or described, are items forming part of the agreed consideration for the license granted hereby and are so paid by the Exhibitor and so received by the Company, and notwithstanding any termination or expiration of this license, all such sums theretofore paid may be retained by the Company without prejudice to the Company's right to recover any additional amounts which may be due. Title to and ownership of all equipment furnished pursuant to any of the terms hereof (including all parts, accessories, batteries, tubes, wiring, and incidental mechanism and tools of all kinds) is and shall at all times be and remain vested in the Company.

18. *Events of Default.*—This agreement and the license hereby granted shall, at the option of the Company, terminate and come to an end upon the happening of any of the following events, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, within ten days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment.

(*d*) Upon the removal of the Equipment or any part thereof from the location and position in which it was installed by the Company.

(*e*) Upon the failure of the Exhibitor to permit access to the Equipment by the Company for the uses and purposes herein set forth.

Except as to the provisions of subdivisions (*a*), (*b*), and (*e*) of this section the foregoing provisions for the termination of this license in the event of default shall not be effective until the Company shall have notified the Exhibitor by registered mail that it is in default, specifying in what particular,

Digitized by Google

and until a period of fourteen days shall have been given to the Exhibitor to remove or correct such default, but any and all obligations imposed upon the Company by virtue of this agreement shall be suspended while the Exhibitor shall be in default.

19. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to the Company in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted and the Company may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor will cooperate in such removal. If this license shall be terminated by default, the Company shall thereupon, without notice, have the right to take immediate possession of said Equipment, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter with the aid and assistance of any person or persons the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. The Exhibitor expressly covenants that in any such event no claim will be made for damages on account of such removal or otherwise, and the exhibitor further agrees that it will hold and save harmless the Company from and against any and all claims for damages by any parties whatsoever on account of such removal.

20. *Patent Protection.*—The Company agrees that subject to the provisions hereof, it will at its own expense defend any and all actions and suits which may, during the term hereof, be brought against the Exhibitor for infringement of patents by reason of the employment by the Exhibitor of apparatus and equipments furnished by the Company hereunder and used for the purpose and in the manner contemplated by this agreement, and will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the court of last resort in any such action or suit on account of any such infringement; provided that the Exhibitor shall give the Company prompt notice of such action or suit, full information, and all reasonable cooperation in connection therewith, and full opportunity to defend the same, and provided further that this agreement shall not extend to any infringement arising from the use of any of said Equipment in combination with apparatus or things not furnished by the Company and that the liability of the Company under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to the Company.

21. *License Non-exclusive.*—Nothing in this contract shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting the Company from entering into similar contracts of license for the use and installation of similar equipment in competing theatres.

22. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of the Company. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors and legal representatives and shall be interpreted according to the laws of the State of New York.

23. *Period of License.*—This license shall be for a term of ten years from the Service Day as herein defined, but if the installation charge shall have been fully paid and the Exhibitor shall not be in default as to any of the provisions of this agreement, the same may be terminated at the option of the Exhibitor after the expiration of three years from the Service Day upon not less than six months' written notice given by the Exhibitor to the Company of intention so to terminate and the payment to the Company of a sum sufficient to defray the cost to the Company of removing the Equipment.

24. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision

Digitized by Google

or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

ELECTRICAL RESEARCH PRODUCTS, INCORPORATED,

By _____

_____

By _____

In the presence of—

_____
(As to E. R. P. I.)

_____
(As to Exhibitor)

Contract No. _____

This agreement made in triplicate in the City of New York, State of New York, this _____ day of _____192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York, hereinafter called the "Company" licensor, and _____ a Corporation having its principal place of business at No. _____ Street, in the City of _____ State of _____ hereinafter called the "Exhibitor", licensee and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____, hereinafter referred to as the "Theatre",

Witnesseth, that for and in consideration of the premises and of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Company grants license and will install Equipment.*—The Company hereby grants and agrees to grant to the Exhibitor, subject to all the terms and conditions hereof, the non-exclusive, non-assignable right and license to use and employ in the Theatre the methods, systems, and equipment of the Company for the electrical reproduction of sound independently of and in synchronism with motion pictures under any and all United States patents, applications for patents, and licenses applicable thereto, now or during the term hereof owned or controlled by the Company and under which the Company has the right to grant such license.

(*b*) *Service Day.*—In pursuance of the license hereinabove granted, the Company agrees to install in the Theatre sound reproducing equipment (hereinafter referred to as "Equipment") as follows: Type _____ equipment designed for use with Simplex or Powers Projectors and will use its best endeavor to complete such installation on or before _____192__, which shall be known as the "Tentative Service Day." Nothing herein contained shall be considered as a firm agreement on the part of the Company to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of the Company in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which installation of the Equipment shall be completed and the Equipment made available to the Exhibitor as ready for public exhibition whether prior or subsequent to the "Tentative Service Day" shall be known as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees to use and employ the Equipment only in the Theatre, and when the same is used for the purpose of reproducing synchronized production (i. e., recordings of sound in synchronism with co-ordinated or co-related motion pictures produced in synchronism) no recordings shall be used except those produced by licensees of the Company.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, the Company will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre satisfactory to the Company, not theretofore so equipped, of similar character, in the same zone or neighborhood and managed or operated by the same or an affiliated corporation; provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the

Digitized by Google

Exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to the Company of the performance of such new agreement).

4. *Instruction.*—The Company agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment. The Company will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. The Company further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance, and at such additional hours as may be necessary, an engineer or other person skilled in such operation, for a period of one week following the Service Day.

5. *Inspection Service.*—The Company agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. The Company agrees to keep on hand and in stock a line of spare parts and accessories. The Company may from time to time install such spare and renewal parts and accessories as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

6. *Installation Fee.*—The Exhibitor agrees to pay to the Company in New York exchange an installation fee of _____ Dollars ($_____), payable as follows: the sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged; the sum of _____ Dollars ($_____) on the "Service Day" to be evidenced by a demand promissory note satisfactory to the Company, made by the Exhibitor and delivered to the Company on or before the execution of this instrument and bearing no interest prior to presentation which demand note the Company agrees not to present for payment prior to the "Service Day"; and the balance _____ in _____ equal monthly installments of _____ Dollars ($_____) each, all to be evidenced by a series of promissory notes satisfactory to the Company, corresponding to the amounts of the respective payments, made by the Exhibitor and delivered to the Company on or before the execution of this instrument, the first of said notes maturing one month after the "Service Day" and the remaining notes serially thereafter, and all bearing interest at the rate of 6% per annum from the "Service Day." The Company is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined, the respective maturity dates thereof and the date from which interest shall run. It is understood and agreed that the giving and acceptance of said promissory notes is for convenience and as evidence that they shall not be construed to constitute payment nor a waiver of any term, provision, or condition of this agreement, and that the Company shall have the privilege of endorsing or discounting them without such endorsement or discount being construed as an acceptance of the same as a payment hereon. Upon the failure of the Exhibitor to pay any of the said notes as and when the same become due all of the said notes shall forthwith become due and payable.

7. *Service and Inspection Charge.*—The Exhibitor agrees to pay to the Company a weekly service and inspection charge in accordance with the Company's regular schedule of such charges from time to time established, the Company reserving the right, in its sole judgment, to increase or decrease its schedule of such charges to accord with increases or decreases in the cost of labor or material involved or in the character of services to be rendered. Under the Company's present schedule, the weekly service charge shall be _____ Dollars. Payment thereof shall be made on Saturday of each week, starting with the Saturday following the Service Day. This charge shall be payable for each week during which, or during any part of which the Equipment shall have been operated, and shall be payable for a minimum of forty weeks out of each fifty-two weeks following the Service Day, provided that said weekly charge shall not be payable unless there be available to the Exhibitor records adapted for reproduction by, and/or in conjunction with the equipment.

8. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof. Similarly, upon the termination of this agreement, the Ex-

Digitized by Google

hibitor agrees to pay the cost of disconnecting and removing the Equipment from the Theatre and of transporting it to such place as may then be designated by the Company which said place shall not be more distant from the Theatre than the place from which shipment was originally made.

9. *Projection Equipment of Theatre—Changes in Theatre.*—The Exhibitor agrees that the Theatre is or will be equipped with not less than two projection machines which are or will be machines in good order and condition, and of a type with which the Equipment has been designed to operate and that the Theatre is or will be supplied with suitable electric current. Prior to the service day, the Company will cause the Theatre to be inspected by its engineers and will notify the Exhibitor as to the general character and extent of the changes which will be necessary for the proper installation and accommodation of the Equipment. The Exhibitor agrees to make such reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, including, among other things, the possible enlargement and sound proofing of the booth, the provision of suitable space, properly ventilated, for the installation of the storage batteries and charging equipment, provision of suitable supports for horns and provision of drapes for acoustic purposes, all at the expense of the Exhibitor and to the extent and in the manner prescribed by the Company or its engineers; provided, however, that if the necessary changes involve such major structural modifications in the building or are otherwise so extensive as to inflict an unreasonable hardship, the Exhibitor, at its election, may, by immediate written notification to the Company and by the payment of the expenses incurred by the Company in connection with such inspection and installation (including repacking and return transportation charges), forthwith terminate this contract.

10. *Payment for Spare Parts, etc.*—The Exhibitor agrees to pay to the Company its list charges as from time to time established for any additional equipment or spare or renewal parts furnished or supplied by the Company upon delivery thereof to the Theatre and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by the Company's employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

11. *Manner of using Equipment.*—The Exhibitor agrees that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by the Company and in no other manner; that it will not, without the written consent of the Company, alter, change, or modify the Equipment in any particular, nor add anything thereto or take anything therefrom; that all additional or renewal parts shall be obtained from the Company and that it will not break the seal upon any part or collection of parts which is or may be sealed upon the delivery or installation thereof, but nothing herein contained shall be construed as prohibiting the Exhibitor from taking all reasonable steps to correct or repair the Equipment in the event of an accident or breakdown.

12. *Private Trial of Films and Record.*—The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or record it will cause such films and/or records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or record. If at any time any defect or faulty adjustment in the Equipment develops, which cannot be immediately corrected by the Exhibitor, the Exhibitor shall notify the Company by telegraph or telephone, and shall refrain from further use of the Equipment until such defect or faulty adjustment has been corrected. In the absence of such notification it shall be assumed that the Equipment is in satisfactory condition.

13. *Insurance.*—The Exhibitor agrees that upon and after the arrival of the Equipment at the town of destination (commencing immediately upon receipt of information from the common carrier that it has so arrived), it shall be kept insured at the expense of the Exhibitor against loss or damage by fire to the amount of at least the aggregate installation payments herein stipulated, loss, if any, to be adjusted with and payable to the Company as the owner of the Equipment, and in the event of loss, the Company will apply any moneys recovered by it towards the repair or replacement of the leased equipment either in the same theatre or, in the event of the Exhibitor ceasing to operate the

Digitized by Google

said theatre, then in another theatre of similar character, in the same zone or neighborhood, not theretofore so equipped, satisfactory to the Company, and managed by the Exhibitor or an affiliated corporation or concern. Unless the Exhibitor shall promptly affect and maintain insurance satisfactory to the Company and shall lodge with the Company the policies or certificates therefor, the Company may at its option and so long as any of the installation charges remain unpaid, effect and maintain such insurance as it may deem advisable and arrange for the premiums to be billed directly to the Exhibitor, who shall promptly pay the same. The exhibitor agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements. It is mutually understood and agreed that after shipment of said equipment, all risk of loss thereof or damage thereto shall be borne by the Exhibitor.

14. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all taxes, license fees, and any and all other municipal, county, state, or other public charges that may be charged or levied against the Equipment or against the Company by reason of its ownership of the Equipment.

15. *Access to Equipment.*—The Exhibitor will permit the Company, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, including hours of performance, for the purpose of examining and inspecting the Equipment and for the purpose also of instructing motion picture operators, not employed by the Exhibitor, in the operation thereof (but only in such manner and at such times as not to interfere with regular performances) and will grant to the Company full opportunity to make such adjustments therein and repairs thereof as, in the opinion of the Company, are necessary or desirable. The Exhibitor will, through its operators, electricians, and other employees, facilitate such examinations, inspections, adjustments, and repairs, and at all reasonable hours and times have available and supply electric current of suitable voltage and character therefor. The Exhibitor will grant similar access to the Theatre to representatives and employees of the Company for a reasonable length of time (depending on the size and situation of the Theatre) prior to the "Service Day", for the purpose of installing and testing the Equipment and will also grant such access, after the expiration or termination of this license to permit representatives of the Company to disconnect, pack, and remove the Equipment.

16. *Liability or Interruptions, Injuries, etc.*—The Company shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever, and the Exhibitor agrees to indemnify the Company and save it harmless on account of any such loss or damage. The Exhibitor agrees to indemnify the Company for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

17. *Title to Equipment.*—All of the sums agreed to be paid by the Exhibitor to the Company by any of the provisions hereof, however designated, calculated, or described, are items forming part of the agreed consideration for the license granted hereby and are so paid by the Exhibitor and so received by the Company, and notwithstanding any termination or expiration of this license, all such sums theretofore paid may be retained by the Company without prejudice to the Company's right to recover any additional amounts which may be due. Title to and ownership of all equipment furnished pursuant to any of the terms hereof (including all parts, accessories, batteries, tubes, wiring, and incidental mechanism and tools of all kinds) is and shall at all times be and remain vested in the Company.

18. *Events of Default.*—This agreement and the license hereby granted shall, at the option of the Company, terminate and come to an end upon the happening of any of the following events, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, within ten days after such item or sum is or may become due, and as to this provision time shall be of the essence.

Digitized by Google

(c) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment.

(d) Upon the removal of the Equipment or any part thereof from the location and position in which it was installed by the Company.

(e) Upon the failure of the Exhibitor to permit access to the Equipment by the Company for the uses and purposes herein set forth.

Except as to the provisions of subdivisions (a), (b) and (e) of this section the foregoing provisions for the termination of this license in the event of default shall not be effective until the Company shall have notified the Exhibitor by registered mail that it is in default, specifying in what particular, and until a period of fourteen days shall have been given to the Exhibitor to remove or correct such default, but any and all obligations imposed upon the Company by virtue of this agreement shall be suspended while the Exhibitor shall be in default.

19. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to the Company in good order and condition, reasonable wear and tear and obsolescense due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted and the Company may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor will cooperate in such removal. If this license shall be terminated by default, the Company shall thereupon, without notice, have the right to take immediate possession of said Equipment, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter with the aid and assistance of any person or persons the Theatre or other promises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. The Exhibitor expressly covenants that in any such event no claim will be made for damages on account of such removal or otherwise, and the exhibitor further agrees that it will hold and save harmless the Company from and against any and all claims for damages by any parties whatsoever on account of such removal.

20. *Patent Protection.*—The Company agrees that subject to the provisions hereof, it will at its own expense defend any and all actions which may, during the term hereof, be brought against the Exhibitor for infringement of patents by reason of the employment by the Exhibitor of apparatus and equipments furnished by the Company hereunder and used for the purpose and in the manner contemplated by this agreement, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the court of last resort in any such action or suit on account of any such infringement; provided that the Exhibitor shall give the Company prompt notice of such action or suit, full information, and all reasonable cooperation in connection therewith, and full opportunity to defend the same, and provided further that this agreement shall not extend to any infringement arising from the use of any of said Equipment in combination with apparatus or things not furnished by the Company and that the liability of the Company under this agreement shall in no case exceed the total amount paid hereunder by the Exhibitor to the Company.

21. *License Nonexclusive.*—Nothing in this contract shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood, or as preventing or prohibiting the Company from entering into similar contracts of license for the use and installation of similar equipment in competing theatres.

22. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of the Company. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and their respective successors and legal representatives and shall be interpreted according to the laws of the State of New York.

23. *Period of License.*—This license shall be for a term of ten years from the Service Day as herein defined, but if the installation charge shall have been fully paid and the Exhibitor shall not be in default as to any of the provisions of this agreement, the same may be terminated at the option of the

Digitized by Google

Exhibitor after the expiration of three years from the Service Day upon not less than six months' written notice given by the Exhibitor to the Company of intention so to terminate and the payment to the Company of a sum sufficient to defray the cost to the Company of removing the Equipment.

24. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

25. *Cancelling Previous Agreement.*—Reference is hereby made to a certain agreement between The Vitaphone Corporation and the Exhibitor dated ----------, granting a license to the Exhibitor to use Vitaphone Equipment in said Theatre, which agreement has been assigned to the Company, and the parties hereto mutually agree that this agreement on ---------- ----------, be and the same hereby is substituted for said prior agreement with the Vitaphone Corporation, and said prior agreement on said date be and the same hereby is terminated and all rights of the parties hereto terminated. Any and all payments heretofore made and promissory notes delivered by the Exhibitor to The Vitaphone Corporation applying to the installation fee shall be considered as having been made and delivered under the provisions and pursuant to the terms of the present agreement and to be, to the extent thereof, compliance with the provisions of the present agreement.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

ELECTRICAL RESEARCH PRODUCTS, INCORPORATED.

(as to Exhibitor)

WESTERN ELECTRIC CO., INC.,
New York, September 27, 1935.

COMMITTEE ON PATENTS,
House of Representatives, United States,
New York, N. Y.

(Attention Mr. Chas. A. Welsh, Jr.)

DEAR MR. WELSH: With reference to your request with regard to the apparatus and service account under the sound picture agreements of Electrical Research Products, Inc., I am advised that the amount collected on this account by Electrical Research Products, Inc., is approximately $89,476,000.

Yours very truly,

E. J. MORIARTY, *General Attorney.*

AMERICAN TELEPHONE & TELEGRAPH CO.,
New York, October 14, 1935.

Mr. CHARLES A. WELCH, JR.,
New York, N. Y.

DEAR SIR: In response to your telephonic request I take pleasure in sending you herewith a copy of the agreement between the General Electric Co. and this company, dated July 1, 1926, for which the agreement you now have was substituted.

Very truly yours,

G. E. FOLK, *General Patent Attorney.*

Digitized by Google

AGREEMENT BETWEEN WESTERN ELECTRIC AND AMERICAN TELEPHONE & TELEGRAPH

This agreement made this 6th day of February, A. D. 1882, by and between the American Bell Telephone Co., a corporation created and existing under the laws of the Commonwealth of Massachusetts, of the first part, and the Western Electric Co., a corporation created and existing under the laws of the State of Illinois of the second part.

Witnesseth: Whereas said second party desires to be employed by said first party to manufacture the telephones required by it, said first party, and to be licensed to manufacture telephonic appliances and apparatus, other than telephones under letters patent now owned, or controlled, or which may hereafter be owned or controlled by said first party, and whereas said second party owns certain inventions, patents, and rights under patents relating to telephones and telephonic appliances.

Now therefore it is agreed

1. Said second party agrees that it will if said first party shall elect to purchase the same at any time within 6 months from the date hereof, sell, assign, and transfer to the first party at the actual cost thereof to it, said second party, either or any, or all the inventions in electrical speaking telephones, or improvements therein, or applicable thereto, which it, said second party, now owns, and further that it, said second party, will from time to time if, and whenever it shall acquire any inventions in electric speaking telephones, or improvements therein, or applicable thereto, forthwith notify said first party thereof and that it will, in case said first party shall elect to purchase the same within 6 months after such notice sell, assign, and transfer the same to said first party at the actual cost thereof to said second party.

The word "telephone" as used in this contract includes all instruments employed for the electrical transmission of articulate speech, including therein all attachments and devices which serve to cause to improve, or to modify, the articulating current, or the effects thereof.

2. Said first party agrees that it will employ said second party during the existence of this contract to manufacture telephones required by it, the American Bell Telephone Co., whether for use in the United States, or for export, upon the terms and conditions following—that is to say:

Said telephones shall be manufactured only at such of the manufacturies of said second party as said first party may from time to time designate.

At all times during their manufacture and upon their completion the instruments and the materials employed shall be subject to the inspection and acceptance of superintendents and inspectors, appointed by said first party.

The price to be paid therefor shall be the actual cost thereof, with an addition of 20 percent of such cost as manufacturer's profit.

Said second party shall promptly manufacture and supply all telephones ordered by said American Bell Telephone Co. and shall provide itself with facilities for making them in such quanities as the cost of business may demand.

Said telephones shall be of such patterns and styles and shall embody such inventions and improvements as said first party may from time to time prescribe, and shall be made in all respects as they shall direct as to style, material, workmanship, and finish.

In addition to the patent marks and figures said telephones shall bear such other marks and figures as said American Bell Telephone Co. shall from time to time direct and no others.

Said manufacture shall be subject to such regulations as may in the opinion of the first party be necessary for its protection and as it shall from time to time prescribe to said second party. Except as in this article provided for the second party shall engage in the manufacture of telephones within the United States only under such restrictions as the first party may from time to time impose.

Said second party faithfully complying with the terms of this employment, said first party agrees that it will during the existence of this contract employ no others to manufacture telephones.

3. Said second party hath granted and doth hereby grant to the first party the sole and exclusive right and license during the full term for which patents thereon have been, or may be granted, to make, use, and sell, and to license others, except only the existing licensed manufacturers of said first party named in article 4 hereof, to make, use, and sell in call bells, switches, and other telephonic appliances, any inventions or improvements therein, which

Digitized by Google

it, said second party, does now or may hereafter own or control, in whole or in part, by contract or otherwise, whether patented or not.

"Telephonic appliances" include calls, switches, switchboards, annunciators, exchange furniture, and other apparatus, and devices adapted for use on or for telephone lines, except telephones as above defined.

The second party agrees that it will from time to time and at all times do, execute, and deliver such other and further acts and instruments, if any, as may be necessary to secure to and vest in said first party such sole and exclusive right and license.

4. Said first party hereby grants and agrees to grant (subject, however, as to inventions hereafter directly acquired by said first party to the provisions of (*j*) of this article) to the second party a license exclusive, except as hereinafter stated upon the terms and conditions and subject to the limitations herein expressed, during the full term for which letters patent thereon have been or may be granted, to make and to sell call bells, switches, and other telephonic appliances as above defined, embodying any inventions or improvements thereon which it, said first party, does now or may hereafter own or control (including herein the inventions and improvements licensed to it, said first party, by said second party in the previous article hereof) but said second party shall and said second party hereby agrees that it will—

(*a*) Assume, and pay, or discharge any and all royalties and other obligations which said first party is, or may be bound to pay or perform on, or on account of said inventions, or any of them.

(*b*) Within the United States sell such apparatus to the licensees of telephones of the American Bell Telephone Co. at prices not exorbitant or unreasonable and under the terms and limitations hereinafter stated; such prices are to be uniform for the different classes of licensees of said American Bell Telephone Co.—and to sublicensees and nonlicensees of said American Bell Telephone Co. only under such restrictions as the first party may from time to time impose.

(*c*)

(*d*) Mark such apparatus in addition to the patent numbers and marks with such other numbers, marks, notices or names and in such manner as said first party shall from time to time prescribe.

(*e*) Promptly manufacture and supply all such apparatus as it is hereby authorized to supply, and of such patterns and styles, and embodying such inventions and improvements as may be ordered by the parties to whom it is authorized to dispose of the same, and will provide itself with facilities for making such apparatus in such quantities as the course of business may demand.

(*f*) Will, during the continuance hereof, make full and true returns under oath of all and singular telephonic appliances and apparatus manufactured hereunder if and when such return may be required by the first party.

(*g*) And except as in this article provided shall engage in the manufacture of telephonic appliances within the United States only under such restrictions as the first party may from time to time impose.

(*h*) The party of the second part agrees that all instruments, or apparatus, manufactured under this license, shall be of the most approved forms and first class in point of material, finish, and workmanship and shall be subject to the inspection of the party of the first part.

(*i*) The license hereby granted is not exclusive as to inventions, or improvements in cables, conductors, insulators, or the manner of constructing and arranging lines (apart from switches and instruments) and

The rights in this article granted are subject to the existing rights of Post & Co. of Cincinnati, Ohio, under contract dated June 27, 1879, with the National Bell Telephone Co.; of Davis and Watts, of Baltimore, Md., under contract dated June 24, 1879, with the National Bell Telephone Co. of the Electric Merchandising Co. under contract dated June 11, 1879, with the National Bell Telephone Co.; and to the manufacturing rights of the Telephone & Telegraph Construction Co. under contract dated October 24, 1877, with Gardiner G. Hubbard, trustee. But the first party agrees that it will within 6 months after request therefor from said second party give notice to terminate such of such last-named contracts as can be so terminated as therein provided; and it is agreed that the second party shall until such termination be entitled to receive all royalties accruing to the first party thereunder after July 1, 1881, on account of manufactures less only royalties which said first party may be bound to pay on account thereof.

Digitized by Google

(*j*) In case said first party shall hereafter acquire any invention, or inventions, in telephone appliances as above defined, other than such as it may hereafter acquire by license from the second party under article 3 hereof it shall forthwith notify said second party thereof, and such invention, or inventions, shall in case said second party shall so elect within 6 months from the date of such notice, come under the provisions of this article 4 hereof with like effect as if such invention, or inventions, were now owned by said first party; but the second party, in case it shall elect to have such license, shall forthwith upon making such election repay to said first party the cost of such invention or inventions and assume any and all royalties and other obligations which said first party may be bound to pay or perform on or on account of such invention, or inventions.

5. Whereas the due prosecution of the business of said telephone company and of its licensees, users of its telephones, requires that telephones and telephonic appliances of the most approved forms and workmanship be promptly furnished, and, as herein provided, and whereas the said telephone company is unwilling to permit the reasonable expectations of its licensees in this regard to be disappointed, and whereas the time required to ascertain judicially whether the second party shall or shall not, have failed to perform its obligations hereunder, would cause a delay which might work great, irreparable, and unascertainable damage to said telephone company and its said licensees, now it is an integral part of this contract, and is also a limitation of, and an exception to the license hereby granted, and the employment hereby contracted for, that—

1. Whenever the directors or executive committee of said telephone company shall be of opinion that the second party has failed in its obligations in this respect, or that there is imminent danger, or probability, that it will so fail, the said telephone company may without notice on demand forthwith manufacture, or cause to be manufactured elsewhere, either by itself or others, such instruments as in its opinion may be required to meet the emergency and may continue, and prepare to continue, such manufacture elsewhere so long as in its opinion may be needful; and for the purpose of obtaining such supply, the opinion of its directors, or its executive committee, arrived at in good faith, shall be conclusive as to its right so to obtain a supply elsewhere, and its action, based thereon, shall not be restrained by any court or judicial power whatever; but such decision shall not terminate this contract and license, nor shall it prevent the second party from furnishing apparatus to any persons who may lawfully order the same according to the terms hereof.

2. If it shall thereafter be determined by agreement of the parties, or by the final judgment of any court of competent jurisdiction, that the opinion so acted on by said telephone company was erroneous, then the consequences of such error shall be that said telephone company shall pay to said second party all the profits which it, said second party, would actually have realized and receive if such supply, so obtained elsewhere, had been obtained of said second party and said decision of said telephone company shall not authorize it thereafter to obtain such supply elsewhere.

3. If it shall be determined by agreement of the parties, or by the final judgment of any court of competent jurisdiction, that said second party did violate, or failed to comply with, or has violated, or failed to comply with, any of the terms of this agreement, then this license to manufacture telephonic appliances shall be deemed to have been nonexclusive and the obligation to employ the second party to manufacture telephones to have ceased as from the time of such violation, or default, and said license shall remain nonexclusive, and the first party shall be under no obligation to employ the second party to manufacture telephones, unless and until said second party shall, upon notice from said first party, have remedied or repaired such default, violation, or neglect and shall have repaid and made good to said first party any and all loss, cost, damage, and expense occasioned thereby, or resulting therefrom, and shall reasonably satisfy said first party that it is prepared and intends to conform hereto, whereupon said license shall again become exclusive and the obligation to employ the second party to manufacture telephones shall revive, such license and such employment being, however, subject to all the terms, conditions, limitations, and stipulations, inclusive of this article, herein contained.

6. Existing interferences in cases of inventions in telephonic appliances shall be disposed of as counsel of the parties hereto may advise, to recognize and protect the right of the several inventors to their respective inventions, subject to the decisions of the Patent Office.

Digitized by Google

7. The first party agrees that it will, so long as, and insofar as the license herein granted the second party is and shall remain exclusive, consent to the use of its name either alone, or together with that of the second party, as the case may require, in all such suits as counsel of the parties may advise are necessary or proper for the protection of such rights against infringement, but the whole expense of such litigation shall be borne by the second party.

8. This contract shall remain in force until it shall be terminated by the mutual agreement of the parties hereto.

In witness whereof the American Bell Telephone Co. has caused these presents to be signed in its name and behalf of William H. Forbes, its president, and its corporate seal to be hereto affixed, and the Western Electric Co. has caused these presents to be signed in its name and behalf by Anson Stager, its president, and its corporate seal to be hereto affixed the day and year first above written.

[Before the execution hereof the following interlineations were made, viz: On p. 3 the word "employment" (substituted for the word "agreement" erased). On p. 4 the word "thereon" and the words "except only the existing licensed manufacturers of said first party named in art. 4 hereof"; on p. 4 the words "or perform"; on p. 7 the words "to the manufacturing rights" and (at the end of par. (i)) the words "on account of manufactures less only royalties which said first party may be bound to pay on account thereof"; on p. 8 the words "or perform" and the word "said"; on p. 9 the words "or has violated or failed to comply with".]

Memorandum of an agreement made this 8th day of April 1908 between the American Bell Telephone Co., a corporation organized under the laws of Massachusetts, of the first part, and the Western Electric Co., a corporation organized under the laws of Illinois, of the second part,

Witnesseth: That whereas the parties hereto executed on the 6th day of February 1882 a certain contract relating to the manufacture of telephones and telephonic apparatus and it is desired that certain changes be made in said contract.

Now, therefore, it is mutually agreed that said contract shall be modified as follows:

1. That clause 2 be modified by striking out the words:

"Except as in this article provided for the second party shall not engage in the manufacture of telephones within the United States."

and substituting in place thereof thefollowingwords:

"Except as in this article provided for the second party shall engage in the manufacture of telephones within the United States only under such restrictions as the first party may from time to time impose."

2. That the following be substituted for paragraph (*b*) of clause 4:

"Within the United States sell such apparatus to the licensees of telephones of the American Bell Telephone Co. at prices not exorbitant or unreasonable and under the terms and limitations hereinafter stated; such prices are to be uniform for the different classes of licensees of said American Bell Telephone Co.—and to sublicensees and nonlicensees of said American Bell Telephone Co. only under such restrictions as the first party may from time to time impose."

3. That paragraph (*e*) of clause 4 be canceled.

4. That the following be substituted for paragraph (*d*) of clause 4:

"Mark such apparatus in addition to the patent numbers and marks with such other numbers, marks, notices, or names and in such manner as said first party shall from time to time prescribe."

5. That the following be substituted for paragraph (*f*) of clause 4:

"Will, during the continuance hereof, make full and true returns under oath of all and singular telephonic appliances and apparatus manufactured hereunder if and when such return may be required by the first party."

6. That the following be substituted for paragraph (*g*) of clause 4:

"And except as in this article provided shall engage in the manufacture of telephonic appliances within the United States only under such restrictions as the first party may from time to time impose."

WESTERN ELECTRIC CO., INC.,
195 Broadway, New York, September 25, 1935.

COMMITTEE ON PATENTS,
House of Representatives,
Fifth Avenue Hotel, New York, N. Y.
(Attention Mr. Charles A. Welsh, Jr.)

DEAR MR. WELSH: In accordance with your request, I am handing you herewith copies of the contract forms covering the leasing by Electrical Research Products, Inc., to exhibitor licensees of sound picture reproducing equipment.

I also hand you a small binder of photostatic copies of the general contractual arrangement made on May 11, 1928, relating to Paramount Publix Theatres.

Yours very truly,

E. J. MORIARTY,
General Attorney.

PARAMOUNT FAMOUS LASKY CORPORATION TO ELECTRICAL RESEARCH PRODUCTS, INC.—ORDER AGREEMENT WITH SCHEDULES A AND B AND EXHIBITORS' AGREEMENT FORM DATED MAY 11, 1928

MAY 11, 1928.

ELECTRICAL RESEARCH PRODUCTS, INC.,
195 Broadway, New York City.

GENTLEMEN: We hereby place with you orders for 55 reproducing equipments of the types standardized by you and suitable for installation in the theaters listed in schedule A hereto annexed, for such approximate installation dates as are indicated on said schedule.

We agree that for each such theater and for any other theater owned, controlled, or operated by us, or in which we have a proprietary interest, for which such equipment may be ordered from time to time, a contract shall be entered into for the individual theater by the company which owns, operates, or controls the theater, on your standard form of exhibitor's license agreement which is applicable to the particular equipment determined upon as above, subject to the modifications of such exhibitor's license agreement set forth in schedule B hereto annexed, and such agreement shall in each case be deemed amended as provided in said schedule B. It is understood that the reproducing equipments covered hereby shall be furnished upon the terms set forth in the letter from you to us of even date herewith, insofar as such terms relate to said reproducing equipments.

Very truly yours,

PARAMOUNT FAMOUS LASKY CORPORATION,
By ADOLPH ZUKOR, *President.*

APRIL 13, 1933.

Mr. A. E. CASE and
Mr. J. J. LAWRENCE:

Herewith photostat copy of a list of theaters denominated "Schedule A, Electrical Research Products, Inc., and Paramount Famous Lasky Corporation, dated May 11, 1928." This list was substituted for the list of 55 theaters originally attached to the letter of May 11, 1928, from Paramount Famous Lasky Corporation to E. R. P. I. ordering the installation of reproducing equipments in the theater shown in the schedule.

Digitized by Google

The first page of the original of this list bears the following notation: "O. K. W. B. Saal." It is my understanding that at the time this list was prepared Mr. Saal was in charge of theater matters for Paramount. His signature has not reproduced very well on the photostat copy, but it is entirely plain on the original.

L. E. SHERWOOD.

SCHEDULE B

ANNEXED TO LETTER DATED MAY 11TH, 1928 FROM PARAMOUNT FAMOUS LASKY CORPORATION TO ELECTRICAL RESEARCH PRODUCTS, INC.

The following modifications of the so-called Exhibitors' License Agreement are to apply to the contracts referred to in the letter to which this Schedule

Digitized by Google

is annexed, the references herein being to several paragraphs in said Exhibitors' License Agreement.

Par. 14: "*Events of Default.*"

Par. 15: "*Repossession of Equipment.*"

It is understood that Products shall give notice stating the default, which notice shall be given by registered mail addressed to the particular exhibitor at the theatre in question and a copy thereof addressed to the exhibitor's home office in New York City, before Products shall exercise the option to terminate, except, however, that in the event of bankruptcy of the exhibitor no notice from Products shall be required.

Par. 17: "*Patent Protection.*"

In the event that in any action or suit for infringements covered by the above paragraph a judgment or decree for profits, damages, or costs on account of any such infringement shall be entered against the Exhibitor by any court of competent jurisdiction, Products agrees either to pay and satisfy such judgment or decree or, at its own expense, to take all necessary action (as by appeal or writ of certiorari, including the furnishing of all necessary bonds) to suspend the operation thereof pending final judgment by a court of last resort.

It is agreed that the provision at the end of paragraph 17, which reads as follows:

"and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products"

shall be considered eliminated with respect to the agreements referred to in the letter to which this is annexed.

Paragraph 19. "Period of License."

The license shall be for a term of sixteen (16) years instead of ten (10) years, as stated in the above paragraph.

Paragraph 21: "Non-Assignable."

If the Exhibitor ceases to own or operate the Theatre he may assign this license to the successor operator of the Theatre, provided such successor operator assumes full performance of all of the obligations of this license in a manner satisfactory to Products; and provided further, that if said assignment takes place prior to the payment in full of the installation charges herein provided, the Exhibitor herein named shall remain liable for the unpaid balance of such charges.

287 T S—12 M

Contract No._____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____, 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County, and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth, that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (*a*) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

(*b*) *Service Day.*—Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

Digitized by Google

and will endeavor to complete such installation on or before _____ 192__, which shall be known as the "Tentative Service Day." Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously. The day on which installation of the Equipment shall be completed and the Equipment made available to the Exhibitor as ready for public exhibition whether prior or subsequent to the "Tentative Service Day" shall be known as the "Service Day."

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain, and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound records (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sounds records with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make peri-

Digitized by Google

odical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an installation charge of_____Dollars ($_____) payable as follows:

The sum of_____Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the sum of_____Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the "Service Day", and the balance by a Series of twelve (12) promissory notes, each in the principal amount of_____Dollars ($_____) satisfactory to Products made by the Exhibitor and delivered to Products on or before the execution of this instrument, the first of said notes maturing one month after the "Service Day" and the remaining notes at monthly intervals thereafter, and all bearing interest at the rate of 6% per annum from the "Service Day." Products is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined by it the respective maturity dates thereof and the date from which interest shall run. Upon the failure of the Exhibitor to pay any of the said notes as and when the same become due all of the said notes shall forthwith become due and payable.

6. *Service Inspection Charge.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay Products throughout the term of the license hereby granted a service and inspection payment, payable weekly, which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the "Service Day" and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule, the service and inspection payment shall be $_____ per week, which charge shall not be exceeded during the first two years of the period of said license and thereafter for the balance of the term of said license shall not exceed the sum of $_____ per week.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for powe rsupply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

Digitized by Google

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for any defect or change of condition in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing, or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of any of the notes provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the term of this license, the license hereby granted and all obligations imposed upon Products by virtue of this agreement shall, at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided, be suspended during the continuance of such default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor

Digitized by Google

or not in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same; and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the functions required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Non-exclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of ten years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any of the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agree-

Digitized by Google

ment in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor be binding upon the parties and their respective successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of New York.

22. This agreement shall be subject to the modifications set forth in Schedule B annexed to the order agreement entered into between Products and Paramount Famous Lasky Corporation dated May 11, 1928.

(As to Exhibitor)

ELECTRICAL RESEARCH PRODUCTS, INC.,
May 11, 1928.

PARAMOUNT FAMOUS LASKY CORPORATION,
New York City.

GENTLEMEN: Referring to the recording-license agreement with you which we are executing simultaneously herewith, there are several matters relating generally to such agreement or incidental to our contractual relationship which we have discussed and which, in consideration of the execution of said recording license agreement, are agreed to by and between us as follows:

1. We understand that you are desirous of procuring from us licenses under such foreign patents and rights as we have or may acquire, to distribute in countries foreign to the United States, sound records produced in the United States with our recording equipment and we are willing to enter into agreements for these purposes. It is understood between us that if and when such agreements are consummated the royalties to be payable thereunder shall be for the following foreign countries or territorial divisions the amount set opposite each, determined on a basis similar in each case to that provided in subparagraphs (1) and (3) of paragraph (*b*), section 1, article III of your recording license agreement for the United States.

	Rate of royalty
United Kingdom and Ireland	$100.00
Germany	50.00
Australasia	62.50
Central Europe	35.00
France and Belgium	25.00
South America	40.00
Scandinavia and Denmark	20.00
Spain and Portugal	12.50
Italy	15.00
Cuba	7.50
Mexico	7.50
India and Indo-China	7.50
China and Japan	15.00
Holland	10.00
Turkey, Egypt, and Asia Minor	7.50
South Africa	10.00
Canada	75.00

It is further understood that if any such agreements for the foreign field include the distribution in such field of news reels produced in the United States the amount of royalty with respect thereto shall be at a rate equal to

Digitized by Google

one-fifth of the amount set forth opposite each of the countries or territorial divisions above and shall be determined on a basis similar in each case to that provided in subparagraph (2) of paragraph (*b*) of section 1 of article III of the recording license agreement.

If, upon investigation of conditions in any foreign country, we determine that we do not desire to exploit the installation of reproducing equipment, we will notify you and will offer no objection to your developing the installation of reproducing equipment in such foreign country in such manner and by such means as may be reasonably consistent with our mutual interests. You may call upon us for a statement of our policy as regards any foreign country in these respects at the expiration of 2 years from the date hereof.

2. Under our agreements with certain of our other licensees we may be entitled to obtain for you certain rights to use artists and performers for recording sound, and it is understood that if you desire to obtain any of these rights you shall similarly assign rights which you may have or obtain with respect to artists and performers for recording sound, so that they will be available to our other licensees, and that if it is desired by our various licensees that an agency or bureau be established for the purpose of engaging artists and performers for recording sound, you may participate in the use of such agency or bureau, on agreeing to pay your share of the maintenance thereof, it being understood that the services of such agency or bureau shall not be available to any but our licensees. By artists and performers, as above referred to, we do not mean to include motion-picture actors, whether stars or otherwise. By an instrument which is being executed simultaneously herewith we are granting you certain rights under a copyright agreement dated September 5, 1927, between us and Edwin C. Mills, acting as agent and trustee for certain music publishers. In connection with said grant of rights to you under the Mills agreement, you agree that the expenses to be apportioned by us may include the expenses incurred by us in negotiating the Mills agreement. It is contemplated that we shall negotiate on behalf of all our licensees other agreements covering copyrighted music and that we shall give all of our licensees opportunity to participate in the benefits of such agreements. You agree that in the event you participate in such agreements you will share in the expenses of the negotiation thereof and our expenses in performing and carrying out the terms and provisions thereof, your share to be determined by our equitably apportioning between our licensees availing themselves of such agreements any royalties or other payments which we are required to make under such agreements, together with the expenses above referred to, and also the expenses in connection with, or on account of, or arising from any litigation in respect of the subject matter of such agreements, except that you shall not be liable for any contribution toward or for any part of any loss, damage, or expense that we may suffer, incur, or assume by reason of any act or omission of any licensee of ours other than you or your associated companies.

3. We herewith consent, pursuant to the provisions of article II, section 1, paragraph (c) of the recording-license agreement, so long as you or your associated companies distribute the productions of Christie Film Co., Inc., that the limitations of said paragraph (*c*) with respect to number of motion pictures of other producers shall not apply to the productions of Christie Film Co., Inc., except that the number of feature pictures produced by it shall not exceed five on any one calendar year. This consent is condition upon Christie Film Co., Inc., executing a recording-license agreement with us satisfactory to us. It is understood that this consent is subject to the condition that you pay royalties, at the rates provided in your recording-license agreement, with respect to the motion pictures produced by Christie Film Co., Inc., and distributed by you, which pictures are accompanied by sound records.

4. It is understood between us that it may become necessary in connection with our other contractual obligations to determine the amount of your gross revenue derived from the exercise of the license granted by us to you, and in order to facilitate this determination you agree that from time to time as and when we request you to do so in writing you will furnish us a figure representing such part of your gross revenue and that of your associated companies as is derived from the production, lease, or other distribution of sound records, and of motion pictures accompanied by sound records. You also agree to furnish us as far as you can in your opinion consistently with your other business interests the amount of the gross revenue received by you on particular motion pictures accompanied by sound records, and with such other information as you

Digitized by Google

feel you can in your opinion consistently give us from time to time to enable a fair estimate to be made as to the proportion of your gross revenues which are derived from the exercise of your licenses from us. We agree that we will not require any such information from you as is referred to in this paragraph except when we deem it necessary in connection with our business, and will not disclose the information to others unless we deem it necessary to do so in connection with existing contracts, and furthermore that such information shall have no bearing upon the royalties payable by you under your recording-license agreement.

If the time shall arrive when all your productions have sound records accompanying them, you shall not be required under this provision to furnish the total gross of your business, but in that event, you will furnish us with figures showing the total gross on your motion-picture productions not featuring recognized stars and of such pictures featuring recognized stars as you in your opinion can consistently furnish.

If we desire and request you to do so in writing, you agree, at our expense, to have the certified public accountants regularly used by you certify to us the correctness of the figures which you furnish to us under this paragraph 4.

5. In order to promote the use of sound records in connection with motion pictures, and to make an adequate market for your productions and for our reproducing equipments, you agree that all theaters operated by you or by your associated companies shall install our reproducing equipments (which you agree are hereby adopted as the standard equipment for such purposes), wherever and as rapidly as in your judgment conditions permit, and we will supply such equipments as rapidly as we are able to after receipt of orders therefor, taking into account our other commitments, but as respects orders for reproducing equipment given us by you during the calendar year 1928 (other than your initial order which is now being placed with us) we agree that we will, subject to the provisions of our standard exhibitors' license agreements, install up to 50 of said equipments not later than 4 months after date of receipt of order. You further agree to promote in every reasonable manner the installation of our reproducing equipments in motion-picture theaters.

6. We agree to furnish to you and your associated companies from time to time during the period of the recording license agreement, reproducing equipment at our current prevailing charges for such equipment, and you and your associated companies agree to lease the same from us upon such basis. In the case of all installations made in theaters controlled or operated by you or your associated companies during the first 5 years from date hereof, we shall be entitled to an average net profit not in excess of 20 percent of our charge for furnishing and installing such equipment. At the end of said 5-year period an adjustment will be made between us and we will pay to you any excess over said average net profit of 20 percent which may be determined to be due to you, calculation being made on the basis set forth below. You, on the other hand, shall not be called upon to make any payment to us on account of its being determined at that time that we have not received an average net profit of 20 percent.

Such average net profit shall represent the difference between the net charges collected by us for furnishing and installing such equipment and the complete cost of such equipment installed, as follows:

"(*a*) Manufacturing cost computed in accordance with Western Electric Co.'s established accounting procedure used in determining complete standard cost for apparatus sold to the Bell System. You agree to accept the statement of the president of Western Electric Co., certified to by the firm of certified public accountants employed by Western Electric Co., as to such costs.

"(*b*) Installation cost computed in accordance with our established accounting procedure covering all the engineering, operating, and overhead expenditures and expenses relative to the furnishing and installation of reproducing equipments, except that past experimental engineering expenses and losses shall not be included in cost where such expenses and losses were incurred prior to January 1, 1928. You agree to accept the statement of the president of Electrical Research Products Inc., certified to by the firm of certified public accountants employed by us, as to such cost and as to the net profit above referred to."

7. Where reference is made in article IV of the recording license agreement to our charges including a net profit to us of 20 percent, it is agreed that such net profit shall be determined in accordance with our established

Digitized by Google

accounting procedure, and you agree to accept the statement of the president of Electrical Research Products Inc., certified to by the firm of certified public accountants employed by us, as to the net profit above referred to.

8. We understand that there are theaters in which you or your associated companies now have or may hereafter have a substantial proprietary interest which are not owned, controlled or operated by you or your associated companies. All of the provisions of this letter which refer to your associated companies shall be deemed to apply to the theaters in which you or your associated companies shall have such a substantial proprietary interest, except, however, that it shall be understood that as to installations made in such class of theaters the payment and credit terms for equipments shall be arranged between us and such respective theaters in the regular course of business. It is understood in this connection that you make no agreement to install equipments in such theaters, but that you do agree to use your best efforts to have our reproducing equipments installed in such theaters wherever and as rapidly as in your judgment conditions will permit.

9. Referring to subparagraph (4) of paragraph (*g*), section 1, article III of the recording license agreement, it is understood and agreed that the reference to theaters owned, controlled or operated shall be deemed to include theaters in which you or your associated companies have a substantial proprietary interest; also that the theaters referred to in said subparagraph (4) shall be limited to those at which the average gross weekly admission receipts exceed $2,000 per theater.

10. It is understood and agreed that except as herein otherwise specifically provided, the definitions referred to in said recording license agreement between us shall likewise apply to the terms used in this letter.

To indicate your agreement with the above, kindly accept this letter in the place provided for acceptance and return one copy to us.

Your very truly,

ELECTRICAL RESEARCH PRODUCTS, INC.,
By J. E. OTTERSON, *President.*

Accepted:

PARAMOUNT FAMOUS LASKY CORPORATION,
By ADOLPH ZUKOR, *President.*

The following are four Loew's theaters that are under the May 11, 1928, agreement:

Capitol Theater, New York, N. Y.; Embassy Theater, North Bergen, N. J.; Majestic Theater, Evansville, Ind.; Zeigfield Theater, New York, N. Y.

The Capitol Theater at New York appears on original schedule A. The other three theaters do not appear on schedule A but are under the blanket agreement.

J. J. LAWRENCE, *June 1, 1935.*

APRIL 13, 1933.

Mr. J. D. VAN WAGONER,
Paramount Publix Corporation, Paramount Building,
New York, N. Y.

MY DEAR MR. VAN WAGONER: Pursuant to our telephone conversation, I am enclosing herewith photostat copy of a list of theaters, denominated "schedule A, Electrical Research Products, Inc., and Paramount Famous Lasky Corporation, dated May 11, 1928."

This list was substituted for the list originally attached to the letter of May 11, 1928, ordering reproducing equipments from us. You will note that Mr. Saal, who, it is my understanding, was in charge of theater matters for Paramount Famous Lasky Corporation at the date mentioned, has placed an O. K. on the first sheet of the list. Mr. Saal's signature did not reproduce any too well on the photostat copy but is perfectly plain on the original.

I am having a complete check made of the theaters in the Southern Enterprises, Inc., system, to determine whether they are included in the above-mentioned schedule or whether we have separate contracts therefor. As soon as this is done I propose advising Mr. Linz, the receiver for Southern Enterprises, Inc., of the situation and will be glad to send a copy to you.

Very truly yours,

L. E. SHERWOOD.

EXHIBIT C—METRO GOLDWYN PICTURES CORPORATION

EQUIPMENT TO BE INSTALLED

5. The Exhibitor agrees to pay to Products in New York Exchange an installation charge of _____ Dollars ($_____), payable as follows:
The sum of _____ Dollars ($_____), on or before the execution of this instrument, receipt of which (with interest) is hereby acknowledged.
The sum of _____ Dollars ($_____), on the "Service Day".
The balance of the installation charge shall be evidenced by a series of thirteen (13) promissory notes made by the Exhibitor and delivered to Products on or before the execution of this instrument, which said notes are to be dated as hereinafter provided as of the fifteenth day of the month during which the "Service Day" occurs and are to bear interest at the rate of 6% per annum from said date. One-half of said balance shall be evidenced by twelve of said notes of equal principal amount which shall mature monthly beginning one month after the date thereof; the remaining half of said balance shall be evidenced by the thirteenth note which shall bear even maturity date with the twelfth note of the series. Products is hereby authorized by the Exhibitor to enter upon the face of any notes given hereunder, when the "Service Day" is determined by it, the date of the said notes, and the date from which interest shall run. Upon the failure of the Exhibitor to pay any of the said notes as and when the same become due, all of the said notes shall forthwith become due and payable.
6. In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay Products throughout the term of the license hereby granted a service and inspection payment, payable weekly, which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the "Service Day" and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be in accordance with Products' regular schedule of such charges as from time to time established. Under Products' present schedule, the service and inspection payment shall be _____ Dollars ($_____) per week, which charge shall not be exceeded during the first two years of the period of said license and thereafter for the balance of the term of said license shall not exceed the sum of _____ Dollars ($_____) per week.

---

286 T S—104 W
Contract No. _____

This Agreement made in triplicate in the City of New York, State of New York, this _____ day of _____ 192__, by and between Electrical Research Products, Inc. (subsidiary of Western Electric Company, Incorporated), a Delaware Corporation having its principal place of business in the City, County and State of New York (hereinafter called "Products"), licensor, and _____, a _____ Corporation having its principal place of business at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Exhibitor"), licensee, and operating the _____ Theatre, at No. _____ Street, in the City of _____, State of _____ (hereinafter called the "Theatre"):

Witnesseth that, for and in consideration of the covenants, stipulations, and representations herein set forth, the respective parties hereto agree as follows:

1. (a) *Grant of License and Installation of Equipment.*—Products hereby grants to the Exhibitor a non-exclusive non-assignable license to use in the Theatre (subject to all the terms, conditions, limitations, and agreements herein contained) the equipment hereinafter described for the electrical reproduction of sound in synchronism with, or as incidental to, the exhibition of motion pictures, or any performance given in conjunction therewith, and to employ (to the extent necessarily involved in such use of said equipment) the methods and/or systems of Products, under all United States patents and applications for United States patents, relating to said equipment or to such use thereof, which are now owned or controlled, or which may during the term of this agreement be owned or controlled by Products, or in respect of which it has or may hereafter during the term of this agreement have the right to grant such license.

Digitized by Google

(b) *Service Day.*—Products agrees to install in the Theatre sound reproducing equipment (herein referred to as "Equipment"), as follows:

---

and will endeavor to complete such installation on or before _____ 193__. Nothing herein contained shall be considered as a firm agreement on the part of Products to complete the installation of the Equipment on or before the said date, it being understood that the extent of the obligation of Products in this respect is limited to using its best efforts to procure the manufacture and delivery of the Equipment and to installing the same expeditiously.

2. *Use of Equipment.*—The Exhibitor agrees that it will use and employ the Equipment only in the Theatre, and that it will at all times during the period of this license keep, maintain and operate the Equipment in the manner from time to time prescribed by Products and in no other manner. The Exhibitor recognizes the highly technical mechanism and art involved in the inventions and construction of the Equipment, and in the making of sound record (in any form) for use therewith, and that the prestige and business reputation of Products might be seriously affected by imperfect operation of the Equipment or by its use with sound records which are not suited to it or which produce inferior results when used with the Equipment, and that use of said Equipment otherwise than as herein licensed may involve infringement of patent rights. Therefore, in order to secure and insure the functioning of the Equipment to the satisfaction of the parties hereto, the Exhibitor shall not, without the written consent of Products, move, alter, change, or modify the Equipment, nor add anything thereto nor take anything therefrom; nor break the seal upon any part or collection of parts which is or may be sealed by Products; nor operate, use, or employ the Equipment in any manner in conjunction with any sound record not made under license from Products for such use, unless such sound record is of such character that the Equipment will operate properly, reliably, and efficiently to reproduce sound from such sound record with accuracy of quality and adequacy of volume. Also, in order further to secure proper functioning of the Equipment as aforesaid satisfactorily to the parties hereto, it is agreed that all additional and renewal parts and assembled parts for the Equipment shall be obtained from Products. Nothing herein contained, however, shall be construed as prohibiting the Exhibitor from taking all reasonable steps, consistent with the general intent hereof, either alone or together with Products, to protect, correct, or repair the Equipment in the event of an accident or breakdown. The Exhibitor agrees that prior to the first public use in the Theatre of each film and/or sound record, it will cause such films and/or sound records to be run privately upon the Equipment for the purpose of ascertaining that the Equipment is in satisfactory condition and adjustment for the particular film and/or sound record. The Exhibitor expressly agrees that if at any time the Equipment fails to function satisfactorily, it will immediately notify Products by registered mail and telegraph, and the absence of such notification shall be conclusive as to satisfactory functioning of the Equipment.

3. *Removal to another Theatre.*—In the event that the Exhibitor shall for any reason cease to manage or to operate the Theatre, Products will, at the request of the Exhibitor, remove the Equipment to and install the same in another theatre designated by the Exhibitor and satisfactory to Products, provided, however, that the cost of such removal and installation shall be borne by the Exhibitor and that a new agreement for the unexpired term of this license shall be executed by the exhibitor operating such theatre (the Exhibitor hereunder thereupon becoming guarantor to Products of the performance of such new agreement).

4. *Instruction and Inspection Service.*—Products agrees to instruct the motion-picture machine operators of the Exhibitor in the manner and method of operating the Equipment, and will issue to each operator who has, in its opinion, satisfactorily completed a course of instruction in the operation of the Equipment, a certificate to that effect. Products further agrees, in order to perfect such instruction, and also in order to superintend the operation of the Equipment, to keep in attendance at the Theatre during the hours of performance and at such additional hours as may be necessary, an engineer or other person skilled in such operation for a period of one week following the day upon which the installation is completed and the Equipment made available to the Exhibitor as ready for public exhibition. Products also agrees to make periodical inspection and minor adjustments in the Equipment after it shall have been installed. Products may from time to time install such spare and renewal parts as may, in its opinion, be necessary to the satisfactory operation and maintenance of the Equipment.

Digitized by Google

5. *Installation Charge.*—The Exhibitor agrees to pay to Products in New York Exchange an initial charge of _____ Dollars ($_____) payable as follows:

The sum of _____ Dollars ($_____) on or before the execution of this instrument, receipt of which is hereby acknowledged, and the balance, namely, _____ Dollars ($_____) by a demand promissory note satisfactory to Products in the amount last mentioned, made by the Exhibitor and delivered to Products on or before the execution of this agreement and bearing no interest prior to presentation, which demand note Products agrees not to present for payment prior to the date on which the installation of the Equipment is completed and the Equipment made available to the Exhibitor as ready for public exhibition.

6. *Weekly Payment.*—In addition to any other payments required to be made by the Exhibitor hereunder, the Exhibitor agrees to pay to Products throughout the term of the license hereby granted, a weekly payment which, for the first two weeks of said term, shall be payable on the Saturday next succeeding the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use, and thereafter throughout the balance of said term on each and every Saturday in advance. The amount of such payment shall be _____ Dollars ($_____) per week for the first two years (104 weeks), and thereafter for the balance of the term of said license such weekly payment shall be in accordance with Product's then current schedule of weekly payments for similar licenses, but not exceeding one-fourth of the weekly payment hereinabove agreed upon to be paid for the first two years.

7. *Transportation Charges.*—The Exhibitor agrees to pay the cost of transporting the Equipment from the place of shipment to the Theatre, and to accept delivery thereof from the common carrier and make payment directly to the common carrier of freight and express charges thereon. The Exhibitor will also arrange for any necessary loading, trucking, and unloading to put the Equipment down inside the Theatre, and will directly defray the cost thereof.

8. *Payment for Parts, etc.*—The Exhibitor agrees to pay to Products its list installation charges as from time to time established for any additional equipment or spare or renewal parts, furnished or supplied by Products, upon delivery thereof and to pay the transportation charges thereon. The Exhibitor also agrees upon rendition of invoices to pay for any services rendered and expenses incurred by Products' employees in connection with and for the benefit of the Exhibitor, except for the regular periodical inspection and minor adjustment service hereinbefore provided for.

9. *Changes in Theatre.*—The Exhibitor warrants that the Theatre is or before said Equipment is installed will be supplied with suitable electric current; electric power leads of suitable capacity with outlets conveniently located for power supply to the Equipment; suitable space, properly ventilated, for the installation of the storage batteries and charging equipment; drapes for acoustic purposes, and suitable support for horns, and agrees to make such other reasonable changes, alterations, and modifications as may be necessary for the proper installation and accommodation of the Equipment, all at the expense of the Exhibitor and when and to the extent and in the manner prescribed by Products or its engineers, and agrees to comply with all local laws and ordinances relating to the use and operation of the Equipment and with any Fire Insurance Underwriters' requirements.

10. *Title to Equipment.*—Title to and ownership of all equipment at any time furnished hereunder and also all tools of all kinds, drawings, prints, and written descriptions and instructions, remains vested in Products.

11. *Taxes.*—The Exhibitor shall bear and discharge promptly any and all personal property taxes which may be charged or levied in connection with the Equipment.

12. *Access to Equipment.*—The Exhibitor will permit Products, through its designated agents, engineers, and mechanics, to have access to the Theatre at all reasonable hours, for the purpose of installing, and from time to time for the purpose of examining and inspecting the Equipment, and will grant to Products full opportunity to make such adjustments therein and repairs thereto as, in the opinion of Products, are necessary or desirable.

13. *Liability for Interruptions, Injuries, etc.*—Products shall not be responsible in any manner for any interruption of service arising from any cause or for

Digitized by Google

any defect or change of condtion in the Theatre or in the equipment thereof or in the electric current supplied thereto or for any loss or damage to persons or property in or upon the said premises for any reason whatsoever. The Exhibitor agrees to indemnify Products for, and save it harmless from any liability or injury to workmen whom the Exhibitor shall furnish to assist in the handling, installing or operating of the Equipment, and from any liability to any persons resulting from negligence of such workmen.

14. *Events of Default.*—This agreement and the license hereby granted shall, at the option of Products, terminate and come to an end upon the happening of any of the following events, hereby designated to be events of default, to wit:

(*a*) Upon the bankruptcy or insolvency of the Exhibitor or the assignment of any of its assets for the benefit of creditors.

(*b*) Upon the failure or refusal of the Exhibitor for any reason to pay any of the items or sums herein agreed to be paid by it, including the payment of the note provided for in Section 5 hereof, within five days after such item or sum is or may become due, and as to this provision time shall be of the essence.

(*c*) Upon the Exhibitor's ceasing to own or operate the Theatre, unless the Exhibitor shall previous to its ceasing to own or operate the Theatre have notified Products in writing of the date it will cease to own or operate the Theatre and shall have made provision, satisfactory to Products, for the care and custody of the Equipment or for the assumption of this agreement by the successor operator of the Theatre.

(*d*) Upon a breach by the Exhibitor of any of the covenants herein contained relative to the use or maintenance of the Equipment, continued for more than fourteen (14) days after notice thereof by registered mail from Products.

(*e*) Upon the removal of the Equipment or any part thereof without the consent of Products from the location and position in which it was installed by Products.

(*f*) Upon the failure of the Exhibitor to accept delivery of the Equipment from the transportation company or common carrier, or to facilitate the work of Products in installing the Equipment.

In the event of a default under any of the provisions of this section at any time during the first two years of the term of this license, the entire balance of weekly payments for the first two years shall be due and payable forthwith at the option of Products and whether or not it terminates this license or removes the Equipment as hereinafter provided. The license hereby granted and all obligations imposed upon Products by virtue of this agreement shall be suspended during the continuance of any event of default.

15. *Repossession of Equipment.*—Upon termination or expiration of this license by lapse of time or otherwise, the Exhibitor will surrender up and deliver possession of the Equipment to Products in good order and condition, reasonable wear and tear and obsolescence due to proper use thereof in the manner and place and for the purpose set forth in this agreement only excepted, and Products may repossess the Equipment and may, for the purpose of reducing the same to possession, enter the Theatre or any other premises where said Equipment may be and without any legal proceedings whatever possess and remove said Equipment, and the Exhibitor agrees to cooperate in such removal. If this license shall be terminated by default, or if the Exhibitor permits any of the events of default, hereinbefore enumerated, to occur, whether or not Products shall exercise the option to terminate this agreement, Products shall thereupon have the right without notice to take immediate possession of said Equipment, or any part thereof, and for that purpose may pursue the same wherever it or any part thereof may be found and may enter, with the aid and assistance of any person or persons, the Theatre or other premises of the Exhibitor and such place or places whatsoever, whether belonging to the Exhibitor or not, in which the Equipment or any part thereof may be placed, and may take and seize the same to its own proper use forever, free from any right of the Exhibitor under this agreement. Products shall also have the right in like manner to enter the said premises and remove the Equipment in the event of the said premises being destroyed or damaged by fire or otherwise, to an extent which, in the opinion of Products, endangers the Equipment. The Exhibitor expressly covenants that in any such event no claim will be made for damage on account of such removal or otherwise, and the Exhibitor further agrees that it will hold and save harmless Products from and against any and all claims for damages by any parties whatsoever on account of such removal.

Digitized by Google

16. *Replacement of Equipment in the Event of Destruction.*—In the event of the partial or total destruction of the Equipment during the term of this license by fire or any other cause, without fault or neglect on the part of the Exhibitor, provided the Exhibitor shall not be in default in respect to any of the terms of this agreement, and provided the Exhibitor shall continue to operate the Theatre or after any necessary repairs to the Theatre shall resume its operation, Products will, at its own expense, either repair the Equipment, or if, in the sole judgment of Products, such destruction is so extensive as to render repair of the Equipment impracticable, install in the Theatre equipment then manufactured by or for Products as nearly similar as possible to the type of Equipment so destroyed.

17. *Patent Protection.*—Products agrees that subject to the provisions hereof it will at its own expense defend any and all actions and suits which may during the term hereof be brought against the Exhibitor for infringement of patents by reason of the use by the Exhibitor, for the purpose and in the manner contemplated by this agreement, of apparatus and equipment furnished by Products hereunder, and will pay or satisfy all judgments and decrees for profits, damages, and/or costs which may be finally awarded against the Exhibitor by the Court of last resort in any such action or suit on account of any such infringement, provided that the Exhibitor shall give Products immediate written notice of such action or suit, full information and all reasonable cooperation in connection therewith and full opportunity to defend the same, and provided further, that this agreement shall not extend to any infringement or claim of infringement arising from any use of any of said equipment in combination with any apparatus or thing (not including films or records of Products' licensees) not furnished by Products, and that the liability of Products on account of any such infringement or claim of infringement shall be limited to its agreements in this paragraph contained and shall in no case exceed the total amount paid hereunder by the Exhibitor to Products. To the end that Products may protect itself and the Exhibitor from claims for infringement of patents, it is agreed that Products may at any time substitute for any of the Equipment or parts thereof which may have been furnished to the Exhibitor hereunder, other equipment or parts which Products shall after test determine to be equally suitable for performing the function required, such substitution to be made without additional expense to the Exhibitor and with the least possible inconvenience to it or interruption of its business.

18. *License Nonexclusive.*—Nothing in this agreement shall be construed as granting to the Exhibitor an exclusive right or license to operate the Equipment in any particular City, Town, zone, or neighborhood or as preventing or prohibiting Products from entering into similar agreements or granting licenses for the installation and use of similar equipment in competing theatres.

19. *Period of License.*—This license shall be for a term of_____years from the day upon which the installation shall have been completed and the Equipment made available to the Exhibitor as ready for use. It may, however, provided the Exhibitor shall not be in default in respect of any of the terms of this agreement, be terminated at the option of the Exhibitor at any time after the expiration of the first two years of the term hereof upon not less than six months' written notice given by the Exhibitor to Products of its intention so to terminate.

20. *Entire Understanding.*—The parties hereto expressly stipulate that this agreement as herein set forth contains the entire understanding of the respective parties with reference to the subject matter hereof, and that there is no other understanding, agreement, or representation, express or implied, in any way limiting, extending, defining, or otherwise relating to the provisions hereof or any or the matters to which the present agreement relates. No agent or employee of Products is authorized to alter or modify this agreement in any way unless such alteration or modification shall be approved in writing by the President or a Vice President of Products or by such representative as may from time to time be designated in writing by either of such officers. No waiver by either party, whether express or implied, of any of the provisions of this agreement shall be construed as constituting a waiver of any other provision or provisions of this agreement or as estopping either party from its right to enforce any provision or all provisions hereof.

21. *Not Assignable.*—This agreement shall not be assigned by the Exhibitor without the written consent of Products. It shall, however, subject to such restriction upon assignment by the Exhibitor, be binding upon the parties and

Digitized by Google

their respective successors, assigns, and legal representatives, and shall be interpreted according to the laws of the State of New York.

In witness whereof, the parties hereto have caused these presents to be executed by their duly authorized officers in their behalf, the day and year first above written.

AGREEMENT BETWEEN WESTERN ELECTRIC COMPANY, INCORPORATED, AND ELECTRICAL RESEARCH PRODUCTS, INC., DATED DECEMBER 30, 1926

This agreement, made this 30th day of December 1926, between Western Electric Company, Incorporated, a corporation of the State of New York (hereinafter called the Seller) and Electrical Research Products, Inc., a corporation of the State of Delaware (hereinafter called the Buyer).

WITNESSETH

Whereas the Buyer is authorized by its certificate of incorporation to issue 750,000 shares of stock without par value, of which the subscribers to the certificate of incorporation have subscribed for a total of ten shares and duly assigned their several subscriptions to the Seller, leaving unsubscribed 749,990 shares; and

Whereas it is mutually desired by the parties hereto that the Buyer shall, subject to certain reservations hereinafter set forth, purchase the business of the Seller, which is distinct from its Bell System business, Graybar business, International business, and Canadian business, as herein defined, and it is also mutually desired that the Buyer shall purchase certain property, effects, assets, rights, licenses, and good-will of the Seller and shall in consideration thereof and the payment by the Seller of the sum of One million dollars ($1,000,000) in cash issue to the Seller all of the shares of stock of the Buyer which it is authorized to issue:

Now, therefore, in consideration of the covenants and agreements herein contained, and the further considerations herein expressed, it is agreed by and between the parties hereto as follows:

ARTICLE I

SECTION 1. *Bell System Business.*—The Seller's Bell System business is understood and agreed to be the development, manufacture, purchase, sale, repair, lease, and other handling of and dealing with apparatus, machinery, material, supplies, and merchandise for, and the furnishing of services to, the companies comprising the Bell System, and generally all business of every description of the Seller, directly or indirectly, with or for said companies as the same is now or may hereafter from time to time be conducted.

SECTION 2. *Bell System.*—The term "Bell System", as used in this contract, shall include all of the companies which the Seller usually and regularly treats, or may from time to time hereafter regularly treat, as a part of said System.

SECTION 3. *Graybar Business.*—The Seller's Graybar business is understood and agreed to be that part of the Seller's business connected with the performance by the Seller of such contract or contracts as are, or from time to time may be, in force between the Seller and the Graybar Electric Company, Inc., or their respective successors and assigns, and generally all business of every description of the Seller, directly or indirectly, with or for said Graybar Electric Company, Inc., as the same is now or may hereafter from time to time be conducted.

SECTION 4. *International Business.*—The Seller's International business is understood and agreed to be that part of the Seller's business connected with the performance by the Seller of such contract or contracts as are or from

Digitized by Google

time to time may be in force between the Seller and International Telephone and Telegraph Corporation or International Standard Electric Corporation, or their respective successors and assigns, and generally all business of every description of the Seller, directly or indirectly, with or for said last-mentioned companies, as the same is now or may hereafter from time to time be conducted.

SECTION 5. *Canadian Business.*—The Seller's Canadian business is understood and agreed to be all business now or at any time hereafter transacted by the Seller in Canada or Newfoundland or with persons, firms, or corporations domiciled in Canada or Newfoundland, and all manufacture, lease, and sale of apparatus and merchandise intended for use or sale in Canada or Newfoundland, and all transactions relating to patents in said countries.

SECTION 6. *Patents.*—The word "patents" wherever used herein shall be understood to include letters patent, applications for letters patent, licenses, and rights in respect of inventions, whether for the United States or other countries.

SECTION 7. *Title to Property.*—In all cases where any of the property herein agreed to be assigned or transferred to the Buyer is inseparable or indivisible from the property which, under the terms hereof, is to be retained by the Seller, the Seller shall retain the legal title to and deal with such property for the benefit of the Buyer and the Seller according to their respective interests under this contract.

SECTION 8. *Transfer of Licenses and Action Regarding Patents.*—In all cases where patents herein agreed to be assigned or transferred by either party to the other are or shall be applicable both to the field of business of the Buyer and to the fields of business herein reserved to the Seller, the party holding the legal title thereto shall grant and does hereby grant to the other party licenses under such patents, which licenses are and shall be exclusive for the field of business of such other party hereunder, subject, however, to all the provisions of this agreement. In all cases of infringement of such patents by third parties, the party holding the legal title will bring such suits and take such action (or permit such other party to do so in the name of the party holding such legal title) as may be necessary or advisable to protect the rights of both parties, and the expenses of such suits shall be borne by the party benefited or in the event that both parties are benefited, such expense shall be apportioned between the parties in such manner as may be mutually agreed upon or, in default of such agreement, such apportionment shall be determined by arbitration in accordance with the provisions of Section 3 of Article IV hereof.

ARTICLE II.

SECTION 1. *Assets to be Sold.*—The Seller agrees to pay to the Buyer the sum of One million dollars ($1,000,000) in cash and to sell, assign, transfer, and deliver to the Buyer, and the Buyer agrees to purchase and accept from the Seller, at the times and in the manner and for the consideration herein expressed, all of the following property of the Seller:

(a) One hundred fifty thousand (150,000) shares of the capital stock of Graybar Electric Company, Inc.

(b) Twenty-six thousand, one hundred sixty (26,160) shares of the capital stock of Northern Electric Company, Limited.

(c) One hundred (100) shares of the capital stock of Western Electric Company, Limited of Canada.

(d) One hundred (100) shares of Western Electric Company, Limited of London.

(e) All accounts receivable which are owing on the date of sale by Western Electric Company, Limited, of Canada to the Seller.

(f) All accounts receivable which are owing on the date of sale by Western Electric Company, Limited, of London to the Seller.

(g) Bonds and certificates of indebtedness of the United States of the aggregate face value of Thirty million dollars ($30,000,000) subject to outstanding agreements by the Seller to re-sell said securities or any part thereof at rates or on bases fixed at the time the same were purchased by the Seller, which re-sale agreements are assumed by the Buyer.

(h) All accounts receivable outstanding on the date of sale which relate solely to the business herein agreed to be transferred.

(i) All interest accrued and unpaid to the date of sale on items (e), (f), (g), and (h) above listed.

Digitized by Google

(j) All royalties accrued and unpaid to the date of sale under contracts of be assigned by the Seller to the Buyer as hereinafter provided, less such part of said royalties as the Seller is obligated to pay to others.

(k) Apparatus, material, and equipment which on the date of sale is under lease or loan by the Seller in the course of that part of the Seller's business to be transferred hereunder to the Buyer.

(l) Claim against Russia on account of deposits in banks, stock interest in and receivables from N. C. Heisler & Company, and accounts receivable owing to the Seller (as assignee of International Western Electric Company, Incorporated, and its subsidiaries) from Russian customers.

(m) Claim against Germany for losses and damages in Belgium growing out of the World War.

(n) The Seller's business (as distinguished from its property) existing on the date of sale which is separate and distinct from the business herein reserved to the Seller.

(o) All right, title, and interest which the Seller has the right so to transfer, in and to all contracts, good-will, patents, trade-marks, and trade-names of the Seller (except the trade-mark or trade-name "Western Electric") in so far as but only to the extent that the same respectively pertain to the business and property herein agreed to be transferred, and subject to all the reservations, terms, conditions, and limitations in this agreement contained. Among said contracts so to be transferred are included specifically, but not by way of limitation, the contracts listed in Schedule A attached hereto and made a part hereof.

SECTION 2. *Assigned Contracts.*—In the event that the assignment of any of the contracts herein agreed to be assigned shall require the consent of the other party or parties to such contracts and such consent cannot be obtained, the Buyer shall at the request of the Seller act as the agent of the Seller to carry out and perform such contracts, and whether the Buyer shall so act as agent or not, the Buyer shall be entitled to receive such profits as would have been derived by it if the assignment of such contracts had been consented to by the other party thereto.

SECTION 3. *General Reservation of Business.*—The Seller specifically reserves to itself all its Bell System business, Graybar business, International business, and Canadian business, and all business with and sales to the following classes of customers, together with all rights, assets, and property relating to or connected with the buinesses so reserved:

(a) Such of the companies now or hereafter designated or known as Bell Connecting Companies as the Seller may from time to time exclude from the provisions of its contract with the Graybar Electric Company, Inc., dated December 31, 1925, or from any other contracts, present or future, between the Seller and said Graybar Electric Company, Inc.

(b) Companies (other than those of the Bell System and Bell Connecting Companies) operating public communication services with which the Seller may at any time during the term hereof enter into continuing contracts to supply its manufactures.

(c) The United States Government.

(d) Manufacturers who may from time to time purchase apparatus of the Seller's manufacture for incorporation in or assembly with the apparatus manufactured by such other manufacturers for sale either to the Seller only or to the Seller and other customers of such manufacturers.

(e) Employees of the Seller and its subsidiaries and employees of companies comprising the Bell System.

SECTION 4. *Future Transfer of Certain Reserved Business.*—As and when the existing obligations of the Seller with reference to its Graybar, International, or Canadian businesses are terminated or diminished, the Seller shall thereupon transfer to the Buyer such part of any business so released as the Seller may elect to sell to the Buyer, together with the contracts, rights, assets, and property of the Seller pertaining to such business, and the Buyer agrees to purchase the same as and when notified by the Seller of its election to sell, subject to all of the terms and conditions of this contract and at a price to be mutually agreed upon, or in the absence of such agreement at a fair and reasonable price to be determined by arbitration in accordance with the provisions of Section 3 of Article IV hereof.

SECTION 5. *Reservation as to Sales in Special Cases.*—The Seller specifically reserves the right to make any sales direct to customers not reserved to it hereunder in such special cases as it deems desirable, but in each such case the

Digitized by Google

Seller shall pay to the Buyer the profit the latter would have derived in case it had made such sale.

SECTION 6. *Reservations as to Seller's Contractual Obligations.*—All of the agreements in this instrument contained and all of the property herein agreed to be assigned or transferred are and shall be subject to all contracts and obligations of the Seller existing on the date of the respective assignments or transfers. The Seller hereby reserves are rights (and the Buyer agrees to transfer to the Seller all rights which the Buyer may acquire) which are necessary to enable the Seller to carry out said contracts and obligations, except in so far as such contracts and obligations are herein agreed to be transferred to the Buyer.

SECTION 7. *Reservations as to Modification of Contracts.*—The Seller reserves the right and option at any time or times hereafter to modify its existing contractual relations with respect to the business herein reserved as existing on the date of sale, and either to enlarge or restrict the character and extent of any such reserved business, and this contract shall be and become subject to all such modifications; but in the event that any such modification shall diminish or enlarge any rights of the Buyer hereunder with respect to business as existing on the date of sale (except where the diminution of such rights is made necessary by virtue of the enforcement by other parties of contractual obligations of the Seller to such other parties) reasonable compensation shall be paid therefor either to the Buyer by the Seller or to the Seller by the Buyer as the case may be; such reasonable compensation to be determined by mutual agreement or, in default of such agreement, to be determined by arbitration in accordance with the provisions of Section 3 of Article IV hereof.

SECTION 8. *Assumption of Obligations of Seller.*—The Buyer agrees to perform and carry out all of the obligations of the Seller in or in connection with any of the contracts, business or other assets herein agreed to be assigned to the Buyer, to the extent that such obligations exist on the date of the respective assignments or transfers.

SECTION 9. *Reimbursement for Taxes.*—The Buyer agrees to reimburse the Seller for any taxes which the Seller may hereafter be required to pay to the etxent that such taxes are based on investments which are to be transferred by the Seller to the Buyer, pursuant to the proivsions of this agreement, or where such taexs are based on earnings and such investments enter into the determination of the ratio to be used in determining the amount of such tax, or to the extent that such taxes are based on earnings attributable to the business herein agreed to be transferred.

ARTICLE III.

SECTION 1. *Patents of Seller.*—The Seller hereby agrees, subject to all the provisions of this agreement, that it will, upon request of the Buyer, assign and transfer to the Buyer (so far as and to the extent that the Seller shall have the right so to do) all rights of the Seller pertaining to the field of business herein agreed to be transferred to the Buyer in, to, and under all patents which the Seller may hereafter acquire relating or applicable to the said field of business.

SECTION 2. *Patents of Buyer.*—The Buyer hereby agrees, subject to the provisions of this Article, that it will, upon request of the Seller, assign and transfer to the Seller (so far as and to the extent that the Buyer shall have the right so to do) all rights pertaining to the field of business herein reserved to the Seller in, to, and under all patents which the Buyer may hereafter acquire relating or applicable to the Seller's said fields of business.

SECTION 3. *Assumption of Obligations Under Patents.*—Patents which have been or which may be acquired by either party subject to any conditions, obligations or restrictions, such, for example, as those requiring the payment of royalties, or limiting the field of use of the invention, or requiring the grant of licenses in exchange, shall be subject to transfer to the other party hereto only upon the agreement of such other party in writing to assume and be bound by all such conditions, obligations and restrictions, and to pay all royalties which may be required by reason of the use of such patents by such other party.

SECTION 4. *Exchange of Information.*—Each party agrees to furnish to the other party from time to time upon request and at cost (including the usual current loadings of the party furnishing the same) all engineering, manufacturing and technical information (including drawings, blueprints, specifi-

Digitized by Google

cations, models and samples) in its possession or under its control and which it may have the right so to furnish, relating to inventions, apparatus, systems, material and processes applicable to the field of the other party hereunder.

SECTION 5. *Performance of Services and Sale of Material.*—Each party agrees upon request of the other party to perform for the other aprty all services and to furnish to the other party all apparatus, material and merchandise relating to their respective fields hereunder which the party so requested may be in a position to perform or furnish; provided, however, that neither party shall be required to perform for the other any obligations which the other party shall at the time itself be in a position to perform. All such services shall be paid for by the party requesting the same at cost (including the usual current loadings of the party furnishing the same), and all such apparatus, material and merchandise furnished by either party to the other hereunder shall be furnished not at cost but at prices and upon terms to be established from time to time by the party furnishing the same, which prices and terms shall be as favorable as those at which the party furnishing the same then sells comparable apparatus, material and merchandise in like quantities to its other customers. The prices and terms of payment on sales to companies comprising the Bell System, to employees of the Seller and its subsidiaries, and to employees in the Bell System, or on sales to the United States Government, shall not be used in determining the prices and terms hereunder.

SECTION 6. *Reservation of Right to Manufacture.*—The Seller reserves the exclusive right and license under all patents or inventions relating or applicable to the business herein agreed to be transferred to manufacture any apparatus which the Buyer may require to be manufactured, provided, however, that if the Seller shall decline to accept any specific order from the Buyer for the manufacture of any apparatus for use within the field of the business herein agreed to be transferred to the Buyer, the Buyer shall thereupon have the right to manufacture or to have manufactured for it a reasonable quantity of said apparatus.

SECTION 7. *Patents in Fields Similar to Seller's.*—The Seller reserves under its present and future patents, and the Buyer agrees to assign to the Seller under all patents which the Buyer may hereafter acquire, all right, title, and interest for business and fields similar to or of the same character as the Seller's Bell System business or Graybar business.

SECTION 8. *Patents on Manufacturing Methods, etc.*—The Buyer agrees that in granting licenses or rights to others for methods or processes of manufacture or for machinery, tools, or equipment for manufacturing purposes, under the patents herein assigned or agreed to be assigned to the Buyer, the Buyer will first obtain the approval of the Seller as to the licensee to whom such grant is to be made.

ARTICLE IV

SECTION 1. *Issuance of Stock.*—The Buyer agrees to issue and deliver to the Seller, at the time herein provided, certificates representing 750,000 shares of fully-paid and non-assessable stock of the Buyer without par value in consideration of the cash payment herein provided, and the business, property, effects, assets, rights, licenses, and good-will to be transferred, assigned, and delivered by the Seller to the Buyer pursuant to the provisions of this agreement.

SECTION 2. *Documents of Transfer.*—The Seller agrees to execute and deliver to the Buyer upon receipt from the Buyer of the certificates of stock provided in Section 1 of this Article, proper instruments transferring all of the personal property and good-will of the Seller covered hereby, and as promptly as possible thereafter to deliver to the Buyer assignments of contracts and patents and such other instruments as may be necessary to vest full title in the Buyer to the business, property, effects, assets, rights, and licenses herein agreed to be transferred, and the Seller further agrees to deliver to the Buyer, from time to time upon request, any other or further instruments that may be necessary to fully carry out the terms and provisions of this agreement or to evidence the rights of the Buyer in and to the property herein agreed to be transferred, without the necessity of producing this agreement. All expenses in connection with the transfers required hereunder shall be borne by the Buyer.

SECTION 3. *Arbitration.*—In the event that the parties fail to mutually agree on any of the matters left for mutual agreement in Section 8 of Article I, of Sections 4 and 7 of Article II hereof, either of the parties may make a request

Digitized by Google

in writing that such matter be referred to arbitration, in which event each of the parties shall appoint an arbitrator within ten days after such request. The two arbitrators so appointed shall, within ten days thereafter, select a third arbitrator or umpire, and the matter in dispute shall be promptly submitted to such arbitrators, pursuant to such rules and in accordance with such regulations as they may prescribe; provided, that each of the parties shall be required, within thirty days after notice from such arbitrators, to fully present the matter in dispute with the evidence relative thereto, to said arbitrators, and provided further, that within sixty days thereafter said arbitrators shall make their award. The cost of the arbitration shall be divided equally between the parties hereto. Should either party fail to appoint an arbitrator, the arbitration shall proceed notwithstanding, and the arbitrator appointed by the other party, shall, in such case, be the sole arbitrator. Should two arbitrators be appointed by the parties and they be unable to agree upon the third arbitrator or umpire, such third arbitrator or umpire shall, upon application of either party, on two days' written notice to the other, be appointed by one of the Justices of the Supreme Court of the State of New York, New York County. A decision by two of the arbitrators upon any matter submitted to them under the provisions hereof shall be binding and conclusive upon both parties hereto.

SECTION 4. *Date of Sale.*—It is agreed that the date of sale of the business, property, effects, assets, rights, licenses, and good-will covered by this agreement shall be January 1, 1927, and that delivery of the cash payment provided in Section 1 of Article II hereof and of certificates of the Buyer's stock shall be made on the first business day of January 1927.

SECTION 5. *Construction.*—This contract shall be construed according to the Laws of the State of New York and shall inure to the benefit of and be binding upon the parties hereto and their respective successors.

In witness whereof the parties hereto have caused this agreement to be executed by their respective officers thereunto duly authorized, and their respective corporate seals to be hereunto affixed the day and year first above written.

(11) Contract dated April 22, 1925, between Columbia Graphophone Company, Limited, and International Western Electric Company, Incorporated (and duly assigned by the latter to Western Electric Company, Incorporated), relating to apparatus for the electrical recording of sound.

JUNE 14, 1934.

Subject: Sound-picture equipment.

J. B. HARLOW,
Development Manager, Electrical Research Products, Inc.
New York, N. Y.

DEAR SIR: Pending the settlement of the proper form to be used in granting rights to Electrical Research Products, Inc., in new fields, it is satisfactory to the Western Electric Co., Inc., for the Electrical Research Products, Inc., to go ahead and exploit in all countries of the world, other than Canada and Newfoundland, sound-picture equipment of Western Electric manufacture for use in the home for educational and entertainment purposes, and this release shall be replaced by whatever form for granting rights that is agreed upon.

Such exploitation is also subject to the following:

1. The distribution of this apparatus shall not be other than in accordance with the conditions of the substitute license agreement of July 1, 1932, between General Electric Co and American Telephone & Telegraph Co.

2. Electrical Research Products, Inc., shall pay the Western Electric Co., Inc., for transmittal to the American Telephone & Telegraph Co. 33⅓ percent of the gross royalties and/or other payments received by Electrical Research Products, Inc., for the use of these systems and apparatus in the United States

Very truly yours,

F. B. GLEASON,
General Commercial Manager.

Digitized by Google

NOVEMBER 6, 1926.

EDGAR S. BLOOM,
President, Western Electric Co., Inc., New York, N. Y.

DEAR MR. BLOOM: The American Telephone & Telegraph Co. extends to the Western Electric Co., Inc., the privilege of manufacturing, for sale or lease in the United States, systems and apparatus for recording and reproducing sound in coordination, synchronism, or timed relation with the taking and projection of pictures and of entering into contracts with properly accredited individuals or organizations for the use by them of such systems and apparatus in the United States. This release is subject to restrictions as follows:

1. That the Western Electric Co., Inc., pay to the American Telephone & Telegraph Co. a 5-percent royalty on its sale price. The same royalty shall also apply on all parts for repair or reconstruction where such parts are in the classification of restricted apparatus, but shall not apply on other parts which are classed as standard unrestricted apparatus.

2. That the Western Electric Co., Inc., furnish this equipment to the Associated Bell Telephone Cos. at prices which shall be as low as the electric company's prices, under comparable conditions, to its most favored customers, in effect on the date of shipment.

3. That the Western Electric Co., Inc., pay to the American Telephone & Telegraph Co. 33⅓ percent of the gross royalties and/or other payments received by the Western Electric Co. for the use of these systems and apparatus in the United States.

4. That the manufacture, sale, lease, and use of these systems and apparatus shall not be other than in accordance with the conditions of the license agreement of July 1, 1920, between the General Electric Co. and the American Telephone & Telegraph Co. as modified by the agreement dated July 1, 1926.

5. That the Western Electric Co., Inc., shall extend no rights covering the use of such systems and apparatus in connection with a wire distributing system, except for apparatus for distribution to an assembled audience or to rooms (other than "homes") within a building or a group of substantially adjacent buildings commonly owned or operated, in each case located in the immediate vicinity of such audience or within the building or group of buildings within which such distribution is made.

6. That the American Telephone & Telegraph Co. shall approve the form of contract to be entered into between the Western Electric Co. and its customers or lessees which shall provide in particular—

(*a*) That said apparatus shall not be used for any other purpose than the recording and reproducing of sound in coordination, synchronism, or timed relation with the taking and projection of pictures.

(b) That such licenses under patents of the American Telephone & Telegraph Co. and of the Western Electric Co., Inc., as are extended by the latter, shall be nonexclusive to at least the extent that nonexclusive rights under any and all such patents shall be reserved by the American Telephone & Telegraph Co. and its associated companies.

The American Telephone & Telegraph Co. also now withdraws the release to the Western Electric Co., Inc., covered by Mr. Gifford's letter to Mr. DuBois, dated July 6, 1925.

Sincerely yours,

W. S. GIFFORD, *President.*

(Copy sent to Mr. C. P. Cooper, Mr. J. C. Lynch, Mr. G. E. Folk, Mr. E. H. Colpitts, Mr. C. A. Heiss.)

JULY 6, 1935.

C. G. DUBOIS,
President Western Electric Co., Inc., New York, N. Y.

DEAR MR. DUBOIS: The American Telephone & Telegraph Co. extends to the Western Electric Co. the privilege of manufacturing and selling or leasing systems and apparatus developed for the recording and reproduction of so-called talking motion pictures and to enter into contracts with properly accredited individuals or organizations to extend technical development of these systems and apparatus to commercial forms and to promote their commercial development. This release is subject to restrictions, as follows:

1. That the Western Electric Co. pay to the American Telephone & Telegraph Co. a royalty of 5 percent on all parts of the equipment manufactured by the

Digitized by Google

Western Electric Co. This royalty is to apply on the sale price of the telephone department to the supply department of the Western Electric Co. In the case of sales for export, this royalty is to apply on the sale price of the telephone department of the Western Electric Co. to the International Western Electric Co.

2. That the Western Electric Co. shall extend no rights covering the use of this equipment in connection with any public-service telephone or telegraph system or with any communication system for the purpose of transmitting matter outside of the building in which the equipment is located.

3. That the American Telephone & Telegraph Co. shall approve the form of contract to be entered into between the Western Electric Co. and its customers or lessees or with agents employed for the purpose of promoting the technical and commercial development of these systems and apparatus which shall provide in particular—

(*a*) That said apparatus shall not be used for any other purpose than the recording and reproduction of so-called talking motion pictures.

(*b*) That such licenses under patents of the American Telephone & Telegraph Co. and of the Western Electric Co. as are extended by the latter, shall not be exclusive to at least the extent that nonexclusive rights under any and all such patents shall be reserved by the American Telephone & Telegraph Co. and its associated companies.

It should be understood by the Western Electric Co., Inc., that should successful commercial use of these systems and apparatus be developed wherein royalties are collected or moneys accrue to the Western Electric Co. for their use, it shall promptly advise the American Telephone & Telegraph Co. in order that proper sharing of these moneys between the two corporations may be effected. The American Telephone & Telegraph Co. agrees that it will not require payments in excess of 50 percent of the gross amounts received by the Western Electric Co. as a result of such successful commercial development.

Very truly yours,

W. S. GIFFORD, *President.*

(Copies sent to Mr. G. E. Folk, Mr. E. H. Colpitts, Mr. C. A. Heiss.)

WESTERN ELECTRIC CO., INC.,
New York, January 2, 1934.

Mr. C. P. COOPER,
Vice President, American Telephone & Telegraph Co.,
New York, N. Y.

DEAR MR. COOPER: As you know, we have an opportunity to close a contract with the Associated Press for the purchase of telephotographic equipment which will be used on lines leased from the telephone companies. Undoubtedly there will be other press associations that will be interested in purchasing similar equipment, and we would like to be in a position to meet their demands. The equipment we plan to sell to the Associated Press will be the new machines that have recently been developed for 11-inch by 17-inch pictures.

Will you please let us know if it will be satisfactory to the American Telephone & Telegraph Co. for the Western Electric Co., Inc., to manufacture and sell in the United States telephotographic equipment for picture transmission purposes?

Very truly yours,

C. G. STOLL, *Vice President.*

JANUARY 5, 1934.

Mr. C. G. STOLL,
Vice President, Western Electric Co., Inc.,
New York, N. Y.

DEAR MR. STOLL: In response to your letter of January 2, 1934, American Telephone & Telegraph Co. extends to Western Electric Co., Inc., the right to manufacture and sell in the United States, to press associations, equipment for sending pictures by wire, subject to the following condition:

"That Western Electric Co., Inc., pay to American Telephone & Telegraph Co. a 5-percent royalty on its sales price."

Very truly yours,

C. P. COOPER, *Vice President.*

Digitized by Google

JANUARY 15, 1934.

MR. KENT COOPER,
General Manager, the Associated Press,
383 Madison Avenue, New York, New York.

DEAR MR. COOPER: We have your letter of December 29, 1933, regarding the purchase of telephotograph equipment, and are submitting herein statements embodying the obligations and responsibilities of the Western Electric Co. In so doing, we have attempted to cover all of the points raised by you.

DESCRIPTION OF APPARATUS

The units of apparatus involved in this transaction and which you have ordered as "telephotograph transmitting and receiving machines" may best be described as including:

Two machines, one for transmitting and one for receiving, with their associated tables.

Two bays of relay rack type equipment containing the amplifiers, oscillators, filters, and other equipment associated with the machines.

One cylinder-loading fixture and test microscope.
One set of spare vacuum tubes and lamps.
One spare sending light valve.
One spare receiving light valve head.
One extra picture cylinder for sending machine.
One extra film cylinder for receiving machine.
One portable filament ammeter.
One portable voltmeter for plate and grid batteries.
One associated power plant (table mounted).

This equipment is substantially that which has been demonstrated to you in your various visits of the past few months to the Bell Telephone Laboratories. It is sufficient for continuous service in transmitting and receiving pictures, except for such time as is necessary for maintenance and repairs. It is arranged to operate with 220-volt 3-phase 60-cycle alternating current, which you will make available at the location of the picture equipment. If it should be necessary to use another type of power supply, arrangements to suit such a supply can be made at possibly a slight increase in cost to you. We believe, however, that the specified power supply is generally available in the cities in which you expect to operate.

As stated in Mr. Carter's letter of October 10 to Mr. Huse, the loading of the transmitting machine with the picture to be sent (which picture must be of a type that can be wrapped snugly around the cylinder) does not require the use of a dark room. You no doubt understand that the loading and unloading of the film cylinder for the reception of the picture must be done in a dark room, and this is not covered in our bid.

The equipment as we have described it can be housed in a floor space of approximately 200 square feet with a minimum ceiling height of 8 feet, providing the space is reasonably proportioned. Any splitting up of the space would necessitate changes which might involve additional cost to you for engineering, manufacture, and installing.

The equipment is designed for use in ordinary office buildings and will function properly with vibration normally experienced in such buildings. If, however, the equipment must be located near heavy machinery which sets up severe vibrations, additional cost of installation might be necessary, and this is not included in our price.

INTALLATION

Our price of the equipment covers its complete installation on the premises of your subscribers. There are certain requirements on you, however, that it might be well to call to your attention. They are as follows:

It is essential that the floor space of your subscribers' premises in which the equipment is to be installed be made available to us in accordance with our schedules, which will be planned to meet the best possible service dates, and our employees must have free access to such buildings and facilities. You will have advance notice of our schedule.

It will be necessary that line facilities be supplied in order that testing may be done in accordance with our schedules.

Digitized by Google

Heat and illumination in the rooms in which the work is to be performed and material stored must be provided.

Proper electric current and suitable terminals in the rooms in which the equipment is to be installed, for soldering irons and power purposes, shall be provided.

Inasmuch as you will doubtless have required dark-room facilities at each location, this requirement must be provided in sufficient time that it may be used by us during the testing period.

QUALITY

The warranty of the Western Electric Co. is that the apparatus which we supply you is capable of transmitting and receiving pictures equal to the samples which we herewith submit to you provided that the original pictures are comparable to those which were used to produce such samples.

It has been called to your attention that picture-transmission systems have certain limitations as regards fineness of details which can be transmitted. This is most noticeable in pictures carrying small type, and this limitation is shown by the sample marked "small type."

Another limitation which has been mentioned relates to the transmission of halftones and is, we believe, familiar to you. The quality to be expected is shown by sample marked "Halftone."

This warranty is subject to the conditions that the apparatus shall be properly maintained and operated and used over lines of proper characteristics.

The equipment will transmit and receive pictures to a maximum size of approximately 11 by 17 inches, and as stated above, the pictures must be such that they may be wrapped snugly around the cylinder of the transmitter.

The equipment will operate at a speed of about 1 minute to cover 1 inch of the length of the rotating drum; therefore a picture 8 by 10 inches would take approximately 8 minutes to transmit.

PRICE

The price to the Associated Press per unit of equipment, made up of the apparatus described under the heading "Description of Apparatus" and completely installed in the United States of America, is sixteen thousand dollars ($16,000) each.

SCHEDULE

You have expressed the desire that twelve (12) units of this equipment be delivered by September 30, 1934, and our plans are being made to meet this date as closely as possible. In the manufacture of apparatus and equipment such as this, where much of the apparatus is new and complicated, the units will be completed and assembled one or two at a time. We expect very shortly to advise you of the schedule to which we shall work that you may make your plans accordingly. In all probability, however, while some of the units will be ready for delivery prior to September 30, the 12 equipments will not be ready on that date. You may rest assured that no effort will be spared to comply with your wishes.

ORDER

Your acceptance of the conditions of this letter will constitute your order on us for the following:

1. Twelve (12) telephotograph transmitting and receiving machines, to be delivered as soon as possible.

2. Sixteen (16) additional telephotograph transmitting and receiving machines, to be installed as early as possible after September 30, 1934. The sixteen (16) additional machines herein mentioned are ordered with the option of cancelation by the Associated Press, in full or in part, at any time prior to February 16, 1934.

3. Thirty-two (32) additional telephotograph transmitting and receiving machines over and above the foregoing twenty-eight (28) mentioned, with the option of cancelation by the Associated Press, in whole or in part, of such thirty-two (32) machines herein mentioned at any time prior to July 1, 1934.

In other words, this is an order for sixty (60) machines, twelve (12) of which are on definite order, sixteen (16) or any part thereof are subject to can-

Digitized by Google

celation prior to February 16, 1934, and thirty-two (32), or any part thereof, are subject to cancelation prior to July 1, 1934.

We would state to you that with the prompt acceptance of this letter your order will be the only order we have or have had for this type of equipment, and will take precedence over any other orders we may later receive, with the possible exception of the 32 units covered by the paragraph numbered 3. If an order from another customer should be received by us before July 1, 1934, it would necessarily take precedence over the 32 units unless prior to such order you had withdrawn your right to cancel. If you so desire, it is acceptable to us what you consolidate the 32 units with those mentioned under the paragraph numbered 2, in which event all 60 units will take precedence over any orders which we may receive from other customers.

PRICE CHANGES

As to price changes, you will recall that when we were in your office our commitment was that at all times you would enjoy prices on Telephotograph equipment based on date of order, as low as our prices for like quantities to our most favored customers other than the Bell system and associated companies. We could not make a retroactive adjustment of price on apparatus previously shipped and billed, but we should always give you the "most favored customer" price basis outlined above. Of course, the great advantage to you, and which must be considered as offsetting any possibly higher-priced first production units, would be that you would be securing apparatus ahead of all others.

PATENT CLAUSE

We agree to defend at our own expense all suits alleging infringement of any United States patent on account of your use of the apparatus we furnish you on this order and will hold you harmless against all liability for such infringement, provided that we shall have immediate notice of and full control of the defense of all claims and suits for such infringement, and provided also that we assume no responsibility for alleged infringements due to any use of said apparatus in combination with other apparatus not furnished by us or for any uses otherwise than as and for the purposes for which it is furnished.

TERMS

The terms which we discussed in your office and which are agreeable to us are—

One-quarter (¼) of the total amount of any firm commitment thirty (30) days after date of first shipment of apparatus applying on that commitment, with the balance to be paid in twenty-four (24) equal monthly installments beginning thirty (30) days after the first payment is due, with interest at the rate of six percent (6%) per annum. The Associated Press is to have the right to make payment in full at any time within that period.

TRAINING OF ASSOCIATED PRESS EMPLOYEES

Our price does not include the training of any of your employees in the operation and maintenance of the equipment. This is a matter that should be arranged for in your dealings with Mr. Miller and Mr. Carter.

We wish to assure you that with your signifying the acceptance of this letter, we shall proceed with all speed to carry forward the manufacturing involved, and shall exert every effort to complete the work to your entire satisfaction and in accordance with your wishes as to schedule.

Yours very truly,

_____,
General Commercial Manager.

JANUARY 16, 1934.

Mr. KENT COOPER,
General Manager, The Associated Press,
383 Madison Avenue, New York, N. Y.

DEAR MR. COOPER: In accordance with our conversation of yesterday, we are agreeable to supplementing the paragraphs of our letter of January 15 as follows:

Digitized by Google

PRICE CHANGES

If it should happen that while we are engaged in manufacturing on your order or orders apparatus such as is defined under the heading, "Description of apparatus", in our letter of January 15, we should agree to sell to another customer (other than the Bell System or associated companies) like apparatus in like quantities and under like conditions at a price lower than our price to you covering the apparatus then being made, we will reduce the price of the uncompleted portion of your such order or orders to agree with the price named to such other customer.

PATENT CLAUSE

The use for which the apparatus defined in our letter of January 15 under the heading, "Description of apparatus", is sold to you is that of the facsimile reproduction of pictures, including photographs, drawings, sketches, and the like, and printed and written matter at a distance, by means of electrical transmitting and receiving apparatus operating over wires extending from the transmitting station to the receiving station (as distinguished from operation by radio waves) but not including the transmission or reception of personal messages as a service to the public.

Will you be good enough to signify your acceptance of the provisions of our letter of January 15 as supplemented by the above paragraphs?

Yours very truly,

_____.

(Original signed by F. B. Gleason, general commercial manager.)

THE ASSOCIATED PRESS,
January 19, 1934.

Mr. F. B. GLEASON,
195 Broadway, New York, N. Y.

DEAR MR. GLEASON: This is acceptance for the Associated Press of the conditions of your letter of January 15 and therefore constitutes our order for the equipment specified in that letter, and we accept further your offer to consolidate with no. 2 of the order the 32 units specified in no. 3 of the order, which action will cause all sixty units to take precedence over any orders you may receive from other customers, but the Associated Press reserves the option to cancel, in full or in part, any of these additional 48 machines if such cancelation, in full or in part, is mailed to you at any time prior to February 16, 1934.

The acceptance herein is further based upon your letter of January 16, 1934, supplementing the letter of January 15, 1934, as respects "Price changes" and "Patent clause."

Please confirm receipt of this order as outlined herein.

Sincerely yours,

KENT COOPER.

JULY 30, 1928.

GENERAL RADIO CO.,
Cambridge, Mass.

GENTLEMEN: My attention has been called to an article entitled "Equalization Panels" contained in the April 1928 edition of the General Radio Experimenter. I understand that the article refers to a type of equalizer which you furnished the New England Telephone & Telegraph Co., one of the associated companies of the Bell System. If I am correct, then that type of equalizer is covered by

Digitized by Google

our Hoyt patent no. 1453980, issued May 1, 1923, and the use thereof in combination with certain other apparatus is covered by our patents nos. 1453982 of May 1, 1923, and 1454011 of May 1, 1923.

I am calling your attention to this matter in order that you may not inadvertently infringe these patents, since the article states that "equipmens of this sort having any desired specification can be made on special order."

Yours very truly,

G. E. FOLK,
General Patent Attorney.

NOVEMBER 21, 1928.

LEMERT ENGINEERING CORPORATION,
Wilmington, Calif.

GENTLEMEN: Our attention has been called to recent newspaper statements, purporting to come from you, to the effect that you are planning to erect a radio telephone transmitting station on the Pacific coast and, in connection therewith, to manufacture and sell receiving apparatus for ship-to-shore radio-telephone communication. We are unaware of the details of your proposed system and apparatus, but, out of an abundance of caution, this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents and applications which cover very thoroughly radio-telephone transmitting and receiving apparatus. We wish to put you on your guard so that you may not inadvertently infringe those patents. In particular, I call your attention to the following United States patents: Arnold, 1129942, March 2, 1915; Colpitts, 1129959, March 2, 1915; Heising, 1137315, April 27, 1915; Hartley, 1183875, May 23, 1916; De Forest, 1201272, October 17, 1916; Lowenstein, 1231764, July 3, 1917; Colpitts (reissue), 14380, October 23, 1917; De Forest, 1314250, August 26, 1919; Arnold, 1349252, August 10, 1920; Van der Bijl, 1350752, August 24, 1920; Hartley, 1356763, October 26, 1920; Scriven, 1375739, April 26, 1921; De Forest, 1377405, May 10, 1921; Colpitts & Arnold, 1388450, August 23, 1921; Arnold, 1398665, November 29, 1921; Mathes, 1426754, August 22, 1922; Heising, 1442146, January 16, 1923; Heising, 1442147, January 16, 1923; De Forest, 1507016, September 2, 1924; De Forest, 1507017, September 2, 1924.

These are but some of this company's more fundamental patents covering radio-telephone transmitting and receiving apparatus. It is not intended to be anything like a complete list.

As you were informed in a letter dated October 8, 1928, this company expects to develop commercially, in the field above mentioned, the inventions covered by its patents. It, furthermore, intends to enforce its rights under these and other patents covering systems of the general type which you propose to use, and it is for that reason that I am warning you of the extent of its patent rights in such systems.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

APRIL 16, 1929.

NORTHERN ELECTRIC CO.,
908 Weston Avenue, Seattle, Wash.

GENTLEMEN: We have received information to the effect that you are planning to manufacture and sell radiotelephone apparatus for use in ship-to-shore communication. We are unaware of the details of your proposed apparatus, but out of an abundance of caution this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents and applications which cover very thoroughly radiotelephone transmitting and receiving apparatus. We wish to put you on your guard so that you may not inadvertently infringe such patents. In particular I call your attention to the following United States patents: Arnold, 1129942, March 2, 1915; Colpitts, 1129959, March 2, 1915; Heising, 1137315, April 27, 1915; Hartley, 1183875, May 23, 1916; DeForest, 1201272, October 17, 1916; Lowenstein, 1231764, July 3, 1917; Colpitts (reissue), 14380, October 23, 1917; DeForest, 1314250, August 26, 1919; Arnold, 1349252, August 10, 1920; Van der Bijl, 1350752, August 24, 1920; Hartley, 1356763, October 26, 1920; Scriven, 1375739, April 26, 1921; DeForest, 1377405, May 10, 1921; Colpitts & Arnold, 1388450, August 23, 1921; Arnold, 1398665, November 29, 1921; Mathes, 1426754, August 22, 1922; Heising, 1442146, January 16, 1923; Heising, 1442147, January 16,

1923; DeForest, 1507016, September 2, 1924; DeForest, 1507017, September 2, 1924.

These are but some of this company's more fundamental patents covering radiotelephone transmitting and receiving apparatus. It is not intended to be anything like a complete list.

This company has developed inventions covered by its patents for commercial exploitation in the field above mentioned. It furthermore intends to enforce its rights under these and other patents covering systems of the general type which we understand you propose to manufacture and sell, and it is for that reason that I am warning you of the extent of its patent rights in such systems.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

APRIL 16, 1929.

HEITZ & KAUFMAN,
219–223 Natoma Street, San Francisco, Calif.

GENTLEMEN: We have received information to the effect that you are planning to manufacture and sell radiotelephone apparatus for use in ship-to-shore communication and for use in communicating airplanes. We are unaware of the details of your proposed apparatus, but out of an abundance of caution this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents and applications which cover very thoroughly radiotelephone transmitting and receiving apparatus. We wish to put you in your guard so that you may not inadvertently infringe such patents. In particular, I call your attention to the following United States patents: Arnold, 1129942, March 2, 1915; Colpitts, 1129959, March 2, 1915; Heising, 1137315, April 27, 1915; Hartley, 1183875, May 23, 1916; DeForest, 1201272, October 17, 1916; Lowenstein, 1231764, July 3, 1917; Colpitts (reissue), 14380, October 23, 1917; DeForest, 1314250, August 26, 1919; Arnold, 1349252, August 10, 1920; Van der Bijl, 1350752, August 24, 1920; Hartley, 1356763, October 26, 1920; Scriven, 1375739, April 26, 1921; DeForest, 1377405, May 10, 1921; Colpitts & Arnold, 1338450, August 23, 1921; Arnold, 1398665, November 29, 1921; Mathes, 1426754, August 22, 1922; Heising, 1442146, January 16, 1923; Heising, 1442147, January 16, 1923; DeForest, 1507016, September 2, 1924; DeForest, 1507017, September 2, 1924.

These are but some of this company's more fundamental patents covering radiotelephone transmitting and receiving apparatus. It is not intended to be anything like a complete list.

This company has developed inventions covered by its patents for commercial exploitation in the fields above mentioned. It furthermore intends to enforce its rights under these and other patents covering systems of the general type which we understand you propose to manufacture and sell, and it is for that reason that I am warning you of the extent of its patent rights in such systems.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

MAY 27, 1929.

GENERAL INDUSTRIES CO.,
63 Gorham Street, West Somerville, Mass.

GENTLEMEN: We have received information to the effect that you have manufactured and installed, at the headquarters of the Boston Fire Department, radio telephone equipment for use in communication with fire boats in Boston Harbor. We are unaware of the structure of this apparatus, but out of an abundance of caution this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents and applications which cover very thoroughly radio telephone transmitting and receiving apparatus.

We wish to put you on your guard so that you may not inadvertently infringe such patents. In particular, I call your attention to the following United States patents: Arnold, 1129942, March 2, 1915; Colpitts, 1129959, March 2, 1915; Heising, 1137315, April 27, 1915; Hartley, 1183875, May 23, 1916; DeForest, 1201272, October 17, 1916; Lowenstein, 1231764, July 3, 1917; Colpitts (reissue), 14380, October 23, 1917; DeForest, 1314250, August 26, 1919; Arnold, 1349252, August 10, 1920; Van der Bijl, 1350752, August 24, 1920; Hartley, 1356763, October 26, 1920; Scriven, 1375739, April 26, 1921; DeForest, 1377405, May 10, 1921; Colpitts and Arnold, 1388450, August 23, 1921; Arnold, 1398665, November

Digitized by Google

29, 1921; Mathes, 1426754, August 22, 1922; Heising, 1442146, January 16, 1923; Heising, 1442147, January 16, 1923; DeForest, 1507016, September 2, 1924; DeForest, 1507017, September 2, 1924.

These are but some of this company's more fundamental patents covering radio telephone transmitting and receiving apparatus. It is not intended to be anything like a complete list.

This company has developed inventions covered by its patents for commercial exploitation in the fields above mentioned. It furthermore intends to enforce its rights under these and other patents covering systems of the general type which we understand you have furnished to the Boston Fire Department, and it is for this reason that I am warning you of the extent of its patent rights in such systems.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

MAY 25, 1931.

Mr. THEODORE H. BEARD,
Supervising Engineer, Dictaphone Corporation,
Bridgeport, Conn.

DEAR SIR: We have examined the blue prints which you forwarded me with your letter of March 27, 1931, and in connection therewith wish to call your attention to the following patents owned or controlled by this company which appear to contain claims reading on the circuits of said prints:

Colpitts, 1128292, February 16, 1915.

Arnold, 1504537, August 12, 1924. See particularly claims 17 and 33.

Lowenstein, 1231764, July 3, 1916.

Mathes, 1426754, August 22, 1922.

Scriven, 1375739, April 26, 1921. This patent is especially applicable to diagram 3.

Wilson, 1403932, January 17, 1922. The claims of this patent appear to read on diagram 4.

Heising, 1432022, October 17, 1922. The claims of this patent read on diagram 4.

Blattner, 1493595, May 13, 1924. Some of the claims, as example claim 8, read on diagram 4. 1483273, February 12, 1924. Some of the claims, such as 7, read on diagram 4.

DeForest, 1375447, April 19, 1921; 1314250, August 26, 1919. Particular attention is called to claims 8 and 27 of patent 1375447 and claim 7 of patent 1314250. 1377405, May 10, 1921. Special attention is called to claim 6 which appears to read on diagrams 1, 2, 3, 4, and 5.

Arnold, 1292942, March 2, 1915. Special attention is called to claim 2. 1329283, January 27, 1920. From the data we have it cannot be definitely ascertained whether your amplifier embodies the features of this patent. 1349252, August 10, 1920. From the data we have it cannot be definitely ascertained whether your amplifier embodies the features of this patent. 1448550, March 13, 1923. The claims of this patent read on diagrams 1, 2, 3, and 4. 1398665. November 29, 1921. Attention is called to claim 4 as probably reading on several diagrams. 1520994, December 30, 1924. Attention is called to claim 2 in connection with diagrams 1, 2, 3, and 4. 1465332, Aug. 21, 1923. Claims 3 and 4 read on diagram 2.

Mathes, 1442439. January 16, 1923. This is probably of interest.

Kendall, 1453982, May 1, 1923. Special attention is called to claim 66 in connection with diagram 2 and also probably in connection with diagrams 1 and 3.

Without more detailed information it is impossible to say whether all of the above-mentioned patents would be infringed by your diagrams, but certainly a large number of them would be. All of them appear to be of interest, and hence I call them to your attention.

If you are interested in acquiring a license under the above-mentioned patents, or any of them, or if you wish to make some arrangement to have the amplifying apparatus manufactured for you, you may take this matter up with Mr. H. G. Knox, vice president of Electrical Research Products, Inc., 250 West Fifty-seventh Street, New York City.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

APRIL 5, 1933.

BROWNIEFONE CO.,
18 Napier Street, Oakland, Calif.

GENTLEMEN: It has come to our attention that you have been demonstrating certain radiotelephone apparatus for use in police work and by the United States Navy. We are unaware of the details of the apparatus or circuits which you are using or contemplating using, but out of an abundance of caution this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents and patent applications relating to such apparatus and circuits.

We wish to put you on your guard so that you may not inadvertently infringe such patents. In particular, I call your attention to the following United States patents: Hartley, 1183875, May 23, 1916; DeForest, 1201272, October 17, 1916; Lowenstein, 1231764, July 3, 1917; Colpitts (reissue), 14380, October 23, 1917; DeForest, 1314250, August 26, 1919; Arnold, 1349252, August 10, 1920; Van der Bijl, 1350752, August 24, 1920; Hartley, 1356763, October 26, 1920; Scriven, 1375739, April 26, 1921; DeForest, 1377405, May 10, 1921; Colpitts & Arnold, 1388450, August 23, 1921; Arnold, 1398665, November 29, 1921; Heising, 1442146, January 16, 1923; Heising, 1442147, January 16, 1923; DeForest, 1507016, September 2, 1924; DeForest, 1507017, September 2, 1934.

These are but some of this company's more fundamental patents covering radiotelephone transmitting and receiving apparatus. It is not intended to be anything like a complete list.

It is the intention of this company to enforce its rights under its patents and it is for this reason that I am warning you of the extent of its patent rights in such systems.

Yours very truly,

G. E. FOLK.
General Patent Attorney.

MAY 18, 1933.

RADIO ENGINEERING LABORATORIES, INC.,
100 Wilbur Avenue, Long Island City, N. Y.

GENTLEMEN: My attention has been called to your advertisement of April 1933, in Q. S. T., page 65, in which you are offering for sale wireless telephone transmitting and receiving apparatus for various purposes. We are unaware of the structure of this apparatus, but out of an abundance of caution this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents which cover very thoroughly radio telephone transmitting and receiving apparatus. We wish to put you on your guard so that you may not inadvertently infringe such patents. In particular, I call your attention to the following United States patents: Hartley, 1183875, May 23, 1916; DeForest, 1201272, October 17, 1916; Lowenstein, 1231764, July 3, 1917; Colpitts (reissue), 14380, October 23, 1917; DeForest, 1314250, August 26, 1919; Arnold, 1349252, August 10, 1920; Van der Bijl, 1350752, August 24, 1920; Hartley, 1356763, October 26, 1920; Scriven, 1375759, April 26, 1921, DeForest, 1377405, May 10, 1921; Colpitts & Arnold, 1388450, August 23, 1921; Arnold, 1398665, November 29, 1921; Heising, 1442146, January 16, 1923; Heising, 1442147, January 16, 1923; DeForest, 1507016, September 2, 1924; DeForest, 1507017, September 2, 1924. These are but some of this company's more fundamental patents covering radio transmitting and receiving apparatus. It is not intended to be anything like a complete list.

This company has developed inventions covered by these patents for commercial exploitation in the fields mentioned in your advertisement. It intends to enforce its rights under these and other patents covering such systems, and it is for this reason that I am warning you of the extent of its patent rights. Unless we receive from you the assurance of your intention to desist from what would seem to be an infringement of its patents, it is the expectation of the American Telephone & Telegraph Co. to proceed to enforce its rights.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

MARCH 27, 1934.

The LEICH ELECTRIC CO., *Genoa, Ill.*

GENTLEMEN: This is to notify you on behalf of the American Telephone & Telegraph Co., that your company is infringing the following patents: Campbell, 1254472, January 22, 1918; Campbell, 1254474, January 22, 1918; Thompson, 1402322, January 3, 1922.

Your antiside tone circuit infringes the above-mentioned Campbell patents, and when that circuit is used with a hand set, the above-mentioned Thompson patent is also infringed. You are, therefore, requested to desist from further infringing these patents and to account for past infringement thereof.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

MARCH 27, 1934.

KELLOGG SWITCHBOARD & SUPPLY CO.,
1066 West Adams Street, Chicago, Ill.

GENTLEMEN: This is to notify you on behalf of the American Telephone & Telegraph Co. that your company is infringing the following patents: Campbell, 1254472, January 22, 1918; Campbell, 1254474, January 22, 1918; Thompson, 1402322, January 3, 1922.

Your antiside tone circuit, known as the triad circuit, infringes the above-mentioned Campbell patents, and when that circuit is used with a hand set, the above-mentioned Thompson patent is also infringed. You are, therefore, requested to desist from further infringing these patents and to account for past infringement thereof.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

OCTOBER 8, 1934.

Mr. C. C. COLE,
20 North Thorton Street, Orlando, Fla.

DEAR SIR: I have been informed that you are designing and selling police radio equipment for cities in Florida. We are unaware of the details of the apparatus or circuits which you are using but out of an abundance of caution this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents and patent applications relating to such apparatus and circuits. We wish to put you on your guard so that you may not inadvertently infringe such patents. I call your attention to the following United States patents: DeForest, 1314250, August 26, 1919; Arnold, 1349252, August 10, 1920; Van der Bijl, 1350752, August 24, 1920; Hartley, 1356763, October 26, 1920; Scriven, 1375739, April 26, 1921; DeForest, 1377405, May 10, 1921; Colpitts & Arnold, 1388450, August 23, 1921; Arnold, 1398665, November 29, 1921; Heising, 1442146, January 16, 1923; Heising, 1442147, January 16, 1923; DeForest, 1507016, September 2, 1924; DeForest, 1507017, September 2, 1924.

In particular, I call your attention to the last two mentioned patents which cover the circuit arrangements by which the vacuum tube is used as a generator of high frequency oscillations. This patent has been recently sustained by the Supreme Court of the United States.

It is the intention of this company to enforce its rights under its patents, and I shall be pleased to hear from you that it is your intention to respect these patent rights.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

NOVEMBER 7, 1934.

Mr. VAN C. NORWOOD,
10 Northwest Second Street, Evansville, Ind.

DEAR SIR: Your letter of October 31, 1934, addressed to the Bell Telephone Co., regarding the use of privately owned amplifiers on telephone lines, has been

Digitized by Google

referred to the Indiana Bell Telephone Co., from whom you will hear in due course.

I note, however, from your letterhead that you hold yourself out as furnishing "Installations of public address centralized sound systems." We are unaware of the details of the apparatus or systems which you furnish, but out of an abundance of caution, we hereby inform you on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents and patent applications relating to such apparatus and systems. We wish to put you on guard so that you may not inadvertently infringe such patents. In particular, we call your attention to the enclosed list of United States patents which cover public-address systems manufactured and sold by the Western Electric Co. under license from this company. These are but some of this company's more fundamental patents covering public-address systems. It is not intended to be anything like a complete list.

It is the intention of this company to enforce its rights under these patents, and it is for this reason that we are warning you of the extent of its right in such systems.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

PUBLIC ADDRESS SYSTEMS

Amplifiers: 1195632 (General Electric Co.), 1231764, 1314250, 1325865, 1329283, 1349252, 1375447, 1375739, 1377405, 1387262, 1396745, 1397862, 1398665, 1401121, 1403475, 1403932, 1422837, 1426754, 1431219, 1432863, 1442439, 1442456, 1448550, 1453982, 1465332, 1483273, 1493216, 1493595, 1495422, 1496768, 1534537, 1507994, 1520994, 1523827, 1530649, 1530981, 1534172, 1545247, 1562844, 1743701, 1752046.

Transmitters: 1333744, 1456538, 1565581, 1583416, 1603300, 1611870, 1660990, 1675853, 1722347, 1833642.

Receivers: 1365898, 1393515, 1400038, 1707544, 1707545, 1717158, 1734624, 1812389, 1845075.

Panels: 1231764, 1343880, 1377405, 1426754, 1432863, 1448550, 1453982, 1472507, 1493216, 1495422, 1520994, 1523102, Re. 15469, 1523827, 1530633, 1550724, 1562844, 1587107, 1778779.

Announcing system: 1296617, 1356256.

Anticlick circuit: 1523102.

Plurality of loud speakers: 1550724.

J. W. MILLER Co.,
5917 South Main Street, Los Angeles, Calif.

GENTLEMEN: One of our licensees under the DeForest patents nos. 1507016 and 1507017, covering the use of the generation of high frequencies by feedback vacuum tube circuits, has called our attention to the fact that you are manufacturing such devices. These patents have very recently been sustained by the Supreme Court of the United States, and it is our intention to protect our rights under them. If the information we have is correct will you please let us know what your intentions are regarding the matter.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

JUNE 17, 1935.

LEAR DEVELOPMENTS, INC.,
125 West Seventeenth Street, New York, N. Y.

GENTLEMEN: My attention has been called to your booklet entitled "Aircraft Radios." An examination of the circuits disclosed therein indicates clearly that certain patents owned or controlled by this company are infringed by your

Digitized by Google

manufacture and sale of the apparatus described in the booklet. I call your attention particularly to the following patents:

1350752 Van der Bijl.
1356763 Hartley.
*1398665 Arnold.
*1403475 Arnold.
*1403932 Wilson.
1447773 Espenschied et al.
*1465332 Arnold.
1472470 Hartley.
*1507016 DeForest.
*1507017 DeForest.
1511015 Affel.
*1531805 Mathes.
1574780 Affel.
*1596198 Loewe.
1734038 Levy.
1734132 Kendall.
1778750 Bruce.
1849651 Anderson.
1869323 Evans.
*1896780 Llewellyn.
1936162 Heising.

Those patents that are starred are ones on which this company has repeatedly brought suit successfully. No doubt you are aware that the two patents, nos. 1507016 and 1507017, have been held by the Supreme Court to be valid and infringed (54 Sup. Ct. R. 752).

It is the intention of this company to insist that its patent rights be respected by you, and I shall be pleased to hear from you that it is your intention to do so.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

JUNE 18, 1935.

SOUTHERN ELECTRIC & TRANSMISSION CO.,
3513 Cleveland Street, Dallas, Tex.

GENTLEMEN: Our attention has been called to the fact that you are manufacturing and selling the following types of equipment:

(1) Carrier telephone systems;
(2) Telephone repeaters; and
(3) Loading coils made up of iron dust of high permeability.

We are unaware of the details of any of your such equipment, but out of an abundance of caution this letter is written to inform you, on behalf of the American Telephone & Telegraph Co., that this company controls a number of patents covering each of such types of equipment. We wish to put you on your guard so that you may not inadvertently infringe any of those patents. In that connection we call your attention to the following United States patents relating to carrier and repeater systems:

1273154 Demarest.
1277274 Toomey et al.
1280969 Demarest.
1308664 Demarest.
1329283 Arnold.
1330471 Kendall.
1343306 Carson.
1343307 Carson.
1343308 Carson.
1349252 Arnold
1350752 Van der Bijl.
1356763 Hartley.
1364159 Toomey.
1375447 DeForest.
1375739 Scriven.
1377405 DeForest
1382206 McCaa.
1385777 Clark.
1388450 Colpitts-Arnold.
1398665 Arnold.
1402202 Affel-Davidson.
1403475 Arnold.
1403932 Wilson.
1413732 Heising.
1420989 Fondiller.
1426754 Mathes.
1426755 Mathes-Read.
1429248 Osborne.
1432863 Johnson.
1442439 Mathes.
1443984 Espenschied.
1445141 Kendall.

1880800 Chestnut et al

Your attention is especially called to the above patents numbered 1507016 and 1507017, which have recently been held valid and infringed by the Supreme Court of the United States after prolonged litigation.

Your attention is also called to the following patents relating to loading coils:

1274952 Speed
1286965 Elmen
1292206 Woodruff
1297126 Elmen
1297127 Elmen
1303511 Shackelton
1378969 Milton
1381460 Harris
1403305 Elmen
1448542 Jackson
1523109 Elmen
1572869 Adams
1586884 Elmen
1615685 Ehlers
1618818 Ehlers
1620878 Elmen
1624630 Shackelton
1632105 Zichrick
1647737 Legg
1647738 Legg
1651957 Lowry
1651958 Lowry
1669642 Andrews
1669643 Andrews et al.
1669645 Andrews et al.
1669646 Bandur
1669644 Andrews
1669648 Bandur
1669658 Elmen
1669665 Karcher
1675884 Elmen
1695041 Elmen
1703287 Andrews
1714683 Lowry
1715543 Elmen
1715646 Elmen
1715647 Elmen
1715648 Elmen
1721379 Ehlers et al.
1725026 Swinne
1733592 Given
1739068 Harris
1739752 Elmen
1768274 Thomas et al.

It is the intention of this company to enforce its rights under its patents relating to the above systems and apparatus and it is for this reason that we are putting you on your guard. We shall be pleased to hear from you regarding this matter.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

JUNE 19, 1935.

The COMMUNICATION EQUIPMENT & ENGINEERING CO.,
2626 West Washington Boulevard, Chicago, Ill.

GENTLEMEN: Our attention has been called to the fact that you are either manufacturing or propose to manufacture and sell carrier current telephone equipment. We are not aware of the details of your proposed system, but wish to call your attention to the fact that this company controls a large number of patents relating to such systems, and wish to put you on your guard so that you may not inadvertently infringe those patents. In particular, your attention is called to the two DeForest patents 1507016 and 1507017 which have recently, in an infringement suit, been adjudicated and held by the Supreme Court of the United States to be valid and infringed.

It is the intention of this company to enforce its rights under its patents relating to such equipment, and it is for this reason that we are putting you on your guard.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

JUNE 19, 1935.

KELLOGG SWITCHBOARD & SUPPLY CO.,
1066 West Adams Street, Chicago, Ill.

GENTLEMEN: Our attention has been called to a circular of your company describing a two-way telephone repeater including schematic circuit drawings designated A-2388, 2339, 2360, 2363, 2364, and 2368, and a gain-frequency characteristic curve. The circuits described in the circular are believed to infringe the following patents owned or controlled by this company: Toomey et al, 1277274, August 27, 1918; Demarest, 1280969, October 8, 1918; Arnold, 1329283, January 27, 1920; Arnold, 1349252, August 10, 1920; DeForest, 1377405, May 10, 1921; Clark, 1495221, May 27, 1924.

There is not sufficient detailed description and drawings of the circuit, to determine if they infringe the following of this company's patents: Nos. 1454011, 1273154, 1308664, 1364159, 1398665, and 1453982, but we are calling your attention to these and the other patents, out of an abundance of caution so that you may not inadvertently infringe any of them.

It is the intention of this company to enforce its rights under its patents relating to repeater systems and apparatus, and it is for this reason we are putting you on your guard. We should be pleased to hear from you regarding this matter.

Yours very truly,

G. E. FOLK, *General Patent Attorney.*

JULY 12, 1935.

MR. R. A. CLARK, JR.,
President, The Communication Equipment & Engineering Co.,
2626 West Washington Boulevard, Chicago, Ill.

DEAR SIR: This will acknowledge the receipt of your letter of July 10, 1935, in which you request a list of patents which this company owns or controls

Digitized by Google

covering oscillator and modulator circuits. In this connection, I call your attention to the following patents relating to carrier and repeater systems:

1273154 Demarest
1277274 Toomey et al.
1280969 Demarest
1308664 Demarest
1329283 Arnold
1330471 Kendall
1343306 Carson
1343308 Carson
1349252 Arnold
1350752 Van der Bijl
1356763 Hartley
1364159 Toomey
1375447 DeForest
1375739 Scriven
1377405 DeForest
1382206 McCaa
1385777 Clark
1388450 Colpitts-Arnold
1398665 Arnold
1479613 Kendall
1481817 Affel
1481831 Demarest
1485156 Arnold
1493216 Mathes
1493217 Mathes
1495221 Clark
1501729 Scriven
1504537 Arnold
1507594 Field
1509184 Zobel
1513761 Osborne
1514705 Kendall
1520994 Arnold
1523737 Quarles
1523473 Clark
1530613 Pierce
1530633 Whiting
1530649 Casper
1537653 Murphy
1580884 Elmen
1615685 Ehlers
1618818 Ehlers
1620878 Elmen
1624630 Shackelton
1632105 Zichrick
1647737 Legg
1647738 Legg
1651957 Lowry
1651958 Lowry
1669642 Andrews
1669643 Andrews et al.
1669645 Andrews et al.
1669646 Bandur
1669644 Andrews
1669648 Bandur
1669658 Elmen
1669665 Karcher
1675884 Elmen
1695041 Elmen
1703287 Andrews
1714683 Lowry
1715543 Elmen
1715646 Elmen
1715647 Elmen
1715648 Elmen
1721379 Ehlers et al.
1725926 Swinne
1733592 Given
1739068 Harris
1739752 Elmen
1768274 Thomas et al.
1845113 Andrews et al.
1826711 Andrews
1666191 Bandur
1673790 Bandur
1669647 Bandur
1743089 Bandur
1669649 Beath et al.
1818070 Lathrop
1787606 Legg
1809042 Kelsall
1561782 Given
1759612 Given et al.
1841472 Given
1845144 Gillis
1739052 White
1739068 Harris
1747854 Bozorth
1853924 Owens
1795639 Chaston et al.

It is the intention of this company to enforce its rights under its patents relating to such coils and it is for this reason that we are putting you on your guard.

Yours very truly,

G. E. FOLK,
General Patent Attorney.

An Act to consolidate the enactments relating to Patents for Inventions and the Registration of Designs and certain enactments relating to Trade Marks.

[*Printed (in accordance with 22 & 23 Geo. 5. c. 32. s. 14) as amended up to 12th July, 1932, by the Patents and Designs Act,* 1914 (4 & 5 *Geo. 5. c.* 18), *the Patents and Designs Act,* 1919 (9 & 10 *Geo. 5. c.* 80), *the Patents and Designs (Convention) Act,* 1928 (18 *Geo. 5. c.* 3) *and the Patents and Designs Act,* 1932 (22 & 23 *Geo. 5. c.* 32).]

Be it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Digitized by Google

PART I. PATENTS

APPLICATION FOR AND GRANT OF PATENT

1. (1) An application for a patent may be made by any person who claims to be the true and first inventor of an invention, whether he is a British subject or not, and whether alone or jointly with any other person.

(2) The application must be made in the prescribed form, and must be left at, or sent by post to, the Patent Office in the prescribed manner.

(3) The application must contain a declaration to the effect that the applicant is in possession of an invention, whereof he, or in the case of a joint application one at least of the applicants, claims to be the true and first inventor, and for which he desires to obtain a patent, and must be accompanied by either a provisional or complete specification.

(4) The declaration required by this section may be either a statutory declaration or not, as may be prescribed.

2. (1) A provisional specification must describe the nature of the invention.

(2) A complete specification must particularly describe and ascertain the nature of the invention and the manner in which the same is to be performed.

(3) In the case of any provisional or complete specification where the comptroller deems it desirable he may require that suitable drawings shall be supplied with the specification, or at any time before the acceptance of the same, and such drawings shall be deemed to form part of the said specification.

(4) A specification, whether provisional or complete, must commence with the title, and in the case of a complete specification must end with a distinct statement of the invention claimed.

(5) Where the invention in respect of which an application is made is a chemical invention, then, subject to the prescribed rules, typical samples and specimens shall, if in any particular case the comptroller considers it desirable so to require, be furnished before the acceptance of the complete specification, and the applicant shall be at liberty, where he so desires, and subject to the prescribed rules, so to furnish any typical samples and specimens, unless the comptroller in any particular case considers that it is undesirable that any should be received.

3. (1) The comptroller shall refer every application to an examiner.

(2) If the examiner reports that the nature of the invention is not fairly described, or as respects a complete specification that the nature of the invention or the manner in which it is to be performed is not therein particularly described and ascertained, or that the application, specification, or drawings have not been prepared in the prescribed manner, or that the title does not sufficiently indicate the subject-matter of the invention, the comptroller may refuse to accept the application or require that the application, specification, or drawings be amended before he proceeds with the application; and in the latter case the application shall, if the comptroller so directs, be deemed to have been made on the date on which the requirement is complied with.

(3) The comptroller may, where the application was accompanied by a specification purporting to be a complete specification, if the applicant so requests, treat the specification as a provisional specification and proceed with the application accordingly.

(4) The comptroller may, where the applicant before acceptance of the complete specification so requests and upon payment by the applicant of the prescribed fee, direct that the application shall be deemed to have been made on such date within a period of six months running from the date when the application was actually made, as the applicant may request.

(5) The applicant may appeal from any decision of the comptroller under this section to the Appeal Tribunal, who shall, if required, hear the applicant and the comptroller, and may make an order determining whether and subject to what conditions (if any) the application shall be accepted.

(6) The comptroller shall, when an application has been accepted, give notice thereof to the applicant.

4. An invention may, during the period between the date of an application for a patent therefor and the date of sealing a patent on that application, be used and published without prejudice to that patent, and such protection from the consequences of use and publication is in this Act referred to as provisional protection.

In this section the expression "date of an application for a patent" means, as respects an application which is post-dated or ante-dated under this Act, the

Digitized by Google

date to which the application is so post-dated or ante-dated, and means, as respects any other application, the date on which it is actually made.

5. (1) If the applicant does not leave a complete specification with his application, he may leave it at any subsequent time within twelve months from the date of the application:

Provided that where an application is made for an extension of the time for leaving a complete specification, the comptroller shall, on payment of the prescribed fee, grant an extension of time to the extent applied for but not exceeding one month.

(2) Unless a complete specification is so left the application shall be deemed to be abandoned.

6. (1) Where a complete specification is left after a provisional specification, the comptroller shall refer both specifications to an examiner.

(2) If the examiner reports that the nature of the invention or the manner in which it is to be performed is not particularly described and ascertained in the complete specification or that the complete specification or drawings have not been prepared in the prescribed manner, the comptroller may refuse to accept the complete specification until it has been amended to his satisfaction.

(3) If the examiner reports that the invention particularly described in the complete specification is not substantially the same as that which is described in the provisional specification the comptroller may—

(*a*) refuse to accept the complete specification until it has been amended to his satisfaction; or

(*b*) (with the consent of the applicant) cancel the provisional specification and direct that the application shall be deemed to have been made on the date at which the complete specification was left and proceed with the application accordingly:

Provided that where the complete specification includes an invention not included in the provisional specification, the comptroller may allow the original application to proceed so far as the invention included both in the provisional and in the complete specification is concerned, and allow an application for the additional invention included in the complete specification to be made and direct that that application shall be deemed to have been made on the date at which the complete specification was left.

(4) An appeal shall lie from the decision of the comptroller under this section to the Appeal Tribunal, who shall, if required, hear the applicant and the comptroller and may make an order determining whether and subject to what conditions (if any) the complete specification shall be accepted.

7. (1) Where an application for a patent has been made and a complete specification has been left, the examiner shall, in addition to the other inquiries which he is directed to make by this Act, make a further investigation for the purpose of ascertaining whether the invention claimed has been wholly or in part claimed or described in any specification (other than a provisional specification not followed by a complete specification) published before the date which the patent applied for would bear if granted and left pursuant to any application for a patent made in the United Kingdom and dated within fifty years next before such date.

(2) If on investigation it appears that the invention claimed has been wholly or in part claimed or described in any such specification, the applicant shall be informed thereof, and the applicant may, within such time as may be prescribed, amend his specification, and the amended specification shall be investigated in like manner as the original specification.

(3) If the comptroller is satisfied that no objection exists to the specification on the ground that the invention claimed thereby has been wholly or in part claimed or described in a previous specification as before mentioned, he shall, in the absence of any other lawful ground of objection, accept the specification.

(4) If the comptroller is not so satisfied, he shall, unless the objection is removed by amending the specification to the satisfaction of the comptroller, determine whether a reference to any, and, if so, what prior specifications ought to be made in the specification by way of notice to the public:

Provided that the comptroller, if satisfied that the invention claimed has been wholly and specifically claimed or wholly and specifically described in any specification to which the investigation has extended, may, in lieu of requiring references to be made in the applicant's specification as aforesaid, refuse to grant a patent.

(5) If it is within the knowledge of the comptroller that the invention claimed has been made available to the public by publication in the United

Digitized by Google

Kingdom, before the date which the patent applied for would bear if granted, in any document (other than a United Kingdom specification or a specification describing the invention for the purposes of an application for protection made in any country outside the United Kingdom more than fifty years next before that date, or any abridgment of, or extract from, any such specification published under the authority of the comptroller or of the Government of any country outside the United Kingdom), the provisions of subsections (2), (3) and (4) of this section shall apply in relation to a claim or description of the invention in that document in like manner as those provisions apply in relation to a description thereof in a prior specification to which the investigation has extended.

(6) An appeal shall lie from the decision of the comptroller under this section to the Appeal Tribunal.

8. (1) In addition to the investigation under the last preceding section, the examiner shall make an investigation for the purpose of ascertaining whether the invention claimed has been wholly or in part claimed in any specification published on or after the date which the patent applied for would bear if granted and deposited pursuant to an application made in the United Kingdom for a patent which if granted would bear prior date to the date which the patent applied for would bear if granted.

(2) Where on such further investigation it appears that the invention claimed has been wholly or in part claimed in any such specification, the applicant shall, whether or not his specification has been accepted or a patent granted to him, be afforded such facilities as may be prescribed for amending his specification, and in the event of his failing to do so the comptroller shall, in accordance with such procedure as may be prescribed, determine what reference, if any, to other specifications ought to be made in his specificaton by way of notice to the public.

(3) An appeal shall lie from the decision of the comptroller under this section to the Appeal Tribunal.

(4) The investigations and reports required by this and the last preceding section shall not be held in any way to guarantee the validity of any patent and no liability shall be incurred by the Board of Trade or any officer thereof by reason or or in connection with any such investigation or report or any proceedings consequent thereon.

8A. Unless a complete specification is accepted within eighteen months from the date of an application the application shall become void unless—

(*a*) an appeal under any of the foregoing provisions of this Act has been lodged in respect of the application; or

(*b*) in the case of an application for a patent of addition an appeal under any of the foregoing provisions of this Act has been lodged in respect either of that application or of the application for the original patent; or

(*c*) the time within which such an appeal as aforesaid may be lodged has not expired:

Provided that where an application is made for an extension of time for the acceptance of a complete specification, the comptroller shall, on payment of the prescribed fee, grant an extension of time to the extent applied for, but not exceeding three months.

9. On the acceptance of the complete specification the comptroller shall advertise the acceptance; and the application and specifications, with the drawings samples and specimens (if any), shall be open to public inspection.

10. After the acceptance of a complete specification and until the date of sealing a patent in respect thereof, or the expiration of the time for sealing, the applicant shall have the like privileges and rights as if a patent for the invention had been sealed on the date of the acceptance of the complete specification: Provided that an applicant shall not be entitled to institute any proceeding for infringement until the patent has been sealed.

11. (1) Any person may at any time within two months from the date of the advertisement of the acceptance of a complete specification or within such further period, not exceeding one month, as the comptroller may on an application made to him within the said period of two months and subject to payment of the prescribed fee, allow, give notice at the Patent Office of opposition to the grant of the patent on any of the following grounds:—

(*a*) that the applicant obtained the invention or any part thereof from him, or from a person of whom he is the legal representative; or

(*b*) that the invention has prior to the date which the patent applied for would bear if granted been published in any complete specification,

Digitized by Google

or in any provisional specification followed by a complete specification, deposited pursuant to any application made in the United Kingdom and dated within fifty years next before such date, or has been made available to the public by publication in any document (other than a United Kingdom specification or a specification describing the invention for the purpose of an application for protection made in any country outside the United Kingdom more than fifty years next before such date, or any abridgment of, or extract from any such specification published under the authority of the comptroller or of the Government of any country outside the United Kingdom) published in the United Kingdom before such date; or

(*bb*) that the invention has been claimed in any complete specification for a United Kingdom patent which though not published at the date which the patent applied for would bear if granted was deposited pursuant to an application for a patent which is or will be of prior date to such patent; or

(*c*) that the nature of the invention or the manner in which it is to be performed is not sufficiently and fairly described and ascertained in the complete specification; or

(*d*) that the complete specification describes or claims an invention other than that described in the provisional specification, and that such other invention either forms the subject of an application made by the opponent for a patent which if granted would bear a date in the interval between the date of the application and the leaving of the complete specifiaction, or has been made available to the public by publication in any document published in the United Kingdom in that interval; or

(*e*) that in the case of an application under section ninety-one of this Act the specification describes or claims an invention other than that for which protection has been applied for in foreign state or any part of His Majesty's dominions outside of the United Kingdom and that such other invention either forms the subject of an application made by the opponent for a patent which if granted would bear a date in the interval between the leaving of the application in the foreign state or part of His Majesty's dominions outside the United Kingdom and the date of the application in the United Kingdom, or has been made available to the public by publication in any document published in the United Kingdom in that interval,

but on no other ground.

(2) Where such notice is given the comptroller shall give notice of the opposition to the applicant, and shall, after hearing the applicant and the opponent, if desirous of being heard, decide on the case.

(3) The decision of the comptroller shall be subject to appeal to the Appeal Tribunal who shall, if required, hear the applicant and the opponent, if the opponent is, in the opinion of the Tribunal, a person entitled to be heard in opposition to the grant of the patent and shall decide the case.

12. (1) If there is no opposition, or, in case of opposition, if the determination is in favour of the grant of a patent, a patent shall, on payment of the prescribed fee, be granted to the applicant, or in the case of a joint application to the applicants jointly, and the comptroller shall cause the patent to be sealed with the seal of the Patent Office.

Provided that—

(*a*) where an applicant under a joint application has died, the patent may, with the consent of his personal representative, be granted to the survivors or survivor of the joint applicants;

(*b*) where an applicant has agreed in writing to assign the patent when granted or, in the case of a joint application, his interest in the patent when granted, the patent may, upon proof of the agreement to the satisfaction of the comptroller, be granted to the assignee or, in the case of an assignment by a joint applicant of his interest to an assignee not being the other joint applicant, to the assignee jointly with the other applicant or his assignee.

(2) Where disputes arise between joint applicants or their assigns as to proceeding with an application, the comptroller, if satisfied that one or more of such persons ought to be allowed to proceed alone, may allow him or them to proceed with the application and may grant a patent to him or them, so, however, that all parties interested shall be entitled to be heard before the comptroller.

(3) An appeal shall lie from the decision of the comptroller under this section to the Appeal Tribunal.

Digitized by Google

(4) A patent shall be sealed as soon as may be, and not after the expiration of twenty-one months from the date of application, provided that—

(*a*) where the comptroller has allowed an extension of the time within which a complete specification may be left or accepted, a further extension of four months after the said twenty-one months shall be allowed for the sealing of the patent:

(*b*) where the sealing of a patent is delayed by an appeal to the Appeal Tribunal or by any proceedings taken for obtaining the decision of the comptroller under the provisions of subsection (2) of this section, or by opposition to the grant of the patent, that patent and any patent of addition the sealing whereof is delayed in consequence of the delay in the sealing of that patent may be sealed at such time as in the first-mentioned case the Tribunal, or in either of the two last-mentioned cases the comptroller, may direct:

(*c*) where the patent is granted to the legal representative of an applicant who has died before the expiration of the time which would otherwise be allowed for sealing the patent, the patent may be sealed at any time within twelve months after the date of his death, or at such later time as the comptroller may think fit:

(*d*) where it is proved to the satisfaction of the comptroller that hardship would arise in connection with the prosecution by an applicant of an application for a patent in any country outside the United Kingdom unless the maximum period which would otherwise be allowed for sealing the patent is extended, that period may be extended subject to payment of the prescribed fee to such an extent as appears to the comptroller to be necessary in order to prevent that hardship arising:

(*e*) where for any reason a patent cannot be sealed within the period allowed by this section, that period may, on the payment of the prescribed fee and on compliance with the prescribed conditions, be extended to such an extent as may be prescribed.

13. Except as otherwise expressly provided by this Act, a patent shall be dated as of the date of the application: Provided that no proceedings shall be taken in respect of an infringement committed before the acceptance of the complete specification.

14. (1) A patent sealed with the seal of the Patent Office shall have the same effect as if it were sealed with the Great Seal of the United Kingdom, and shall have effect throughout the United Kingdom and the Isle of Man:

Provided that a patentee may assign his patent for any place in or part of the United Kingdom, or Isle of Man, as effectually as if the patent were originally granted to extend to that place or part only.

(2) Every patent may be in the prescribed form and shall be granted for one invention only, but the specification may contain more than one claim; and it shall not be competent for any person in an action or other proceeding to take any objection to a patent on the ground that it has been granted for more than one invention.

15. (1) A patent granted on the application of the true and first inventor shall not be invalidated by an application in fraud of him, or by provisional protection obtained thereon, or by any use or publication of the invention subsequent to that fraudulent application during the period of provisional protection.

(2) Where a patent has been revoked by the court on the ground that it has been obtained in fraud of the true and first inventor, or where the grant has been refused by the comptroller under the provisions of paragraph (*a*) of subsection (1) of section eleven of this Act, or revoked on the same ground under the provisions of section twenty-six of this Act, the comptroller may, on the application of the true inventor made in accordance with the provisions of this Act, grant to him a patent for the whole or any part of the invention in lieu of and bearing the same date as the patent so revoked, or as would have been borne by the patent if the grant thereof had not been refused.

(3) Where in proceedings before the comptroller under this Act for opposition to the grant of a patent or for revocation of a patent, the comptroller has found that an invention was in part obtained from the opponent or the applicant for revocation and has required that the specification be amended by exclusion of that part of the invention, he may, on the application of the true inventor made in accordance with the provisions of this Act, grant to him a patent for that excluded part of the invention bearing the date of the opposed application or the date of the patent sought to be revoked as the case may be.

Digitized by Google

(4) No action shall be brought for any infringement of a patent granted under the provisions of either of the last two foregoing subsections committed before the date of sealing the patent.

16. (1) Where the same applicant has put in two or more provisional specifications for inventions which are cognate or modifications one of the other, and has obtained thereby concurrent provisional protection for the same, and the comptroller is of opinion that the whole of such inventions are such as to constitute a single invention and may properly be included in one patent, he may accept one complete specification in respect of the whole of such applications and grant a single patent thereon.

(2) Such patent shall bear the date of the earliest of such applications, but in considering the validity of the same, and in determining other questions under this Act, the court or the comptroller, as the case may be, shall have regard to the respective dates of the provisional specifications relating to the several matters claimed in the complete specification.

Term of Patents

17. (1) The term limited in every patent for the duration thereof shall, save as otherwise expressly provided by this Act, be sixteen[1] years from its date.

(2) A patent shall, notwithstanding anything therein or in this Act, cease if the patentee fails to pay the prescribed fees within the prescribed times; provided that the comptroller, upon the application of the patentee, shall, on receipt of such additional fee, not exceeding ten pounds, as may be prescribed, enlarge the time to such an extent as may be applied for but not exceeding three months.

(3) If any proceeding is taken in respect of an infringement of the patent committed after a failure to pay any fee within the prescribed time, and before any enlargement thereof, the court before which the proceeding is proposed to be taken may, if it thinks fit, refuse to award any damages in respect of such infringement.

18. (1) A patentee may, after advertising in manner provided by rules of the Supreme Court his intention to do so, present a petition to the court praying that his patent may be extended for a further term, but such petition must be presented at least six months before the time limited for the expiration of the patent:

Provided that the court may allow such a petition to be presented at such time, not being later than the time limited for the expiration of the patent, as the court may in its discretion think fit.

(2) Any person may give notice to the court of objection to the extension.

(3) On the hearing of any petition under this section the patentee and any person who has given such notice of objection shall be made parties to the proceeding, and the comptroller shall be entitled to appear and be heard, and shall appear if so directed by the court.

(4) The court, in considering its decision, shall have regard to the nature and merits of the invention in relation to the public, to the profits made by the patentee as such, and to all the circumstances of the case.

(5) If it appears to the court that the patentee has been inadequately remunerated by his patent, the court may by order extend the term of the patent for a further term not exceeding five years, or, in exceptional cases, ten years, or may order the grant of a new patent for such term as may be specified

---

[1] The Patents and Designs Act, 1919 (9 & 10 Geo. 5, c. 80) provides (section 6) that—

(2) Any patent the original term of which had not expired at the date of the commencement of this Act shall have effect as if the term mentioned herein was sixteen years instead of fourteen years, subject to the following conditions:—

(*a*) Any licence existing at that date which has been granted for the term of the patent shall be treated as having been granted for the term as so extended if the licensee so desires:

(*b*) If the patent would, apart from this section, have expired on or before the first day of January, nineteen hundred and twenty, the patent shall, during the period of extension, be subject to all the provisions by this Act substituted for section twenty-four of the principal Act (except subsection (5) thereof) as if the patent had been endorsed "licences of right."

(3) Where any party to a contract with the patentee or any other person, entered into before the nineteenth day of November, nineteen hundred and seventeen, is subjected to loss or liability by reason of the extension of the term of any patent under the provisions of this section, the court shall have power to determine in what manner and by which parties such loss or liability shall be borne.

Digitized by Google

in the order and containing any restrictions, conditions, and provisions the court may think fit.

(6) Where, by reason of hostilities between His Majesty and any foreign state, the patentee as such has suffered loss or damage (including loss of opportunity of dealing in or developing his invention owing to his having been engaged in work of national importance connected with such hostilities) an application under this section may be made by originating summons instead of by petition, and the court in considering its decision may have regard solely to the loss or damage so suffered by the patentee:

Provided that this subsection shall not apply if the patentee is a subject of such foreign state as aforesaid, or is a company the business whereof is managed or controlled by such subjects or is carried on wholly or mainly for the benefit or on behalf of such subjects, notwithstanding that the company may be registered within His Majesty's dominions.

19. (1) Where a patent for an invention has been applied for or granted and the applicant or the patentee, as the case may be, applies for a further patent in respect of any improvement in or modification of the invention, he may, if he thinks fit, in his application for the further patent, request that the term limited in that patent for the duration hereof be the same as that of the original patent or so much of that term as is unexpired.

(2) Where an application containing such a request is made, a patent of addition may be granted for such term as aforesaid.

(3) Where an invention, being an improvement in or modification of an original invention, is the subject of an independent patent and the patentee in respect of the independent patent, being also the patentee in respect of the patent for the original invention, so requests, the comptroller may make an order for the revocation of the independent patent and a patent of addition may be granted in respect of the improvement or modification bearing the same date as the date of the independent patent so revoked.

(4) A patent of addition shall remain in force during the term limited in the patent for the original invention or until the previous cesser thereof and no longer, but may be extended under the last foregoing section for any period for which the patent for the original invention is extended thereunder, and in respect of a patent of addition no fees shall be payable for renewals:

Provided that, if the patent for the original invention is revoked, then the patent of addition shall, if the court or comptroller so orders, become an independent patent, and the fees payable, and the dates when they become payable, shall be determined by its date, but its duration shall not exceed the unexpired term of the patent for the original invention.

(5) The grant of a patent of addition shall be conclusive evidence that the invention is a proper subject for a patent of addition, and the validity of the patent shall not be questioned on the ground that the invention ought to have been the subject of an independent patent.

RESTORATION OF LAPSED PATENTS

20. (1) Where any patent has become void owing to the failure of the patentee to pay any prescribed fee within the prescribed time, the patentee may apply to the comptroller in the prescribed manner for an order for the restoration of the patent.

(2) Every such application shall contain a statement of the circumstances which have led to the omission of the payment of the prescribed fee.

(3) If it appears from such statement that the omission was unintentional and that no undue delay has occurred in the making of the application, the comptroller shall advertise the application in the prescribed manner, and within such time as may be prescribed any person may give notice of opposition at the Patent Office.

(4) Where such notice is given the comptroller shall notify the applicant thereof.

(5) After the expiration of the prescribed period the comptroller shall hear the case and issue an order either restoring the patent or dismissing the application:

Provided that the comptroller may, if he thinks fit, as a condition of issuing an order under this section restoring a patent require that an entry shall be made in the register of patents in respect of any document or instrument in

Digitized by Google

respect of which the provisions of this Act as to entries in the register have not been complied with.

(6) In every order under this section restoring a patent such provision as may be prescribed shall be inserted for the protection of persons who may have availed themselves of the subject-matter of the patent after the patent has been announced as void in the Official Journal (Patents).

(7) An appeal shall lie from the decision of the comptroller under this section to the court.

AMENDMENT OF SPECIFICATION

21. (1) An applicant at any time after acceptance of his complete specification or a patentee at any time may, by request in writing left at the Patent Office, seek leave to amend his specification, including drawings forming part thereof, by way of disclaimer, correction, or explanation, stating the nature of, and the reasons for, the proposed amendment.

(2) The request and the nature of the proposed amendment shall be advertised in the prescribed manner, and at any time within one month from its first advertisement any person may give notice at the Patent Office of opposition to the amendment.

(3) Where such a notice is given the comptroller shall give notice of the opposition to the person making the request, and shall hear and decide the case.

(4) Where no notice of opposition is given, or the person so giving notice of opposition does not appear, the comptroller shall determine whether and subject to what conditions, if any, the amendment ought to be allowed.

(5) The decision of the comptroller in either case shall be subject to an appeal, where the person making the request to amend is a patentee, to the court, and, where the person making the request to amend is an applicant for a patent, to the Appeal Tribunal and the court or the Tribunal, as the case may be, shall, if required, hear the person making the request to amend, and, where notice of opposition has been given the person giving that notice, if he is in the opinion of the court or of the Tribunal, as the case may be, entitled to be heard in opposition to the request, and, where there is no opposition the comptroller, and may make an order determining whether and subject to what conditions (if any) the amendment ought to be allowed.

(6) No amendment shall be allowed that would make the specification, as amended, claim an invention substantially larger than or substantially different from the invention claimed by the specification as it stood before amendment.

(7) Leave to amend shall be conclusive as to the right of the party to make the amendment allowed, except in case of fraud; and the amendment shall be advertised in the prescribed manner, and shall in all courts and for all purposes be deemed to form part of the specification:

Provided that the court shall be entitled in construing a specification as amended to refer to the specification as accepted and published.

(8) This section shall not apply when and so long as any action for infringement or preceeding before the court for the revocation of a patent is pending.

22. In any action for infringement of a patent or proceedings before a court for the revocation of a patent the court may by order allow the patentee to amend his specification by way of disclaimer, correction or explanation in such manner, and subject to such terms as to costs advertisements or otherwise, as the court may think fit:

Provided that no amendment shall be so allowed that would make the specification, as amended, claim an invention substantially larger than, or substantially different from, the invention claimed by the specification as it stood before the amendment, and where an application for such an order is made to the court notice of the application shall be given to the comptroller, and the comptroller shall have the right to appear and be heard, and shall appear if so directed by the court.

23. Where an amendment of a specification by way of disclaimer, correction, or explanation, has been allowed under this Act, no damages shall be given in any action in respect of the use of the invention before the date of the decision allowing the amendment, unless the patentee establishes to the satisfaction of the court that his original claim was framed in good faith and with reasonable skill and knowledge.

COMPULSORY LICENSES AND REVOCATION

24. (1) At any time after the sealing of a patent the comptroller shall, if the patentee so requests, cause the patent to be indorsed with the words "licences of right," and a corresponding entry to be made in the register, and thereupon—

(*a*) any person shall at any time thereafter be entitled as of right to a licence under the patent upon such terms as, in default of agreement, may be settled by the comptroller on the application of either the patentee or the applicant:

Provided that any licence the terms of which are settled by agreement shall be deemed, unless otherwise expressly provided, to include the terms and conditions specified in paragraphs (*c*) and (*d*) of this subsection as if they had been imposed by the comptroller thereunder in like manner as if the terms had been settled by the comptroller:

(*b*) in settling the terms of any such licence the comptroller shall be guided by the following considerations—

(i) he shall, on the one hand, endeavour to secure the widest possible user of the invention in the United Kingdom consistent with the patentee deriving a reasonable advantage from his patent rights;

(ii) he shall, on the other hand, endeavour to secure to the patentee the maximum advantage consistent with the invention being worked by the licensee at a reasonable profit in the United Kingdom;

(iii) he shall also endeavor to secure equality of advantage among the several licensees, and for this purpose may, on due cause being shown, reduce the royalties or other payments accruing to the patentee under any licence previously granted:

Provided that, in considering the question of equality of advantage, the comptroller shall take into account any work done or outlay incurred by any previous licensee with a view to testing the commercial value of the invention or to securing the working thereof on a commercial scale in the United Kingdom:

(*c*) any such licence the terms of which are settled by the comptroller may be so framed as to preclude the licensee from importing into the United Kingdom any goods the importation of which, if made by persons other than the patentee of those claiming under him, would be an infringement of the patent, and in such a case the patentee and all licensees under the patent shall be deemed to have mutually covenanted against such importation:

(*d*) every such licensee shall be entitled to call upon a patentee to take proceedings to prevent the infringement of the patent, and if the patentee refuses, or neglects to do so within two months after being so called upon, the licensee may institute proceedings for the infringement in his own name as though he were patentee, making the patentee a defendant. A patentee so added as defendant shall not be liable for any costs unless he enters an appearance and takes part in the proceedings. Service on him may be effected by leaving the writ at his address for service given on the register:

(*e*) if in any action for infringement of a patent so indorsed the infringing defendant is ready and willing to take a licence upon terms to be settled by the comptroller, no injunction against him shall be awarded, and the amount recoverable against him by way of damages (if any) shall not exceed double the amount which would have been recoverable against him as licensee if the licence had been dated prior to the earliest infringement:

Provided that this paragraph shall not apply where the infringement consists of the importation of infringing goods:

(*f*) the renewal fees payable by the patentee of a patent so indorsed shall, as from the date of the indorsement, be one moiety only of the fees which would otherwise have been payable.

(2) The comptroller shall, before acting on any request to indorse a patent made by the patentee under this section, advertise such request in the Official Journal (Patents), and shall satisfy himself that the patentee is not precluded by contract from making such request, and for that purpose shall require from the patentee such evidence, by statutory declaration or otherwise, as he may deem necessary:

Provided that a patentee shall not be deemed to be so precluded by reason only of his having granted a licence under the patent where the licence does not limit his right to grant other licences.

Digitized by Google

(3) Any person, alleging that a request under this section has been made contrary to some contract in which he is interested, may apply to the comptroller within the prescribed time and in the prescribed manner, and the comptroller, if satisfied of the truth of such allegation, shall refuse to indorse the patent pursuant to the request or shall cause the indorsement, if already made, to be cancelled.

(4) Where a patent of addition is in force any request made under this section for an indorsement either of the original patent or of the patent of addition shall be treated as a request for the indorsement of both patents, and if refused as respects the one shall be refused as respects the other also, and where a patent of addition is granted in respect of a patent which is indorsed under this section the patent of addition shall also be so indorsed.

(5) All indorsements of patents under this section shall be entered on the register of patents and shall be published in the Official Journal (Patents), and in such other manner as to the comptroller may seem desirable for the purpose of bringing the invention to the notice of manufacturers.

(6) The comptroller may, if he thinks fit, on the application of the patentee and on payment by him of the unpaid moiety of all renewal fees which have become due since the indorsement, cancel the indorsement, and in that case the patentee's rights and liabilities shall be the same as if no such indorsement had been made:

Provided that before acting on any application for the cancellation of an indorsement, the comptroller shall advertise the application in the prescribed manner and shall satisfy himself that there is no existing licence or that all existing licensees consent to the application.

(7) Any person may within the prescribed time and in the prescribed manner, give notice at the Patent Office of opposition to an application for the cancellation of an indorsement, and where any such notice is given the comptroller shall, after giving notice of the opposition to the applicant and after giving to the applicant and to the opponent an opportunity of being heard, decide on the case.

(8) Any decision of the comptroller under this section shall be subject to an appeal to the court.

25.—(1) Revocation of a patent may be obtained on petition to the court.

(2) A patent may be revoked upon any of the following grounds,—

(*a*) that the invention was the subject of a valid prior grant;

(*b*) that the true and first inventor was not the applicant or one of the applicants for the patent;

(*c*) that the patent was obtained in fraud of rights of the person applying for the order or of any person under or through whom he claims;

(*d*) that the invention is not a manner of new manufacture the subject of letters patent and grant of privilege within section six of the Statute of Monopolies;

(*e*) subject as in this subsection provided, that the invention is not new;

(*f*) that the invention is obvious and does not involve any inventive step having regard to what was known or used prior to the date of the patent;

(*g*) that the invention is not useful;

(*h*) that the complete specification does not sufficiently and fairly describe and ascertain the nature of the invention and the manner in which the invention is to be performed;

(*i*) that the complete specification does not sufficiently and clearly ascertain the scope of the monopoly claimed;

(*j*) that the complete specification does not disclose the best method of performance of the invention known to the applicant for the patent at the time when the specification was left at the Patent Office;

(*k*) that the patent was obtained on a false suggestion or representation;

(*l*) that the invention claimed in the complete specification is not the same as that contained in the provisional specification, and that the invention claimed, so far as it is not contained in the provisional specification was not new at the date when the complete specification was filed, or the true and first inventor was not the applicant, or one of the applicants, for the patent, or, in the case of an application made under section ninety-one of this Act, that the invention claimed in the complete specification is not the same as that for which protection has been applied for in the foreign state, or part of His Majesty's dominions outside the United Kingdom;

Digitized by Google

(*m*) that the primary or intended use or exercise of the invention is contrary to law;

(*n*) that the patentee has contravened or has not complied with the conditions contained in the patent;

(*o*) that prior to the date of the patent the invention was secretly worked on a commercial scale and not merely by way of reasonable trial or experiment in the United Kingdom by the patentee or others, not being a Government department or the agents or contractors of, or other person authorised in that behalf by, a Government department;

(*p*) that, in the case of inventions relating to substances prepared or produced by chemical processes or intended for food or medicine the specification includes claims which under section thirty-eight A of this Act cannot lawfully be made; or

upon any other ground upon which a patent might, immediately before the first day of January one thousand eight hundred and eighty-four, have been repealed by scire facias:

Provided that this subsection shall have effect, as respects the ground of revocation specified in paragraph (*e*) thereof, subject to the provisions of subsection (1) of section fifteen, subsection (12) of section thirty, section forty-one and section forty-five of this Act.

(3) Every ground on which a patent may be revoked shall be available as a ground of defence in an action for infringement of a patent.

(4) A petition for revocation of a patent may be presented—

(*a*) by the Attorney-General or any person authorised by him; or

(*b*) by any person alleging—

(i) that the patent was obtained in fraud of his rights, or of the rights of any person under or through whom he claims; or

(ii) that he, or any person under or through whom he claims, was the true inventor of any invention included in the claim of the patentee; or

(iii) that he, or any person under or through whom he claims an interest in any trade, business, or manufacture, had publicly manufactured, used, or sold, within this realm, before the date of the patent, anything claimed by the patentee as his invention.

26. (1) Any person who would have been entitled to oppose the grant of a patent or is the successor in interest of a person who was so entitled may within twelve months from the date of sealing the patent apply to the comptroller for an order revoking the patent on any one or more of the grounds on which the grant of a patent might have been opposed:

Provided that when an action for infringement or proceedings for the revocation of the patent are pending in any court, an application under this section shall not be made except with the leave of the court.

(2) The comptroller shall give notice of the application to the patentee, and after hearing the parties, if desirous of being heard, may make an order revoking the patent or requiring the specification relating thereto to be amended by disclaimer, correction, or explanation, or dismissing the application; but the comptroller shall not make an order revoking the patent unless the circumstances are such as would have justified him in refusing to grant the patent had the proceedings been proceedings in an opposition to the grant of a patent.

(3) A patentee may at any time by giving notice in the prescribed manner to the comptroller offer to surrender his patent, and the comptroller may, if after giving notice of the offer and hearing all parties who desire to be heard he thinks fit, accept the offer, and thereupon make an order for the revocation of the patent.

(4) Any decision of the comptroller under this section shall be subject to appeal to the court.

27. (1) Any person interested may at any time after the expiration of three years from the date of sealing a patent apply to the comptroller alleging in the case of that patent that there has been an abuse of the monopoly rights thereunder and asking for relief under this section.

(2) The monopoly rights under a patent shall be deemed to have been abused in any of the following circumstances:—

(*a*) If the patented invention (being one capable of being worked in the United Kingdom), is not being worked within the United Kingdom on a commercial scale, and no satisfactory reason can be given for such non-working:

Provided that, if an application is presented to the comptroller on this ground, and the comptroller is of opinion that the time which has elapsed

Digitized by Google

since the sealing of the patent has by reason of the nature of the invention or for any other cause been insufficient to enable the invention to be worked within the United Kingdom on a commercial scale, the comptroller may make an order adjourning the application for such period as will in his opinion be sufficient for that purpose.

(*b*) If the working of the invention within the United Kingdom on a commercial scale is being prevented or hindered by the importation from abroad of the patented article by the patentee or persons claiming under him, or by persons directly or indirectly purchasing from him, or by other persons against whom the patentee is not taking or has not taken any proceedings for infringement:

(*c*) If the demand for the patented article in the United Kingdom is not being met to an adequate extent and on reasonable terms:

(*d*) If, by reason of the refusal of the patentee to grant a licence or licences upon reasonable terms, the trade or industry of the United Kingdom or the trade of any person or class of persons trading in the United Kingdom, or the establishment of any new trade or industry in the United Kingdom, is prejudiced, and it is in the public interest that a licence or licences should be granted:

(*e*) If any trade or industry in the United Kingdom, or any person or class of persons engaged therein, is unfairly prejudiced by the conditions attached by the patentee, whether before or after the passing of this Act, to the purchase, hire, licence, or use, of the patented article, or to the using or working of the patented process:

(*f*) If it is shown that the existence of the patent, being a patent for an invention relating to a process involving the use of materials not protected by the patent or for an invention relating to a substance produced by such a process, has been utilised by the patentee so as unfairly to prejudice in the United Kingdom the manufacture, use or sale of any such materials:

Provided that, for the purpose of determining whether there has been any abuse of the monopoly rights under a patent, it shall be taken that patents for new inventions are granted not only to encourage invention but to secure that new inventions shall so far as possible be worked on a commercial scale in the United Kingdom without undue delay.

(3) On being satisfied that a case of abuse of the monopoly rights under a patent has been established, the comptroller may exercise any of the following powers as he may deem expedient in the circumstances:—

(*a*) He may order the patent to be indorsed with the words "licences of right" and thereupon the same rules shall apply as are provided in this Act in respect of patents so indorsed, and an exercise by the comptroller of this power shall entitle every existing licensee to apply to the comptroller for an order entitling him to surrender his licence in exchange for a licence to be settled by the comptroller in like manner as if the patent had been so indorsed at the request of the patentee, and the comptroller may make such order; and an order that a patent be so indorsed may be made notwithstanding that there may be an agreement subsisting which would have precluded the indorsement of the patent at the request of the patentee:

(*b*) He may order the grant to the applicant of a licence on such terms as the comptroller may think expedient, including a term precluding the licensee from importing into the United Kingdom any goods the importation of which, if made by persons other than the patentee or persons claiming under him, would be an infringement of the patent, and in such case the patentee and all licensees for the time being shall be deemed to have mutually covenanted against such importation. A licensee under this paragraph shall be entitled to call upon the patentee to take proceedings to prevent infringement of the patent, and if the patentee refuses, or neglects to do so within two months after being so called upon, the licensee may institute proceedings for infringement in his own name as though he were the patentee, making the patentee a defendant. A patentee so added as defendant shall not be liable for any costs unless he enters an appearance and takes part in the proceedings. Service on him may be effected by leaving the writ at his address for service given on the register:

In settling the terms of a licence under this paragraph the comptroller shall be guided as far as may be by the same considerations as are specified in section twenty-four of this Act for his guidance in settling licences under that section:

Digitized by Google

(c) If the comptroller is satisfied that the invention is not being worked on a commercial scale within the United Kingdom, and is such that it cannot be so worked without the expenditure of capital for the raising of which it will be necessary to rely on the patent monopoly, he may, unless the patentee or those claiming under him will undertake to find such capital, order the grant to the applicant, or any other person, or to the applicant and any other person or persons jointly, if able and willing to provide such capital, of an exclusive licence on such terms as the comptroller may think just, but subject as hereinafter provided:

(d) If the comptroller is satisfied that the monopoly rights have been abused in the circumstances specified in paragraph (f) of the last foregoing subsection, he may order the grant of licences to the applicant and to such of his customers and containing such terms as the comptroller may think expedient:

(e) If the comptroller is satisfied that the objects of this section cannot be attained by the exercise of any of the foregoing powers, he may order the patent to be revoked, either forthwith or after such reasonable interval as may be specified in the order, unless in the meantime such conditions as may be prescribed in the order with a view to attaining the objects of this section are fulfilled, and the comptroller may, on reasonable cause shown in any case, by subsequent order extend the interval so specified:

Provided that the comptroller shall make no order for revocation which is at variance with any treaty, convention, arrangement, or engagement with any foreign country or part of His Majesty's dominions outside the United Kingdom:

(f) If the comptroller is of opinion that the objects of this section will be best attained by making no order under the above provisions of this section, he may make an order refusing the application and dispose of any question as to costs thereon as he thinks just.

(4) In settling the terms of any such exclusive license as is provided in paragraph (c) of the last preceding subsection, due regard shall be had to the risks undertaken by the licensee in providing the capital and working the invention, but, subject thereto, the licence shall be so framed as—

(a) to secure to the patentee the maximum royalty compatible with the licensee working the invention within the United Kingdom on a commercial scale and at a reasonable profit;

(b) to guarantee to the patentee a minimum yearly sum by way of royalty, if and so far as it is reasonable so to do, having regard to the capital requisite for the proper working of the invention and all the circumstances of the case;

and, in addition to any other powers expressed in the licence or order, the licence and the order granting the licence shall be made revocable at the discretion of the comptroller if the licensee fails to expend the amount specified in the licence as being the amount which he is able and willing to provide for the purpose of working the invention on a commercial scale within the United Kingdom, or if he fails so to work the invention within the time specified in the order.

(5) In deciding to whom such an exclusive license is to be granted the comptroller shall, unless good reason is shown to the contrary, prefer an existing licensee to a person having no registered interest in the patent.

(6) The order granting an exclusive licence under this section shall operate to take away from the patentee any right which he may have as patentee to work or use the invention and to revoke all existing licences, unless otherwise provided in the order, but on granting an exclusive licence the comptroller may, if he thinks it fair and equitable, make it a condition that the licensee shall give proper compensation to be fixed by the comptroller for any money or labour expended by the patentee or any existing licensee in developing or exploiting the invention.

(7) Every application presented to the comptroller under this section must set out fully the nature of the applicant's interest and the facts upon which the applicant bases his case and the relief which he seeks. The application must be accompanied by statutory declarations verifying the applicant's interest and the facts set out in the application.

(8) The comptroller shall consider the matters alleged in the application and declarations, and, if satisfied that the applicant has a bonâ fide interest and that a primâ facie case for relief has been made out, he shall direct the applicant to serve copies of the application and declarations upon the patentee

Digitized by Google

and upon any other persons appearing from the register to be interested in the patent and shall advertise the application in the Official Journal (Patents).

(9) If the patentee or any person is desirous of opposing the granting of any relief under this section, he shall, within such time as may be prescribed or within such extended time as the comptroller may on application further allow, deliver to the comptroller a counter statement verified by a statutory declaration fully setting out the grounds on which the application is to be opposed.

(10) The comptroller shall consider the counter statement and declarations in support thereof and may thereupon dismiss the application if satisfied that the allegations in the application have been adequately answered, unless any of the parties demands a hearing or unless the comptroller himself appoints a hearing. In any case the comptroller may require the attendance before him of any of the declarants to be cross-examined or further examined upon matters relevant to the issues raised in the application and counter statement, and he may, subject to due precautions against disclosure of information to rivals in trade, require the production before him of books and documents relating to the matter in issue.

(11) All orders of the comptroller under this section shall be subject to appeal to the court, and on any such appeal the Attorney-General or such other counsel as he may appoint shall be entitled to appear and be heard.

(12) In any case where the comptroller does not dismiss an application as hereinbefore provided, and (*a*) if the parties interested consent; or (*b*) if the proceedings require any prolonged examination of documents or any scientific or local investigation which cannot in the opinion of the comptroller conveniently be made before him; the comptroller may at any time order the whole proceedings or any question or issue of fact arising thereunder to be referred to an arbitrator agreed on by the parties, or in default of agreement appointed by the comptroller, and, where the whole proceedings are so referred, the award of such arbitrator shall, if all the parties consent, be final, but otherwise shall be subject to the same appeal as the decision of the comptroller under this section, and, where a question or issue of fact is so referred, the arbitrator shall report his findings to the comptroller.

(13) For the purposes of this section, the expression "patented article" includes made by a patented process.

REGISTER OF PATENTS

28. (1) There shall be kept at the Patent Office a book called the register of patents, wherein shall be entered the names and addresses of grantees of patents, notifications of assignments and of transmissions of patents, of licences under patents, and of amendments, extensions, and revocations of patents, and such other matters affecting the validity or proprietorship of patents as may be prescribed.

(2) The register of patents existing at the commencement of this Act shall be incorporated with and form part of the register of patents under this Act.

(3) The register of patents shall be prima facie evidence of any matters by this Act directed or authorised to be inserted therein.

(4) Copies of deeds, licences, and any other documents affecting the proprietorship in any letters patent or in any licence thereunder, must be supplied to the comptroller in the prescribed manner for filing in the Patent Office.

CROWN

29. (1) A patent shall have to all intents the like effect as against His Majesty the King as it has against a subject:

Provided that any Government department may, by themselves or by such of their agents, contractors, or others as may be authorised in writing by them at any time after the application, make, use or exercise the invention for the services of the Crown on such terms as may, either before or after the use thereof, be agreed on, with the approval of the Treasury, between the department and the patentee, or, in default of agreement, as may be settled in the manner hereinafter provided. And the terms of any agreement or licence concluded between the inventor or patentee and any person other than a Government department, shall be inoperative so far as concerns the making, use or exercise of the invention for the service of the Crown:

Digitized by Google

Provided further that, where an invention which is the subject of any patent has, before the date of the patent, been duly recorded in a document by, or tried by or on behalf of, any Government department (such invention not having been communicated directly or indirectly by the applicant for the patent or the patentee), any Government department, or such of their agents, contractors, or others as may be authorised in writing by them, may make, use and exercise the invention so recorded or tried for the service of the Crown, free of any royalty or other payment to the patentee, notwithstanding the existence of the patent. If in the opinion of the department the disclosure to the applicant or the patentee, as the case may be, of the document recording the invention, or the evidence of the trial thereof, if required, would be detrimental to the public interest, it may be made confidentially to counsel on behalf of the applicant or patentee, or to any independent expert mutually agreed upon.

(2) In case of any dispute as to the making, use or exercise of an invention under this section, or the terms therefor, or as to the existence or scope of any record or trial as aforesaid, the matter shall be referred to the court for decision, who shall have power to refer the whole matter or any question or issue of fact arising thereon to be tried before a special or official referee or an arbitrator upon such terms as it may direct. The court, referee, or arbitrator, as the case may be, may, with the consent of the parties, take into consideration the validity of the patent for the purposes only of the reference and for the determination of the issues between the applicant and such Government department. The court, referee, or arbitrator, further in settling the terms as aforesaid, shall be entitled to take into consideration any benefit or compensation which the patentee, or any other person interested in the patent, may have received directly or indirectly from the Crown or from any Government department in respect of such patent.

(3) The right to use an invention for the services of the Crown under the provisions of this section or any provisions for which this section is substituted shall include, and shall be deemed always to have included, the power to sell any articles made in pursuance of such right which are no longer required for the services of the Crown.

(4) Nothing in this section shall affect the right of the Crown or of any person deriving title directly or indirectly from the Crown to sell or use any articles forfeited under the laws relating to the customs or excise.

30. (1) The inventor of any improvement in instruments or munitions of war may (either for or without valuable consideration) assign to the Secretary of State for War or Secretary of State for Air or the Admiralty on behalf of His Majesty all the benefit of the invention and of any patent obtained or to be obtained for the invention; and the Secretary of State or the Admiralty may be a party to the assignment.

(2) The assignment shall effectually vest the benefit of the invention and patent in the Secretary of State or the Admiralty on behalf of His Majesty, and all covenants and agreements therein contained for keeping the invention secret and otherwise shall be valid and effectual (notwithstanding any want of valuable consideration), and may be enforced accordingly by the Secretary of State or the Admiralty.

(3) Where any such assignment has been made, the Secretary of State or the Admiralty may at any time before the publication of the complete specification certify to the comptroller that, in the interest of the public service, the particulars of the invention and of the manner in which it is to be performed should be kept secret.

(4) If the Secretary of State or the Admiralty so certify the application and specifications, with the drawings (if any), and any amendment of the complete specification, and any copies of such documents and drawings shall, instead of being left in the ordinary manner at the Patent Office, be delivered to the comptroller in a packet sealed by authority of the Secretary of State or the Admiralty.

(5) The packet shall, until the expiration of the term during which a patent for the invention may be in force, be kept sealed by the comptroller, and shall not be opened save under the authority of an order of the Secretary of State or the Admiralty.

(6) The sealed packet shall be delivered at any time during the continuance of the patent to any person authorised by the Secretary of State or the Admiralty to receive it, and shall if returned to the comptroller be again kept sealed by him.

(7) On the expiration of the term of the patent, the sealed packet shall be delivered to the Secretary of State or the Admiralty.

Digitized by Google

(8) Where the Secretary of State or the Admiralty certify as aforesaid, after an application for a patent has been left at the Patent Office, but before the publication of the complete specification, the application and specifications, with the drawings (if any), shall be forthwith placed in a packet sealed by authority of the comptroller, and the packet shall be subject to the foregoing provisions respecting a packet sealed by authority of the Secretary of State or the Admiralty.

(9) No proceeding by petition or otherwise shall lie for revocation of a patent granted for an invention in relation to which a certificate has been given by the Secretary of State or the Admiralty as aforesaid.

(10) No copy of any specification or other document or drawing, by this section required to be placed in a sealed packet, shall in any manner whatever be published or open to the inspection of the public, but, save as in this section otherwise directed, the provisions of this Act shall apply in respect of any such invention and patent as aforesaid.

(11) The Secretary of State or the Admiralty may at any time waive the benefit of this section with respect to any particular invention, and the specifications, documents, and drawings shall be thenceforth kept and dealt with in the ordinary way.

(12) The communication of any invention for any improvement in instruments or munitions of war to the Secretary of State or the Admiralty or to any person or persons authorised by the Secretary of State or the Admiralty to investigate the same or the merits thereof, shall not, nor shall anything done for the purposes of the investigation, be deemed use or publication of such invention so as to prejudice the grant or validity of any patent for the same.

(13) Rules may be made under this Act, after consultation with the Secretary of State and the Admiralty, for the purpose of ensuring secrecy with respect to patents to which this section applies, and those rules may modify any of the provisions of this Act in their application to such patents as aforesaid so far as may appear necessary for the purpose aforesaid.

LEGAL PROCEEDINGS

31. (1) In an action or proceeding for infringement or revocation of a patent, the court may, if it think fit, and shall on the request of all of the parties to the proceeding, call in the aid of an assessor specially qualified, and try the case wholly or partially with his assistance; the action shall be tried without a jury unless the court otherwise directs.

(2) The Court of Appeals may, if they think fit, in any proceeding before them call in the aid of an assessor as aforesaid.

(3) The remuneration, if any, to be paid to an assessor under this section shall be determined by the court or the Court of Appeal, as the case may be, and be paid as part of the expenses of the execution of this Act.

32. A defendant in an action for infringement of a patent may, without presenting a petition, apply in accordance with the rules of the Supreme Court by way of counterclaim in the action for the revocation of the patent.

32A. Where the court in any action for infringement of a patent finds that any claim in the specification, in respect of which infringement is alleged, is valid, but that any other claim therein is invalid, then, notwithstanding anything in section twenty-three of this Act—

(*a*) if the patentee furnishes proof to the satisfaction of the court that the invalid claim was framed in good faith and with reasonable skill and knowledge, or if the patent is dated before the commencement of the Patents and Designs Act, 1932, the court shall, subject to its discretion as to costs and as to the date from which damages should be reckoned, and to such terms as to amendment of the specification as it may deem desirable, grant relief in respect of any valid claim which is infringed without regard to the invalidity of any other claim in the specification and in exercising such discretion the court may take into consideration the conduct of the parties in inserting the invalid claim in the specification or permitting that claim to remain there;

(*b*) if the patentee does not furnish proof as aforesaid, and the patent is dated after the commencement of the Patents and Designs Act, 1932, the court shall not grant any relief by way of damages or costs, but may grant such other relief in respect of any valid claim which is infringed as to the court seems just, and may impose such terms as to amendment of the specification as a condition of granting any such relief as it may deem desirable;

Digitized by Google

(c) if a counterclaim for revocation of the patent has been made in the action on the ground of the invalidity of any claim in the specification, the court may postpone the operation of any order made thereon during such time as may be requisite for enabling the patentee to effect any amendment of the specification pursuant to terms imposed upon him and may attach any such other condition to any order to be made on the counterclaim as the court may deem desirable.

33. A patentee shall not be entitled to recover any damages in respect of any infringement of a patent granted after the commencement of this Act from any defendant who proves that at the date of the infringement he was not aware, nor had reasonable means of making himself aware, of the existence of the patent, and the marking of an article with the word "patent," "patented," or any word or words expressing or implying that a patent has been obtained for the article, stamped, engraved, impressed on, or otherwise applied to the article, shall not be deemed to constitute notice of the existence of the patent unless the word or words are accompanied by the number of the patent:

Provided that nothing in this section shall affect any proceedings for an injunction.

34. In an action for infringement of a patent, the plaintiff shall be entitled to relief by way of injunction and damages but not to an account of profits, but subject as aforesaid the court may on the application of either party make such order for an injunction or inspection, and impose such terms and give such directions respecting the same and the proceedings thereon as the court may see fit.

35. In an action for infringement of a patent, the court may certify that the validity of any claim in the specification of the patent came in question; and, if the court so certifies, then in any subsequent action for infringement of such claim the plaintiff in that action on obtaining a final order or judgment in his favour shall, unless the court trying the action otherwise directs, have his full costs, charges, and expenses as between solicitor and client so far as that claim is concerned.

36. (1) Where any person, by circulars, advertisements or otherwise, threatens any person with an action for infringement of patent or other like proceedings, then, whether the person making the threats is or is not entitled to or interested in a patent or an application for a patent, any person aggrieved thereby may bring an action against him, and may obtain a declaration to the effect that such threats are unjustifiable and an injunction against the continuance of such threats and may recover such damage, if any, as he has sustained thereby, unless the person making the threats proves that the acts in respect of which the proceedings are threatened constitute or, if done, would constitute an infringement of a patent in respect of a claim in the specification which is not shown by the plaintiff to be invalid or an infringement of rights arising from the acceptance of a complete specification in respect of a claim therein which is not shown by the plaintiff to be capable of being successfully opposed.

(2) The defendant in any such action as aforesaid may apply, by way of a counterclaim in the action, for any relief to which he would be entitled in a separate action in respect of any infringement by the plaintiff of the patent to which the threats relate.

MISCELLANEOUS

37. (1) Where, after the commencement of this Act, a patent is granted to two or more persons jointly, they shall, unless otherwise specified in the patent, be treated for the purpose of the devolution of the legal interests therein as joint tenants, but, subject to any contract to the contrary, each of such persons shall be entitled to use the invention for his own profit without accounting to the others, but shall not be entitled to grant a licence otherwise than with their consent or in accordance with directions given under this section, and, if any such person dies, his beneficial interest in the patent shall devolve on his personal representatives as part of his personal estate.

(2) The comptroller may, upon application for relief under this subsection being made to him in the prescribed manner by any one or more of joint patentees, and after giving to the other joint patentees an opportunity of being heard, give such directions in accordance with the application as to the sale or lease of the patent for the invention, or as to the grant of licences in respect thereof, or otherwise as to the use and development of the rights

Digitized by Google

thereunder as appear to him to be just and expedient, and it shall be the duty of all the joint patentees to give effect to any directions so given.

(3) If any person who is under obligation to give effect to any such directions as aforesaid fails to execute any instrument or to do any act or thing requisite for giving effect thereto within fourteen days after being requested in writing so to do by any of the joint patentees, the comptroller may, by direction given under the last foregoing subsection, empower any person to execute that instrument or to do that act or thing in the name and on behalf of the person in default.

(4) Nothing in this section shall be taken to authorise the use of an invention or the giving of any directions in such manner as to prejudice or affect the mutual rights or obligations of trustees or the personal representatives of a deceased person, or any rights or obligations arising out of those relationships.

(5) An order of the comptroller giving any directions or refusing an application made under this section shall be subject to appeal to the court.

38. (1) It shall not be lawful in any contract made after the passing of this Act in relation to the sale or lease of, or licence to use or work, any article or process protected by a patent to insert a condition the effect of which will be—(*a*) to prohibit or restrict the purchaser, lessee, or licensee from using any article or class of articles, whether patented or not, or any patented process, supplied or owned by any person otber than the seller, lessor, or licensor or his nominees; or (*b*) to require the purchaser, lessee, or licensee to acquire from the seller, lessor, licensor, or his nominees, any article or class of articles not protected by the patent; and any such condition shall be null and void, as being in restraint of trade and contrary to public policy:

Provided that this subsection shall not apply if—

(i) the seller, lessor, or licensor proves that at the time the contract was entered into the purchaser, lessee, or licensee had the option of purchasing the article or obtaining a lease or licence on reasonable terms, without such conditions as aforesaid; and

(ii) the contract entitles the purchaser, lessee, or licensee to relieve himself of his liability to observe any such condition on giving the other party three months notice in writing and on payment in compensation for such relief in the case of a purchase of such sum, or in the case of a lease or licence of such rent or royalty for the residue of the term of the contract, as may be fixed by an arbitrator appointed by the Board of Trade.

In any action, application, or proceedings under this Act no person shall be estopped from applying for or obtaining relief by reason of any admission made by him as to the reasonableness of the terms offered to him under subsection (1) (i).

(2) Any contract relating to the lease of or licence to use or work any patented article or patented process, whether made before or after the passing of this Act, may at any time after the patent or all the patents by which the article or process was protected at the time of the making of the contract has or have ceased to be in force, and notwithstanding anything in the same or in any other contract to the contrary, be determined by either party on giving three months notice in writing to the other party; but where any such notice is given determining any contract made before the passing of this Act, the party giving the notice shall be liable to pay such compensation as failing agreement may be awarded by an arbitrator appointed by the Board of Trade.

(3) Any contract made before the passing of this Act relating to the lease of or licence to use or work any patented article or process and containing any condition which, had the contract been made after the passing of this Act, would by virtue of this section have been null and void may, at any time before the contract is determinable under the last preceding subsection, and notwithstanding anything in the same or any other contract to the contrary, be determined by either party on giving three months notice in writing to the other party, but where any such notice is given the party giving the notice shall be liable to pay such compensation as, failing agreement, may be awarded by an arbitrator appointed by the Board of Trade.

(4) The insertion by the patentee in a contract made after the passing of this Act of any condition which by virtue of this section is null and void shall be available as a defence to an action for infringement of the patent to which the contract relates brought while that contract is in force.

(5) Nothing in this section shall—

(*a*) affect any condition in a contract whereby a person is prohibited from selling any goods other than those of a particular person; or

Digitized by Google

(*b*) be construed as validating any contract which would, apart from this section, be invalid; or

(*c*) affect any right of determining a contract or condition in a contract exerciseable independently of this section; or

(*d*) affect any condition in a contract for the lease of or licence to use a patented article, whereby the lessor or licensor reserves to himself or his nominees the right to supply such new parts of the patented article as may be required to put or keep it in repair.

38A.[2] (1) In the case of inventions relating to substances prepared or produced by chemical processes or intended for food or medicine, the specification shall not include claims for the substance itself, except when prepared or produced by the methods or processes of manufacture particularly described and ascertained or by their obvious chemical equivalents:

Provided that in relation to a substance intended for food or medicine a mere admixture resulting only in the aggregation of the known properties of the ingredients of that substance shall not be deemed to be a method or process of manufacture.

(2) In an action for infringement of a patent where the invention relates to the production of a new substance, any substance of the same chemical composition and constitution shall in the absence of proof to the contrary be deemed to have been produced by the patented process.

(3) In the case of any patent for an invention intended for or capable of being used for the preparation or production of food or medicine, the comptroller shall, unless he sees good reason to the contrary, grant to any person applying for the same, a licence limited to the use of the invention for the purposes of the preparation or production of food or medicine but not otherwise; and, in settling the terms of such licence and fixing the amount of royalty or other consideration payable, the comptroller shall have regard to the desirability of making the food or medicine available to the public at the lowest possible price consistent with giving to the inventor due reward for the research leading to the invention.

Any decision of the comptroller under this subsection shall be subject to appeal to the court.

[*Section 39 repealed by 9 and 10 Geo. 5, c. 80, s. 12.*]

[*Section 40 omitted by 22 and 23 Geo. 5. c. 32, Schedule.*]

41. (1) An invention covered by a patent shall not be deemed to have been anticipated by reason only of its being made available to the public by publication in the United Kingdom—

(*a*) in a specification left pursuant to an application made in the United Kingdom and dated not less than fifty years before the date of the patent, or

(*b*) in a specification describing the invention for the purpose of an application for protection in any country outside the United Kingdom made not less than fifty years before that date, or

(*c*) in any abridgment of or extract from any such specification published under the authority of the comptroller or of the Government of any country outside the United Kingdom, or

(*d*) in a provisional specification of any date not followed by a complete specification.

(2) A patent shall not be held to be invalid by reason only of the invention in respect of which the patent was granted or any part thereof having been published prior to the date of the patent, if the patentee proves to the satisfaction of the court that the publication was made without the knowledge and consent of the true inventor, and that the matter published was derived or obtained from the true inventor, and if the true inventor learnt of the publication before the date of his application for the patent that he applied for and obtained protection for the invention with all reasonable diligence after learning of the publication:

Provided[3] that the protection afforded by this subsection shall not extend to a patentee who has or whose predecessors in title (which expression shall include the applicant for the patent) have commercially worked the invention

[2] This section applies only to patents applied for after the passing of the Patents and Designs Act, 1919 [9 & 10 Geo. 5, c. 80, s. 11 (2)].

[3] This proviso does not apply in the case of patents granted before the passing of the Patents and Designs Act, 1919 (9 & 10 Geo. 5, c. 80, s. 13).

Digitized by Google

in the United Kingdom otherwise than for the purpose of reasonable trial of the invention prior to the date of the application for the patent.

42. A patent shall not be held to be invalid on the ground that the complete specification claims a further or different invention to that contained in the provisional, if the invention therein claimed, so far as it is not contained in the provisional, was novel at the date when the complete specification was put in, and the applicant was the first and true inventor thereof.

43. (1) If the person claiming to be inventor of an invention dies without making an application for a patent for the invention, application may be made by, and a patent for the invention granted to, his legal representative.

(2) Every such application must contain a declaration by the legal representative that he believes the deceased to be the true and first inventor of the invention.

44. If a patent is lost or destroyed, or its nonproduction is accounted for to the satisfaction of the comptroller, the comptroller may at any time seal a duplicate thereof.

44A. A person making a request to the comptroller in the prescribed manner as respects any patent specified in the request or as respects any application for a patent so specified, for information to be furnished to him by the comptroller of any such matters as may be prescribed affecting that patent or application, shall be entitled, subject to payment of the prescribed fees, to have information furnished to him accordingly.

45. (1) The exhibition of an invention at an industrial or international exhibition, certified as such by the Board of Trade, or the publication of any description of the invention during the period of the holding of the exhibition, or the use of the invention for the purpose of the exhibition in the place where the exhibition is held, or the use of the invention during the period of the holding of the exhibition by any person elsewhere, without the privity or consent of the inventor, or the reading of a paper by an inventor before a learned society or the publication of the paper in the society's transactions, shall not prejudice the right of the inventor to apply for and obtain a patent in respect of the invention or the validity of any patent granted on the application, provided that—(*a*) the exhibitor, before exhibiting the invention, or the person reading such paper or permitting such publication, gives the comptroller the prescribed notice of his intention to do so; and (*b*) the application for a patent is made before or within six months from the date of the opening of the exhibition, or the reading or publication of such paper.

(2) His Majesty may by Order in Council apply this section to any exhibition mentioned in the Order in like manner as if it were an industrial or international exhibition certified as such by the Board of Trade, and any such Order may provide that the exhibitor shall be relieved from the condition of giving notice to the comptroller of his intention to exhibit, and shall be so relieved either absolutely or upon such terms and conditions as may be stated in the Order.

46. (1) The comptroller shall issue periodically a journal of patented inventions, as well as reports of patent cases decided by courts of law, reports of decisions of the comptroller, of the law officer, or of the Appeal Tribunal, and any other information that he may deem generally useful or important.

(2) Provision shall be made by the comptroller for keeping on sale copies of such journal, and also of all complete specifications of patents in force, with any accompanying drawings.

(3) The comptroller shall continue, in such form as he deems expedient, the indexes and abridgements of specifications hitherto published, and shall prepare and publish such other indexes, abridgements of specifications, catalogues, and other works relating to inventions, as he thinks fit.

47. (1) The control and management of the Patent Museum and its contents shall remain vested in the Board of Education, subject to such directions as His Majesty in Council may think fit to give.

(2) The Board of Education may at any time require a patentee to furnish them with a model of his invention on payment to the patentee of the cost of the manufacture of the model, the amount to be settled, in case of dispute, by the Board of Trade.

48. (1) Subject to the provisions of this section. the rights of a patentee shall not be deemed to be infringed—

Digitized by Google

(*a*) by the use on board a foreign vessel of the patented invention in the body of the vessel or in the machinery, tackle, apparatus or other accessories thereof, if the vessel comes into the territorial jurisdiction waters of the United Kingdom temporarily or accidentally only, and the invention is used exclusively for the actual needs of the vessel:

(*b*) by the use of the patented invention in the construction or working of a foreign aircraft or land vehicle or of the accessories thereof if the aircraft or vehicle comes into the United Kingdom temporarily or accidentally only.

(2) This section shall apply only to vessels, aircraft, and land vehicles of a foreign state with respect to which His Majesty by Order in Council declares that the laws thereof confer corresponding rights with respect to the use of inventions in vessels, aircraft and land vehicles of the United Kingdom when coming into the foreign state or the territorial waters thereof.

(3) For the purposes of this section—

Vessels and aircraft shall be deemed to be vessels and aircraft of the country in which they are registered, and land vehicles shall be deemed to be vehicles of the country within which the owners are ordinarily resident:

The Isle of Man shall be deemed to be part of the United Kingdom.

(4) His Majesty may by Order in Council apply this section to vessels, aircraft and land vehicles of a part of His Majesty's dominions outside the United Kingdom in like manner as to vessels, aircraft and land vehicles of a foreign state.

PART II. DESIGNS

REGISTRATION OF DESIGNS

49. (1) The comptroller may, on the application made in the prescribed form and manner of any person claiming to be the proprietor of any new or original design not previously published in the United Kingdom, register the design under this Part of this Act.

(2) The same design may be registered in more than one class, and, in case of doubt as to the class in which a design ought to be registered, the comptroller may decide the question.

(3) The comptroller may, if he thinks fit, refuse to register any design presented to him for registration, but any person aggrieved by any such refusal may appeal to the Appeal Tribunal, and the Appeal Tribunal shall, after hearing the applicant and the comptroller, if so required, make an order determining whether, and subject to what conditions, if any, registration is to be permitted.

(4) An application which, owing to any default or neglect on the part of the applicant, has not been completed so as to enable registration to be effected within the prescribed time shall be deemed to be abandoned.

(5) A design when registered shall be registered as of the date of the application for registration.

50. (1) Where a design has been registered in one or more classes of goods the application of the proprietor of the design to register it in some one or more other classes shall not be refused, nor shall the registration thereof be invalidated—

(*a*) on the ground of the design not being a new or original design, by reason only that it was so previously registered; or

(*b*) on the ground of the design having been previously published in the United Kingdom, by reason only that it has been applied to goods of any class in which it was so previously registered:

Provided that such subsequent registration shall not extend the period of copyright in the design beyond that arising from the previous registration.

(2) Where the proprietor of a registered design applies for the registration in the same class of goods of a design consisting of the registered design with modifications or variations not sufficient to alter the character or substantially to affect the identity thereof, the application shall not be refused, nor shall the registration of that other design be invalidated—

(*a*) on the ground that it is not a new or original design, by reason only of the registration of the registered design; or

(*b*) on the ground that it has been previously published in the United Kingdom, by reason only that the registered design has been applied to the goods in respect of which it is registered:

Digitized by Google

Provided that the period of copyright conferred by the registration of that design shall not extend beyond the expiration of the original and any extended period of copyright in the registered design.

51. (1) The comptroller shall grant a certificate of registration to the proprietor of the design when registered.

(2) The comptroller may, in case of loss of the original certificate, or in any other case in which he deems it expedient, furnish one or more copies of the certificate.

52. (1) There shall be kept at the Patent Office a book called the Register of Designs wherein shall be entered the names and addresses of proprietors of registered designs, notifications of assignments and of transmissions of registered designs, and such other matters as may be prescribed.

(2) The register of designs existing at the commencement of this Act shall be incorporated with and form part of the register of designs under this Act.

(3) The register of designs shall be primâ facie evidence of any matters by this Act directed or authorised to be entered therein.

COPYRIGHT IN REGISTERED DESIGNS

53. (1) When a design is registered, the registered proprietor of the design shall, subject to the provisions of this Act, have copyright in the design during five years from the date of registration.

(2) If before the expiration of the said five years or within such further time (not exceeding three months) as the comptroller may allow application for the extension of the period of copyright is made to the comptroller in the prescribed manner, the comptroller shall on payment of the prescribed fee extend the period of copyright for a second period of five years from the expiration of the original period of five years.

(3) If before the expiration of such second period of five years or within such further time (not exceeding three months) as the comptroller may allow application for the extension of the period of copyright is made to the comptroller in the prescribed manner, the comptroller may, subject to any rules under this Act, on payment of the prescribed fee, extend the period of copyright for a third period of five years from the expiration of the second period of five years.

54. (1) Before delivery on sale of any articles to which a registered design has been applied, the proprietor shall cause each such article to be marked with the prescribed mark, or with the prescribed words or figures denoting that the design is registered; and if he fails to do so the proprietor shall not be entitled to recover any penalty or damages in respect of any infringement of his copyright in the design unless he shows that he took all proper steps to ensure the marking of the article, or unless he shows that the infringement took place after the person guilty thereof knew or had received notice of the existence of the copyright in the design.

(2) Where a representation is made to the Board of Trade by or on behalf of any trade or industry that in the interests of the trade or industry it is expedient to dispense with or modify as regards any class or description of articles any of the requirements of this section as to marking, the Board may, if they think fit, by rule under this Act dispense with or modify such requirements as regards any such class or description of articles to such extent and subject to such conditions as they think fit.

55. The disclosure of a design by the proprietor to any other person, in such circumstances as would make it contrary to good faith for that other person to use or publish the design, and the disclosure of a design in breach of good faith by any person other than the proprietor of the design, and the acceptance of a first and confidential order for goods bearing a new or original textile design intended for registration, shall not be deemed to be a publication of the design sufficient to invalidate the copyright thereof if registration thereof is obtained subsequently to the disclosure or acceptance.

56. (1) During the existence of copyright in a design, or such shorter period as may be prescribed, the design shall not be open to inspection except by the proprietor or a person authorised in writing by him, or a person authorised by the comptroller or by the court, and furnishing such infomation as may enable the comptroller to identify the design, and shall not be open to the inspection of any person except in the presence of the comptroller, or of an officer acting under him, and on payment of the prescribed fee; and the per-

Digitized by Google

son making the inspection shall not be entitled to take any copy of the design, or of any part thereof:

Provided that where registration of a design is refused on the ground of identity with a design already registered, the applicant for registration shall be entitled to inspect the design so registered.

(2) After the expiration of the copyright in a design or such shorter period as aforesaid, the design shall be open to inspection, and copies thereof may be taken by any person on payment of the prescribed fee.

(3) Different periods may be prescribed under this section for different classes of goods.

57. On the request of any person furnishing such information as may enable the comptroller to identify the design, and on payment of the prescribed fee, the comptroller shall inform such person whether the registration still exists in respect of the design, and if so, in respect of what classes of goods, and shall state the date of registration, and the name and address of the registered proprietor.

58. (1) At any time after the registration of a design any person interested may apply to the comptroller—

(*a*) for the cancellation of the registration of the design on the ground that the design has been published in the United Kingdom prior to the date of the registration;

(*b*) for the grant of a compulsory licence on the ground that the design is applied by manufacture to any article in a country outside the United Kingdom and is not so applied by manufacture in the United Kingdom to such an extent as is reasonable in the circumstances of the case

and the comptroller may make such order on the application as he considers just:

Provided that the comptroller shall not make any order under paragraph (*b*) of this subsection which is at variance with any treaty, convention, arrangement, or engagement with any country outside the United Kingdom.

(2) An appeal shall lie from any order of the comptroller under this section to the Appeal Tribunal, and the comptroller may at any time refer any such application to the Appeal Tribunal for trial.

58A. The registration of a design shall have to all intents the like effect as against His Majesty the King as it has against a subject:

Provided that the provisions of section twenty-nine of this Act shall apply to registered designs as though those provisions were herein re-enacted and in terms made applicable to registered designs.

INDUSTRIAL AND INTERNATIONAL EXHIBITIONS

59. (1) The exhibition at an industrial or international exhibition certified as such by the Board of Trade, or the exhibition elsewhere during the period of the holding of the exhibition without the privity or consent of the proprietor, of a design, or of any article to which a design is applied, or the publication, during the holding of any such exhibition, of a description of a design, shall not prevent the design from being registered, or invalidate the registration thereof: Provided that—

(*a*) The exhibitor, before exhibiting the design or article, or publishing a description of the design, gives the comptroller the prescribed notice of his intention to do so; and

(*b*) The application for registration is made before or within six months from the date of the opening of the exhibition.

(2) His Majesty may, by Order in Council, apply this section to any exhibition mentioned in the Order in like manner as if it were an industrial or international exhibition certified as such by the Board of Trade, and any such Order may provide that the exhibitor shall be relieved from the condition of giving notice to the comtproller of his intention to exhibit, and shall be so relieved either absolutely or upon such terms and conditions as may be stated in the Order.

LEGAL PROCEEDINGS

60.—(1) During the existence of copyright in any design it shall not be lawful for any person—

(*a*) For the purposes of sale to apply or cause to be applied to any article in any class of goods in which the design is registered the design or any frau-

Digitized by Google

dulent or obvious imitation thereof, except with the licence or written consent of the registered proprietor, or to do anything with a view to enable the design to be so applied; or

(*b*) Knowing that the design or any fraudulent or obvious imitation thereof has been applied to any article without the consent of the registered proprietor to publish or expose or cause to be published or exposed for sale that article.

(2) If any person acts in contravention of this section he shall be liable for every contravention to pay to the registered proprietor of the design a sum not exceeding fifty pounds, recoverable as a simple contract debt, or if the proprietor elects to bring an action for the recovery of damages for such contravention, and for an injunction against the repetition thereof, he shall be liable to pay such damages as may he awarded and to be restrained by injunction accordingly:

Provided that the total sum recoverable as a simple contract debt in respect of any one design shall not exceed one hundred pounds.

61. The provisions of this Act with regard to certificates of the validity of a patent, and to the remedy in case of groundless threats of legal proceedings by a patentee, shall apply with the necessary modifications in the case of registered designs in like manner as they apply in the case of patents.

PART III. GENERAL

PATENT OFFICE, AND PROCEEDINGS THEREAT

62. (1) The Treasury may continue to provide for the purposes of this Act and the Trade Marks Act, 1905, an office with all requisite buildings and conveniences, which shall be called, and is in this Act referred to as, the Patent Office.

(2) The Patent Office shall be under the immediate control of the comptroller, who shall act under the superintendence and direction of the Board of Trade.

(3) Any act or thing directed to be done by or to the comptroller may be done by or to any officer authorised by the Board of Trade.

(4) Rules under this Act may provide for the establishment of branch offices for designs at Manchester or elsewhere, and for any document or thing required by this Act to be sent to or done at the Patent Office being sent to or done at any branch office which may be established.

63. (1) There shall continue to be a comptroller-general of patents, designs, and trade marks, and the Board of Trade may, subject to the approval of the Treasury, appoint the comptroller, and so many examiners and other officers and clerks, with such designations and duties as the Board of Trade think fit, and may remove any of those officers and clerks.

(2) The salaries of those officers and clerks shall be appointed by the Board of Trade, with the concurrence of the Treasury, and those salaries and the other expenses of the execution of this Act and the Trade Marks Act, 1905, shall continue to be paid out of money provided by Parliament.

64. Impressions of the seal of the Patent Office shall be judicially noticed and admitted in evidence.

FEES

65. There shall be paid in respect of the grant of patents and the registration of designs, and applications therefor, and in respect of other matters with relation to patents and designs under this Act, such fees as may be with the sanction of the Treasury, prescribed by the Board of Trade, so however that the fees prescribed in respect of the instruments and matters mentioned in the First Schedule to this Act shall not exceed those specified in that Schedule.

PROVISIONS AS TO REGISTERS AND OTHER DOCUMENTS IN PATENT OFFICE

66. There shall not be entered in any register kept under this Act, or be receivable by the comptroller, any notice of any trust expressed implied or constructive.

67. Every register kept under this Act shall at all convenient times be open to the inspection of the public, subject to the provisions of this Act and to such regulations as may be prescribed; and certified copies, sealed with the

Digitized by Google

seal of the Patent Office, of any entry in any such register shall be given to any person requiring the same on payment of the prescribed fee.

68. Reports of examiners made under this Act shall not in any case be published or be open to public inspection, and shall not be liable to production or inspection in any legal proceeding, unless the court or officer having power to order discovery in such legal proceeding certifies that such production or inspection is desirable in the interests of justice, and ought to be allowed:

Provided that, on application being made by any person in the prescribed form, the comptroller may disclose the result of a search made under section seven or eight of this Act on any particular application for the grant a patent where either—(*a*) the complete specification has been accepted; or (*b*) the complete specification has been published and the application has become void.

69. (1) Where an application for a patent has been abandoned, or become void, the application, the specifications and the drawings samples and specimens (if any) accompanying or left in connection with such application, shall not, save as otherwise expressly provided by this Act, at any time be open to public inspection or be published by the comptroller.

(2) Where an application for a design has been abandoned or refused the application and any drawings, photographs, tracings, representations, or specimens left in connection with the application shall not at any time be open to public inspection or be published by the comptroller.

70. The comptroller may, on request in writing accompanied by the prescribed fee,—

(*a*) correct any clerical error in or in connection with an application for a patent or in any patent or any specification;

(*b*) cancel the registration of a design either wholly or in respect of any particular goods in connection with which the design is registered;

(*c*) correct any error in an application for the registration of or in the representation of a design or in the name or address of the proprietor of any patent or design, or in any other matter which is entered upon the register of patents or the register of designs:

Provided that where a request is made for a correction under paragraph (*a*) of this section and it appears to the comptroller that the correction would materially alter the meaning or scope of the document to which the request relates, and ought not to be made without notice to persons affected thereby, he shall require a notice of the nature of the proposed correction to be advertised in the prescribed manner, and any person may within the prescribed time and in the prescribed manner give notice at the Patent Office of opposition to the request and, where any such notice is given, the comptroller shall, after giving notice of the opposition to the applicant and after giving to the applicant and to the opponent an opportunity of being heard, decide on the case.

71. (1) Where a person becomes entitled by assignment, transmission, or other operation of law to a patent or to the copyright in a registered design, he shall make application to the comptroller in the prescribed manner to register his title, and the comptroller shall, on receipt of such application and on proof of title to his satisfaction, register him as the proprietor of such patent or design and shall cause an entry to be made on the register of the assignment, transmission or other instrument affecting the title.

(2) Where any person becomes entitled as mortgagee, licensee, or otherwise to any interest in a patent or design, he shall make application to the comptroller in the prescribed manner to register his title, and the comptroller shall, on receipt of such application and on proof of title to his satisfaction, cause notice of the interest to be entered in the register of patents or designs, as the case may be, with particulars of the instrument, if any, creating such interest.

(3) The person registered as the proprietor of a patent or design shall, subject to the provisions of the Act and to any rights appearing from the register to be vested in any other person, have power absolutely to assign, grant licenses as to or otherwise deal with the patent or design, and to give effectual receipts for any consideration for any such assignment, license or dealing:

Provided that any equities in respect of the patent or design may be enforced in like manner as in respect of any other personal property.

(4) Except in applications made under section seventy-two of this Act, a document or instrument in respect of which no entry has been made in the register in accordance with the provisions of subsections (1) and (2) aforesaid, shall not be admitted in evidence in any court in proof of the title to a

Digitized by Google

patent or copyright in a design or to any interest therein unless the court otherwise directs.

72. (1) The court may, on the application in the prescribed manner of any person aggrieved by the noninsertion in or omission from the register of patents or designs of any entry or by any entry made in either such register without sufficient cause, or by any entry wrongly remaining on either such register, or by an error or defect in any entry in either such register, make such order for making, expunging, or varying such entry as it may think fit.

(2) The court may in any proceeding under this section decide any question that it may be necessary or expedient to decide in connection with the rectification of a register.

(3) The prescribed notice of any application under this section shall be given to the comptroller, who shall have the right to appear and be heard thereon, and shall appear if so directed by the court.

(4) Any order of the court rectifying a register shall direct that notice of the rectification be served on the comptroller in the prescribed manner, who shall upon the receipt of such notice rectify the register accordingly.

POWERS AND DUTIES OF COMPTROLLER

73. Where any discretionary power is by or under this Act given to the comptroller, he shall not exercise that power adversely to the applicant for a patent, or for amendment of a specification, or for registration of a design without (if so required within the prescribed time by the applicant) giving the applicant an opportunity of being heard.

73A. (1) The comptroller shall, in any proceedings before him under this Act, have power by order to award to any party such costs as he may consider reasonable, and to direct how and by what parties they are to be paid, and any such order may be made a rule of court.

(2) If any party giving notice of any opposition under this Act, or applying to the comptroller for the revocation of a patent or for the cancellation of the registration of a design or for the grant of a compulsory license in relation to a patent or to a registered design or giving notice of appeal from any decision of the comptroller under this Act, neither resides nor carries on business in the United Kingdom or the Isle of Man, the comptroller, or in the case of appeal to the Appeal Tribunal or the court, the Appeal Tribunal or the court may require such party to give security for the costs of the proceedings or appeal, and in default of such security being given may proceed to treat the proceedings or appeal as abandoned.

[*Section 74 omitted by 22 and 23 Geo. 5. c. 32, Schedule.*]

75. If any application is made to the comptroller to grant a patent for an invention which is so obviously contrary to well-established natural laws that the application is frivolous or to grant a patent for an invention, or to register a design, of which the use would, in his opinion, be contrary to law or morality the comptroller may refuse the application, or may, in the case of an invention any particular use of which would, in his opinion, be contrary to law, require as a condition of granting a patent the insertion in the specification of such disclaimer as respects that particular use of the invention or any such other reference to the illegality thereof as he thinks fit.

An appeal shall lie from the decision of the comptroller under this section to the Appeal Tribunal.

76. The comptroller shall, before the first day of June in every year, cause a report respecting the execution by or under him of this Act to be laid before both Houses of Parliament, and therein shall include for the year to which the report relates an account of all fees, salaries, and allowances, and other money received and paid under this Act.

EVIDENCE, &C.

77. (1) Subject to rules under this Act in any proceeding under this Act before the comptroller the evidence shall be given by statutory declaration in the absence of directions to the contrary; but in any case in which the comptroller thinks it right so to do, he may take evidence vivâ voce in lieu of or in addition to evidence by declaration or allow any declarant to be cross-examined on his declaration. Any such statutory declaration may in the case of appeal be used before the court in lieu of evidence by affidavit, but if so used shall have all the incidents and consequences of evidence by affidavit.

Digitized by Google

(2) The comptroller shall in respect of discovery and production of documents and, where any evidence is taken viva voce, in respect of requiring the attendance of witnesses and taking evidence on oath, be in the same position in all respects as an official referee of the Supreme Court.

78. A certificate purporting to be under the hand of the comptroller as to any entry, matter, or thing which he is authorised by this Act, or any general rules made thereunder, to make or do, shall be prima facie evidence of the entry having been made, and of the contents thereof, and of the matter or thing having been done or left undone.

79. Printed or written copies or extracts, purporting to be certified by the comptroller and sealed with the seal of the Patent Office, of or from patents, specifications, and other documents in the Patent Office, and of or from registers and other books kept there, shall be admitted in evidence in all courts in His Majesty's dominions, and in all proceedings, without further proof or production of the originals.

[*Section 80 omitted by 22 and 23 Geo. 5. c. 32, Schedule.*]

81. Any aplication, notice, or other document authorised or required to be left, made, or given at the Patent Office or to the comptroller, or to any other person under this Act, may be sent by post.

82. Where the last day fixed by this Act for doing anything under this Act falls on any day specified in rules under this Act as an excluded day, the rules may provide for the thing being done on the next following day not being an excluded day.

83. (1) If any person is, by reason of infancy, unsoundness of mind, or other disability, incapable of making any declaration or doing anything required or permitted by or under this Act, the guardian or committee (if any) of the person subject to the disability, or, if there be none, any person appointed by any court possessing jurisdiction in respect of his property, may make such declaration or a declaration as nearly corresponding thereto as circumstances permit, and do such thing in the name and on behalf of the person subject to the disability.

(2) An appointment may be made by the court for the purposes of this section upon the petition of any person acting on behalf of the person subject to the disability or of any other person interested in the making of the declaration or the doing of the thing.

83A. Any order for the grant of a licence under this Act shall, without prejudice to any other method of enforcement, operate as if it were embodied in a deed granting a licence executed by the patentee or proprietor of a registered design as the case may be and all other necessary parties.

REGISTER OF PATENT AGENTS

84. (1) No person shall practise, describe himself, or hold himself out, or permit himself to be described or held out, as a patent agent, unless—

(*a*) in the case of an individual, he is registered as a patent agent in the register of patent agents;

(*b*) in the case of a firm, every partner of the firm is so registered:

(*c*) in the case of a company which commenced to carry on business as a patent agent after the seventeenth day of November, nineteen hundred and seventeen, every director and the manager (if any) of the company is so registered;

(*d*) in the case of a company which commenced to carry on business as a patent agent before that date, a manager or a director of the company is so registered:

Provided that in the last-mentioned case the name of such manager or director shall be mentioned as being a registered patent agent in all professional advertisements, circulars or letters in which the name of the company appears.

(2) If any person contravenes the provisions of this section, he shall be liable on conviction under the Summary Jurisdiction Acts to a fine not exceeding twenty pounds or in the case of a second or subsequent conviction to a fine not exceeding fifty pounds, and in the case of a company every director, manager, secretary, or other officer of the company who is knowingly a party to the contravention shall be guilty of a like offence and liable to a like fine.

(3) Notwithstanding anything in any enactment prescribing the time within which proceedings may be brought before a court of summary jurisdiction, proceedings for an offence under this section may be commenced at any time

Digitized by Google

within twelve months from the date on which the alleged offence was committed.

(4) For the purposes of this section, the expression "patent agent" means a person, firm, or company carrying on for gain in the United Kingdom the business of applying for or obtaining patents in the United Kingdom or elsewhere.

(5) Nothing in this section shall be taken to prohibit solicitors from taking such part as they have heretofore taken in any proceedings under this Act.

(6) No person not registered before the fifteenth day of July, nineteen hundred and nineteen, shall be registered at a patent agent unless he be a British subject.

85. (1) Rules under this Act may authorise the comptroller to refuse to recognise as agent in respect of any business under this Act any person whose name has been erased from the register of patent agents, or (during the term of his suspension) any person who has been suspended from acting as a patent agent, or who is proved to the satisfaction of the Board of Trade, after being given an opportunity of being heard, to have been convicted of such an offence or to have been guilty of such misconduct as would have rendered him liable, if his name had been on the register of patent agents, to have his name erased therefrom, and may authorise the comptroller to refuse to recognise as agent in respect of any business under this Act any company which, if it had been an individual, the comptroller could refuse to recognise as such agent.

(2) When a company or firm acts as agents, such rules as aforesaid may authorise the comptroller to refuse to recognise the company or firm as agent if any person whom the comptroller could refuse to recognise as an agent acts as director or manager of the company or is a partner in the firm.

(3) The comptroller shall refuse to recognise as agent in respect of any business under this Act any person who neither resides nor has a place of business in the United Kingdom or the Isle of Man.

POWERS, &C. OF BOARD OF TRADE

86. (1) The Board of Trade may make such general rules and do such things as they think expedient, subject to the provisions of this Act—

(*a*) For regulating the practice of registration under this Act:

(*b*) For classifying goods for the purposes of designs:

(*c*) For making or requiring duplicates of specifications, drawings, and other documents:

(*d*) For securing and regulating the publishing and selling of copies, at such prices and in such manner as the Board of Trade think fit, of specifications, drawings, and other documents:

(*e*) For securing and regulating the making, printing, publishing, and selling of indexes to, and abridgments of, specifications and other documents in the Patent Office; and providing for the inspection of indexes and abridgments and other documents:

(*f*) For regulating (with the approval of the Treasury) the presentation of copies of Patent Office publications to patentees and to public authorities, bodies, and institutions at home and abroad:

(*g*) For regulating the keeping of the register of patent agents under this Act:

(*h*) Generally for regulating the business of the Patent Office, and all things by this Act placed under the direction or control of the comptroller, or of the Board of Trade.

(2) General rules shall whilst in force be of the same effect as if they were contained in this Act.

(3) Any rules made in pursuance of this section shall be advertised twice in the Official Journal (Patents), and shall be laid before both Houses of Parliament as soon as practicable after they are made, and if either House of Parliament, within the next forty days after any rules have been so laid before that House, resolves that the rules or any of them ought to be annulled, the rules or those to which the resolution applies shall after the date of such resolution be of no effect, without prejudice to the validity of anything done in the meantime under the rules or to the making of any new rules.

87. (1) All things required or authorised under this Act to be done by, to, or before the Board of Trade, of the Board may be done by, to, or before the President or a secretary or an assistant secretary of the Board.

Digitized by Google

(2) All documents purporting to be orders made by the Board of Trade and to be sealed with the seal of the Board, or to be signed by a secretary or assistant secretary of the Board, or by any person authorised in that behalf by the President of the Board, shall be received in evidence, and shall be deemed to be such orders without further proof, unless the contrary is shown.

(3) A certificate, signed by the President of the Board of Trade, that any order made or act done is the order or act of the Board, shall be conclusive evidence of the fact so certified.

88. An Order in Council under this Act shall, from a date to be mentioned for the purpose in the Order, take effect as if it had been contained in this Act; but may be revoked or varied by a subsequent Order.

OFFENCES

89. (1) If any person makes or causes to be made a false entry in any register kept under this Act, or a writing falsely purporting to be a copy of an entry in any such register, or produces or tenders or causes to be produced or tendered in evidence any such writing, knowing the entry or writing to be false, he shall be guilty of a misdemeanour.

(2) If any person falsely represents that any article sold by him is a patented article, or falsely describes any design applied to any article sold by him as registered, he shall be liable for every offence, on conviction under the Summary Jurisdiction Acts, to a fine not exceeding five pounds.

(3) If any person sells an article having stamped, engraved, or impressed thereon or otherwise applied thereto the word "patent", "patented", "registered", or any other word expressing or implying that the article is patented or that the design applied thereto is registered, he shall be deemed for the purposes of this section to represent that the article is a patented article or that the design applied thereto is a registered design.

(4) Any person who, after the copyright in a design has expired, puts or causes to be put on any article to which the design has been applied the word "registered," or any word or words implying that there is a subsisting copyright in the design, shall be liable on conviction under the Summary Jurisdiction Acts to a fine not exceeding five pounds.

(5) If any person uses on his place of business, or on any document issued by him, or otherwise, the words "Patent Office," or any other words suggesting that his place of business is officially connected with, or is, the Patent Office, he shall be liable on conviction under the Summary Jurisdiction Acts to a fine not exceeding twenty pounds.

90. (1) The grant of a patent under this Act shall not be deemed to authorise the patentee to use the Royal Arms or to place the Royal Arms on any patented article.

(2) If any person, without the authority of His Majesty, uses in connection with any business, trade, calling, or profession the Royal Arms (or arms so nearly resembling them as to be calculated to deceive) in such manner as to be calculated to lead to the belief that he is duly authorised to use the Royal Arms, he shall be liable on conviction under the Summary Jurisdiction Acts to a fine not exceeding twenty pounds:

Provided that nothing in this section shall be construed as affecting the right, if any, of the proprietor of a trade mark containing such arms to continue to use such trade mark.

INTERNATIONAL AND COLONIAL ARRANGEMENTS

91. (1) If His Majesty is pleased to make any arrangement with the government of any foreign state for mutual protection of inventions, or designs, or trade marks, then any person who has applied for protection for any invention, design, or trade mark in that state or his legal representative or assignee shall be entitled to a patent for his invention or to registration of his design or trade mark under this Act or the Trade Marks Act, 1905, in priority to other applicants; and the patent or registration shall have the same date as the date of the application in the foreign state.

Provided that—

(*a*) The application is dated, in the case of a patent within twelve months, and in the case of a design or trade mark within six months, from the application for protection in the foreign state; and

Digitized by Google

(*b*) Nothing in this section shall entitle the patentee or proprietor of the design or trade mark to recover damages for infringements happening prior to the actual date on which his complete specification is accepted, or his design or trade mark is registered, in this country.

(2) Where the same applicant has made two or more applications for protection of inventions in any foreign state to which the provisions of this section apply, and the comptroller is of opinion that the whole of the inventions in respect of which the applications were made are such as to constitute a single invention and may properly be included in one patent, he may, if a separate application dated within twelve months from the date of the earliest of the foreign applications is made in respect of each of the foreign applications, accept one complete specification in respect of the whole of those inventions and grant a single patent thereon. The patent shall bear the date of the earliest of the foreign applications, but in considering the validity thereof and in determining other questions under this Act, the court or the comptroller, as the case may be, shall have regard to the respective dates of the foreign applications relating to the several matters claimed in the specification.

(3) The patent granted for the invention or the registration of a design or trade mark shall not be invalidated—

(*a*) in the case of a patent, by reason only of the publication of a description of, or use of, the invention; or

(*b*) in the case of a design, by reason only of the exhibition or use of, or the publication of a description or representation of, the design; or

(*c*) in the case of a trade mark, by reason only of the use of the trade mark,

in the United Kingdom or the Isle of Man during the period specified in this section as that within which the application may be made.

(4) The application for the grant of a patent, or the registration of a design, or the registration of a trade mark under this section, must be made in the same manner as an ordinary application under this Act or the Trade Marks Act, 1905: Provided that—

(*a*) In the case of patents the application shall be accompanied by a complete specification, which, if it is not accepted within eighteen months from the application for protection in the foreign state, or in the case of applications made in accordance with the provisions of subsection (2) of this section from the earliest of the applications for protection in the foreign state, shall with the drawings, samples and specimens (if any) be open to public inspection at the expiration of that period; and

(*b*) In the case of trade marks, any trade mark the registration of which has been duly applied for in the country of origin may be registered under the Trade Marks Act, 1905.

(5) The provisions of this section shall apply only in the case of those foreign states with respect to which His Majesty by Order in Council declares them to be applicable, and so long only in the case of each state as the Order in Council continues in force with respect to that state.

(6) Where it is made to appear to His Majesty that the legislature of any part of His Majesty's dominions outside the United Kingdom has made satisfactory provision for the protection of inventions, designs, or trade marks, patented or registered in this country, it shall be lawful for His Majesty, by Order in Council, to apply the provisions of this section to that of His Majesty's dominions, with such variations or additions, if any, as may be stated in the Order.

DEFINITIONS

92. (1) In this Act, unless the context otherwise requires, "the court" means, subject to the provisions as to Scotland, Northern Ireland, and the Isle of Man, the High Court in England.

(2) Where by virtue of this Act a decision of the comptroller is subject to an appeal to the court, or a petition may be referred or presented to the court, the appeal shall, except in the case of a petition for the revocation of a patent under section twenty-five of this Act, and subject to and in accordance with rules of the Supreme Court, be made and the petition referred or presented to such judge of the High Court as the Lord Chancellor may select for the purpose. An appeal shall not lie from any decision of such judge except in the case of an order revoking or confirming the revocation of a patent.

Digitized by Google

92A. (1) For the purpose of hearing appeals from decisions of the comptroller, which, by virtue of this Act, are subject to an appeal to the Appeal Tribunal, there shall be constituted a tribunal (in this Act referred to as the "Appeal Tribunal") to consist of a judge of the High Court to be nominated by the Lord Chancellor.

(2) The expenses of the Appeal Tribunal shall be defrayed and the fees to be taken therein may be fixed as if the Tribunal were a court of the High Court, but subject as aforesaid appeals to the Tribunal shall not be deemed to be proceedings in the High Court.

(3) The Appeal Tribunal may—

(*a*) examine witnesses on oath and administer oaths for that purpose:

(*b*) make rules regulating appeals to the Tribunal and the practice and proceedings before the Tribunal under this Act; and

(*c*) in any proceedings under this Act by order award to any party such costs as the Tribunal consider reasonable and direct how and by what parties they are to be paid and any such order may be made a rule of court;

so however that, as respects rights of audience and the awarding of costs, the like practice shall be observed as, before the commencement of the Patents and Designs Act, 1932, was observed in the hearing of appeals by the law officer.

(4) The Appeal Tribunal may, if it thinks fit, obtain the assistance of an expert, who shall be paid such remuneration as the Tribunal, with the consent of the Treasury, may determine.

93. In this Act, unless the context otherwise requires,—

"Prescribed" means prescribed by general rules under this Act:

"His Majesty's dominions outside the United Kingdom" includes any territory under His Majesty's protection, or in respect of which a mandate on behalf of the League of Nations is being exercised by His Majesty, but does not include the Isle of Man or the Channel Islands:

"Patent" means letters patent for an invention:

"Patentee" means the person for the time being entered on the register as the grantee or proprietor of the patent:

"Invention" means any manner of new manufacture the subject of letters patent and grant of privilege within section six of the Statute of Monopolies, and includes an alleged invention:

"Inventor" and "applicant" shall, subject to the provisions of this Act, include the legal representative of a deceased inventor or applicant:

"Design" means only the features of shape, configuration, pattern, or ornament applied to any article by any industrial process or means, whether manual, mechanical, or chemical, separate or combined, which in the finished article appeal to and are judged solely by the eye; but does not include any mode or principle of construction, or anything which is in substance a mere mechanical device:

"Article" means (as respects designs) any article of manufacture and any substance artificial or natural, or partly artificial and partly natural:

"Copyright" means the exclusive right to apply a design to any article in any class in which the design is registered:

"Proprietor of a new or original design"—

(*a*) Where the author of the design, for good consideration, executes the work for some other person, means the person for whom the design is so executed; and

(*b*) Where any person acquires the design or the right to apply the design to any article either exclusively of any other person or otherwise, means, in the respect and to the extent in and to which the design or right has been so acquired, the person by whom the design or right is so acquired; and

(*c*) In any other case, means the author of the design;

and where the property in, or the right to apply, the design has devolved from the original proprietor upon any other person, includes that other person:

"Working on a commercial scale" means the manufacture of the article or the carrying on of the process described and claimed in a specification for a patent in or by means of a definite and substantial establishment or organisation, and on a scale which is adequate and reasonable under all the circumstances.

"The comptroller" means the Comptroller General of Patents, Designs and Trade Marks.

Digitized by Google

"Date of application" has the meaning assigned to it in section four of this Act.

"Patent of addition" means a patent granted under the provisions of section nineteen of this Act.

"The Appeal Tribunal" means the tribunal constituted under the provisions of section 92A of this Act.

"The Statute of Monopolies" means the Act of the twenty-first year of the reign of King James the First chapter three, intituled "An Act concerning monopolies and dispensations with penal laws and the forfeiture thereof."

APPLICATION TO SCOTLAND, NORTHERN IRELAND, AND THE ISLE OF MAN

94. In the application of this Act to Scotland—

(1) In any action for infringement of a patent in Scotland the provisions of this Act with respect to calling in the aid of an assessor shall apply, and the action shall be tried without a jury unless the court otherwise direct, but otherwise nothing shall affect the jurisdiction and forms of process of the courts in Scotland in such an action or in any action or proceeding respecting a patent hitherto competent to those courts; and for the purposes of the provisions so applied "court of appeal" shall mean any court to which such action is appealed:

(2) Any offence under this Act declared to be punishable on conviction under the Summary Jurisdiction Acts may be prosecuted in the sheriff court:

(3) Proceedings for revocation of a patent shall be in the form of an action of reduction at the instance of the Lord Advocate, or at the instance of a party having interest with his concurrence, which concurrence may be given on just cause shown only, and service of all writs and summonses in that action shall be made according to the forms and practice existing at the commencement of this Act:

(4) The provisions of this Act conferring a special jurisdiction on the court as defined by this Act shall not, except so far as the jurisdiction extends, affect the jurisdiction of any court in Scotland in any proceedings relating to patents or to designs; and with reference to any such proceedings, the term "the Court" shall mean any Lord Ordinary of the Court of Session, and the term "Court of Appeal" shall mean either Division of that Court:

(5) Notwithstanding anything in this Act, the expression "the Court" shall in reference to proceedings in Scotland for the extension of the term of a patent mean any Lord Ordinary of the Court of Session:

(6) The expression "Rules of the Supreme Court" shall, except in section ninety-two of this Act, mean act of sederunt:

(7) If any rectification of a register under this Act is required in pursuance of any proceeding in a court, a copy of the order, decree, or other authority for the rectification, shall be served on the comptroller, and he shall rectify the register accordingly:

(8) The expression "injunction" means "interdict."

95. In the application of this Act to Northern Ireland—

(1) All parties shall, notwithstanding anything in this Act, have in Northern Ireland their remedies under or in respect of a patent as if the same had been granted to extend to Northern Ireland only:

(2) The provisions of this Act conferring a special jurisdiction on the court, as defined by this Act, shall not, except so far as the jurisdiction extends, affect the jurisdiction of any court in Northern Ireland in any proceedings relating to patents or to designs; and with reference to any such proceedings the term "the Court" means the High Court in Northern Ireland:

(3) If any rectification of a register under this Act is required in pursuance of any proceeding in a court, a copy of the order, decree, or other authority for the rectification shall be served on the comptroller, and he shall rectify the register accordingly.

96. This Act shall extend to the Isle of Man, subject to the following modifications:

(1) Nothing in this Act shall affect the jurisdiction of the courts in the Isle of Man in proceedings for infringement or in any action or proceeding respecting a patent or design competent to those courts:

(2) The punishment for a misdemeanour under this Act in the Isle of Man shall be imprisonment for any term not exceeding two years, with or without

Digitized by Google

hard labour, and with or without a fine not exceeding one hundred pounds, at the discretion of the court:

(3) Any offence under this Act committed in the Isle of Man which would in England be punishable on summary conviction may be prosecuted, and any fine in respect thereof recovered, at the instance of any person aggrieved, in the manner in which offences punishable on summary conviction may for the time being be prosecuted.

REPEAL, SAVINGS, AND SHORT TITLE

97. Nothing in this Act shall take away, abridge, or prejudicially affect the prerogative of the Crown in relation to the granting of any letters patent or to the withholding of a grant thereof.

98. (1) The enactments mentioned in the Second Schedule to this Act are hereby repealed to the extent specified in the third column of that schedule—

(*a*) As respects the enactments mentioned in Part I of that schedule, as from the commencement of this Act;

(*b*) As respects the enactments mentioned in Part II of that schedule, as from the date when rules of the Supreme Court regulating the matters dealt with in those enactments come into operation;

(*c*) As respects the enactments mentioned in Part III of that schedule, as from the date when rules under this Act regulating the matters dealt with in those enactments come into operation;

and the enactments mentioned in Part II and Part III of that schedule shall, until so repealed, have effect as if they formed part of this Act:

Provided that this repeal shall not affect any convention, Order in Council, rule, or table of fees having effect under any enactment so repealed, but any such convention, Order in Council, rule, or table of fees in force at the commencement of this Act shall continue in force, and may be repealed, altered, or amended, as if it had been made under this Act.

(2) Except where otherwise expressly provided, this Act shall extend to all patents granted and all designs registered before the commencement of this Act, and to applications then pending, in substitution for such enactments as would have applied thereto if this Act had not been passed.

99.[4] This Act may be cited as the Patents and Designs Act, 1907, and shall, save as otherwise expressly provided, come into operation on the first day of January, one thousand nine hundred and eight.

PART III

46 & 47 Vict. c. 57.	The Patents, Designs, and Trade Marks Act, 1883.	Subsections (2) and (3) of section forty-seven and section forty-eight.

[Official pamphlet—No charge]

INSTRUCTIONS TO APPLICANTS FOR PATENTS.

1. *General.*—The grant of Patents for inventions is now governed by the Patents and Designs Acts, 1907 to 1932, and the Patents Rules, 1932. For information as to obtaining copies of the Acts and Rules, see para. 31.

The address of The Patent Office is 25, Southampton Buildings, London, W. C. 2. (*Telegraphic Address:*—Patent Office, London. *Telephone No:*—Holborn 8721.) Communications should be addressed to The Comptroller. The office hours are 10 a. m.—4 p. m. on week days, Saturdays 10 a. m.—1 p. m.

2. *Who may apply for a Patent in the United Kingdom.*—Any person, whether a British subject or not, may make an application for a Patent for an invention provided that he is the true and first inventor, or applies

Digitized by Google

jointly with the true and first inventor or inventors, or has received the invention from abroad.

Except in the case of an invention received from abroad or of an application under International Arrangements (see paras. 8 and 27), the true and first inventor (or inventors) must be a party (or parties) to the application.

A Company or other corporate body may apply for a Patent as joint applicant with the inventor, but not as sole applicant, unless the application is made in respect of an invention communicated from abroad or under the International or Colonial Arrangements (see para. 27). An application to which a Company is a party should be made under its seal.

Firms, partnerships or other unincorporate bodies cannot apply as such but must apply in the names of the partners constituting the firm, &c., and the application must be signed by all such partners.

If an inventor dies without making an application for a Patent for an invention, his legal representative may apply for a Patent for such invention.

3. *What may be patented.*—Patents are only granted for inventions the subject-matter of which is "a manner of new manufacture" within the meaning of Section 93 of the Acts.

Applications for Patents would not be accepted in the following cases:—

(a) Where no material product of a substantial character is realised or effected by the alleged invention, or where the only material product is a printed sheet, ticket, coupon, or its equivalent, for use in carrying out some scheme of business or the like.

(b) Where it is proposed to use, modify, or imitate natural conditions existing on the earth's surface, there being no invention as to the means or apparatus applied to these purposes.

(c) Where the alleged invention is so obviously contrary to well-established natural laws that the application is frivolous.

(d) Where the invention is of such a character that its use would be contrary to law or morality.

Patents for inventions relating to substances prepared or produced by chemical processes, or intended for food or medicine, are only granted subject to the provisions of Section 38A of the Acts.

An application for a Patent must be restricted to one invention. Several distinct matters are not deemed to constitute one invention merely because they are all applicable to or may form parts of an existing machine, apparatus, or process.

4. *Manner of Applying for a Patent.*—

All applications and communications must be made in English.

Applicants must apply in their real names and not under assumed or trade names.

An application can be made either by direct communication with the Office or through an agent duly authorised to the satisfaction of the Comptroller and resident or having a place of business in Great Britain or Northern Ireland. In every case an address for service in Great Britain or Northern Ireland must be given. (See also paras. 6 and 28 (4).)

No models are required.

Applications for Patents should be left at the Patent Office by hand or sent by post, addressed to the Comptroller, The Patent Office, 25, Southampton Buildings, London, W.C.2.

Applicants must use the appropriate Stamped Forms (see para. 5) as fees cannot be accepted if tendered by cheque or Money Order or in cash.

5. *Patent Forms and Fees.*—The following Forms and Fees are prescribed under the Patents Rules, 1932. A Specimen of each of these Forms will be found in the Second Schedule to these Rules (see para. 31).
