	For each additional patent devolving under the same title	2s. 6d.
	If made after 6 months from date of document, or sealing of patent.	
	In respect of one patent	£10
	For each additional patent devolving under the same title	2s. 6d.
35	Request for Correction of Clerical Error:—	
	Up to Sealing	10s.
	After Sealing	£1
35A	Notice of Opposition to Correction of Clerical Error	£1
36	Request for Certificate of Comptroller	10s.
36A	Request for information affecting a Patent or an application therefor	10s.
37	Application for Duplicate of Letters Patent	£2
38	Notice of Intended Exhibition or Publication of Unpatented Invention	£1
39	Application for Entry of Order of Court in Register	10s.
40	Application for direction under Section 37 (2)	£5
	MISCELLANEOUS FEES	
	For inspection of Register, original or Convention documents, and samples or specimens	1s.
	For typewritten office copies, every 100 words (but never less than than shilling)	6d.
	For photographic office copies and office copies of drawings, cost according to Agreement	
	For office copies of Letters Patent	4s. 6d.
	For certifying office copies, M. S. or printed, each	2s. 6d.
	NOTE.—An additional stamp duty of one shilling is also charged under the Stamp Act upon certified copies of registers or of stamped legal documents.	

5 (*a*). *Manner of obtaining Forms.—Stamped Forms.*—Stamped forms ***can not be sent by post from the Patent Office***, but may be obtained, ***on personal application only***, at the Inland Revenue Stamp Office (Room 28), The Patent Office, 25, Southampton Buildings, Chancery Lane, London, W. C. 2.

They may also be obtained, at a few days' notice and ***upon prepayment of the value of the stamp***, at any Money Order Office in Great Britain or Northern Ireland.

Digitized by Google

Further, stamped forms can be ordered by post from the Controller of Stamps, Room 5, Inland Revenue Dept., Somerset House, London, W. C. 2. A bankers' draft or a Money or Postal Order payable to the Commissioners of Inland Revenue and crossed "Bank of England," to cover the value of the stamps and the cost of transmitting the forms in a registered envelope by post, must be forwarded to Somerset House with the order.

Cheques will not be accepted either by the Inland Revenue Department or the Patent Office.

Unstamped Forms.—When ordering stamped forms, any unstamped forms required for use therewith should be ordered at the same time. No charge is made for such forms.

6. *Documents required on application for a Patent.*—An application for a Patent consists of an application form and a specification (either provisional or complete). The Forms must bear the prescribed stamp fees, and the specification must be in duplicate.

The application form must be signed by the applicant or applicants, and an address for service in Great Britain or Northern Ireland must be given.

In an ordinary case an application for a Patent may be made in either of two ways:

(1) The applicant may apply in the first instance with a provisional specification, using Patents Form No. 1 (stamped £1), accompanied by two Patents Forms No. 2 (unstamped); and may leave his complete specification (stamped £4) at any later date within twelve months, or, with application for extension of time on Patents Form No. 6 (stamped £2), within thirteen months.

(2) The applicant may leave his complete specification at the time of making his application, using Patents Form No. 1 (stamped £1), accompanied by two Patents Forms No. 3 (one copy stamped £4 and one unstamped).

In any other case one of the Forms No. 1A, 1B, &c. (see para. 5), should be used instead of Form No. 1.

The title of the invention should cover the whole subject matter, and is not intended to be the name under which the invention is to be sold.

In the title of the invention the following forms are not allowable:—

(a) Fancy names or titles, e. g., "The Simplex Wheel;" "The Hercules Braces."

(b) The use of the inventor's name, or of the word "Patent."

(c) The abbreviation "&c." This should be replaced by words expressing whatever is intended to be covered by the term, or by the phrase "and the like."

The Specifications and all other documents, except drawings, must be written, typewritten, lithographed or printed in large and legible characters with deep permanent black ink on one side only of sheets of strong wide-ruled white paper measuring approximately 13 inches by 8 inches, leaving a margin of at least one inch and a half on the left-hand side thereof; and the signatures thereto must be written in ink in a large and legible hand, and the several sheets should be fastened together at the top left-hand corner. At the top of the first page of a specification a space of about 2 inches should be left blank. The work of the Office is facilitated when specifications are printed or typewritten. Carbon copies of typewritten documents will be accepted as duplicates provided they are on paper of good quality and that the typing is black and distinct.

Provisional Specification.—The provisional specification must contain the full name, address, and nationality of each applicant, and the title of the invention (all of which must be identical with those given on the application form), and must fairly describe the nature of the invention.

The specification should be begun on Patents Form No. 2, and continued if necessary on foolscap paper. The duplicate must be an exact copy. The applicant should in this document give a clear description of the invention, but he need not enter into minute details as to the manner in which the invention is to be carried into effect, and no claims are necessary or allowable. It should be noted, however, that, unless the nature of the invention be fairly described in the provisional specification, postdating of the application to the date on which an adequate description is received may be necessary. Drawings (in duplicate) may be furnished if desired, but are not necessary except when an adequate description of the invention cannot be given without their aid. The specification must be dated at the end, and signed by each applicant or by the authorised agents. The signature of a corporate body to a specification is not required to be under seal.

Digitized by Google

Unless a complete specification, stamped £4 is left within 12 months, or with extension of time 13 months (see para. 5, Patents Form No. 6), from the date of application, an application for a Patent is deemed to be abandoned.

Complete Specification.—The complete specification must contain the full name, address, and nationality of each applicant, and the title of the invention, all of which must be identical with those given on the application form.

The complete specification must be begun upon Patents Form No. 3 (stamped £4), and continued, if necessary, on foolscap paper. The duplicate must be an exact copy, but unstamped. The specification should contain a full and detailed description of the invention, of such a nature that the invention could be carried into practical effect by a competent workman from the directions of the document alone. Drawings (in duplicate) are required to accompany a complete specification in all cases where they are necessary to a clear and ready understanding of the invention described and claimed.

A complete specification left after a provisional specification should refer to the number and date of the provisional specification, should contain a full and detailed description of the invention, independent of the description given in the provisional specification, and should be confined to substantially the same invention as described in the provisional specification.

It is necessary at the end of the complete specification to make a distinct and proper statement of claims, which must be clear and succinct as well as separate and distinct from the body of the specification. The claims should be preceded by the prescribed preamble given on Patents Form No. 3, and should form in brief a clear statement of that which constitutes the invention, and inventors should be careful that their claims include neither more nor less than they desire to protect by their Patent. Any unnecessary multiplicity of claims or prolixity of language should be avoided.

Claims should not be made for the efficiency or advantages of the invention.

The specification must be dated at the end, and signed by each applicant or by the authorised agents. The signature of a corporate body to a specification is not required to be under seal.

Use of mathematical formulae in specifications.—In order to avoid errors in printing where mathematical expressions and equations are employed in specifications, care should be taken to arrange such matter as simply and clearly as possible; the various characters employed should be of the correct relative size and in proper alignment, and where typewritten characters might cause confusion, as in the case of the letter l and the figure 1, the character should be written in. Dots over letters and bars above or below expressions should be avoided. Thus $\sqrt{(ax + by)}$ or $(ax + by)^{\frac{1}{2}}$ is to be preferred to $\sqrt{ax + by}$. Generally the use of the solidus / is to be preferred to the horizontal rule ——, thus (a + b) / (c + d) is preferred to $\frac{a + b}{c + d}$. Advice on this matter is contained in a pamphlet "Notes on the preparation of mathematical papers" issued by the London Mathematical Society and obtainable from the printers, Messrs. C. F. Hodgson & Son, Ltd., 2, Newton Street, London, W. C. 2.

Drawings.—As the drawings are printed by a photo-lithographic process after the acceptance of the complete specification, the character of each original drawing must be brought as nearly as possible to a uniform standard of excellence, suited to the requirements of such process and calculated to give the best results in the interest of inventors, of the Patent Office, and of the public. The statutory requirements (see Rules 18–25 of the Patents Rules, 1932) should, therefore, be strictly observed, as non-compliance therewith will cause delay in the progress of an application for a Patent.

A pamphlet containing full instructions as to the preparation of drawings will be sent free on application.

6a. *Post-dating of Applications.*—Applications are recorded and dated as of the date of their receipt, but an applicant may, before the acceptance of the complete specification of his application, request that the application be post-dated to a date not later than six months from the date when the application was made. Such request should be made on Patents Form No. 4 duly stamped (for stamp fees see para. 5). In the case of an application accompanied by a provisional specification in respect of which no complete specification has been left, the request for post-dating must be made within twelve months from the date of the application or, if accompanied by Form 6 (stamped £2), within thirteen months.

Digitized by Google

7. *Communication from Abroad.*—In cases of applications for Patents for inventions communicated from abroad, the person to whom the invention is communicated will be treated in all respects as the actual applicant, and the Patent will be issued to such person. Where, however, he has agreed to assign the patent when granted to the communicator, the latter may request the grant to be made to him (see para. 16).

8. *Applications under International Arrangements (Convention Applications).* (See para. 27).—An application in the United Kingdom for a Patent claiming priority of date under International Arrangements must be made on the apppropriate form (see para. 5) within 12 months from the date of the *first* application in a country which has such an arrangement with this country. The application must be made and signed by the person or persons by whom the first foreign application was made or by his or their legal representatives or assignees, and must be accompanied by a complete specification, and, *in addition*, by copies of the specification and drawings or documents filed abroad in respect of the first foreign application duly certified by the official chief of the foreign Patent Office, or otherwise verified to the satisfaction of the Comptroller; and if such specification or any document relating to the application is in a foreign language, by a translation verified by statutory declaration or otherwise to the satisfaction of the Comptroller.

One complete specification may be filed in respect of two or more applications under these Arrangements provided that the separate applications and the complete specification are filed at the Patent Office on the same date, that the applications are all made within 12 months from the earliest of the foreign applications and that all the foreign applications were made in the same country. The Comptroller must be satisfied that the whole of the inventions covered by the foreign applications constitute a single invention and may properly be included in one Patent. (See Section 91 (2) of the Acts.)

If an extension of time is required for leaving the copies of the foreign specification, translation, drawings or documents, application should be made on Patents Form No. 5, duly stamped. Such extension may be for one, two, or three months but cannot exceed three months.

9. *Patent of Addition.*—Where a Patent for an invention has been applied for or granted, the applicant or patentee may apply either by himself or jointly with other persons for a Patent to be called a "Patent of Addition" in respect of any improvement in or modification of the invention.

The Patent of Addition if granted will be granted for the unexpired term of the original Patent, and no renewal fees will be payable on such Patent of Addition, which will remain in force only so long as the original Patent remains in force. (See Section 19 of the Acts.)

Where an independent Patent has been granted for an invention which is an improvement in or modification of an original invention, and the patentee is also the patentee of the original invention, he may make application on Patent Form 13B (stamped £5) for revocation of the independent Patent and the grant to him in lieu thereof of a Patent of Addition.

10. *Single Patent for Cognate Inventions.*—As applicant who has put in two or more applications accompanied by Provisional Specifications for inventions which are cognate or modifications one of the other may put in one complete specification in respect of all such applications; and if the whole of the inventions are such as to constitute a single invention, he may obtain a single Patent therefor. (See Section 16 of the Acts.)

11. *Patents for Inventions relating to Munitions of War.*—The attention of applicants for Patents is drawn to the desirability of avoiding publication of inventions which relate to munitions of war as defined in the Official Secrets Acts, 1911 and 1920.

In such cases, after lodging an application at the Patent Office and thus obtaining protection, the inventor is advised to submit the details of his invention confidentially to the departments concerned, i. e., Admiralty, War Office, or Air Ministry, in good time before publication takes place, in order that, if considered necessary by such Departments, steps may be taken for the invention, and any Patent to be granted thereon, to be kept secret under the provisions of Section 30 of the Acts, on such terms as may be arranged.

12. *Official Examination.*—Every application is referred to an Examiner who is required to report (a) whe her the nature of the invention is fairly described, (b) as respects a complete specification whether the nature of the invention and the manner in which it is to be performed are particularly

Digitized by Google

described and ascertained, (c) whether the application, specification, and drawings (if any) have been prepared in the prescribed manner, (d) whether the title sufficiently indicates the subject-matter of the invention, (e) whether the specification comprises one invention only, and, (f) in the case of a complete specification left after a provisional specification, whether the invention in the complete specification is substantially the same as in the provisional specification. If this report is adverse, the Comptroller may refuse to accept the application, or may require that the application, specification, or drawings be amended before he proceeds with the application, and in the latter case he may direct that the application be postdated.

In the case of an application accompanied by a complete specification the Comptroller may also, if the applicant so requests, treat the specification as a provisional specification and proceed with the application accordingly.

When a complete specification has been filed, a search is made to ascertain whether the invention claimed has been wholly or in part anticipated in any published specification (other than a provisional specification not followed by a complete specification) filed pursuant to any application made in the United Kingdom within the preceding fifty years or has been made available to the public in any document within the Comptroller's knowledge published in the United Kingdom. If any such anticipation be found and the applicant is unable suitably to amend his pecification, the specification will be accepted only after the insertion of a reference to the prior specification or other document by way of notice to the public; and, in cases where the Comptroller is satisfied that the invention claimed has been wholly and specifically claimed or described in any specification or other document to which the investigation has extended, he may, in lieu of requiring references to be made in the applicant's specification, refuse to grant a Patent. The official search is not, of course, exhaustive and the procedure must not be regarded as conveying in any way a guarantee of the validity of the Patent.

12a. *Searches.*—Searches, other than the official search made in respect of complete specifications filed upon applications for Patents, cannot be undertaken by the Patent Office, but must be made by the person requiring information or by his agent. A list of places where specifications of Patents and other Patent Office publications may be consulted, is given in para. 31.

After a complete specification has been accepted, or a Convention application, the specification of which is open to public inspection, has become void, any person may make application to the Comptroller upon Patents Form No. 9, stamped £1, to be informed of the result of the official search in connection with that specification.

13. *Acceptance of Complete Specifications.*—A complete specification must be accepted within 18 months or, with extension of time (see para. 5, Patents Form No. 8) 19, 20, or 21 months from the date of application. If not so accepted the application becomes void and cannot be further proceeded with.

On the acceptance of a complete specification, the Comptroller gives notice thereof to the applicant, and the acceptance is advertised in the Official Journal (Patents).

Any other person who desires immediate notification of the acceptance should previously make a request for such information on Patents Form No. 36A (stamped 10s.).

An application for Patent is allotted a serial number when the complete specification is accepted. The serial number is used instead of the original application number in all subsequent proceedings.

14. *Public Inspection of Specifications.*—The provisional specification (if any) and the complete specification are not open to public inspection, for searches or for copying, until after the acceptance of the complete specification, except in the case of a Convention application (see paras. 8 and 27). In such case the complete specification, if not already accepted, becomes open to public inspection at the end of 18 months from the priority date claimed, but is not printed in that form unless the application becomes void. The specifications of other void applications or of abandoned applications are not printed or open to inspection.

Upon the acceptance of a complete specification, the application, specification or specifications with the drawings (if any) may be inspected at the Patent Office upon payment of the prescribed fee of one shilling. A similar fee is payable for inspection of the specification of a Convention application open to public inspection under Section 91 (4) of the Acts.

Digitized by Google

Specifications are printed fifteen days after the advertisement of the acceptance of the complete specification, and may be obtained as indicated in para. 31.

15. *Opposition to the Grant of a Patent.*—A Patent is granted, subject to the payment of a sealing fee, upon an application which passes the prescribed stages and is unopposed.

Any person may at any time within two months from the date of the advertisement in the Official Journal (Patents) of the acceptance of a complete specification, or within such further period not exceeding one month as may be allowed on application being made within the two months period, give notice of opposition to the grant of the patent on any of the following grounds, *but on no other ground:*—

(a) that the applicant obtained the invention or any part thereof from him, or from a person of whom he is the legal representative; or

(b) that the invention has, prior to the date which the Patent applied for would bear if granted, been published in any complete specification, or in any provisional specification followed by a complete specification, deposited pursuant to any application made in the United Kingdom and dated within fifty years next before such date, or has been made available to the public by publication in any document (other than a United Kingdom specification or a specification describing the invention for the purpose of an application for protection made in any country outside the United Kingdom more than fifty years next before such date, or any abridgment of, or extract from any such specification published under the authority of the Comptroller or of the Government of any country outside the United Kingdom) published in the United Kingdom before such date; or

(bb) that the invention has been claimed in any complete specification for a United Kingdom Patent which, though not published at the date which the Patent applied for would bear if granted, was deposited pursuant to an application for a Patent which is or will be of prior date to such Patent; or

(c) that the nature of the invention, or the manner in which it is to be performed is not sufficiently and fairly described and ascertained in the complete specification; or

(d) that the complete specification describes or claims an invention other than that described in the provisional specification, and that such other invention forms the subject of an application made by the opponent for a Patent which if granted would bear a date in the interval between the date of the application and the leaving of the complete specification or has been made available to the public by publication in any document published in the United Kingdom in the interval; or

(e) that in the case of an application under section ninety-one of the Acts the specification describes or claims an invention other than that for which protection has been applied for in a foreign state or any part of His Majesty's dominions outside the United Kingdom, and that such other invention either forms the subject of an application made by the opponent for a Patent which if granted would bear a date in the interval between the leaving of the application in the foreign state or part of His Majesty's dominions outside the United Kingdom and the date of the application in the United Kingdom, or has been made available to the public by publication in any document published in the United Kingdom in that interval.

The notice of opposition must be given on Patents Form No. 10, stamped £1, and must state the grounds (i. e., one or more of the grounds (a) to (e) shown above) on which the person giving the notice intends to oppose the grant, and must be signed by him. The notice must also state his address for service in Great Britain or Northern Ireland, and be accompanied by an unstamped copy and a statement in duplicate setting out fully the nature of his interest, the facts upon which he bases his case, and the relief which he seeks. One copy of the notice and of the statement will be transmitted by the Comptroller to the applicant.

The subsequent procedure is regulated by Rules 44–50 of the Patents Rules, 1932.

Where an extension of time for giving notice of opposition is desired, application for such extension should be made on Patents Form No. 10A (stamped £1) before the expiry of the normal period of two months.

16. *Grant and Sealing of Patent.*—A Patent is granted only to the applicant except in the following cases:

Digitized by Google

(a) Where an applicant has agreed in writing to assign the Patent when granted, or in the case of a joint application, his interest in the Patent when granted. In such cases the Patent may, on application being made on Patents Form No. 1E (stamped £1), be granted to the assignee either alone or jointly with the remaining applicant or applicants as the case may be.

(b) Where the applicant has died, the Patent may be granted to his legal representative, and where an applicant in a joint application has died the Patent may be granted either (1) to the surviving applicant or applicants and the legal representative of the deceased, or (2) with the consent of the legal representative of the deceased, to the surviving applicant or applicants.

(c) Where disputes arise between joint applicants as to proceeding with an application, the Comptroller may, after giving all parties interested an opportunity of being heard, allow the application to proceed in the names of one or more of the parties, and may grant the Patent to him or them.

Except in certain special cases a Patent must be sealed within 21 months, or, if extension of time has been allowed for leaving or accepting a complete specification 25 months, from the date of the application for the Patent. A sealing fee of £1 is payable, and should be paid by leaving at the Patent Office Patents Form No. 12, stamped £1 (see para. 5).

Great care must be taken to ensure that the form, duly stamped, is left at the Office at such a date as to permit of the sealing of the Patent within the prescribed time. The applicant for a Patent is advised to pay the sealing fee after the date of the acceptance of the complete specification and before the expiration of the period allowed for opposition. If this be done, the Patent will as a rule be sealed about 10 weeks after the date of the acceptance of the complete specification. If the payment has been omitted, application may be made to the Comptroller on Patents Form. No. 13 (see para. 5) for an extension of time for one, two or three months to make such payment, but no extension can be allowed beyond three months except in cases where hardship would arise in connection with the prosecution by the applicant of applications in foreign countries. In such cases an applicant who has already obtained the maximum extension of time otherwise allowable may, before the expiry of such extension, apply for a further extension on Patents Form No. 13A duly stamped.

17. *Duration of Patent and payment of Renewal Fees for the continuance of Patent.*—Every Patent (other than a Patent of Addition) is granted for the term of 16 years from the date of application, subject to the payment, before the expiration of the 4th and each succeeding year during the term of the Patent, of the prescribed fee. The patentee may pay all or any of such prescribed annual fees in advance.

In the case of Patents granted on Convention applications (see para. 27) the term of the Patent is reckoned as from the date of the first foreign application, and not from the date of application in this country.

Payment of the annual fee must be made by way of Patents Form No. 14 duly stamped (see para. 5), which must be lodged at the Patent Office not later than the date on which payment is due. The production of the Letters Patent at the Patent Office is not required.

As the payment of these renewal fees is regulated by Act of Parliament, a fee cannot ordinarily be accepted a *single day* after it is due: but if the payment has been omitted, application may be made to the Comptroller, on Patents Form No. 15 (see para. 5), for an enlargement of time of one, two, or three months, as the case may be, within which to make such payment, but no enlargement can be allowed beyond three months.

In every case an address for service in Great Britain or Northern Ireland must be given.

18. *Extension of term of Patent.*—A patentee may petition the Court for an extension of the term of his Patent, but such petition must be presented a least six months before the time limited for the expiration of the Patent or at such other time not later than the date of expiration as the Court may in its discretion allow. Notice may be given to the Court of opposition thereto.

When a patentee has suffered loss or damage by reason of hostilities between His Majesty and any foreign state, application for an extension of the term of a Patent may be made by originating summons, instead of by petition.

The procedure to be followed in applying for an extension of term is laid down in the Rules of the Supreme Court (Patents and Designs), 1925. (Statutory Rules and Orders, 1925, No. 650/L8), and in the Rules of the Supreme Court (No. 2), 1933, (Statutory Rules and Orders, 1933, No. 645/L18), copies

Digitized by Google

of which may be obtained from H.M. Stationery Office, Adastral House, Kingsway, London, W.C.2, price 3d. each, by post, 3½d.

19. *Restoration of Letters Patent.*—If a Patent has expired owing to failure to pay a renewal fee within the prescribed time, application may be made to the Comptroller by the patentee on Patents Form No. 16 (stamped £20) for an Order restoring the Patent, provided that the omission to pay the fee was unintentional and that no undue delay has occurred in making the application for restoration. The application must be accompanied by one or more statutory declarations giving full details of the circumstances which led to the non-payment of the fee and to the subsequent discovery of the omission.

The application is advertised in the Official Journal (Patents) and any person desiring to oppose the application may give notice of opposition on Patents Form No. 17 within two months from the date of advertisement. If no notice of opposition is given within the prescribed period, a formal hearing is appointed, and if the Comptroller is satisfied with the evidence an Order for restoration will be issued upon payment of all overdue renewal fees.

20. *Amendment of Specification.*—A request for leave to amend an accepted complete specification by way of disclaimer, correction or explanation must be made on Patents Form No. 18 and signed by the applicant or patentee, and must be accompanied by a King's Printer's or official printed copy of the specification showing clearly in red ink the proposed amendments. Care should be taken to indicate clearly what part of the printed description it is proposed to omit, and at what points interlineations are to be inserted. Additional matter which cannot be written upon the printed copy should be written upon a separate sheet and attached to the print.

It should be remembered that proposed amendments, whether allowable or not, are made public and advertised, and that this publication may be a bar to the obtaining of a valid Patent for matter disallowed by way of amendment.

Any person desiring immediate notification of a request to amend any particular specification should make application for such information on Patents Form No. 36_A (stamped 10s).

21. *Correction of Clerical Errors.*—A request for the correction of a clerical error in or in connexion with an application for a Patent, or in any Patent or specification, or in the name or address of the proprietor of any Patent, or in any matter which is entered upon the Register of Patents, should be made on Patents Form No. 35. See para. 5.

22. *Licenses of Right.*—A patentee may apply for the indorsement of his Patent "Licences of Right." Patents so indorsed are subject to the grant of Licences to any person making application therefor, and the terms of the Licence will be settled by the Comptroller, failing agreement between the parties. *As from the date of such indorsement, however, only half the ordinary renewal fees are payable.*

Applications for indorsement must be made on Patents Form No. 20, stamped £1 (see para. 5), accompanied by a statutory declaration that the patentee is not precluded by contract from making the request, and by the Letters Patent. The application must include any Patents of Addition.

Unless an application for indorsement, fully complying with official requirements, is received at least six weeks before the date on which a renewal fee will become due, the indorsement cannot be effected before such date, and the full fee will therefore be payable. In no case can a half renewal fee be accepted unless the Patent was actually indorsed "Licences of Right" before the date on which the fee became payable.

Any person desiring to oppose an application for indorsement may give notice to the Comptroller upon Patents Form No. 21, stamped £2 (see para. 5) *within one month* from the date of the advertisement in the Official Journal (Patents).

All indorsements of Patents are entered on the Register of Patents and are advertised in the Official Journal (Patents) and the Board of Trade Journal for the purpose of bringing the invention to the notice of manufacturers. Any Patents of Addition granted on an indorsed Patent are automatically indorsed at the time of grant.

23. *Assignments, Mortgages, Licenses, &c.*—The Acts require application to be made to the Comptroller for entry on the Register of Patents of deeds of assignment of Patents, and other documents affecting the proprietorship of Patents, and licenses to manufacture or use patented inventions. A document not entered on the Register will not be admitted in evidence in any Court in proof

Digitized by Google

of title to a Patent or to any interest in a Patent unless the Court otherwise directs. No document can, however, be entered on the Register until the Patent to which it relates has been actually sealed.

Any person who becomes entitled to a Patent, or to any interest in a Patent, under such documents, should therefore make application on—

(a) Patents Form No. 32, for the entry of his name as proprietor or part proprietor in the Register of Patents; or

(b) Patents Form No. 33, for the entry of a notice of a mortgage or license in the Register of Patents; or

(c) Patents Form No. 34, for the entry in the Register of a notification of any document affecting a Patent and not coming under heads (a) or (b);

whichever is the appropriate form. (For fees, see para. 5.)

Where, however, an applicant for a Patent has agreed to assign the Patent when granted, the assignee may apply upon Patents Form 1E (stamped £1) for the grant of the Patent to be made to him instead of to the applicant.

In the case of firms, partnerships, or other unincorporate bodies, the application must be made in the names of the partners constituting the firm &c. A statement as to the nationality of the parties to the transaction should be supplied in all cases.

The stamped form must be accompanied by the original document, which must have been duly stamped in accordance with the provisions of the Stamp Act, 1891, together with an attested copy written, typewritten, or printed, on foolscap paper, on one side only, and bearing a 1s. impressed stamp.

24. *Certificates.*—A request for a certificate of the Comptroller as to any entry, matter or thing which he is authorized by the Acts or Rules to make or do, should be made on Patents Form No. 36. See paragraphs 5 and 28 (1).

Certified copies of any entry in the Register of Patents, or certified copies of, or extracts from, Patents, specifications, disclaimers, affidavits, statutory declarations, and other public documents in the Office, or of or from registers and other books kept there, may be furnished by the Comptroller on payment of the prescribed fee. See para. 5.

25. *Exhibition of Unpatented Inventions.*—An unpatented invention may be exhibited, published or used at an exhibition certified by the Board of Trade as industrial, during the period of the holding of the exhibition, or a paper describing an unpatented invention may be read before a learned Society or published in the Society's transactions, without prejudicing the right of the inventor to apply for and obtain a Patent in respect of the invention, or the validity of any Patent granted on the application, provided, (a) that he gives the prescribed notice on Patents Form No. 38 stamped £1 (see para. 5) to the Comptroller of his intention so to exhibit the invention, or to read or publish the paper, and (b) that the application for a Patent is made before or within six months from the date of the opening of the exhibition or of the reading or publication of the paper. It should be noted that the filing of Patents Form No. 38 does not confer any priority of date on the subsequent application for a Patent, which would be recorded and dated at the Patent Office on the day of actual receipt.

Notice on Form No. 38 need not be given if an application for a Patent for the invention has been made before the opening of the exhibition or the reading or publication of the paper.

26. *Applications for Patents, &c. in His Majesty's Dominions and in Foreign States.*—The rights conferred by a Patent do not extend outside Great Britain and Northern Ireland and the Isle of Man. Application for Patents in other parts of His Majesty's Dominions and in foreign states must be made to the Government of the country in which protection is desired. (See also para. 27.) A collection of the patent, design, and trade mark laws of British Dominions and Colonies and of foreign states may be seen in the Free Library of the Patent Office.

The procedure for obtaining such Patents varies considerably in the different countries, and applicants therefore may find it desirable in their own interests to consult a Patent Agent before making their applications.

27. *International Arrangements.*—Under the terms of the International Convention for the Protection of Industrial Property, any person who has made application for a Patent in a country which is a party to the Convention (or his legal representative or assignee) has the right, within twelve months from

Digitized by Google

the date of the first application in a Convention country to claim priority of date for applications in respect of the same invention in any other Convention country.

The following countries are parties to this Convention:—

Great Britain with Ceylon, Palestine, and Trinidad and Tobago.
Canada.
Australia with Papua and New Guinea.
New Zealand, with Western Samoa.
Irish Free State.
Austria.
Belgium.
Brazil.
Bulgaria.
Cuba.
Czecho-slovakia.
Danzig (Free City).
Denmark with the Farõe Islands.
Dominican Republic.
Esthonia.
Finland.
France with Algeria and colonies.
Germany.
Greece.
Hungary.
Italy, with Libia, Eritrea and the Italian Aegean Islands.
Japan.
Latvia.
Luxemburg.
Mexico.
Morocco (French zone.)
Morocco (Spanish zone).
Netherlands, with the Dutch East Indies, Surinam and Curaçao.
Norway.
Poland.
Porutgal, with the Azores and Madeira.
Roumania.
Serb—Croat—Slovene State.
Spain.
Sweden.
Switzerland.
Syria and Lebanon.
Tunis.
Turkey.
United States of America.

Mutual arrangements for the grant of priority rights to applications for Patents have also been made between Great Britain on the one hand and British India and the Union of South Africa on the other.

28. *Miscellaneous Matters relating to Patents and the Patent Office.*—

(1) *Information as to a particular patent or application for patent.*

Any person requiring information in respect of any one of the following matters:

(*a*) when a complete specification following a provisional specification has been left or when an application for a patent has become abandoned,

(*b*) when a complete specification has been accepted or when an application for a patent has become void,

(*c*) when a patent has been sealed or when the time for payment of the sealing fee has expired,

(*d*) when a renewal fee has been paid,

(*e*) when a patent has expired,

(*f*) when an entry has been made on the register or application has been made for the making of such entry, or

(*g*) when any application is made or action taken involving an entry on the register or advertisement in the Journal

should make request therefor on Patents Form No. 36A (stamped 10s.).

(2) *Information by Post.*—Any person wishing to know whether a particular Patent is still in force, the name of the present proprietor of a Patent, or any similar details, may obtain an extract from the Register of Patents upon stating the number and year of the Patent and forwarding by postal order the prescribed fee of one shilling in respect of each Patent. No information with reference to the contents of unpublished specifications can be given to any person other than the applicant for the Patent.

(3) *Photographic Copies of Drawings.*—Photographic copies of Patent specification drawings may be obtained at the rates shown in para. 28 (10).

Where several copies of the same drawing are required, estimates for reproduction by photo-lithography will be furnished on application.

(4) *Advice on Patent Matters, &c.*—The Patent Office does not undertake to give legal advice or opinions on any subject connected with Patent Law, or to examine or express opinions on specifications, agreement or other documents before they are lodged in connection with formal proceedings.

Applicants for Patents who are not familiar with the practice and procedure of the Patent Office are advised, in their own interests, to employ a Patent

Digitized by Google

Agent, as the value of Patents depends largely upon the skilful preparation of specifications and claims.

The Patent Office cannot recommend any particular Patent Agent for employment by applicants, but a list of Registered Patent Agents may be obtained from Messrs. Eyre and Spottiswoode (Publishers), Ltd., 6 Great New Street, London, E.C.4, or through any bookseller. Price (including postage) 6d.

No person can be recognised by the Comptroller as an agent unless his name is entered on the Register of Patent Agents.

(5) *Application for Assistance, Reduction of Fees, &c.*—It is not within the power of the Comptroller to comply with any of the following requests:

For pecuniary assistance to obtain Patents.

For reduction or remission of any fee.

For purchase or acquirement of any interest in patented or other inventions.

For recommendation of any invention for purchase or use by a Government Department or by the public.

(6) *Provisional Protection.*—An invention may, during the period between the date of an application for a Patent therefor and the date of sealing a Patent on that application, be used and published without prejudice to that Patent; but an applicant is not entitled to institute proceedings for infringement until the Patent has been granted, and no proceedings can be taken in respect of an infringement committed before the acceptance of the complete specification.

(7) *Use of the word "Patent."*—The marking of an article with the word "patent," "patented," or any words implying that a Patent has been obtained for the article does not constitute notice of the existence of the Patent unless the number of the Patent is also specified. See Section 33 of the Acts.

Any person who falsely represents that an article sold by him is a patented article is liable for every offence on summary conviction to a fine not exceeding five pounds. In a case decided by a Police Magistrate, it was held, however, that a person was entitled to mark goods with the word "patent" after the complete specification had been accepted. (See Sections 10 and 89 of the Acts, and Reports of Patent Cases, Vol. 13, No. 17, page 265.)

(8) *Use of the Royal Arms.*—The grant of a Patent is not to be deemed to authorise a patentee to use the Royal Arms or to place the Royal Arms on any patented article.

(9) *Patent Medicines.*—Communications with respect to the preparation and supply of Medicine Stamps appropriated to a particular medicine, or as to the liability to stamp duty of so-called "Patent Medicines", should be addressed to the Secretary of Excise, Custom House, Lower Thames Street, London, E. C. 3.

The use of Medicine Stamps does not have the effect of Letters Patent.

(10) *Photographic Copies.*—Photographic copies of out-of-print Specifications and other documents are supplied at the following rates:—

		Per copy.
(a) Negative Copies:		
(i) Out-of-print British Patent Specifications not more than 50 years old		1s.
		Per page or sheet.
(ii) Other out-of-print Patent Office publications.	Letter press or drawings (small sheets)	4d.
	Drawings (large sheets)	8d.
(iii) Other documents	up to 13 in. × 9 in	6d.
	up to 13 in. × 18 in	1s. 0d.

(b) Positive Copies.—The charge for a positive copy of a document is twice that for a negative copy, but when two or more positive copies of the same document are ordered, the second and subsequent positive copies are supplied at the same price as negative copies.

(c) Minimum charge for a copy of any document or publication ..... 1s.

Orders for photographic copies must be prepaid, or the cost may be charged to a Deposit Account.

The prices quoted include inland postage only. Postage to places abroad is extra in all cases.

29. *Patent Office Museum.*—The contents of the Museum were transferred in 1883 to what is now the Science Museum at South Kensington, where they have been added to the general collections of that Museum. All communica-

Digitized by Google

tions relating to the Museum should be addressed to the Director and Secretary, Science Museum, South Kensington, London, S. W. 7.

30. *Patent Office Library.*—The Free Library of the Patent Office, 25, Southampton Buildings, Chancery Lane, London, W. C. 2, is open daily, from 10 a. m. to 9 p. m., except on Sundays, Christmas Day, Good Friday, Easter Eve, and Bank Holidays. On Whitsun Eve and Christmas Eve the Library is closed at 4 p. m.

In addition to the printed specifications, indexes, and other publications of the Patent Office, the Library contains a collection of the leading British and foreign scientific journals, transactions of learned societies, and textbooks of science and art, and the full or abridged patent specifications of the principal foreign countries and British Dominions.

31. *Patent Office Publications.*—These may be consulted daily at the Free Public Library of the Patent Office, and at the following places each of which is supplied free of charge with a complete set:

Belfast—Central Public Library, Royal.
Birmingham—The Patents Library, Council House, Great Charles Street.
Bolton—Little Bolton Library.
Bradford, Yorkshire—Commercial Reference Library, 53, Market Street.
Bristol—Central Public Libraries, College Green.
Cardiff—Central Free Library, Reference Department.
Dundee—Public Library, Albert Institute.
Edinburgh—Royal Scottish Museum.
Glasgow—The Commercial Library, 21, Miller Street.
Halifax—Public Library, Akroyd Park.
Huddersfield—Public Library and Art Gallery.
Hull—Central Public Library, Albion Street.
Keighley—Public Library.
Leeds—Public Library.
Leicester—Central Municipal Library, Bishop Street.
Liverpool—Free Public Libraries, William Brown Street.
London—British Museum.
Science Museum Library, South Kensington.
Manchester—Patents Library, Reference Library, Piccadilly.
[1] Newcastle-on-Tyne—Public Library, New Bridge Street.
Nottingham—Public Library.
Preston—Harris Free Public Library and Museum.
[1] Rochdale—Free Public Library, Esplanade.
Sheffield—Free Public Library, Surrey Street.

A separate leaflet containing a full list of all places receiving complete or partial sets of these publications will be supplied free on application.

They are also on sale at the Patent Office, 25, Southampton Buildings, London, W. C. 2, and will be forwarded by post on receipt of the price paid and of the postage (if any is charged). *Sums amounting to 6d. or more should be remitted by Postal or Money Order payable to the Comptroller-General, Patent Office, and crossed "Bank of England."* Deposit accounts may be opened, the minimum amount receivable on deposit being £4, which may be drawn on so long as a sufficient balance remains in hand to cover an order for publications.

The following are the principal official publications relating to patents:

Patents and Designs Act, 1907 (as amended up to 12th July, 1932), 1s. 3d. by post 1s. 4d.

Patents Rules, 1932, 2s. 1d., by post 2s. 2d.

Specifications of British Patents, per copy, 1s. (inland), 1s. 1d. (abroad). See *Note below.*

Official Journal (Patents)—published weekly, price 1s. (inland), 1s. 2d. (abroad). Annual Subscription, £2 1s. (inland), £2 15s. (abroad). Quarterly Subscription in proportion.

A complete list of publications can be obtained free on application.

NOTE.—In ordering copies of specifications, the *year as well as the number* of the application must be stated in the case of specifications relating to applications made prior to 1916, but in the case of subsequent applications, the *serial number* of the specification must be quoted.

[1] Specifications for last 16 years only.

FRENCH EMBASSY IN THE UNITED STATES,
OFFICE OF THE COMMERCIAL ATTACHÉ,
MAISON FRANÇAISE,
610 Fifth Avenue, New York, January 15, 1936.

In your reply please quote Ref. 1817, No. 343.
Texte loi française sur brevets.

Mr. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
Congress of the United States, Washington, D. C.

DEAR SIR: Following my letter of November 20, I am pleased to send you herewith a copy of the French Patent Law (act of 1844). I am very sorry not to have been able to obtain an English translation for you, as I understand it has not yet been made.

I hope this will meet your requirements, and remain,

Very truly yours,

M. GABREAU-DOMBASLE,
Commercial Attaché.

BREVETS D'INVENTION

Loi du 5 Juillet 1844 Modifiée par la Loi du 7 Avril 1902

(Les modifications sont imprimées en caractères gras)

TITRE PREMIER. DISPOSITIONS GÉNÉRALES

ARTICLE PREMIER. Toute nouvelle découverte ou invention dans tous les genres d'industries, confère à son auteur, sous les conditions et pour le temps ci-après déterminés, le droit exclusif d'exploiter à son profit ladite découverte ou invention.

Ce droit est constaté par des titres délivrés par le gouvernement, sous le nom de brevets d'invention.

ART. 2. Seront considérées comme inventions ou découvertes nouvelles:

L'invention de nouveaux produits industriels;

L'invention de nouveaux moyens ou l'application nouvelle de moyens connus, pour l'obtention d'un résultat ou d'un produit industriel.

ART. 3. Ne sont pas susceptibles d'être brevetés:

1° Les compositions pharmaceutiques ou remèdes de toute espèce, lesdits objets demeurant soumis aux lois et règlements spéciaux sur la matière, et notamment au décret du 18 août 1810, relatifs aux remèdes secrets;

2° Les plans et combinaisons de crédit ou de finances.

ART. 4. La durée des brevets sera de cinq, dix ou quinze années.

Chaque brevet donnera lieu au payement d'une taxe, qui est fixée ainsi qu'il suit:

300 Fr pour chacune des 2è, 3è, 4è, 5è annuités. 400 Fr pour chacune des 6è, 7è, 8è, 9è, 10è annuités. 500 Fr pour chacune des 11è, 12è, 13è, 14è, 15è annuités. (décret du 6 Décembre 1926).

TITRE II. DES FORMALITÉS RELATIVES À LA DÉLIVRANCE DES BREVETS

SECTION PREMIÈRE. DES DEMANDES DE BREVETS

ART. 5. Quiconque voudra prendre un brevet d'invention devra déposer, sous cachet, au secrétariat de la préfecture, dans le département où il est domicilié, ou dans tout autre département, en y élisant domicile:

1° Sa demande au ministre de l'agriculture et du commerce;

2° Une description de la découverte, invention ou application faisant l'objet du brevet demandé;

3° Les dessins ou échantillons qui seraient nécessaires pour l'intelligence de la description;

Et 4° un bordereau des pièces déposées.

ART. 6. La demande sera limitée à un seul objet principal, avec les objets de détail qui le constituent, et les applications qui auront été indiquées.

Elle mentionnera la durée que les demandeurs entendent assigner à leur brevet dans les limites fixées par l'article 4, et ne contiendra ni restrictions, ni conditions, ni réserves.

Digitized by Google

Elle indiquera un titre renfermant la désignation sommaire et précise de l'objet de l'invention.

La description ne pourra être écrite en langue étrangère. Elle devra être sans altérations ni surcharges. Les mots rayés comme nuls seront comptés et constatés, les pages et les renvois paraphés. Elle ne devra contenir aucune dénomination de poids ou de mesures autre que celles qui sont portées au tableau annexé à la loi du 4 juillet 1837.

Les dessins seront tracés à l'encre et d'après une échelle métrique.

Un duplicata de la description et des dessins sera joint à la demande.

Toutes les pieces seront signées par le demandeur ou par un mandataire, dont le pouvoir restera annexé à la demande.

ART. 7. Aucun dépôt ne sera recu que sur la production d'un récépissé constatant le versement d'une somme de 350f francs à valoir sur le montant de la taxe du brevet (décret du 27-12-1927).

Un procès-verbal, dressé sans frais par le secrétaire général de la préfecture, sur un registre à ce destiné, et signé par le demandeur, constatera chaque dépôt, en énoçant le jour et l'heure de la remise des pièces.

Une expédition dudit procès-verbal sera remise au déposant, moyennant le remboursement des frais de timbre.

ART. 8. La durée du brevet courra du jour du dépôt prescrit par l'article 5.

SECTION II. DE LA DÉLIVRANCE DES BREVETS

ART. 9. Aussitôt après l'enregistrement des demandes, et dans les cinq jours de la date du dépôt, les prefets, transmettront les pièces, sous le cachet de l'inventeur, au ministre de l'agriculture et du commerce, en y joignant une copie certifiée du procès-verbal de dépôt, le récépissé constatant le versement de la taxe, et, s'il y a lieu, le pouvoir mentionné dans l'article 6.

ART. 10. A l'arrivée des pièces au ministère de l'agriculture et du commerce, il sera procédé à l'ouverture, à l'enregistrement des demandes et à l'expédition des brevets, dans l'ordre de la réception desdites demandes.

ART. 11. **Les brevets dont la demande aura été régulièrement formée seront délivrés sans examen préalable, aux risques et périls des demandeurs et sans garantie, soit de la réalité, de la nouveauté ou du mérite de l'invention, soit de la fidélité ou de l'exactitude de la description.**

Un arrêté du ministre, constatant la régularité de la demande, sera délivré au demandeur et constituera le brevet d'invention.

A cet arrêté sera joint un exemplaire imprimé de la description et des dessins mentionnés dans l'article 24, après que la conformité avec l'expédition originale en aura été reconnue et établie au besoin.

La première expédition des brevets sera délivrée sans frais.

Toute expédition ultérieure, demandée par le breveté ou ses ayants cause, donnera lieu au payement d'une taxe de 30 francs.

Les frais de dessin, s'il y a lieu, demeureront à la charge de l'impétrant.

La délivrance n'aura lieu qu'un an après le jour de dépôt de la demande, si ladite demande renferme une réquisition expresse à cet effet.

Le bénéfice de la disposition qui précède ne pourra être réclamé par ceux qui auraient déjà profité des délais de priorité accordés par des traités de réciprocité, notamment par l'article 4 de la Convention internationale pour la protection de la propriété industrielle, du 20 mars 1883.

ART. 12. Toute demande dans laquelle n'auraient pas été observées les formalités prescrites par les numéros 2 et 3 de l'article 5, et par l'article 6, sera rejetée.

La moitié de la somme versée restera acquise au Trésor, mais il sera tenu compte de la totalité de cette somme au demandeur s'il reproduit sa demande dans un délai de trois mois, à compter de la date de la notification du rejet de sa requête.

ART. 13. Lorsque, par application de l'article 3, il n'y aura pas lieu de délivrer un brevet, la taxe sera restituée.

ART. 14. Une ordonnance royale, insérée au *Bulletin des Lois*, proclamera, tous les trois mois, les brevets délivrés.

ART. 15. La durée des brevets ne pourra être prolongée que par une loi.

Digitized by Google

SECTION III—DES CERTIFICATS D'ADDITION

ART. 16. Le breveté ou les ayants droit au brevet, auront, pendant toute la durée du brevet, le droit d'apporter à l'invention des changements, perfectionnements ou additions, en remplissant, pour le dépôt de la demande, les formalités déterminées par les articles 5, 6 et 7.

Ces changements, perfectionnements ou additions seront constatés par des certificats délivrés dans la même forme que le brevet principal, et qui produiront, à partir des dates respectives des demandes et de leur expédition, les mêmes effets que ledit brevet principal, avec lequel il prendront fin.

Chaque demande de certificat d'addition donnera lieu au payement d'une taxe de 35 francs.

Les certificats d'addition pris par un des ayants droit profiteront à tous les autres.

ART. 17. Tout breveté qui, pour un changement, perfectionnement ou addition, voudra prendre un brevet principal de cinq, dix ou quinze années, au lieu d'un certificat d'addition expirant avec le brevet primitif, devra remplir les formalités prescrites par les articles 5, 6 et 7, et acquitter la taxe mentionnée dans l'article 4.

ART. 18. Nul autre que le breveté ou ses ayants droit, agissant comme il est dit ci-dessus, ne pourra, pendant une année, prendre la lablement un brevet pour un changement, perfectionnement ou addition à l'invention qui fait l'objet du brevet primitif.

Neanmoins, toute personne qui voudra prendre un brevet pour changement, addition ou perfectionnement à une découverte déjà brevetée, pourra, dans le cours de ladite année, former une demande quit sera transmise, et restera déposée sous cachet, au ministère de l'agriculture et du commerce.

L'année expirée le cachet sera brisé et le brevet délivré.

Toutefois, le breveté principal aura la préférence pour les changements, perfectionnements et additions pour lesquels il aurait lui-même, pendant l'année, demandé un certificat d'addition ou un brevet.

ART. 19. Quiconque auras pris un brevet pour une découverte, invention ou application se rattachant à l'objet d'un autre brevet, n'aura aucun droit d'exploiter l'invention déjà brevetée, et réciproquement le titulaire du brevet primitif ne pourra exploiter l'invention objet du nouveau brevet.

SECTION IV. DE LA TRANSMISSION ET DE LA CESSION DES BREVETS

ART. 20. Tout breveté pourra céder la totalité ou partie de la propriété de son brevet.

La cession totale ou partielle d'un brevet, soit à titre gratuit, soit à titre onéreux, ne pourra être faite que par acte notarié et après le payment de la totalité de la taxe déterminée par l'article 4.

Aucune cession ne sera valable, à l'égard des tiers, qu'après avoir été enregistrée au secrétariat de la préfecture du département dans lequel l'acte aura été passé.

L'enregistrement des cessions et de tous autres actes emportant mutation, sera fait sur la production et le dépôt d'un extrait authentique de l'acte de cession on de mutation.

Une expédition de chaque procès-verbal d'enristrement accompagnée de l'extrait de l'acte ci-dessus mentionné, sera transmise par les préfets au ministre de l'agriculture et du commerce, dans les cinq jours de la date du procès-verbal.

ART. 21. Il sera tenu, au ministère de l'agriculture et du commerce, un registre sur lequel seront inscrites les mutations intervenues sur chaque brevet, et tous les trois mois, une ordonnance royale proclamera, dans la forme déterminée par l'article 14, les mutations enregistrées pendant le trimestre expiré.

ART. 22. Les cessionnaires d'un brevet, et ceux qui auront acquis d'uu breveté ou de ses ayants droit la faculté d'exploiter la découverte ou l'inveution, profiteront, de plein droit, des certificats d'addition qui seront ultérieurement délivrés au breveté ou à ses ayants droit. Réclproquement, le breveté ou ses ayants droit profiteront des certificats d'addition qui seront ultérieurement délivrés aux cessionnaires.

Tous ceux qui auront droit de profiter des certificats d'addition pourront en lever une expédition au ministère de l'agriculture et du commerce, moyennant un droit de vingt francs.

Digitized by Google

SECTION V. DE LA COMMUNICATION ET DE LA PUBLICATION DES DESCRIPTIONS ET DESSINS DE BREVETS

ART. 23. Les descriptions, dessins, échantillons et modèles des brevets délivrés, resteront, jusqu'à l'expiration des brevets, déposés au ministère de l'agriculture et du commerce, où ils seront communiqués, sans frais, à toute réquisition.

Toute personne pourra obtenir, à ses frais, copie desdites descriptions et dessins, suivant les formes qui seront déterminées dans le règlement rendu en exécution de l'article 50.

ART. 24. **Les descriptions et dessins de tous les brevets d'invention et certificats d'addition seront publiés *in extenso*, par fascicules séparés, dans leur ordre d'enregistrement.**

Cette publication, relativement aux descriptions et dessins des brevets pour la délivrance desquels aura été requis le délai d'un an prévu par l'article 11, n'aura lieu qu'après l'expiration de ce délai.

Il sera, en outre, publié un catalogue des brevets d'invention délivrés.

Un arrêté du ministre du commerce et de l'industrie déterminera: 1° les conditions de forme, dimensions et rédaction que devront présenter les descriptions et dessins, ainsi que les prix de vente des fascicules imprimés et les conditions de publication du catalogue; 2° les conditions à remplir par ceux qui, ayant déposé une demande de brevet en France et désirant déposer à l'étranger des demandes analogues avant la délivrance du brevet français, voudront obtenir une copie officielle des documents afférents à leur demande en France. Toute expedition de cette nature donnera lieu au payment d'une taxe de 25 francs; les frais de dessin, s'il y a lieu, seront à la charge de l'impétrant.

Seront publiés, conformément aux prescriptions du présent article, les descriptions et les dessins des brevets d'invention et certificats d'addition qui auront été demandés depuis le 1^er^ janvier 1902.

ART. 25. Le recueil des descriptions et dessins et le catalogue publiés en exécution de l'article précédent seront déposés au ministère de l'agriculture et du commerce, et au secrétariat de la préfecture de chaque département, où ils pourront être consultés sans frais.

ART. 26. A l'expiration des brevets, les originaux des descriptions et dessins seront déposés au Conservatoire royal des arts et métiers.

TITRE III. DES DROITS DES ÉTRANGERS

ART. 27. Les étrangers pourront obtenir en France des brevets d'invention.

ART. 28. Les formalités et conditions déterminées par la présente loi seront applicables aux brevets demandés ou délivrés en exécution de l'article précédent.

ART. 29. L'auteur d'une invention ou découverte déjà brevetée à l'étranger pourra obtenir un brevet en France; mais la durée de ce brevet ne pourra excéder celle des brevets antérieurement pris à l'étranger.

TITRE IV. DES NULLITÉS ET DÉCHÉANCES, ET DES ACTIONS Y RELATIVES.

SECTION PREMIÈRE. DES NULLITÉS ET DÉCHÉANCES

ART. 30. Seront nuls, et de nul effet, les brevets délivrés dans les cas suivants, savoir:

1° Si la découverte, invention ou application n'est par nouvelle;

2° Si la découverte, invention ou application n'est pas, aux termes de l'article 3, susceptibles d'être brevetée;

3° Si les brevets portent sur des principes, méthodes, systèmes, découvertes et conceptions théoriques ou purement scientifiques, dont on n'a pas indiqué les applications industrielles;

4° Si la découverte, invention ou application est reconnue contraire à l'ordre ou à la sûreté publique, aux bonnes mœurs ou aux lois du royaume, sans préjudice, dans ce cas et dans celui du paragraphe précédent, des peines qui pourraient être encourues pour la fabrication ou le débit d'objets prohibés;

5° Si le titre sous lequel le brevet a été demandé indique frauduleusement un objet autre que le véritable objet de l'invention;

6° Si la description jointe au brevet n'est pas suffisante pour l'exécution de l'invention, ou si elle n'indique pas, d'une manière complète et loyale, les véritables moyens de l'inventeur;

7° Si la brevet a été obtenu contrairement aux dispositions de l'article 18.

Digitized by Google

Seront également nuls, et de nul effet, les certificats comprenant des changements, perfectionnements ou additions qui ne se rattacheraient pas au brevet principal.

ART 31. Ne sera pas réputée nouvelle toute découverte, invention ou application qui, en France ou à l'étranger, et antérieurement à la date du dépôt de la demande, aura reçu une publicité suffisante pour pouvoir être exécutée.

ART. 32. **Sera déchu de tous ses droits:**

1° Le breveté qui n'aura pas acquitté son annuité, avant le commencement de chacune des années de la durée de son brevet.

L'intéressé aura toutefois un délai de trois mois au plus pour effectuer valablement le payement de son annuité, mais il devra verser en outre une taxe supplémentaire de 5 francs, s'il effectue le payement dans le premier mois; de 10 francs, s'il effectue le payement dans le second mois, et de 15 francs, s'il effectue le payement dans le traisième mois.

Cette taxe supplémentaire devra être acquittée en même temps que l'annuité en retard;

2° Le breveté qui n'aura pas mis en exploitation sa découverte ou invention en France dans le délai de deux ans, à dater du jour de la signature du brevet, ou qui aura cessé de l'exploiter pendant deux années consécutives, à moins que, dans l'un ou l'autre cas, il ne justifie des causes de son inaction;

3° Le Breveté qui aura introduit en France des objets fabriqués en pays étranger et semblables à ceux qui sont garantis par son brevet.

Néanmoins, le ministre du commerce et de l'industrie pourra autoriser l'introduction;

1° Des modèles de machines;

2° Des objets fabriqués à l'étranger, destinés à des expositions publiques ou à des essais faits avec l'assentiment du gouvernement.

ART. 33. Quiconque, dans des enseignes, annonces, prospectus, affiches, marques ou estampilles, prendra la qualité de breveté sans posséder un brevet délivré conformément aux lois, ou après l'expiration d'un brevet antérieur; ou qui, étant breveté, mentionnera sa qualité de breveté ou son brevet sans y ajouter ces mots: sans garantie du gouvernement, sera puni d'une amende de cinquante à mille francs.

En cas de récidive, l'amende pourra être porté au double.

SECTION II. DES ACTIONS EN NULLITÉ ET EN DÉCHÉANCE

ART. 34. L'action en nullité et l'action en déchéance pourront être exercées par toute personne y ayant intérêt.

Ces actions, ainsi que toutes contestations relatives à la propriété des brevets, seront portées devant les tribunaux civils de première instance.

ART. 35. Si la demande est dirigée en même temps contre le titulaire du brevet et contre un ou plusieurs cessionnaires partiels, elle sera porté devant le tribunal du domicile du titulaire du brevet.

ART. 36. L'affaire sera instruite et jugée dans la forme prescrite pour les matières sommaries par les articles 405 et suivants du Code de procédure civile. Elle sera communiquée au procureur du roi.

ART. 37. Dans toute instance tendant à faire prononcer la nullité ou la déchéance d'un brevet, le ministère public pourra se rendre partie intervenante et prendre des réquisitions pour faire prononcer la nullité ou la déchéance absolue du brevet.

Il pourra même se pourvoir directement par action principale pour faire prononcer la nullité, dans les cas prévus aux n°° 2, 4 et 5 de l'article 30.

ART. 38. Dans les cas prévus par l'article 37, tous les ayants droit au brevet dont les titres auront été enregistrés au ministère de l'agriculture et du commerce, conformément à l'article 21, devront être mis en cause.

ART. 39. Lorsque la nullité ou la déchéance absolue d'un brevet aura été prononcée par jugement ou arrêt ayant acquis force de chose jugée, il en sera donné avis au ministre de l'agriculture et du commerce, et la nullité ou la déchéance sera publiée dans la forme déterminée par l'article 14 pour la proclamation des brevets.

TITRE V. DE LA CONTREFAÇON, DES POURSUITES ET DES PEINES

ART. 40. Toute atteinte portée aux droits du breveté, soit par la fabrication de produits, soit par l'emploi de moyens faisant l'objet de son brevet, constitue le délit de contrefaçon.

Digitized by Google

Ce délit sera puni d'une amende de cent à deux mille francs.

ART. 41. Ceux qui auront sciemment recélé, vendu ou exposé en vente, ou introduit sur le territoire français, un ou plusieurs objets contrefaits, seront punis des mêmes peines que les contrefacteurs.

ART. 42. Les peines établies par la présente loi ne pourront être cumulées.

La peine la plus forte sera seule prononcée pour tous les faits antérieurs au premier acte de poursuite.

ART. 43. Dans le cas de récidive, il sera prononcé, outre l'amende portée aux articles 40 et 41, un emprisonnement d'un mois à six mois.

Il y a récidive lorsqu'il a été rendu contre le prévenu, dans les cinq années antérieures, une première condamnation pour un des délits prévus par la présente loi.

Un emprisonnement d'un mois à six mois pourra aussi être prononcé, si le contrefacteur est un ouvrier ou un employé ayant travaillé dans les ateliers ou dans l'etablissement du breveté, ou si le contrefacteur, s'étant associé avec un ouvrier ou un employé du breveté, a eu connaissance, par ce dernier, des procédés décrits au brevet.

Dans ce dernier cas, l'ouvrier ou l'employé pourra être poursuivi comme complice.

ART. 44. L'article 463 du Code pénal pourra être appliqué aux délits prévus par les dispositions qui précèdent.

ART. 45. L'action correctionnelle, pour l'application des peines cidessus, ne pourra être exercée par le ministère public que sur la plainte de la partie lésée.

ART. 46. Le tribunal correctionnel, saisi d'une action pour délit de contrefaçon, statuera sur les exceptions qui seraient tirées par la prévenu, soit de la nullité ou de la déchéance du brevet, soit des questions relatives à la propriété dudit brevet.

ART. 47. Les propriétaires de brevets pourront, en vertu d'une ordonnance du président du tribunal de première instance, faire procéder, par tous huissiers, à la désignation et description détaillées, avec ou sans saisie, des objets prétendus contrefaits.

L'ordonnance sera rendue sur simple requête, et sur la représentation du brevet; elle contiendra, s'il y a lieu, la nomination d'un expert pour aider l'huissier dans sa description.

Lorsqu'il y aura lieu à la saisie, ladite ordonnance pourra imposer au requérant un cautionnement qu'il sera tenu de consigner avant d'y faire procéder.

Le cautionnement sera toujours imposé à l'étranger breveté qui requerra la saisie.

Il sera laissé copie au détenteur des objets décrits ou saisis, tant de l'ordonnance que de l'acte constatant de dépôt du cautionnement, le cas échéant; le tout, à peine de nullité et dommages-intérêts contre l'huissier.

ART. 48. A défaut, par le requérant, de s'être pourvu, soit par la voie civile, soit par la voie correctionnelle, dans le délai de huitaine, outre un jour par trois myriamètres de distance entre le lieu où se trouvent les objets saisis ou décrits, et le domicile du contrefacteur, recéleur, introducteur ou débitant, la saisie ou description sera nulle de plein droit, sans préjudice des dommages-intérêts qui pourront être réclamés, s'il y a lieu, dans la forme prescrite par l'article 36.

ART. 49. La confiscation des objets reconnus rontrefaits, et, le cas échéant, celle des instruments on ustensiles destinés spécialemen à leur fabrication, seront, même en cas d'acquittement, prononcée contre le contrefacteur, le recéleur l'introducteur ou le débitant.

Les objets confisqués seront remis au propriétaire du brevet, sans préjudice de plus amples dommages-intérêts et de l'affiche du jugement, s'il y a lieu.

TITRE VI. DISPOSITIONS PARTICULIÈRES ET TRANSITOIRES

ART. 50. Des ordonnances royales, portant règlement d'administration publique, arrêteront les dispositions nécessaires pour l'exécution de la présente loi, qui n'aura effet que trois mois après sa promulgation.

ART. 51. Des ordonnances rendues dans la même forme pourront régler l'application de la présente loi dans les colonies, avec les modifications qui seront jugées nécessaires.

ART. 52. Seront abrogés, à compter du jour où la présente loi sera devenue exécutoire, les lois des 7 janvier et 25 mai 1791, celle du 20 septembre 1792, l'arrêté du 17 vendémiaire an VII, l'arrêté du 5 vendémiaire an IX, les décrets des 25 novembre 1806 et 25 janvier 1807, et toutes les dispositions antérieures à

Digitized by Google

la présente loi relatives aux brevets d'invention, d'importation et de perfectionnement.

ART. 53. Les brevets d'invention, d'importation et de perfectionnement actuellement en exercise, délivrés conformément aux lois antérieures à la présente, ou prorogés par ordonnance royale, conserveront leur effet pendant tout le temps qui aura été assigné à leur durée.

ART. 54. Les procédures commencées avant la promulgation de la présente loi seront mises à fin conformément aux lois antérieures.

Toute action, soit en contrefaçon, soit en nullité ou déchéance de brevet, non encore intentée, sera suivie conformément aux dispositions de la présente loi, alors même qui'll s'agirait de brevets délivrés antérieurement.

THE SOVIET PATENT LAW

Full text of the decree of April 9, 1931, concerning inventions and technical improvements

DECREE ON INVENTIONS AND TECHNICAL IMPROVEMENTS

During the period of reconstruction, the mastering of technique and its further development are of decisive importance for the success of socialist construction. Socialist industrialisation affords an enormous scope for the development of the creative ability of the working masses in the field of technique, a scope impossible under a capitalist regime. Mass inventions constitute one of the most important forms of immediate participation of the workers in socialist rationalisation of production and in the introduction of new technique into the national economy of the U. S. S. R.

However, so far the attention paid to inventions and especially to workers' inventions has been altogether inadequate, owing to bureaucratic distortions, inertia, red tape, and in many instances downright sabotage.

In spite of the enormous importance of mass inventions to the cause of the struggle for the speed-up of industrialisation, the exploitation of inventions and the exchange of technical experience are most unsatisfactory. The work of the bodies set up to assist inventions is inadequate. The creative initiative of the workers-inventors is not sufficiently encouraged.

It is necessary within the shortest possible period of time to bring about a decisive change in this field. The organisation and utilisation of mass inventions must become the most important concern of the economic bodies, of the trade unions, and other social organisations.

The patent legislation which has existed until now and has protected the interest of the inventor by granting him an exclusive right to his invention no longer satisfies the aspirations of the foremost inventors—the class-conscious builders of socialist society.

It has become necessary to create other forms of interrelation between the worker-inventor and the socialist state, which will be in keeping with the role of the worker-inventor as an immediate participant in socialist construction. Along with the guarantees of early and full exploitation of the inventions, it is necessary to create conditions which will further mass inventions and will guarantee a proper remuneration (on a fixed scale) to the worker-inventor, securing him a number of exemptions and privileges (housing privileges; preference in entering schools; the preferential right to be appointed as a scientific worker in enterprises and institutions devoted to scientific experimentation and research; the utilisation of the best inventors for exclusive work on inventions; extra vacations; the right to a personal pension, etc.).

Moved by these considerations the Central Executive Committee and the Council of People's Commissars of the Union of Socialist Soviet Republics decree:

1. To confirm the regulations concerning inventions and technical improvements and to let them become operative one month after their promulgation.

2. To charge the Council of Labour and Defence within the period of one month:

(*a*) to form a Committee to be attached to it dealing with inventions and to confirm a set of regulations governing it;

Digitized by Google

(*b*) to issue a decree governing the amount and the procedure in the payment of fees with respect to patent cases (Sec. 7 of the regulations).

3. Inventors who hold patents covering inventions under former laws may enjoy all or some of the privileges granted under the new regulations if these inventions are used by the State bodies and organizations of the socialised sector, provided an order to that effect is issued by the Inventions Committee of the Council of Labour and Defence or by the Committees of the governments of the Union, in each individual case.

4. The following procedure governs applications filed prior to the time when the regulations concerning inventions and technical improvements went into effect, and on which patents have not yet been granted:

(*a*) applications not accompanied by application fees will be regarded as applications for the issuance of author's certificates unless the applicant within a month and a half of the date of publication of the regulations expresses his desire to obtain a patent and pays the application fee;

(*b*) applications on which fees have been paid are regarded as applications for the issuance of patents, unless the applicant within a month and a half of the date of publication of the regulations expresses his desire to obtain an author's certificate. If he makes such a declaration the fee is returned to him.

As regards applications filed after the publication of the regulations but before they have gone into effect, the applicant has the option of stating whether he wishes to obtain an author's certificate or a patent.

5. The Committee of Inventions of the Council of Labour and Defence determines in what cases and in what manner inventors who obtained patents prior to the time when the regulations concerning inventions and technical improvements went into effect may exchange them for author's certificates.

The Committee also settles all other questions connected with the going into effect of these regulations.

6. To request the Central Executive Committees of the Union republics to incorporate within one month measures of social defence in their respective criminal codes to provide against the violation of any of the regulations concerning inventions and technical improvements.

In this connection and on the basis of Part 2, Sec. 3, of the fundamental principles of the criminal laws of the U. S. S. R. and of the allied republics (Statutes of the U. S. S. R., 1927, No. 12, Sec. 122), the Central Executive Committees of the Union republics are requested to provide penalties as follows:

(*a*) for applying without proper permission for a patent covering any invention made within the U. S. S. R. or any invention made abroad by a Soviet citizen sent on a mission by the State; compulsory labour for a period not exceeding one year or a fine not exceeding 1,000 rubles;

(*b*) for taking abroad without proper permission any invention mentioned in Clause a — deprivation of freedom for a period up to ten years with confiscation of all or part of the property of the delinquent.

The application for a patent for, or the taking abroad of, any invention or improvement relating to the defence of the State or any other invention or improvement recognized as secret is punishable under Sec. 6 of the regulations concerning State offences (Statutes of the U. S. S. R., 1927, No. 12, Sec. 123).

7. To charge the Council of People's Commissars of the Union of Socialist Soviet Republics and the Councils of People's Commissars of the Union republics to confirm within two months' time the changes in the laws of the U. S. S. R. and of the Union republics necessitated by these regulations concerning inventions and technical improvements.

8. To charge the People's Commissariat of Workers' and Peasants' Inspection of the U. S. S. R. within two months' time to issue regulations governing the procedure in registering, selecting, and encouraging useful suggestions which do not fall within the scope of the regulations concerning inventions and technical improvements in all spheres of national economy, of social-cultural construction, and national defence.

M. KALININ,
President of the Central Executive Committee of the U. S. S. R.
V. MOLOTOV (SKRYABIN),
President of the Council of People's Commissars of the U. S. S. R.
A. YENUKIDZE,
Secretary of the Central Executive Committee of the U. S. S. R.

THE SOVIET PATENT LAWS

PART I. GENERAL PRINCIPLES

1. The present regulations are intended to cover—
(*a*) New inventions.
(*b*) All other technical improvements.
2. The author of a new invention may demand either—
(*a*) that his authorship alone be recognised;
(*b*) that he be granted also exclusive rights to his invention.
In the former case an author's certificate covering the invention is issued; in the latter case a patent is granted.
The application itself must state whether the inventor wishes to obtain an author's certificate or a patent.
3. Author's certificates and patents are granted only for new inventions which can be used in production.
Author's certificates and patents are granted for new methods in the preparation of medicinal, alimentary, gustatory, or other substances obtained by chemical means, but not for the substances themselves.
4. The following rules apply where an author's certificate is issued for an invention:
(*a*) the right to make use of the invention within the U. S. S. R. belongs to the State;
(*b*) cooperatives and other organisations of the socialised sector may use those inventions which fall within their sphere of activity on the same basis as State organs;
(*c*) the inventor himself (or his heir), if he is a handicraftsman or a private businessman, may utilise the invention in his business;
(*d*) all other private persons and cooperatives not forming part of the cooperative system may use the invention with the permission of the State branch industrial board competent to deal with the invention in question and on terms prescribed by this board;
(*e*) if the invention is recognised as useful for the national economy of the Union of Socialist Soviet Republics, the inventor is entitled to receive a remuneration from the State or from the corresponding organisation having jurisdiction;
(*f*) if an invention, not recognised as useful for the national economy, is applied in some enterprise, the inventor or his heir is entitled to receive a remuneration from that enterprise. The amount of the remuneration in that case is fixed by agreement and in the absence of an agreement is fixed by the court;
(*g*) a worker-inventor is entitled to the privileges stated in the present regulations (Sections 93–104).
5. When an exclusive right (patent) is claimed for an invention the following rules apply:
(*a*) no one may make use of the invention without the consent of the patent-holder. The patent-holder himself may exploit his invention with due observance of the laws regulating the conduct of private enterprise; foreigners and foreign juridical persons may work inventions with due observance of the laws governing the procedure in admitting foreign capital to engage in economic activities within the U. S. S. R.;
(*b*) patents are issued for a period of 15 years, which period is calculated from the date of the final decision to grant the patent, but the rights of the patent-holder are protected as of the date from which the priority of his claim is calculated (Sec. 43);
(*c*) the person to whom a patent belongs (the patent-holder) may grant to another person (the licensee) permission (a license) to exploit the invention either fully or in part;
(*d*) institutions, enterprises, and persons who, prior to the application for a patent covering an invention, have applied the invention in question within the U. S. S. R. independently of the inventor, or have made all the preparations necessary to do so, retain the right to the further use of the invention (right of prior user);
(*e*) a patent-holder must within 3 years of the date of the issuance of the patent either personally or through a licensee make practical use of his invention within the U. S. S. R. on an industrial scale. The importation of the object of the invention from abroad read-made or in separate parts to be

Digitized by Google

assembled within the U. S. S. R. is not considered putting the invention to practical use. If the invention has not been put to practical use within the period stated the Inventions Committee of the Council of Labour and Defence, on the application of the body, organisation, or person interested, issues a compulsory license for putting the invention to practical use and fixes the amount of remuneration to be paid to the patent-holder;

(*f*) if the invention is of substantial importance to the State and no agreement is reached with the patent-holder, the Inventions Committee of the Council of Labour and Defence is empowered to enter a decree for the compulsory alienation of the patent or for the issuance of a license (permission to use the invention) to the State body concerned. The amount of remuneration, which in such case is to be paid to the patent-holder, is fixed by the Inventions Committee;

(*g*) fees are charged in connection with the patenting of inventions in accordance with the present regulations (Sec. 67);

(*h*) an inventor to whom a patent is issued does not enjoy the privileges which under the present regulations are granted to an inventor who holds an author's certificate;

(*i*) an inventor who owns a patent may, before the expiration of the period during which the patent is valid, exchange it for an author's certificate. The conditions and procedure in effecting such an exchange are prescribed by the Inventions Committee of the Council of Labour and Defence;

(*j*) an inventor who holds an author's certificate for some of his inventions and patents for others may enjoy the privileges incident to author's certificates if he releases the patents in favour of the State or exchanges them for author's certificates.

6. No patents are granted, but author's certificates are issued in the following cases:

(*a*) if the invention was made in connection with the work of the inventor in scientific research institutes, construction bureaus, test shops, laboratories, and similar bodies of the socialised sector for the exploration, preparation, and testing of the inventions;

(*b*) if the invention was made at the express instance of a State body or organisation of the socialised sector;

(*c*) if the inventor received material assistance from the State or an organisation of the socialised sector to work out the invention.

7. The right to obtain an author's certificate or a patent as well as an author's certificate or patent already granted may be inherited.

The right to obtain a patent as well as a patent that has already been granted may be assigned by the inventor or his heirs to any person and may pass from person to person both by agreement and by inheritance.

The author's certificate or patent, even if not granted to the inventor personally, must state the name of the inventor.

Note.—Assignments of and licenses under patents (Sec. 5, Clause *c*) must be registered in the Originality Bureau of the Inventions Committee of the Council of Labour and Defence. Otherwise such agreements are considered null and void.

8. An agreement between an inventor and a private person granting rights to future inventions is considered null and void.

9. Any one who knowingly makes a false statement in his application as to who is the author of the invention may be criminally prosecuted.

Likewise any one who unlawfully makes use of an invention the exploitation of which is reserved to the State may be criminally prosecuted.

Any one who infringes the exclusive right of a patent-holder must compensate the latter for any losses incurred.

10. Persons who have suggested technical improvements which are not original inventions to a State body or organisation of the socialised sector, in case such suggestions are accepted, receive a premium according to a special scale (Sec. 90). They also enjoy the privileges stated in Sec. 105.

They may obtain certificates attesting that the technical improvements have been accepted at their suggestion. These certificates are issued by the bodies and organisations making use of the suggestions.

11. Foreigners enjoy the rights granted under the present regulations on the same basis as citizens of the Union of Socialist Soviet Republics.

The Inventions Committee of the Council of Labour and Defence, in agreement with the People's Commissariat for Foreign Affairs, is empowered to

Digitized by Google

lay down special restrictions for citizens and juridical persons of those states which do not grant reciprocity to citizens and juridical persons of the U. S. N. R.

12. Instructions on how to apply the present regulations are issued by the Inventions Committee of the Council of Labour and Defence.

PART II. PUBLIC BODIES DEALING WITH INVENTIONS

13. The Inventions Committee of the Council of Labour and Defence is set up for the purpose of assisting inventors, of exercising general control over the bodies dealing with inventions, and of supervising their activities.

The following bodies are attached to it: the Originality Bureau, which determines whether an invention is original and issues author's certificates and patents covering the same; and the Council for the Review of Appeals, which reviews appeals from the decisions of the Originality Bureau.

The regulations governing the Inventions Committee are confined by the Council of Labour and Defence.

Inventions Committees may also be formed, attached to the Council of People's Commissars of the Economic Councils (conferences) of the Union republics in conformity with the laws of these republics based on the regulations governing the Inventions Committee of the Council of Labour and Defence.

14. In order to encourage inventive genius and for the purpose of organising the best and most expeditious exploitation of inventions and technical improvements, boards dealing with inventions are set up, attached to the People's Commissariats of the U. S. S. R. and the Union republics, to the combines of branches of industry and administration offices, the co-operative centres, individual manufacturing and transportation enterprises employing more than 500 workers (including the soviet farms and the Machine-Tractor Stations), big constructions and, if necessary, other enterprises and organisations.

Standard regulations to govern such boards are drawn up by the respective People's Commissariats and co-operative centres in agreement with the All-Union Central Council of Trade Unions and are confirmed by the Inventions Committee of the Council of Labour and Defence; as regards separate People's Commissariats of the Union republics, these regulations are drawn up and confirmed in accordance with the procedure prescribed by the laws of the Union republics.

15. The boards of inventions attached to the combines of branches of industry, to administration offices and to the co-operative centres (industrial branch boards of inventions)[1] perform the following functions:

(*a*) select the inventions that are useful to the national economy of the U. S. S. R.;

(*b*) work on and test useful inventions and assist in applying them;

(*c*) organise an exchange of inventions and useful technical improvements between the enterprises of any one branch of industry;

(*d*) organise the work of investigating new inventions and technical improvements, connecting them with the general plans of rationalisation and reconstruction of any one branch;

(*e*) study foreign patent and technical literature generally for the purpose of making use of the achievements of foreign technique in the branch of national economy in question;

(*f*) assist the authors of useful inventions and technical improvements;

(*g*) guide the lower bodies dealing with inventions.

16. The bodies dealing with inventions, attached to the separate enterprises, perform the following functions:

(*a*) lend assistance to the workers of their respective enterprise in the technical working out of inventions and improvements; also to other persons who offer suggestions within the scope of activity of the enterprise in question; assist in drawing up the applications, in obtaining author's certificates and in securing the privileges provided by law; at the request of the inventor, these bodies must take care of all details incident to establishing the rights of the inventor, up to and including the receipt of an author's certificate in his name;

(*b*) take such steps as are calculated to further inventions in enterprises; in particular they work out the problems to be solved by the inventors, connecting them with the general plans of rationalisation and reconstruction of the enterprise concerned; assist the inventors' collectives, etc.;

[1] Industrial branch boards of inventions—boards dealing with inventions applying to any particular branch of industry.—*Ed.*

Digitized by Google

(c) take steps to assure early and full utilisation of every useful invention and technical improvement;

(d) for the purpose of exchanging experiences, inform the higher body dealing with inventions of the inventions and technical improvements used at the enterprise in question.

17. Factory laboratories, experimental plants and departments, construction bureaus, etc., are set up for the scientific and technical testing of inventions and improvements and for the planned research for new inventions and improvements. The scientific research institutes must also be fully utilised for that purpose.

18. Boards of inventions connected with departments, branches of industry or enterprises, combine with the rationalisation organisations. The forms of their combination are prescribed by the People's Commissariat of Workers' and Peasants' Inspection of the U. S. S. R.

19. Boards of inventions—those connected with departments, branches of industry, and those attached to enterprises—must be equipped with the necessary skeleton staffs consisting of inventors, shock brigade workers, and public-spirited specialists.

PART III. THE SELECTION AND UTILISATION OF USEFUL INVENTIONS AND OF TECHNICAL IMPROVEMENTS

20. The selection of inventions useful to the national economy of the U. S. S. R. from among the inventions for which application for a patent has been made to the Originality Bureau of the Inventions Committee of the Council of Labour and Defence, is entrusted to industrial branch boards of inventions (Sec. 15). These boards, after obtaining from the Originality Bureau a copy of the application with the necessary exhibits, decide on the usefulness of the invention within one month.

The Originality Bureau, on making its experts' investigation into the originality of the invention, must draw the attention of the bodies appraising its usefulness to those inventions which, in the opinion of the Originality Bureau, may be of great importance to the national economy of the U. S. S. R.

Note.—An accurate list of the industrial branch boards which are entrusted with the duty of appraising the usefulness of inventions, including the procedure to follow in the appraisal and the drafting of the plans for the utilisation of inventions, where the invention affects the interest of several branches of industry, and where there are several combines in the same branch of industry, is drawn up pursuant to instructions of the Inventions Committee of the Council of Labour and Defence.

In those departments in which it is deemed inexpedient to form industrial branch boards of inventions, their place is to be taken by the boards of inventions attached to the People's Commissariats.

21. The above-mentioned decision concerning the usefulness of an invention is final in cases where the invention has already been tested or does not require testing; it is provisional in all other cases.

On the strength of the provisional recognition of an invention as useful, the industrial branch boards of inventions immediately, without awaiting any particulars as to its originality, take all the necessary steps to have it worked out and tested. The final appraisal of the usefulness of the invention is made after the results of the test have become known.

22. The board organises in experimental shops or departments or at one of its enterprises, etc., the working out of the invention, the production of a model or of a sample specimen, and the testing of the invention. Whenever necessary the working out and testing of the more complicated and more important inventions is entrusted to the corresponding scientific research institutes and is included in their plan of work.

Where an invention has already been tested by an enterprise or some other interested body, the industrial branch board of inventions explains the results obtained and decides whether the invention is to be subjected to additional testing or experimentation.

23. The inventor is entitled to be present at the examination (both preliminary and final) of the question of the usefulness of his invention. If he resides in the locality where the question of the usefulness of his invention is considered, he is notified in due time of the date when the question will be considered. If the presence of the inventor is necessary he is called in for consultation irrespective of his place of residence, the summons stating

Digitized by Google

that his presence is necessary; in such event all expenses connected with such summons must be refunded to him.

The representatives of the corresponding trade union organisations and of the leagues of inventors have the right to take part in the discussion of the usefulness of the invention.

24. The inventor is invited to attend the working out and testing of his invention.

The procedure in inviting the inventor and the time of such invitation are prescribed by the body which does the working out and testing of the invention.

An inventor who is a wage earner retains his employment throughout the entire period during which he has been taken away to take part in the working out and testing of his invention.

If the working out and testing is done in the same enterprise or institution where the inventor is a wage worker, he continues to receive from the enterprise wages in the amount of his average wage. If, on the other hand, the working out and testing of the enterprise is done at another institution or enterprise, and also in cases where the inventor is not working for wages, he receives a remuneration from the body that has organised the working out and the testing for the period that he is called upon to work out and test the invention. The amount of remuneration in this case is fixed in accordance with the instructions of the Inventions Committee of the Council of Labour and Defense, and the remuneration of persons working for wages is to be not lower than their average wage.

25. The industrial branch board communicates to the applicant its decision (both preliminary and final) on the question of the usefulness of the invention, stating its reasons therefor.

If a suggestion is not considered useful, owing to the fact that it is already being used in the branch of industry in question, independently of the applicant, the industrial branch board sends a copy of the decision also to the Originality Bureau.

26. The decision of the industrial branch board on the question of the usefulness of the invention may be appealed within a period of three months to the board of inventions attached to the corresponding People's Commissariat. Inventors' organisations may file appeals also after the expiration of the said period.

The decision of the central department board, where there is no industrial branch board of inventions (Sec. 20, note), may be appealed to the collegium of the people's commissariat concerned.

27. After an invention has been finally recognised as useful, the economic body concerned draws up a plan for the utilisation of the invention and an estimate of the funds necessary therefor and carries out that plan.

The inventor himself must be called in on drawing up the plans for the utilisation of those inventions which have been recognised as being of great importance (except secret inventions).

Every useful invention must be put to practical use in all enterprises of the branch of industry concerned in which it can be usefully applied.

The industrial branch board of inventions exercises control over the practical application of inventions.

28. Whenever necessary the manager of the industrial branch combine or administration office or the departmental board of inventions must take all the necessary measures in due time so that the work on which the turning out of the invention depends may be included in the production and financial plans of the enterprises belonging to other branches of industry and to other departments.

29. If an invention made at an enterprise or in a trust, or submitted to the enterprise or trust, may be usefully applied by it, such enterprise or trust ought to test and make use of such invention, without waiting for the industrial branch board to appraise it. However, it must notify the latter in such event.

30. If an invention for which a patent is applied for is recognised as useful the industrial branch board must enter into negotiations with the inventor or his lawful successor concerning the release of his rights to the invention. However, until the patent is granted no remuneration for the release of his rights to the invention may be paid in excess of the premium for an improvement (Sec. 90).

Where a test is required for the final appraisal of the usefulness of an invention for which a patent is claimed, and where it is necessary to work out the invention, such tests and working out take place after an agreement is reached with the applicant concerning the release of his rights to the invention.

Digitized by Google

If the invention according to the preliminary appraisal may be of substantial importance to the State and no agreement is reached with the applicant, the testing and working out are allowed with the permission of the Inventions Bureau of the Council of Labour and Defence.

Where the invention is of substantial importance to the State but no agreement has been reached concerning the release of his rights with the inventor or his lawful successors, the industrial branch board, through the departmental board of inventions, applies to the Inventions Bureau of the Council of Labour and Defence for a compulsory alienation of the patent or for the issuance of a compulsory license (Sec. 5, Clause f).

31. Suggestions of technical improvements which do not constitute new inventions are accepted by the boards of inventions attached to enterprises or trusts both from the workers of such enterprise or trust and from outsiders (from the latter only if the suggestion refers to the work of the enterprise or trust in question). These boards decide the question of the usefulness of all suggestions referring to the work of the enterprise or trust concerned and take steps toward applying the useful suggestions.

32. The boards of inventions attached to enterprises and trusts must inform the industrial branch boards of inventions of all the more important improvements which have been accepted for exploitation at the enterprise or trust.

These suggestions are governed by Sections 23, 25, 26, 27, and 28; where an additional test or work-out is required, also Sections 21, 22, and 24.

If a suggestion has been submitted directly to the industrial branch board, the latter either passes it on to the enterprise or trust concerned or decides its usefulness independently, makes arrangements, whenever necessary, for testing it and working it out, and takes steps to work it, following the same procedure as that prescribed for inventions, all dependent upon the importance of the suggestion.

33. In selecting useful inventions and improvements those of great importance for the national economy of the U. S. S. R. must be specially singled out.

34. The manager (management) of an industrial branch combine appoints a person responsible for applying each invention of great importance and informs the Inventions Bureau of the Council of Labour and Defence and the central departmental board of inventions.

35. If an invention recognised as useful for the national economy has not been put into practical use within half a year from the date it has been recognised as useful, the industrial branch board of inventions must notify the Inventions Bureau of the Council of Labour and Defence and the central departmental board of inventions. The information transmitted must state the reason why the invention is not being applied.

If an invention or improvement of great importance has not been put into practical use within half a year's time, a similar notification must be sent to the People's Commissariat of the Workers' and Peasants' Inspection of the U. S. S. R.

Note.—Where a preliminary appraisal of usefulness is made (Sec. 21) this half-yearly period begins to run from the date of the preliminary decision.

36. The manager (management) of the combine, trust, or enterprise is responsible for the rapid, complete, and proper exploitation of inventions and improvements in his branch of industry.

37. Expenses for furthering inventions, for working out and testing inventions and improvements, and for the remuneration of their authors are defrayed out of special funds.

The procedure in collecting and expending these funds is established by a special law.

The means required to realise inventions and improvements are provided in the industrial-financial plans.

PART IV. APPLICATION AND EXPERTS' EXAMINATION OF THE ORIGINALITY OF INVENTIONS WHERE AUTHOR'S CERTIFICATES OF INVENTION ARE APPLIED FOR

38. An application for an author's certificate of invention can only be made by the inventor himself, or in case of his death by his heirs.

If it is authorised by the inventor or his heirs, the application for an author's certificate should be made in their name by the enterprise or institution where they are working or by any organisation dealing with inventions to which the invention in question by its nature appertains.

Digitized by Google

Note.—Hereinafter the term "applicant" will be taken to mean the person in whose name the application is made, *i. e.*, the inventor or his heir.

39. To file an application in the matter of an invention, a declaration in writing must be filed with the Originality Bureau of the Inventions Committee of the Council of Labour and Defence.

The declaration must state the name of the author of the invention, the object of the invention, and the name and address of the applicant.

The declaration must be accompanied by a description of the invention with the necessary drawings.

The description must set out the essence of the invention so clearly, precisely, and fully as to enable competent persons to realise the invention on the basis of this description. Particularly those principal distinguishing features must be indicated which the applicant regards as constituting the originality of his invention (the invention formula).

At the same time the applicant may state his ideas on the realisability of his invention, the extent of its application, and the importance of the invention.

The declaration and the description attached to it are filed with the Originality Bureau in triplicate.

If the application does not satisfy the requirements set forth in this section, a letter is sent within ten days to the applicant requesting him to supplement his application in those respects in which it was deficient, for which purpose the necessary time will be allowed, but not more than two months.

40. Within a month after the day of filing the application, the applicant may supplement or correct the description and drawings submitted without changing the substance of the application. Supplements and corrections are submitted in triplicate.

At the request of the applicant the Originality Bureau may prolong the time allowed for filing supplements or corrections to three months.

41. If at the preliminary examination of the application the Originality Bureau finds that the subject matter submitted is faulty, palpably impracticable, or palpably not original, the Bureau quashes the examination of the case. The applicant is informed of this by a letter which sets forth the grounds on which the case is quashed.

The decision to quash the case may be appealed within a month from the date of its receipt to the Council for the Review of Appeals of the Inventions Bureau.

42. If the application contains all the necessary information and material, even though it be in a single copy, and if at the preliminary examination it is not adjudged faulty, palpably impracticable, or palpably not original, the Originality Bureau issues a memorandum of priority of claim to the applicant. The memorandum states the appellation of the invention applied for, the names of the author, and the applicant and the date of application.

At the same time the Originality Bureau forwards one copy of the declaration, of the description, and of the drawings of the invention to the industrial branch board of inventions (Sec. 15, Sec. 20, note), indicating the date of application.

A copy of the application, the description, and the drawings is sent to the industrial branch board even where the Originality Bureau enjoins all production under the application in view of a palpable lack of originality.

Note.—If the application and the necessary exhibits are offered in less than three copies, the Originality Bureau passes the missing copies on to the industrial branch board when it receives them from the applicant, and in case the invention is of great importance, it itself makes copies of the said documents.

43. The date from which priority is calculated is the day when the application reaches the Originality Bureau; in case of dispute, it is the day when application was mailed. If the description and necessary drawings were not attached to the application, the date of application is taken to be the day when the description and drawings reached the Bureau or when they were mailed.

44. The memorandum of priority of application, or the request to supplement the application, or the notification that the case was quashed at the preliminary examination (Sec. 41), must be forwarded to the applicant not later than ten days from the day the application was received.

45. A search is made at the Originality Bureau in the case of every application, the purpose of which search is to ascertain whether the subject matter submitted is an original invention.

46. An invention will not be recognised as original if before the date of application it was in use within the U. S. S. R. or abroad, or was described in a printed work, or was made accessible to the general public in any other way, so that any competent person could apply the invention.

Digitized by Google

An author's certificate, however, may be issued in the following cases:

(*a*) where the inventor has made oral or written reports not more than six months before the filing of his application within the territory of the U. S. S. R. about his invention to any scientific research institution, to any board of inventions or to any one of the enterprises where the invention might be prepared, tested, or exploited;

(*b*) where within the same period of time the invention has been applied within the territory of the U. S. S. R. for the purpose of testing or improving it.

Making an invention public before an application has been filed, without the consent of its inventor, is punishable as a criminal offence; such publication does not deprive the inventor of the right to receive an author's certificate.

47. The investigating experts should be guided by the previously issued author's certificates and patents, both Soviet and pre-Soviet, by the applications for patents previously made, by the foreign literature at the disposal of the Originality Bureau, and by the technical literature published within the U. S. S. R. and foreign technical literature accessible to the experts.

48. Persons who have jointly made an invention (co-inventors) are entitled to one author's certificate in the names of all of them.

Persons who have given technical assistance to the inventor are not considered co-inventors.

49. If an invention is made at an enterprise or at an organisation and its author cannot be established (factory invention), the author's certificate is issued in the name of the enterprise or organisation. The remuneration for the invention is paid in such case to the workers' collective of that enterprise.

50. The searches to establish originality are made in the order in which the applications were made, and must be completed within six months of the date of application.

51. The decision of the Originality Bureau on the issuance of an author's certificate is sent to the applicant within five days.

If the applicant does not agree with the declaration of the essence of the invention (invention formula) as set forth by the Bureau, he is entitled to send his objections to the Bureau within one month after receiving the decision. The applicant has the right to acquaint himself either personally or through persons or organisations authorised by him with all the material on which the decision of the Bureau was based; he may also demand that copies of the said material be sent to him free of charge. In the latter case the period for sending in his objections begins to run from the date the applicant receives such material.

If the applicant does not raise any objections within the period prescribed, the Originality Bureau issues an author's certificate to him and sends a copy of the certificate to the industrial branch board of inventions.

The Originality Bureau reviews the objections of the applicant within one month's time and enters a decree which is communicated to the applicant. The applicant may within one month's time appeal this decision to the Council for the Review of Appeals, which must review the appeal within a month from the date it reaches the Board.

If required by the terms of the decisions of the appeal the Originality Bureau issues an author's certificate and sends a copy of it to the industrial branch board of inventions.

52. The decisions of the Originality Bureau to refuse an author's certificate should be communicated to the applicant, who is allowed three months' time to appeal this refusal to the Council for the Review of Appeals.

The applicant has the right personally or through persons or organisations authorised by him to acquaint himself with the material on the strength of which the Originality Bureau refused to issue the certificate, and he may also demand that copies of this material be sent to him free of charge.

53. Any State body, co-operative or other public organisation, or any person may before the expiration of three years from the date of publication of the issuance of an author's certificate, enter a protest against the issuance of an author's certificate and dispute the validity of the certificate issued for the invention by proving that it is not original.

Where no public announcement is made, the period for entering the protest is calculated from the date of the issuance of the author's certificate.

Protests made prior to the issuance of the certificate are filed with the Originality Bureau, but those made after the issuance of the certificate are filed with the Council for the Review of Appeals.

54. Any State body or public organisation or individual person interested may, from the date of application until the expiration of three years after the

Digitized by Google

publication of the issuance of the author's certificate, contest the issuance of the certificate by proving that a different person or group of persons is the real author of the invention.

Where no publication is made, the issue of the author's certificate may be contested within three years from the date it was issued.

Such claims are made by instituting an ordinary law suit, giving notice to the Originality Bureau at the same time.

55. If a claim contesting authorship is filed before the author's certificate is issued, the Originality Bureau does everything necessary to establish the originality of the invention, but suspends the issuance of the author's certificate until the claim has been decided by the court.

If the claim is filed after the author's certificate has been issued and the court adjudges the person named in the application not the author of the invention, the certificate issued is declared invalid. In such case the Originality Bureau issues an author's certificate to the person whom the court has adjudged the real author with priority as of the date of the original application.

56. The decisions of the Council for the Review of Appeals are final and cannot be appealed.

These decisions may, however, be re-examined by the Inventions Bureau in the due exercise of their supervisory jurisdiction.

57. All petitions and documents filed in connection with the issuance of author's certificates are free of charge.

PART V.—PROCEDURE IN PATENT CASES

58. The procedure mentioned in Part IV is applicable to the filing of applications for patents and to their examination by experts, subject to the special rules set forth hereinafter.

59. The application for a patent may be made by the inventor himself or by his lawful successors, *i. e.*, by his heirs or by any person to whom the inventor or his heirs assigned the right to the invention (Sec. 7).

60. Persons permanently resident abroad should authorise some person permanently resident in the Union of Socialist Soviet Republics to act as their representative in the matter of procuring the patent.

The categories of persons who may act as such representatives are determined by the Inventions Bureau of the Council of Labour and Defence.

61. In the declaration for the grant of a patent the inventor or his lawful successor must state that there are no bars to granting a patent as stated in Sec. 6 of the present regulations.

Such statement is not required if the inventor is a foreigner residing abroad.

State boards and social organizations interested may prove in an ordinary law suit that the inventor has no right to obtain a patent, for reasons stated in Sec. 6, and they may demand on this ground that the patent granted be declared invalid. Likewise suits may be instituted at all times during the validity of the patent.

62. Each application must refer to one invention only. If this condition is not complied with, the applicant must, in order to retain the priority of his application, at the demand of the Originality Bureau subdivide his application within a period of time set by the Bureau.

63. In case an applicant who disagrees with the patent formula or who was refused a patent, demands that copies of the material on the basis of which the decision of the Originality Bureau was rendered be forwarded to him, he must pay the expenses incident to it.

64. In case the experts' investigation considers the granting of a patent possible and an agreement is reached with the applicant concerning the invention formula, the Originality Bureau makes a preliminary publication of the name of the applicant and of the invention formula in the "Messenger of the Inventions Committee of the Council of Labour and Defence."

At the same time the description and drawings referring to the application are exhibited at the Originality Bureau for the inspection of all persons desiring to do so.

Within three months of the date of the preliminary publication of the invention formula any state body, cooperative or other organisation, or any person, may enter a protest against granting the patent.

The protest must be presented in writing, stating in detail the reasons for the protest, and must be accompanied by the necessary exhibits.

Digitized by Google

If no protest is filed within the said period, the Originality Bureau grants the patent.

If a protest is filed, it must be examined by the Originality Bureau within two months.

65. The forwarding of one copy of the application to the industrial branch board of inventions for examination as to its usefulness is postponed, if the applicant so requests, until the preliminary publication of the invention formula (sec. 64).

66. The patent may be contested on the ground that the invention is not original or that a wrong person has been adjudged its inventor at any time during the validity of the patent.

67. The following fees are charged in patent matters:

(*a*) an application fee for each application for a patent;

(*b*) an annual patent fee for each patent granted;

(*c*) a fee for each appeal from a decision of the Originality Bureau;

(*d*) a fee for each application to record in the register of inventions a full or partial assignment of the rights to the invention.

The amounts of the fees and the procedure in paying them are prescribed by the Council of Labour and Defence.

The Inventions Committee of the Council of Labour and Defence may, in individual cases, exempt workers-inventors from the payment of fees.

The non-payment in due time of the annual patent fee terminates the operation of the patent.

PART VI. SUPPLEMENTARY INVENTIONS

68. An invention is deemed supplementary if it is an improvement of another (basic) invention for which an author's certificate or a patent has been granted and if it cannot be exploited independently without using that basic invention.

69. If an author's certificate has been issued for the basic invention, a dependent author's certificate is issued for the invention supplementing it. Moreover, the application covering a supplementary invention made by the author of the basic invention before the expiration of four months from the date of the grant of the author's certificate enjoys priority over an application for the same invention made by another person during that period.

70. Where the basic invention for which an author's certificate was issued was in itself not recognised as useful for the national economy but is recognised as useful in conjunction with the supplementary invention, the remuneration is paid to the authors of both the basic and the supplementary inventions.

The instructions of the Inventions Committee of the Council of Labour and Defence prescribe the procedure in paying the remuneration in such case (Sec. 90).

71. Where the basic invention is protected by a patent, either a dependent patent or a dependent author's certificate is issued to cover the supplementary invention, at the option of the applicant. Moreover, the supplementary invention may be worked only with the consent of the holder of the patent for the basic invention.

No remuneration is paid to the person to whom a dependent author's certificate was issued according to general principles before the State receives the right to put the basic invention to practical use.

The dependent patent is granted for the duration of the validity of the basic patent.

72. If the basic patent ceases to be valid before its regular termination through causes not affecting the supplementary invention, the dependent patent or author's certificate will be converted to an independent patent or certificate. In such event the dependent patent will be valid only for the period for which the basic patent has been granted.

In all other respects a dependent patent shall be treated as equivalent to an independent patent.

PART VII. PUBLICATION AND REGISTER OF INVENTIONS

73. All applications, except those which are secret, which have been filed with the Originality Bureau and on which memorandum of priority of application has been issued, are announced in the "Messenger of the Inventions

Digitized by Google

Committee of the Council of Labour and Defence." The announcement must state the appellation of the invention, the names of the author and the applicant, the date of application and the name of industrial branch board to which a copy of the application has been sent to have its usefulness appraised.

74. All decisions that have become effective and that concern the issuance of author's certificates and patents for inventions, except those that are secret, are published in the "Messenger of the Inventions Committee of the Council of Labour and Defence."

75. The descriptions and drawings of inventions for which author's certificates or patents have been granted, except those that are secret, are published by the Inventions Committee in the form of pamphlets which in their totality constitute a digest of inventions of the U. S. S. R.

76. The Originality Bureau of the Inventions Committee of the Council of Labour and Defence keeps a register of inventions (except those that are secret). Any one desiring to do so may acquaint himself with this register as well as with the descriptions and drawings of the inventions on which author's certificates or patents have been granted.

77. The publication of decisions concerning the issuance of author's certificates and patents as well as the publication of descriptions and drawings may, upon the demand of organisations or persons interested, be postponed for a definite period of time, or, with the sanction of the Inventions Committee, be omitted altogether.

The Inventions Committee may also postpone for a definite period of time, or abrogate altogether, the inspection of the descriptions and drawings of individual inventions by all persons.

PART VIII. SECRET INVENTIONS AND IMPROVEMENTS

78. Inventions and improvements referring to the defence all persons.

Moreover, the Inventions Committee may, in its discretion or at the suggestion of the department of the industrial branch board concerned, recognise any invention as secret, if its secrecy is demanded in the interests of the State.

An improvement which does not amount to an original invention may be recognised as secret by decree of the People's Commissariat or of the industrial branch combine or the administration concerned.

79. The decree declaring an invention secret is immediately communicated to the applicant, to the author and to the industrial branch board of inventions concerned, which in its turn informs the corresponding enterprises, institutes of scientific research, etc. Similarly the People's Commissariat or the industrial branch board concerned informs the persons, his representative and the corresponding enterprises that the technical improvement has been recognised as secret.

80. The publication in the press of any information concerning secret inventions or improvements or the disclosure of their essential content in any manner whatsoever is punishable as a criminal offence.

81. A secret invention or improvement may be submitted only to the State body of the U. S. S. R. interested in it. Likewise a secret invention or improvement may be exploited only by the State body of the U. S. S. R. interested in it.

82. The secrecy attached to an invention or improvement may be removed in a proceeding similar to the one in which it was established.

83. The author of an invention which may be of importance to the defence of the State must file his application personally with the special department of the Inventions Committee of the Council of Labour and Defence, or with the local branch of the United State Political Administration (O. G. P. U.), or with the local military authorities, to be forwarded immediately and secretly to the Inventions Committee of the Council of Labour and Defence.

84. The procedure in selecting useful inventions and improvements referring to the defence of the country, the procedure in establishing their originality, of removing their secrecy, as well as the procedure in appeals from the decisions rendered in such cases are prescribed in special instructions.

These instructions are issued by the Inventions Committee of the Council of Labour and Defence in agreement with the People's Commissariat for Military and Naval Affairs.

Digitized by Google

PART IX. THE PATENTING AND REALISATION OF INVENTIONS ABROAD

85. The patenting and realisation abroad of inventions made within the U. S. S. R., and also of inventions made abroad by Soviet citizens sent by the State on missions, can be effected only with the permission of the Inventions Committee of the Council of Labour and Defence and under the procedure prescribed by it.

Any violation of this rule is punishable as a criminal offence.

86. For purposes of protecting the rights of inventors abroad, an author's certificate is deemed equivalent to a patent.

PART X. REMUNERATION AND PRIVILEGES OF INVENTORS WHO ARE GRANTED AUTHOR'S CERTIFICATES AND OF PERSONS WHO SUGGEST TECHNICAL IMPROVEMENTS

87. The industrial branch board of inventions determines and pays the remuneration to the author of a useful invention for which an author's certificate is issued.

88. If the enterprise starts to exploit the invention before the industrial branch board has determined its usefulness, it pays the inventor a remuneration according to the rules governing the payment of premiums for improvements (Sec. 90).

89. The premium for technical improvements is paid by the enterprise exploiting it. If the improvement is exploited by several enterprises of the branch of industry in question, the premium is determined and paid by the industrial branch board of inventions after deduction of the sums that have already been received.

90. The amount of the remuneration is determined on the basis of the instruction of the Inventions Committee of the Council of Labour and Defence.

The instruction should provide for various rates of remuneration; (a) for new inventions; (b) for all other improvements.

91. A commission is set up at the corresponding People's Commissariat consisting of the representatives of the People's Commissariat, the trade union, and the Workers' and Peasants' Inspection, under the chairmanship of the representative of the Workers' and Peasants' Inspection, to review appeals involving questions of the amount of, or procedure in, obtaining remuneration.

Note.—By agreement between the People's Commissariat on the one hand and the All-Union Central Council of Trade Unions and the People's Commissariat of the Workers' and Peasants' Inspection of the Union of Socialist Soviet Republics (and for the People's Commissariats of the Union republics, the Republican Council of Trade Unions and the People's Commissariat of the Workers' and Peasants' Inspection of the Union republic) on the other hand, commissions may be attached to industrial branch combines in place of the commissions attached to the People's Commissariats to consider appeals. Such commissions consist of representatives of the combine, of the Trade Union and of the Workers' and Peasants' Inspection, the latter representative acting as chairman.

92. Where an invention or an improvement is made by several persons jointly, the remuneration for the exploitation of the invention is shared between them as they agree. In the absence of an agreement the question is decided by the court or by a public organisation, if they so request.

93. Remuneration received for an invention or an improvement is equivalent in all respects to wages, whether the person in question is a wage-earner or not.

94. In calculating the income tax on the remuneration received for an invention or improvement, remuneration up to 6,000 rubles a year is absolutely exempt. If the remuneration is more than 6,000 rubles, income tax is paid only on the excess over 6,000 rubles a year.

95. Inventors who have distinguished themselves by useful inventions enjoy housing privileges on an equal basis with scientific workers.

Inventors working in enterprises and institutions who have distinguished themselves by useful inventions, in case they have no living quarters or live under unsatisfactory conditions, have the right to receive housing quarters in preference to others, out of the housing fund of the enterprise or institution in question.

In industrial centres the local Soviets must reserve a definite number of quarters for inventors.

Digitized by Google

96. No worker-inventor who is qualified to enter higher and secondary technical schools may be refused admittance as a student.

Inventors who are not workers are admitted to these schools on the same basis as industrial workers.

97. Inventors have a preferential right, *ceteris paribus*, to occupy posts of scientific workers at appropriate institutions and enterprises for scientific research and experimentation (institutes, laboratories, experimental plants and departments, etc.).

A definite number of posts for scientific workers should be reserved in these institutions and enterprises for inventors.

98. The industrial branch board of inventions, by agreement with the All-Union Society of Inventors, selects workers who have become noted as important inventors, to utilise them exclusively on inventions in institutes for scientific research, laboratories, construction bureaus, experimental plants and departments, etc.

They work according to a plan confirmed by the industrial branch board and receive a corresponding salary.

99. The economic bodies should provide a certain number of posts for inventors, in the annual plan of commissions sent to various places in the U. S. S. R. and abroad to study production and to improve their qualifications.

The selection of inventors who are to be offered places on such commissions is made by the industrial branch board of inventions in agreement with the corresponding organisations.

100. Inventors who work on inventions and perform their principal work as wage-earners at the same time are entitled to an additional two weeks' vacation.

101. Inventors who have become incapacitated are granted personal pensions upon applications to the appropriate public organisations or boards of inventions.

102. Inventors working in enterprises or institutions are sent to sanatoriums, health resorts, and houses of rest, with priority over other persons, *ceteris paribus*.

103. Inventors not falling within the social insurance scheme, as well as their families, are entitled to every description of medical relief on the same basis as insured workers and their families.

104. Children of workers-inventors who meet the requirements for admission to educational institutions must be accepted.

Children of inventors who are not workers are admitted to educational institutions and may fill vacancies without charge in children's homes, colonies, and similar institutions on the same basis as children of workers.

Children of dead inventors are given priority over all others in being admitted without charge to vacancies in children's homes, colonies, etc.

105. The privileges set forth in Sections 93–104 are granted to those workers-inventors who possess an author's certificate and whose inventions after having been tested have been recognised as useful to the national economy of the Union of Socialist Soviet Republics.

Persons who have suggested technical improvements enjoy privileges on the same basis as inventors, provided these improvements are of considerable importance, otherwise the conditions attached to, and the extent of their privileges, are set forth in the instructions of the Inventions Committee of the Council of Labour and Defence.

The privileges set forth in Sections 93 and 94 are conferred on all workers who receive remunerations for inventions or improvements.

Privileges are conferred on the basis of certificates issued by the corresponding bodies dealing with inventions.

106. In case of death of the inventor or of the person who suggested the improvement, the right to remuneration passes to his heirs. No rights to privileges pass to heirs except those provided in Sections 93 and 94.

President of the Central Executive Committee of the U. S. S. R.:
M. KALININ.

President of the Council of People's Commissars of the U. S. S. R.:

INDUSTRIAL FELLOWSHIPS

Officers of Administration of Mellon Institute of Industrial Research

BOARD OF TRUSTEES

Officers: John G. Bowman, president; Edward R. Weidlein, vice-president; Henry A. Phillips, secretary.

Members: Andrew W. Mellon, Pittsburgh, Pa.; Richard K. Mellon, Pittsburgh, Pa.; John G. Bowman, Pittsburgh, Pa.; Henry A. Phillips, Pittsburgh, Pa.; Edward R. Weidlein, Pittsburgh, Pa.

EXECUTIVE STAFF

Edward R. Weidlein, director; E. Ward Tillotson, assistant director; William A. Hamor, assistant director; Harry S. Coleman, assistant director; George D. Beal, assistant director; Leonard H. Cretcher, assistant director and head, Department of Research in Pure Chemistry; Henry A. Phillips, treasurer.

Lois B. Whittle, secretary to the director; Henrietta Kornhauser, Edith Portman, librarians; William W. Mills, head, analytical department; Howard C. Davies, head, accounting department; William H. Child, head curator.

The Industrial Fellowships of Mellon Institute of Industrial Research

The essential aim of Mellon Institute of Industrial Research of the University of Pittsburgh is the creation of new knowledge by scientific investigation, in accordance with the Industrial Fellowship System of Dr. Robert Kennedy Duncan. The institution was founded by Messrs. Andrew W. Mellon and Richard B. Mellon, whose constant interest has brought success to the application of the System.

The industrial research of the Institute is organized on a contract basis, the problem being set by a person, firm, or association interested in its solution, the scientific worker being found and engaged by the Institute, and an Industrial Fellowship being assigned for a period of at least one year. Each holder of an Industrial Fellowship is given for the time being the broadest facilities for accomplishing a definite piece of research, and all results obtained by him belong exclusively to the founder (donor) of the Fellowship. Only one investigation is carried out on a particular subject at any one time, and hence there is no duplication of the research activities of the Fellowships in operation.

The Institute is primarily an industrial experiment station, but the nature of its investigational procedure enables broad training of young scientists in research methods and in special subjects of technology. It also recognizes the need of fundamental scientific research as a background and source of stimulus for industrial research. It has funds that are devoted to the prosecution of investigations not suggested by industry, but planned within the Institute and directed towards the study of more fundamental problems than those usually investigated for direct industrial purposes.

HISTORY OF THE INDUSTRIAL FELLOWSHIP SYSTEM

In his allegorical romance, The New Atlantis, written before 1617, Francis Bacon planned a palace of invention, a great temple of science, where the pursuit of natural knowledge in all its branches was to be organized on principles of the highest efficiency. The story of his Solomon's House was a vision of the practical results to be anticipated from diligent and systematic research. By the formulation of his Industrial Fellowship System, Dr. Duncan provided for the creation and maintenance of a body of experimenters on this design, but in a modern laboratory of science.

The idea of this System was conceived by Dr. Duncan in 1906, while in attendance at the Sixth International Congress of Applied Chemistry in Rome. For some time previous to this Congress, Dr. Duncan had been in Europe gathering material for several books on chemistry. Through visits of inspection to factories, laboratories, and universities of some European countries, and through conversations with industrialists and scientists, he had become impressed at various places with the spirit of cooperation that existed between technology and science which made for the advancement of both. At the same time he became aware, more than ever before, of the fact that much of Ameri-

Digitized by Google

can chemical industry, from the standpoint of manufacturing efficiency, was in a weak condition. The absence of the application of scientific research methods was one reason for this state of affairs, and Dr. Duncan was led to propose a remedy in industrial Fellowships. His plan was to assist manufacturers who desired to break away from tradition and to make even more scientific that production already well on the road from tradition to science.

Upon his return from Europe to accept the chair of industrial chemistry in the University of Kansas, Dr. Duncan arranged for the establishment of the first Industrial Fellowship in January 1907. The System was described by him in an article entitled "Temporary Industrial Fellowships", in the *North American Review* for May 1909, and a little later in his book on "The Chemistry of Commerce", an interpretation of some new chemistry in its relation to modern industry. Dr. Duncan's gifts of narration had an important part in interesting American manufacturers in science and in encouraging recognition of the economic value of industrial research.

In 1911, Dr. Duncan was called to the University of Pittsburgh to inaugurate his System in the Department of Industrial Research, and the operation of the Fellowships was begun in a temporary building on March 1 of that year. Messrs. Andrew W. Mellon and Richard B. Mellon, citizens of Pittsburgh and sons of Judge Thomas Mellon of the class of 1837 at the University of Pittsburgh, noted the practical success of this educational experiment and saw in the System an apparently sound method of benefiting American industry by the systematic study of manufacturing problems under suitable conditions and by training young men for technical service. In consequence of this interest, in March 1913 they founded Mellon Institute of Industrial Research of the University of Pittsburgh and later placed the Industrial Fellowship System on a permanent basis, as a memorial to their father (1813–1908) and to Dr. Dunnan (1868–1914). The present home of the Institute, which is a part of the central group of the University of Pittsburgh, was occupied in February 1915 by twenty-three Fellowships then in operation. Within eight years the building became filled to approximate capacity with fifty Fellowships, covering a wide variety of different problems. The continued financial support of the Messrs. Mellon has made it possible to develop the System to its present strong position.

By the application of the Industrial Fellowship System, the Institute has been successful in demonstrating to American manufacturers, irrespective of size, that industrial research, properly carried out, is profitable to them. Eighty-five per cent of the problems accepted for study, 1911–1935, have been solved satisfactorily, and many chemists and chemical engineers have been trained in research methods and then placed in useful industrial positions. The Institute has also been active in stimulating research in other laboratories and in cooperating with other research establishments, both in the United States and abroad. It is, however, best known by the successful commercial processes which it has developed and by its contributions to the literature of chemistry and allied sciences. Lists (*Bibliographic Bulletin* No. 1 and its *Annual Supplements*) of the books, bulletins, journal articles, and patents by the membership of the Institute, 1911 to date, may be had upon request. At the close of each fiscal year, on March 1, the Institute publishes a list of the Industrial Fellowships in operation, copies of which are distributed to all persons interested in the System.

Notable investigations have been carried out by Industrial Fellowships on subjects in the following fields: bread, byproduct coking, carbon dioxide, cellulose, citrus products, composition flooring, corrosion, dental products, edible gelatin, electrical precipitation, enameled ware, fertilizers, fiber containers, fish products, flotation of ores, food and beverage flavors, fuels, galvanizing, garment cleaning, glass, glue, heat insulation, hydrometallurgy of copper, inks, insecticides, laundering, magnesia products, matches, natural gas, nickel, olefine gases, organic synthesis, petroleum, protected metals, refractories, roofing materials, rubber compounding, smoke abatement, sodium silicate, stove enamels, sulfur, synthetic resins, vitamins, vitrified tile, wood chemicals, wrought iron, and zinc.

GENERAL PRINCIPLES OF THE INDUSTRIAL FELLOWSHIP SYSTEM

In accordance with the System of the Institute, an individual industrialist, a company, or an association of manufacturers that has a suitable problem or

Digitized by Google

group of problems that requires investigation may become the donor of an Industrial Fellowship, provided the problems are of sufficient scope to warrant the services of at least one man for a period of not less than one year, provided no other investigation is in progress in the Institute on the research topic that is of interest to the prospective donor, and also provided the Institute can give accommodation to the work that is necessary to solve the problems.

The Industrial Fellowships of the Institute are of two general types, namely, Individual and Multiple. An Individual Industrial Fellowship utllizes the services of one research chemist or engineer (with assistants when necessary), who is responsible directly to the executive staff of the Institute. A Multiple Industrial Fellowship has the services of one or more research men (Junior Fellows) under the direction of a Senior Fellow, who, in turn, is responsible to the executive staff.

The Institute is not of a commercial nature, being entirely independent and deriving no financial profit from the investigations conducted under its auspices. Moreover, members of the executive staff devote their time and ability to the interests of the Institute and of the University of Pittsburgh without outside remuneration.

The donor, on his part, provides a foundation sum that is adequate to cover the annual cost of maintenance of the Industrial Fellowship, comprising operating charges, the purchase of all necessary special apparatus or other equipment, and the salary of the research man or men selected to work on the particular problem, the solution of which is of concern to the donor. This sum of money is approximately $5,000 for each research man needed on the Fellowship.

Cooperation by sympathetic encouragement and practical suggestion is essential on the part of the donating company or association for the successful conduct of the Industrial Fellowship work.

The Institute, in due order, selects the Industrial Fellow, and the investigation to be carried out is entrusted to this qualified man, who devotes his entire time to it.

The Institute furnishes laboratory, library, and consultative facilities, the use of its permanent research equipment, direction to the progress of the work, and an environment that stimulates productive investigation. All results obtained by the Industrial Fellowship are the property of its donor.

Each Industrial Fellowship is a case of trust and is operated in strict accordance with the terms of the agreement governing its operation (see page 17). Information pertaining to its subject matter and progress is not released to the public unless the donor so desires. Further, the knowledge gained by one Industrial Fellow along one investigational line becomes available to another man, *provided such cooperation does not violate a trust.*

The Institute has a tried system of reporting, and all records, reports, and correspondence are given secure guardianship.

Reports on progress made and difficulties encountered are submitted weekly from each Industrial Fellowship to the executive staff. These private reports are considered for purposes of advice and guidance and serve to record all research observations and results. Confidential monthly reports are transmitted to the donors, and yearly summary reports are prepared and placed in the archives of the Institute, to be released for publication at such times as will not injure the interests of the donors. The Institute has definite instructions governing the preparation of all types of reports. Scientific or technical papers are not prepared for publication without the consent and approval of the donor concerned. Moreover, the donor decides as to whether patent protection shall be sought for new processes or products that are developed.

For the benefit of donors, the Institute secures, through proper connections, systematic and prompt advices concerning improvements in American and European technical practice that may be of value to its Industrial Fellowships.

Cooperation is a large factor in the success of the Institute. Teamwork and high creative ability go together—an idea that was made vital by Dr. Duncan and is now a valued heritage of the Institute. The Robert Kennedy Duncan Club is an organization of the Institute in which this idea especially lives. All Industrial Fellows are expected to take part in the activities of the Club, which arranges annual programs of social and athletic events and special lectures. The members of the Institute are also eligible for membership in the University Faculty Club, with its social life, and many of the unmarried Fellows reside there. Chemical research colloquia are held weekly by an organized

Digitized by Google

group of Fellows of the Institute, to discuss progress in the field of pure chemistry. These meetings are open to all members of the Institute.

The System of the Institute enables a manufacturer to obtain results in a shorter period of time and at less cost than is ordinarily possible. The co-operative and research facilities of the Institute hasten results.

All advertising or publicity matter referring to the Institute or to any of its activities is by agreement with donors submitted to the Director for approval before release.

OUTLINE OF INDUSTRIAL FELLOWSHIP PROCEDURE

There are three definite stages of Industrial Fellowship work, namely preparatory, experimental, and developmental.

The preparatory stage includes a critical study of the literature of the subject, preliminary conferences with the donor, and visits to his plant, in order to familiarize the Industrial Fellow and the executive staff with the problem in all its aspects. Each incumbent of an Industrial Fellowship, who is getting ready to undertake a piece of research, submits a report on his plans for investigation and on whot has been found on the subject in the literature before he actually begins experimental work. Most of the troubles of the industries have a chemical origin. Most of the Institute's researches are therefore in the closely related provinces of chemistry and chemical engineering; but the solution of many problems requires the cooperative efforts of the chemist and the physicist or the biologist.

Following the approval of the executive staff to a definite program of research, the experimental stage is entered. It embraces laboratory work and contact with the donor through regular progress reports and necessary conferences.

The developmental stage, which follows the laboratory or experimental investigation, includes the working-out of processes or the preparation of products on first a unit-plant scale and then in the donor's factory. It is essentially chemical engineering in character, and stress is placed on those chemical and physical facts that are of direct economic interest. A process may be carried out on a laboratory scale with entire success; but just as soon as it is put in operation under semi-commercial conditions, or on an industrial plant scale, it may fail through inadvertent neglect of engineering factors. Hence plant-size investigations, involving considerable financial outlay, are often necessary in industrial research.

Research at the institute is not of the individual type, carried out for the personal gratification and advancement of scholarship of the Industrial Fellows. It is institutional in that it is conducted by scientists, working independently or in varying measure of cooperation, as members of an organized agency, designed to serve industry. The effort is made to administer the Industrial Fellowships in such a way as to enable their holders to put forth their best efforts. The aim of the Institute is to select good men, and then to give them requisite freedom and sustained support, financial, sympathetic and advisory. In competent research men, the maintenance of freshness of view, enthusiasm and diligence leads to effective work, in overcoming difficulties and in pointing out new lines of advance.

The renewal of many Industrial Fellowships, year after year, attests to their productivity and to the confidence that their donors have in the Institute. It is of interest to mention here that the incumbents of the larger and older Industrial Fellowships are recognized generally as specialists in the particular branches of technology in which they are conducting investigations.

ASSOCIATION FELLOWSHIPS

The United States Department of Commerce has expressed the opinion that "among constructive activities of trade associations none is more fitting nor more profitable than scientific research." Mellon Institute has been engaged in research for a number of associations of manufacturers since 1914—at present there are fourteen association Fellowships in operation—and its experience shows convincingly the valuable relation of industrial research to the advancement of business in the manufacturing fields thus covered.

Each association of manufacturers that is maintaining an Industrial Fellowship in the Institute consists of those firms in an industry having problems of common interest which are so basic or of such general application that

Digitized by Google

the results of research thereon are of importance to all company-members. This type of investigational work may be carried on without interfering with competitive interests or the relative commercial positions of the cooperating firms. It has been demonstrated that competitors can work harmoniously on a research program, provided the problems selected are of concern to all members of the association and do not require the disclosure of confidential information by any member of the organization.

An association Fellowship enables direct research service to a number of industrial concerns instead of to an individual company. Its activities also give rise to stable relations of cooperation among the members of the association by the exchange of technical experience and research results. An association Fellowship usually acts as a clearing-house of information for the sustaining organization, and gives technical assistance and scientific advice to the company-members. One of the prominent advantages of association research is that it enables a small manufacturer, who cannot afford to have a reserch laboratory of his own, to profit from the investigational work in the same way as a larger manufacturer. Association research reduces the cost factor to a minimum and thus promotes the welfare of manufacturers in the field concerned, without respect to size. Moreover, problems may be studied that require more time and expense than should be borne by a single manufacturer or company, in view of the wider application of the results. The correlation of research effort, such as is done in the Fellowships supported by associations, prevents unnecessary duplication in scientific inquiries.

For the most part, the Institute's researches for associations have for their purpose the advancement of basic knowledge of the industries, their processes and products. It has been especially successful in work on standardization of factory practice and manufactured products and on extending uses of various chemicals and commodities. The Industrial Fellowships are advised by committees chosen from the membership of the associations. These committees of three or more technical specialists obtain suggestions from members of the associations, select for study the outstanding problems, keep the Industrial Fellows in touch with the manufacturing phases of the work, and aid them in the interpretation of results in terms of factory practice and in having individual manufacturers act upon their recommendations. In addition to participating actively in the direction of research work, these committees therefore assist in training men for industrial service.

SCOPE AND SPIRIT OF INDUSTRIAL RESEARCH

The purpose of industrial research is to promote success in manufacturing practice through scientific investigation; in other words, to find new materials, new processes, and new uses of products for industrial development and to advance manufacturing operations through the application of scientific methods to industry. Before things can be used in any way they must be discovered, and it is the particular function of science to reveal them. It is the business of the scientific investigator to discover and of the engineer or inventor to recognize and apply the results achieved.

Chemistry, physics, and biology, the sciences that unite to make the basis of industrial research, depend upon observation, experiment, and comparison, or upon a combination of these methods, setting out, in their studies, from fundamental principles. The chemist, by observation and experiment, that is, by systematic examination of organic and inorganic substances, determines the properties of matter, describes the structure of compounds, and studies the processes of synthesis. The chemical engineer, by physical means, by analytical control, by observation of materials, and by experiment upon processes, gains insight into the nature of manufacturing operations and is enabled to develop industrial procedures. The physicist, by making accurate measurements with instruments of precision, by observing changes in properties under definite conditions, and by comparing results, discovers verifiable facts about natural and manufactured products. The biologist investigates by microscopic methods, by examination of vital products, by experimentation upon animals, the nature and effects of ferments, foods and drugs; his research is bacteriological, physiological, or pharmacodynamic, depending upon its purpose. The results that each scientist obtains and the methods he employs must be confirmable by other investigators. The equipment necessary for industrial research depends upon the field in which it is pursued. Most types of investigational work involve the use of special apparatus and are conducted in laboratories provided

Digitized by Google

with the esential equipment and operating on such a scale as may be deemed advisable for the successful industrial application of the information acquired.

The industrial research man may have the dual task of discovering the cause of a difficulty in manufacturing and of eliminating or correcting it. This type of problem is frequently complicated. The scientist working on it must secure all the data that modern methods can furnish, in the laboratory as well as in the plant, and then he must interpret these facts by a careful process of logical reasoning and organize them into a usable recommendation. Investigational work in and for industry demands sound preparation, correct scientific attitude, active optimism, and constant hospitality to suggestions of others and to new knowledge and improved methods.

The spirit of all industrial research is sincerely scientific. It seeks to be open-minded toward new truth. It recognizes the intricacy of its problems, it does not hesitate to admit ignorance nor to suspend judgment. Its constant aim is the discovery of truth and its application to human need. Its scope is as wide as the range of influences, chemical, physical, biological, and economic, which affect technology.

The effects of the influence of scientific investigation on behalf of technology are so broad and beneficial that they are interwoven intimately with everyday life and contribute constantly to human progress. Industrial research is one of the greatest gifts of science to mankind.

INDUSTRIAL FELLOWSHIP AGREEMENT

Each Industrial Fellowship that is accepted by the Institute is the subject of a definite agreement between the industrialist, company, or association of manufacturers concerned and the Institute. The following form of agreement for Individual Fellowships is in use by the Institute.[1]

Agreements for_____Industrial Fellowship No._____(Mellon Institute Industrial Fellowship No._____).

This Agreement, made and entered into this_____day of_____, 19____, between Mellon Institute of Industrial Research of the University of Pittsburgh, of the City of Pittsburgh, Pennsylvania, hereinafter called the "Institute", and_____, a corporation of_____, having head offices in_____, hereinafter called the "Donor,"

Witnesseth: That, for the purpose of promoting the increase of useful knowledge and in consideration of the mutual promises and covenants herein contained, the parties hereto agree as follows:

1. The Donor shall pay to the Institute in_____payments in advance, for a period of_____year , beginning on_____, 19__ (the date on which work of this Fellowship is commenced), the total sum of_____dollars ($_____), for the foundation of an Industrial Fellowship to be known as_____Industrial Fellowship No. _____, the exclusive purpose of which is_____; and the study of such other problems connected with the Donor's business as in the opinion of the Director of the Institute can be accepted by the Institute. In case the Donor desires problems other than those specifically mentioned above to be included under this Fellowship, written permission to include such problems shall first be obtained from the Director of the Institute.

2. The Institute shall accept the sums so to be furnished by the Donor and shall devote them as herein indicated to the furtherance of the problems of this Fellowship: to this end, out of the money received from the Donor under this Agreement, the Institute shall pay over as compensation to the incumbent of this Fellowship such amounts from time to time as may be agreed upon by the Institute and said incumbent; and the Institute shall, also out of said money, purchase such apparatus, chemicals, and other supplies related to this research as the Director of the Institute may deem necessary for its efficient operation, and defray traveling expenses and other expenses incident

[1] If a bonus is to be provided by the donor of an Industrial Fellowship, as a reward to its incumbent for the accomplishment of results, it is the subject of a separate agreement.

Digitized by Google

and related to the elucidation of the problems concerned; and the remainder shall be retained and applied by the Institute toward its reimbursement for expenditures for water, light, heat, gas, and other general overhead expenses incurred by the Institute. The Fellow shall be provided, at the expense of the Institute, with adequate laboratory facilities, with the general facilities of the Institute, and with the advice and direction of the executive officers of the Institute. The Donor, on its part, shall coöperate with the Institute in this research by providing the Director thereof and the Fellow of this Fellowship with its sympathy and with whatever knowledge of the subjects of research it may possess, and, with the approval of the Donor, with its facilities for large-scale experimentation. In the event that experimental plant work shall be recommended by the Director and approved of by the Donor, such additional expense, including traveling expenses, as may be incidental thereto, shall be borne by the Donor.

3. The incumbent of the Fellowship provided hereunder shall be appointed by the Director of the Institute, upon such terms as the Director and he may agree upon, and he shall give his whole time and attention to the object of the Fellowship, with the exception, if the Director so elect, of three hours a week, which he shall give to instructional work in the University of Pittsburgh. The Fellow shall work under the advice and direction of the Director, and shall from time to time through the Director forward to the Donor reports of the progress of his work. During the existence of the Fellowship provided hereunder, the Donor shall have the right, through and with the acquiescence of the Director, to employ and take into its regular service the Fellow of this Fellowship, upon terms to be agreed upon between the Fellow and the Donor, and the Institute shall appoint a successor to the Fellowship, vacated by reason of the regular employment of the Fellow by the Donor, provided the condition of the research work shall, in the opinion of the Donor and the Director, make necessary or advisable the appointment of such successor.

4. Any and all discoveries, germane to the subjects of this investigation, made during the term of this Fellowship, as well as all relevant information obtained, by the Fellow of this Fellowship, or the Executive Staff of the Institute, separately or conjointly, shall become the property of the Donor, subject to the terms and provisions of this Agreement, and such member of the Institute making such discovery or obtaining such information shall promptly and without demand make revelation of all such information and discoveries. Such revelations shall be made to the duly designated representatives of the Donor directly, or through the Director, as the Director may determine.

5. The members of the Institute, as referred to in Paragraph 4 of this Agreement, making a discovery or invention germane to the subjects of the Donor's investigation, shall at any time, upon the request and at the expense of the Donor, apply for letters patent, and shall assign such letters patent and any and all rights to such invention to the Donor under the conditions of this Agreement. In case the Donor desires to keep secret any discovery or invention, or for any reason desires that letters patent shall not be applied for, such member of the Institute making such discovery or invention shall not at any time apply for patent or patents in his own name and shall not disclose such discovery or invention to others except as herein provided.

6. In the event of any difference of opinion between the parties hereto as to the interpretation of this Agreement, or the rights of the respective parties to this Agreement, the matters in issue shall be referred to a Board of Arbitration, which Board shall consist of a representative of the Institute and a representative of the Donor and a third person whom these two shall select. The decision of this Board shall be obtained without recourse to the Courts and, when rendered, shall be binding upon the parties hereto.

7. During the term of this Fellowship, the incumbent thereof may publish such results of his investigation as do not, in the opinion of the Donor, injure the Donor's interests. It is contemplated that, on or before _____, 19____, the said incumbent shall have completed a comprehensive monograph on the subject of his researches. The subject matter of such monograph shall not contain specific information of the process or methods of the Donor, but it shall be confined to a statement of new discoveries of scientific fact obtained

Digitized by Google

by this Fellowship. A copy of this monograph shall be forwarded to the Donor and a copy shall be signed and placed in the archives of the Institute until the expiration of three years from the time hereinafter provided for the termination of this Fellowship, when the Institute shall be at liberty to publish it for the use and benefit of the public. Such monograph, when published, shall not contain data nor information in regard to the cost of manufacture by any process revealed in such monograph.

In the event that, in the opinion of the Donor, such publication at such time will unduly injure the Donor's interests, the Donor shall have the privilege of appealing at any time for an extension of time of such publication to the Board of Arbitration provided for herein, which, after considering the appeal, shall, if in its opinion such publication will unduly injure the Donor's interests, extend the time of publication to a time when, in the Board's opinion, publication will not unduly injure the interests of the Donor.

It is also agreed that no advertising or other publicity matter having or containing any reference to the Institute, or in which the name of the Institute is mentioned, shall be made use of by the Donor or anyone in the Donor's behalf, unless and until the same shall have first been submitted to and received the approval of the Director of the Institute.

8. The Fellowship provided for in this Agreement shall terminate on the _____ day of _____, 19____. It is understood and agreed that the Donor may renew this Fellowship upon such payments and terms as may be agreed upon.

In witness whereof, the parties hereto have caused this Agreement to be duly executed under the seal the day and year first above mentioned.

MELLON INSTITUTE OF INDUSTRIAL RESEARCH
OF THE UNIVERSITY OF PITTSBURGH,

PROGRESS AT MELLON INSTITUTE DURING 1934–35[1]

THE GROWTH OF MELLON INSTITUTE during the past twenty-four years is a striking illustration of the rising esteem for research. One of the first organizations in this country founded expressly for investigating the problems of the industries, the industrial fellowships of the institute have now passed the one-thousand mark and have served 3,600 companies, either as independent firms or as members of industrial associations. In ten instances, fellowship inventions have created new industries, and many new branches have been added to existing manufactures as a result of other research accomplishments. The further development of industry will be effected only through the greater accumulation of scientific knowledge. Science has now so greatly expanded its boundaries that significant contributions to its future enlargement can be made only with well-equipped laboratories, adequate libraries, and tools of intricate mechanism. The founders of research laboratories are therefore among the greatest contributors to the progress of science and are classed with the great benefactors of mankind. Fortunately, there have arisen in this country a few conspicuous men of this type, and as a result the march of science is steadily on and always to the ultimate enrichment, and not impoverishment of the human race.

---

[1] Abstract of the Twenty-second Annual Report of the director, E. R. Weidlein, to the trustees of the institution.

Digitized by Google

It is generally recognized that chemical research is a factor in aiding the unemployment situation; and it has often demonstrated its capability of bringing new employment, thereby compensating for the displacement resulting from increased mechanical efficiency or other technological changes. The cooperation of science with the industries has been directly responsible for our higher standard of living. Our present standard not only can be maintained, but can be progressively improved by creating the proper conditions for the industries, whereby they can plan for the future and show the way through a continuous development of products and an expansion of activities, so that the consumer is offered new and better commodities at lower costs.

The chemical industry as a whole has maintained its research organizations and has been gradually expanding during the past year. The institute has been extending its own activities in the field of pure scientific research, as well as in industrial work. In addition to its wide investigational program, the institute has, since the beginning of the depression, aided in the employment of scientists and engineers, and it is becoming more difficult to fill the recent demands for specialists. It is also encouraging to note that an increasing number of opportunities are opening up for the younger technical graduates. As in the preceding years, the organization has been helpful to scientific professions and to the industries by presenting facts respecting the utility of applied science, in addresses before business groups, and in popular articles. In addition, a series of lectures on important subjects in industrial chemistry and chemical engineering is presented by specialists of the institute. These discourses are open to the students of industrial chemistry and chemical engineering in the University of Pittsburgh, as well as to interested scientists and engineers in the Pittsburgh district.

One of the functions of the institute is to act as a clearing house on specific scientific information for the public. Where it is possible this is supplied direct, and in other cases the inquirer is referred to the proper sources—specialists in various fields; research laboratories working along specific lines; commercial laboratories; and to pertinent books and periodicals.

PROGRESS IN THE CONSTRUCTION OF THE INSTITUTE'S NEW BUILDING

The first use of the new Mellon Institute building was to house the Science Exhibition held in connection with the Pittsburgh meeting of the American Association for the Advancement of Science. More than 25,000 people visited the exhibition, which was open from December 27 to December 30, 1934. The success of the display was due to the many eminent scientific men who personally devoted their time to exhibits and demonstrations. The new building will be gradually occupied during the year. The chemical engineering quarters are practically completed and many of the new laboratories will be ready for occupancy within the next few months. It is planned to have the building entirely completed by the end of 1935.

GENERAL CONDITION OF THE INSTITUTE'S INTERNAL AFFAIRS

Financial Information.—In the fiscal year, March 1, 1934, to March 1, 1935, the total sum of $596,937.68 has been received by the institute from industrial fellowship donors to defray the cost of scientific investigations being carried on for these companies and associations. The money appropriated by donors during the past twenty-four years amounts to $10,029,544.

Industrial Fellowships, Fellows, and Assistants.—Throughout the last fiscal year 62 industrial fellowships—17 multiple and 45 individual fellowships—have been at work (see appended list). These different investigations have required the services of 97 fellows and 48 assistants during all or part of the year. At the close of the year 56 industrial fellowships—16 multiple and 40 individual fellowships—were in operation, and 87 fellows and 29 assistants held positions thereon. Twenty-eight fellowships have been working for five years or more, and of this number 14 have concluded 10 years of research, 8 have been active for 15 years or more, and 8 fellowships are 20 years of age or older.

CHANGES IN INDUSTRIAL FELLOWSHIPS DURING 1934–35

New Industrial Fellowships.—Seven fellowships began operation during 1934–35: Starch (980); Stone (990); Closure (997); Zymology (1011); Demulcent (1017); Laboratory (1025); and Thread (1028).

The institute also accepted a new fellowship on soy bean, which began operation on March 1, 1935.

Industrial Fellowships Terminated.—The following fellowships concluded their investigational programs during the year: Cleaning (931); Velvet (950); Vanadium (951); Sugar (958); Phosphates (960); and Paper Finishing (963).

The incumbents of fellowships 951, 960, and 963 have been appointed to fellowships 990, 1017, and 997, respectively. The holders of fellowships 931 and 950 have been transferred to the plants of their donors.

NOTABLE INDUSTRIAL RESEARCH RESULTS

The activities of the fellowships have been so extensive that it is necessary to study the appended fellowship list and the annual supplement to our Bibliographic Bulletin No. 2 to comprehend the scope of the work. Many of the fellowship findings have been published during the year in scientific and trade journals. The following brief summaries cover new releasable facts regarding recent research progress:

Results of Fundamental Research on Carbon Blacks.—Since 1927 the Carbon Black Fellowship (982), sustained by the Columbian Carbon Co., New York, N. Y., has been studying the physical, chemical, and colloidal properties of carbon black pigments. It has also been concerned with the application of this fundamental work to the development of new carbon blacks, new uses for carbon blacks, and improvements of various products in which carbon blacks are at present used. The fellowship incumbent, C. W. Sweitzer, has collaborated in all these studies with the Research and Development Department of the Binney and Smith Co., which is allied with the donor.

The fellowship's basic investigation of the dispersion properties of carbon blacks has led to the development of a method for colloidally dispersing carbon black pigments in lacquer vehicles, this colloidal dispersion resulting in markedly improved properties for the black lacquer. The preparation of black lacquers by this method involves two operations. In the first, the carbon black is colloidally dispersed in a lacquer body of nitrocellulose plus some plasticizer, the product of this operation being a dry, brittle lacquer intermediate in which carbon black is dispersed to its ultimate fineness. The second consists of the solution of this dry product in suitable lacquer solvents and the formulation of this solution with stock lacquer components to give the final finished black lacquer. This dry lacquer intermediate is being manufactured by the Binney and Smith Co. and is offered to the trade under the name of "Coblac." The process and product of this development are both fully covered by United States Letters Patent, recently granted.

The use of Coblac enables the manufacturer to prepare superior black lacquers by simply dissolving the Coblac and formulating this solution with stock solutions to give the desired product. It also elimnates the troublesome and unsatisfactory pebble mill grinding of carbon blacks, since the carbon black is dispersed in Coblac and retains this colloidal dispersion during subsequent solution and formulation. The superiority of such black lacquers is amply demonstrated. Compared with the best carbon black pigmented lacquers available on the market prior to the introduction of Coblac, these lacquers show remarkable improvement in color (blackness), color tone (black instead of the usual brown or gray cast), stability of pigment dispersion, remarkably increased resistance to ultraviolet exposure and weathering, and surprisingly superior gloss properties. In brief, by the use of Coblac the lacquer manufacturer is able readily to prepare black lacquers showing the maximum development of all the properties most desired.

In recent years some states have specified the use of dark and light traffic lanes in new highway construction, the purpose being to cut down road glare and to afford more contrast between the lanes. The darkened concrete is obtained by coloring with black pigments, carbon black being found most satisfactory for this purpose. Fellowship studies showed that, by the use of aqueous

Digitized by Google

dispersions of carbon black, maximum darkening of concrete could be obtained with minimum pigment content (2 per cent carbon black). Furthermore, various physical tests on concrete containing 2 per cent dispersed black showed in every instance improved strength, this improvement being as much as 25 per cent in some cases. Undoubtedly, the colloidal black besides coloring the concrete improves, in some manner, the bond between the hydrated cement and aggregate, thereby increasing the strength of the concrete. It seems quite probable that these aqueous dispersions of carbon black will have a considerable use, not only for darkening but also for increasing the strength of all compositions, such as concrete, mortars, and artificial stone. Aqueous dispersions of carbon blacks for these purposes are being manufactured and sold under the name of "Hiblak."

This strength improvement in aggregate-containing compositions resulting from the addition of carbon black was demonstrated strikingly in a study of the effect of carbon blacks on sulfur cements. The discovery was made that the addition of 2 to 5 per cent carbon black to sulfur-sand compositions improved markedly the workability of the mixtures and furthermore increased very appreciably their strength and stability. In fact the strength of certain sulfur cements containing 2 per cent carbon black was found to be as much as 50 per cent greater than the strength of the same cement without the carbon black.

Advance in Enamel Procedure.—The O. Hommel Co.'s fellowship on enameling (1014) has given attention to several aspects of enameling procedure and W. J. Baldwin, the incumbent, has carried into the plant stage of development an improved enameling process.

Recognizing the practical necessity of employing cobalt in the ground coat to insure maximum adherence of the enamel to the steel and for the purpose of eliminating the usual ground coat, a procedure has been developed by which a special ground coat and the first cover coat are applied in one firing. As a consequence of the absence of the customary dark ground coat, one or two light cover coats are adequate for the desired finish and, in addition, one firing operation is eliminated. Thus a simplification and a saving have been effected in operation and in materials and, at the same time, the quality of the product has been maintained.

Mr. Baldwin has also studied the problem of stabilizing certain colors which have an inherent tendency to change in appearance during the firing operation. As a result, several new frit compositions have been developed that minimize this color change.

Development of New Building Materials.—Hard-Finished Robertson Protected Metal, which was described in an earlier report, has been renamed "Tile-Faced Robertson Protected Metal." This building material was developed by D. S. Hubbell, one of the incumbents of the H. H. Robertson Co.'s fellowship (992), and is manufactured under U. S. Patent 1,973,193 and corresponding foreign patents. The second year of commercial production has been devoted largely to simplification of plant operation and to the improvement of equipment design.

During two years of commercial production, the ready acceptance of Tile-Faced Robertson Metal has demonstrated that a broad, immediate market exists for this novel building material, owing to the fortunate combination of an attractive ceramic surface upon a core of asphalt-asbestos protected steel.

The comprehensive program of research upon the fundamentals of plastic cements has been continued and during the past year has resulted in an innovation in these cements. A simple change in composition effects the synthesis of a rock-forming mineral found in nature and results in what is virtually a new cement, whose physical characteristics qualify it for many other fields of usefulness.

New Method for Testing Refractories.—The multiple industrial fellowship (985) of the American Refractories Institute has continued, under S. M. Phelps, senior fellow, work on developing new test methods for evaluating progress in developmental work, as well as for the control of commercial products while being manufactured.

One of the most important causes for failure of refractories in service is spalling. It was realized some years ago that the test methods then in use

Digitized by Google

were not satisfactory, so the problem of designing a special test which would actually simulate service conditions was studied. This work has led to the development of what is known as the panel spalling test.

The principle of this test is to expose for treatment a section of a furnace wall rather than individual brick. The surface of the panel is heated for a 24-hour period under suitable conditions so as to reproduce the depth and degree of vitrification found in many types of industrial furnaces. The heat-treated panel is then given a series of severe thermal shocks by an alternate heating and cooling, the cooling being accomplished by means of an air blast. The test was conducted on a large number and variety of commercial products, and the data were correlated with the actual behavior of these brands in service. The results were so promising that the test has been accepted by the industry and is now part of the A. S. T. M. test methods. The rather extensive testing equipment necessary for the procedure has also been adopted. Suitable spalling procedures have been incorporated in three A. S. T. M. specifications covering refractories for malleable iron furnaces, stationary boilers, and incinerators.

The accurate determination of alkalies in refractory materials high in alumina has long been a problem. The J. Lawrence Smith method is not entirely satisfactory because the samples are not readily decomposed by the usual procedure. A systematic investigation was made of the procedure, devoting considerable attention to the time and temperature of the fusion. This work showed that it was necessary to control the temperatures accurately in order to obtain complete decomposition of the sample. Loss of alkali by volatilization was overcome by cooling the top portion of the crucible.

Another part of the study had to do with the decomposition of samples by means of a hydrofluoric acid method. After the initial hydrofluoric acid treatment, the R_2O_3 is precipitated in the usual manner, the calcium as oxalate, and the magnesium by 8-hydroxyquinoline. The alkalies are then weighed as sulfates, and, by determining the sulfur trioxide, the alkali content as oxides can be calculated. The details of these methods are to be published.

The question of the effect of furnace gas pressure on the behavior of refractories in industrial furnaces has always been an interesting subject for discussion. During the past year the fellowship conducted experimental work to show the effect of positive and negative furnace pressures on two types of clay refractories. The bricks under test were laid up with joints of a high-shrinking kaolin to allow leakage of gases through the joints, and, for the sake of comparison, some tests were made, using a joint material which produced a monolithic structure. In this study it was clearly demonstrated that positive pressures within the furnace cause the brick to vitrify to a much greater depth, and this results in a subsequent high spalling loss. As would be expected, reduced pressures within the furnace allow cold air to filter through the brickwork, reducing the depth of vitrification, which results in a smaller spalling loss. The use of well-sealed joints reduces the furnace pressure effect but, even so, there is a great difference between positive and negative pressure. For example, with Brand A, the spalling loss resulting from the negative pressure was 2.9 per cent, while positive pressure showed 16.7 per cent loss; and with Brand B, the order was 5.4 per cent and 14.6 per cent. Both of these tests were conducted with the open type of joint material. The results of this study also will be published.

Research on Sodium Hexametaphosphate.—During the past two years Bernard H. Gilmore, as the incumbent of the Calgonizing Fellowship (995), has conducted an extended investigation of the role of this salt in sequestering calicum and magnesium ions as they affect detergent operations in which soap is used or formed. By removing these ions from solution without precipitation, the curdling effect of hard water upon soap is completely inhibited, and all of the soap used in washing operations is held in solution to exercise its full detergent effect. Published contributions from the fellowship have included reports on the use of sodium hexametaphosphate in laundering and in mechanical dishwashing, the cleaning of the foliage of evergreen shrubbery, its use as a veterinary wash for the removal of medication, and for pet-washing in general, and a broad theoretical discussion of the use of sodium hexametaphosphate as an adjuvant to soap in detergency operations. Dr. Gilmore has also investigated the

Digitized by Google

methods for the determination of calcium soap on textile fibers, has pointed out a number of fallacies that have arisen out of the past use of faulty methods, and has recommended an analytical procedure by which trustworthy results may be obtained. This study promises to be of much assistance in the solution of difficulties in textile-dyeing operations.

New Sulfur Cements.—The multiple industrial fellowship (988) sustained by the Texas Gulf Sulphur Co., Inc., New York, N. Y. (incumbents: W. W. Duecker, senior fellow, and C. R. Payne) has continued its broad investigation of problems relating to the utilization of sulfur.

During the year it was announced that acid-resistant cements, made by combining sulfur with an aggregate, could be improved by the addition of certain olefin polysulfides. With the aid of these sulfides, sulfur cement can be made resistant to deterioration by fluctuating temperatures and can also be produced in varying degrees of plasticity. Such cements can be applied as bonding agents or as protective coatings in structures subjected to acids or corrosive solutions. The production of such modified sulfur cements has been undertaken by a commercial company.

Among its other activities the fellowship also rendered assistance to the donor in the preparation of a booklet dealing with the history, production, and uses of sulfur and containing tabulated scientific data of value in the application of this element. The booklet was widely distributed and favorably received.

Improvement of Safety Razors.—E. J. Casselman, on the Magazine Repeating Razor Co.'s Industrial Fellowship (1029), has been engaged in a study of improvements of safety razors, including guard-bar design and razor-blade quality. He has developed a procedure that has resulted in the advancement of the technic of controlling factory methods for sharpening safety razor blades, as well as enabling the manufacturer to specify the correct quality of razor-blade steel.

Organic Synthesis.—The Perkin Medal for 1935 was presented to George O. Curme, Jr., vice president and director of research of the Carbide and Carbon Chemicals Corp., on January 11, 1935, at a joint meeting of scientific societies under the auspices of the American Section of the Society of Chemical Industry. The Carbide and Carbon Chemicals Corp. was formed on a basis of Dr. Curme's research work in the institute in the field of aliphatic chemistry. His achievements emphasize the value of carefully organized and fundamental research work. The research work is still being conducted at the institute by the Carbide and Carbon Chemicals Corp. (fellowship 1019) under the supervision of E. W. Reid, senior fellow.

This fellowship has developed and improved methods for the production of glycol ethers, and several new products of this type were synthesized and their properties examined. Several new plasticizers of the ether-ester type were prepared and tested. The work on the development of new types of vinyl resins was continued. A group of polyethylene amine derivatives of ethylene diamine, particularly triethylene tetramine, was developed for use in the gas purification field for the removal and/or recovery of acid vapors, such as hydrogen sulfide or carbon dioxide. These products are now being produced on a semicommercial scale. The production of morpholine and certain derivatives, such as morpholine ethanol, methyl morpholine, and phenyl morpholine, has been realized and will permit their commercial utilization. New uses have been discovered for the ethylene and morpholine amines. These materials can be used in the purification of liquids in the manufacture of polishes, in new types of medicinals, as textile and dye assistants, and as corrosion inhibitors.

Dental Caries Investigation.—Some studies of the fundamental causes of tooth decay have been made by G. J. Cox and Mary L. Dodds, of the multiple industrial fellowship (958) sustained by The Sugar Institute, Inc. A new type of experimental dental caries has been observed in rats and seems to be related to the diet of the animal—i. e., of the nursing mother at the time of formation of the enamel in the young. The appearance and location of the initial lesions indicate that the decay is not caused by fracture arising from coarse particles of food. As the lesions first appear as opaque areas and later become open cavities, they closely resemble typical enamel caries in the human subject and therefore probably arise by the same process in both species. As susceptibility

Digitized by Google

to tooth decay in the rat seemed to be related to the diet during tooth formation, modifications of the maternal diet were made to determine if caries incidence could be controlled. It was found that caries appeared on diets made up with all the presently recognized essential constituents; but, if such diets were supplemented with certain milk fraction, or with milk itself, the incidence of caries was markedly reduced. These results suggest the existence of a factor which, if present in the diet during a critical period of tooth formation, will aid in the construction of teeth resistant to decay.

Arrangements have been completed with an industrial organization to manufacture and market the chemicals derived from sugar, such as sucrose octaacetate, calcium, levulinate, and the esters of levulinic acid.

Food Research.—The multiple industrial fellowship of the H. J. Heinz Co. (1022), E. R. Harding, senior fellow, developed two new strained foods during 1934. One is a strained cereal for use in the feeding of babies and in special diets. The other is strained apricots, prepared from fresh, undried fruit.

A great deal of work was done on vitamin C with relation to its distribution in vegetable varieties, effect of harvesting and storage of the vegetable, and its destruction in various processes in the manufacture of food products.

Air Hygiene (793).—The Owens automatic filter was kept in operation during the year, so that the continuous record of solid atmospheric pollution at the fellowship's station could be maintained. During the first half of the year there was opportunity to make particle counts with the Owens dust counter and the Hill dust counter. The C. W. A. project mentioned in the last report was continued intermittently to August 2, when it was discontinued until December 6. The work included a study of 2,500 autopsy cases to determine degrees of anthracosis, complicated or uncomplicated by tuberculosis and/or pneumonia; attempts to simplify methods and instrumentation for the study of suspended solids; the building of a spectrograph to be used with photoelectric cells to measure energy from natural light in specific regions; a critical study of circuits for amplification of minute currents; and chemical analyses of fuels as well as of air pollution. The project will continue into 1935.

At the request of the Pennsylvania Railroad, a survey was made to determine the amount and effects of volatile sulfur compounds emitted from stacks of locomotives transferring mail to and from the new post office building in Pittsburgh. A preliminary study of air pollution in Scranton, Pa., with recommendations for abatement, was made by request.

In coöperation with the Smoke Abatement Fellowship (1024), addresses were made on invitation and these and some other activities of the two fellowships were publicized in the continued compaign for general education in the effects of, and rational remedies for, excessive smoke and dust. In particular, Mr. Meller and Mr. Sisson have been keeping closely in touch with government-financed housing projects and the development of building materials and of fuel-burning and air-conditioning equipment.

DEPARTMENT OF RESEARCH IN PURE CHEMISTRY

Studies in the field of cinchona alkaloids have been continued with particular emphasis on following lines which might lead to compounds of value therapeutically in pneumonia. To date fifty-nine different preparations have been tested for toxicity, protection against lethal doses of pneumococci in animals and pneumococcocidal power, in vitro. Many biological and clinical data are being accumulated by Dr. W. W. G. Maclachlan and his associates, Drs. H. H. Permar, John M. Johnston, Joseph R. Kenny, and H. B. Burchell. One paper, "Some Effects of Quinine Derivatives in Experimental Pneumococcus Studies", has been published.

The chemical staff has been enlarged by the addition of B. L. Souther and Mary Hosler during the year.

A paper (at present in press, C. L. Butler, W. L. Nelson, Alice G. Renfrew, and Leonard H. Cretcher) on "Cinchona Alkaloids in Pneumonia" was presented at the September 1934 meeting of the American Chemical Society. A completed research on the action of sodium and sodium amide has been accepted for publication (Alice G. Renfrew and Leonard H. Cretcher). Studies on the preparation of apoquinine and its ethyl and hydroxyethyl ethers are practically

Digitized by Google

ready for publication. Other aqoquinine ethers, such as the methyl, isopropyl, and higher alkyl ethers, will be studied further. The preparation and alkylation of cinchona alkaloid oxides are under way. To date the most interesting compounds studied, from the medical point of view, have been hydroxyethylhydrocupreine, apoquinine, ethylapoquinine, and hydroxyethylapoquinine.

Revision of the United States Pharmacopeia.—The institute has taken an active part, during the past five years, in the preparation of the Eleventh Revision of the United States Pharmacopeia. This work is of particular importance at this time because of new responsibilities that will be placed upon manufacturers should pending food and drug legislation be enacted by the Congress. G. D. Beal during this period has served as chairman of the Revision Committee's Subcommittee on Organic Chemicals, in which he has been assisted by C. R. Szalkowski, assistant in the Department of Research in Pure Chemistry. Dr. Beal is also a member of the Subcommittees on Proximate Assays and Reagents and Test Solutions, and has taken an active part in the deliberations of the Subcommittee on Inorganic Chemicals.

U. S. P. XI will contain among its official titles standards for about 200 substances classified as organic chemicals, of which approximately 10 percent are receiving pharmacopeial recognition for the first time. Changes in manufacturing procedures, newly discovered scientific data and therapeutic needs, and the necessity in some cases for more rigid standardization have made imperative the revision of many assays and tests for purity, and the development of new assay processes for the elimination of hitherto unrecognized inaccuracies.

Included in the studies that have been completed during the five-year period are: A critical study of the melting point of acetylsalicylic acid, the determination of aldehydes and peroxides in ether, the detection of gelatin in agar, a volumetric (iodometric) assay for organic nitrites and nitroglycerin, the detection of rosin and rosin oil in balsams, the differentiation between barbital and phenobarbital, a gravimetric method for the assay of camphor and its preparations made necessary by the admission of optically inactive synthetic camphor, the detection of acetone in chloroform, the assay of chloroformic preparations, the detection of carnauba wax in beeswax, the assay of compound solution of cresol, two methods for the chemical evaluation of methylene blue, an investigation of the water of crystallization of quinine sulfate, the evaluation of the adsorptive properties of medicinal charcoal, the detection of antipyrine in amidopyrine, the revision of the pharmacopeial standards for soap, and a critical study of the methods for the chemical assay of thyroid preparations. Many other tests and assays have been carefully rechecked. Six papers have been published and as many more will appear within the next few months.

RESEARCH AT WESTERN PENNSYLVANIA HOSPITAL

The coöperative work with the Institute of Pathology of the Western Pennsylvania Hospital in Pittsburgh, made through arrangements with Dr. C. B. Schildecker, has been continued. These studies are being carried out by twelve scientists under the direction of Dr. R. R. Mellon. This work covers a broad investigaton of pneumonia and allied pulmonary diseases. Considerable advancement has been made in an anti-pneumococcic serum and an anti-streptococcic serum.

BIBLIOGRAPHIC INFORMATION

During the calendar year 1934, 11 bulletins, 19 research reports, and 41 other papers were contributed to the literature by members of the institute. Fifty-two U. S. patents and 49 foreign patents were issued to fellows. The total publications for the 24 years ended December 31, 1934, have been 18 books, 122 bulletins, 704 research reports, 1,023 other articles, and 582 U. S. patents.

The seventh annual supplement to Bulletin No. 2 of the Institute's Bibliographic Series was printed and distributed. The eighth supplement is being prepared for publication by Henrietta Kornhauser, librarian. Copies of this bulletin and its supplements, which list the books, bulletins, journal contributions, and patents (U. S. and foreign) of the institute's membership, 1911–35, will be supplied, gratis, to laboratory directors, librarians, and science teachers upon request.

Industrial fellowships in operation at Mellon Institute during the fiscal year, Mar. 1, 1934, to Mar. 1, 1935

Fellowship no.	Fellowship name (with foundation year)	Fellows and assistants	End of fellowship year
793	Air Pollution (1928)	H. B. Meller (E. M., University of Pittsburgh)	Sept. 15, 1935
931	Cleaning (1921)	L. E. Jackson (B. S., University of Kansas)	May 1, 1934
936	Phytochemistry (1932)	C. F. Bailey (Ph. D., University of Wisconsin)	June 1, 1935
950	Velvet (1928)	G. S. Hiers (Ph. D., University of Illinois)	Sept. 1, 1934
951	Vanadium (1933)	R. C. Briant (B. S., Lafayette College)	May 1, 1934
958	Sugar (1930)	G. J. Cox (Ph. D., University of Illinois), senior fellow.	Oct. 1, 1934
		May L. Dodds (M. S., University of Pittsburgh).	
		W. E. Walker, assistant.	
		J. J. Enright (Ph. D., Yale University), assistant, to July 1, 1934.	
960	Phosphates (1933)	Adolphus Koenig (M. D., University of Pittsburgh).	Nov. 1, 1934
963	Paper Finishing (1923)	Marc Darrin (M. S., University of Washington)	June 15, 1934
		V. H. Hayden, assistant.	
974	Tire Bead (1931)	H. E. Foote (Ph. D., Brown University)	Apr. 1, 1935
		John Metschl (Ph. D., University of Wisconsin), assistant, from Apr. 3, 1934, to Mar. 1, 1935.	
		T. R. LeCompte (Ph. D., Columbia University), assistant, to Mar. 3, 1934.	
978	Slag (1921)	Tracy Bartholomew (E. M., Colorado School of Mines).	Sept. 21, 1935
979	Cosmetics (1933)	W. L. Nelson (Ph. D., University of Pittsburgh).	Nov. 15, 1935
980	Starch (1934)	D. L. Sherk (Ph. D., University of Wisconsin)	Apr. 15, 1935
982	Carbon Black (1927)	C. W. Sweitzer (Ph. D., University of Toronto)	Apr. 1, 1935
983	Pressing Machinery (1928)	E. R. Clark (M. S., University of Pittsburgh)	Apr. 1, 1935
984	Nitrogen Compounds (1933)	P. J. Wilson, Jr. (B. S., University of Michigan), senior fellow.	May 1, 1935
		J. H. Wells (Ph. D., Cornell University)	
985	Refractories (1917)	S. M. Phelps, senior fellow	May 1, 1935
		E. B. Read (B. S., Kenyon College).	
		Vance Cartwright (M. S., University of Washington).	
		E. C. Petrie (B. Cer. E., Ohio State University).	
986	Safety Fuse (1930)	D. E. Pearsall (Ch. E., University of Pennsylvania).	May 1, 1935
987	Bread (1930)	H. A. Kohman (Ph. D., University of Kansas)	May 1, 1935
988	Sulfur (1931)	W. W. Duecker (Ph. D., Iowa State College) senior fellow.	May 15, 1935
		C. R. Payne (Ph. D., University of Pittsburgh)	
989	Cotton Yarns (1925)	C. F. Goldthwait (B. S., Worcester Polytechnic Institute), senior fellow.	May 16, 1935
		E. R. McLean (B. T. C., Lowell Textile Institute).	
990	Stone (1934)	R. C. Briant (B. S., Lafayette College)	May 1, 1935
991	Detergent (1932)	R. R. Fulton (A. B., University of Kansas)	June 1, 1935
		Pauline M. Hopfer (B. S., University of Pittsburgh), assistant, from July 16 to Dec. 13, 1934.	
992	Protected Metals (1918)	J. H. Young (Ph. D., Ohio State University), senior fellow.	June 1, 1935
		P. W. Jenkins (B. S., University of Pittsburgh)	
		A. W. Coffman (Ph. D., University of Illinois)	
		D. S. Hubbell (M. S., Ohio State University)	
993	Cottonseed Products (1930)	A. W. Harvey (Ph. D., University of Pittsburgh).	June 15, 1935
994	Abrasives (1930)	A. P. Thompson (Ph. D., University of Illinois)	Jan. 1, 1936
995	Calgonizing (1933)	B. H. Gilmore (Ph. D., Ohio State University)	June 15, 1935
996	New Plastics (1933)	E. H. Balz (Ph. D., University of Pittsburgh)	July 1, 1935
997	Closure (1934)	Marc Darrin (M. S., University of Washington)	June 15, 1935
		Elinor A. Sackter (B. S., University of Pittsburgh), assistant, from Oct. 18, 1934.	
998	Rayon (1933)	W. B. Burnett (Ph. D., University of Illinois), senior fellow.	July 15, 1935
		L. V. Clark (B. S., Grove City College)	
999	Pharmaceuticals (1922)	H. W. Coles (Ph. D., Iowa State College)	July 1, 1935
1000	Insecticides (1917)	O. F. Hedenburg (Ph. D., University of Chicago).	July 1, 1935
		Elinor A. Sackter (B. S., University of Pittsburgh), assistant, from Mar. 5 to June 1, 1934.	
1001	Yeast (1931)	R. R. Irvin (M. S., University of Kansas), senior fellow.	Aug. 1, 1935
		M. W. Mead (Ph. D., University of Pittsburgh)	
1002	Steel (1927)	S. A. Braley (Ph. D., University of Illinois)	Aug. 1, 1935
1003	Anthracite (1932)	H. J. Rose (Sc. D., Yankton College,) senior fellow.	Aug. 15, 1935
		F. P. Lasseter (Ph. D., Columbia University)

ANTITRUST LAWS WITH AMENDMENTS, 1890–1923

[PUBLIC—No. 190]

AN ACT To protect trade and commerce against unlawful restraints and monopolies

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding five thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monoplize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding five thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 3. Every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and any State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding five thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 4. The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 5. Whenever it shall appear to the court before which any proceeding under section four of this act may be pending, that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 6. Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in section one of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law.

Digitized by Google

SEC. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of any thing forbidden or declared to be unlawful by this act, may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

SEC. 8. That the word "person," or "persons," wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country.

Approved, July 2, 1890.

[PUBLIC LAW No. 227—53d CONGRESS]

(Extract from)

SEC. 73. That every combination, conspiracy, trust, agreement, or contract is hereby declared to be contrary to public policy, illegal, and void, when the same is made by or between two or more persons or corporations either of whom is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade, or free competition in lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any manufacture into which such imported article enters or is intended to enter. Every person who is or shall hereafter be engaged in the importation of goods or any commodity from any foreign country in violation of this section of this Act, or who shall combine or conspire with another to violate the same, is guilty of a misdemeanor, and, on conviction thereof in any court of the United States, such person shall be fined in a sum not less than one hundred dollars and not exceeding five thousand dollars, and shall be further punished by imprisonment, in the discretion of the court, for a term not less than three months nor exceeding twelve months.

SEC. 74. That the several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of section seventy-three of this Act; and it shall be the duty of the several district attorneys of the United Staets, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petitions setting forth the case and praying that such violations shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 75. That whenever it shall appear to the court before which any proceeding under the seventy-fourth section of this Act may be pending, that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 76. That any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in section seventy-three of this Act, and being in the course of transportation from one State to another, or to or from a Territory, or the District of Columbia, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law.

SEC. 77. That any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this Act may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

Received by the President, August 15, 1894.

[NOTE BY THE DEPARTMENT OF STATE.—The foregoing act having been presented to the President of the United States for his approval, and not having been returned by him to the house of Congress in which it originated within the time prescribed by the Constitution of the United States, has become a law without his approval.]

[PUBLIC LAW No. 11—55TH CONGRESS]

(Extract from)

And provided further, That nothing in this Act shall be construed to repeal or in any manner affect the sections numbered seventy-three, seventy-four, seventy-five, seventy-six, and seventy-seven of an Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," which became a law on the twenty-eighth[1] day of August, eighteen hundred and ninety-four.

Approved, July 24, 1897.

[PUBLIC—No. 82]

AN ACT To expedite the hearing and determination of suits in equity pending or hereafter brought under the Act of July second, eighteen hundred and ninety, entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," "An Act to regulate commerce," approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that may be hereafter enacted

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in any suit in equity pending or hereafter brought in any circuit court of the United States under the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety, "An Act to regulate commerce," approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that hereafter may be enacted, wherein the United States is complainant, the Attorney General may file with the clerk of such court a certificate that, in his opinion, the case is of general public importance, a copy of which shall be immediately furnished by such clerk to each of the circuit judges of the circuit in which the case is pending. Thereupon such case shall be given precedence over others and in every way expedited, and be assigned for hearing at the earliest practicable day, before not less than three of the circuit judges of said circuit, if there be three or more; and if there be not more than two circuit judges, then before them and such district judge as they may select. In the event the judges sitting in such case shall be divided in opinion, the case shall be certified to the Supreme Court for review in like manner as if taken there by appeal as hereinafter provided.

SEC. 2. That in every suit in equity pending or hereafter brought in any circuit court of the United States under any of said Acts, wherein the United States is complainant, including cases submitted but not yet decided, an appeal from the final decree of the circuit court will lie only to the Supreme Court and must be taken within sixty days from the entry thereof: *Provided*, That in any case where an appeal may have been taken from the final decree of a circuit court to the circuit court of appeals before this Act takes effect, the case shall proceed to a final decree therein, and an appeal may be taken from such decree to the Supreme Court in the manner now provided by law.

Approved, February 11, 1903.

[PUBLIC LAW No. 87—57TH CONGRESS]

(Extract from)

SEC. 6. That there shall be in the Department of Commerce and Labor a bureau to be called the Bureau of Corporations, and a Commissioner of Corporations, who shall be the head of said bureau, to be appointed by the Presi-

[1] Date is incorrect. It should read August 27, 1894. See Supp. Rev. Stat., vol. 2, p. 334.

dent, who shall receive a salary of five thousand dollars per annum. There shall also be in said bureau a deputy commissioner, who shall receive a salary of three thousand five hundred dollars per annum, and who shall, in the absence of the Commissioner, act as and perform the duties of the Commissioner of Corporations, and who shall perform such other duties as may be assigned to him by the Secretary of Commerce and Labor or by the said Commissioner. There shall also be in the said bureau a chief clerk and such special agents, clerks, and other employees as may be authorized by law.

The said Commissioner shall have power and authority to make, under the direction and control of the Secretary of Commerce and Labor, diligent investigation into the organization, conduct, and management of the business of any corporation, joint stock company, or corporate combination engaged in the commerce among the several States and with foreign nations, excepting common carriers subject to "An act to regulate Commerce," approved February fourth, eighteen hundred and eighty-seven, and to gather such information and data as will enable the President of the United States to make recommendations to Congress for legislation for the regulation of such commerce, and to report such data to the President from time to time as he shall require; and the information so obtained or as much thereof as the President may direct shall be made public.

In order to accomplish the purposes declared in the foregoing part of this section, the said Commissioner shall have and exercise the same power and authority in respect to corporations, joint stock companies, and combinations subject to the provisions hereof, as is conferred on the Interstate Commerce Commission in said "Act to regulate commerce" and the amendments thereto in respect to common carriers so far as the same may be applicable, including the right to subpœna and compel the attendance and testimony of witnesses and the production of documentary evidence and to administer oaths. All the requirements, obligations, liabilities, and immunities imposed or conferred by said "Act to regulate commerce" and by "An Act in relation to testimony before the Interstate Commerce Commission," and so forth, approved February eleventh, eighteen hundred and ninety-three, supplemental to said "Act to regulate commerce," shall also apply to all persons who may be subpœnaed to testify as witnesses or to produce documentary evidence in pursuance of the authority conferred by this section.

It shall also be the province and duty of said bureau, under the direction of the Secretary of Commerce and Labor, to gather, compile, publish, and supply useful information concerning corporations doing business within the limits of the United States as shall engage in interstate commerce or in commerce between the United States and any foreign country, including corporations engaged in insurance, and to attend to such other duties as may be hereafter provided by law.

Approved, February 14, 1903.

[PUBLIC RESOLUTION—No. 8]

JOINT RESOLUTION Instructing the Interstate Commerce Commission to make examinations into the subject of railroad discriminations and monopolies in coal and oil, and report on the same from time to time

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Interstate Commerce Commission be, and is hereby, authorized and instructed immediately to inquire, investigate, and report to Congress, or to the President when Congress is not in session, from time to time as the investigation proceeds—

First. Whether any common carriers by railroad, subject to the interstate-commerce Act, or either of them, own or have any interest in, by means of stock ownership in other corporations or otherwise, any of the coal or oil which they, or either of them, directly or through other companies which they control or in which they have an interest, carry over their or any of their lines as common carriers, or in any manner own, control, or have any interest in coal lands or properties or oil land or properties.

Second. Whether the officers of any of the carrier companies aforesaid, or any of them, or any person or persons charged with the duty of distributing cars or furnishing facilities to shippers are interested, either directly or in-

Digitized by Google

directly, by means of stock ownership or otherwise in corporations or companies owning, operating, leasing, or otherwise interested in any coal mines, coal properties, or coal traffic, oil, oil properties, or oil traffic over the railroads with which they or any of them are connected or by which they or any of them are employed.

Third. Whether there is any contract, combination in the form of trust, or otherwise, or conspiracy in restraint of trade or commerce among the several States, in which any common carrier engaged in the transportation of coal or oil is interested, or to which it is a party; and whether any such common carrier monopolizes, or attempts to monopolize, or combines or conspires with any other carrier, company or companies, person or persons to monopolize any part of the trade or commerce in coal or oil, or traffic therein among the several States or with foreign nations, and whether or not, and if so, to what extent, such carriers, or any of them, limit or control, directly or indirectly, the output of coal mines or the price of coal and oil fields or the price of oil.

Fourth. If the Interstate Commerce Commission shall find that the facts or any of them set forth in the three paragraphs above do exist, then that it be further required to report as to the effect of such relationship, ownership, or interest in coal or coal properties and coal traffic, or oil, oil properties, or oil traffic aforesaid, or such contracts or combinations in form of trust or otherwise, or conspiracy or such monopoly or attempt to monopolize or combine or conspire as aforesaid, upon such person or persons as may be engaged independently of any other persons in mining coal or producing oil and shipping the same, or other products, who may desire to so engage, or upon the general public as consumers of such coal or oil.

Fifth. That said Commission be also required to investigate and report the system of car supply and distribution in effect upon the several railway lines engaged in the transportation of coal or oil as aforesaid, and whether said systems are fair and equitable, and whether the same are carried out fairly and properly; and whether said carriers, or any of them, discriminate against shippers or parties wishing to become shippers over their several lines, either in the matter of distribution of cars or in furnishing facilities or instrumentalities connected with receiving, forwarding, or carrying coal or oil as aforesaid.

Sixth. That said Commission be also required to report as to what remedy it can suggest to cure the evils above set forth, if they exist.

Seventh. That said Commission be also required to report any facts or conclusions which it may think pertinent to the general inquiry above set forth.

Eighth. That said Commission be required to make this investigation at its earliest possible convenience and to furnish the information above required from time to time and as soon as it can be done consistent with the performance of its public duty.

Approved, March 7, 1906.

[PUBLIC LAW No. 105—59TH CONGRESS]

(Extract from)

To enable the Interstate Commerce Commission to give effect to the provisions of the Act to regulate commerce and all Acts and amendments supplementary thereto, including the joint resolution "instructing the Interstate Commerce Commission to make examinations into the subject of railroad discriminations and monopolies in coal and oil, and report on the same from time to time," approved March seventh, nineteen hundred and six, the sum of forty-five thousand dollars is hereby transferred to said Commission and made available for the remainder of the fiscal year nineteen hundred and six, from the balance of the appropriation of five hundred thousand dollars for the enforcement of "An Act to regulate commerce" and all Acts amendatory thereof or supplemental thereto, and other Acts mentioned in said appropriation, made in the legislative, executive, and judicial appropriation Act for the fiscal year nineteen hundred and four, and reappropriated for the fiscal year nineteen hundred and six by the sundry civil appropriation Act, under the Department of Justice: *Provided*, That the total amount that may be expended in the employment of counsel by the Interstate Commerce Commission shall not exceed the sum of forty-five thousand dollars during the fiscal year nineteen hundred and six.

Approved, April 16, 1906.

[PUBLIC—No. 389]

AN ACT Defining the right of immunity of witnesses under the Act entitled "An Act in relation to testimony before the Interstate Commerce Commission," and so forth, approved February eleventh, eighteen hundred and ninety-three, and an Act entitled "An Act to establish the Department of Commerce and Labor," approved February fourteenth, nineteen hundred and three, and an Act entitled "An Act to further regulate commerce with foreign nations and among the States," approved February nineteenth, nineteen hundred and three, and an Act entitled "An Act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June thirtieth, nineteen hundred and four, and for other purposes," approved February twenty-fifth, nineteen hundred and three

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That under the immunity provisions in the Act entitled "An Act in relation to testimony before the Interstate Commerce Commission," and so forth, approved February eleventh, eighteen hundred and ninety-three, in section six of the Act entitled "An Act to establish the Department of Commerce and Labor," approved February fourteenth, nineteen hundred and three, and in the Act entitled "An Act to further regulate commerce with foreign nations and among the States," approved February nineteen, nineteen hundred and three, and in the Act entitled "An Act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June thirtieth, nineteen hundred and four, and for other purposes," approved February twenty-fifth, nineteen hundred and three, immunity shall extend only to a natural person who, in obedience to a subpœna, gives testimony under oath or produces evidence, documentary or otherwise, under oath.

Approved, June 30, 1906.

[PUBLIC—No. 310]

(H. R. 26233)

AN ACT To amend an Act entitled "An Act to expedite the hearing and determination of suits in equity pending or hereafter brought under the Act of July second, eighteen hundred and ninety, entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies,' 'An Act to regulate commerce,' approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that may be hereafter enacted," approved February eleventh, nineteen hundred and three

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section one of the Act entitled "An Act to expedite the hearing and determination of suits in equity pending or hereafter brought under the Act of July second, eighteen hundred and ninety, entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies,' 'An Act to regulate commerce,' approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that may be hereafter enacted," approved February eelventh, nineteen hundred and three, be, and the same is hereby, amended so as to read as follows:

"That in any suit in equity pending or hereafter brought in any circuit court of the United States under the Act entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies,' approved July second, eighteen hundred and ninety, 'An Act to regulate commerce,' approved February fourth, eighteen hundred and eighty-seven, or any other Acts having a like purpose that hereafter may be enacted, wherein the United States is complainant, the Attorney General may file with the clerk of such court a certificate that, in his opinion, the case is of general public importance, a copy of which shall be immediately furnished by such clerk to each of the circuit judges of the circuit in which the case is pending. Thereupon such case shall be given precedence over others and in every way expedited, and be assigned for hearing at the earliest practicable day, before not less than three of the circuit judges of said court, if there be three or more; and if there be not more than two circuit judges, then before them and such district judge as they may select; or, in case the full court shall not at any time be made up by reason of the necessary absence or disqualification of one or more of the said circuit judges, the justice of the Supreme Court assigned to that circuit or the other circuit judge or judges may designate a district judge or judges within the circuit who shall be competent to sit in said court at the hearing of said suit. In the event the judges sitting in such case shall be equally divided in opinion

Digitized by Google

as to the decision or disposition of said cause, or in the event that a majority of said judges shall be unable to agree upon the judgment, order, or decree finally disposing of said case in said court which should be entered in said cause, then they shall immediately certify that fact to the Chief Justice of the United States, who shall at once designate and appoint some circuit judge to sit with said judges and to assist in determining said cause. Such order of the Chief Justice shall be immediately transmitted to the clerk of the circuit court in which said cause is pending, and shall be entered upon the minutes of said court. Thereupon said cause shall at once be set down for re-argument and the parties thereto notified in writing by the clerk of said court of the action of the court and the date fixed for the reargument thereof. The provisions of this section shall apply to all causes and proceedings in all courts now pending, or which may hereafter be brought.

Approved, June 25, 1910.

[PUBLIC—No. 475—61ST CONGRESS]

(Extract from)

Twenty-third. Of all suits and proceedings arising under any law to protect trade and commerce against restraints and monopolies.

Approved, March 3, 1911.

[PUBLIC—No. 479—61ST CONGRESS]

(Extract from)

ARMOR AND ARMAMENT: Toward the armor and armament for vessels authorized, ten million five hundred and thirty-two thousand nine hundred and twenty-eight dollars: *Provided*, That no part of this appropriation shall be expended for armor for vessels except upon contracts for such armor when awarded by the Secretary of the Navy to the lowest responsible bidders, having in view the best results and most expeditious delivery: *Provided further*, That no part of this appropriation shall be expended for the purchase of armor or armament from any persons, firms or corporations, that have entered into any combination, agreement, conspiracy or understanding, the effect, object or purpose of which is to deprive the Government of fair, open and unrestricted competition in letting contracts for the furnishing of any of said armor or armament.

Approved, March 4, 1911.

[PUBLIC LAW No. 290—62D CONGRESS]

(Extract from)

That no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States, or the commerce or trade between the State and any Territory or the District of Columbia, in any of the articles aforesaid, and no purchase of structural steel, ship plates, or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture. But this limitation shall in no case apply to any existing contract.

Approved, August 22, 1912.

[PUBLIC LAW No. 302—62D CONGRESS]

(Extract from)

Enforcement of antitrust laws: For the enforcement of antitrust laws, including not exceeding $10,000 for salaries of necessary employees at the seat of government, $200,000.

Approved, August 24, 1912.

Digitized by Google

[PUBLIC LAW No. 302—62D CONGRESS]

(Extract from)

That no part of any appropriation made under this Act for the following purposes, namely, conduct of customs cases; defending suits and claims against the United States; detection and prosecution of crime; defenses in Indian depredation claims; enforcement of antitrust laws; suits to set aside conveyances of allotted lands, Five Civilized Tribes; enforcement of acts to regulate commerce; for payment of assistants to the Attorney General and to United States district attorneys employed by the Attorney General to aid in special cases; and for payment of such miscellaneous expenditures as may be authorized by the Attorney General for the United States courts and their officers; shall be used for the payment of any salary, fee, compensation, or allowance in any form whatever to any person who holds any other office, place, position, or appointment under the United States Government, or any department thereof, or to anyone hereafter appointed, designated, or employed, who within one year next preceding the date of his appointment, designation, or employment has held any other office, place, position, or appointment under the United States Government or any department thereof: *Provided*, That this inhibition shall not apply except in cases where the persons appointed, designated, employed or paid shall have previously rendered service in connection with the same subject matter: *And provided further*, That nothing in the foregoing provision shall prevent or authorize a person who holds an office, place, position, or appointment under the United States Government, or any department thereof, from being detailed to other work falling under the appropriations for the purpose hereinbefore named, and from being paid out of said appropriations, the amount of all the payments not to exceed the amount of compensation which said person would have received from his regular office, place, position, or appointment, together with his expenses incident to the temporary detail.

Approved, August 24, 1912.

[PUBLIC LAW No. 337—62D CONGRESS]

(Extract from)

No vessel permitted to engage in the coastwise or foreign trade of the United States shall be permitted to enter or pass through said canal if such ship is owned, chartered, operated, or controlled by any person or company which is doing business in violation of the provisions of the Act of Congress approved July second, eighteen hundred and ninety, entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," of the provisions of sections seventy-three to seventy-seven, both inclusive, of an Act approved August twenty-seventh, eighteen hundred and ninety-four, entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," or the provisions of any other Act of Congress amending or supplementing the said Act of July second, eighteen hundred and ninety, commonly known as the Sherman Anti-trust Act, and amendments thereto, or said sections of the Act of August twenty-seventh, eighteen hundred and ninety-four. The question of fact may be determined by the judgment of any court of the United States of competent jurisdiction in any cause pending before it to which the owners or operators of such ship are parties. Suit may be brought by any shipper or by the Attorney General of the United States.

Approved, August 24, 1912.

[PUBLIC—No. 370]

(H. R. 25002)

AN ACT To amend section seventy-three and section seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes"

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section seventy-three and section

seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," be, and the same are hereby, amended to read as follows:

"SEC. 73. That every combination, conspiracy, trust, agreement, or contract is hereby declared to be contrary to public policy, illegal, and void when the same is made by or between two or more persons or corporations either of whom, as agent or principal, is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade, or free competition in lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any manufacture into which such imported article enters or is intended to enter. Every person who is or shall hereafter be engaged in the importation of goods or any commodity from any foreign country in violation of this section of this Act, or who shall combine or conspire with another to violate the same, is guilty of a misdemeanor, and on conviction thereof in any court of the United States such person shall be fined in a sum not less than one hundred dollars and not exceeding five thousand dollars, and shall be further punished by imprisonment, in the discretion of the court, for a term not less than three months nor exceeding twelve months."

"SEC. 76. That any property owned under any contract or by any combination, or pursuant to any conspiracy, and being the subject thereof, mentioned in section seventy-three of this Act, imported into and being within the United States or being in the course of transportation from one State to another, or to or from a Territory or the District of Columbia, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law."

Approved, February 12, 1913.

[PUBLIC—No. 416]

(S. 8000)

AN ACT Providing for publicity in taking evidence under Act of July second, eighteen hundred and ninety

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in the taking of depositions of witnesses for use in any suit in equity brought by the United States under the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety, and in the hearings before any examiner or special master appointed to take testimony therein, the proceedings shall be open to the public as freely as are trials in open court; and no order excluding the public from attendance on any such proceedings shall be valid or enforceable.

Approved, March 3, 1913.

[PUBLIC LAW No. 433—62D CONGRESS]

(Extract from)

That no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States, or the commerce or trade between the States and any Territory or the District of Columbia, in any of the articles aforesaid, and no purchase of structural steel, ship plates, or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture. But this limitation shall in no case apply to any existing contract.

Approved, March 4, 1913.

[PUBLIC LAW No. 121—63D CONGRESS]

(Extract from)

That no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States, or the commerce or trade between the States and any Territory or the District of Columbia, in any of the articles aforesaid, and no purchase of structural steel, ship plates, or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture. But this limitation shall in no case apply to any existing contract.

Approved, June 30, 1914.

[PUBLIC LAW No. 161—63D CONGRESS]

(Extract from)

Enforcement of antitrust laws: For the enforcement of antitrust laws, including not exceeding $15,000 for salaries of necessary employees at the seat of government, $300,000: *Provided, however,* That no part of this money shall be spent in the prosecution of any organization or individual for entering into any combination or agreement having in view the increasing of wages, shortening of hours or bettering the conditions of labor, or for any act done in furtherance thereof, not in itself unlawful: *Provided further,* That no part of this appropriation shall be expended for the prosecution of producers of farm porducts and associations of farmers who cooperate and organize in an effort to and for the purpose to obtain and maintain a fair and reasonable price for their products.

Approved, August 1, 1914.

[PUBLIC—No. 203—63D CONGRESS]

(H. R. 15613)

AN ACT To create a Federal Trade Commission, to define its powers and duties, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a commission is hereby created and established, to be known as the Federal Trade Commission (hereinafter referred to as the commission), which shall be composed of five commissioners, who shall be appointed by the President, by and with the advice and consent of the Senate. Not more than three of the commissioners shall be members of the same political party. The first commissioners appointed shall continue in office for terms of three, four, five, six, and seven years, respectively, from the date of the taking effect of this Act, the term of each to be designated

Digitized by Google

by the President, but their successors shall be appointed for terms of seven years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the commissioner whom he shall succeed. The commission shall choose a chairman from its membership. No commissioner shall engage in any other business, vocation, or employment. Any commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. A vacancy in the commission shall not impair the right of the remaining commissioners to exercise all the powers of the commission.

The commission shall have an official seal, which shall be judicially noticed.

SEC. 2. That each commissioner shall receive a salary of $10,000 a year, payable in the same manner as the salaries of the judges of the courts of the United States. The commission shall appoint a secretary, who shall receive a salary of $5,000 a year, payable in like manner, and it shall have authority to employ and fix the compensation of such attorneys, special experts, examiners, clerks, and other employees as it may from time to time find necessary for the proper performance of its duties and as may be from time to time appropriated for by Congress.

With the exception of the secretary, a clerk to each commissioner, the attorneys, and such special experts and examiners as the commission may from time to time find necessary for the conduct of its work, all employees of the commission shall be a part of the classified civil service, and shall enter the service under such rules and regulations as may be prescribed by the commission and by the Civil Service Commission.

All of the expenses of the commission, including all necessary expenses for transportation incurred by the commissioners or by their employees under their orders, in making any investigation, or upon official business in any other places than in the city of Washington, shall be allowed and paid on the presentation of itemized vouchers therefor approved by the commission.

Until otherwise provided, by law, the commission may rent suitable offices for its use.

The Auditor for the State and Other Departments shall receive and examine all accounts of expenditures of the commission.

SEC. 3. That upon the organization of the commission and election of its chairman, the Bureau of Corporations and the offices of Commissioner and Deputy Commissioner of Corporations shall cease to exist; and all pending investigations and proceedings of the Bureau of Corporations shall be continued by the commission.

All clerks and employees of the said bureau shall be transferred to and become clerks and employees of the commission at their present grades and salaries. All records, papers, and property of the said bureau shall become records, papers, and property of the commission, and all unexpended funds and appropriations for the use and maintenance of the said bureau, including any allotment already made to it by the Secretary of Commerce from the contingent appropriation for the Department of Commerce for the fiscal year nineteen hundred and fifteen, or from the departmental printing fund for the fiscal year nineteen hundred and fifteen, shall become funds and appropriations available to be expended by the commission in the exercise of the powers, authority, and duties conferred on it by this Act.

The principal office of the commission shall be in the city of Washington, but it may meet and exercise all its powers at any other place. The commission may, by one or more of its members, or by such examiners as it may designate, prosecute any inquiry necessary to its duties in any part of the United States.

SEC. 4. That the words defined in this section shall have the following meaning when found in this Act, to wit:

"Commerce" means commerce among the several States or with foreign nations, or in any Territory of the United States or in the District of Columbia, or between any such Territory and another, or between any such Territory and any State or foreign nation, or between the District of Columbia and any State or Territory or foreign nation.

"Corporation" means any company or association incorporated or unincorporated, which is organized to carry on business for profit and has shares of capital or capital stock, and any company or association, incorporated or unincorporated, without shares or capital stock, except partnerships, which is organized to carry on business for its own profit or that of its members.

Digitized by Google

"Documentary evidence" means all documents, papers, and correspondence in existence at and after the passage of this Act.

"Acts to regulate commerce" means the Act entitled "An Act to regulate commerce," approved February fourteenth, eighteen hundred and eighty-seven, and all Acts amendatory thereof and supplementary thereto.

"Antitrust acts" means the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety; also the sections seventy-three to seventy-seven, inclusive, of an Act entitled "An Act to reduce taxation to provide revenue for the Government, and for other purposes," approved August twenty-seventh, eighteen hundred and ninety-four; and also the Act entitled "An Act to amend sections seventy-three and seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled 'An Act to reduce taxation, to provide revenue for the Government, and for other purposes,'" approved February twelfth, nineteen hundred and thirteen.

SEC. 5. That unfair methods of competition in commerce are hereby declared unlawful.

The commission is hereby empowered and directed to prevent persons, partnerships, or corporations, except banks, and common carriers subject to the Acts to regulate commerce, from using unfair methods of competition in commerce.

Whenever the commission shall have reason to believe that any such person, partnership, or corporation has been or is using any unfair methods of competition in commerce, and if it shall appear to the commission that a proceeding by it in respect thereof would be to the interest of the public, it shall issue and serve upon such person, partnership, or corporation a complaint stating its charges in that respect, and containing a notice of a hearing upon a day and at a place therein fixed at least thirty days after the service of said complaint. The person, partnership, or corporation so complained of shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the commission requiring such person, partnership, or corporation to cease and desist from the violation of the law so charged in said complaint. Any person, partnership, or corporation may make application, and upon good cause shown may be allowed by the commission, to intervene and appear in said proceeding by counsel or in person. The testimony in any such proceeding shall be reduced to writing and filed in the office of the commission. If upon such hearing the commission shall be of the opinion that the method of competition in question is prohibited by this Act, it shall make a report in writing in which it shall state its findings as to the facts, and shall issue and cause to be served on such person, partnership, or corporation an order requiring such person, partnership, or corporation to cease and desist from using such method of competition. Until a transcript of the record in such hearing shall have been filed in a circuit court of appeals of the United States, as hereinafter provided, the commission may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section.

If such person, partnership, or corporation fails or neglects to obey such order of the commissison while the same is in effect, the commission may apply to the circuit court of appeals of the United States, within any circuit where the method of competition in question was used or where such person, partnership, or corporation resides or carries on business, for the enforcement of its order, and shall certify and file with its application a transcript of the entire record in the proceeding, including all the testimony taken and the report and order of the commission. Upon such filing of the application and transcript the court shall cause notice thereof to be served upon such person, partnership, or corporation and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to make and enter upon the pleadings, testimony, and proceedings set forth in such transcript a decree affirming, modifying, or setting aside the order of the commission. The findings of the commission as to the facts, if supported by testimony, shall be conclusive. If either party shall apply to the court for leave to adduce additional evidence, and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the commission, the court may order such additional evidence to be taken before the commission and to be adduced upon the

Digitized by Google

hearing in such manner and upon such terms and conditions as to the court may seem proper. The commission may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, which, if supported by testimony, shall be conclusive, and its recommendation, if any, for the modification or setting aside of its original order, with the return of such additional evidence. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certiorari as provided in section two hundred and forty of the Judicial Code.

Any party required by such order of the commission to cease and desist from using such method of competition may obtain a review of such order in said circuit court of appeals by filing in the court a written petition praying that the order of the commission be set aside. A copy of such petition shall be forthwith served upon the commission, and thereupon the commission forthwith shall certify and file in the court a transcript of the record as hereinbefore provided. Upon the filing of the transcript the court shall have the same jurisdiction to affirm, set aside, or modify the order of the commission as in the case of an application by the commission for the enforcement of its order, and the findings of the commission as to the facts, if supported by testimony, shall in like manner be conclusive.

The jurisdiction of the circuit court of appeals of the United States to enforce, set aside, or modify orders of the commission shall be exclusive.

Such proceedings in the circuit court of appeals shall be given precedence over other cases pending therein, and shall be in every way expedited. No order of the commission or judgment of the court to enforce the same shall in any wise relieve or absolve any person, partnership, or corporation from any liability under the antitrust acts.

Complaints, orders, and other processes of the commission under this section may be served by anyone duly authorized by the commission, either (a) by delivering a copy thereof to the person to be served, or to a member of the partnership to be served, or to the president, secretary, or other executive officers or a director of the corporation to be served; or (b) by leaving a copy thereof at the principal office or place of business of such person, partnership, or corporation; or (c) by registering and mailing a copy thereof addressed to such person, partnership, or corporation at his or its principal office or place of business. The verified return by the person so serving said complaint, order, or other process setting forth the manner of said service shall be proof of the same, and the return post-office receipt for said complaint, order, or other process registered and mailed as aforesaid shall be proof of the service of the same.

SEC. 6. That the commission shall also have power—

(a) To gather and compile information concerning, and to investigate from time to time the organization, business, conduct, practices, and management of any corporation engaged in commerce, excepting banks and common carriers subject to the Act to regulate commerce, and its relation to other corporations and to individuals, associations, and partnerships.

(b) To require, by general or special orders, corporations engaged in commerce, excepting banks, and common carriers subject to the Act to regulate commerce, or any class of them, or any of them, respectively, to file with the commission in such form as the commission may prescribe annual or special, or both annual and special, reports or answers in writing to specific questions, furnishing to the commission such information as it may require as to the organization, business, conduct, practices, management, and relation to other corporations, partnerships, and individuals of the respective corporations filing such reports or answers in writing. Such reports and answers shall be made under oath, or otherwise, as the commission may prescribe, and shall be filed with the commission within such reasonable period as the commission may prescribe, unless additional time be granted in any case by the commission.

(c) Whenever a final decree has been entered against any defendant corporation in any suit brought by the United States to prevent and restrain any violation of the antitrust Acts, to make investigations, upon its own initiative, of the manner in which the decree has been or is being carried out, and upon the application of the Attorney General it shall be its duty to make such investigation. It shall transmit to the Attorney General a report embodying its findings and recommendations as a result of any such investigation and the report shall be made public in the discretion of the commission.

Digitized by Google

(d) Upon the direction of the President or either House of Congress to investigate and report the facts relating to any alleged violations of the antitrust Acts by any corporation.

(e) Upon the application of the Attorney General to investigate and make recommendations for the readjustment of the business of any corporation alleged to be violating the antitrust Acts in order that the corporation may thereafter maintain its organization, management, and conduct of business in accordance with the law.

(f) To make public from time to time such portions of the information obtained by its hereunder, except trade secrets and names of customers, as it shall deem expedient in the public interest; and to make annual and special reports to the Congress and to submit therewith recommendations for additional legislation; and to provide for the publication of its reports and decisions in such form and manner as may be best adapted for public information and use.

(g) From time to time to classify corporations and to make rules and regulations for the purpose of carrying out the provisions of this Act.

(h) To investigate, from time to time, trade conditions in and with foreign countries where associations, combinations, or practices of manufacturers, merchants, or traders, or other conditions, may affect the foreign trade of the United States, and to report to Congress thereon, with such recommendations as it deems advisable.

SEC. 7. That in any suit in equity brought by or under the direction of the Attorney General as provided in the antitrust Acts, the court may, upon the conclusion of the testimony therein, if it shall be then of opinion that the complainant is entitled to relief, refer said suit to the commission, as a master in chancery, to ascertain and report an appropriate form of decree therein. The commission shall proceed upon such notice to the parties and under such rules of procedure as the court may prescribe, and upon the coming in of such report such exceptions may be filed and such proceedings had in relation thereto as upon the report of a master in other equity causes, but the court may adopt or reject such report, in whole or in part, and enter such decree as the nature of the case may in its judgment require.

SEC. 8. That the several departments and bureaus of the Government when directed by the President shall furnish the commisison, upon its request, all records, papers, and information in their posession relating to any corporation subject to any of the provisions of this Act, and shall detail from time to time such officials and employees to the commission as he may direct.

SEC. 9. That for the purposes of this Act the commission, or its duly authorized agent or agents, shall at all reasonable times have access to, for the purpose of examination, and the right to copy any documentary evidence of any corporation being investigated or proceeded against; and the commission shall have power to require by subpœna the attendance and testimony of witnesess and the production of all such documentary evidence relating to any matter under investigation. Any member of the commission may sign subpœnas, and members and examiners of the commission may administer oaths and affirmations, examine witnesess, and receive evidence.

Such attendance of witnesses, and the production of such documentary evidence, may be required from any place in the United States, at any designated place of hearing. And in case of disobedience to a subpœna the commission may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of documentary evidence.

Any of the district courts of the United States within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpœna issued to any corporation or other person, issue an order requiring such corporation or other person to appear before the commission, or to produce documentary evidence if so ordered, or to give evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof.

Upon the application of the Attorney General of the United States, at the request of the commission, the district courts of the United States shall have jurisdiction to issue writs of mandamus commanding any person or corporation to comply with the provisions of this Act or any order of the commission made in pursuance thereof.

The commission may order testimony to be taken by deposition in any proceeding or investigation pending under this Act at any stage of such proceeding or investigation. Such depositions may be taken before any person designated by the commission and having power to administer oaths. Such testimony

Digitized by Google

shall be reduced to writing by the person taking the deposition, or under his direction, and shall then be subscribed by the deponent. Any person may be compelled to appear and depose and to produce documentary evidence in the same manner as witnesses may be compelled to appear and testify and produce documentary evidence before the commission as hereinbefore provided.

Witnesses summoned before the commission shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken and the persons taking the same shall severally be entitled to the same fees as are paid for like services in the courts of the United States.

No person shall be excused from attending and testifying or from producing documentary evidence before the commission or in obedience to the subpœna of the commission on the ground or for the reason that the testimony or evidence, documentary or otherwise, required of him may tend to criminate him or subject him to a penalty or forfeiture. But no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may testify, or produce evidence, documentary or otherwise, before the commission in obedience to a subpœna issued by it: *Provided*, That no natural person so testifying shall be exempt from prosecution and punishment for perjury committed in so testifying.

SEC. 10. That any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry, or to produce documentary evidence, if in his power to do so, in obedience to the subpœna or unlawful requirement of the commission, shall be guilty of an offense and upon conviction thereof by a court of competent jurisdiction shall be punished by a fine of not less than $1,000 nor more than $5,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

Any person who shall willfully make, or cause to be made, any false entry or statement of fact in any report required to be made under this Act, or who shall willfully make, or cause to be made, any false entry in any account, record, or memorandum kept by any corporation subject to this Act, or who shall willfully neglect or fail to make, or cause to be made, full, true, and correct entries in such accounts, records, or memoranda of all facts and transactions appertaining to the business of such corporation, or who shall willfully remove out of the jurisdiction of the United States, or willfully mutilate, alter, or by any other means falsify any documentary evidence of such corporation, or who shall willfully refuse to submit to the commission or to any of its authorized agents, for the purpose of inspection and taking copies, any documentary evidence of such corporation in his possession or within his control, shall be deemed guilty of an offense against the United States, and shall be subject, upon conviction in any court of the United States of competent jurisdiction, to a fine of not less than $1,000 nor more than $5,000, or to imprisonment for a term of not more than three years, or to both such fine and imprisonment.

If any corporation required by this Act to file any annual or special report shall fail so to do within the time fixed by the commission for filing the same, and such failure shall continue for thirty days after notice of such default, the corporation shall forfeit to the United States the sum of $100 for each and every day of the continuance of such failure, which forfeiture shall be payable into the Treasury of the United States, and shall be recoverable in a civil suit in the name of the United States brought in the district where the corporation has its principal office or in any district in which it shall do business. It shall be the duty of the various district attorneys, under the direction of the Attorney General of the United States, to prosecute for the recovery of forfeitures. The costs and expenses of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States.

Any officer or employee of the commission who shall make public any information obtained by the commission without its authority, unless directed by a court, shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by fine and imprisonment, in the discretion of the court.

SEC. 11. Nothing contained in this Act shall be construed to prevent or interfere with the enforcement of the provisions of the antitrust Acts or the Acts to regulate commerce, nor shall anything contained in the Act be construed to alter, modify, or repeal the said antitrust Acts or the Acts to regulate commerce or any part or parts thereof.

Approved, September 26, 1914.

[PUBLIC—No. 212—63D CONGRESS]

(H. R. 15657)

AN ACT To supplement existing laws against unlawful restraints and monopolies, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That "antitrust laws," as used herein, includes the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety; sections seventy-three to seventy-seven, inclusive, of an Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," of August twenty-seventh, eighteen hundred and ninety-four; an Act entitled "An Act to amend sections seventy-three and seventy-six of the Act of August twenty-seventh, eighteen hundred and ninety-four, entitled 'An Act to reduce taxation, to provide revenue for the Government, and for other purposes,'" approved February twelfth, nineteen hundred and thirteen; and also this Act.

"Commerce," as used herein, means trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession or other place under the jurisdiction of the United States: *Provided*, That nothing in this Act contained shall apply to the Philippine Islands.

The word "person" or "persons" wherever used in this Act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country.

SEC. 2. That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities, which commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce: *Provided*, That nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of differences in the grade, quality, or quantity of the commodity sold, or that makes only due allowance for differences in the cost of selling or transportation, or discrimination in price in the same or different communities made in good faith to meet competition: *And provided further*, That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade.

SEC. 3. That it shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies or other commodities, whether patented or unpatented, for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods, wares, merchandise, machinery, supplies, or other commodity of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

SEC. 4. That any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

Digitized by Google

SEC. 5. That a final judgment or decree hereafter rendered in any criminal prosecution or in any suit or proceeding in equity brought by or on behalf of the United States under the antitrust laws to the effect that a defendant has violated said laws shall be prima facie evidence against such defendant in any suit or proceeding brought by any other party against such defendant under said laws as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto: *Provided*, This section shall not apply to consent judgments or decrees entered before any testimony has been taken: *Provided further*, This section shall not apply to consent judgments or decrees rendered in criminal proceedings or suits in equity, now pending, in which the taking of testimony has been commenced but has not been concluded, provided such judgments or decrees are rendered before any further testimony is taken.

Whenever any suit or proceeding in equity or criminal prosecution is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws the running of the statute of limitations in respect of each and every private right of action arising under said laws and based in whole or in part on any matter complained of in said suit or proceeding shall be suspended during the pendency thereof.

SEC. 6. That the labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws.

SEC. 7. That no corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of another corporation engaged also in commerce, where the effect of such acquisition may be to substantially lessen competition between the corporation whose stock is so acquired and the corporation making the acquisition, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce.

No corporation shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of two or more corporations engaged in commerce where the effect of such acquisition, or the use of such stock by the voting or granting of proxies or otherwise, may be to substantially lessen competition between such corporations, or any of them, whose stock or other share capital is so acquired, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce.

This section shall not apply to corporations purchasing such stock solely for investment and not using the same by voting or otherwise to bring about, or in attempting to bring about, the substantial lessening of competition. Nor shall anything contained in this section prevent a corporation engaged in commerce from causing the formation of subsidiary corporations for the actual carrying on of their immediate lawful business, or the natural and legitimate branches or extensions thereof, or from owning and holding all or a part of the stock of such subsidiary corporations, when the effect of such formation is not to substantially lessen competition.

Nor shall anything herein contained be construed to prohibit any common carrier subject to the laws to regulate commerce from aiding in the construction of branches or short lines so located as to become feeders to the main line of the company so aiding in such construction or from acquiring or owning all or any part of the stock of such branch lines, nor to prevent any such common carrier from acquiring and owning all or any part of the stock of a branch or short line constructed by an independent company where there is no substantial competition between the company owning the branch line so constructed and the company owning the main line acquiring the property or an interest therein, nor to prevent such common carrier from extending any of its lines through the medium of the acquisition of stock or otherwise of any other such common carrier where there is no substantial competition between the company extending its lines and the company whose stock, property, or an interest therein is so acquired.

Digitized by Google

Nothing contained in this section shall be held to affect or impair any right heretofore legally acquired: *Provided*, That nothing in this section shall be held or construed to authorize or make lawful anything heretofore prohibited or made illegal by the antitrust laws, nor to exempt any person from the penal provisions thereof or the civil remedies therein provided.

SEC. 8. That from and after two years from the date of the approval of this Act no person shall at the same time be a director or other officer or employee of more than one bank, banking association or trust company, organized or operating under the laws of the United States, either of which has deposits, capital, surplus, and undivided profits aggregating more than $5,000,000; and no private banker or person who is a director in any bank or trust company, organized and operating under the laws of a State, having deposits, capital, surplus, and undivided profits aggregating more than $5,000,000, shall be eligible to be a director in any bank or banking association organized or operating under the laws of the United States. The eligibility of a director, officer, or employee under the foregoing provisions shall be determined by the overage amount of deposits, capital, surplus, and undivided profits as shown in the official statements of such bank, banking association, or trust company filed as provided by law during the fiscal year next preceding the date set for the annual election of directors, and when a director, officer, or employee has been elected or selected in accordance with the provisions of this Act it shall be lawful for him to continue as such for one year thereafter under said election or employment.

No bank, banking association or trust company, organized or operating under the laws of the United States, in any city or incorporated town or village of more than two hundred thousand inhabitants, as shown by the last preceding decennial census of the United States, shall have as a director or other officer or employee any private banker or any director or other officer or employee of any other bank, banking association or trust company located in the same place: *Provided*, That nothing in this section shall apply to mutual savings banks not having a capital stock represented by shares: *Provided further*, That a director or other officer or employee of such bank, banking association, or trust company may be a director or other officer or employee of not more than one other bank or trust company organized under the laws of the United States or any State where the entire capital stock of one is owned by stockholders in the other: *And provided further*, That nothing contained in this section shall forbid a director of class A of a Federal reserve bank, as defined in the Federal Reserve Act, from being an officer or director or both an officer and director in one member bank.

That from and after two years from the date of the approval of this Act no person at the same time shall be a director in any two or more corporations, any one of which has capital, surplus, and undivided profits aggregating more than $1,000,000, engaged in whole or in part in commerce, other than banks, banking associations, trust companies and common carriers subject to the Act to regulate commerce, approved February fourth, eighteen hundred and eighty-seven, if such corporations are or shall have been theretofore, by virtue of their business and location of operation, competitors, so that the elimination of competition by agreement between them would constitute a violation of any of the provisions of any of the antitrust laws. The eligibility of a director under the foregoing provision shall be determined by the aggregate amount of the capital, surplus, and undivided profits, exclusive of dividends declared but not paid to stockholders, at the end of the fiscal year of said corporation next preceding the election of directors, and when a director has been elected in accordance with the provisions of this Act it shall be lawful for him to continue as such for one year thereafter.

When any person elected or chosen as a director or officer or selected as an employee of any bank or other corporation subject to the provisions of this Act is eligible at the time of his election or selection to act for such bank or other corporation in such capacity his eligibility to act in such capacity shall not be affected and he shall not become or be deemed amenable to any of the provisions hereof by reason of any change in the affairs of such bank or other corporation from whatsoever cause, whether specifically excepted by any of the provisions hereof or not, until the expiration of one year from the date of his election or employment.

SEC. 9. Every president, director, officer or manager of any firm, association or corporation engaged in commerce as a common carrier, who embezzles, steals, abstracts or willfully misapplies, or willfully permits to be misapplied, any

Digitized by Google

of the moneys, funds, credits, securities, property or assets of such firm, association or corporation, arising or accruing from, or used in, such commerce, in whole or in part, or willfully or knowingly converts the same to his own use or to the use of another, shall be deemed guilty of a felony and upon conviction shall be fined not less than $500 or confined in the penitentiary not less than one year nor more than ten years, or both, in the discretion of the court.

Prosecutions hereunder may be in the district court of the United States for the district wherein the offense may have been committed.

That nothing in this section shall be held to take away or impair the jurisdiction of the courts of the several States under the laws thereof; and a judgment of conviction or acquittal on the merits under the laws of any State shall be a bar to any prosecution hereunder for the same act or acts.

SEC. 10. That after two years from the approval of this Act no common carrier engaged in commerce shall have any dealings in securities, supplies or other articles of commerce, or shall make or have any contracts for construction or maintenance of any kind, to the amount of more than $50,000, in the aggregate, in any one year, with another corporation, firm, partnership or association when the said common carrier shall have upon its board of directors or as its president, manager or as its purchasing or selling officer, or agent in the particular transaction, any person who is at the same time a director, manager, or purchasing or selling officer of, or who has any substantial interest in, such other corporation, firm, partnership or association, unless and except such purchases shall be made from, or such dealings shall be with, the bidder whose bid is the most favorable to such common carrier, to be ascertained by competitive bidding under regulations to be prescribed by rule or otherwise by the Interstate Commerce Commission. No bid shall be received unless the name and address of the bidder or the names and addresses of the officers, directors, and general managers thereof, if the bidder be a corporation, or of the members, if it be a partnership or firm, be given with the bid.

Any person who shall, directly or indirectly, do or attempt to do anything to prevent anyone from bidding or shall do any act to prevent free and fair competition among the bidders or those desiring to bid shall be punished as prescribed in this section in the case of an officer or director.

Every such common carrier having any such transactions or making any such purchases shall within thirty days after making the same file with the Interstate Commerce Commission a full and detailed statement of the transaction showing the manner of the competitive bidding, who were the bidders, and the names and addresses of the directors and officers of the corporations and the members of the firm or partnership bidding; and whenever the said commission shall, after investigation or hearing, have reason to believe that the law has been violated in and about the said purchases or transactions it shall transmit all papers and documents and its own views or findings regarding the transaction to the Attorney General.

If any common carrier shall violate this section it shall be fined not exceeding $25,000; and every such director, agent, manager or officer thereof who shall have knowingly voted for or directed the act constituting such violation or who shall have aided or abetted in such violation shall be deemed guilty of a misdemeanor and shall be fined not exceeding $5,000, or confined in jail not exceeding one year, or both, in the discretion of the court.

SEC. 11. That authority to enforce compliance with sections two, three, seven and eight of this act by the persons respectively subject thereto is hereby vested: in the Interstate Commerce Commission where applicable to common carriers, in the Federal Reserve Board where applicable to banks, banking associations and trust companies, and in the Federal Trade Commission where applicable to all other character of commerce, to be exercised as follows:

Whenever the commission or board vested with jurisdiction thereof shall have reason to believe that any person is violating or has violated any of the provisions of sections two, three, seven and eight of this Act, it shall issue and serve upon such person a complaint stating its charges in that respect, and containing a notice of a hearing upon a day and at a place therein fixed at least thirty days after the service of said complaint. The person so complained of shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the commission or board requiring such person to cease and desist from the violation of the law so charged in said complaint. Any person may make application, and upon good cause shown may be allowed by the commission or board, to intervene and appear in said proceeding by counsel or in person. The testimony in any such

Digitized by Google

proceeding shall be reduced to writing and filed in the office of the commission or board. If upon such hearing the commission or board, as the case may be, shall be of the opinion that any of the provisions of said sections have been or are being violated, it shall make a report in writing in which it shall state its findings as to the facts, and shall issue and cause to be served on such person an order requiring such person to cease and desist from such violations, and divest itself of the stock held or rid itself of the directors chosen contrary to the provisions of sections seven and eight of this Act, if any there be, in the manner and within the time fixed by said order. Until a transcript of the record in such hearing shall have been filed in a circuit court of appeals of the United States, as hereinafter provided, the commission or board may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section.

If such person fails or neglects to obey such order of the commission or board while the same is in effect, the commission or board may apply to the circuit court of appeals of the United States, within any circuit where the violation, complained of was or is being committed or where such person resides or carries on business, for the enforcement of its order, and shall certify and file with its application a transcript of the entire record in the proceeding, including all the testimony taken and the report and order of the commission or board. Upon such filing of the application and transcript the court shall cause notice thereof to be served upon such person and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to make and enter upon the pleadings, testimony, and proceedings set forth in such transcript a decree affirming, modifying, or setting aside the order of the commission or board. The findings of the commission or board as to the facts, if supported by testimony, shall be conclusive. If either party shall apply to the court for leave to adduce additional evidence, and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the commission or board, the court may order such additional evidence to be taken before the commission or board and to be adduced upon the hearings in such manner and upon such terms and conditions as to the court may seem proper. The commission or board may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, which, if supported by testimony, shall be conclusive, and its recommendation, if any, for the modification or setting aside of its original order, with the return of such additional evidence. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certiorari as provided in section two hundred and forty of the Judicial Code.

Any party required by such order of the commission or board to cease and desist from a violation charged may obtain a review of such order in said circuit court of appeals by filing in the court a written petition praying that the order of the commission or board be set aside. A copy of such petition shall be forthwith served upon the commission or board, and thereupon the commission or board forthwith shall certify and file in the court a transcript of the record as hereinbefore provided. Upon the filing of the transcript the court shall have the same jurisdiction to affirm, set aside, or modify the order of the commission or board as in the case of an application by the commission or board for the enforcement of its order, and the findings of the commission or board as to the facts, if supported by testimony, shall in like manner be conclusive.

The jurisdiction of the circuit court of appeals of the United States to enforce, set aside, or modify orders of the commission or board shall be exclusive.

Such proceedings in the circuit court of appeals shall be given precedence over other cases pending therein, and shall be in every way expedited. No order of the commission or board or the judgment of the court to enforce the same shall in any wise relieve or absolve any person from any liability under the antitrust Acts.

Complaints, orders, and other processes of the commission or board under this section may be served by anyone duly authorized by the commission or board, either (a) by delivering a copy thereof to the person to be served, or to a member of the partnership to be served, or to the president, secre-

Digitized by Google

tary, or other executive officer or a director of the corporation to be served; or (b) by leaving a copy thereof at the principal office or place of business of such person; or (c) by registering and mailing a copy thereof addressed to such person at his principal office or place of business. The verified return by the person so serving said complaint, order, or other process setting forth the manner of said service shall be proof of the same, and the return post-office receipt for said complaint, order, or other process registered and mailed as aforesaid shall be proof of the service of the same.

SEC. 12. That any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found.

SEC. 13. That in any suit, action, or proceeding brought by or on behalf of the United States subpœnas for witnesses who are required to attend a court of the United States in any judicial district in any case, civil or criminal, arising under the antitrust laws may run into any other district: *Provided*, That in civil cases no writ of subpœna shall issue for witnesses living out of the district in which the court is held at a greater distance than one hundred miles from the place of holding the same without the permission of the trial court being first had upon proper application and cause shown.

SEC. 14. That whenever a corporation shall violate any of the penal provisions of the antitrust laws, such violation shall be deemed to be also that of the individual directors, officers, or agents of such corporation who shall have authorized, ordered, or done any of the acts constituting in whole or in part such violation, and such violation shall be deemed a misdemeanor, and upon conviction therefor of any such director, officer, or agent he shall be punished by a fine of not exceeding $5,000 or by imprisonment for not exceeding one year, or by both, in the discretion of the court.

SEC. 15. That the several district courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this Act, and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition, and before final decree, the court may at any time make temporary restraining order or prohibition as shall be deemed just in the premises. Whenever it shall appear to the court before which any such proceeding may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned whether they reside in the district in which the court is held or not, and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 16. That any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, including sections two, three, seven and eight of this Act, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue: *Provided*, That nothing herein contained shall be construed to entitle any person, firm, corporation, or association, except the United States, to bring suit in equity for injunctive relief against any common carrier subject to the provisions of the Act to regulate commerce, approved February fourth, eighteen hundred and eighty-seven, in respect of any matter subject to the regulation, supervision, or other jurisdiction of the Interstate Commerce Commission.

SEC. 17. That no preliminary injunction shall be issued without notice to the opposite party.

No temporary restraining order shall be granted without notice to the opposite party unless it shall clearly appear from specific facts shown by affidavit or by the verified bill that immediate and irreparable injury, loss, or damage will result to the applicant before notice can be served and a hearing had thereon.

Digitized by Google

Every such temporary restraining order shall be indorsed with the date and hour of issuance, shall be forthwith filed in the clerk's office and entered of record, shall define the injury and state why it is irreparable and why the order was granted without notice, and shall by its terms expire within such time after entry, not to exceed ten days, as the court or judge may fix, unless within the time so fixed the order is extended for a like period for good cause shown, and the reasons for such extension shall be entered of record. In case a temporary restraining order shall be granted without notice in the contingency specified, the matter of the issuance of a preliminary injunction shall be set down for a hearing at the earliest possible time and shall take precedence of all matters except older matters of the same character; and when the same comes up for hearing the party obtaining the temporary restraining order shall proceed with the application for a preliminary injunction, and if he does not do so the court shall dissolve the temporary restraining order. Upon two days' notice to the party obtaining such temporary restraining order the opposite party may appear and move the dissolution or modification of the order, and in that event the court or judge shall proceed to hear and determine the motion as expeditiously as the ends of justice may require.

Section two hundred and sixty-three of an Act entitled "An Act to codify, revise, and amend the laws relating to the judiciary," approved March third, nineteen hundred and eleven, is hereby repealed.

Nothing in this section contained shall be deemed to alter, repeal, or amend section two hundred and sixty-six of an Act entitled "An Act to codify, revise, and amend the laws relating to the judiciary," approved March third, nineteen hundred and eleven.

SEC. 18. That, except as otherwise provided in section 16 of this Act, no restraining order or interlocutory order of injunction shall issue, except upon the giving of security by the applicant in such sum as the court or judge may deem proper, conditioned upon the payment of such costs and damages as may be incurred or suffered by any party who may be found to have been wrongfully enjoined or restrained thereby.

SEC. 19. That every order of injunction or restraining order shall set forth the reasons for the issuance of the same, shall be specific in terms, and shall describe in reasonable detail, and not by reference to the bill of complaint or other document, the act or acts sought to be restrained, and shall be binding only upon the parties to the suit, their officers, agents, servants, employees, and attorneys, or those in active concert or participating with them, and who shall, by personal service or otherwise, have received actual notice of the same.

SEC. 20. That no restraining order or injunction shall be granted by any court of the United States, or a judge or the judges thereof, in any case between an employer and employees, or between employers and employees, or between employees, or between persons employed and persons seeking employment, involving, or growing out of, a dispute concerning terms or conditions of employment, unless necessary to prevent irreparable injury to property, or to a property right, of the party making the application, for which injury there is no adequate remedy at law, and such property or property right must be described with particularity in the application, which must be in writing and sworn to by the applicant or by his agent or attorney.

And no such restraining order or injunction shall prohibit any person or persons, whether singly or in concert, from terminating any relation of employment, or from ceasing to perform any work or labor, or from recommending, advising, or persuading others by peaceful means so to do; or from attending at any place where any such person or persons may lawfully be, for the purpose of peacefully obtaining or communicating information, or from peacefully persuading any person to work or to abstain from working; or from ceasing to patronize or to employ any party to such dispute, or from recommending, advising, or persuading others by peaceful and lawful means so to do; or from paying or giving to, or withholding from, any person engaged in such dispute, any strike benefits or other moneys or things of value; or from peaceably assembling in a lawful manner, and for lawful purposes; or from doing any act or thing which might lawfully be done in the absence of such dispute by any party thereto; nor shall any of the acts specified in this paragraph be considered or held to be violations of any law of the United States.

SEC. 21. That any person who shall willfully disobey any lawful writ, process, order, rule, decree, or command of any district court of the United States

Digitized by Google

or any court of the District of Columbia by doing any act or thing therein, or thereby forbidden to be done by him, if the act or thing so done by him be of such character as to constitute also a criminal offense under any statute of the United States or under the laws of any State in which the act was committed, shall be proceeded against for his said contempt as hereinafter provided.

SEC. 22. That whenever it shall be made to appear to any district court or judge thereof, or to any judge therein sitting, by the return of a proper officer on lawful process, or upon the affidavit of some credible person, or by information filed by any district attorney, that there is reasonable ground to believe that any person has been guilty of such contempt, the court or judge thereof, or any judge therein sitting, may issue a rule requiring the said person so charged to show cause upon a day certain why he should not be punished therefor, which rule, together with a copy of the affidavit or information, shall be served upon the person charged, with sufficient promptness to enable him to prepare for and make return to the order at the time fixed therein. If upon or by such return, in the judgment of the court, the alleged contempt be not sufficiently purged, a trial shall be directed at a time and place fixed by the court: *Provided, however,* That if the accused, being a natural person, fail or refuse to make return to the rule to show cause, an attachment may issue against his person to compel an answer, and in case of his continued failure or refusal, or if for any reason it be impracticable to dispose of the matter on the return day, he may be required to give reasonable bail for his attendance at the trial and his submission to the final judgment of the court. Where the accused is a body corporate, an attachment for the sequestration of its property may be issued upon like refusal or failure to answer.

In all cases within the purview of this Act such trial may be by the court, or, upon demand of the accused, by a jury; in which latter event the court may impanel a jury from the jurors then in attendance, or the court or the judge thereof in chambers may cause a sufficient number of jurors to be selected and summoned, as provided by law, to attend at the time and place of trial, at which time a jury shall be selected and impaneled as upon a trial for misdemeanor; and such trial shall conform, as near as may be, to the practice in criminal cases prosecuted by indictment or upon information.

If the accused be found guilty, judgment shall be entered accordingly, prescribing the punishment, either by fine or imprisonment, or both, in the discretion of the court. Such fine shall be paid to the United States or to the complainant or other party injured by the act constituting the contempt, or may, where more than one is so damaged, be divided or apportioned among them as the court may direct, but in no case shall the fine to be paid to the United States exceed, in case the accused is a natural person, the sum of $1,000, nor shall such imprisonment exceed the term of six months: *Provided,* That in any case the court or a judge thereof may, for good cause shown, by affidavit or proof taken in open court or before such judge and filed with the papers in the case, dispense with the rule to show cause, and may issue an attachment for the arrest of the person charged with contempt; in which event such person, when arrested, shall be brought before such court or a judge thereof without unnecessary delay and shall be admitted to bail in a reasonable penalty for his appearance to answer to the charge or for trial for the contempt; and thereafter the proceedings shall be the same as provided herein in case the rule had issued in the first instance.

SEC. 23. That the evidence taken upon the trial of any persons so accused may be preserved by bill of exceptions, and any judgment of conviction may be reviewed upon writ of error in all respects as now provided by law in criminal cases, and may be affirmed, reversed, or modified as justice may require. Upon the granting of such writ of error, execution of judgment shall be stayed, and the accused, if thereby sentenced to imprisonment, shall be admitted to bail in such reasonable sum as may be required by the court, or by any justice, or any judge of any district court of the United States or any court of the District of Columbia.

SEC. 24. That nothing herein contained shall be construed to relate to contempts committed in the presence of the court, or so near thereto as to obstruct the administration of justice, nor to contempts committed in disobedience of any lawful writ, process, order, rule, decree, or command entered in any suit or action brought or prosecuted in the name of, or on behalf of, the United

Digitized by Google

States, but the same, and all other cases of contempt not specifically embraced within section twenty-one of this Act, may be punished in conformity to the usages at law and in equity now prevailing.

SEC. 25. That no proceeding for contempt shall be instituted against any person unless begun within one year from the date of the act complained of; nor shall any such proceeding be a bar to any criminal prosecution for the same act or acts; but nothing herein contained shall affect any proceedings in contempt pending at the time of the passage of this Act.

SEC. 26. If any clause, sentence, paragraph, or part of this Act shall, for any reason, be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

Approved, October 15, 1914.

States or the District of Columbia, or between the District of Columbia and any State or States.

That the word "association" wherever used in this Act means any corporation or combination, by contract or otherwise, of two or more persons, partnerships, or corporations.

SEC. 2. That nothing contained in the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July second, eighteen hundred and ninety, shall be construed as declaring to be illegal an association entered into for the sole purpose of engaging in export trade and actually engaged solely in such export trade, or an agreement made or act done in the course of export trade by such association, provided such association, agreement, or act is not in restraint of trade within the United States, and is not in restraint of the export trade of any domestic competitor of such associaion: *And provided further*, That such association does not, either in the United States or elsewhere, enter into any agreement, understanding, or conspiracy, or do any act which artificially or intentionally enhances or depresses prices within the United States of commodities of the class exported by such association, or which substantially lessens competition within the United States or otherwise restrains trade therein.

SEC. 3. That nothing contained in section seven of the Act entitled "An Act to supplement existing laws against unlawful restraints and mopopolies, and for other purposes," approved October fifteenth, nineteen hundred and fourteen, shall be construed to forbid the acquisition or ownership by any corporation of the whole or any part of the stock or other capital of any corporation organized solely for the purpose of engaging in export trade, and actually engaged solely in such export trade, unless the effect of such acquisition or ownership may be to restrain trade or substantially lessen competition within the United States.

SEC. 4. That the prohibition against "unfair methods of competition" and the remedies provided for enforcing said prohibition contained in the Act entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September twenty-sixth, nineteen hundred and fourteen, shall be construed as extending to unfair methods of competition used in export trade against competitors engaged in export trade, even though the acts constituting such unfair methods are done without the terriorial jurisdicion of the United States.

SEC. 5. That every association now engaged solely in export trade, within sixty days after the passage of this Act, and every association entered into hereafter which engages solely in export trade, within thirty days after its creation, shall file with the Federal Trade Commissioner a verified written statement setting forth the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members, and if a corporation, a copy of its certificate or articles of incorporation and by-laws, and if unincorporated, a copy of its articles or contract of association, and on the first day of January of each year thereafter it shall make a like statement of the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members and of all amendments to and changes in its articles or certificate of incorporation or in its articles or contract of association. It shall also furnish to the commission such information as the commission may require as to its organization, business, conduct, practices, management, and relation to other associations, corporations, partnerships, and individuals. Any association which shall fail so to do shall not have the benefit of the provisions of section two and section three of this Act, and it shall also forfeit to the United States the sum of $100 for each and every day of the continuance of such failure, which forfeiture shall be payable into the Treasury of the United States, and shall be recoverable in a civil suit in the name of the United States brought in the district where the association has its principal office, or in any district in which it shall do business. It shall be the duty of the various district attorneys, under the direction of the Attorney General of the United States, to prosecute for the recovery of the forfeiture. The costs and expenses of such prosecution shall be paid out of the apporpriation for the expenses of the courts of the United States.

Whenever the Federal Trade Commission shall have reason to believe that an association or any agreement made or act done by such association is in restraint of trade within the United States or in restraint of the export trade of any domestic competitor of such association, or that an association either

Digitized by Google

in the United States or elsewhere has entered into any agreement, understanding, or conspiracy, or done any act which artificially or intentionally enhances or depresses prices within the United States of commodities of the class exported by such association, or which substantially lessens competition within the United States or otherwise restrains trade therein, it shall summon such association, its officers, and agents to appear before it, and thereafter conduct an investigation into the alleged violations of law. Upon investigation, if it shall conclude that the law has been violated, it may make to such association recommendations for the readjustment of its business, in order that it may thereafter maintain its organization and management and conduct its business in accordance with law. If such association fails to comply with the recommendations of the Federal Trade Commission, said commission shall refer its findings and recommendations to the Attorney General of the United States for such action thereon as he may deem proper.

For the purpose of enforcing these provisions the Federal Trade Commission shall have all the powers, so far as applicable, given it in "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes."

Approved, April 10, 1918.

AN ACT To amend the Act approved December 23, 1913, known as the Federal Reserve Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act approved December 23, 1913, known as the Federal Reserve Act, as amended be further amended by adding a new section as follows:

"BANKING CORPORATIONS AUTHORIZED TO DO FOREIGN BANKING BUSINESS

"SEC. 25 (a). Corporations to be organized for the purpose of engaging in international or foreign banking or other international or foreign financial operations, or in banking or other financial operations in a dependency or insular possession of the United States, either directly or through the agency, ownership, or control of local institutions in foreign countries, or in such dependencies or insular possessions as provided by this section, and to act when required by the Secretary of the Treasury as fiscal agents of the United States, may be formed by any number of natural persons, not less in any case than five.

"Such persons shall enter into articles of association which shall specify in general terms the objects for which the association is formed and may contain any other provisions not inconsistent with law which the association may see fit to adopt for the regulation of its business and the conduct of its affairs.

"Such articles of association shall be signed by all of the persons intending to participate in the organization of the corporation and, thereafter, shall be forwarded to the Federal Reserve Board and shall be filed and preserved in its office. The persons signing the said articles of association shall, under their hands, make an organization certificate which shall specifically state:

"First. The name assumed by such corporations, which shall be subject to the approval of the Federal Reserve Board.

"Second. The place or places where its operations are to be carried on.

"Third. The place in the United States where its home office is to be located.

"Fourth. The amount of its capital stock and the number of shares into which the same shall be divided.

"Fifth. The names and places of business or residence of the persons executing the certificate and the number of shares to which each has subscribed.

"Sixth. The fact that the certificate is made to enable the persons subscribing the same, and all other persons, firms, companies, and corporations, who or which may thereafter subscribe to or purchase shares of the capital stock of such corporation, to avail themselves of the advantages of this section.

"The persons signing the organization certificate shall duly acknowledge the execution thereof before a judge of some court of record or notary public, who shall certify thereto under the seal of such court or notary, and thereafter the certificate shall be forwarded to the Federal Reserve Board to be filed and preserved in its office. Upon duly making and filing articles of association and an organization certificate, and after the Federal Reserve Board has approved the same and issued a permit to begin business, the association shall become and be a body corporate, and as such and in the name designated therein shall have power to adopt and use a corporate seal, which may be changed at the pleasure of its board of directors; to have succession for a period of twenty years unless sooner dissolved by the act of the shareholders owning two-thirds of the stock or by an Act of Congress or unless its franchises become forfeited by some violation of law; to make contracts; to sue and be sued, complain, and defend in any court of law or equity; to elect or appoint directors, all of whom shall be citizens of the United States; and, by its board of directors, to appoint such officers and employees

Digitized by Google

as may be deemed proper, define their authority and duties, require bonds of them, and fix the penalty thereof, dismiss such officers or employees, or any thereof, at pleasure and appoint others to fill their places; to prescribe, by its board of directors, by-laws not inconsistent with law or with the regulations of the Federal Reserve Board regulating the manner in which its stock shall be transferred, its directors elected or appointed, its officers and employees appointed, its property transferred, and the privileges granted to it by law exercised and enjoyed.

"Each corporation so organized shall have power, under such rules and regulations as the Federal Reserve Board may prescribe:

"(a) To purchase, sell, discount, and negotiate, with or without its indorsement or guaranty, notes, drafts, checks, bills of exchange, acceptances, including bankers' acceptances, cable transfers, and other evidences of indebtedness; to purchase and sell, with or without its indorsement or guaranty, securities, including the obligations of the United States or of any State thereof but not including shares of stock in any corporation except as herein provided; to accept bills or drafts drawn upon it subject to such limitations and restrictions as the Federal Reserve Board may impose; to issue letters of credit; to purchase and sell coin, bullion, and exchange; to borrow and to lend money; to issue debentures, bonds, and promissory notes under such general conditions as to security and such limitations as the Federal Reserve Board may prescribe, but in no event having liabilities outstanding thereon at any one time exceeding ten times its capital stock and surplus; to receive deposits outside of the United States and to receive only such deposits within the United States as may be incidental to or for the purpose of carrying out transactions in foreign countries or dependencies or insular possessions of the United States; and generally to exercise such powers as are incidental to the powers conferred by this Act or as may be usual, in the determination of the Federal Reserve Board, in connection with the transaction of the business of banking or other financial operations in the countries, colonies, dependencies, or possessions in which it shall transact business and not inconsistent with the powers specifically granted herein. Nothing contained in this section shall be construed to prohibit the Federal Reserve Board, under its power to prescribe rules and regulations, from limiting the aggregate amount of liabilities of any or all classes incurred by the corporation and outstanding at any one time. Whenever a corporation organized under this section receives deposits in the United States authorized by this section it shall carry reserves in such amounts as the Federal Reserve Board may prescribe, but in no event less than 10 per centum of its deposits.

"(b) To establish and maintain for the transaction of its business branches or agencies in foreign countries, their dependencies or colonies, and in the dependencies or insular possessions of the United States, at such places as may be approved by the Federal Reserve Board and under such rules and regulations as it may prescribe, including countries or dependencies not specified in the original organization certificate.

"(c) With the consent of the Federal Reserve Board to purchase and hold stock or other certificates of ownership in any other corporation organized under the provisions of this section, or under the laws of any foreign country or a colony or dependency thereof, or under the laws of any State, dependency, or insular possession of the United States but not engaged in the general business of buying or selling goods, wares, merchandise or commodities in the United States, and not transacting any business in the United States except such as in the judgment of the Federal Reserve Board may be incidental to its international or foreign business: *Provided, however*, That, except with the approval of the Federal Reserve Board, no corporation organized hereunder shall invest in any one corporation an amount in excess of 10 per centum of its own capital and surplus, except in a corporation engaged in the business of banking, when 15 per centum of its capital and surplus may be so invested: *Provided further*, That no corporation organized hereunder shall purchase, own, or hold stock or certificates of ownership in any other corporation organized hereunder or under the laws of any State which is in substantial competition therewith, or which holds stock or certificates of ownership in corporations which are in substantial competition with the purchasing corporation.

"Nothing contained herein shall prevent corporations organized hereunder from purchasing and holding stock in any corporation where such purchase shall be necessary to prevent a loss upon a debt previously contracted in good faith; and stock so purchased or acquired in corporations organized under this section shall within six months from such purchase be sold or disposed of at public

Digitized by Google

or private sale unless the time to so dispose of same is extended by the Federal Reserve Board.

"No corporation organized under this section shall carry on any part of its business in the United States except such as, in the judgment of the Federal Reserve Board, shall be incidental to its international or foreign business: *And provided further*, That except such as is incidental and preliminary to its organization no such corporation shall exercise any of the powers conferred by this section until it has been duly authorized by the Federal Reserve Board to commence business as a corporation organized under the provisions of this section.

"No corporation organized under this section shall engage in commerce or trade in commodities except as specifically provided in this section, nor shall it either directly or indirectly control or fix or attempt to control or fix the price of any such commodities. The charter of any corporation violating this provision shall be subject to forfeiture in the manner hereinafter provided in this section. It shall be unlawful for any director, officer, agent, or employee of any such corporation to use or to conspire to use the credit, the funds, or the power of the corporation to fix or control the price of any such commodities, and any such person violating this provision shall be liable to a fine of not less than $1,000 and not exceeding $5,000 or imprisonment not less than one year and not exceeding five years, or both, in the discretion of the court.

"No corporation shall be organized under the provisions of this section with a capital stock of less than $2,000,000, one-quarter of which must be paid in before the corporation may be authorized to begin business, and the remainder of the capital stock of such corporation shall be paid in installments of at least 10 per centum on the whole amount to which the corporation shall be limited as frequently as one installment at the end of each succeeding two months from the time of the commencement of its business operations until the whole of the capital stock shall be paid in. The capital stock of any such corporation may be increased at any time, with the approval of the Federal Reserve Board, by a vote of two-thirds of its shareholders or by unanimous consent in writing of the shareholders without a meeting and without a formal vote, but any such increase of capital shall be fully paid in within ninety days after such approval; and may be reduced in like manner, provided that in no event shall it be less than $2,000,000. No corporation, except as herein provided, shall during the time it shall continue its operations, withdraw or permit to be withdrawn, either in the form of dividends or otherwise, any portion of its capital. Any national banking association may invest in the stock of any corporation organized under the provisions of this section, but the aggregate amount of stock held in all corporations engaged in business of the kind described in this section and in section 25 of the Federal Reserve Act as amended shall not exceed 10 per centum of the subscribing bank's capital and surplus.

"A majority of the shares of the capital stock of any such corporation shall at all times be held and owned by citizens of the United States, by corporations the controlling interest in which is owned by citizens of the United States, chartered under the laws of the United States or of a State of the United States, or by firms or companies, the controlling interest in which is owned by citizens of the United States. The provisions of section 8 of the act approved October 15, 1914, entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes,' as amended by the acts of May 15, 1916, and September 7, 1916, shall be construed to apply to the directors, other officers, agents, or employees of corporations organized under the provisions of this section: *Provided, however*, That nothing herein contained shall (1) prohibit any director or other officer, agent or employee of any member bank, who has procured the approval of the Federal Reserve Board from serving at the same time as a director or other officer, agent or employee of any corporation organized under the provisions of this section in whose capital stock such member bank shall have invested; or (2) prohibit any director or other officer, agent, or employee of any corporation organized under the provisions of this section, who has procured the approval of the Federal Reserve Board, from serving at the same time as a director or other officer, agent or employee of any other corporation in whose capital stock such first-mentioned corporation shall have invested under the provisions of this section.

Digitized by Google

"No member of the Federal Reserve Board shall be an officer or director of any corporation organized under the provisions of this section, or of any corporation engaged in similar business organized under the laws of any State, nor hold stock in any such corporation, and before entering upon his duties as a member of the Federal Reserve Board he shall certify under oath to the Secretary of the Treasury that he has complied with this requirement.

"Shareholders in any corporation organized under the provisions of this section shall be liable for the amount of their unpaid stock subscriptions. No such corporation shall become a member of any Federal reserve bank.

"Should any corporation organized hereunder violate or fail to comply with any of the provisions of this section, all of its rights, privileges, and franchises derived herefrom may thereby be forfeited. Before any such corporation shall be declared dissolved, or its rights, privileges, and franchises forfeited, any noncompliance with, or violation of such laws shall, however, be determined and adjudged by a court of the United States of competent jurisdiction, in a suit brought for that purpose in the district or territory in which the home office of such corporation is located, which suit shall be brought by the United States at the instance of the Federal Reserve Board or the Attorney General. Upon adjudication of such noncompliance or violation, each director and officer who participated in, or assented to, the illegal act or acts, shall be liable in his personal or individual capacity for all damages which the said corporation shall have sustained in consequence thereof. No dissolution shall take away or impair any remedy against the corporation, its stockholders, or officers for any liability or penalty previously incurred.

"Any such corporation may go into voluntary liquidation and be closed by a vote of its shareholders owning two-thirds of its stock.

"Whenever the Federal Reserve Board shall become satisfied of the insolvency of any such corporation, it may appoint a receiver who shall take possession of all of the property and assets of the corporation and exercise the same rights, privileges, powers, and authority with respect thereto as are now exercised by receivers of national banks appointed by the Comptroller of the Currency of the United States: *Provided, however*, That the assets of the corporation subject to the laws of other countries or jurisdictions shall be dealt with in accordance with the terms of such laws.

"Every corporation organized under the provisions of this section shall hold a meeting of its stockholders annually upon a date fixed in its by-laws, such meeting to be held at its home office in the United States. Every such corporation shall keep at its home office books containing the names of all stockholders thereof, and the names and addresses of the members of its board of directors, together with copies of all reports made by it to the Federal Reserve Board. Every such corporation shall make reports to the Federal Reserve Board at such times and in such form as it may require; and shall be subject to examination once a year and at such other times as may be deemed necessary by the Federal Reserve Board by examiners appointed by the Federal Reserve Board, the cost of such examination, including the compensation of the examiners, to be fixed by the Federal Reserve Board and to be paid by the corporation examined.

"The directors of any corporation organized under the provisions of this section may, semiannually, declare a dividend of so much of the net profits of the corporation as they shall judge expedient; but each corporation shall, before the declaration of a dividend, carry one-tenth of its net profits of the preceding half year to its surplus fund until the same shall amount to 20 per centum of its capital stock.

"Any corporation organized under the provisions of this section shall be subject to tax by the State within which its home office is located in the same manner and to the same extent as other corporations organized under the laws of that State which are transacting a similar character of business. The shares of stock in such corporation shall also be subject to tax as the personal property of the owners or holders thereof in the same manner and to the same extent as the shares of stock in similar State corporations.

"Any corporation organized under the provisions of this section may at any time within the two years next previous to the date of the expiration of its corporate existence, by a vote of the shareholders owning two-thirds of its stock, apply to the Federal Reserve Board for its approval to extend the period of its corporate existence for a term of not more than twenty years, and upon

Digitized by Google

certified approval of the Federal Reserve Board such corporation shall have its corporate existence for such extended period unless sooner dissolved by the act of the shareholders owning two-thirds of its stock, or by an Act of Congress or unless its franchise becomes forfeited by some violation of law.

"Any bank or banking institution, principally engaged in foreign business, incorporated by special law of any State or of the United States or organized under the general laws of any State or of the United States and having an unimpaired capital sufficient to entitle it to become a corporation under the provisions of this section may, by the vote of the shareholders owning not less than two-thirds of the capital stock of such bank or banking association, with the approval of the Federal Reserve Board, be converted into a Federal corporation of the kind authorized by this section with any name approved by the Federal Reserve Board: *Provided, however*, That said conversion shall not be in contravention of the State law. In such case the articles of association and organization certificate may be executed by a majority of the directors of the bank or banking institution, and the certificate shall declare that the owners of at least two-thirds of the capital stock have authorized the directors to make such certificate and to change or convert the bank or banking institution into a Federal corporation. A majority of the directors, after executing the articles of association and the organization certificate, shall have power to execute all other papers and to do whatever may be required to make its organization perfect and complete as a Federal corporation. The shares of any such corporation may continue to be for the same amount each as they were before the conversion, and the directors may continue to be directors of the corporation until others are elected or appointed in accordance with the provisions of this section. When the Federal Reserve Board has given to such corporation a certificate that the provisions of this section have been complied with, such corporation and all its stockholders, officers, and employees, shall have the same powers and privileges, and shall be subject to the same duties, liabilities, and regulations, in all respects, as shall have been prescribed by this section for corporations originally organized hereunder.

"Every officer, director, clerk, employee, or agent of any corporation organized under this section who embezzles, abstracts, or willfully misapplies any of the moneys, funds, credits, securities, evidences of indebtedness or assets of any character of such corporation; or who, without authority from the directors, issues or puts forth any certificate of deposit, draws any order or bill of exchange, makes any acceptance, assigns any note, bond, debenture, draft, bill of exchange, mortgage, judgment, or decree; or who makes any false entry in any book, report, or statement of such corporation with intent, in either case, to injure or defraud such corporation or any other company, body politic or corporate, or any individual person, or to deceive any officer of such corporation, the Federal Reserve Board, or any agent or examiner appointed to examine the affairs of any such corporation and every receiver of any such corporation and every clerk or employee of such receiver who shall embezzle, abstract, or willfully misapply or wrongfully convert to his own use any moneys, funds, credits or assets of any character which may come into his possession or under his control in the execution of his trust or the performance of the duties of his employment; and every such receiver or clerk or employee of such receiver who shall, with intent to injure or defraud any person, body politic or corporate, or to deceive or mislead the Federal Reserve Board, or any agent or examiner appointed to examine the affairs of such receiver, shall make any false entry in any book, report, or record of any matter connected with the duties of such receiver; and every person who with like intent aids or abets any officer, director, clerk, employee, or agent of any corporation organized under this section, or receiver or clerk or employee of such receiver as aforesaid in any violation of this section, shall upon conviction thereof be imprisoned for not less than two years nor more than ten years, and may also be fined not more than $5,000, in the discretion of the court.

"Whoever being connected in any capacity with any corporation organized under this section represents in any way that the United States is liable for the payment of any bond or other obligation, or the interest thereon, issued or incurred by any corporation organized hereunder, or that the United States incurs any liability in respect of any act or omission of the corporation, shall be punished by a fine of not more than $10,000 and by imprisonment for not more than five years."

Approved, December 24, 1919.

GENERAL PROVISIONS APPLICABLE TO COAL, PHOSPHATE, SODIUM, OIL, OIL SHALE, AND GAS LEASES

SEC. 26. That the Secretary of the Interior shall reserve and may exercise the authority to cancel any prospecting permit upon failure by the permittee to exercise due dilligence in the prosecution of the prospecting work in accordance with the terms and conditions stated in the permit, and shall insert in every such permit issued under the provisions of this Act appropriate provisions for its cancellation by him.

SEC. 27. That no person, association, or corporation, except as herein provided, shall take or hold more than one coal, phosphate, or sodium lease during the life of such lease in any one State; no person, association, or corporation shall take or hold, at one time, more than three oil or gas leases granted hereunder in any one State, and not more than one lease within the geologic structure of the same producing oil or gas field; no corporation shall hold any interest as a stockholder of another corporation in more than such number of leases; and no person or corporation shall take or hold any interest or interests as a member of an association or associations or as a stockholder of a corporation or corporations holding a lease under the provisions hereof, which, together with the area embraced in any direct holding of a leases under this Act, or which, together with any other interest or interests as a member of an association or associations or as a stockholder of a corporation or corporations holding a lease under the provisions hereof, for any kind of mineral leased hereunder, exceeds in the aggregate an amount equivalent to the maximum number of acres of the respective kinds of minerals allowed to any one lessee under this Act. Any interests held in violation of this Act shall be forfeited to the United States by appropriate proceedings instituted by the Attorney General for that purpose in the United States district court for the district in which the property, or some part thereof, is located, except that any ownership or interest forbidden in this Act which may be acquired by descent, will, judgment, or decree may be held for two years and not longer after its acquisition: *Provided*, That nothing herein contained shall be construed to limit sections 18, 18a, 19, and 22 or to prevent any number of lessees under the provisions of this Act from combining their several interests so far as may be necessary for the purposes of constructing and carrying on the business of a refinery, or of establishing and constructing as a common carrier a pipe line or lines of railroads to be operated and used by them jointly in the transportation of oil from their several wells, or from the wells of other lessees under this Act, or the transportation of coal: *Provided further*, That any combination for such purpose or purposes shall be subject to the approval of the Secretary of the Interior on application to him for permission to form the same: *And Provided further*, That if any of the lands or deposits leased under the provisions of this Act shall be subleased, trusteed, possessed, or controlled by any device permanently, temporarily, directly, indirectly, tacitly, or in any manner whatsoever, so that they form part of, or are in any wise controlled by any combination in the form of an unlawful trust, with consent of lessee, or form the subject of any contract or conspiracy in restraint of trade in the mining or selling of coal, phosphate, oil, oil shale, gas, or sodium entered into by the lessee, or any agreement or understanding, written, verbal, or otherwise to which such lessee shall be a party, of which his or its output is to be or become the subject, to control the price or prices thereof or of any holding of such lands by any individual, partnership, association, corporation, or control, in excess of the amounts of lands provided in this Act, the lease thereof shall be forfeited by appropriate proceedings.

Approved, February 25, 19 0.

ADDITIONAL MATERIAL SUBMITTED TO THE COMMITTEE ON PATENTS BY FRANK H. RUSSELL, PRESIDENT, IN COMPLIANCE WITH SUBPENA SERVED ON HIM NOVEMBER 20, 1935, COVERING ITEMS 17 AND 19 OF MEMORANDUM ACCOMPANYING SUBPENA DATED SEPTEMBER 20, 1935, TO MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

STATEMENT BY F. H. RUSSELL TO THE PATENTS COMMITTEE OF THE HOUSE OF REPRESENTATIVES REGARDING MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

I am pleased to appear before you today as president of the Manufacturers Aircraft Association, Inc. Since I severed my active association with airplane and engine manufacturing in 1930, my statement must necessarily have to do with matters historical in character. Nevertheless, my years in the industry, my participation in the early aeronautical activities in the United States, and my intimate knowledge of the conditions and circumstances leading to the early days and the legislative and organizational adjustments which have taken place will, I trust, be of interest to you. From that standpoint, I hope to be able to give a very general outline of the background of the association as well as the details in regard to our history and operations. It is unnecessary to tell you that the board of directors and the president of the association place full and complete confidence in the active organization, but very definitely retain as their own function the establishment of all broad principles and policies. In this way the association has maintained its present position as one of the most useful facilities so far instituted in any industry for the protection of the inventor and the patent owner.

The original cross-license agreement was adopted in July 1917. As the years have passed by and as the cross-licensing agreement and the association continue their usefulness, the good judgment and foresight then exercised become increasingly evident. Only recently the present Federal Coordinator of Transportation, Mr. Joseph B. Eastman, has recommended that the railroads endeavor to stabilize the patent situation in the railroad field by some method of cross-licensing, both among the operators and among the suppliers of equipment thereto.

The aviation interest of most of your honorable committee has come as a corollary to the success you have attained in other fields. My interest, however, and this is true of most of those actively engaged in aviation, began in my youth and became my major activity. I have spent 21 years in this business, entering it in 1909. Those were the years in which the essential features of the airplane were being devised and in which the new facility was being

Digitized by Google

applied to the needs of commerce and the national defense. I don't like to use the word "pioneer", because it is so frequently misused, but the early days of aviation were pioneering days; we have no other word to describe them.

My interest in aviation began in 1909. I was then president of the Automatic Hook & Eye Co., of Hoboken, N. J., the company which later became the Hookless Fastener Co., manufacturing the Talon or "zipper" fastener with which you are all familiar. Through Mr. Russell A. Alger, of Detroit, I made the acquaintance of Orville and Wilbur Wright, and negotiations followed which resulted in my employment as manager of the then budding Wright Co. In that capacity I was intimately associated with these famous brothers in their early attempts to improve the airplane, and in their progress toward the commercial and military production of aeronautical equipment I employed and worked with many of the famous pilots of those days—but that is a separate story, hardly pertinent at this time.

In October 1911 I left the Wright Co. and joined the Burgess Co. and Curtiss, of Marblehead, Mass., as general manager. Its president, W. Starling Burgess, was a great designer and engineer. Of late years he designed both the *Rainbow* and the *Enterprise*, the successful defenders of the America's Cup in the last two international yacht races. During my association there, the war broke out in Europe, and the company began its war production for the British Admiralty. Certain conditions had arisen, however, which we felt would be best solved by joining the Burgess and Glenn H. Curtiss Co., and with that step I became vice president of the Curtiss Aeroplane & Motor Corporation and remained in that capacity until 1931, when I left to join the Edward G. Budd Manufacturing Co., of Philadelphia. There I became engaged in the development of the Zephyr type of light railroad trains, which it is hoped will help to solve the economic problems of our railroads. That, gentlemen, is a brief outline of my aviation background. It extends from the year 1909 to the year 1931. It brought intimate contact with all the early aircraft experimenters and producers. It brought me participation in all the aviation activities of the pre-war, war, and post-war periods. The results of that experience I gladly make available to you.

Now a few words about the Manufacturers Aircraft Association. It was formed in 1917. I was its first president and Mr. S. S. Bradley has been its general manager continuously since that time. It has filled a specific need in the industry. It has served that need economically and well. It has been of immeasurable advantage to the industry as well as to the air services of the Government. It is, however, a specialized operation.

In 1921 we felt that aviation had reached the stage where another facility was needed; that is, one to take the lead in promoting the interests of the aeronautical industry with the public and in guiding the future development of both the manufacturing and operating phases of the industry. Consequently, the Aeronautical Chamber of Commerce of America, Inc., was formed. For purposes of economy, the Manufacturers Aircraft Association and the Aeronautical Chamber of Commerce jointly occupied the same offices. In 1929, however, the two were completely divorced from one another, and Mr. Bradley withdrew from the management of the chamber. The offices of the Manufacturers Aircraft Association are still in New York. The offices of the Aeronautical Chamber of Commerce are in Washington. No connection exists between the two organizations, other than that the Manufacturers Aircraft Association is a member of the Aeronautical Chamber of Commerce.

With further reference to the Manufacturers Aircraft Association, the testimony presented to your committee during the hearings held last spring must have created the impression that the association was an exclusive organization composed of manufacturers of aircraft who were trying, through the association activities, to monopolize American aircraft production. Nothing could have been further from the truth. The most casual examination of our charter, bylaws, or the amended cross-license agreement will show the fallacy of such a premise. The Manufacturers Aircraft Association is solely an agency for the cross-licensing of airplane patents. It has no other function. It does not engage in activities of any public nature. It does no lobbying in Washington or elsewhere. It has no publicity functions. It has no interest in the placing of procurement contracts. It is simply a facility for the airplane manufacturers to use in solving problems relating to patents.

Membership in the association and participation in the patent pool is open to any reputable manufacturer or organization contemplating the manufacture of aircraft. It is a cooperative organization not entitled to be considered an ex-

Digitized by Google

clusive or a restricted one. The board of directors of the association has never refused to accept any qualified applicant for membership. In order to qualify, the only requirement is that the applicant shall be either a responsible manufacturer of aircraft; a responsible manufacturer who intends to become a bona fide producer thereof; a manufacturer to whom the United States Government has given a contract for the construction of 10 or more complete aircraft or aircraft engines; or any person, firm, or corporation holding or controlling United States patents relating to aircraft. No stockholder of the association may acquire, own, or hold at any time more than one share of stock of the association, which is sold to each new member at a cost of $1,000 per share. An applicant must further agree to give all members the benefit of any patents that it may hold on the same basis that such members are required to exchange any such rights that they may have with the new member.

The patents which are exchanged under the agreement represent very substantially the development of the art of aviation in this country during the past 25 years. Through the agreement the results of this development have been made available on a reasonable basis to all Americans who desire to take part in the business of the construction and development of aircraft. No applicant during the period of the entire existence of the association has ever been refused membership who has been willing to comply with the conditions above outlined which all members of the association have agreed to observe.

It is true that certain aircraft companies and other persons have owned or controlled aircraft patents, the use of which they have not desired to extend to the industry or to the Government at the rates of royalty provided for in the agreement. These parties have been free to enter the field and to operate independently.

The association cannot sue any nonmember for the infringement of any of the patents cross-licensed under the agreement. It can take no legal action of any kind for patent infringement against a nonmember. That responsibility rests entirely with the owner of the patent in question. No restriction whatsoever exists as to the action that patentee may take except that such patent owner has agreed with all other members that no arrangement will be entered into with other parties on more favorable terms than will accrue automatically to members through the cross-license agreement. The Government, the largest single purchaser of aircraft, has been comparatively free from aircraft patent litigation during the period of the association's existence, and has paid in royalties to the owners of the basic patents sums of money aggregating an amount which I believe to be far below the compensation paid to inventors and engineers in any other art used by the Government.

Patent suits have been brought against the Government on airplane patents, but it is interesting to note that such litigation has always resulted from the claims of nonmembers which have usually been greatly exaggerated, and in proportion to the number of patents alleged to be used by the Government, have been of little consequence. One can easily imagine the amount of litigation with attendant waste due to legal expenses, the demoralization of business, and the hardship to the Government, had there been no agreement in regard to the 750 patents cross-licensed through the association.

The Manufacturers Aircraft Association in its cross-licensing agreement has never been exclusive or restricted in any respect; it has never interfered with Government procurement by lobbying or any other activity of a public nature; nor has it ever exacted exorbitant royalties, directly or indirectly from the Government or from any of its members. Yet, over the entire history of its existence, starting almost immediately after its organization, charges of monopoly, coercion, and the like have been brought against it. Had these charges not been so serious in their effect on this industry, they would have been extremely amusing. There have been 20 or more investigations of our industry during the past 18 years. There are no less than five such investigations pending at the present time. This constant series of investigations has kept the industry in a state of unrest. These investigations have cost hundreds of thousands of dollars directly, and the indirect costs, such as the time of many men whose minds and lives are devoted to the designing and production of aircraft for the United States, are incalculable.

The association has not been previously heard before your committee. Your chairman was informed last February that it did not wish to appear to testify in regard to H. R. 4523 because compliance with the provisions of the bill as drafted did not impose any unreasonable hardship from the point of view

Digitized by Google

of the administration of the agreement, and we presumed that some good purpose was intended to be served by facilitating the reference of such matters to the Federal Trade Commission in the case of patent arrangements deemed to be against the public interest or the public welfare. Possibly we should not have permitted the kind of testimony heard by your committee at that time to go unchallenged. As has been indicated, however, such statements have been repeated at frequent intervals, usually by the same proponents, and we are appreciative of your desire to give us an opportunity to acquaint you at first hand with the activities of this association, its agreements, its personnel, and its accomplishments. We welcome your investigation of our affairs and trust that as a result of your review of our activities some constructive purpose may be accomplished. We are confident that you as a score or more of earlier aircraft investigators have done, will conclude that the association has been and will continue to be a valuable agency for our industry and the Government.

I am pleased to submit herewith three supplementary statements prepared for your consideration outlining the history and operations of the association and the aims and purposes of the cross-licensing plan; reviewing the suggestions which have been made with regard to the proposed revision of legislation affecting this subject; and analyzing the testimony which has been presented in regard to the association.

I wish to express my appreciation for the opportunity which you have given me to submit for your information all of the facts regarding the origin and operations of the Manufacturers Aircraft Association, Inc., and to rebut the misleading testimony above referred to presented by certain of the other witnesses which have been heard by your committee.

FIRST SUPPLEMENTAL STATEMENT BY F. H. RUSSELL TO THE PATENTS COMMITTEE OF THE HOUSE OF REPRESENTATIVES REGARDING THE HISTORY AND OPERATIONS OF THE MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

In this statement I desire to review for your information the history and operations of the Manufacturers Aircraft Association, Inc., and to outline briefly the objects of the cross-licensing plan. By doing so, I hope that the harm done by the publication of the hearings held by your committee last February and March, may be mitigated or at any rate that the record of these proceedings may be corrected and not continue unchallenged to the injury of American aviation. Much of the record to date has no bearing whatsoever upon the subject of the bill you are considering (H. R. 4523), and the greater part of the testimony thus far printed has been devoted to the personal opinions and the unsupported and frequently false statements of two witnesses defaming many reputable and responsible persons and criticising many agencies of the Government as well as our association.

At the end of the year 1916, with the Government's serious contemplation of participation in the World War, there had developed an increasing realization of the extent to which airplanes could be used in military operations. Inventions, patents, and design rights applicable to aircraft became the subject of national interest. A number of the existing patents were basic in character and called for licenses of one thousand dollars ($1,000.00) per airplane, or more. With the concentration of engineers and designers on improved performance, it was realized that patents based upon new inventions would continue to force attention upon this subject.

By January 1917 it was recognized that aeronautical development was being and would continue to be seriously retarded by patent litigation. Because of this fact, the Navy Department, through its Acting Secretary, requested the National Advisory Committee for Aeronautics to study this question and suggest a fair solution. Shortly thereafter, a like request was made by the Acting Secretary of War. The National Advisory Committee for Aeronautics had been created by Congress in 1915 to advise the President and the Executive Departments on aeronautical questions.

On March 2, 1917, while the National Advisory Committee for Aeronautics was studying this question, Congress appropriated one million dollars ($1,000,000) to acquire by purchase, condemnation, donation, or otherwise necessary aircraft patents. Although this sum was appropriated, no offer was ever made, as it was well known that one or two of the basic Wright and Curtiss patents alone had cost several times that amount and that the essential patents in this field were worth many times that sum. The minutes of a

Digitized by Google

meeting of the National Advisory Committee for Aeronautics, held on March 22, 1917, records the fact that the chairman of its executive committee, Dr. Charles D. Walcott, who was also the secretary of the Smithsonian Institution, stated:

"It is not the desire of the National Advisory Committee * * * to condemn or purchase any patent. It believes that such action would be construed as indicating an unreasonable attitude * * * on the part of the owners of the patents condemned or purchased, besides perhaps serving to discourage invention, if a settlement was made at too low a basis, or to encourage all sorts of claims upon the industry and the Government if such settlement was on too high a basis. * * *"

On July 16, 1917, in accordance with a plan approved by the National Advisory Committee, of which Dr. Joseph S. Ames, president of Johns Hopkins University, was then chairman and Rear Admiral David W. Taylor, vice chairman, the Manufacturers Aircraft Association was incorporated under the laws of the State of New York. The association's first meeting was held on July 24, 1917, and in accordance with the plan proposed by the National Advisory Committee, a cross-license agreement was adopted by eleven (11) manufacturers of airplanes. Since that time, nearly eighty (80) other manufacturers have approved the objects of the association and enjoyed its benefits. This agreement recognized the constitutional and legal rights of inventors and patentees and also proprietary rights of airplane designs by provisions specifying the terms for the acquisition of such rights and payment therefor.

On July 27, 1917, the National Advisory Committee for Aeronautics, by letter advised Hon. Newton D. Baker, Secretary of War, and Hon. Josephus Daniels Secretary of the Navy, of the solution of this question and enclosed copies of the agreement. In acknowledging receipt of these letters, the Secretaries expressed their appreciation of the work accomplished by the committee. On the same day, the committee also wrote to the association recommending acceptance of the agreement by all manufacturers in the interests of harmony and efficiency and to permit the free expansion of the industry to meet the demands of the Government.

Early in August 1917 a few days after the publication of statements on behalf of the Secretaries of War and Navy expressing their satisfaction at the successful issue of the Government's first step relative to airplane manufacture and procurement under the cross-licensing agreement, the motives of the Government and the association were publicly attacked by a small group, including a few officers of the then moribund and now defunct Aeronautical Society. Based upon unsupported opinions and false assumptions of fact, these critics whose interest in the problem and its solution has not been indicated previously, declared the plan to be the basis of a conspiracy to defraud the Government and to delay its aircraft production program, and to be in violation of the anti-trust statutes. This was the origin of the hoax of the "air trust." Later, Government investigators reported that foreign agents inspired certain inventors and patent attorneys to instigate such an attack and that money was paid to attempt to discredit all features of the plan in principle and to do everything to harm the Government and the industry so as to prevent aeronautical development in this country.

On September 17, 1917, following the publication of the hoax of the "air trust", the Secretary of War submitted to Hon. T. W. Gregory, Attorney General of the United States, a request for an opinion as to the legal status of the association and the agreement.

On October 6, 1917, the Attorney General rendered an opinion, concluding as follows:

"Not to go into further details it suffices to say that upon the data submitted to me I am of the opinion that the association incorporated as now constituted and the cross-license agreement under which it is now operated is not in contravention of the antitrust laws of the United States."

Following the publication of the opinion of the Attorney General, the attack on the "air trust" was renewed. This time the criticism related to the amount and rates of the royalties provided by the agreement.

Following the latter criticism, the Government's Aircraft Board, composed of officers of the War, Navy, and other Departments, on December 11, 1917, appointed a special patents committee, composed of three recognized patent authorities, Frederick L. Emery, Esq., and George P. Dike, Esq., of Boston, and John C. Kerr, Esq., of New York, to investigate the report upon the patent rates and amounts of royalties covered by the agreement. The report of this com-

Digitized by Google

mittee, dated January 14, 1918, after detailed consideration of use and validity, stated:

"We would advise any client and consequently the Government to take a license under * * * any reasonable and proper basis rather than to incur the injury which would inevitably result from litigation", and that the value of the patents and the payments called for by the agreement are "entirely reasonable * * * and less than the basis of recovery a court would allow in a suit against a private individual or concern."

The Government and the industry naturally hoped that having thus concluded three aircraft investigations during 1917, production of airplanes might proceed without further interference. Unfortunately this hope was not realized.

Early in 1918, a number of new aircraft investigations were started. This caused further delay in war production and resulted in great harm, in exact accord with the plan attributed by the Government to foreign agents.

During this period, the Military Affairs Committee of the Senate investigating war production heard many witnesses, including W. H. Workman, special representative of Handley Page, advocating the establishment of a factory in this country, at Government expense, to manufacture planes of English design, John A Jordan, who subsequently became associated with Mr. Workman in attempting to exploit other Handley Page projects including the dumping in this country of war surplus by the British Aircraft Disposals Corporation, and Henry Woodhouse, whom many will recognize as one of the persistently destructive critics of all American aviation and the predecessor and sponsor of your second witness, J. V. Martin.

In submitting the report of the Military Affairs Committee on August 23, 1918, Senator Thomas quoted from that part of the report referring to cross-licensing of airplane patents, as follows: "Although this subject has been referred to a special subcommittee for investigation, it has constantly obtruded itself upon our attention * * *. The committee has not heard a word in approval of it. It is condemned by every airplane manufacturer outside of the immediate beneficiaries." Recognizing the possibility of error in connection with the criticism of the Association and the cross-license agreement which had been presented to the committee, Senator Thomas in presenting the report expressed regret that the subject had not been fully and exhaustively investigaated.

Without referring to this qualification or to the fact that no member or officer of the Government or of the Manufacturers Aircraft Association interested in and understanding the provisions of the agreement had the privilege of appearing before the committee, all subsequent critics of American aviation have continued to take from the context of that report this one reference as a starting point each time an attempt for another congressional aircraft investigation is to be made. In accordance with this custom, as you will note by referring to page 6 of your printed record, that reference was used by the first witness appearing before your committee on February 11, 1935.

Amazed at the gross errors in the news releases regarding his speech and the report of the committee, S. S. Bradley, general manager of the association, went to Washington and called upon Senator Thomas the day after that speech was made and asked what evidence, if any, he had for the misstatements of fact contained in the report. He replied that certain individuals whose names he did not recall had stated thus and so. Inquiry was then made how he as a lawyer and a man experienced in public affairs could have made these statemeuts after reading our cross-license agreement. He confessed that he had not read the agreement, and Mr. Bradley then read it aloud to him and proved that many of the statements contained in the report concerning the association were untrue. Realizing that the harm could not be entirely done away with, Senator Thomas proposed that the special subcommittee be at once instructed to go into the subject thoroughly and to report in detail at an early date, so that the actual facts might be known and publicized.

It is significant to note however, that this subcommittee never met and no report of the facts was ever made by it. The criticism continued. It became almost exclusively political in character, and President Wilson then appointed Hon. Charles E. Hughes chairman of a special committee to make a complete investigation of the questions which had been raised regarding aircraft.

On October 25, 1918, the Hughes committee submitted its report to President Wilson, in which was included the following reference to the cross-license agreement of the Manufacturers Aircraft Association:

Digitized by Google

"The agreement has been criticized upon the ground that its provisions constitute a hindrance to the progress of invention in the important airplane field and as being in restraint of trade. Whatever ground for criticism exists in this respect is to be found in the terms of the agreement itself, as these are quite definite and determine its operation and effect. * * * The question of the legality of the agreement * * * was specifically submitted by the Secretary of War to the Attorney General * * * whether the association and the agreement were in contravention of the antitrust statutes of the United States, and the opinion was expressed by the Attorney General that they were not. That disposed of the question, in the absence of a contrary decision by the courts * * *. To the question whether the patents * * * and the payments for which the agreement provides constitute a compensation for the rights conferred, it would require an exhaustive examination of the patent situation, and this inquiry has furnished no opportunity for such examination. For this reason no opinion is expressed upon the point further than to say that, if the validity of the agreement be assumed, the amount of the payments was a matter of sound administrative discretion, and there is no ground for the conclusion that the amount as fixed * * * could not be fairly allowed."

In transmitting the Hughes report to President Wilson, Attorney General Gregory referred to the agreement as follows:

"Whatever may be said of the charge that this arrangement tends to discourage future inventions, one of the results was to enable the Government, through contractors, to secure the use of all necessary patents as a fixed cost and with little friction. * * * I find no basis for the suggestion that in bringing it about the members * * * were actuated by any unlawful or dishonest motive."

In view of these authoritative statements, it would seem impossible for any honest person pretending to have knowledge of this subject, to cite the earlier incomplete and inconclusive report of the Senate Military Affairs Committee as an authoritative criticism of either the association or the cross-license agreement.

Before the Hughes report was submitted and while a number of other aircraft investigators were at work, including the Snowden Marshall committee and Gutzon Borglum and Eugene Myer, the Secretary of the Navy, in the face of the continued criticism and ensuing political disturbances, called upon the association to consider a modification of the agreement.

This suggestion started in March and resulted in the supplemental cross-license agreement of April 19, 1918. By it, payments under the original agreement were arbitrarily reduced 50 percent during the period of the war. During these negotiations, the Secretaries of War and Navy also reached an agreement with the association for licenses under all of the patents owned by members of the association covering all airplanes manufactured in Government factories or procured from foreign or nonmember sources.

After the Armistice, criticism of the association and the agreement subsided, but in the summer of 1919, when foreign markets for airplanes began to open up, it was renewed by the same group of individuals. A printed pamphlet was submitted to the Frear committee of the House investigating war-time expenditures. When the committee failed to be impressed, another pamphlet was printed criticizing Congressman Frear and his associates.

In March 1920, certain foreign countries attempted to dispose of their surplus war planes and motors in the United States. The British Aircraft Disposals Corporation, of which Handley Page was manager, prepared and launched an elaborate plan for the sale of such material in this country at about one-twentieth of the cost of manufacture in England. An antidumping bill was introduced and referred to the Ways and Means Committee of the House. Critics of the association and the Government, and other paid lobbyists, opposed this bill. Officers of the Government and of the aircraft industry appeared in favor of it. The bill was immediately favorably reported and unanimously voted by the House, but Congress adjourned next day, preventing its passage by the Senate. The dumping of the English-built airplanes was stopped by court injunctions based upon infringement of patents owned by members of our association.

I am not in a position to determine whether all of the critics of our cross-licensing plan have been inspired by ignorance or malice, but it is certain that in the first instance such criticism was promptly capitalized by foreign propagandists to the detriment of our war effort. It is equally certain that while each succeeding official aircraft inquiry has always determined

Digitized by Google

the falsity of the allegations, their recurrence has resulted in repeated injury to the progress of airplane development in the United States.

Following the injunctions preventing the dumping of airplanes, Gaston B. Means, H. L. Scaife, Gutzon Borglum, W. E. D. Stokes, Henry Woodhouse, James V. Martin, and others continued their propaganda against the Government Air Services and the aviation industry through publicity and an active lobby in Congress and before the executive departments.

In January 1923, it was reported that desks had been assigned to one or more of these men in the House Office Building so that they might more effectively cooperate with Congressmen Nelson and Woodruff in preparation of material for a renewed attack on the "air trust" and the "billion-dollar aircraft scandal." The details of this effort will be covered in another statement which I have prepared, in accordance with your request, analyzing testimony of previous witnesses before your committee concerning the Manufacturers' Aircraft Association.

In view of such other statement and the more complete historical review (item no. 1) previously submitted in response to your subpena of September 20, 1935, I shall not comment further herein upon the 20 or more investigations to which reference has been made, nor shall I comment upon the current investigation, except by a brief reference to correct two statements made last spring, as printed in "Pooling of Patents" and the Congressional Record.

The statements that the Manufacturers' Aircraft Association expressed satisfaction with the testimony heard last February and March, and that members of the association had refused or failed to respond to invitations to testify regarding "grave charges" against them clearly show that the committee must have been grossly misinformed at the time of making such statements. Therefore, it is important from the point of view of the association and its members that a positive denial of both be entered in the record. No such satisfaction was ever expressed, nor were any such invitations ever received by our members.

Furthermore, the testimony during February and March was limited almost exclusively to "grave charges" against the "air trust." This indicates that the interest of previous witnesses was not primarily centered in the provisions of H. R. 4523. We do, however, appreciate the position in which the committee found itself after such testimony had been presented and feel in fairness to all concerned, it should now be determined finally and for all time: (1) whether officers of the Government and responsible reputable professional and business men actually did conspire to establish, and did establish in July 1917, an "air trust" which has been maintained since that date for the purpose of throttling aeronautical development in the United States and to rob our Government and its citizens; and (2) whether incidental to such conspiracy, a variety of crimes, including murder, arson, theft, and perjury, have been committed.

Anyone inclined to believe the testimony as printed in the 245 pages of the record of your previous hearing, must necessarily be prepared to include as essential factors therein, a large number of well-known, responsible people. A list of the participants would include, in addition to the President of the United States, four former Presidents, together with the Secretaries of War and Navy serving under the respective administrations of each during the past 19 years. The latter would include Secretaries Baker, Weeks, Davis, Hurley, Dern, Daniels, Wilbur, Adams, and Swanson. Specific mention is made of many, if not all of these men. Such a list would also include all of the earlier aircraft investigators. In addition to Charles Evans Hughes, the names of H. Snowden Marshall, Dwight W. Morrow, and members of former Congressional aircraft investigations are mentioned many times, specifically the Lampert Committee of the Sixty-ninth Congress. Three of the latter, Representatives Lea, Perkins, and Rogers, are also members of the present Congress. The Federal Aviation Commission, appointed by President Roosevelt under authority of the present Congress, is named as having been recently controlled by the "air trust." This group, as you know, was headed by Hon. Clark Howell, of Atlanta, Ga.

In order to believe this testimony, one must assume that in addition to the War and Navy Departments and the congressional committees, the "air trust" has dominated the Department of Justice for the past 18 years during the incumbency of Attorneys General Gregory, Palmer, Daugherty, Stone, Sargent, Mitchell, and Cummings. One must also accept the premise that the National Advisory Committee for Aeronautics were the originators of the

Digitized by Google

"conspiracy" which forms the basis for all of these "grave charges." The latter would impose an analysis of the motives and acts of Dr. Charles D. Walcott, former secretary of the Smithsonian Institution; Dr. Joseph S. Ames, former president of Johns Hopkins University; Rear Admiral David W. Taylor, former chief of the Bureau of Construction and Repair, and Dr. W. F. Durand, dean of the engineering school of Leland Stanford University, and Maj. Gen. A. O. Squier, former Chief Signal Officer of the United States Army, and other men of like caliber who have been actively identified with that body. They also rest, either by specific reference or implication, against all of the members of the several Federal Patents and Design Boards, the Institute of Aeronautical Sciences, the Aeronautical Chamber of Commerce and this association. Such a list would contain the names of every noteworthy manufacturer, engineer, designer, and operator of aircraft in this country, including Orville Wright and Charles A. Lindbergh.

While our critics have directed campaigns of destruction, responsible inventors, engineers, and manufacturers have devoted their time, capable energy, and capital to the advancement of American aviation. One cannot build a "Spirit of St. Louis", a Glenn Martin or Sikorsky "Clipper", a Boeing bomber, a Douglass transport, a Lockheed airliner, a Waco or Stinson cruiser, a Vought or Curtiss fighter, or a consolidated patrol boat, while answering groundless charges of some self-appointed "expert" lobbying for Government compensation covering claimed inventions.

Some of the alleged participants in the conspiracy of the "air trust" are dead, but many are still alive and available for examination before your committee. Possibly you will ask them to appear and speak for themselves. However that may be, and absurd and needless as it seems, I request that the record of your hearings contain an emphatic denial of these "grave charges" so that (to that extent at least) they may be freed from this cruel libel. I know of no action, and I am sure that no one else knows of any action by the Manufacturers Aircraft Association, nor the result of any such action, which has been injurious to our Government, its citizens, or to aviation. On the contrary, I know, and I am convinced that every informed, reputable person knows, of results which prove beyond question, the manifold benefits derived through the principle of cross-licensing of patents as applied to the development of aviation and in the application of aviation to our national defense. Further, I have no knowledge, and I am sure that no one else has knowledge or evidence of any crime of any nature, committed by anyone at any time, in the interest of the Manufacturers Aircraft Association. In making this statement, I submit that were any such knowledge or evidence available, it should not be incorporated and published in the form in which it appears in your record as a desultory dissertation of general accusations by irresponsible misinformed or malicious persons.

General Mitchell by his statements reveals himself as woefully misinformed or ignorant concerning the subject of patents and the operations of the Manufacturers Aircraft Association as well as other matters in regard to which he has presumed to testify. His testimony before your committee sets forth his well-known arguments for an air force entirely independent of the War and the Navy Departments. You have heard his views on that subject while he was presumed to be talking about H. R. 4523 or the cross-licensing of patents. You must have been impressed with his almost complete lack of understanding of the essential relationship in patent matters between the inventor, the manufacturer, and the Government. His final recommendation regarding airplane patents was a suggestion that the Government own them. Apparently he is unaware that the Government is already empowered to purchase aircraft patents. That they have not done so must be due to definite reasons. Perhaps the patents submitted have not been necessary or sufficiently valuable, or the right to use them has been obtained more economically and equitably through licenses. Possibly the inventors have not been willing to sell within the maximum sum the Government is empowered to offer.

Ten years ago, when General Mitchell was in aviation, we worked with him toward its development. The industry did not always agree with him about what to do and how to do it but benefited by his enthusiasm in spite of his contempt for facts and details. Later General Mitchell's criticism of the Army and the Navy was not conducive to the harmonious understanding and mutual confidence required for progressive development in a pioneering enterprise. Many in the industry told him so but he chose to continue on that course. With his resignation from the Army after court martial, his attitude became more

Digitized by Google

critical, and as Grover Loening has said in his recent book, General Mitchell after "dictating every move of the Air Service, certainly proposing, approving, and even testing the types of planes to be used, with orders given only for equipment that he himself chose" also became critical of those in the industry who continued to serve the air services. He designated the manufacturers as mere "merchants" and showed other evidence of increased disfavor.

From his statements to your committee alone, it would seem conclusive that his views on patents are based upon misinformation or misunderstanding. Perhaps they are merely opinions forced upon him by others, or by circumstances or situations from which he wishes to escape. At any rate, they justify the feeling that he is not in a position to make helpful suggestions in this field.

I am firm in my belief that experience to date has taught that the principle of cross-licensing, properly applied to modern industry and administered on the basis of fairness to the public, the inventor, and the manufacturer is of great value to economic, industrial, and social development.

The fact that after our 18 years' experience practically all reputable aeronautical interests in the United States still approve and enjoy the benefits of cross-licensing should be first-hand and convincing evidence as to the value of the agreement administered by the Manufacturers Aircraft Association. There are critics of cross-licensing in principle and others of airplane cross-licensing in particular. The latter, as you will learn, have always been motivated by purely personal interests.

SECOND SUPPLEMENTAL STATEMENT BY F. H. RUSSELL TO THE PATENT COMMITTEE OF THE HOUSE OF REPRESENTATIVES REGARDING THE OBJECTS OF THE CROSS-LICENSE AGREEMENT AND ALSO CONCERNING PROPOSED LEGISLATION AFFECTING PATENTS

In this statement, it is my pleasure to discuss the constructive side of our presentation; to deal with the objects of the cross-license agreement and general principles underlying it; and to review very generally the recommendations which have already been presented to you by previous witnesses in regard to new legislation affecting the aviation patent situation. I have already commented on the first suggestion offered you, i. e., General Mitchell's recommendation that the Government take over the ownership of all aeronautical patents. I need not add anything to the views previously expressed in regard to such suggestion. It is obviously impractical.

Concerning the second recommendation which has been made, you will undoubtedly be interested to learn that we are on record as a part of our recent submission to another Federal investigating group, as favoring amendment, or repeal, of the Patent Act of July 1, 1918. Needless to say, therefore, we were quite surprised, in view of the nature of the other testimony presented by the witness J. V. Martin, to know that he has adopted the same view toward this particular legislation as has previously been urged by the association. Specifically, our recommendation has been that the act of July 1, 1918 (c. 114, 40 Stat. 705), amending the Court of Claims Act of June 25, 1910 (c. 423, 36 Stat. 851) entitled "An Act to Provide Additional Protection for Owners of Patents" be amended so as to define it specifically as war-time legislation and to limit its application to such periods as a state of war, involving the United States, is officially declared to exist.

If you will refer to the record of the passage of this act (see Congressional Record, 65th Cong., 2d sess., proceedings of June 18, 1918) you will find that the primary congressional purpose of the amendment of 1918 was to stimulate contractors to furnish what was needed for the period of the World War, without fear of becoming liable themselves for infringement to private inventors and owners of patents. The record of the passage of that act leaves no doubt that this was the occasion for it, but through an apparent oversight, it was not limited to times "when the United States is at war." The act of October 6, 1917, for example, dealing with the disclosure of certain inventions essential to the national defense, was so limited and it is just as reasonable to assume that the failure to provide similar limitations in the act of 1918 was an oversight as to attribute it to deliberate intent. Other examples can readily be given as it was the obvious intention of Congress to so limit all war-time legislation.

Just as the original act of 1910 provided a means for obtaining compensation from the Government when the power of eminent domain was exercised in obtaining the use of patents impressed with a general public utility, the amendment of 1918 also provided a means for obtaining compensation under

Digitized by Google

similar circumstances, but in addition, it limited the manner in which such compensation could be obtained. Likewise, the 1918 amendment contemplated the possibility of official error or mistake, and therefore afforded a remedy for correction and resulting compensation. It is a fact, however, which cannot be successfully refuted, that neither the act of 1910 nor the amendment of 1918 was ever intended to give the Government an automatic license to use all patents, yet, as will be shown, that has been its result.

Although the war was officially terminated in July 1921, and the emergency period had ceased to exist more than 2 years prior to that date, the practice of confiscating patents without any regard to the element of public necessity, was continued by certain departments of the Government. These departments were quick to realize that, in order to meet the exigencies of wartime conditions, Congress had given them the power (but not the right) to take over any and all patents whether necessary to the Government or not. To do this it was only necessary to let a contract to a private firm, specifying that the article covered by the patent be furnished. This practice is extremely vicious from the point of view of the individual patent owner, particularly since there is no longer any excuse for continuing the wartime measure. It operates to give the Government exactly what the Congress never intended to grant, either by the 1910 act or the 1918 amendment thereof, namely, the equivalent of a general license to use all patents irrespective of ownership, whether or not the power or eminent domain is exercised.

Furthermore, despite the fact that the amended statute would seem to have definitely placed the liability for the confiscation of such rights on the Government, when the power of eminent domain is exercised, the executive departments have also adopted the practice of including so-called "save harmless" patent clauses in all contracts. Originally, these clauses were merely a restatement of the law on the subject and were not objectionable, but during recent years, they have been modified to such an extent as to shift the burden which Congress imposed on the United States directly from the Government to the contractor. As a result, in order to do business with the Government, the manufacturer is compelled to assume complete liability for the indeterminate amounts representing the compensation which the patent owners might recover in the Court of Claims because of such infringement, plus the court costs and other expenses incurred by the Government in connection with such litigation.

Thus, we see, that although the contractor is temporarily secure because the patent owner has no immediate recourse against him, there is, in fact, no difference between the indeterminate liability incurred by the manufacturer, and measured by the extensive litigation, possibilities of prohibitive injunction, punitive damages, etc., which existed prior to the passage of the amendment, than the indeterminate liability measured by restitution under a "save harmless" patent clause. The liabilities are equivalent in every respect. The only difference is one of convenience to the Government departments in placing orders and obtaining prompt delivery of patented articles. On the other hand, a temporary security is extended to the manufacturer at the expense of individual patent owners, who are now compelled to incur the hardship and cost of litigation in the Court of Claims for every such use, before any recognition whatsoever is given to their patents, either by the Government or the contractor. As a matter of fact, the wording of the amended statute, which purports to make the Government liable for all infringments, has been advanced by such executive departments as the compelling reason for the use of the "save harmless" patent clauses in Government contracts.

It is also to be noted that the contractor is compelled to make such restitution without having had any opportunity to direct the litigation or to appear and defend in its own right. The adoption of such patent clauses, therefore, in addition to subverting the intention and purpose of Congress in passing the amendment, only means that the contractor instead of the Government must take the precaution to insure himself against these indeterminate liabilities. This can only be accomplished by sufficiently increasing the selling price of each article.

Obviously, very few manufacturers, if any but the largest, do business on a scale large enough to warrant covering this indeterminate liability with any kind of insurance, if it be assumed that a suitable method could be found for calculating and distributing the charges. As a result, representative members of the various industries having large investments in patented rights, started

Digitized by Google

a movement shortly after the war, to secure the repeal of the amended statute. A bill was drafted, conferences were held, but due to failure to appreciate the serious consequences which have ensued, no action was taken, and the amended act has been allowed to continue in force. Now, under the practices which have grown up, many of the most enterprising manufacturers investing large sums of money in developing patents stand stripped of any practical advantage over their competitors. As will be hereinafter pointed out, such concerns actually find themselves at a very serious disadvantage insofar as business with the Government is concerned.

Under the practices above referred to, which have developed as a result of the continuation of the act of July 1, 1918, the patent owner, learning of the infringement of his patent by a contractor with the Government, knows at once that it is futile to approach the contractor as he will merely be advised that his only recourse is a suit against the Government in the Court of Claims. The remedy of injunction to prohibit continued infringement of his patent is no longer open to him. Although one department of the Government grants a patent, which according to law reserves to the owner of such patent, the exclusive right to the enjoyment of the invention for a period of seventeen (17) years from the date of issue, as consideration for a complete disclosure of the invention to the public, he is now confronted with the possibility of unlimited use by any competitor who is doing business for the Government. The most that he can expect from the contractor who is openly infringing the patent in response to a notice of the alleged infringement, is to be referred to the interested Department of the Government.

Assume that the patent owner then notifies the Government of such infringement. In recent years the tendency has been for the Government, believing that their contractors are ultimately liable under the terms of the "save harmless" patent clauses, to feel secure in advising the patent owner that his only recourse is a suit in the Court of Claims. Thus the inherent right to negotiate licenses under patents, without recourse to expensive litigation, is now denied to the individual patent owner insofar as use or manufacture by or for the Government is concerned. The infringing contractor feels that he is temporarily secure because he has been led to believe that the patent owner has no immediate recourse against him, and the Government relying upon the provisions of the "save harmless" clauses, feels that it has secured itself against any compensation which may be recovered in the Court of Claims by imposing the liability on the contractor. The practical effect has been to discourage initiative on the part of private inventors and, consequently, to suppress ideas for the improvement of processes and articles purchased by the Government.

Likewise, in the case of a Government contractor, the amendment tends to lessen the incentive to improve articles sold to the Government because it has become more profitable to copy the inventions made by competitors than to undertake the expense of original research and experimentation.

Consider, for instance, the case of a patent owner who has contractual relations with the Government as a supplier of the patented articles. The patent specification, if drawn so as to comply with the law, teaches the public, including all competitors, how to practice the invention in the preferred form. A competitor, having learned the best way to practice the invention can then underbid the patent owner, since the necessary knowledge cost him only the price (10 cents) of the printed copy of the patent. The patent owner is then told that no direct recourse is open to him against the competitor, but that he may bring a suit against the Government in the Court of Claims, not for the purpose of enjoining the infringement of his patent, but only to recover reasonable compensation for use or manufacture by or for the United States. In other words, his only recourse is to bring suit against the customer upon whom it may be necessary for him to depend for future sales and for whom he may have developed the patented article at his own expense. This is particularly true if the invention is susceptible of use in connection with the national defense, such as inventions relating to the subject of aeronautics.

It is admitted by some officials that the filing of suit against the Government has a pronounced reaction prejudicial to the patent owner. Relations at once become strained, and such owner must decide whether the prosecution in the Court of Claims and the compensation which may eventually be recovered are worth more than the business he might otherwise have had with the Government during the same period. Obviously, he would lose the advantage which

Digitized by Google

he hoped to gain by having been first in the field with a worthwhile invention and having gone to the expense and trouble of patenting it.

This presentation is not going so far as to contend that the amended statute is unconstitutional. However, it does seem inconsistent that the Constitution should extend to inventors an exclusive right to their discoveries for limited times, while the congressional amendment of the act above referred to, which deals only with patents, should result in unlimited use of the inventions by all contractors with the Government. This effectively deprives the patent owner of the only substantial right reserved to him as a direct result of having disclosed his invention to the public in order to obtain a valid patent. Obviously, this practice has grown out of the continuation of the 1918 amendment and use of the "save harmless" clauses in Government contracts. It is inconsistent with the theory underlying the constitutional provision for the patent laws and is not in the public interest. Therefore, it is submitted that the 1918 act should be amended in such a manner as to define it as wartime legislation, and to limit the application thereof to periods when a state of war involving the United States is officially declared to exist. The only justifiable alternative from the point of view of the patent owner is to repeal the statute.

As an alternative, it has recently been recommended that the act of July 1, 1918 (40 Stat. 705), be repealed; that the act of June 25, 1910 (36 Stat. 851), be reinstated; and that Revised Statutes 4921 be amended to provide for direct suit against Government contractors by a patentee, but that no injunction shall issue which would interfere with the delivery of materials to the Government. Although this extends the theory of the amended act further than would seem to be warranted in order to meet peacetime requirements, it would appear that the patent owners may have modified their views on this question until a majority of them at present agree that the right to obtain injuncive relief against Government contractors should be denied. The above recommendation is essentially a repetition of one which the Lampert Committee made on the same subject in 1925.

It is not necessary, I feel certain, to call your attention to the pendency of House bill 5384 before the present Congress. Passage of this bill, which has also been referred to your committee, would put into effect the above recommendation except insofar as it relates to injunctive relief. Judging by the testimony presented to your committee by the self-appointed spokesman for the so-called independent inventors and manufacturers and by the views of the remainder of the industry, this measure apparently receives the hearty support of all persons. Therefore, we strongly commend it to your immediate attention.

Other suggested legislation referred to in your "Pooling of patents" is that relative to the repeal of certain provisions of the National Defense Act which has also been proposed by the witness Martin. Differently expressed, his idea is that inventors should be free to secure from governmental sources, aided by Government officials, whatever information they consider necessary or useful in pressing claims for damages against the Government in the Court of Claims. The reason for this recommendation by J. V. Martin is probably as apparent to you as it is to me. Documents obtained in the manner suggested would prove of great value to any litigant. This rather novel proposition has not been presented to the directors of the association, therefore, I cannot give you their considered opinion on it. I believe, however, that they would not favor it, and I can assure you that the aeronautical industry and all responsible citizens of the United States should prefer to continue this law as it now stands as a matter of public policy.

The only other proposed legislation referred to in your record is the bill now under consideration, H. R. 4523, providing for the recording in the United States Patent Office of all patent-pool agreements and for other purposes with which you are familiar. As in the case above referred to, our directors have not met in consideration of this bill. The suggested provisions, however, have been discussed by the officers and certain members of the association who agree in substance with the recent report of the special committee of the American Bar Association which unanimously disapproved the bill. This is also the opinion of all other persons with whom we have discussed it. The conditions to be obtained by its passage, however, are no different so far as the Manufacturers Aircraft Association is concerned, than the conditions which have prevailed without change ever since the organization of this association in July 1917. Ever since that date, our several successive cross-license agreements have been available to everyone including all departments of the Government. In cannot tell you offhand whether the Commissioner of Patents

Digitized by Google

has ever received copies of these agreements, but if he has asked for them, they have been sent to him. We have never refused to give complete information in regard to our operations to any official of the Government or to any other responsible person or organization, including the more than 20 investigating committees and boards who have inquired into our activities during the past 18 years. The theory and contents of all of the agreements which have been administered by the association have always been public knowledge. This is the policy of our organization, and I see no reason why it should be changed, either now or in the future.

It has always been relatively easy to make the front page of the newspapers by shouting fraud and corruption; but when such outcries are coupled with aviation, they have become double-barreled in their effectiveness. If the desired effect is not immediately realized, it has never required a master mind to add both of the military services of the Government, the Department of Justice, and various committees of Congress as a last resort. This is certain to get results. Hence, aviation has often been characterized as a puppet in the hands of publicity seekers.

I doubt if there has ever been any undertaking more closely scrutinized by the legislative, executive, and judicial branches of the Government, and by the public, than the activities of the Manufacturers Aircraft Association since the very date of its inception. Had not the objects and principles underlying the cross-license agreement and the character of its administration been what they are, undoubtedly some of these investigations would have found some feature of the plan which should be changed. The fact that they have not done so is significant, to say the least. As a matter of fact, the operations of the association have been so widely publicized for so many years that it was a distinct surprise to us to observe the direction taken by the present hearings and to read in your "Pooling of patents" another revival of this ancient hoax.

Before proceeding with a discussion of the objects of the cross-license agreement and the manner in which the same has functioned, there is one other item of the testimony before you which I desire to deny emphatically at this particular time. Both Martin and Mitchell assert or intimate in various ways that the Manufacturers Aircraft Association has sued various airplane manufacturers for the infringement of patents. Those statements are positively untrue. The association has never owned any patent. Therefore, it has never been in a position to sue anyone for patent infringement, nor has it ever been a party to any such suit. By no stretch of the imagination has the association ever possessed the right to do that which Mitchell appears to assert on page 11 and Martin does assert on page 86 of the testimony; that is, sue others for the infringement of any patent. Can you believe in view of such fact that the statement which Martin has made on page 86 of the testimony was not deliberately calculated and intended to mislead you? He states there that "* * * only recently the Manufacturers Aircraft Association as plaintiff with the Curtiss Co." brought suits against Henry Ford and Bellanca. I desire to repeat that this is entirely untrue, a deliberate falsehood.

Let me state to you the sole function of the Manufacturers Aircraft Association. It is to administer the cross-license agreement, and in doing so to render a necessary service regarding patent problems to its stockholders and subscribers. The cross-license agreement itself is a contract between members of the Association by the terms of which each member agrees to grant licenses for the use of all of its patents by all other members, and each member agrees to accept licenses under all of the patents of the other members. The Manufacturers Aircraft Association merely serves as a licensing agency and as administrator of the necessary steps in this process. The association is the common ground on which all of its members stand in handing to each other the right to use the combined inventive genius of the entire membership. They do that, through the association facilities, promptly and expeditiously. By the terms of the cross-license agreement, all patents of all members are made immediately available for use in the airplanes sold to the public for civil purposes or delivered upon contract to the United States Government. Through this instrumentality, the inventive effort of all of the manufacturers has been made available on reasonable terms to improve the quality of the products of all members, and to advance the art and science of aeronautics without resort to expensive and wasteful patent litigation. This is the principal object of the cross-licensing plan. You will note that it is recited as such in the preamble to the agreement, a copy of which has been handed to you for your records.

Digitized by Google

Now, concerning the objects of the plan, you should know that the aims and purposes of the cross-license agreement are based upon sound economic principles which have been thoroughly proven in practice. Broadly stated, these principles may be enumerated as follows:

"(*a*) To minimize legal and administrative expense incident to patent problems and to avoid insofar as practicable wasteful infringement suits, nuisance claims, and other controversies regarding patents as a direct result of providing equitable compensation to individual inventors and patent owners, thus escaping the interminable delays and losses which would result from destructive litigation;

"(*b*) To avoid unnecessary duplication of expensive research activities in regard to new developments, thereby enabling different inventors and manufacturers to profit by the research work already carried on by others with the result that better airplanes are produced at lower cost and consequent lower price to the consumer;

"(*c*) To stimulate invention through direct benefits to individual inventors, and to encourage the recognition of invention and the filing of applications for patents within the industry in order to prevent the subsequent issuance of letters patent on similar subject matter to foreign interests or other parties, which might be used to arrest and disturb the normal advancement of the art in this country; and

"(*d*) To give the public and the Government the benefit of as many patentable developments as possible, without delay, upon a basis of fair compensation determined by commercial arbitration, so as to maintain the high quality of our products and prevent any monopolistic tendency within the industry due to patent combinations."

It is interesting at this point to note that the chairman of your committee in preparing a memorandum outlining the advantages to be gained from the cross-licensing of patents has apparently framed his entire statement around assumptions which really amount to no more than a restatement of the above principles. In fact, many paragraphs of that memorandum are directed specifically to a description of the beneficial results which would be obtained if full effect were given to the principles above set forth. This is more than a mere coincidence. The cross-licensing plan as adopted by the manufacturers of aircraft in this country was designed to obtain the precise results which your chairman has so ably discussed on pages 225 to 229 of the printed record of these hearings. These results have, in a large measure, been realized by the principal manufacturers of aircraft in this country.

In 1925, the Lampert committee found that the cross-license agreement was—

"a practical business arrangement to do away with the litigation over patents and permit the members to build planes rather than try law suits against each other. Any builder could become a member upon payment of a membership fee of $1,000, and by putting in his patents get the right to use all of the patents in the control of the membership. A similar cross-license agreement has long been in use in the automobile and other industries. The feature of a trust is to keep others out. All could enter here upon payment of a membership fee costing about one-seventeenth of the average cost of a plane."

This condition is just as true today as it was then. There has been no change. In the above memorandum prepared a few weeks ago, your chairman refers to the pooling of patents in the modern industrial world as "a virtual necessity" and states regarding the same automobile agreement referred to by the Lampert committee in 1925, that—

"The assembling under common control of numerous patents covering the latest improvements in any particular line of manufacture makes possible the realization of the product which from the standpoint of economy, efficiency of operation and general merit approaches the ideal. Since in the absence of a patent pool it would be virtually impossible, in many instances, for any one manufacturer, and even more so with respect to a group of manufacturers, to build a machine having the combined virtues represented by the several patented improvements."

It can readily be seen that the above remarks are all the more true in the case of aircraft where safety and superiority of performance are paramount. In view of the conclusions already reached by your chairman, it would not seem that any more emphasis need be given to such aspect of the inquiry at this time.

Digitized by Google

Concerning the manner in which the association performs its functions, the primary and most frequent operations are those which are specifically outlined in the cross-license agreement. The periodical reports of production and payments thereon, and reports of any patents or rights under patents owned or controlled by subscribers are all described at length therein. There are, however, other rights also provided which may need some explanation, namely, those which may be exercised in regard to patents acquired after the effective date of the agreement. In reporting such a patent, the subscriber may, if he so desires, report the same to the association with a claim for extra compensation, in which case a commercial arbitration is held to determine whether the invention covered by the patent is of such a nature as to justify a monetary award. These arbitrations conform to the arbitration laws of New York, the State in which the association is incorporated. The board of arbitration consists of one arbitrator appointed by the subscriber owning the patent, another arbitrator appointed by the association, and a third arbitrator chosen by the two arbitrators thus appointed. The arbitration board may decide that the patent is not entitled to any compensation in addition to the mutual benefits flowing between subscribers and, therefore, that the same should be contributed by the owner thereof to the common benefit of all subscribers, or the arbitrators may render an award fixing the rate at which royalty or other payments shall be made for each use of the invention until the total amount specified in the award has been paid. That is, each time a member uses the particular invention covered by a patent granted extra compensation, he must pay a small sum in addition to the regular payments under the agreement.

This has been referred to by a previous witness as a vicious practice. Accordingly, it is interesting to observe that since 1928, when the present cross-license agreement went into effect, there have been a total of 45 arbitration proceedings, each of which has resulted in a unanimous vote of the arbitrators. In no instance has the subscriber owning the patent been dissatisfied, nor have any of the other subscribers expressed any dissatisfaction with the awards as rendered by the arbitrators.

This is indicative of the degree of fairness and justice which has been attained and of the understanding and honesty with which these proceedings have been attained and of the understanding and honesty with which these proceedings have been conducted. At the present time there are approximately 750 patents licensed under the agreement now being administered by the association. Since December 31, 1928, arbitrations have been held on 159 patents reported with claims for special compensation. Of that number, 87 patents have been refused extra compensation and 51 patents have received cash awards, the maximum total sum on account of an award on any single patent being $35,000. Therefore, the statement which was made, criticizing this provision of the agreement, is entirely groundless.

There is another function which falls naturally to the association. As you know, the maintenance of domestic and foreign files of patents is an expensive undertaking. Our members, practically all of them, find it impossible to maintain such a facility for their own use. The association, however, is able to fill this need and to make available for the use of its members a most complete file and record of all of the domestic aeronautical patents as well as those of England, France, and Germany. From this source our members may obtain the patent information necessary for the development of their own ideas and the protection of their activities. In this connection the association is now publishing a semimonthly digest of domestic aeronautical patents to all subscribers to the agreement and to the interested departments of the Government. This digest has proven to be of great value to all concerned. A similar digest of British patents has recently been developed which is being published bimonthly and has lasting merit and usefulness.

Of equal value is the association's aeronautical library of magazines, textbooks, photographs, and publications which is in constant use in connection with searches of the prior art, applications to practice, and other historical information. This library, I may add, is probable the most complete of its kind in the United States, if not the world. Due to the concentration of work of this character for many manufacturers in one office, a more economical result is obtained which, in turn, is reflected in reduced cost of manufacturing in the industry. Many of our members feel that the small sums paid for the association membership are more than returned by these service features alone.

Now, let us take up the matter of royalties paid for the use of this large group of patents. Except for those patents which have been awarded extra

Digitized by Google

compensation through the arbitration procedure above referred to, each member agrees to pay to the association an amount equal to one-quarter of 1 percent of the selling price of the airplane, excluding the cost of the engine and certain other accessories. At the present time there is a limitation on the amount of these payments which provides that they shall not exceed the sum of $25 per airplane. This amount is retained by the association for the purpose of administering the cross-license agreement and performing the service functions mentioned above. In addition, each member pays the sums due for each use of the nventions covered by patents which have been granted special awards, and of these sums, the association is entitled to retain up to 12½ percent for the same purposes. There are no other charges; the only sources of income which the association has are those two just given. The first, one-fourth of 1 percent of the less-engine price of the airplane with a maximum of $25, and secondly, the 12½ percent of the amounts paid under special awards. The total of these sums received by the association since the adoption of the original agreement, or in other words, during the entire 18 years, has averaged less than $30,000 per year. I believe that you will agree that this is comparatively a modest sum of money for the industry to expend for these facilities.

There is one other matter which I would like to bring to your attention which will be of immediate interest to your committee in connection with the subject at present under consideration. I have reference to the form of certain contract provisions currently stipulated by the War and Navy Departments as a condition precedent to doing business with the Government of the United States.

First, I would like to refer to the recent contentions of the Government in regard to its so-called New Features of Design clause, which reads as follows:

"The contractor agrees to accept the contract with the understanding that the Bureau of Aeronautics holds the right to maintain new features of design involved in this contract as secret, until such time as it deems it advisable to release them for other than military purposes. The contractor obligates himself to comply with this requirement to the best of his ability and agrees not to publish, divulge or sell anything pertaining thereto, until officially authorized by the Navy Department. The features of design considered to fall under this category will be mutually agreed upon during the course of development covered by the contract."

The above clause has been used in experimental contract for some time, and the contractors, recogning that certain of such inventions may be important to the national defense, have accepted the provisions of these clauses and have refrained from patenting any new features which the Government has designated as secret. Such a procedure, of course, is tantamount to an outright abandonment of these rights, but it has seemed to be necessary under the circumstances, due to the fact that the issuance of a patent by the Patent Office would constitute a publication of the invention which would be in violation of the above clause.

Within the past year, however, the Government has indicated that it will compel contractors to execute an assignment of all such inventions so that patent applications may be filed by the Government under the "Three Year Act" and the rights will not be lost. The present attitude of the Navy Department at least, is to compel the outright assignment of all of these rights whenever possible under the terms of the contract. The so-called "Three Year Act" reads as follows:

"R. S. Section 4894. All applications for patents shall be completed and prepared for examination within 6 months after the filing of the applications, and in default thereof, or upon the failure of the applicant to prosecute the same within 6 months after any action therein, of which notice shall be given to the applicant, they shall be regarded as abandoned by the parties thereto, unless it be shown to the satisfaction of the Commissioner of Patents that such delay was unavoidable: *Provided, however,* That no application shall be regarded as abandoned which has become the property of the Government of the United States and with respect to which the head of any department of the Government shall have certified to the Commissioner of Patents, within a period of 3 years, that the invention disclosed therein is important to the armament or defense of the United States: *Provided, further,* that within 90 days, and not less than 30 days, before the expiration of any such 3-year period the Commissioner of Patents shall, in writing, notify the head of the department interested in any pending application for patent, of the approaching expiration of the 3-year period within which any application for patent shall have been pending".

Digitized by Google

It is to be noted that the benefits of the above provisions are only available to the Government as regards applications which have become the property of the Government of the United States Furthermore, attention is called to the fact that under the contract clause above quoted, there is no limitation whatsoever regarding the nature or the number of such inventions which the Government may designate as secret Accordingly, if the Government continues to designate all experimental work as secret projects and in accordance with the above procedure continues to require that all of these inventions be assigned to it, the industry will be confronted with a situation in which it cannot assign such rights without violating the provisions of the cross-license agreement as well as the contract between the Manufacturers Aircraft Association and the Government, and the only alternative will be for the industry to continue to withhold the issuance of the patents for an indefinite period of time at the risk of forfeiting the right to obtain any patent protection either in this country or abroad

The hardship and injustice of such a requirement from the point of view of the contractor is readily apparent The experimental equipment is put into use and in certain cases production orders follow. These airplanes, including the secret features of design, are flown extensively, disclosing the invention. This permits third parties (who have either seen the invention or have obtained the information in some other manner, or have even developed the device without previous knowledge of the earlier discovery by the contractor) to file applications in the Patent Office, covering such features. The contractor, however, would have no way of knowing that such applications have been filed until at some later date a patent issues, and all manufacturers including the actual inventor and the Government, are confronted with claims for patent infringement. In such cases the prior secret use of the invention is not a bar to the granting of the patent to the third party, and under the statutes such use does not constitute a valid defense to any infringement suits which may ensue. Some inventors, knowing of this practice, make it a business to observe all secret projects as soon after delivery as possible and file patent applications on every new feature.

While it is true that the experimental use, above referred to, might not prevent the contractor from filing a subsequent application (providing the Government would permit such action) with a request that an interference be declared by the Patent Office to determine the question of priority of invention between such application and the issued patent, such a procedure would be expensive and highly unsatisfactory. In such cases it is much more probable that both the contractor and the Government will lose all rights to the inventions and must stand suit or pay royalties for the use of features actually developed by the contractor.

On the other hand, it is recognized that the Government should be able to suppress the disclosure of certain inventions essential to the national defense. This is just as true, however, of inventions made by others than the Government contractors. During the World War Congress recognized that all inventions of such a nature should be kept a secret and passed legislation to that effect which is still part of our laws, as follows:

"Act of October 6, 1917:

"That whenever during a time when the United States is at war the publication of an invention by the granting of a patent might, in the opinion of the Commissioner of Patents, be detrimental to the public safety or defense or might assist the enemy or endanger the successful prosecution of the war he may order that the invention be kept secret and withhold the grant of a patent until the termination of the war; *Provided*, That the invention disclosed in the application for said patent may be held abandoned upon it being established before or by the Commissioner that in violation of said order said invention has been published or that an application for a patent therefore has been filed in a foreign country by the inventor or his assigns or legal representatives, without the consent or approval of the Commissioner of Patents, or under a license of the Secretary of Commerce as provided by law. When an applicant whose patent is withheld as herein provided and who faithfully obeys the order of the Commissioner of Patents above referred to shall tender his invention to the Government of the United States for its use, he shall, if and when he ultimately receives a patent, have the right to sue for compensation in the Court of Claims, such right to compensation to begin from the date of the use of the invention by the Government."

Digitized by Google

It will be noted, however, that the above act was limited to times when the United States is at war, and that the loss of foreign rights was not involved due to the operation of the Nolan Act of March 3, 1921, and reciprocal legislation in foreign countries. It is also important to observe that provision is made in the above act for compensating the patentee for that which the Government is taking away from him. In other words, any applicant who faithfully obeys the order of the Commissioner of Patents not to publish the invention or to file an application for a patent in any foreign country based thereupon, and who shall tender the invention to the Government of the United States for its use in connection with the national defense, shall have the right to sue in the Court of Claims for such use, such right to begin from the date of the first use of the invention by the Government.

In considering this subject, it should be appreciated that efforts to maintain inventions of this nature in secrecy seldom if ever succeed for more than 2 years following the date such experimental contract is completed. Consequently, the contractor frequently is in the position of being known as the originator of a device concerning which the public has full knowledge while at the same time being unable to secure patent protection for himself in this or foreign countries due to the continued enforcement of the above clause. This fact is said to have been recognized in other industries doing business with the Government by limiting the term of such clause to a period not to exceed 2 years, thereby enabling such industries to proceed in an orderly manner to obtain patent protection. For some reason, the 2-year limitation has been omitted from the clauses which our manufacturers have been compelled to accept, with the result that valuable rights may be forfeited. This will certainly be true if the contractors are forced to assign such rights to the Government, as all rights will then be lost to the originator of the design, and the commercial rights to our most important developments would be thrown into open competition. On the other hand, a patent covering the same subject matter may have been taken by a third party in the manner heretofore indicated, in which case both the industry and the Government would ultimately be required to pay royalties to a patentee, possibly a foreigner, who was not the original inventor.

A possible explanation of the exception above referred to in the case of airplane contracts may rest in the fact that a greater possibility may exist in this highly specialized art as compared to other fields, that the results of research and experimentation may produce inventions of far-reaching importance. This is undoubtedly true, and for such reason alone, all patentable rights should be zealously guarded both by the Government and the industry, and not be dissipated in the manner above outlined, as a direct result of a shortsighted policy on the part of the military services regarding all new inventions. Our leadership today in aeronautics may be attributed directly to the individual initiative of our designers, and if such leadership is to be maintained in the future, our efforts should be directed toward the stimulation and encouragement of such individual initiative rather than to placing further obstacles in the path of any recognition or return for worthwhile accomplishments.

In view of the above, it is the feeling of the industry that this is another instance in which the great power of the Government has been used, through procurement contracts, to enforce an unjustifiable policy upon the owners of valuable property rights without just compensation. Accordingly, as president of the Manufacturers Aircraft Association, which represents practically all of the manufacturers in the field, I wish to suggest for your consideration that definite steps be taken to prevent the recurrence of a situation which may result in any such confiscation of valuable private rights. More specifically, I would recommend (1) that the act of October 6, 1917, above quoted, be amended to extend the protection afforded by it to peace time conditions, including reciprocal relations with other nations, if necessary, in regard to the period of time within which foreign applications may be filed, and (2) in view of the recent intimation by the Government that it may be necessary to compel the assignment of these inventions to it, that any such clauses in the future contain an expressed reservation to the contractor of title in all such inventions. It is thought that the adoption of these recommendations will give the Government a measure of security commensurate with its needs, while securing for the actual inventor some degree of protection in the enjoyment of the rights herein discussed.

Digitized by Google

Another matter which I desire to discuss is the form of the patent clause used by the Government in procurement contracts. In this connection, your attention is called to the fact that during the past year the language of these clauses has been modified to include in addition to the objectionable features of previous forms, all inventions and improvements incorporated in the project which were wholly or in part perfected or reduced to practice, either with the aid of the Government or with the cooperation of Government personnel. An example of hardship which such a condition imposes would be found in the requirement that an invention made prior to the contract, and consequently the sole property of the contractor, if reduced to practice during the performance of the contract, would become subject to a license to the Government to have made by any other party without the payment of any consideration other than the contract price.

The inclusion of these provisions is apparently based on the theory that since the Government is participating to some extent in the cost of the development work involved, it is entitled to free use forever of all discoveries or inventions of whatever nature, or whatever intrinsic value, and that these provisions are considered as necessary to protect the Government against any possible suits for infringement. This theory overlooks entirely the possibility that an invention made under such circumstances might be worth several times the amount paid for the whole contract, with the result that the contractor could not afford to do otherwise than to withhold the use of any invention representing a substantial advance in the art until after the contract has been completed. Even this would not suffice if the invention should be used at a later date on an airplane sold to the Government under a contract containing such a clause.

It is contrary to every principle upon which our laws are founded for the Government to obtain a free license for such invention (previously conceived and/or possibly, actually or constructively reduced to practice at the expense of the contractor) just because said device is used for the first time in an airplane manufactured under a Government contract, particularly since payment for rights under such invention comprises no part of the consideration paid by the Government. At least one instance has already been experienced in which the Government by simply altering its specifications during the performance of an experimental contract, has contended that the result arrived at by the contractor in meeting such revised specifications was not the invention of the contractor, but the joint invention of the contractor and agents of the Government, and that the patent taken by the contractor was invalid and consequently worthless.

Assume that substantially identical contracts have been awarded to competing organizations, and that both competitors deliver equally satisfactory articles, but that one of the competitors, through superior engineering skill and greater expense discovers and applies a new principle, which—although it does not result in superior performance of the particular article delivered under the contract—has inherent features, which with further development, will permit a performance and efficiency in future designs far exceeding that possible by any other known means. According to the interpretation which must be placed on a patent clause such as the one under consideration, the Government would have unlimited right immediately (and without compensation to the contractor), to pass on to any or all manufacturers the free right to embody the new principle in designs of their own manufacture. The contractor may derive a certain measure of patriotic self-satisfaction for having donated services to the national welfare, but his competitors will be able to derive a greater profit by reason of the fact of having been spared the engineering expense necessary to maintain an efficient product. Such a contractor has delivered services and material to the Government which are clearly far more valuable than that delivered by the other. Although not entitled to higher compensation for the article contracted for, it would seem that, in all equity, the former is clearly entitled to reasonable protection of its proprietary rights in new discoveries, which may prove to be immensely more valuable to the Government than the specific article delivered under the contract.

It should also be emphasized that the total cost of finally developing a new discovery or invention to a point where it is a thoroughly salable serviceable article is seldom, if ever, covered by the cost of actual design and construction of the particular article on which it is first demonstrated. Nor is it applicable exclusively to the particular class of articles which are represented by the

Digitized by Google

articles used in demonstrating it. Once a new discovery or invention has been demonstrated as potentially valuable, there ensues a period of refinement and development not covered by patent protection, the actual cost of which is usually many times the cost of production of the initial demonstration sample. When a contractor to the Government is required (immediately upon the completion of a particular contract) to accord to the Government nonexclusive and irrevocable licenses, in accordance with the provisions of the above clauses, not only has it been compelled to relinquish all proprietary rights in all new inventions, but also the only means to protect the very large investment incurred in connection with related investigations preliminary to the discovery and in perfecting the invention subsequent to the delivery of the particular article specified in the contract, as well as in applying it to other usages than that specified.

In summarization of the above, I wish to emphasize, first, that the wartime act of October 6, 1917, relative to the suppression of the public disclosure of certain inventions essential to the national defense, should be amended to extend the protection afforded by it to peacetime conditions; secondly, that the practice of including a catch-all patent-license clause in all contracts for the procurement of aircraft and aeronautical material, should be abandoned; and finally, that the existing provisions of law providing for a suit in the Court of Claims as the sole remedy of a patentee for patent infringement, should be amended to allow direct suit for damages against any manufacturer alleged to be infringing a patent in connection with work done for the Federal Government. In order to accomplish the latter, it appears desirable that the act of July 1, 1918 (40 Stat. 705) be repealed, and that the act of June 25, 1910 (36 Stat. 851), be reinstated. In other words, H. R. 5384, at present pending before your committee, should be enacted without further delay. Revised Statutes 4921 could also be amended to provide that no injunction shall issue against a contractor which would affect the delivery of materials to the Government.

I trust that the above suggestions may prove to be of some assistance to you in rendering a constructive report in regard to much needed legislation for the guidance of the Congress.

THIRD SUPPLEMENTAL STATEMENT BY F. H. RUSSELL TO THE PATENTS COMMITTEE OF THE HOUSE OF REPRESENTATIVES ANALYZING PREVIOUS TESTIMONY REGARDING MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

I now desire to present the results of a study which has been made of the specific charges presented by previous witnesses before your committee, and call your attention to some of the more important phases of the many past investigations into the same subject matter.

The history of all previous aeronautical investigations has also been studied with some thoroughness. Although engaged in aeronautical activities for many years, I have found much that had been forgotten. Perhaps the most interesting forgotten facts are those relating to the conditions and circumstances by which the Lampert committee investigation into aviation was inspired in 1924. This is particularly true, just at this time, when your committee is engaged in a similar study of one phase of the aircraft industry largely growing out of charges made by James Vernon Martin.

Before I start reading from the record, you should have certain dates firmly fixed in mind. The Lampert committee was appointed by the Speaker of the House of Representatives under the authority of H. R. 192, passed March 24, 1924, and chosen largely from the House Committee on Patents. Its first hearing was held October 9, 1924, at Pasadena, Calif. Later, hearings were held in San Diego, Calif., New York, and Washington, D. C., the last public hearing being held in Washington on March 2, 1925, and their report was rendered December 14, 1925. During this period, covering 15 continuous months, 150 witnesses were examined under oath. The record comprises 6 volumes, totaling 3,558 pages. This record is frequently referred to in your past testimony, so I assume you have it available.

The first witness in the city of Washington was the Honorable John M. Nelson, a representative from the State of Wisconsin. I read from his testimony.

"I am very glad to have had some share in bringing about this investigation. * * * When first presented by me I did not expect to authorize the committee to make a full investigation. * * * But * * * I modified

Digitized by Google

my resolution so that the special committee would have full power to complete their work. * * *

"We finally worked out a compromise in this way: That a special committee should be appointed by the Speaker, to consist of nine members, taken largely if not wholly from the Committee on Patents. * * *

"I ought to perhaps state this for the record, that one of the early pioneers in this field came to my office, and I did not know the gentleman, and drew my attention to what he thought were some serious evils * * * he was a very interesting gentleman, and, as I say, one of the pioneers, not only as inventor but as an aviator * * * I became very much interested. And so when he backed up his complaints with the statement that he had upward of 10,000 documents and papers, I felt it my duty as a Member of Congress to consider the matter. * * *

"I then asked this pioneer in aeronautics, Captain Scaife, and my secretary, to select out of the mass of documentary evidence a few points * * * that I might use as the basis of a speech, to show the House that there was prima facie evidence at least warranting an investigation. * * *

"Briefly, the topics that I selected and to which I drew the attention of the House, * * * are these: The war fraud audits, * * * the character of the Manufacturers Aircraft Association itself * * * the so-called cross-license agreement * * * the so-called save harmless clause * * * the nature of the contracts. * * *

"Now, I carefully refrained from making any charges of fraud and corruption. You will find it nowhere in my speeches. I took no interest in that phase of it. Let the Department of Justice handle that * * *. I am thinking of the matter wholly in constructive terms. I hope that this committee will look into the whole field without bias for either pioneers or against the Manufacturers' Aircraft Association, divesting itself wholly of any prejudice, and I am sure you will.

"* * * Now, gentlemen, as I said in the beginning, this thing came to me and I could not turn the complaints down. The gentleman who came to me is here. He has volunteered to assist the committee. He is well informed. He may be zealous, but I hope you will bear with him. I hope you will hear him. * * * I commend you to the motto in the Scriptures: 'If ye seek the truth the truth will set you free.' All we want is the truth, all the truth, and nothing but the truth, and then this industry will be set free. * * *."

Then, under questioning by Congressman Reid, one of its members:

"Mr. REID. Give us the names of individuals who will give us the truth.

"Mr. NELSON. Well, I mentioned the pioneer in aircraft, Captain Martin; also Captain Scaife. They were the two main witnesses. The others I simply consulted incidentaly to verify the documents that these gentlemen presented. Each of them had many documents. I have not given the matter very much attention of late, but there was a man who was very familiar with aeronautics, Mr. Woodhouse. Mr. Woodhouse came to my office 1 or 2 days, and I made inquiry of him as to whether these things were correct, whether these charges could be sustained. He assured me that they could, most amply. * * *"

And, finally another question by Mr. Reid:

"Mr. REID. Can you think of anybody else we ought to call.

"Mr. NELSON. Well, there are many others, but all of them do not have information of such a nature that I would particularly suggest them. Captain Martin gave me a whole series of names of pioneers that he said would come here to testify, and I am informed by one of your clerks that during this summer these men have been seen and that they will come before your committee and give you evidence if you desire. * * *"

That testimony I had forgotten. To find it came as a surprise. We have all overlooked the undeniable fact that the Lampert committee's investigation found its inception in charges made by James Vernon Martin. Confirming that fact, is the testimony of the second Washington witness, the Hon. Roy P. Woodruff, of Michigan. His testimony covers pages 52 to 57 of the Lampert record. On page 54 the following statement is made by him:

"* * * Now, gentlemen, the purpose that I had in mind in doing whatever I have done in regard to the creation of this committee was prompted solely by the desire that out of its activities would grow something constructive * * *."

On the next page Congressman Woodruff is questioned by Mr. Perkins:

"Mr. PERKINS. When you referred to the independent inventor, what did you mean? How shall I distinguish him from other inventors?

Digitized by Google

"Mr. WOODRUFF. I simply distinguish him by saying he is a man, or if it be a manufacturing institution, that it is an institution, which is not a member of nor in sympathy with the manufacturers Aircraft Association."

Then on page 57, he is again questioned:

"Mr. FAUST. And was that independent concern that you mentioned a responsible concern?

"Mr. WOODRUFF. Yes; responsible in every way. * * *

"Mr. FAUST. Would you give us the name?

"Mr. WOODRUFF. I can. It was the Martin Aeroplane Factory, the president and general manager of which is here in the room at the present time. * * *"

The Lampert investigation took place 11 years ago. From a comparison of their record with that printed by your committee and titled the "Pooling of Patents", I find that Mr. Martin has not added much important material to the charges previously presented. The aircraft industry is familiar with all of them. He has made those charges many times. He has, of course, changed some of the detail, reworded some of the claims, and clothed old allegations in new wrappers, but I am unable to find much of essential difference on important matters. As has recently been printed, it is the same old story. What little new material there is seems to have a sensational character, such as that attributing the death of the late President Harding to some indefinite "air trust" conspiracy (p. 67); various assertions that his own life is under constant threat and physical danger (pp. 90–96–189); that a continuance of the so-called "air trust" will result in a war with Japan (p. 95); and that the death of the patent litigant, Janin, was presumably caused by poisoning at the hands of his aeronautical enemies (p. 201). These charges are merely expressions of Martin's personal opinion. If Mr. Martin has any information whatsoever which will constitute evidence tending to prove these charges, it is obviously his public duty to be specific as to names, facts, and dates, and to present such evidence to the proper authorities. I am confident, for instance, that the authorities of New York City would seek the indictment and trial of anyone against whom legal evidence could be presented as having poisoned Albert S. Janin. The health authorities of that city are now under the impression that he died of cancer of the lungs, as attested by the standard certificate of death, a certified copy of which I hand to the committee for its record. I secured this certificate for my own information, and yours. It is probable, however, that Mr. Martin does not have evidence on any of his charges which will stand the test of judicial decision, since his one attempt to do so ended by his case being thrown out of the Supreme Court of the District of Columbia on a decision rendered by the Honorable Justice Frederick L. Siddons on February 24, 1924. I refer to the case, law no. 67540, of *James V. Martin* v. *The Manufacturers Aircraft Association, Inc., et al.* That case was filed on April 4, 1923, and named the following 67 organizations and individuals as defendants: Manufacturers Aircraft Association, Inc.; Aeronautical Chamber of Commerce; National Aeronautic Association; Aeromarine Plane & Motor Corporation; Burgess Co.; Boeing Airplane Co.; Curtiss A. & M. Corporation; Dayton Airplane Co.; G. Elias & Bros., Inc.; Engel Aircraft Co.; Fisher Body Corporation; Gallaudet Aircraft Corporation; Goodyear Tire & Rubber Co.; L. W. F. Engineering Co.; Glenn L. Martin Co.; Mitsui & Co., Ltd.; Standard Aero Corporation; Packard Motor Co.; St. Louis Aircraft Corporation; Sturtevant Aeroplane Co.; Thomas-Morse Aircraft Corporation; J. G. White & Co.; Wright Aeronautical Corporation; Loening Aeronautical Corporation; Cox-Klemin Aircraft Corporation; Huff-Daland Aero. Corporation; Stout Engineering Laboratories, Inc.; Gardner-Moffett Co., Inc.; General Motors Co.; Howard E. Coffin; Benedict Crowell, ex-Assistant Secretary of War; E. A. Deeds; Sidney D. Waldon; Harold E. Talbott, Jr.; Charles F. Kettering; Jessie C. Vincent; William B. Stout; Gen. Mason M. Patrick; Richard F. Hoyt; Henry M. Crane; Col. Horace M. Hickam; Benjamin F. Castle; George H. Houston; Frank H. Russell; Clement M. Keys; Admiral Wm. A. Moffett, United States Navy; Commander S. M. Kraus, United States Navy; Col. T. H. Bane, United States Army; R. H. Fleet; F. D. Schnacke; L. D. Gardner; Caleb S. Bragg; L. W. McIntosh; Gen. Wm. D. Gilmore, United States Army; Jerome C. Hunsaker; J. K. Robinson, Jr.; S. S. Bradley; H. E. Blood; James A. Blair; R. H. Young; Roy D. Chapin; Grover C. Loening; Albert P. Loening; Inglis M. Uppercu; Wm. B. Sebherz; Fred B. Rentschler; Delos C. Emmons.

In the declaration in this case, the plaintiff described himself as "one of the foremost pioneer inventors of basic principles and improved methods of

Digitized by Google

construction of aeroplanes" and charges that the "defendants and each of them have entered into a contract or contracts, combination in the form of trust or otherwise, or conspiracy * * * in restraint of trade." Further, that they have "monopolized or attempted to monopolize, or have combined or conspired with each other to monoplize a part of the trade or commerce * * * among the several States", and, lastly, that they have "jointly planned, schemed, and conspired to control and monopolize * * * the manufacturing and sale of aircraft in the United States."

The plaintiff further stated that the defendants "have altogether destroyed the business of the plaintiff, in the United States and foreign countries" and he claimed damages totaling $51,510,000.

Let me read from Justice Siddons' decision in this case, dated February 24, 1924:

"This declaration * * * represents the fourth attempt * * * to state a cause of action * * *. While fully recognizing that a liberal view should be taken * * * liberality cannot go to the extent of exempting a pleader from such averments in his declaration as will reasonably inform the defendants of the essentials of the case alleged against them. This in the opinion of the court the plaintiff in this case has signally failed to do * * *. The motion to strike, therefore, must be granted and as the court is of the opinion that the plaintiff has been given every fair opportunity to state a case, the time has come when further amendments should not be permitted."

That decision judicially disposed of the Martin material. Previously, however, Martin had taken practically the same material to the Hon. John M. Nelson, of Wisconsin, who presented some of it to the Congress of the United States in his speeches of January 29 and February 23, 1934. The second speech, you will notice, was delivered the day before the Siddons' decision. The House of Representatives decided to pursue their own investigation and, on March 24, 1924, authorized the appointment of the Lampert committee, the circumstances of which I have already read you.

Now, what did the Lampert committee find from their investigation? Their study extended for over 11 months, four of which were spent in hearing the 150 witnesses. I read from their final report, dated December 14, 1935, and start on page 1:

"In the debates in Congress which led to the appointment of this committee much stress was laid upon the necessity of a complete investigation of certain general charges which had been in circulation throughout the country for some years concerning the relationship between the Government and the industry, and concerning the contracts between the Government and the industry. These charges alleged corruption of Army and Navy contract officers, that manufacturers secured excessive profits, that there existed an aircraft trust or conspiracy among some of the Manufacturers Aircraft Association, and that the so-called 'save harmless' clause in the contracts was unjust and inequitable and gave definite advantages to certain contractors.

"The committee made an investigation of these charges; studying contracts in detail, examining many witnesses and calling upon the War Department, the Navy Department, the Department of Justice, and the Comptroller General to obtain the definite facts necessary. Upon the basis of these facts, the committee finds as follows:

"(1) That there was no evidence of corruption on the part of the officers of the Army and Navy or the members of the aeronautical industry submitted to the committee.

"(2) That contracts given to aircraft builders have not resulted in excessive profits, but, on the contrary, the aircraft industry * * * is rapidly diminishing under present conditions and will soon practically disappear * * *.

"(3) That the charges and the allegations that there existed an aircraft trust, or conspiracy, were not proven. Both the association and the cross-license agreement upon which it is based had been investigated nine times in 8 years, two of these investigations having been made by the Department of Justice. Both have sustained the legality of the Manufacturers' Aircraft Association and the cross-license agreement. That the findings of these legal investigations should now be accepted as conclusive.

"(4) That the so-called 'save-harmless' clause in all air contracts * * * is in fact merely an interpretation of an act of Congress passed on July 1, 1918 * * *."

Then in appendix A of the report, page 10, the committee gives their findings relative to the Manufacturers Aircraft Association. I read from that appendix.

Digitized by Google

"The committee naturally began its inquiry by taking up definite charges made in speeches delivered on the floor of the House against the methods of administering the Air Service and against the aircraft industry.' * * *

"The most searching investigation on the part of the committee discloses not the slightest ground for the charge that the Air Service procedure is corrupt. * * * Instead of prospering on Air Service contracts, the industry is impoverished. * * * In fact, there is general agreement from all of the witnesses, whether from the Government, the industry, or outside, that the aircraft industry, instead of fattening on Government contracts, is being steadily starved to death.

"The next charge made against the Air Service, which is offered to account for its present condition of inefficiency, is: That aircraft companies * * * formed themselves into an air trust, known as the Manufacturers' Aircraft Association, Inc. This trust go up the cross-license agreement and by means of it did and still continues to perpetrate a fraud upon the Government.

"The committee finds that there is no aircraft trust; that there is not now and never has been a service conspiracy. The Manufacturers' Aircraft Association, Inc., was formed and the cross-license agreement entered into under the following circumstances: * * *

"* * * The War Department and the Navy Department requested the advisory committee to investigate the situation and to suggest a solution for the unsatisfactory conditions existing in the airplane industry. Acting in accordance with these requests, the advisory committee proceeded to make a careful study of the situation, and after several months of investigations and numerous conferences with all interests directly involved, recommended the formation of an association of aircraft manufacturers, with a form of cross-license agreement.

"Pursuant to the recommendation of that committee, the association (incorporated) was formed and the cross-license agreement now under consideration was entered into. * * *

"After a most thoroughgoing examination into this subject, we find that there is no such thing in this country as an aircraft trust, nor are the manufacturers, by means of the cross-license agreement, perpetrating a fraud upon the Government. * * *"

This final report was unanimous. All members signed it and it was sent to the House of Representatives. Following closely on the Siddons' decision, it would seem to have settled the matter of the Martin charges once and for all. Under the circumstances, however, in bringing the same material to you 11 years later, it is significant that your attention has not been called to the fact that Justice Siddons' decision and the findings of the Lampert committee refute all of his charges. But even more significant is the apparently deliberate attempts which he makes to infer that his charges have never been completely investigated, that the Lampert committee did not finish its appointed assignment, and that its investigation was limited by the later appointment of the Morrow board. I call your attention to the following quotations from Martin's statements as reported in the published record of your hearings:

"In other words, the committee (Lampert committee) itself did not have this authority I am pleading for. They did not have enough money to go through with the investigation the way it should be. There has never been There has never been a thorough disclosure by investigation to Congress of this national scandal (p. 172)."

"I deny that any investigation has been thorough and complete and if the Honorable Chairman of this committee will authorize it, I will submit a very brief résumé of the record of the Lampert committee (p. 185)."

"It is my opinion there has never been a thorough and complete investigation. Especially there has never been a committee that had both willingness and money and authority, those three things, to get independents before it. The independents are very skeptical of these committees (p. 186)."

"I can offer you before I close the testimony and a résumé of the Lampert committee and it shows that, insofar as that investigation was allowed to go, all the charges were thoroughly and fully sustained * * * (p. 69)."

From the foregoing, it is clear, I believe, that the charges were not "thoroughly and fully sustained." They were actually proven to be unfounded in fact.

From these quotations of the record, it appears that (1) the Lampert committee investigation grew out of the James V. Martin charges; (2) the charges were thoroughly investigated and a complete and final report made

Digitized by Google

to the Congress; (3) that the report disproved, in their entirety, the charges offered; and that (4) the witness, Martin, has failed to inform you of the full facts as related to points (1), (2), and (3) above, and (5) that the Supreme Court of the District of Columbia found Mr. Martin unable to state a sound legal case against those individuals and organizations whom he still claims have done him damage.

Since the Lampert investigation was made 11 years ago, at a time when the facts and circumstances were fresh in the minds of all concerned, and since little new evidence has been offered to you, it seems reasonable to accept their findings as conclusive, as regards all of these allegations.

Now I would like to draw your attention to another record available in a public document. It relates specifically to Martin's claims as an inventor and it may be found in the hearings of January 15, 1925, of the Lampert committee (p. 904).

The witness who gave that testimony is admittedly a pioneer in aviation; the man who received the first aeronautical degree ever given by an American university; the man who was employed as an engineer by Wilbur and Orville Wright, the inventors of the essential feature which made modern flying possible; the man who was an engineer for the Queen Aeroplane Co., which company constructed the Queen-Martin tractor biplane, of which you have heard mention; and the man who, throughout his entire history as one of the most responsible and successful aircraft manufacturers, never became a member of the Manufacturers Aircraft Association, or a subscriber to the cross-license agreement. In that respect, and in all others, he has been more completely "independent" than the witness, Martin. This man is Mr. Grover Loening, now retired from the airplane manufacturing industry. I read a few paragraphs from his testimony printed on pages 905 and 909 of the Lampert record.

"Mr. LOENING. One of the first and most important requirements, in my opinion, * * * is to establish the business of building airplanes on a foundation of integrity and honesty * * *. This cannot be done if the development of aeronautics is constantly permitted to be faced by wild charges of fraud and promoting schemes based on unsound claims such as actually have taken place before this committee.

"I propose therefore, gentlemen, to refer directly, and without compunction to the outrageous charges and statements fabrications, and untruths, presented to the committee by Mr. James V. Martin. In view of the unfortunate publication by the committee and its receptive attitude toward this gold brick that has been handed them, I do not hesitate to claim a few minutes of your valuable time to present the beginning only of a few answers to the allegations made in this testimony. * * *

"Mr. Martin has probably spent * * * the better part of 2 or 3 years gathering together his voluminous data. As I am intimately familiar, and one of the few actively at present in the business, with the early days of aviation referred to in Martin's claims, I happen to have an equally voluminous amount of data, photographs, letters, articles, and so on, to refer to in disproving practically every item of his testimony. * * *

"To begin with, on page 59 of the testimony Martin claims to have invented the original tractor biplane and to have demonstrated this in the United States in October 1911. During the year 1910 I wrote one of the earliest textbooks on aviation, monoplanes and biplanes, when I was a student at Columbia University. * * *

"In this book, which Martin no doubt read, as it was very widely distributed, you will find on page 203 the photographs and description of the 1909 'Goupy biplane.' This, gentlemen, was the first tractor biplane. It embodies all of the descriptions of Martin's claim. * * * On the same page, 59, Martin refers to the interconnecting ailerons as not having been used prior to 1911 anywhere in the world, prior to his invention. I refer you in the same book to the 'Sommer' biplane (p. 216) flying in 1910; the 'Maurice Farman' (p. 202); the 'Voisin' (p. 227), described in the book, and in fact I would refer you in your own testimony to the biplane of Mr. Christmas and his patent claims, which came up before you. I also would refer you to the Curtiss monoplane, which was not only exhibited but used in the race at Belmont Park in 1910, which had interconnecting ailerons slotted into the wing.

"Martin is telling this committee an absolute untruth. Whether he is verified or not by other experts that you have had is merely a question of how expert those experts are. The fact remains that the originality of his inventions is not

Digitized by Google

so. * * * On page 60 Martin endeavors to impress you with the hands-off control possibilities of his rear-tail plane. On page 227 of my book you will find a photograph of the 1910 Voisin airplane with the rear-tail surface, and in the photograph, page 227, if you care to look at it, sir, you will find the pilot flying hands off, as that was one of the great selling features of that machine. In fact, there were probably 15 or 20 types of planes at this date in which this characteristic was nothing exceptional. * * *

"I can go into this further if the committee desires, as such matters are well within our direct experience, and have not been submitted merely for the purpose of theorizing, or by theorizing engineers or inventors. And we can show you that this is not just a lot of bunk, because it is not. And in preparing further examples of this for the committee, I can cite you instances.

"The retractable chassis—and I have seen the patent end of that has been taken up in the testimony. I can only say that we have always felt * * * that that is a feature, the fundamentals of which are not patentable * * *.

"Gentlemen, page after page of the testimony of this individual is exactly of the same order, and by exaggerating his experiences with the Government to enlist your sympathy, and then by systematically minimizing and laying about the achievements of successful constructors of the day, he is enlisting your assistance, and I am sure it has, although I do not know, but I am sure it has occurred to you that if there were afoot a scheme to gain recognition and payment for patents which are not deserved, you are lending yourselves to it forcefully, if unwittingly. * * *"

Over a year later, on May 26, 1926, this same witness appeared to testify before the Naval Affairs Committee of the House in their hearings on H. R. 11249. The statement for some unknown reason does not appear in the printed report of the hearings, although Mr. Loening recently stated that was discussed with the committee and the complete statement handed them for insertion in that record. A few of the pertinent paragraphs will be of interest to you.

"The testimony before the Lampert committee, when finally concluded, presented facts, priority of others on patents, and supported statements, which completely discredited the testimony of Mr. James V. Martin, and showed that much of it consisted of outright falsehoods, prevarications, and outrageous muckraking.

"Nevertheless, on page 2571 of the recent testimony before your committee, Mr. Woodruff, a member of your committee definitely states 'We are trying to develop legislation which will make it possible for inventors like Mr. Martin to realize something from their inventions.'

"If this is the object of the hearing * * * it becomes absolutely necessary to have the facts presented as to the kind of inventor Mr. Martin is—whether he deserves any recognition for having invented anything himself, and whether or not the entire presentation of James Vernon Martin is, perhaps. after all, nothing but a gigantic scheme to defraud the Government by setting up all kinds of ridiculous claims for priority on invention, in order to collect royalties * * * on practically every plane to be built for the United States Government.

"The committees and members of your committee, like Mr. Woodruff, may be unwittingly assisting in a fraud. At any rate, it is only fair that they should hear both sides of the case.

"It so happens that in much of the testimony that has appeared in this connection, technicians and engineers have testified who are not familiar with the status of aviation at the period that Mr. Martin starts with, and who are therefore qualified only by hearsay to base opinion on the merits of Martin's claims. It so happens, however, that I was the engineer of the Queen Airplane Co. in 1911—the very company that built the Queen Martin tractor, the claims for which said Martin starts out with in his outrageous false propaganda. I have seen the plane; I saw it wrecked, and I am thoroughly familiar with the entire art at that time * * *.

"Martin claimed widely that he had originated the tractor biplane when he built the Queen Martin tractor. His bluff on this was called by me in brief and hurried testimony before the Lampert committee * * *. I showed the gentlemen of that committee photographs, for example, of the Goupy biplane of 1909, antedating Martin by two years, and Martin in his rebuttal testimony * * * says that he had been misquoted, and that he did not mean that he was 'the inventor of the concept of the tractor biplane' but that he meant he was the first one to develop it in the United States. In other words,

Digitized by Google

gentlemen, he comes before you as the great inventor and originator but admits himself that he copied it from European practice, nevertheless, and I am amazed that some of you gentlemen let him get away with it. Yet he testifies * * * as follows: 'I then designed an airplane of very different general design from anything that had been flown in the world up to that time. It was called a tractor biplane.' This, gentlemen, I regret to have to again call to your attention is an outright falsehood, admittedly so, by Martin himself in previous testimony.

"Furthermore, * * * I happen to know that the fuselage and engine mounting, controls, seats, and entire general arrangement of the body of that airplane (the *Queen Martin*) was a copy down to many of the minutest fittings of the standard Bleriot tractor monoplane, and in fact was actually built in a few parts out of Bleriot fittings that we happened to have had in stock at that time, as the Queen Co. was then engaged in building copies of the Bleriot monoplanes for exhibition work. What Martin did was to copy Goupy's use of a biplane wing on a tractor fuselage using a Bleriot type-copy tractor fuselage. Incidentally, by the way, a point that has escaped me previously is that Goupy's plane happened also to have the famous 'wing end ailerons' that Martin also claims to have 'invented' with the difference that Goupy's plane came out and was flown and publicly demonstrated and photographed some 4 or 5 years before Martin thought that Goupy's idea was good enough for him to jump in and falsely claim another of his famous original features.

"Here we have the beginning of his scheme and that of those who are assisting him to establish himself falsely as the originator of all kinds of things so that by influencing you gentlemen to modify your procurement methods to pay inventors for their work, he and his associates will be able to get a huge sum in royalties out of the Government, by having established page after page of high-sounding testimony that comes uncontroverted before your committee. Then when we fellows who know about these things finally hear of them, either your committee hearings have stopped and we unfairly cannot get a hearing to tell you the truth about this fake, or else our hurried testimony for which we have so little time of preparation (in the press of building planes for the Government that have to fly) all gets lost in the maze of volumes of testimony that this Martin scheme has given rise to.

"I can continue taking up a lot of your time with his false claim on interconnecting ailerons and with every single item mentioned by Martin. * * * Some of you gentlemen on this committee, however, appear to be somewhat gullible to let this man influence you to such an extent that he continues to be your pet witness. * * *

"The last item which is the most important is the retractable landing gear, and here is where I come in because not only have I made an exhaustive study of this in its application to aircraft but I designed my first retractable landing gear in 1913, when I was with Mr. Orville Wright, and have constantly been advocating the use of this invention, well known to the art prior to 1916, when Martin made his first application. Although I also hold a patent thereon, I have never claimed to have invented the retractable landing gear because the prior art as shown in the patents placed in evidence before the Lampert committee is so complete that there cannot be any question in the mind of any sane man that James V. Martin or anyone else can be held to be the basic inventor of the idea of rectracting an airplane's landing gear for any purpose What he did patent in 1916 was merely one particular detailed mechanism of an airplane retractable landing gear, and after building many of these developments and studying the matter longer, I believe, than Mr. Martin, I can prove, as an engineer, that his method of retracting a landing gear is probably the worst of any design that has been put into use and entirely impractical for an amphibian. * * *

"Gentlemen, I am not testifying in a patent suit, so that I will go no further with the mass of data that we have assembled to show that Martin's claim to have invented the retractable landing gear is an outrageous imposition and is not far from being a willful fraud in trade practice. Long before he ever advocated retractable landing gears, amphibians had been built with such gears, and flown and illustrated, and many patents have been taken out by other inventors than himself, including my own patent on retractable gear, which patents are all allowed only on the detailed mechanism if you read them carefully, because the broad idea of retracting landing gears on aircraft had been disclosed by Penaud 50 years ago. * * *

Digitized by Google

"It is exceedingly discouraging to spend our money without return from the Government on the development of real valuable ideas, proven valuable not by our opinion but by actual test, and yet be faced with having our work constantly interfered with by vicious attacks on our integrity, false claims on patents, etc. * * *

"The history of J. V. Martin's operations have shown that on the average it takes him about 2 years after an invention has been disclosed to realize that he has missed a 'good bet' and then rush to the Patent Office and claim anything he can, so that several years later he can come before you gentlemen and, as has been proven, falsely pose before you as a martyred inventor. I understand that we have him red-handed right now, and that he actually has or is shortly applying for certain patents on amphibians, and he reluctantly seems to be impressed with the successful results of my work.

"Therefore, if any change in the law is going to encourage an 'inventor' like Martin, I plead with you to leave the law as it is. * * *"

These comments are, of course, expressions of one individual's personal opinion regarding the witness Martin. From this particular witness they are doubly valuable and informative. It is well, however, to examine the opinion of an organization by which he was employed, and through which such ability as he possessed was to aid the development of aviation in the national defense. I refer to the engineering division of the Army Air Corps, whose remarks bearing on qualifications of J. V. Martin and on his credibility as a witness are given on pages 2706 and 2707, in the Lampert committee's record. I read from that memorandum:

"It has always been, and still is, the opinion of the engineering division of the Air Service that a very few of J. V. Martin's 'efficiency devices' possess some merit (notably the shock-absorbing wheel), but that none of them possess sufficient merit or suitability for general use of military aircraft. It has also been, and still is, the opinion of the engineering division that J. V. Martin does not possess the ability to design, construct, or perfect his devices so as to make them practicable for general use.

"It is desired that the committee may see that the Air Service has been as lenient and tolerant toward Martin as consistently could be the case considering the fact that the Air Service has not desired to waste public funds on ridiculous or useless developments. For this purpose attention is invited to the fact that Martin was employed by the Air Service at McCook field, beginning February 1, 1919, as a consulting engineer, at a salary of $5,000 per annum, solely for the purpose of giving him a free hand in working out his own radical ideas. He was given this employment in order to give him every opportunity of demonstrating and convincing Air Service engineers that he had something which fould be a genuine contribution to the art. Very suddenly, however, on May 12, 1919, Martin informed the chief of the engineering division that he expected to leave at once (on May 15) to go abroad. (See Exhibit W.) Upon investigation it was learned that Martin had become restless and was desirous of again going to sea, and that he had obtained a position with the United States Shipping Board Emergency Fleet Corporation as an officer on board the Steamship *Lake Fray*. (See Exhibit X.) It is therefore apparent that the officials of the engineering division were very charitable and open minded toward Martin and his devices in spite of the fact that he had previously written many slanderous and malicious letters to higher officials accusing the engineering officers of incompetence and of criminal acts of dishonesty. (See Exhibits Y and Z as representative letters of this type.) Even during this period that Martin was employed by the Air Service (between February and May 1919) he again started a program of attack against Col. T. H. Bane, the chief of the engineering division, and his assistants, by addressing letters to the Secretary of War (See Exhibit Z–1), to Mr. Joseph P. Tumulty, secretary to President Wilson (see Exhibit Z–2), and to Gen. Chas. T. Menoher, director of Air Service (see Exhibit Z–3); but when Martin suddenly resigned on May 12, 1919, he addressed himself in a letter to Colonel Bane as follows:

'Permit me to express my sincere appreciation of your personal courtesy and fairness and the hope that the important work I have undertaken for our Government will be vigorously pushed by your organization during my short absence'. (See Exhibit W.)

"From this letter of May 12, 1919, it would seem that Martin was finally satisfied that he had been given a fair and reasonable opportunity to demonstrate the value of his devices, but no sooner was he at sea than he resumed

Digitized by Google

his malicious attacks upon the engineering division by addressing a letter to The Adjutant General of the Army. (See exhibit Z–4.)

"In order that the committee may form a more accurate idea as to the technical qualifications of Martin, and as to the credibility which should be given to him as a witness, attention is invited to Martin's testimony before this committee set forth on page 61 of the printed record, wherein he stated under oath that he took work in mathematics, at the University of Virginia and at Harvard University. Attention is also invited to his sworn statement made on February 1, 1919 (exhibit Z–5 attached hereto), when making application for employment in the engineering division, that he graduated from Harvard University after 2 years' work there. After considering those statements made by Martin under oath, please refer to exhibit Z–6, attached hereto, wherein the that university for 1 year and that he took work in English, moral philosophy, and mathematics, but that the only course in which he passed was moral philosophy. Please also refer to exhibit Z–7, attached hereto, wherein Harvard University reports that he took no technical course there at all, since most of his work was in philosophy and German, and that he did not graduate, as he stated in his sworn application for employment. From these university records it is evident that Martin has not had the basic technical training that he claims to have had, and also that no great reliance can be placed on the accuracy or truth of his sworn statements.

"For the purpose of showing some of the recent malicious attacks which J. V. Martin has made against public officials in the Air Service, attention is invited to his broadcasted pamphlet entitled 'Don't pay attention to this', and to the court records in an action entitled '*James V. Martin* v. *The Manufacturers' Aircraft Association, Inc., et al.*' (Law No. 67540), in the Supreme Court of the District of Columbia, wherein Martin sued over 60 defendants for $51,510,000, alleging a conspiracy between Government officials and various aircraft manufacturers. This suit was dismissed by the court. His malicious activities have undoubtedly cost the Government many thousands of dollars during the past few years."

If you gentlemen had time to review all the testimony given by the 150 witnesses before the Lampert committee during the 15 months of its investigation, you, too, would find that the charges made by Martin were thoroughly considered by that committee, not only as to their technical merit, or lack of it, but as to their bearing on the continued development and expansion of the art of aeronautics, and the effect on the encouragement and stimulation of the inventive genius of the citizens of this country. Not having the necessary time, I believe enough has already been read to indicate the type of testimony recently received from the witness and to properly evaluate it for yourselves.

The final report of the Lampert committee speaks for itself. That investigation cost the taxpayers of the United States many thousands of dollars. Its record totals 3,552 pages. At an estimated cost of $8 per page, the printing of its six-volume record alone represents an investment of $28,500.

There are other matters, however, to which the witness, Martin, recently testified which should, I think, be called to your attention.

Look on page 176 of your "Pooling of Patents", here Mr. Martin states, "I challenge anyone on the side of the Manufacturers Aircraft Association, the so-called industry to point to any investigation which was not a self-conducted investigation."

Has he forgotten Justice Siddons' decision? Was that a self-conducted investigation? Has he forgotten the make-up of the Lampert committee? To refresh your minds on this point, let me again quote the Honorable John M. Nelson, on page 46 of the Lampert record. He says, "That a special committee should be appointed by the Speaker, to consist of nine members, taken largely, if not wholly, from the Committee on Patents". That committee was largely taken from the Committee on Patents. Had it been selected in 1935, instead of in 1924, nearly all of you gentlemen would be numbered in its membership Yet that committee, according to the witness Martin, was subject to the control of the Manufacturers Aircraft Association. Do you believe that? And, it is an interesting fact, that three members of the Lampert committee are still members of the present Congress. They are the Honorable Randolph Perkins, of New Jersey, the Honorable Clarence F. Lea, of California, and the Honorable William N. Rogers, of New Hampshire. I suggest that you ask them if they were ever under the so-called air-trust control.

If you will look on page 216 of your record you will see what purports to be a statement bearing on the printed testimony of the congressional aircraft

Digitized by Google

committee, or Lampert committee, on charges of corruption, conspiracy, and an air trust, as the cause of United States air deficiency. This exhibit was supplied by Martin. It reviews the so-called proof of Martin's two main charges, to the effect that, first, Federal funds were being spent for worthless and dangerous airplanes, in preference to better airplanes offered by others, presumably by Mr. Martin himself; and, second, that a so-called air trust controlled all Federal procurement of aircraft. It consists of references to the testimony which, in Mr. Martin's opinion, tend to substantiate his own charges. But, in choosing them, and this is the vital point, he completely ignores all other testimony by other witnesses which refute those charges, and he disregards the elemental fact that the committee heard both sides of the question and decided the charges unfounded in fact. Had Mr. Martin proved his charges, as he asserts that he did, the Lampert committee would have decided accordingly. That they did not do so apparently fails to influence Mr. Martin, for he appears before you, repeats essentially the same charges, conceals the conclusiveness of the previous investigations, and quotes from the records only those statements previously made by him or by others which appear to sustain his charges, so apparently attempting to lend official color to his "evidence."

Let's select at random a few extracts illustrative of the practice just described. Look on page 218, section 18 on how the committee prevented testimony supporting the charges * * * from getting into the record. The first reason given is that Hon. Randolph Perkins was selected as interrogator. Mr. Perkins is now the ranking minority member of your committee. Was he dominated by the alleged "air trust"? You might ask him that question. The next reason is that under dictation of Mr. Perkins, the "air trust" * * * announced to the press in New York about January 12 that the committee would not inquire into graft and corruption. Now, regardless of any question about such an announcement, did the committee inquire into graft and corruption? The answer is yes. Their report says:

"These charges alleged corruption * * *. The committee made an investigation of these charges; studying * * * in detail, examining many witnesses, and calling upon the War Department, the Navy Department, the Department of Justice, and the Comptroller General to obtain definite facts necessary. Upon the basis of these facts, the committee finds * * * That there was no evidence of corruption * * * submitted to the committee * * * That the constant circulation of rumors and charges * * * has been a destructive influence in the aviation industry of the United States for the past 8 years * * * has laid upon the officers of the Government and upon the owners of business in this trade suspicions which this committee believe unfounded" (pp. 1-2).

"The most searching investigation on the part of the committee discloses not the slightest ground for the charge that the * * * procedure is corrupt" (p. 10).

Therefore, you see the Lampert committee did investigate the charges of corruption; furthermore, that it did not accept Martin's claims as evidence of corruption, but rejected them completely.

Here is another example of J. V. Martin's practice. He refers to Mr. Henry Woodhouse who voluntarily appeared * * * to testify and brought a first-class witness to swear to bribery of the high aircraft officials. He states that Mr. Woodhouse was not permitted to testify (see p. 1033), and that the threat of the master at arms to throw Mr. Woodhouse out of the room has not been printed in the record.

Let's look at page 1033, as Mr. Martin suggests. What do we find? I will read it.

"Mr. PERKINS. Now, Mr. Woodhouse, if you have a witness to produce, you may produce him.

"Mr. WOODHOUSE. Yes; Mr. Chairman, Mr. McCorrey.

"Mr. REID. What has he to present? Have you examined him, Mr. Perkins?

"Mr. PERKINS. No; not yet.

"Mr. REID. I suggest you examine him privately first.

"(Thereupon, Mr. Perkins conferred in private with Mr. McCorrey.)

"Mr. PERKINS. This statement is made for the record. Mr. Woodhouse has requested the committee to call Mr. McCorrey as a witness before the committee. Upon a private examination by myself of Mr. McCorrey, Mr. McCorrey informs me that Mr. Woodhouse has evidently mistaken him for his brother,

Digitized by Google

Mr. Alfred McCorrey; and in the absence of Mr. Alfred McCorrey, Mr. Harry McCorrey, this man, does not care to make a statement."

I fail to find evidence there of refusal to hear Mr. Woodhouse; nor is there evidence of refusing to hear a first-class witness, since the wrong man could hardly be described as such; and if the master at arms had occasion to threaten Mr. Woodhouse with ejection, he undoubtedly had ample cause for doing so since he was not censured by the committee members.

Another point frequently mentioned by Martin is that referring to the "pioneer viewpoint" and the need of hearing witnesses representing that viewpoint. His argument on page 218 of your record gives pages 63, 108, 109, 112, 113, 125, and 2323 of the Lampert record as showing the names of the pioneers whom he desired called, and he says "* * * the committee did not call upon one of the listed witnesses or ask one question of them * * * respecting corruption or conspiracy."

Let's examine this assertion. On page 63, Martin names 8 men as pioneers: A. M. Herring, A. S. Heinrich and his brother Arthur Heinrich, Chas. and Clarence Whittemann, J. A. D. McCurdy, Orville Wright, and Glenn H. Curtiss. Now, did the committee call one of them, as Mr. Martin says they failed to do? Yes!

On January 16, 1925, p. 1033, Mr. Herring appeared, asked the privilege of submitting his testimony in brief form, since his health was not good, and it is printed in full on pages 1834 to 1838. The same day he appeared a second time and gave direct testimony over two pages of the record, pages 1069 and 1070. Mr. Martin seems to have forgotten Mr. Herring's appearance.

Looking further we find that on page 2325, the following interrogation took place between Messrs. Perkins and Martin:

"Mr. PERKINS. Can we get Mr. Heinrich down here on Wednesday?

"Mr. MARTIN. I believe so.

"Mr. PERKINS. We will be glad to hear him on Wednesday if he will come."

Apparently, Mr. Heinrich did not choose to come, for his testimony does not appear in the record, and Mr. Martin, in referring to the pioneer viewpoint, ignores that fact. Further, it should be noted that Orville Wright, Glenn Curtiss, and J. A. D. McCurdy are, according to Martin in other places in his testimony, members of the "air trust", and the last we have heard of the Whittemann brothers was a tentative application for membership in the Manufacturers Aircraft Association.

Let's now take one more example of Mr. Martin's assertions regarding the testimony. Look on page 219. Martin says, "Also please note that there was necessary a great effort to get the witness Martin's testimony before the committee, and this was accomplished only by resolution, see page 2320."

Now, gentlemen, let's look at page 2320 of the Lampert record. On that day, February 16, 1925, Mr. Martin was called to the stand. Mr. Perkins said, "Mr. Martin, the committee passed a resolution to recall you for the purpose of taking a further statement." As you see, that resolution was for an additional appearance and statement. But what were his previous appearances? Let us look at the record. The first two witnesses before the Lampert committee hearings in Washington were Congressmen Nelson and Woodruff, previously referred to as having delivered the speeches which led to the appointment of the Lampert committee. The third witness, gentlemen, was none other than James Vernon Martin, whose testimony covered pages 57 to 126. No mention is made during that, his first appearance, of needing a resolution to secure his testimony. He appears voluntarily, at the request of the committee, who stated that his name was given them by the two Congressmen named above, and he testified for over 70 pages of the record.

Then on January 17, 1925, page 1092, Mr. Martin again appears as a witness. There is no mention there of resistance to hearing his testimony.

His next appearance is that to which he refers as being obtained at "great effort."

But following that, Mr. Martin testifies from pages 2335 to 2345, from 2369 to 2376, from 2390 to 2411, he interrupts witness Howard on pages 2452, 2453, and 2454, supplies various exhibits, which cover pages 2455 and 2484; he interrupts the witness Roche on pages 2854, 2861, and 2868; and finally he supplies the investigating committee with a rebuttal of testimony given them by others, which extends from page 3198 to page 3261. There is no mention there of difficulty in receiving a hearing. That, gentlemen, is the actual record of Mr. Martin's testimony before the Lampert committee. Of the 3558 pages of that

Digitized by Google

record, he seems to have used approximately 500 pages for his testimony and exhibits, in addition to the fact that the entire investigation was the outgrowth of his own charges, as he states himself on page 2321, by saying, "the pioneers' point of view was responsible for this investigation. There was a demand by my associates, the early pioneer builders and fliers of the United States, for an investigation."

Another item in the Martin testimony, which I think you should consider, is that printed in your hearings on page 204, and which, as you can see, purports to be a quotation from an unanimously adopted conference report, no. 1395. Having become skeptical of Mr. Martin's quotations from other records, I had the curiosity to look up that report. Here it is. I do not want to bore you with a reading of all of it. Suffice it to say that the first 12 lines of the purported quotations are actually small portions of several paragraphs to be found on pages 2 and 3 of the report. But the entire remainder of the quotation is not to be found at any place in that report. The remainder consists, as far as I can determine, of the personal views of James Vernon Martin, but it is printed in your record with the appearance of a complete quotation of the formal report made by the Honorable John J. McSwain to the Sixty-ninth Congress of the United States. Mr. Martin may claim it is a printer's error. If he does, it would be interesting to investigate the exact form of the exhibit as originally submitted to you.

The points in the Martin testimony to which I have just called your attention, are only examples of the similar cases to which more time could be devoted were it available. To carry on would only serve the repeat the practices that have already been shown. No useful purpose would be served.

There is another matter which, while it does not appear in your record, should be called to your attention, since you may decide that it has an important bearing on your investigation, on the interests of the United States Government, and on the activities of at least one of the executive departments. I refer to the 14 suits of the witness James Vernon Martin now pending against the United State Government in the Court of Claims. The damages asked under these claims, for alleging infringement of some of his patents, are reported to total in excess of $60,000,000. If the Government's use of 14 of the 47 patents claimed by him are worth $60,000,000, then all 47, using the same proportions, might be claimed to be worth over $200,000,000 or more than the entire Federal expenditures for airplanes during the past 16 years. But it is also interesting to compare the $60,000,000 already claimed by Martin on 14 of his patents, with the $3,500,000 which has been paid in royalties over the entire 18 years including all of the war-time production, for the use of the more than 750 patents owned by members of the Manufacturers' Aircraft Association. Of this number, the Wright and Curtiss patents were admittedly basic and probably one-half of the inventions covered by the other patents have been as widely used as any of Martin's alleged inventions. The comparison is striking.

I have felt that your record should contain some specific reference to these 14 Court of Claims cases which are being defended by the Department of Justice. That is my reason for bringing the matter to your attention at this time. There are those who might doubt that one individual could honestly be fostering a congressional investigation into the aviation patent situation and concurrently suing the Government for infringement of his own aviation patents. Possible connections between the two activities appear obvious.

As the witness whose testimony I have previously read to you said, Martin has for many years devoted a considerable portion of his time to the accumulation, from various sources, of letters, papers, documents, books, etc., with which he claims, if you follow his reasoning and draw his same conclusions, to have built up a case establishing proof of his charges.

Let me give you an example of the manner in which a case can be built up. It appears on pages 220 to 222 of your record, and consists of five letters, three of them written by J. V. Martin to the Matériel Division of the Air Corps, and two replies of that division. The first letter, dated November 3, 1933, from Martin to General Pratt, then Chief of the Division, requests "a clear statement of your policy on the following pertinent matters," all of which matters pertain to the conditions Mr. Martin considers necessary to a "fairer understanding and an opportunity for one of the pioneers of aviation in the United States." I need not add that the policy of the Air Corps relative to these conditions is well known to the industry and to Mr. Martin, since all

Digitized by Google

suppliers of military equipment are currently meeting them in obtaining Air Corps contracts.

General Pratt replies to that letter on November 10, 1933, saying "I do not feel that the Air Corps is in a position at this time to enter into a detailed discussion of general policies * * *."

Mr. Martin again writes on January 12, 1935, reasking his questions on Air Corps policy and seeking "some slight measure of reward * * *."

This letter is replied to by Lt. Park Holland on January 21, 1935, who pointed out that the conditions surrounding the design competitions of the Air Corps are fully described in their circular proposal, a copy of which was attached.

The stage is now set for Mr. Martin's so-called case against the Air Corps. He sums it up in his last letter to the Chief of Matériel Division under date of January 28, 1935. Quoting the letter of General Pratt, dated November 10, 1933, and one paragraph of House Report No. 2060, dated June 16, 1934, which has been published in the meantime, he concludes his letter with these paragraphs:

"Unless and until the simple and pertinent questions I have propounded are answered in clear and unequivocal manner, there will be no use in an independent effort to aid your division by submitting the best airplane designs.

"Hoping that the day will come when an independent airplane manufacturer can receive dependable assurance that his proprietary rights and patents will receive fair consideration and recognition from the Air Corps, I remain, James V. Martin."

There, gentlemen, is his case. It is complete. He has so-called proof. He has it in writing. He can show it to anyone who will read it. But what he does not tell is that the conditions he so heartily dislikes and under which he apparently refuses to submit his so-called "best designs" are exactly the same conditions under which all the other airplane manufacturers in the United States, "independents" as well as members of the Manufacturers Aircraft Association are now operating. If one wants military business, one meets the service requirements. If not, one refuses the contracts. What is required of one is required of all.

I need not add that, like J. V. Martin, the responsible members of the industry would like complete protection for their proprietary rights and their patents. As a matter of fact, this was recommended by the Lampert committee, the Morrow board, and the Federal Aviation Commission. All the manufacturers have been wanting it for years. They have presented arguments regularly, to the Services, to committees of Congress, and to various investigating boards. The Services contend, however, that any airplane design purchased in a design competition by the Army or Navy, becomes the property of the Government and that they can build it or have it built by whomever they wish. Further, the Government contends that it automatically receives a license to use or have used any patents developed in the course of a Government contract, or prior thereto, if such devices are included in the article contracted for, and that such licenses pass, without extra compensation to the inventor thereof, regardless of the potential value of these patents. That is the fact.

The responsible manufacturers do not like that condition any better than does James Vernon Martin. They have been complaining about it for years. Most of the investigating committees have recommended a change to protect the patent rights of inventors and the proprietary rights of the manufacturers, but so far, the Congress has not seen fit to clearly and definitely incorporate those recommendations into law. But despite this condition, these responsible manufacturers continue to build aircraft for the United States Government, all the time hoping that the wisdom of the Government will eventually see fit to protect their genius, their inventiveness, and their foresight, by the adoption of equitable, sound, and far-sighted principles regarding these important matters in procurement contracts.

And in the meantime, while responsible manufacturers continue to devote their time and efforts to the furtherance of this country's aeronautical interests they, speaking quite frankly, do not like repetitions of unsupported charges of fraud, corruption, arson, robbery, theft, and murder. But with equal frankness, they do not believe that such charges are taken seriously by the general public. And in the meantime also, they continue to build bigger and better and faster and more powerful aircraft—to the envy of the entire world. That is the effort on which the American aircraft manufacturers are spending their

Digitized by Google

time. That is their service to the Government of the United States. That service has been productive and of untold value from the national viewpoint. We hope that your committee will lend its efforts toward our greater accomplishments in the future.

During the 18 years' period covered by this analysis, our aircraft manufacturers have produced and sold more than 33,000 airplanes. Manufacturing plants and facilities represent huge capital investments. Thousands of skilled engineers and artisans are employed, and, as previously stated, their products occupy a premier position in the competitive markets of the world. These figures do not include the three or four, or possibly a few more airplanes, made by J. V. Martin, nor is consideration given to his "million dollar factory" or to his employees. As a matter of fact, the number of his employees is unknown. Undoubtedly, its officers, if subpenaed, will give you the essential facts regarding the organization and its activities. According to the letterhead of the Martin Airplane Co., Gen. A. C. Dalton is indicated to be the president and Col. J. Edward Cassidy its general manager.

This study, and the presentation of its results, has been undertaken in the belief that you, as active members of the Congress, face a multitude of serious problems of national importance, and that you do not have within the short compass of each day sufficient time to give detailed examination to the detailed history of each subject. As related to certain phases of the aeronautical industry, I have endeavored to supply the essential history in this statement. It is all too brief. There is much more that could well be studied. But what has been presented to you here comes, as you have seen, from public documents available to every citizen of the United States. I have endeavored to refrain from expressions of my personal opinions. I have referred you to the record in almost every instance, but personal sentiment, born out of a friendship which began during the war period and has extended up to the present time, has prompted me to refrain from following a similar course in regard to the oft-repeated testimony of General Mitchell.

In fairness, however, to the task which has been undertaken by your committee, and to the trust imposed upon me by my present office, I feel compelled to tell you that the statements which General Mitchell has made to you inferring that the Manufacturers Aircraft Association or any of its executive officers has ever been implicated in any collusion or conspiracy to influence Government officials or to retard development of aviation or to suppress any aeronautical patents are untrue in every particular. His attempt to use your committee as a vehicle to dignify his oft-repeated and always discredited sensational charges that the United States Army, Members of Congress, and the American aviation industry have conspired to provide the Air Services with inferior equipment have come as no surprise to his former associates. His statement that a billion and one-quarter dollars was spent for aircraft by the Government during the World War is typical of his many misrepresentations. According to the records of his own chief, the money spent for aircraft was one-quarter of that amount, and including the money spent for fields, equipment, and all other purposes relating to aviation was less than half of that amount.

The officers of the Manufacturers Aircraft Association or its staff has never had anything to do either with appropriations or with the writing of specifications for airplanes which the Services has required, or for the manufacture of such airplanes and equipment, or for their testing or for their use. Its service in making available to all the patents of each of its members has saved the Government and the industry untold expense and time which otherwise would have been lost as a result of litigation for infringement which is certain to follow in any industry where each individual company is developing its product independent of all others.

Patent clauses used in aviation contracts have interested the association. General Mitchell's statement, however, that the Government has in any way favored or held members harmless for infringement because they were members of the association is untrue. Quite the contrary is the fact. While these patent clauses have varied from time to time, they have never offered a member of the association any immunity from damages due to patent infringement.

It is really unfortunate that the General should be so woefully misinformed with reference to the operation of this association. To imply that the errors in judgment of individual manufacturers, whether members or not, or of military officers or the successive administrations, should be attributed to a patent exchange, is ridiculous. As has been said many times, this exchange is open

Digitized by Google

to all inventors and manufacturers in this industry. No valid application has ever been refused. No nonmember inventor has ever had anything but help in the presentation of his ideas to the industry.

The principle of cross-licensing in industry needs no defense. While countless charges have been brought against the association during its existence, none have ever been justified by investigation.

I appreciate the opportunity of presenting these facts for the constructive consideration of your honorable body.

Respectively submitted,

F. H. RUSSELL, *President.*

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.,
30 Rockefeller Plaza, New York, January 13, 1936.

Re: H. R. 5384

Hon. WILLIAM I. SIROVICH,
House of Representatives, Washington, D. C.

DEAR DR. SIROVICH: In response to your recent verbal request, we are pleased to enclose herewith a memorandum regarding the history and legal aspects of the July 1, 1918, amendment of the Court of Claims Act which will supplement the comments contained in Mr. Russell's letter of December 11, 1935, to give you a complete outline of the situation as it now exists. This statement has been prepared impartially, and citations to references contained therein have been checked with care.

Trusting that the above will be helpful to you in connection with your efforts to obtain a prompt passage of this constructive legislation, we remain,

Yours very truly,

JOHN A. SANBORN,
Director, Patent Research Division.

MEMORANDUM REGARDING THE PROPOSED REPEAL OF THE JULY 1, 1918, AMENDMENT OF THE COURT OF CLAIMS ACT

NATURE OF THE RIGHTS INVOLVED

Patent rights are exclusive, not only of citizens and residents of the United States, but also of the United States Government itself, and of its agents. When the Government grants a patent for an invention, an exclusive property is conferred upon the patentee and the invention cannot thereafter be appropriated or used by the Government without the payment of just compensation: *Hollister* v. *Benedict Mfg. Co.* (113 U. S. 59); *United States* v. *Palmer* (128 U. S. 262); *United States* v. *Berdan Firearms Co.* (156 U. S. 552); United *States* v. *Lynah* (188 U. S. 445).

CONDITIONS PRIOR TO PASSAGE OF THE ACT OF 1910

In order to provide such compensation in certain cases, the Congress, on February 24, 1855, created the Court of Claims and conferred upon it jurisdiction to hear and determine all claims founded on any law of Congress, or upon any regulation of an executive department or upon any contract, express or implied, with the Government of the United States. This jurisdiction was enlarged by the act of March 3, 1887, to include claims for damages, liquidated or unliquidated, in cases not sounding in tort, in respect to which the party would be entitled to redress against the United States either in a court of law, equity, or admiralty, if the United States were suable, it being axiomatic, of course, that the United States cannot be sued without its consent: R. S. 1059, c. 122, sec. 1, 10 Stat. 612; Tucker Act c. 359, sec. 1, 24 Stat. 505. See also 30 Stat. 494; 30 Stat. 649; and 36 Stat. 1136.

Since the infringement of letters patent is considered to be a tort, a patentee, therefore, could not recover against the United States in the Court of Claims under the acts of 1855 and 1887 unless an express or implied contract for the use of the patent could be established. Where no such contract arose from the circumstances, the owner of the patent was without remedy against the United States, although he could proceed against one who had contracted with the Government to supply an article which infringed his patent: *United States* v. *Palmer* (supra); *Schillinger* v. *United States* (155 U. S. 163); *United*

Digitized by Google

States v. *Berdan Firearms Co.* (supra); *Belknap* v. *Shild* (161 U. S. 10); *Russell* v. *United States* (182 U. S. 516); *International Postal Supply Co.* v. *Bruce* (194 U. S. 601); *Harley* v. *United States* (198 U. S. 229).

Evidently inspired by the injustice of this rule, as applied to rights of the character of those embraced in patents, because of the frequent possibility of infringement under circumstances which would not justify the implication of a contract, Congress with the intention of providing "additional protection for owners of patents" enacted the law of June 25, 1910. This statute provides in comprehensive terms that "whenever an invention described in and covered by a patent of the United States shall hereafter be used by the United States without license of the owner thereof, or lawful right to use the same, such owner may recover reasonable compensation for such use by suit in the Court of Claims." That is to say, the statute added to the right to sue the United States in the Court of Claims already conferred when contract relations could be shown to exist, the right to sue for the infringement of a patent even though no element of contract was present: Act of June 25, 1910, 36 Stat., c. 423, p. 851; *Crozier* v. *Krupp* (224 U. S. 290).

INTENTION AND PURPOSE OF CONGRESS IN PASSING THE 1910 ACT

There would seem to be no room for doubt that the direct and simple provisions of the 1910 statute embraces, and was intended alone to provide for the discrepancy resulting from, the divergence between the right in one case to sue on an implied contract and the nonexistence of a right to sue for unlawful use in another. This conclusion becomes irresistible when the concordance which it produces between the title and the report of the committee is considered on the one hand, and the discord which would arise from writing into the statute the theory of automatic and general license as to every patent as was advanced by contracting officers on the other: House Report No. 1288, Sixty-first Congress, Second session; *Crozier* v. *Krupp* (supra); *Wm. Cramp & Sons* v. *International Curtiss Marine Turbine Co.* (246 U. S. 28).

Furthermore, official authority could not consciously and intentionally be exerted so as to violate the Constitution by wrongfully appropriating private property either before or after the passage of the 1910 act. This follows from the fact that the right to sue on implied contract is based on recognition of the patent right by the Government and the implied assent of the owner, acting in the belief that adequate compensation would be paid; and from the fact that in conferring the right on the patentee to prove infringement, the act contemplates the possibility of the commission of official error or mistake and, therefore, affords a remedy for correction and resulting compensation. The contention that Congress intended universal and automatic appropriation by the United States of a license to use all patent rights, as was urged by agents of the Government shortly after the passage of the act, cannot be accepted for the reason that it cannot be assumed that official authority would be willfully exerted so as to violate the Constitution: *Crozier* v. *Krupp* (supra); *Brown* v. *Fletcher* (237 U. S. 583); *Wm. Cramp & Sons* v. *International Curtiss Marine Turbine Co.* (supra); *Marconi Wireless Telegraph Co.* v. *Simon* (246 U. S. 46).

Although the act of 1910 may have embraced the exceptional case where, because of some essential governmental or public necessity, the authority of the United States is exerted to take patent rights by exercise of the power of eminent domain in reliance upon the provision to recover the adequate compensation which the act affords, this fundamental characteristic at once exposes the want of foundation for the contention that because the statute made provision for giving effect to acts of official power in taking patent rights under the statute, and even when necessary to cure defects in the exertion of such power, it is to be assumed that the statute conferred upon all who contracted with the United States for the performance of work the right to disregard and take without compensation the property of any patentee. The making of a contract with the United States and the resulting obligation to perform duties in favor of the United States by necessary implication imposes the responsibility of performance in accordance with the law of the land, that is, without disregarding the rights or appropriating the property of others. There is no assumption that as a result of the contract with the United States the contractor would enjoy the right to exercise any of the public and governmental powers possessed by the United States.

Digitized by Google

AMENDMENT OF 1918 INTENDED BY CONGRESS TO MEET THE REQUIREMENTS OF THE SERVICES DURING THE PERIOD OF THE WORLD WAR

During the emergency period of the World War, the War and Navy Departments experienced considerable inconvenience in connection with the procurement of patented articles. Due to the great need for large quantities of certain materials and the necessity for prompt delivery thereof, orders were placed wherever the same could best be filled, without any regard whatsoever to the rights of the individual patentees, with the result that the contractors were exposed to expensive litigation involving the possibilities of prohibitive injunction, payment of royalties, rendering of accounts, and payment of punitive damages. Although the placing of orders in such a manner may have been warranted during the period of the emergency, the manufacturers were reluctant to enter into contracts calling for the wholesale disregard of the rights of other private citizens which would bring such severe consequences, and the situation promised serious disadvantages to what were considered under the circumstances to be the public interests.

Congress was thereupon urged to amend the act of 1910 so as to restrict the dissatisfied patentees to a suit in the Court of Claims for any infringement by a Government contractor. As a result, the act of June 25, 1910, was amended by the act approved July 1, 1918, which in amended form reads in part: "That whenever an invention described in and covered by a patent of the United States shall hereafter be used or manufactured by or for the United States without license of the owner thereof or lawful right to use or manufacture the same, such owner's remedy shall be suit against the United States in the Court of Claims for the recovery of his reasonable and entire compensation for such use and manufacture." Act of July 1, 1918, c. 114, 40 Stat. 704.

Whereas the act of July 25, 1910, provided that compensation would be paid whenever an invention described in and covered by a patent of the United States should thereafter be used by the United States without license of the owner thereof or lawful right to use the same, the amendment of 1918 purported to relieve the contractor entirely from liability of any kind for the infringement of patents in manufacturing for the Government, and to limit the owner of the patent and all claiming through or under him to suit in the Court of Claims. It is to be noted that the act of 1910 covers use by the United States. The amendment of 1918 covers use or manufacture by or for the United States, and provides that the remedy shall be by suit against the United States in the Court of Claims for the recovery of the patent owners' reasonable and entire compensation.

The important Congressional purpose of the amendment of 1918, therefore, was to stimulate contractors to furnish what was needed, for the period of the World War, without fear of becoming liable themselves for infringements to inventors or owners of patents. The record of the passage of the act leaves no doubt that this was the occasion for it: Congressional Record, Sixty-fifth Congress, second session, proceedings of June 18, 1918, p. 7969; *Woods* v. *Atlantic Gulf & Pacific Co.* (296 Fed. 718).

It is important to note that in order to accomplish this special intent and purpose, Congress exercised the power to take away from all patent owners the right to recover from Government contractors for the infringement of their patents. This was not a mere case of declared immunity of the Government from liability for its own torts. It was an attempt to take away from private citizens, for the period of the War, the lawful claim for damages to property by another private person which, but for this Act, they would have had against the private wrongdoer: *Woods* v. *Atlantic Gulf & Pacific Co.* (supra) *Sperry Gyroscope Co.* v. *Arma Engineering Co.* (271 U. S. 232); *Richmond Screw Anchor Co.* v. *United States* (275 U. S. 319).

EFFECT OF CONTINUING THE AMENDMENT IN FORCE AFTER THE END OF THE WAR

Although the war was officially terminated in July 1921 and the emergency period which was really the only reason for the passage of the amended act had ceased to exist more than 2 years prior to that date, the practice of confiscating patents without any regard to the element of public necessity was continued by officers of the services who were quick to realize that, in order to meet the exigencies of wartime conditions, Congress had given them the power (but not the right) to take over any and all patents, whether necessary or not, merely by letting a contract to a private firm specifying that the article

Digitized by Google

covered by the patent be furnished. This practice was extremely vicious from the point of view of the patent owner, particularly since there was no longer any excuse for continuing the wartime measure, and it has operated to give the Government exactly what Congress did not intend to grant, either by the 1910 act or the 1918 amendment, namely, the equivalent of a general license to use all patents: *Foundation Co.* v. *Underpinning & Foundation Co.* (256 Fed. 374); *Floyd Smith Aerial Equipment Co.* v. *Irving Air Chute Co.* (276 Fed. 834); *Van Meter* v. *United States* (37 Fed. 2d 111).

Furthermore, despite the fact that the amended statute would seem to have definitely fixed the liability for the confiscation of such rights by making the Government indemnitor for the manufacturers and contractors in their infringements, the contracting officers of the War and Navy Departments began at this time the practice of including a "save harmless" patent clause in all Government contracts. These clauses were so drafted as to shift the burden which Congress had imposed on the United States from the Government to the contractor. As a result, in order to do business with the Government, the manufacturer is compelled to assume complete liability for the indeterminate amounts representing the compensation which patent owners might recover in the Court of Claims because of such infringement, plus the court costs and other expenses incurred by the Government in connection with such litigation.

CONTINUATION OF AMENDMENT IN FORCE HAS ALSO BEEN DETRIMENTAL TO BEST INTERESTS OF GOVERNMENT

Assume that the Government has accepted delivery of the patented article and has paid the contract price therefor, including a reasonable manufacturing profit. The inventor, whose patent has been infringed by the contractor producing the article for the Government, in accordance with specifications furnished by the Army or the Navy, may then resort to recourse for such infringement by the contractor, namely, he may file a suit in the Court of Claims to recover reasonable and entire compensation. Such compensation has been held by the Courts to include the profits which the contractor has realized as a result of such infringement. To quote from one of the most recent cases on this subject:

"Prior to the amendment of July 1, 1918, plaintiff could have recovered this sum (referring to profits) in suit in equity. It was intended by the Amendment to secure to the owner of the patent the exact equivalent of what it took away from him. It took away the profits, and the Government undertook to pay such profits made in the manufacture by the contractor of the infringing apparatus;" *Van Meter* v. *United States* (47 Fed. 2d 192).

The intention of Congress in passing the amendment is clear. See Congressional Record, Sixty-fifth Congress, second session, proceedings of June 18, 1918, page 7961. See also *Woods* v. *Atlantic Gulf & Pacific Co.* (296 Fed. 718), above referred to. The Supreme Court of the United States, speaking in the case of *Richmond Screw Anchor Co.* v. *United States* (275 U. S. 343), has said:

"The purpose of the amendment was to relieve the contractor entirely from liability of every kind for the infringement of patents in manufacturing anything for the Government and to limit the owner of the patent and his assigns and all claiming through or under him to suit against the United States in the Court of Claims for the recovery of his reasonable and entire compensation for such use and manufacture. The word "entire" emphasizes the exclusive and comprehensive character of the remedy provided * * *. The intention and purpose of Congress in the act of 1918 was to stimulate contractors to furnish what was needed for the war without fear of becoming liable themselves for infringements to inventors or the owners or assignees of patents. * * * To accomplish this Governmental purpose, Congress exercised the power to take away the right of the owner of the patent to recover from the contractor for infringement. This is not a case of a mere declaration of immunity of the Government for liability from its own torts. It is an attempt to take away from a private citizen his lawful claim for damages to his property by another private person which but for this act he would have had against the private wrongdoer."

It follows, therefore, that in each case of a recovery under the amended act, the Government has been required to pay manufacturers' profits both to the contractor and to the patentee who has brought the suit in the Court of Claims. This is the price which Congress intended that the Government should

Digitized by Google

pay for the privilege of obtaining prompt delivery during the period of the war of such infringing articles as were needed for war purposes.

In other words, either the Government is compelled to pay a wartime price, measured by at least twice the profits on any manufacturing contract, for prompt delivery to it in times of peace of the infringing articles, or the contractor must assume complete liability for the indeterminate amounts representing the damages and profits plus courts costs in connection with any such litigation without having had an opportunity to defend. In either event, the individual patent owner is unduly penalized as a direct result of having disclosed his invention to the public in compliance with the patent laws. It seems inconsistent with sound principles that the power to pass the patent laws granted to Congress by the Constitution should be limited to legislation which secures an exclusive right to inventors for limited times in their discoveries, while the act of 1918, which deals only with patents, should have the effect of permitting unlimited use of the inventions by all contractors with the Government, thereby depriving the individual patent owner of the only substantial right reserved to him by the patent laws, while the Government has put itself in the position of encouraging patent infringement, and at the same time avoiding the obligations which the Congress intended by the passage of the act that it would assume.

As pointed out by the Supreme Court of the United States in the *Richmond Screw Anchor case*, the requirement that the Government would pay a manufacturing profit to the contractor and also an amount equal thereto to the patentee was in fact intended during times when the Unied States is at war, but was never intended by Congress in peacetime procurement. Neither was it intended by Congress, either by the passage of the act of 1910, or the amendment of July 1, 1918, that the Government should receive the equivalent of a general license to use all patents.

The practice of soliciting bids from unlicensed manufacturers has been held in some instances to be justified on the theory that money is saved for the Government. All that may be said in favor of that theory is that certain purchases may appear to be made at somewhat lower prices, but at the expense of the private inventor and his licensees, and, as pointed out above, ultimately at increased cost to the Government. The fact that low prices, as a result of such practice, may ultimately result in increased expense to the Government is seldom emphasized.

It should also be noted that the direct liability of the Government through judgments frequently exceeds many times any apparent initial saving. Further, the direct expense to the Government, particularly to the Department of Justice, is certainly very great. In this connection, it might be contended that, since the expense of litigation is borne by the Department of Justice and judgments are paid through deficiency bills, the War and Navy appropriations for procurement are actually indirectly increased by this practice. It is not necessary to point out, however, that seldom, if at all, has any emphasis ever been given to such a contention, notwithstanding the fact that the recoveries in Court of Claims cases of this character have been large and the burden of defending them has been proportionately great. Actually, there has been more patent litigation in the Court of Claims on account of Army and Navy procurement since the World War (the date when the amended act was passed) than during the entire history of the country prior to that date.

SUBMITTED BY WITNESS MORGAN, AERONAUTICAL CHAMPER OF COMMERCE

MEMORANDUM ON SUGGESTED CHANGES IN EXISTING PATENT LAWS

1. Certain inventions relating to national defense may be of such a nature as to require the Government to keep them secret. Recognizing this, Congress, during the World War, passed a statute (act of Oct. 6, 1917) to this end. It authorized the Commissioner of Patents to keep secret such inventions as might be of assistance to the enemy and to withhold the grant of a patent until the termination of the war. It further provided that the inventor in such a case who obeys the order of the Commissioner of Patents and who tenders his invention to the United States shall have the right, upon the issuance of a patent, to sue for compensation in the Court of Claims for the entire use of his invention by the Government.

Digitized by Google

In this way the governmental necessities for secrecy were established while at the same time it assured the inventor of a right, a method, and a court in which he could recover for the use of his invention at the end of the war.

Unfortunately, the statute is by its terms limited to wartime—unfortunately, in that there are, in times of peace, inventions which affect the national defense and which he Government rightly demands must be kept secret. There being no statute that fits the case, the Government is forced to rely on contractual undertakings by the inventor. The inventor for his part is placed in a difficult position. There is no provision of law which in peacetime assures him of an ultimate right of recovery in the Court of Claims. If the Government will not release the design he is unable to secure a patent, which is tantamount to an abandonment of the invention, so far as patent protection is concerned. The alternative is to assign the invention to the Government.

The existing situation is unsatisfactory at once to the Government and to the inventor. The remedy would be to amend the act of October 6, 1917, to extend its provisions to peacetime.

2. Another wartime piece of legislation relating to patents which has not been adjusted to the requirements of peacetime is the War Time Patent Act of July 1, 1918. This act was intended and has been consistently interpreted to date as limiting the rights of the patentee to a suit in the Court of Claims against the Government for any infringement of patents arising out of work done for the Government. This places a very real burden on the inventor, who has to undertake the lengthy process of instituting a suit in the Court of Claims. Undoubtedly during the war the statute referred to was in every way proper, but during peacetime it seems inequitable and a deterrent on invention. To encourage invention the right of a patentee to sue a Government contractor in the district courts of the United States should be preserved. In order, however, that there be no interference with Government procurement, the right of suit should not carry with it the right to injunction against a contractor manufacturing for the Government, which would affect the delivery of materials to the Government. To bring about this result it is suggested that the act of July 1, 1918 (40 Stat. 705) be repealed; that the act of June 25, 1910 (36 Stat. 851) be reinstated; and that the Revised Statutes 4921 be amended to provide that no injunction shall issue against a Government contractor manufacturing for the Government so as to hinder the delivery of materials to the Government.

[Opinions of the Attorney General, vol. 31, p. 166]

MANUFACTURERS AIRCRAFT ASSOCIATION—ANTITRUST LAWS

Upon the data submitted, the Manufacturers Aircraft Association, incorporated under the laws of the State of New York, as now constituted, and the cross-license agreement under which it is now operated, are not in contravention of the antitrust laws of the United States

DEPARTMENT OF JUSTICE,
October 6, 1917.

SIR: I have the honor to acknowledge the receipt of your letter of September 17, 1917, in which you ask for my opinion concerning the legal status of the Manufacturers Aircraft Association, incorporated under the laws of the State of New York, and in particular whether the cross-license agreement entered into between that corporation and its subscribers (stockholders) is in any way in contravention of the antitrust statutes of the United States.

You submitted with your letter a copy of the cross-license agreement, and a digest of certain of the minutes of the National Advisory Committee for Aeronautics (hereafter referred to as Advisory Committee) relating to the subject. The other papers and information necessary for determination of the questions involved were not immediately available but have since been furnished by that committee at various dates from September 19 to 28.

The Manufacturers Aircraft Association (Inc.) (hereafter referred to as Association, Inc.), was formed and the cross-license agreement entered into under the following circumstances as gathered from the data submitted:

The principal patents in the airplane industry were controlled by the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane & Motor Corporation. The former, controlling what it claimed to be a basic patent, was demanding

Digitized by Google

high royalties from all other aircraft manufacturers. The latter, controlling numerous important patents, was likewise making demands for royalties upon the other aircraft manufacturers. The patents controlled by these companies were of such a character as to make it difficult for any aircraft manufacturer to construct any modern approved form of airplane without infringing one or more alleged patents of each of these companies. The result of these patent claims was not only to render the cost of airplanes to the Government excessive, but also to make it difficult for the Government to get its order filled, because some of the airplane manufacturers, in view of impending patent litigation, were unwilling to make further expenditures upon their plants.

Confronted with this serious crisis, the War Department and the Navy Department requested the Advisory Committee to investigate the situation and to suggest a solution for the unsatisfactory conditions exlsing in the airplane industry. Acting in accordance with these requests the Advisory Committee proceeded to make a careful study of the situation, and after several months of investigation and numerous conferences with all interests directly involved, recommended the formation of an association of aircraft manufacturers with a form of cross-license agreement.

Pursuant to the recommendation of that committee, the Association (Inc.), was formed and the cross-license agreement now under consideration was entered into.

Practically all of the manufacturers of airplanes have since become stockholders in the Association (Inc.) and parties to the cross-license agreement. The royalties to be paid under the cross-license agreement in respect to the patents of both the Wright-Martin and Curtiss corporations are materially lower than those previously demanded by the Wright-Martin Corporation alone. The arrangement will result in a substantial saving to the Government.

You state in your letter:

"In accordance with the arrangement thus developed, the War Department now desires to proceed with the placing of contracts for airplanes with airplane manufacturers thus organized."

The Federal antitrust laws prohibit every combination and agreement that produces or tends to produce a monopoly in the interstate and foreign commerce of the United States or that is otherwise unduly restrictive of competitive conditions in such commerce. Their fundamental purpose is to prevent undue interference with the free play of competition without prohibiting normal and usual contracts and agreements entered into for the purpose of promoting the legitimate interests of the trader or of the industry in which he is engaged. The questions here involved must be determined in the light of this fundamental purpose of the antitrust laws.

In considering the questions submitted I have examined the cross-license agreement, the articles of incorporation, the by-laws and the voting trust agreement of the Association (Inc.), together with other data relating to that association furnished by the Advisory Committee. I have also examined and considered the criticisms of the arrangement in the "Protest of the Aeronautical Society of America against the formation under Government auspices of an aircraft trust."

The cross-license agreement between the Association (Inc.), and such persons (hereinafter called subscribers) as shall become stockholders therein, was entered into on July 24, 1917. (Cross-License Agreement, p. 1.) The subscribers under that agreement agree—

To grant to each other licenses under all airplane patents of the United States (with unimportant exceptions) now or hereafter owned or controlled by them. (Cross-License Agreement, Art. II, p. 2.)

To appoint the Association (Inc.) their agent with full power to grant the nonexclusive licenses provided for in the agreement, in the form attached thereto. (Art. III, pp. 3, 15.)

Not to contract for rights under any airplane patents in such a way as to prevent the owner from granting similar rights to other subscribers on the same terms, unless the subscriber at the same time obtains the further privilege of itself granting rights under the patent, which of itself shall have the effect of bringing the rights acquired by the subscriber under the operation of the cross-license agreement. (Art. III, pp. 3–4.)

Not to enter into any agreement in respect to the subscriber's privileges under any airplane patent in such a way as to restrict the operation of the cross-license agreement in respect thereto. (Art. IV, p. 4.)

Digitized by Google

Not to grant licenses under airplane patents to others than subscribers upon lower terms of royalty than those provided for in the agreement in the case of subscribers. (Art. IV, p. 4.)

To submit claims for compensation in respect to airplane patents or patent rights hereafter acquired to a board of arbitrators consisting of one member appointed by the board of directors of the Association (Inc.), another by the subscriber making the claim, and a third by the other two, who shall determine the total amount of compensation, if any, to be paid for the same, and the rate of royalty to be paid toward such compensation by any subscriber desiring to take a license under such patent. (Art. V, pp. 4–5.)

To waive all claims as against each other for infringements prior to July 1, 1917 (Art. XIV, p. 13); to make various reports and to keep various accounts, etc.

To pay to the Association (Inc.) specified amounts upon every airplane manufactured and sold by the subscriber until the expiration of specified patents controlled by the Wright-Martin and Curtiss corporations, or until each of those corporations shall have received the aggregate sum of $2,000,000, and to make other payments of minor importance. (Art. VIII, pp. 8–9.)

The Association (Inc.) agrees:

To accept the appointment as agent of its subscribers, for granting and enforcing the license provided for in the agreement, and for enforcing the other obligations of the subscribers under the agreement. (Art. II, p. 3.)

To make specified payments to the Wright-Martin and Curtiss corporation until the expiration of designated patents or until each of those corporations shall have received the aggregate sum of $2.000,000, and to pay to the other subscribers the royalties, if any, to which they are entitled under the cross-license agreement. (Art. IX, pp. 9–10.)

The cross-license agreement, as appears from its principal provisions summarized above, makes available to each subscriber of the Association (Inc.) the patents of all the other subscribers, and thus in this important respect instead of restraining trade facilitates competition among the subscribers of that association.

To thus make the patents of each available to all it was, of course, necessary to provide special compensation for those controlling the more important patents in the industry. This, as appears from the data submitted by the Advisory Committee, was the reason for the special payments to the Wright-Martin and Curtiss corporations.

The provision requiring these payments to be made to these corporations upon *every* airplane manufactured and sold by the subscribers at first sight seemed objectionable as possibly designed to extend the patent rights of these corporations to objects not covered by their patents.

However, the circumstances which led to the negotiation of the cross-license agreement refute this. The numerous patents controlled by the Wright-Martin and Curtiss corporations made it difficult for a manufacturer to construct an up-to-date airplane without infringing one or more of the alleged patents of each of these corporations.

For this reason the Advisory Committee deemed it advisable to provide for a fixed payment to be made to these corporations in respect to every airplane manufactured and thus avoid the controversies which would almost inevitably arise if the payment were made dependent upon the delicate question of which and how many of the patents of the Wright-Martin and Curtiss corporations had been used in the manufacture of a particular airplane.

The provision requiring subscribers to submit claims for compensation in respect to patents subsequently acquired by them to a board of arbitrators and to license each other under such patents at the rates of royalty fixed by that board might possibly be used to secure valuable inventions at unreasonable compensation. But it serves the purpose of keeping the patents of each of the subscribers open to all, and that doubtless was the purpose for which it was adopted. Its possible abuse, therefore, scarcely justifies its condemnation in the absence of such abuse.

Not to go into further detail, the provisions of the cross-license agreement seem to me to be reasonably adapted to secure cooperation among the parties to the agreement in the interchange of their patent privileges without imposing by their necessary effect any undue restriction of competition in violation of the Federal antitrust laws, but rather rendering competition freer by giving every responsible manufacturer of aircraft access to all the inventions in that field.

Digitized by Google

The bylaws of the Association (Inc.) authorize any responsible manufacturer or prospective manufacturer of airplanes, or any manufacturer to whom the United States has given a contract for the construction of ten or more airplanes, or any owner of the United States patents relating to the same, to become a party to the cross-license agreement upon subscribing for a share of the stock of that association and signing the voting trust agreement provided for in the bylaws.

The certificate of incorporation of the Association (Inc.) limits the stock of that association to 100 shares, of no nominal or par value, and authorizes it to issue and sell the same from time to time at their fair market value. The subscription value of this stock has since been fixed by the Association (Inc.) at $1,000 per share. The Association (Inc.) under its certificate of incorporation enjoys broad powers not material to the validity of the arrangement here under consideration.

The limitation of the number of shares of capital stock to 100, taken in connection with other provisions of the by-laws and cross-license agreement, has the effect of limiting the number of aircraft manufacturers who may become parties to the cross-license agreement to 100. In the expansion of the industry this limitation may prove objectionable, but the Advisory Committee informs me that that number is far beyond the probable number of such manufacturers in the near future.

The voting trust agreement in effect gives the management of the Association (Inc.) for a period of five years to three voting trustees, to wit, a representative of the Wright-Martin and Curtiss corporations, a representative of the smaller manufacturers, and a member of the Advisory Committee.

The most questionable provision in the entire arrangement is that requiring the aircraft manufacturers who become stockholders in the Association (Inc.) and parties to the cross-license agreement to sign the voting trust agreement. This provision, however, in view of the circumstances noted below, does not in my opinion constitute a restraint of trade in violation of the Federal antitrust laws.

The primary functions of the Association (Inc.) so far as material to the arrangement here under consideration are to act as an agent for the parties to the cross-license agreement in executing prescribed licenses, collecting and distributing royalties, and appointing through its board of directors one of the arbitrators to pass upon the value of patents acquired subsequent to the execution of the cross-license agreement.

Under the arrangement the interests of the Wright-Martin and Curtiss corporations, as owners of the principal patents and entitled to the bulk of the royalties provided for in the agreement, are somewhat antagonistic to the interests of the smaller manufacturers who have to pay these royalties. If all the manufacturers had been given equal voice in the Association (Inc.) the smaller manufacturers together would have been enabled to control the Association (Inc.), to wit, the agent of the parties in whose responsibility and vigilance the Wright-Martin and Curtiss corporations are so vitally interested. This conflict of interest accounts for the adoption of the voting trust agreement under which the Wright-Martin and Curtiss corporations named one trustee, the smaller manufacturers another trustee, and a party not favorable to either interest, namely, a member of the Advisory Committee, was selected for the third trustee.

Not to go into further detail, it suffices to say that upon the data submitted to me I am of the opinion that the Association (Inc.) as now constituted, and the cross-license agreement under which it is now operated, are not in contravention of the antitrust laws of the United States.

Respectfully,

T. W. GREGORY.

To the SECRETARY OF WAR.

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, February 14, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives.

MY DEAR MR. CHAIRMAN: This office was informally requested February 13, 1935, by the secretary, Committee on Patents, House of Representatives, for copies of decisions of this office on Army and Navy contracts concerning

Digitized by Google

quantity purchases of airplanes involving patents. In view of the request that the papers be furnished as early as possible, there are being furnished you herewith at this time the decisions of this office involving patents in the procurement of Army and Navy aircraft, and should decisions of any further scope be desired I shall be glad to be informed.

There is attached a copy of letter of March 2, 1925 (A–7155) of this office making a report to the chairman, select committee on inquiry into operations of the United States Air Service, House of Representatives, and this copy is furnished to your committee, not only for the information therein contained, but for the purpose of suggestion that possibly such records of the select committee of inquiry into operations of the United States Air Service as involved patents in connection with aircraft may be obtained for use of your committee.

Also enclosed are copies of decisions dated May 12, 1927, and April 28, 1928 (A–11220), negativing claim of the Manufacturers' Aircraft Association, Inc., under a contract dated June 24, 1917, with the United States for certain royalties, and it will be noted from the concluding paragraph of said decision that during the war period the Manufacturers' Aircraft Association, Inc., received royalty payments of $2,094,600. The decisions of May 12, 1927, and April 28, 1928, concluded, for reasons therein stated, that the association was not entitled to an additional payment of $141,800. Thereupon the Manufacturers' Aircraft Association, Inc., filed suit in the Court of Claims, no. J–569, and in an opinion of May 8, 1933, copy enclosed, the court entered judgment in favor of the association for $363,500 additional. The court denied, October 9, 1933, a motion submitted by the Government for a new trial, and the Supreme Court of the United States denied a petition for certiorari to review the judgment in *United States* v. *Manufacturers' Aircraft Association, Inc.*, 291 U. S. 667.

There has not been tabulated the aggregate amount of public money which actually has been paid under this contract of June 24, 1917, with the Manufacturers' Aircraft Association, Inc., nor has there been tabulated the exact amount of public money which has been paid under Navy contract NOd–155, dated December 31, 1928, with said Manufacturers' Aircraft Association, Inc., for use of patents. There are enclosed herewith copies of decisions dated June 10, 1932, and August 18, 1933, which sustain deductions of $800 made at the rate of $200 per airplane by reason of the alleged use of patents covered by said agreement of December 31, 1928, and as stipulated in the contract of August 7, 1930, with the Ford Motor Co. under which the four airplanes were delivered.

During the limited time available in which to make an examination of the records of this office, there have not been discovered other decisions relating to claims for royalties under other contracts, though the records do disclose that suits have been instituted in the Court of Claims to recover royalty on airplane patent claims which were not presented to this office for settlement in the case of *Esnault-Pelterie* v. *United States* and in *James V. Martin* v. *United States*, Ct. Cls. No. 42553. Possibly information as to whether additional cases are pending in the Court of Claims for royalties on airplane patents may be obtained from the Department of Justice.

If the committee should require any further information in this matter and will so inform me, an effort will be made to furnish same.

Sincerely yours,

J. R. McCarl,
Comptroller General of the United States.

Enclosures.

Court of Claims of the United States. No. J–569. Decided May 8, 1933. *Manufacturers Aircraft Association, Inc.*, v. *The United States.*

Mr. William Wallace for the plaintiff.

Chadbourne, Stanchfield & Levy were on the brief.

Mr. Wilbur H. Friedman, with whom was *Mr. Assistant Attorney General Charles B. Rugg*, for the defendant.

In this suit plaintiff seeks to recover $363,600 under implied contracts for royalties on 2,216 airplanes using patented devices controlled by plaintiff, which royalties, it is alleged, the defendant agreed to pay on airplanes which were either made or purchased by the defendant and used by it within the United

Digitized by Google

States between July 24, 1917, and December 31, 1928. The agreement was to continue until October 1933; however, the royalties for the period subsequent to December 31, 1928, are not involved in this proceeding inasmuch as a formal contract was entered into effective on that date for a period of seven and one half years from the close of the war. The War and the Navy Departments concluded upon advice from the Attorney General that they could not pay the royalties for airplanes acquired in prior years upon a provision therefor in this formal contract, but that such royalties as might be due would have to be paid under an implied contract for the period prior to December 31, 1928. Invoices rendered by plaintiff for unpaid royalties were approved and the matter of stating an account was referred to the Comptroller General, who first informed plaintiff that a certificate for the amount due would be issued, but later, on May 12, 1927, the certificate was refused and the entire claim then before him was disallowed.

During the period from July 24, 1917, to December 31, 1918, the War and Navy Departments made regular and current payments to plaintiff directly or through manufacturers who were stockholders of the plaintiff company and subscribers to the cross-license agreement for royalties on certain airplanes manufactured by such departments or purchased by them from such manufacturers, but it was later found, during the preparation of the aforesaid formal contract, that these departments had manufactured or had purchased from manufacturers who were not stockholders of the plaintiff, and who were not subscribers to the cross-license agreement hereinafter mentioned, certain airplanes using the patents controlled by plaintiff, which airplanes had not been reported to plaintiff by the departments and as to which no royalties had been paid. The royalties on these airplanes constitute the subject matter of this suit.

The defendant contends that, assuming without conceding that there were implied contracts between the War and Navy Departments and the plaintiff, such implied contracts arose only in favor of the patentees and that, since plaintiff was and is not the owner of the patents, it has no cause of action; that recovery of royalties on airplanes made and purchased by the Government after July 25, 1922, is barred by the statute of limitation, and that as to all other airplanes the plaintiff has failed to prove the reasonable value of the use of the patents.

SPECIAL FINDINGS OF FACT

1. During and prior to January 1917, the development of the aircraft industry in the United States was seriously retarded by the existence of a chaotic situation concerning the validity and ownership of important aeronautical patents. This situation was one of great concern to the Government of the United States. A National Advisory Committee for Aeronautics had been created pursuant to an act of Congress to consider and advise the President and the departments on aeronautical problems and to consider and devise some plan to remedy the existing difficulties. January 13, 1917, the Secretary of the Navy reported to the chairman of the executive committee of the National Advisory Committee that various companies were threatening all other airplane and seaplane manufacturing companies with suits for infringements of patents, resulting in a general demoralization of the entire trade; that it was difficult for the Government to obtain fulfillment of orders because some companies would not expend any money on their plants for fear that suits brought against them would force them out of business; that to protect themselves in case they were forced to pay large license fees the companies had greatly increased the sales prices of their products to the Government and that as the Army and Navy were the principal purchasers of aircraft in this country, they were bearing the burden of that levy; and that it was thought that the National Advisory Committee for Aeronautics might be able in some way to render great assistance to the Navy by undertaking a study of the question and suggesting some line of action to be taken. A similar letter concerning the same subject was written to this committee by the Secretary of War January 31, 1917. There were a number of outstanding patents on devices for airplanes desired by the Government. Prior to the time the arrangement hereinafter mentioned was agreed upon and placed in operation, one airplane manufacturer, who had made a considerable number of airplanes, was paying a royalty of $1,000 an airplane for the use of only one of the patents.

Digitized by Google

2. A joint meeting of the Committee with the representatives of the War and the Navy Departments and of the aeronautical industry was arranged and held March 22, 1917, at which time the chairman of the committee, Doctor Walcott, after stating the various means by which the basic airplane patents could be acquired by the Government for the development of the industry, said that "The Committee is therefore working diligently upon the proposition of arranging an adjustment out of court whereby just recognition will be made to the owners of the more important or basic patents in the form of reasonable royalties to be paid by the purchasers of planes whether for military or civil use." The entire statement of the Committee is in evidence as exhibit 3 (a) and is made a part of this finding by reference.

The Committee forthwith proceeded to consider the problem confronting the Government and on March 23, 1917, the subcommittee on patents of the National Advisory Committee rendered a report, recommending the formation of the Aircraft Manufacturers Association among all aircraft manufacturers and suggesting the details of a cross-license agreement among its members This recommendation is in evidence as exhibit 3 (b) and is made a part of this finding by reference.

June 14, 1917, the executive committee of the National Advisory Committee for Aeronautics authorized the patent committee to take such steps as appeared necessary to effect a solution of the patent question and recommended that royalties to be paid by the Aircraft Manufacturers Association, to be organized, to the Wright and Curtiss Companies, who owned the principal airplane patents, be limited to two million dollars each. The Wright Company had become consolidated with the Martin Company and the Curtiss Company had become consolidated with the Burgess Company, with the result that the principal airplane patents, theretofore owned by the four companies, were then owned by the Wright and the Curtiss Companies. The minutes of this meeting are in evidence as exhibit 4 and are made a part of this finding by reference.

June 18, 1917, the subcommittee on patents and the Wright-Martin and Curtiss-Burgess interests met and approved a proposed plan and authorized counsel for the Wright-Martin and Curtiss-Burgess interests to prepare a form of agreement. The minutes of this meeting and a report of the subcommittee are in evidence as exhibits 5 (a) and (b) and are made a part of this finding by reference.

July 10, 1917, the subcommittee on patents met with the airplane manufacturers and representatives of the Wright and Curtiss Companies, at which meeting the terms of the proposed agreement were generally discussed and rules for the qualifications of membership in the association adopted. Only members of the association became subscribers to the cross-license agreement hereinafter mentioned. A resolution of the National Advisory Committee was adopted, fixing the qualifications of the stockholders or "subscribers" in the plaintiff corporation, as follows: "A stockholder of this corporation shall be a responsible manufacturer of airplanes, airplane engines, or parts and accessories used in airplanes; a responsible manufacturer who intends to become bona fide producer of airplanes or airplane engines, parts, or accessories; or a manufacturer to whom the Government has given a contract for the construction of ten or more complete airplanes or airplane engines; but no stockholder herein shall acquire or own more than one share of the stock of said corporation." July 12, 1917, the subcommittee on patents again met, at which time there was submitted the draft of the proposed cross-license agreement, which draft was unanimously approved and recommended to the executive committee of the National Advisory Committee for Aeronautics for its approval. On the same date the executive committee of the National Advisory Committee approved the report of the patent committee and the proposed cross-license agreement.

As contemplated by the plan approved by the executive committee of the National Advisory Committee for Aeronautics, a corporation was incorporated under the laws of the State of New York, July 16, 1917, under the corporate name of the Manufacturers Aircraft Association, Inc., hereinafter sometimes called the "association." This corporation is the plaintiff in the present action.

July 24, 1917, the first corporate meeting of the plaintiff was held and, in accordance with the approved plan, a cross-license agreement, hereinafter called the "agreement", was entered into by plaintiff and eleven manufacturers of airplanes, including the Wright-Martin Aircraft Corporation and the Curtiss-Burgess Airplane & Motor Corp., Inc., who had contracts with the Govern-

Digitized by Google

ment. This cross-license agreement and a list of the subscribing members, stockholders in plaintiff company, are in evidence as exhibits 10 (a) and (b), respectively, and are made a part of this finding by reference.

3. The agreement and the bylaws of the plaintiff provided for the issuance of licenses to use patented devices for airplanes owned or controlled by it and called for the payment of a royalty to the association (the plaintiff) at the rate of $200 an airplane until October 1933. Plaintiff was authorized to retain up to 12½ per centum of all royalties received for the purpose of meeting its expenses of administering the agreement and for other purposes. The agreement required the plaintiff to pay the remaining 87½ per centum of the royalties received from all sources in declared proportions of 67½ per centum to the Wright-Martin Aircraft Corporation and 20 per centum to the Curtiss-Burgess Airplane & Motor Corp., Inc. The agreement also contained a provision to the effect that, within the period prior to November 1933, whenever and if said 87½ per centum payments to Wright and Curtiss had equaled a maximum of $2,000,000 for each, the rate of royalty to be paid to plaintiff was automatically to change to a sum not exceeding $25 an airplane.

Article 7 of the original cross-license agreement provided in part that "On the 10th days of January, April, July, and October in each year, each 'subscriber' shall report the number of airplanes (with or without engine), sold and delivered by it, together with the names of the purchasers, and the dates of delivery, or put into use for other than experimental or development purposes, or shipped out of the United States, during the three preceding calendar months. * * * The first of each of the reports specified shall be made by each 'subscriber' on the tenth day of January, April, July, or October first occurring after it has become a 'subscriber' hereto, and shall cover the period from July 1, 1917, to the first day of the month in which the report is due."

Article 8 provided that each "subscriber" should pay to the plaintiff a royalty of $200 at the time of making the aforesaid reports on each airplane required to be reported under art. 7.

4. This agreement was enclosed by the National Advisory Committee for Aeronautics in its formal report made to the Secretary of War and the Secretary of the Navy. With respect thereto the report stated that:

"Under date of July 27, the chairman addressed letters to the Secretary of War and the Secretary of the Navy reporting the solution of the patent question and inclosing a copy of the cross-license agreement which had been accepted by the aircraft manufacturers and signed by them as members of a new 'Manufacturers Aircraft Association.'

"On the same date the chairman addressed a letter to the president of the Manufacturers Aircraft Association recommending the acceptance of the cross-license agreement by the association and its members and that aircraft manufacturers generally be invited to subscribe to same in the interests of harmony and efficiency and to the end that the industry may be enabled to expand freely in order to meet the demand of the Government for the quantity production of aircraft."

August 2, 1917, the Secretary of the Navy wrote the chairman of the National Advisory Committee for Aeronautics as follows:

"I beg to acknowledge receipt of your letter of July 27, 1917, informing me of the settlement of the aircraft patent situation reached by the manufacturers of aircraft and enclosing a copy of 'cross-license agreement and license' as drawn up by that association.

"I wish to thank you and the members of your committee for the assistance which has been rendered to the Navy by the guidance of the various manufacturers toward amicable settlement of the perplexing patent situation, thereby rendering it unnecessary to expend the appropriation of $1,000,000, included in the Naval Appropriation Act of the fiscal year 1918, for the purchase or condemnation of basic aeronautic patents."

From July 1917 the plaintiff functioned in issuing licenses for airplane manufacture under said airplane patents and otherwise functioned as contemplated in the agreement for the benefit of the Government and of the airplane industry.

5. September 17, 1917, the Secretary of War submitted the "cross-license agreement" to the Attorney General of the United States for an opinion as to the legal status of the association and an opinion as to whether the agreement was in accord with the antitrust laws of the United States. In this letter of transmittal the Secretary of War expressed the desire of the War Department to proceed under the agreement and secure the benefits thereof. This letter

Digitized by Google

is in evidence as exhibit 11 (b) and is made a part of this finding by reference. In response to this letter, the Attorney General, on October 6, 1917, rendered an opinion, 31 Op. Atty. Gen. 166, on the question submitted, which opinion concludes as follows: "Not to go into further details it suffices to say that upon the data submitted to me I am of the opinion that the association incorporated as now constituted and the cross-license agreement under which it is now operated is not in contravention of the antitrust laws of the United States."

6. In a letter of November 6, 1917, to the Secretary of War the National Advisory Committee recommended that the payment of royalties provided for in the agreement be recognized as an element of cost of all aircraft purchased on a cost-plus basis by the War and the Navy Departments. This recommendation is in evidence as exhibit 12 (a) and is made a part of this finding by reference.

7. December 11, 1917, a resolution was passed at a meeting of the Aircraft Board of the United States, which recommended the payment by the Government of the royalty of $200 an airplane purchased, as follows:

"It is the opinion of this Board that settlement of patent controversies involved in the cross-licensing agreement is of great value to the Government in the present crisis, and this Board is apprehensive that if the amounts to be paid under the cross-licensing agreement are not allowed as elements of cost in the manufacture of planes it will result in the repudiation of the settlements therein effected, plunge the contractor into litigation, and render the Government liable for large claims of indeterminate amounts."

The Aircraft Board also recommended the appointment of a special patent committee to investigate the validity of the patents involved. Thereafter the Bureau of Aircraft Production, on behalf of the Government, submitted to a committee of patent experts the question of the value of the agreement to the Government and the reasonableness of the royalties provided therein. The report of this committee, dated January 14, 1918, speaking of the royalty of $200 an airplane, said:

"Such royalty in our opinion is entirely reasonable in the premises and in all probability less than the basis of recovery a court would allow in a suit against a private individual or concern. In fact * * * the amount in question would be a perfectly reasonable royalty under the Wright patent alone and possibly under the Bell et al. (Curtiss) patent alone to say nothing of the other patents covered by the cross-license agreement. * * *."

8. In February 1918 the Secretary of the Navy, in conversation with a representative of the plaintiff, suggested that, in view of the circumstance that the war was being carried on, the royalties to be paid by the Government to plaintiff be reduced during the period of the war. On March 1, 1918, plaintiff, by letter to the Secretary of the Navy, declared its understanding of the above request for reduction as being that the present agreement be modified for the period of the war, the reduction of the established royalty from $200 to $100 an airplane. This letter is in evidence as exhibit 13 and is made a part of this finding by reference.

March 8, 1918, the Secretary of the Navy replied in writing to plaintiff as follows:

"Referring to our recent conversation and your letter of March 1, 1918, in reference to the Manufacturers Aircraft Association, and the royalties under the cross-license agreement entered into between manufacturers of aircraft and your association, I wish to confirm what I have said to you in conversation. As you are aware, on March 2, 1917, Congress appropriated $1,000,000.

"'* * * to enable the Secretary of War and the Secretary of the Navy to secure by purchase, condemnation, donation, or otherwise such basic patent or patents as they may consider necessary to the manufacture and development of aircraft in the United States for governmental and civil purposes.'

"I should much prefer to handle the patent situation by purchase under the above law within the limit of the appropriation made, but have not found the owners of the Wright patents willing to agree to a figure which would enable this to be done. Apparently the only action practicable under the act of March 2, 1917, would be to proceed to condemn the necessary patents. This I am loath to do under present conditions if some other reasonable solution can be had. It was contemplated that under the cross-license agreement between the manufacturers of aircraft and your association, royalties of $200 per plane would be paid over a term of years, with a possible maximum limit of $2,000,000 to each of two companies. It now appears, however, that owing

Digitized by Google

to the great and growing requirements of the Government for airplanes, under the royalty of $200 per plane the limit of $4,000,000 woul be paid by the Government alone during the next few months. I consider this excessive and inadmissible.

"The maximum payments which would in my opinion be at all acceptable under the cross-license agreement would be as follows:

"(*a*) On all planes shipped to the United States Government after December 31, 1917, the royalty be reduced to $100 per plane.

"(*b*) When the Wright-Martin and Curtiss Companies have together received royalties for machines bought by the Government not to exceed the aggregate amount of $2,000,000, no further royalties to be paid for the use of the patents controlled by the Manufacturers Aircraft Association by the United States Government during the period of the present war.

"If the cross-license agreement is modified as above, I will agree with the Secretary of War that all makers of airplanes for the War and Navy Departments on the cost-plus basis will be reimbursed for royalties paid to your association as above. * * *"

9. Between March 8 and March 28, 1918, while he was acting during these negotiations for both the Navy and the War Departments, the Secretary of the Navy expressed to the plaintiff his desire for the Government to obtain the right to make airplanes in its factories on the payment, for such of them as might be made during the war, of the reduced royalty of $100 an airplane. In the same period a supplemental cross-license agreement, hereinafter sometimes called the "supplemental", was prepared. This agreement is in evidence as exhibit 15 and is made a part of this finding by reference. This supplemental provided that, except as therein modified, the original cross-license agreement of July 24, 1917, should remain in full force and effect, and that "the price herein agreed upon for royalties upon airplanes furnished during the present emergency to the United States Government is so fixed for the sole purpose of enabling the Government to acquire airplanes manufactured under said patents upon a preferential basis during the period of the present war."

The supplemental agreement, which modified the terms of the original cross-license agreement between the stockholding manufacturers and the plaintiff, granting a preferential royalty to the Government and limiting the maximum amount of royalty to be paid to the owners of the patents *during the period of the war* to $2,000,000, was submitted to and accepted by the Secretary of the Navy for both the Navy and the War Departments by letter from the Secretary of the Navy to plaintiff on March 28, 1918, in which the Secretary of the Navy stated:

"This agreement, as modified, meets the conditions laid down by me and should be accepted promptly by all manufacturers of aircraft under Government contracts, and by the owners of the patents.

"In consideration of the reduced royalties therein provided for on the patents now owned or controlled by the association or its subscribers for use on all airplanes manufactured and delivered to the United States Government during the period of the war, I will agree.

"1. That the contracting and disbursing officers of the Navy Department shall allow and will be directed to allow as an element of cost in all cost-plus contracts, the royalties paid under the cross-license agreement and the supplementary agreement above referred to, to the amount and in the manner provided for in said agreements.

"2. That the Navy Department will pay to the Manufacturers Aircraft Association, Inc., a royalty of $100 per plane on all airplanes manufactured by the Navy Department. It being understood that the payments so made shall be included in the $2,000,000 total allowed to the owners of the patents during the period of the war, and with the further understanding that a detailed agreement will be made setting forth that such payments shall be complete and full compensation for the use of all the patents now controlled by the Manufacturers Aircraft Association, Inc., for the airplanes manufactured by the Navy Department during the period of the war. Said payment of $100 per plane to cease when the sum of $2,000,000 has been realized by the owners of the patents.

"I have conferred with the Acting Secretary of War about this matter and he authorized me to say that he concurs in the statements made above, with the understanding, of course, that the same agreement made to the Navy Department will operate with respect to the War Department. And if the

Digitized by Google

War Department shall undertake the manufacture of its own planes it will agree to pay the same royalty as the provision requires the Navy Department to pay."

10. March 30, 1918, the supplemental agreement was submitted by letter to the Secretary of War. A further conference between the Secretary of War, the Secretary of the Navy, and the plaintiff was held, and on April 5, 1918, the Secretary of War in general confirmed and accepted the terms of the supplemental agreement and suggested certain slight modifications. The letter of acceptance of the Secretary of War concluded as follows:

"However, after conferring with the Secretary of the Navy, and in order that there may be no misunderstanding of the matter, it is understood that it is not the intent of this letter, nor of the letter of the Secretary of the Navy dated March 28, 1918, that either the War Department or the Navy Department agrees to pay or allow, as an element of cost, royalties for 'after acquired patents' under the provisions of section 5 of the original cross-license agreement. It is understood that the question of the amount and propriety of any such payments is left for future disposition.

"I understand that all necessary steps to insure the legality of the right of the Manufacturers Aircraft Association, Incorporated, to license under the patents in question are being taken and will be completed.

"I trust that the modifications proposed by the supplemental agreement will be accepted promptly by manufacturers of aircraft under Government contract and by the owners of the patents."

These letters are in evidence as exhibits 17 (*a*) and (*b*), respectively, and are made a part of this finding by reference.

11. The phrase "amount and propriety of any such payments" which appears in the last sentence of the first paragraph of the letter of April 5, 1918, of the Secretary of War, hereinabove quoted, related to payments of royalties on "after acquired patents." This and the temporary modification in the amount of royalty per airplane were the only changes from the terms of the agreement as incorporated in the Government's proposal for a special license. By reason of the requests of the Secretary of War and the Secretary of the Navy, as hereinbefore set forth, the modifications were forthwith accepted by plaintiff and by the stockholders, subscribers to the agreement, by letters from plaintiff of April 27, 1918, to the Secretary of War and the Secretary of the Navy. These letters were the same. The letter to the Secretary of War in evidence as exhibit 18 (*a*) is made a part of this finding by reference. After July 17, 1918, the original and supplemental agreements were signed by certain other makers of airplanes, who thereby became "Subscribers" thereto; all of whom approved the special-license agreement with the Government.

12. April 24, 1918, the War Department, by Order A. C. #30, instructed its contracting officers to allow and to make direct payments of royalties on contracts awarded on a cost-plus basis, where due on Government manufacture, to plaintiff until the sum of $2,000,000 had been distributed by plaintiff to the owners of the various patents, in accordance with the distributive ratios provided in the agreements. This order is in evidence as exhibit 19 and is made a part of this finding by reference. The allowance and payment of royalties to plaintiff through contractors with the Government applied only to contractors who were stockholders of plaintiff and "Subscribers" to the original and supplemental cross-license agreements.

13. May 10, 1918, the Secretary of War wrote to plaintiff acknowledging receipt of its letter of April 27, 1918, exhibit 18 (*a*) above, and stating that the necessary instructions had been given for the allowance and payment of royalties on cost-plus contracts under the terms of the supplemental agreement. This letter was acknowledged by plaintiff May 14, 1918.

14. In August 1918, the Bureau of Aircraft Production, on behalf of the War Department and the Navy Department, with a view to consolidating into one document the various agreements which had theretofore been entered into and the understandings which had been had, as hereinbefore referred to, caused such an agreement to be prepared for execution by the respective parties in interest. This agreement, however, was not executed because of the armistice. Thereafter the Navy Department prepared and submitted to plaintiff and to the Wright and Curtiss companies a so-called Operating contract, dated March 11, 1919, in accordance with paragraph 2 of the letter of the Secretary of the Navy dated March 28, 1918, as set out above. This contract, which was executed by the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane & Motor Corporation as parties of the first part, and who are referred to in the contract as

Digitized by Google

the associates, the Manufacturers Aircraft Association, Inc., as agent and attorney for the associates as party of the second part, and the United States, represented by the Secretary of the Navy, as party of the third part, hereinafter referred to in the contract as the Department, provides in part as follows:

"*Whereas* the associates own or control certain United States patents, covering important inventions relating to aircraft, and

"*Whereas* the Department desires to manufacture, or has manufactured, at its navy yards and naval factories, airplanes in the construction of which certain of the aforesaid inventions may be or have been used.

"*Now, therefore*, it is hereby agreed by and between the parties hereto as follows:

"1. The Department shall have the right to use in the construction of airplanes at any of its navy yards or naval factories, during the period of the war, all or any of the inventions covered by any and all 'airplane' patents (not including engines and engine accessories) now owned by the associates jointly or severally, or under which they jointly or severally now have the right to grant a license, each of the associates hereby agreeing jointly with the other associate where their interests are joint and severally where their interests are several.

"2. The Department will pay to the Manufacturers Aircraft Association and the Manufacturers Aircraft Association will receive for and in behalf of the associates a royalty in the sum of one hundred dollars ($100) for and on account of each and every airplane manufactured or caused to be manufactured by the Department (during the period of the war) at any of its navy yards or naval factories, and the associates agree that the aforesaid royalties when so paid to and received by the Manufacturers Aircraft Association shall constitute and be accepted by them as compensation in full for and on account of the use in the construction of the aforesaid airplane of every 'airplane' invention (not including inventions on engines and engine accessories) owned or cotrolled by them or either of them, but nothing herein contained shall be construed as a waiver of any rights as to royalties on airplanes manufactured by or for the Government after the period of war or on airplanes manufactured by aircraft manufacturers for the Government during the war period."

During the war airplanes using the devices of said patents were being manufactured for the Government by manufacturers who were not, as well as those who were, subscribers to the agreement. The royalties on all airplanes manufactured for the Government by "Subscribers" have been paid to plaintiff. The royalties here involved are those on airplanes manufactured by the Government or acquired by it from contractors who were not stockholders of plaintiff or subscribers to the original and supplemental cross-license agreements.

15. Operations under the original agreement and its later modifications began about the end of July 1917 and have been continued by its members uninterruptedly ever since. As a part of the operations the members of the association, i. e., "Subscribers" to the cross-license agreements, made reports to plaintiff from time to time of their production of airplanes and the War and the Navy Departments similarly reported manufacture in Government factories after the Government accepted the supplemental agreement and secured the special-license agreement, except as hereinafter stated in finding 17. Under the operating practice and the arrangement between the Government and the plaintiff, the Government required invoices from the plaintiff before payment and such invoices were to be made by plaintiff after the receipt of reports of airplanes manufactured or otherwise acquired. Such invoices were never made by plaintiff until after such reports had been received by it. The royalties to be paid by the Government to the plaintiff were not to become due and payable until after the receipt by plaintiff of such reports and the receipt by the Government of plaintiff's invoices. Plaintiff was required to certify the amount of distributions made to the Wright and the Curtiss companies and the Government from time to time audited plaintiff's books.

16. To carry out the terms of the original agreement, exhibit 10 (a), the supplemental agreement, exhibit 15, and the Government's special-license agreements, exhibits 16, 17 (b), 19, 20 (a), and 22, reports were called for from time to time to be made on the 10th of January, April, July, and October of each year on all airplanes sold and delivered during the three preceding calendar months, and payment was demanded upon invoice submitted for the Government airplanes so reported.

17. During each year after, as well as before, 1921, all stockholders of plaintiff, subscribers to the cross-license agreement, regularly made their quarterly reports and payments to plaintiff. Subsequent to the general statement and

Digitized by Google

report of September 19, 1923, hereinafter referred to, the plaintiff from time to time called upon the War Department for further reports of the airplanes made for the Government by manufacturers other than subscribers and it furnished the association with such reports in response to such requests. From time to time after July 2, 1921, the plaintiff called on the Navy Department for further reports in a similar manner. Failing to receive such reports prior to 1927, plaintiff made tentative invoices to the Navy Department from information contained in the annual reports of the Chief of the Naval Bureau of Aeronautics.

18. Under the terms of the original agreement and the supplemental, there were reported by the subscribers to the plaintiff as made by them during the period of the war 15,353 airplanes, of which 15,032 were for the Army and the Navy and 321 for other purposes. By similar reports made to the plaintiff and as a basis for payment provided in its special licenses, as hereinbefore stated, the Government reported to the association that there had been made by the Government in governmental factories during the period of the war 451 airplanes. In the aggregate, such reported airplanes constituted approximately 90 percent of all the airplanes made by or for the Government for use of the United States during that period.

19. The quarterly reports made by the Government pursuant to its agreement with the plaintiff included all airplanes made by the Government in Government factories, save as hereinafter specified and particularly in finding 28 hereof. All airplanes made for the Government by members of the plaintiff association were also duly reported by its members, but such reports did not include airplanes using the devices of the patents owned or controlled by the plaintiff made for the Government by persons other than members of the association or contractors licensed by such members. It was not known to either the plaintiff or to the Government that there were any such airplanes unreported, but the fact that certain airplanes manufactured by the Government and acquired by it from contractors other than subscriber-contractors had not been reported to plaintiff came to light in the course of negotiations for a new post-war contract, as hereinafter referred to. As to the royalties herein sued for on airplanes received or used by the Government before July 25, 1922, the Government did not report any thereof to the plaintiff before September 19, 1923, except one airplane, as stated in finding 20 hereof, and prior to such report the plaintiff did not know, and had no means of knowing, the number or kind or date of receipt, or of use by the Government, of any of such previously unreported airplanes.

20. Royalties were paid to plaintiff by its members making airplanes for the Government for all airplanes so made by them down to March 31, 1928, and royalties were paid by the Government to plaintiff for such airplanes as were reported to have been made by the Government except in the case of six airplanes where the manufacturer became bankrupt before payment and in the case of one Government-made airplane reported October 8, 1920, and invoiced by plaintiff April 19, 1921, being the first item in exhibit H (a) of the petition. No payments of royalties were ever made by either the War or the Navy Departments on any of the airplanes involved in this suit.

21. Prior to May 1924 the Government had paid royalties, either directly to plaintiff or through subscribing contractors, on 16,108 airplanes. Since May 20, 1924, the Government, in the same manner, has paid to the plaintiff royalties on 1,803 airplanes, aggregating, in amount, more than $360,000. As such payments were made from time to time and during each year from 1918 to 1928, inclusive, they were credited by plaintiff on its general royalties account with the Government.

22. The Government audit of plaintiff's books shows the total of all royalties paid to plaintiff from any source before July 2, 1921, to have been $2,094,600. Of this sum the Curtiss Company paid $969,900; other subscribers paid $1,079,700; the War Department paid $1,200, and the Navy Department paid $43,800. Included in the amounts received by plaintiff as royalty were royalties on 274 airplanes made in the United States and sold to users other than the Government at a royalty rate of $200 each and 23 airplanes of foreign manufacture for which a royalty of $300 each was received. For the 297 airplanes so manufactured $61,700 was received by plaintiff as royalty.

23. Of the $2,094,600, royalties received by plaintiff before July 2, 1921, and all royalties received by it at any time thereafter, 12½ per centum of the amount received was retained by the plaintiff and the balance distributed by

Digitized by Google

it in accordance with the original agreement, the supplemental, and the special license agreement. Of the $2,094,600, $261,825 (12½%), was retained by plaintiff, $418,920 or 20 per centum was paid to the Curtiss Company, and $1,413,855, being 67½ per centum, was paid to the Wright Company. Included in the $2,094,600 is $45,000 paid by the Government to plaintiff as royalties for airplanes made in its own factories before July 2, 1921. Neither the Wright nor the Curtiss companies has received any other sum as royalties for airplanes made or purchased prior thereto. The retention of 12½ per centum and distribution of 20 per centum and 67½ per centum, as above stated, continued until May 1923; but of all procurement or production royalties received by the plaintiff during or since May 1923, 87½ per centum has been paid to Curtiss and 12½ per centum kept by the plaintiff. Every distribution or disposition of royalties received by plaintiff was truly declared on its books and records, which were always subject to examination, and were periodically examined by the War Department auditors during each year of operation. The auditors after each such examination prepared a report showing the entire number of airplanes reported to plaintiff by subscribers and by the Government. Each such report showed the total of royalties earned and received to that date by both the Wright and Curtiss companies to be equal to 87½ per centum of the total royalties received by plaintiff. Such reports were furnished from time to time to the Government and no complaint was ever made by the Government as to the method of disposition or distribution of the royalties or of the amount shown as to the total received by the Wright and Curtiss companies from plaintiff until the comptroller general rendered his opinion on May 12, 1927, disallowing plaintiff's claim for the royalties involved in this suit.

24. November 5, 1919, Rear Admiral Taylor, then Chief of the Bureau of Construction and Repair of the Navy Department, wrote to plaintiff concerning one of its invoices for $9,300 as due from the Navy Department in royalties. Referring to that invoice as reference (*a*), and by reference (*b*) to the letter of the Secretary of the Navy of March 28, 1918, above, he said:

"Attention is invited to paragraph three of the supplemental cross-license agreement and to reference (*b*) which provide that royalty payments shall cease when the limit of two million dollars is reached.

"Before placing the invoice reference (*a*) in line for payment, it is requested that the Manufacturers Aircraft Association state that the payment of the amount of this invoice will not cause the above-mentioned limit of two million dollars to be exceeded."

On November 6, 1919, the following letter was written by the Manufacturers Aircraft Association, Inc., to Rear Admiral Taylor in response to his letter of the preceding day:

"The total amounts disbursed by us under the cross-license agreement to the owners of the patents up to and including June 30th, 1919 (last complete quarter under the cross-license agreement), are as follows:

Wright-Martin Aircraft Corporation	$1,331,910
Curtiss Aeroplane & Motor Corp	394,640
	1,726,550

"Payment of our invoice $9,300, covering royalties on planes manufactured at the Naval Aircraft Factory will not exceed the limit of two million dollars, provided for in the supplemental agreement.

"We trust that with this information you will be able to pass the invoice for payment."

25. January 20, 1921, the Secretary of the Navy wrote plaintiff with reference to royalties for Government-made airplanes as follows:

"In accordance with your request of December 27, 1920, to the Bureau of Construction and Repair, a statement is being furnished to you, showing the number of airplanes (viz 20) manufactured in Government-owned factories by the Navy Department during the fourth quarter of 1920. It is assumed that you will submit an invoice for the royalties due the Manufacturers Aircraft Association at the rate of $100 per plane in accordance with the supplemental agreement to the cross-license agreement dated July 24, 1917.

"As stated in my letter of March 28, 1918, it is understood that payments are to cease when the sum of $2,000,000 has been realized by the owners of the patents, controlled by the Manufacturers Aircraft Association.

Digitized by Google

"It is accordingly requested that when invoice is submitted covering the amount now due the association, it be accompanied by a statement showing the amount disbursed to the owners of the patents involved."

26. In March 1927 the Comptroller General during his consideration of invoices submitted to him on or after May 20, 1924, informed the plaintiff that he had just learned of his failure previously to secure certification and approval of such invoices and was taking immediate steps to insure such approval and certification. The invoices were in fact then certified to, but the Comptroller General did thereafter acquire and obtain verification thereof. April 4, 1927, the Comptroller General informed plaintiff that the audit had been completed and a certificate of indebtedness for the amount due was being drawn and would issue. At a later date the Comptroller General refused the certificate and disallowed the claim as then before him.

27. By a joint resolution Congress declared that the war with Germany should be deemed, for war-contract purposes, to have ended on July 2, 1921. This operated to terminate the supplemental agreement to the original agreement. The Government made no reports to plaintiff between July 1, 1921, and September 19, 1923. On the latter date a detailed report was made as will be hereinafter set forth.

28. In December 1921 the Government, desiring to continue the use of the patented devices in its own factories, suggested that a new agreement be entered into, based on the experience under the special-license agreement and the post-war needs of the Government and the industry; and, with that end in view, negotiations were begun by the parties in 1922. In the early stages of these negotiations it developed that there were airplanes manufactured and purchased by the Government that had not been reported, and which the plaintiff considered should have been reported, and negotiations were broadened to include those items. At that time the plaintiff had no definite knowledge of the number or nature of the unreported airplanes, and had no way of obtaining such information except from the Government, in order to bill the Government for the royalties due in accordance with the original arrangement. In July 1922 when discussing the features of such negotiations with the Army Air Service and the Naval Bureau of Aeronautics, plaintiff brought matter of the unreported airplanes to their attention and asked that the Government promptly report all such airplanes. Plaintiff was informed that the data for such a report was not immediately available; and, thereafter, negotiations for a new agreement proceeded on the understanding that such a supplemental report would be made by the Government in such a way that all items not previously reported by the Government could be known and the date of delivery determined in order that the Government could be billed for the royalties claimed to be due.

29. On July 1, 1921, the temporary arrangement for reducing royalties on airplanes made by subscribers and those made or purchased by the Government expired. During protracted negotiations which followed from and after July 2, 1921, and pending the conclusion of a modified agreement for future use of the patented subject matter in the manufacture of airplanes by the Government, the War and the Navy Departments, by consent of all parties connected with the negotiations, continued to make, buy, use, and even sell within the United States, airplanes containing the patented subject matters controlled by plaintiff. The practice continued until December 1928, when the War and the Navy Departments entered into a formal agreement with the plaintiff, which agreement became effective December 31, 1928. This agreement and a copy of the letter dated December 1928, from the Secretary of War and the Secretary of the Navy, are in evidence as exhibits 23 and 23 (a), respectively, and are made a part of this finding by reference. The letter referred to the new agreement as "conforming to the terms of the proposed amended agreement and to the understanding and practice which has been evolved through the Government's use of patents controlled and licensed by them to you."

30. After July 1921, it became the practice in making contracts for airplanes for the contracting officers of the War Department to make a price distinction as between contractors who were and those who were not subscribers to the plaintiff association. In contracts with the former there was inserted a clause requiring the subscriber-contractor to indemnify the Government against claims on it under patents covered by the agreement. It was not the practice of that Department to insert such clauses in contracts with nonsubscribers. Contracting officers of the War Department were instructed to make a price differential

Digitized by Google

of $200 less an airplane in their (nonsubscribers') contracts to cover the Government's obligation to pay royalties to plaintiff thereon. In two contracts with a single nonsubscriber contractor, in which he first agreed to discharge the obligation (in his negotiated contract) and thereafter failed to do so, the War Department withheld from its final payment to such contractor $200 an airplane on the 70 airplanes involved in that contract. The amount so withheld was $14,000, which amount the Government did not pay to plaintiff but still retains. These are the 70 airplanes in the fifth item from the bottom of page 103 of the amended petition in exhibit H (b).

31. The unreported airplanes by the Government, in which were used the patented subject matter controlled by plaintiff, whether such uses were before or after July 2, 1921, for which royalties have not been paid, were of the nature described by the Attorney General in his opinion of March 24, 1925, and in the letter requesting such opinion sent him by the Secretary of the Navy, dated September 28, 1922, both of which are hereinafter referred to in finding 32. Such uses were enjoyed by the Government under practices similar to those obtaining during the period of the war except that they were not reported to the plaintiff until long after the date of the several uses.

32. By September 1922 an agreement, providing for payment by the Government of any and all royalties on airplanes previously unreported, using devices of said patents, and also providing for royalties to be paid on similar airplanes to be made by or for the Government in the future, had been reached and drafted and approved by the Judge Advocate General of the Navy. It was submitted to the Attorney General by the Secretary of the Navy by letter of September 28, 1922, with a request for an expression of his opinion as to whether such agreement was legal and proper. The Attorney General rendered his opinion March 24, 1925, 34 Op. Atty. Gen. 447. This opinion is made a part of this finding by reference. The Attorney General was of the opinion that the letters of the Secretaries of War and of the Navy, plus the operating contract, sufficiently protected the Government as to royalties already paid by it and, after having disposed of the reported and royalty-paid "during-the-war" airplanes as being within the benefit of the letters and the operating contract, the Attorney General said with reference to the unreported airplanes, included in those here in suit, that "There remain not settled for, certain airplanes built or imported during the war, not covered by the terms of the express contract, which it is now proposed to arrange settlement for on the same basis—$100 per airplane—as has been the case for those already settled for, and further machines built or otherwise secured by the United States since the war and prior to the date of the proposed contract which it is proposed to settle for at the rate provided for in the original cross-license agreement, namely, $200 per airplane. * * * It will be necessary to consider whether the use was an infringing one—or one under implied contract. * * * That an implied contract to pay compensation for use of a patented invention will arise when the Government uses it with the patentee's consent and either acquiesces in his title or does not deny it, is now fully settled. * * *."

33. September 19, 1923, the War Department submitted to plaintiff a statement and report comprehensively covering all airplanes using the patented devices of the plaintiff made for and used by the Government from 1908 to 1918, including all procurements by the Bureau of Aircraft Production. A like formal report covering the procurement by the Navy Department was sent by the latter to the plaintiff with a letter of June 22, 1927. From the first-named report and certain additional information covering procurement by both the Army and the Navy, and obtained by plaintiff in 1923 and 1924, tentative invoices were submitted to the Chief of the Naval Bureau of Aeronautics and the Chief of the Air Corps by letters of May 13 and May 16, 1924, respectively. In these letters the plaintiff requested that officers of the Army and the Navy be designated to check with it all such procurement figures to eliminate duplications and errors, with the object of securing Government certification to all unpaid items.

34. The Chief of the Air Corps promptly designated such officers. Plaintiff's request to the Naval Bureau of Aeronautics was referred to the Judge Advocate General of the Navy. Thereupon plaintiff prepared similar invoices covering all such items of unpaid royalties as existed on May 20, 1924, so far as they could be determined from the information then at hand. Plaintiff submitted these invoices on that date to the Chief of the Air Corps, the Chief of

Digitized by Google

the Naval Bureau of Aeronautics, and to the Comptroller General of the United States. As so submitted the invoices covered all unpaid items then reported by the War Department and the amounts unpaid on account of the naval procurement as disclosed by the annual reports of the Naval Bureau of Aeronautics. These items are all the items listed on page 60 of exhibit H (a) of the amended petition plus those on page 61 of said exhibit, as to which invoices are dated in May 1924, and also the item on page 61 "1 Sarling (Barling) B. Whiteman, L", which, as appears from page 79 of exhibit H (a) should be dated May 20, 1924, instead of January 20, 1926.

35. March 1, 1927, the Chief of the Air Corps of the War Department, after having considered the claims of the plaintiff to royalties as set forth in the origiual of which exhibit H (a), found on pages 60 to 85, both inclusive, of the amended petition is a copy, certified to the Comptroller General that the 1,041 airplanes first listed on pages 60 and 61, being all save one Barling bomber and the 45 airplanes listed in the last seven starred items on page 61, had been made by or for, and delivered to and received and used by the War Department under and subject to the Government's special license agreement with plaintiff. He then further certified that the aggregate amount of the royalties due on the 1,041 airplanes was $143,500, that none of the royalties had been paid, and that the whole thereof was approved by him for payment. Exhibit H (a), which is attached to the seconded amended petition herein, is made a part of this finding by reference.

36. At the same time, having also considered all the claims of plaintiff as represented by the items listed in an original account of which so much of exhibit H (b) of the second amended petition as is found on pages 103 to 109, both inclusive, thereof is a part, the Chief of the Air Corps of the War Department likewise certified to the Comptroller General that all of the 504 airplanes as now listed on page 103 of the amended petition had been made by or for, delivered to and received and used by the War Department; that none of the royalties claimed thereon had been paid; and that the total thereof was approved by him for payment. Exhibit H (b) to the second amended petition is made a part of this finding by reference.

37. In December 1923 the Wright Company commenced suit in this court against the United States to recover royalties for the use by the Government of patented devices, which use is the basis of the royalty claimed in the present action by plaintiff. At the request of plaintiff and other subscribers, the Wright Company, by agreement to that effect with the Department of Justice, withdrew the suit without prejudice.

38. The claims for royalties involved in this suit, including all items shown on exhibits H (a) and (b) of the amended petition, the same having been referred to the General Accounting Office for consideration, remained before the Comptroller General for consideration until May 12, 1927, when he rejected all the claims then before him. Plaintiff asked the Comptroller General to reconsider his ruling and on April 28, 1928, he declined to do so, and the claims were finally rejected.

39. All the 1,545 airplanes on which, in its amended petition, plaintiff has claimed royalties because of their use by the War Department were made by or for, and received and used by that Department prior to March 31, 1928. They were all provided with and used patented devices controlled by plaintiff and described in and subject to the agreement, the supplemental, and the special-license agreement of the Government. No royalty has been paid on any of them.

Of these 1,545 airplanes, 1,041 thereof were received and used in the United States before the termination of the war, namely, before July 2, 1921. The remaining 504 airplanes were so made, received, and used after the termination of the war, but before March 31, 1928. And of the last-mentioned number, 500 thereof were so made, received, and used after July 25, 1922.

40. Reasonable royalties for the use by the Government of the patented devices on each of the 1,545 airplanes in every instance correspond to the sum provided for use thereof in the agreement, the supplemental, and the special-license agreement of the Government. Thus calculated, the total of royalties due plaintiff on the 1,545 airplanes was $244,300.

On the 1,041 airplanes received and used by defendant before the termination of the war on July 2, 1921, the total of such royalties, so calculated, was $143,500.

On the 504 airplanes received and used after the termination of the war and before March 31, 1928, the total of such royalties, so calculated, was $100,800.

Digitized by Google

On the 500 airplanes of the 504 last mentioned so received and used by the defendant after July 25, 1922, and before March 31, 1928, the total of such reasonable royalties, so calculated, was $100,000; while on the remaining 4 airplanes of those received and used after the termination of the war, the total of such royalties so calculated was $800.

41. Of the total of 1,545 airplanes above mentioned, 1,000 thereof were first reported to plaintiff by the War Department as having been so received and used by it in September 1928. Of the remaining 505 airplanes all but one were reported to plaintiff by the War Department from time to time after September 1923.

42. Of the 444 airplanes on which in its amended petition plaintiff has claimed royalties because of their use by the Navy Department, 434 thereof, and no more, were in fact so made by or for, and received and used by that Department prior to March 31, 1928. Since the filing of that amended petition the Navy Department has finally verified to plaintiff 65 more previously unverified airplanes as made for, and received and used by it, within the United States in 1917 and 1918, so that the total actually received and used by defendant prior to March 31, 1928, on which plaintiff claims royalties for uses during that period is 499 airplanes.

All of the 499 airplanes were provided with and used patented devices controlled by the plaintiff and described in and subject to the original agreement, the supplemental, and the special license agreement of the Government. No royalty has ever been paid by defendant on any of them.

Of these 499 airplanes, 160 thereof were received and used by the Navy Department in the United States before the termination of the war, July 2, 1921. The remaining 339 airplanes were so made, received, and used by the Navy Department after the termination of the war but before March 31, 1928. And of these 339 airplanes, 325 thereof were so made, received, and used by the Navy Department after July 25, 1922.

43. Reasonable royalties for the use by the Government of the patented devices on each of the 499 airplanes above referred to in every instance correspond to the sum provided for use thereof in the agreement, the supplemental, and the special-license agreement of the Government. The total of the royalties due on the 499 airplanes was $84,900. On the 160 airplanes received and used before the termination of the war, the total of such royalties, so calculated, was $17,100. On the 339 airplanes received and used after the termination of the war and before March 31, 1928, the total of such royalties was $67,800. On the 325 airplanes received and used after July 25, 1922, and before March 31, 1928, the total of such royalties was $65,000; while on the remaining 14 airplanes of those received and used after the termination of the war the total of such royalties, so calculated, was $2,800.

44. Of the 499 airplanes made by or for, and received and used by the Navy Department, 434 thereof were first reported to the plaintiff by the Navy Department in June 1927 as having been so received and used by it. As already stated, the remaining 65 airplanes were not finally verified until 1929, after the commencement of this action, but which are included in the amended petition.

45. During the last nine months of 1928, between March 31, 1928, and the end of that year, on which latter date, by its terms, the newly made contract between the plaintiff and the Government referred to in finding 29 hereof for airplane royalties went into effect, 172 airplanes using the patented devices covered by the original and supplemental agreements were made by or for, and received and used by the Government in the United States, 168 thereof being so received and used by the War Department and the remaining 4 thereof by the Navy Department. No royalty has ever been paid on any of these airplanes. A reasonable per-airplane royalty was that prescribed for the applicable period by the original and supplemental agreements, and the special license agreement of the Government, namely, $200 an airplane. On the 4 airplanes so used by the Navy Department the total of such reasonable royalties was $800. On the said 168 airplanes so used by the War Department the total of such reasonable royalties was $33,600. The manufacture, receipt, and use of the 172 airplanes was had under a continuation of the practice prevailing with respect to the manufacture, receipt, and use of airplanes as hereinbefore set forth.

Of the 1,041 airplanes received and used by the War Department during the period of the war, finding 40, and the 162 airplanes received and used by the Navy Department during the period of the war, finding 42, only 22 thereof were made by the Government.

46. A summary with reference to the 2,216 airplanes involved in this suit made by or for, and received and used by the Government with respect to which no royalties have geen paid, and the reasonable royalties due thereon, follows:

Summary

	War Department			Navy Department			Total War and Navy	
	Number Government made	Purchased	Royalties	Number Government made	Purchased	Royalties	Planes	Royalties
During war	1	1,040	$143,500	21	139	$17,100		
After war until 7/28/22		4	800		14	2,800		
After 7/25/22 until 3/31/28		500	100,000		325	65,000		
Last 9 mos. of 1928		168	33,600		4	800		
	1	1,712			482			
Total made and purchased		1,713	277,900	21	503	85,700	2,216	$363,60

Total made in Government factories during war and *paid for* ($45,000) 452
Total made in Government factories during war and *not paid for*—21 of them unreported until 1928.. 20

47. The chief purpose of the arrangement detailed in these findings and the implied understanding and agreement between the War and the Navy Departments and the plaintiff, which were carried out in practice, was that the United States should have the right to fulfill its requirements for airplanes by manufacture or purchase from subscribers to the cross-license agreement or nonsubscribing manufacturers upon the payment to plaintiff of a royalty of $100 or $200 an airplane, depending upon the time such airplanes were manufactured or purchased.

It was further impliedly agreed that the Government would report quarterly to plaintiff all airplanes manufactured by it or acquired or purchased from nonsubscribing airplane manufacturers and pay to plaintiff the royalties agreed upon, and that such royalties should accrue and become due and payable upon the receipt of invoices or bills therefor with a certification by plaintiff that the royalties demanded would not cause the amounts to be distributed to the Wright and the Curtiss Companies to exceed the maximum agreed upon.

48. If plaintiff recovers the royalties claimed in this suit, the distributions made therefrom to the Wright and the Curtiss Companies will not cause the amount to which the companies were entitled under the original plan and arrangement to exceed the maximum amount specified.

CONCLUSION OF LAW

Upon the foregoing special findings of fact, which are made a part of the judgment herein, the court decides as a conclusion of law that the plaintiff is entitled to recover $363,500.

It is therefore adjudged and ordered that the plaintiff recover of and from the United States three hundred sixty-three thousand five hundred dollars ($363,500).

OPINION

LITTLETON, *Judge*, delivered the opinion of the court:

The arrangement which resulted in the incorporation of the plaintiff and the control by it of various patents relating to airplanes, whereby the Government was enabled to obtain and manufacture all the airplanes desired by it upon the payment of a royalty of $200 an airplane, which was, by agreement, reduced to $100 during a certain period, was brought about at the suggestion of the Secretary of War and the Secretary of the Navy through the assistance of the National Advisory Committee for Aeronautics. The arrangement and the practice under it related to all airplanes acquired by the Government. This should be kept in mind throughout the case. The Secretaries of War and of the Navy had full au'hority to act in the premises and if in the arrangement and

Digitized by Google

practice, followed, as disclosed in detail by the findings, they had embodied the same in a formal written contract there could be no question but that plaintiff would be entitled to the royalties claimed in the amount of $363,600 in addition to those paid to it by the War and the Navy Departments.

Between July 16, 1917, the date of plaintiff's incorporation, and May 1924 the Government had paid royalties to the plaintiff in accordance with the original, the supplemental, and the cross-license agreements, either directly or through contractors, on 16,108 airplanes manufactured by or for the Government and received and used by it, in the manufacture of which airplanes various patents controlled by plaintiff were used. These royalties were at the rate of either $200 an airplane or $100 an airplane, depending upon the time they were made or acquired under contracts. Since May 20, 1924, to December 31, 1928, the effective date of the formal contract for the payment of royalties, the Government in the same manner paid to plaintiff royalties at the rate of $200 an airplane on 1,803 airplanes aggregating $360,600.

During the period of the war, ending July 2, 1921, the Government made in its own factories and duly reported to plaintiff 450 airplanes using the patents controlled by plaintiff, for which plaintiff was duly paid $100 an airplane, or $45,000. During the period of the war and until December 31, 1928, the Government manufactured in its own factories 22 airplanes and purchased from contractors who were not "subscribers" to the cross-license agreement 2,194 airplanes, all of which used the patented devices controlled by plaintiff and for which, under the original and supplemental agreements, the total of the reasonable royalties due plaintiff was $363,600. These 2,216 airplanes are the ones involved in this proceeding and the royalties thereon constitute the claim for which plaintiff seeks judgment.

The Government agreed to make accurate quarterly reports to plaintiff of all airplanes made or purchased by it upon the basis of which reports the plaintiff was to render invoices to the War and the Navy Departments, respectively, for the royalties due thereon, which royalties were not to accrue and become payable until such reports were made and invoices received.

Of the 2,216 airplanes involved in this case 22 were manufactured by the Government during the period of the war but were not paid for nor reported to plaintiff until 1928. The Government purchased 1,179 airplanes during the war; and it likewise purchased 18 between July 2, 1921, and July 25, 1922; 825 between July 28, 1922 and March 31, 1928; and 172 between April 1 and December 31, 1928. The total of the royalties due and unpaid on the 1,713 airplanes manufactured and purchased by the War Department is $277,900, and the total of the royalties due on the 503 airplanes manufactured or purchased by the Navy Department is $85,700. None of the royalties has been paid nor were any of the 2,216 airplanes involved, except one, reported by the Government to the plaintiff prior to September 19, 1923.

There is no dispute as to the number of airplanes using the patented devices controlled by plaintiff and the facts establish that the per-plane royalty sued for is in every case reasonable.

It is contended by the defendant, first, that plaintiff is not entitled to maintain this suit because it was not the absolute owner of the patents used on the airplanes manufactured or purchased by the Government; and, second, that $164,400 of the royalties sued for relate to airplanes manufactured or purchased by the Government prior to July 25, 1922, and is therefore barred by the statute of limitation.

Plaintiff contends that it has a right to maintain this suit and to recover the royalties claimed under implied contracts; that no portion of the total royalties claimed is barred by the statute of limitation, inasmuch as the cause of action for such royalties did not accrue under the terms of payment of the original agreement, which terms were also applicable to the supplemental agreement and the Government's special license agreement, until fifteen days after the date on which the Government was required to report all airplanes manufactured or otherwise acquired by the War and the Navy Departments.

The facts summarized show that within the United States and during the period between July 24, 1927, and December 31, 1928, the Government made or purchased and used all the airplanes on which royalties are here sued for. Each airplane used devices of patents controlled by the plaintiff. No royalties have been paid on any of the airplanes involved and the total demanded represents reasonable royalties on the 2,216 airplanes in question.

The plaintiff was created in 1917 at the instance of the Government and in accordance with the plan evolved by it as the means of overcoming obstacles

Digitized by Google

to the production of airplanes arising from disputes between patentees that were embarrassing the Government in its need for airplanes. The Government found itself in a situation where it was being required to pay amounts which it regarded as excessive for airplanes using certain patented devices. The purpose of the plan, which was carried out in practice, was to enable the Government to fulfill its needs for airplanes using patented devices upon payment to plaintiff of a stipulated royalty for each airplane. After full report from the agency designated to formulate a plan to overcome this difficulty, in one of which reports it was recommended that such royalties be regarded as an item of cost of airplane production, and after the Attorney General had approved the legality of the plan, the Secretaries of War and of the Navy approved the plan in all essential particulars. The substance of the arrangement and understanding between the Government and the plaintiff was that the War and Navy Departments would pay to plaintiff a certain amount on each airplane made or purchased as a royalty on certain patents which had been pooled for that purpose and were controlled by plaintiff, and such royalty was to be paid by the Government on each airplane using devices of the patents, whether manufactured by the Government in its own factories or purchased and used by it from subscribers to the original cross-license agreement or from manufacturers who were nonsubscribers thereto. Plaintiff licensed certain manufacturers who then had contracts for airplanes with the Government and they became stockholders or subscribers to the arrangement known as the cross-license agreement, but the Government was not limited to the purchase of airplanes from subscribers. It was free to purchase airplanes using the patented devices from other manufacturers who had not signed the cross-license agreement, and there was an implied agreement between the Government and the plaintiff that the Government would report such airplanes and pay to the plaintiff the stipulated royalty which should become due upon the receipt of invoices or bills from plaintiff.

After its organization, plaintiff for all practical purposes was referred to by the departments as owning or controlling these patents. The arrangement was to endure for about fifteen years. The disputing patentees who held legal title to the airplane patents agreed under the plan formulated and suggested by the Government that plaintiff, until November 1933, should license airplane makers to use the patented devices, should collect royalties and retain one eighth thereof, or 12½% of all royalties collected, and use the same to meet expenses of administering the plan and for other purposes, and should distribute the balance in specified proportions to the Wright and the Curtiss Companies who were the owners of the principal patents. After plaintiff's organization all dealings with the Government were with the plaintiff. When the Government sought reduction of royalties for the period of the war and also the privilege of making in its own factories airplanes using the patented devices, it took these matters up with the plaintiff and not with the patentees. All reports of airplanes using patented devices, including the late reports by the Government of airplanes representing royalties here sued for, were made to the plaintiff. The Secretary of War referred to the legality of the right of plaintiff to license under the patents in question and both he and the Secretary of the Navy urged airplane manufacturers and patentees to accept the supplemental agreement which only varied the original by the reduction of royalties during the war. The recommendation of the departments that royalties be treated as a part of airplane-production costs was adopted and observed in practice, and plaintiff was advised that such would be the practice. During the period from 1917 until the end of 1928 no one except plaintiff ever issued a license or collected a royalty. The only joint agreement by Wright, Curtiss, and the plaintiff with the Government was made pursuant to the provision of the original cross-license agreement and directed payment of royalties to plaintiff.

The Curtiss Company, one of the patentees, in its capacity as a manufacturer of airplanes for the Government, paid to plaintiff $969,900, as full royalties on all airplanes made by it during the war. It received from plaintiff in distributions to itself as a patentee $418,920, being 20 percent of the total royalties of $2,094,600 collected by plaintiff from all sources during that time. The whole of those royalty payments by the Curtiss Company was included in the total used in figuring the distributions to the Wright Company and to the Curtiss Company to make sure that such distributions during the war period had not exceeded $2,000,000 to both companies, as provided in the supplemental agreement suggested by the Government.

The Secretary of the Navy, who originated and carried into execution the plan, kept a careful check of the distributions on the basis agreed upon and

Digitized by Google

he and the Secretary of War distinctly recognized the patents grouped in the plaintiff. In 1922, when called upon by plaintiff to report to it the airplanes herein suit so that plaintiff could bill the Government for royalties thereon, the Secretaries did not dispute plaintiff's right to collect such royalties from the Government, but recognized the same and excused its delay in reporting by urging a lack of necessary data, and promised such reports as soon as possible so that plaintiff could bill for the royalties involved.

Soon after the ending of the arrangement for reduction of royalties for the war period, such arrangement being the so-called special-license agreement with the Government, negotiations were begun for a new rayalty agreement. These were continued by the Government, through the Secretaries of War and the Navy on the one hand and plaintiff on the other, until the end of 1928, when such new arrangement was entered into between them. That agreement, according to its title, granted a nonexclusive license to the Government under all airplane patents embraced therein, and in accordance with the terms of the amended cross-license agreement with the plaintiff, and recited that the plaintiff controlled and had the power to grant licenses under certain United States patents covering important inventions. It also provided for the termination of all formal and informal agreements between the Govenrment and the plaintiff, except only such matters as were in dispute, which matters were those involved in the present action. By that agreement, the Government was to pay the plaintiff specified royalties until October 31, 1933, the expiration date of patent #1203550, unless a specified total maximum should have been paid to plaintiff before that date, after which the uses would be free.

Intermediate of the negotiations, an acceptable form of agreement was reached containing a provision for payment to plaintiff of all royalties here in suit that had been earned in prior years. In 1922, this agreement was submitted to the Attorney General, who, in 1925, ruled that payment with respect to airplanes used prior to the date of the agreement would have to be settled for otherwise than by a new contract, whereupon that feature was eliminated from the negotiations and the procedure indicated by the Attorney General was followed.

The post-war uses by the Government reducing the royalties claimed herein were enjoyed under a practice similar to that obtaining during the war, except for delay in reporting the airplanes used. In settling with a particular contractor the Government withheld royalties aggregating $14,000 on seventy airplanes, which it still holds, and these royalties are a part of those involved in this suit.

On March 1, 1927, after having checked the claims made by plaintiff at that time for royalties which are involved in this suit, the War Department approved the same for the amount claimed on the 1,545 airplanes theretofore used by it and recommended payment of that sum. It further found that this number of airplanes had been made by or for, and received and used by, the War Department under and subject to the Government's special-license agreement with the plaintiff.

The Secretary of the Navy on June 22, 1927, prepared and furnished the plaintiff with a report of the airplanes received and used by it from July 1, 1917, to July 1, 1926, which related to royalties payable on airplanes manufac ured or procured by the Government.

In the circumstances of this case, we are of opinion that plaintiff has a right to maintain this suit. This is not a case involving the infringement of patents and the suit is not grounded upon the use by the Government of patents without license of the owner and without lawful right to use the same, but is one based upon an implied contract by the Government to pay plaintiff certain royalties for the use of certain patents used on airplanes made or purchased by the Government. For the purpose of the arrangement made, at the suggestion of the Government, all the patents on devices used on the airplanes were pooled and placed under the control of plaintiff and thereafter the Government as well as all patentees recognized such control of plaintiff and its right to demand and collect the royalties provided for, and the patentees of the principal airplane patents paid to the plaintiff the agreed royalties on all airplanes manufactured by them in the same manner as such royalties were paid to plaintiff by the Government and the manufacturers who were not patentees. It was entirely a contractual arrangement, and we may lay aside the cases cited and relied upon by the defendant involving suits for infringement which hold that only the patentee or the person having legal title to the patents may sue to recover damages or compensation for infringement.

Digitized by Google

In this case the Government used the patents in the manufacture of airplanes and used the airplanes embodying devices covered by the patents with the consent of the patentees and the plaintiff, and impliedly agreed to pay plaintiff a specified royalty on each airplane without further liability to the patent owners. This was under an arrangement to which the patent owners agreed, whereby such patent owners had a right to receive and did receive out of all royalties paid to the plaintiff a certain specified distribution in full of all compensation due them for the use of their patents.

In addition to the control of the patents for contract purposes with the Government, the plaintiff had an interest to the extent of 12½ percent of all royalties collected, including those payable by the Government on airplanes made or purchased by it using devices covered by the patents; such interest amounts to $45,450 of the royalties claimed in this case. Cf. *Ohio Oil Co.* v. *United States*, no. K–319, decided March 7, 1932.

The next question is whether there was an implied contract between the Government and the plaintiff for the payment to the plaintiff by the Government of the royalties claimed in this suit.

An implied contract upon which a suit may be maintained under section 145 of the Judicial Code must be one implied in fact rather than in law. A contract implied in fact, or an implied contract in the proper sense, arises where the intention of the parties is not expressed, but an agreement in fact, creating an obligation, is implied or presumed from their acts, or, where the circumstances show, according to the ordinary course of dealing and the common understanding, a mutual intent to contract. The nature of the understanding of the parties, whether the contract be expressed or implied, is the same, the only distinction being in the mode of proof. Bot express contracts and contracts implied in fact are founded on the mutual agreement of the parties. The one class is proved by direct, and the other by indirect, evidence; in other words, an express contract is proved by an actual agreement, while in the case of an implied contract it will be implied that the party made such an agreement as, under the circumstances disclosed, he ought in fairness to have made. The implication must be a reasonable deduction from all the circumstances and relations of the parties, their acts, and conduct, although it need not be evidenced by any precise words and may result from random statements and uncertain language. In this case there was no formal written contract under which the Government agreed to pay the plaintiff royalties claimed in this suit. We think all the circumstances surrounding the matter of royalties on airplanes made or purchased by the Government using the devices covered by the patents controlled by the plaintiff, the acts and conduct of the parties, and their relations, establish an implied contract on the part of the Government to pay to the plaintiff the royalties which it now claims. This was the view of the arrangement taken by the parties, the Government being represented by the Secretary of War and the Secretary of the Navy who had authority to act for it.

The War and Navy Departments recognized the right of plaintiff to collect the royalties claimed on the airplanes made by or for the Government and the invoices or bills to the Government therefore rendered by the plaintiff, after it has received reports from these departments of the airplanes used by them containing the patented devices, were approved. Under the Attorney General's opinion, however, the matter of payment of plaintiff's invoices was referred to the Comptroller General for the purpose of stating an account. He first advised plaintiff that a certificate for the amount due would be issued but later refused such certificate and disallowed payment of the entire amount claimed, principally on the ground that under his view of the arrangement the patentees, Wright and Curtiss, who were entitled to distributions from the royalties collected by the plaintiff, had received the total amount to which they were entitled after which the Government was entitled to use airplanes containing devices covered by the patents without further payment of royalty. We think the interpretation by the General Accounting Office of the arrangement was not correct. It is not here urged by the defendant. Under the original cross-license agreement the Government was to pay the stipulated royalties until such time as the Wright and Curtiss companies had received in distributions from the plaintiff a maximum of $2,000,000 each. For the period between December 31, 1917, and the end of the war, the per-plane royalty on all airplanes manufactured or purchased by the United States was reduced and it was provided that whenever both the Wright and the Curtiss companies had together received

Digitized by Google

$2,000,000, in the aggregate, for airplanes bought by the Government it would be released from further payments "during the period of the present war." The last-mentioned arrangement expired on July 2, 1921, at the termination of the war. The Wright and the Curtiss companies did not receive, and will not receive, in distributions from the plaintiff an amount in excess of the maximum authorized by the original and the supplemental agreements if judgment is rendered in favor of plaintiff for the amount claimed in this suit. The practical interpretation of the arrangement and the understanding by the parties during performance is of great importance. *Insurance Co.* v. *Dutcher*, 95 U. S. 269, 273; *District of Columbia* v. *Gallaher*, 124 U. S. 505, 510; *Old Colony Trust Co.* v. *City of Omaha*, 230 U. S. 100, 118.

Under the arrangement disclosed by the facts, which was suggested by the Government and carried out in all of its details, the plaintiff was the only party who could have contracted with the Government. It was the only one who had dealings with the Government in the matter. Every action was by or with it. All communications from the Government carrying matters of contract implication were with the plaintiff. All negotiations for the new agreement between the termination of the war in 1921 and the execution of that agreement at the end of 1928 were with plaintiff. The understanding with which the departments proceeded, in the meantime using the patented devices, was with plaintiff, as was the understanding by the Government that when data for reports of airplanes used, but theretofore unreported, could be secured, such reports would be made to the end that plaintiff might render invoices or bills for the royalties due by the War or Navy Departments. The Departments during the operations never questioned their obligation to pay royalty on every airplane used, regardless of who may have made it; or their obligation to report the unreported used airplanes, on the ground that they were not required to report or pay plaintiff therefor, because made by nonsubscribers. The findings establish this and, further, that after the first general report of the War Department on September 19, 1923, of the then unreported airplanes made by nonsubscribers, the Government from time to time made further reports to plaintiff of airplanes used by it, made by manufacturers other than subscribers. There was no independent action by or with the patentees, Wright or Curtiss, or with any other subscribing patentee. The only alternative to a contract by implication with plaintiff would be a tortious infringement by the Government, but the findings of fact negative such possibility. The implied contract upon which this claim is based was wholly performed. *St. Louis Hay & Grain Co.* v. *United States*, 191 U. S. 159; *Willard, Sutherland & Co.* v. *United States*, 262 U. S. 489.

The last question is whether the royalties due on airplanes manufactured by or for the Government and used by it during the period prior to July 25, 1922, are barred by the statute of limitation. Counsel for the defendant contends that, if there was an implied contract obligating the Government to pay royalties, plaintiff's cause of action for such royalties accrued at the time the airplanes were made or purchased by the Government. On the other hand, the plaintiff contends that the statute of limitation did not begin to run in this case, except as to one airplane reported by the Government in October 1920 until sometime after September 19, 1923, in the case of royalties on airplanes used by the War Department and not until sometime after June 22, 1927, in the case of royalties on airplanes used by the Navy Department.

The statute of limitation, section 156 of the Judicial Code, provides that suits in this court shall be commenced within six years after the cause of action first accrues. The date on which a cause of action first accrues is not necessarily the same in every case. Ordinarily a cause of action accrues when the service is rendered or the articles are furnished and the obligation to pay therefor arises, but this is not a hard and fast rule and whether the cause of action in a particular case accrues at such time depends upon the agreement or arrangement between the parties. Their express agreement as to this in the case of a formal contract or their understanding and course of conduct under an implied contract may fix a different time for the accrual of the claim for the purpose of computing the statute of limitation. We think the language of section 156, *supra*, was used with this in view, for if it had been intended definitely to fix the time when the claim should accrue in every case, it would simply have provided that every suit should be commenced within six years after the service was rendered or the articles called for were furnished. In the case of a breach of a contract a cause of action accrues when

Digitized by Google

the breach occurs. In this case there was no breach and royalties claimed did not accrue and become payable under the agreement until reports had been made and invoices or bills rendered. There had been no refusal of the Government to pay prior to September 19, 1923. It is true that the royalties had not been paid, due to failure of the Government to report the airplanes made by it or acquired from nonsubscribers or stockholders of plaintiff, but the agreement and the practice under it fixed the time when the royalties should become due and whe then plaintiff could demand payment. Compare *Amy* v. *Dubuque*, 98 U. S. 470; *United States* v. *Taylor*, 104 U. S. 216, 222; *United States ex rel. Louisville Cement Co.* v. *Interstate Commerce Commission*, 246 U. S. 638, 644; *W. A. & G. Steam Packet Co.* v. *Sickles*, 10 How. 419, 441; *Mundt* v. *Sheboygan & F. Dul. R. Co.*, 31 Wis. 451; *Barnes* v. *City of Brooklyn*, 22 N. Y., App. Div. 520. A claim may be said to accrue at one time for accounting purposes and at another, or later, time for the purpose of determining the statute of limitation within which suit may be brought. *Smith Courtney Co.* v. *United States*, 46 C. Cls. 262; *Maneely, Admr., et al.*, v. *United States*, 68 C. Cls. 623, 631, 632; *Penn Bridge Co.* v. *United States*, 71 C. Cls. 273.

In *Bull, Executor*, v. *Commissioner of Internal Revenue*, 7 B. T. A. 993, 995, the United States Board of Tax Appeals said:

"A study of the multitude of decisions, treaties, and variously expressed views, and our experience in the consideration of many cases presented to this board in which the word is either carefully or loosely used, disclose that the word 'accrue' is fraught with confusion because it expressed no certain concept. In law, it has long been used in respect of rights and obligations which are said to accrue when they become enforceable. In accounting, it may be variously used with equal authority to refer to a right or liability fixed in amount, or certain in all respects except amount, or to an apportionment of a right or liability which runs hand in hand with a matter upon which it depends, or to a reserve in anticipation of an event, sometimes certain and sometimes uncertain. Other connotations will occur, but these are sufficient to indicate that there is little in common among the significations recognized. One thing is clear—that the word implies the exclusion of 'received' or 'paid', or a right or liability discharged. But short of this, what is meant when an item is accounted for as accrued depends upon the system of accounting in which it appears and the breadth of the accountant's concept.

"When, therefore, it becames necessary to interpret the word as it appears in the revenue act, the interpretation cannot be fixed by definition, for this would imply a precision of congressional intention at variance with the more fundamental purpose tax that which a proper system of accounting should clearly reflect as net income."

The question of when an item accrues for the purpose of the income tax was the question before the courts in *United States* v. *Anderson*, 269 U. S. 422; *American National Co., Receiver*, v. *United States*, 274 U. S. 99; *Lucas* v. *American Code Co., Inc.*, 280 U. S. 445; *Lucas* v. *North Texas Lumber Co.*, 281 U. S. 11; *Uncasville Mfg. Co.* v. *Commissioner of Internal Revenue*, 55 Fed. (2d) 983; and *Acme Coal Co.* v. *United States*, 70 C. Cls. 696, 44 Fed. (2d) 95; and, for this reason, those cases are distinguishable. In the present case, for the purpose of accounting in determining whether the maximum distributable to the Wright and the Curtiss companies had been reached, royalties would only be payable on airplanes made by or delivered to the Government to the dates such airplanes were made or delivered.

This suit was begun July 25, 1928, and the six-year period of the statute would therefore extend back to July 25, 1922. Of the 33,600 royalties herein sued for, $199,200 thereof relates to royalties on airplanes indisputably made or purchased by the Government and placed in use after July 25, 1922. Only $164,400 of the total amount sued for can be affected by the statute of limitation. The right to recover this amount depends upon the terms of the implied contract affecting the terms and conditions for the payment of royalties on airplanes manufactured by the Government and those acquired by it from persons other than subscribers to the original cross-license agreement. All persons making airplanes for the Government, and who were subscribers to the cross-license agreement, regularly and properly reported to plaintiff all airplanes made by them. The Government did not make reports to the plaintiff of all the airplanes manufactured by it and did not, until September 1923 and June 1927 report to the plaintiff any of the airplanes acquired and put

Digitized by Google

in use by it from manufacturers other than subscribers to the cross-license agreement. Some of the airplanes upon which royalties are claimed in this suit were placed in use by the Government concurrently with airplanes made by the Government or by manufacturers who were subscribers to the cross-license agreement, as to which airplanes the terms of payment were declared in writing. The practice as to time and manner of payment of royalties on all airplanes was uniform throughout all the years from 1917 to 1928. It conformed to the provisions of the original agreement which were applicable also to the supplemental and the Government's special license agreement. Similar provisions were placed in the new contract, effective December 31, 1928, which brought to an end the period of the implied contracts involved in this proceeding. Inasmuch as those provisions corresponded to the practice they may be looked to as evidence as to what the practice was. Summarizing, the requirement were that (1) all airplanes manufactured or otherwise acquired by the War and Navy Departments in any quarter of each calendar year were to be reported with specific data to the plaintiff in writing on the 10th day of the month next following that quarter; (2) forthwith, on receipt of each report, plaintiff was to render invoices to said Departments in accordance with certain reports; and (3) within a reasonable time (or 15 days) after the receipt of such invoices the Government was to authorize and instruct its disbursing officers to make payments accordingly. The foregoing procedure leading up to payment was actually followed in operating practice with respect to all airplanes reported and paid for. Under such practice the Government, before paying the royalties, always insisted upon having invoices or bills from plaintiff covering airplanes on which the latter was claiming a royalty. The Government would not, and did not pay any such royalties until bills were rendered therefor. During the period of the war plaintiff rendered no invoices or bills to the Government except for airplanes previously reported to it. It was recognized by all parties to the arrangement that plaintiff could not prepare and render invoices or bills without the information contained in those reports.

Another circumstance which throws light upon the question when the cause of action for the unpaid royalties accrued is the provision of a draft of a formal contract in August 1918 prepared by the Bureau of Aircraft Production for the War and Navy Departments for execution by the plaintiff and the Government, but which was not executed before of the ending of the war, November 11, 1918. Paragraph 7 thereof provides that "On the tenth day of January, April, July, and October of each year, the Government, through the War and Navy Departments, shall report to the association the number of airplanes built and accepted by the War and Navy Departments, during the three (3) months preceding, and, based upon said reports, payments of said royalties shall be made on the 25th of each such month. The first report shall be rendered on October 10, 1918, and shall cover the period from July 1, 1917, to October 1, 1918."

Under the foregoing summary of the operating practices, we think payments of royalties were to be based upon and to be made fifteen days after the furnishing of each report for airplanes therein reported. In view of these terms, by implication, the case stands as if the parties by formal contract had agreed to a rightful use of the patented devices to pay reasonable sums as royalties for such use; and that payments should become due on demand accompanied by bills based on and made from information contained in reports to be made quarterly for all airplanes manufactured by or sold and delivered to the Government in each quarter preceding any given report.

In *Butler* v. *United States*, 23 C. Cls. 335, 339, which was a suit upon an implied contract, the court pointed out that "There was no express contract postponing the payment of the royalty or making it contingent upon a demand or other event; * * *." In *Smith Courtney Co.* v. *United States*, *supra*, the plaintiff contracted to sell metal for which the United States agreed to pay after presentation of bills, with proper evidence of delivery, inspection, and acceptance, and within ten days after warrant had been passed by the Secretary of the Treasury. The petition was filed July 1, 1909, so that the six-year period began to run July 1, 1903. In May 1901 it delivered the metal to the proper authorities and on May 23, 1903, the Government inspected and accepted it. June 6, 1903, bills with proper evidence were presented and accepted. But they were not passed upon by the Secretary of the Treasury until

Digitized by Google

May 23, 1904. It was alleged that a reasonable time to pass upon the bills was within thirty days from their presentation. This court held that the right of action did not arise until a reasonable time had elapsed, ten days from such presentation to the Treasury; and that since the allegation that thirty days was a reasonable time was admitted by the demurrer, the right of action first accrued forty days after June 6, or on July 16, 1903, which was fifteen days within the statutory period. In overruling the demurrer and holding that the statute of limitation was not a bar, the court stated that "It has been determined by the Supreme Court and this court, and is in fact elementary, that a right of action accrues and the statute of limitations begins to run when, and only when, the period of credit has expired; or, in other words, when an account is due and payable, or when there is a breach of the contract." As the parties may specify such terms as price or time of payment by express contract, equally may they do so by implication of practice. In *Penn Bridge Co.* v. *United States, supra,* the plaintiff had contracted to furnish and erect machinery in the Government navy yards. The contract provided that if the wages of labor should be increased above the rate prevailing when the contract was executed, the plaintiff would receive certain additional compensation therefor. The contract, however, provided "That any increase over the wage rates prevailing at the date of the contract before being granted by the contractor shall be notified to and approved in writing by the Bureau of Yards and Docks. * * * Determination of such claims shall be deferred until the completion of the contract."

The court held that the plaintiff's right to recover additional compensation did not accrue when the machinery was delivered, but only after determination by the Bureau of Yards and Docks of the amount of increase in the prevailing wage rate, and the approval by that Bureau. To hold that a right to sue for the royalties involved in this case arose the moment the airplanes were placed in use by the Government would, we think, be making an implied contract at variance with the practice, acts, and operations of the parties. Such an arrangement, we think, was not contemplated by the parties. In the circumstances of this case, we think the statute of limitation did not begin to run with reference to the royalties herein sued for earlier than September 19, 1923, which was within six years prior to the filing of the petition on July 25, 1928.

There is included in plaintiff's claim a royalty of $100 upon an airplane reported to plaintiff by the Government on October 6, 1920, for which royalty the plaintiff prepared an invoice and rendered a bill to the Government in 1921. Recovery of this royalty is clearly barred.

Judgment will be entered in favor of the plaintiff for $363,500. It is so ordered.

WILLIAMS, *Judge;* and GREEN, *Judge,* concur.

WHALEY, *Judge,* concurs in the conclusion.

BOOTH, *Chief Justice,* took no part in the decision of this case on account of illness.

A true copy.
Teste:

Chief Clerk, Court of Claims of the United States.

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, May 12, 1927.

A-11220.

The Manufacturers' Aircraft Association, Inc., by its letter dated May 20, 1924, filed claims in the total sum of $141,800, which sum is asserted to represent accrued obligations on the part of the Government to pay royalties for the use by the War Department of a large number of United States aircraft patents, owned by certain associated patentee stockholders in that corporation, at the rates of royalty stipulated in a cross-license agreement entered into by the patentees, dated July 24, 1917, and as temporarily modified for the period of the war. The sum thus claimed arises from royalty assessed upon air-

Digitized by Google

craft alleged to have been furnished the War Department by the following manufacturers, understood not to be identified with the association:

1923, Wittemann Aircraft Corporation, 1 Barling bomber	$200
C. P., 1917, Canadian Airplane Co., 380 planes at $200	76,000
C. P., 1918, Canadian Airplane Co., 300 planes at $100	30,000
C. P., 1918, Fowler-Howell & Lesser Co., 125 planes at $100	12,500
C. P., 1918, Liberty Iron Works, 200 planes at $100	20,000
F. P., 1918, A. S. Heinrich, 4 planes at $100	400
F. P., 1917, A. S. Heinrich, 2 planes at $200	400
F. P., 1918, Ordnance Engineering Co., 6 planes at $100	600
F. P., 1917, and 1 in 1918, 2 planes at $200	400
F. P., 1917, Equipment Holding Co., 2 planes at $200	400
F. P., 1917, O. D. Blakely, 1 plane at $200	200
F. P., 1917, Pigeon-Fraser Co., 2 planes at $200	400
F. P., 1918, Schaefer & Sons, 1 plane at $200	200
1917, also there is claimed, 1 plane at $100	100
	141,800

The claim is based upon a cross-license agreement, dated July 24, 1917, between the principal owners of aircraft patents, which was the basis of an agreement with the Secretary of the Navy, by letter of March 28, 1918, and the Secretary of War by letter of April 5, 1918.

The cross-license agreement recites that it is made between the Manufacturers' Aircraft Association, Inc., a New York corporation, designated as the company, party of the first part, and each person, firm, or corporation, designated as subscriber, as shall become stockholders of the said company, in the manner and under the conditions provided in the bylaws thereof—which for the purpose of the agreement are made a part thereof—and become parties to the agreement, parties of the second part.

It is set forth as the purpose of the association that:

"Whereas the parties hereto are interested in the manufacture, sale, and use of airplanes, as hereinafter defined, and desire to promote and develop the industry in which they are engaged, and to encourage and advance the art applicable thereto; and

"Whereas the said development and advancement in the past have not been capable of as complete accomplishment as is desirable, because of the existence of certain United States patents claimed to be basic in their nature, upon which suits have been brought, or threatened, for alleged infringement and for the collection of royalties and damages in connection therewith; and

"Whereas it is desired to prevent and avoid such litigations in the future and to give all of the subscribers the right to manufacture, sell, and use airplanes embodying the inventions of each of the subscribers and to that end it is desired that licenses be granted as herein expressed:

"Now, this agreement witnesseth:

"That for and in consideration of the premises, the covenants and conditions herein contained, and of other good and valuable considerations moving between the company and each of the subscribers hereto and between the subscribers themselves, it is covenanted and agreed as follows:

* * * * * * *

"II. Licenses and powers granted.

"The subscribers grant, agree to grant, and cause to be granted to each other linceses, to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them or any of them, or by any firm, corporation, or association owned or controlled by them, or under which they, or any of them, or any such firm, corporation, or association, have or shall have the right to grant licenses—in and throughout the United States, its Territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall said rights or the licenses, herein provided for, apply to or include the use of said patents in their application to other than airplaines, and except further that no licenses are hereby granted under the Dunne Patents, no. 975403, issued November 15, 1910, and no. 1003721, issued September 19, 1911, rights under which are held by the Burgess Co.

Digitized by Google

"All licenses provided for herein shall run to the full end of the term of the Letters Patent under which the license is or is to be granted and shall be personal, indivisible, nonassignable, and irrevocable, except for the causes and in the manner hereinafter stated.

"The subscribers hereby designate, constitute, and appoint the company (and the company hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact for them and in their respective names, to make and execute licenses in writing in the form hereto annexed, and to deliver the same to those of the subscribers who, at the time, are stockholders of the company not in default hereunder, and who shall have executed an agreement in writing of like tenor to this; and to enforce said licenses and any and all other obligations (including the obligation to make payments), of the subscribers under this agreement; and the subscribers hereby give and grant unto said company, as full, complete, and ample power and authority in the premises as the subscribers themselves now have and possess.

"All licenses provided for herein, when made, executed, and delivered in accordance with the provisions hereof, shall have the same force and effect as if they had been executed and delivered by the subscribers themselves."

There is included as addendum to the copy of agreement a form of license for use by the licensor to grant a license to the subscribers to make, use, and sell airplanes under all airplane patents of the United States then or thereafter owned or controlled by the licensor, or by any firm, corporation, or association owned or controlled by it, which license is made subject to all the terms, conditions, covenants, and agreements contained in the cross-license agreement, the same being in form for signature of the licensor by the Manufacturers Aircraft Association, as agent and attorney in fact.

There were incorporated in the agreement mutual covenants of further assurance, and as to other licenses, after acquired patents, and special models, and condition as to the rendering of periodical reports upon the number of airplanes, engines, or other airplane devices sold and delivered.

Certain payments were stipulated to be made by the subscribers by paragraph VIII, as follows:

"VIII. Payments to the company.

"Each subscriber agrees to pay into the treasury of the company on the 10th days of January, April, July, and October in each year the following sums of money, to wit:

"(a) On each airplane, with or without engine required to be reported as provided in subdivision (c) of paragraph VII hereof, the sum of $200 until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane & Motor Corporation shall have been paid the aggregate sums provided for in subdivisions (a) and (b) of paragraph IX hereof."

Further sums were assessed by this paragraph at proportionate rates for specific patents, specifications of drawings of special models, etc., as specified in paragraph VII, it being stipulated, however, that—

"Moneys paid into the treasury of the company pursuant to any provisions hereof shall not be or constitute or be deemed to be or constitute the assets, property, or profits of said company, but shall be received and disbursed by it as the agent and attorney in fact of the subscribers in the manner and for the purposes herein mentioned."

By paragraph IX it was provided:

"IX. Payments by the company.

"Out of the moneys paid into the treasury of the company pursuant to the provisions hereof, the following payments shall be made by the company on the 20th days of January, April, July, and October in each year, to wit:

"(*a*) To the Wright-Martin Aircraft Corporation one-hundred and thirty-five dollars ($135), on each airplane with or without engine, with reference to which payments shall have been made in accordance with subdivisions (*a*) and (*e*) of paragraph VIII hereof, during the preceding 3 calendar months, until United States Patent No. 821393, issued May 22, 1906, shall have expired, or until the aggregate sum of two million ($2,000,000) dollars shall have been paid to the said Wright-Martin Aircraft Corporation when all payments to it hereunder shall cease, except as hereinafter provided.

"(*b*) To the Curtiss Aeroplane & Motor Corporation, forty dollars ($40), on each airplane, with or without engine with reference to which payments

Digitized by Google

shall have been made in accordance with subdivisions (*a*) and (*e*) of paragraph VIII hereof, during the preceding 3 calendar months until such time as the Wright-Martin Aircraft Corporation shall have been paid in full as provided for in subdivision (*a*) of this paragraph, after which there shall be paid to the Curtiss Aeroplane & Motor Corporation at the times herein mentioned the sum of one hundred and seventy-five dollars ($175) on each of said airplanes until the aggregate sum of two million ($2,000,000) dollars shall have been paid to it or until United States Patent No. 1203550 issued October 31, 1916, shall have expired, when all payments to it hereunder shall cease, except as hereinafter provided."

Subdivisions (*c*), (*d*) and (*e*) provide for pro-rata payments to the subscribers out of the balance of the sums so paid in for the use of after acquired patents, drawings and specifications of special models, and for an amount sufficient to cover the operating expenses of the company.

The legality of the incorporation of the Manufacturers' Aircraft Association and of the cross-license agreements and their recognition by the United States was found without objection by the Attorney General in an opinion of October 6, 1917 (31 Op. Atty. Gen. 166).

It appears that the formation of this association was with the knowledge and approval of the War and Navy Departments, as being a necessary medium for the expeditious supplying of required war planes. The articles of agreement quoted herein disclose this association to have been formed primarily with the avowed purpose of permitting any and all manufacturers of aircraft who were members of the association to carry out their undertakings without friction through threatened prosecution for patent infringements, though incidental thereto the United States benefited by early and increased production. The amount thus fixed in the nature of royalty to be paid by the subscribers of the association for the right to operate under the patents thus pooled, would, under the circumstances involved, ultimately be paid by the Government as an item of cost, because of being practically the only purchaser. There is in this arrangement, however, no condition upon which to premise a claim against the United States by the Manufacturers' Aircraft Association for any payments to it for its own uses.

The Secretary of the Navy apparently later arrived at the conclusion that the royalty thus fixed would result in the United States ultimately paying a sum considered excessive and addressed a letter dated March 8, 1918, to S. S. Bardley, general manager of the Manufacturers' Aircraft Association, as follows:

"Referring to our recent conversation and to your letter of March 1, 1918, in reference to the Manufacturers' Aircraft Association and the royalties under the cross-license agreement entered into between manufacturers of aircraft and your association, I wish to confirm what I have stated to you in conversation. As you are aware, on March 2, 1917, Congress appropriated $1,000,000—

"'* * * to enable the Secretary of War and the Secretary of the Navy to secure by purchase, condemnation, donation, or otherwise such basic patent or patents as they may consider necessary to the manufacture and development of aircraft in the United States for governmental and civil purposes.'

"I should much prefer to handle the patent situation by purchase under the above law within the limit of the appropriation made, but have not found the owners of the Wright patents willing to agree to a figure which would enable this to be done. Apparently the only action practicable under the act of March 2, 1917, would be to proceed to condemn the necessary patents. This I am loath to do under present conditions if some other reasonable solution can be had. It was contemplated that under the cross-license agreement between the manufacturers of aircraft and your association royalties of $200 per plane would be paid over a term of years, with a possible maximum limit of $2,000,000 to each of two companies. It now appears, however, that owing to the great and growing requirements of the Government for aeroplanes, under the royalty of $200 per plane the limit of $4,000,000 would be paid by the Government alone during the next few months. I consider this excessive and inadmissible.

"The maximum payments which would, in my opinion, be at all acceptable under the cross-license agreement would be as follows:

"(*a*) On all planes shipped to the United States Government after December 31, 1917, the royalty to be reduced to $100 per plane.

Digitized by Google

"(b) When the Wright-Martin and the Curtiss Cos. have together received royalties for machines bought by the Government not to exceed the aggregate amount of $2,000,000, no further royalties to be paid for the use of the patents controlled by the Manufacturers' Aircraft Association by the United States Government during the period of the present war.

"If the cross-license agreement is modified as above, I will agree with the Secretary of War that all makers of aeroplanes for the War and Navy Departments on the cost-plus basis will be reimbursed for royalties paid to your association as above.

"In view of the fact that early action by the Departments is required in connection with contract provisions referring to your association, it is essential that modifications in the agreement necessary for the Navy Department to approve payments of royalties, if made at all, should be made at once."

Subsequently, and presumably in accordance with the views thus expressed in the quoted letter, a supplemental cross-license agreement was entered into between the Manufacturers' Aircraft Association and the subscribers, whereby the payments stipulated for in the original cross-license agreement were modified to provide for payments as follows:

"Now, therefore, this agreement witnesseth:

"That for and in consideration of the premises, covenants, and conditions herein contained and other good and valuable considerations moving between the company and each of the subscribers hereto, and between the subscribers themselves:

"It is covenanted and agreed as follows:

"First. That on the 10th days of January, April, July, and October, in each year, each subscriber shall report to the company the number of airplanes (with or without engines), sold and delivered by it, during the 3 preceding calendar months, to the United States Government; (1) under flat-price contracts entered into prior to April 1, 1918; (2) under flat-price contracts entered into after March 31, 1918; (3) under cost-plus contracts on which deliveries were made prior to January 1, 1918, unless the same have been heretofore reported; (4) under cost-plus contracts on which deliveries have been or shall be made after December 31, 1917.

"Second. On the 10th days of January, April, July, and October, in each year, each subscribed shall pay into the treasury of the company on each airplane (with or without engines) delivered to the United States Government by it during the 3 preceding calendar months, the following sums of money, to wit: (1) two hundred ($200) dollars on each airplane which has been or shall be delivered under flat-price contracts entered into prior to April 1st, 1918; (2) one hundred ($100) dollars on each airplane which shall be delivered under flat-price contracts entered into after March 31, 1918; (3) two hundred ($200) dollars on each airplane delivered prior to January 1, 1918, under cost-plus contracts; and (4) one hundred ($100) dollars on each airplane which has been or shall be delivered after December 31, 1917, under cost-plus contracts. Said payments to be made until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation shall have been paid the aggregate sum of two million ($2,000,000) dollars as provided for in paragraph third hereof.

"Third. Out of the moneys paid into the company pursuant to the provisions of paragraph second hereof, the following payments shall be made by the company, on the 20th days of January, April, July, and October, in each year, to wit: To the Wright-Martin Aircraft Corporation sixty-seven and one-half percent (67½%), of the amount received on each airplane (with or without engines), and to the Curtiss Aeroplane and Motor Corporation twenty percent (20%) of the amount received on each airplane (with or without engines). Said payment shall be made until the sums paid to the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation under and pursuant to the terms of this supplemental agreement and the original agreement of July 24th, 1917, and from any other source paying royalties to the Manufacturers' Aircraft Association, shall amount in the aggregate to two million ($2,000,000) dollars, when and after which time the said subscribers shall not be obliged to pay any royalties for the use of the patents now owned or controlled by the subscribers or the company in any

Digitized by Google

airplane sold and delivered by them to the United States Government during the period of the present war with the Imperial German Government.

"Fourth. Except as herein modified the original agreement of July 24, 1917, shall be and remain in full force and effect between the parties thereto and all other persons, firms, or corporations who may become subscribers thereto, it being understood, however, that such sums as are paid to the Wright-Martin Aircraft Corporation and Curtiss Aeroplane and Motor Corporation pursuant to the provisions of this supplemental agreement shall be credited upon and shall constitute a part of the moneys which they are entitled to receive under and pursuant to the provisions of paragraph IX of said original agreement.

"Fifth. Nothing herein contained shall be taken, considered, or construed as fixing the reasonable value of the royalties to be paid for the use of the patents now owned or controlled by the subscribers. The price herein agreed upon for royalties upon airplanes furnished during the present emergency to the United States Government is so fixed for the sole purpose of enabling the Government to acquire airplanes manufactured under said patents upon a preferential basis during the period of the present war."

Following the entering into this supplemental agreement the Secretary of the Navy, under date of March 28, 1918, addressed Mr. Bradley, of the Manufacturers' Aircraft Association, as follows:

"I have seen the proposed supplementary agreement modifying the terms of the original cross-license agreement, between the manufacturers and the Manufacturers Aircraft Association, Inc., granting a preferential royalty to the Government and limiting the maximum amount of royalty to be paid to the owners of the patents during the period of the war to $2,000,000.

"This agreement, as modified, meets the conditions laid down by me and should be accepted promptly by all manufacturers of aircraft under Government contracts, and by the owners of the patents.

"In consideration of the reduced royalties therein provided for on the patents now owned or controlled by the association or its subscribers for use on all airplanes manufactured and delivered to the United States Government during the period of the war, I will agree—

"1. That the contracting and disbursing officers of the Navy Department shall allow and will be directed to allow as an element of cost in all cost-plus contracts, the royalties paid under the cross-license agreement and the supplementary agreement above referred to, to the amount and in the manner provided for in said agreements.

"2. That the Navy Department will pay to the Manufacturers Aircraft Association, Inc., a royalty of $100 per plane on all aeroplanes manufactured by the Navy Department. It being understood that the payments so made shall be included in the $2,000,000, total allowed to the owners of the patents during the period of the war and with the further understanding that a detailed agreement will be made, setting forth that such payments shall be complete and full compensation for the use of all the patents now controlled by the Manufacturers Aircraft Association, Inc., for the aeroplanes manufactured by the Navy Department during the period of the war. Said payment of $100 per plane to cease when the sum of $2,000,000 has been realized by the owners of the patents.

"I have conferred with the Acting Secretary of War about this matter, and he authorized me to say that he concurs in the statements made above, with the understanding, of course, that the same agreement made to the Navy Department will operate with respect to the War Department. And if the War Department shall undertake the manufacture of its own planes, it will agree to pay the same royalty as the provision requires the Navy Department to pay."

The agreement as thus expressed by the Secretary of the Navy was approved by the Secretary of War in substantially the same phraseology under date of April 5, 1918.

The Revised Statutes, section 3744, provide:

"It shall be the duty of the Secretary of War, of the Secretary of the Navy, and of the Secretary of the Interior to cause and require every contract made by them severally on behalf of the Government, or by their officers under them appointed to make such contracts, to be reduced to writing, and signed by the contracting parties with their names at the end thereof; a copy of which

Digitized by Google

shall be filed by the officer making and signing the contract in the returns office of the Department of the Interior, as soon after the contract is made as possible, and within 30 days, together with all bids, offers, and proposals to him made by persons to obtain the same, and with a copy of any advertisements he may have published inviting bids, offers, or proposals for the same. All the copies and papers in relation to each contract shall be attached together by a ribbon and seal, and marked by numbers in regular order, according to the number of papers composing the whole return."

See also in this connection sections 3745, 3746, Revised Statutes.

The section above quoted has been held by the courts to be mandatory, and in effect prohibits and renders unlawful any other mode of making a contract with the United States by these Departments, *Clark* v. *United States*, 95 U. S. 539, and contracts not so made are rendered void as a special contract and cannot become the basis upon which to sue, to the extent not performed. *St. Louis Hay and Grain Co.* v. *United States*, 191 U. S. 159. *Erie Coal and Coke Corpn.* v. *United States*, 266 U. S. 518, decided by United States Supreme Court January 5, 1925.

The agreement may be summarized that the United States would allow as an element of cost in all cost-plus contracts for the construction of airplanes for the United States, the royalties payable under the cross-license agreement and the supplementary agreement, and similarly a royalty of $100 where airplanes were manufactured by the War and Navy Departments in the United States during the period of the war, the payments so made to be included in the $2,000,000 total allowed to the owners of the patents during the period of the war, and that a detailed agreement be made setting forth that such payments shall be complete and full compensation for the use of all the patents then controlled by the association, for the airplanes manufactured during the period of the war, it being expressly stipulated that said payment of $100 per plane should cease when the sum of $2,000,000 was realized by the owners of the patents.

The Manufacturers' Aircraft Association, in presenting its claim for $141,800 royalty due, states that the total amount of royalty paid (received), during the period of the war, amounted to $1,831,200, which was $168,800 less than the total of $2,000,000 agreed upon as the limit for that period. This sum of $1,831,200, however, only represents the amount paid by the Manufacturers' Aircraft Association to the Wright and Curtiss interests, two of the patentee associates, on the basis provided in the cross-license agreement, namely, 87½ percent of $100, and would make the actual payments $2,092,800, but the records show the actual amount paid to be $2,094,600, as follows, for the period of the war ending July 2, 1921:

	Planes	Royalty
Aeromarine Co	253	$45,600
Burgess Co	370	38,100
Boeing Airplane Co	92	14,900
Packard Co	33	3,300
Dayton Wright Co	3,533	356,300
Fisher Body Corporation	2,003	200,300
Curtiss Aeroplane & Motor Corporation	5,359	855,300
Curtiss Engine Corporation	272	41,500
Gallaudet Aircraft Co	65	6,500
L. W. F. Engineering Co	363	47,400
Glenn L. Martin Co	56	6,600
Standard Aircraft Corporation	227	22,700
Standard Aero Corporation	897	110,700
Sturtevant Aero Corporation	13	2,600
Springfield Aircraft Corporation	585	58,500
St. Louis Aircraft Co	450	90,000
Thomas Morse Co	640	116,300
Wright Martin Co. of Calif	49	9,800
Wright Martin Corporation	7	1,200
Wright Aeronautical Corporation	97	21,700
Elias & Bro., Inc	3	300
War Department	12	1,200
Navy Department	438	43,800
Total	15,818	2,094,600

Digitized by Google

The difference of $1,800, between $2,092,800 and $2,094,600, arises from a supplemental report of payments to the last quarter of 1919. Distribution of the foregoing sum is disclosed to have been made as follows:

	Planes	Royalty
Aeromarine Co.	243	$45,600
Burgess Co.	370	38,100
Boeing Airplane Co.	92	14,900
Packard Co.	33	3,300
Dayton Wright Co.	3,533	356,300
Fisher Body Corporation	2,003	200,300
Curtiss Aeroplane & Motor Corporation	5,359	855,300
Curtiss Engine Corporation	272	41,500
Galluedet Aircraft Co.	65	6,500
L. W. F. Engineering Co.	363	47,400
Glenn L. Martin Co.	56	6,600
Standard Aircraft Corporation	227	22,700
Standard Aero Corporation	897	110,700
Sturtevant Aero Corporation	13	2,600
Springfield Aircraft Corporation	585	58,500
St. Louis Aircraft Co.	450	90,000
Thomas Morse Co.	640	116,300
Wright Martin Co. of California	49	9,800
Wright Martin Corporation	7	1,200
Wright Aeronautical Corporation	97	21,700
Elias & Bro., Inc.	3	300
War Department	12	1,200
Navy Department	438	43,800
Total	15,818	2,094,600

To Wright-Martin interests	$1,413,855
To Curtiss interests	418,920
To Manufacturers' Aircraft Association	261,825
Total	2,094,600

There arises a question as to the reasons for the discrepancy between this amount of over 2 millions evidenced as paid, and the claim that the 2 millions, allowed to the owners of patents, has not been reached, a difference of $261,825. The cause of this great variation based upon the assertion of the claimant is evidently found in the sections of the supplemental cross-license agreement providing that out of the royalties paid to the Manufacturers' Aircraft Association by the associates 67½ percent shall be paid to the Wright-Martin interests and 20 percent to the Curtiss interests, until the sums paid those two interests shall amount in the aggregate to $2,000,000. This would interpret that the agreement of the United States was to pay royalties pursuant to the distribution provided for under the supplemental cross-license agreement until the Wright-Martin-Curtiss interests had received $2,000,000, and would make the royalty payable $112.50 per airplane instead of $100 per airplane. This appears to have been the procedure followed by the parties, but it does not clearly appear to have been the intent of the Secretary of the Navy as disclosed by his communications herein quoted. The Secretary of the Navy stipulated that the $2,000,000 total allowed to the owners of the patents during the period of the war shall be complete and full compensation for all the patents so controlled, and that payment of $100 per plane was to cease when the sum of $2,000,000 had been realized by the owners of the patents.

The fact that production of airplanes was, during the war, practically all for the United States, and that the onus of paying royalty was primarily upon the Government, argues an intention that royalty for use of their patents be restricted to a total payment of $2,000,000 for the patents thus controlled. It is clear at least that whatever the United States is to pay, is to be paid to the patentees as royalty, and if the payment of $100 per plane is to cease when the sum of $2,000,000 has been realized by the owners of the patents, upon what basis may a claim to further sums be based, and for what and to whom are such additional sums to be paid? The sum of $2,000,000 is no less realized in gross by providing for a distribution by percentages among the parties as set forth in the supplemental cross-license agreement. There is nothing to

Digitized by Google

disclose an intent that the $2,000,000 should be computed on a net basis by first deducting the 12½ percent the cross-license agreement entitled the Manufacturers' Aircraft Association to receive in the distribution of the sums received at $100 per airplane.

The agreement is between the parties thereto and the United States is not materialy concerned in the method of distributing the receipts from royalty among the associated patentees. The United States was mainly concerned in that no more than $100 per plane should be paid until the maximum of $2,000,000 was reached, and any intersese conditions respecting disposition of receipts cannot operate to increase the obligation of the Government.

The claim, so far as it involves the difference of 12½ percent, is based upon the assumption of a contract between the United States and the Manufacturers' Aircraft Association, by which that corporation asserts its right to payment of $100 per plane until the Wright-Martin and Curtiss interests alone shall have been paid the $2,000,000, equivalent of 87½ percent apportioned to them in the supplemental cross-license agreement, the Manufacturers' Aircraft Association retaining the difference for its corporate purposes. But the entire claim fails as an enforceable agreement with the Manufacturers' Aircraft Association through lack of such consideration moving from it as would establish privity of contract, and as a claim of the patentees based upon a quantum valebant, there is no consideration moving to the United States to support the difference of 12½ percent over $2,000,000 allowable as for patent rights.

The Secretaries of War and Navy had authority to enter into a valid agreement to pay royalty so limited to the specified amount of $2,000,000, as the necessary consideration for the use of all patents thus pooled, but when that total sum was paid as royalty, any further sum being without consideration constituted nothing more than a gratuity for which no public officer had authority to obligate the United States.

It may be added that a contract formally executed on the 11th day of March 1919 between the Wright-Martin Aircraft Corporation and the Curtiss Airplane & Motor Corporation, parties of the first part, and termed associates, the Manufacturers' Aircraft Association, Inc., as agent and attorney for the associates, and the United States, represented by the Secretary of the Navy, provided for the use of the airplane patents on aircraft to be constructed at any of the navy yards or naval factories during the period of the war; and, further, that the Department will pay to the Manufacturers' Aircraft Association and the Manufacturers' Aircraft Association will receive for and in behalf of the associates a royalty in the sum of $100 for and on account of each and every airplane manufactured or caused to be manufactured by the Department during the period of the war at any of its navy yards or naval factories and the associates agree that the aforesaid royalties, when so paid to and received by the Manufacturers' Aircraft Association, shall constitute and be accepted by them as compensation in full for and on account of the use in the construction of the aforesaid airplanes, etc.

This contract taken in connection with paragraph 2 of the letter dated March 28, 1918, from the Secretary of the Navy, addressed to the Manufacturers' Aircraft Association, supra, is evidentiary of the fact that the Secretary of the Navy understood that the royalty to be paid for the use of the patents during the war should be $100 per plane and no more.

It is disclosed by the evidence at hand that there has already been received as royalty paid during the period of the war $2,094,600, or $94,600 in excess of $2,000,000, properly creditable to the associated patentees in accordance with the proper interpretation of the terms of the agreement expressed by the Secretaries of War and Navy. The further amount, $141,800, now claimed must be and is disallowed. The apparent excess payment of $94,600 arises from the procedure of allowing 12½ percent to the Manufacturers' Aircraft Association before application of the payments to the $2,000,000 limitation. Such excess payment will not be further questioned at this time, but may be taken into consideration in the adjustment of claims for royalties upon patents used in aircraft construction subsequent to the war period and prior to September 30, 1925.

(Signed) J. R. McCarl,
Comptroller General of the United States.

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, April 28, 1928.

A-11220.

The Manufacturers' Aircraft Association, Inc., requested reconsideration of a decision by this office May 12, 1927, disallowing its claim for $141,800 as royalties payable by the United States for the use by or for the War Department in aircraft production of aircraft patents during the war period and prior to July 1, 1921, the claim being asserted as pursuant to a cross-license agreement of July 24, 1917, as subsequently modified.

It may be observed generally as to the claims asserted by the association that the cross-license agreement was, as stated, an arrangement between those who owned or controlled certain patents, the use of which patents was thought necessary in connection with production of aircraft for the prosecution of the war, whereby in the use of the patents involved, or any of them, in the manufacture of aircraft, those so associated operated as the Manufacturers' Aircraft Association, Inc. It was thereby made possible for manufacturers of aircraft to obtain license, through the association, to use any or all of such patents at a fixed price per plane manufactured. In the beginning this price was $200 per plane, and there was stipulated in the agreement the division to be made of all moneys received by the association, to wit: $135 per plane to the Wright-Martin Aircraft Corporation, until $2,000,000 shall have been paid to it; $40 per plane (and later $175) to the Curtiss Aeroplane & Motor Corporation, until $2,000,000 shall have been paid to it, and the balance to the subscribers after payment of expenses of the association, and payment for use of after acquired patents, drawings, and specifications of special makes.

The Government was engaged in a war and in need of aircraft. To obtain such needed aircraft it appeared necessary to make use of said patents owned by the Wright-Martin and the Curtiss interests. To enable the Secretary of War and the Secretary of the Navy to obtain patents needed in the manufacture of aircraft the Congress, by an enactment approved March 2, 1917, appropriated $1,000,000—

"* * * to enable the Secretary of War and the Secretary of the Navy to secure, by purchase, condemnation, donation, or otherwise, such basic patent or patents as they may consider necessary to the manufacture and development of aircraft in the United States for governmental and civil purposes."

Being unable to acquire the needed patents through purchase at satisfactory terms and within the limits of said appropriation, the Secretary of the Navy negotiated for their use in the construction of aircraft by and for the United States. Owing to the large number of planes needed by the United States he was unable to agree, however, that a charge of $200 per plane, as contemplated by the patent owners' agreement, aforesaid, was justified, and he so advised the general manager of the association by letter dated March 8, 1918, advising also that a royalty of $100 per plane on planes shipped to the United States after December 31, 1917, would be the maximum the Government should pay, and this only until the Wright-Martin and the Curtiss interests, together, had received royalties for machines bought by the Government not in excess of $2,000,000, when no further royalties would be paid by the United States for use of patents controlled by the association during the remainder of the war period.

The Secretary having thus stated the maximum the United States would do in the matter of payments for uses of the patents, the members of the association amended their cross-license agreement reducing the royalty charge for planes manufactured by or for the United States to $100 per plane, the provision for division of moneys received being, Wright-Martin 67½ percent and Curtiss 20 percent until the sums paid them, pursuant to the original and the amended cross-license agreement, and from any other source paying royalties to the association, should amount in the aggregate to $2,000,000.

For aircraft manufactured by and for the United States there has heretofore been paid for the use of the patents here involved a total of $2,094,600, or $94,600 more than the maximum amount fixed by the Secretary of the Navy in his letter of March 8, 1918. Of this total it appears the Wright-Martin interests have received $1,413,855, the Curtiss interests have received $418,920, and the association itself has retained the balance, $261,825. The present claim is asserted by the association, in the sum of $141,800, as royalties unpaid

Digitized by Google

on planes manufactured for the United States, and was disallowed by this office in substance because the royalties the Government might properly pay, under the facts as disclosed and without regard to any question of appropriation limitation, was $100 per plane until there had been paid a total of $2,000,000 and that there having been paid $2,094,600, there was an apparent overpayment of $94,600. It is asserted in favor of the claim, in substance, that what was intended in the arrangement made by the Secretary of the Navy with the association as to the Government's payments of royalty for the use of the patents, was, that not the entire $100 payable per plane manufactured by or for the United States was to be counted in making up the $2,000,000 stipulated as the maximum amount payable by the United States, but that only the portions, 67½ percent and 20 percent, totaling 87½ percent, receivable by the Wright-Martin and the Curtiss interests pursuant to the arrangement made by the patent owners for division of moneys received by the association. This phase of the matter has heretofore been carefully considered, and nothing has been advanced justifying a change in the adverse conclusion then reached. It is to be observed in such connection that the matter of the division and disposition of moneys received from the United States as royalties and from any other source paying royalties to the Manufacturers' Aircraft Association, was one for adjustment by the members of the association and was adjusted by them in their cross-license agreement, to which agreement the United States was not a party. It is to be observed, also, that in the negotiations and arrangements made by the Secretary of the Navy with the association, which arrangement was concurred in by the Secretary of War, the Secretary was much concerned as to the maximum amount that might be payable by the United States for the use of the patents, and as to this he made it quite clear that the limit would be $2,000,000. He at no time appears to have purposed that such sum should be exceeded, but notwithstanding this it appears there has already been collected by the association from the United States $94,600 in excess of such maximum of $2,000,000.

But there appears still another feature of the matter for consideration: Apparently the limits of the authority of the Secretary of the Navy in the matter were in the appropriation provision hereinbefore quoted, act of March 2, 1917, 39 Stat. 1169, to which the attention of the association was specifically called by the letter of the Secretary dated March 8, 1918. With an appropriation limitation of $1,000,000 for purchase, condemnation, etc., as stipulated in the law, there was lacking authority in obtaining a lesser right, that of mere use of the patents, to exceed the limitation fixed by law for purchase of the patents. Without at this time disturbing what was done then, it is sufficient to say that considering all of the material facts, including the appropriation limitation, there is no authority to allow any further payments upon claims under the cross-license agreement of July 24, 1917, or as modified, or otherwise for the use of the patents by or for the United States during the war period.

There was also requested review of settlement no. 137784 (1) of August 4, 1927, wherein was disallowed the claim of the association for royalties in the use of aircraft patents by the War and Navy Departments in aircraft production during the period July 1, 1921, to June 30, 1926, inclusive. The amount involved in this claim for the alleged use of the patents in question for the respective years mentioned, so far as can be ascertained from the presentation by claimant, is $55,000, being at the rate of $200 per plane on 275 airplanes. Insofar as the records of this office disclose, it has not been shown by any competent evidence that said patents were used on any airplanes manufactured by or for the War or Navy Departments during those years; or if so used, that payment therefor has not been heretofore made either directly or indirectly. No specific data has been furnished by claimant upon which the claim could be definitely examined into and checked. As stated by the claimant itself on various invoices, the charges are based upon unofficial information of procurement. The claim presents no valid basis upon which there could be made any allowance and a complete acquittance be thereby given the Government. There appears nothing tangible to show that the value of the patent use claimed was any greater subsequent to the war period than during the war period when the use had relation to the cross-license agreement of 1917, as modified, and to justify a higher rate than $100 for the period subsequent to the war. In this connection, attention is also invited to the provisions of the act of June 25, 1910 (36 Stat. 851), providing for recovery by suit in the Court of Claims for use of patents by the United States without license from the

Digitized by Google

owner. But if there should be any amount due in such connection, it would be for application as a credit on the overpayments heretofore obtained by the association as hereinbefore mentioned.

(Signed) J. R. McCARL,
Comptroller General of the United States.

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, March 2, 1935.

A-7155.

The Chairman, Select Committee of Inquiry Into Operations of the United States Air Service, House of Representatives:

SIR: In further compliance with the request of the committee, expressed in letter to this office dated December 24, 1924, for report upon some 20 questions propounded for consideration as embodied in the report of Alexander M. Fisher, dated December 7, 1924, pages 8 and 9, there have been taken up for investigation the following subjects upon which report is made of such information as has been obtainable to date. The facts and copies of papers reported and furnished herewith are largely subject to verification, the despatch with which the report is desired not permitting further delay in determining the accuracy thereof; and it should be understood that the conclusions reached are not to be taken as final as to any matter presented here for decision, and necessarily are based upon the limited study of the matters involved permitted by the time allowed for making this report.

For your convenience there are quoted below certain statutes bearing generally upon the acquisition of patents, patent rights or licenses, thereunder applicable at times before and after the execution of the cross-license agreement.

The act of March 3, 1915, 38 Stat. 930, provides:

"AERONAUTICS.—The sum of $1,000,000 is hereby reappropriated out of the unobligated balances of the appropriations 'Construction and repair of vessels and steam machinery' for the fiscal year ending June thirtieth, nineteen hundred and fourteen, and made available for aeronautics, to be expended under the direction of the Secretary of the Navy for procuring, producing, constructing, operating, preserving, storing, and handling aircraft and appurtenances, maintenance of aircraft stations and experimental work in development of aviation for naval purposes.

"An Advisory Committee for Aeronautics is hereby established, and the President is authorized to appoint not to exceed twelve members, to consist of two members from the War Department, from the office in charge of military aeronautics; two members from the Navy Department, from the office in charge of naval aeronautics; a representative each of the Smithsonian Institution, of the United States Weather Bureau, and of the United States Bureau of Standards; together with not more than five additional persons who shall be acquainted with the needs of aeronautical science, either civil or military, or skilled in aeronautical engineering or its allied sciences: *Provided*, That the members of the Advisory Committee for Aeronautics, as such, shall serve without compensation: *Provided further*, That it shall be the duty of the Advisory Committee for Aeronautics to supervise and direct the scientific study of the problems of flight, with a view to their practical solution, and to determine the problems which should be experimentally attacked, and to discuss their solution and their application to practical questions. In the event of a laboratory or laboratories, either in whole or in part, being placed under the direction of the committee, the committee may direct and conduct research and experiment in aeronautics in such laboratory or laboratories: *And provided further*, That rules and regulations for the conduct of the work of the committee shall be formulated by the committee and approved by the President."

The act of March 4, 1917, 39 Stat. 1169, provides:

"To enable the Secretary of War and the Secretary of the Navy to secure by purchase, condemnation, donation, or otherwise, such basic patent or patents as they may consider necessary to the manufacture and development of aircraft in the United States and its dependencies, for governmental and civil purposes, under such regulations as the Secretary of War and the Secretary of the Navy may prescribe, $1,000,000.

Digitized by Google

"*Provided*, That such arrangements may be made in relation to the purchase of any basic patent connected with the manufacture and development of aircraft in the United States as in the judgment of the Secretary of War and the Secretary of the Navy will be of the greatest advantage to the Government and to the development of the industry.

"*Provided further*, That in the event there shall be pending in court litigation involving the validity of said patent or patents, bond, with good and approved security in an amount sufficient to indemnify the United States, shall be required, payable to the United States, conditioned to repay to the United States the amount paid for said patent or patents in the event said patent or patents are finally adjudged invalid."

The act of October 1, 1917, 40 Stat. 296, which was "An Act to create the Aircraft Board and provide for its maintenance" provides:

"That for the purpose of expanding and coordinating the industrial activities relating to aircraft, or parts of aircraft, produced for any purpose in the United States, and to facilitate generally the development of air service, a board is hereby created, to be known as the Aircraft Board, hereinafter referred to as the board.

"SEC. 2. That the board shall number not more than nine in all, and shall include a civilian chairman, the Chief Signal Officer of the Army, and two other officers of the Army to be appointed by the Secretary of War; the Chief Constructor of the Navy, and two other officers of the Navy to be appointed by the Secretary of the Navy; and two additional civilian members. The chairman and civilian members shall be appointed by the President, by and with the advice and consent of the Senate.

* * * * * * *

"SEC. 4. That the board is hereby empowered, under the direction and control of and as authorized by the Secretary of War and the Secretary of the Navy, respectively, on behalf of the Departments of War and Navy, to supervise and direct, in accordance with the requirements prescribed or approved by the respective departments, the purchase, production, and manufacture of aircraft, engines, and all ordnance and instruments used in connection therewith, and accessories and materials therefor, including the purchase, lease, acquisition, or construction of plants for the manufacture of aircraft, engines, and accessories: *Provided*, That the board may make recommendations as to contracts and their distribution in connection with the foregoing, but every contract shall be made by the already constituted authorities of the respective departments."

The questions propounded will be reported upon in the order stated, as follows:

"1. What statutory authority has there been or is there for the cross-license agreement?"

I know of no specific statutory authority for the agreement between the subscribers and the Manufacturers Aircraft Association, Inc., executed under date of July 24, 1917, known as the cross-license agreement, so far as it comprises an *inter sese* matter of the parties.

"2. Has the United States been made a party directly or through transactions if not specifically included in the agreement?"

The cross-license agreement as disclosed by its terms is an *inter partes* arrangement of the principal patentees and manufacturers of airplanes and parts, in which the United States did not join. It appears, however, that it was contemplated that the United States should become a party upon a contractual basis and, accordingly, its connection with the association took the form of an agreement evidenced only by letters of the Secretary of the Navy and the Secretary of War, dated March 28, 1918, and April 5, 1918, respectively, approving and agreeing with reference to the terms of the cross-license agreement, copies herewith. This agreement purports to be accepted on behalf of the Manufacturers Aircraft Association by letters dated April 27, 1918, signed by Samuel S. Bradley, general manager, copies herewith. In addition thereto, a formal contract under seal no. 2635, dated March 11, 1919, was made and concluded by and between three of the parties to the cross-license agreement, as follows—quoting as far as pertinent:

"CONTRACT, of two parts, made and concluded this 11th day of March 1919, by and between the Wright-Martin Aircraft Corporation, a New York corporation, and the Curtiss Aeroplane & Motor Corporation, a New York corporation, parties of the first part (hereinafter called the associates), the Manufacturers Aircraft

Digitized by Google

Association, Inc., a New York corporation, as agent and attorney for the associates, party of the second part, and the United States, represented by the Secretary of the Navy, party of the third part (hereinafter called the Department).

"Whereas the associates own or control certain United States patents covering important inventions relating to aircraft; and

"Whereas the Department desires to manufacture, or has manufactured, at its navy yards and naval factories, airplanes in the construction of which certain of the aforesaid inventions may be or have been used:

"Now, therefore, it is hereby agreed by and between the parties hereto as follows:

"1. The Department shall have the right to use in the construction of airplanes at any of its navy yards or naval factories, during the period of the war, all or any of the inventions covered by any and all 'airplane' patents (not including engines and engine accessories) now owned by the associates jointly or severally, or under which they jointly or severally now have the right to grant a license, each of the associates hereby agreeing jointly with the other associate where their interests are joint and severally where their interests are several.

"2. The Department will pay to the Manufacturers Aircraft Association and the Manufacturers Aircraft Association will receive for and in behalf of the associates, a royalty in the sum of one hundred ($100) dollars for and on account of each and every airplane manufactured or caused to be manufactured by the Department (during the period of the war) at any of its navy yards or naval factories, and the associates agree that the aforesaid royalties when so paid to and received by the Manufacturers Aircraft Association shall constitute and be accepted by them as compensation in full for and on account of the use in the construction of the aforesaid airplanes of every airplane invention (not including inventions on engines and engine accessories) owned or controlled by them or either of them, but nothing herein contained shall be construed as a waiver of any rights as to royalties on airplanes manufactured by or for the Government after the period of war or on airplanes manufactured by aircraft manufacturers for the Government during the war period.

* * * * * * *

"Signed and sealed in the presence of—

"WRIGHT MARTIN AIRCRAFT CORP.,
"GEORGE H. HOUSTON, *President.*
"CURTISS AEROPLANE AND MOTOR CORPORATION,
"By W. B. STRATTON, *V. Pres.*
"MANUFACTURERS AIRCRAFT ASSOCIATION, INC.
"By A. H. FLINT, *President.*
"THE UNITED STATES,
"By F. D. ROOSEVELT,
"Acting Secretary of the Navy."

(See copy of contract attached.)

"3. Has the validity of the patents or rights covered by the cross-license agreement been determined and to what extent?"

The only record found in the digested cases of the Federal courts of any litigation of aircraft patents, covered by the cross-license agreement, involved the Curtiss and Wright patents upon questions of infringement only, as follows:

Curtiss Aeroplane and Motor Corporation et al. v. *Jarvis et al.* (278 Fed. 454), decision in favor of the Curtiss invention.

Wright Company v. *Herring-Curtiss Co.* (177 Fed. 257; 204 Fed. 597; affirmed in 211 Fed. 654), holding the Wright patent basically of such a comprehensive principle that other patents of the character must of necessity infringe.

There is found no specific case of an adjudication as to the validity of any of the patents, their validity being taken as prima facie, as evidenced by the letters patent.

"4. What specific patents and rights are included in the cross-license agreement?"

There is attached hereto list of all patents identified under membership designation, so far as disclosed upon inquiries made to date.

"5. Have any of these specific patents or rights failed in validity, and if so, does the consideration fail because of an indivisible payment?"

As stated under question no. 3, so far as can be ascertained from digest of court records, with one exception, none of the specific patents or rights subject to the cross-license agreement has failed in validity—that is, been declared

Digitized by Google

invalid by the courts. The exception involves the Curtiss rights litigated in *Wright Co.* v. *Herring-Curtiss Co.*, *supra*, wherein the Curtiss patent was adjudged an infringement of the Wright principles.

Under the terms of the cross-license agreement, making each patent available to all subscribers, who appear to own the most important aircraft patents, there seems little likelihood of an attack upon the validity of any patent subject to that agreement.

As to the general effect of the invalidity of the thing supporting the consideration, the opinion is expressed that the failure of any inconsiderable part would not effect a complete failure of consideration unless it involved such a defeasance as would amount substantially to the extinction of the subject matter of the agreement. Less than a considerable decimation would appear to give merely a right to some abatement of the consideration.

"6. Under what State was the Manufacturers Aircraft Association incorporated?"

The articles and certificate of incorporation (copy herewith) recite that the Manufacturers Aircraft Association, Inc., was incorporated in and is a corporation of the State of New York.

"7. If in New York State, is it a business corporation under the laws of that State?"

Chapter 28 of the Laws of New York, acts of 1909, "Cahill's Consolidated Laws of New York, 1923, Corporatio nManual 1925", under the title "General corporation laws", distinguishes certain organizations as follows:

"PAR. 2. *Classification of corporations.*—A corporation shall be either (1) a municipal corporation; (2) a stock corporation; or (3) a nonstock corporation.

"A stock corporation shall be either (1) a moneyed corporation; (2) a railroad or other transportation corporation; or (3) a business corporation.

"A nonstock corporation shall be either (1) a religious corporation; (2) a membership corporation; or (3) any corporation other than a stock corporation.

"PAR. 3. *Definitions.*—1. * * *

"2. A 'stock corporation' is a corporation having a capital stock divided into shares, and which is authorized by law to distribute to the holders thereof dividends or shares of the surplus profits of the corporation. A corporation is not a stock corporation because of having issued certificates called certificates of stock, but which are in fact merely certificates of membership; and which is not authorized by law to distribute to its members any dividends or shares of profits arising from the operations of the corporation.

"3. The term 'nonstock corporation' includes every corporation other than a stock corporation.

"4. A 'moneyed corporation' is a corporation formed under or subject to the banking or the insurance law.

* * * * * * *

"10. The term 'business of a corporation' when used with reference to a nonstock corporation includes the operations for the conduct of which it is incorporated.

"PAR. 6. Nor shall any corporation except a religious, charitable, or benevolent corporation or bar association, be authorized to do business in this State unless its name has such words or words, abbreviation, affix, or prefix, therein or thereto, as will clearly indicate that it is a corporation, as distinguished from a natural person, firm, or copartnership, or unless such corporation uses with its corporate name, in this State, such an affix or prefix.

"PAR. 10. Limitation of powers; provisions of certificate. (1) No corporation shall possess or exercise any corporate powers not given by law or not necessary to the exercise of the powers so given.

"2. The certificate of incorporation of any corporation may contain any provisions for the regulation of the business and the conduct of the affairs of the corporation, any limitation upon its powers, or upon the powers of its directors and stockholders, which does not exempt them from the performance of any obligation or the performance of any duty imposed by law."

The certificate of incorporation, by the assumption of the name 'Manufacturers Aircraft Association, Inc.", evidences the intention to establish a corporate entirety, and the preamble recites the desire to organize a stock corporation pursuant to the provisions of the "Business corporations law of the State of New York." The objects and purposes for which formed are stated in the copy of the articles of incorporation herewith.

This office would consider the organization as in form a business corporation under the laws of New York, if necessary, in matters before this

Digitized by Google

office, but the question involves a legal opinion not for rendering by this office generally.

"8. What is or has been (*a*) the relation of the Manufacturers Aircraft Association to the United States and the owners of patents or rights, or (*b*) with and between the United States and the owners of the several patents and rights cross licensed?"

The relation of the Manufacturers Aircraft Association to the owners of the association patents may best be described by transposing the relation of the terms and defining the adhering owners of the patents as corporators of the Manufacturers Aircraft Association, which thus represents their aggregate entity.

As disclosed by the articles of incorporation, the cross-license agreement, the dual agreement with the War and Navy Departments, and the formal contract with the Secretary of the Navy, the relations of the Manufacturers Aircraft Association purport a contractual relation with the United States as a corporation, but not in the manner prescribed by section 3744, Revised Statutes, except as established directly between the United States and the Wright and Curtiss interests under the contract of March 11, 1919. The cross-license agreement constitutes merely an agreement to effect mutual grants of license rights upon express conditions to subscribers only, for the accomplishment of which purposes limited powers of agency were conferred upon the corporation, and the specific powers thus granted are not interpreted as extending to an authority conferred upon the corporation to grant any license to the United States from the individual patentees thus associated.

"9. Are the relations of a fiduciary nature?"

Assuming this question as premised upon question no. 8, it may be said that the relations between the United States and the association are contractual only, while the relations between the corporation and the associate subscribers are fiduciary.

"10. Is the Manufacturers Aircraft Association not a de-facto trustee or agent for the owners of rights cross licensed under the cross-license agreement?"

The objects of the cross-license agreement concern the rights held by the associate subscribers, and the practical operation of the agreement is the conferring of a power upon the corporation to license the use of all patents thus pooled, and to collect, receive, and distribute the royalties stipulated. This power operates not merely to the execution of licenses from and to present associates but the power persists after any subscriber withdraws and may be subsequently exercised for the benefit of new members.

Considering that there is no assignment of patents, but only the grant of certain powers, the status of the Manufacturers Aircraft Association in relation to the owners of patent rights cross-licenses under the agreement is that of a fiduciary involving both the elements of trust and agency.

"11. Is it lawful for a business corporation organized under the laws of New York State or operating in the District of Columbia to act as a de-facto trustee or agent, or to act in a fiduciary relation?"

Unless the power is expressly or impliedly conferred by its charter, a corporation has no power to so act and its acts for such purposes would be ultra vires. Under a general power to form a corporation for the purpose of carrying on any lawful business or enterprise, a corporation may be formed for the purpose of carrying on the business of agency. Where a corporation has no power to engage in a particular business as principal, it has no right to do so as agent unless its principal chartered business is that of agency. The fact that in order to act as agent the corporation must act through the instrumentality of its own officers or agents does not involve a delegation of powers. In *Killingsworth* v. *Portland Trust Co.* (18 Or. 351, 23 P. 66) it was said:

"When a corporation is made the agent of another to sell and convey property, it acts through the same instrumentalities as when acting for itself, and the relations between it and its instrumentalities are as one being, or artificial person, in the performance of its engagement, and involves no delegation of powers. So that when a corporation is invested with a power of attorney to sell and convey real property, the person conveying the power knows that the corporation cannot act personally in the matter, but that in performing the engagement it will act through its agents, who for that purpose are its faculties, and whose acts in the discharge of that duty are the acts of the corporation, and as such must be considered to be included in the artificial person as instrumentalities authorized by him to do the act conferred upon it by his power of attorney."

Digitized by Google

Paragraph 10 of the laws of New York, supra, stipulated, first, that no corporation shall possess or exercise any corporate powers not given by law or not necessary to the exercise of the powers so given; and, second, that the certificate of incorporation of any corporation may contain any provisions for the regulation of the business and the conduct of the affairs of the corporation, any limitation upon the powers, or upon the powers of its directors and stockholders, which does not exempt them from the performance of any obligation or the performance of any duty imposed by law. Article 8 of the charter of the corporation includes authority—

"8. To act as agent or attorney in fact or representative of firms, corporations, or individuals, and as such to develop, extend, and promote the business interests thereof."

While there may be some doubt as to whether this provision may not be construed as contemplating the exercise of the agency or powers of attorney in fact only for corporate purpose, yet, if specifically so authorized to act in extraneous matters for private parties, it would seem that in general an act accomplished in the exercise of such powers would be valid to an extent not inconsistent with the proper function of a corporation of this particular character.

Answering the specific question, it appears that a business corporation organized under the laws of New York, and constituted as herein considered, could lawfully act as a de-facto trustee or agent in connection with the purposes of the cross-license agreement, to the extent so specifically empowered, and assume in connection with such duty an incidental fiduciary responsibility.

"12. Under what statutory authority may the United States make payments to an agent?"

I know of no general statutory authority for the United States to make payment to an agent. On the contrary, section 3477, Revised Statutes, prohibits such payments, it being stipulated as follows:

"All transfers and assignments made of any claim upon the United States, or of any part or share thereof, or interest therein, whether absolute or conditional, and whatever may be the consideration therefor, and all powers of attorney, orders, or other authorities for receiving payment of any such claim, or of any part or share thereof, shall be absolutely null and void, unless they are freely made and executed in the presence of at least two attesting witnesses, after the allowance of such a claim, the ascertainment of the amount due, and the issuing of a warrant for the payment thereof. Such transfers, assignments, and powers of attorney must recite the warrant for payment, and must be acknowledged by the person making them before an officer having authority to take acknowledgments of deeds, and shall be certified by the officer; and it must appear by the certificate that the officer, at the time of the acknowledgment, read and fully explained the transfer, assignment, or warrant of attorney to the person acknowledging the same."

This act aims at the payment of public money to any representative of the principal claimant, whether demanding as assignee or agent through power of attorney, and in the interpretation of this act the courts have held that it comprehends all demands against the United States for the payment of money.

The following sections of the Revised Statutes also having a bearing upon this question:

"SEC. 3620. It shall be the duty of every disbursing officer having any public money intrusted to him for disbursement to deposit the same with the Treasurer or some one of the Assistant Treasurers of the United States, and to draw for the same only as it may be required for payments to be made by him in pursuance of law [and to draw for the same only in favor of the persons to whom payment is made;] * * *."

"SEC. 3737. No contract, or order, or any interest therein, shall be transferred by the party to whom such contract or order is given to any other party, and any such transfer shall cause the annulment of the contract or order transferred, so far as the United States are concerned. All rights of action, however, for any breach of such contract by the contracting parties are reserved to the United States."

"13. Does it not require that powers of attorney for each transaction on behalf of a principal and each principal for an agent to receive vouchers in payment of debts of the United States?"

It is required and necessary for an agent to receive payment of amounts due from the United States that the power of attorney be executed by the principal in the manner prescribed by section 3477, supra.

Digitized by Google

"14. Have payments been made to the Manufacturers Aircraft Association contrary to the United States statutes?"

The payments appearing of record as made directly to the Manufacturers Aircraft Association aggregate $43,800, effected by disbursing officers' checks pursuant to the contract with the Navy Department dated March 11, 1919, supra. While the contract incorporates the power of attorney in terms for the Manufacturers Aircraft Association to receive payment on account of the principals and is not in accordance with section 3477, supra, credit for the payments so made were allowed in the disbursing officers' accounts under decisions of the courts to the effect that payments made to assignees or agents upon legally executed unrevoked assignments or powers of attorney accomplished a valid acquittance between the parties.

"15. Have vouchers been drawn in favor of principals, that is, the owners of the several patents and rights, or have they been drawn in favor of the Manufacturers Aircraft Association as de-facto agents of such principals?"

There have not been disclosed other vouchers executed in favor of the Manufacturers Aircraft Association (than as stated in reply to question no. 14) nor in favor of any of the associate owners of the several patents or rights, as principal, covering payment of royalties. Any other payments which may have been made in accordance with the cross-license agreement were probably absorbed as an element of compensation under direct contracts with the associate subscribers for aircraft at fixed prices, it having been ruled by the former Comptroller of the Treasury that in the absence of specific provisions the payment of royalty was not authorized to be reimbursed as an item of cost under cost-plus contracts.

"16. Under what statutory authority may the United States be made a trustee or guarantor as to the collection, disbursement, or payments of moneys or accounts, due to private individuals on account of such an agreement as the cross-license agreement of the Manufacturers Aircraft Association?"

I know of no statute empowering any Government officer or agent to obligate the United States to act or assume responsibility as a trustee or guarantor with reference to any matter arising under the cross-license agreement.

"17. Were preferential arrangements made in connection with the cross-license agreement or by the Manufacturers Aircraft Association concerning the Wright or Curtiss patents or any of them?"

The cross-license agreement appropriates a distinctly preferential proportion of 87½ per centum of any royalties received to the Wright and Curtiss patent interests, but there appears no agreement with the United States involving any such preferential arrangement under the cross-license agreement.

"18. As a matter of fact were the basic Wright and Curtiss patents used on any Government planes?"

The conditions involved in investigating and reporting upon a question of this nature are such that this office is not in a position to acquire the necessary data for reporting thereon at this time. As the question is raised in connection with the general investigation by the committee, it is assumed that it will be able to require this information from sources intimately acquainted with the facts. It may be said, however, in view of the courts' decisions cited above, and the general information otherwise available, it is safe to assume that the patented inventions were used in many Government planes.

"19. By making de-facto payments, incorporating references and obligations into its contracts, or otherwise, has the United States recognized the validity of the several patents and rights covered under the cross-license agreement?"

Where there is a contract to pay royalty for a license to use a patent there is imposed an obligation upon the licensee in the nature of an attornment to the patentee, which, precluding any collateral attack upon validity of the patent, would be tantamount to a recognition of the validity of the patent involved. *Kinsman* v. *Parkhurst*, 18 Howard 292; *Stott* v. *Rutherford*, 92 U. S. 109; *Dale Tile Mfg. Co.* v. *Hyatt*, 125 U. S. 52; *United States* v. *Harvey Steel Co.*, 196 U. S. 310.

To the extent and during the period only in which royalty was paid under the contract of March 11, 1919, it is my opinion that the United States must be considered as having recognized the validity of the Wright and Curtiss patents.

"20. Has the United States required contractors or made it a condition for contract that the license payments contemplated under the cross-license agreement shall be agreed to as an obligation on the contractor?"

Digitized by Google

Examination of contracts on file in this office discloses two conditions incorporated in contracts concerning the assumption of responsibility for the use of patent rights; providing substantially as follows:

"First. The contractor agrees to hold and save the United States and its representatives harmless against all liabilities and damages arising by reason of the infringement or alleged infringement of letters patent of the United States relating to the articles or work herein contracted for which are owned or controlled either by assignment, license or otherwise, by the contractor, its officers or employees, or persons in privity with the contractor, and by reason of the infringement or alleged infringement of letters patent of the United States which cover or relate to any materials, parts, or processes of manufacture not specifically prescribed by the United States for the performance of this contract."

"Second. (1) The contractor will hold and save the Government, its representatives, and all other persons acting for it as agent, contractor, or otherwise, harmless from all demands or liabilities for alleged use of any patented or unpatented invention, secret process, or suggestion in, or in the making or supplying of, the articles and/or spare parts herein contracted for, and for alleged use of any patented invention in using such articles and/or spare parts for the purpose for which they are made or supplied, where the demand or liability is based on patents that are owned or controlled by, or under which and to the extent that rights are enjoyed by, the contractor, its officers or employees, or persons in privity with the contractor, or is based on patents or rights that are enjoyed by members of the Manufacturers Aircraft Association, or on patents or rights that are cross-licensed under the so-called cross-license agreement and/or its supplements, under which the members of said association are entitled to the use of certain patents; and if and when required, will discharge and secure the Government from all demand or liability on account thereof by proper release from the patentees or claimants; but if such release is not practicable, then by bond or otherwise, and to the satisfaction of the Chief of Air Service.

"(2) The Government will, without limitation to the time of completion of this contract in other respects, hold and save the contractor harmless from all demands or liabilities for alleged use of any patented or unpatented invention, secret process, or suggestion in, or in making or supplying, the articles and/or spare parts herein contracted for, and for alleged use of any patented invention in using such articles and/or spare parts for the purpose for which they are made or supplied, where the demand or liability is based on patents that are not owned or controlled by or under which rights are not enjoyed by the contractor, its officers or employees, or persons in privity with the contractor, or is based on patents that are not enjoyed by members of the Manufacturers Aircraft Association, or patents or rights that are not cross-licensed under the said cross-license agreement or any supplements thereto, provided immediate notice of any such demand or liability and of any legal proceedings connected therewith is given in writing by the contractor to the contracting officer, and provided further, that the Government may intervene in any such demand or proceeding and in its discretion may defend the same or make settlement thereof, and the contractor shall furnish all information in its possession and all assistance of its employees requested by the Government."

Insofar as has been discovered from the contracts on file, this second form appears to have been a condition restricted to contracts with members subscribing to the cross-license agreement, and there have not been found any cases where it has been made a condition that payments contemplated under that agreement shall be an obligation of any contractor not so affiliated. Accordingly, the question is answered in the negative.

Respectfully,

(Signed) J. R. McCarl.
Comptroller General.

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, June 10, 1932.

A-41410.

There is before this office the claim of the Ford Motor Co. (Airplane Division) for the amount of $800 which was deducted on voucher no. 783, November 1931, accounts of Capt. L. H. Price, Army Finance Officer at Wright Field, Dayton,

Digitized by Google

Ohio, in making payment to claimant under War Department contract no. W–535–ac–3492, dated August 7, 1930, for the manufacture and delivery of four cargo airplanes, spare parts, etc., such deduction having been made on account of patent royalties of $200 each on the four airplanes theretofore paid by the said finance officer at Wright Field on voucher 1502 of his June 1931 accounts, to the Manufacturers Aircraft Association, Inc., under its license contract no. NOd–155, dated December 31, 1928. The instant claim was submitted to this office by the Chief of Finance War Department, on the recommendation of the Chief of the Air Corps, War Department.

Articles 1 and 2 of the said license contract, stated to be between Manufacturers Aircraft Association, Inc., and the War and Navy Departments of the United States Government, are as follows:

"1. The association hereby grants to the Government a nonexclusive license to make or cause to be made and use and sell in the United States, its territories and possessions, during the term of this contract and thereafter to use and to sell airplanes under any and all of such airplane patents as defined in said cross-license agreement as are enumerated in appendix A of the amended cross-license agreement, dated December 31, 1928, copy of which is attached hereto and by reference made a part hereof and under all other patents which have been or may be reported to or acquired by or come into the control of the Manufacturers Aircraft Association, Inc., and/or subscribers thereto; provided, however, that no licenses are so granted to the Government hereunder in patents reported to the association with a claim for extra compensation under paragraph V of said amended cross-license agreement: Provided further, That an option is hereby granted to the Government to acquire licenses under those patents so reported on the same terms as granted to said subscribers.

"2. The Government agrees to pay for such use of the inventions described in any and all of said patents, a sum equal to two per cent (2%) of the cost or purchase price of such airplanes, as it may either make or acquire, as provided in paragraph 1, above, provided that the Government shall not be required to pay nor shall any obligation accrue to pay royalties on airplanes upon which members or nonmembers of the Manufacturers Aircraft Association, Inc., have paid or have agreed to pay royalties; provided further, however, that in no instance shall said royalty exceed the sum of two hundred dollars ($200) per airplane, regardless of what the cost or price thereof may amount to; and provided that the cost or price thereof as used herein shall be understood to mean the price paid to a manufacturer, if procured from a manufacturer, completely equipped, read to operate, including all parts of airplanes and accessories used therein except the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears, and if such airplane is built or manufactured by the Government the cost shall be the amount expended in the direct construction thereof, including the cost of materials entering therein completely equipped ready to operate, including all parts of airplanes and accessories used or useful therein, except the engine and such engine accessories as propellers, propeller hubs, superchargers, starters, magnetos, mufflers, carburetors, and reduction gears.

"The Government agrees to pay said royalties for use of the inventions described in any and all of said patents until the maximum payments provided for in the amended cross-license agreement shall have been made or until Patent No. 1,203,550 shall expire, on the 31st day of October 1933, after which the Government shall enjoy the license herein conveyed and granted without the payment of any further royalties."

The contract of August 7, 1930, with the Ford Motor Co. required the claimant, for the consideration of $157,391.40, to manufacture and deliver to the United States four airplanes, together with certain spare parts, etc., more particularly set forth in articles 15, 16, and 17 of the contract. Article 18 of the said contract, relative to the use of any patented inventions and particularly those enjoyed by members of the said Manufacturers Aircraft Association, Inc., is, in part, as follows:

"ART. 18.—*Manufacturers' Cross License Agreement—Manufacturers' Aircraft Association.*—(1) The contractor will hold and save the Government, its representatives and all other persons acting for it as agent, harmless from all demands or liabilities for alleged use of any patented invention in the making or supplying or using of the articles or work herein contracted for, or in any way concerning the fulfillment of this contract by the contractor, unless such use of the patented invention being necessary to the fulfillment of the contract is spe-

Digitized by Google

cifically prescribed in writing by the Government or the use necessarily flows from the nature of the thing being produced or supplied, provided, however, the obligation of the contractor in this respect shall include all demands and liabilities based on patents that are enjoyed by members of the Manufacturers' Aircraft Association or on patents that are cross-licensed under the so-called cross-license agreement and/or its supplements, under which the members of said association are entitled to the use of certain patents; and if and when required, the contractor will discharge and secure the Government from all demand or liability on account thereof by proper release from the patentee or patentees or by bond or otherwise to the satisfaction of the Chief of Air Corps."

With reference to this provision of its contract and the deduction of $800 thereunder on account of payment in that amount by the said Army finance officer to the Manufacturers Aircraft Association, Inc., as patent royalties on the four airplanes procured under the contract, the claimant, in letter of December 18, 1931, states:

"This provision furnishes no warrant whatever for any deduction except it be based on demands and liabilities based on patents that are enjoyed by members of the Manufacturers' Aircraft Association or an patents that are cross-licensed under the so-called cross-licensing agreement, and/or its supplements under which the members of said association are entitled to the use of certain patents. We emphatically deny that the aeroplane or spare parts covered by this contract are in any manner covered by any patent or patents enjoyed by members of the Manufacturers' Aircraft Association or by any patents that are cross-licensed under the cross-license agreement or its supplement. Accordingly we deny that the Government is entitled under the provisions of this article 18 or any other article of this contract to deduct any payment made by the Government to the Manufacturers' Aircraft Association, whatever the reason may have been for that payment.

"Whatever the claims of the Manufacturers' Aircraft Association or its members may be, it is certainly not a function of the War Department or of the General Accounting Office to determine the validity of those claims. We are ready and willing to comply with all of our obligations under this contract, and particularly under article 18 thereof, but deny that this deduction of $800 for royalties paid by the Government to the Manufacturers' Aircraft Association is a proper deduction from the contract price, and therefore specifically request that it be paid."

With respect to this phase of the matter, a report by first endorsement, dated January 6, 1932, from the contracting officer, Air Corps, Wright Field, is in part as follows:

"3. In an attempt to determine what particular patents controlled by the Manufacturers' Aircraft Association, Inc., or enjoyed by its subscribers, were infringed by the Ford Motor Co. in constructing the airplanes called for under the terms of contract W 535 ac-3492 this office called upon the association for a detailed statement, and reply was received under date of May 25, 1931, in part as follows:

" 'While it is presumed that it would be impracticable to construct a modern airplane without infringing our patents, you will readily appreciate that to determine such infringement would involved considerable expense. In the instant case it would be necessary for us to have an engineer examine the particular planes in question and consider their infringement of our patents, which now total approximately 400; the expense of such an examination and the study required to ascertain the extent of the infringement would entail a sum out of proportion to the very low rate of royalties.' "

In regard to the above, the Ford Motor Co. replied on June 18, 1931, in part as follows:

"We note your remarks concerning the ownership by the Manufacturers' Aircraft Association of some 400 patents and your statement that you are of the belief that no modern airplane can be constructed without infringing many of them. We, however, hold a contrary view of the value of these patents, and, as a matter of fact, suits have already been brought by the Curtiss Assets Corporation and affiliated companies against the Ford Motor Co. for alleged infringement of certain patents by Ford tri-motor airplanes similar to those furnished by Ford Motor Co. to the War Department. The Manufacturers' Aircraft Association has full knowledge of these suits, which are still pending and have not as yet come to trial."

Digitized by Google

Thus the situation appears to be that under the terms of the license agreement the association could not claim the stipulated royalties on the four airplanes if its patents were not used; that claimant was obligated to save the United States harmless from all demands and liabilities based on the use of such patents; that claimant emphatically denies such patents were used; that the association presumes such patents were used but considers that the amount of royalty involved does not warrant an attempt to establish such use. The burden is clearly upon the association to prove the use of its patents as a condition precedent to any payment of the royalties; and this not having been established, either directly or by agreement to the deduction from its contract price—or by acquiescence therein—by the contractor obligated to save the Government harmless from any demands or liability on that account, it must be held that the said association was not entitled, under such conditions, or, in any event, until it had established the use of its patents, to be paid the said royalties, and unless and until such use is established, that no obligation arises under the terms of the contract with the claimant requiring it to reimburse the United States for any such payment, the claimant's contractual obligations in this respect under the quoted provisions of article 18 of its contract being to secure the Government from all demands or liability on this account by proper release from the patentees or by bond or otherwise to the satisfaction of the Chief of Air Corps, with which obligations it states it is ready and willing to comply.

Accordingly credit will be disallowed in the accounts of Capt. L. H. Price for the payment of $800 to the Manufacturers' Aircraft Association as patent royalties on the four airplanes in question, and such amount, if otherwise correct, will be allowed the claimant by settlement of this office when it shall have properly established that it has otherwise secured the Government against the demands of the Manufacturers' Aircraft Association and the possible contingent liability of the United States on that account. What is said herein is not to be understood as expressing any opinion upon the legality of the license agreement of December 31, 1928, with the Manufacturers' Aircraft Association, Inc., but see A–11220, May 12, 1927, and reconsideration thereof, A–11220, April 28, 1928.

(Signed) J. R. McCarl,
Comptroller General of the United States.

Comptroller General of the United States,
Washington, August 18, 1933.

A–41410.

Ford Motor Company,
3674 Schaefer Road, Dearborn, Mich.

Gentlemen: Reference is made to your letter of June 1, 1933 (E. J. M.–J. C.), in reply to my letter to you of April 28, 1933, A–41410, concerning your claim for $800 which was withheld pursuant to article 18 of your War Department contract no. W–535–ac–3492, dated August 7, 1930, for the manufacture and delivery of four cargo airplanes, on account of patent royalties of $200 on each airplane, paid the Manufacturers' Aircraft Association, Inc., under its license contract with the United States, no. NOd–155, dated December 31, 1928.

In view of your further disagreement with the conclusions based on the memorandum by the Judge Advocate General of the Army, dated October 18, 1932, set forth in my letter to you of April 28, 1933, that inventions described in certain patents controlled by the Manufacturers' Aircraft Association were used in the construction of the four airplanes, and your statement that the Curtiss Assets Corporation, plaintiff in three suits against the Ford Motor Company involving claims for royalties under the patents in question, "has seen fit to allow these cases to be struck from the calendar in the Federal courts", a copy of your letter of June 1, 1933, was transmitted to the Secretary of War for a further administrative report on the matters involved. The reply of the Secretary of War, under date of August 2, 1933, is in part as follows:

"I am advised by the Judge Advocate General it is clearly shown by a study made in the patent section of that office of the drawings and specifications from which these planes were manufactured, that the structure set forth in claims 3 and 4 of the patent issued December 29, 1914, to Orville and Wilbur Wright, no. 1122348, and the structure covered by claim 5 of the patent issued

Digitized by Google

November 6, 1917, to Glenn H. Curtiss, no. 1246020, are embraced in the construction of the four Ford C–4A cargo airplanes in question. The Chief of the Air Corps of the Army certified to the same effect September 30, 1932. The Manufacturers' Aircraft Association, by whom these patents are owned and controlled, under date of October 1, 1932, stated that the use of the structures covered by these claims in the airplanes in question, as shown by the Government blue print (F–9014) and specifications, is obvious. Furthermore, Honorable Patrick J. Hurley, former Secretary of War, in October 1932, interpreting the provisions of this contract, decided that some of the patents licensed by the Manufacturers' Aircraft Association to the Government, were actually used in the construction of these same planes. I am advised by the Judge Advocate General that the provisions of paragraph (t), section 10, of the Air Corps Act of July 2, 1926 (44 Stat. 784), as amended by the act of March 3, 1927 (44 Stat. 1380; 10 U. S. C., section 310, paragraph (t)), make such a decision final and not reviewable by any officer or tribunal of the United States, except by the President and the Federal courts.

"It would be unreasonable to expect that one of the attorneys for the Ford Motor Company would voluntarily, and in writing, concede that his client had infringed certain patents which he acknowledges in the same letter have been, and apparently still remain, in litigation. The improbability of such an admission against interest is strengthened when it is considered that his client is the defendant and the alleged infringer. His conclusion is said to rest upon the opinion of unidentified experts. Opinions of experts, generally, are but arguments of the side calling them. It is their province to instruct but not to decide. The existence of a patent is *prima facie* evidence of its own validity. In the absence of evidence to the contrary the legal conclusion is that it was issued without fraud to the proper person for a real invention. Until a Federal court determines its status the War Department cannot give serious consideration to the expression of an ex parte opinion as to its validity or infringement.

"With reference to the implied inference as to noninfringement suggested by the alleged consent of the Curtiss Assets Company to the striking of three suits from the calendar in the Federal courts, the assumption made by the Ford Motor Company is not borne out by the facts.

"The cases referred to are probably three suits in the District Court of the United States for the District of Delaware identified thus:

"Equity No. 781. Curtiss Assets Corporation v. Ford Motor Company, involving ten patents (including no. 1246020), filed April 10, 1930.

"Equity No. 782, Curtiss Airplane & Motor Co., Inc., v. Ford Motor Company, involving two patents, filed April 10, 1930.

"Equity No. 846, Curtiss Assets Corporation v. Ford Motor Company, involving patent no. 1,122,348, filed September 18, 1930.

"On March 8, 1933, a court order signed by Judge John P. Nields was filed in each of these cases, which reads in pertinent part as follows:

"'And now, to-wit, this 8th day of March, A. D. 1933, upon reading and considering the foregoing stipulation, it is, upon motion of E. Ennalls Berl, Esq., solicitor for plaintiff,

"'Ordered by the court that the above-entitled cause be, and the same hereby is, removed from the trial calendar, *subject to restoration upon the application of either party within one year from the date hereof, upon thirty days' notice.*' (Italics supplied.)

"Accordingly, these suits are neither dismissed nor discontinued but are still in effect and the stay of one year has not expired. They may be restored without prejudice upon application of either party. It is understood that this action is based upon pending negotiations for an amicable settlement, the terms of which will depend upon whether or not the Ford Motor Company shall continue, or cease, to manufacture and sell airplanes. This decision may involve settlement for past infringement, licenses for future production, or continuation of the present litigation. In any event the plaintiffs are still in court and the issues involved are neither determined nor adjudicated.

"It may clarify the case to reemphasize the fact that a former Secretary of War has decided that one or more of the patents licensed by the Manufacturers' Aircraft Association to the United States was used in the construction of the four cargo planes manufactured by the Ford Motor Company under the contract in question. The specifications of that contract made the use of

Digitized by Google

such patents by the Ford Company unavoidable. This being so, a contractual obligation was created on the part of the Government, under the license agreement of December 31, 1928 (supra), to pay a royalty of $200 per plane to the Manufacturers' Aircraft Association, which owns and controls these patents. Accordingly, it is believed that the General Accounting Office should cancel the disallowance of credit in the accounts of Captain Price for the $800 payment to the association."

In view of the matters set forth in the Judge Advocate General's memorandum of October 18, 1932, as quoted in my letter to you of April 28, 1933, and those set forth in the further report of August 2, 1933, by the Secretary of War, *supra*, it must be concluded that the Manufacturers' Aircraft Association, Inc., was entitled under its license contract with the Government to the royalties of $800 paid to it on account of the use in the four Ford cargo airplanes of inventions described in patents controlled by the said association, and that the deduction of a like amount in payment to you for the four airplanes pursuant to article 18 of your contract, specifically providing that you would have the Government harmless from all liabilities based on patents enjoyed by members of the Manufacturers' Aircraft Association, was proper.

Accordingly, you are advised that your claim for the said amount of $800, deducted in payments to you for the four airplanes, must be and is disallowed.

Respectfully,

(Signed) J. R. McCARL,
Comptroller General of the United States.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON PATENTS,
Washington, D. C., January 13, 1936.

Dr. WILLIAM I. SIROVICH,
Chairman, Committee on Patents,
House of Representatives, Washington, D. C.

DEAR DR. SIROVICH: The following data from representative industries illustrate the typical forms of patent pools and cross-licensing agreements which are in use in industry.

Examination of the answers to the questionnaire devised by the committee to obtain information relevant to H. R. 4523 have been so numerous that it is impossible to include them all in an exhibit, consequently, without reference to any other attribute, these responses have been selected as demonstrating in part, at least, the numerous patents which may apply to a particular art and a particular enterprise within that art; and the assumed necessity on the part of the producers of forming patent consolidations and accumulating numerous patents which cover closely related processes necessary for production.

Respectfully submitted.

CHARLES A. WELSH, Jr., *Economic Adviser.*

HOUSE OF REPRESENTATIVES,
COMMITTEE ON PATENTS,
Washington, D. C.

Your personal attention is respectfully requested to the attached letter, which because of the number sent out necessarily is a form letter.

The Committee on Patents of the House of Representatives request your personal cooperation in this matter, and its members feel assured that the replies to the questions asked, which are for the information of the committee, will be forwarded promptly.

Yours respectfully,

WILLIAM I. SIROVICH, *Chairman.*

HOUSE OF REPRESENTATIVES,
COMMITTEE ON PATENTS,
Washington, D. C.

House Resolution 196 for the purposes set forth in House Resolution 4523, of the Seventy-fourth Congress, first session, authorized and instructed the Committee on Patents, for the information of Congress, to investigate all matters

Digitized by Google

pertaining to cross-licensing and patent-pooling agreements under existing patents.

It is the intention of the Committee on Patents to go into this investigation thoroughly, comprehensively, and impartially, with the view of ascertaining the real facts, based on actualities, as to whether or not patent pooling and cross-licensing are beneficial or detrimental to either large or small businesses, or both.

The Committee on Patents will be very glad to have your cooperation in this investigation, and therefore would appreciate your furnishing the committee, as promptly as possible, the information requested herewith:

1. A complete list of all patents owned by you, your company, or corporation, and also those patents now being used by you or them through cross-license or patent-pooling agreements or otherwise.
2. If you are not using some of your patents at this time, why not?
3. A copy of the constitution and bylaws or articles of agreement of your organization or association.
4. Copies of cross-license or patent-pooling agreements to which you, your company, or corporation are parties.
5. A copy of the different forms of cross-licensing or pooling agreements made and existing between your organization and others to date.
6. The names of the inventors of all such patents in such cross-license agreements or patent pools, date and number of patent, date of assignment to you, amount paid for same, estimated value of patent at date of purchase and now.
7. Are any of said patents controlled by said cross-license and patent-pooling agreements used as basis for charter or corporation franchises? If so, valuation of such patents.
8. Was inventor an employee of assignee at time of making invention and is the inventor an employee of such assignee now. If so, does assignee retain contract providing such invention shall belong to employer without additional cost?
9. Please give number, name, ownership, and valuation of existing patents now being used by your company through cross-license or with a patent pool.
10. Do you cross-license nonmembers of the patent pool—if such exists—and if so, on what terms?
11. What are the eligibility requirements for outsiders to join this patent pool?
12. Do you suggest any amendments to existing patent laws? If so, enumerate.

We will greatly appreciate your furnishing the above information as soon as possible, and enclose franked, self-addressed envelope for your convenience in promptly forwarding the information above requested.

Thanking you, we are

Very truly yours,

WILLIAM I. SIROVICH,
Chairman.

CURTISS AEROPLANE & MOTOR CO., INC.,
New York, N. Y., December 6, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, House of Representatives, Committee on Patents,
Fifth Avenue Hotel, 24 Fifth Avenue, New York, N. Y.

DEAR SIR: There is submitted herewith, in behalf of Curtiss Aeroplane & Motor Co., Inc., answers to the questionnaire contained in your letter of November 9, 1935.

Very truly yours,

CURTISS AEROPLANE & MOTOR CO., INC.,
By E. S. CRAMER, *Secretary.*

CURTISS AEROPLANE & MOTOR CO., INC.

1. Question. A complete list of all patents owned by you, your company or corporation, and also those patents now being used by you or them through cross-license or patent pooling agreements or otherwise.

Digitized by Google

Answer. Curtiss Aeroplane & Motor Co., Inc., owns the following patents, to wit:

SCHEDULE A

Patentee	Number	Date of issue	Date of assignment

Curtiss Aeroplane & Motor Co., Inc., as a member of the Manufacturers Aircraft Association, Inc., is licensed to make use of all patents subject to the cross-license agreement which said association administers. (It is the writer's understanding that your committee has already been furnished by said association with a complete list of all patents subject to the cross-license agreement.)

Curtiss Aeroplane & Motor Co., Inc., by negotiated contracts, is licensed to make use of the following patents, none of which are owned by Curtiss: 1226965, 1223017, 1256954, 1270339, 1290000, 1326010, 1353666, 1358603, 1394343, 1394344, 1405177, 1405176, 1427314, 1422616, 1422614, 1422615, 1427012, 1419507, 1433030, 1431520, 1459411, 1414200, 1463888, 1485349, 1496731, 1496732, 1496733, 1523994, 1567670, 1609468, 1635687, 1760838.

2. Question. If you are not using some of your patents at this time, why not?

Answer. Curtiss Aeroplane & Motor Co., Inc., makes current use of all patents which it owns.

Digitized by Google

3. Question. A copy of the constitution and bylaws or articles of agreement of your organization or association.

Answer. A copy of the constitution and of the bylaws of the Manufacturers Aircraft Association, Inc., are hereto attached.

4. Question. Copies of cross-license or patent-pooling agreements to which you, your company, or corporation are parties.

Answer. A copy of the original cross-license agreement and of all subsequent modifications thereof are hereto attached.

5. Question. A copy of the different forms of cross-licensing or pooling agreements made between your organization and others to date.

Answer. A copy of each form of license which the Manufacturers Aircraft Association, Inc., is authorized to grant is hereto attached.

6. Question. The names of the inventors of all such patents in such cross-license agreement for patent pools, date and number of patent, date of assignment to you, amount paid for same, estimated value of patent at date of purchase and now.

Answer. The names of the inventors, the dates and numbers of the patents, and the dates of assignment thereof to Curtiss, of all Curtiss-owned patents subject to the cross-license agreement of the manufacturers Aircraft Association, Inc., are given in the answer to question 1 under the schedule headings "A", "B", "C", and "D."

Each of the patents listed under the schedule heading "A" is predicated on a development originating within the Curtiss organization, and each was assigned to the Curtiss Co. by reason of the existence of an employer-employee agreement entered into between employees of Curtiss and the Curtiss Co. (A copy of the standard form of employer-employee agreement used by the Curtiss Co. is hereto attached).

Each of the patents listed under the schedule heading "B" was at one time owned by the Aviation Corporation, and assigned by said corporation to the Curtiss Co. (A copy of the Curtiss-Aviation Corporation agreement setting forth the consideration for the transfer of title to said patents is hereto attached).

Each of the patents listed under the schedule heading "C" was at one time owned by the Keystone Aircraft Corporation, and assigned by said corporation to the Curtiss Co. upon dissolution of the former. (The consideration for the transfer of title to said patents was $1, said amount being the value at which the patents were carried on the books of the Keystone Corporation.)

Each of the patents listed under the schedule heading "D" was at one time owned by S. M. Fairchild, and assigned by him to the Curtiss Co. (A copy of the Curtiss-Fairchild agreement setting forth the consideration for the transfer of title to said patents is hereto attached.)

There is no basis upon which the value to Curtiss, either today or at the time it acquired title to the patents listed under the schedule headings "A", "B", "C", and "D" can be either estimated or determined.

7. Question. Are any of said patents controlled by said cross-license and patent pooling agreements used as a basis for charter or corporation franchises? If so, valuation of said patents.

Answer. No Curtiss-owned patents are currently used as a basis for charter or corporation franchises.

8. Question. Was inventor an employee of assignee at time of making invention, and is the inventor an employee of such assignee now? If so, does assignee retain contract providing such invention shall belong to employer without additional cost?

Answer. The patentees listed under the schedule heading "A" were all, at the time of the filing of the applications resulting in the patents granted, employees of the Curtiss Co.

The patentees listed under the schedule headings "B", "C", and "D" were not, at the time of the filing of the applications resulting in the patents granted, employees of the Curtiss Co.

Of the patentees listed under the schedule heading "A", the following are still in the employ of the Curtiss Co.: R. Flader, F. R. Weymouth, C. G. Trimbach, C. E. Hathorn, S. I. Vaughan, S. T. Payne, A. G. Butler, R. D. Carleton, E. R. Child, R. R. Osborn, R. C. Blaylock, E. L. Noonan, H. R. Moles, and F. W. Fink.

None of the patentees retain any interest whatsoever in the patents assigned.

Digitized by Google

9. Question. Please give number, name, ownership, and valuation of existing patents now being used by your company through cross-license or with a patent pool.

Answer. The value to the Curtiss Co., of the patents under which it is licensed by reason of its membership in the Manufacturers Aircraft Association, Inc., cannot be determined. It is the writer's understanding that your committee has already been furnished with the number, name, and ownership of the patents under which it is licensed by reason of its association membership.

10. Question. Do you cross-license nonmembers of the patent pool—if such exists—and if so, on what terms?

Answer. At no time has the Curtiss Co. refused any concern or airplane manufacturing company a license under any or all of the "airplane" patents which it now owns or previously owned. Licenses have been granted to nonmembers of the association, subsequent to the formation of the association, at the same royalty rate as that required to be met by association members.

Question. What are the eligibility requirements for outsiders to join this patent pool?

Answer. To entitle a person, firm, or corporation to become a stockholder of the Manufacturers Aircraft Association, Inc., he or it, as the case may be, shall be a responsible manufacturer of aircraft or aircraft engines, or parts and accessories thereof; or a responsible manufacturer who intends to become a bona fide producer of the same; or a manufacturer to whom the United States Government has given a contract for the construction of 10 or more complete aircraft or aircraft engines; or a person, firm, or corporation owning or controlling United States patents relating to any of the foregoing.

12. Question. Do you recommend any amendments to existing patent laws? If so, enumerate.

Answer. It is recommended that the act of June 25, 1910 (36 Stat. 851), as amended by the act of July 1, 1918 (40 Stat. 705), be repealed.

[Standard form of Curtiss Employer-Employee Agreement]

AGREEMENT

Whereas the Curtiss Aeroplane & Motor Co., Inc., a corporation of New York, having its principal places of business at Garden City and Buffalo, N. Y., is now engaged in the development, manufacture, and sale of various types of aircraft, pontoons, hulls, engines, and parts thereof and accessories therefor, and of apparatus and processes incident to the manufacture of said devices and the parts thereof, and

Whereas I desire employment with said corporation in the course of which I may be informed from time to time of more or less confidential matters pertaining to these and any other lines of work that the corporation may now or hereafter be engaged in the investigation or development of during my employment,

Now, therefore, this indenture witnesseth: That in part consideration of my employment with said corporation, and the resulting renumeration and attending advantages, I agree that—

1. I will communicate to its Law Department and assign to the corporation, for its sole and exclusive benefit, any and all improvements and inventions I may conceive of or make while in its employ, along the lines of the Corporation's work and investigations, and will execute all patent application and other proper papers deemed by the corporation as necessary or expedient to the filing and prosecution of applications for patents in this and all foreign countries, on said improvements or inventions, and otherwise in acquiring Letters Patent therefor, and will otherwise assist the Corporation in every proper way (entirely at its expense) to protect in any and all countries, the inventions to be and remain the property of the said Corporation, whether patented or not: As a matter of record I attach hereto a complete list of all inventions which I have made prior to my said employment and which I desire to have excluded from this assignment, and

2. I will regard and preserve as confidential all information pertaining to the Corporation's business that may be obtained by me from specifications, drawings, blue-prints, reproductions, and other sources of any sort as a result of such employment, and I will not, without written authority from the Corporation so to do, disclose to others during my employment or thereafter, such or any other confidential information obtained by me while in the employ of the Corporation.

In witness whereof, I have hereunto set my hand and seal this _____ day of _____ 19__.

(Signature) _____ [SEAL]

Witness:

(Original to be dated, signed, witnessed and returned to the Law Department of the Corporation.)

AGREEMENT

This agreement entered into this 1st day of Oct., 1933, by and between the Aviation Corporation, a Delaware Corporation, party of the first part, and Curtiss Aeroplane & Motor Company, Inc., a New York Corporation, Curtiss Assets Corporation, a New York Corporation, Curtiss-Wright Airplane Company, Inc., a Missouri Corporation, Keystone Aircraft Corporation, a Delaware Corporation, and Wright Aeronautical Corporation, a New York Corporation, parties of the second part, witnesseth:

Whereas the party of the first part is empowered to procure an assignment or assignments to Curtiss Aeroplane & Motor Company, Inc., of certain U. S. Letters Patents and applications for Letters Patents (either filed, or prepared and not yet filed), identified in Schedule "A" hereto attached, and

Whereas said party of the first part through its subsidiaries, Fairchild Aviation Corporation, Fairchild Airplane Manufacturing Corporation, Fairchild Enigne Corporation, American Airplane & Engine Corporation, Kreider-Reisner Aircraft Company, Inc., and the Aviation Patent & Research Corporation, has manufactured, sold, and/or used, or has caused to be manufactured, sold, and/or used, airplanes and/or parts thereof, which it is alleged by the parties of the second part constitute an infringement of certain U. S. Letters Patents owned or controlled by them or one of them, and

Whereas said party of the first part is the owner of a certain library, identified as the Farmingdale Library, comprising copies of United States and foreign patents, books, magazines, and other material which all of the parties hereto desire to make more generally available for use in the advancement of the airplane art and industry, and

Whereas Curtiss Aeroplane & Motor Company, Inc., is desirous of acquiring all right, title, and interest in and to the U. S. Letters Patents and applications for Letters Patents enumerated in Schedule "A", and

Whereas under a certain agreement known as the Amended Cross-License Agreement of December 31, 1928 (by which all of the parties of the second part are bound), the parties of the second part are required to account to the Manufacturers Aircraft Association, Inc., for all licenses granted under any and all airplane patents which they or any of them own or control; and

Whereas the said Manufacturers Aircraft Association, Inc., at present owns and maintains a patent and engineering library devoted to aeronautical subjects which is available to and widely used by all parties hereto and other Members of the said Association, and which all of said parties now desire to improve and extend for the continued advancement and benefit of the airplane art and industry; and

Whereas the parties hereto are desirous of settling any and all claims which the parties of the second part may now have, may have heretofore had, or may hereafter have, against the party of the first part, and/or its subsidiaries, based on the alleged infringement of any and all airplane patents owned or controlled by the parties of the second part, or any of them, and which said claim or claims relate or pertain in any way, except as hereinafter provided, to airplanes and/or parts thereof manufactured, sold, and/or used by Fairchild Aviation Corpora-

tion, Fairchild Airplane Manufacturing Corporation, Fairchild Engine Corporation, American Airplane & Engine Corporation, Kreider-Reisner Aircraft Company, Inc., and The Aviation Patent & Research Corporation prior to the date of the signing hereof.

Now, therefore, in consideration of the covenants herein contained, and of other good and valuable considerations, the receipt whereof is hereby acknowledged, it is mutually agreed as follows:

1. The Aviation Corporation agrees to procure and deliver within a reasonable time hereafter an assignment or assignments to Curtiss Aeroplane & Motor Company, Inc., of all U. S. Patents and applications (both filed, and prepared but not yet filed) enumerated in Schedule "A", title to which is now vested in it or in Fairchild Aviation Corporation, Fairchild Airplane Manufacturing Corporation, Fairchild Engine Corporation, American Airplane & Engine Corporation, Kreider-Reisner Aircraft Company, Inc., and/or The Aviation Patent & Research Corporation; and as to such U. S. Patents and/or applications enumerated in said Schedule which are the rightful property of The Aviation Corporation, but title to which is now vested in other than the above companies, The Aviation Corporation agrees to use every reasonable and proper effort to induce the present owners of title to execute, in favor of Curtiss Aeroplane & Motor Company, Inc., an assignment or assignments of like effect and tenor.

2. The Aviation Corporation agrees to transfer and deliver to Curtiss Aeroplane & Motor Company, Inc., title to the library identified as the Farmingdale Library in order that the same may be consolidated with the library of the Manufacturers Aircraft Association, Inc., as hereinafter provided.

3. The Curtiss Aeroplane & Motor Company, Inc., agrees to report to the Manufacturers Aircraft Association, Inc., without claims for compensation, all patents and/or applications referred to in Schedule "A", which are or may be assigned to it as provided in Paragraph 1, whereby, in conformity with the Amended Cross-License Agreement and Contract with the U. S. Government of December 31, 1928, which said Association administers, said patents and/or applications may be cross-licensed, without compensation to the Government and to all Subscriber members. That there may be no misunderstanding as to the terms and conditions of said Cross-License Agreement and Contract of December 31, 1928, copies of the same are attached hereto and made a part hereof.

4. Curtiss Aeroplane & Motor Company, Inc., agrees to transfer title to and deliver the said Farmingdale Library transferred to it in accordance with Paragraph 2 hereof, to said Manufacturers Aircraft Association, Inc., in lieu of the 12½% of the amount of this settlement which may become due to it (the Association) under the terms of Paragraph VII and VIII of said Cross-License Agreement.

5. The parties of the second part, in return for the assignment to Curtiss Aeroplane & Motor Company, Inc., of the patents and appliances referred to in Schedule "A", and in return for the delivery to Curtiss Aeroplane & Motor Company, Inc., of the said Farmingdale Library referred to in Paragraph 2, agree to release and do hereby release The Aviation Corporation, Fairchild Aviation Corporation, Fairchild Airplane Manufacturing Corporation, Fairchild Engine Corporation, American Airplane & Engine Corporation, Kreider-Reisner Aircraft Company, Inc., and The Aviation Patent & Research Corporation, and its or their successor or successors, except as provided in Paragraph 6 hereof, from, and acknowledge complete satisfaction of any and all claims or causes of action which the said parties of the second part or any of them, or their successor or succesors, and assign or assigns, may now own or may hereafter own, insofar as said claim or claims or cause or causes of action relate or pertain to airplanes and/or parts thereof, manufactured, sold and/or used prior to the date of execution of this agreement, the words "Airplane" and "Airplane Patent" as used in this agreement being understood to have the same meaning as in the said Cross-License Agreement, for the definition of which see Paragraph 1 thereof.

6. It is specifically understood and agreed that the release contained in Paragraph 5 hereof in no way concerns, nor is it intended in any way to affect

Digitized by Google

any claim or cause of action which the parties of the second part, or any of them, may now have, or may hereafter have, based on the unlicensed manufacture, sale, and/or use of airplanes and/or parts thereof, by any person, firm, corporation or association which is now or at any time heretofore was connected with The Aviation Corporation as a subsidiary or subsubsidiary thereof, after the time when such person, firm, corporation, or association ceased to be so connected with The Aviation Corporation. Specifically it is agreed that the release contained in Paragraph 5 hereof shall not in any way release or affect any claim or cause of action which the parties of the second part, or any of them, may now have or may hereafter have based on the unlicensed manufacture, sale, and/or use of airplanes and/or thereof by Fairchild Aviation Corporation, or the Kreider-Reisner Aircraft Company, Inc., since April 1, 1931.

7. It is further understood and agreed that the assignments required to be executed under the provisions of Paragraph 1 hereof shall be subject to a non-exclusive license which has been granted to Fairchild Aviation Corporation and its present and future subsidiaries and controlled companies under all patents owned or controlled by The Aviation Patent & Research Corporation on April 1, 1931, and shall provide for the retention by the assignor for the benefit of itself and its present or future subsidiaries and sub-subsidiaries or affiliated companies of a non-exclusive right and license, for the life of the patents and/or applications therein referred to, to manufacture, use, and/or sell the invention or inventions covered by said patents and/or applications, without obligation, should The Aviation Corporation or its subsidiaries, or its or their successor or successors and/or assigns in the future elect to continueto manufacture airplanes and/or parts thereof.

In witness whereof, the parties hereto have executed this agreement, in duplicate, as and of the date hereinbefore first written.

AGREEMENT

This agreement entered into this 31st day of December 1933 by and between Fairchild Aviation Corporation, a Delaware Corporation, party of the first part, and Curtiss Assets Corporation, a New York Corporation, party of the second part, witnesseth:

Whereas the party of the first part represents that it is empowered to procure an assignment or assignments to Curtiss Aeroplane & Motor Company, Inc. (an affiliate of Curtiss Assets Corporation), of certain United States Letters Patent, and applications for Letters Patents, either filed, or in the process of preparation, identified in Schedule "A" hereto attached, and

Whereas said party of the first part, and/or its affiliate, Kreider-Reisner Aircraft Company, Inc., a Maryland Corporation, has manufactured, sold and/or used, or caused to be manufactured, sold and/or used, airplanes which it is alleged by the party of the second part constitute an infringement of certain United States Letters Patents owned or controlled by said party of the second part; and

Digitized by Google

Whereas Curtiss Aeroplane & Motor Company, Inc., is desirous of acquiring all right, title, and interest in and to said United States Letters Patents and applications enumerated in Schedule "A"; and

Whereas the parties hereto are desirous of settling any and all claims which the party of the second part may now have or may have heretofore had against the party of the first part and/or its affiliate, Kreider-Reisner Aircraft Company, Inc., based on the alleged infringement of any and all patents owned or controlled by the party of the second part.

Now, therefore, in consideration of Five Hundred Dollars ($500), and of the covenants herein contained, and of other good and valuable considerations, the receipt whereof is hereby acknowledged, it is mutually agreed as follows:

(1) Fairchild Aviation Corporation agrees, as and of the date of execution hereof, to deliver an assignment in writing to Curtiss Aeroplane & Motor Company, Inc., a New York Corporation, of all United States Letters Patents and pending applications identified in Schedule "A", hereof, and further agrees, if and when applications for United States Letters Patents covering the invention or inventions identified in Schedule "A", as "Applications in Process of Preparation", are prepared, to procure the execution of said applications by Sherman M. Fairchild. Fairchild Aviation Corporation also agrees, if and when called upon by the party of the second part, to procure the execution of any and all papers and/or the documents deemed by the party of the second part to be necessary to vest in it all right, title, and interest in and to said application or applications aforesaid.

(2) The party of the second part, in return for the assignment to Curtiss Aeroplane & Motor Company, Inc., of the patents and applications referred to in Schedule "A", and in consideration of the Five Hundred Dollars ($500) payment herein referred to, agrees to release and does hereby release Fairchild Aviation Corporation and/or Kreider-Reisner Aircraft Company, Inc., from, and acknowledges complete satisfaction of any and all claims or causes of action which it or its successor or successors, and assign or assigns, may now have or may have heretofore had, insofar as, and only insofar as said claim or claims or cause or causes of action relate or pertain to airplanes and/or parts thereof manufactured, sold and/or used prior to the date of execution of this agreement, and which airplanes and/parts it is alleged by the party of the second part constitute an infringement of its patents.

In witness whereof, the parties hereto have executed this agreement, in duplicate, as and of the date heretofore first written.

APPLICATIONS IN PROCESS OF PREPARATION

(*a*) Automatic stabilizer adjustment to maintain constant longitudinal balance irrespective of power on and power off conditions.
(*b*) Two types of retractable landing gears.
(*c*) Two types of cantilever landing gears.
(*d*) New method of increasing air stream velocity through in-line airplane engines. This is a cowling invention and therefore relates to airplanes.
(*e*) New type of military pilot seat which has been approved by the Army.
(*f*) New type of wheel pants and landing gear.

CROSS-LICENSE AGREEMENT

This agreement, made this 24th day of July 1917, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers") as shall become stockholders of the said "Company" in the manner and under the conditions provided in the by-laws thereof (which for the purpose of this agreement are made a part hereof), and become parties to this agreement, parties of the second part.

Whereas, the parties hereto are interested in the manufacture, sale, and use of airplanes, as hereinafter defined, and desire to promote and develop the industry in which they are engaged, and to encourage and advance the art applicable thereto; and

Whereas the said development and advancement in the past have not been capable of as complete accomplishment as is desirable, because of the existence of certain United States patents claimed to be basic in their nature, upon which suits have been brought or threatened for alleged infringement and for the collection of royalties and damages in connection therewith; and

Whereas it is desired to prevent and avoid such litigations or threatened litigations in the future and to give to all of the "Subscribers" the right to manufacture, sell, and use airplanes embodying the inventions of each of the "Subscribers" and to that end it is desired that licenses be granted as herein expressed:

Now, this agreement witnesseth: That for and in consideration of the premises, the covenants, and conditions herein contained, and of other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves, it is covenanted and agreed as follows:

I. DEFINITIONS

The word "airplane", as used in this agreement, shall be understood to mean any form of heavier-than-air craft using wing surfaces for sustaining it and to include propelling means, propellers, propeller hubs, radiators, and all parts and accessories used or useful in the airplane except the engine and its accessories.

The words "airplane patent", as used in this agreement, shall be understood to mean any patent covering inventions for or capable of use in or in connection with airplanes, including propellers, propeller hubs, radiators, and all parts of airplanes and accessories used or useful in the airplane, except the engine and its accessories.

II. LICENSES AND POWERS GRANTED

The "Subscribers" grant, agree to grant, and cause to be granted to each other, licenses to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them or any of them, or by any firm, corporation, or association owned or controlled by them, or under which they, or any of them, or any such firm, corporation, or association, have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall said rights or the licenses, herein provided for, apply to or include the use of said patents in their application to other than airplanes, and except further that no licenses are hereby granted under the Dunne patents No. 975403, issued November 15th, 1910, and No. 1003721, issued September 19th, 1911, rights under which are held by the Burgess Company.

Digitized by Google

All licenses provided for herein shall run to the full end of the term of the letters patent under which the license is or is to be granted and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner hereinafter stated.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them and in their respective names, to make and execute licenses in writing in the form hereto annexed, and to deliver the same to those of the "Subscribers" who, at the time, are stockholders of the "Company" not in default hereunder, and who shall have executed an agreement in writing of like tenor to this; and to enforce said licenses and any and all other obligations (including the obligation to make payments), of the "Subscribers" under this agreement; and the "Subscribers" hereby give and grant unto said "Company" as full, complete, and ample power and authority in the premises as the "Subscribers" themselves now have and possess.

All licenses provided for herein, when made, executed, and delivered in accordance with the provisions hereof, shall have the same force and effect as if they had been executed and delivered by the "Subscribers" themselves.

III. COVENANTS OF FURTHER ASSURANCE

(a) Each "Subscriber", now or hereafter, having rights under any United States airplane patent or invention, of such character that it has legal right and power to procure the grant of rights thereunder to others, but is not itself empowered to grant such rights, covenants to procure the execution of such further instrument as may be necessary to empower the "Company" to grant rights under such patent, or with reference to such invention, to the extent and in the manner herein provided.

(b) Each "Subscriber" covenants that it will not contract for or obtain any rights under any such patent or invention in such manner that its owner would be prevented from granting to other "Subscribers" hereto similar rights on the same terms, unless the "Subscriber" obtains, at the same time, the further privilege to grant rights under said patent or said invention, whereby the same may and will be brought under the operation of this instrument.

IV. COVENANTS AGAINST OTHER LICENSES

Each "Subscriber" covenants that it has not heretofore entered and will not hereafter enter into any contract or arrangement, whereby its privileges under United States airplane patents, issued or to be issued, inventions, and rights, owned or controlled by it, have been or shall be diminished or surrendered so as to exclude or restrict the operation of this instrument in respect thereto. Each "Subscriber" further covenants that it will not grant licenses under any such patents for use in airplanes, with reference to which it is receiving royalties hereunder, to any other person, firm, or corporation on more favorable or lower terms of royalty, than those herein provided, or which may become more favorable or lower during the term of such license.

V. AFTER ACQUIRED PATENTS

When a "Subscriber" shall hereafter acquire a United States airplane patent, or any right thereunder, he shall be entitled to compensation for the use thereof if the patent or patent right covers an invention which secures the performance of a function not before known to the art, or constitutes an adaptation for the first time to commercial use of an invention known to the industry to be desirable of use but not used because of lack of adaptation, or is otherwise of striking character or constitutes a radical departure from previous practice, or if either the price paid therefor or the amount expended in developing the same is such as to justify such compensation, provided that at the time said patent or patent right is reported to the "Company", as required in subdivision (b) of paragraph VII, the "Subscriber" claims such compensation, and states the grounds on which such claim is based. Such report and claim shall be submitted to a Board of Arbitration to be selected in the manner provided for in paragraph XIII hereof, which Board shall determine whether such compensation shall be paid, and, if so, the total amount thereof and the rate of royalty, or other payments, which shall be paid (towards such compensation) by any "Subscriber" desiring and taking a license under said patent and shall also fix the time or times when said royalties or other amounts shall be paid.

Digitized by Google

VI. SPECIAL MODELS

If any "Subscriber" shall have developed the design and manufacture of any special model of airplane, or airplane engine, or other device used in an airplane (except the airplanes manufactured by the Burgess Company under the Dunne Patents hereinbefore mentioned, and the Hispano-Suiza aeronautical engine manufactured by the Wright Martin Aircraft Corporation or its subsidiaries), which the United States Government may at any time desire to have manufactured in the factory of any other "Subscriber" or in the factory of any manufacturer not a "Subscriber" hereto, the said "Subscriber" agrees that it will furnish to the other "Subscriber" or said other manufacturer such complete specifications, drawings, and other production data, as may be required for use in the manufacture of such special model, provided that and upon condition that the "Subscriber" or other manufacturer in whose factory the work is placed by the United States Government shall agree with said Government and with the "Subscriber" owning said specifications, etc., to pay and shall pay into the treasury of the "Company" one percent upon the contract price paid by the Government for each airplane or airplane engine or other device manufactured for it in accordance with said specifications, etc.

If the manufacture of such special model is conducted by one not a "Subscriber", such manufacturer shall also agree to pay into the treasury of the "Company" such royalty as a "Subscriber" would have been obliged to pay had it made and sold the airplane, engine, or other device, including the amount specified in subdivisions (a) and (b) of paragraph VIII hereof, if an airplane with or without engine is the thing manufactured for and sold to the Government.

VII. REPORTS TO THE COMPANY

The following reports in writing shall be rendered to the "Company" by each "Subscriber" at the time or times hereinafter set forth:

(a) At the time of the execution of this agreement each "Subscriber" shall report all United States airplane patents and inventions, together with serial numbers and filing dates of all pending applications for such patents, and all rights under such patents and inventions then owned or controlled by it, but no omission from such report shall exclude the patent, application, or right so omitted from the operation of this agreement.

(b) Within 30 days after the acquisition by any "Subscriber" of any United States patent (other than patents to be issued upon inventions now owned by it) or right within the scope of this agreement, each such "Subscriber" shall report such acquisition, together with all the facts known to it as to such patent or right and its manner of acquisition. If such "Subscriber" claims that additional compensation should be paid to it for licenses under such patent or right, it shall so claim in its report.

(c) On the 10th days of January, April, July, and October in each year, each "Subscriber" shall report the number of airplanes (with or without engine), sold and delivered by it, together with the names of the purchasers, and the dates of delivery, or put into use for other than experimental or development purposes, or shipped out of the United States during the three preceding calendar months.

(d) On the 10th day of January, April, July, and October in each year, each "Subscriber" shall report the number of airplanes, airplane engines, or other devices for use in airplanes, which it has sold and delivered during the preceding three calendar months, made from specifications, drawings, and other production data obtained from any other "Subscriber", as provided in paragraph VI hereof, together with the sales price and the dates of delivery; and there shall be included in the same report a copy of any agreement which the "Subscriber" shall have made with another manufacturer as provided in said paragraph.

(e) Each license to other than "Subscribers" as provided in paragraph IV hereof, shall be reported within 30 days after its delivery.

The first of each of the reports specified in subdivisions (c) and (d) hereof shall be made by each "Subscriber" on the tenth day of January, April, July, or October first occurring after it has become a "Subscriber" hereto, and shall cover the period from July 1, 1917, to the first day of the month in which the report is due.

Each of the "Subscribers" hereto shall keep separate books of account showing all business done under or subject to the operation of this agreement.

Digitized by Google

The "Company" may at any time have a New York Certified Public Accountant, to be designated by it, audit such books of account of the "Subscribers", together with such other accounts as the accountant may deem necessary, in order to verify or correct the reports herein provided for, and the "Company" shall have such audit made when any "Subscriber" so demands. Such audit, however, shall be limited to ascertaining whether the reports herein provided for are properly made and to correcting the same, if necessity for correction shall appear. No information obtained from any such audit shall be reported by the accountant or given to any of the parties hereto, except as it directly applies to the reports required by this agreement.

VIII. PAYMENTS TO THE "COMPANY"

Each "Subscriber" agrees to pay into the treasury of the "Company" on the 10th days of January, April, July, and October in each year the following sums of money, to wit:

(a) On each airplane, with or without engine, required to be reported as provided in subdivision (c) of paragraph VII hereof, the sum of two hundred dollars until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation shall have been paid the aggregate sums provided for in subdivisions (a) and (b) of paragraph IX hereof.

(b) On each airplane, with or without engine, required to be reported as provided for in subdivision (c) of paragraph VII hereof, such sum not to exceed twenty-five dollars, as the Board of Directors of the "Company" may, from time to time, fix and determine as payable after the above-mentioned aggregate sums shall have been paid to the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation.

(c) Such amount or amounts as the Board of Arbitration may specify as special compensation for after-acquired patents as provided in paragraph V hereof, and required to be reported in subdivision (c) of paragraph VII.

(d) Such amount or amounts as may be payable with reference to the use of specifications, drawings, and data as provided in paragraph VI hereof, including the royalty payments therein provided for, but all one (1%) percent payments on account of the use of such specifications, drawings, and data covering any one model shall cease when the total paid by all users shall aggregate Fifty thousand ($50,000) dollars.

(e) All royalties received under licenses referred to in subdivision (e) of paragraph VII .

Each "Subscriber" who shall become a party hereto after the first day of July 1917 shall on the 10th day of January, April, July, or October next occurring pay to the "Company" those amounts which it would have been obliged to pay in accordance with the foregoing if it had been a "Subscriber" on July 1, 1917.

Moneys paid into the treasury of the "Company" pursuant to any provisions hereof shall not be or constitute or be deemed to be or constitute the assets, property, or profits of said "Company", but shall be received and disbursed by it as the agent and attorney in fact of the "Subscribers" in the manner and for the purposes herein mentioned.

IX. PAYMENTS BY THE "COMPANY"

Out of the moneys paid into the treasury of the "Company" pursuant to the provisions hereof, the following payments shall be made by the "Company" on the 20th days of January, April, July, and October in each year, to wit:

(a) To the Wright-Martin Aircraft Corporation One hundred and thirty-five dollars ($135) on each airplane, with or without engine, with reference to which payments shall have been made in accordance with subdivisions (a) and (e) of paragraph VIII hereof, during the preceding three calendar months, until U. S. Patent No. 821393, issued May 22, 1906, shall have expired, or until the aggregate sum of Two million ($2,000,000) dollars shall have been paid to the said Wright-Martin Aircraft Corporation when all payments to it hereunder shall cease, except as hereinafter provided.

(b) To the Curtiss Aeroplane and Motor Corporation Forty dollars ($40) on each airplane, with or without engine with reference to which payments shall have been made in accordance with subdivisions (a) and (e) of paragraph VIII hereof, during the preceding three calendar months, until such time as the Wright-Martin Aircraft Corporation shall have been paid in full as provided for

Digitized by Google

in subdivision (a) of this paragraph, after which there shall be paid to the Curtiss Aeroplane and Motor Corporation at the times herein mentioned the sum of One hundred and seventy-five dollars ($175) on each of said airplanes until the aggregate sum of Two million ($2,000,000) dollars shall have been paid to it or until U. S. Patent No. 1203550 issued October 31st, 1916, shall have expired, when all payments to it hereunder shall cease, except as hereinafter provided.

(c) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" with relation to the use of after acquired patents in accordance with subdivisions (c) and (e) of paragraph VIII hereof.

(d) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" on account of the use of specifications, drawings, and data as provided in paragraph VI and in subdivision (d) of paragraph VIII hereof, but any royalty payment received from outside manufacturers shall be distributed as though received from "Subscribers."

(e) To any "Subscriber" who shall have granted licenses to others than "Subscribers", as provided in paragraph IV, the royalties received under such licenses which are not required for payments provided for in subdivisions (a), (b), and (c) of this paragraph.

Out of the balance of said moneys paid into the treasury of the "Company" under this agreement, the "Company" may retain and use sufficient to cover its operating expenses and to create such fund as, in the judgment of the Board of Directors of said "Company", shall be necessary and proper for the further development of the airplane art and industry, and the purchase of patents and rights for the benefit of the "Subscribers" hereto.

If after making the payments and reservations herein provided for, any surplus or balance remains out of the funds so paid in the treasury of the "Company", the same shall be distributed by the "Company" from time to time, among those "Subscribers" who have contributed to said moneys, in proportion to their respective contributions under subdivisions (a) and (b) of paragraph VIII other than those required for payments under subdivisions (a) and (b) of this paragraph IX.

X. BREACH OF AGREEMENT

In the event that any "Subscriber" is claimed by the "Company", or any other "Subscriber", to be in default in the performance of any of its obligations hereunder, and such claimed default continues after thirty days' notice in writing, by the "Company" or any "Subscriber" hereto, to the "Subscriber" claimed to be in default, then the Board of Arbitration, hereinafter provided for, shall determine whether there has been such specified default, and if such default is found to exist, shall fix the time within which it must be repaired, and shall assess such damages and impose upon the "Subscriber" in default such other requirements (including the forfeiture of its stock and license) as may seem to the said Board of Arbitration to be proper under the circumstances. Each "Subscriber" covenants and agrees that it will pay such damages and comply with such requirements as may be specified by the said Board of Arbitration.

Nothing contained in this paragraph shall deprive the "Company" of the power to make, execute, and deliver licenses under the patents or patent rights owned and controlled by any defaulting "Subscriber", or to which the "Subscriber" may be entitled, at the time he ceases to be a stockholder or "Subscriber", nor deprive other than defaulting "Subscribers" of any right which they may have received to the use of the said patents or patent rights.

IX. WITHDRAWAL FROM AGREEMENT

Any "Subscriber" may withdraw from this agreement at any time after ten years from the date hereof, on giving to the "Company" written notice of its election so to do and on fulfilling all of its obligations up to the date of such withdrawal. But no withdrawal shall relieve the other parties and other "Subscribers" from their obligations to each other hereunder, nor deprive them of their rights acquired under the patents and patent rights owned or controlled by the withdrawing "Subscriber" at the time of withdrawal, all of said patents and patent rights remaining under this agreement, but such withdrawing "Subscriber" shall cease to have any rights under the patents of the other "Subscribers" hereto, or any other right under this agreement, from and after such withdrawal.

Digitized by Google

XII. REPURCHASE OF STOCK

In the event of the death of any person who is a stockholder in the "Company", or in the event of the dissolution of any corporation or firm which is a stockholder therein, or in the event of the bankruptcy or insolvency of any such stockholders, or in the event of withdrawal under paragraph XI hereof, the "Company" shall have the right to purchase for the benefit of the other "Subscribers" the stock held by such person, firm, or corporation at a sum not to exceed the distributive share or shares of such stockholder in the funds held by the "Company", and the license or licenses issued to such stockholder shall be surrendered to the "Company" and cancelled.

XIII. ARBITRATION OF CLAIMS AND DISPUTES

In case of any dispute or controversy between the "Subscribers" hereto, or between the "Subscribers" and the "Company", or in case of a claim by a "Subscriber" for special compensation for licenses under patents or rights hereafter acquired by it, or in case of breach of this agreement, the said dispute, controversy, claim, or breach shall, within thirty days after a "Subscriber" or "Subscribers" shall have given notice to the "Company" or the "Company" shall have given notice to the "Subscribers" thereof, be referred to a board of disinterested Arbitrators consisting of three persons, for determination.

In the case of a claim for special compensation, one member of such Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" making the claim, and the third by the other two arbitrators.

In the case of any dispute between the "Company" and a "Subscriber" or "Subscribers", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" (or if more than one "Subscriber" is involved in the same dispute, then by a majority of those so involved), and the third by the other two arbitrators.

In case of a breach of this agreement asserted by the "Company" or a "Subscriber" against another "Subscriber", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" against whom the assertion of breach is made, and the third by the other two arbitrators.

If either the Board of Directors or the "Subscribers" fail to appoint a member of the Board of Arbitration within the time specified, the other party or parties may appoint such member or fill such vacancy.

The decision of a majority of the members of said Board upon all matters submitted to them for adjudication shall be final and binding upon all the parties hereto.

XIV. RELEASE TO "SUBSCRIBERS"

The "Subscribers" hereby waive and release any and all claims which they, or any of them, may have had against each other for damages and profits on account of any infringement or alleged infringement, prior to July 1, 1917, of any patent included within this instrument in the manufacture, sale, or use of airplanes.

XV. BINDING UPON PARTIES, CONTROLLED COMPANIES, LEGAL REPRESENTATIVES, ETC.

This agreement is binding upon the parties hereto and their several successors, legal representatives, and assigns, but shall enure to the benefit of only their several successors in business. Each "Subscriber" agrees that all persons, firms, and corporations now or hereafter controlled by it, and engaged in the manufacture of airplanes, or owning or controlling United States airplane patents, shall be caused to execute this agreement.

XVI. EXECUTION OF AGREEMENT

This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

LICENSE

License granted this _____ day of _____ 1917, by the _____ _____ (hereinafter called the Licensor), to _____ _____ (hereinafter called the Licensee).

Whereas the Licensor and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called "Subscribers"), heretofore entered into a certain agreement dated July 24, 1917, entitled "Cross License Agreement" (a copy of which is hereto annexed), wherein and whereby the Licensor agreed to grant certain licenses to the other "Subscribers"; and

Whereas the said agreement also authorized and empowered the Manufacturers Aircraft Association, Inc., as the agent and attorney in fact of the Licensor, to make, execute, and deliver such licenses in the name of the Licensor; and it is desired to execute the powers therein granted: Now, This License

Witnesseth, That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensor does hereby give and grant unto the said Licensee the unrestricted but non-exclusive license to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by it, or by any firm, corporation, or association owned or controlled by it, or under which it or any such firm, corporation, or association have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for apply to or include the use of said patents in their application to other than airplanes; and except further, that no licenses are hereby granted under the Dunne patents, No. 975403, issued November 15, 1910, and No. 1003721, issued September 19, 1911, the rights under which are held by the Burgess Company.

The patents, the patents to issue on inventions, and the agreements with reference to which the Licensor has a right to grant licenses at the present time, and which are intended to be included in this license are set forth in Schedule "A", hereto annexed.

2. This license shall run to the full end of the term of the Letters Patent under which the license is or is to be granted, and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner set forth in the "Cross License Agreement" hereinbefore referred to.

3. This license is made subject to all the terms, conditions, covenants, and agreements contained in said "Cross License Agreement", which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this instrument to be executed as of the day and year first above written.

By MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

FIRST SUPPLEMENTAL CROSS-LICENSE AGREEMENT

THIS SUPPLEMENTAL AGREEMENT, made this_____day of_____ _____1918, between the Manufacturers Aircraft Association, Inc., a New York Corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers") as are and shall become stockholders of the said "Company", in the manner and under the conditions provided in the By-laws thereof (which for the purposes of this agreement are made a part hereof), parties of the second part;

Whereas an agreement dated the 24th day of July 1917 was entered into between the "Company' and certain "Subscribers", wherein and whereby it was agreed, among other things, that the "Company" should issue licenses to said "Subscribers" to manufacture, sell, and use airplanes embodying the

Digitized by Google

patents owned and controlled by the "Subscribers", and that the "Subscribers" should pay, as a royalty for such licenses, for the use of the patents now owned or controlled by them, the sum of Two Hundred ($200), dollars upon each of said airplanes; and

Whereas it is desired to modify said agreement and to reduce the amount of the royalty which said "Subscribers" shall be obliged to pay for the use of said patents upon airplanes sold and delivered by them to the United States Government, during the period of the present war with the Imperial German Government: Now, therefore, this agreement Witnesseth:

That for and in consideration of the premises, covenants, and conditions herein contained and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves: It is covenanted and agreed, as follows:

First. That on the 10th days of January, April, July, and October, in each year, each "Subscriber" shall report to the "Company" the number of airplanes (with or without engines) sold and delivered by it, during the three preceding calendar months, to the United States Government: (1) Under flat-price contracts entered into prior to April 1st, 1918; (2) Under flat-price contracts entered into after March 31, 1918; (3) Under cost-plus contracts on which deliveries were made prior to January 1st, 1918, unless the same have been heretofore reported; (4) Under cost-plus contracts on which deliveries have been or shall be made after December 31, 1917.

Second. On the 10th days of January, April, July, and October, in each year, each "Subscriber" shall pay into the treasury of the "Company" on each airplane (with or without engines) delivered to the United States Government by it during the three preceding calendar months, the following sums of money, to-wit: (1) Two hundred ($200) dollars on each airplane which has been or shall be delivered under flat-price contracts entered into prior to April 1st, 1918; (2) One hundred ($100) dollars on each airplane which shall be delivered under flat-price contracts entered into after March 31, 1918; (3) Two hundred ($200) dollars on each airplane delivered prior to January 1st, 1918, under cost-plus contracts; and (4) One hundred ($100) dollars on each airplane which has been or shall be delivered after December 31, 1917, under cost-plus contracts. Said payments to be made until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation shall have been paid the aggregate sum of Two million ($2,000,000) dollars as provided for in paragraph "Third" hereof.

Third. Out of the moneys paid into the "Company" pursuant to the provisions of paragraph "Second" hereof, the following payments shall be made by the "Company", on the 20th days of January, April, July, and October, in each year, to-wit: To the Wright-Martin Aircraft Corporation Sixty-seven and one-half per cent (67½%) of the amount received on each airplane (with or without engines), and to the Curtiss Aeroplane and Motor Corporation Twenty per cent (20%) of the amount received on each airplane with or without engines). Said payments shall be made until the sums paid to the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation under and pursuant to the terms of this supplemental agreement and the original agreement of July 24th, 1917, and from any other source paying royalties to the Manufacturers Aircraft Association, shall amount in the aggregate to Two million ($2,000,000) dollars, when and after which time the said "Subscribers" shall not be obliged to pay any royalties for the use of the patents now owned or controlled by the "Subscribers" or the "Company" in any airplane sold and delivered by them to the United States Government during the period of the present war with the Imperial German Government.

Fourth. Except as herein modified the original agreement of July 24th, 1917, shall be and remain in full force and effect between the parties thereto and all other persons, firms, or corporations who may become "Subscribers" thereto, it being understood, however, that such sums as are paid to the Wright-Martin Aircraft Corporation and Curtiss Aeroplane and Motor Corporation pursuant to the provisions of this supplemental agreement shall be credited upon and shall constitute a part of the moneys which they are entitled to receive under and pursuant to the provisions of paragraph IX. of said original agreement.

Fifth. Nothing herein contained shall be taken, considered, or construed as fixing the reasonable value of the royalties to be paid for the use of the patents now owned or controlled by the "Subscribers." The price herein agreed upon for royalties upon airplanes furnished during the present emergency to the

Digitized by Google

United States Government is so fixed for the sole purpose of enabling the Government to acquire airplanes manufactured under said patents upon a preferential basis during the period of the present war.

Sixth. This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

In Witness Whereof the parties hereto have executed this instrument as of the day and year first above written.

SECOND SUPPLEMENTAL CROSS-LICENSE AGREEMENT

This supplemental agreement, made this 12th day of January 1923, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers") as are and shall become stockholders of the said "Company", in the manner and under the conditions provided in the By-Laws thereof (which for the purpose of this agreement are made a part hereof), parties of the second part;

Whereas an agreement dated the 24th day of July 1917 was entered into between the "Company" and certain "Subscribers", which agreement was amended by supplemental agreement dated the 19th day of April 1918, between the same parties; and

Whereas, it is desired to modify the said agreement as hereinafter set forth:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained, and other good and valuable considerations moving between the "Company" and each of the "Subscribers hereto, and between the "Subscribers" themselves: It is covenanted and agreed, as follows:

First. That, anything in said cross-license agreement, as amended, to the contrary notwithstanding, particularly in Paragraph IX of said cross-license agreement, the "Company" may retain and use, for the purposes set forth in Paragraph IX of said cross-license agreement, up to twelve and one-half percent (12½) of such amounts as may be paid to the "Company", on or after the 10th day of October 1922, with relation to the use of after-acquired patents in accordance with Subdivisions (c) and (e) of Paragraph VIII of said cross-license agreement;

Second. That, anything in said cross-license agreement, as amended, to the contrary notwithstanding, particularly in Paragraph IX of said cross-license agreement, the "Company" may retain and use, for the purpose set forth in Paragraph IX of said cross-license agreement, up to twelve and one-half percent (12½%) of that part of any amount paid to the "Company" on or after the 10th day of October 1922, in accordance with Subdivision (e) of Paragraph VIII as is not required for the payments provided for in subdivisions (a), (b), and (c) of Paragraph IX of said cross-license agreement.

Third. Except as herein modified, the original agreement of July 24, 1917, as amended April 19, 1918, shall be and remain in full force and effect between the parties thereto and all other persons, firms, or corporations who may become "Subscribers" thereto.

Fourth. This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

THE AMENDED CROSS-LICENSE AGREEMENT OF DECEMBER 31, 1928

This agreement, made this 31st day of December 1928, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company") party of the first part, and each person, firm, corporation, or association (hereinafter called the "Subscriber" or "Subscribers") as are and shall become stockholders of the said "Company" in the manner and under the conditions provided in the By-Laws thereof (which for the purpose of this Agreement are made a part hereof), parties of the second part:

Whereas an Agreement (hereinafter called the original Cross-License Agreement) dated the 24th day of July 1917, was entered into between the "Company" and certain "Subscribers", which Agreement was amended by a Supplemental Agreement dated the 19th day of April 1918, between the same parties, and which Agreement was further amended by a second Supplemental Agreement dated the 12th day of January 1923, between the same parties, and

Whereas the parties hereto are interested in the manufacture, sale, and use of airplanes, as hereinafter defined, and desire to promote and develop the industry in which they are engaged, and to encourage and advance the art applicable thereto; and

Whereas the said development and advancement, prior to the execution of the original Cross-License Agreement, was not capable of complete accomplishment because of the existence of certain United States patents claimed to be basic in their nature, upon which suits have been brought, or threatened, for alleged infringement and for the collection of royalties and damages in connection therewith; and

Whereas it is desired to prevent and avoid such litigations or threatened litigations in the future and to give to all of the "Subscribers" the right to manufacture, sell, and use airplanes embodying the inventions of each of the "Subscribers" and to that end it is desired that licenses be granted as herein expressed; and

Whereas on account of conditions which did not exist and which were not anticipated at the date of execution of said original Cross-License Agreement, nor at the date of execution of the Supplemental Agreements of April 19, 1918, and January 12, 1923, respectively, and in an effort to better serve the art and industry as they now exist, it is desired to further modify and amend said original Cross-License Agreement as hereinafter set forth:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained, and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves:

It is covenanted and agreed: That the said original Cross-License Agreement as amended by the Supplemental Agreements of April 19, 1918, and January 12, 1923, anything therein contained to the contrary notwithstanding, shall from December 31st, 1928, which is fixed as the date of execution of this Agreement, be modified and amended to read henceforth as follows:

I. DEFINITIONS

The word "Airplane" as used in this agreement shall be understood to mean any form of heavier-than-air craft, using wing surfaces for sustaining it, and to include such indirect power plant appurtenances as radiators, oil-coolers,

Digitized by Google

fuel and oil tanks, and motor controls; but not to include the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The words "Airplane patent", as used in this agreement, shall be understood to mean any patent covering inventions for or capable of use in or in connection with airplanes, including such indirect power plant appurtenances as radiators, oil-coolers, fuel and oil tanks, and motor controls; but not including the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The words "selling price", as used in this agreement, shall be understood to mean the manufacturer's regular selling price of an airplane, completely equipped according to contract, if and when delivered under formal written contract, or in the absence of such contract, a completely equipped airplane ready to operate, as above defined, minus the then prevailing selling price of the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears, irrespective of any and all discounts and rebates of whatsoever character.

II. LICENSES AND POWERS GRANTED

The "Subscribers" grant, agree to grant, and cause to be granted to each other, licenses to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them or any of them, or by any firm, corporation, or association owned or controlled by them or under which they or any of them, or any such firm, corporation, or association, have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall said rights or the license herein provided for, apply to or include the use of said patents in their application to other than airplanes.

All licenses provided for herein shall run to the full end of the term of the letters patent under which the license is or is to be granted and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner hereinafter stated.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them and in their respective names, to make and execute licenses in writing in the form hereto annexed, and to deliver the same to those of the "Subscribers" who, at the time, are stockholders of the "Company" not in default hereunder and who shall have executed an agreement in writing of like tenor to this; and to enforce said licenses and any and all other obligations (including the obligation to make payments) of the "Subscribers" under this Agreement and the "Subscribers" hereby give and grant unto said "Company" as full, complete, and ample power and authority in the premises as the "Subscribers" themselves now have and possess.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them in their respective names, to make and execute licenses to the Government of the United States and/or the various branches, bureaus, and departments thereof, for the use by the Government and/or the various branches, bureaus, and departments thereof the patents covered by this Agreement, upon the agreement by the Government of the United States and/or the various branches, bureaus, and departments thereof, to pay to the "Company" the rates of royalty fixed in paragraph VII hereof, and to demand and receive of the Government of the United States and/or the various branches, bureaus, and departments thereof, royalties due the "Company" and to give the said Government of the United States and/or the various branches, bureaus, and departments thereof, receipts for royalties so collected, and to disburse the royalties so received in the same manner as the "Company" is herein authorized to disburse the royalties received by it from the "Subscribers" hereto.

All licenses provided for herein, when made, executed, and delivered in accordance with the provisions hereof, shall have the same force and effect as if they had been executed and delivered by the "Subscribers" themselves.

Digitized by Google

III. COVENANTS OF FURTHUR ASSURANCE

(*a*) Each "Subscribed" now or hereafter, having rights under any United States airplane patent or invention, of such character that it has legal right and power to procure the grant of rights thereunder to others, but is not itself empowered to grant such rights, covenants to procure the execution of such further instrument as may be necessary to empower the "Company" to grant rights under such patent, or with reference to such invention, to the extent and in the manner herein provided.

(*b*) Each "Subscriber" covenants that it will not contract for or obtain any rights under any such patent or invention in such manner that its owner would be prevented from granting to other "Subscribers" hereto similar rights on the same terms unless the "Subscriber" obtains, at the same time, the further privilege to grant rights under said patent or said invention, whereby the same may and will be brought under the operation of this instrument.

IV. COVENANTS AGAINST OTHER LICENSES

Each "Subscriber" covenants that it has not heretofore and will not hereafter enter into any contract or arrangement, whereby its privileges under United States airplane patents, issued or to be issued, inventions, and rights, owned or controlled by it, have been or shall be diminished or surrendered so as to exclude or restrict the operation of this instrument in respect thereto. Each "Subscriber" further covenants that it will not grant licenses under any such patents for use in airplanes, with reference to which it is receiving royalties hereunder, to any other person, firm, or corporation on more favorable, or lower terms of royalty, than those herein provided, or which may become more favorable or lower during the term of such license.

V. AFTER-ACQUIRED PATENTS

When a "Subscriber" shall hereafter acquire a United States airplane patent, or any right thereunder, he shall be entitled to compensation for the use thereof if the patent or patent right covers an invention which secures the performance of a function not before known to the art or constitutes an adaptation for the first time to a commercial use of an invention known to the industry to be desirable of use but not used because of lack of adaptation, or is otherwise of striking character or constitutes a radical departure from previous practice, or if either the price paid therefor or the amount expended in developing the same is such as to justify such compensation, provided that at the time said patent or patent right is reported to the "Company" as required in subdivision (*b*) of Paragraph VI, the "Subscriber" claims such compensation and states the grounds on which such claim is based. Such report and claims shall be submitted to a Board of Arbitration to be selected in the manner provided for in Paragraph XIV hereof, which Board shall determine whether such compensation shall be paid, and if so, the total amount thereof and the rate of royalty, or other payments which shall be paid (toward such compensation) by each "Subscriber" upon the issuance of a license under said patent and the use by any "Subscriber" of the subject matter covered by said patent, and shall also fix the time or times when said royalties or other amounts shall be paid. Licenses shall be issued to each "Subscriber" as a matter of course, through the offices of the "Company" within thirty days (30 days) after the rendition by such Board of Arbitration of its final report, whether or not compensation, under such after-acquired patent is or is not required to be paid.

The following reports in writing shall be rendered to the "Company" by each "Subscriber" at the time or times hereinafter set forth:

(*a*) At the time of the execution of this Agreement each "Subscriber" shall report all United States airplane patents and inventions together with serial numbers and filing dates of all pending applications for such patents and all rights under such patents and inventions then owned or controlled by it, but no omission from such report shall exclude the patent, application or right so omitted from the operation of this Agreement.

(*b*) Within thirty days after the acquisition by any "Subscriber" of any United States patent (other than patents to be issued upon inventions now owned by it) or right within the scope of this Agreement, each such "Sub-

Digitized by Google

scriber" shall report such acquisition together with all the facts known to it as to such patent or right and its manner of acquisition. If such "Subscriber" claims that additional compensation should be paid to it for licenses under such patent or right, it shall so claim in its report.

(*c*) On the 10th days of January, April, July, and October, in each year, each "Subscriber" shall report the number of airplanes (with or without engines) sold and delivered by it, together with the names of the purchasers, the selling price of each airplane, and the dates of delivery, or the number of airplanes put into use for other than experimental or development purposes, and the number of airplanes (with or without engines) shipped out of the United States, during the preceding 3 calendar months.

(*d*) Each License to other than "Subscribers" as provided in Paragraph IV hereof, shall be reported within thirty days after its delivery.

(*e*) Each suit instituted against infringers of the patents licensed hereunder shall be reported in a reasonable time.

The first report under sub-division (*c*) hereof shall be made by each "Subscriber" on the tenth day of January, April, July, or October first occurring after it has become a "Subscriber" hereto and shall cover the period from December 31, 1928, to the first day of the month in which the report is due.

Each of the "Subscribers" hereto shall keep separate books of account showing all business done under or subject to the operation of this Agreement. The "Company" may at any time have a New York Certified Public Accountant to be designated by it, audit such books of account of the "Subscriber" together with such other accounts as the accountant may deem necessary, in order to verify or correct the report herein provided for, and the "Company" shall have such audit made when any "Subscriber" so demands. Such audit, however, shall be limited to ascertaining whether the reports herein provided for are properly made and to correcting the same, if necessity for correction shall appear. No information obtained from any such audit shall be reported by the accountant or given to any of the parties hereto, except as it directly applies to the reports required by this Agreement.

VII. PAYMENTS TO THE "COMPANY"

Each "Subscriber" agrees to pay into the treasury of the "Company" on the 10th days of January, April, July, and October in each year the following sums of money, to wit:

(*a*) On each airplane, with or without engine, required to be reported as provided, in sub-division (*c*) of Paragraph VI hereof, the sum of two per cent (2%) of the selling price of such airplane, with a maximum of Two Hundred Dollars ($200) on any one airplane regardless of its cost or selling price until such time as the Curtiss Airplane & Motor Company, Inc., shall have been paid the aggregate sums provided for in Paragraph VIII hereof, or until United States Patent No. 1,203,550 issued October 31, 1916, shall have expired.

(*b*) On each airplane, with or without engine, required to be reported as provided for in sub-division (*c*) of Paragraph VI hereof, such sum not to exceed one-quarter of one per cent of the selling price of such airplane, but in no case to exceed twenty-five dollars ($25.00) per airplane, as the Board of Directors of the "Company" may, from time, to time, fix and determine as payable after October 31, 1933, or after the above mentioned aggregate sums shall have been paid to the Curtiss Airplane & Motor Company, Inc.

(*c*) Such amount or amounts as the Board of Arbitration may specify as special compensation for after acquired patents as provided in Paragraph V hereof, and required to be reported in sub-division (*b*) of Paragraph VI.

(*d*) All royalties received under Licenses referred to in sub-division (*d*) of Paragraph VI.

(*e*) All monies received as the result of suits reported under sub-division (*e*) of Paragraph VI less deductions for actual cost to the Subscriber of such suit.

Each "Subscriber" who shall become a party hereto after the thirty-first day of December, 1928, shall on the 10th day of January, April, July, or October next thereafter occurring pay to the "Company" those amounts which it would have been obliged to pay in accordance with the foregoing if it had been a "Subscriber" on December 31, 1928.

Monies paid into the treasurer of the "Company" pursuant to any provisions hereof shall not be or constitute or be deemed to be or constitute the assets,

Digitized by Google

property, or profits of said "Company" but shall be received and disbursed by it as the agent and the attorney in fact of the "Subscriber" in the manner and for the purposes herein mentioned.

VIII. PAYMENTS BY THE "COMPANY"

Out of the monies paid into the treasury of the "Company" pursuant to the provisions hereof and of the predecessor agreements hereinabove mentioned, the following payments shall be made by the Company on the 20th days of January, April, July, and October in each year, to wit:

(*a*) To the Curtiss Aeroplane & Motor Company, Inc., eighty-seven and one-half percent (87½%) of all sums received on account of each of said airplanes with reference to which payments have been or shall be made in accordance with sub-divisions (*a*) and (*d*) of Paragraph VII hereof, until the payments so made to Curtiss Airplane & Motor Company, Inc., under the original Cross-License Agreement, when increased by the payments made after the execution of this Amended Agreement, shall aggregate the sum of Two Million Dollars ($2,000,000) or until the United States Patent No. 1203550 issued October 31, 1916, shall have expired, when all payments to it hereunder shall cease, except as hereinafter provided.

(*b*) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" with relation to the use of after acquired patents in accordance with Sub-division (*c*) of Paragraph VII, subject to the reservation in sub-division (*a*) of Paragraph IX.

(*c*) To any "Subscriber" who shall have granted licenses to other than subscribers, as provided in Paragraph IV, the royalties received under such licenses which are not required for payments provided for in sub-division (*a*) of this Paragraph VIII, subject to the reservation of sub-division (*b*) of Paragraph IX.

IX. MONEYS RETAINED BY THE COMPANY

(*a*) The "Company" may retain and use, for the purposes set forth in sub-division (*c*) of this Paragraph IX up to twelve and one-half per cent (12½%) of such amounts as may be paid to the "Company" with relation to the use of after acquired patents in accordance with sub-division (*c*) of Paragraph VII.

(*b*) The "Company" may retain and use for the purposes set forth in sub-division (*c*) of this Paragraph IX, up to twelve and one-half per cent (12½%) of that part of any amount paid to the "Company" on account of direct licenses given and reported in accordance with sub-division (*d*) of Paragraph VI.

(*c*) Out of the balance of said moneys paid into the treasury of the "Company" under sub-division (*a*) of Paragraph VII of this Agreement, and not paid out by the Company under sub-division (*a*) of Paragraph VIII, the "Company" may retain and use sufficient to cover its operating expenses and to create such fund as, in the judgment of the Board of Directors of said "Company" shall be necessary and proper for the further development of the airplane art and industry, and the purchase of patents and rights for the benefit of the "Subscribers" hereto.

X. DISPOSITION OF SURPLUS

If, after making the payments and reservations herein provided for, any surplus or balance remains out of the funds so paid into the treasury of the "Company" the same shall be distributed by the "Company" from time to time, among those "Subscribers" who have contributed to said moneys, in proportion to their respective contributions under sub-divisions (*a*) and (*b*) of Paragraph VII other than those required for payments under this Paragraph X.

XI. BREACH OF AGREEMENT

In the event that any "Subscriber" is claimed by the "Company" or any other "Subscriber" to be in default in the performance of any of its obligations hereunder, and such claimed default continues after thirty days' notice in writing, by the "Company" or any "Subscriber" claiming the default, then the Board of Arbitration, hereinafter provided for, shall determine whether there has been such specified default and if such default is found to exist, shall fix the time within which it must be repaired, and shall assess such damages and impose upon the "Subscriber" in default such other requirements (includ-

Digitized by Google

ing the forfeiture of its stock and license) as may seem to the said Board of Arbitration to be proper under the circumstances. Each "Subscriber" covenants and agrees that it will pay such damages and comply with such requirements as may be specified by said Board of Arbitration.

Nothing contained in this Paragraph shall deprive the "Company" of the power to make, execute, and deliver licenses under the patents or patent rights owned and controlled by any defaulting "Subscriber" or to which the "Subscriber" may be entitled at the time to cease to be a stockholder or "Subscriber", nor deprive other than defaulting "Subscribers" of any right which they may have received to the use of the said patents or patent rights.

XII. WITHDRAWAL FROM AGREEMENT

Any "Subscriber" may withdraw from this Agreement at any time after one (1) year after executing and delivering it, providing that written notice of its election to do so shall be given to the "Company" at least thirty (30) days in advance of the date when the next quarterly report is required to be filed under sub-division (c) of Paragraph VI hereof and on fulfilling all of its obligations up to the date of such withdrawal, but no withdrawal shall relieve the other parties and other "Subscribers" from their obligations to each other hereunder, nor deprive them of their rights acquired under the patents and patent rights owned or controlled by the withdrawing "Subscriber" at the time of withdrawal, all of said patents and patent rights remaining under this Agreement, but such withdrawing "Subscriber" shall cease to have any rights under the patents of the other "Subscribers" hereto, or any other right under this Agreement, from and after such withdrawal.

XIII. REPURCHASE OF STOCK

In the event of the death of any person who is a stockholder in the "Company" or in the event of the dissolution of any corporation or firm which is a stockholder therein, or in the event of the bankruptcy or insolvency of such stockholders, or in the event of withdrawal under Paragraph XII hereof, the "Company" shall have the right to purchase for the benefit of the other "Subscribers" the stock held by such person, firm, or corporation at a sum not to exceed the distributive share or shares of such stockholder in the funds held by the "Company" and the license or licenses issued to such stockholder shall be surrendered to the "Company" and cancelled.

XIV. ARBITRATION OF CLAIMS AND DISPUTES

In case of any dispute or controversy between the "Subscribers" hereto, or between the "Subscribers" and the "Company" or in case of a claim by a "Subscriber" for special compensation for license under patents or rights hereafter acquired by it, or in case of breach of this Agreement, the said dispute, controversy, claim, or breach shall, within thirty days after a "Subscriber" or "Subscribers" shall have given notice in writing to the "Company" or the "Company" shall have given notice in writing to the "Subscribers" hereof, be referred to a board of disinterested arbitrators consisting of three persons, for determination.

In the case of a claim for special compensation, one member of such Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" making the claim and the third by the other two arbitrators.

In the case of any dispute between the "Company" and a "Subscriber" or "Subscribers" one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" (or if more than one "Subscriber" is involved in the same dispute, then by a majority of those so involved) and the third by the other two arbitrators.

In case of a breach of this Agreement asserted by the "Company" or a "Subscriber" against another "Subscriber", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company" another by the "Subscriber" against whom the assertion of breach is made and the third by the other two arbitrators.

Digitized by Google

If either the Board of Directors or the "Subscribers" fail to appoint a member of the Board of Arbitration within the time specified the other party or parties may appoint such member or fill such vacancy.

The decision of a majority of the members of said Board upon all matters submitted to them for adjudication shall be final and binding upon all the parties hereto.

XV. RELEASE TO "SUBSCRIBERS"

The "Subscribers" hereby waive and release any and all claims which they or any of them may have had against each other for damages and profits on account of any infringement or alleged infringement prior to December 31, 1928, of any patent included within this instrument in the manufacture, sale, or use of airplanes.

XVI. BINDING UPON PARTIES, CONTROLLED COMPANIES, LEGAL REPRESENTATIVES, ETC.

This Agreement is binding upon the parties hereto and their several successors, legal representatives, and assigns, but shall inure to the benefit of only their several successors in business. Each "Subscriber" agrees that all persons, firms, and corporations now or hereafter controlled by it and engaged in the manufacture of airplanes, or owning or controlling United States airplane patents, shall be caused to execute this Agreement.

XVIII. EXECUTION OF AGREEMENT

Nothing herein contained shall be construed to relieve either the "Company" or any "Subscriber" hereto of any act or obligation to be performed or any duty to be fulfilled under the terms and conditions of the original Cross-License Agreement, as amended April 19, 1918, and January 12, 1923, respectively, which act, obligation, or duty, as and of December 31, 1928, shall remain at such time unperformed or unfulfilled.

This Agreement may be executed by the "Subscriber" in any number of counterparts, but when so executed shall constitute but one and the same Agreement, and shall be as binding and of the same force and effect as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been dated December 31, 1928, which date shall be the date on which this Agreement becomes effective.

This Agreement of December 31, 1928, amending the original Cross-License Agreement of July 24, 1917, in turn amended by the Supplemental Agreements of 1918 and January 12, 1923, respectively, shall, for convenience, be referred to as "The amended cross-license agreement of December 31, 1928."

In witness whereof the parties hereto have executed this instrument as of the day and year first above written.

MANUFACTURERS AIRCRAFT ASSOCIATAON, INC.,

CERTIFICATE OF INCORPORATION OF MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

This is to certify that we, the undersigned citizens of the United States, all being of full age, and at least one of whom is a resident of the State of New York, desiring to form a stock corporation pursuant to the provisions of the business corporations law of the State of New York, do hereby make, sign, acknowledge, and file this instrument of writing for that purpose as follows:

First. The name of the proposed corporation is Manufacturers Aircraft Association, Inc.

Second. The objects and purposes for which it is formed are the following:

1. To manufacture, buy, sell, and deal in all kinds of aircraft, aircraft engines, and all parts and accessories used or useful in aircraft.

Digitized by Google

2. To acquire by purchase or otherwise, and sell and dispose of all kinds of personal property, including patents, patent rights, applications for patents and licenses and shop rights under patents, and to issue licenses, sublicenses, or cross-licenses under letters patent.

3. To acquire by purchase, lease, or otherwise any real property or any rights or privileges in real property which the company may deem necessary and proper for the purposes of its business.

4. To acquire and take over the good will, property, and assets and assume the liabilities of any person, firm, association, or corporation engaged in similar or kindred business for the purpose herein specified.

5. To acquire, purchase, hold, sell, and deal in or dispose of stocks, bonds, securities, and other evidences of debt of any other corporation, domestic or foreign, and issue in exchange therefor its stocks, bonds, or other obligations, and while the owner of any stocks, bonds, or other obligations to possess and exercise in respect thereto all right, powers, and privileges of individual owners or holders and to exercise any and all voting powers thereunder.

6. To establish and maintain in connection with the business of the corporation and as lawfully incidental thereto, laboratories for the purpose of the development and extension of the business herein referred to, together with such books of reference as may be required for said purposes.

7. To make and enter into all kinds of contracts, agreements, and obligations with any person, firm, or corporation for purchasing, acquiring, manufacturing, exchanging, or dealing in any article of personal property of any kind or nature, to the extent that the same may be permitted by the business corporations law.

8. To act as agent or attorney in fact or representative of firms, corporations, or individuals, and as such to develop, extend, and promote the business interests thereof.

9. To consolidate the business of this corporation with that of any corporation engaged in or authorized to conduct a similar business to that herein provided for insofar as the laws of the State of New York permit such consolidation.

10. To purchase, hold, and reissue the shares of its own capital stock in the manner authorized by statute.

11. Generally, to do every act and thing necessary, suitable, and proper for the accomplishment of any or all of the objects, the attainment of any or all of the purposes or in furtherance of any and all of the powers herein set forth, either alone or in association with any other corporation, firm, or individual, and to do any other act, thing, or things incident or appertaining to, or growing out of, or connected with the aforesaid business or powers, or any part or parts thereof, provided the same are not inconsistent with the business corporations law of the State of New York, under which this corporation is organized.

Third. The number of shares of capital stock that may be issued by the corporation is 100, which shall have no nominal or par value.

Fourth. The amount of capital with which said corporation will commence and carry on business is $1,000.

Fifth. The corporation may issue and sell its authorized shares from time to time for such consideration as shall be the fair-market value of such shares.

Sixth. The principal business office of the corporation shall be located in the Borough of Manhattan, city, county, and State of New York.

Seventh. The duration of said corporation shall be perpetual.

Eighth. The number of its directors shall be seven, but they need not be stockholders of said corporation. They may hold their meetings at their principal office in the State of New York, or at such other place or places within or outside of said State, which they may determine.

Ninth. The names and post-office addresses of the directors for the first year are as follows: Albert H. Flint, 500 West End Avenue, New York City, N. Y.; Benjamin S. Foss, Hyde Park, Boston, Mass., George H. Houston, 360 Riverside Drive, New York City, N. Y.; Harry B. Mingle, 233 Broadway, New York City, N. Y.; Frank H. Russell, Marblehead, Mass.; Harold E. Talbott, Jr., Dayton, Ohio; and John P. Tarbox, Buffalo, N. Y.

Tenth. The names and post-office addresses of the subscribers to this certificate, and the number of shares of stock which each agrees to take in the corporation are as follows: Joseph S. Ames, Baltimore, Md., one share; W. Benton Crisp, New York City, N. Y., one share; Albert H. Flint, New York City, N. Y.,

Digitized by Google

one share; George H. Houston, New York City, N. Y., one share; and John P. Tarbox, Buffalo, N. Y., one share.

In witness whereof we have made, signed, and acknowledged this certificate in duplicate, this 16th day of July, in the year 1917.

In the presence of:

JOSEPH S. AMES. [L. S.]
W. BENTON CRISP. [L. S.]
ALBERT H. FLINT. [L. S.]
GEORGE H. HOUSTON. [L. S.]
JOHN P. TARBOX. [L. S.]

[SEAL] ALBERT F. SMITH,
Notary Public, New York County,
Clerk's No. 419, Register's No. 9204.

Term expires March 30, 1919.

STATE OF NEW YORK,
County of New York, ss:

On this 16th day of July, in the year 1917, before me personally appeared Joseph S. Ames, W. Benton Crisp, Albert H. Flint, George H. Houston, and John P. Tarbox, to me known, and known to me to be the individuals described in and who executed the foregoing certificates, and they severally duly acknowledged to me that they executed the same.

[SEAL] ALBERT F. SMITH.
Notary Public, New York County,
Clerk's No. 419, Register's No. 9204.

Term expires March 30, 1919.
No. 48064 series B.

STATE OF NEW YORK,
County of New York, ss:

I, William F. Schneider, clerk of the county of New York, and also clerk of the supreme court for said county, the same being a court of record, do hereby certify that Albert F. Smith, whose name is subscribed to the deposition or certificate of the proof or acknowledgement of the annexed instrument, and thereon written, was, at the time of taking such deposition, or proof and acknowledgement, a notary public in and for such county, duly commissioned and sworn, and authorized by the laws of said State, to take depositions and to administer oaths to be used in any court of said State and for general purposes; and also to take acknowledgments and proofs of deeds, of conveyances for land, tenements, or hereditaments in said State of New York. And further, that I am well acquainted with the handwriting of such notary public and verily believe that the signature to said deposition or certificate of proof or acknowledgement is genuine.

In testimony whereof I have hereunto set my hand and affixed the seal of the said court and county, the 17th day of July 1917.

[SEAL] W. F. SCHNEIDER, *Clerk.*

BY-LAWS OF THE MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

(As Amended to February 16, 1931)

ARTICLE I. STOCKHOLDERS [1]

SECTION 1. *Qualification of Stockholders.*—To entitle a person, firm, or corporation to become a stockholder of this corporation, he or it, as the case may be, shall be [1] a responsible manufacturer of aircraft or aircraft engines, or parts and accessories thereof; or a responsible manufacturer who intends to become a bona fide producer of the same; or a manufacturer to whom the United States Government has given a contract for the construction of ten or more complete aircraft or aircraft engines; or any person, firm, or corporation owning a controlling United States patents relating to any of the foregoing.[1] No one becoming a stockholder of this corporation [1] shall, however, acquire, own, or hold at any time more than one (1) share of stock of the corporation.[1]

[1] Provision for Voting Trust Agreement, which expired by limitation in July 1925, omitted.

Digitized by Google

ARTICLE II. DIRECTORS

SECTION 1. *Directors.*—The affairs of the corporation shall be managed and controlled by a Board of Directors to consist of twelve persons, who shall be elected annually at the regular annual meetings of the stockholders and who shall serve for one year, or until their successors are elected.

SECTION 2. *Vacancies.*—Vacancies in the Board of Directors occurring during the year shall be filled by a majority vote of the remaining members of the Board at any regular meeting thereof, or at any special meeting called for the purpose of filling any such vacancies.

ARTICLE III. OFFICERS AND THEIR DUTIES

SECTION 1. *Officers.*—The officers of the corporation shall consist of a President, as many Vice-Presidents as the Board of Directors may from time to time deem necessary or expedient, a Treasurer and a Secretary. The Board may also elect or appoint at any time an Assistant Treasurer and Assistant Secretary, and such other officers, agents and employees as it may deem proper and for such periods as it may determine. The offices of Secretary and Treasurer may be held by one and the same person and the offices of Assistant Treasurer and Assistant Secretary may also be held by one and the same person.

SECTION 2. *Election of Officers.*—As soon as practicable after the election of the Board of Directors in each year, such newly elected Directors shall hold an Annual Meeting and elect a President from their number and also elect one or more Vice-Presidents, as provided in Section 1 of this Article, a Treasurer and a Secretary, all of whom shall serve for the ensuing year or until their successors are elected.

SECTION 3. *Vacancies.*—In the event of a vacancy in any of said offices, either by death, resignation, or otherwise, the same shall be filled by the Board of Directors at any regular or special meeting of said board.

SECTION 4. *The President—His Duties.*—The President shall preside at all meetings of the corporation and at all meetings of the Board of Directors. He, together with the Secretary, unless otherwise ordered by the Board of Directors, shall sign all contracts, deeds, leases, licenses, or other instruments or writings necessary for the due and proper conduct of the business of the corporation. He, together with the Treaurer, unless otherwise ordered by the Board of Directors, shall sign all certificates of stock, and bonds, issued by the corporation, and shall countersign all checks, drafts, notes, or bills which may be required for the purposes of the corporation. He shall have general supervision of the affairs of the corporation and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 5. *The Vice-Presidents—Their Duties.*—All Vice-Presidents shall have equal rank. In the absence of the President, they shall perform all the duties of the President and such other duties as may be required of them from time to time by the Board of Directors and as are required of them by the laws of the State of New York.

SECTION 6. *The Treasurer—His Duties.*—The Treasurer shall have charge of all moneys, bills, notes, and other evidences of debt of the corporation; shall deposit all moneys coming into his hands in the name of the corporation, and shall keep true and accurate books of account of all such moneys and other property of the corporation received by him. He, together with the President, unless otherwise ordered by the Board of Directors, shall sign all certificates of stock, and bonds, checks, drafts, and notes or bill issued by or required for the purposes of the corporation. He shall also perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York. He shall report from time to time to the Board of Directors or as often as may be required by said Board, concerning all matters pertaining to his office. He shall give a bond for the faithful discharge of the duties of his office in such amount as shall be fixed by the Board of Directors.

SECTION 7. *The Assistant Treasurer—His Duties.*—The Assistant Treasurer, in the absence of the Treasurer, shall perform all the duties of the Treasurer, and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York. He shall give a bond for the faithful discharge of the duties of his office in such amount as shall be fixed by the Board of Directors.

Digitized by Google

SECTION 8. *The Secretary—His Duties.*—The Secretary shall have charge of the corporate seal and shall attend all sessions of the stockholders and the Board of Directors; act as the clerk thereof and keep true and accurate records and minutes of all proceedings of said stockholders and Board in a book or books to be kept for that purpose. He, together with the President, unless otherwise ordered by the Board of Directors, shall execute all contracts, deeds, leases, licenses, or other instruments or writings necessary for the due and proper conduct of the business of the corporation. He shall send out all notices of meetings of stockholders and directors of the corporation, and shall perform such other duties as may be required of him by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 9. *The Assistant Secretary—His Duties.*—The Assistant Secretary, in the absence of the Secretary, shall perform all the duties of the Secretary, and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 10. *Compensation.*—The officers and directors of the corporation may receive by way of compensation for services rendered by them such salary or salaries as the Board of Directors of said corporation may from time to time approve.

ARTICLE IV. MEETINGS, QUORUMS, ETC.

SECTION 1. *Annual Meetings of Stockholders.*—There shall be an annual meeting of the stockholders of the corporation to be held at 11 A. M. on the last Friday in January of each year. At such meeting the stockholders may transact any and all business which may properly come before them, and shall elect the directors for the ensuing year in the manner hereinbefore set forth.

SECTION 2. *Annual Meetings of Directors.*—Immediately after the annual stockholders' meeting hereinbefore referred to, or as soon thereafter as may be convenient, there shall be held an annual meeting of the Board of Directors of the corporation. At such meeting said Board shall elect the officers for the ensuing year, and may transact any and all other business which may properly come before it.

SECTION 3. *Special Meetings of Stockholders.*—Special meetings of the stockholders shall be called at the request of holders of the stock owning at least ten (10) per cent. thereof, by the officers of the corporation, or any of them, to be held within fifteen (15) days after said request has been made, or by the President without request. The notice of the meeting shall be in writing, and signed by the President or a Vice-President, or the Secretary or an Assistant Secretary. Such notice shall state the purpose or purposes for which the meeting is called, the time and the place where the same is to be held, and a copy thereof shall be served either personally or by mail upon each stockholder of record entitled to vote at such meeting and to any stockholder who by reason of any action proposed at such meeting would be entitled to have his stock appraised if such action were taken, not less than ten (10) nor more than forty (40) days before the meeting. If mailed, it shall be directed to a stockholder at his address as it appears on the stock book unless he shall have filed with the Secretary of the corporation a written request that notices intended for him be mailed to some other address, in which case it shall be mailed to the address designated in such request.

SECTION 4. *Special Meeting of Board of Directors.*—The officers of the corporation, or any of them, upon the request of any two members of the Board of Directors, shall call a special meeting of said Board, to be held within five (5) days after the receipt of said request, and the Secretary shall give by mail and by telegraph to each member of said Board at his last known post office address, a notice of said meeting stating the purposes thereof, at least three (3) days before the date upon which such meeting is to be held. The President may, without request, upon like notice, call a special meeting of said Board.

SECTION 5. *Quorum of Stockholders' Meetings.*—At all meetings of stockholders, except where it is otherwise provided by law, it shall be necessary that stockholders representing in person or by proxy a majority of the capital stock, issued and outstanding, be present in order to constitute a quorum for the transaction of business.

SECTION 6. *Quorum of Directors' Meetings.*—At all meetings of the Board of Directors at least one-third of the number thereof shall be present to constitute a quorum for the transaction of business.

Digitized by Google

SECTION 7. *Failure to Perform Duty.*—Should any person whose duty it is to call a meeting at the time or times required by these by-laws, fail or refuse to do so, the meeting may be called by any other officer or director.

ARTICLE V. BALLOTING AND INSPECTORS

SECTION 1. *Balloting.*—At all meetings of the stockholders the voting shall be by ballot. At all meetings of the Board of Directors the voting may be viva voce.

SECTION 2. *Inspectors.*—The stockholders may at their annual meetings provided for in Section 1, of Article IV hereof, in each year, designate two (2) persons who shall act as inspectors of election for the ensuing year. Upon their failure so to designate inspectors, the Board of Directors may, at any time prior to election, designate the same. Upon the failure of both to so designate inspectors prior to any election, the President is authorized to make such designation.

ARTICLE VI. AMENDMENT

SECTION 1. These by-laws may not be amended, altered, or suspended by the Board of Directors, but only by stockholders at an annual or special meeting, by the affirmative vote of stockholders representing at least seventy-five (75) per cent, in amount of the stock then outstanding.[1]

CONTRACT BETWEEN MANUFACTURERS AIRCRAFT ASSOCIATION, INC., AND THE WAR AND NAVY DEPARTMENTS OF THE UNITED STATES GOVERNMENT GRANTING A NON-EXCLUSIVE LICENSE TO THE LATTER UNDER ALL AIRPLANE PATENTS EMBRACED WITHIN AND ACCORDING TO THE TERMS OF THE AMENDED CROSS-LICENSE AGREEMENT OF SAID ASSOCIATION

(Effective December 31, 1928)

Contract of the thirty-first day of December 1928, by and between MANUFACTURERS AIRCRAFT ASSOCIATION, INC., a New York Corporation, hereinafter termed Association, acting in behalf of its subscribers and in its own behalf, party of the first part, and the UNITED STATES OF AMERICA, represented by the Secretary of War and the Secretary of the Navy, hereinafter termed The Government, party of the second part, witnesseth:

WHEREAS, The Association controls and has power to grant licenses under certain United States patents covering important inventions relating to aircraft; as listed and shown in appendix A hereto attached, and has been authorized to act herein; and

WHEREAS the use of several of these patented inventions is necessary in the successful operation of airplanes or hydro-airplanes, the term planes being hereinafter used to include airplanes, hydroairplanes, and flying boats; and

WHEREAS the Government has acquired or desires to acquire aircraft, using certain or all of the aforesaid inventions; and

WHEREAS all formal and informal Agreements between the Government and the Association relating to the period of the War for the licensed use of said patented inventions and for payment of royalties, were terminated on July 2, 1921, except only such matters as are in dispute in a certain action now pending in the United States Court of Claims entitled "Manufacturers Aircraft Association, Inc., vs. United States of America", which action covers the period both before and after July 2, 1921; and

WHEREAS the Government desires to secure licenses for the future use of said patented inventions under as favorable terms and conditions as is provided in the Amended Cross-License Agreement of the thirty-first day of December 1928, to which reference is made herein.

NOW THEREFORE, in consideration of the premises, covenants, and conditions herein contained, and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows, viz:

1. The Association hereby grants to the Government a non-exclusive license to make, or cause to be made, and use and sell in the United States, its territories and possessions during the term of this contract and thereafter to

[1] Provisions for Voting Trust Agreement, which expired by limitation in July 1925, omitted.

Digitized by Google

use and to sell airplanes under any and all of such airplane patents as defined in said Cross-License Agreement as are enumerated in Appendix A of the Amended Cross-License Agreement, dated December 31, 1928, copy of which is attached hereto and by reference made a part hereof and under all other patents which have been or may be reported to or acquired by or come into the control of the Manufacturers Aircraft Association, Inc., and/or Subscribers thereto; Provided, however, that no licenses are so granted to the Government hereunder in patents reported to the Association with a claim for extra compensation under Paragraph V of said Amended Cross-License Agreement; Provided, further, that an option is hereby granted to the Government to acquire licenses under those patents so reported on the same terms as granted to said Subscribers.

2. The Government agrees to pay for such use of the inventions described in any and all of said patents, a sum equal to two per cent (2%) of the cost or purchase price of such airplanes, as it may either make or acquire, as provided in Paragraph 1, above, provided that the Government shall not be required to pay, nor shall any obligation accrue to pay, royalties on airplanes upon which members or nonmembers of the Manufacturer Aircraft Association, Inc., have paid or have agreed to pay royalties; provided further, however, that in no instance shall said royalty exceed the sum of Two Hundred Dollars ($200) per airplane, regardless of what the cost or price thereof may amount to; and provided that the cost or price thereof as used herein shall be understood to mean the price paid to a manufacturer, if procured from a manufacturer, completely equipped, ready to operate, including all parts of airplanes and accessories used therein except the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears, and if such airplane is built or manufactured by the Government the cost shall be the amount expended in the direct construction thereof, including the cost of materials entering therein completely equipped ready to operate including all parts of airplanes and accessories used or useful therein, except the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The Government agrees to pay said royalties for use of the inventions described in any and all of said patents until the maximum payments provided for in the Amended Cross-License Agreement shall have been made or until Patent No. 1,203,550 shall expire, on the 31st day of October 1933, after which the Government shall enjoy the license herein conveyed and granted without the payment of any further royalties.

The word "use" as employed herein shall be held to include the manufacturing of planes by the Government or through the procurement of the Government or the purchases by the Government of planes from others.

3. For the purpose of carrying out the above, the Government shall on the tenth day of April, July, October, and January in each year make reports to the Association of the number of planes manufactured or otherwise acquired by its War and Navy Departments during the preceding three months.

Upon the receipt of each report the Association shall forthwith render invoices to said Departments in accordance with said reports and the terms and provisions of Paragraph 2 of this contract. The Government agrees to receive such invoices and to authorize and instruct its disbursing officers to make payments accordingly.

Payments under this contract shall be made to the Association and when payments are so made and received they shall constitute and be accepted for and on behalf of the owners of the patents by the Association as full and complete compensation as to the airplanes to which they apply for licenses to use any and all of the said patents as set out hereinbefore.

The Association shall disburse and account for each of such payments in precisely the same manner as if the same had been made to the Association under the Cross-License Agreement by a Subscriber thereto and as if the royalty for each plane had been received from a Subscriber by the Association at the time when such plane was acquired by the Government.

The Association shall furnish to officers of the Government when required a statement by a certified public accountant of the total amount of royalties paid by it to each of the owners of the patents under the Cross-License Agreement and the Amended Cross-License Agreement, and when the maximum payments provided thereunder for the owners of the patents have been completed no further payments of royalties on the part of the Government shall be demanded or paid.

Digitized by Google

4. The Government shall have the right to terminate this contract by serving a written notice upon the Association at least five days before the beginning of each additional year; but in the absence of such action it is agreed that the provisions thereof shall be automatically renewed and continue in force until such a notice shall be served or the contract shall be terminated in accordance with the other provisions thereof; provided that, if upon demand by the United States to the Association and owners of the patents, the owners of the patents fail for ninety days to bring suit to enforce the rights of the patents herein licensed, all liability to pay royalties shall cease thereafter and until such suit is brought.

5. The Government does not admit, and is not to be understood as admitting, by virtue of the license hereunder, the validity of any of said Letters Patent heretofore or hereafter issued and is to be held free to dispute the validity of each and any of them in case the public interest should so require, save that this provision shall not be construed to give it any right, if such right be now otherwise lacking, to dispute validity in connection with any claims growing out of past operations under previous formal, informal, or implied contracts.

6. Any department, bureau, or independent establishment of the Government not signatory hereto may avail itself of the license herein granted upon the same terms as the War and Navy Departments upon written notice to the Association of its intention so to do and by paying the royalties prescribed herein and otherwise complying with the terms hereof.

7. No Senator or member or delegate to Congress, officers of the Army or the Navy, nor any person holding any office or appointment under the Army or the Navy Department is or shall be admitted to any share or part of this contract or to any profits that may arise therefrom, but this provision shall not be construed to extend to stockholders of the Manufacturers' Aircraft Association or any Subscriber thereto.

LICENSE ISSUED UNDER THE AMENDED CROSS-LICENSE AGREEMENT OF DECEMBER 31, 1928

License, granted this _____ day of _____, 19__, by Aeromarine Plane & Motor Company, Inc., Boeing Airplane Company, Curtiss Aeroplane and Motor Company, Inc., Dayton-Wright Company, G. Elias & Bro., Inc., Gallaudet Aircraft Corporation, L. W. F. Engineering Company, Glenn L. Martin Company, Packard Motor Car Company, Sturtevant Aeroplane Company, Thomas-Morse Aircraft Corporation, and Wright Aeronautical Corporation (hereinafter called the Licensors) to _____ (hereinafter called the Licensee).

Whereas the Licensors and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called Subscribers), having heretofore entered into a certain agreement dated July 24, 1917, known as the Original Cross License Agreement and/or having entered into an amended agreement, dated December 31, 1928, entitled "The Amended Cross License Agreement of December 31, 1928" (copy of which said Amended Agreement is hereto annexed), wherein and whereby the Licensors agreed to grant certain licenses to each other as Subscribers to said Agreements, and

Whereas both said Original Cross License Agreement and said Amended Cross License Agreement authorized and empowered the Manufacturers Aircraft Association, Inc., as the agent for and attorney in fact of the Licensors, to make, execute, and deliver such licenses in the names of the Licensors; and it is desired to execute the powers therein granted;

Now, This License Witnesseth:

That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

Digitized by Google

1. The Licensors do hereby give and grant unto the said Licensee the unrestricted, but non-exclusive license to make, use, and sell airplanes—under all airplane patents of the United States now orhereafter owned or controlled by them, or any of them, or by any firm, corporation, or association owned or controlled by them, or any of them, or under which they or any such firm, corporation, or association have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes.

The patents which the Licensors have a right to grant licenses at the present time, and which are intended to be included in this license are set forth in Appendix A, hereto annexed.

2. This license shall run to the full end of the term of the Letters Patent under which this license is granted, and shall be personal, indivisible, nonassignable, and irrevocable, except for the causes and in the manner set forth in The Amended Cross License Agreement of December 31, 1928, hereinbefore referred to.

3. This license is made subject to all the terms, conditions, covenants, and agreements contained in said The Amended Cross License Agreement of December 31, 1928, which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the partles hereto have caused this instrument to be executed as of the day and year first above written.

Aeromarine Plane & Motor Company, Inc.; Boeing Airplane Company; Curtiss Aeroplane and Motor Company, Inc.; Dayton-Wright Company; G. Elias & Bro., Inc.; Gallaudet Aircraft Corporation; L. W. F. Engineering Company; Glenn L. Martin Company; Packard Motor Car Company; Sturtevant Aeroplane Company; Thomas-Morse Aircraft Corporation; Wright Aeronautical Corporation, Licensors,

By MANUFACTURERS AIRCRAFT ASSOCIATION, INC.,

---------- President,

---------- Secretary,

As Agent and Attorney in fact of Licensors.

---------- Licensee,

---------- President.

---------- Secretary.

APPENDIX A

List of Patents

Name of Licensor and Patents No.	Issue Date	Title of Invention
Aeromarine Plane & Motor Company, Inc.:		
1345885	July 6, 1920	Aeroplane.
1375199	Apr. 19, 1921	Aeroplane Control.
1358247	Nov. 9, 1920	Aeroplane fitting.
1361495	Dec. 7, 1920	Do.
1564826	Dec. 8, 1925	Float Structure.
1537973	May 19, 1925	Flying Boat Hull.
1552258	Sept. 1, 1925	Airplane Land Gear.
1567222	Dec. 29, 1925	Tail Skid.
1552259	Sept. 1, 1925	Retractible Landing Gear.
1571989	Feb. 9, 1926	Aerofoil.
1579905	Apr. 6, 1926	Airplane Structure.
1597306	Aug. 24, 1926	Stabilizer lock.
1579905	Apr. 6, 1926	Pontoon.
1597305	Aug. 24, 1926	Retractable Landing Gear.
1603304	Oct. 19, 1926	Hydro Airplane.
1653341	Dec. 20, 1927	Propeller Mounting.
Boeing Airplane Company:		
1264498	Apr. 30, 1918	Controlling devices for Airplanes.
1284918	Nov. 12, 1918	Clips for attaching wires.
1284919	....do....	Joint Fittings for Truss Structures.
1290280	Jan. 7, 1919	Steering Mechanism for Airplanes.
1290281	....do....	Fittings for Airplanes.
1295202	Feb. 25, 1919	Molds for Pontoons.
1295203	....do....	Shop Inventions.
1363422	Dec. 28, 1920	Wire Wrapping Machine.

List of Patents—Continued

Name of Licensor and Patents No.	Issue Date	Title of Invention
Curtiss Aeroplane and Motor Company, Inc.:		
1010842	Dec. 5, 1911	Flying Machine.
1011106	do	Do.
1027242	May 21, 1912	Means for Launching Flying Machines.
1050601	Jan. 14, 1913	Flying Machine.
1085575	Jan. 27, 1914	Control Mechanism for Flying Machines.
1104036	July 21, 1914	Flying Machine.
1108490	Aug. 25, 1914	Do.
1142754	June 8, 1915	Flying Boat.
1156215	Oct. 12, 1915	Heavier-than-air Flying Machine.
1170965	Feb. 8, 1916	Hydroaeroplane.
1195142	Aug. 15, 1916	Fuselage for Aeroplanes.
1197746	Sept. 12, 1916	Hydroplane Wing Pontoons.
1203550	Oct. 31, 1916	Hydroaeroplane.
1204380	Nov. 7, 1916	Improvements in Flying Machines.
1210374	Dec. 26, 1916	Hulls for Flying Boats.
1210379	do	Aileron System.
1223298	Apr. 17, 1917	Spoke Stays.
1223315	do	Landing Gear for Aircraft.
1223316	do	Multiple Control System for Prime Movers.
1223317	do	Folding Wing Aeroplane.
1223318	do	Boat Hull.
1223319	do	Flying Boat Hulls.
1223320	do	Multiple Step Flying Boat.
1223321	do	Propeller.
1228375	May 29, 1917	Universal Wing Post Socket.
1228380	do	Method of Operating Rudders on Aircraft.
1228381	do	Improvements in Hydroaero Machines.
1228382	do	Aeroplane.
1246010	Nov. 6, 1917	Inherently Stable Flying Boat.
1246011	do	Aeroplane Construction.
1246012	do	Flying Boat.
1246013	do	Balancing System for Aircraft.
1246014	do	Hydroaeroplane.
1246015	do	Aeroplane.
1246016	do	Flying Boats.
1246017	do	Boat Type Wing Pontoon.
1246018	do	Draft System for Flying Boats.
1246019	do	Flying Boat Hull.
1246020	do	Landing Gear.
1246021	do	Streamline Shock Absorber.
1246022	do	Aeroplane Motor Support.
1246023	do	Aerial Propeller Fastening.
1246024	do	Gas Tank Cradle.
1246025	do	Dual Interlocking Control.
1246026	do	Tail Skid Clip.
1246027	do	Aeroplane Control Mechanism.
1246028	do	Aeroplane Wing Hinge.
1246029	do	Impregnating Apparatus.
1256878	Feb. 19, 1918	Hydroaeroplane Boat.
1259397	June 11, 1918	Hydroaeroplane Pontoon.
1259570	do	Convertible Running Gear.
1283529	Nov. 5, 1918	Fan Pump.
1283684	do	Flying Boat Crusier.
1284906	Nov. 12, 1918	Hydro Landing Base for Aircraft.
1284907	do	Landing Gear for Aircraft.
1285021	Nov. 19, 1918	Aeroplane Wing Construction.
1285229	do	Flying Boat Hulls.
1285230	do	Hydroaeroplane Pontoon.
1287249	Dec. 10, 1918	Tilting Wing Flying Boat.
1287341	do	Handling Truck for Flying Boats.
1289683	Dec. 31, 1918.	Flying Boat.
1290004	do	Aeroplane Fitting.
1290005	do	Fuselage Cover.
1290102	Jan. 7, 1919	Landing Gear.
1290235	do	Triplane.
1290236	do	Tail Skid for Aeroplanes.
1290237	do	Engine Bed Mounting.
1290838	do	Aeroplane Construction.
1291678	Jan. 14, 1919	Wing Construction.
1294389	Feb. 18, 1919	Hydro-aero-Machine.
1294412	do	Twin Fuselage Construction.
1294413	do	Autoplane.
1294414	do	Hull for Flying Boats.
1294415	do	Flying Boat.
1294476	do	Duplex V-Strut Landing Gear.
1294477	do	Tail Skid for Aeroplanes.
1295084	do	Aeroplane Construction.
1296630	Mar. 11, 1919	Hydroaircraft.
1296667	do	Wing Post Socket.
1296730	do	Pusher Hydroaeroplane.

Digitized by Google

List of Patents—Continued

Name of Licensor and Patents No.	Issue Date	Title of Invention
Curtiss Aeroplane and Motor Company, Inc.—Continued.		
1296770	do	Airplane Landing Gear.
1296773	do	Convertible Control System.
1296774	do	Magneto Switch for Aeroplanes.
1296775	do	Aeroplane Construction.
1296876	do	Skid Structure for Hydroaircraft.
1298515	Mar. 25, 1919	Fuselage Clip.
1298516	do	Aeroplane Control Bridge.
1298625	do	Landing Gear for Aeroplanes.
1306749	June 17, 1919	Twin Float Hydroaeroplane.
1306750	do	Airplane Wing Truss.
1306751	do	Combination Landing Gear.
1306764	do	Aeroplane Wing Hinge.
1306765	do	Landing Gear fo Aircraft.
1310737	July 22, 1919	Reconnoitering Airplane.
1310764	do	Airplane Wing Fastening.
1310942	do	Airplane Wing Construction.
1311129	do	Control System.
1316277	Sept. 16, 1919	Cruising Hydroaeroplane.
1316278	do	Triplane Speed Scout.
1316279	do	Speed Scout Aeroplane.
1316280	do	Folding Wing Aeroplane.
1316281	do	Thrust Measuring Device.
1323842	Dec. 2, 1919	Reconnoitering Aeroplane.
1323843	do	Fuel Supply System.
1323959	do	Pusher Triplane.
1326008	Dec. 23, 1919	Turnbuckle.
1329336	Jan. 27, 1920	Flying Boat Hull.
1329342	do	Aeroplane Construction.
1336405	Apr. 6, 1920	Airplane.
1336406	do	Convertible Multiplane.
1336632	Apr. 13, 1920	Airplane Control Mechanism.
1336633	do	Landing Gear for Aircraft.
1336634	do	Flying Boat.
1349677	Aug. 17, 1920	Strut Fitting.
1351742	Sept. 7, 1920	Flying Boat Construction.
1351743	do	Airplane Wing Structure Truss.
1351764	do	Hoisting Connection for Airplane.
1355736	Oct. 12, 1920	Hydro Aircraft.
1355738	do	Aeroplane Wing Structure.
1355741	do	Airplane Fuselage.
1355767	do	Airplane Fitting.
1357950	Nov. 9, 1920	Airplane Control Surface Operating Brace.
1358527	do	Tripod Flying Boat.
1358605	do	Fuselage Wiring.
1363794	Dec. 28, 1920	Control Mechanism.
1368844	do	Airplane Fitting.
1363847	do	Aeroplane.
1364425	Jan. 4, 1921	Flying Boat Hull.
1364431	do	Airplane Wing Structure.
1364614	do	Airplane Wing Construction.
1368542	Feb. 15, 1921	Longitudinal Control System.
1368548	do	Aileron Braking System.
1368549	do	Airplane Construction.
1368550	do	Triplane.
1370693	Mar. 8, 1921	Airplane Landing Gear.
1373408	Apr. 5, 1921	Pontoon Mounting.
1373433	do	Control Column.
1382387	June 21, 1921	Engine Bed Support.
1382421	do	Hydroaeroplane Landing Gear.
1386841	Aug. 9, 1921	Method and Apparatus for Making Aerofoils.
1386846	do	Fuel Supply System.
1392271	Sept. 27, 1921	Streamline Wiring.
1392272	do	Airplane V-Strut Landing Gear.
1392277	do	Airplane Landing Gear.
1392278	do	Fuselage.
1392279	do	Flying Boat Hull.
1398330	Nov. 21, 1921	Radistor for Airplanes.
1406575	Feb. 14, 1922	Landing Gear for Aircraft.
1406600	do	Propeller Hub Construction.
1406617	do	Control for Aircraft.
1420609	June 20, 1922	Hydroaeroplane.
1420610	do	Method of Getting a Hydroairplane off the Water into the Air.
1430640	Oct. 3, 1922	Airplane.
1434547	Nov. 7, 1922	Do.
1434559	do	Wing Jig.
1437465	Dec. 5, 1922	Airplane Fitting.
1437469	do	Aeroplane Wing Structure.
1437471	do	Propeller Hub Fastening.
1445135	Feb. 13, 1923	Fighting Airplane.

List of Patents—Continued

Name of Licensor and Patents No.	Issue Date	Title of Invention
Curtiss Aeropjane and Motor Company, Inc.—Continued.		
1445142	do	Propeller Mounting.
1454505	May 8, 1923	Multiple Control System for Multi-Motored Aircraft.
1465973	Aug. 28, 1923	Triplane Flying Boat
1466634	do	Wing Shedding Means for Flying Boats.
1486607	Mar. 11, 1924	Tanks and Method of Making.
1494787	May 20, 1924	Tail Skid for Aeroplanes.
1509251	Sept. 23, 1924	Wing Radiator Fastening.
1511666	Oct. 14, 1924	Twin Fuselage Monoplane.
1511667	do	Cooling System for Power Plants of Aircraft.
1511689	do	Combination Land, Air, and Water Craft.
1511691	do	Airplane Radiator.
1535526	Apr. 28, 1925	Aeroplane Wing.
1535532	do	Aeroplane.
1543651	June 23, 1925	Wing Strut Fastening for Aeroplanes.
1555409	Sept. 29, 1925	Airplane Wing.
1556348	Oct. 6, 1925	Aeroplane Landing Gear.
1565097	Dec. 8, 1925	Differential Aileron Control.
1575328	Mar. 2, 1926	Aeroplane Landing Gear.
1584053	May 11, 1926	Engine Bed Mounting.
1613602	Jan. 11, 1927	Aerofoil.
1613619	do	Aeroplane Radiator.
1631259	June 7, 1927	Variable Lift—Variable Resistence Aerofoil.
1639029	Aug. 16, 1927	Aeroplane.
1653122	Dec. 20, 1927	Aeroplane Landing Gear.
1666769	Apr. 17, 1928	Airplanes.
1682202	Aug. 28, 1928	Beam.
1682204	do	Aeroplane Radiator.
1682229	Nov. 20, 1928	Adjustable Wind Shield.
1692010	Aug. 28, 1928	Retractable Landing Gear.
1694496	Dec. 11, 1928	Rudder Operating Mechanism for Aircraft.
Dayton-Wright Company:		
D 52685	Nov. 12, 1918	Insignia.
1290025	Dec. 31, 1918	Aeroplane Control.
1298080	Mar. 25, 1919	Fuel Tank.
1342385	June 1, 1920	Steering Device.
1441984	Jan. 9, 1923	Fuselage.
1452641	Apr. 24, 1923	Aeroplane Wing.
1462531	July 24, 1923	Rudder Controls.
1462533	do	Fuselage Construction.
1476438	Dec. 4, 1923	Airplane Construction.
1483164	Feb. 12, 1924	Door for Aircraft Bodies.
1494787	May 20, 1924	Tail Skids for Airplanes.
1496200	June 3, 1924	Airplane Control.
1500235	July 8, 1924	Airplane—Wing Spar.
1501522	July 15, 1924	Aircraft Observation Window.
1501523	do	Airplane.
1501530	do	Do.
1501549	do	Aeroplane Structure.
1501550	do	Standard Stick Control.
1501592	do	Valve.
1501601	do	Tail Skid.
1501608	do	Landing Skid.
1503478	Aug. 5, 1924	Apparatus for Doping Airplane Wings.
1503887	do	Fuselage Fittings.
1504663	Aug. 12, 1924	Airplane.
1509297	Sept. 23, 1924	Pontoon Skid.
1512912	Oct. 28, 1924	Aeroplane.
1522672	Jan. 13, 1925	Tail Skid.
1545239	July 7, 1925	Airplane Controls.
1549202	Aug. 11, 1925	Retractable Radiator.
1549251	do	Method of making Welded Tube Fuselage.
1552111	Sept. 1, 1925	Airplane.
1552112	do	Moulded Airplane Wings.
1556589	Oct. 13, 1925	Metal Wing Spar.
1557214	do	Airplane Control Mechanism.
1557242	do	Landing Chassis.
1616682	Feb. 8, 1927	Wing or Similar Member for Airplane.
G. Elias & Bro., Inc.:		
1342138	June 1, 1920	Landing Gears for Flying Machines.
1346772	July 13, 1920	Hoisting Devices for Flying Machines.
1350947	Aug. 24, 1920	Launching Devices for Flying Machines.
1350948	do	Detachable Stabilizer Fins for Flying Machines.
1354353	Sept. 28, 1920	Rudders for Hydroaeroplanes.
1357260	Nov. 2, 1920	Driving Mechanism for Flying Machines.
1358596	Nov. 9, 1920	Hydroaeroplanes.
1424996	Aug. 8, 1922	Wing Construction for Airplanes.

Digitized by Google

List of Patents—Continued

Name of Licensor and Patents No.	Issue Date	Title of Invention
Gallaudet Aircraft Corporation:		
1058422	Apr. 8, 1913	System of Aeroplane Control.
D-44168	June 10, 1913	Hydroaeroplane Body.
1074256	Sept. 30, 1913	System of Aerial Control.
1074257	do	System of Aeroplane Control.
D-45106	Jan. 6, 1914	Hydroaeroplane Body.
1145013	July 6, 1915	Aeroplane.
1165770	Dec. 28, 1915	Aerohydroplane.
1200097	Oct. 3, 1916	Aeroplane.
1200098	do	Do.
1203557	Oct. 31, 1916	Propeller.
1203558	do	Aeroplane.
1214536	Feb. 6, 1917	Do.
1219285	Mar. 13, 1917	Do.
1262660	Apr. 16, 1918	Do.
1303052	May 6, 1919	Aeroplane Stay.
L. W. F. Engineering Company:		
1310850	July 22, 1919	Guy-Wire Attachment.
1315356	Sept. 9, 1919	Aeroplane Securing Member.
1353538	Sept. 21, 1920	Strut Construction.
1393488	Oct. 11, 1921	Fuselage.
1394459	Oct. 18, 1921	Fuselage Construction.
1394460	do	Aeroplane Construction.
1395254	Nov. 1, 1921	Aeroplane Control Systems.
1398244	Nov. 29, 1921	Processes of Producing Laminated Constructions and Apparatus for use in connection therewith.
1418762	June 6, 1922	Landing Gears for Aeroplanes.
1428143	Sept. 5, 1922	Fuselage Construction for Aeroplanes.
1434367	Nov. 7, 1922	Armed Aeroplanes.
1441319	Jan. 9, 1923	Wing Connections for Aeroplanes.
1441329	do	Internal Combustion Engines.
Glenn L. Martin Company:		
1480890	Jan. 15, 1924	Gunner's Chair.
1488493	Mar. 11, 1924	Controls.
1608611	Nov. 30, 1926	Adjustable Rudder Controls.
1669380	May 8, 1928	Wing Leveling Device.
Packard Motor Car Company:		
D-52056	May 28, 1918	Design for Aircraft Fuselage.
1325054	Dec. 16, 1919	Aircraft.
1329390	Feb. 3, 1920	Airplane Brake.
1377858	May 10, 1921	Aircraft.
1406251	Feb. 14, 1922	Detachable Aircraft Propeller Hub.
1415052	May 9, 1922	Airplane.
1434604	Nov. 7, 1922	Windshield.
1434620	do	Gear Driving Mechanism.
1443100	Jan. 23, 1923	Airplane.
1464670	Aug. 14, 1923	Do.
1513945	Nov. 4, 1924	Gear Driving Mechanism.
1517765	Dec. 2, 1924	Airplane.
1558942	Oct. 27, 1925	Do.
1632862	June 21, 1927	Do.
Sturtevant Aeroplane Company:		
1162177	Nov. 30, 1915	Airplane Landing Gears.
1283828	Nov. 5, 1918	Aeroplane.
1357177	Oct. 26, 1920	Aeroplane Trucks.
Thomas-Morse Aircraft Corporation:		
1370242	Mar. 1, 1921	Airplane.
1389106	Aug. 30, 1921	Do.
1394870	Oct. 25, 1921	Driving Connections for Airplane Engines.
1443155	Jan. 23, 1923	Clips for Airplane Construction.
Wright Aeronautical Corporation:		
566954	June 15, 1910	Flying Machine.
821393	May 22, 1906	Do.
908929	Jan. 5, 1909	Mechanism for Flexing the Rudder of a Flying Machine or the like.
987662	Mar. 21, 1911	Flying Machine.
1075533	Oct. 14, 1913	Do.
1122348	Dec. 29, 1914	Do.
1165891	Dec. 28, 1915	Do.
1239500	Sept. 11, 1917	Flying boat.

(License Form No. 3—After-Acquired Patents Granted Royalty Compensation)

PATENT LICENSE ISSUED PURSUANT TO AWARD OF ROYALTY COMPENSATION BY BOARD OF ARBITRATION NO. —

License granted this _____ day of _____, by _____ _____ (hereinafter called the Licensor), to _____ (hereinafter called the Licensee).

Whereas the Licensor and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called Subscribers), heretofore entered into a certain agreement, dated July 24, 1917, known as the Cross-License Agreement, and/or entered into an Amended Agreement, entitled "The Amended Cross-License Agreement of December 31, 1928", wherein provision is made for the cross-licensing of airplane patents owned or controlled by Subscribers; and

Whereas both said Cross-License Agreement and said Amended Cross-License Agreement authorize and empower the Manufacturers Aircraft Association, Inc., as the agent and attorney in fact of the Subscribers, to make, execute, and deliver such licenses in the names of the Licensors; and

Whereas in reporting to said Association the patents hereinafter described the Licensor claimed compensation under Article V of said Cross-License Agreement or said Amended Cross-License Agreement for the issuance of licenses thereunder to other Subscribers, and the use by them of the inventions covered by said patents; and

Whereas a Board of Arbitration was duly constituted in the manner provided for in said Agreements which, after considering the claims of the Licensor on the patents hereinafter described, rendered its award thereunder providing for the payment by Subscribers of the royalties hereinafter set forth.

Now, therefore, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensor does hereby give and grant unto the Licensee a non-exclusive license to make, use, and sell airplanes under the following-described patents in and throughout the United States, its territories, and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for apply to or include the use of said patents in their application to other than airplanes:

No. _____ Issue Date _____ Title _____

2. This license is effective from the issue dates of the patents hereinbefore described, unless otherwise herein provided, and shall run to the full end of the terms thereof. It is personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner set forth in said Amended Cross-License Agreement.

4. This license is subject to all the terms, conditions, covenants, and stipulations contained in said Amended Cross-License Agreement, which is made a part hereof, with the same force and effect as if herein set forth at large.

In witness whereof the parties hereto have caused this license to be executed as of the day and year first above written.

Form No. 2.

PATENT LICENSE

License, granted this_____day of_____, 19__, by _____(hereinafter called the Licensors), to_____ (hereinafter called the Licensee).

Whereas, the Licensors and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called "Subscribers"), heretofore entered into a certain agreement dated July 24, 1917, known as the Cross-License Agreement and/or having entered into an Amended Agreement, entitled

Digitized by Google

"The Amended Cross-License Agreement of December 31, 1928", wherein and whereby the Licensors agreed to grant certain licenses to the other "Subscribers" to said agreement, and

Whereas, both said Cross-License Agreement and said Amended Cross-License Agreement authorized and empowered the Manufacturers Aircraft Association, Inc., as the agent for and attorney in fact of the Licensors, to make, execute, and deliver such licenses in the name of the Licensors, and

Whereas, certain licenses have been issued to the Licensee herein under patents heretofore reported to the Association by Subscribers, and additional patents having been subsequently reported by Subscribers to said Association, it is now desired to issue licenses thereunder to the Licensee;

Now, therefore, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensors do hereby give and grant unto the said Licensee, the unrestricted but non-exclusive license to make, use, and sell airplanes under the patents described in Schedule "A—", hereto annexed and made a part thereof, in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes.

2. This license shall run to the full end of the term of the Letters Patent under which it is granted, and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner set forth in said Amended Cross-License Agreement.

3. This license is made subject to all the terms, conditions, covenants, and agreements contained in said Amended Cross-License Agreement, which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this license to be executed as of the day and year first above written.

SCHEDULE A

Name of licensor and patent number	Issue date	Title of invention

CURTISS-WRIGHT AIRPLANE CO.,
30 Rockefeller Plaza, New York, N. Y., December 6, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, House of Representatives, Committee on Patents,
Fifth Avenue Hotel, 24 Fifth Avenue, New York, N. Y.

DEAR SIR: There is submitted herewith, in behalf of the Curtiss-Wright Airplane Co., answers to the questionnaire contained in your letter of November 9, 1935.

Very truly yours,

CURTISS-WRIGHT AIRPLANE CO.,
By E. S. CRAMER, *Secretary.*

CURTISS-WRIGHT AIRPLANE CO.

1. Question. A complete list of all patents owned by you, your company or corporation, and also those patents now being used by you or them through cross-license or patent pooling agreement, or otherwise.

Digitized by Google

Answer. Curtiss-Wright Airplane Co. owns the following patents, to wit:

Patentee	Number	Date of issue	Date of assignment
K. Henrichsen	1874522	Aug. 30, 1932	Jan. 21, 1931
H. Rawdon et al	1902421	Mar. 21, 1933	June 2, 1930
W. H. Beech	1958229	May 8, 1934	Mar. 16, 1931
K. Henrichsen	1988079	Jan. 15, 1935	May 11, 1932
G. A. Page, Jr	1993893	Mar. 12, 1935	Feb. 18, 1933

Curtiss-Wright, as a member of the Manufacturers' Aircraft Association, Inc., is licensed to make use of all patents subject to the cross-license agreement which said association administers. (It is the writer's understanding that your committee has already been furnished by said association with a complete list of all patents subject to the cross-license agreement.)

Curtiss-Wright, by negotiated contracts, is licensed to make use of the following patents, none of which are owned by Curtiss-Wright: 1226985, 1419507, 1427314, 1459411, 1485349, 1523994, 1567670.

2. Question. If you are not using some of your patents at this time, why not?

Answer. Curtiss-Wright Airplane Co. makes current use of all patents which it owns.

3. Question. A copy of the constitution and bylaws or articles of agreement of your organization or association.

Answer. A copy of the constitution and of the bylaws of the Manufacturers' Aircraft Association, Inc., are hereto attached.

4. Question. Copies of cross-license or patent pooling agreements to which you, your company, or corporation are parties.

Answer. A copy of the original cross-license agreement and of all subsequent modifications thereof are hereto attached.

5. Question. A copy of the different forms of cross-license or pooling agreements made between your organization and others to date.

Answer. A copy of each form of license which the Manufacturers Aircraft Association, Inc., is authorized to grant is hereto attached.

6. Question. The names of the inventors of all such patents in such cross-license agreement or patent pools, date and number of patent, date of assignment to you, amount paid for same, estimated value of patent at the date of purchase and now.

Answer. The names of the inventors, the dates and numbers of the patents, and the dates of assignment thereof to Curtiss-Wright, of all Curtiss-Wright owned patents subject to the cross-license agreement of the Manufacturers Aircraft Association, Inc., are given in the answer to question 1. Each of the patents owned by Curtiss-Wright is predicated on a development originating within the Curtiss-Wright organization, and each was assigned to Curtiss-Wright by reason of the existence of an employer-employee agreement entered into between employees of Curtiss-Wright and the company. (A copy of the standard form of employer-employee agreement used by Curtiss-Wright is hereto attached.)

There is no basis upon which the value to Curtiss-Wright Airplane Co., either today or at the time it acquired title to the patents which it owns, can be either estimated or determined.

7. Question. Are any of said patents controlled by said cross-license and patent pooling agreements used as a basis for charter or corporation franchises? If so, valuation of said patents.

Answer. No Curtiss-Wright owned patents are currently used as a basis for charter or corporation franchises.

8. Question. Was inventor an employee of assignee at time of making invention and is the inventor an employee of such assignee now? If so, does assignee retain contract providing such invention shall belong to employer without additional cost?

Answer. The patentees named in the patents owned by Curtiss-Wright were all at the time of the filing of the applications resulting in the patents granted, employees of the Curtiss-Wright Co.

Of the patentees named, the following are still in the employ of the Curtiss-Wright Co.: G. A. Page, Jr.

Digitized by Google

None of the patentees retain any interest whatsoever in the patents assigned.

9. Question. Please give number, name, ownership, and valuation of existing patents now being used by your company through cross-license or with a patent pool.

Answer. The value to Curtiss-Wright, of the patents under which it is licensed by reason of its membership in the Manufacturers Aircraft Association, Inc., cannot be determined. It is the writer's understanding that your committee has already been furnished with the number, name, and ownership of the patents under which it is licensed by reason of its association membership.

10. Question. Do you cross-license nonmembers of the patent pool—if such exists—and if so, on what terms?

Answer. At no time has Curtiss-Wright refused any concern or airplane manufacturing company a license under any or all of the patents which it owns. Licenses, if requested, would be granted at the same royalty rate as that required to be met by association members.

11. Question. What are the eligibility requirements for outsiders to join this patent pool?

Answer. To entitle a person, firm, or corporation to become a stockholder of the Manufacturers Aircraft Association, Inc., he or it, as the case may be, shall be a responsible manufacturer of aircraft or aircraft engines, or parts and accessories thereof; or a responsible manufacturer who intends to become a bona fide producer of the same; or a manufacturer to whom the United States Government has given a contract for the construction of 10 or more complete aircraft or aircraft engines; or a person, firm, or corporation owning or controlling United States patents relating to any of the foregoing.

12. Question. Do you recommend any amendments to existing patent laws? If so, enumerate.

Answer. It is recommended that the act of June 25, 1910 (36 Stat. 851), as amended by the act of July 1, 1918 (40 Stat. 705), be repealed.

AGREEMENT

Whereas Curtiss-Wright Airplane Company, a corporation of Missouri, having its principal place of business at Robertson, Missouri, is now engaged in the development, manufacture, and sale of various types of aircraft, pontoons, hulls, engines, and parts thereof and accessories therefor, and of apparatus and processes incident to the manufacture of said devices and the parts thereof, and

Whereas I desire employment with said Corporation in the course of which I may be informed from time to time of more or less confidential matters pertaining to these and any other lines of work that the Corporation may now or hereafter be engaged in the investigation or development of during my employment,

Now, therefore, this indenture witnesseth: that in part consideration of my employment with said Corporation, and the resulting remuneration and attending advantages, I agree that

1. I will communicate to its Law Department and assign to the Corporation, for its sole and exclusive benefit, any and all improvements and inventions I may conceive of or make while in its employ, along the lines of the Corporation's work and investigations, and will execute all patent application and other proper papers deemed by the Corporation as necessary or expedient to the filing and prosecution of applications for patents in this and all foreign countries, on said improvements or inventions, and otherwise in acquiring Letters Patent therefor, and will otherwise assist the Corporation in every proper way (entirely at its expense) to protect in any and all countries, the inventions to be and remain the property of the said Corporation, whether patented or not: As a matter of record I attach hereto a complete list of all inventions which I have made prior to my said employment and which I desire to have excluded from this assignment, and

2. I will regard and preserve as confidential all information pertaining to the Corporation's business that may be obtained by me from specifications, drawings, blue-prints, reproductions, and other sources of any sort as a result of such employment, and I will not, without written authority from the Corporation so to do, disclose to others during my employment or thereafter, such or

any other confidential information obtained by me while in the employ of the Corporation.

In witness whereof I have hereunto set my hand and seal this _____ day of _____, 19__.

[SEAL.] (Signature) _____

Witness:

_____

CROSS-LICENSE AGREEMENT

This agreement, made this 24th day of July 1917, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers") as shall become stockholders of the said "Company" in the manner and under the conditions provided in the by-laws thereof (which for the purpose of this agreement are made a part hereof), and become parties to this agreement, parties of the second part;

Whereas the parties hereto are interested in the manufacture, sale, and use of airplanes, as hereinafter defined, and desire to promote and develop the industry in which they are engaged, and to encourage and advance the art applicable thereto; and

Whereas the said development and advancement in the past have not been capable of as complete accomplishment as is desirable because of the existence of certain United States patents claimed to be basic in their nature upon which suits have been brought or threatened for alleged infringement and for the collection of royalties and damages in connection therewith; and

Whereas it is desired to prevent and avoid such litigations or threatened litigations in the future and to give to all of the "Subscribers" the right to manufacture, sell, and use airplanes embodying the inventions of each of the "Subscribers", and to that end it is desired that licenses be granted as herein expressed:

Now, This Agreement Witnesseth: That for and in consideration of the premises, the covenants, and conditions herein contained, and of other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto and between the "Subscribers" themselves, it is covenanted and agreed as follows:

I. DEFINITIONS

The word "airplane", as used in this agreement, shall be understood to mean any form of heavier-than-air craft using wing surfaces for sustaining it and to include propelling means, propellers, propeller hubs, radiators, and all parts and accessories used or useful in the airplane except the engine and its accessories.

The words "airplane patent" as used in this agreement shall be understood to mean any patent covering inventions for or capable of use in or in connection with airplanes, including propellers, propeller hubs, radiators, and all parts of airplanes and accessories used or useful in the airplane except the engine and its accessories.

II. LICENSES AND POWERS GRANTED

The "Subscribers" grant, agree to grant, and cause to be granted to each other, licenses to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them or any of them, or by any firm, corporation, or association owned or controlled by them, or under which they, or any of them, or any such firm, corporation, or association have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents; nor shall said rights or the licenses herein provided for apply to or include the use of said patents in their application to other than airplanes; and except further that no licenses are hereby granted under the Dunne patents No. 975403 issued November 15th, 1910, and No. 1003721, issued September 19th, 1911, rights under which are held by the Burgess Company.

All licenses provided for herein shall run to the full end of the term of the letters patent under which the license is or is to be granted and shall be per-

Digitized by Google

sonal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner hereinafter stated.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them and in their respective names, to make and execute licenses in writing in the form hereto annexed, and to deliver the same to those of the "Subscribers" who, at the time, are stockholders of the "Company" not in default hereunder, and who shall have executed an agreement in writing of like tenor to this; and to enforce said licenses and any and all other obligations (including the obligation to make payments), of the "Subscribers" under this agreement; and the "Subscribers" hereby give and grant unto said "Company" as full, complete, and ample power and authority in the premises as the "Subscribers" themselves now have and possess.

All licenses provided for herein, when made, executed, and delivered in accordance with the provisions hereof, shall have the same force and effect as if they had been executed and delivered by the "Subscribers" themselves.

III. COVENANTS OF FURTHER ASSURANCE

(a) Each "Subscriber", now or hereafter, having rights under any United States airplane patent or invention, of such character that it has legal right and power to procure the grant of rights thereunder to others, but is not itself empowered to grant such rights, covenants to procure the execution of such further instrument as may be necessary to empower the "Company" to grant rights under such patent, or with reference to such invention, to the extent and in the manner herein provided.

(b) Each "Subscriber" covenants that it will not contract for or obtain any rights under any such patent or invention in such manner that its owner would be prevented from granting to other "Subscribers" hereto similar rights on the same terms, unless the "Subscriber" obtains, at the same time, the further privilege to grant rights under said patent or said invention, whereby the same may and will be brought under the operation of this instrument.

IV. COVENANTS AGAINST OTHER LICENSES

Each "Subscriber" covenants that it has not heretofore entered and will not hereafter enter into any contract or arrangement whereby its privileges under United States airplane patents, issued or to be issued, inventions, and rights, owned or controlled by it, has been or shall be diminished or surrendered so as to exclude or restrict the operation of this instrument in respect thereto. Each "Subscriber" further covenants that it will not grant licenses under any such patents for use in airplanes, with reference to which it is receiving royalties hereunder, to any other person, firm, or corporation on more favorable, or lower terms of royalty, than those herein provided, or which may become more favorable or lower during the term of such license.

V. AFTER ACQUIRED PATENTS

When a "Subscriber" shall hereafter acquire a United States airplane patent, or any right thereunder, he shall be entitled to compensation for the use thereof if the patent or patent right covers an invention which secures the performance of a function not before known to the art, or constitutes an adaptation for the first time to commercial use of an invention known to the industry to be desirable of use but not used because of lack of adaptation, or is otherwise of striking character or constitutes a radical departure from previous practice, or if either the price paid therefor or the amount expended in developing the same is such as to justify such compensation, provided that at the time said patent or patent right is reported to the "Company", as required in subdivision (b) of paragraph VII, the "Subscriber" claims such compensation, and states the grounds on which such claim is based. Such report and claim shall be submitted to a Board of Arbitration to be selected in the manner provided for in paragraph XIII hereof, which Board shall determine whether such compensation shall be paid, and, if so, the total amount thereof and the rate of royalty, or other payments, which shall be paid (towards such compensation) by any "Subscriber" desiring and taking a license under said patent and shall also fix the time or times when said royalties or other amounts shall be paid.

Digitized by Google

VI. SPECIAL MODELS

If any "Subscriber" shall have developed the design and manufacture of any special model of airplane, or airplane engine, or other device used in an airplane (except the airplanes manufactured by the Burgess Company under the Dunne Patents, hereinbefore mentioned, and the Hispano-Suiza aeronautical engine, manufactured by the Wright-Martin Aircraft Corporation or its subsidiaries), which the United States Government may at any time desire to have manufactured in the factory of any other "Subscriber" or in the factory of any manufacturer not a "Subscriber" hereto, the said "Subscriber" agrees that it will furnish to the other "Subscriber" or said other manufacturer such complete specifications, drawings, and other production data, as may be required, for use in the manufacture of such special model, provided that and upon condition that the "Subscriber" or other manufacturer in whose factory the work is placed by the United States Government shall agree with said Government and with the "Subscriber" owning said specifications, etc., to pay and shall pay into the treasury of the "Company" one percent, upon the contract price paid by the Government for each airplane or airplane engine or other device manufactured for it in accordance with said specifications, etc.

If the manufacture of such special model is conducted by one not a "Subscriber", such manufacturer shall also agree to pay into the treasury of the "Company" such royalty as a "Subscriber" would have been obliged to pay had it made and sold the airplane, engine, or other device, including the amount specified in subdivisions (a) and (b) of paragraph VIII hereof, if an airplane with or without engine is the thing manufactured for and sold to the Government.

VII. REPORTS TO THE "COMPANY"

The following reports in writing shall be rendered to the "Company" by each "Subscriber" at the time or times hereinafter set forth:

(a) At the time of the execution of this agreement each "Subscriber" shall report all United States airplane patents and inventions, together with serial numbers and filing dates of all pending applications for such patents, and all rights under such patents and inventions then owned or controlled by it, but no omission from such report shall exclude the patent, application, or right so omitted from the operation of this agreement.

(b) Within 30 days after the acquisition by any "Subscriber" of any United States patent (other than patents to be issued upon inventions now owned by it) or right within the scope of this agreement, each such "Subscriber" shall report such acquisition together with all the facts known to it as to such patent or right and its manner of acquisition. If such "Subscriber" claims that additional compensation should be paid to it for licenses under such patent or right, it shall so claim in its report.

(c) On the 10th days of January, April, July, and October in each year, each "Subscriber" shall report the number of airplanes (with or without engine), sold and delivered by it, together with the names of the purchasers, and the dates of delivery, or put into use for other than experimental or development purposes, or shipped out of the United States, during the three preceding calendar months.

(d) On the 10th days of January, April, July, and October in each year, each "Subscriber" shall report the number of airplanes, airplane engines, or other devices for use in airplanes, which it has sold and delivered during the preceding three calendar months, made from specifications, drawings, and other production data obtained from any other "Subscriber", as provided in paragraph VI hereof, together with the sales price and the dates of delivery; and there shall be included in the same report a copy of any agreement which the "Subscriber" shall have made with another manufacturer as provided in said paragraph.

(e) Each license to other than "Subscribers" as provided in paragraph IV hereof, shall be reported within 30 days after its delivery.

The first of each of the reports specified in subdivisions (c) and (d) hereof shall be made by each "Subscriber" on the tenth days of January, April, July, or October first occurring after it has become a "Subscriber" hereto, and shall cover the period from July 1, 1917, to the first day of the month in which the report is due.

Each of the "Subscribers" hereto shall keep separate books of account showing all business done under or subject to the operation of this agreement. The

Digitized by Google

"Company" may at any time have a New York Certified Public Accountant, to be designated by it, audit such books of account of the "Subscribers", together with such other accounts as the accountant may deem necessary, in order to verify or correct the reports herein provided for, and the "Company" shall have such audit made when any "Subscriber" so demands. Such audit, however, shall be limited to ascertaining whether the reports herein provided for are properly made and to correcting the same, if necessity for correction shall appear. No information obtained from any such audit shall be reported by the accountant or given to any of the parties hereto, except as it directly applies to the reports required by this agreement.

VIII. PAYMENTS TO THE "COMPANY"

Each "Subscriber" agrees to pay into the treasury of the "Company" on the 10th days of January, April, July, and October in each year the following sums of money, to wit:

(a) On each airplane, with or without engine, required to be reported as provided in subdivision (c) of paragraph VII hereof, the sum of two hundred dollars until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation shall have been paid the aggregate sums provided for in subdivisions (a) and (b) of paragraph IX hereof.

(b) On each airplane, with or without engine required to be reported as provided for in subdivision (c) of paragraph VII hereof, such sum not to exceed twenty-five dollars, as the Board of Directors of the "Company" may, from time to time, fix and determine as payable after the above-mentioned aggregate sums shall have been paid to the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation.

(c) Such amount or amounts as the Board of Arbitration may specify as special compensation for after acquired patents as provided in paragraph V hereof, and required to be reported in subdivision (c) of paragraph VII.

(d) Such amount or amounts as may be payable with reference to the use of specifications, drawings, and data as provided in paragraph VI hereof, including the royalty payments therein provided for, but all one (1%) percent payments on account of the use of such specifications, drawings, and data covering any one model shall cease when the total paid by all users shall aggregate fifty thousand ($50,000) dollars.

(e) All royalties received under licenses referred to in subdivision (e) of paragraph VII.

Each "Subscriber" who shall become a party hereto after the first day of July 1917 shall, on the 10th day of January, April, July, or October next occurring, pay to the "Company" those amounts which it would have been obliged to pay in accordance with the foregoing if it had been a "Subscriber" on July 1, 1917.

Moneys paid into the treasury of the "Company" pursuant to any provisions hereof shall not be or constitute or be deemed to be or constitute the assets, property, or profits of said "Company", but shall be received and disbursed by it as the agent and attorney in fact of the "Subscribers" in the manner and for the purposes herein mentioned.

IX. PAYMENTS BY THE "COMPANY"

Out of the moneys paid into the treasury of the "Company" pursuant to the provisions hereof, the following payments shall be made by the Company on the 20th days of January, April, July, and October in each year, to wit:

(a) To the Wright-Martin Aircraft Corporation one hundred and thirty-five ($135) on each airplane with or without engine, with reference to which payments shall have been made in accordance with subdivisions (a) and (e) of paragraph VIII hereof, during the preceding three calendar months, until U. S. Patent No. 821393, issued May 22, 1906, shall have expired, or until the aggregate sum of two million ($2,000,000) dollars shall have been paid to the said Wright-Martin Aircraft Corporation when all payments to it hereunder shall cease, except as hereinafter provided.

(b) To the Curtiss Aeroplane and Motor Corporation forty dollars ($40) on each airplane, with or without engine, with reference to which payments shall have been made in accordance with subdivisions (a) and (e) of paragraph VIII hereof, during the preceding three calendar months, until such time as the Wright-Martin Aircraft Corporation shall have been paid in full

Digitized by Google

as provided for in subdivision (a) of this paragraph, after which there shall be paid to the Curtiss Aeroplane and Motor Corporation at the times herein mentioned the sum of one hundred and seventy-five dollars ($175) on each of said airplanes until the aggregate sum of two million ($2,000,000) dollars shall have been paid to it or until U. S. Patent No. 1203550, issued October 31st, 1916, shall have expired, when all payments to it hereunder shall cease, except as hereinafter provided.

(c) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" with relation to the use of after acquired patents in accordance with subdivisions (c) and (e) of paragraph VIII hereof.

(d) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" on account of the use of specifications, drawings, and data as provided in paragraph VI and in subdivision (d) of paragraph VIII hereof, but any royalty payment received from outside manufacturers shall be distributed as though received from "Subscribers."

(e) To any "Subscriber" who shall have granted licenses to others than "Subscribers", as provided in paragraph IV, the royalties received under such licenses which are not required for payments provided for in subdivisions (a), (b), and (c) of this paragraph.

Out of the balance of said moneys paid into the treasury of the "Company" under this agreement, the "Company" may retain and use sufficient to cover its operating expenses and to create such fund as, in the judgment of the Board of Directors of said "Company", shall be necessary and proper for the further development of the airplane art and industry, and the purchase of patents and rights for the benefit of the "Subscribers" hereto.

If after making the payments and reservations herein provided for, any surplus or balance remains out of the funds so paid in the treasury of the "Company", the same shall be distributed by the "Company" from time to time, among those "Subscribers" who have contributed to said moneys, in proportion to their respective contributions under subdivisions (a) and (b) or paragraph VIII other than those required for payments under subdivisions (a) and (b) of this paragraph IX.

X. BREACH OF AGREEMENT

In the event that any "Subscriber" is claimed by the "Company", or any other "Subscriber", to be in default in the performance of any of its obligations hereunder, and such claimed default continues after thirty days' notice in writing, by the "Company" or any "Subscriber" hereto, to the "Subscriber" claimed to be in default, then the Board of Arbitration, hereinafter provided for, shall determine whether there has been such specified default and, if such default is found to exist, shall fix the time within which it must be repaired, and shall assess such damages and impose upon the "Subscriber" in default such other requirements (including the forfeiture of its stock and license) as may seem to the said Board of Arbitration to be proper under the circumstances. Each "Subscriber" covenants and agrees that it will pay such damages and comply with such requirements as may be specified by the said Board of Arbitration.

Nothing contained in this paragraph shall deprive the "Company" of the power to make, execute, and deliver licenses under the patents or patent rights owned and controlled by any defaulting "Subscriber", or to which the "Subscriber" may be entitled, at the time he ceases to be a stockholder or "Subscriber", nor deprive other than defaulting "Subscribers" of any right which they may have received to the use of the said patents or patent rights.

XI. WITHDRAWAL FROM AGREEMENT

Any "Subscriber" may withdraw from this agreement at any time after ten years from the date hereof, on giving to the "Company" written notice of its election so to do and on fulfilling all of its obligations up to the date of such withdrawal. But no withdrawal shall relieve the other parties and other "Subscribers" from their obligations to each other hereunder, nor deprive them of their rights acquired under the patents and patent rights owned or controlled by the withdrawing "Subscriber" at the time of withdrawal, all of said patents and patent rights remaining under this agreement, but such withdrawing "Subscriber" shall cease to have any rights under the patents of the other "Subscribers" hereto, or any other right under this agreement, from and after such withdrawal.

Digitized by Google

XII. REPURCHASE OF STOCK

In the event of the death of any person who is a stockholder in the "Company", or in the event of the dissolution of any corporation or firm which is a stockholder therein, or in the event of the bankruptcy or insolvency of any such stockholders, or in the event of withdrawal under paragraph XI hereof, the "Company" shall have the right to purchase for the benefit of the other "Subscribers" the stock held by such person, firm, or corporation at a sum not to exceed the distributive share or shares of such stockholder in the funds held by the "Company", and the license or licenses issued to such stockholder shall be surrendered to the "Company" and cancelled.

XIII. ARBITRATION OF CLAIMS AND DISPUTES

In the case of any dispute or controversy between the "Subscribers' hereto, or between the "Subscribers" and the "Company", or in case of a claim by a "Subscriber" for special compensation for licenses under patents or rights hereafter acquired by it, or in case of breach of this agreement, the said dispute, controversy, claim, or breach shall, within thirty days after a "Subscriber" or "Subscribers" shall have given notice to the "Company" or the "Company" shall have given notice to the "Subscribers" thereof, be referred to a board of disinterested Arbitrators consisting of three persons, for determination.

In the case of a claim for special compensation, one member of such Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" making the claim, and the third by the other two arbitrators.

In the case of any dispute between the "Company" and a "Subscriber" or "Subscribers", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" (or if more than one "Subscriber" is involved in the same dispute, then by a majority of those so involved), and the third by the other two arbitrators.

In case of a breach of this agreement asserted by the "Company" or a "Subscriber" against another "Subscriber", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" against whom the assertion of breach is made, and the third by the other two arbitrators.

If either the Board of Directors or the "Subscribers" fail to appoint a member of the Board of Arbitration within the time specified the other party or parties may appoint such member or fill such vacancy.

The decision of a majority of the members of said Board upon all matters submitted to them for adjudication shall be final and binding upon all the parties hereto.

XIV. RELEASE TO "SUBSCRIBERS"

The "Subscribers" hereby waive and release any and all claims which they or any of them may have had against each other for damages and profits on account of any infringement or alleged infringement, prior to July 1, 1917, of any patent included within this instrument in the manufacture, sale, or use of airplanes.

XV. BINDING UPON PARTIES, CONTROLLED COMPANIES, LEGAL REPRESENTATIVES, ETC.

This agreement is binding upon the parties hereto and their several successors, legal representatives, and assigns, but shall enure to the benefit of only their several successors in business. Each "Subscriber" agrees that all persons, firms, and corporations now or hereafter controlled by it, and engaged in the manufacture of airplanes, or owning or controlling United States airplane patents, shall be caused to execute this agreement.

XVI. EXECUTION OF AGREEMENT

This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

In Witness Whereof, the parties hereto have executed this instrument as of the day and year first above written.

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

LICENSE

License, granted this _____ day of _____, 1917, by the (hereinafter called the Licensor), to _____ (hereinafter called the Licensee).

Whereas the Licensor and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called "Subscribers") heretofore, entered into a certain agreement dated July 24, 1917, entitled "Cross License Agreement" (a copy of which is hereto annexed), wherein and whereby the Licensor agreed to grant certain licenses to the other "Subscribers"; and

Whereas the said agreement also authorized and empowered the Manufacturers Aircraft Association, Inc., as the agent and attorney in fact of the Licensor, to make, execute, and deliver such licenses in the name of the Licensor; and it is desired to execute the powers therein granted;

Now, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensor does hereby give and grant unto the said Licensee the unrestricted, but non-exclusive license to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by it, or by any firm, corporation, or association owned or controlled by it, or under which it or any such firm, corporation, or association have or shall have the right to grant licenses—in and throughout the United States, its territories, and dependencies for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes, and except further that no licenses are hereby granted under the Dunne patents, No. 975,403, issued November 15, 1910, and No. 1,003,721 issued September 19, 1911, the rights under which are held by the Burgess Company.

The patents, the patents to issue on inventions, and the agreements with reference to which the Licensor has a right to grant licenses at the present time, and which are intended to be included in this license are set forth in Schedule "A", hereto annexed.

2. This license shall run to the full end of the term of the Letters Patent under which the license is or is to be granted, and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner set forth in the "Cross License Agreement" hereinbefore referred to.

3. This license is made subject to all the terms, conditions, covenants, and agreements contained in said "Cross License Agreement", which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this instrument to be executed as of the day and year first above written.

by MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

SUPPLEMENTAL CROSS-LICENSE AGREEMENT

This supplemental agreement, made this _____ day of _____, 1918, between the Manufacturers Aircraft Association, Inc., a New York Corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers"), as are and shall become stockholders of the said "Company", in the manner and under the conditions provided in the Bylaws thereof (which for the purposes of this agreement are made a part hereof), parties of the second part;

Whereas an agreement dated the 24th day of July 1917 was entered into between the "Company" and certain "Subscribers", wherein and whereby it was agreed, among other things, that the "Company" should issue licenses to said "Subscribers" to manufacture, sell, and use airplanes embodying the patents owned and controlled by the "Subscribers", and that the "Subscribers" should pay, as a royalty for such licenses, for the use of the patents now owned or

Digitized by Google

controlled by them, the sum of Two Hundred ($200) dollars upon each of said airplanes; and

Whereas it is desired to modify said agreement and to reduce the amount of the royalty which said "Subscribers" shall be obliged to pay for the use of said patents upon airplanes sold and delivered by them to the United States Government, during the period of the present war with the Imperial German Government:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves: It is covenanted and agreed, as follows:

First. That on the 10th days of January, April, July, and October, in each year, each "Subscriber" shall report to the "Company" the number of airplanes (with or without engines), sold and delivered by it, during the three preceding calendar months, to the United States Government; (1) Under flat-price contracts entered into prior to April 1st, 1918; (2) Under flat-price contracts entered into after March 31, 1918; (3) Under cost-plus contracts on which deliveries were made prior to January 1st, 1918, unless the same have been heretofore reported; (4) Under cost-plus contracts on which deliveries have been or shall be made after December 31, 1917.

Second. On the 10th day of January, April, July, and October, in each year, each "Subscriber" shall pay into the treasury of the "Company" on each airplane (with or without engines) delivered to the United States Government by it during the three preceding calendar months, the following sums of money, to wit: (1) Two hundred ($200) dollars on each airplane which has been or shall be delivered under flat-price contracts entered into prior to April 1st, 1918; (2) One hundred ($100) dollars on each airplane which shall be delivered under flat-price contracts entered into after March 31, 1918; (3) Two hundred ($200) dollars on each airplane delivered prior to January 1st, 1918, under cost-plus contracts; and (4) One hundred ($100) dollars on each airplane which has been or shall be delivered after December 31, 1917, under cost-plus contracts. Said payments to be made until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation shall have been paid the aggregate sum of Two million ($2,000,000) dollars as provided for in paragraph "Third" hereof.

Third. Out of the moneys paid into the "Company" pursuant to the provisions of paragraph "Second" hereof, the following payments shall be made by the "Company", on the 20th days of January, April, July, and October, in each year, to wit: To the Wright-Martin Aircraft Corporation Sixty-seven and one-half per cent (67½%) of the amount received on each airplane (with or without engines), and to the Curtiss Aeroplane and Motor Corporation Twenty per cent (20%) of the amount received on each airplane (with or without engines). Said payments shall be made until the sums paid to the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation under and pursuant to the terms of this supplemental agreement and the original agreement of July 24th, 1917, and from any other source paying royalties to the Manufacturers Aircraft Association, shall amount in the aggregate to Two million ($2,000,000) dollars, when and after which time the said "Subscribers" shall not be obliged to pay any royalties for the use of the patents now owned or controlled by the "Subscribers" or the "Company" in any airplane sold and delivered by them to the United States Government during the period of the present war with the Imperial German Government.

Fourth. Except as herein modified the original agreement of July 24th, 1917, shall be and remain in full force and effect between the parties thereto and all other persons, firms, or corporations who may become "Subscribers" thereto, it being understood, however, that such sums as are paid to the Wright-Martin Aircraft Corporation and Curtiss Aeroplane and Motor Corporation pursuant to the provisions of this supplemental agreement shall be credited upon and shall constitute a part of the moneys which they are entitled to receive under and pursuant to the provisions of paragraph IX of said original agreement.

Fifth. Nothing herein contained shall be taken, considered, or construed as fixing the reasonable value of the royalties to be paid for the use of the patents

Digitized by Google

now owned or controlled by the "Subscribers." The price herein agreed upon for royalties upon airplanes furnished during the present emergency to the United States Government is so fixed for the sole purpose of enabling the Government to acquire airplanes manufactured under said patents upon a preferential basis during the period of the present war.

Sixth. This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

In witness whereof the parties hereto have executed this instrument as of the day and year first above written.

SECOND SUPPLEMENTAL CROSS-LICENSE AGREEMENT

This supplemental agreement, made this 12th day of January 1923, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers") as are and shall become stockholders of the said "Company", in the manner and under the conditions provided in the By-Laws thereof (which for the purpose of this agreement are made a part hereof), parties of the second part;

Whereas an agreement dated the 24th day of July 1917 was entered into between the "Company" and certain "Subscribers", which agreement was amended by supplemental agreement dated the 19th day of April 1918 between the same parties; and

Whereas it is desired to modify the said agreement as hereinafter set forth:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained, and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves: It is covenanted and agreed, as follows:

First. That, anything in said cross-license agreement, as amended, to the contrary notwithstanding, particularly in Paragraph IX of said cross-license agreement, the "Company" may retain and use, for the purposes set forth in Paragraph IX of said cross-license agreement, up to twelve and one-half percent (12½%) of such amounts as may be paid to the "Company", on or after the 10th day of October 1922, with relation to the use of after-acquired patents in accordance with Subdivisions (c) and (e) of Paragraph VIII of said cross-license agreement;

Second. That, anything in said cross-license agreement, as amended, to the contrary notwithstanding, particularly in Paragraph IX of said cross-license agreement, the "Company" may retain and use, for the purpose set forth in Paragraph IX of said cross-license agreement, up to twelve and one-half percent (12½%) of that part of any amount paid to the "Company" on or after the 10th day of October 1922 in accordance with Subdivision (e) of Paragraph VIII as is not required for the payments provided for in subdivisions (a), (b), and (c) of Paragraph IX of said cross-license agreement.

Third. Except as herein modified, the original agreement of July 24, 1917, as amended April 19, 1918, shall be and remain in full force and effect between the parties thereto and all other persons, firms, or corporations who may become "Supbscribers" thereto.

Fourth. This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as

Digitized by Google

if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

In witness whereof, the parties hereto have executed this instrument as of the day and year first above written.

THE AMENDED CROSS-LICENSE AGREEMENT OF DECEMBER 31, 1928

This agreement, made this 31st day of December 1928, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company") party of the first part, and each person, firm, corporation, or association (hereinafter called the "Subscriber" or "Subscribers") as are and shall become stockholders of the said "Company" in the manner and under the conditions provided in the By-Laws thereof (which for the purpose of this Agreement are made a part hereof), parties of the second part:

Whereas an Agreement (hereinafter called the original Cross-License Agreement) dated the 24th day of July 1917, was entered into between the "Company" and certain "Subscribers", which Agreement was amended by a Supplemental Agreement dated the 19th day of April 1918, between the same parties, and which Agreement was further amended by a second Supplemental Agreement dated the 12th day of January 1923, between the same parties, and

Whereas the parties hereto are interested in the manufacture, sale, and use of airplanes, as hereinafter defined, and desire to promote and develop the industry in which they are engaged, and to encourage and advance the art applicable thereto; and

Whereas the said development and advancement, prior to the execution of the original Cross-License Agreement was not capable of complete accomplishment because of the existence of certain United States patents claimed to be basic in their nature, upon which suits have been brought, or threatened, for alleged infringement and for the collection of royalties and damages in connection therewith; and

Whereas it is desired to prevent and avoid such litigations or threatened litigations in the future and to give to all of the "Subscribers" the right to manufacture, sell, and use airplanes embodying the inventions of each of the "Subscribers" and to that end it is desired that licenses be granted as herein expressed; and

Whereas on account of conditions which did not exist and which were not anticipated at the date of execution of said original Cross-License Agreement, nor at the date of execution of the Supplemental Agreements of April 19, 1918, and January 12, 1923, respectively, and in an effort to better serve the art and industry as they now exist, it is desired to further modify and amend said original Cross-License Agreement as hereinafter set forth:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained, and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves:

It is covenanted and agreed: That the said original Cross-License Agreement as amended by the Supplemental Agreements of April 19, 1918, and January 12, 1923, anything therein contained to the contrary notwithstanding, shall from December 31st, 1928, which is fixed as the date of execution of this Agreement, be modified and amended to read henceforth as follows:

I. DEFINITIONS

The word "Airplane" as used in this agreement shall be understood to mean any form of heavier-than-air craft, using wing surfaces for sustaining it, and

Digitized by Google

to include such indirect power plant appurtenances as radiators, oil-coolers, fuel and oil tanks, and motor controls; but not to include the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The words "Airplane patent", as used in this agreement, shall be understood to mean any patent covering inventions for or capable of use in or in connection with airplanes, including such indirect power plant appurtenances as radiators, oil-coolers, fuel and oil tanks, and motor controls; but not including the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The words "selling price", as used in this agreement, shall be understood to mean the manufacturer's regular selling price of an airplane, completely equipped according to contract, if and when delivered under formal written contract, or in the absence of such contract, a completely equipped airplane ready to operate, as above defined, minus the then prevailing selling price of the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears, irrespective of any and all discounts and rebates of whatsoever character.

II. LICENSES AND POWERS GRANTED

The "Subscribers" grant, agree to grant, and cause to be granted to each other, licenses to make, use and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them or any of them, or by any firm, corporation, or association owned or controlled by them or under which they or any of them, or any such firm, corporation, or association, have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall said rights or the license herein provided for, apply to or include the use of said patents in their application to other than airplanes.

All licenses provided for herein shall run to the full end of the term of the letters patent under which the license is or is to be granted and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner hereinafter stated.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them and in their respective names, to make and execute licenses in writing in the form hereto annexed, and to deliver the same to those of the "Subscribers" who, at the time, are stockholders of the "Company" not in default hereunder and who shall have executed an agreement in writing of like tenor to this; and to enforce said licenses and any and all other obligations (including the obligation to make payments) of the "Subscribers" under this Agreement and the "Subscribers" hereby give and grant unto said "Company" as full, complete, and ample power and authority in the premises as the "Subscribers" themselves now have and possess.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them in their respective names, to make and execute licenses to the Government of the United States and/or the various branches, bureaus, and departments thereof, for the use by the Government and/or the various branches, bureaus, and departments thereof of the patents covered by this Agreement, upon the agreement by the Government of the United States and/or the various branches, bureaus, and departments thereof, to pay to the "Company" the rates of royalty fixed in paragraph VII hereof, and to demand and receive of the Government of the United States and/or the various branches, bureaus, and departments thereof, royalties due the "Company" and to give the said Government of the United States and/or the various branches, bureaus, and departments thereof, receipts for royalties so collected, and to disburse the royalties so received in the same manner as the "Company" is herein authorized to disburse the royalties received by it from the "Subscribers" hereto.

All licenses provided for herein, when made, executed, and delivered in accordance with the provisions hereof, shall have the same force and effect as if they had been executed and delivered by the "Subscribers" themselves.

Digitized by Google

III. COVENANT OF FURTHER ASSURANCE

(a) Each "Subscriber" now or hereafter, having rights under any United States airplane patent or invention, of such character that it has legal right and power to procure the grant of rights thereunder to others, but is not itself empowered to grant such rights, covenants to procure the execution of such further instrument as may be necessary to empower the "Company" to grant rights under such patent, or with reference to such invention, to the extent and in the manner herein provided.

(b) Each "Subscriber" covenants that it will not contract for or obtain any rights under any such patent or invention in such manner that its owner would be prevented from granting to other "Subscribers" hereto similar rights on the same terms unless the "Subscriber" obtains, at the same time, the further privilege to grant rights under said patent or said invention, whereby the same may and will be brought under the operation of this instrument.

IV. COVENANTS AGAINST OTHER LICENSES

Each "Subscriber" covenants that it has not heretofore and will not hereafter enter into any contract or arrangement, whereby its privileges under United States airplane patents, issued or to be issued, inventions and rights, owned or controlled by it, have been or shall be diminished or surrendered so as to exclude or restrict the operation of this instrument in respect thereto. Each "Subscriber" further covenants that it will not grant licenses under any such patents for use in airplanes, with reference to which it is receiving royalties hereunder, to any other person, firm, or corporation on more favorable, or lower terms of royalty, than those herein provided, or which may become more favorable or lower during the term of such license.

V. AFTER ACQUIRED PATENTS

When a "Subscriber" shall hereafter acquire a United States airplane patent, or any right thereunder, he shall be entitled to compensation for the use thereof if the patent or patent right covers an invention which secures the performance of a function not before known to the art or constitutes an adaptation for the first time to a commercial use of an invention known to the industry to be desirable of use but not used because of lack of adaptation, or is otherwise of striking character or constitutes a radical departure from previous practice, or if either the price paid therefor or the amount expended in developing the same is such as to justify such compensation, provided that at the time said patent or patent right is reported to the "Company" as required in subdivision (b) of Paragraph VI, the "Subscriber" claims such compensation and states the grounds on which such claim is based. Such report and claims shall be submitted to a Board of Arbitration to be selected in the manner provided for in Paragraph XIV hereof, which Board shall determine whether such compensation shall be paid, and if so, the total amount thereof and the rate of royalty, or other payments which shall be paid (toward such compensation) by each "Subscriber" upon the issuance of a license under said patent and the use by any "Subscriber" of the subject matter covered by said patent, and shall also fix the time or times when said royalties or other amounts shall be paid. Licenses shall be issued to each "Subscriber" as a matter of course, through the offices of the "Company" within thirty days (30 days) after the rendition by such Board of Arbitration of its final report, whether or not compensation, under such after acquired patent, is or is not required to be paid.

VI. REPORTS TO THE "COMPANY"

The following reports in writing shall be rendered to the "Company" by each "Subscriber" at the time or times hereinafter set forth:

(a) At the time of the execution of this Agreement each "Subscriber" shall report all United States airplane patents and inventions, together with serial numbers and filing dates of all pending applications for such patents and all rights under such patents and inventions then owned or controlled by it, but no omission from such report shall exclude the patent, application, or right so omitted from the operation of this Agreement.

Digitized by Google

(b) Within thirty days after the acquisition by any "Subscriber" of any United States patent (other than patents to be issued upon inventions now owned by it) or right within the scope of this Agreement, each such "Subscriber" shall report such acquisition, together with all the facts known to it as to such patent or right and its manner of acquistion. If such "Subscriber" claims that additional compensation should be paid to it for licenses under such patent or right, it shall so claim in its report.

(c) On the 10th days of January, April, July, and October, in each year, each "Subscriber" shall report the number of airplanes (with or without engines) sold and delivered by it, together with the names of the purchasers, the selling price of each airplane, and the dates of delivery, or the number of airplanes put into use for other than experimental or development purposes, and the number of airplanes (with or without engines) shipped out of the United States, during the preceding three calendar months.

(d) Each License to other than "Subscribers", as provided in Paragraph IV hereof, shall be reported within thirty days after its delivery.

(e) Each suit instituted against infringers of the patents licensed hereunder shall be reported in a reasonable time.

The first report under sub-division (c) hereof shall be made by each "Subscriber" on the tenth day of January, April, July, or October first occurring after it has become a "Subscriber" hereto and shall cover the period from December 31, 1928, to the first day of the month in which the report is due.

Each of the "Subscribers" hereto shall keep separate books of account showing all business done under or subject to the operation of this Agreement. The "Company" may at any time have a New York Certified Public Accountant, to be designated by it, audit such books of account of the "Subscribers", together with such other accounts as the accountant may deem necessary, in order to verify or correct the report herein provided for, and the "Company" shall have such audit made when any "Subscriber" so demands. Such audit, however, shall be limited to ascertaining whether the reports herein provided for are properly made and to correcting the same, if necessity for correction shall appear. No information obtained from any such audit shall be reported by the accountant or given to any of the parties hereto, except as it directly applies to the reports required by this Agreement.

VII. PAYMENTS TO THE "COMPANY"

Each "Subscriber" agrees to pay into the treasury of the "Company" on the 10th days of January, April, July, and October in each year the following sums of money, to wit:

(a) On each airplane, with or without engine, required to be reported as provided, in sub-division (c) of Paragraph VI hereof, the sum of two per cent (2%) of the selling price of such airplane, with a maximum of Two Hundred Dollars ($200) on any one airplane regardless of its cost or selling price until such time as the Curtiss Airplane & Motor Company, Inc., shall have been paid the aggregate sums provided for in Paragraph VIII hereof, or until United States Patent No. 1203550, issued October 31, 1916, shall have expired.

(b) On each airplane, with or without engine, required to be reported as provided for in sub-division (c) of Paragraph VI hereof, such sum not to exceed one-quarter of one per cent of the selling price of such airplane, but in no case to exceed twenty-five dollars ($25.00) per airplane, as the Board of Directors of the "Company" may, from time to time, fix and determine as payable after October 31, 1933, or after the above mentioned aggregate sums shall have been paid to the Curtiss Airplane & Motor Company, Inc.

(c) Such amount or amounts as the Board of Arbitration may specify as special compensation for after acquired patents as provided in Paragraph V hereof and required to be reported in subdivision (b) of Paragraph VI.

(d) All royalties received under Licenses referred to in subdivision (d) of Paragraph VI.

(e) All monies received as the result of suits reported under sub-division (e) of Paragraph VI, less deductions for actual cost to the Subscriber of such suit.

Each "Subscriber" who shall become a party hereto after the thirty-first day of December 1928 shall, on the 10th day of January, April, July, or October next thereafter occurring, pay to the "Company" those amounts which it would have been obliged to pay in accordance with the foregoing if it had been a "Subscriber" on December 31, 1928.

Monies paid into the treasury of the "Company" pursuant to any provisions hereof shall not be or constitute or be deemed to be or constitute the assets,

Digitized by Google

property, or profits of said "Company" but shall be received and disbursed by it as the agent and the attorney in fact of the "Subscriber" in the manner and for the purposes herein mentioned.

VIII. PAYMENTS BY THE "COMPANY"

Out of the monies paid into the treasury of the "Company" pursuant to the provisions hereof and of the predecessor agreements hereinabove mentioned, the following payments shall be made by the Company on the 20th days of January, April, July, and October in each year, to wit:

(a) To the Curtiss Aeroplane & Motor Company, Inc., eighty-seven and one-half percent (87½%) of all sums received on account of each of said airplanes with reference to which payments have been or shall be made in accordance with sub-divisions (a) and (d) of Paragraph VII hereof, until the payments so made to Curtiss Airplane & Motor Company, Inc., under the original Cross-License Agreement, when increased by the payments made after the execution of this Amended Agreement, shall aggregate the sum of Two Million Dollars ($2,000,000), or until the United States Patent No. 1203550, issued October 31, 1916, shall have expired, when all payments to it hereunder shall cease, except as hereinafter provided.

(b) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" with relation to the use of after acquired patents in accordance with Sub-division (c) of Paragraph VII, subject to the reservation in sub-division (a) of Paragraph IX.

(c) To any "Subscriber" who shall have granted licenses to other than subscribers, as provided in Paragraph IV, the royalties received under such licenses which are not required for payments provided for in sub-division (a) of this Paragraph VIII, subject to the reservation of sub-division (b) of Paragraph IX.

IX. MONEYS RETAINED BY THE COMPANY

(a) The "Company" may retain and use, for the purposes set forth in sub-division (c) of this Paragraph IX up to twelve and one-half per cent (12½%) of such amounts as may be paid to the "Company" with relation to the use of after acquired patents in accordance with sub-division (c) of Paragraph VII.

(b) The "Company" may retain and use for the purposes set forth in sub-division (c) of this Paragraph IX, up to twelve and one-half per cent (12½%) of that part of any amount paid to the "Company" on account of direct licenses given and reported in accordance with sub-division (d) of Paragraph VI.

(c) Out of the balance of said moneys paid into the treasury of the "Company" under sub-division (a) of Paragraph VII of this Agreement, and not paid out by the Company under sub-division (a) of Paragraph VIII, the "Company" may retain and use sufficient to cover its operating expenses and to create such fund as, in the judgment of the Board of Directors of said "Company" shall be necessary and proper for the further development of the airplane art and industry, and the purchase of patents and rights for the benefit of the "Subscribers" hereto.

X. DISPOSITION OF SURPLUS

If, after making the payments and reservations herein provided for, any surplus or balance remains out of the funds so paid into the treasury of the "Company" the same shall be distributed by the "Company" from time to time, among those "Subscribers" who have contributed to said moneys, in proportion to their respective contributions under sub-divisions (a) and (b) of Paragraph VII other than those required for payments under this Paragraph X.

XI. BREACH OF AGREEMENT

In the event that any "Subscriber" is claimed by the "Company" or any other "Subscriber" to be in default in the performance of any of its obligations hereunder, and such claimed default continues after thirty days' notice in writing, by the "Company" or any "Subscriber" claiming the default, then the Board of Arbitration, hereinafter provided for, shall determine whether there has been such specified default and if such default is found to exist, shall fix the time within which it must be repaired, and shall assess such damages and impose upon the "Subscriber" in default such other requirements (including the forfeiture of its stock and license) as may seem to the said Board of

Digitized by Google

Arbitration to be proper under the circumstances. Each "Subscriber" covenants and agrees that it will pay such damages and comply with such requirements as may be specified by the said Board of Arbitration.

Nothing contained in this Paragraph shall deprive the "Company" of the power to make, execute, and deliver licenses under the patents or patent rights owned and controlled by any defaulting "Subscriber" or to which the "Subscriber" may be entitled at the time to cease to be a stockholder or "Subscriber" nor to deprive other than defaulting "Subscribers" of any right which they may have received to the use of the said patents or patent rights.

XII. WITHDRAWAL FROM AGREEMENT

Any "Subscriber" may withdraw from this Agreement at any time after one (1) year after executing and delivering it, providing that written notice of its election to do so shall be given to the "Company" at least thirty (30) days in advance of the date when the next quarterly report is required to be filed under sub-division (c) of Paragraph VI hereof and on fulfilling all of its obligations up to the date of such withdrawal, but no withdrawal shall relieve the other parties and other "Subscribers" from their obligations to each other hereunder, nor deprive them of their rights acquired under the patents and patent rights owned or controlled by the withdrawing "Subscriber" at the time of withdrawal, all of said patents and patent rights remaining under this Agreement, but such withdrawing "Subscriber" shall cease to have any rights under the patents of the other "Subscribers" hereto, or any other right under this Agreement, from and after such withdrawal.

XIII. REPURCHASE OF STOCK

In the event of the death of any person who is a stockholder in the "Company" or in the event of the dissolution of any corporation or firm which is a stockholder therein, or in the event of the bankruptcy or insolvency of any such stockholders, or in the event of withdrawal under Paragraph XII hereof, the "Company" shall have the right to purchase for the benefit of the other "Subscribers" the stock held by such person, firm, or corporation at a sum not to exceed the distributive share or shares of such stockholder in the funds held by the "Company" and the license or licensees issued to such stockholder shall be surrendered to the "Company" and cancelled.

XIV. ARBITRATION OF CLAIMS AND DISPUTES

In case of any dispute or controversy between the "Subscribers" hereto, or between the "Subscribers" and the "Company" or in case of a claim by a "Subscriber" for special compensation for license under patents or rights hereafter acquired by it, or in case of breach of this Agreement, the said dispute, controversy, claim, or breach shall, within thirty days after a "Subscriber" or "Subscribers" shall have given notice in writing to the "Company" or the "Company" shall have given notice in writing to the "Subscribers" hereof, be referred to a board of disinterested arbitrators, consisting of three persons, for determination.

In the case of a claim for special compensation, one member of such Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" making the claim, and the third by the other two arbitrators.

In the case of any dispute between the "Company" and a "Subscriber" or "Subscribers" one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" (or if more than one "Subscriber" is involved in the same dispute, then by a majority of those so involved) and the third by the other two arbitrators.

In case of a breach of this Agreement asserted by the "Company" or a "Subscriber" against another "Subscriber", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" against whom the assertion of breach is made, and the third by the other two arbitrators.

If either the Board of Directors or the "Subscribers" fail to appoint a member of the Board of Arbitration within the time specified, the other party or parties may appoint such member or fill such vacancy.

Digitized by Google

The decision of a majority of the members of said Board upon all matters submitted to them for adjudication shall be final and binding upon all the parties hereto.

XV. RELEASE TO "SUBSCRIBERS"

The "Subscribers" hereby waive and release any and all claims which they or any of them may have had against each other for damages and profits on account of any infringement or alleged infringement prior to December 31, 1928, of any patent included within this instrument in the manufacture, sale, or use of airplanes.

XVI. BINDING UPON PARTIES, CONTROLLED COMPANIES, LEGAL REPRESENTATIVES, ETC.

This Agreement is binding upon the parties hereto and their several successors, legal representatives and assigns, but shall inure to the benefit of only their several successors in business. Each "Subscriber" agrees that all persons, firms, and corporations now or hereafter controlled by it and engaged in the manufacture of airplanes, or owning or controlling United States airplane patents shall be caused to execute this Agreement.

XVII. EXECUTION OF AGREEMENT

Nothing herein contained shall be construed to relieve either the "Company" or any "Subscriber" hereto of any act or obligation to be performed or any duty to be fulfilled under the terms and conditions of the original Cross-License Agreement as amended April 19, 1918, and January 12, 1923, respectively, which act, obligation, or duty, as and of December 31, 1928, shall remain at such time unperformed or unfulfilled.

This Agreement may be executed by the "Subscriber" in any number of counterparts, but when so executed shall constitute but one and the same Agreement, and shall be as binding, and of the same force and effect as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been dated December 31, 1928, which date shall be the date on which this Agreement becomes effective.

This Agreement of December 31, 1928, amending the original Cross-License Agreement of July 24, 1917, in turn amended by the Supplemental Agreements of 1918 and January 12, 1923, respectively, shall, for convenience, be referred to as "The Amended Cross-License Agreement of December 31, 1928."

In witness whereof, the parties hereto have executed this instrument as of the day and year first above written.

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.,
By _____, *President.*
_____, *Secretary.*

_____
By _____, *President.*
_____, *Secretary.*

CERTIFICATION OF INCORPORATION OF MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

This is to certify that we, the undersigned, citizens of the United States, all being of full age, and at least one of whom is a resident of the State of New York, desiring to form a stock corporation pursuant to the provisions of the business corporations law of the State of New York, do hereby make, sign, acknowledge, and file this instrument of writing for that purpose, as follows:

First. The name of the proposed corporation is Manufacturers Aircraft Association, Inc.

Second. The objects and purposes for which it is formed are the following:

(1) To manufacture, buy, sell, and deal in all kinds of aircraft, aircraft engines, and all parts and accessories used or useful in aircraft.

Digitized by Google

(2) To acquire by purchase or otherwise and sell and dispose of all kinds of personal property, including patents, patent rights, applications for patents and licenses and shop rights under patents, and to issue licenses; sublicenses or cross-licenses under letters patent.

(3) To acquire by purchase, lease, or otherwise any real property or any rights or privileges in real property which the company may deem necessary and proper for the purposes of its business.

(4) To acquire and take over the goodwill, property, and assets and assume the liabilities of any person, firm, association, or corporation engaged in similar or kindred business for the purpose herein specified.

(5) To acquire, purchase, hold, sell, and deal in or dispose of stocks, bonds, securities, and other evidences of debt of any other corporation, domestic or foreign, and issue in exchange therefor, its stocks, bonds, or other obligations, and while the owner of any stocks, bonds, or other obligations, to possess and exercise in respect thereto all rights, powers, and privileges of individual owners or holders and to exercise any and all voting powers thereunder.

(6) To establish and maintain in connection with the business of the corporation and as lawfully incidental thereto, laboratories for the purpose of the development and extension of the business herein referred to, together with such books of reference as may be required for said purposes.

(7) To make and enter into all kinds of contracts, agreements, and obligations with any person, firm, or corporation, for purchasing, acquiring, manufacturing, exchanging, or dealing in any article of personal property of any kind or nature, to the extent that the same may be permitted by the business corporations' law.

(8) To act as agent or attorney in fact or representative of firms, corporations, or individuals, and as such to develop, extend, and promote the business interests thereof.

(9) To consolidate the business of this corporation with that of any corporation engaged in or authorized to conduct a similar business to that herein provided for, insofar as the laws of the State of New York permit such consolidation.

(10) To purchase, hold, and reissue the shares of its own capital stock in the manner authorized by statute.

(11) Generally, to do every act and thing necessary, suitable and proper for the accomplishment of any or all of the objects, the attainment of any or all of the purposes or in furtherance of any and all of the powers herein set forth, either alone or in association with any other corporation, firm, or individual and to do any other act, thing or things incident or appertaining to, or growing out of, or connected with the aforesaid business or powers, or any part or parts thereof, provided the same are not inconsistent with the business corporations law of the State of New York, under which this corporation is organized.

Third. The number of shares of capital stock that may be issued by the corporation is one hundred (100), which shall have no nominal or par value.

Fourth. The amount of capital with which said corporation will commence and carry on business is one thousand ($1,000) dollars.

Fifth. The corporation may issue and sell its authorized shares from time to time for such consideration as shall be the fair market value of such shares.

Sixth. The principal business office of the corporation shall be located in the Borough of Manhattan, city, county, and State of New York.

Seventh. The duration of said corporation shall be perpetual.

Eighth. The number of its directors shall be seven (7), but they need not be stockholders of said corporation. They may hold their meetings at their principal office in the State of New York, or at such other place or places within or outside of said State, which they may determine.

Ninth. The names and post-office addresses of the directors for the first year are as follows: Albert H. Flint, 500 West End Avenue, New York City, N. Y.; Benjamin S. Foss, Hyde Park, Boston, Mass.; George H. Houston, 360 Riverside Drive, New York City, N. Y.; Harry B. Mingle, 233 Broadway, New York City, N. Y.; Frank H. Russell, Marblehead, Mass.; Harold E. Talbott, Jr., Dayton, Ohio; John P. Tarbox, Buffalo, N. Y.

Tenth. The names and post-office addresses of the subscribers to this certificate, and the number of shares of stock which each agrees to take in the corporation are as follows: Joseph S. Ames, Baltimore, Md., one; W. Benton Crisp, New York City, N. Y., one; Albert H. Flint, New York City, N. Y., one;

Digitized by Google

George H. Houston, New York City, N. Y., one; John P. Tarbox, Buffalo, N. Y., one.

In witness whereof, we have made, signed, and acknowledged this certificate in duplicate, this 16th day of July, in the year one thousand nine hundred and seventeen.

JOSEPH S. AMES. [L. S.]
W. BENTON CRISP. [L. S.]

Clerk's No. 419, Register's No. 9204.

Term expires March 30, 1919.

STATE OF NEW YORK,
County of New York, ss:

On this 16th day of July, in the year one thousand nine hundred and seventeen, before me personally appeared Joseph S. Ames, W. Benton Crisp, Albert H. Flint, George H. Houston, and John P. Tarbox, to me known, and known to me to be the individuals described in and who executed the foregoing certificates, and they severally duly acknowledged to me that they executed the same.

[NOTARIAL SEAL]

ALBERT F. SMITH,
Notary Public, New York County,
Clerk's No. 419, Register's No. 9204.

Term expires March 30, 1919.

No. 48064, series B.

STATE OF NEW YORK,
County of New York, ss:

I, William F. Schneider, clerk of the county of New York, and also clerk of the supreme court for the said county, the same being a court of record, do hereby certify that Albert P. Smith, whose name is subscribed to the deposition or certificate of the proof or acknowledgement of the annexed instrument, and thereupon written, was, at the time of taking such deposition, or proof and acknowledgement, a notary public in and for such county, duly commissioner and sworn, and authorized by the laws of said State, to take depositions and to administer oaths to be used in any court of said State and for general purposes; and also to take acknowledgments and proofs of deeds of conveyances for land, tenements or hereditaments in said State of New York. And further, that I am well acquainted with the handwriting of such notary public and verily believe that the signature to which said deposition or certificate of proof or acknowledgment is genuine.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said court and county, the 17 day of July 1917.

[SEAL] W. F. SCHNEIDER, *Clerk.*

BY-LAWS OF THE MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

(As Amended to February 16, 1931)

ARTICLE I. STOCKHOLDERS[1]

SECTION 1. *Qualification of Stockholders.*—To entitle a person, firm, or corporation to become a stockholder of this corporation, he or it, as the case may be, shall be[1] a responsible manufacturer of aircraft or aircraft engines, or parts and accessories thereof; or a responsible manufacturer who intends to become a bona fide producer of the same; or a manufacturer to whom the United States Government has given a contract for the construction of ten or more complete aircraft or aircraft engines; or any person, firm, or corporation owning a controlling United States patents relating to any of the foregoing.[1] No one becoming a stockholder of this corporation[1] shall, however, acquire, own or hold at any time more than one (1) share of stock of the corporation.[1]

Digitized by Google

ARTICLE II. DIRECTORS

SECTION 1. *Directors.*—The affairs of the corporation shall be managed and controlled by a Board of Directors to consist of twelve persons, who shall be elected annually at the regular annual meetings of the stockholders and who shall serve for one year, or until their successors are elected.

SECTION 2. *Vacancies.*—Vacancies in the Board of Directors occurring during the year shall be filled by a majority vote of the remaining members of the Board at any regular meeting thereof, or at any special meeting called for the purpose of filling any such vacancies.

ARTICLE III. OFFICERS AND THEIR DUTIES

SECTION 1. *Officers.*—The officers of the corporation shall consist of a President, as many Vice-Presidents as the Board of Directors may from time to time deem necessary or expedient, a Treasurer, and a Secretary. The Board may also elect or appoint at any time an Assistant Treasurer and Assistant Secretary, and such other officers, agents, and employees as it may deem proper and for such periods as it may determine. The offices of Secretary and Treasurer may be held by one and the same person and the offices of Assistant Treasurer and Assistant Secretary may also be held by one and the same person.

SECTION 2. *Election of Officers.*—As soon as practicable after the election of the Board of Directors in each year, such newly elected Directors shall hold an Annual Meeting and elect a President from their number and also elect one or more Vice-Presidents, as provided in Section 1 of this Article, a Treasurer and a Secretary, all of whom shall serve for the ensuing year or until their successors are elected.

SECTION 3. Vacancies.—In the event of a vacancy in any of said offices, either by death, resignation, or otherwise, the same shall be filled by the Board of Directors at any regular or special meeting of said board.

SECTION 4. *The President—His Duties.*—The President shall preside at all meetings of the corporation and at all meetings of the Board of Directors. He, together with the Secretary, unless otherwise ordered by the Board of Directors, shall sign all contracts, deeds, leases, licenses, or other instruments or writings necessary for the due and proper conduct of the business of the corporation. He, together with the Treasurer, unless otherwise ordered by the Board of Directors, shall sign all certificates of stock, and bonds, issued by the corporation, and shall countersign all checks, drafts, notes, or bills which may be required for the purposes of the corporation. He shall have general supervision of the affairs of the corporation and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 5. *The Vice-Presidents—Their Duties.*—All Vice-Presidents shall have equal rank. In the absence of the President they shall perform all the duties of the President and such other duties as may be required of them from time to time by the Board of Directors and as are required of them by the laws of the State of New York.

SECTION 6. *The Treasurer—His Duties.*—The Treasurer shall have charge of all moneys, bills, notes, and other evidences of debt of the corporation; shall deposit all moneys coming into his hands in the name of the corporations, and shall keep true and accurate books of account of all such moneys and other property of the corporation received by him. He, together with the President, unless otherwise ordered by the Board of Directors, shall sign all certificates of stock, and bonds, checks, drafts, and notes or bills issued by or required for the purposes of the corporation. He shall also perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York. He shall report from time to time to the Board of Directors or as often as may be required by said Board, concerning all matters pertaining to his office. He shall give a bond for the faithful discharge of the duties of his office in such amount as shall be fixed by the Board of Directors.

SECTION 7. *The Assistant Treasurer—His Duties.*—The Assistant Treasurer, in the absence of the Treasurer, shall perform all the duties of the Treasurer, and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York. He shall give a bond for the faithful discharge of the duties of his office in such amount as shall be fixed by the Board of Directors.

Digitized by Google

SECTION 8. *The Secretary—His Duties.*—The Secretary shall have charge of the corporate seal and shall attend all sessions of the stockholders and the Board of Directors; act as the clerk thereof and keep true and accurate records and minutes of all proceedings of said stockholders and Board in a book or books to be kept for that purpose. He, together with the President, unless otherwise ordered by the Board of Directors, shall execute all contracts, deeds, leases, licenses, or other instruments or writing necessary for the due and proper conduct of the business of the corporation. He shall send out all notices of meetings of stockholders and directors of the corporation, and shall perform such other duties as may be required of him by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 9. *The Assistant Secretary—His Duties.*—The Assistant Secretary, in the absence of the Secretary, shall perform all the duties of the Secretary and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 10. *Compensation.*—The officers and directors of the corporation may receive by way of compensation for services rendered by them such salary or salaries as the Board of Directors of said corporation may from time to time approve.

ARTICLE IV. MEETINGS, QUORUMS, ETC.

SECTION 1. *Annual Meetings of Stockholders.*—There shall be an annual meeting of the stockholders of the corporation to be held at 11 A. M. on the last Friday in January of each year. At such meeting the stockholders may transact any and all business which may properly come before them, and shall elect the directors for the ensuing year in the manner hereinbefore set forth.

SECTION 2. *Annual Meetings of Directors.*—Immediately after the annual stockholders' meeting hereinbefore referred to, or as soon thereafter as may be convenient, there shall be held an annual meeting of the Board of Directors of the corporation. At such meeting said Board shall elect the officers for the ensuing year, and may transact any and all other business which may properly come before it.

SECTION 3. *Special Meetings of Stockholders.*—Special meetings of the stockholders shall be called at the request of holders of the stock owning at least ten (10) per cent. thereof, by the officers of the corporation, or any of them, to be held within fifteen (15) days after said request has been made, or by the President without request. The notice of the meeting shall be in writing and signed by the President, or a Vice-President, or the Secretary, or an Assistant Secretary. Such notice shall state the purpose or purposes for which the meeting is called, the time and the place where the same is to be held, and a copy thereof shall be served either personally or by mail upon each stockholder of record entitled to vote at such meeting and to any stockholder who by reason of any action proposed at such meeting would be entitled to have his stock appraised if such action were taken, not less than ten (10) nor more than forty (40) days before the meeting. If mailed, it shall be directed to a stockholder at his address as it appears on the stock book unless he shall have filed with the Secretary of the corporation a written request that notices intended for him be mailed to some other address, in which case it shall be mailed to the address designated in such request.

SECTION 4. *Special Meeting of Board of Directors.*—The officers of the corporation, or any of them, upon the request of any two members of the Board of Directors, shall call a special meeting of said Board, to be held within five (5) days after the receipt of said request, and the Secretary shall give by mail and by telegraph to each member of said Board at his last-known post office address, a notice of said meeting stating the purposes thereof, at least three (3) days before the date upon which such meeting is to be held. The President may, without request, upon like notice, call a special meeting of said Board.

SECTION 5. *Quorum of Stockholders' Meetings.*—At all meetings of stockholders, except where it is otherwise provided by law, it shall be necessary that stockholders representing in person or by proxy a majority of the capital stock, issued and outstanding, be present in order to constitute a quorum for the transaction of business.

SECTION 6. *Quorum of Directors' Meetings.*—At all meetings of the Board of Directors at least one-third of the number thereof shall be present to constitute a quorum for the transaction of business.

Digitized by Google

SECTION 7. *Failure to Perform Duty.*—Should any person whose duty it is to call a meeting at the time or times required by these by-laws, fail or refuse to do so, the meeting may be called by any other officer or director.

ARTICLE V. BALLOTING AND INSPECTORS

SECTION 1. *Balloting.*—At all meetings of the stockholders the voting shall be by ballot. At all meetings of the Board of Directors the voting may be viva voce.

SECTION 2. *Inspectors.*—The stockholders may at their annual meetings provided for in Section 1, of Article IV hereof, in each year, designate two (2) persons who shall act as inspectors of election for the ensuing year. Upon their failure so to designate inspectors, the Board of Directors may, at any time prior to election, designate the same. Upon the failure of both to so designate inspectors prior to any election, the President is authorized to make such designation.

ARTICLE VI. AMENDMENT

SECTION 1. These by-laws may not be amended, altered or suspended by the Board of Directors, but only by stockholders at an annual or special meeting, by the affirmative vote of stockholders representing at least seventy-five (75%) per cent. in amount of the stock then outstanding.[1]

CONTRACT BETWEEN MANUFACTURERS AIRCRAFT ASSOCIATION, INC., AND THE WAR AND NAVY DEPARTMENTS OF THE UNITED STATES GOVERNMENT, GRANTING A NON-EXCLUSIVE LICENSE TO THE LATTER UNDER ALL AIRPLANE PATENTS EMBRACED WITHIN AND ACCORDING TO THE TERMS OF THE AMENDED CROSS-LICENSE AGREEMENT OF SAID ASSOCIATION

(Effective December 31st, 1928)

Contract of the thirty-first day of December 1928, by and between Manufacturers Aircraft Association, Inc., a New York Corporation, hereinafter termed "Association", acting in behalf of its subscribers and in its own behalf, party of the first part, and the United States of America, represented by the Secretary of War and the Secretary of the Navy, hereinafter termed "The Government", party of the second part, witnesseth:

Whereas the Association controls and has power to grant licenses under certain United States patents covering important inventions relating to aircraft; as listed and shown in appendix A hereto attached, and has been authorized to act herein; and

Whereas the use of several of these patented inventions is necessary in the successful operation of airplanes or hydro-airplanes, the term planes being hereinafter used to include airplanes, hydro-airplanes, and flying boats; and

Whereas the Government has acquired or desires to acquire aircraft, using certain or all of the aforesaid inventions; and

Whereas all formal and informal Agreements between the Government and the Association relating to the period of the War for the licensed use of said patented inventions and for payment of royalties, were terminated on July 2, 1921, except only such matters as are in dispute in a certain action now pending in the United States Court of Claims entitled "Manufacturers Aircraft Association, Inc., vs. United States of America", which action covers the period both before and after July 2, 1921; and

Whereas the Government desires to secure licenses for the future use of said patented inventions under as favorable terms and conditions as is provided in the Amended Cross-License Agreement of the thirty-first day of December 1928, to which reference is made herein.

Now therefore, in consideration of the premises, covenants, and conditions herein contained and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows, viz:

1. The Association hereby grants to the Government a non-exclusive license to make, or cause to be made, and use and sell in the United States, its terri-

[1] Provisions for Voting Trust Agreement, which expired by limitation in July 1925, omitted.

Digitized by Google

tories and possessions during the term of this contract, and thereafter to use and to sell airplanes under any and all of such airplane patents as defined in said Cross-License Agreement as are enumerated in Appendix A of the Amended Cross-License Agreement, dated December 31, 1928, copy of which is attached hereto and by reference made a part hereof, and under all other patents which have been or may be reported to or acquired by or come into the control of the Manufacturers Aircraft Association, Inc., and/or Subscribers thereto: Provided, however, that no licenses are so granted to the Government hereunder in patents reported to the Association with a claim for extra compensation under Paragraph V of said Amended Cross-License Agreement: Provided further, that an option is hereby granted to the Government to acquire licenses under those patents so reported on the same terms as granted to said Subscribers.

2. The Government agrees to pay for such use of the inventions described in any and all of said patents, a sum equal to two percent (2%) of the cost or purchase price of such airplanes, as it may either make or acquire, as provided in Paragraph 1, above, provided that the Government shall not be required to pay nor shall any obligation accrue to pay royalties on airplanes upon which members or nonmembers of the Manufacturers Aircraft Association, Inc., have paid or have agreed to pay royalties; provided further, however, that in no instance shall said royalty exceed the sum of Two Hundred Dollars ($200) per airplane, regardless of what the cost or price thereof may amount to; and provided that the cost or price thereof as used herein shall be understood to mean the price paid to a manufacturer, if procured from a manufacturer, completely equipped, ready to operate, including all parts of airplanes and accessories used therein except the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears, and if such airplane is built or manufactured by the Government the cost shall be the amount expended in the direct construction thereof, including the cost of materials entering therein completely equipped ready to operate including all parts of airplanes and accessories used or useful therein, except the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The Government agrees to pay said royalties for use of the inventions described in any and all of said patents until the maximum payments provided for in the Amended Cross-License Agreement shall have been made or until Patent No. 1203550 shall expire, on the 31st day of October 1933, after which the Government shall enjoy the license herein conveyed and granted without the payment of any further royalties.

The word "use" as employed herein shall be held to include the manufacturing of planes by the Government or through the procurement of the Government or the purchases by the Government of planes from others.

3. For the purpose of carrying out the above, the Government shall on the tenth day of April, July, October, and January in each year make reports to the Association of the number of planes manufactured or otherwise acquired by its War and Navy Departments during the preceding three months.

Upon receipt of each report the Association shall forthwith render invoices to said Departments in accordance with said reports and the terms and provisions of Paragraph 2 of this contract. The Government agrees to receive such invoices and to authorize and instruct its disbursing officers to make payments accordingly.

Payments under this contract shall be made to the Association and when payments are so made and received, they shall constitute and be accepted for and on behalf of the owners of the patents by the Association as full and complete compensation as to the airplanes to which they apply for licenses to use any and all of the said patents as set out hereinbefore.

The Association shall disburse and account for each of such payments in precisely the same manner as if the same had been made to the Association under the Cross-License Agreement by a Subscriber thereto and as if the royalty for each plane had been received from a Subscriber by the Association at the time when such plane was acquired by the Government.

The Association shall furnish to officers of the Government, when required, a statement by a certified public accountant of the total amount of royalties paid by it to each of the owners of the patents under the Cross-License Agreement and the Amended Cross-License Agreement, and when the maximum

Digitized by Google

payments provided thereunder for the owners of the patents have been completed, no further payment of royalties on the part of the Government shall be demanded or paid.

4. The Government shall have the right to terminate this contract by serving a written notice upon the Association at least five days before the beginning of each additional year; but in the absence of such action it is agreed that the provisions thereof shall be automatically renewed and continue in force until such a notice shall be served or the contract shall be terminated in accordance with the other provisions thereof; provided that, if upon demand by the United States to the Association and owners of the patents, the owners of the patents fail for ninety days to bring suit to enforce the rights of the patents herein licensed, all liability to pay royalties shall cease thereafter and until such suit is brought.

5. The Government does not admit, and is not to be understood as admitting, by virtue of the license hereunder, the validity of any of said Letters Patent heretofore or hereafter issued and is to be held free to dispute the validity of each and any of them in case the public interest should so require, save that this provision shall not be construed to give it any right, if such right be now otherwise lacking, to dispute validity in connection with any claims growing out of past operations under previous formal, informal or implied contracts.

6. Any department, bureau, or independent establishment of the Government, not signatory hereto, may avail itself of the license herein granted upon the same terms as the War and Navy Departments upon written notice to the Association of its intention so to do, and by paying the royalties prescribed herein and otherwise complying with the terms hereof.

7. No Senator or Member or Delegate to Congress, officers of the Army or the Navy, nor any person holding any office or appointment under the Army or the Navy Department, is or shall be admitted to any share or part of this contract or to any profits that may arise therefrom, but this provision shall not be construed to extend to stockholders of the Manufacturers' Aircraft Association or any Subscriber thereto.

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.,
By _____, *President.*

Attest:

_____, *Secretary.*

UNITED STATES OF AMERICA,

_____
Secretary of War.

_____
Secretary of Navy.

Executed in quintuplicate.

Form No. 2

PATENT LICENSE

License, granted this _____ day of _____, 19__, by _____ (hereinafter called the Licensors), to _____ (hereinafter called the Licensee).

Whereas the Licensors and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called "Subscribers") heretofore entered into a certain agreement dated July 24, 1917, known as the Cross-License Agreement and/or having entered into an Amended Agreement, entitled "The Amended Cross-License Agreement of December 31, 1928", wherein and whereby the Licensors agreed to grant certain licenses to the other "Subscribers" to said agreement, and

Whereas both said Cross-License Agreement and said Amended Cross-License Agreement authorized and empowered the Manufacturers Aircraft Association, Inc., as the agent for and attorney in fact of the Licensors, to make, execute, and deliver such licenses in the name of the Licensors, and

Whereas certain licenses have been issued to the Licensee herein under patents heretofore reported to the Association by Subscribers, and additional patents having been subsequently reported by Subscribers to said Association, it is now desired to issue licenses thereunder to the Licensee;

Digitized by Google

Now, therefore, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensors do hereby give and grant unto the said Licensee, the unrestricted but non-exclusive license to make, use, and sell airplanes under the patents described in Schedule "A—", hereto annexed and made a part thereof, in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes.

2. This license shall run to the full end of the term of the Letters Patent under which it is granted, and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner set forth in said Amended Cross-License Agreement.

3. This license is made subject to all the terms, conditions, covenants, and agreements contained in said Amended Cross-License Agreement, which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this license to be executed as of the day and year first above written.

SCHEDULE A

Name of licensor and patent number	Issue date	Title of invention

(License Form No. 3 after-acquired patents granted royalty compensation)

PATENT LICENSE

ISSUED PURSUANT TO AWARD OF ROYATY COMPENSATION BY BOARD OF ARBITRATION NO.—

License, granted this _____ day of _____, by _____ (hereinafter called the Licensor), to _____ (hereinafter called the Licensee).

Whereas the Licensor and certain other stockholders of the Manufacturers Aircraft Association, Inc., (hereinafter called Subscribers) heretofore entered into a cerain agreement, dated July 24, 1917, known as the Cross-License Agreement and/or entered into an Amended Agreement, entitled "The Amended Cross-License Agreement of December 31, 1928", wherein provision is made for the cross-licensing of airplane patents owned or controlled by Subscribers, and

Whereas both said Cross-License Agreement and said Amended Cross-License Agreement authorize and empower the Manufacturers Aircraft Association, Inc., as the agent and attorney in fact of the Subscribers, to make, execute and deliver such licenses in the names of the Licensors, and

Whereas, in reporting to said Association the patents hereinafter described, the Licensor claimed compensation under Article V of said Cross-License Agreement or said Amended Cross-License Agreement for the issuance of licenses thereunder to other Subscribers, and the use by them of the inventions covered by said patents, and

Digitized by Google

Whereas a Board of Arbitration was duly constituted in the manner provided for in said Agreements which, after considering the claims of the Licensor on the patents hereinafter described, rendered its award thereunder providing for the payment by Subscribers of the royalties hereinafter set forth.

Now, therefore, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensor does hereby give and grant unto the Licensee a non-exclusive license to make, use and sell airplanes under the following described patents in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes:

No. _____ Issue Date _____ Title _____

2. This license is effective from the issue dates of the patents hereinbefore described, unless otherwise herein provided, and shall run to the full end of the terms thereof. It is personal, indivisible, non-assignable and irrevocable, except for the causes and in the manner set forth in said Amended Cross-License Agreement.

4. This license is subject to all the terms, conditions, covenants and stipulations contained in said Amended Cross-License Agreement, which is made a part hereof, with the same force and effect as if herein set forth at large.

In Witness whereof, the parties hereto have caused this license to be executed as of the day and year first above written.

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.,

LICENSE ISSUED UNDER THE AMENDED CROSS-LICENSE AGREEMENT OF DECEMBER 31, 1928

License, granted this _____ day of _____, 19____, by Aeromarine Plane & Motor Company, Inc., Boeing Airplane Company, Curtiss Aeroplane and Motor Company, Inc., Dayton-Wright Company, G. Elias & Bro., Inc., Gallaudet Aircraft Corporation, L. W. F. Engineering Company, Glenn L. Martin Company, Packard Motor Car Company, Sturtevant Aeroplane Company, Thomas-Morse Aircraft Corporation, Wright Aeronautical Corporation (hereinafter called the Licensors) to _____ (hereinafter called the Licensee).

Whereas, the Licensors and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called "Subscribers"), having heretofore entered into a certain agreement dated July 24, 1917, known as the Original Cross-License Agreement and/or having entered into an amended agreement, dated December 31, 1928. entitled "The Amended Cross-License Agreement of December 31, 1928" (copy of which said Amended Agreement is hereto annexed), wherein and whereby the Licensors agreed to grant certain licenses to each other as Subscribers to said Agreements, and

Whereas both said Original Cross-License Agreement and said Amended Cross-License Agreeemnt authorized and empowered the Manufacturers Aircraft Association, Inc., as the agent for an attorney in fact of the Licensors, to make, execute, and deliver such licenses in the names of the Licensors; and it is desired to execute the powers therein granted;

Now, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

Digitized by Google

1. The Licensors do hereby give and grant unto the said Licensee the unrestricted, but non-exclusive license to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them, or any of them, or by any firm, corporation, or association owned or controlled by them, or any of them, or under which they or any such firm, corporation, or association have or shall have the right to grant licenses—in and throughout the United States, its territories, and dependencies for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for apply to or include the use of said patents in their application to other than airplanes.

The patents which the Licensors have a right to grant licenses at the present time, and which are intended to be included in this license are set forth in Appendix "A", hereto annexed.

2. This license shall run to the full end of the term of the Letters Patent under which this license is granted, and shall be personable, indivisible, non-assignable, and irrevocable, except for the causes and in the manner set forth in "The Amended Cross-License Agreement of December 31, 1928", hereinbefore referred to.

3. This license is made subject to all the terms, conditions, covenants, and agreements contained in said "The Amended Cross License Agreement of December 31, 1928", which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this instrument to be executed as of the day and year first above written.

APPENDIX A

List of Patents

Name of Licensor and Patents No.	Issue Date	Title of Invention
Aeromarine Plane & Motor Company, Inc.:		
1345885	July 6, 1920	Aeroplane.
1375199	Apr. 19, 1921	Aeroplane Control.
1358247	Nov. 9, 1920	Aeroplane Fitting.
1361495	Dec. 7, 1920	Do.
1564826	Dec. 8, 1925	Float Structure.
1537973	May 19, 1925	Flying Boat Hull.
1552258	Sept. 1, 1925	Airplane Land Gear.
1567222	Dec. 29, 1925	Tail Skid.
1552259	Sept. 1, 1925	Retractable Landing Gear.
1571989	Feb. 9, 1926	Aerofoil.
1579905	Apr. 6, 1926	Airplane Structure.
1597306	Aug. 24, 1926	Stabalizer lock.
1579905	Apr. 6, 1926	Pontoon.
1597305	Aug. 24, 1926	Retractable Landing Gear.
1603304	Oct. 19, 1926	Hydro Airplane.
1653341	Dec. 20, 1927	Propeller Mounting.
Boeing Airplane Company:		
1264498	Apr. 30, 1918	Controlling devices for Airplanes.
1284918	Nov. 12, 1918	Clips for attaching wires.
1284919	do	Joint Fittings for Truss Structures.
1290280	Jan. 7, 1919	Steering Mechanism for Airplanes.
1290281	do	Fittings for Airplanes.
1295202	Feb. 25, 1919	Molds for Pontoons.
1295203	do	Shop Inventions.
1363422	Dec. 28, 1920	Wire Wrapping Machine.

List of Patents—Continued

Name of Licensor and Patents No.	Issue Date	Title of Invention
Curtiss Aeroplane and Motor Company, Inc.:		
1010842	Dec. 5, 1911	Flying Machine.
1001106	do	Do.
1027242	May 21, 1912	Means for Launching Flying Machines.
1050901	Jan. 14, 1913	Flying Machine.
1085575	Jan. 27, 1914	Control Mechanism for Flying Machines.
1104036	July 21, 1914	Flying Machine.
1108490	Aug. 25, 1914	Do.
1142754	June 8, 1915	Flying Boat.
1156215	Oct. 12, 1915	Heavier-than-air Flying Machine.
1176965	Feb. 8, 1916	Hydroaeroplane.
1195142	Aug. 15, 1916	Fuselage for Aeroplanes.
1197746	Sept. 12, 1916	Hydroplane Wing Pontoons.
1203550	Oct. 31, 1916	Hydroaeroplane.
1204380	Nov. 7, 1916	Improvements in Flying Machines.
1210374	Dec. 26, 1916	Hulls for Flying Boats.
1210379	do	Aileron System.
1223298	Apr. 17, 1917	Spoke Stays.
1223315	do	Landing Gear for Aircraft.
1223316	do	Multiple Control System for Prime Movers
1223317	do	Folding Wing Aeroplane.
1223318	do	Boat Hull.
1223319	do	Flying Boat Hulls.
1223320	do	Multiple Step Flying Boat.
1223321	do	Propeller.
1228375	May 29, 1917	Universal Wing Post Socket.
1228380	do	Method of Operating Rudders on Aircraft.
1228381	do	Improvements in Hydroaero Machines.
1228382	do	Aeroplane.
1246010	Nov. 6, 1917	Inherently Stable Flying Boat.
1246011	do	Aeroplane Construction.
1246012	do	Flying Boat.
1246013	do	Balancing System for Aircraft.
1246014	do	Hydroaeroplane.
1246015	do	Aeroplane.
1246016	do	Fying Boats.
1246017	do	Boat Type Wing Pontoon.
1246018	do	Draft System for Flying Boats.
1246019	do	Flying Boat Hull.
1246020	do	Landing Gear.
1246021	do	Streamline Shock Absorber.
1246022	do	Aeroplane Motor Support.
1246023	do	Aerial Propeller Fastening.
1246024	do	Gas Tank Cradle.
1246025	do	Dual Interlocking Control.
1246026	do	Tail Skid Clip.
1246027	do	Aeroplane Control Mechanism.
1246028	do	Aeroplane Wing Hinge.
1246029	do	Impregnating Apparatus.
1256878	Feb. 19, 1918	Hydroaeroplane Boat.
1269397	June 11, 1918	Hydroaeroplane Pontoon.
1269570	do	Convertible Running Gear.
1283529	Nov. 5, 1918	Fan Pump.
1283684	do	Flying Boat Cruiser.
1284906	Nov. 12, 1918	Hydro Landing Base for Aircraft.
1284907	do	Landing Gear for Aircraft.
1285021	Nov. 19, 1918	Aeroplane Wing Construction.
1285229	do	Flying Boat Hulls.
1285230	do	Hydroaeroplane Pontoon.
1287249	Dec. 10, 1918	Tilting Wing Flying Boat.
1287341	do	Handling Truck for Flying Boats.
1289683	Dec. 31, 1918	Flying Boat.
1290004	do	Aeroplane Fitting.
1290005	do	Fuselage Cover.
1290102	Jan. 7, 1919	Landing Gear.
1290235	do	Triplane.
1290236	do	Tail Skid for Aeroplanes.
1290237	do	Engine Bed Mounting.
1290838	do	Aeroplane Construction.
1291678	Jan. 14, 1919	Wing Construction.
1294389	Feb. 18, 1919	Hydro-aero-Machine.
1294412	do	Twin Fuselage Construction.
1294413	do	Autoplane.
1294414	do	Hull for Flying Boats.
1294415	do	Flying Boat.
1294476	do	Duplex V-Strut Landing Gear.
1294477	do	Tail Skid for Aeroplanes.
1295084	do	Aeroplane Construction.
1296630	Mar. 11, 1919	Hydroaircraft.
1296667	do	Wing Post Socket.
1296730	do	Pusher Hydroaeroplane.
1296770	do	Airplane Landing Gear.

List of Patents—Continued

Name and Licensor and Patents No.	Issue Date	Title of Invention
Curtis Aeroplane and Motor Company, Inc.—Continued.		
1296773	Mar. 11, 1919	Convertible Control System.
1296774	do	Magneto Switch for Aeroplanes.
1296775	do	Aeroplane Construction.
1296876	do	Skid Structure for Hydroaircraft.
1298515	Mar. 25, 1919	Fuselage Clip.
1298516	do	Aeroplane Control Bridge.
1298625	do	Landing Gear for Aeroplanes.
1306749	June 17, 1919	Twin Float Hydroaeroplane.
1306750	do	Airplane Wing Truss.
1306751	do	Combination Landing Gear.
1306764	do	Aeroplane Wing Hinge.
1306765	do	Landing Gear for Aircraft.
1310737	July 22, 1919	Reconnoitering Airplane.
1310764	do	Airplane Wing Fastening.
1310942	do	Airplane Wing Construction.
1311129	do	Control System.
1316277	Sept. 16, 1919	Cruising Hydroaeroplane.
1316278	do	Triplane Speed Scout.
1316279	do	Speed Scout Aeroplane.
1316280	do	Folding Wing Aeroplane.
1316281	do	Thrust Measuring Device.
1323842	Dec. 2, 1919	Reconnoitering Aeroplane.
1323843	do	Fuel Supply System.
1323959	do	Pusher Triplane.
1326008	Dec. 23, 1919	Turnbuckle.
1329336	June 27, 1920	Flying Boat Hull.
1329342	do	Aeroplane Construction.
1336405	Apr. 6, 1920	Airplane.
1336406	do	Convertible Multiplane.
1336632	Apr. 13, 1920	Airplane Control Mechanism.
1336633	do	Landing Gear for Aircraft.
1336634	do	Flying Boat.
1349677	Aug. 17, 1920	Strut Fitting.
1351742	Sept. 7, 1920	Flying Boat Construction.
1351743	do	Airplane Wing Structure Truss.
1351764	do	Hoisting Connection for Airplane.
1355736	Oct. 12, 1920	Hydro Aircraft.
1355738	do	Aeroplane Wing Structure.
1355741	do	Airplane Fuselage.
1355767	do	Airplane Fitting.
1357950	Nov. 9, 1920	Airplane Control Surface Operating Brace.
1358527	do	Tripod Flying Boat.
1358605	do	Fuselage Wiring.
1363794	Dec. 28, 1920	Control Mechanism.
1363844	do	Airplane Fitting.
1363847	do	Aeroplane.
1364425	Jan. 4, 1921	Flying Boat Hull.
1364431	do	Airplane Wing Structure.
1364614	do	Airplane Wing Construction.
1368542	Feb. 15, 1921	Longitudinal Control System.
1368548	do	Aileron Braking System.
1368549	do	Airplane Construction.
1368550	do	Triplane.
1370693	Mar. 8, 1921	Airplane Landing Gear.
1373408	Apr. 5, 1921	Pontoon Mounting.
1373433	do	Control Column.
1382387	June 21, 1921	Engine Bed Support.
1382421	do	Hydroaeroplane Landing Gear.
1386841	Aug. 9, 1921	Method and Apparatus for Making Aerofoils.
1386846	do	Fuel Supply System.
1392271	Sept. 27, 1921	Streamline Wiring.
1392272	do	Airplane V-Strut Landing Gear.
1392277	do	Airplane Landing Gear.
1392278	do	Fuselage.
1392279	do	Flying Boat Hull.
1398330	Nov. 21, 1921	Radiator for Airplanes.
1406575	Feb. 14, 1922	Landing Gear for Aircraft.
1406600	do	Propeller Hub Construction.
1406617	do	Control for Aircraft.
1420609	June 20, 1922	Hydroaeroplane.
1420610	do	Method of Getting a Hydroairplane off the Water into the Air.
1430640	Oct. 3, 1922	Airplane.
1434547	Nov. 7, 1922	Do.
1434559	do	Wing Jig.
1437465	Dec. 5, 1922	Airplane Fitting.
1437469	do	Aeroplane Wing Structure.
1437471	do	Propeller Hub Fastening.
1445135	Feb. 13, 1923	Fighting Airplane.
1445142	do	Propeller Mounting.

WRIGHT AERONAUTICAL CORPORATION,
New York, N. Y., December 6, 1935.

Hon. WILLIAM I. SIROVICH,
Chairman, Committee on Patents, House of Representatives,
New York, N. Y.

DEAR SIR: There is submitted herewith, in behalf of Wright Aeronautical Corporation, answers to the questionnaire contained in your letter of November 9, 1935.

Very truly yours,

WRIGHT AERONAUTICAL CORPORATION,
By E. S. CRAMER, *Secretary.*

WRIGHT AERONAUTICAL CORPORATION

1. Question. A complete list of all patents owned by you, your company, or corporation, and also those patents now being used by you or them through cross-license or patent pooling agreements, or otherwise.

Answer. Wright Aeronautical Corporation owns the following patents, to wit:

Patentee	Number	Date of issue	Date of application
O. & W. Wright	821393	May 22, 1906	Nov. 27, 1899
Do	908929	Jan. 5, 1909	Do.
Do	987662	Mar. 21, 1911	Do.
Do	1075533	Oct. 14, 1913	Do.
Do	1122348	Dec. 29, 1914	Do.
G. L. Martin	1165891	Dec. 28, 1915	Feb. 11, 1914
Do	1235500	Sept. 11, 1917	Jan. 14, 1914
N. F. Vanderlipp	1642278	Sept. 13, 1927	Nov. 8, 1926

Wright Aeronautical Corporation, as a member of the Manufacturers Aircraft Association, Inc., is licensed to make use of all patents subject to the cross-license agreement which said association administers. (It is the writer's understanding that your committee has already been furnished by said association with a complete list of all patents subject to the cross-license agreement.)

Wright Aeronautical Corporation, by an agreement entered into with the Pratt & Whitney Aircraft Co., dated June 3, 1931, is licensed to make use of two Pratt & Whitney owned engine patents, to wit: patents nos. 1704851 and 1705458.

Wright Aeronautical Corporation is also licensed to make use of a number of engine and engine-accessory patents, title to which is vested in a patent-holding company. None of the patents comprised in this group are cross-licensed (except insofar as is required by the terms of the Wright-Pratt & Whitney argeement above referred to) nor are they included in any patent pooling agreement. The engine and engine accessory patents which said patent-holding company owns may be identified as follows: 1723175, 1737122, 1739690, 1743173, 1773399, 1803995, 1823883, 1832320, 1860813, 1860814, 1860851, 1874444, 1874446, 1896222, 1908820, 1910591, 1914940, 1926329, 1926349, 1933966, 1934399, 1944219, 1950970, 1950971, 1958264, 1962246, 1267962, 1280760, 1283803, 1284250, 1286345, 1287339, 1294474, 1294475, 1310913, 1316244, 1326405, 1329038, 1336704, 1338310, 1349676, 1351763, 1357992, 1363793, 1368439, 1370692, 1373432, 1386787, 1392276, 1398194, 1398315, 1404617, 1404618, 1404861, 1423334, 1432817, 1437466, 1437861, 1439798, 1447788, 1463171, 1465989, 1479993, 1511672, 1543479, 1545684, 1565100, 1568578, 1569245, 1575359, 1598738, 1621326, 1621494, 1632562, 1674191, 1714806, 1714807, 1722821, 1974802, 1974803, 1974804, 1976483, 1979025, 1980185, 1983378, 1988119, 1990979, 1993875, 1995601, 1997279, 2000714, 2018012.

Wright Aeronautical Corporation, by negotiated contracts, is licensed to make use of the following patents, none of which are owned by Wright, and all of which have to do with engine and engine accessories or processes required in connection with the manufacture thereof: 1127398, 1137254, 1142299, 1164064, 1394534, 1426384, 1508556, 1572487, 1713814, 1750706, 1770125, 1778999, 1781008, 1804010, 1811625, 1845474, 1846031, 1864374, 1960898, 1960899, Re-17266, Re-18115.

2. Question. If you are not using some of your patents at this time, why not?

Answer. Wright Aeronautical Corporation makes no current use whatsoever of the airplane patents which it owns, nor of the patents under which it is

Digitized by Google

licensed by reason of its membership in the Manufacturers' Aircraft Association, Inc. For a number of years Wright has confined its activities exclusively to the manufacture and sale of engines and engine accessories as distinguished from airplanes. Patents relating or pertaining to engine and such engine accessories as propellers, propeller hubs, superchargers, starters, magnetos, mufflers, carburetors, and reduction gears are specifically excluded from the operations of the cross-license agreement.

Use is currently made by Wright Aeronautical Corporation of all engine and engine accessory patents under which it is licensed.

3. Question. "A copy of the constitution and bylaws or articles of agreement of your organization or association."

Answer. A copy of the constitution and of the bylaws of the Manufacturers' Aircraft Association, Inc., are hereto attached.

4. Question. "Copies of cross-license or patent-pooling agreements to which you, your company, or corporation are parties."

Answer. A copy of the original cross-license agreement and of all subsequent modifications thereof are hereto attached.

5. Question. "A copy of the different forms of cross-licensing or pooling agreements made between your organization and others to date."

Answer. A copy of each form of license which the Manufacturers' Aircraft Association, Inc., is authorized to grant is hereto attached. Also hereto attached is a copy of the Wright-Pratt & Whitney agreement above referred to.

6. Question. The names of the inventors of all such patents in such cross-license agreement or patent pools, date and number of patent, date of assignment to you, amount paid for same, estimated value of patent at date of purchase and now.

Answer. The names of the inventors, the dates and numbers of the patents, and the dates of assignment thereof to Wright, of all Wright-owned patents subject to the cross-license agreement are given in the answer to question 1.

The names of the inventors, the dates and numbers of the patents, and the dates of assignment thereof to Wright, of the two patents licensed Pratt & Whitney by Wright under the Wright-Pratt & Whitney agreement are as follows:

Patentee	Number	Date of issue	Date of assignment
C. L. Lawrance	1398194	Nov. 22, 1921	Dec. 29, 1921
A. V. D. Willgoos	1569245	Jan. 12, 1926	Apr. 14, 1925

NOTE.—Title to the 2 patents above identified is now vested in the patent-holding company above referred to. At the time of the execution of the Wright-Pratt & Whitney agreement said patents were owned by Wright.

The Vanderlipp, Lawrance, and Willgoos patents are predicated upon developments occurring within the Wright organization, which were assigned to Wright by reason of the existence, at the date of assignment, of an employer-employee agreement (a copy of the standard form of employer-employee agreement used by Wright is hereto attached).

The O. & W. Wright and the Martin patents above referred to have long since expired. These patents are of no value to Wright today.

As to the Vanderlipp, Lawrance, and Willgoos patents, there is no basis upon which the value thereof to Wright, either today or at the time it acquired title thereto, can be estimated or determined.

As indicative of the cost to the predecessor Wright Co. at the time it acquired title to the now expired O. & W. Wright patents, it may be pointed out that said company, in 1909, paid to O. & W. Wright stock having a par value of $700,000, and agreed to pay, as additional compensation, a royalty of 10 percent of the selling price on all airplanes which it, or its successors, subsequently manufactured and sold.

G. L. Martin, as an officer of the Wright-Martin Aircraft Co., a predecessor of Wright, assigned to it the two Martin patents above referred to.

7. Question. Are any of said patents controlled by said cross-license and patent pooling agreements used as a basis for charter or corporation franchises? If so, valuation of said patents.

Answer. No Wright-owned patents are currently used as a basis for charter or corporation franchises.

Digitized by Google

8. Question. Was inventor an employee of assignee at time of making invention, and is the inventor an employee of such assignee now? If so, does assignee retain contract providing such invention shall belong to employer without additional cost?

Answer. Vanderlipp, Lawrance, and Willgoos were employed by Wright at the time the inventions resulted in patents identified opposite their names were made. G. L. Martin was at one time an officer of the Wright-Martin Aircraft Corporation, the predecessor of Wright Aeronautical Corporation. Neither O. nor W. Wright have at any time been either officers or employees of the Wright organization. None of the patentees above named are at the present time employed by Wright. None of said patentees retained any interest whatsoever in the patents assigned.

9. Question. Please give number, name, ownership, and valuation of existing patents now being used by your company through cross-license or with a patent pool.

Answer. The patents under which which Wright Aeronautical Corporation is licensed by reason of its membership in the Manufacturers Aircraft Association, Inc., are of no value to Wright. The value to Wright, during that period of its history when it was actively engaged in the manufacture of airplanes, under said patents, cannot be estimated, nor is there any way of estimating the value to Wright of the license which it now owns under the two Pratt & Whitney owned patents above referred to.

It is the writer's understanding that your committee has already been furnished with the number, name, and ownership of the patents under which it is licensed by reason of its association membership.

10. Question. Do you cross-license nonmembers of the patent pool—if such exists—and if so, on what terms?

Answer. At no time has Wright Aeronautical Corporation refused any concern or airplane manufacturing company a license under any or all of the airplane patents which it now or previously owned. Licenses have been granted to nonmembers of the association, subsequent to the formation of the association, at the same royalty rate as that required to be met by association members.

11. Question. What are the eligibility requirements for outsiders to join this patent pool?

Answer. To entitle a person, firm, or corporation to become a stockholder of the Manufacturers Aircraft Association, Inc., he or it, as the case may be, shall be a responsible manufacturer of aircraft or aircraft engines, or parts and accessories thereof; or a responsible manufacturer who intends to become a bona-fide producer of the same; or a manufacturer to whom the United States Government has given a contract for the construction of ten or more complete aircraft or aircraft engines; or a person, firm, or corporation owning or controlling United States patents relating to any of the foregoing.

12. Question. Do you suggest any amendments to existing patent laws? If so, enumerate.

Answer. It is recommended that the Act of June 25, 1910 (36 Stat. 851), as amended by the Act of July 1, 1918 (40 Stat. 705), be repealed.

AGREEMENT FOR SERVICES

In consideration of my employment by the Wright Aeronautical Corporation, herein termed "company", upon the terms and conditions of this agreement, I _____, of _____, agree with the Company as follows:

1. To devote my whole time and ability so long as I shall remain in the employ of the Company to the services of the Company in such capacity as it shall from time to time direct, and to perform my duties faithfully and diligently.

2. Without charge, but at the cost of the Company, to assign to it any and all inventions which I may make while in the employ of the Company relating to the business of the character carried on or contemplated by the Company and any and all Letters Patent, and any and all reissues, renewals, and extensions thereof that may be granted to me therefor; and that I will do, execute, and deliver any and all acts and instruments that may be necessary or proper to vest said inventions and patents in the Company and to enable it to obtain such Letters Patent; and that I will render to the Company all such assistance as it may require in the prosecution of applications for the reissue of said

Digitized by Google

patents and in the prosecution or defense of all interferences which may be declared involving any of said applications or patents, but the expense of all such proceedings shall be borne by the Company; and the Company shall pay to me the sum of Twenty-five Dollars ($25) for each of such granted Letters Patent.

8. I further agree—

(a) That my employment with the Company is an employment at will and not for any stated period of time.

(b) That the Company may terminate my employment at any time regardless of cause, and in such event the Company shall be obligated to pay me only up to the date of such termination of my employment.

(c) That the semi-monthly basis upon which my salary is adjusted is not to be considered or construed as indicating or defining the length of the term of my employment.

(d) That I shall obey and be bound by any and all rules and regulations of the Company as they now exist and as they may hereafter be changed or amended.

(e) I will regard and preserve as confidential all information pertaining to the Corporation's business that may be obtained by me from specifications, drawings, blue-prints, reproductions, and other sources of any sort as a result of such employment and I will not, without written authority from the Corporation so to do, disclose to others during my employment or thereafter, such or any other confidential information obtained by me while in the employ of the Corporation.

Signed _____.

LICENSE AND AGREEMENT

This agreement entered into this 3rd day of June 1931, by and between the Pratt and Whitney Aircraft Co., of East Hartford, Connecticut, a Delaware Corporation, hereinafter called "Pratt & Whitney", which corporation shall include its successors and assigns where the context so requires or admits, and Wright Aeronautical Corporation, of Paterson, New Jersey, a New York Corporation, hereinafter called "Wright", which corporation shall include its successors and assigns where the context so requires or admits.

WITNESSETH:

Whereas Pratt & Whitney is the owner of all right, title, and interest in and to U. S. Letters Patent #1,704,815 dated March 12, 1929, and U. S. Letters Patent #1,705,458 dated April 9, 1930; and

Whereas Wright is the owner of all right, title, and interest in and to U. S. Letters Patent #1,398,194, dated November 22, 1921, and U. S. Letters Patent #1,569,245, dated January 12, 1926; and

Whereas Pratt & Whitney is desirous of obtaining a right and license to manufacture, use, and/or sell the invention or inventions described and claimed in said Wright owned patents; and

Whereas Wright is desirous of obtaining a right and license to manufacture, use, and/or sell the invention or inventions described and claimed in said Pratt & Whitney owned patents; and

Whereas both Pratt & Whitney and Wright are desirous of reaching an agreement as to ways and means of avoiding, if possible, patent litigation involving other United States Letters Patent issued or to be issued.

Now, therefore, in consideration of their mutual grants and undertakings, the parties hereto agree as follows:

1. Pratt & Whitney, by these presents, hereby grants and conveys to Wright under said Letters Patent #1,704,815 and #1,705,458, above identified, a non-exclusive right and license to manufacture, use, and/or sell the invention or inventions described and claimed therein to the full end of the term or terms for which said Letters Patent, or either of them, shall or may have been granted.

2. Wright, by these presents, hereby grants and conveys to Pratt & Whitney under said Letters Patent #1,398,194 and #1,569,245, above identified, a non-exclusive right and license to manufacture, use and/or sell the invention or inventions described and claimed therein to the full end of the term or terms for which said Letters Patent or either of them shall or may have been granted.

Digitized by Google

3. It is mutually understood and agreed that no royalty or other payment is required or expected to be made by either party hereto to the other for any past infringement or for any subsequent manufacture, use, and/or sale of any invention or inventions described and claimed in any patent or patents referred to in either Paragraph 1 or Paragraph 2 hereof.

4. As to the other U. S. Letters Patents, issued or to be issued, owned, or controlled by either party, it is mutually understood and agreed as follows:

(a) Should either party own or control one or more U. S. Letters Patent which it is believed that the other party is infringing, the party owning such patent or patents may call upon the other party for a determination of the following questions: (1) Does the infringement complained of actually exist: (2) Is the patent upon which the claim is predicated of "minor" or "major" importance; (3) Is the patent valid: and (4) Does the party against whom the claim is made own or control one or more patents upon which a counter-claim, in the nature of a set-off, may be based; and the other party, i. e., the party against whom such claim is made, having first been given the opportunity to agree or disagree with the party making the claim, hereby agrees to arbitrate the claim in the manner herein provided.

(b) Arbitration of patent disputes or of the claim or claims of one party hereto against the other shall proceed as follows: The party initiating the dispute or claim shall designate concurrently with the presentation of the claim two arbitrators. The party against whom the claim is made shall, within sixty (60) days from the date such claim is made, likewise designate two arbitrators, and at the same time notify the complaining party of such designation. Within thirty (30) days from the date of notification of the last two designated arbitrators, the four arbitrators thus designated shall confer. At such conference the questions referred to in the preceding paragraph hereof shall be considered and a meeting of the minds of the four arbitrators brought about, if possible. Should the arbitrators agree as to a settlement plan whereby the questions raised by the party initiating the claim may be disposed of, such plan, together with appropriate recommendations, shall be made by the said arbitrators to the respective parties hereto for final determination. Should the respective parties hereto concur in the recommendations and findings of the arbitrators, it is mutually agreed that appropriate steps will, within a reasonable time, be taken to fully and finally dispose of the claim or claims thus arbitrated.

(c) It is mutually understood and agreed that should the four arbitrators classify any patent or patents complained of as "minor" importance, and should such classification be accepted by both parties hereto, then and in such event, and providing there is no existing counter-claim to act as an offset, and providing further that the parties hereto agree that infringement actually exists and that the patent or patents under consideration is or are valid, the party charged with the infringing act or acts, if it elects to continue to manufacture, use, and/or sell the patented device or part, shall pay to the owner of the patent or patents upon which the complaint is based a royalty in an amount to be agreed upon by the arbitrators after careful and full consideration of all facts and circumstances surrounding the ownership of the particular patent or patents which it is desired at the time shall be licensed.

(d) Nothing in this agreement shall be construed to affect in any way patents classified as of "major" importance.

(e) If, after arbitration, as herein provided, the parties hereto are unable to effect a settlement of future claims one against the other, nothing herein shall be considered to affect in any way the rights of the respective parties either at Law or in Equity.

(f) There is no obligation on the part of either party hereto to submit its patent or patents to either arbitration or classification except and unless it is claimed of a particular patent, that the other party hereto is at the time infringing the particular patent upon which such charge of infringement is based.

(g) This license and/or agreement may be terminated by either party hereto, by the one party giving to the other party written notice six months in advance of the date which it is desired that such termination shall become effective. Such termination, however, shall in no way affect any existing license since it is the desire of both parties hereto that patent licenses, once extended and/or granted, shall continue for the full duration of the patent or patents therein referred to.

Digitized by Google

(h) It is further mutually understood and agreed that so long as this agreement shall remain in full force and effect, it shall be binding upon all subsidiary or controlled companies of both parties hereto, and that this agreement shall be assignable as to each of the parties hereto as a part of its entire business, but not otherwise.

CROSS-LICENSE AGREEMENT

This agreement, made this 24th day of July 1917 between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers") as shall become stockholders of the said "Company" in the manner and under the conditions provided in the by-laws thereof (which for the purpose of this agreement are made a part hereof), and become parties to this agreement, parties of the second part.

Whereas the parties hereto are interested in the manufacture, sale, and use of airplanes, as hereinafter defined, and desire to promote and develop the industry in which they are engaged, and to encourage and advance the art applicable thereto; and

Whereas the said development and advancement in the past have not been capable of as complete accomplishment as is desirable, because of the existence of certain United States patents claimed to be basic in their nature, upon which suits have been brought, or threatened, for alleged infringement and for the collection of royalties and damages in connection therewith; and

Whereas it is desired to prevent and avoid such litigations or threatened litigations in the future and to give to all of the "Subscribers" the right to manufacture, sell, and use airplanes embodying the inventions of each of the "Subscribers" and to that end it is desired that licenses be granted as herein expressed:

Now, this agreement witnesseth: That for and in consideration of the premises, the covenants, and conditions herein contained, and of other good and valuable considerations moving between the "company" and each of the "subscribers" hereto, and between the "Subscribers" themselves, it is covenanted and agreed as follows:

I. DEFINITIONS

The word "airplane", as used in this agreement, shall be understood to mean any form of heavier-than-air craft using wing surfaces for sustaining it, and to include propelling means, propellers, propeller hubs, radiators, and all parts and accessories used or useful in the airplane, except the engine and its accessories.

The words "airplane patent", as used in this agreement, shall be understood to mean any patent covering inventions for or capable of use in or in connection with airplanes, including propellers, propeller hubs, radiators, and all parts of airplanes and accessories used or useful in the airplane, except the engine and its accessories.

II. LICENSES AND POWERS GRANTED

The "Subscribers" grant, agree to grant, and cause to be granted to each other, licenses to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them or any of them, or by any firm, corporation, or association owned or controlled by them, or under which they, or any of them, or any such firm, corporation, or association, have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign pat-

Digitized by Google

ents, nor shall said rights or the licenses herein provided for apply to or include the use of said patents in their application to other than airplanes, and except further that no licenses are hereby granted under the Dunne patents no. 975403 issued November 15, 1910 and no. 1003721 issued September 19, 1911, rights under which are held by the Burgess Co.

All licenses provided for herein shall run to the full end of the term of the letters patent under which the license is or is to be granted and shall be personal, indivisible, nonassignable, and irrevocable, except for the causes and in the manner hereinafter stated.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them and in their respective names, to make and execute licenses in writing in the form hereto annexed, and to deliver the same to those of the "Subscribers" who, at the time, are stockholders of the "Company" not in default hereunder, and who shall have executed an agreement in writing of like tenor to this; and to enforce said licenses and any and all other obligations (including the obligation to make payments), of the "Subscribers" under this agreement; and the "Subscribers" hereby give and grant unto said "Company" as full, complete, and ample power and authority in the premises as the "Subscribers" themselves now have and possess.

All licenses provided for herein, when made, executed, and delivered in accordance with the provisions hereof, shall have the same force and effect as if they had been executed and delivered by the "Subscribers" themselves.

III. COVENANTS OF FURTHER ASSURANCE

(a) Each "Subscriber", now or hereafter, having rights under any United States airplane patent or invention, of such character that it has legal right and power to procure the grant of rights thereunder to others, but is not itself empowered to grant such rights, covenants to procure the execution of such further instrument as may be necessary to empower the "Company" to grant rights under such patent, or with reference to such invention, to the extent and in the manner herein provided.

(b) Each "Subscriber" covenants that it will not contract for or obtain any rights under any such patent or invention in such manner that its owner would be prevented from granting to other "Subscribers" hereto similar rights on the same terms, unless the "Subscriber" obtains, at the same time, the further privilege to grant rights under said patent or said invention, whereby the same may and will be brought under the operation of this instrument.

IV. COVENANTS AGAINST OTHER LICENSES

Each "Subscriber" covenants that it has not heretofore entered and will not hereafter enter into any contract or arrangement, whereby its privileges under United States airplane patents, issued or to be issued, inventions, and rights, owned or controlled by it, have been or shall be diminished or surrendered so as to exclude or restrict the operation of this instrument in respect thereto. Each "Subscriber" further covenants that it will not grant licenses under any such patents for use in airplanes, with reference to which it is receiving royalties hereunder, to any other person, firm, or corporation on more favorable, or lower terms of royalty, than those herein provided, or which may become more favorable or lower during the term of such license.

V. AFTER ACQUIRED PATENTS

When a "Subscriber" shall hereafter acquire a United States airplane patent, or any right thereunder, he shall be entitled to compensation for the use thereof if the patent or patent right covers an invention which secures the performance of a function not before known to the art, or constitututes an adaptation for the first time to commercial use of an invention known to the industry to be desirable of use but not used because of lack of adaptation, or is otherwise of striking character or constitutes a radical departure from previous practice, or if either the price paid therefor or the amount expended in developing the same is such as to justify such compensation, provided that at the time said patent or patent right is reported to the "Company", as required in subdivision (*b*) of paragraph VII, the "Subscriber" claims such compensation, and states the grounds on which such claim is based. Such report and claim shall be

Digitized by Google

submitted to a Board of Arbitration to be selected in the manner provided for in paragraph XIII hereof, which Board shall determine whether such compensation shall be paid, and, if so, the total amount thereof and the rate of royalty, or other payments, which shall be paid (towards such compensation) by any "Subscriber" desiring and taking a license under said patent and shall also fix the time or times when said royalties or other amounts shall be paid.

VI. SPECIAL MODELS

If any "Subscriber" shall have developed the design and manufacture of any special model of airplane, or airplane engine or other device used in an airplane (except the airplanes manufactured by the Burgess Company under the Dunne patents hereinbefore mentioned, and the Hispano-Suiza aeronautical engine manufactured by the Wright Martin Aircraft Corporation or its subsidiaries), which the United States Government may at any time desire to have manufactured in the factory of any other "Subscriber" or in the factory of any manufacturer not a "Subscriber" hereto, the said "Subscriber" agrees that it will furnish to the other "Subscriber" or said other manufacturer such complete specifications, drawings, and other production data, as may be required, for use in the manufacture of such special model, provided that and upon condition that the "Subscriber" or other manufacturer in whose factory the work is placed by the United States Government shall agree with said Government and with the "Subscriber" owning said specifications, etc., to pay and shall pay into the treasury of the "Company" one per cent, upon the contract price paid by the Government for each airplane or airplane engine or other device manufactured for it in accordance with said specifications, etc.

If the manufacture of such special model is conducted by one not a "Subscriber", such manufacturer shall also agree to pay into the treasury of the "Company" such royalty as a "Subscriber" would have been obliged to pay had it made and sold the airplane, engine, or other device, including the amount specified in subdivisions (a) and (b) of paragraph VIII hereof, if an airplane with or without engine is the thing manufactured for and sold to the Government.

VII. REPORTS TO THE "COMPANY"

The following reports in writing shall be rendered to the "Company" by each "Subscriber" at the time or times hereinafter set forth:

(a) At the time of the execution of this agreement each "Subscriber" shall report all United States airplane patents and inventions together with serial numbers and filing dates of all pending applications for such patents, and all rights under such patents and inventions then owned or controlled by it, but no omission from such report shall exclude the patent, application, or right so omitted from the operation of this agreement.

(b) Within 30 days after the acquisition by any "Subscriber" of any United States patent (other than patents to be issued upon inventions now owned by it) or right within the scope of this agreement, each such "Subscriber" shall report such acquisition together with all the facts known to it as to such patent or right and its manner of acquisition. If such "Subscriber" claims that additional compensation should be paid to it for licenses under such patent or right, it shall so claim in its report.

(c) On the 10th days of January, April, July, and October in each year, each "Subscriber" shall report the number of airplanes (with or without engine), sold and delivered by it, together with the names of the purchasers, and the dates of delivery, or put into use for other than experimental or development purposes, or shipped out of the United States, during the three preceding calendar months.

(d) On the 10th days of January, April, July, and October in each year, each "Subscriber" shall report the number of airplanes, airplane engines, or other devices for use in airplanes, which it has sold and delivered during the preceding three calendar months, made from specifications, drawings, and other production data obtained from any other "Subscriber", as provided in paragraph VI hereof, together with the sales price and the dates of delivery; and there shall be included in the same report a copy of any agreement which the "Subscriber" shall have made with another manufacturer as provided in said paragraph.

Digitized by Google

(e) Each license to other than "Subscribers" as provided in paragraph IV hereof, shall be reported within 30 days after its delivery.

The first of each of the reports specified in subdivisions (c) and (d) hereof shall be made by each 'Subscriber" on the tenth days of January, April, July, or October, first occurring after it has become a "Subscriber" hereto, and shall cover the period from July 1, 1917, to the first day of the month in which the report is due.

Each of the "Subscribers" hereto shall keep separate books of account showing all business done under or subject to the operation of this agreement. The "Company" may at any time have a New York Certified Public Accountant, to be designated by it, audit such books of account of the "Subscribers", together with such other accounts as the accountant may deem necessary, in order to verify or correct the reports herein provided for, and the "Company" shall have such audit made when any "Subscriber" so demands. Such audit, however, shall be limited to ascertaining whether the reports herein provided for are properly made and to correcting the same, if necessity for correction shall appear. No information obtained from any such audit shall be reported by the accountant or given to any of the parties hereto, except as it directly applies to the reports required by this agreement.

VIII. PAYMENTS TO THE "COMPANY"

Each "Subscriber" agrees to pay into the treasury of the "Company" on the 10th days of January, April, July, and October in each year the following sums of money, to wit:

(a) On each airplane, with or without engine required to be reported as provided in subdivision (c) of paragraph VII hereof, the sum of two hundred dollars until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation shall have been paid the aggregate sums provided for in subdivisions (a) and (b) of paragraph IX hereof.

(b) On each airplane, with or without engine required to be reported as provided for in subdivision (c) of paragraph VII hereof, such sum not to exceed twenty-five dollars, as the Board of Directors of the "Company" may, from time to time, fix and determine as payable after the above-mentioned aggregate sums shall have been paid to the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation.

(c) Such amount or amounts as the Board of Arbitration may specify as special compensation for after acquired patents as provided in paragraph V hereof, and required to be reported in subdivision (c) of paragraph VII.

(d) Such amount or amounts as may be payable with reference to the use of specifications, drawings and data as provided in paragraph VI hereof, including the royalty payments therein provided for, but all one (1%) per cent. payments on account of the use of such specifications, drawings, and data covering any one model shall cease when the total paid by all users shall aggregate Fifty thousand ($50,000) dollars.

(e) All royalties received under licenses referred to in subdivision (e) of paragraph VII.

Each "Subscriber" who shall become a party hereto after the first day of July 1917, shall on the 10th day of January, April, or October next occurring pay to the "Company" those amounts which it would have been obliged to pay in accordance with the foregoing if it had been a "Subscriber" on July 1, 1917.

Moneys paid into the treasury of the "Company" pursuant to any provisions hereof shall not be or constitute or be deemed to be or constitute the assets, property, or profits of said "Company", but shall be received and disbursed by it as the agent and attorney in fact of the "Subscribers" in the manner and for the purposes herein mentioned.

IX. PAYMENTS BY THE "COMPANY"

Out of the moneys paid into the treasury of the "Company" pursuant to the provisions hereof, the following payments shall be made by the Company on the 20th days of January, April, July, and October in each year, to wit:

(a) To the Wright-Martin Aircraft Corporation One hundred and thirty-five dollars ($135) on each airplane with or without engine, with reference to which payments shall have been made in accordance with subdivisions (a) and (e) of paragraph VIII hereof, during the preceding three calendar months, until U. S. Patent No. 821393 issued May 22, 1906, shall have expired, or until the aggregate sum of Two million ($2,000,000) dollars shall have been paid

Digitized by Google

to the said Wright-Martin Aircraft Corporation when all payments to it hereunder shall cease, except as hereinafter provided.

(b) To the Curtiss Aeroplane and Motor Corporation Forty dollars ($40) on each airplane, with or without engine with reference to which payments shall have been made in accordance with subdivisions (a) and (e) of paragraph VIII hereof, during the preceding three calendar months, until such time as the Wright-Martin Aircraft Corporation shall have been paid in full as provided for in subdivision (a) of this paragraph, after which there shall be paid to the Curtiss Aeroplane and Motor Corporation at the times herein mentioned the sum of One hundred and seventy-five dollars ($175) on each of said airplanes until the aggregate sum of Two million ($2,000,000) dollars shall have been paid to it or until U. S. Patent No. 1203550 issued October 31st, 1916, shall have expired, when all payments to it hereunder shall cease, except as hereinafter provided.

(c) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" with relation to the use of after acquired patents in accordance with subdivisions (c) and (e) of paragraph VIII hereof.

(d) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" on account of the use of specifications, drawings and data as provided in paragraph VI and in subdivision (d) of paragraph VIII hereof, but any royalty payment received from outside manufacturers shall be distributed as though received from "Subscribers."

(e) To any "Subscriber" who shall have granted licenses to others than "Subscribers", as provided in paragraph IV, the royalties received under such licenses which are not required for payments provided for in subdivisions (a), (b), and (c) of this paragraph.

Out of the balance of said moneys paid into the treasury of the "Company" under this agreement, the "Company" may retain and use sufficient to cover its operating expenses and to create such fund as, in the judgment of the Board of Directors of said "Company", shall be necessary and proper for the further development of the airplane art and industry, and the purchase of patents and rights for the benefit of the "Subscribers" hereto.

If after making the the payments and reservations herein provided for, any surplus or balance remains out of the funds so paid in the treasury of the "Company", the same shall be distributed by the "Company" from time to time, among those "Subscribers" who have contributed to said moneys, in proportion to their respective contributions under subdivisions (a) and (b) of paragraph VIII other than those required for payments under subdivisions (a) and (b) of this paragraph IX.

X. BREACH OF AGREEMENT

In the event that any "Subscriber" is claimed by the "Company", or any other "Subscriber", to be in default in the performance of any of its obligations hereunder, and such claimed default continues after thirty days' notice in writing, by the "Company" or any "Subscriber" hereto, to the "Subscriber" claimed to be in default, then the Board of Arbitration, hereinafter provided for, shall determine whether there has been such specified default, and if such default is found to exist, shall fix the time within which it must be repaired, and shall assess such damages and impose upon the "Subscriber" in default such other requirements (including the forfeiture of its stock and license) as may seem to the said Board of Arbitration to be proper under the circumstances. Each "Subscriber" covenants and agrees that it will pay such damages and comply with such requirements as may be specified by the said Board of Arbitration.

Nothing contained in this paragraph shall deprive the "Company" of the power to make, execute and deliver licenses under the patents or patent rights owned and controlled by any defaulting "Subscriber", or to which the "Subscriber" may be entitled, at the time he ceases to be a stockholder or "Subscriber", nor deprive other than defaulting "Subscribers" of any right which they may have received to the use of the said patents or patent rights.

XI. WITHDRAWAL FROM AGREEMENT

Any "Subscriber" may withdraw from this agreement at any time after ten years from the date hereof, on giving to the "Company" written notice of its election so to do and on fulfilling all of its obligations up to the date of such withdrawal. But no withdrawal shall relieve the other parties and other

Digitized by Google

"Subscribers" from their obligations to each other hereunder, nor deprive them of their rights acquired under the patents and patent rights owned or controlled by the withdrawing "Subscriber" at the time of withdrawal, all of said patents and patent rights remaining under this agreement, but such withdrawing "Subscriber" shall cease to have any rights under the patents of the other "Subscribers" hereto, or any other right under this agreement, from and after such withdrawal.

XII. REPURCHASE OF STOCK

In the event of the death of any person who is a stockholder in the "Company", or in the event of the dissolution of any corporation or firm which is a stockholder therein, or in the event of the bankruptcy or insolvency of any such stockholders, or in the event of withdrawal under paragraph XI hereof, the "Company" shall have the right to purchase for the benefit of the other "Subscribers" the stock held by such person, firm, or corporation at a sum not to exceed the distributive share or shares of such stockholder in the funds held by the "Company", and the license or licenses issued to such stockholder shall be surrendered to the "Company" and cancelled.

XIII. ARBITRATION OF CLAIMS AND DISPUTES

In case of any dispute or controversy between the "Subscribers" hereto, or between the "Subscribers" and the "Company", or in case of a claim by a "Subscriber" for special compensation for licenses under patents or rights hereafter acquired by it, or in case of breach of this agreement, the said dispute, controversy, claim, or breach shall, within thirty days after a "Subscriber" or "Subscribers" shall have given notice to the "Company" or the "Company" shall have given notice to the "Subscribers" thereof, be referred to a board of disinterested Arbitrators consisting of three persons, for determination.

In the case of a claim for special compensation, one member of such Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" making the claim and the third by the other two arbitrators.

In the case of any dispute between the "Company" and a "Subscriber" or "Subscribers", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" (or if more than one "Subscriber" is involved in the same dispute, then by a majority of those so involved) and the third by the other two arbitrators.

In case of a breach of this agreement asserted by the "Company" or a "Subscriber" against another "Subscriber", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" against whom the assertion of breach is made, and the third by the other two arbitrators.

If either the Board of Directors or the "Subscribers" fail to appoint a member of the Board of Arbitration within the time specified, the other party or parties may appoint such member or fill such vacancy.

The decision of a majority of the members of said Board upon all matters submitted to them for adjudication shall be final and binding upon all the parties hereto.

XIV. RELEASE TO "SUBSCRIBERS"

The "Subscribers" hereby waive and release any and all claims which they or any of them may have had against each other for damages and profits on account of any infringement or alleged infringement, prior to July 1, 1917, of any patent included within this instrument in the manufacture, sale, or use of airplanes.

XV. BINDING UPON PARTIES, CONTROLLED COMPANIES, LEGAL REPRESENTATIVES, ETC.

This agreement is binding upon the parties hereto and their several successors, legal representatives and assigns, but shall enure to the benefit of only their several successors in business. Each "Subscriber" agrees that all persons, firms and corporations now or hereafter controlled by it, and engaged in the manufacture of airplanes, or owning or controlling United States airplane patents, shall be caused to execute this agreement.

Digitized by Google

XVI. EXECUTION OF AGREEMENT

This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

In Witness Whereof, the parties hereto have executed this instrument as of the day and year first above written.

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

LICENSE

License, granted this _____ day of _____, 1917, by the (hereinafter called the Licensor), to _____ (hereinafter called the Licensee).

Whereas the Licensor and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called "Subscribers"), heretofore, entered into a certain agreement dated July 24, 1917, entitled "Cross License Agreement" (a copy of which is hereto annexed), wherein and whereby the Licensor agreed to grant certain licenses to the other "Subscribers"; and

Whereas the said agreement also authorized and empowered the Manufacturers Aircraft Associatiton, Inc., as the agent and attorney in fact of the Licensor, to make, execute and deliver such licenses in the name of the Licensor; and it is desired to execute the powers therein granted;

Now, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is convenanted and agreed as follows:

1. The Licensor does hereby give and grant unto the said Licensee the unrestricted, but non-exclusive license to make, use and sell airplanes—under all airplane patents of the United States now or hereafter owner or controlled by it, or by any firm, corporation, or association owned or controlled by it, or under which it or any such firm, corporation or association have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes, and except further that no licenses are hereby granted under the Dunne patents, No. 975,403, issued November 15, 1910, and No. 1,003,721 issued September 19, 1911, the rights under which are held by the Burgess Company.

The patents; the patents to issue on inventions; and the agreements with reference to which the Licensor has a right to grant licenses at the present time, and which are intended to be included in this license are set forth in Schedule "A", hereto annexed.

2. This license shall run to the full end of the term of the Letters Patent under which the license is or is to be granted, and shall be personal, indivisible, non-assignable and irrevocable, except for the causes and in the manner set forth in the "Cross License Agreement" hereinbefore referred to.

3. This license is made subject to all the terms, conditions, covenants and agreements contained in said "Cross License Agreement", which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this instrument to be executed as of the day and year first above written.

By MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

SUPPLEMENTAL CROSS-LICENSE AGREEMENT

This supplemental agreement, made this _____ day of _____, 1918, between the Manufacturers Aircraft Association, Inc., a New York Corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers"), as are and shall become stockholders of the said "Company", in the manner and under the conditions provided in the By-laws thereof (which for the purposes of this agreement are made a part hereof), parties of the second part;

Whereas an agreement dated the 24th day of July 1917 was entered into between the "Company" and certain "Subscribers", wherein and whereby it was agreed, among other things, that the "Company" should issue licenses to said "Subscribers" to manufacture, sell, and use airplanes embodying the patents owned and controlled by the "Subscriber", and that the "Subscribers" should pay, as a royalty for such licenses, for the use of the patents now owned or controlled by them, the sum of Two Hundred ($200) dollars upon each of said airplanes; and

Whereas it is desired to modify said agreement and to reduce the amount of the royalty which said "Subscribers" shall be obliged to pay for the use of said patents upon airplanes sold and delivered by them to the United States Government, during the period of the present war with the Imperial German Government:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves: It is covenanted and agreed, as follows:

First. That on the 10th days of January, April, July, and October, in each year, each "Subscriber" shall report to the "Company" the number of airplanes (with or without engines) sold and delivered by it, during the three preceding calendar months, to the United States Government; (1) Under flat-price contracts entered into prior to April 1st, 1918; (2) Under flat-price contracts entered into after March 31, 1918; (3) Under cost-plus contracts on which deliveries were made prior to January 1st, 1918, unless the same have been heretofore reported; (4) Under cost-plus contracts on which deliveries have been or shall be made after December 31, 1917.

Second. On the 10th days of January, April, July, and October in each year, each "Subscriber" shall pay into the treasury of the "Company" on each airplane (with or without engines) delivered to the United States Government by it during the three preceding calendar months, the following sums of money, to-wit: (1) Two hundred ($200) dollars on each airplane which has been or shall be delivered under flat-price contracts entered into prior to April 1st, 1918; (2) One hundred ($100) dollars on each airplane which shall be delivered under flat-price contracts entered into after March 31, 1918; (3) Two hundred ($200) dollars on each airplane delivered prior to January 1st, 1918, under cost-plus contracts; and (4) One hundred ($100) dollars on each airplane which has been or shall be delivered after December 31, 1917, under cost-plus contracts. Said payments to be made until such time as the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation shall have been paid the aggregate sum of Two million ($2,000,000) dollars as provided for in paragraph "Third" hereof.

Third. Out of the moneys paid into the "Company" pursuant to the provisions of paragraph "Second" hereof, the following payments shall be made by the "Company", on the 20th days of January, April, July, and October in each year, to-wit: To the Wright-Martin Aircraft Corporation, Sixty-seven and one-half per cent (67½%) of the amount received on each airplane (with or without engines), and to the Curtiss Aeroplane and Motor Corporation Twenty per cent (20%) of the amount received on each airplane (with or without engines). Said payments shall be made until the sums paid to the Wright-Martin Aircraft Corporation and the Curtiss Aeroplane and Motor Corporation under and pursuant to the terms of this supplemental agreement and the original agreement of July 24th, 1917, and from any other source paying royalties to the Manufacturers Aircraft Association, shall amount in the aggregate to Two Million ($2,000,000) dollars, when and after which time the said "Subscribers" shall not be obliged to pay any royalties for the use of the patents now owned or controlled by the "Subscribers" or the "Company" in any airplane

Digitized by Google

sold and delivered by them to the United States Government during the period of the present war with the Imperial German Government.

Fourth. Except as herein modified the original agreement of July 24th, 1917, shall be and remain in full force and effect between the parties thereto and all other persons, firms, or corporations who may become "Subscribers" thereto, it being understood, however, that such sums as are paid to the Wright-Martin Aircraft Corporation and Curtiss Aeroplane and Motor Corporation pursuant to the provisions of this supplemental agreement shall be credited upon and shall constitute a part of the moneys which they are entitled to receive under and pursuant to the provisions of paragraph IX of said original agreement.

Fifth. Nothing herein contained shall be taken, considered, or construed as fixing the reasonable value of the royalties to be paid for the use of the patents now owned or controlled by the "Subscribers." The price herein agreed upon for royalties upon airplanes furnished during the present emergency to the United States Government is so fixed for the sole purpose of enabling the Government to acquire airplanes manufactured under said patents upon a preferential basis during the period of the present war.

Sixth. This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

In Witness Whereof the parties hereto have executed this instrument as of the day and year first above written.

SECOND SUPPLEMENTAL CROSS-LICENSE AGREEMENT

This supplemental agreement, made this 12th day of January 1923, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company"), party of the first part, and each person, firm, or corporation (hereinafter called the "Subscriber" or "Subscribers") as are and shall become stockholders of the said "Company", in the manner and under the conditions provided in the By-Laws thereof (which for the purpose of this agreement are made a part hereof), parties of the second part:

Whereas an agreement dated the 24th day of July 1917, was entered into between the "Company" and certain "Subscribers", which agreement was amended by supplemental agreement dated the 19th day of April 1918, between the same parties; and

Whereas it is desired to modify the said agreement as hereinafter set forth:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained, and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves: It is covenanted and agreed, as follows:

First. That, anything in said cross-license agreement, as amended, to the contrary notwithstanding, particularly in Paragraph IX of said cross-license agreement, the "Company" may retain and use, for the purposes set forth in Paragraph IX of said cross-license agreement, up to twelve and one-half percent (12½%) of such amounts as may be paid to the "Company", on or after the 10th day of October 1922, with relation to the use of after-acquired patents in accordance with subdivisions (c) and (e) of Paragraph VIII of said cross-license agreement.

Second. That, anything in said cross-license agreement, as amended, to the contrary notwithstanding, particularly in Paragraph IX of said cross-license agreement, the "Company" may retain and use, for the purpose set forth in Paragraph IX of said cross-license agreement, up to twelve and one-half percent (12½%) of that part of any amount paid to the "Company" on or after

Digitized by Google

the 10th day of October 1922, in accordance with Subdivision (e) of Paragraph VIII as is not required for the payments provided for in subdivisions (a), (b), and (c) of Paragraph IX of said cross-license agreement.

Third. Except as herein modified, the original agreement of July 24, 1917, as amended April 19, 1918, shall be and remain in full force and effect between the parties thereto and all other persons, firms, or corporations who may become "Subscribers" thereto.

Fourth. This agreement may be executed by the "Subscribers" in any number of counterparts, but when so executed shall constitute but one and the same agreement, and shall be as binding, and of the same force and effect, as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been at the same time.

In witness whereof, the parties hereto have executed this instrument as of the day and year first above written.

THE AMENDED CROSS-LICENSE AGREEMENT OF DECEMBER 31, 1928

This agreement, made this 31st day of December 1928, between the Manufacturers Aircraft Association, Inc., a New York corporation (hereinafter called the "Company") party of the first part, and each person, firm, corporation, or association (hereinafter called the "Subscriber" or "Subscribers") as are and shall become stockholders of the said "Company" in the manner and under the conditions provided in the By-Laws thereof (which for the purpose of this Agreement are made a part hereof), parties of the second part:

Whereas an Agreement (hereinafter called the original Cross-License Agreement) dated the 24th day of July 1917, was entered into between the "Company" and certain "Subscribers", which Agreement was amended by a Supplemental Agreement dated the 19th day of April 1918, between the same parties, and which Agreement was further amended by a second Supplemental Agreement dated the 12th day of January 1923, between the same parties, and

Whereas the parties hereto are interested in the manfacture, sale, and use of airplanes, as hereinafter defined, and desire to promote and develop the industry in which they are engaged, and to encourage and advance the art applicable thereto; and

Whereas the said development and advancement, prior to the execution of the original Cross-License Agreement was not capable of complete accomplishment because of the existence of certain United States patents claimed to be basic in their nature, upon which suits have been brought, or threatened, for alleged infringement and for the collection of royalties and damages in connection therewith; and

Whereas it is desired to prevent and avoid such litigations or threatened litigations in the future and to give to all of the "Subscribers" the right to manufacture, sell, and use airplanes embodying the inventions of each of the "Subscribers" and to that end it is desired that licenses be granted as herein expressed; and

Whereas on account of conditions which did not exist and which were not anticipated at the date of execution of said original Cross-License Agreement, nor at the date of execution of the Supplemental Agreements of April 19, 1918, and January 12, 1923, respectively, and in an effort to better serve the art and industry as they now exist, it is desired to further modify and amend said original Cross-License Agreement as hereinafter set forth:

Now, therefore, this agreement witnesseth: That for and in consideration of the premises, covenants, and conditions herein contained, and other good and valuable considerations moving between the "Company" and each of the "Subscribers" hereto, and between the "Subscribers" themselves:

It is covenanted and agreed: That the said original Cross-License Agreement as amended by the Supplemental Agreements of April 19, 1918, and January 12,

Digitized by Google

1923, anything therein contained to the contrary notwithstanding, shall from December 31st, 1928, which is fixed as the date of execution of this Agreement, be modified and amended to read henceforth as follows:

I. DEFINITIONS

The word "Airplane" as used in this agreement, shall be understood to mean any form of heavier-than-air craft, using wing surfaces for sustaining it, and to include such indirect power plant appurtenances as radiators, oil-coolers, fuel and oil tanks, and motor controls; but not to include the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The words "Airplane patent", as used in this agreement, shall be understood to mean any patent covering inventions for or capable of use in or in connection with airplanes, including such indirect power plant appurtenances as radiators, oil-coolers, fuel and oil tanks, and motor controls; but not including the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears.

The words "selling price", as used in this agreement, shall be understood to mean the manufacturer's regular selling price of an airplane, completely equipped according to contract, if and when delivered under formal written contract, or in the absence of such contract, a completely equipped airplane, ready to operate, as above defined, minus the then prevailing selling price of the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors, and reduction gears, irrespective of any and all discounts and rebates of whatsoever character.

II. LICENSES AND POWERS GRANTED

The "Subscribers" grant, agree to grant, and cause to be granted to each other, licenses to make, use, and sell airplanes—under all airplane patents of the United States now or hereafter owned or controlled by them or any of them, or by any firm, corporation or association owned or controlled by them or under which they or any of them, or any such firm, corporation, or association, have or shall have the right to grant licenses—in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall said rights or the license herein provided for, apply to or include the use of said patents in their application to other than airplanes.

All licenses provided for herein shall run to the full end of the term of the letters patent under which the license is or is to be granted and shall be personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner hereinafter stated.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them and in their respective names, to make and execute licenses in writing in the form hereto annexed, and to deliver the same to those of the "Subscribers" who, at the time, are stockholders of the "Company" not in default hereunder and who shall have executed an agreement in writing of like tenor to this; and to enforce said licenses and any and all other obligations (including the obligation to make payments) of the "Subscribers" under this Agreement, and the "Subscribers" hereby give and grant unto said "Company" as full, complete, and ample power and authority in the premises as the "Subscribers" themselves now have and possess.

The "Subscribers" hereby designate, constitute, and appoint the "Company" (and the "Company" hereby accepts the appointment) as their true, sufficient, and lawful agent and attorney in fact, for them in their respective names, to make and execute licenses to the Government of the United States and/or the various branches, bureaus, and departments thereof, for the use by the Government and/or the various branches, bureaus, and departments thereof of the patents covered by this Agreement, upon the agreement by the Government of the United States and/or the various branches, bureaus, and departments thereof, to pay to the "Company" the rates of royalty fixed in paragraph VII hereof, and to demand and receive of the Government of the United States and/or the various branches, bureaus, and departments thereof, royalties due the "Company", and to give the said Government of the United States and/or the various branches, bureaus, and departments thereof, receipts for royalties

Digitized by Google

so collected, and to disburse the royalties so received in the same manner as the "Company" is herein authorized to disburse the royalties received by it from the "Subscribers" hereto.

All licenses provided for herein, when made, executed, and delivered in accordance with the provisions hereof, shall have the same force and effect as if they had been executed and delivered by the "Subscribers" themselves.

III. COVENANTS OF FURTHER ASSURANCE

(a) Each "Subscriber" now or hereafter, having rights under any United States airplane patent or invention, of such character that it has legal right and power to procure the grant of rights thereunder to others but is not itself empowered to grant such rights, covenants to procure the execution of such further instrument as may be necessary to empower the "Company" to grant rights under such patent, or with reference to such invention, to the extent and in the manner herein provided.

(b) Each "Subscriber" covenants that it will not contract for or obtain any rights under any such patent or invention in such manner that its owner would be prevented from granting to other "Subscribers" hereto similar rights on the same terms unless the "Subscriber" obtains, at the same time, the further privilege to grant rights under said patent or said invention, whereby the same may and will be brought under the operation of this instrument.

IV. COVENANTS AGAINST OTHER LICENSES

Each "Subscriber" covenants that it has not heretofore and will not hereafter enter into any contract or arrangement whereby its privileges under United States airplane patents, issued or to be issued, inventions, and rights owned or controlled by it, have been or shall be diminished or surrendered so as to exclude or restrict the operation of this instrument in respect thereto. Each "Subscriber" further covenants that it will not grant licenses under any such patents for use in airplanes, with reference to which it is receiving royalties hereunder, to any other person, firm, or corporation on more favorable or lower terms of royalty than those herein provided, or which may become more favorable or lower during the term of such license.

V. AFTER ACQUIRED PATENTS

When a "Subscriber" shall hereafter acquire a United States airplane patent, or any right thereunder, he shall be entitled to compensation for the use thereof if the patent or patent right covers an invention which secures the performance of a function not before known to the art or constitutes an adaptation for the first time to a commercial use of an invention known to the industry to be desirable of use but not used because of lack of adaptation, or is otherwise of striking character or constitutes a radical departure from previous practice, or if either the price paid therefor or the amount expended in developing the same is such as to justify such compensation, provided that at the time said patent or patent right is reported to the "Company" as required in subdivision (b) of Paragraph VI, the "Subscriber" claims such compensation and states the grounds on which such claim is based. Such report and claims shall be submitted to a Board of Arbitration to be selected in the manner provided for in Paragraph XIV hereof, which Board shall determine whether such compensation shall be paid, and if so, the total amount thereof and the rate of royalty or other payments which shall be paid (toward such compensation) by each "Subscriber" upon the issuance of a license under said patent and the use by any "Subscriber" of the subject matter covered by said patent, and shall also fix the time or times when said royalties or other amounts shall be paid. Licenses shall be issued to each "Subscriber" as a matter of course, through the offices of the "Company" within thirty days (30 days) after the rendition by such Board of Arbitration of its final report, whether or not compensation, under such after acquired patent, is or is not required to be paid.

VI. REPORTS TO THE "COMPANY"

The following reports in writing shall be rendered to the "Company" by each "Subscriber" at the time or times hereinafter set forth:

(a) At the time of the execution of this Agreement each "Subscriber" shall report all United States airplane patents and inventions, together with serial

Digitized by Google

numbers and filing dates of all pending applications for such patents and all rights under such patents and inventions then owned or controlled by it, but no omission from such report shall exclude the patent, application, or right so omitted from the operation of this Agreement.

(b) Within thirty days after the acquisition by any "Subscriber" of any United States patent (other than patents to be issued upon inventions now owned by it) or right within the scope of this Agreement, each such "Subscriber" shall report such acquisition, together with all the facts known to it as to such patent or right and its manner of acquisition. If such "Subscriber" claims that additional compensation should be paid to it for licenses under such patent or right, it shall so claim in its report.

(c) On the 10th days of January, April, July, and October, in each year, each "Subscriber" shall report the number of airplanes (with or without engines) sold and delivered by it, together with the names of the purchasers, the selling price of each airplane, and the dates of delivery, or the number of airplanes put into use for other than experimental or development purposes, and the number of airplanes (with or without engines) shipped out of the United States, during the preceding three calendar months.

(d) Each License to other than "Subscribers" as provided in Paragraph IV hereof, shall be reported within thirty days after its delivery.

(e) Each suit instituted against infringers of the patents licensed hereunder shall be reported in a reasonable time.

The first report under subdivision (c) hereof shall be made by each "Subscriber" on the tenth day of January, April, July, or October first occurring after it has become a "Subscriber" hereto and shall cover the period from December 31, 1928, to the first day of the month in which the report is due.

Each of the "Subscribers" hereto shall keep separate books of account showing all business done under or subject to the operation of this Agreement. The "Company" may at any time have a New York Certified Public Accountant to be designated by it, audit such books of account of the "Subscribers", together with such other accounts as the accountant may deem necessary, in order to verify or correct the report herein provided for, and the "Company" shall have such audit made when any "Subscriber" so demands. Such audit, however, shall be limited to ascertaining whether the reports herein provided for are properly made and to correcting the same, if necessity for correction shall appear. No information obtained from any such audit shall be reported by the accountant or given to any of the parties hereto, except as it directly applies to the reports required by this Agreement.

VII. PAYMENTS TO THE "COMPANY"

Each "Subscriber" agrees to pay into the treasury of the "Company" on the 10th days of January, April, July, and October in each year the following sums of money, to wit:

(a) On each airplane, with or without engine, required to be reported as provided in subdivision (c) of Paragraph VI hereof, the sum of two per cent (2%) of the selling price of such airplane, with a maximum of Two Hundred Dollars ($200) on any one airplane regardless of its cost or selling price until such time as the Curtiss Airplane & Motor Company, Inc., shall have been paid the aggregate sums provided for in Paragraph VIII hereof, or until United States Patent No. 1203550, issued October 31, 1916, shall have expired.

(b) On each airplane, with or without engine, required to be reported as provided for in sub-division (c) of Paragraph VI hereof, such sum not to exceed one-quarter of one per cent of the selling price of such airplane, but in no case to exceed twenty-five dollars ($25.00) per airplane, as the Board of Directors of the "Company" may, from time to time, fix and determine as payable after October 31, 1933, or after the above mentioned aggregate sums shall have been paid to the Curtiss Airplane & Motor Company, Inc.

(c) Such amount or amounts as the Board of Arbitration may specify as special compensation for after acquired patents as provided in Paragraph V hereof, and required to be reported in sub-division (b) of Paragraph VI.

(d) All royalties received under Licenses referred to in sub-division (d) of Paragraph VI.

(e) All monies received as the result of suits reported under sub-division (e) of Paragraph VI less deductions for actual cost to the Subscriber of such suit.

Digitized by Google

Each "Subscriber" who shall become a party hereto after the thirty-first day of December 1928 shall on the 10th day of January, April, July, or October next thereafter occurring pay to the "Company" those amounts which it would have been obliged to pay in accordance with the foregoing if it had been a "Subscriber" on December 31, 1928.

Monies paid into the treasury of the "Company" pursuant to any provisions hereof shall not be or constitute or be deemed to be or constitute the assets, property, or profits of said "Company" but shall be received and disbursed by it as the agent and the attorney in fact of the "Subscriber" in the manner and for the purposes herein mentioned.

VIII. PAYMENTS BY THE "COMPANY"

Out of the monies paid into the treasury of the "Company" pursuant to the provisions hereof and of the predecessor agreements hereinabove mentioned, the following payments shall be made by the Company on the 20th days of January, April, July, and October in each year, to wit:

(a) To the Curtiss Aeroplane & Motor Company, Inc., eighty-seven and one-half percent (87½%) of all sums received on account of each of said airplanes with reference to which payments have been or shall be made in accordance with sub-divisions (a) and (d) of Paragraph VII hereof, until the payments so made to Curtiss Airplane & Motor Company, Inc., under the original Cross-License Agreement, when increased by the payments made after the execution of this Amended Agreement, shall aggregate the sum of Two Million Dollars ($2,000,000) or until the United States Patent No. 1,203,550 issued October 31, 1916, shall have expired, when all payments to it hereunder shall cease, except as hereinafter provided.

(b) To each of the "Subscribers" entitled thereto such amounts as may have been paid to the "Company" with relation to the use of after acquired patents in accordance with subdivision (c) of Paragraph VII, subject to the reservation in subdivision (a) of Paragraph IX.

(c) To any "Subscriber" who shall have granted licenses to other than subscribers, as provided in Paragraph IV, the royalties received under such licenses which are not required for payments provided for in subdivision (a) of this Paragraph VIII subject to the reservation of subdivision (b) of Paragraph IX.

IX. MONEYS RETAINED BY THE COMPANY

(a) The "Company" may retain and use, for the purposes set forth in subdivision (c) of this Paragraph IX up to twelve and one-half per cent (12½%) of such amounts as may be paid to the "Company" with relation to the use of after acquired patents in accordance with subdivision (c) of Paragraph VII.

(b) The "Company" may retain and use for the purposes set forth in subdivision (c) of this Paragraph IX, up to twelve and one-half per cent (12½%) of that part of any amount paid to the "Company" on account of direct licenses given and reported in accordance with subdivision (d) of Paragraph VI.

(c) Out of the balance of said moneys paid into the treasury of the "Company" under subdivision (a) of Paragraph VII of this Agreement, and not paid out by the Company under subdivision (a) of Paragraph VIII, the "Company may retain and use sufficient to cover its operating expenses and to create such fund as, in the judgment of the Board of Directors of said "Company" shall be necessary and proper for the further development of the airplane art and industry, and the purchase of patents and rights for the benefit of the "Subscribers" hereto.

X. DISPOSITION OF SURPLUS

If, after making the payments and reservations herein provided for, any surplus of balance remains out of the funds so paid into the treasury of the "Company" the same shall be distributed by the "Company" from time to time, among those "Subscribers" who have contributed to said moneys, in proportion to their respective contributions under subdivisions (a) and (b) of Paragraph VII other than those required for payments under this Paragraph X.

XI. BREACH OF AGREEMENT

In the event that any "Subscriber" is claimed by the "Company" or any other "Subscriber" to be in default in the performance of any of its obligations hereunder, and such claimed default continues after thirty days' notice

Digitized by Google

in writing, by the "Company" or any "Subscriber" claiming the default, then the Board of Arbitration, hereinafter provided for, shall determine whether there has been such specified default and if such default is found to exist, shall fix the time within which it must be repaired, and shall assess such damages and impose upon the "Subscriber" in default such other requirements (including the forfeiture of its stock and license) as may seem to the said Board of Arbitration to be proper under the circumstances. Each "Subscriber" covenants and agrees that it will pay such damages and comply with such requirements as may be specified by the said Board of Arbitration.

Nothing contained in this Paragraph shall deprive the "Company" of the power to make, execute, and deliver licenses under the patents or patent rights owned and controlled by any defaulting "Subscriber" or to which the "Subscriber" may be entitled at the time to cease to be a stockholder or "Subscriber", nor deprive other than defaulting "Subscribers" of any right which they may have received to the use of the said patents or patent rights.

XII. WITHDRAWAL FROM AGREEMENT

Any "Subscriber" may withdraw from this Agreement at any time after one (1) year after executing and delivering it, providing that written notice of its election to do so shall be given to the "Company" at least thirty (30) days in advance of the date when the next quarterly report is required to be filed under subdivision (c) of Paragraph VI hereof and on fulfilling all of its obligations up to the date of such withdrawal, but no withdrawal shall relieve the other parties and other "Subscribers" from their obligations to each other hereunder, nor deprive them of their rights acquired under the patents and patent rights owned or controlled by the withdrawing "Subscriber" at the time of withdrawal, all of said patents and patent rights remaining under this Agreement, but such withdrawing "Subscriber" shall cease to have any rights under the patents of the other "Subscribers" hereto, or any other right under this Agreement, from and after such withdrawal.

XIII. REPURCHASE OF STOCK

In the event of the death of any person who is a stockholder in the "Company" or in the event of the dissolution of any corporation or firm which is a stockholder therein, or in the event of the bankruptcy or insolvency of any such stockholders, or in the event of withdrawal under Paragraph XII hereof, the "Company" shall have the right to purchase for the benefit of the other "Subscribers" the stock held by such person, firm, or corporation at a sum not to exceed the distributive share or shares of such stockholder in the funds held by the "Company" and the license or licenses issued to such stockholder shall be surrendered to the "Company" and cancelled.

XIV. ARBITRATION OF CLAIMS AND DISPUTES

In case of any dispute or controversy between the "Subscribers" hereto, or between the "Subscribers" and the "Company" or in case of a claim by a "Subscriber" for special compensation for license under patents or rights hereafter acquired by it, or in case of breach of this Agreement, the said dispute, controversy, claim, or breach shall, within thirty days after a "Subscriber" or "Subscribers" shall have given notice in writing to the "Company" or the "Company" shall have given notice in writing to the "Subscribers" hereof, be referred to a board of disinterested arbitrators consisting of three persons, for determination.

In the case of a claim for special compensation, one member of such Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" making the claim and the third by the other two arbitrators.

In the case of any dispute between the "Company" and a "Subscriber" or "Subscribers" one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company", another by the "Subscriber" (or if more than one "Subscriber" is involved in the same dispute, then by a majority of those so involved), and the third by the other two arbitrators.

In case of a breach of this Agreement asserted by the "Company" or a "Subscriber" against another "Subscriber", one member of the Board of Arbitration shall be appointed by the Board of Directors of the "Company" another by the "Subscriber" against whom the assertion of breach is made and the third by the other two arbitrators.

Digitized by Google

If either the Board of Directors or the "Subscribers" fail to appoint a member of the Board of Arbitration within the time specified the other party or parties may appoint such member or fill such vacancy.

The decision of a majority of the members of said Board upon all matters submitted to them for adjudication shall be final and binding upon all the parties hereto.

XV. RELEASE TO "SUBSCRIBERS"

The "Subscribers" hereby waive and release any and all claims which they or any of them may have had against each other for damages and profits on account of any infringement or alleged infringement prior to December 31, 1928, of any patent included within this instrument in the manufacture, sale, or use of airplanes.

XVI. BINDING UPON PARTIES, CONTROLLED COMPANIES, LEGAL REPRESENTATIVES, ETC.

This Agreement is binding upon the parties hereto and their several successors, legal representatives and assigns, but shall inure to the benefit of only their several successors in business. Each "Subscriber" agrees that all persons, firms, and corporations now or hereafter controlled by it and engaged in the manufacture of airplanes, or owning or controlling United States airplane patents, shall be caused to execute this Agreement.

XVII. EXECUTION OF AGREEMENT

Nothing herein contained shall be construed to relieve either the "Company" or any "Subscriber" hereto of any act or obligation to be performed or any duty to be fulfilled under the terms and conditions of the original Cross-License Agreement as amended April 19, 1918 and January 12, 1923, respectively, which act, obligation or duty, as and of December 31, 1928, shall remain at such time unperformed or unfulfilled.

This Agreement may be executed by the "Subscriber" in any number of counterparts, but when so executed shall constitute but one and the same Agreement, and shall be as binding, and of the same force and effect as if all the "Subscribers" had executed but one and the same instrument, and as if all executions had been dated December 31, 1928 which date shall be the date on which this Agreement becomes effective.

This Agreement of December 31, 1928 amending the original Cross-License Agreement of July 24, 1917, in turn amended by the Supplemental Agreements of 1918 and January 12, 1923, respectively, shall, for convenience, be referred to as

"THE AMENDED CROSS-LICENSE AGREEMENT OF DECEMBER 31, 1928."

IN WITNESS WHEREOF, the parties hereto have executed this instrument as of the day and year first above written.

MANUFACTURERS AIRCRAFT ASSOCIATION, INC.,

By _____, *President.*

_____, *Secretary.*

By _____, *President.*

_____, *Secretary.*

CERTIFICATE OF INCORPORATION OF MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

This is to certify, that we, the undersigned, citizens of the United States, all being of full age, and at least one of whom is a resident of the State of New York, desiring to form a stock corporation pursuant to the provisions of the Business Corporations Law of the State of New York, do hereby make, sign, acknowledge, and file this instrument of writing for that purpose, as follows:

First. The name of the proposed corporation is Manufacturers Aircraft Association, Inc.

Second. The objects and purposes for which it is formed are the following:

1. To manufacture, buy, sell, and deal in all kinds of aircraft, aircraft engines, and all parts and accessories used or useful in aircraft.

Digitized by Google

2. To acquire by purchase or otherwise, and sell and dispose of all kinds of personal property, including patents, patent rights, applications for patents, and licenses and shop rights under patents, and to issue licenses; sub-licenses, or cross-licenses under letters patent.

3. To acquire by purchase, lease, or otherwise any real property or any rights or privileges in real property which the company may deem necessary and proper for the purposes of its business.

4. To acquire and take over the good will, property, and assets and assume the liabilities of any person, firm, association, or corporation engaged in similar or kindred business for the purpose herein specified.

5. To acquire, purchase, hold, sell, and deal in or dispose of stocks, bonds, securities, and other evidences of debt of any other corporation, domestic or foreign, and issue in exchange therefor, its stocks, bonds, or other obligations, and while the owner of any stocks, bonds, or other obligations, to possess and exercise in respect thereto all rights, powers, and privileges of individual owners or holders and to exercise any and all voting powers thereunder.

6. To establish and maintain in connection with the business of the corporation and as lawfully incidental thereto, laboratories for the purpose of the development and extension of the business herein referred to, together with such books of reference as may be required for said purposes.

7. To make and enter into all kinds of contracts, agreements, and obligations with any person, firm, or corporation, for purchasing, acquiring, manufacturing, exchanging, or dealing in any article of personal property of any kind or nature, to the extent that the same may be permitted by the Business Corporations Law.

8. To act as agent or attorney in fact or representative of firms, corporations, or individuals, and as such to develop, extend, and promote the business interests thereof.

9. To consolidate the business of this corporation with that of any corporation engaged in or authorized to conduct a similar business to that herein provided for, in so far as the laws of the State of New York permit such consolidation.

10. To purchase, hold, and reissue the shares of its own capital stock in the manner authorized by statute.

11. Generally, to do every act and thing necessary, suitable, and proper for the accomplishment of any or all of the objects, the attainment of any or all of the purposes, or in furtherance of any and all of the powers herein set forth, either alone or in association with any other corporation, firm, or individual, and to do any other act, thing, or things incident or appertaining to, or growing out of, or connected with the aforesaid business or powers, or any part or parts thereof, provided the same are not inconsistent with the Business Corporations Law of the State of New York, under which this corporation is organized.

Third. The number of shares of Capital Stock that may be issued by the corporation is one hundred (100), which shall have no nominal or par value.

Fourth. The amount of capital with which said corporation will commence and carry on business is one thousand dollars ($1,000).

Fifth. The corporation may issue and sell its authorized shares from time to time for such consideration as shall be the fair market value of such shares.

Sixth. The principal business office of the corporation shall be located in the Borough of Manhattan, City, County, and State of New York.

Seventh. The duration of said corporation shall be perpetual.

Eighth. The number of its directors shall be seven (7), but they need not be stockholders of said corporation. They may hold their meetings at their principal office in the State of New York, or at such other place or places within or outside of said State, which they may determine.

Ninth. The names and post office addresses of the directors for the first year are as follows: Albert H. Flint, 500 West End Avenue, New York City, N. Y.; Benjamin S. Foss, Hyde Park, Boston, Massachusetts; George H. Houston, 360 Riverside Drive, New York City, N. Y.; Harry B. Mingle, 233 Broadway, New York City, N. Y.; Frank H. Russell, Marblehead, Massachusetts; Harold E. Talbott, Jr., Dayton, Ohio; John P. Tarbox, Buffalo, N. Y.

Tenth. The names and post office addresses of the subscribers to this certificate, and the number of shares of stock which each agrees to take in the corporation, are as follows: Joseph S. Ames, Baltimore, Maryland, One; W. Benton Crisp, New York City, N. Y., One; Albert H. Flint, New York City,

Digitized by Google

N. Y., One; George H. Houston, New York City, N. Y., One; John P. Tarbox, Buffalo, N. Y., One.

In witness whereof we have made, signed, and acknowledged this certificate in duplicate, this 16th day of July, in the year one thousand nine hundred and seventeen.

JOSEPH S. AMES. (L. S.)
W. BENTON CRISP. (L. S.)
ALBERT H. FLINT. (L. S.)
GEORGE H. HOUSTON. (L. S.)
JOHN P. TARBOX. (L. S.)

In the presence of—
ALBERT F. SMITH.

STATE OF NEW YORK,
County of New York, ss:

On this 16th day of July, in the year one thousand nine hundred and seventeen, before me personally appeared Joseph S. Ames, W. Benton Crisp, Albert H. Flint, George H. Houston, and John P. Tarbox, to me known, and known to me to be the individuals described in and who executed the foregoing certificates, and they severally duly acknowledged to me that they executed the same.

[SEAL]

ALBERT F. SMITH,
Notary Public, New York County,
Clerk's No. 419, Register's No. 9204.

Term Expires March 30, 1919.

No. 48064 Series B.

STATE OF NEW YORK,
County of New York, ss:

I, William F. Schneider, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that Albert F. Smith, whose name is subscribed to the deposition or certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such deposition, or proof and acknowledgment, a Notary Public in and for such County, duly commissioned and sworn, and authorized by the laws of said State to take depositions and to administer oaths to be used in any Court of said State and for general purposes; and also to take acknowledgments and proofs of deeds, of conveyances for land, tenements, or hereditaments in said State of New York. And further, that I am well acquainted with the handwriting of such Notary Public and verily believe that the signature to said deposition or certificate of proof or acknowledgment is genuine.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 17 day of July 1917.

[SEAL]

W. F. SCHNEIDER, *Clerk.*

BY-LAWS OF THE MANUFACTURERS AIRCRAFT ASSOCIATION, INC.

(As amended to February 16, 1931)

ARTICLE I. STOCKHOLDERS [1]

SECTION 1. *Qualification of Stockholders.*—To entitle a person, firm, or corporation to become a stockholder of this corporation, he or it, as the case may be, shall be [1] a responsible manufacturer of aircraft or aircraft engines, or parts and accessories thereof; or a responsible manufacturer who intends to become a bona fide producer of the same; or a manufacturer to whom the United States has given a contract for the construction of ten or more complete aircraft engines; or any person, firm, or corporation owning a controlling United States patents relating to any of the foregoing.[1] No one becoming a stockholder of this corporation [1] shall, however, acquire, own, or hold at any time more than one (1) share of stock of the Corporation.[1]

[1] Provisions for Voting Trust Agreement, which expired by limitation in July 1935, omitted.

Digitized by Google

ARTICLE II. DIRECTORS

SECTION 1. *Directors.*—The affairs of the corporation shall be managed and controlled by a Board of Directors to consist of twelve persons, who shall be elected annually at the regular annual meetings of the stockholders and who shall serve for one year, or until their successors are elected.

SECTION 2. *Vacancies.*—Vacancies in the Board of Directors occurring during the year shall be filled by a majority vote of the remaining members of the Board at any regular meeting thereof, or at any special meeting called for the purpose of filling any such vacancies.

ARTICLE III. OFFICERS AND THEIR DUTIES

SECTION 1. *Officers.*—The officers of the corporation shall consist of a President, as many Vice-Presidents as the Board of Directors may from time to time deem necessary or expedient, a Treasurer, and a Secretary. The Board may also elect or appoint at any time an Assistant Treasurer and Assistant Secretary, and such other officers, agents, and employees as it may deem proper and for such periods as it may determine. The offices of Secretary and Treasurer may be held by one and the same person, and the offices of Assistant Treasurer and Assistant Secretary may also be held by one and the same person.

SECTION 2. *Election of Officers.*—As soon as practicable after the election of the Board of Directors in each year, such newly elected Directors shall hold an Annual Meeting and elect a President from their number and also elect one or more Vice-Presidents, as provided in Section 1 of this Article, a Treasurer and a Secretary, all of whom shall serve for the ensuing year or until their successors are elected.

SECTION 3. *Vacancies.*—In the event of a vacancy in any of said offices, either by death, resignation, or otherwise, the same shall be filled by the Board of Directors at any regular or special meeting of said board.

SECTION 4. *The President—His Duties*—The President shall preside at all meetings of the corporation and at all meetings of the Board of Directors. He, together with the Secretary, unless otherwise ordered by the Board of Directors, shall sign all contracts, deeds, leases, licenses, or other instruments or writings necessary for the due and proper conduct of the business of the corporation. He, together with the Treasurer, unless otherwise ordered by the Board of Diectors, shall sign all certificates of stock, and bonds, issued by the corporation, and shall countersign all checks, drafts, notes, or bills which may be required for the purposes of the corporation. He shall have general supervision of the affairs of the corporation and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 5. *The Vice-Presidents—Their Duties.*—All Vice-Presidents shall have equal rank. In the absence of the President, they shall perform all the duties of the President and such other duties as may be required of them from time to time by the Board of Directors and as are required of them by the laws of the State of New York.

SECTION 6. *The Treasurer*—His Duties.—The Treasurer shall have charge of all moneys, bills, notes, and other evidences of debt of the corporation; shall deposit all moneys coming into his hands in the name of the corporation, and shall keep true and accurate books of account of all such moneys and other property of the corporation received by him. He, together with the President, unless otherwise ordered by the Board of Directors, shall sign all certificates of stock, and bonds, checks, drafts, and notes or bills issued by or required for the purposes of the corporation. He shall also perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York. He shall report from time to time to the Board of Directors or as often as may be required by said Board, concerning all matters pertaining to his office. He shall give a bond for the faithful discharge of the duties of his office in such amount as shall be fixed by the Board of Directors.

SECTION 7. *The Assistant Treasurer—His Duties.*—The Assistant Treasurer, in the absence of the The Treasurer, shall perform the duties of the Treasurer, and shall perform such other duties as may be required of him from time by

Digitized by Google

the Board of Directors or as are required of him by the laws of the State of New York. He shall give a bond for the faithful discharge of the duties of his office in such amount as shall be fixed by the Board of Directors.

SECTION 8. *The Secretary—His Duties.*—The Secretary shall have charge of the corporate seal and shall attend all sessions of the stockholders and the Board of Directors; act as the clerk thereof and keep true and accurate records and minutes of all proceedings of said stockholders and Board in a book or books to be kept for that purpose. He, together with the President, unless otherwise ordered by the Board of Directors, shall execute all contracts, deeds, leases, licenses, or other instruments or writings necessary for the due and proper conduct of the business of the corporation. He shall send out all notices of meetings of stockholders and directors of the corporation, and shall perform such other duties as may be required of him by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 9. *The Assistant Secretary—His Duties.*—The Assistant Secretary, in the absence of the Secretary, shall perform all the duties of the Secretary, and shall perform such other duties as may be required of him from time to time by the Board of Directors or as are required of him by the laws of the State of New York.

SECTION 10. *Compensation.*—The officers and directors of the corporation may receive by way of compensation for services rendered by them such salary or salaries as the Board of Directors of said corporation may from time to time approve.

ARTICLE IV. MEETINGS, QUORUMS, ETC.

SECTION 1. *Annual Meetings of Stockholders.*—There shall be an annual meeting of the stockholders of the corporation to be held at 11 a. m. on the last Friday in January of each year. At such meeting the stockholders may transact any and all business which may properly come before them, and shall elect the directors for the ensuing year in the manner hereinbefore set forth.

SECTION 2. *Annual Meetings of Directors.*—Immediately after the annual stockholders' meeting hereinbefore referred to, or as soon thereafter as may be convenient, there shall be held an annual meeting of the Board of Directors of the corporation. At such meeting said Board shall elect the officers for the ensuing year, and may transact any and all other business which may properly come before it.

SECTION 3. *Special Meetings of Stockholders.*—Special meetings of the stockholders shall be called at the request of holders of the stock owning at least ten (10 per cent thereof, by the officers of the corporation, or any of them, to be held within fifteen (15) days after said request has been made, or by the President without request. The notice of the meeting shall be in writing, and signed by the President or a Vice-President, or the Secretary or an Assistant Secretary. Such notice shall state the purpose or purposes for which the meeting is called, the time and the place where the same is to be held, and a copy thereof shall be served either personally or by mail upon each stockholder of record entitled to vote at such meeting and to any stockholder who by reason of any action proposed at such meeting would be entitled to have his stock appraised if such action were taken, not less than ten (10) nor more than forty (40) days before the meeting. If mailed, it shall be directed to a stockholder at his address as it appears on the stock book unless he shall have filed with the Secretary of the corporation a written request that notices intended for him be mailed to some other address, in which case it shall be mailed to the address designated in such request.

SECTION 4. *Special Meeting of Board of Directors.*—The officers of the corporation, or any of them, upon the request of any two members of the Board of Directors, shall call a special meeting of said Board, to be held within five (5) days after the receipt of said request, and the Secretary shall give by mail and by telegraph to each member of said Board at his last known post office address, a notice of said meeting stating the purposes thereof, at least three (3) days before the date upon which such meeting is to be held. The President may, without request, upon like notice, call a special meeting of said Board.

SECTION 5. *Quorum of Stockholders' Meetings.*—At all meetings of stockholders, except where it is otherwise provided by law, it shall be necessary that stockholders representing in person or by proxy a majority of the capital

Digitized by Google

stock, issued and outstanding, be present in order to constitute a quorum for the transaction of business.

SECTION 6. *Quorum of Directors' Meetings.*—At all meetings of the Board of Directors at least one-third of the number thereof shall be present to constitute a quorum for the transaction of business.

SECTION 7. *Failure to Perform Duty.*—Should any person whose duty it is to call a meeting at the time or times required by these by-laws, fail or refuse to do so, the meeting may be called by any other officer or director.

ARTICLE V. BALLOTING AND INSPECTORS

SECTION 1. *Balloting.*—At all meetings of the stockholders the voting shall be by ballot. At all meetings of the Board of Directors the voting may be viva voce.

SECTION 2. *Inspectors.*—The stockholders may at their annual meetings provided for in Section 1, of Article IV hereof, in each year, designate two (2) persons who shall act as inspectors of election for the ensuing year. Upon their failure so to designate inspectors, the Board of Directors may, at any time prior to election, designate the same. Upon the failure of both to so designate inspectors prior to any election, the President is authorized to make such designation.

ARTICLE VI. AMENDMENT

SECTION 1. These by-laws may not be amended, altered, or suspended by the Board of Directors, but only by stockholders at an annual or special meeting, by the affirmative vote of stockholders representing at least seventy-five (75%) per cent in amount of the stock then outstanding.[1]

CONTRACT BETWEEN MANUFACTURERS AIRCRAFT ASSOCIATION, INC. AND THE WAR AND NAVY DEPARTMENTS OF THE UNITED STATES GOVERNMENT GRANTING A NON-EXCLUSIVE LICENSE TO THE LATTER UNDER ALL AIRPLANE PATENTS EMBRACED WITHIN AND ACCORDING TO THE TERMS OF THE AMENDED CROSS-LICENSE AGREEMENT OF SAID ASSOCIATION

(Effective December 31st, 1928)

Contract of the thirty-first day of December 1928, by and between Manufacturers Aircraft Association, Inc., a New York Corporation, hereinafter termed "Association", acting in behalf of its subscribers and in its own behalf, party of the first part, and the United States of America, represented by the Secretary of War and the Secretary of the Navy, hereinafter termed "The Government", party of the second part, witnesseth:

Whereas the Association controls and has power to grant licenses under certain United States patents covering important inventions relating to aircraft; as listed and shown in appendix "A" hereto attached, and has been authorized to act herein; and

Whereas the use of several of these patented inventions is necessary in the successful operation of airplanes or hydro-airplanes, the term planes being hereinafter used to include airplanes, hydro-airplanes, and flying boats; and

Whereas the Government has acquired or desires to acquire aircraft, using certain or all of the aforesaid inventions; and

Whereas all formal and informal Agreements between the Government and the Association relating to the period of the War for the licensed use of said patented inventions and for payment of royalties, were terminated on July 2, 1921, except only such matters as are in dispute in a certain action now pending in the United States Court of Claims entitled "Manufacturers Aircraft Association, Inc., vs. United States of America", which action covers the period both before and after July 2, 1921; and

Whereas the Government desires to secure licenses for the future use of said patented inventions under as favorable terms and conditions as is provided in the Amended Cross-License Agreement of the thirty-first day of December 1928, to which reference is made herein.

[1] Provisions for Voting Trust Agreement, which expired by limitation in July 1935 omitted.

Digitized by Google

Now therefore, in consideration of the premises, covenants, and conditions herein contained and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows, viz,

1. The Association hereby grants to the Government a non-exclusive license to make, or cause to be made and use and sell in the United States, its territories and possessions during the term of this contract and thereafter to use and to sell airplanes under any and all of such airplane patents as defined in said Cross-License Agreement as are enumerated in Appendix "A" of the Amended Cross-License Agreement, dated December 31, 1928, copy of which is attached hereto and by reference made a part hereof and under all other patents which have been or may be reported to or acquired by or come into the control of the Manufacturers Aircraft Association, Inc., and/or Subscribers thereto; Provided, however that no licenses are so granted to the Government hereunder in patents reported to the Association with a claim for extra compensation under Paragraph V of said Amended Cross-License Agreement; Provided, further that an option is hereby granted to the Government to acquire licenses under those patents so reported on the same terms as granted to said Subscribers.

2. The Government agrees to pay for such use of the inventions described in any and all of said patents, a sum equal to two per cent (2%) of the cost or purchase price of such airplanes, as it may either make or acquire, as provided in Paragraph 1, above, provided that the Government shall not be required to pay nor shall any obligation accrue to pay royalties on airplanes upon which members or nonmembers of the Manufacturers Aircraft Association, Inc., have paid or have agreed to pay royalties; provided further, however that in no instance shall said royalty exceed the sum of Two Hundred Dollars ($200) per airplane, regardless of what the cost or price thereof may amount to, and provided that the cost or price thereof as used herein shall be understood to mean the price paid to a manufacturer, if procured from a manufacturer, completely equipped, ready to operate, including all parts of airplanes and accessories used therein except the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors and reduction gears, and if such airplane is built or manufactured by the Government the cost shall be the amount expended in the direct construction thereof, including the cost of materials entering therein completely equipped ready to operate including all parts of airplanes and accessories used or useful therein, except the engine and such engine accessories as propellers, propeller hubs, super-chargers, starters, magnetos, mufflers, carburetors and reduction gears.

The Government agrees to pay said royalties for use of the inventions described in any and all of said patents until the maximum payments provided for in the Amended Cross-License Agreement shall have been made or until Patent No. 1,203,550 shall expire, on the 31st day of October 1933, after which the Government shall enjoy the license herein conveyed and granted without the payment of any further royalties.

The word "use" as employed herein shall be held to include the manufacturing of planes by the Government or through the procurement of the Government or the purchases by the Government of planes from others.

3. For the purpose of carrying out the above, the Government shall on the tenth day of April, July, October, and January in each year make reports to the Association of the number of planes manufactured or otherwise acquired by its War and Navy Departments during the preceding three months.

Upon receipt of each report the Association shall forthwith render invoices to said Departments in accordance with said reports and the terms and provisions of Paragraph 2 of this contract. The Government agrees to receive such invoices and to authorize and instruct its disbursing officers to make payments accordingly.

Payments under this contract shall be made to the Association and when payments are so made and received, they shall constitute and be accepted for and on behalf of the owners of the patents by the Association as full and complete compensation as to the airplanes to which they apply for licenses to use any and all of the said patents as set out hereinbefore.

The Association shall disburse and account for each of such payments in precisely the same manner as if the same had been made to the Association under the Cross-License Agreement by a Subscriber thereto and as if the royalty for each plane had been received from a Subscriber by the Association at the time when such plane was acquired by the Government.

Digitized by Google

The Association shall furnish to officers of the Government, when required, a statement by a certified public accountant of the total amount of royalties paid by it to each of the owners of the patents under the Cross-License Agreement and the Amended Cross-License Agreement, and when the maximum payments provided thereunder for the owners of the patents have been completed, no further payment of royalties on the part of the Government shall be demanded or paid.

4. The Government shall have the right to terminate this contract by serving a written notice upon the Association at least five days before the beginning of each additional year; but in the absence of such action it is agreed that the provisions thereof shall be automatically renewed and continue in force until such notice shall be served or the contract shall be terminated in accordance with the other provisions thereof; provided that, if upon demand by the United States to the Association and owners of the patents, the owners of the patents fail for ninety days to bring suit to enforce the rights of the patents herein licensed, all liability to pay royalties shall cease thereafter and until such suit is brought.

5. The Government does not admit, and is not to be understood as admitting, by virtue of the license hereunder, the validity of any of said Letters Patent heretofore or hereafter issued and is to be held free to dispute the validity of each and any of them in case the public interest should so require, save that this provision shall not be construed to give it any right, if such right be now otherwise lacking, to dispute validity in connection with any claims growing out of past operations under previous formal, informal, or implied contracts.

6. Any department, bureau, or independent establishment of the Government, not signatory hereto, may avail itself of the license herein granted upon the same terms as the War and Navy Departments upon written notice to the Association of its intention so to do, and by paying the royalties prescribed herein and otherwise complying with the terms hereof.

7. No Senator or member or delegate to Congress, officers of the Army or the Navy, nor any person holding any office or appointment under the Army or the Navy Department, is or shall be admitted to any share or part of this contract or to any profits that may arise therefrom, but this provision shall not be construed to extend to stockholders of the Manufacturers' Aircraft Association or any Subscriber thereto.

Form No. 2.

PATENT LICENSE

License, granted this _____ day of _____ 19__, by _____ _____ (hereinafter called the Licenors), to _____ _____ (hereinafter called the Licensee).

Whereas the Licensors and certain other stockholders of the Manufacturers Aircraft Association, Inc., (hereinafter called "Subscribers") heretofore entered into a certain agreement dated July 24, 1917, known as the Cross-License Agreement and/or having entered into an Amended Agreement, entitled "The Amended Cross-License Agreement of December 31, 1928", wherein and whereby the Licensors agreed to grant certain licenses to the other "Subscribers" to said agreement, and

Whereas both said Cross-License Agreement and said Amended Cross-License Agreement authorized and empowered the Manufacturers Aircraft Association, Inc., as the agent for and attorney in fact of the Licensors, to make, execute, and deliver such licenses in the name of the Licensors, and

Whereas certain licenses have been issued to the Licensee herein under patents heretofore reported to the Associatiton by Subscribers, and additional

patents having been subsequently reported by Subscribers to said Association, it is now desired to issue licenses thereunder to the Licensee;

Now, therefore, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensors do hereby give and grant unto the said Licensee, the unrestricted but non-exclusive license to make, use and sell airplanes under the patents described in Schedule "A __", hereto annexed and made a part thereof, in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes.

2. This license shall run to the full end of the term of the Letters Patent under which it is granted, and shall be personal, indivisible, nonassignable, and irrevocable, except for the causes and in the manner set forth in said Amended Cross-License Agreement.

3. This License is made subject to all the terms, conditions, covenants and agreements contained in said Amended Cross-License Agreement, which is made a part hereof with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this license to be executed as of the day and year first above written.

SCHEDULE A

Name of licensor and patent no.	Issue date	Title of invention

(License Form No. 3—After-acquired patents granted royalty compensation)

PATENT LICENSE ISSUED PURSUANT TO AWARD OF ROYALTY COMPENSATION BY BOARD OF ARBITRATION NO. —

LICENSE, granted this_____day of_____, by_____ _____(hereinafter called the Licensor), to_____ _____(hereinafter called the Licensee).

Whereas the Licensor and certain other stockholders of the Manufacturers Aircraft Association, Inc. (hereinafter called Subscribers), heretofore entered into a certain agreement, dated July 24, 1917, known as the Cross-License Agreement and/or entered into an Amended Agreement, entitled "The Amended Cross-License Agreement of December 31, 1928", wherein provision is made for the cross-licensing of airplane patents owned or controlled by Subscribers, and

Whereas both said Cross-License Agreement and said Amended Cross-License Agreement authorize and empower the Manufacturers Aircraft Association, Inc., as the agent and attorney in fact of the Subscribers, to make, execute, and deliver such licenses in the names of the Licensors, and

Whereas, in reporting to said Association the patents hereinafter described, the Licensor claimed compensation under Article V of said Cross-License Agreement or said Amended Cross-License Agreement for the issuance of licenses

Digitized by Google

thereunder to other Subscribers, and the use by them of the inventions covered by said patents, and

Whereas, a Board of Arbitration was duly constituted in the manner provided for in said Agreements which, after considering the claims of the Licensor on the patents hereinafter described, rendered its award thereunder providing for the payment by Subscribers of the royalties hereinafter set forth.

Now, therefore, this license witnesseth: That for and in consideration of the premises and other good and valuable considerations moving between the parties hereto, it is covenanted and agreed as follows:

1. The Licensor does hereby give and grant unto the Licensee a non-exclusive license to make, use, and sell airplanes under the following described patents in and throughout the United States, its territories and dependencies, for use therein or abroad, except that no rights, express or implied, are hereby granted under any foreign patents, nor shall the licenses herein provided for, apply to or include the use of said patents in their application to other than airplanes:

No. _____ Issue Date _____ Title _____

2. This license is effective from the issue dates of the patents hereinbefore described, unless otherwise herein provided, and shall run to the full end of the terms thereof. It is personal, indivisible, non-assignable, and irrevocable, except for the causes and in the manner set forth in said Amended Cross-License Agreement.

4. This license is subject to all the terms, conditions, covenants, and stipulations contained in said Amended Cross-License Agreement, which is made a part hereof, with the same force and effect as if herein set forth at large.

In Witness Whereof, the parties hereto have caused this license to be executed as of the day and year first above written.

KEYSTONE AIRCRAFT CORPORATION,
New York, N. Y., December 6, 1935.

HON. WILLIAM I. SIROVICH,
Chairman, House of Representatives, Committee on Patents,
Fifth Avenue Hotel, 24 Fifth Avenue,
New York, N. Y.

DEAR SIR: There is submitted herewith, in behalf of Keystone Aircraft Corporation, answer to the questionnaire contained in your letter of November 9, 1935.

Very truly yours,

KEYSTONE AIRCRAFT CORPORATION,
By E. S. CRAMER, *Agent.*

KEYSTONE AIRCRAFT CORPORATION

Keystone Aircraft Corporation was legally dissolved September 28, 1934. It accordingly owns no patents, makes use of no patents, is licensed under no patents, and is not now a party to any cross-licensing or patent pooling agreement. All patents previously owned by Keystone Aircraft Corporation were assigned to Curtiss Aeroplane & Motor Co., Inc., November 18, 1933.

The above, it is believed, is a complete answer to the questionnaire dated November 9, 1935, sponsored by your committee.

Digitized by Google

CURTISS-WRIGHT CORPORATION,
New York, December 6, 1935.

HON. WILLIAM I. SIROVICH,
Chairman, House of Representatives, Committee on Patents,
Fifth Avenue Hotel, 24 Fifth Avenue,
New York, N. Y.

DEAR SIR: There is submitted herewith, in behalf of Curtiss-Wright Corporation, answer to the questionnaire contained in your letter of November 9, 1935.

Very truly yours,

CURTISS-WRIGHT CORPORATION,
By E. S. CRAMER, *Secretary.*

CURTISS-WRIGHT CORPORATION

Curtiss-Wright Corporation owns no patents, makes use of no patents, is licensed under no patents, is not now nor has it ever been a party to any cross-licensing or patent-pooling agreement.

The above, it is believed, is a complete answer to the questionnaire dated November 9, 1935, sponsored by your committee.

JANUARY 9, 1936.

Mr. V. J. BURNELLI,
Burnelli Aircraft, Ltd.,
Keyport, N. J.

MY DEAR MR. BURNELLI: Your very kind letter of recent date is hereby acknowledged. I would respectfully ask you to prepare any memoranda or brief that you desire regarding the aircraft situation as it affects your organization. If you will send it to me within the next week or two, I shall have it incorporated in the record of the patent-pooling hearings.

With every good and kind wish to you, I beg to remain,

Very sincerely yours,

WILLIAM I. SIROVICH.

BURNELLI AIRCRAFT, LTD.,
Keyport, N. J., December 28, 1935.

Hon. WILLIAM SIROVICH,
Chairman, Patent Committee, House of Representatives,
Washington, D. C.

DEAR DR. SIROVICH: We greatly appreciate the consideration you extended our associates and myself in connection with the hearings of your committee in New York. Its recommendations, beyond doubt, will have valuable effect in correcting known abuses and encourage more fair practice in the dealings between the government branches and the unentrenched or independent contributors also in industrial relations with invention and development which, in most cases, originates from new and unexpected sources.

While it is understandable for the strong to attempt to devour the week, based on our heritage of nature's laws, it is the duty of government to prevent the employment of this primitive instinct which clashes with present civilized order.

It is necessary to encourage the government branches to set a better example and in an unbiased way encourage and consider creative work beyond the limits fixed by patent pools and cross license clanishness. Also, the purpose and rights granted by a related branch of Government, the Patent Office, especially when backed by reduction to practice should be properly regarded and not treated as contributing only nuisance value from any source outside the circle.

Your advising us that the hearings are to be continued in Washington and that we will be granted ample time and consideration for such constructive suggestions as we may contribute, based on our timely and practical experience, is appreciated.

The attached photostat briefly applies notice regarding the broad phase of our situation based on our reduction to practice and patent position which applies to the most modern form of aircraft.

Under the old deal we had to face the harrassing issue that financial might was right, however, we have recently applied effective and thorough engineering and demonstrating effort to bring about government consideration of the

Digitized by Google

proven advancement, of our all-wing lifting fuselage type of design, for military service and anticipate fair decision.

Our firm has received no government contract work or assistance, or sold a share of stock to bring about proof of the advantages of our type which has been demonstrated on private means by the construction and operation of large airplanes of our type since 1920. During the early period our planes were among the largest commercial airplanes in the world.

Respectfully yours,

BURNELLI AIRCRAFT, LTD.,
V. J. BURNELLI, *Vice President.*

[Proof of advertisement for the January 1933 issue of Aero Digest]

THE ALL-WING PRINCIPLE OF AIR TRANSPORT DESIGN AS PIONEERED BY BURNELLI

The Burnelli transport, developed and refined over a period of years, has reduced to practice a new trend of airplane design. It provides the desired aerodynamic advancement to meet the growing demands of air transportation for increased safety, speed, and space.

The Burrelli design is based on the all-wing principle (an airfoil section with cargo space within and multi-engines at the entering edge) concerning which our extensive patent properties relate. The evolutionary advancement of the all-wing principle is readily discernible in the accompanying illustrations of development planes.

This program was begun with the RB–1, which incorporated the fundamentals of the future giant flying wing airplane, in part, by using a central airfoil body element with complementary supporting area. This permitted the founding of engineering and construction values with control and stability qualities on a preliminary test basis.

Enlargement in span and capacity would consequently permit usual wing proportions for the entire span, to provide required thickness to enclose power plant, useful load and other exposed elements within the lifting structure, with propellers directly forward. Thereby, with giant machines, the power required to overcome parasite resistance is saved and the load distributed over the span with consequent weight reduction.

In applying this principle to transport design of present size, the compromise now employed combines suitable accommodations with high aerodynamic efficiency. Excess chord and thickness are used for the center wing section with normal high efficiency sections for required wing surface.

The production application of this design, incorporating the stressed skin construction developed with the UB–20, will assist the economical advancement of air-transport design and construction. In operation, it will achieve the high aerodynamic efficiency for the finest single engine design combined with the greater power reliability and required size increase of the nacelle type. Other desirable safety, structural, and accommodation advantages are a direct result. The accessibility and ability of the duplex power installation, to permit satisfactory single engine flight, is a main design feature.

The following briefly covers opinion regarding consideration that should be applied to improving the aircraft patent situation.

Since the formation of the cross-license agreement of the N. A. A. during the war, based on the Wright airplane and Curtiss flying-boat patents including a mass of details contributed by other members, the Government branches apparently took it for granted that that was the source of all aircraft design patent rights for the past, present, and future. Through the Government's association with this group, indifference was applied to any patent affecting aircraft which was outside the circle. These tactics were practiced by the Government procurement branches and of course the members of the favored select circle which established their entrenched position under the distress of the war, reaped generous financial profits.

The fact that the Government formerly held the association members harmless from infringement in Government contracting required the Government to maintain patent department for the purpose of defending any possible claim or litigation that would be brought about through infringement by members on patented elements which were outside of the cross-license circle.

The Morrow board in 1926, following considerable pressure from certain independents, recommended that a board be appointed to encourage and determine new invention and consider infringement in connection with Govern-

Digitized by Google

ment work. This board to be composed of an Assistant Secretary of War, Assistant Secretary of Navy, and a member of the National Advisory Committee of Aeronautics, which organization has always been closely associated with the cross-license interests though supported by funds appropriated by Congress.

Hearings on the bill were intended to bring out suggestions and means to remedy the evil and give encouragement to outside invention and consideration to those who had been infringed on. The final bill contained provision to pay, not to exceed $75,000 for each patent infringed or which may be later bought by the Government. This small item, in a field where development cost may run into hundred of thousands of dollars, was apparently intended to destroy incentive and discourage capital interests from backing development work and new invention. The tendency has been for the Government branches, if possible, to refuse to have anything to do with patent devices, particularly regarding airplane design and construction. This of course is not in the spirit of Federal policies because the patent office is a sister branch of the Government and its purpose and functions should not be held in contempt and prejudiced by other Government branches.

The air procurement law of 1926 provides a clause, section K, which was intended to permit the Government to purchase new and patented designs of aircraft without requiring the design competition which was intended for procurement of standard types based on degree of engineering refinement. Instead of confining section K to patented products the wording was changed to cover proprietary rights and not the intended expression of patent rights. This change made it possible for the Government to give the majority of the contract work, under this clause, to the then-established groups and it was the generous interpretation of section K and proprietary rights that gave established firms a preferential position outside of patent law.

The Military Affairs Committee, since the present administration, brought out the unfairness of this procedure through hearings conducted by the aviation subcommittee and considered that the wording of section K be amended to specifically apply to patented products which could not be a subject of open bidding. This change would be to the fair interest of those who contribute to aviation invention and advanced development upon which progress depends. The Government could encourage same by awarding an experimental contract instead of being in a position opposed to patent rights or at least inclined to discount the other then nuisance aspects of same.

The Government should set a good example in this regard as the Patent Office is a related institution and provides considerable Federal income in contrast to the deficit incurred by the others.

Substitute License Agreement (B2) Between General Electric Co. and American Telephone & Telegraph Co., and Agreements Relating Thereto

Substitute License Agreement (B2) Dated July 1, 1932, Between General Electric Co., and American Telephone & Telegraph Co.

Agreement dated July 1, 1932, between General Electric Co., a New York Corporation (herein called the General Company), and American Telephone and Telegraph Co., a New York corporation (herein called the Telephone Company).

Whereas the parties hereto heretofore entered into an agreement made the first day of July 1920, generally known as Agreement "B", which was subsequently modified by an agreement dated July 1, 1926, generally known as "Modified Agreement B", and

Whereas it is now the mutual desire of the parties to substitute therefor this agreement and the licenses herein granted.

Now, in consideration of the premises and the mutual agreements herein contained, the parties agree each with the other as follows:

Article I. Termination of Existing Agreements and Licenses

The said agreements of July 1, 1920, and July 1, 1926, generally known as Agreement B and Modified Agreement B, respectively, and all licenses therein granted and agreed to be granted are hereby terminated as of the

Digitized by Google

date hereof, and this agreement and the licenses herein granted and agreed to be granted are substituted therefor.

ARTICLE II. DEFINITIONS

For the purposes of this agreement the following terms are defined as follows:

"*Wire telephony*" is the art of communicating or reproducing sound waves (created, directly or indirectly, by the voice or by musical instruments) by means of electricity, magnetism, or electro-magnetic waves, variations, or impulses conveyed or guided by wires, and includes all generating, measuring, switching, signaling, and other means or methods incidental to or involved in such communication.

"*Wireless telephony*" has the same meaning as "wire telephony", except that the waves, variations, or impulses are radiated through space.

"*Wire telegraphy*" is the art of communicating messages by code signals (such as the Morse Code, for example), and of picture transmission, by means of electricity, magnetism, or electro-magnetic waves, variations or impulses conveyed or guided by wires, and includes all generating, measuring, switching, signaling, and other means or methods incidental to or involved in such communication, but does not include such devices as annunciators, elevator signals, engine-room telegraphs, etc.

"*Wireless telegraphy*" has the same meaning as "wire telegraphy", except that the waves, variations, or impulses are radiated through space.

"*Picture transmission*" is the art of transmitting, or receiving at another point than the point of transmission, by means of electricity, magnetism or electro-magnetic waves, variations or impulses, the aspect or shape of things, including pictures, whether still or moving, drawings, writings, forms, and other graphic, printed and written matter of all kinds; and includes television.

"*Programs*" means pictures, news, music, speeches, sermons, advertising, and entertainment, educational, and similar matter, or any of them or combinations of any of them, for the purpose of exhibition, entertainment, or instruction.

"*Power purposes*" means all prime movers and their accessories and all generation, use, measurement, control, and application of electricity for light, heat, power, and traction, but does not include any communication purpose.

"*Public address system*" means a combination including one or more telephone transmitters, an electrical amplifier or amplifiers and one or more loud speaking telephone receivers, either adjacent to said transmitters or at a distance therefrom, operating by one-way wire telephony for the reproduction of sound with increased volume, but does not include apparatus for (1) wireless telephone reception, or (2) reception of programs over electric light, electric heat, electric power, or electric traction lines, or (3) the production or reproduction of sound from sound records.

"*Phonographs*" means all apparatus for the reproduction of sound from sound records used in or in connection with such apparatus, to be heard in the immediate vicinity of the apparatus, but does not include apparatus for the transmission to, or reception at, other points of sound reproduced from such records.

"*Electric Phonograph*" means a phonograph in which the sound record used therein gives rise to or controls an electric current or electro-motive force in such a way that the variations of the electric current or electro-motive force correspond in some way to the recorded sounds, and the electric current or electro-motive force directly or indirectly brings about the production of the sound from the phonograph.

"*Transoceanic*" communication means all communication which crosses any ocean, gulf, or sea between two continents, or between a continent and an island more than one hundred miles from its shores (islands within one hundred miles of the shores of a continent being considered parts thereof), or between two islands which are not parts of the same continent, except that communication between ships or aircraft, between ships and aircraft, or between ships or aircraft and shore, and communication between parts of the same continent, is not transoceanic communication. North America, including the Panama Canal Zone and all of Central America north thereof, is to be considered as one continent, and South America and all of Central America south of the Panama Canal Zone as another.

"*The United States Government*" means not only the Federal Government but also the Governments of the Philippines, Porto Rico, and other Federal

Digitized by Google

possessions, present or future; but does not include any municipal, county, or State government.

"*Train dispatching*" is telegraphic or telephonic conveyance of tran orders or operating information between the office of a train dispatcher or similar official and railway trains or other automotive land vehicles (not including airplanes or airships), or points along the line of way for directing the movements of such automotive vehicles.

"*Railway signalling*" is the operation of signals, switches, brakes, stops, crossing gates, etc., controlling or signalling the movements of trains or other automotive vehicles, controlled by or in accordance with train or vehicle movements or track conditions, including block signalling, cab signals, and train stops. It does not include train dispatching.

"*Apparatus*" includes machines, devices, and appliances and the materials entering into the construction thereof.

"*Household devices*" are electric or electrically operated apparatus, not herein otherwise specified, designed primarily for domestic use, but do not include apparatus for communication purposes.

"*Homes*" means all places of residence, permanent or temporary, including, however, as to hotels, hospitals, and clubhouses only the private living rooms thereof.

"*Amateur*" means one, not a professional investigator, who is more than a mere broadcast listener and who evidences his interest in the art of wireless telephony by study, investigation, or experiment in the art.

"*Printing telegraph apparatus*" means, and is limited to, mechanisms and devices for use in telegraphy, whether wire or wireless, whereby electrical signals corresponding to the characters of a message—

(*a*) are created in an electric circuit by the operation of a manual device upon which such characters are represented, or by the operation of an automatic transmitter controlled by a tape or other record having holes or other marks corresponding respectively to the characters of the message impressed thereon by the operation of such manual device, and/or

(*b*) are utilized to cause said characters to be successively recorded or displayed (directly or through storage means) in typed or other form, or are utilized to select successively devices or elements corresponding to said characters, and/or

(*c*) are sequentially distributed or delivered by the apparatus referred to in clause (*a*) to a transmission channel, (such as a wire circuit, carrier-current circuit, or radio apparatus) or from a transmission channel to the apparatus referred to in clause (*b*);

but this definition does not include the transmission channel or any apparatus, circuits, systems, or methods for electrical transmission or reception the functions of which are distinct from those of the apparatus referred to in clauses (*a*), (*b*), or (*c*) hereof, nor any mechanism or devices for enabling automatic comparison of sequential repetition of said signals or records thereof; and this definition does not include any apparatus for "picture transmission" as herein defined.

"*Subsidiaries*" of either party are corporations a majority of whose stock having power to vote for the election of directors is owned, directly or indirectly, either by such party, or by such party and one or more of its other subsidiaries, or by one or more of its other subsidiaries. The party hereto so controlling, directly or indirectly, any subsidiary is herein called the "*parent company*" of such subsidiary.

"*Companies of the Bell System*" are those companies which, in connection directly or indirectly with the Telephone Company, provide a telephone service throughout the United States, or from the United States to foreign countries. These companies at present comprise the Telephone Company, Western Electric Company, Incorporated, Cuban American Telephone and Telegraph Company, and the so-called Associate Companies and Connecting Companies, and the several subsidiaries of each of said Companies.

Any dispute arising as to the meaning or application of the foregoing definitions shall be settled by arbitration, as hereinafter provided.

ARTICLE III. THE PATENTS INCLUDED IN THIS AGREEMENT

The licenses provided for herein are granted and agreed to be granted under all patents, and rights to or under patents, of the United States now or hereafter during the term of this agreement owned or controlled by the parties

Digitized by Google

hereto, and under all such patents hereafter issued upon inventions now or hereafter during said term so owned or controlled, and to the extent to which the parties have or may have the right to grant licenses, insofar as the inventions covered by such patents are or shall be applicable to the respective fields for which said licenses are expressed as granted or to be granted, excepting (1) as otherwise specified in connection with the several grants hereinafter contained, and (2) such patents and inventions as may hereafter be excluded from the operation of this agreement in the following manner:

Each party agrees to furnish to the other, upon request, a list of all United States patents under which said other party is entitled to receive licenses hereunder. Such lists shall separately identify those patents, and shall also include those applications, as to which rights, if granted hereunder, would be restricted in scope or would involve continuing obligations not implied by law. Copies of all contracts creating such restrictions or obligations shall, upon request, be furnished by each party to the other. Thereupon, and within six months after the receipt of the lists to be furnished as aforesaid, each party may in writing advise the other as to the patents and applications described in such list, furnished by the other, which (or the patents to issue on which) it desires to exclude from this agreement; and no licenses are granted by this agreement under any patents so excluded.

ARTICLE IV. SCOPE OF LICENSES

1. All of the licenses herein granted are, unless otherwise expressed in connection with the several grants, licenses to use methods and processes, and to make, use, sell, lease, or otherwise dispose of apparatus and systems in the fields in which the licenses are granted.

2. A license to make apparatus includes a license to have such apparatus manufactured for the licensee by others, except that no rights are granted to either party to manufacture or to have manufactured, under patents under which it receives licenses hereunder, apparatus of the character at the time manufactured by the other party, except in factories owned or operated by one or the other of the parties hereto, or by their subsidiaries, without the written consent of the party granting such licenses.

3. Every license herein granted to either party includes, unless otherwise herein provided, all incidental rights necessary to the full enjoyment and exercise of the license granted, notwithstanding that such incidental rights may lie primarily in a field in which the said party is not herein expressly granted a license.

4. The making, using, selling, leasing, or otherwise disposing of parts is subject to the same restrictions and conditions as are applicable under this agreement to apparatus of which they are or may be parts.

ARTICLE V. RESERVATIONS AND EXCEPTIONS TO WHICH THE LICENSES ARE SUBJECT

1. No licenses are granted by either party with reference to the manufacture or sale of wire or cable for the transmission of electric current for light, heat, traction, or other power purposes, or for telephone or telegraph purposes.

2. No licenses are granted to the Telephone Company for electric lamps or other lighting apparatus (except non-exclusive licenses with reference to telephone and telegraph signal lamps and telephone and telegraph ballast lamps for use solely in fields in which the Telephone Company is otherwise licensed under this agreement).

3. The licenses herein granted to the Telephone Company, in so far as they cover rights to sell or lease carrier current, wireless, or vacuum tube apparatus for use on electric railroads, are limited to sales or leases of said apparatus to the railroads.

4. Wherever in this agreement either party receives from the other a license with the right to license others, such party shall have the right to release others for past infringement in the fields for which it receives such licenses and to retain for itself all considerations paid to it on account of such past infringements.

ARTICLE VI. LICENSES GRANTED

Subject to the foregoing reservations, each party grants and agrees to grant to the other the following licenses in the following fields of use:

1. *Government Uses.*—Each party grants to the other non-exclusive licenses to make for, and sell or lease to, the United States Government wireless apparatus and systems.

Digitized by Google

2. *Wireless Telegraphy.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of wireless telegraphy for combined wireless telephone and telegraph sets for use on ships; except that where such combined sets are for use on ocean-going and coast-wise ships of American registry (excluding harbor tug-boats and other harbor craft), said licenses are only to manufacture; and the Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, to use, lease, or sell or otherwise dispose of, but not to manufacture such sets. The Telephone Company agrees, upon request, to make such sets and sell them for such use to the General Company upon reasonable terms.

(*b*) The General Company grants to the Telephone Company non exclusive licenses in the field of wireless telegraphy to make and use (but not to sell, lease, or otherwise dispose of, except to Companies of the Bell System), apparatus and systems for its own communication or that of Companies of the Bell System, and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement, but not for transmission of messages for the public except temporarily in emergencies due to storms or other catastrophes.

(*c*) The General Company grants to the Telephone Company non-exclusive licenses in the field of wireless telegraphy to make and use (but not to sell, lease, or otherwise dispose of, except leases to subscribers in connection with a service given by Companies of the Bell System in this paragraph described) apparatus and systems for the purpose of giving within the continental United States, and between the continental United States and other parts of continental North America, a business, commercial, or official service limited to a particular customer or class of customers and analogous to the service given by Companies of the Bell System by wire telegraphy at the date of this agreement, commonly designated as leased wire or special contract service, but said licenses do not include the making or using of such apparatus for (1) transmission or reception for the public generally or (2) transoceanic communication or (3) transmission or reception of programs.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses in the field of wireless telegraphy to make and use (but not to sell, lease, or otherwise dispose of, except to Companies of the Bell System) apparatus and systems for television for use solely in combination with apparatus and systems for two-way telephony for the purpose of giving a public service combining television and speech, but said licenses do not include the making or using of such apparatus for transmission or reception of programs.

(*e*) The General Company grants to the Telephone Company non-exclusive licenses in the field of wireless telegraphy for combined wireless telephone and telegraph sets, other than sets for transoceanic communication, (1) for use in communication by, with, and between airplanes, airships, and other automotive devices other than ships and railway vehicles, and (2) for export from the continental United States for use for any purpose other than transoceanic communication.

(*f*) The Telephone Company grants to the General Company: (1) exclusive licenses, including the right to grant licenses to others, in the field of wireless telegraphy for purposes of public service communication, subject, however, to non-exclusive rights which the Telephone Company reserves for itself and its present and future subsidiaries under its and their patents to make, use, and sell in said field and to grant to the United States Government licenses to make and to have made for it and to use apparatus for such purposes; and (2) non-exclusive licenses, including the right to grant non-exclusive licenses to others, for all other purposes in the field of wireless telegraphy other than the purposes covered by paragraph (a) of this section 2 and by section 8 of this Article VI.

(*g*) The General Company grants to the Telephone Company non-exclusive licenses for printing telegraph apparatus for use in the fields of wire and wireless telegraphy.

(*h*) The Telephone Company agrees that printing telegraph apparatus manufactured by Teletype Corporation (which is a subsidiary of Western Electric Company, Incorporated), shall be sold by Teletype Corporation to the General Company, upon the basis defined in Article X hereof, for use only within the fields for which licenses are herein granted to the General Company. The

Digitized by Google

Telephone Company agrees that Teletype Corporation will grant to the General Company, under patents and inventions owned or controlled by the Teletype Corporation (so far as and to the extent that Teletype Corporation has the right, in view of its existing obligations, to grant such licenses) licenses of the same character and scope as the licenses herein granted by the Telephone Company to the General Company, except that no licenses are agreed to be granted with respect to printing telegraph apparatus under any patents or inventions of the Teletype Corporation; and the General Company agrees that all non-exclusive rights and licenses granted to or reserved by the Telephone Company hereunder may be extended by the Telephone Company to the Teletype Corporation.

(*i*) The licenses granted to the General Company in this section 2 do not cover the use of wireless telegraph stations for giving a telephone service, except as licensed in section 4 of this Article VI.

3. *Wire Telegraphy.*—(*a*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of wire telegraphy for the transmission and reception of programs over electric light, electric heat, electric power, and electric traction lines, subject, however, to the provisions of paragraph (*b*) of section 5 of this Article VI regarding electrical interference.

(*b*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telegraphy to make (but not to sell, lease, or otherwise dispose of), apparatus and systems, and (1) to use such apparatus and systems for its own communication and for use sole'y as an incidental facility in fields in which it is otherwise licensed under this agreement, and (2) to use (but not to furnish to others) such apparatus and systems upon wire telegraph systems owned by it, or leased to it for its operation (other than transoceanic cables), for all purposes other than giving a service by wire telegraphy analogous to the services given by the Companies of the Bell System by wire telegraphy at the date of this agreement, commonly designated as leased wire service, special contract service or teletypewriter exchange service, and other than train dispatching; but no licenses are granted with reference to transoceanic wire telegraphy.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telegraphy for apparatus and systems for communication only in connection with the operation of apparatus for power purposes, but not for transmission of messages for the public.

(*d*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telegraphy for apparatus and systems for communication between parts of a train (without regard to the nature of the motive power thereof), or between trains following or approaching each other upon the same system of tracks, or between trains approaching a cross-over or junction point of the systems of tracks upon which they are running, or between trains and signal towers or way-stations within short distances thereof, but in each instance only for use in connection with the operation of such trains but not for train dispatching.

(*e*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for all purposes in the field of wire telegraphy (other than that covered by paragraph (*a*) of this section 3) on land, and over ocean cables not more than one hundred miles in length, and between the main body of the United States and Cuba; but no licenses are granted with reference to other transoceanic wire telegraphy.

4. *Wireless Telephony.*—*A. In General.*—(*a*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wireless telephony to make and use (but not to sell, lease, or otherwise dispose of) apparatus and systems for its own communication and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement, but not for transmission of messages (as distinguished from programs) for the public except temporarily in emergencies due to storms or other catastrophes.

(*b*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others in the field of amateur wireless telephony; and the General Company grants to the Telephone Company non-exclusive licenses to make and sell apparatus in the field of amateur wireless telephony limited as hereinafter in this paragraph (*b*) provided. The licenses by this paragraph (*b*) granted by the Telephone Company to the General Company shall be free of royalties, but all apparatus

Digitized by Google

sold by the Telephone Company under the licenses granted by this paragraph (*b*) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of paragraph (*d*) of subdivision C of this section 4 and shall be governed by all the provisions of said paragraph (*d*).

(*c*) Each party grants to the other non-exclusive licenses for headphones for all purposes in all fields covered by this agreement; provided, however, that headphones sold by the Telephone Company as part of complete apparatus for one-way wireless telephone reception of programs shall be included in the determination of the royalties payable by the Telephone Company under the provisions of paragraph (*d*) of subdivision C of this section 4.

(*d*) Each party grants to the other non-exclusive licenses in the field of wireless telephony for apparatus and systems for communication only in connection with the operation of apparatus for power purposes, but not for transmission of messages for the public.

(*e*) Each party grants to the other non-exclusive licenses in the field of wireless telephony for apparatus and systems for communication between parts of a train (without regard to the nature of the motive power thereof), or between trains following or approaching each other upon the same system of tracks, or between trains approaching a cross-over or junction point of the systems of tracks upon which they are running, or between trains and signal towers or way-stations within short distances thereof, but in each instance only for use in connection with the operation of such trains but not for train dispatching.

B. *Two-way wireless telephony.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of two-way transoceanic wireless telephony to make and use (but not to sell, lease, or otherwise dispose of), apparatus and systems for use in the continental United States; but such licenses do not include use for transmission or reception of messages offered for telephonic transmission.

(*b*) The General Company grants to the Telephone Company non-exclusive licenses in the field of two-way transoceanic wireless telephony, to make and sell to stations outside the continental United States engaged in cooperation with the Telephone Company in giving for the public a transoceanic telephone service, apparatus for use in giving such service; and the Telephone Company grants to the General Company non-exclusive licenses including the right to grant non-exclusive licenses to others in the field of two-way transoceanic wireless telephony for apparatus for export from the continental United States.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses in the field of two-way wireless telephony for combined wireless telephone and telegraph sets, other than sets for transoceanic communication, (1) for use in communication by, with, and between airplanes, airships, and other automotive devices other than ships and railway vehicles, and (2) for export from the continental United States for use for any purpose other than transoceanic communication.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of two-way wireless telephony (other than in the field of transoceanic wireless telephony) for all purposes other than the purposes covered by subdivision A of this section 4.

(*e*) The licenses granted to the Telephone Company in this subdivision B do not include the use of wireless telephone stations for giving a telegraph service, except as licensed in section 2 of this Article VI.

C. *One-way wireless telephony.*—(*a*) Each party grants to the other non-exclusive licenses in the field of one-way wireless telephony for apparatus and systems for the purpose of giving a business, commercial, or official service limited to a particular customer or class of customers; but the licenses granted to a particular customer or class of customers; but the licenses granted by this paragraph (a) do not include the making or using of such apparatus for (1) transmission or reception of messages for the public generally or (2) transmission or reception of programs; and the licenses granted to the Telephone Company with respect to transmission for the purposes covered by this paragraph (*a*) include only apparatus for the transmission of such service from and within the continental United States.

Digitized by Google

(*b*) Each party grants to the other non-exclusive licenses in the field of one-way wireless telephony for apparatus and systems for use for transmitting for purposes other than that covered by paragraph (*a*) of this subdivision C, including, however, apparatus for wireless telephone reception furnished as a part of the equipment of transmitting stations; but the licenses granted by this paragraph (*b*) do not include apparatus in the field of amateur wireless telephony.

(*c*) The General Company grants to the Telephone Company non-exclusive licenses to make and use (but not to sell, lease, or otherwise dispose of, except to Companies of the Bell System), apparatus for one-way wireless telephone reception (including apparatus for the reception of programs), for its own communication or that of Companies of the Bell System, and for use solely as an incidental facility in fields which it is otherwise licensed under this agreement.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses for apparatus for one-way wireless telephone reception of programs; provided, however, that the licenses granted in this paragraph (*d*) shall be subject to the following terms and limitations:

(1) Tubes (thermionic devices) sold as separate devices for use in apparatus covered by this paragraph (*d*), or in apparatus which under other provisions of this agreement shall be treated as apparatus covered by this paragraph (*d*), shall be to the amount of $1,000,000 free of royalties during each calendar year, and said tubes in excess of said amount in any year shall be subject to a royalty of five percent computed as hereinafter provided; but no licenses are granted in this paragraph (*d*) for tubes in excess of $2,000,000 in amount or 1,000,000 in number during any calendar year; and provided further that where said tubes are sold as parts of receiving sets or other complete units designed for operation with such sets, such tubes shall be treated as parts of the receiving set or other unit and shall not be classified under this subparagraph (1).

(2) Receiving sets and apparatus which under other provisions of this agreement shall be treated as apparatus covered by this paragraph (*d*), or parts thereof (including loud speakers, amplifiers, and tubes other than thermionic devices), shall be to the aggregate amount of $1,500,000 free of royalty in each calendar year, and such sets, apparatus, or parts in excess of said amount shall be subject to a royalty of five percent computed as hereinafter provided; but no licenses are granted in this paragraph (*d*) for receiving sets, apparatus, and parts in excess of $3,000,000 in amount in any calendar year, provided, that if the sales of tubes sold as separate devices amount to less than $2,000,000 during any year, the amount of such deficiency shall be added to the amount of receiving sets, apparatus, and parts which may be sold under the license granted in this paragraph (*d*).

(3) For any portion of the first or last calendar year of this agreement, less than an entire calendar year, during which royalties shall be payable hereunder, the amounts which may be sold free of royalty and subject to royalty respectively shall be those proportions of the amounts which may be sold free of royalty and subject to royalty respectively in the entire calendar year which said fractional part of a calendar year bears to a calendar year.

(4) The aforementioned amounts sold free of royalty, and the amounts subject to royalty, shall be based on the price at which the apparatus is sold by the manufacturer thereof, before cash discount, freight and advertising allowance or other similar deductions.

(5) Sales for export shall be included in determining the amounts sold free of royalty, and the amounts subject to royalty, on the basis of the price at which the sale is made.

(6) In ascertaining the amount of the sales which are free from royalty and the amount of the sales upon which royalties are to be paid hereunder, where apparatus is sold any part of which embodies any invention of any of the patents in force at the time of such sale under which licenses are granted in this paragraph (*d*), the selling price of the apparatus sold shall be taken as the basis; but apparatus not covered by any of said patents when sold not assembled for operation with apparatus covered by such patents, shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty, unless such apparatus not covered by such patents is adapted for operation with

Digitized by Google

apparatus covered by such patents and is sold in such manner that its sale or its use in connection with apparatus covered by such patents would, except for the licenses granted by this paragraph (*d*), constitute contributory infringement of the patents under which such licenses are granted. Where radio receiving sets are sold for use in combination with public address apparatus or other apparatus not subject to royalties under this agreement, the sale price of the public address or other apparatus shall not be included in the amount of the sales which are free from royalty or the amount of the sales which are subject to royalty. Chemical primary batteries, wet or dry, and chemical storage batteries, not sold as part of apparatus upon which royalties are payable hereunder, or wiring in a building in connection with a sale of such apparatus, shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty.

(*e*) The Telephone Company grants to the General Company nonexclusive licenses, including the right to grant nonexclusive licenses to others, for apparatus and systems for one-way wireless telephone reception of programs.

(*f*) Subdivision A of this section 4 and paragraphs (*a*) to (*e*), inclusive, of this subdivision C are intended to make provision for all anticipated fields of use of apparatus for one-way wireless telephone reception. If it should develop that there are other fields of use of such apparatus not covered herein licenses shall be granted in such other fields of use to the respective parties in accordance with the principle underlying said other paragraphs of this subdivision C, with special reference to the interest of the General Company in the field of one-way wireless telephone reception of programs, on th one hand, and of the Telephone Company in the field of one-way wireless telephone reception for giving a service of a business, commercial or official nature, on the other hand. If the parties can not agree with respect to such licenses, their respective rights shall be determined by arbitration in accordance with the provisions of Article XIII.

5. *Wire Telephony.*—(*a*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, and the General Company grants to the Telephone Company non-exclusive licenses, in the field of wire telephony for apparatus for carrier current telephone communication, both one-way and two-way, over electric light, electric heat, electric power, and electric traction lines, or partly over such lines and partly across wireless gaps, but in each instance only for the use of the owner or operator of such lines in the business of such owner or operator, and not for transmission of messages for the public except temporarily in emergencies due to storms or other catastrophes.

(*b*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of one-way wire telephony for apparatus for the transmission and reception of programs over electric light, electric heat, electric power and electric traction lines including the use of such lines for pick-up lines or for connecting two or more separate electric systems in connection with the transmission or reception of programs over such lines or by means of wireless telephony, but not including the use of other wires for such purposes except as licensed in paragraph (*c*) of this section 5; provided, however, that no apparatus is licensed under this paragraph (*b*), or under paragraph (*a*) of section 3 of this Article VI, the use of which would electrically interfere unreasonably with the Telephone Company's systems of wire communication for which it is licensed under this agreement, as the same may now exist or may hereafter normally be developed, or with any system of the Telephone Company for transmitting programs by wire telephony over lines other than electric light, electric heat, electric power, and electric traction lines, where such system exists prior to the installation in the same locality by the General Company of apparatus licensed under this paragraph (*b*), and the Telephone Company shall be the sole judge of the existence of such unreasonable interference. The Telephone Company agrees whenever requested by the General Company, but at the expense of the General Company consented to by it before being incurred, to co-operate with the General Company in every reasonable way to enable the General Company to develop apparatus within the licenses granted by this paragraph (*b*) which will avoid such electrical interference.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony, both one-way and two-way, to make (but not to sell, lease, or otherwise dispose of) apparatus and systems, and

Digitized by Google

to use such apparatus and systems solely upon systems owned by it, for its own communication and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement, but not for transmission of messages (as distinguished from programs) for the public except temporarily in emergencies due to storms or other catastrophes. The Telephone Company agrees to furnish to the General Company, when requested, pick-up or connecting wires, if available, for its use in the transmission of programs to or from its stations for such transmission either by means of wireless telephony or over electric light, electric heat, electric power, and electric traction lines, or for its use in electrical sound recording, on terms at least as favorable as the terms given to others than the General Company, and agrees that in furnishing such pick-up and connecting wires for such service there shall be no discrimination against the General Company.

(d) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony for apparatus for the distribution, to an assembled audience, or to rooms within a building or a group of substantially adjacent buildings commonly owned or operated, or to rooms within a ship, airship or train, of matter from apparatus for one-way wireless telephone reception, or from apparatus for reception in the field covered by paragraph (*b*) of this section 5, or from phonographs, in each case located in the immediate vicinity of such audience or within the building or group of buildings, ship, airship, or train within which such distribution is made.

(*e*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony, both one-way and two-way, for apparatus and systems for communication only over wires used in connection with apparatus for remote control or actuation of apparatus for power purposes and only in connection with the operation of apparatus for power purposes, but not for transmission of messages for the public.

(*f*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony, both one-way and two-way, for apparatus for communication between parts of a train (without regard to the nature of the motive power thereof), or between trains following or approaching each other upon the same system of tracks, or between trains approaching a cross-over or junction point of the systems of tracks upon which they are running, or between trains and signal towers or way-stations within short distances thereof, but in each instance only for use in connection with the operation of such trains but not for train dispatching.

(*g*) The General Company grants to the Telephone Company nonexclusive licenses, including the right to grant non-exclusive licenses to others, in the field of wire telephony, both one-way and two-way, for all purposes other than for the purposes covered by the paragraphs (*a*) and (*b*) of this section 5; provided, however, that the licenses granted by this paragraph (*g*) for apparatus for reception of programs in connection with a service of transmitting programs by wire telephony (analogous to wireless broadcasting) over lines other than electric light, electric heat, electric power and electric traction lines, are licenses only to make and use, to lease to subscribers to such a service, and to sell only at retail (except as to sales for export) either directly or through the Telephone Company's own direct agents, and said licenses are subject to the condition that the Telephone Company shall retain in itself, or in one or more of its subsidiaries, title to the apparatus and control of its disposition until it is so sold.

6. Power Purposes and Household Devices.—The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the fields of (*a*) distance actuation and control by wireless, (*b*) power purposes (including apparatus for distance actuation and control of apparatus for power purposes and apparatus for indicating at remote points the condition or position, of apparatus for power purposes) and (*c*) household devices, in each case for purposes other than communication purposes.

7. Railroad Signalling Radio Goniometry, X-ray Apparatus.

(*a*) The General Company grants to the Telephone Company non-exclusive licenses in the field of radio goniometry for apparatus for use as part of apparatus in respect of which the Telephone Company is otherwise licensed under this agreement.

(*b*) The General Company grants to the Telephone Company non-exclusive licenses in the field of railway signalling for apparatus incidental to apparatus for train dispatching, for use only by the train dispatcher or similar official

Digitized by Google

for operating at will, and not automatically, signals, switches, brakes, and stops.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the fields of railroad signalling, X-ray apparatus and apparatus associated therewith, and radio goniometry.

8. *Train Dispatching.*

The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of train dispatching.

9. *Electric Sound Recording.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electrical apparatus for the production of sound records (which records are for the private use of the maker, and not for commercial use or sale) in combination or connection with apparatus in the field of wire telephony other than in connection with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI.

(*b*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electrical apparatus for the production of sound records (which records are for the private use of the maker, and not for commercial use or sale) in combination or connection with apparatus for one-way wireless telephone reception of programs and with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI.

(*c*) The Te'ephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electrical apparatus for the production in homes (which records are for the private use of the maker, and not for commercial use or sale) of sound records of entertainment and educational matter, other than appartus covered by paragraphs (*a*) and (*b*) of this section 9.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses for electrical apparatus for the production of sound records in homes, for entertainment or educational purposes (which records are for the private use of the maker and not for commercial use or sale), provided that all apparatus sold under the licenses granted in this paragraph (other than that covered by paragraphs (*a*) and (*c*) hereof) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of pragraph (*d*) of sub-division C of Section 4 of Article VI and all of the provisions of said paragraph (*d*) shall apply thereto.

(*e*) Each party grants to the other non-exclusive licenses for electrical apparatus for the production of sound records other than apparatus covered by parag aphs (*a*), (*b*), (*c*), and (*d*) of this section 9.

10. *Electric Phonographs.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electric phonographs for use in combination or connection with apparatus in the field of wire telephony other than in combination or connection with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI; provided, however, that the licenses granted by this paragraph (*a*) for phonographs for private use in homes for entertainment and educational purposes are licenses only to make and use in connection with a service of transmitting programs by wire telephony over lines other than electric light, electric heat, electric power, and electric traction lines, to lease to subscribers to such a service, and to sell only at retail (except as to sales for export) either directly or through the Telephone Company's own direct agents, and said licenses are subject to the condition that the Telephone Company shall retain in itself, or in one or more of its subsidiaries, title to the apparatus and control of its disposition until it is so sold.

(*b*) The General Company grants to the Telephone Company a non-exclusive license for electric phonographs (including electric phonographs in combination or connection with apparatus for wireless telephone reception) for private use in homes for entertainment and educational purposes, other than for the purposes covered by paragraph (*a*) of section 10 of this Article VI, but all apparatus sold by the Telephone Company under the licenses granted by this paragraph (*b*) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of paragraph (*d*) of sub-division C of section 4 of Article VI and shall be governed by all of the said provisions of said paragraph (*d*).

Digitized by Google

(*c*) The Telephone Company grants to the General Company nonexclusive licenses, including the right to grant non-exclusive licenses to others, for electric phonographs in combination or connection with apparatus for one-way wireless telephone reception, and in combination or connection with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI.

(*d*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electric phonographs for private use in homes for all entertainment and educational purposes other than those covered by paragraphs (*a*) and (*c*) of this section 10.

(*e*) Each party grants to the other non-exclusive licenses for electric phonographs for all purposes other than those covered by paragraphs (*a*), (*b*), (*c*), and (*d*) of this section 10.

11. *Apparatus for Co-ordination of Sound and Pictures.*—(*a*) The rights and licenses of the parties hereto in respect of apparatus for transmitting, receiving, recording, or reproducing sound in co-ordination, synchronism, or timed relation with the taking, transmission or projection of pictures shall, in so far as the fields of wire and wireless telegraphy and telephony, electrical sound recording, and electric phonographs are involved, be governed by the other provisions of this agreement relating to said fields.

(*b*) In so far as apparatus for the taking or projection of pictures and apparatus for co-ordinating, synchronizing, or timing such taking or projection in relation to the recording or reproduction of sound are not covered by the provisions of paragraph (*a*) of this section 11, the Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for such apparatus for private use in homes for entertainment and educational purposes, and each party grants to the other non-exclusive licenses for such apparatus for all other purposes.

(*c*) The General Company grants to the Telephone Company a non-exclusive license for apparatus for private use in homes for entertainment and educational purposes for the projection of pictures and the reproduction of sound from sound records in co-ordination, synchronism, or timed relation therewith, but all apparatus sold by the Telephone Company under the licenses granted by this paragraph (*c*) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of paragraph (*d*) of sub-division C of section 4 of this Article VI and shall be governed by all of said provisions of said paragraph (*d*).

12. *Public Address Systems.*—The Telephone Company grants to the General Company non-exclusive licenses for public address systems, including the combination or connection thereof with other apparatus for which the General Company is otherwise licensed hereunder, provided, however, that the licenses granted in this section 12 (1) do not include apparatus for giving by wire telephony a service analogous to wireless broadcasting (but do include apparatus for use in localities specified in paragraph (*d*) of section 5 of this Article VI), and (2) shall be subject to the following terms and limitations:

(1) Public address system apparatus and parts thereof shall be to the aggregate amount of $1,500,000 free of royalty in each calendar year and such apparatus and parts thereof in excess of said amount shall be subject to a royalty of 5% computed as hereinafter provided; but no license is granted for public address system apparatus and parts thereof in excess of $5,000,000 in amount during any calendar year.

(2) For any portion of the first or last calendar year of this agreement, less than an entire calendar year, during which royalties shall be payable hereunder, the amounts which may be sold free of royalty and subject to royalty, respectively, shall be those proportions of the amounts which may be sold free of royalty and subject to royalty, respectively, in the entire calendar year which said fractional part of a calendar year bears to a calendar year.

(3) The aforementioned amounts sold free of royalty, and the amounts subject to royalty, shall be based on the price at which such apparatus is sold by the manufacturer thereof, before cash discount, freight, and advertising allowances or other similar deductions.

(4) Sales for export shall be included in determining the amounts sold free of royalty, and the amounts subject to royalty, on the basis of the price at which the sale is made.

(5) In ascertaining the amount of the sales which are free from royalty and the amount of the sales upon which royalties are to be paid hereunder, where apparatus is sold any part of which embodies any invention of any of the patents in force at the time of such sale under which licenses are granted

Digitized by Google

in this section 12, the selling price of the apparatus sold shall be taken as the basis; but the apparatus not covered by any of said patents, when sold not assembled for operation with apparatus covered by such patents, shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty, unless such apparatus not covered by such patents is adapted for operation with apparatus covered by such patents and is sold in such manner that its sale or its use in connection with apparatus covered by such patents would, except for the licenses granted by this agreement, constitute contributory infringement of the patents under which such licenses are granted. Where public address system apparatus is sold for use in combination with apparatus for one-way wireless telephone reception of programs, the sale price of such receiving apparatus shall not be included in the amount of the sales which are free from royalty or the amount of the sales which are subject to royalty. Chemical primary batteries, wet or dry, and chemical storage batteries not sold as part of apparatus upon which royalties are payable hereunder, or wiring in a building in connection with a sale of apparatus shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty.

13. *Submarine Signaling, Scientific and Therapeutic Apparatus, Tools, and Other Applications.*—Each party grants to the other, non-exclusive licenses in the following fields:

Submarine signaling.

Scientific apparatus for use of laboratories, colleges, and scientific societies, as distinguished from commercial use.

Mechanical phonographs.

Wireless apparatus for use of professional investigators (as distinguished from amateurs) for experimental purpose only.

Therapeutic apparatus other than X-ray devices and appliances.

Tools, machinery, appliances, materials, methods, and processes for the manufacture, installation, and repair of apparatus for use in fields for which the grantee is licensed hereunder.

All applications, not herein otherwise specified, of inventions pertaining or applicable to or to the use of vacuum tubes, and to generating (directly or from other currents), modifying, amplifying, transmitting, or receiving electromagnetic waves, variations, or impulses for other than power purposes.

ARTICLE VII. PROVISIONS WITH REFERENCE TO FOREGOING LICENSES

1. Whenever licenses granted under the terms of this agreement are based upon rights held by the licensor under any agreement requiring the payment of royalties or other deferred payments, measured by the use made of the invention, the party accepting such licenses shall make payments measured by its use of the invention at the same rate and upon the same terms as those agreed to be made by the party originally acquiring the rights.

2. Upon the termination of this agreement under the provisions of Article XIV hereof all licenses herein granted shall, during the terms of the several patents, issued or to be issued, in respect of which such licenses exist at the date of termination, continue unaffected and of the same scope and character herein expressed, so far as the grantor thereof has the right to grant such licenses for such terms; and such licenses shall not be limited by the term of this agreement.

3. (*a*) The Telephone Company may grant sub-licenses to the operating Companies of the Bell System (but not manufacturing companies) which now or may from time to time be giving a communications service.

(*b*) Each party hereto may grant to its subsidiaries sub-licenses under the licenses granted to it herein; provided, however, that each subsidiary to which a sub-license shall be granted (excepting, however, sub-licensees pursuant to paragraph (*a*) of this section 3 and except also the Teletype Corporation as to which special provision is made elsewhere in this agreement) shall either have entered into an agreement with its parent company effectively subjecting to this agreement all United States patents then or thereafter during the term of this agreement owned or controlled by it, or have executed to the party hereto other than its parent company an instrument granting to such other party licenses under said patents co-extensive with the licenses herein granted to such other party. Use by any subsidiary of any sub-license granted under this agreement

Digitized by Google

shall for all purposes of this agreement, including determination of royalties payable hereunder, be deemed to be use by its parent company, and ownership, lease, or operation of any telephone or telegraph system or station by any subsidiary shall be deemed to be ownership, lease or operation of such system or station by its parent company for all purposes of this agreement. Wherever in this agreement either party is granted a general right to grant non-exclusive licenses to others such rights shall nevertheless be subject to the provision of this paragraph (*b*) so far as concerns the grant of sub-licenses to subsidiaries.

(*c*) In addition to the sublicensing provided for in the foregoing paragraphs (*a*) and (*b*), each party hereto may assign or grant sub-licenses under any of the rights granted to it hereunder, which are not expressed as including the right to grant sublicenses to others, provided that in each instance the assent of the other party is first obtained.

(*d*) When either party shall enter into an agreement with any of its subsidiaries effectively subjecting to this agreement all United States patents then or thereafter during the term of this agreement owned or controlled by such subsidiary, such party shall promptly give the other party appropriate notice of such agreement.

(*e*) Each party shall enter into an agreement with each of its subsidiaries which is engaged primarily or wholly in the conduct of research and development work in the fields for which licenses are granted to the other party under this agreement whereby the United States patents owned or controlled by such subsidiary during the term of this agreement shall become effectively subject to this agreement.

(*f*) Each party may, subject to the provisions of section 4 of this Article VII, sell or lease to any sub-licensee having a sub-license to use granted under the provisions of any of paragraphs (*a*), (*b*), and (*c*) of this section 3, apparatus for the use of such sub-licensee under such sub-license, notwithstanding that the party granting such sub-license may not be licensed under this agreement generally to sell, lease, or otherwise dispose of such apparatus.

(*g*) All sub-licenses granted hereunder shall be subject to all limitations and obligations attaching to the apparatus or system in respect of which sub-licenses are granted, whether under the patents, or under the instruments by which any party acquired the patents or licenses under them, or under this agreement.

(*h*) No disposition by either party of rights hereunder acquired by it, shall relieve such party of any of its obligations under this agreement, or restrict the rights of the parties hereto in operating under or modifying this agreement.

4. Each party agrees that, so far as practicable, it will, in disposing of apparatus embodying inventions pertaining or applicable to vacuum tubes, or to generating, modifying, amplifying, transmitting or receiving electromagnetic waves, or other apparatus or material the unrestricted sale of which would deprive the other party of rights to which it is entitled hereunder, use such precautions by contracts, leases, restricted licenses or otherwise as may be necessary or advisable in order to prevent its subsidiaries, sublicenses, customers or others from acquiring (by acquisition of apparatus from it or otherwise) licenses to use the same which the party disposing thereof has no right to grant.

5. All royalties payable under any provision of this agreement shall continue to be payable to the ends of the terms of the patents in respect of which such royalties are payable, notwithstanding any termination of this agreement.

6. The admission of validity implied in the acceptance of licenses hereunder is limited to the field for which such licenses are granted or agreed to be granted.

7. No licenses under foreign patents are now granted or are to be implied; but except as herein otherwise expressely provided the licenses to make, sell, lease or otherwise dispose of, herein granted under United States patents include the right to make, sell, lease or otherwise dispose of for use abroad in the fields for which such licenses under United States patents are granted, but not for use abroad in other fields. Each party agrees not to export to any country in which the other party has an affiliated company, apparatus purchased from such other party which such other party could not itself so export, in view of existing contract obligations, after notice of such obligations and without first securing a written waiver thereof.

8. Each party represents that in its best judgment it has no outstanding obligations which would prevent it from entering into the agreements and from granting the licenses herein expressed. If, however, it is found that there

Digitized by Google

are such conflicting obligations, the present agreement is made subject to the right to fulfill those obligations.

ARTICLE VIII. INTERFERENCES

The parties agree to use reasonable endeavors to settle, without litigation, interferences now pending or which may arise involving inventions within the scope of this agreement.

ARTICLE IX. CO-OPERATION AND EXCHANGE OF INFORMATION

1. Each party agrees that it will, from time to time during the term of this agreement, freely permit the other to have all information in its possession which it may have a right to dispose of with reference to its standardized apparatus or methods or processes applicable to the uses of the other party in fields in which such other party is granted licenses hereunder, but any secret process so disclosed shall be maintained in secrecy by the party to whom it is disclosed. Blue prints, etc., shall be furnished at the cost of preparing the same. For the purpose of acquiring such information each party shall at all reasonable times have access (through a reasonably limited number of accredited representatives who are regular employees under obligation to assign inventions to their employers), to the laboratories, factories, and wireless stations of the other, to the end that development work may be expedited and rendered the more effective.

Each party shall, with reference to inventions owned or controlled by it, under which the other party is entitled to rights hereunder and which either party deems to be of sufficient value to justify such action, endeavor to obtain or permit and aid the other to obtain proper patents thereon.

2. Each party shall afford the engineering representatives of the other the fullest possible facilities, consistent with the reasonable operation of the other, for experimenting and for developing and testing apparatus and systems for use in transoceanic telephony, and each shall at all times be given such an opportunity to make such tests, experiments, and observations in the transoceanic stations of the other as do not conflict with the service then being rendered by such stations, and each party shall afford to the other such facilities for test, experimentation, and observations on ships as it may be able to extend.

3. In the operation of wireless and carrier-current communication, the parties shall co-operate to the end that interference with the operations of either party, due to the operations of the other, shall be minimized, it being recognized that the available wave lengths are limited.

ARTICLE X. PURCHASES AS BETWEEN PARTIES

It is recognized that each party has and will normally continue to have facilities for manufacturing certain apparatus or parts thereof which may be required by the other party under its licenses hereunder, and that a duplication of such facilities may be wasteful and uneconomical. Each party agrees that it will upon request manufacture for and sell and deliver to the other, with reasonable business promptness and within its reasonable manufacturing capacity, on receipt of orders from time to time, and at favorable prices not to exceed those charged to others (except subsidiaries and, in the case of the Telephone Company, Companies of the Bell System) purchasing in like quantities for use in the United States, such apparatus and parts as the former is engaged in manufacturing from time to time and as the latter may desire for use in the fields for which licenses are granted to it by this agreement.

ARTICLE XI. LITIGATION

1. Neither party shall bring suit for infringement of patents against the other party, or against the distributors and jobbing houses owned by or affiliated with either party, because of sales by such party, or by its (or its subsidiaries') distributors or jobbing houses, of apparatus made, in the United States, by others than the parties hereto, it being agreed that the remedy in case of any such infringement shall be only by suit against the manufacturer of those devices; but nothing herein contained shall be construed as the granting of a right to sell infringing apparatus manufactured by others.

Digitized by Google

2. In all cases of infringement of a patent of either party in a field in which the licenses herein granted to the other party include the general right to grant sub-licenses, if the party holding title to such patent shall not bring suit against the infringer within thirty days after receipt from the other party of written notice and full information of such infringement together with a written offer from such other party to pay half the cost and expenses of such suit, then (*a*) the party having given such notice, information and offer may at its own expense bring suit against the infringer in question in the name of the party holding legal title to the patent, and (*b*) such party holding title to the patent shall assign to the other party all claims, demands, and rights of action against the particular infringer designated in such notice on account of any and all past and future infringements of such patent in said field.

3. If, however, the party holding title to such patent shall bring suit against the infringer within thirty days after receipt of said notice and information from the other party, then any recoveries from the infringer shall be applied first toward the reimbursement of the costs and expenses of such suit, and the remainder, if any, shall be divided between the parties as their interests appear. In any such case the party holding title to the patent in suit shall not release or license the infringer or otherwise settle or dismiss the suit without the consent of the party having the general right to grant sub-licenses.

ARTICLE XII. RELEASES

Each party reserves to itself the right to deal with the United States Government with reference to settlement for past use of its inventions in telephone and telegraph apparatus and systems. Subject to the foregoing, each party releases the other and the vendees and users of apparatus or systems made by it, from all claims growing out of past infringement of patents, by reason of the manufacture, use and sale of such apparatus and systems by the other party, and its resale or use by such vendees and users.

ARTICLE XIII. ARBITRATION

In case any controversy under this agreement (except in respect of interference or priority of rights to inventions or patents) shall arise between the parties to this agreement, which they are unable to adjust between themselves, it shall be settled by arbitration pursuant to the Arbitration Law of the State of New York in the following manner:

Either party may by notice in writing served on the other, appoint one arbitrator and call upon the other to appoint a second arbitrator within thirty days after the receipt of such notice; and each party agrees that upon receiving any such notice it will so appoint an arbitrator. The two arbitrators thus appointed shall, within thirty days after the appointment of the one last appointed, jointly appoint a third arbitrator. The controversy shall be submitted to the three arbitrators in such manner as they shall direct and their decision, or the decision of a majority of them, rendered in writing, shall be final, conclusive and binding upon the parties. In the event that a second arbitrator shall not be appointed as above provided or the two arbitrators first appointed shall fail to appoint a third, application may be made by either party to the Supreme Court of the State of New York, or to a judge thereof, to designate and appoint an arbitrator or arbitrators, as the case may require, as provided by said Arbitration Law. Each party shall pay its own expenses in connection with the arbitration but the compensation and expenses of the arbitrators shall be borne in such manner as may be specified in their decision in writing.

ARTICLE XIV. TERMINATION OF AGREEMENT

This agreement shall continue until December 31, 1954, but shall automatically continue thereafter until cancelled on three years' written notice given after December 31, 1951, by one party to the other party.

ARTICLE XV. FURTHER ASSURANCES

The parties agree to execute and deliver such further instruments as may reasonably be necessary for carrying out the provisions and purposes of this agreement.

Digitized by Google

ARTICLE XVI. SUCCESSORS

This agreement is binding upon and shall inure to the benefit of each of the parties hereto and their several successors in business, except that either party may transfer or dispose of any part or parts of its business not involving the grant of any licenses under this agreement, and in such case this agreement shall not be binding upon or inure to the benefit of the successor to that part of the business so transferred.

In witness whereof, the parties hereto have caused this instrument to be executed on the day and year first above written, by their proper officers thereunto duly authorized.

TERMINATION SYNCHRONIZATION AGREEMENT

Agreement made this 1st day of July 1932 between Electrical Research Products, Inc., a Delaware corporation, hereinafter called Products, and RCA Victor Company, Inc., a Maryland corporation, hereinafter called Radio:

WITNESSETH:

Whereas under date of January 11, 1928, Products and Victor Talking Machine Company entered into a certain license agreement relating among other things to synchronized records for use in motion picture theatres in the United States and certain other territory; and

Whereas Radio has succeeded to the rights and obligations of Victor Talking Machine Company under said contract, and the parties hereto desire to terminate said contract;

Now, therefore, in consideration of the premises the parties hereto agree that said contract of January 11, 1928, be and the same hereby is terminated as of the date hereof, and each of the parties releases and discharges the other from any and all liability thereunder.

Products hereby leases to Radio for a period of ten years from the date hereof without royalty or other consideration than herein expressed, all apparatus and equipment heretofore leased by Products to Victor Talking Machine Company or Radio under said contract, on the payment forthwith by Radio to Products of any of Products' charges with respect to said apparatus and equipment which have not been fully paid. At the end of said period of ten years said apparatus and equipment shall become the property of Radio.

In witness whereof, the parties have caused this instrument to be executed by their respective proper officers thereunto duly authorized and their corporate seals to be affixed as of the day and year first above written.

TERMINATION U. S. ACOUSTIC CONTRACT

Agreement made this 1st day of July 1932 between Electrical Research Products, Inc., a Delaware corporation, hereinafter called Products, and RCA Victor Company, Inc., a Maryland corporation, hereinafter called Radio:

WITNESSETH:

Whereas under date of June 26, 1925, Western Electric Company, Incorporated, and Victor Talking Machine Company entered into a certain license agreement relating to the manufacture, use, and sale of acoustic phonographs within the continental United States of America, Alaska, and Hawaii; and

Whereas, Products and Radio have succeeded, respectively, to the rights and obligations of Western Electric Company, Incorporated, and Victor Talking Machine Company under said contract, and desire to terminate the same upon the conditions herein set forth;

Now, therefore, in consideration of the premises and of the several covenants and agreements herein set forth, the parties hereto agree as follows:

1. Radio will pay to Products forthwith royalties in accordance with the provisions of said contract (including provisions for minimum) to and including December 31, 1931, and for the period from January 1, 1932, to June 30, 1932, will pay to Products the royalties other than the minimum royalty provided for in said contract. In each case Radio will furnish a certified statement and audit and Products will have the right to verify the same as provided in said contract.

2. Except as hereinabove otherwise provided, said contract shall terminate and all rights and obligations of the parties thereunder shall cease as of June 30th, 1932.

In witness whereof, the parties have caused this instrument to be executed by their respective proper officers thereunto duly authorized and their corporate seals to be affixed as of the day and year first above written.

MODIFICATION FOREIGN ACOUSTIC CONTRACT

Agreement made this 1st day of July 1932 between Electrical Research Products, Inc., a Delaware corporation, hereinafter called Products, and RCA Victor Company, Inc., a Maryland corporation, hereinafter called Radio:

WITNESSETH:

Whereas under date of July 19, 1926, Western Electric Company, Incorporated, and Victor Talking Machine Company entered into a certain license agreement relating to the manufacture, use, and sale of acoustic phonographs in certain foreign countries; and

Whereas, Products and Radio have succeeded respectively to the rights and obligations of Western Electric Company, Incorporated, and Victor Talking Machine Company under said contract, and desire to modify the same as herein set forth;

Now, therefore, in consideration of the premises and of the several covenants and agreements herein set forth, the parties hereto agree as follows:

1. Said contract shall be and hereby is amended by eliminating therefrom all provisions that call for or relate to the payment of minimum royalties. For this purpose the following Sections are specifically cancelled:

(a) Section 9 of Article IV.

(b) Section 10 of Article IV (except the final paragraph thereof numbered (3)).

(c) Section 2 of Article V.

2. Said contract shall be and is hereby amended by eliminating therefrom all provisions that specify or imply that the license granted therein is more than a non-exclusive license or that place any restrictions upon the grant by Products to others than Radio of rights similar to those granted therein. For this purpose the following are specifically cancelled:

(a) Section 8 of Article II.

(b) The final paragraph numberer (3) of Section 10 of Article IV.

3. Said contract shall be and hereby is amended by inserting in substitution for Section 8 of Article II hereinbefore cancelled, the following:

"8. All licenses herein granted or agreed to be granted are and shall be non-exclusive."

Digitized by Google

4. The foregoing modifications shall take effect as of July 1st, 1932.
5. Except as hereinabove modified, said contract shall continue in full force and effect for the term thereof.

In witness whereof, the parties have caused this instrument to be executed by their respective proper officers thereunto duly authorized and their corporate seals to be affixed as of the day and year first above written.

MODIFICATION FOREIGN RECORDING CONTRACT

Agreement made this 1st day of July 1932 between Electrical Research Products, Inc., a Delaware corporation, hereinafter called Products, and RCA Victor Company, Inc., a Maryland corporation, hereinafter called Radio:

WITNESSETH:

Whereas under date of May 1, 1925, International Western Electric Company, Incorporated, and Victor Talking Machine Company entered into a certain license agreement relating to the electrical recording of sound for phonograph records in certain foreign countries; and

Whereas Products and Radio have succeeded respectively to the rights and obligations of International Western Electric Company, Incorporated, and Victor Talking Machine Company under said contract, and desire to modify the same as herein set forth;

Now, therefore, in consideration of the premises and of the several covenants and agreements herein set forth, the parties hereto agree as follows:

1. Said contract shall be and hereby is amended by eliminating therefrom all provisions that call for or relate to the payment of minimum royalties. For this purpose the following paragraphs are specifically cancelled:
(a) The first paragraph of Section 8.
(b) The first two paragraphs of Section 9.

2. Said contract shall be and is hereby amended by eliminating therefrom all provisions that specify or imply that the license granted therein is more than a non-exclusive license or that place any restrictions upon the grant by Products to others than Radio of rights similar to those granted therein. For this purpose the following paragraph is specifically cancelled: The second paragraph of subsection (a) of Section 6.

3. Said contract shall be and hereby is amended by inserting as an additional paragraph to Section 7 the following:

Master records produced by Lessee and/or its associated and subsidiary companies in the United States on equipment supplied by Products, including derivative copies, shells, and matrices made from such master records, may be sold and/or shipped for export from the United States to the Empire of Japan for the exclusive use of Lessee, its associated and subsidiary companies in the manufacture of commercial records in the Empire of Japan, but royalties shall be paid upon all commercial phonograph records sold, leased, or put into commercial use manufactured from said master records so exported in the Empire of Japan by Lessee, its associated and subsidiary companies, in accordance with the terms hereof.

4. The foregoing amendments shall take effect as of July 1st, 1932.
5. Except as hereinabove modified said contract shall continue in full force and effect for the term thereof.

Agreement made this 1st day of July 1932 between General Electric Company, a New York corporation (herein called the General Company), American Telephone and Telegraph Company, a New York corporation (herein called the Telephone Company), Western Electric Company, Incorporated, a New York corporation (herein called the Western Company), Radio Corporation of America, a Delaware corporation (herein called RCA), and Broadcasting Company of America, Inc., a Delaware corporation (herein called the Broadcasting Company):

WITNESSETH:

Whereas certain of the parties have entered into the following agreements, each dated July 1, 1926:

(1) Letter agreement between the Telephone Company, the Western Company, the General Company and RCA, confirming the rights of, and consenting to the extension of the rights to, the United Fruit Company and others as therein provided;

(2) Agreement between the Telephone Company, the Broadcasting Company and RCA, relating to the purchase of Station WEAF, generally known as the Purchase Agreement; and

(3) Agreement between the Telephone Company and RCA, generally known as the Service Agreement; and

Whereas the General Company and the Telephone Company have entered into an Agreement dated July 1, 1932, of which the parties hereto have knowledge, which is a substitute license agreement for a certain license agreement between them dated July 1, 1920, which was modified by an agreement dated July 1, 1926;

Now, therefore, in consideration of the premises, the parties hereto agree that the agreements specified in the first preamble of this agreement are hereby modified so that where reference is made in any of said agreements to said license agreement dated July 1, 1920, as modified July 1, 1926, such reference shall be to the Substitute License Agreement between certain of the parties dated July 1, 1932, and each of the parties hereto, to the extent necessary, renews its assent to the extension of any rights reserved by any of the other parties hereto or acquired or to be acquired by such parties, respectively, under said Substitute License Agreement, to the same extent to which it has previously assented to the extension of such rights under said License Agreements dated July 1, 1920, or under the License Agreement dated July 1, 1926, modifying said License Agreement dated July 1, 1920.

This agreement shall be effective from and after the date hereof.

In witness whereof, the parties hereto have caused this instrument to be executed in five counterparts, by their proper officers thereunto duly authorized,

AMERICAN TELEPHONE AND TELEGRAPH COMPANY,
195 Broadway, New York, Exchange 3-6000, August 11, 1932.

RADIO CORPORATION OF AMERICA,
570 Lexington Avenue, New York, N. Y.

GENTLEMEN: The agreement of July 1, 1932, between General Electric Company, American Telephone and Telegraph Company, Western Electric Company, Radio Corporation of America, and Broadcasting Company of America, Incorporated (Agreement No. 6), has not been signed by the Broadcasting Company of America, Incorporated, for the reason that as provided in the Purchase Agreement of July 1, 1926, the said Broadcasting Company was dissolved as provided in Article III of said Agreement of July 1, 1926. You may take this letter as an assurance that any obligations of said Broadcasting Company of America, Incorporated, under said Purchase Agreement, are hereby assumed by the American Telephone and Telegraph Company.

Very truly yours,

(Sgd.) C. P. COOPER, *Vice President.*

G. E. F.
C. M. B.
O. S. S.

Agreement made this 1st day of July 1932 between American Telephone and Telegraph Company, a New York corporation (herein called the Telephone Company), and General Electric Company, a New York corporation (herein called the General Company):

WITNESSETH:

Whereas the parties entered into a certain letter agreement dated August 26, 1930, modifying the License Agreement between the parties dated July 1, 1920, as modified by an agreement dated July 1, 1926, and relating, among other things, to a grant by the Telephone Company to the General Company of certain licenses with respect to close-talking microphones; and

Whereas the parties hereto desire to terminate said letter agreement;

Now, therefore, in consideration of the premises, the parties hereto agree that said letter agreement, dated August 26, 1930, be, and the same hereby is, terminated as of the date hereof, and each of the parties releases and discharges the other from any and all liability thereunder.

SUBSTITUTE EXTENSION AGREEMENT

Agreement, dated July 1, 1932, between General Electric Company, a New York corporation (hereinafter called the General Company), Radio Corporation of America, a Delaware corporation (hereinafter called the Radio Company), American Telephone and Telegraph Company, a New York corporation (hereinafter called the Telephone Company), and Western Electric Company, Incorporated, a New York corporation (hereinafter called the Western Company).

Whereas, the parties hereto have heretofore entered into an agreement dated July 1, 1920, known as the Extension Agreement, in which agreement reference is made to a License Agreement dated July 1, 1920, between the General Company and the Telephone Company;

Whereas, the General Company and the Telephone Company have entered into an agreement dated July 1, 1926, of which the parties hereto have knowledge, modifying said License Agreement dated July 1, 1920;

Whereas, the parties hereto, under date of July 1, 1926, have entered into an agreement generally known as Modified Agreements C and X modifying said Extension Agreement; and

Whereas, the General Company and the Telephone Company have entered into an agreement dated July 1, 1932, of which the parties hereto have knowledge, which is a substitute license agreement for said License Agreement dated July 1, 1920, as modified by Agreement dated July 1, 1926; and

Whereas, the General Company desires to extend rights under said Substitute License Agreement of July 1, 1932, to the Radio Company; and

Whereas, the Telephone Company desires to extend rights under said Substitute License Agreement of July 1, 1932, to the Western Company; and

Whereas, the Radio Company and the Western Company, respectively, desire to obtain such rights and the assent of both parties to the Substitute License Agreement of July 1, 1932, may be desirable or necessary for the extension of such rights;

Whereas, it is now the mutual desire of the parties to substitute this agreement and the licenses herein granted for said Extension Agreement dated July 1, 1920, as modified by an agreement known as Modified Agreements C and X dated July 1, 1926.

Now, therefore, in consideration of the premises and the mutual agreements herein contained, the parties agree with each other as follows:

I. The said agreements between the parties hereto, dated July 1, 1920, and July 1, 1926, generally known as the Extension Agreement and Modified Agreements C and X, respectively, and all licenses therein granted and agreed to be

Digitized by Google

granted, are hereby terminated as of the date hereof, and this agreement and the licenses herein granted and agreed to be granted are substituted therefor.

II. The General Company may extend to the Radio Company, and the Telephone Company may extend to the Western Company, any of the said rights reserved and acquired by each, respectively, under this present agreement and under said Substitute License Agreement of July 1, 1932, whether or not expressed in said Substitute License Agreement of July 1, 1932, as including the right to grant sub-licenses, or as personal or non-assignable, except any right to terminate under the provisions of Article XIV of said agreement.

III. The Western Company hereby grants and agrees to grant to the General Company under the present and future patents of the Western Company, rights of the same character and scope, and for the same fields and subject to the same limitations and conditions, as the rights granted to the General Company in and by said Substitute License Agreement of July 1, 1932. And the Western Company hereby assumes toward the General Company (and the Telephone and Western Companies assume toward the Radio Company, to the extent that the General Company, under the provisions of Article II hereof, extends or may hereafter extend its rights to the Radio Company) obligations similar to the obligations assumed by the Telephone Company toward the General Company in and by said Substitute License Agreement of July 1, 1932, except that the Western Company assumes no obligations as to operation of telephone or telegraph systems unless and until it shall engage in the commercial operation of such systems.

IV. The Radio Company hereby grants and agrees to grant to the Telephone Company under the present and future patents of the Radio Company, rights of the same character and scope, and for the same fields and subject to the same limitations and conditions, as the rights granted to the Telephone Company in and by said Substitute License Agreement of July 1, 1932. And the Radio Company hereby assumes toward the Telephone Company (and the General and Radio Companies assume toward the Western Company, to the extent that the Telephone Company, under the provisions of Article II hereof, extends or may hereafter extend its rights to the Western Company) obligations similar to the obligations assumed by the General Company toward the Telephone Company in and by said Substitute License Agreement of July 1, 1932, except that the Radio Company assumes no obligations as to manufacturing or selling articles or devices which it is not from time to time engaged in commercially manufacturing.

V. This Agreement shall terminate at the same time that the said Substitute License Agreement of July 1, 1932, terminates.

VI. This Agreement shall be effective from and after the date hereof.

In witness whereof, the parties hereto have caused this instrument to be executed in quadruplicate as of the 1st day of July 1932 by their proper officers thereunto duly authorized.

SUBSTITUTE TERMINATION AGREEMENT

Agreement, dated July 1, 1932, between General Electric Company, a New York corporation (hereinafter called the General Company), Radio Corporation of America, a Delaware corporation (hereinafter called the Radio Company),

Digitized by Google

American Telephone and Telegraph Company, a New York corporation (hereinafter called the Telephone Company), and Western Electric Company, Incorporated, a New York corporation (hereinafter called the Western Company).

Whereas the parties hereto have heretofore entered into an agreement dated July 1, 1920, known as the Termination Agreement, in which agreement reference is made to a License Agreement dated July 1, 1920, between the General Company and the Telephone Company;

Whereas, the General Company and the Telephone Company have entered into an agreement dated July 1, 1926, of which the parties hereto have knowledge, modifying said License Agreement dated July 1, 1920;

Whereas, the parties hereto, under date of July 1, 1926, have entered into an agreement generally known as Modified Agreements C and X modifying said Termination Agreement; and

Whereas, the General Company and the Telephone Company have entered into an agreement dated July 1, 1932, of which the parties hereto have knowledge, which is a Substitute License Agreement for said License Agreement dated July 1, 1920, as modified by Agreement dated July 1, 1926; and

Whereas, it is now the mutual desire of the parties to substitute this agreement and the licenses herein granted for said Termination Agreement dated July 1, 1920, as modified by said agreement known as Modified Agreements C and X dated July 1, 1926.

Now, therefore, in consideration of the premises and the mutual agreements herein contained, the parties agree with each other as follows:

I. The said agreements between the parties hereto, dated July 1, 1920, and July 1, 1926, generally known as Termination Agreement and Modified Agreements C and X, respectively, and all licenses therein granted and agreed to be granted, are hereby terminated as of the date hereof, and this agreement and the licenses herein granted and agreed to be granted are substituted therefor.

II. If the United States (except temporarily on account of war or otherwise) acquires the property of the Radio Company or of the Telephone Company, or the inventions or business of either of them, or any definite part thereof, so as to prevent either of said companies from continuing any substantial part or all of its then existing business so as substantially to adversely affect the rights of any of the other parties under the said Substitute License Agreement of July 1, 1932, the said Substitute License Agreement shall thereupon terminate so far as concerns the fields of business or inventions so acquired (all licenses which have theretofore vested continuing in force), it having been the purpose of the aforesaid Substitute License Agreement to provide for conditions which it was thought might be foreseen in the conduct of privately owned enterprises, but not for conditions which might arise from such radical changes as would be involved in Government ownership or operation.

III. The company whose property, business, or patents are so acquired shall have the right to grant to the Government licenses under the patent rights which it acquired through said Substitute License Agreement of July 1, 1932, in and for the same fields and uses as any licenses then (at the time of such taking over) possessed under said Substitute License Agreement by the party whose property, business, or patents have been taken over.

IV. This agreement shall be effective from and after the date hereof.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed in quadruplicate as of the day and year first above written by their proper officers thereunto duly authorized.

Agreement, made this 1st day of July 1932, between American Telephone and Telegraph Company, a New York corporation (herein called the Telephone Company), Western Electric Company, Incorporated, a New York corporation (herein called the Western Company), and General Electric Company, a New York corporation (herein called the General Company),

WITNESSETH

Whereas, the parties have entered into a certain letter agreement dated July 1, 1926, dealing with the granting of sub-licenses under a certain license agreement dated July 1, 1926, between the Telephone Company and the General Company, modifying a certain License Agreement between the same parties dated July 1, 1920, said Modified License Agreement being generally known as Modified Agreement "B" and the assent to sub-licenses and the conditions attached thereto; and

Whereas, the parties hereto desire to terminate said letter agreement dated July 1, 1926, and the letter agreement therein referred to;

Now, therefore, in consideration of the premises, the parties hereto agree that said letter agreement dated July 1, 1926, and the letter agreement therein referred to be and the same hereby are terminated as of the date hereof, and each of the parties releases and discharges the others from any and all liability thereunder.

SUBSTITUTE FOR MODIFIED AGREEMENT H

JULY 1, 1932.

GENERAL ELECTRIC COMPANY,
120 Broadway, New York, N. Y.
RADIO CORPORATION OF AMERICA,
570 Lexington Avenue, New York, N. Y.

DEAR SIRS: Under date of June 30, 1921, American Telephone and Telegraph Company and Western Electric Company, Incorporated, at your request, assented to the extension by you to Westinghouse Electric & Manufacturing Company of rights under licenses acquired by you under the patents of the undersigned companies through the License Agreement between General Electric Company and American Telephone and Telegraph Company, dated July 1,

Digitized by Google

1920, and through the agreement also dated July 1, 1920, permitting the extension of rights under said License Agreement to Radio Corporation of America and to Western Electric Company, Incorporated.

Said License Agreement and said Extension Agreement, dated July 1, 1920, were modified by the parties thereto by agreements dated July 1, 1926, and a Substitute License Agreement dated July 1, 1932, between the General Electric Company and American Telephone and Telegraph Company has been substituted therefor, and said Extension Agreement has been replaced by an agreement dated July 1, 1932 (hereinafter called the Substitute Extension Agreement).

American Telephone and Telegraph Company and Western Electric Company, Incorporated, pursuant to the provisions of Article VII, Section 3, subdivision (c) of said Substitute License Agreement dated July 1, 1932, and pursuant to said Substitute Extension Agreement, hereby assent to the extension by you to Westinghouse Electric & Manufacturing Company and its subsidiaries of any of the rights, whether or not expressed as including the right to grant sublicenses, or as personal or nonassignable, reserved by you or acquired or to be acquired by you, respectively, under said Substitute License Agreement dated July 1, 1932, and said Substitute Extension Agreement.

Yours very truly,

SUBSTITUTE FOR MODIFIED AGREEMENT I

Agreement, dated July 1, 1932, between American Telephone and Telephone Company, a New York corporation (hereinafter called the Telephone Company), Western Electric Company, Incorporated, a New York corporation (hereinafter called the Western Company), and Westinghouse Electric & Manufacturing Company, a Pennsylvania corporation (hereinafter called the Westinghouse Company).

Whereas an agreement, dated July 1, 1932, known as the Substitute License Agreement, has been entered into between the General Electric Company, a New York corporation (hereinafter called the General Company), and the Telephone Company, which agreement has been substituted for an agreement, dated July 1, 1926, between said parties, known as Modified Agreement B, said Modified Agreement B having modified a previous agreement, dated July 1, 1920, between said parties, known as Agreement B; a copy of said Substitute License Agreement is attached hereto and marked "Exhibit 1"; and

Whereas, by virtue of certain agreements, dated July 1, 1932, copies of which are hereto attached and marked "Exhibits 2 and 3", the General Company, Radio Corporation of America (hereinafter called the Radio Corporation), the Telephone Company and the Western Company have substituted said agreements for an agreement, dated July 1, 1926, between said parties, known as Modified Agreements C and X (and also for the agreements which it modified), which said Modified Agreements C and X modified an agreement, dated July 1, 1920, between said parties, known as the Extension Agreement, and also modified an agreement, dated July 1, 1920, between said parties, known as the Termination Agreement; and

Whereas, pursuant to the provisions of said Substitute License Agreement, the General Company desires to extend to the Westinghouse Company, at its request, certain of the rights under the patents and inventions of the Telephone Company and Western Company received by the General Company under the said agreements and, at the request of the General Company, the Telephone Company and the Western Company have assented thereto, as shown by the assent, dated July 1, 1932, known as "Substitute for Modified Agreement H", a copy of which is hereto attached and marked "Exhibit 4"; and

Whereas, in view of the above-mentioned agreements entered into contemporaneously herewith it is now the mutual desire of the parties hereto to substitute this agreement and the licenses herein contained for an agreement, dated July 1, 1926, between the parties hereto, known as "Modified Agreement I", which said Modified Agreement I modified an agreement, dated June 30, 1921, between the parties hereto, known as the "Telephone-Westinghouse Agreement";

Now, therefore, in consideration of the premises and the mutual agreements herein contained, the parties agree with each other as follows:

I. The said agreements between the parties hereto, dated June 30, 1921, and July 1, 1926, generally, known as the Telephone-Westinghouse Agreement and Modified Agreement I, respectively, and all licenses therein granted and agreed to be granted, are hereby terminated as of the date hereof, and this agreement and the licenses herein granted and agreed to be granted are substituted therefor.

II. The Westinghouse Company hereby grants and agrees to grant to the Telephone Company, and to the Western Company, under the present and future patents of the Westinghouse Company and rights to and under patents, in so far as it has or may have the right to do so, rights of the same character

Digitized by Google

and scope, and for the same fields of operation, and subject to the same limitations and conditions, as the rights granted by the General Company to the Telephone Company in and by the Substitute License Agreement, dated July 1, 1932; provided, however, that all rights, granted and agreed to be granted under this paragraph, are subject to rights which the Westinghouse Company hereby reserves for itself, for the General Company, and for the Radio Corporation, and their several subsidiaries and successors in business, and which are of the same character and scope, and for the same fields, and subject to the same limitations and conditions, as the rights reserved by the General Company in and by said Substitute License Agreement. The admission of validity implied in the acceptance of licenses hereunder, is limited to the fields for which such licenses exist.

III. The Telephone Company agrees, in addition to giving its assent to the extension of rights, under its patents, to the Westinghouse Company, as aforesaid, and to the granting of the other rights and privileges herein conferred, to pay to the Westinghouse Company one-third of the sums paid and payable by the Westinghouse Company to the Inventors under a certain agreement known as the "Armstrong and Pupin agreement", dated October 5, 1920, under which the Westinghouse Company acquired certain patents and applications of said Inventors. One-third of the payments made by the Westinghouse Company to date under said agreement have been paid by the Telephone Company, and one-third of future payments shall be paid by the Telephone Company as they are due and paid by the Westinghouse Company under the terms of said agreement.

IV. The Westinghouse Company agrees that it will not terminate its rights to and under the Armstrong and Pupin patents, under the provisions of paragraph 11 of the aforesaid "Armstrong and Pupin agreement", without first making such arrangements between the parties then interested in said patents that the Telephone Company shall continue to enjoy the rights herein granted under said patents without the payment of any consideration other than that herein provided.

V. The Telephone Company and the Western Company hereby assume toward the Westinghouse Company and its subsidiaries, to the extent that the General Company or the Radio Corporation, pursuant to said assent, extend or may hereafter extend rights to the Westinghouse Company and its subsidiaries, obligations similar to the obligations assumed by the Telephone Company and the Western Company toward the General Company and the Radio Corporation in and by said Substitute License Agreement and said Substitute Extension Agreement, except, that the Western Company assumes no obligations as to operation of telephone or telegraph systems unless and until it shall engage in the commercial operation of such systems.

The Westinghouse Company hereby assumes toward the Telephone Company and the Western Company obligations similar to the obligations assumed by the General Company and the Radio Corporation toward the Telephone Company and the Western Company in and by said Substitute License Agreement and said Substitute Extension Agreement.

Notwithstanding the provisions of Section 7 of Article VII of said Substitute License Agreement, it is understood and agreed that the Westinghouse Company hereby grants to the Telephone Company non-exclusive licenses and the right to grant non-exclusive licenses to the foreign associated and allied companies of the Telephone Company and Western Company, under all foreign patents which the Westinghouse Company acquires under the "Armstrong and Pupin Agreement" of October 5, 1920, so far as the Westinghouse has or may have the right to make such grants.

VI. Unless previously terminated by mutual consent, this agreement shall continue in force until December 31, 1954, and automatically thereafter until canceled on three years' written notice given on or after December 31, 1951, by either party to the other, provided, however, that it shall not be thus cancelled by the Westinghouse Company during the continuance of said Substitute License Agreement and said Substitute Extension Agreement and its enjoyment thereunder of rights under the patents of the Telephone Company and the Western Company. In the event that said Substitute License Agreement and said Substitute Extension Agreement, or either of them, are terminated prior to the termination of this agreement, as above specified, the parties hereto shall continue, during the continuance of this agreement, to enjoy rights under each other's patents, and rights to and under patents, the same as prior to the termination of such agreements. If this agreement is terminated by

Digitized by Google

three years' written notice as above specified, the then existing licenses of both parties shall continue during the lives of the several patents. For the purposes of this paragraph, the Telephone Company and the Western Company shall be regarded as one party and the Westinghouse Company as the other party.

VII. This agreement shall be effective from and after the date hereof.

In witness whereof, the parties hereto have caused this instrument to be executed in triplicate as of the day and year first above written, by their proper officers thereunto duly authorized.

EXHIBIT 1

SUBSTITUTE LICENSE AGREEMENT [B2] DATED JULY 1, 1932 BETWEEN GENERAL ELECTRIC COMPANY AND AMERICAN TELEPHONE AND TELEGRAPH COMPANY

Agreement dated July 1, 1932, between General Electric Company, a New York corporation (herein called the General Company), and American Telephone and Telegraph Company, a New York corporation (herein called the Telephone Company).

Whereas the parties hereto heretofore entered into an agreement made the first day of July, 1920, generally known as Agreement "B", which was subsequently modified by an agreement dated July 1, 1926, generally known as "Modified Agreement B", and

Whereas it is now the mutual desire of the parties to substitute therefor this agreement and the licenses herein granted.

Now, in consideration of the premises and the mutual agreements herein contained, the parties agree each with the other as follows:

ARTICLE I. TERMINATION OF EXISTING AGREEMENTS AND LICENSES

The said agreements of July 1, 1920, and July 1, 1926, generally known as Agreement B and Modified Agreement B, respectively, and all licenses therein granted and agreed to be granted are hereby terminated as of the date hereof, and this agreement and the licenses herein granted and agreed to be granted are substituted therefor.

ARTICLE II. DEFINITIONS

For the purposes of this agreement the following terms are defined as follows:

"*Wire telephony*" is the art of communicating or reproducing sound waves (created, directly or indirectly, by the voice or by musical instruments) by means of electricity, magnetism, or electro-magnetic waves, variations or impulses conveyed or guided by wires, and includes all generating, measuring, switching, signaling, and other means or methods incidental to or involved in such communication.

"*Wireless telephony*" has the same meaning as "wire telephony", except that the waves, variations, or impulses are radiated through space.

"*Wire telegraphy*" is the art of communicating messages by code signals (such as the Morse Code, for example) and of picture transmission, by means of electricity, magnetism, or electro-magnetic waves, variations or impulses conveyed or guided by wires, and includes all generating, measuring, switching, signaling, and other means or methods incidental to or involved in such communication, but does not include such devices as annunciators, elevator signals, engine-room telegraphs, etc.

Digitized by Google

"*Wireless telegraphy*" has the same meaning as "wire telegraphy," except that the waves, variations, or impulses are radiated through space.

"*Picture transmission*" is the art of transmitting, or receiving at another point than the point of transmission, by means of electricity, magnetism, or electro-magnetic waves, variations, or impulses, the aspect or shape of things, including pictures, whether still or moving, drawings, writings, forms, and other graphic, printed, and written matter of all kinds; and includes television.

"*Programs*" means pictures, news, music, speeches, sermons, advertising and entertainment, educational and similar matter, or any of them or combinations of any of them, for the purpose of exhibition, entertainment, or instruction.

"*Power purposes*" means all prime movers and their accessories and all generation, use, measurement, control, and application of electricity for light, heat, power, and traction, but does not include any communication purpose.

"*Public address system*" means a combination including one or more telephone transmitters, an electrical amplifier or amplifiers and one or more loud speaking telephone receivers, either adjacent to said transmitters or at a distance therefrom, operating by one-way wire telephony for the reproduction of sound with increased volume; but does not include apparatus for (1) wireless telephone reception, or (2) reception of programs over electric light, electric heat, electric power or electric traction lines, or (3) the production or reproduction of sound from sound records.

"*Phonographs*" means all apparatus for the reproduction of sound from sound records used in or in connection with such apparatus, to be heard in the immediate vicinity of the apparatus, but does not include apparatus for the transmission to, or reception at, other points of sound reproduced from such records.

"*Electric Phonograph*" means a phonograph in which the sound record used therein gives rise to or controls an electric current or electromotive force in such a way that the variations of the electric current or electromotive force correspond in some way to the recorded sounds, and the electric current or electromotive force directly or indirectly brings about the production of the sound from the phonograph.

"*Transoceanic*" communication means all communication which crosses any ocean, gulf, or sea between two continents, or between a continent and an island more than one hundred miles from its shores (islands within one hundred miles of the shore of a continent being considered parts thereof), or between two islands which are not parts of the same continent, except that communication between ships or aircraft, between ships and aircraft, or between ships or aircraft and shore, and communication between parts of the same continent, is not transoceanic communication. North America, including the Panama Canal Zone and all of Central America north thereof, is to be considered as one continent, and South America and all of Central America south of the Panama Canal Zone as another.

"*The United States Government*" means not only the Federal Government but also the Governments of the Philippines, Porto Rico, and other federal possessions, present or future; but does not include any municipal, county, or state government.

"*Train dispatching*" is telegraphic or telephonic conveyance of train orders or operating information between the office of a train dispatcher or similar official and railway trains or other automotive land vehicles (not including airplanes or airships) or points along the line of way, for directing the movements of such automotive vehicles.

"*Railway signalling*" is the operation of signals, switches, brakes, stops, crossing gates, etc., controlling or signalling the movements of trains or other automotive vehicles, controlled by or in accordance with train or vehicle movements or track conditions, including block signalling, cab signals, and train stops. It does not include train dispatching.

"*Apparatus*" includes machines, devices, and appliances and the materials entering into the construction thereof.

"*Household devices*" are electric or electrically operated apparatus, not herein otherwise specified, designed primarily for domestic use, but do not include apparatus for communication purposes.

"*Homes*" means all places of residence, permanent or temporary, including, however, as to hotels, hospitals and club houses only the private living rooms thereof.

"*Amateur*" means one, not a professional investigator, who is more than a mere broadcast listener and who evidences his interest in the art of wireless telephony by study, investigation or experiment in the art.

Digitized by Google

"*Printing telegraph apparatus*" means, and is limited to, mechanisms and devices for use in telegraphy, whether wire or wireless, whereby electrical signals corresponding to the characters of a message.

(*a*) are created in an electric circuit by the operation of a manual device upon which such characters are represented, or by the operation of an automatic transmitter controlled by a tape or other record having holes or other marks corresponding respectively to the characters of the message impressed thereon by the operation of such manual device, and/or

(*b*) are utilized to cause said characters to be successively recorded or displayed (directly or through storage means) in typed or other form, or are utilized to select successively devices or elements corresponding to said characters, and/or

(*c*) are sequentially distributed or delivered by the apparatus referred to in clause (*a*) to a transmission channel (such as a wire circuit, carrier-current circuit, or radio apparatus), or from a transmission channel to the apparatus referred to in clause (*b*);

but this definition does not include the transmission channel or any apparatus, circuits, systems or methods for electrical transmission or reception the functions of which are distinct from those of the apparatus referred to in clauses (*a*), (*b*) or (*c*) hereof, nor any mechanism or devices for enabling automatic comparison of sequential repetition of said signals or records thereof; and this definition does not include any apparatus for "picture transmission" as herein defined.

"*Subsidiaries*" of either party are corporations a majority of whose stock having power to vote for the election of directors is owned, directly or indirectly, either by such party, or by such party and one or more of its other subsidiaries, or by one or more of its other subsidiaries. The party hereto so controlling, directly or indirectly, any subsidiary is herein called the "*parent company*" of such subsidiary.

"*Companies of the Bell System*" are those companies which, in connection directly or indirectly with the Telephone Company, provide a telephone service throughout the United States, or from the United States to foreign countries. These companies at present comprise the Telephone Company, Western Electric Company, Incorporated, Cuban American Telephone and Telegraph Company, and the so-called Associate Companies and Connecting Companies, and the several subsidiaries of each of said Companies.

Any dispute arising as to the meaning or application of the foregoing definitions shall be settled by arbitration, as hereinafter provided.

ARTICLE III. THE PATENTS INCLUDED IN THIS AGREEMENT

The licenses provided for herein are granted and agreed to be granted under all patents, and rights to or under patents, of the United States now or hereafter during the term of this agreement owned or controlled by the parties hereto, and under all such patents hereafter issued upon inventions now or hereafter during said term so owned or controlled, and to the extent to which the parties have or may have the right to grant licenses, in so far as the inventions covered by such patents are or shall be applicable to the respective fields for which said licenses are expressed as granted or to be granted, excepting (1) as otherwise specified in connection with the several grants hereinafter contained, and (2) such patents and inventions as may hereafter be excluded from the operation of this agreement in the following manner:

Each party agrees to furnish to the other, upon request, a list of all United States patents under which said other party is entitled to receive licenses hereunder. Such lists shall separately identify those patents, and shall also include those applications, as to which rights, if granted hereunder, would be restricted in scope or would involve continuing obligations not implied by law. Copies of all contracts creating such restrictions or obligations shall, upon request, be furnished by each party to the other. Thereupon, and within six months after the receipt of the lists to be furnished as aforesaid, each party may in writing advise the other as to the patents and applications described in such list, furnished by the other, which (or the patents to issue on which) it desires to exclude from this agreement; and no licenses are granted by this agreement under any patents so excluded.

Digitized by Google

ARTICLE IV. SCOPE OF LICENSES

1. All of the licenses herein granted are, unless otherwise expressed in connection with the several grants, licenses to use methods and processes, and to make, use, sell, lease or otherwise dispose of apparatus and systems in the fields in which the licenses are granted.

2. A license to make apparatus includes a license to have such apparatus manufactured for the licensee by others, except that no rights are granted to either party to manufacture or to have manufactured, under patents under which it receives licenses hereunder, apparatus of the character at the time manufactured by the other party, except in factories owned or operated by one or the other of the parties hereto, or by their subsidiaries, without the written consent of the party granting such licenses.

3. Every license herein granted to either party includes, unless otherwise herein provided, all incidental rights necessary to the full enjoyment and exercise of the license granted, notwithstanding that such incidental rights may lie primarily in a field in which the said party is not herein expressly granted a license.

4. The making, using, selling, leasing or otherwise disposing of parts is subject to the same restrictions and conditions as are applicable under this agreement to apparatus of which they are or may be parts.

ARTICLE V. RESERVATIONS AND EXCEPTIONS TO WHICH THE LICENSES ARE SUBJECT

1. No licenses are granted by either party with reference to the manufacture or sale of wire or cable for the transmission of electric current for light, heat, traction, or other power purposes, or for telephone or telegraph purposes.

2. No licenses are granted to the Telephone Company for electric lamps or other lighting apparatus (except non-exclusive licenses with reference to telephone and telegraph signal lamps and telephone and telegraph ballast lamps for use solely in fields in which the Telephone Company is otherwise licensed under this agreement).

3. The licenses herein granted to the Telephone Company, in so far as they cover rights to sell or lease carrier current, wireless or vacuum tube apparatus for use on electric railroads, are limited to sales or leases of said apparatus to the railroads.

4. Wherever in this agreement either party receives from the other a license with the right to license others, such party shall have the right to release others for past infringement in the fields for which it receives such licenses and to retain for itself all considerations paid to it on account of such infringements.

ARTICLE VI. LICENSES GRANTED

Subject to the foregoing reservations, each party grants and agrees to grant to the other the following licenses in the following fields of use:

1. *Government Uses.*—Each party grants to the other non-exclusive licenses to make for, and sell or lease to, the United States Government wireless apparatus and systems.

2. *Wireless Telegraphy.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of wireless telegraphy for combined wireless telephone and telegraph sets for use on ships; except that where such combined sets are for use on ocean-going and coast-wise ships of American registry (excluding harbor tug-boats and other harbor craft), said licenses are only to manufacture; and the Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, to use, lease, or sell or otherwise dispose of, but not to manufacture such sets. The Telephone Company agrees, upon request, to make such sets and sell them for such use to the General Company upon reasonable terms.

(*b*) The General Company grants to the Telephone Company non-exclusive licenses in the field of wireless telegraphy to make and use (but not to sell, lease, or otherwise dispose of, except to Companies of the Bell System) apparatus and systems for its own communication or that of Companies of the Bell System, and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement, but not for transmission of messages for the public except temporarily in emergencies due to storms or other catastrophes.

Digitized by Google

(*c*) The General Company grants to the Telephone Company non-exclusive licenses in the field of wireless telegraphy to make and use (but not to sell, lease, or otherwise dispose of, except leases to subscribers in connection with a service given by Companies of the Bell System in this paragraph described) apparatus and systems for the purpose of giving within the continental United States, and between the continental United States and other parts of continental North America, a business, commercial, or official service limited to a particular customer or class of customers and analogous to the service given by Companies of the Bell System by wire telegraphy at the date of this agreement, commonly designated as leased wire or special contract service, but said licenses do not include the making or using of such apparatus for (1) transmission or reception for the public generally or (2) transoceanic communication or (3) transmission or reception of programs.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses in the field of wireless telegraphy to make and use (but not to sell, lease, or otherwise dispose of, except to Companies of the Bell System) apparatus and systems for television for use solely in combination with apparatus and systems for two-way telephony for the purpose of giving a public service combining television and speech, but said licenses do not include the making or using of such apparatus for transmission or reception of programs.

(*e*) The General Company grants to the Telephone Company non-exclusive licenses in the field of wireless telegraphy for combined wireless telephone and telegraph sets, other than sets or transoceanic communication, (1) for use in communication by, with, and between airplanes, airships, and other automotive devices other than ships and railway vehicles, and (2) for export from the continental United States for use for any purpose other than transoceanic communication.

(*f*) The Telephone Company grants to the General Company: (1) exclusive licenses, including the right to grant licenses to others, in the field of wireless telegraphy for purposes of public service communication, subject, however, to non-exclusive rights which the Telephone Company reserves for itself and its present and future subsidiaries under its and their patents to make, use, and sell in said field and to grant to the United States Government licenses to make and to have made for it and to use apparatus for such purposes; and (2) non-exclusive licenses, including the right to grant non-exclusive licenses to others, for all other purposes in the field of wireless telegraphy other than the purposes covered by paragraph (*a*) of this section 2 and by section 8 of this Article VI.

(*g*) The General Company grants to the Telephone Company nonexclusive licenses for printing telegraph apparatus for use in the fields of wire and wireless telegraphy.

(*h*) The Telephone Company agrees that printing telegraph apparatus manufactured by Teletype Corporation (which is a subsidiary of Western Electric Company, Incorporated) shall be sold by Teletype Corporation to the General Company, upon the basis defined in Article X hereof, for use only within the fields for which licenses are herein granted to the General Company. The Telephone Company agrees that Teletype Corporation will grant to the General Company, under patents and inventions owned or controlled by the Teletype Corporation (so far as and to the extent that Teletype Corporation has the right, in view of its existing obligations, to grant such licenses) licenses of the same character and scope as the licenses herein granted by the Telephone Company to the General Company, except that no licenses are agreed to be granted with respect to printing telegraph apparatus under any patents or inventions of the Teletype Corporation; and the General Company agrees that all non-exclusive rights and licenses granted to or reserved by the Telephone Company hereunder may be extended by the Telephone Company to the Teletype Corporation.

(*i*) The licenses granted to the General Company in this section 2 do not cover the use of wireless telegraph stations for giving a telephone service, except as licensed in section 4 of this Article VI.

3. Wire Telegraphy.—(*a*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of wire telegraphy for the transmission and reception of programs over electric light, electric heat, electric power, and electric traction lines, subject, however, to the provisions of paragraph (*b*) of section 5 of this Article VI regarding electrical interference.

Digitized by Google

(*b*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telegraphy to make (but not to sell, lease, or otherwise dispose of) apparatus and systems, and (1) to use such apparatus and systems for its own communication and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement, and (2) to use (but not to furnish to others) such apparatus and systems upon wire telegraph systems owned by it, or leased to it for its operation (other than transoceanic cables), for all purposes other than giving a service by wire telegraphy analogous to the services given by the Companies of the Bell System by wire telegraphy at the date of this agreement, commonly designated as leased wire service, special contract service or teletypewriter exchange service, and other than train dispatching; but no licenses are granted with reference to transoceanic wire telegraphy.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telegraphy for apparatus and systems for communication only in connection with the operation of apparatus for power purposes, but not for transmission of messages for the public.

(*d*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telegraphy for apparatus and systems for communication between parts of a train (without regard to the nature of the motive power thereof), or between trains following or approaching each other upon the same system of tracks, or between trains approaching a cross-over or junction point of the systems of tracks upon which they are running, or between trains and signal towers or way-stations within short distances thereof, but in each instance only for use in connection with the operation of such trains but not for train dispatching.

(*e*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for all purposes in the field of wire telegraphy (other than that covered by paragraph (*a*) of this section 3) on land, and over ocean cables not more than one hundred miles in length, and between the main body of the United States and Cuba; but no licenses are granted with reference to other transoceanic wire telegraphy.

4. Wireless Telephony.—A. In general.—(*a*) The Telephone Company grants to the General Company nonexclusive licenses in the field of wireless telephony to make and use (but not to sell, lease or otherwise dispose of) apparatus and systems for its own communication and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement, but not for transmission of messages (as distinguished from programs) for the public except temporarily in emergencies due to storms or other catastrophes.

(*b*) The Telephone Company grants to the General Company nonexclusive licenses, including the right to grant non-exclusive licenses to others in the field of amateur wireless telephony; and the General Company grants to the Telephone Company non-exclusive licenses to make and sell apparatus in the field of amateur wireless telephony limited as hereinafter in this paragraph (*b*) provided. The licenses by this paragraph (*b*) granted by the Telephone Company to the General Company shall be free of royalties, but all apparatus sold by the Telephone Company under the licenses granted by this paragraph (*b*) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of paragraph (*d*) of subdivision C of this section 4 and shall be governed by all the provisions of said paragraph (*d*).

(*c*) Each party grants to the other non-exclusive licenses for headphones for all purposes in all fields covered by this agreement; provided, however, that headphones sold by the Telephone Company as part of complete apparatus for one-way wireless telephone reception of programs shall be included in the determination of the royalties payable by the Telephone Company under the provisions of paragraph (*d*) of subdivision C of this section 4.

(*d*) Each party grants to the other non-exclusive licenses in the field of wireless telephony for apparatus and systems for communication only in connection with the operation of apparatus for power purposes, but not for transmission of messages for the public.

(*e*) Each party grants to the other non-exclusive licenses in the field of wireless telephony for apparatus and systems for communication between parts of a train (without regard to the nature of the motive power thereof), or between trains following or approaching each other upon the same system of tracks, or between trains approaching a cross-over or junction of the systems

Digitized by Google

of tracks upon which they are running, or between trains and signal towers or way-stations within short distances thereof, but in each instance only for use in connection with the operation of such trains but not for train dispatching.

B. *Two-way wireless telephony.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of two-way transoceanic wireless telephony to make and use (but not to sell, lease or otherwise dispose of) apparatus and systems for use in the continental United States; but such licenses do not include use for transmission or reception of messages offered for telephonic transmission.

(*b*) The General Company grants to the Telephone Company non-exclusive licenses in the field of two-way transoceanic wireless telephony, to make and sell to stations outside the continental United States engaged in cooperation with the Telephone Company in giving for the public a transoceanic telephone service, apparatus for use in giving such service; and the Telephone Company grants to the General Company non-exclusive licenses including the right to grant non-exclusive licenses to others in the field of two-way transoceanic wireless telephony for apparatus for export from the continental United States.

(*c*) The Telephone Company grants to the General Company non-exclusive rights in the field of two-way wireless telephony for combined wireless telephone and telegraph sets, other than sets for transoceanic communication, (1) for use in communication by, with, and between airplanes, airships and other automotive devices other than ships and railway vehicles, and (2) for export from the continental United States for use for any purpose other than transoceanic communication.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of two-way wireless telephony (other than in the field of transoceanic wireless telephony) for all purposes other than the purposes covered by subdivision A of this section 4.

(*e*) The licenses granted to the Telephone Company in this subdivision B do not include the use of wireless telephone stations for giving a telegraph service, except as licensed in section 2 of this Article VI.

C. *One-way wireless telephony.*—(*a*) Each party grants to the other non-exclusive licenses in the field of one-way wireless telephony for apparatus and systems for the purpose of giving a business, commercial, or official service limited to a particular customer or class of customers; but the licenses granted by this paragraph (a) do not include the making or using of such apparatus for (1) transmission or reception of messages for the public generally or (2) transmission or reception of programs; and the licenses granted to the Telephone Company with respect to transmission for the purposes covered by this paragraph (a) include only apparatus for the transmission of such service from and within the continental United States.

(*b*) Each party grants to the other non-exclusive licenses in the field of one-way wireless telephony for apparatus and systems for use for transmitting for purposes other than that covered by paragraph (*a*) of this subdivision C, including, however, apparatus for wireless telephone reception furnished as a part of the equipment of transmitting stations; but the licenses granted by this paragraph (*b*) do not include apparatus in the field of amateur wireless telephony.

(*c*) The General Company grants to the Telephone Company non-exclusive licenses to make and use (but not to sell, lease, or otherwise dispose of, except to Companies of the Bell System) apparatus for one-way wireless telephone reception (including apparatus for the reception of programs) for its own communication or that of Companies of the Bell System, and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses for apparatus for one-way wireless telephone reception of programs; provided, however, that the licenses granted in this paragraph (*d*) shall be subject to the following terms and limitations:

(1) Tubes (thermionic devices) sold as separate devices for use in apparatus covered by this paragraph (*d*), or in apparatus which under other provisions of this agreement shall be treated as apparatus covered by this paragraph (*d*), shall be to the amount of $1,000,000 free of royalties during each calendar year, and said tubes in excess of said amount in any year shall

Digitized by Google

be subject to a royalty of five percent computed as hereinafter provided; but no licenses are granted in this paragraph (d) for tubes in excess of $2,000,000 in amount or 1,000,000 in number during any calendar year; and provided further that where said tubes are sold as parts of receiving sets or other complete units designed for operation with such sets, such tubes shall be treated as parts of the receiving set or other unit and shall not be classified under this subparagraph (1).

(2) Receiving sets and apparatus which under other provisions of this agreement shall be treated as apparatus covered by this paragraph (*d*), or parts thereof (including loud speakers, amplifiers, and tubes other than thermionic devices), shall be to the aggregate amount of $1,500,000 free of royalty in each calendar year, and such sets, apparatus, or parts in excess of said amount shall be subject to a royalty of five percent computed as hereinafter provided; but no licenses are granted in this paragraph (d) for receiving sets, apparatus and parts in excess of $3,000,000 in amount in any calendar year, provided, that if the sales of tubes sold as separate devices amount to less than $2,000,000 during any year, the amount of such deficiency shall be added to the amount of receiving sets, apparatus, and parts which may be sold under the license granted in this paragraph (*d*).

(3) For any portion of the first or last calendar year of this agreement, less than an entire calendar year, during which royalties shall be payable hereunder, the amounts which may be sold free of royalty and subject to royalty respectively shall be those proportions of the amounts which may be sold free of royalty and subject to royalty respectively in the entire calendar year which said fractional part of a calendar year bears to a calendar year.

(4) The forementioned amounts sold free of royalty, and the amounts subject to royalty, shall be based on the price at which the apparatus is sold by the manufacturer thereof, before cash discount, freight and advertising allowances or other similar deductions.

(5) Sales for export shall be included in determining the amounts sold free of royalty, and the amounts subject to royalty, on the basis of the price at which the sale is made.

(6) In ascertaining the amount of the sales which are free from royalty and the amount of the sales upon which royalties are to be paid hereunder, where apparatus is sold any part of which embodies any invention of any of the patents in force at the time of such sale under which licenses are granted in this paragraph (*d*), the selling price of the apparatus sold shall be taken as the basis; but apparatus not covered by any of said patents when sold not assembled for operation with apparatus covered by such patents, shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty, unless such apparatus not covered by such patents is adapted for operation with apparatus covered by such patents and is sold in such manner that its sale or its use in connection with apparatus covered by such patents would, except for the licenses granted by this paragraph (*d*), constitute contributory infringement of the patents under which such licenses are granted. Where radio receiving sets are sold for use in combination with public address apparatus or other apparatus not subject to royalties under this agreement, the sale price of the public address or other apparatus shall not be included in the amount of the sales which are free from royalty or the amount of the sales which are subject to royalty. Chemical primary batteries, wet or dry, and chemical storage batteries, not sold as part of apparatus upon which royalties are payable hereunder, or wiring in a building in connection with a sale of such apparatus, shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty.

(*e*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for apparatus and systems for one-way wireless telephone reception of programs.

(*f*) Subdivision A of this section 4 and paragraphs (*a*) to (*e*), inclusive, of this subdivision C are intended to make provision for all anticipated fields of use of apparatus for one-way wireless telephone receiption. If it should develop that there are other fields of use of such apparatus not covered herein licenses shall be granted in such other fields of use to the respective parties in accordance with the principle underlying said other paragraphs of this subdivision C, with special reference to the interest of the General Company in the field of one-way wireless telephone reception of programs, one the one hand, and of the Telephone Company in the field of one-way wireless telephone reception for

Digitized by Google

giving a service of a business, commercial or official nature, on the other hand. If the parties cannot agree with respect to such licenses, their respective rights shall be determined by arbitration in accordance with the provisions of Article XIII.

5. *Wire Telephony.*—(*a*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, and the General Company grants to the Telephone Company non-exclusive licenses, in the field of wire telephony for apparatus for carrier current telephone communication, both one-way and two-way, over electric light, electric heat, electric power and electric traction lines, or partly over such lines and partly across wireless gaps, but in each instance only for the use of the owner or operator of such lines in the business of such owner or operator, and not for transmission of messages for the public except temporarily in emergencies due to storms or other catastrophes.

(*b*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of one-way wire telephony for apparatus for the transmission and reception of programs over electric light, electric heat, electric power, and electric traction lines including the use of such lines for pick-up lines or for connecting two or more separate electric systems in connection with the transmission or reception of programs over such lines or by means of wireless telephony, but not including the use of other wires for such purposes except as licensed in paragraph (*c*) of this section 5; provided, however, that no apparatus is licensed under this paragraph (*b*), or under paragraph (*a*) of section 3 of this Article VI, the use of which would electrically interfere unreasonably with the Telephone Company's systems of wire communication for which it is licensed under this agreement, as the same may now exist or may hereafter normally be developed, or with any system of the Telephone Company for transmitting programs by wire telephony over lines other than electric light, electric heat, electric power, and electric traction lines, where such system exists prior to the installation in the same locality by the General Company of apparatus licensed under this paragraph (*b*), and the Telephone Company shall be the sole judge of the existence of such unreasonable interference. The Telephone Company agrees whenever requested by the General Company, but at the expense of the General Company consented to by it before being incurred, to co-operate with the General Company in every reasonable way to enable the General Company to develop apparatus within the licenses granted by this paragraph (*b*) which will avoid such electrical interference.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony, both one-way and two-way, to make (but not to sell, lease, or otherwise dispose of) apparatus and systems, and to use such apparatus and systems solely upon systems owned by it, for its own communication and for use solely as an incidental facility in fields in which it is otherwise licensed under this agreement, but not for transmission of messages (as distinguished from programs) for the public except temporarily in emergencies due to storms or other catastrophes. The Telephone Company agrees to furnish to the General Company, when requested, pick-up or connecting wires, if available, for its use in the transmission of programs to or from its stations for such transmission either by means of wireless telephony or over electric light, electric heat, electric power, and electric traction lines, or for its use in electrical sound recording, on terms at least as favorable as the terms given to others than the General Company, and agrees that in furnishing such pick-up and connecting wires for such service there shall be no discrimination against the General Company.

(*d*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony for apparatus for the distribution, to an assembled audience, or to rooms within a building or a group of substantially adjacent buildiugs commonly owned or operated, or to rooms within a ship, airship, or train, of matter from apparatus for one-way wireless telephone reception, or from apparatus for reception in the field covered by paragraph (*b*) of this section 5, or from phonographs, in each case located in the immediate vicinity of such audience or within the building or group of buildings, ship, airship, or train within which such distribution is made.

(*e*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony, both one-way and two-way, for apparatus and systems for communication only over wires used in connection with apparatus for remote control or actuation of apparatus for power purposes

Digitized by Google

and only in connection with the operation of apparatus for power purposes, but not for transmission of messages for the public.

(*f*) The Telephone Company grants to the General Company non-exclusive licenses in the field of wire telephony, both one-way and two-way, for apparatus for communication between parts of a train (without regard to the nature of the motive power thereof), or between trains following or approaching each other upon the same system of tracks, or between trains approaching a cross-over or junction point of the systems of tracks upon which they are running, or between trains and signal towers or way-stations within short distances thereof, but in each instance only for use in connection with the operation of such trains but not for train dispatching.

(*g*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of wire telephony, both one-way and two-way, for all purposes other than for the purposes covered by the paragraphs (*a*) and (*b*) of this section 5; provided, however, that the licenses granted by this paragraph (*g*) for apparatus for reception of programs in connection with a service of transmitting programs by wire telephony (analogous to wireless broadcasting) over lines other than electric light, electric heat, electric power and electric traction lines, are licenses only to make and use, to lease to subscribers to such a service, and to sell only at retail (except as to sales for export) either directly or through the Telephone Company's own direct agents, and said licenses are subject to the condition that the Telephone Company shall retain in itself, or in one or more of its subsidiaries, title to the apparatus and control of its disposition until it is so sold.

6. *Power Purposes and Household Devices.*—The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the fields of (*a*) distance actuation and control by wireless, (*b*) power purposes (including apparatus for distance actuation and control of apparatus for power purposes and apparatus for indicating at remote points the condition or position, of apparatus for power purposes) and (*c*) household devices, in each case for purposes other than communication purposes.

7. *Railroad Signalling, Radio Goniometry, X-ray Apparatus.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses in the field of radio goniometry for apparatus for use as part of apparatus in respect of which the Telephone Company is otherwise licensed under this agreement.

(*b*) The General Company grants to the Telephone Company non-exclusive licenses in the field of railway signalling for apparatus incidental to apparatus for train dispatching, for use only by the train dispatcher or similar official for operating at will, and not automatically, signals, switches, brakes, and stops.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the fields of railroad signalling, X-ray apparatus and apparatus associated therewith, and radio goniometry.

8. *Train Dispatching.*—The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, in the field of train dispatching.

9. *Electric Sound Recording.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electrical apparatus for the production of sound records (which records are for the private use of the maker, and not for commercial use or sale) in combination or connection with apparatus in the field of wire telephony other than in connection with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI.

(*b*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electrical apparatus for the production of sound records (which records are for the private use of the maker and not for commercial use or sale) in combination or connection with apparatus for one-way wireless telephone reception of programs and with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI.

(*c*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electrical apparatus for the production in homes (which records are for the private use

Digitized by Google

of the maker and not for commercial use or sale) of sound records of entertainment and educational matter, other than apparatus covered by paragraphs (*a*) and (*b*) of this section 9.

(*d*) The General Company grants to the Telephone Company non-exclusive licenses for electrical apparatus for the production of sound records in homes, for entertainment or educational purposes (which records are for the private use of the maker and not for commercial use or sale), provided that all apparatus sold under the licenses granted in this paragraph (other than that covered by paragraphs (*a*) and (*e*) hereof) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of paragraph (*d*) of sub-division C of Section 4 of Article VI and all of the provisions of said paragraph (*d*) shall apply thereto.

(*e*) Each party grants to the other non-exclusive licenses for electrical apparatus for the production of sound records other than apparatus covered by paragraphs (*a*), (*b*), (*c*), and (*d*) of this section 9.

10. *Electric Phonographs.*—(*a*) The General Company grants to the Telephone Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electric phonographs for use in combination or connection with apparatus in the field of wire telephony other than in combination or connection with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI; provided, however, that the licenses granted by this paragraph (*a*) for phonographs for private use in homes for entertainment and educational purposes are licenses only to make and use in connection with a service of transmitting programs by wire telephony over lines other than electric light, electric heat, electric power, and electric traction lines, to lease to subscribers to such a service, and to sell only at retail (except as to sales for export) either directly or through the Telephone Company's own direct agents, and said licenses are subject to the condition that the Telephone Company shall retain in itself, or in one or more of its subsidiaries, title to the apparatus and control of its disposition until it is so sold.

(*b*) The General Company grants to the Telephone Company a non-exclusive license for electric phonographs (including electric phonographs in combination or connection with apparatus for wireless telephone reception) for private use in homes for entertainment and educational purposes, other than for the purposes covered by paragraph (*a*) of section 10 of this Article VI, but all apparatus sold by the Telephone Company under the licenses granted by this paragraph (*b*) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of paragraph (*d*) of sub-division C of section 4 of Article VI and shall be governed by all of the said provisions of said paragraph (*d*).

(*c*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others for electric phonographs in combination or connection with apparatus for one-way wireless telephone reception, and in combination or connection with apparatus in the field covered by paragraph (*b*) of section 5 of this Article VI.

(*d*) The Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for electric phonographs for private use in homes for all entertainment and educational purposes other than those covered by paragraphs (*a*) and (*c*) of this section 10.

(*e*) Each party grants to the other non-exclusive licenses for electric phonographs for all purposes other than those covered by paragraphs (*a*), (*b*), (*c*), and (*d*) of this section 10.

11. *Apparatus for Co-ordination of Sound and Pictures.*—(*a*) The rights and licenses of the parties hereto in respect of apparatus for transmitting, receiving, recording, or reproducing sound in co-ordination, synchronism, or timed relation with the taking, transmission, or projection of pictures shall, in so far as the fields of wire and wireless telegraphy and telephony, electrical sound recording and electric phonographs are involved, be governed by the other provisions of this agreement relating to said fields.

(*b*) In so far as apparatus for the taking or projection of pictures and apparatus for co-ordinating, synchronizing, or timing such taking or projection in relation to the recording or reproduction of sound are not covered by the provisions of paragraph (*a*) of this section 11, the Telephone Company grants to the General Company non-exclusive licenses, including the right to grant non-exclusive licenses to others, for such apparatus for private use in homes for entertainment and educational purposes, and each party

Digitized by Google

grants to the other non-exclusive licenses for such apparatus for all other purposes.

(*c*) The General Company grants to the Telephone Company a non-exclusive license for apparatus for private use in homes for entertainment and educational purposes for the projection of pictures and the reproduction of sound from sound records in co-ordination, synchronism or timed relation therewith, but all apparatus sold by the Telephone Company under the licenses granted by this paragraph (*c*) shall be treated as if such apparatus were apparatus for one-way wireless telephone reception of programs under the provisions of paragraph (*d*) of sub-division C of section 4 of this Article VI and shall be governed by all of said provisions of said paragraph (*d*).

12. *Public Address Systems.*—The Telephone Company grants to the General Company non-exclusive licenses for public address systems, including the combination or connection thereof with other apparatus for which the General Company is otherwise licensed hereunder, provided, however, that the licenses granted in this section 12 (1) do not include apparatus for giving by wire telephony a service analogous to wireless broadcasting (but do include apparatus for use in localities specified in paragraph (*d*) of section 5 of this Article VI), and (2) shall be subject to the following terms and limitations:

(1) Public address system apparatus and parts thereof shall be to the aggregate amount of $1,500,000 free of royalty in each calendar year and such apparatus and parts thereof in excess of said amount shall be subject to a royalty of 5% computed as hereinafter provided; but no license is granted for public address system apparatus and parts thereof in excess of $5,000,000 in amount during any calendar year.

(2) For any portion of the first or last calendar year of this agreement, less than an entire calendar year, during which royalties shall be payable hereunder, the amounts which may be sold free of royalty and subject to royalty respectively shall be those proportions of the amounts which may be sold free of royalty and subject to royalty respectively in the entire calendar year which said fractional part of a calendar year bears to a calendar year.

(3) The aforementioned amounts sold free of royalty, and the amounts subject to royalty, shall be based on the price at which such apparatus is sold by the manufacturer thereof, before cash discount, freight, and advertising allowances or other similar deductions.

(4) Sales for export shall be included in determining the amounts sold free of royalty, and the amounts subject to royalty, on the basis of the price at which the sale is made.

(5) In ascertaining the amount of the sales which are free from royalty and the amount of the sales upon which royalties are to be paid hereunder, where apparatus is sold any part of which embodies any invention of any of the patents in force at the time of such sale under which licenses are granted in this section 12, the selling price of the apparatus sold shall be taken as the basis; but the apparatus not covered by any of said patents, when sold not assembled for operation with apparatus covered by such patents, shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty, unless such apparatus not covered by such patents is adapted for operation with apparatus covered by such patents and is sold in such manner that its sale or its use in connection with apparatus covered by such patents would, except for the licenses granted by this agreement, constitute contributory infringement of the patents under which such licenses are granted. Where public address system apparatus is sold for use in combination with apparatus for one-way wireless telephone reception of programs, the sale price of such receiving apparatus shall not be included in the amount of the sales which are free from royalty or the amount of the sales which are subject to royalty. Chemical primary batteries, wet or dry, and chemical storage batteries not sold as part of apparatus upon which royalties are payable hereunder, or wiring in a building in connection with a sale of apparatus shall not be taken into account in computing the amount of sales which are free from royalty or the amount of sales which are subject to royalty.

13. *Submarine Signaling, Scientific and Therapeutic Apparatus, Tools and Other Applications.*—Each party grants to the other, non-exclusive licenses in the following fields:

Submarine signaling.

Scientific apparatus for use of laboratories, colleges, and scientific societies as distinguished from commercial use.

Digitized by Google

Mechanical phonographs.

Wireless apparatus for use of professional investigators (as distinguished from amateurs) for experimental purpose only.

Therapeutic apparatus other than X-ray devices and appliances.

Tools, machinery, appliances, materials, methods, and processes for the manufacture, installation, and repair of apparatus for use in fields for which the grantee is licensed hereunder.

All applications, not herein otherwise specified, of inventions pertaining or applicable to or to the use of vacuum tubes, and to generating (directly or from other currents), modifying, amplifying, transmitting, or receiving electromagnetic waves, variations, or impulses for other than power purposes.

ARTICLE VII. PROVISIONS WITH REFERENCE TO FOREGOING LICENSES

1. Whenever licenses granted under the terms of this agreement are based upon rights held by the licensor under any agreement requiring the payment of royalties or other deferred payments, measured by the use made of the invention, the party accepting such licenses shall make payments measured by its use of the invention at the same rate and upon the same terms as those agreed to be made by the party originally acquiring the rights.

2. Upon the termination of this agreement under the provisions of Article XIV hereof all licenses herein granted shall, during the terms of the several patents, issued or to be issued, in respect of which such licenses exist at the date of termination, continue unaffected and of the same scope and character herein expressed, so far as the grantor thereof has the right to grant such licenses for such terms; and such licenses shall not be limited by the term of this agreement.

3. (*a*) The Telephone Company may grant sub-licenses to the operating Companies of the Bell System (but not manufacturing companies) which now or may from time to time be giving a communications service.

(*b*) Each party hereto may grant to its subsidiaries sub-licenses under the licenses granted to it herein; provided, however, that each subsidiary to which a sub-license shall be granted (excepting, however, sub-licenses pursuant to paragraph (*a*) of this section 3 and except also the Teletype Corporation as to which special provision is made elsewhere in this agreement) shall either have entered into an agreement with its parent company effectively subjecting to this agreement all United States patents then or thereafter during the term of this agreement owned or controlled by it, or have executed to the party hereto other than its parent company an instrument granting to such other party licenses under said patents co-extensive with the licenses herein granted to such other party. Use by any subsidiary of any sub-license granted under this agreement shall for all purposes of this agreement, including determination of royalties payable hereunder, be deemed to be use by its parent company, and ownership, lease or operation of any telephone or telegraph system or station by any subsidiary shall be deemed to be ownership, lease or operation of such system or station by its parent company for all purposes of this agreement. Wherever in this agreement either party is granted a general right to grant non-exclusive licenses to others such rights shall nevertheless be subject to the provision of this paragraph (*b*) so far as concerns the grant of sub-licenses to subsidiaries.

(*c*) In addition to the sublicensing provided for in the foregoing paragraphs (*a*) and (*b*), each party hereto may assign or grant sub-licenses under any of the rights granted to it hereunder, which are not expressed as including the right to grant sublicenses to others, provided that in each instance the assent of the other party is first obtained.

(*d*) When either party shall enter into an agreement with any of its subsidiaries effectively subjecting to this agreement all United States patents then or thereafter during the term of this agreement owned or controlled by such subsidiary, such party shall promptly give the other party appropriate notice of such agreement.

(*e*) Each party shall enter into an agreement with each of its subsidiaries which is engaged primarily or wholly in the conduct of research and development work in the fields for which licenses are granted to the other party under this agreement whereby the United States patents owned or controlled by such subsidiary during the term of this agreement shall become effectively subject to this agreement.

Digitized by Google

(*f*) Each party may, subject to the provisions of section 4 of this Article VII, sell or lease to any sub-licensee having a sub-license to use granted under under the provisions of any of paragraphs (*a*), (*b*), and (*c*) of this section 3, apparatus for the use of such sub-licensee under such sub-license, notwithstanding that the party granting such sub-license may not be licensed under this agreement generally to sell, lease or otherwise dispose of such apparatus.

(*g*) All sub-licenses granted hereunder shall be subject to all limitations and obligations attaching to the apparatus or system in respect of which sub-licenses are granted, whether under the patents, or under the instruments by which any party acquired the patents or licenses under them, or under this agreement.

(*h*) No disposition by either party of rights hereunder acquired by it, shall relieve such party of any of its obligations under this agreement, or restrict the rights of the parties hereto in operating under or modifying this agreement.

4. Each party agrees that, so far as practicable, it will, in disposing of apparatus embodying inventions pertaining or applicable to vacuum tubes, or to generating, modifying, amplifying, transmitting, or receiving electro-magnetic waves, or other apparatus or material the unrestricted sale of which would deprive the other party of rights to which it is entitled hereunder, use such precautions by contracts, leases, restricted licenses, or otherwise as may be necessary or advisable in order to prevent its subsidiaries, sub-licensees, customers, or others from acquiring (by acquisition of apparatus from it or otherwise) licenses to use the same which the party disposing thereof has no right to grant.

5. All royalties payable under any provision of this agreement shall continue to be payable to the ends of the terms of the patents in respect of which such royalties are payable, notwithstanding any termination of this agreement.

6. The admission of validity implied in the acceptance of licenses hereunder is limited to the field for which such licenses are granted or agreed to be granted.

7. No licenses under foreign patents are now granted or are to be implied; but except as herein otherwise expressly provided the licenses to make, sell, lease, or otherwise dispose of, herein granted under United States patents include the right to make, sell, lease, or otherwise dispose of for use abroad in the fields for which such licenses under United States patents are granted, but not for use abroad in other fields. Each party agrees not to export to any country in which the other party has an affiliated company, apparatus purchased from such other party which such other party could not itself so export, in view of existing contract obligations, after notice of such obligations and without first securing a written waiver thereof.

8. Each party represents that in its best judgment it has no outstanding obligations which would prevent it from entering into the agreements and from granting the licenses herein expressed. If, however, it is found that there are such conflicting obligations, the present agreement is made subject to the right to fulfil those obligations.

ARTICLE VIII. INTERFERENCES

The parties agree to use reasonable endeavors to settle, without litigation, interferences now pending or which may arise involving inventions within the scope of this agreement.

ARTICLE IX. CO-OPERATION AND EXCHANGE OF INFORMATION

1. Each party agrees that it will, from time to time during the term of this agreement, freely permit the other to have all information in its possession which it may have a right to dispose of with reference to its standardized apparatus or methods or processes applicable to the uses of the other party in fields in which such other party is granted licenses hereunder, but any secret process so disclosed shall be maintained in secrecy by the party to whom it is disclosed. Blue prints, etc., shall be furnished at the cost of preparing the same. For the purpose of acquiring such information each party shall at all reasonable times have access (through a reasonably limited number of accredited representatives who are regular employees under obligation to assign inventions to their employers), to the laboratories, factories, and wireless stations of the other, to the end that development work may be expedited and rendered the more effective.

Digitized by Google

Each party shall, with reference to inventions owned or controlled by it, under which the other party is entitled to rights hereunder and which either party deems to be of sufficient value to justify such action, endeavor to obtain or permit and aid the other to obtain proper patents thereon.

2. Each party shall afford the engineering representatives of the other the fullest facilities, consistent with the reasonable operation of the other, for experimenting and for developing and testing apparatus and systems for use in transoceanic telephony, and each shall at all times be given such an opportunity to make such tests, experiments, and observations in the transoceanic stations of the other as do not conflict with the service then being rendered by such stations, and each party shall afford to the other such facilities for test, experimentation, and observations on ships as it may be able to extend.

3. In the operation of wireless and carrier-current communication, the parties shall co-operate to the end that interference with the operations of either party, due to the operations of the other, shall be minimized, it being recognized that the available wave lengths are limited.

ARTICLE X. PURCHASES AS BETWEEN PARTIES

It is recognized that each party has and will normally continue to have facilities for manufacturing certain apparatus or parts thereof which may be required by the other party under its licenses hereunder, and that a duplication of such facilities may be wasteful and uneconomical. Each party agrees that it will upon request manufacture for and sell and deliver to the other, with reasonable business promptness and within its reasonable manufacturing capacity, on receipt of orders from time to time, and at favorable prices not to exceed those charged to others (except subsidiaries and, in the case of the Telephone Company, Companies of the Bell System) purchasing in like quantities for use in the United States, such apparatus and parts as the former is engaged in manufacturing from time to time and as the latter may desire for use in the fields for which licenses are granted to it by this agreement.

ARTICLE XI. LITIGATION

1. Neither party shall bring suit for infringement of patents against the other party, or against the distributors and jobbing houses owned by or affiliated with either party, because of sales by such party, or by its (or its subsidiaries') distributors or jobbing houses, of apparatus made, in the United States, by others than the parties hereto, it being agreed that the remedy in case of any such infringement shall be only by suit against the manufacturer of those devices; but nothing herein contained shall be construed as the granting of a right to sell infringing apparatus manufactured by others.

2. In all cases of infringement of a patent of either party in a field in which the licenses herein granted to the other party include the general right to grant sub-licenses, if the party holding title to such patent shall not bring suit against the infringer within thirty days after receipt from the other party of written notice and full information of such infringement together with a written offer from such other party to pay half the cost and expenses of such suit, then (*a*) the party having given such notice, information and offer may at its own expense bring suit against the infringer in question in the name of the party holding legal title to the patent, and (*b*), such party holding title to the patent shall assign to the other party all claims, demands, and rights of action against the particular infringer designated in such notice on account of any and all past and future infringements of such patent in said field.

3. If, however, the party holding title to such patent shall bring suit against the infringer within thirty days after receipt of said notice and information from the other party, then any recoveries from the infringer shall be applied first toward the reimbursement of the costs and expenses of such suit, and the remainder, if any, shall be divided between the parties as their interests appear. In any such case the party holding title to the patent in suit shall not release or license the infringer or otherwise settle or dismiss the suit without the consent of the party having the general right to grant sub-licenses.

ARTICLE XII. RELEASES

Each party reserves to itself the right to deal with the United States Government with reference to settlement for past use of its inventions in telephone and telegraph apparatus and systems. Subject to the foregoing, each party releases

Digitized by Google

the other and the vendees and users of apparatus or systems made by it, from all claims growing out of past infringement of patents, by reason of the manufacture, use and sale of such apparatus and systems by the other party, and its resale or use by such vendees and users.

ARTICLE XIII. ARBITRATION

In case any controversy under this agreement (except in respect of interference or priority of rights to inventions or patents) shall arise between the parties to this agreement, which they are unable to adjust between themselves, it shall be settled by arbitration pursuant to the Arbitration Law of the State of New York in the following manner:

Either party may by notice in writing served on the other, appoint one arbitrator and call upon the other to appoint a second arbitrator within thirty days after the receipt of such notice; and each party agrees that upon receiving any such notice it will so appoint an arbitrator. The two arbitrators thus appointed shall, within thirty days after the appointment of the one last appointed, jointly appoint a third arbitrator. The controversy shall be submitted to the three arbitrators in such manner as they shall direct and their decision, or the decision of a majority of them, rendered in writing, shall be final, conclusive, and binding upon the parties. In the event that a second arbitrator shall not be appointed as above provided or the two arbitrators first appointed shall fail to appoint a third, application may be made by either party to the Supreme Court of the State of New York, or to a judge thereof, to designate and appoint an arbitrator or arbitrators, as the case may require, as provided by said Arbitration Law. Each party shall pay its own expenses in connection with the arbitration but the compensation and expenses of the arbitrators shall be borne in such manner as may be specified in their decision in writing.

ARTICLE XIV. TERMINATION OF AGREEMENT

This agreement shall continue until December 31, 1954, but shall automatically continue thereafter until cancelled on three years' written notice given after December 31, 1951, by one party to the other party.

ARTICLE XV. FURTHER ASSURANCES

The parties agree to execute and deliver such further instruments as may reasonably be necessary for carrying out the provisions and purposes of this agreement.

ARTICLE XVI. SUCCESSORS

This agreement is binding upon and shall inure to the benefit of each of the parties hereto and their several successors in business, except that either party may transfer or dispose of any part or parts of its business not involving the grant of any licenses under this agreement, and in such case this agreement shall not be binding upon or inure to the benefit of the successor to that part of the business so transferred.

In witness whereof the parties hereto have caused this instrument to be executed on the day and year first above written, by their proper officers thereunto duly authorized.

EXHIBIT 2

SUBSTITUTE EXTENSION AGREEMENT

Agreement, dated July 1, 1932, between General Electric Company, a New York corporation (hereinafter called the General Company), Radio Corporation of America, a Delaware corporation (hereinafter called the Radio Company),

Digitized by Google

American Telephone and Telegraph Company, a New York corporation (hereinafter called the Telephone Company), and Western Electric Company, Incorporated, a New York corporation (hereinafter called the Western Company).

Whereas the parties hereto have heretofore entered into an agreement dated July 1, 1920, known as the Extension Agreement, in which agreement reference is made to a License Agreement dated July 1, 1920, between the General Company and the Telephone Company;

Whereas the General Company and the Telephone Company have entered into an agreement dated July 1, 1926, of which the parties hereto have knowledge, modifying said License Agreement dated July 1, 1920;

Whereas the parties hereto, under date of July 1, 1926, have entered into an agreement generally known as Modified Agreements C and X modifying said Extension Agreement; and

Whereas the General Company and the Telephone Company have entered into an agreement dated July 1, 1932, of which the parties hereto have knowledge, which is a substitute license agreement for said License Agreement dated July 1, 1920, as modified by Agreement dated July 1, 1926; and

Whereas the General Company desires to extend rights under said Substitute License Agreement of July 1, 1932, to the Radio Company; and

Whereas the Telephone Company desires to extend rights under said Substitute License Agreement of July 1, 1932, to the Western Company; and

Whereas the Radio Company and the Western Company, respectively, desire to obtain such rights and the assent of both parties to the Substitute License Agreement of July 1, 1932, may be desirable or necessary for the extension of such rights;

Whereas it is now the mutual desire of the parties to substitute this agreement and the licenses herein granted for said Extension Agreement dated July 1, 1920, as modified by an agreement known as Modified Agreements C and X dated July 1, 1926.

Now, therefore, in consideration of the premises and the mutual agreements herein contained, the parties agree with each other as follows:

I. The said agreements between the parties hereto, dated July 1, 1920, and July 1, 1926, generally known as the Extension Agreement and Modified Agreements C and X, respectively, and all licenses therein granted and agreed to be granted, are hereby terminated as of the date hereof, and this agreement and the licenses herein granted and agreed to be granted are substituted therefor.

II. The General Company may extend to the Radio Company, and the Telephone Company may extend to the Western Company, any of the said rights reserved and acquired by each, respectively, under this present agreement and under said Substitute License Agreement of July 1, 1932, whether or not expressed in said Substitute License Agreement of July 1, 1932, as including the right to grant sub-licenses, or as personal or non-assignable, except any right to terminate under the provisions of Article XIV or said agreement.

III. The Western Company hereby grants and agrees to grant to the General Company under the present and future patents of the Western Company, rights of the same character and scope, and for the same fields and subject to the same limitations and conditions, as the rights granted to the General Company in and by said Substitute License Agreement of July 1, 1932. And the Western Company hereby assumes toward the General Company (and the Telephone and Western Companies assume toward the Radio Company, to the extent that the General Company, under the provisions of Article II hereof, extends or may hereafter extend its rights to the Radio Company) obligations similar to the obligations assumed by the Telephone Company toward the General Company in and by said Substitute License Agreement of July 1, 1932, except that the Western Company assumes no obligations as to operation of telephone or telegraph systems unless and until it shall engage in the commercial operation of such systems.

IV. The Radio Company hereby grants and agrees to grant to the Telephone Company under the present and future patents of the Radio Company, rights of the same character and scope, and for the same fields and subject to the same limitations and conditions, as the rights granted to the Telephone Company in and by said Substitute License Agreement of July 1, 1932. And the Radio Company hereby assumes toward the Telephone Company (and the General and Radio Companies assume toward the Western Company, to the extent that the Telephone Company, under the provisions of Article II hereof, extends or may hereafter extend its rights to the Western Company) obligations similar

to the obligations assumed by the General Company towards the Telephone Company in and by said Substitute License Agreement of July 1, 1932, except that the Radio Company assumes no obligations as to manufacturing or selling articles or devices which it is not from time to time engaged in commercially manufacturing.

V. This Agreement shall terminate at the same time that the said Substitute License Agreement of July 1, 1932, terminates.

VI. This Agreement shall be effective from and after the date hereof.

In witness whereof, the parties hereto have caused this instrument to be executed in quadruplicate as of the 1st day of July, 1932, by their proper officers thereunto duly authorized.

EXHIBIT 3

SUBSTITUTE TERMINATION AGREEMENT

Agreement, dated July 1, 1932, between General Electric Company, a New York corporation (hereinafter called the General Company), Radio Corporation of America, a Delaware corporation (hereinafter called the Radio Company), American Telephone and Telegraph Company, a New York corporation (hereinafter called the Telephone Company), and Western Electric Company, Incorporated, a New York corporation (hereinafter called the Western Company).

Whereas the parties hereto have heretofore entered into an agreement dated July 1, 1920, known as the Termination Agreement, in which agreement reference is made to a License Agreement dated July 1, 1920, between the General Company and the Telephone Company;

Whereas the General Company and the Telephone Company have entered into an agreement dated July 1, 1926, of which the parties hereto have knowledge, modifying said License Agreement dated July 1, 1920;

Whereas the parties hereto, under date of July 1, 1926, have entered into an agreement generally known as Modified Agreements C and X modifying said Termination Agreement; and

Whereas the General Company and the Telephone Company have entered into an agreement dated July 1, 1932, of which the parties hereto have knowledge, which is a Substitute License Agreement for said License Agreement dated July 1, 1920, as modified by Agreement dated July 1, 1926; and

Whereas it is now the mutual desire of the parties to substitute this agreement and the licenses herein granted for said Termination Agreement dated July 1, 1920, as modified by said agreement known as Modified Agreements C and X dated July 1, 1926.

Now, therefore, in consideration of the premises and the mutual agreements herein contained, the parties agree with each other as follows:

I. The said agreements between the parties hereto, dated July 1, 1920, and July 1, 1926, generally known as Termination Agreement and Modified Agreements C and X respectively, and all licenses therein granted and agreed to be granted, are hereby terminated as of the date hereof, and this agreement and the licenses herein granted and agreed to be granted are substituted therefor.

II. If the United States (except temporarily on account of war or otherwise) acquires the property of the Radio Company or of the Telephone Company, or

Digitized by Google

the inventions or business of either of them, or any definite part thereof, so as to prevent either of said companies from continuing any substantial part or all of its then existing business so as substantially to adversely affect the rights of any of the other parties under the said Substitute License Agreement of July 1, 1932, the said Substitute License Agreement shall thereupon terminate so far as concerns the fields of business or inventions so acquired (all licenses which have theretofore vested continuing in force), it having been the purpose of the aforesaid Substitute License Agreement to provide for conditions which it was thought might be foreseen in the conduct of privately-owned enterprises, but not for conditions which might arise from such radical changes as would be involved in Government ownership or operation.

III. The company whose property, business, or patents are so acquired shall have the right to grant to the Government licenses under the patent rights which it acquired through said Substitute License Agreement of July 1, 1932, in and for the same fields and uses as any licenses then (at the time of such taking over) possessed under said Substitute License Agreement by the party whose property, business, or patents have been taken over.

IV. This agreement shall be effective from and after the date hereof.

In witness whereof, the parties hereto have caused this instrument to be executed in quadruplicate as of the day and year first above written by their proper officers thereunto duly authorized.

EXHIBIT 4

SUBSTITUTE FOR MODIFIED AGREEMENT H

JULY 1, 1932.

GENERAL ELECTRIC COMPANY,
120 Broadway, New York, N. Y.
RADIO CORPORATION OF AMERICA,
570 Lexington Avenue, New York, N. Y.

DEAR SIRS: Under date of June 30, 1921, American Telephone and Telegraph Company and Western Electric Company, Incorporated, at your request, assented to the extension by you to Westinghouse Electric & Manufacturing Company of rights under licenses acquired by you under the patents of the undersigned companies through the License Agreement between General Electric Company and American Telephone and Telegraph Company, dated July 1, 1920, and through the agreement also dated July 1, 1920, permitting the extension of rights under said License Agreement to Radio Corporation of America and to Western Electric Company, Incorporated.

Said License Agreement and said Extension Agreement, dated July 1, 1920, were modified by the parties thereto by agreements dated July 1, 1926, and a Substitute License Agreement dated July 1, 1932, between the General Electric Company and American Telephone and Telegraph Company has been substituted therefor, and said Extension Agreement has been replaced by an agreement dated July 1, 1932 (hereinafter called the Substitute Extension Agreement).

American Telephone and Telegraph Company and Western Electric Company, Incorporated, pursuant to the provisions of Article VII, Section 3,

Digitized by Google

subdivision (c) of said Substitute License Agreement dated July 1, 1932, and pursuant to said Substitute Extension Agreement, hereby assent to the extension by you to Westinghouse Electric & Manufacturing Company and its subsidiaries of any of the rights, whether or not expressed as including the right to grant sublicenses, or as personal or nonassignable, reserved by you or acquired or to be acquired by you, respectively, under said Substitute License Agreement dated July 1, 1932, and said Substitute Extension Agreement.

Yours very truly,

AMERICAN TELEPHONE AND TELEGRAPH COMPANY,
By ——— ———, *Vice President.*

Attest:

———— ———, *Secretary.*

WESTERN ELECTRIC COMPANY, INCORPORATED,
By ——— ———, *Vice President.*

Attest:

Agreement dated July 1, 1932, between General Electric Company, a New York corporation (hereinafter called the General Company); Radio Corporation of America, a Delaware corporation (hereinafter called the Radio Corporation); Westinghouse Electric & Manufacturing Company, a Pennsylvania corporation (hereinafter called the Westinghouse Company); American Telephone and Telegraph Company, a New York Corporation (hereinafter called the Telephone Company); and Western Electric Company, Incorporated, a New York corporation (hereinafter called the Western Company).

Whereas the General Company and the Telephone Company have entered into an agreement dated July 1, 1932, of which the parties hereto have knowledge, which is a Substitute License Agreement for a License Agreement between the parties, dated July 1, 1920, which was modified by an agreement dated July 1, 1926;

Whereas paragraph (d) of subdivision C of Section 4 of Article VI of said Substitute License Agreement provides, among other things, for the payment of certain royalties by the Telephone Company to the General Company;

Whereas Section 12 of Article VI of said Substitute License Agreement provides, among other things, for the payment of certain royalties by the General Company to the Telephone Company; and

Whereas the Telephone Company and the Western Company, by certain agreements known to the parties, have assented to the extension to the Radio Corporation and the Westinghouse Company of certain rights, acquired or to be acquired by the General Company under said Substitute License Agreements; and

Whereas the General Company, the Radio Corporation, and the Westinghouse Company, by certain agreements known to the parties, have assented to the extension to the Western Company of certain rights, acquired or to be acquired by the Telephone Company under said Substitute License Agreement;

Now, therefore, in consideration of the premises and the mutual agreements herein contained, the parties agree, each with the other, as follows:

1. Apparatus covered by said paragraph (d) of sub-division C of Section 4 of Article VI of said Substitute License Agreement shall include not only apparatus covered by patents of the General Company, but also apparatus covered by patents of the Radio Corporation and of the Westinghouse Company and of any other company to which the General Company shall extend licenses granted to it by the said Substitute License Agreement and whose patents shall be subjected to said Substitute License Agreement, and apparatus covered by the patents of any or all of said Companies shall be subject to payment of royalties as provided in said paragraph (d), and all of such royalties shall be payable to the Radio Corporation.

2. Apparatus covered by said section 12 of Article VI of said Substitute License Agreement shall include not only apparatus covered by patents of the Telephone Company, but also apparatus covered by patents of the Western Company and of any other company to which the Telephone Company shall extend licenses granted to it by the said Substitute License Agreement and whose patents shall be subjected to said Substitute License Agreement, and apparatus covered by the patents of any or all of said companies shall be subject to payment of royalties as provided in said section 12, and all of such royalties shall be payable to the Western Company.

JULY 1932.

RADIO CORPORATION OF AMERICA,
570 Lexington Avenue, New York, N. Y.

GENTLEMEN: This will confirm the understanding reached as the result of our conversations in regard to royalties upon sound records to accompany motion pictures distributed by a licensee of one party and heretofore or hereafter recorded by another producer who is a licensee of the other party.

Inasmuch as each party has, pursuant to agreements dated July 1, 1932, nonexclusive licenses under the United States patents of the other party in respect of such sound records for certain purposes, the United States patents under which both Electrical Research Products, Inc., and Radio Corporation of America have rights or licenses for such purposes shall not be used by either party or any of their respective subsidiaries as a basis for requiring the payment of royalties by any of its licensees upon such sound records distributed by such licensees, heretofore or hereafter recorded by another producer who is a licensee of the other party or any of its subsidiaries with apparatus involving the use of such patents furnished by such other party or its subsidiaries.

If you are in agreement, please indicate your acceptance upon the attached copy of this letter which is sent in duplicate, and return to us.

We enclose a copy of a form of letter which we propose to send to each of our producer licensees advising them of our position in the matter.

Yours very truly,

ELECTRICAL RESEARCH PRODUCTS, INC.,
By (Sgd.) H. G. KNOX.

Accepted:

RADIO CORPORATION OF AMERICA,
O. S. S. By (Sgd.) DAVID SARNOFF, *Pres.*

JULY 1932.

METRO GOLDWYN PICTURES CORPORATION,
1540 Broadway, New York, N. Y.

DEAR SIRS: Referring to the recording license agreement between us dated ----------, and particularly to paragraph (b) of Section 1 of Article III thereof:

The patents under which both we and RCA Photophone, Inc. have rights or licenses for sound recording will not be used by us as a basis for requiring the payments of royalties by you upon sound records distributed by you or your associated companies heretofore or hereafter recorded by another producer who is a licensee of RCA Photophone, Inc. with apparatus furnished by the latter involving the use of such patents.

Digitized by Google

This is not to be understood, however, as relieving you from the obligation to pay royalties in accordance with those provisions of our said agreement which are otherwise applicable.

Yours very truly,

O. S. S. H. G. KNOX.

Re14585	Jan. 14, 1919	do	Do.
1200829	Oct. 10, 1916	Goodrum, C. L.	Telephone Signaling System.
1200856	do	Kropp, J. A.	Substation Sender.
1200860	do	Lundell, A. E.	Selector Controller.
1201270	Oct. 17, 1916	De Forest, L.	Oscillating Current Generator.
1201271	do	do	Oscillating Audion.
1201272	do	do	Telegraph and Telephone Receiving System.
1201273	do	do	Oscillation Generator.
1201455	do	Goodrum, C. L.	Telephone Exchange System.
1201504	do	Roberts, J. G.	Code Impulse Signaling System.
1201621	do	Potts, L. M.	Means for Synchronizing Telegraphic and Other Apparatus.
1201809	do	Dixon, A. F.	Printing Telegraph Receiver.
1201810	do	do	Indicator.
1202275	Oct. 24, 1916	Dyson, A. H.	Register Controller.
1202281	do	Goodrum, C. L.	Machine Switching Telephone Exchange System.
1202446	do	Speed, J. B.	Electromagnetic Device.
1202952	Oct. 31, 1916	Adams, E. W.	Controlling System.
1203325	do	Grissinger, E.	Telephone Relay or Repeater.
1203326	do	do	Do.
1203336	do	Hinrichsen, E. E.	Telephone System.
1203407	do	Reinke, A. E.	Telephone Exchange System.
1203502	do	Deakin, G.	Do.
1203671	Nov. 7, 1916	Williams, S. B., Jr.	Do.
1203742	do	Johnson, L. H.	Do.
1203829	do	Williams, S. B., Jr.	Do.
1203851	do	Clark, E. H.	System for Controlling Electrical Circuits.
1203887	do	Lundell, A. E.	Machine Switching Telephone Exchange System.
1203908	do	Reynolds, J. N.	Do.
1204466	Nov. 14, 1916	McQuarrie, J. L.	Switch Actuating Mechanism.
1205518	Nov. 21, 1916	Craft, E. B., and Reynolds, J. N.	Telephone Exchange System.
1205520	do	Dobbin, H. F.	Selector Switch.
1205523	do	Dunham, B. G.	Telephone Exchange System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1205536	Nov. 21, 1916	Heydt, G. H.	Automatic Switch.
1205538	do	Hinrichsen, E. E.	Telephone System.
1205617	do	Goodrum, C. L.	Telephone Exchange System.
1205618	do	Grissinger, E.	Speech Transmitting Mechanism.
1206524	Nov. 28, 1916	Fondiller, W.	Phantom Loading Coil.
1206906	Dec. 5, 1916	Persson, F.	Folding Scaling Ladder.
1206987	do	Clausen, H. P.	Dictating Phonograph System.
1207150	do	Dyson, A. H.	Automatic Telephone Switching System.
1207384	do	Egerton, H. C.	Electric Amplifier.
1207447	do	Van Deusen, W. M., and Persson, F.	Cable Lubricting Wheel.
1207736	Dec 12, 1916	Forsberg, O. F.	Electromagnetic Device.
1207836	do	Barrows, L. D.	Connecting System for Telephone Stations.
1209324	Dec. 19, 1916	Nicolson, A. M., and Hull, E. C.	Electron Emitting Cathode and Process of Manufacturing the Same.
1209834	Dec. 26, 1916	Goodrum, C. L.	Telephone Exchange System.
1210314	do	Hoefer, A. U., and Bascom, H. M.	Telephone Toll System.
1210424	Jan. 2, 1917	Craft, E. B.	Telephone Desk Set.
1210505	do	Lundell, A. E.	Point Finder System.
1210602	do	Clausen, H. P.	Telephone Exchange System.
1210603	do	do	Calling Device.
1210616	do	Dunham, B. G.	Machine Switching Telephone Exchange System.
1210617	do	do	Relay.
1210628	do	Fondiller, W.	Loading Coil.
1210642	do	Harlow, J. B.	Selective Signaling System.
1210652	do	Johnson, L. H.	Telephone Exchange System.
1210653	do	do	Do.
1210678	do	Nicolson, A. M.	Thermionic Amplifier.
1210722	do	Sultzer, M.	Method of Coating Condensers.
1210884	do	Baldwin, J. F., Jr.	Phantom Circuit Loading.
1210912	do	Dixon, A. F.	Selecting Mechanism and System.
1211031	do	Akin, A.	Telephone System and Apparatus.
1211044	do	Bascom, H. M.	Signaling System.
1211274	do	do	Party Line Signaling System.
1211434	Jan. 9, 1917	Goodrum, C. L.	Telephone Exchange System.
1211607	do	McGrath, M. K.	Telephone Apparatus.
1211612	do	Miller, D. D.	Switching Device for Telephone Systems.
1212492	Jan. 16, 1917	Johnson, L. H.	Telephone Exchange System.
1212493	do	do	Do.
1212494	do	do	Do.
1212495	do	do	Do.
1212531	do	McMurry, F. R.	Selecting Mechanism.
1212733	do	Bell, J. H.	Telegraph System.
1212755	do	Fondiller, W.	Method of Manufacturing Inductance Coils.
1212809	do	Reeves, F. N. and Lundell, A. E.	Telephone Exchange System.
1214258	Jan. 30, 1917	Arntzenius, C. R. H.	Telephone System for Toll Traffic.
1214511	Feb. 6, 1917	Clausen, H. P.	Telephone Switching System.
1214512	do	do	Do.
1214515	do	Danielson, O. A.	Switch Selector.
1215038	do	Lanning, C. D., and Drew, S. C.	Telephone Circuit Arrangements.
1215331	Feb. 13, 1917	Bascom, H. M.	Telephone Toll System.
1215378	do	Johnson, L. H.	Telephone Exchange System.
1215406	do	Persson, F.	Cutting Tool.
1215487	do	Clausen, H. P.	Telephone System.
1215702	do	Pleijel, H. B. M., and Olsson, A. H.	Loading Duplex or Multiplex Telephone Lines.
1215859	do	Reynolds, J. N.	Switch Mechanism.
1215860	do	do	Telephone Switch Mechanism.
1215911	do	Clausen, H. P.	Call Distributing System.
1215917	do	Danielson, O. A.	Selecting Mechanism.
1215918	do	Dixon, A. F.	Selecting Apparatus and System.
1215925	do	Goodrum, C. L.	Telephone Exchange System.
1216136	do	Kendall, B. W.	Transmission Circuit.
1216305	Feb. 20, 1917	Goodrum, C. L.	Automatic Telephone System.
1216615	do	Seibt, G.	Apparatus for Producing Powerful Electrical Oscillations.
1216844	do	Roberts, J. G.	Electrical Controlling System.
1217160	Feb. 27, 1917	Dunham, B. G.	Automatic Telephone Line Finder System.
1217168	do	Goodrum, C. L.	Telephone Exchange System.
1217241	do	Tracy, O. H.	Alarm Signaling Apparatus.
1217472	do	McQuarrie, J. L., and Loveridge, F. H.	Telephone Exchange System.
1218035	Mar. 6, 1917	Allen, R. M.	Telegraph Sounder.
1218195	do	Logwood, C. V.	System for Transmitting Communications.
1218274	do	Kitsee, I.	Quadruplex Telegraphy.
1218413	do	do	Do.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1218650	Mar. 13, 1917	Hartley, R. V. L.	System for Amplifying Electrical Energy.
1218795	do	Merritt, B. F.	Indicating and Recording Apparatus.
1218796	do	do	Signal Transmitter.
1218804	do	Reeves, F. N.	Selective Signaling System.
1218805	do	Roberts, J. G.	Automatic Call Distributing System.
1218806	do	do	Telephone Trunking System.
1218870	do	Kitsee, I.	Duplexing Telegraphic Lines.
1219110	do	do	Method of and Means for Quadruplexing Cables.
1219300	do	Hall, J. A.	Spark Coil.
1219517	Mar. 20, 1917	Wilbur, R. S.	Testing System.
1219561	do	Kitsee, I.	Quadruplex Telegraphy.
1219587	do	Reynolds, J. N.	Telephone Exchange System.
1219700	do	Bullard, A. M.	Telephone Exchange System and Apparatus Therefor.
1219727	do	Grissinger, E.	Telephone Repeating System.
1219760	do	Mills, J., and Hoyt, R. S.	Method of and Means for Correcting Loading Section Irregularities in Transmission Lines.
1219833	do	May, D. T.	Protector.
1219955	do	Kitsee, I.	Quadruplex Telegraphy.
1220238	Mar. 27, 1917	do	Do.
1220433	do	Krum, C. L., and H. L.	Electromagnet.
1220607	do	Clausen, H. P.	Testing Arrangement.
1220756	do	Kitsee, I.	Quadruplex Telegraphy.
1221033	Apr. 3, 1917	De Forest, L.	Wireless Telegraph Signaling System.
1221034	do	do	Oscillating Current Generator.
1221035	do	do	Apparatus for Use in Wire or Radio Communications.
1221124	do	Williams, S. B., Jr.	Machine Switching Telephone Exchange System.
1221134	do	Bradbury, C. C.	Secrecy System for Extension and Party Line Telephones.
1221140	do	Clausen, H. P.	Telephone Signaling System.
1221158	do	Dunham, B. G.	Automatic Telephone System.
1221166	do	Goodrum, C. L.	Telephone Exchange System.
1221167	do	do	Automatic Telephone Exchange System.
1221168	do	do	Telephone Exchange System.
1221169	do	do	Machine Switching Telephone Exchange System.
1221177	do	Hill, R. N.	Selectively Operated System.
1221182	do	Johnson, L. H.	Telephone Exchange System.
1221188	do	Kitsee, I.	Quadruplex Telegraphy.
1221191	do	Kolossvary, E.	Apparatus for Checking a Number of Telephone Calls.
1221238	do	Speed, J. B.	Phantom Circuit Loading.
1221262	do	Wright, J. L.	Telephone Exchange System.
1221308	do	Goodrum, C. L., and Dunham, B. G.	Apparatus for Transmitting Impulses of Current in Electric Circuits.
1221547	do	Kitsee, I.	Telegraphy.
1221773	do	Sperry, A. B.	Telephone Exchange System.
1221865	Apr. 10, 1917	Johnson, L. H.	Do.
1221866	do	do	Do.
1221870	do	Kitsee, I.	Telegraphy.
1221879	do	Lundell, A. E.	Semi-Automatic Telephone System.
1221917	do	Sperry, A. B.	Telephone Exchange System.
1222077	do	Cousins, V. D.	Fraud Detecting Telephone Toll System.
1222303	do	Kitsee, I.	Quadruplex Telegraphy.
1222311	do	Lundell, A. E.	Message Register Circuits.
1222323	do	Raynsford, A.	Telephone Exchange System.
1222342	do	Wilbur, R. S.	Do.
1222350	do	Bandfield, H. G.	Protector.
1222364	do	Clausen, H. P.	Connecting Circuit for Telephone Switching Systems.
1222771	Apr. 17, 1917	Kitsee, I.	Telegraphic Receiving Organisms.
1222810	do	Shaw, T.	Protective System for Composite Circuits.
1222853	do	Dixon, A. F.	Selecting System.
1222879	do	Lundell, A. E.	Telephone System.
1223304	Apr. 24, 1917	Aldendorff, F.	Control Circuit for Telephone Systems.
1223376	do	Espenschied, L.	Wireless Receiving System.
1223382	do	Goodrum, C. L.	Locking Mechanism for Impulse Transmitters.
1223434	do	Smith, W. F.	Manufacture of Electric Cables.
1223437	do	Speed, J. B.	Protective System.
1223752	do	Adams, A. H.	Apparatus for Reflecting Light Rays.
1223937	do	Clausen, H. P.	Telephone System.
1224140	May 1, 1917	do	Automatic Testing System.
1224161	do	Goodrum, C. L.	Telephone Exchange System.
1224342	do	Vreeland, F. K.	Multiplex Telegraphy.
1224374	do	Goodrum, C. L.	Two-Way Two-Wire Trunk for Multi-office Automatic Exchange Systems.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1245321	Nov. 6, 1917	Davidson, J., Jr.	Testing Circuit for Measured Service Apparatus.
1245341	do	Hoffmann, H. L.	Service Observing System.
1245402	do	Toomey, J. F.	System for Observing Telephone Service.
1245417	do	Adams, E. W.	Electric Signaling System.
1245422	do	Baldwin, C. F.	Switching Device.
1245436	do	Clark, E. H.	Automatic Telephone System.
1245438	do	Clausen, H. P.	Telephone Exchange System
1245446	do	Englund, C. R.	Radio Telephony.
1245472	do	Lattig, J. W., and Goodrum, C. L.	Coin Collecting Device.
1245478	do	Lundell, A. E.	Telephone Exchange System.
1245481	do	McGrath, M. K.	Selector Switch.
1245490	do	Molina, E. C.	Telephone Service Observing System.
1245507	do	Rainey, P. M.	Telegraph System.
1245748	do	Lundell, A. E.	Telephone Exchange System.
1245894	do	Fell, J. M.	Telegraphic Receiving System.
1245900	do	Goodrum, C. L.	Telephone Switching System.
1246088	Nov. 13, 1917	do	Overflow Release Means.
1246125	do	Lundell, A. E.	Automatic Telephone Exchange System.
1246126	do	do	Call Recording System.
1246176	do	Sperry, A. B.	Machine Switching Telephone Exchange System.
1246201	do	Williams, S. B., Jr.	Telephone Toll Device and Circuits Therefor.
1246545	do	Clausen, H. P.	Telephone Exchange System.
1246546	do	do	Telephone System.
1246547	do	do	Telephone Exchange System.
1246548	do	do	Testing Arrangement for Telephone Exchange Systems.
1246619	do	Lattig, J. W., and Goodrum, C. L.	Automatic Telephone System.
1246625	do	Lundell, A. E.	Multi-Contact Switching Device.
1246881	Nov. 20, 1917	Clausen, H. P.	Telephone Exchange System.
1246882	do	do	Telephone System.
1246895	do	Egerton, H. C.	Phonograph Transmitter.
1246964	do	Lowe, C. W.	Electric Cable.
1247120	do	Kitsee, I.	Telegraphy.
1247358	do	Zwilling, J.	Reeling Device.
1247371	do	Carpenter, W. W.	Telephone Exchange System.
1247392	do	Glenn, H. H.	Telephone Cord.
1247395	do	Goodrum, C. L.	Automatic Telephone System.
1247399	do	Hendrickson, C. J.	Solenoid Operated Switch.
1247462	do	Smith, W. F.	Twisting Machine.
1247463	do	do	Winding Head.
1247669	Nov. 27, 1917	Goodrum, C. L.	Telephone Exchange System.
1247770	do	Williams, S. B., Jr.	Automatic Telephone System.
1274771	do	do	Do.
1247976	do	Lundell, A. E.	Line Finder System.
1248051	do	Agnew, H. D.	Grinding and Polishing Machine.
1248107	do	Hathaway, J. D.	Method and Apparatus for Coating Metallic Articles.
1248122	do	Hosford, W. F.	Electric Soldering Iron.
1248157	do	Piper, H. D.	Article Collecting Device for Grinding Machines.
1248461	Dec. 4, 1917	Crawford, G. C.	Electromagnetic Device.
1248466	do	Dunham, B. G.	Telephone Exchange System.
1248479	do	Goodrum, C. L.	Automatic Telephone Exchange System.
1248515	do	Lundell, A. E.	Telephone Exchange System.
1248979	do	Young, F. V.	Do.
1249145	do	Lundell, A. E.	Machine Switching Telephone Exchange System.
1249146	do	do	Telephone Exchange System.
1249154	do	McQuarrie, J. L.	Electric Switch.
1249155	do	do	Do.
1249570	Dec. 11, 1917	Watkins, S. S. A.	Signaling System.
1250116	do	Goodrum, C. L.	Telephone Exchange System.
1250192	Dec. 18, 1917	Lanning, C. D.	Telephone Repeating Instrument.
1250579	do	Goodrum, C. L.	Machine Switching Telephone System.
1250687	do	Smith, W. F.	Power Transmission System.
1250804	do	Coon, L. E.	Selective Signaling System.
1250854	do	Goodrum, C. L.	Electrical Registering System.
1250856	do	Griffin, J. T.	Electric Soldering Iron.
1250921	do	Martin, H. T.	Telephone Apparatus.
1251190	Dec. 25, 1917	Dixon, A. F.	Indicating and Recording System.
1251219	do	Goodrum, C. L.	Telephone Call Charge System and Apparatus.
1251363	do	Gherardi, B.	Signaling System.
1251364	do	do	Signaling System for Multiplex Telephone Circuits.
1251440	do	Sultzer, M.	Condenser Switch.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1251475	Jan. 1, 1918	Clausen, H. P.	Telephone Exchange System.
1251495	do	Forsberg, O. F.	Impulse Sending Mechanism.
1251503	do	Goodrum, C. L.	Two-Wire Multiple Automatic Telephone System.
1251504	do	do	Machine Switching Telephone Exchange System.
1251505	do	do	Telephone Exchange System.
1251536	do	Keckler, C. W.	Telephone System.
1251543	do	Lattig, J. W., and Goodrum, C. L.	Automatic Telephone System.
1251544	do	Lundell, A. E.	Machine Switching Telephone Exchange System.
1251545	do	Lundquist, F. A.	Telephone Switching System.
1251556	do	Miller, D. D.	Testing Device.
1251572	do	Price, C. S.	Electrical Protective Apparatus.
1251578	do	Riecken, W. E.	Shaping Machine.
1251604	do	Williams, S. B., Jr.	Ringing Control System for Telephone Exchanges.
1251637	do	Carpenter, W. W.	Telephone Exchange System.
1251644	do	Clausen, H. P.	Do.
1251651	do	Espenschied, L.	Core for Magneti Coils.
1251700	do	Shaw, T.	Shield for Magnetic Coils.
1251728	do	Young, F. V.	Telephone Exchange System.
1251750	do	Clausen, H. P.	Testing Arrangement.
1251751	do	do	Selective Switch.
1251752	do	Clausen, H. P. and Goodrum, C. L.	Telephone System.
1251768	do	Goodrum, C. L.	Telephone Exchange System.
1251795	do	McGrath, M. K.	Selector Switch.
1251797	do	McQuarrie, J. L.	Electrical Signaling System.
1251985	do	Lundquist, F. A.	Automatic Switch.
1251988	do	McQuarrie, J. L.	Automatic Selective Switch.
1251995	do	Forsberg, O. F.	Telephone Desk Stand.
1252028	do	Rasmussen, O. E.	Telephone Exchange System.
1252399	Jan. 8, 1918	Clausen, H. P.	Telephone Exchange.
1252412	do	Dickinson, L. E.	Protective Device for Electric Circuits.
1252420	do	Forsberg, O. F.	Telephone Exchange Switching Mechanism.
1252427	do	Goodrum, C. L.	Transmission System.
1252461	do	Lundell, A. E.	Telephone Exchange System.
1252462	do	Lundquist, F. A.	Automatic Switching Mechanism.
1252463	do	do	Telephone Exchange System.
1252464	do	do	Do.
1252465	do	McQuarrie, J. L.	Electric Switch.
1252466	do	McQuarrie, J. L., and Goodrum, C. L.	Machine Switching Telephone System.
1252475	do	Mueller, E. C., Jr.	Telephone Transmitter Mouthpiece.
1252502	do	Shreeve, H. E.	Protective Circuit.
1252813	do	Kochendorfer, F. S.	Baking Oven.
1252911	do	Lundell, A. E.	Telephone Exchange System.
1252948	do	Reeves, F. N.	Do.
1252978	do	Williams, S. B., Jr. and Sperry, A. B.	Machine Switching Telephone Exchange System.
Re. 15310	Mar. 14, 1922	do	Do.
1253228	Jan. 15, 1918	Goodrum, C. L.	Testing Arrangement.
1253365	do	Fondiller, W.	Loading Units for Telephone Systems.
1253657	do	Williams, S. B., Jr.	Telephone Exchange System.
1253671	do	Clausen, H. P.	Do.
1253684	do	Goodrum, C. L.	Do.
1253688	do	Hill, M. F.	Telephone Exchange.
1253698	do	Lundquist, F. A.	Automatic Switching Mechanism.
1254081	Jan. 22, 1918	Stearn, F. A.	Telephone System.
1254116	do	Campbell, G. A.	Signaling Circuit.
1254117	do	do	Do.
1254118	do	do	Do.
1254146	do	Martin, W. H.	Do.
1254254	do	Matthies, W. H.	Indicating System.
1254471	do	Campbell, G. A.	Signaling Circuit.
1254472	do	do	Do.
1254473	do	do	Do.
1254474	do	do	Do.
1254475	do	do	Do.
1254476	do	do	Do.
1254642	Jan. 29, 1918	Adams, A. H. and Polinkowsky, L.	Automatic Circuit Changing Switch.
1254650	do	Bollinger, C.	Recirculation System.
1254657	do	Clausen, H. P.	Telephone Exchange System.
1254658	do	do	Impulse Transmitting Device or Sender.
1254661	do	Dixon, A. F.	Counting Apparatus.
1254679	do	Goodrum, C. L.	Automatic Telephone Exchange System.
1254680	do	do	Automatic Telephone System.
1254681	do	do	Non-Numerical Switches.
1254682	do	do	Telephone Exchange System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1254690	Jan. 29, 1918	Hazard, A. B.	Testing Process and Machine.
1254691	do	Hinrichsen, E. E.	Telephone System.
1254709	do	Levinger, D., and Anderson, O.	Tapping Machine.
1254710	do	Lundell, A. E.	Selector Switch Movement Controlling Circuit.
1254711	do	do	Telephone Exchange System.
1254712	do	do	Do.
1254713	do	Lundquist, F. A.	Automatic Switch.
1254725	do	Pennock, G. A.	Vapor and Fume Controlling System.
1255180	Feb. 5, 1918	Keckler, C. W.	Telephone System.
1255211	do	Nicolson, A. M.	System for the Successive Amplification of Energies.
1255861	Feb. 12, 1918	Crandall, I. B.	Damping Material for Telephones.
1256087	do	Williams, S. B., Jr., and Clark, E. H.	Telephone Exchange System.
1256126	do	Goodrum, C. L.	Automatic Telephone Exchange System.
1256500	do	Clausen, H. P., and Goodrum, C. L.	Telephone Exchange System.
1256661	Feb. 19, 1918	Clausen, H. P.	Do.
1256608	do	Johnson, L. H.	Do.
1256889	do	Espenschied, L.	Wireless Duplex Signaling System.
1256983	do	Colpitts, E. H.	Wireless Telegraphy and Telephony.
1257303	Feb. 26, 1918	Bell, J. H.	Repeater System.
1257317	do	Clausen, H. P.	Telephone Exchange System.
1257338	do	Goodrum, C. L.	Line Switch.
1257362	do	Keckler, C. W.	Telephone Exchange System.
1257363	do	do	Do.
1257370	do	Lundell, A. E., and Stearn, F. A.	Do.
1257381	do	Nichols, H. W.	Low Frequency Signal Repeater.
1257392	do	Reeves, F. N., and Lundell, A. E.	Telephone Line Selecting System.
1257394	do	Reynolds, J. N.	Terminal Bank.
1257684	do	Dixon, A. F.	Tuning Fork.
1257702	do	Harlow, J. B.	Railway Signaling System.
1257715	do	Kropp, J. A.	Selector Switch.
1257720	do	Lundell, A. E.	Automatic Telephone Exchange System.
1257960	do	Reich, J. C.	Machine for Cutting and Spacing Soft Rubber Rods and the Like.
1258374	Mar. 5, 1918	Stearn, F. A.	Telephone Exchange System.
1258540	do	Dixon, A. F.	Synchronizing System.
1258548	do	Englund, C. R.	Radio Telephony.
Re. 15089	Apr. 19, 1921	do	Do.
1258761	Mar. 12, 1918	Gauthier, E.	Crank Shaft.
1258782	do	Keckler, C. W.	Telephone Exchange System.
1258783	do	do	Do.
1258808	do	Poole, F. P.	Indexing Carrier.
1258809	do	Potts, L. M.	Transmitting Apparatus for Electric Telegraphs and the Like.
1260412	Mar. 26, 1918	Lundell, A. E.	Telephone Exchange System.
1260413	do	Lundell, A. E., and Stearn, F. A.	Listening Key Circuit.
1261096	Apr. 2, 1918	Blackwell, O. B.	Testing Apparatus.
1261290	do	Rainey, P. M.	Telegraph System.
1262315	Apr. 9, 1918	Dunham, B. G.	Telephone Exchange System.
1262323	do	Goodrum, C. L.	Do.
1262333	do	Hall, J. A.	Indicating Device.
1262359	do	Kropp, J. A.	Impulse Transmitting Device.
1262368	do	Martin, H. T.	Operating Button for Electrical Switching Apparatus and Process for Making Such Button.
1262496	do	Hinrichsen, E. E.	Telephone Exchange System.
1262526	do	Levinger, D.	Machine for Making Indentures.
1262639	Apr. 16, 1918	Clausen, H. P.	Telephone Exchange.
1262648	do	Danielson, O. A.	Telegraph System.
1262654	do	Dixon, A. F.	Selecting System.
1262655	do	do	Do.
1262752	do	Clausen, H. P.	Telephone System.
1262838	do	Poole, F. P.	Electromagnetic Apparatus.
1262912	do	Bascom, H. M.	Means for Preventing Disturbances in Substation Telephone Sets.
1262996	do	Stull, J. S.	Rotation Counter.
1263057	do	Griffin, J. T.	Mica Grinding Machine.
1263069	do	Keckler, C. W.	Telephone Exchange System.
1263083	do	Lundell, A. E.	Do.
1263376	Apr. 23, 1918	Clausen, H. P., and Goodrum, C. L.	Do.
1263377	do	Clausen, H. P.	Electrical Testing System.
1263383	do	Craft, E. B.	Electromagnetic Device.
1263405	do	Grondahl, H. H. C.	Twisting Machine.

Patent no.	Date of issue	Inventor	Title
1263421	Apr. 23, 1918	Johnson, K. S.	Telephone Substation Circuit.
1263429	do	Keckler, C. W.	Telephone Exchange System.
1263478	do	Smith, W. F.	Twisting Machine.
1263482	do	Stull, J. S.	Multiple Spindle, Drill, Tap and the Like.
1264156	Apr. 30, 1918	Clausen, H. P.	Telephone System.
1264366	do	do	Calling Device.
1264378	do	Dixon, A. F.	Controlling System.
1264388	do	Guthe, O. D. M.	Telephone System.
1264402	do	Lattig, J. W. and Goodrum, C. L.	Metering System for Automatic Telephone Exchanges.
Des. 52009	May 7, 1918	Forsberg, O. F.	Calling Device.
Des. 52010	do	do	Desk Telephone Stand.
1265728	May 14, 1918	Bell, J. H.	Telegraph System.
1265751	do	Conway, R. D.	Signaling System.
1265830	do	Swoboda, A. R.	Polarized Repeating Sounder.
1265851	do	Williams, H. C.	Mechanism for Installing Transmission Line Wires.
1266190	do	Adams, A. H.	Circuit Changing Switch.
1266623	May 21, 1918	Quass, R. L.	Telephone Signaling System.
1266714	do	Richey, C. V.	Telephone Metering System.
1266978	do	Noble, R. E.	Telephone Exchange System.
1267433	May 28, 1918	McQuarrie, J. L.	Automatic Switch.
1267980	do	Craft, E. B., and Reynolds, J. N.	Automatic Telephone Exchange System.
Re. 15341	Apr. 25, 1922	do	Do.
1268221	June 4, 1918	Dunham, B. G.	Do.
1269702	June 18, 1918	Goodrum, C. L.	Message Register Circuits for Machine Switching Telephone Exchange Systems.
1270326	June 25, 1918	Reynolds, J. N.	Call Finder for Automatic and Semi-Automatic Telephone Systems.
1270388	do	Dunham, B. G.	Telephone Exchange System.
1270465	do	Toomey, J. F.	Automatic Switching Means.
1270867	July 2, 1918	Price, C. S.	Fuse.
1271124	do	Booth, W. T.	Switching Device.
1271127	do	Britten, W. G.	Telephone System.
1271133	do	Clausen, H. P.	Do.
1271141	do	Dixon, A. F.	Printing Telegraph System.
1271164	do	Hovland, H.	Impulse Transmitter.
1271171	do	Johnson, L. H.	Telephone System.
1271185	do	Lundell, A. E.	Telephone Exchange System.
1271186	do	do	Do.
1271203	do	Baldwin, C. F.	Electromagnet.
1271320	do	Housekeeper, W. G.	Electric Conductor.
1271322	do	Keckler, C. W.	Telephone Exchange System.
1271335	do	Lundell, A. E.	Do.
1271336	do	do	Do.
1271337	do	do	Telephone System.
1271362	do	Rainey, P. M.	Fluctuating Damping Means for Rotatable Members.
1271652	July 9, 1918	Bellamy, H. T.	Method of Making Colored Glass.
1271794	do	Stevenson, G. H.	Protective Device.
1271824	do	Anderegg, G. A., and Mougey, W. E.	Telephone and Telegraph Cable.
1271855	do	Clausen, H. P.	Trunking System.
1271883	do	Fowler, C. B.	Telephone System.
1271897	do	Hinrichsen, E. E.	Telephone Exchange System.
1271924	do	Miller, D. D.	Electromagnetic Switching Device.
1272022	do	Dolmage, M. M.	Two-Way Repeater Circuits.
1272106	do	Young, C. R.	Loading Coil Case.
1272191	do	Bell, J. H.	Telegraph System.
1272221	do	Clausen, H. P.	Telephone Exchange System.
1272279	do	Lundell, A. E.	Circuit Interrupting Device.
1272280	do	do	Telephone System.
1272282	do	McQuarrie, J. L.	Telephone Exchange System.
1272374	July 16, 1918	Buckley, O. E.	Method of Preparing Vacuum Tubes.
1272402	do	Egerton, H. C.	Electromagnetic Switching Device.
1272624	do	Conway, R. D.	Telephone Exchange System.
1272641	do	Egerton, H. C.	Telephone System.
1272673	do	Keckler, C. W.	Service Observing Circuit for Telephone Lines.
1272689	do	MacDougall, H. W.	Telephone Exchange System.
1272692	do	Mather, G. E., and Bailey, B.	Transmitter Support.
1273154	July 23, 1918	Demarest, C. S.	Relay Selecting Circuit for Artificial Lines.
1273158	do	Dickinson, L. E.	Heat Coil Protective Device for Electric Circuits.
1273245	do	Lundell, A. E.	Electromagnetic Switching Device.
1273247	do	Lundquist, F. A.	Automatic Switch.
1273274	do	Reynolds, J. N., and Forsberg, O. F.	Terminal Bank.
1273351	do	Frederick, H. A.	Telephone Receiver.

1276580	do	Scribner, C. E.	Synchronizing System.
1276581	do	do	Do.
1276761	Aug. 27, 1918	Hinrichsen, E. E.	Telephone Exchange System.
1276772	do	Keckler, C. W.	Do.
1277025	do	Anderegg, G. A., and Mougey, W. E.	Telephone and Telegraph Cable.
1277091	do	Lundquist, F. A.	Telephone Exchange System.
1277274	do	Toomey, J. F., and Read, W. V. H.	Artificial Line Selecting System.
1277385	Sept. 3, 1918	Clausen, H. P.	Machine Switching Telephone Exchange System.
1277386	do	do	Telephone Exchange System.
1277418	do	Hinrichsen, E. E.	Telephone System.
1277440	do	Lundell, A. E.	Telephone Exchange System.
1277444	do	MacDougall, H. W.	Do.
1277478	do	Reynolds, J. N.	Telephone Switch.
1277615	do	Lundell, A. E., and Eddy, H. G.	Testing Sender.
1278245	Sept. 10, 1918	Sperry, A. B.	Telephone Exchange System.
1278330	do	Goodrum, C. L.	Do.
1278331	do	do	Do.
1278448	do	Everett, S. H.	Electromagnetic Switching Device or Relay.
1278697	do	Lundell, A. E.	Telephone Exchange System.
1279489	Sept. 24, 1918	Anderson, F. E.	Do.
1279808	do	Wilbur, R. S.	Howler Circuits for Telephone Lines.
1279811	do	Williams, S. B., Jr.	Telephone Exchange System.
1279812	do	do	Do.
1279840	do	Clausen, H. P.	Switchboard Apparatus and Circuits.
1279841	do	do	Telephone Exchange System.
1279842	do	do	Do.
1279854	do	Forsberg, O. F.	Automatic Electromagnetic Switch.
1279875	do	Keckler, C. W.	Telephone Exchange System.
1279882	do	Kuhn, G. W.	Signaling System.
1279893	do	McQuarrie, J. L.	Selector Switch.
1279894	do	Mather, G. E.	Telephone Receiver.
1279905	do	Rainey, P. M.	Synchronizing System for Multiplex Telegraphs.
1279909	do	Reynolds, J. N.	Brake for Sequence Switches.
1280213	Oct. 1, 1918	Hach, C. A.	Method of and Apparatus for Electroplating.
1280249	do	Landry, G. A.	Do.
1280258	do	Lundell, A. E.	Call Indicating System.
1280324	do	Sperry, A. B.	Automatic Telephone Exchange System.
1280423	do	Dixon, A. F.	Synchronizing System.
1280714	Oct. 8, 1918	Goodrum, C. L.	Telephone System.
1280751	do	Johnson, K. S.	Do.
1280752	do	Johnson, L. H.	Telephone Exchange System.
1280969	do	Demarest, C. S.	Through Ringing Amplifier.
1281084	do	Shaw, T., and Koukol, C. J.	Demagnetizing Apparatus.
1281338	Oct. 15, 1918	Gargan, J. O.	Locking Device.
1281348	do	Goodrum, C. L.	Automatic Telephone Exchange System.
1281459	do	Wilbur, R. S.	Telephone Exchange System.
1281611	do	Lundius, E. R.	Telephone System.
1281811	do	Mortimer, L. A.	Testing System.
1283563	Nov. 5, 1918	Roberts, J. G.	Contact Bank.
1283687	do	Darrow, L. H.	Signaling System.
1283831	do	Lunquist, F. A.	Selecting Switch.
1283894	do	Rasmussen, O. E.	Automatic Switch.
1284206	Nov. 12, 1918	Adams, E. W.	Calling Device.
1284392	do	Lundell, A. E.	Telephone System.
1284480	do	Shreeve, H. E.	Vibrator.
1284533	do	Wright, J. L.	Telephone Exchange System.
1284623	do	Egerton, H. C.	Telephonic Recording and Reproduction Apparatus.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1284660	Nov. 12, 1918	Hall, J. A	Adapter for Ignition Systems.
1284672	do	Hendrickson, C. J	Automatic Switch.
1284730	do	Lundell, A. E	Party-line Ringing System.
1284732	do	Magrath, A. C	Electrical Controlling System.
1284742	do	McQuarrie, J. L	Automatic Switch.
1284823	do	Ulrich, H. W	Telephone System.
1284996	Nov. 19, 1918	McBerty, F. R	Semi-Automatic Telephone Exchange System.
1285278	do	McBerty, F. R., and Polinkowsky, L.	Special Service System for Machine Telephone Switching Exchanges.
1285834	Nov. 26, 1918	Stull, J. S	Vise.
1285997	do	Herbert, C. M	Do.
1286351	Dec. 3, 1918	Krum, H. L	Electric Selective System.
1286917	Dec. 10, 1918	Bell, J. H	Telegraph System.
1286959	do	Dixon, A. F	Printing Telegraph System.
1286965	do	Elmen, G. W	Magnet Core.
1286981	do	Ford, W. H. D	Impulse Transmitter.
1286982	do	Forsberg, O. F	Calling Device.
1286996	do	Goodrum, C. L., and Kropp, J. A.	Selecting Switch.
1287009	do	Harrison, W. H	Telephone Exchange System.
1287064	do	McQuarrie, J. L	Telephone System.
1287100	do	Reynolds, J. N	Terminal Strip.
1287101	do	do	Method of Manufacturing Multiple Contact Strips.
1287161	do	Wilson, R. H	Vacuum Tube Voltmeter.
1287715	Dec. 17, 1918	Lundquist, F. A	Automatic Selecting Switch.
1287716	do	do	Automatic Switch.
1287725	do	May, D. T	Protective Device.
1287805	do	White, C	Telephone Exchange System.
1287831	do	Bascom, H. M	System for Compensating for Differences of Potential.
1287886	do	Clausen, H. P., and Goodrum, C. L.	Telephone System.
1287982	do	Hartley, R. V. L	Modulating System.
1288358	do	Wotton, J. A	Impulse Transmitting Mechanism.
1288365	do	Young, C. R	Coil Support.
1288709	Dec. 24, 1918	Shaw, T	Duplex Balancing Circuit.
1288837	do	Clausen, H. P	Telephone Exchange System.
1289418	Dec. 31, 1918	Elmen, G. W	High Frequency Detector.
1289437	do	Garvin, J. S	Signaling System.
1289467	do	Hinrichsen, E. E	Telephone Exchange System.
1289941	do	Shaw, T., and Fondiller, W	Apparatus for Loaded Telephone Line Systems.
1290382	Jan. 7, 1919	Slaughter, N. H	Electrical Condenser.
1290616	do	McQuarrie, J. L	Automatic Switching Apparatus for Telephone Exchange Systems.
1290808	do	Toomey, J. F	Composite Ringing Apparatus.
1291766	Jan. 21, 1919	Clausen, H. P	Telephone Exchange System.
1291825	do	Gargan, J. O	Signal Lantern.
1291831	do	Glunt, O. M	Electromagnet.
1291861	do	Harlow, J. B	Selective Signaling System.
1291894	do	Hovland, H	Registering System.
1291959	do	Lundell, A. E	Finder Starting System.
1291960	do	do	Number Indicating System.
1291978	do	McQuarrie, J. L	Automatic Switch.
1292003	do	Miller, D. D	Electromagnetic Device.
1292048	do	Rainey, P. M	Isochronizing and Synchronizing System.
1292049	do	do	Telegraph System.
1292206	do	Woodruff, J. C	Magnet Core.
1292207	do	Wotton, J. A	Buzzer.
1292208	do	Wray, A	Transmission System.
1292227	do	Atwood, G. F	Conveying Apparatus.
1292257	do	Clark, E. H	Multioffice Telephone Exchange System.
1292659	Jan. 28, 1919	Speed, J. B	Conductor.
1292828	do	Lundell, A. E	Semi-Automatic Telephone System.
1292839	do	McQuarrie, J. L	Telephone Exchange System.
1292892	do	Hosford, W. F	Process of and Machine for Forming Electrical Contacts.
1293060	Feb. 4, 1919	Edwards, G. D	Telephone System.
1293195	do	Quass, R. L	Switch Control System.
1293390	do	Everett, S. H	Telephone Signaling System.
1293441	do	Housekeeper, W. G	Combined Metal and Glass Structure and Method of Forming Same.
1293458	do	Johnson, K. S	Telephone Circuit.
1293494	do	McQuarrie, J. L	Machine Switching Telephone System.
1293545	do	Rasmussen, O. E	Calling Device.
1293630	do	Deakin, G	Telephone Exchange System.
1293825	Feb. 11, 1919	Lundius, E. R	Testing System.
1293940	do	Sager, J. W	Tube Rolling Machine.
1294095	do	Guthe, O. D. M	Impulse Transmitter.

Patent no.	Date of issue	Inventor	Title
1294111	Feb. 11, 1919	Keckler, C. W	Telephone Exchange System.
1294202	do	Turner, M. C	Telephone Booth.
1294285	do	Lorimer, G. W., and J. H	Automatic Telephone Exchange.
Des. 53000	do	Wotton, J. A	Telephone Receiver Support.
1294466	Feb. 18, 1919	Housekeeper, W. G	Combined Metal and Glass Structure and Method of Making Same.
1294498	do	Lundell, A. E., and Stearn, F. A.	Telephone Exchange System.
1294555	do	Spamer, R. F	Indicating System.
1294557	do	Sperry, A. B	Machine Switching Telephone Exchange System.
1294587	do	Williams, S. B., Jr	Automatic Telephone System.
1294722	do	Smith, R. H	Telephone System.
1295178	Feb. 25, 1919	Lamplough, L. F	Braiding Machine.
1295405	do	Williams, S. B., Jr	Telephone Exchange System.
1295435	do	Clausen, H. P	Telephone System.
1295454	do	Egerton, H. C	Transmission Circuit.
1295502	do	Hitchcock, A. W	Combined Fire Alarm and Watchman's Service Signal System.
1295553	do	Mathes, R. C	Signal Correcting System.
1295709	do	DeVignier, R. M., and Freile, B.	Circuit Controlling Switch.
1295816	do	Toomey, J. F	Testing Apparatus for Four-Wire Repeater Circuits.
1295909	Mar. 4, 1919	Lundius, E. R	Telephone Exchange System.
1295998	do	Merritt, B. F	Telegraph Printer.
1296023	do	Ulrich, H. W	Telephone Exchange System.
1296097	do	Lundell, A. E	Electric Signaling System.
1296154	do	Atchison, I. W., and Steimer, F. M.	Mechanism for Removing Burs.
1296164	do	Corson, F. W	Generator Testing Apparatus.
1296269	do	Crawford, G. C., and Stevenson, G. H.	Generating System.
1296604	Mar. 11, 1919	Adams, A. H	Switch Operating Mechanism.
1296613	do	Bell, J. H	Telegraph System.
1296617	do	Britten, W. G	Do.
1296653	do	Griswold, G. L	Container for Electrical Apparatus.
1296677	do	Lundius, E. R	Telephone Exchange System.
1296679	do	McQuarrie, J. L., and Clausen, H. P.	Telephone System.
1296680	do	McQuarrie, J. L	Telephone Exchange.
1296683	do	Maxfield, J. P	Telephone Transmitter.
1296687	do	Nichols, H. W	Means for Signaling from Captive Balloons.
1296740	do	Bell, J. H	Telegraph System.
1296813	do	Kelsall, G. A	Core Loss Tester.
1296850	do	Rainey, P. M	Speed Changing Device.
1297100	do	Clausen, H. P	Telephone Exchange System.
1297126	do	Elmen, G. W	Magnet Core.
1297127	do	do	Do.
Des. 53093	do	Thompson, G. K	Telephone Receiver Holder.
1297309	Mar. 18, 1919	Arnold, H. D	Manufacture of Vacuum Tube Devices.
1297358	do	Keckler, C. W	Telephone Exchange System.
1297858	do	Johnson, K. S	Electromagnetic Coil.
1297905	do	Pinkler, A. P	Telephone Transmitter.
1297983	Mar. 25, 1919	Anderson, O	Multiple Spindle Turret Machine.
1298217	do	Jenkins, G. M. O	Intercommunicating Set.
1298237	do	McQuarrie, J. L., and Goodrum, C. L.	Telephone System.
1298293	do	Clausen, H. P	Do.
1298321	do	Forsberg, O. F	Terminal Bank.
1298330	do	Goodrum, C. L	Contact Bank.
1298365	do	McQuarrie, J. L	Telephone Exchange System.
1298396	do	Pruessman, A	Condenser.
1298718	Apr. 1, 1919	Hosford, W. F	Machine for Metal Working.
1298771	do	Nash, G. H., and Grace, B. B	Telephone Hand Set.
1298868	do	Bell, J. H	Telegraph System.
1299356	do	De Forest, L	Apparatus for Use in Radio Communication.
1299558	Apr. 8, 1919	Deakin, G., and Polinkowsky, L.	Call Distributing System.
1299606	do	Polinkowsky, L	Do.
1299608	do	Potts, L. M	Selective Signaling Apparatus.
1300326	Apr. 15, 1919	Bell, J. H	Telegraph System.
1301412	Apr. 22, 1919	Elmen, G. W	Electromagnetic Device.
1301525	do	Van der Bijl, H. J	Radio Transmission.
1301644	do	Buckley, O. E	Directive Sending System.
1301827	Apr. 29, 1919	Flye, W. L	Test Connector.
1302767	May 6, 1919	Clausen, H. P., and Goodrum, C. L.	Telephone Exchange System.
1302808	do	Keckler, C. W	Do.
1302809	do	do	Do.
1302946	do	Malcolmson, W. J., and Ward, H. L.	Roasting Apparatus.

Patent no.	Date of issue	Inventor	Title
1303001	May 6, 1919	Wilbur, R. S.	Telephone Exchange System.
1303036	do	Cummings, G. C.	Telegraph System.
1303056	do	Hague, A. E.	Machine Switching Telephone System.
1303070	do	Kochendorfer, F. S., and Blount, H.	Machine for Coating Wire.
1303084	do	Lundquist, F. A.	Cross Bar Line Switch.
1303183	do	Egerton, H. C.	Phonograph Transmitter.
1303184	do	Ehret, C. D.	Method of and Apparatus for Controlling Electrical Energy.
1303452	May 13, 1919	Bellamy, H. T., and Smith, J. C.	Process and Apparatus for Drawing Glass.
1303496	do	Rainey, P. M.	Selecting System.
1303511	do	Shackelton, W. J.	Insulation for Electrical Apparatus.
1303528	do	Wright, J. L.	Telephone Exchange System.
1303579	do	Nicolson, A. M.	System for Successive Amplification of Energies.
1303960	May 20, 1919	Quass, R. L.	Connecting Circuit for Telephone Systems.
1304335	do	Lundell, A. E.	Automatic Telephone Exchange System.
1304641	May 27, 1919	Williams, S. B., Jr.	Call Distributing System.
1305225	do	Krum, H. L., and C. L.	Printing Telegraph.
1305981	June 3, 1919	Hinrichsen, E. E.	Telephone System.
1306054	June 10, 1919	Field, J. C.	Impulse Transmitter.
1306063	do	Johnson, L. H.	Telephone System.
1306072	do	Merritt, B. F.	Speed Control Governor.
1306074	do	Moran, J. F.	Signaling System.
1306124	do	Reynolds, J. N.	Line Switch.
Re. 15644	do	do	Do.
1306299	do	Bell, J. H.	Telegraph System.
1307057	June 17, 1919	Lundell, A. E.	Telephone Exchange System.
1307489	June 24, 1919	Dyson, A. H.	Do.
1307507	do	May, D. T.	High Potential Condenser.
1307510	do	Nicolson, A. M.	Thermionic Translating Device.
1307511	do	do	Electric Wave Repeating Apparatus.
1307517	do	Rainey, P. M.	Rectifier.
1307536	do	Clausen, H. P., and Goodrum, C. L.	Machine Switching Telephone System.
1307586	do	Kochendorfer, F. S.	Hydraulic Press.
1307688	do	Lundquist, F. A.	Telephone System.
1307753	do	Rhoads, C. S., Jr.	Signaling System.
1307999	do	Buckley, O. E.	Method of and Apparatus for Exhausting to Low Pressure.
1308391	July 1, 1919	Bell, J. H.	Distributing System.
1308539	do	Clausen, H. P.	Number Indicating Means.
1308554	do	Quass, R. L.	Call Distributing System.
1308664	do	Demarest, C. S.	Relay Selecting Circuit for Artificial Lines
1308725	do	Toomey, J. F., and Demarest, C. S.	Selecting Circuit for Artificial Lines.
1308726	do	do	Means for Controlling Artificial Lines.
1308841	July 8, 1919	Clausen, H. P.	Automatic Telephone System.
1308867	do	Reynolds, J. N.	Telephone Exchange System.
1309176	do	Bell, J. H.	Selecting System.
1309231	do	Adams, E. W.	Switching Apparatus.
1309233	do	Akin, A.	Protective Device for Electrical Apparatus.
1309248	do	Goodrum, C. L.	Automatic Telephone System.
1309253	do	Lowe, C. W.	Connector.
1309304	do	Reynolds, J. N., and Hearn, J. F.	Automatic Switch.
1309400	do	Espenschied, L.	Radio Frequency Interference Balance.
1309459	do	Carson, J. R.	Wireless Signaling System.
1309523	do	Hosford, W. F.	Process of Forming Electrical Contacts.
1309538	do	Mills, J., and Carson, J. R.	Wireless System.
1309745	July 15, 1919	Potts, L. M.	Machine Telegraph.
1309753	do	De Forest, L.	Means for Transforming Mechanical Vibrations into Electrical Vibrations.
Re. 15540	Feb. 13, 1923	do	Do.
1310226	July 15, 1919	Williams, S. B., Jr.	Call Distributing System.
1310395	July 22, 1919	Bell, J. H.	Telegraph System.
1310719	do	Vernam, G. S.	Secret Signaling System.
1310730	do	Blauvelt, W. G.	Semi-Mechanical Telephone System.
1311264	July 29, 1919	De Forest, L.	Oscillation Generator.
1311283	do	Mathes, R. C.	Amplifying and Correcting System.
1311868	do	Gherardi, B.	Method and Means for Avoiding Interference.
1311915	Aug. 5, 1919	Rainey, P. M.	Distributing Apparatus.
1312126	do	Lundell, A. E.	Telephone Exchange System.
1312433	do	Carson, J. R.	Translating Circuits.
1312572	Aug. 12, 1919	Parker, R. D.	Secret Signaling System.
1312574	do	Pierce, R. E.	Do.
1312768	do	Taggart, D. M.	Telephone Exchange System.
1312773	do	Wilbur, R. S.	Do.
1312778	do	Clausen, H. P.	Do.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1312791	Aug. 12, 1919	Lundell, A. E., and Clark, E. H.	Signaling System.
1312795	do	MacDougall, H. W	Telephone Exchange System.
1312808	do	Quass, R. L	Signaling System for Telephone Exchanges.
1312809	do	Scribner, C. E., and McQuarrie, J. L.	Signaling System.
1312884	do	Williams, S. B., Jr	Automatic Switch Control Circuit.
1313406	Aug. 19, 1919	Mathes, R. C	Vacuum Tube Repeater.
1313413	do	Osborne, H. S	Composite Ringing Apparatus.
1313483	do	Heising, R. A	High Frequency Carrier Telephony.
1314214	Aug. 26, 1919	Reynolds, J. N., and Hearn, J. F.	Telephone Switching Apparatus.
1314250	do	De Forest, L	Method of and Means for Reproducing and Amplifying Weak Pulsating Currents.
1314251	do	do	Radio Telephony.
1314252	do	do	Oscillation Generator.
1314253	do	do	Apparatus for Use in Wire or Radio Communications.
1314695	Sept. 2, 1919	Osborne, H. S	Composite Signaling Circuits.
1314827	do	do	Do.
1314828	do	do	Do.
1315539	Sept. 9, 1919	Carson, J. R	Distortion Correcting Circuit.
1317074	Sept. 23, 1919	Clausen, H. P	Telephone System.
1317155	Sept. 30, 1919	Demarest, C. S	Ringing Arrangement for Four-Wire Circuits.
1317400	do	Stoller, H. M	Modulating System.
1318088	Oct. 7, 1919	Klein, C. H	Combination Tool.
1318459	Oct. 14, 1919	Pfannenstiehl, H	Telegraph System.
1318855	do	Ehret, C. D	Method of and Apparatus for Controlling Electrical Energy.
1318937	do	Toomey, J. F., and Demarest, C. S.	Transmission Controlling Means for Four-Wire Repeaters.
1318941	do	Williams, S. B., Jr	Telephone Exchange System.
1318971	do	Cole, I. E	Electrical Protective Apparatus.
1319031	do	Aldendorff, F	Electromechanical Switching System for Interconnecting Telephone Lines.
1319651	Oct. 21, 1919	Kirkwood, M	Electrical Measuring Apparatus.
1319714	Oct. 28, 1919	Laurenz, O	Milling Cutter.
1319719	do	May, D. T	Protective Device.
1319720	do	do	Do.
1319725	do	Reynolds, J. N., and Hearn, J. F.	Automatic Telephone Switch.
1319740	do	Wickstrom, C. A	Automatic Screw Assembling Machine.
1319999	do	Goodrum, C. L	Telephone Exchange System.
1320366	do	Houskeeper, W. G	Optiphone.
1320489	Nov. 4, 1919	Osborne, H. S	Method of Constructing Telephone Circuits.
1320908	do	Parker, R. D	Ciphering and Deciphering Mechanism.
1320980	do	Bowman, H. N	Transformer.
1321723	Nov. 11, 1919	Demarest, C. S	Through Ringing Repeater Circuits.
1321795	do	Aldendorff, F	Interconnecting Lines by Electromechanically Controlled Switches.
1322010	Nov. 18, 1919	Guthe, O. D. M	Telegraph System.
1322170	do	Hill, M. F	Telephone Exchange System.
1322482	do	Demarest, C. S	Amplifier for Ringing Currents.
1322557	Nov. 25, 1919	Ford, W. H. D	Message Register.
1322590	do	Lewis, H. C	Braiding Machine.
1322634	do	Shaw, T	Method and Means for Correcting Irregularities in Loaded Lines.
1322759	do	Carpenter, W. W	Registering and Controlling Equipment.
1323318	Dec. 2, 1919	Reynolds, J. N	Telephone Switching Apparatus.
1323430	do	Wilbur, R. S., and Ulrich, H. W.	Telephone System.
1324130	Dec. 9, 1919	Mortimer, L. A., and Cummings, G. C.	Telegraph System.
1324334	do	Boving, H	Electrical Protective Device.
1324344	do	Field, J. C	Signaling System.
1324355	do	Keckler, C. W	Telephone Exchange System.
1324356	do	Kropp, J. A	Calling Device.
1324357	do	Larlee, H. A	Telephone Transmitter.
1324364	do	Wilbur, R. S	Telephone Exchange System.
1324365	do	Williams, S. B., Jr., and Quass, R. L.	Telephone System.
1324401	do	Magrath, A. C	Electric Controlling Switch.
1324496	do	Cummings, G. C	Telegraph System.
1324792	Dec. 16, 1919	Booth, W. E	Apparatus Unit.
1324796	do	Carroll, L. W	Telephone Exchange System.
1324798	do	Conway, R. D	Signaling System.
1324818	do	Hazard, A. B	Apparatus for Measuring Electrical Resistance.
1324838	do	McMurry, F. R	Telegraph System.
1324847	do	Rasmussen, O. E	Automatic Switch.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1324959	Dec. 16, 1919	Finley, C. A.	Vibration Detector.
1325184	do	Young, F. V.	Telephone Exchange System.
1325192	do	Field, J. C.	Telephone System.
1325347	do	Booth, W. T.	Do.
1325574	Dec. 23, 1919	Nichols, H. W.	Secret Signaling System.
1325865	do	Shreeve, H. E.	Vacuum Tube Socket.
1325871	do	Keckler, C. W.	Telephone System.
1325879	do	Nichols, H. W.	Vacuum Tube Circuit.
1325889	do	Curtis, A. M.	Protector for Electric Circuits.
1326199	Dec. 30, 1919	Johnson, E. D.	Telephone Repeater Circuits.
1326456	do	Krum, C. L., and H. L.	Telegraph Transmitter.
1326475	do	Brough, W. R., and Dodge, W. L.	Telephone Exchange System.
1326546	do	Taggart, D. M.	Do.
1326719	do	Freund, O. A.	System of Generating Electrical Currents.
1327185	Jan. 6, 1920	Whiting, D. F.	Telephone System.
1327805	Jan. 13, 1920	Bullard, A. M.	Automatic Telephone Exchange.
1328986	Jan. 27, 1920	Dixon, A. F.	Selecting System.
1328996	do	Housekeeper, W. G.	Transmitter.
1329001	do	Lundius, E. R.	Telephone System.
1329004	do	MacDougall, H. W.	Telephone Exchange System.
1329031	do	Waldron, F. D.	Transmitter Support.
1329283	do	Arnold, H. D.	Thermionic Amplifier.
1329758	Feb. 3, 1920	De Forest, L.	Oscillating Current Generator.
1329842	do	Martin, W. H.	Means for Neutralizing Interference.
1329949	do	Blackwell, O. B., Shaw, T., and Koukol, C. J.	Electrical Measuring Apparatus.
1330200	Feb. 10, 1920	Lundell, A. E.	Telephone Exchange System.
1330201	do	Lundius, E. R.	Do.
1330202	do	McAuliffe, J. C.	Do.
1330214	do	Nordenswan, R., and Winckel, R. C.	Telephone Receiver.
1330220	do	Smythe, E. H.	Telephone Call Distributing System.
1330221	do	Taggart, D. M.	Telephone Exchange System.
1330226	do	Wright, J. L.	Do.
1330234	do	Booth, W. T.	Telephone Set.
1330252	do	Fowler, C. B.	Telephone Exchange System.
1330258	do	Gilson, A. F. F.	Telephone Switchboard.
1330391	do	Pinkler, A. P.	Telephone Transmitter.
1330417	do	Williams, S. B., Jr., and Quass, R. L.	Telephone Exchange System.
1330464	do	Goodrum, C. L.	Finder Starting System.
1330467	do	Harrison, W. H.	Telephone Exchange System.
1330471	do	Kendall, B. W.	High Frequency Signaling.
1330472	do	Kerr, M. B.	Printing Telegraph Receiver.
1330474	do	Kiesel, W. C.	Telephone Exchange System.
1330483	do	Lundell, A. E., and Stearn, F. A.	Do.
1330491	do	Nordenswan, R.	Vibration Responsive Device.
1330507	do	Willenbruch, W.	Electromagnetic Switching Device.
1332222	Mar. 2, 1920	Lundell, A. E., and Thompson, G.	Automatic Telephone System.
1332927	Mar. 9, 1920	Smith, T. C.	Reeling Device.
1332961	do	Tanner, DeW. C.	Signaling System.
1332976	do	Dowd, A. D.	Do.
1332996	do	Perry, G. E.	Pneumatic Brush or Sprayer.
1333000	do	Spencer, C. G.	Synchronizing System.
1333003	do	Titus, W. A.	Outlet Box.
1333013	do	De Vignier, R. M.	Button.
1333014	do	Field, J. C.	Signaling System.
1333015	do	Freile, B.	Button.
1333026	do	Lundell, A. E.	Telephone System.
1333027	do	do	Telephone Switch Controlling System.
1333111	do	Hoyt, R. S.	Impedance Equalizer for Use with Transformers.
1333596	Mar. 16, 1920	Andrick, W. P.	Telephone System.
1333744	do	Wente, E. C.	Telephone Transmitter.
1333758	do	Keckler, C. W.	Telephone System.
1334077	do	Bullard, A. M.	Semi-Mechanical Telephone System.
1334080	do	Clausen, H. P.	Impulse Sending Device.
1334093	do	Harris, J. W.	Telephone Transmitter Mouthpiece.
1334105	do	Lundell, A. E.	Switch Controlling System.
1334122	do	Swoboda, A. R.	Telegraph System.
1334125	do	Williams, S. B., Jr.	Telephone Exchange System.
1334276	Mar. 23, 1920	Adams, A. H.	Contact Terminal Bank.
1334294	do	Dyson, A. H.	Telephone Exchange System.
1334300	do	Goodrum, C. L.	Do.
1334307	do	Lundell, A. E.	Telephone System.
1334308	do	Lundell, A. E., and Sperry, A. B.	Telephone Exchange System.
1334311	do	Matthies, W. H.	Telephone System.

Patent no.	Date of issue	Inventor	Title
1334321	Mar. 23, 1920	Shackelton, W. J.	Loading Coil and Method of Constructing Same.
1334447	do	Goodrum, C. L.	Telephone Exchange System.
1334674	do	Pannitti, A., Jr.	Ratchet Screw Driver.
1334735	do	Clark, E. H.	Controlling Device.
1334750	do	Goodrum, C. L., and Kropp, J. A.	Selecting Switch.
1334766	do	Lundell, A. E.	Telephone Exchange System.
1334767	do	Lundell, A. E., and Hancock, E. W.	Sender Testing System.
1335739	Apr. 6, 1920	Keckler, C. W.	Telephone System.
1336414	Apr. 13, 1920	Bell, J. H.	Telegraphy.
1336543	do	Stull, J. S.	Testing Machine.
1336558	do	Gherardi, B.	Anti-Abrasion Cable Support.
1337197	Apr. 20, 1920	Clausen, H. P.	Telephone Exchange System.
1337198	do	do	Calling Device.
1337276	do	Scheuch, W. A.	Electric Resistance Alloy.
1337285	do	Sperry, A. B.	Automatic Selecting Switch.
1337297	do	Ulrich, H. W.	Telephone Exchange System.
1337301	do	Wilbur, R. S.	Do.
1337304	do	Atwood, G. F.	Speech Reproducing Device.
1337309	do	Goodrum, C. L.	Telephone System.
1337310	do	do	Do.
1337314	do	Hall, J. A.	Calling Device.
1337324	do	Powell, W. T.	Automatic Telephone System.
1337325	do	Reynolds, J. N.	Telephone Exchange Apparatus.
1337471	do	Harrison, W. H.	Telephone Exchange System.
1337482	do	Reeves, F. N.	Electric Signaling System.
1337671	do	Sperry, A. B.	Telephone Exchange System.
1337676	do	Wilbur, R. S., and Harrison, W. H.	Telephone System.
1337680	do	Williams, S. B., Jr., and Albert, W. P.	Time Measuring System.
1337681	do	Williams, S. B., Jr.	Telephone Exchange System.
1337692	do	Crawford, W. G.	Telephone Set.
1337694	do	Egerton, H. C.	Telephone Amplifier.
1337699	do	Goodrum, C. L.	Telephone System.
1337710	do	Lundell, A. E.	Machine Switching Telephone Exchange System.
1337711	do	do	Telephone Exchange System.
1337712	do	do	Telephone System.
1337713	do	McQuarrie, J. L.	Do.
1337714	do	do	Automatic Telephone Exchange System.
1337715	do	do	Telephone System.
1337718	do	Mason, S. R.	Cleansing of Ferrous and Non-Ferrous Metals.
1337732	do	Stoller, H. M.	Magnetic Gearing.
1337736	do	Van Amstel, T.	Telephone Exchange System.
1337737	do	Van der Bijl, H. J.	Producing Currents of Desired Wave Form.
1337740	do	Williams, S. B., Jr., and Baldwin, C. F.	Telephone Exchange System.
1337741	do	Wotton, J. A.	Telephone Receiver.
1337748	do	Bell, J. H.	Telegraph System.
1337752	do	Carroll, L. W.	Do.
1337753	do	Clausen, H. P.	Supervisory System.
1337754	do	do	Telephone Exchange System.
1337755	do	do	Do.
1337761	do	Dodge, W. L.	Do.
1337782	do	Lundell, A. E.	Do.
1337783	do	McMurry, F. R.	Signaling Mechanism.
1337784	do	McQuarrie, J. L.	Automatic Switch.
1337794	do	Reynolds, J. N., and Hearn, J. F.	Do.
1338086	Apr. 27, 1920	Kendall, J. B.	Reversing Mechanism.
1339001	May 4, 1920	Reynolds, J. N., and Hearn, J. F.	Cross Bar Switch.
1339010	do	Wright, J. L.	Telephone Exchange System.
1339175	do	Dunham, B. G.	Two-Wire Multiple Automatic Telephone System.
1339202	do	Kochendorfer, F. S.	Grinding, Polishing, and Buffing Machine Equipment.
1339312	do	Albright, H. F.	Grinding, Polishing, and Buffing Machine and the Like.
1339575	May 11, 1920	Polinkowsky, L.	Machine Switching Telephone Exchange System.
1339778	do	Miller, D. D.	Electromagnetic Device.
1339793	do	Smith V. L.	Telephone Transformer.
1339814	do	Egerton, H. C.	Telephone Set.
1339824	do	Heising, R. A.	Telegraph System.
1340260	May 18, 1920	Thompson, G. K.	Registering Circuits for Coin Boxes.
1340933	May 25, 1920	Clausen, H. P.	Electrical Testing System.
1340934	do	do	Automatic Telephone System.

Patent no.	Date of issue	Inventor	Title
1340935	May 25, 1920	Clausen, H. P., and Goodrum, C. L.	Telephone Exchange System.
1340936	do	Conway, R. D	Testing System.
1340940	do	Dixon, A. F., and Reeves, F. N.	Telephone Exchange System.
1340942	do	Edwards, G. D	Signaling System.
1340955	do	Hermann, R. R	Telephone Set.
1340979	do	Polinkowsky, L	Call Distributing System.
1340982	do	Reynolds, J. N., and Stearn, F. A.	Telephone System.
1340989	do	Smith, T. C	Aerial Cable Guide.
1340997	do	Williams, S. B., Jr	Machine Switching Telephone System.
1341006	do	Babcock, C. D	Ionized Chamber Device.
1341007	do	Booth, W. T	Telephone Set.
1341211	do	Heising, R. A	Modulation of High Frequency Currents.
1341447	do	Timm, W. A	Liquid Distributing System.
1341463	do	Hazard, A. B	Testing System, Process and Machine.
1341473	do	Lundell, A. E	Machine Switching Telephone System.
1341998	June 1, 1920	Rainey, P. M	Telegraph System.
1342823	June 8, 1920	Lundell, A. E., and Clark, E. H.	Telephone Exchange System.
1342902	do	Goodrum, C. L	Telephone System.
1343196	June 15, 1920	Conway, R. D	Signaling System.
1343256	do	Field, J. C	Selectively Operated Circuit Controlling Device.
1343306	do	Carson, J. R	Duplex Translating Circuits.
1343307	do	do	Do.
1343308	do	do	Do.
1343562	do	Heising, R. A	Control Means for Vacuum Tube Circuits.
1343880	do	Beck, W. O	Casing and Support for Electrical Apparatus.
1343903	June 22, 1920	Clausen, H. P., and Goodrum, C. L.	Telpehone System.
1345016	June 29, 1920	Lundell, A. E., and Stearn, F. A.	Do.
1345057	do	Bassett, G. O	Insulating and Sealing Composition.
1345176	do	Harlow, J. B	Railway Signaling System.
1345348	July 6, 1920	Clausen, H. P	Telephone Exchange System.
1345349	do	do	Do.
1345717	do	Thomas, G. B	Acoustic Device.
1345743	do	Blount, H	Means for Grinding and Slotting Carbon Disks and the Like.
1345798	do	Mortimer, L. A	Electrical Relay.
1345879	do	Polinkowsky, L	Machine Switching Telephone Exchange System.
1346314	July 13, 1920	Hazard, A. B	Conveying Mechanism.
1346825	July 20, 1920	Hosford, W. F	Wire Tinning Machine.
1346874	do	Bellamy, H. T., and Sweely, B. T.	Resistance Material.
1347049	do	Martin, W. H	Correcting Circuits for High Distortion Lines.
1347900	July 27, 1920	Englund, C. R	Resistance Unit.
1348157	Aug. 3, 1920	De Forest, L	Apparatus for Amplifying Pulsating Electric Currents.
1348213	do	do	Radio Telephone System.
1348835	do	Alldendorff, F	Switching Apparatus.
1348909	Aug. 10, 1920	Toomey, J. F	Telephone Toll Circuits.
1349252	do	Arnold, H. D	Method of and Means for Utilizing Thermionic Currents.
1349729	Aug. 17, 1920	Nelson, E. L	Modulating and Transmitting System.
1350752	Aug. 24, 1920	Van der Bijl, H. J	High Frequency Signaling.
1351186	Aug. 31, 1920	Nelson, C. A	Process of and Machine for Removing Combustible Coverings.
1351674	do	Mitchiner, J. I	Relay Armature.
1351776	Sept. 7, 1920	Logwood, C. V	Oscillation Generator System.
1351845	do	Fish, L. B	Anchoring Device.
1351863	do	Mils, J	Telephone Repeater.
1351989	do	Bell, J. H	Telegraph System.
1352081	do	Moran, J. F	Signaling System.
1352116	do	Cummings, G. C	Telegraphy.
1352459	Sept. 14, 1920	Kochendorfer, F. S., and Balduf, B. E.	Annealing Furnace.
1352549	do	Sinclair, C. G., Jr	Cable Hanger.
1352568	do	White C	Telephone System.
1352597	do	Harrison, H. C	Receiver.
1352660	do	Dyson, A. H	Telephone Exchange System.
1352786	do	Campbell, G. A	Four-Wire Transmission System.
1352828	do	Mills, J	Four-Wire Circuit.
1352939	do	Booth, W. T	Telephone Transmitter.
1352970	do	Keckler, C. W	Telephone Exchange System.
1353031	do	Demarest, C. S	Vacuum Bulb for Signaling Apparatus.
1353145	Sept. 21, 1920	Clement, L. M	Device for Varying Electrical Coupling.

Patent no.	Date of issue	Inventor	Title
1353464	Sept. 21, 1920	Eaves, A. J	Telegraph Repeater System.
1353517	do	Clausen, H. P	Impulse Controlling System.
1353601	do	McQuarrie, J. L	Telephone System.
1353612	do	Reeves, F. N	Telephone Exchange System.
1353637	do	Crisson, G	Repeater Circuit.
1353698	do	Affel, H. A	Combined Carrier and Radio System.
1353735	do	Espenschied, L	Antenna Structure.
1353872	Sept. 28, 1920	Weaver, W. C	Telephone Exchange System.
1353910	do	Johnson, L. H	Telephone System.
1353976	do	Stoekle, E. R	Vacuum Tube Device.
1354051	do	Lundell, A. E	Call Registering System.
1354229	do	Thompson, G. K	Telephone Transmitter.
1354814	Oct. 5, 1920	Field, J. C	Impulse Transmitting Device.
1354908	do	Jenkins, G. M. O	Portable Telephone Set.
1354932	do	Wilson, W	Secret Signaling System.
1354939	do	Arnold, H. D	Vacuum Tube Device.
1355147	Oct. 12, 1920	Jacobs, O. B	Network Selecting Device.
1355594	do	Dunham, B. G	Telephone Exchange System.
1355616	do	Mohn, F	Feeding Head.
1355634	do	Williams, S. B., Jr., and Dunham, B. G.	Telephone Exchange System.
1355635	do	Williams, S. B., Jr	Do.
1355897	Oct. 19, 1920	Demarest, C. S	Testing Circuits for Repeaters Equipped with Automatic Network Selectors.
1355898	do	do	Testing and Monitoring Equipment for Repeater Circuits.
1355926	do	Taggart, D. M	Telephone Exchange System.
1355927	do	do	Do.
1355957	do	Gardanier, P. M	Telephone Transmission System.
1355971	do	Heydt, G. H	Substation Sender.
1355983	do	Lattig, J. W., and Goodrum, C. L.	Automatic Telephone Exchange System.
1356164	do	Lundell, A. E	Telephone Exchange System.
1356176	do	Stearn, F. A	Listening Key.
1356181	do	Wilbur, R. S	Telephone Exchange System.
1356256	do	Britten, W. G	Telephone System.
1356546	Oct. 26, 1920	Morehouse, L. F	Ciphering System.
1356557	do	Potts, L. M	Roller Clutch.
1356592	do	Bell, J. H	Telegraph System.
1356607	do	Dixon, A. F	Counting Apparatus.
1356617	do	Goddard, F. M	Electrical Resistance Element.
1356639	do	Lundell, A. E	Telephone Exchange System.
1356643	do	McQuarrie, J. L	Telephone System.
1356650	do	Mohn, F	Clutch Mechanism.
1356686	do	Arnold, H. D	Means and Method for Secret Signaling.
1356687	do	do	Method and Apparatus for Measuring Gas Pressures.
1356701	do	Eaves, A. J	Secret Telegraphic System.
1356704	do	Fowler, C. B	Telephone Exchange System.
1356763	do	Hartley, R. V. L	Oscillation Generator.
1356834	do	Smith, W. F	Twisting Machine.
1357216	Nov. 2, 1920	Boving, H	Leading-In Wire.
1357264	do	Van Dyke, K. S	Magnetic Modulator.
1357296	do	Martin, W. H	Substation Circuits.
1357498	do	Housekeeper, W. G	Leading-In Wire.
1357657	do	Scriven, E. O	Method of and Means for Generating Low Frequency Electrical Oscillations.
1357979	Nov. 9, 1920	Harper, A. U	Transmission Equalization Arrangement.
1358053	do	Bascom, H. M	Telephone System for Auditoriums.
1358758	Nov. 16, 1920	Kuhn, G. W	Telephone Trunk Circuits.
1358777	do	Osborne, H. S	Signaling Circuits for Electric Railways.
1359019	do	Bell, J. H	Telegraph System.
1359482	Nov. 23, 1920	Blauvelt, W. G	Semi-Mechanical Telephone System.
1359516	do	Loynes, O. H	Holding Circuits for Toll Switching Trunks.
1359565	do	Bell, J. H	Telegraph System.
1359594	do	Harris, J. W	Process for Joining Materials.
1359952	do	Bell, J. H	Telegraph System.
1360231	do	Krum, C. L. and H. L	Printing Telegraph.
1360288	Nov. 30, 1920	Griffin, J. T	Welding Mechanism.
1360331	do	Toomey, J. F	Testing and Adjusting Apparatus for Cord Circuits.
1360332	do	do	Testing Circuit.
1360701	do	Wotton, J. A	Signaling Device.
1360712	do	Bell, J. H	Telegraph System.
1360713	do	do	Do.
1360722	do	Clausen, H. P	Telephone System.
1360738	do	Hall, J. A	Do.
1360740	do	Hartley, R. V. L	Reduction of Distortion of Signaling Currents.
1360757	do	Kelsall, G. A	Loaded Telephone Circuits.
1360948	do	Hendry, W. F	Welding Machine.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1361024	Dec. 7, 1920	Davidson, J., Jr	Signaling Circuits for Toll Lines.
1361026	do	Demarest, C. S., and Shoffstall, H. F.	Testing Apparatus.
1361486	do	Osborne, H. S., and Parker, R. D.	Composite Signaling System.
1361487	do	Osborne, H. S	Plural Demodulation Circuits.
1361488	do	do	Plural Modulation System.
1361510	do	Wilbur, R. S	Telephone Transmission System.
1361522	do	Espenschied, L	Plural Modulation System.
1361813	Dec. 14, 1920	Booth, W. E	Radio Cabinet.
1361928	do	Toomey, J. F	Testing and Adjusting Apparatus for Cord Circuits.
1361929	do	do	Monitoring Circuits for Telephone Repeaters.
1361960	do	Goodrum, C. L	Telephone System.
1362020	do	Lundell, A. E., and Clark, E. H.	Do.
1362096	do	Goodrum, C. L	Do.
1362126	do	Matthies, W. H	Do.
1362138	do	Pratt, E. J	Induction Coil.
1362337	do	May, D. T	Protective Device.
1362587	Dec. 21, 1920	Adams, E. W	Printing Telegraph Receiver.
1362592	do	Bell, J. H	Telegraph System.
1362596	do	Blauvelt, W. G	Semi-Mechanical Telephone System.
1362597	do	Booth, W. T	Transmitter Support.
1362605	do	Dixon, A. F	Selecting System.
1362607	do	Dowd, A. D	Telegraph System.
1362612	do	Espenschied, L	Wireless Receiving System.
1362613	do	do	Means for Neutralizing Interfering Disturbances.
1362639	do	Rainey, P. M	Printing Mechanism.
1362643	do	Smith, W. F	Winding Machine.
1362648	do	Swoboda, A. R	Telegraph System.
1363219	Dec. 28, 1920	Bascom, H. M	Trunking System.
1363220	do	do	Signaling Device.
1363268	do	Powell, W. T	Telephone System.
1363334	do	Lundell, A. E	Do.
1363933	do	Trimble, R. F	Assembly Tool.
1364013	do	Wilbur, R. S., and Lovelee, R. F.	Telephone Transmission System.
1364080	Jan. 4, 1921	Davisson, C. J	Ballasting Device.
1364086	do	Dowd, A. D	Telegraph System.
1364106	do	Goodrum, C. L	Automatic Telephone System.
1364158	do	Toomey, J. F	Method of and Apparatus for Testing Repeater Circuits.
1364159	do	do	Through Ringing Repeater Circuits.
1364162	do	Ulrich, H. W	Telephone Exchange System.
1364170	do	Adams, E. W	Indicator for Telephone Exchange Systems.
1364643	do	Powell, W. T	Telephone Exchange System.
1364685	do	Beck, W. O	Electromagnetic Device.
1364725	do	Correia, J. N	Telegraph System.
1364860	Jan. 11, 1921	Betts, W. L	Vibration-Proof Vacuum Tube Mounting.
1364874	do	Ford, W. H. D	Electromagnetic Device.
1364909	do	Wilbur, R. S., and Spencer, C. G.	Telephone System.
1364964	do	Toomey, J. F	Means for Controlling Repeaters.
1364965	do	do	Telephone Call Transfer System.
1364969	do	Wilbur, R. S	Signaling System.
1365157	do	De Forest, L	Apparatus for Use in Telegraphy or Telephony.
1365231	do	Dixon, A. F	Printing Telegraph System.
1365269	do	Polinkowsky, L	Machine Switching Telephone Exchange System.
1365270	do	do	Telephone Exchange System.
1365413	do	Kochendorfer, F. S., and Blount, H.	Reeling Machine.
1365414	do	Kochendorfer, F. S	Impregnating Machine.
1365425	do	Shewhart, W. A	Sound Proof Shield.
1365470	do	Egerton, H. C	Wave Distribution.
1365710	Jan. 18, 1921	McIlwain, H. A., Walton, C. J., and Wright, J. W.	Collapsible Wire Reel.
1365734	do	Shackleton, S. P	Electron Tube Testing Circuits.
1365898	do	Egerton, H. C	Telephone Apparatus.
1366411	Jan. 25, 1921	Nicolson, A. M	Thermionic Translating Device.
1366414	do	Osborne, H. S., and Martin, W. H.	Means for and Method of Measuring Weak Currents.
1366416	do	Pfannenstiehl, H	Signaling Systems.
1366423	do	Shanck, R. B	Composite Ringer.
1366617	do	Wier, H. B., and Capen, W. H.	Telegraphone.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1366650	Jan. 25, 1921	Hamilton, B. P.	Signaling System.
1366812	do	Krum, C. L, and H. L.	Selective or Printing Telegraph.
1367113	Feb. 1, 1921	Atwood, G. F.	Signaling System.
1367147	do	Keckler, C. W.	Do.
1367224	do	Arnold, H. D.	Radio Receiving System.
1367305	do	Cummings, G. C.	Telegraphy.
1367571	Feb. 8, 1921	Thompson, G. K.	Transmission Equalization Arrangement.
1367590	do	Demarest, C. S.	Transmission Circuits.
1367705	do	Keckler, C. W.	Automatic Telephone System.
1367717	do	Rainey, P. M.	Printing Telegraph System.
1367727	do	Wotton, J. A.	Electromagnetic Device.
1367729	do	Bell, J. H.	Telegraph System.
1367733	do	Cummings, G. C.	Do.
1367734	do	Curtis, A. M.	Construction of Reactance Coils.
1367735	do	Dixon, A. F.	Printing Telegraph System.
1367774	do	Field, J. C.	Signaling System.
1367833	do	Reynolds, J. N.	Terminal Bank for Selectors.
1367967	do	Heydt, G. H.	Telephone Exchange System.
1367999	do	Thronsen, S.	Semi-Automatic Winding Machine.
1368020	do	Campbell, M. H.	Tinning Mechanism.
1368241	Feb. 15, 1921	Crawford, W. G.	Telephone Set.
1368261	do	Jenkins, G. M. O.	Transmitter Mounting.
1368288	do	Pierce, R. E.	Electromagnetic Device.
1368296	do	Sked, N. S.	Anchoring Device.
1368307	do	Waldron, F. D.	Earpiece.
1368916	do	Field, J. C.	Vibrator.
1369003	Feb. 22, 1921	Blauvelt, W. G.	Semi-Mechanical Switchboard.
1369019	do	Field, J. C.	Signaling System.
1369022	do	Goodrum, C. L.	Calling Device.
1369288	do	Lundquist, F. A.	Automatic Telephone Exchange.
1369403	do	Demarest, C. S., and Shoffstall, H. F.	Testing Apparatus.
1369764	do	Van der Bijl, H. J.	Photoelectric Translating Device.
1369805	Mar. 1, 1921	Hamilton, B. P.	Secret Communication System.
1369828	do	Matthews, E. M.	Cable Hanger.
1370558	Mar. 8, 1921	Rhodes, W. A.	Machine Ringing System.
1370562	do	Shackleton, S. P.	Trunk Circuits.
1370669	do	Potts, L. M.	Machine Telegraph.
1371228	Mar. 15, 1921	Curtis, A. M.	Reduction of Static Interference in Radio Receiving Stations.
1371298	do	Clark, A. B.	Telephone and Call Signal System.
1371698	do	Linder, O.	Process of and Apparatus for Electrolysis.
1371699	do	do	Process for the Purification of Porous or Gelatinous Material.
1371717	do	Wilbur, R. S., and Bendernagle, W. H.	Telephone System.
1371734	do	Buckley, O. E.	Apparatus for Exhausting to Low Pressures.
1371737	do	Clausen, H. P., and Goodrum, C. L.	Telephone Exchange System.
1371748	do	Field, J. C.	High Capacity Selective Signaling System.
1371749	do	Fowler, C. B.	Telephone Exchange System.
1372042	Mar. 22, 1921	Rhodes, W. A.	Desk Operator's Circuits.
1372050	do	Toomey, J. F.	Busy Signal Testing Apparatus.
1372448	do	Polinkowsky, L.	Machine Switching Telephone Exchange System.
1372798	Mar. 29, 1921	Buckley, O. E.	Method and Apparatus for Measuring Gas Pressure.
1372838	do	Smith, T. C.	Pole Derrick.
1373019	do	Rainey, P. M.	Acoustic Device.
1373447	Apr. 5, 1921	Polinkowsky, L.	Telephone Exchange System.
1373503	do	Harlow, J. D.	Railway Signaling System.
1373504	do	Hitchcock, H. W.	Electrical Measuring Apparatus.
1374152	do	Krum, C. L. and H. L.	Telegraph Transmitter.
1374184	Apr. 12, 1921	Britton, E. C.	Telephone System.
1374188	do	Clausen, H. P., and Goodrum, C. L.	Do.
1374192	do	Dixon, A. F.	Selective System.
1374193	do	Ford, W. H. D.	Electromagnetic Relay.
1374200	do	Grondahl, H. H. C.	Mechanism for Cutting Cords or Strands.
1374201	do	Hall, J. A.	Selector.
1374219	do	Osborne, H. S.	Composite Transmission System.
1374220	do	do	Composite Signaling System.
1374221	do	do	Composite Phantom Circuits.
1374266	do	White, C.	Generating System.
1374606	do	Pfannenstiehl, H.	Printing Telegraphy.
1374630	do	Bancroft, E. P.	Selective Mechanism.
1375230	Apr. 19, 1921	Reynolds, J. N.	Telephone Exchange System.
1375276	do	Clausen, H. P., and Goodrum, C. L.	Telephone System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1375277	Apr. 19, 1921	Clausen, H. P., and Goodrun, C. L.	Telephone System.
1375281	do	Cummings, G. C.	Do.
1375405	do	Martin, W. H.	Apparatus for Testing Capacity of Electric Conductors.
1375414	do	Osborne, H. S.	Apparatus for Testing Capacity Deviations and Unbalance of Electric Conductors.
1375447	do	De Forest, L.	Means for Amplifying Currents.
1375465	do	Moore, C. R.	Device for Converting Sound or Other Vibrations into Variations in an Electrical Circuit.
1375481	do	Arnold, H. D.	Power Modulator for Radio Transmission.
1375675	do	Colpitts, E. H.	Signaling Method and System.
1375691	do	Goodrum, C. L.	Selective Switch.
1375692	do	do	Machine Switching Device.
1375712	do	Lundell, A. E.	Telephone Exchange System.
1375728	do	Rainey, P. M.	Distributing Apparatus.
1375739	do	Scriven, E. O.	Vacuum Tube Apparatus.
1375762	do	Thompson, G.	Distributing Switch.
Des. 57700	do	McLarn, E. S.	Desk Stand for Hand Telephones.
Des. 57701	do	do	Do.
1376391	May 3, 1921	Arnold, O. M., and Toomey, J. F.	Telephone Toll Circuits.
1376657	do	Thronsen, S.	Resistance Welding Machine.
1376663	do	Wickstrom, C. A.	Polishing Machine.
1376679	do	Curtis, A. M.	Radio Receiving System.
1376893	do	McQuarrie, J. L.	Telephone Switching Apparatus.
1376914	do	Ashbaugh, R. P., and Cawthon, S. C.	Winding Mechanism.
1377242	May 10, 1921	Demarest, C. S.	Network Selective Circuits.
1377405	do	De Forest, L.	Audion Circuit.
1377555	do	Bradbury, C. C.	Telephone System.
1378170	May 17, 1921	Espenschied, L.	Repeater Circuits.
1378392	do	Whiting, D. F.	Signaling System.
1378836	May 24, 1921	Clark, A. B., and Demarest, C. S.	Balancing Equipment for Four-Wire Circuits.
1378919	do	Toomey, J. F., and Spencer, C. G.	Portable Repeater Apparatus.
1378938	do	Clausen, H. P.	Telephone Exchange System.
1378943	do	Field, J. C.	Selective Signaling System.
1378945	do	Gilson, A. F. F., and Shann, O. A.	Step-by-Step Circuit Closing Device.
1378946	do	Gilson, A. F. F.	Fastening Device.
1378947	do	Goodrum, C. L.	Machine Switching Telephone System.
1378950	do	Hargan, A. D.	Recording Key.
1378960	do	Horton, J. W.	Method of and Apparatus for Detecting Under Water Vibrations.
1378961	do	Janicki, J.	Apparatus for Covering Cores.
1378989	do	Milton, I. L.	Method of Manufacturing Inductance Coils.
1378978	do	Rainey, P. M., and Dowd, A. D.	Telegraph System.
1378982	do	Shreeve, H. E.	Signaling System.
Re. 16835	Dec. 27, 1927	do	Do.
1378990	May 24, 1921	Wotton, J. A.	Do.
1379242	do	Beck, W. O.	Electromagnetic Device.
1379243	do	Bell, J. H.	Telegraph System.
1379650	May 31, 1921	Rhodes, W. A.	Testing Apparatus for Message Registers.
1379684	do	Griffin, J. T., Nelson, C. A., and Campbell, M. H.	Soldering Machine.
1380357	June 7, 1921	Clausen, H. P., and Goodrum, C. L.	Telephone System.
1380374	do	Gardner, F. G.	Signaling System.
1380451	do	Wilbur, R. S.	Telephone Exchange System.
1380679	do	Rainey, P. M.	Printing Telegraph System.
1380686	do	Stull, J. S.	Cutter Head.
1380751	do	Toomey, J. F., and Demarest, C. S.	Repeater Network Selecting Apparatus.
1380752	do	Toomey, J. F.	Electrical Relay.
1380857	do	Williams, S. B., Jr.	Telephone Exchange System.
1381368	June 14, 1921	Toomey, J. F.	Busy Back Circuits.
1381431	do	Polinkowsky, L.	Machine Switching Telephone System.
1381450	do	Butterfield, J. T.	Apparatus for Measuring Gas Pressures.
1381451	do	Coon, L. E.	Switching System.
1381456	do	Deakin, G.	Automatic Telephone Exchange System.
1381460	do	Harris, J. W.	Magnet Core.
1381480	do	Lundell, A. E.	Telephone System.
1381483	do	MacDougall, H. W.	Telephone Exchange System.
1381514	do	Hall, J. A., and Soper, C. P.	Electromagnetic Step-by-Step Mechanism.
1381530	do	Williams, S. B., Jr.	Telephone Exchange System.
1381545	do	Demarest, C. S.	Repeater Controlling System for Four-Wire Telephone Circuits.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1381640	June 14, 1921	Horton, J. W	Detecting Under Water Vibrations.
1381899	June 21, 1921	Atwood, G. F	Winding Machine.
1381933	do	Riecken, W. E	Do.
1382206	do	McCaa, D. G	Transmitting Apparatus.
1382262	do	Allen, R. M	Switching System and Indicating Device Therefor
1382631	June 28, 1921	Demarest, C. S., and Shackleton, S. P.	Repeater Circuits.
1383038	do	Toomey, J. F	Telephone Call Wire Circuits.
1383584	July 5, 1921	Wilbur, R. S	Telephone System.
1383588	do	Wright J. L	Semi-Automatic Telephone Exchange System.
1383677	do	Thompson, G	Telephone Exchange System.
1383690	do	Arnold, H. D	Method of Detecting Under Water Vibrations.
1383700	do	Egerton, H. C	Acoustic Device.
1383703	do	Elmen, G. W	Method of Insulating Metal Particles.
1383713	do	Ford, W. H. D	Spring Tension Gage.
1383737	do	McQuarrie, J. L	Method of and Apparatus for Recording and Reproducing Sound.
1383743	do	Mortimer, L. A	Telephone Exchange System.
1383750	do	Parker, R. D., and Hamilton, B. P.	Alternating Current Signaling System.
1383756	do	Reynolds, J. N	Automatic Switching Apparatus for Telephone Exchange Systems.
1383789	do	Conway, R. D	Telephone Exchange System.
1383799	do	Gent, E. W	Electrical Regulating Device.
1383802	do	Goodrum, C. L	Signaling Device.
1383804	do	Hall, J. A	Telephone Exchange System.
1383805	do	do	Party Line Metering System for Telephone Exchanges.
1383807	do	Heising, R. A	Power Modulation for Radio Transmission.
1384396	July 12, 1921	Merritt, B. F	Telegraph System.
1384398	do	Mortimer, L. A	Signaling System.
1384437	do	Edelmann, O	Bracket for Suspending Cables and the Like.
1384579	do	Toomey, J. F., and Demarest, C. S.	Automatic Transmission Controlling Means.
1384587	do	Bellamy, H. T	Manufacture of Composition Cores.
1384734	July 19, 1921	Anderson, C. A	Electrical Testing System and Apparatus.
1384994	do	Demarest, C. S., Clark, A. B., and Crisson, G.	Telephone Repeater Equipment.
1385090	do	Mills, J	Radio Receiving System.
1385091	do	do	Signaling.
1385777	July 26, 1921	Clark, A. B	Grid Circuits for Electron Tubes.
1386321	Aug. 2, 1921	Demarest, C. S	Telephone Repeater Equipment.
1386677	Aug. 9, 1921	Balduf, B. E	Capstan.
1386679	do	Bell, J. H	Telegraph System.
1386683	do	Booth, W. T	Do.
1386686	do	Bullard, A. M., and Reynolds, J. N.	Controlling System for Automatic Switching Systems.
1386688	do	Clausen, H. P., and Goodrum, C. L.	Telephone Exchange System.
1386689	do	Conway, R. D	Telephone System.
1386690	do	Crawford, G. C	Do.
1386697	do	Fletcher, H., and Strassner, F. J.	Testing Apparatus.
1386701	do	Goodrum, C. L	Coin Collect System.
1386705	do	Griffin, J. T., and Timm, W. A.	Electrically Heated Container
1386714	do	Leveridge, W. J	Vacuum Tube Holder.
1386719	do	MacPherson, H. D	Telephone System.
1386722	do	Mather, G. E	Diaphragm.
1386725	do	Palmer, J. C. R	Signaling System.
1386728	do	Polinkowsky, L	Machine Switching Telephone System.
1386730	do	Raynsford, A	Telephone Exchange System.
1386731	do	Read, H. S	Vacuum Tube Repeater Circuits.
1386747	do	White, C	Telephone Exchange System.
1386748	do	Wilbur, R. S	Signaling System.
1386749	do	Williams, S. B., Jr	Call Distributing System.
1386912	do	Timm, W. A	Container for Insulating or Impregnating Compounds.
1386977	do	Watson, E. F	Indicating Mechanism.
1386993	do	Dixon, A. F	Telegraph System.
1387171	do	Polinkowsky, L	Telephone Exchange System.
1387174	do	Powell, W. T	Machine Switching Telephone System.
1387177	do	Reddig, C. E	Flexible Shaft Coupling.
1387180	do	Reynolds, J. N	Telephone System.
1387181	do	Rhodes, W. A., and Anderson, F. E.	Telephone Exchange System.
1387188	do	Shann, O. A	Bell.
1387210	do	Sultzer, M	Method and Means for Correcting Irregularities in Transmission Lines.

Patent no.	Date of issue	Inventor	Title
1387228	Aug. 9, 1921	Bell, J. H	Selective System.
1387229	do	do	Telegraph System.
1387240	do	Collis, R. E	Stroboscopic System.
1387250	do	Fowler, C. B	Telephone Exchange System.
1387251	do	do	Telephone System.
1387252	do	Fredricks, J	Test Connector.
1387255	do	Goodrum, C. L	Telephone Exchange System.
1387262	do	Hartley, R. V. L	Receiving Apparatus for Wave Signaling.
1387270	do	Keckler, C. W	Signaling and Telephone System.
1387271	do	do	Telephone System.
1387280	do	Lundell, A. E	Do.
1387282	do	McQuarrie, J. L	Do.
1387284	do	MacDougall, H. W., and MacPherson, H. D.	Do.
1387288	do	Menefee, H. R	Support.
1387353	do	Clausen, H. P	Machine Switching Telephone System.
1387354	do	do	Telephone Exchange System.
1387367	do	Dodge, W. L., and MacPherson, H. D.	Telephone System.
1387386	do	Goodrum, C. L., and Clausen, H. P.	Do.
1387945	Aug. 16, 1921	Pugh, H. W., and Wotton, J. A.	Adapter for Telephone Calling Devices.
1387972	do	Gauthier, E	Clutch Mechanism for Power Driven Punch Presses.
1388450	Aug. 23, 1921	Colpitts, E. H., and Arnold, H. D.	Transmission of Intelligence.
1388507	do	Bell, J. H	Synchronizing System.
1388887	Aug. 30, 1921	Polinkowsky, L	Indicating System.
1389596	Sept. 6, 1921	Rhodes, W. A	Desk Operator's Circuits.
1390545	Sept. 13, 1921	do	Do.
1390580	do	Osborne, H. S	Means for Reducing Interference.
1390679	do	Dobbin, H. F., and Gent, E. W.	Impulse Transmitter.
1391006	Sept. 20, 1921	Parker, R. D	Half-Duplex Alternating Current Telegraph System.
1391552	do	Loynes, O. H., and Rose, A. F.	Repeater Cord Circuits.
1391947	Sept. 27, 1921	Gent, E. W	Electrically Operated Timing Apparatus.
1392152	do	Harden, W. H	Multiple Station Transmission Circuits.
1392179	do	Kuhn, G. W	Operator's Trunk Circuit.
1392815	Oct. 4, 1921	Crisson, G	Method of and Means for Detecting Irregularities in Transmission Lines.
1393286	Oct. 11, 1921	Hosford, W. F	Reeling Machine.
1393326	do	Sperry, A. B	Telephone System.
1393352	do	Dodge, W. L	Do.
1393429	do	Clausen, H. P	Do.
1393430	do	do	Do.
1393465	do	Taggart, D. M	Telephone Exchange System.
1393471	do	Wegel, R. L	Submarine Signaling.
1393502	do	Clausen, H. P	Machine Switching Telephone System.
1393503	do	do	Electrical System.
1393515	do	Egerton, H. C	Diaphragm and Method of Making Such Diaphragms.
1393521	do	Goodrum, C. L	Machine Switching Telephone System.
1393522	do	do	Telephone Exchange System.
1393557	do	McQuarrie, J. L	Sound Modifying Device.
1393558	do	McQuarrie, J. L., and Goodrum, C. L.	Telephone Exchange System.
1393559	do	do	Do.
1393727	do	Williams, S. B., Jr	Call Distributing System.
1393728	do	do	Telephone Exchange System.
1393946	Oct. 18, 1921	Clausen H. P	Do.
1394062	do	Blackwell, O. B	Means for and Method of Reducing Crosstalk in Four-Wire Circuits.
1394189	do	Demarest, C. S	Repeater Controlling System for Four-Wire Circuits.
1394190	do	do	Testing System for Four-Wire Circuits.
1394642	Oct. 25, 1921	Quass, R. L	Electric Signaling System.
1395007	do	Post, A. M	Telegraph System.
1395378	Nov. 1, 1921	Wilson, R. H., and Schafer, J. P.	Secret Signaling.
1395390	do	Clement, L. M	Oscillation Generating System.
1395595	do	Polinkowsky, L	Telephone System.
1395854	do	Martin, W. H	Balancing Signaling Systems.
1395977	do	Stearn, F. A. and Scudder, F. J.	Telephone Exchange System.
1396721	do	Atwood, G. F	Cable Reeling Apparatus.
1396730	do	Clausen, H. P. and Goodrum, C. L.	Telephone System.
1396739	do	Fowler, C. B	Telephone Exchange System.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1396741	Nov. 1, 1921	Goodrum, C. L.	Machine Switching Telephone System.
1396745	do	Haddock, A.	Vacuum Tube Circuits.
1396746	do	Halter, C.	Telegraph System.
1396747	do	Harrison, H. C.	Telephone Receiver.
1396750	do	Hill, O. E.	Signaling Generator.
1396759	do	Jillard, A. G. and Bracken, S.	Manufacture of Insulating Supporting Blocks.
1396760	do	Johnson, K. S.	Signaling Circuit.
1396769	do	Mather, G. E.	Folding Door Structure.
1396771	do	Minton, J. P.	Receiver Shield.
1396780	do	Pugh, H. W.	Folding Door Structure.
1396786	do	Scriven, E. O.	System for Transmission of Intelligence.
1396800	do	Wilbur, R. S.	Testing System.
1396930	do	Gherardi, B.	System for the Equalization of Transmission Lines.
1397034	do	Clausen, H. P.	Telephone Exchange System.
1397093	do	Espenschied, L.	Radio Repeating System.
1397228	do	Nyquist, H.	Electrical Measuring Apparatus.
1397575	Nov. 22, 1921	De Forest, L.	Selective Audion Amplifier.
1397862	do	Fitch, A. L.	Transmission System.
1397975	do	Kuhn, G. W.	Electrical Testing System.
1397991	do	Thompson, G. K.	Message Registering System.
1398266	Nov. 29, 1921	Hitchcock, H. W.	Electrical Indicating and Measuring Device.
1398287	do	Thompson, G. K.	Selective Signaling System.
1398589	do	Fowler, C. B.	Telephone Exchange System.
1398665	do	Arnold, H. D.	Thermionic Amplifier.
1399066	Dec. 6, 1921	Lubberger, F., and Pinell, W.	Telephone Exchange System.
1399226	do	Rhodes, W. A.	Electrothermal Relay.
1399695	do	Demarest, C. S.	Electrical Testing Circuits.
1399728	Dec. 13, 1921	Adams, A. H.	Automatic Switch for Telephone Exchange Systems.
1399775	do	Johnson, K. S.	Common Battery Substation.
1399993	do	Pfannenstiehl, H., and Watson, E. F.	Printing Telegraph.
1399997	do	Rainey, P. M.	Telegraph System.
1399998	do	Raynsford, A.	Do.
1400014	do	Baber, C. C.	Key for Fastening Gear Wheels, Race Ways for Ball Bearings, and the Like to Rotatable Shafts.
1400035	do	Dixon, A. F.	Telegraph System.
1400038	do	Egerton, H. C.	Coil Terminal.
1400039	do	do	Signaling System.
Re. 16147	do	do	Do.
1400050	do	Grace, B. B.	Do.
1400075	do	Keckler, C. W.	Telephone Exchange System.
1400076	do	do	Telephone Signaling System.
1400103	do	Taggart, D. M.	Artificial Busy Circuits.
1400120	do	Williams, S. B., Jr.	Telephone Exchange System.
1400126	do	Wotton, J. A.	Contact Device.
1400156	do	Griffin, J. T., and Timm, W. A.	Electrically Heated Soldering Iron.
1400181	do	Polinkowsky, L.	Semi-Automatic Telephone Exchange System.
1400189	do	Toomey, J. F.	Means for Controlling Repeater Circuits.
1400493	do	Rainey, P. M.	Telegraph System.
1400583	Dec. 20, 1921	Toomey, J. F.	Do.
1400732	do	Demarest, C. S., and Davidson, J., Jr.	Signaling System.
1400776	do	Smith, T. C.	Deflection Dynamometer.
1401121	Dec. 27, 1921	Allen, R. M.	Mounting for Vacuum Tubes.
1401544	do	Lundell, A. E.	Telephone Exchange System.
1401564	do	Speed, J. B.	Tetrahedronal Magnetic Unit.
1401950	Jan. 3, 1922	Adams, A. H.	Printing Telegraph.
1402202	do	Affel, H. A., and Davidson, J., Jr.	Ringing Arrangement for Multiplex Circuits.
1402322	do	Thompson, G. K.	Anti-Side-Tone Hand Set.
Des. 60180	do	Thompson, G. K., and Harper, A. U.	Hand Telephone.
1402991	Jan. 10, 1222	Affel, H. A.	Carrier Telegraph Circuit.
1403305	do	Elmen, G. W.	Magnet Core and Method of Making the Same.
1403475	Jan. 17, 1922	Arnold, H. D.	Vacuum Tube Circuit.
1403544	do	Darrow, W. E.	Transmission Equalization Arrangement.
1403566	do	Read, H. S.	Vacuum Tube Repeater Circuits.
1403626	do	Potts, L. M.	Automatic Switch for Controlling Motor Driven Automatic Machines.
1403726	do	Wilson, W.	Electric Discharge Device and Operating Circuits Therefor.
1403767	do	Goff, H. W.	Electromagnetic Step-by-Step Mechanism
1403800	do	Malcolmson, W. J., and Blount, H.	Assembling Device for Vacuum Tubes.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1403803	Jan. 17, 1922	Maxfield, J. P., and Smith, G. O.	Resistance Material and Method of Manufacturing Same.
1403811	do	Pauly, H. C	Telephonic Apparatus.
1403833	do	Bell, J. H	Telegraph System.
1403835	do	Blackwell, O. B	Frequency Control System.
1403841	do	Carson, J. R	Do
1403844	do	Clausen, H. P	Automatic Telephone System.
1403845	do	Clausen, H. P., and Goodrum, C. L.	Telephone Exchange System.
1403858	do	Gauthier, E	Reciprocating Tool Operating Machine.
1403861	do	Lundell, A. E	Telephone Exchange System.
1403862	do	do	Do.
1403866	do	Raynsford, A	Do.
1403932	do	Wilson, R. H	Electron Discharge Device.
1403985	do	Spencer, F. C	Drill Press.
1404288	Jan. 24, 1922	Harden, W. H	Repeater Testing Arrangement.
1404311	do	O'Neill, H. W	Electrical Testing System.
1404799	Jan. 31, 1922	Shackleton, S. P	Current Supply Circuit for Vacuum Bulbs.
1405064	do	Neal, E. W	Heater.
1405428	Feb. 7, 1922	Osborne, H. S	Signal Transmitting System.
1405501	do	Demarest, C. S	Repeater Network Selecting Apparatus.
1405710	do	Boe, H. J	Mechanism for Covering Cores.
1405849	do	Kohlhaas, H. T	Vibration Detector.
1406195	Feb. 14, 1922	Kuhn, G. W	Testing Apparatus for Telephone Switchboard Cords.
1406221	do	Polinkowsky, L	Telephone Exchange System.
1406223	do	Pugh, H. W	Telephone Substation Apparatus.
1406236	do	Sperry, A. B	Telephone System.
1406246	do	Toomey, J. F	Testing and Adjusting Apparatus for Cord Circuits.
1406668	do	McQuarrie, J. L	Telephone Exchange System.
1406672	do	Maxfield, J. P	Vibration Detector.
1406678	do	Mortimer, L. A	Telephone System.
1406681	do	Ottman, R. E	Protective Device.
1406833	do	Finley, C. A	Device for Translating the Effects of Sound Vibrations into Variations in an Electrical Circuit.
1406857	do	Heising, R. A	Wireless Signaling.
1406918	do	Blauvelt, W. G	Testing System.
1406996	Feb. 21, 1922	Morrill, J. B	Electric Wave Ranging System.
1406998	do	Osborne, H. S	Signaling System.
1407028	do	Harper, A. U	Transmission Equalization Arrangement.
1407042	do	Rainey, P. M	Telegraph System.
1407046	do	Toomey, J. F	Telephone Apparatus.
1407604	do	do	Repeater Circuit.
1407983	Feb. 28, 1922	Clark, A. B., and Crisson, G	Method of and Means for Determining Unbalance.
1407985	do	Clausen, H. P., and Goodrum, C. L.	Telephone System.
1408046	do	Ulrich, H. W	Do.
1408567	Mar. 7, 1922	Darrow, L. H	Transmission Equalization Arrangement.
1408784	do	Toomey, J. F	Ringing Regulator.
1409339	Mar. 14, 1922	Fischer, F. C	Vacuum Tube Manufacture.
1409341	do	Harrison, H. C	Submarine Signaling.
1409352	do	Adair, S. E	Electrical Coil.
1409362	do	Cummings, G. C	Telegraph System.
1409386	do	McQuarrie, J. L	Do.
1409388	do	Mathes, R. C	Phonograph Reproducer.
1409913	Mar. 21, 1922	Avery, F	Message Register System.
1410003	do	Demarest, C. S., and Loynes, O. H.	Repeater Apparatus.
1410088	do	White, R. H	Screw Driver.
1410545	Mar. 28, 1922	Barrows, L. D	Intercommunicating System.
1410766	do	Lundell, A. E	Telephone Exchange System.
1410890	do	Carson, J. R	Method and Means for Modulating Carrier Oscillations.
1411385	Apr. 4, 1922	Shackleton, S. P	Signaling Apparatus.
1411478	do	Budd, I. D., Cromburg, C. I., and Hurd, F. S.	Electromechanical Switching System.
1411814	do	Stoller, H. M	Power System for Radio Apparatus.
1412103	Apr. 11, 1922	Crisson, G	Service Observing Set.
1412371	do	Reddig, C. E	Belt Adapter.
1412372	do	Sharpe, W. H	Electric Switching Device.
1412376	do	Stoller, H. M	Fault Locator for Electric Cables.
1412405	do	Herrmann, R. R	Method for Testing Transmitters.
1412458	do	Darrow, L. H	Message Registering System.
1412490	do	Rhodes, W. A	Signaling System.
1412567	do	Mills, J	Means for and Method of Wave Transmission.
1412572	do	Polinkowsky, L	Machine Switching Telephone System.
1412574	do	Richard, C. D	Electrically Operated Timing Apparatus.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1412734	Apr. 11, 1922	Goodrum, C. L.	Telephone System.
1412853	Apr. 18, 1922	Espenschied, L.	Synchronizing System.
1412908	do	Van Dyke, H. S.	Do.
1412974	do	Selvig, J. N., and Jongedyk, R.	Safety Attachment and Locking Device for Machines.
1413357	do	Raibourn, P. A.	Electrical Transmission System.
1413368	do	Williams, S. B., Jr.	Machine Switching Telephone System.
1413501	do	Stearn, F. A.	Switch Controlling System.
1413639	Apr. 25, 1922	Waller, L. R.	Switching Device.
1413708	do	Davidson, J., Jr.	Signaling Circuit for Toll Lines.
1413732	do	Heising, R. A.	Electric Discharge Apparatus.
1413753	do	Martin, W. H.	Receiving Device for Signaling Systems.
1414370	May 2, 1922	Nicolson, A. M.	Method of Making Piezo-Electrical Crystals.
1414373	do	Pugh, H. W.	Adapter for Calling Devices.
1414391	do	Affel, H. A.	Means for and Method of Testing Unbalance.
1414397	do	Best, F. H.	Testing Apparatus.
1415076	May 9, 1922	Williams, R. R.	Insulating Composition.
1415098	do	Klein, C. H.	Heater for Soldering Coppers.
1415106	do	Morehouse, L. F.	Ciphering Device.
1415853	May 16, 1922	Andrick, W. P., and Dahl, J. F.	Telephone Exchange System.
1415868	do	Darrow, L. H.	Transmission and Equalization Arrangement.
1415907	do	Thompson, G. K.	Means for Equalizing Transmission Over Lines of Different Electrical Characteristics.
1415972	do	Allen, R. M.	Electrical Switching Device.
1415973	do	Allen, R. M., and Neill, P.	Compensator.
1415980	do	Bellamy, H. T., and Sweely B.	Glass Composition.
1415992	do	Clement, L. M.	Receiving Station.
1415999	do	Curtis, A. M.	Static Reducer for Wireless Signals.
1416000	do	DeCosta, C. J.	Attachment for Reeling Machines.
1416063	do	Reddig, C. E.	Pulley.
1416077	do	Tanner, DeW. C.	System for Electric Signaling.
1416226	do	Meade, H. L.	Telephone Exchange System.
1416724	May 23, 1922	Kuhn, G. W.	Telephone Circuits.
1416765	do	Vernam, G. S.	Ciphering Device.
1417662	May 30, 1922	De Forest, L.	Radio Signaling System.
1418285	June 6, 1922	Carson, J. R.	Translating Circuit.
1418706	do	Hampton, L. N.	Reeling Device.
1418725	do	May, D. T.	Recording Instrument.
1418729	do	Oswald, A. A.	Portable Radiating System.
1418730	do	Ottman, R. E.	Insulating Material and Method of Making Same.
1418739	do	Scriven, E. O.	Oscillation Generator.
1418764	do	Williams, H. L. S.	Attachment for Telephone Hook Switches.
1419090	do	Williams, R. R.	Covering Machine.
1419409	June 13, 1922	Potts, L. M.	System of Telegraph Distribution.
1419528	do	Weinhart, H. W.	Electron Discharge Device.
1419530	do	Wilson, W.	Thermionically Active Substance.
1419550	do	Fischer, F. C.	Bending Jig.
1419559	do	Goff, H. W.	Electromagnetic Device.
1419561	do	Harlow, J. B.	Switching System.
1419562	do	Hartley, R. V. L.	Modulator or Detector.
1419569	do	Keckler, C. W.	Telephone Exchange System.
1419673	do	Hitchcock, H. W.	Electrical Measuring Apparatus.
1419674	do	do	Do.
1419677	do	Krum, C. L. and H. L.	Transmitter for Electrical Printing Telegraph.
1420050	June 20, 1922	Merritt, B. F.	Transfer Tool for Paper Files.
1420055	do	Nichols, H. W.	Selective Receiving System.
1420487	do	Kent, R. J.	Hook.
1420989	June 27, 1922	Fondiller, W.	Transformer.
1421702	July 4, 1922	McCurdy, R. G.	Testing Apparatus.
1422447	July 11, 1922	Kelsay, L. W.	Switching Key.
1422470	do	Osborne, H. S.	Inductive Interference Suppression Device.
1422483	do	Schumacher, E. E.	Plastic Composition.
1422549	do	Eaves, A. J.	Multiple Switch.
1422837	July 18, 1922	Crandall, I. B.	Vacuum Tube Amplifier.
1422861	do	Hocker, C. D.	Liquid Coating Composition.
Re. 16240	Jan. 5, 1926	do	Coating Composition.
1422877	July 18, 1922	Maxfield, J. P.	Acoustical Aid for Deaf Persons.
1422882	do	Nichols, H. W.	Radio Transmission.
1422910	do	Young, C. R., and Van Deusen, H. N.	Terminal Box for Electrical Cables.
1423518	July 25, 1922	Espenschied, L.	Frequency Regulation.
1423911	do	Cardwell, A. D.	Portable Electric Lantern.
1423930	do	Freile, B.	Telephone Switchboard Apparatus.
1424726	Aug. 1, 1922	Johnson, K. S.	Electrical Coil.
1424805	Aug. 8, 1922	De Forest, L.	Subterranean Signaling System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1424866	Aug. 8, 1929	Wold, P. I.	Method and Means for Relaying Modulated Carrier Waves.
1425912	Aug. 15, 1922	Staples, R. T.	Condenser and the Method of Making Same.
1425977	do	Kiesel, W. C.	Telephone Hand Set.
1426669	Aug. 22, 1922	Pierce, R. E.	Ciphering Device.
1426733	do	Heising, R. A.	Method and Means for Preventing Amplifiers from Oscillating.
1426734	do	Hendry, W. F.	Method of Manufacturing Audions.
1426735	do	Hendry, W. F., and Reddig, C. E.	Method and Apparatus for Recording Pressure.
1426751	do	McGall, P. K., and Menefee, H. R.	Thermionic Regulator.
1426754	do	Mathes, R. C.	Circuits for Electron Discharge Devices.
1426755	do	Mathes, R. C., and Read, H. S	Vacuum Tube Circuits and Method of Operating Same.
1426757	do	Moore, C. R.	Acoustic Device.
1426768	do	Pfannenstiehl, H., and Bancroft, E. P.	Printing Telegraph Receiver.
1426771	do	Radu, J. W.	Leading-In Conductor.
1426776	do	Riecken, W. E.	Moisture-Proof Receptacle.
1426786	do	Speed, J. B., and Hutchinson, F., Jr.	Storage Battery.
1426790	do	Stenson, O.	Wire Bending Machine.
1426791	do	Stoller, H. M.	Electric Control System.
1426801	do	Wilson, W.	Repeater for Undulatory Currents.
1426803	do	Adams, A. H.	Printing Telegraph.
1426804	do	do	Typewriter.
1426807	do	Arnold, H. D., and Minton, J. P.	Method of and System for Testing Transmitters or Receivers.
1426810	do	Beatty, W. E.	Repeater System.
1426817	do	Clark, E. H.	Telephone Exchange System.
1426818	do	Clausen, H. P.	Do.
1426821	do	Cummings, G. C.	Telegraph System.
1426825	do	Dobson, G. G.	Numerical Calculating Device.
1426826	do	Egerton, H. C.	Electron Discharge Device Circuits.
1426861	do	Haddock, A.	Measuring Device.
1427695	Aug. 29, 1922	Morris, R. W.	Switchboard Call Signal Apparatus and Circuits.
1427725	do	Cooper, L. W.	Do.
1427923	Sept. 5, 1922	Toomey, J. F.	Telephone Call Circuit.
1428155	do	Espenschied, L., and Affel, H. A.	Means for Signaling Over Multiplex Transmission Channels.
1428156	do	Espenschied, L.	Low Frequency Amplifier.
1428209	do	Blount, H.	Mechanism for Lapping Diamond Dies.
1428227	do	Griffin, J. T., Timm, W. A., and Santschi, A. E.	Electric Soldering Iron.
1428631	Sept. 12, 1922	Harrison, W. H.	Testing and Adjusting Apparatus for Cord Circuits.
1428667	do	Toomey, J. F.	Do.
1429248	Sept. 19, 1922	Osborne, H. S.	Multiplex Signaling System.
1429264	do	Wright, J. W.	Calculating Guy Rule.
1429493	do	De Costa, C. J.	Winding Mechanism for Strands.
1429634	do	Robinson, C., and Chamney, R. M.	Telephonic Repeater.
1429931	Sept. 26, 1922	Davidson, J., Jr.	Signaling Circuit for Toll Lines.
1329972	do	Rhodes, W. A.	Desk Operator's Circuits.
1430531	Oct. 3, 1922	Berryman, D.	Apparatus for Molding.
1430603	do	Timm, W. A.	Soldering Iron.
1430610	do	Whiteside, V.	Vacuum Gauge.
1430634	do	Fischer, F. C.	Means for Manufacturing an Article of a Plurality of Parts.
1430808	do	Hoyt, R. S.	Two-Way Impedence Equalizer for Transformers.
1430869	do	Wickstrom, C. A.	Semi-Automatic Coil Winding Mechanism.
1431091	Oct. 3, 1922	Bendernagle, W. H.	Signaling System.
1431195	Oct. 10, 1922	Toomey, J. F.	Telephone Exchange System.
1431219	do	Crisson, G.	Electron Tube Repeater.
1431921	Oct. 17, 1922	Barnes, H. F.	Brake for Rolling Ladders.
1431995	do	Toomey, J. F.	Signaling Apparatus and Circuits.
1432022	do	Heising, R. A.	Circuit Connection of Electron Discharge Apparatus.
1432781	Oct. 24, 1922	Osborne, H. S.	Means for and Method of Avoiding Interference.
1432829	do	Best, F. H.	Electrical Testing System.
1432852	do	Hargan, A. D.	Telephone Switching Key.
1432863	do	Johnson, K. S.	Transmission System.
1432864	do	Johnston, J.	Heating Device.
1432867	do	Kelly, M. J.	Electron Discharge Device and Method of Making the Same.
1432883	do	Lysons, N. H.	Electrical Switching Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1432885	Oct. 24, 1922	Minton, J. P., and Finley, C. A.	Telephone Transmitter.
1432898	.....do.....	Price, C. S.	Electric Snap Switch.
1432903	.....do.....	Reddig, C. E.	Engine Driven Electric Generator Unit.
1432907	.....do.....	Rhoads, C. S., Jr.	Portable Electric Lantern.
1432925	.....do.....	Thompson, G. F.	Impulse Sender.
1432926	.....do.....	Thronsen, S.	Leading-In Wire Assembly for Vacuum Tubes.
1432931	.....do.....	Weinhart, H. W.	Electric Discharge Device.
1432945	.....do.....	Atwood, G. F.	Submarine Signaling.
1432965	.....do.....	Casher, W. L.	Electric Circuit.
1432978	.....do.....	Dowd, A. D.	Printing Telegraph System.
1432992	.....do.....	Gargan, J. O.	Vacuum Tube.
1433258	.....do.....	Buckley, O. E.	Method of and Means for Exhausting to Low Pressure.
1433298	.....do.....	Polinkowsky, L.	Telephone Switching Apparatus.
1433305	.....do.....	Shaw, T., and Fondiller, W.	Loaded Telephone Line System.
1433594	Oct. 31, 1922	Bailey, R. S.	Telephone Exchange System.
1433599	.....do.....	Bown, R.	Radio Circuit.
1434290	.....do.....	Krum, H. L.	Telegraph System and Apparatus.
1434374	Nov. 7, 1922	DeLemon, M., and Malec, A.	Electric Resistance Welding Mechanism.
1434518	.....do.....	Bailey, R. S.	Telephone Exchange System.
1434555	.....do.....	Martin, W. H.	Wave Filter.
1434767	.....do.....	Bell, J. H.	Telegraph System.
1434773	.....do.....	Correia, J. N.	Telegraph.
1434776	.....do.....	Field, J. C.	Railway Signaling System.
1434788	.....do.....	Maxfield, J. P.	Vibrating System.
1434790	.....do.....	Mills, J.	Two-Way Transmission With Repeaters.
1434705	.....do.....	Ryder, H. W.	Signaling Device.
1434836	.....do.....	Neal, E. W.	Grid Lining Method and Machine.
1434851	.....do.....	Snook, H. C., and Buckley, O. E.	Vacuum Pump.
1434856	.....do.....	Stenson, O.	Wire Working Appliance.
1434862	.....do.....	Wheeler, C. H.	Illumintaing Apparatus.
1434869	.....do.....	Wold, P. I., and Buckley, O. E.	Electric Regulator.
1435240	Nov. 14, 1922	Johnson, K. S.	Signaling System.
1435243	.....do.....	Kelsay, LeR. W.	Automatic Hand Telephone.
1435301	.....do.....	Housekeeper, W. G.	Method and Means for Forming and Winding Filamentary Material.
1435328	.....do.....	Nyquist, H.	Distortion Mesauring Apparatus.
1435333	.....do.....	Polinkowsky, L.	Telephone Exchange System.
1435348	.....do.....	Toomey, J. F.	Automatic Ringing Circuits.
1435447	.....do.....	Bendernagel, W. H.	Telephone Transmission System.
1435470	.....do.....	Hosford, W. F.	Apparatus for Brazing Thin Metal Parts.
1435950	Nov. 21, 1922	Williams, S. B., Jr.	Telephone Exchange System.
1435968	.....do.....	Kuhn, G. W., and Lundius, E. R.	Telephone Trunk Cicuits.
1435980	.....do.....	Renshaw, R. A.	Means for and Method of Reducing Crosstalk in Four-Wire Curciits.
1436165	.....do.....	Goodrum, C. L.	Electrical Registering System.
1436206	.....do.....	Speed, J. B.	Transmitter.
1436212	.....do.....	Swoboda, A. R.	Rheostat.
1436244	.....do.....	Fondiller, W.	Loading Unit.
1436252	.....do.....	Heising, R. A.	System for Producing Modulated Waves.
Re. 15722	Nov. 13, 1923	.....do.....	Do.
1436312	Nov. 21, 1922	Grondahl, H. H. C.	Strand Twisting Mechanism.
1436323	.....do.....	Schnable, G. L., and Abbott, F. F.	Method of and Apparatus for Testing Fibrous Materials.
1436683	Nov. 28, 1922	Rose, A. F.	Battery Supply Circuit for Repeaters.
1436733	.....do.....	Smith, T C.	Carriage for Conveying Drums for Electric Cables.
1437021	.....do.....	Schelleng J. C.	Electron Discharge Device Circuits.
1437422	Dec. 5, 1922	Hoyt, R. S.	Artificial Line.
1437457	.....do.....	Toomey, J. F.	Signaling Apparatus and Circuits.
1437498	.....do.....	De Forest, L.	Oscillion.
1438217	Dec. 12, 1922	Clark, A. B.	Means for and Method of Regulating the Transmission over Electric Circuits.
1438218	.....do.....	.....do.....	Do.
1438219	.....do.....	.....do.....	Do.
1438220	.....do.....	.....do.....	Do.
1438270	.....do.....	Shackleton, S. P.	Do.
1438722	.....do.....	Price, R. A.	Electrolytic Anode.
1438732	.....do.....	Weaver, W. C.	Telephone Exchange System.
1438735	.....do.....	Williams, R. R.	Rubber Composition.
1438736	.....do.....	Williams, S. B, Jr.	Telephone System.
1438743	.....do.....	Clark, E. H.	Telephone Exchange System.
1438744	.....do.....	.....do.....	Do.
1438758	.....do.....	Goodrum, C. L.	Machine Switching Device.
1438841	.....do.....	Lundell, A. E., and Clark, E. H.	Telephone Exchange System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1438938	Dec. 19, 1922	Baldwin, J. F., Jr.	Transmission System.
1438940	do	Blount, H.	Wire Drawing Die.
1438941	do	Boardman, A.	Machine for Vacuum Tube Manufacture.
1438944	do	Conway, R. D.	Electric Regulator.
1438945	do	do	Do.
1438946	do	do	Do.
1438947	do	do	Do.
1438959	do	Lattig, J. W., and Goodrum, C. L.	Automatic Telephone Exhcange System.
1438960	do	do	Do.
1438961	do	Lundell, A. E.	Printing Telegraph System.
1438965	do	Nicolson, A. M.	Piezo-Electric Device and Method of Producing the Same.
1438969	do	Spengeman, L. R.	Vacuum Tube.
1438974	do	Wente, E. C.	Piezo-Electric Voltage Indicator.
1438976	do	Wold, P. I.	Electric Regulator.
1438987	do	Espenschied, L., and Affel, H. A.	High Frequency Translating Circuits.
1438988	do	do	Do.
1438989	do	do	Do.
1439134	do	Sivian, L. J.	Modulating Method and System.
1439213	do	Williams, S. B., Jr.	Telephone Exchange System.
1439723	Dec. 26, 1922	Blauvelt, W. G.	Numbering System for Automatic Telephone System.
1439729	do	Deakin, G.	Telephone Hand Set.
1439735	do	Hancock, E. W.	Telephone Exchange System.
1439771	do	Sprague, C. A.	Signal Controlling System.
1439772	do	Toomey, J. F.	Signaling Apparatus and Circuits.
1440407	Jan. 2, 1923	Osborne, H. S.	Detecting Circuits.
1441270	Jan. 9, 1923	Espenschied, L.	Transmission System.
1441827	do	Blackwell, O. B.	Signaling System.
1442146	Jan. 16, 1923	Heising, R. A.	Modulating and Transmitting System.
1442147	do	do	Production of Modulated High Frequency Oscillations.
1442425	do	Conway, R. D.	Telephone Repeater System.
1442426	do	De Forest, L.	Sound Controlling Means for Producing Light Variations.
1442427	do	Edwards, G. D.	Anti-Side-Tone Substation Circuit.
1442428	do	Fischer, F. C.	Bending Jig.
1442429	do	Harlow, J. B.	Impulse Transmitting Mechanism.
1442430	do	Hartley, R. V. L.	Electron Discharge Device.
1442439	do	Mathes, R. C.	Vacuum Tube Repeater.
1442441	do	Pugh, H. W.	Toll Ticket Distributing System.
1442443	do	Radford, J. B.	Switching Device.
1442444	do	Reeve, H. T.	Casting High Melting Point Metal and Alloy.
1442453	do	Van Inwagen, C. L.	Ticket Hoist.
1442455	do	Whiting, D. F.	Transmission Measuring Circuits and Method.
1442456	do	do	Mounting and Protecting Electrical Apparatus.
1442460	do	Anderegg, G. A.	Current Controlling Means for Electric Circuits.
1442781	do	Nichols, H. W.	Reamplifying System.
1442819	Jan. 23, 1923	Parker, R. D.	Ciphering Machine.
1443007	do	Clement, L. M., and Kishpaugh, A. W.	Control of Electric Circuits.
1443984	Feb. 6, 1923	Espenschied, L.	Repeater Apparatus for Carrier Systems.
1443985	do	do	Signaling System.
1444605	do	Heising, R. A.	Carrier Wave Signaling System.
1444781	Feb. 13, 1923	Deakin, G.	Telephone Exchange System.
1444830	do	Demarest, C. S.	Transmission Controlling Apparatus.
1445141	do	Kendall, B. W.	Signaling System.
1445231	do	Muller, O., Jr.	Welding Jig.
1445233	do	O'Neill, H. W.	Telegraph System.
1445235	do	Plotner, L. D.	Impulse Transmitting Device.
1445239	do	Reddig, C. E.	Brace and Tension Device.
1445242	do	Shackelton, W. J.	Variable Inductance Element.
1445253	do	White, J. H.	Resistance Alloy.
1445258	do	Williams, S. B., Jr., and Bostater, H. L.	Testing System.
1445260	do	Adams, A. H.	Method of and Apparatus for Testing Electrical Coils.
1445271	do	Gent, E. W.	Ratchet Mechanism.
1445278	do	Heising, R. A.	Thermionic Vacuum Tube.
1445432	do	Dunham, B. G.	Telephone Exchange System.
1445731	Feb. 20, 1923	Van der Bijl, H. J.	Transmission System.
1445759	do	Davidson, J., Jr.	Means for and Method of Testing Multiplex Carrier Circuits.
1445992	do	Cameron, J. S.	Cutting Machine.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1446246	Feb. 20, 1923	De Forest, L.	Means for Recording and Reproducing Sound.
1446247	do	do	Light Controlling Means.
1446526	Feb. 27, 1923	Toomey, J. F.	Ringing Regulator.
1446582	do	Polinkowsky, L.	Call Distributing System.
1446752	do	Kendall, B. W.	Generator and the Generation of Multiple Frequencies.
1446980	do	Espenschied, L.	Radio Receiving Apparatus.
1447204	Mar. 6, 1923	do	Plural Modulation and Demodulation Circuit.
1447773	do	Espenschied, L., and Bown, R.	Radio Transmission Control System.
1447913	do	Trowbridge, A., and Duryea, W. C.	Recording Indicator.
1448116	Mar. 13, 1923	Matthews, E. M., and Haislip, R. A.	Connector for Electrical Conductors.
1448216	do	Heising, R. A.	Signaling System.
1448408	do	Jammer, J. S.	Duplex Carrier Wave System.
1448420	do	Smith, P. C.	Telephone Exchange System.
1448523	do	Conway, R. D.	Do.
1448540	do	Houskeeper, W. G.	Apparatus for Measuring Gas Pressure.
1448542	do	Jackson, B. H.	Process of Manufacturing Loading Coils.
1448550	do	Arnold, H. D.	Thermionic Amplifier Circuits.
1448553	do	Lucas, F. F.	Telephone Plug Shelf.
1448559	do	May, D. T.	Electrical Protective Device.
1448566	do	Muller, O., Jr., and Burchett, G. W.	Wire Fabric Manufacture.
1448567	do	Muller, O. Jr., and Fischer, F. C.	Machine for Bending Wire.
1448572	do	Polinkowsky, L.	Telephone System.
1448575	do	Stevenson, G. H.	Wave Meter and Similar Electrical Device.
1448576	do	Strickler, W. B.	Telephone Exchange System.
1448577	do	Stull, J. S.	Metal Spinning Machine.
1448578	do	Swoboda, A. R.	Resistance Element.
1448583	do	Van der Bijl, H. J.	Direct Current Transformer.
1448702	do	Carson, J. R.	Translating Circuit.
1449372	Mar. 27, 1923	Arnold, H. D.	System of Telephony.
1449382	do	Carson, J. R.	Method and Means for Signaling with High Frequency Waves.
1449512	do	Ives, H. E.	High Temperature Measurement.
1449573	do	Albert, W. P.	Controlling System.
1449644	do	White, C.	Telephone System.
1449945	do	Jacobsen, M.	Wire Grip.
1450254	Apr. 3, 1923	Espenschied, L.	Balancing Arrangement for Multiplex Carrier Circuits.
1450305	do	Rhodes, W. A.	Telephone Signaling System.
1450321	do	Lundell, A. E., and Thompson, G.	Party Line Revertive Ringing System.
1450966	Apr. 10, 1923	Affel, H. A.	Synchronizing System.
1450969	do	Carson, J. R.	Receiving Circuits for Weak Signal Currents.
1451746	Apr. 17, 1923	Sultzer, M.	Multiplex Selective Circuit.
1451767	do	Espenschied, L.	Composite Ringer for Multiplex Transmission System.
1452032	do	Farrington, J. F.	Oscillation Generator for Signaling Systems.
1452266	do	Dobbin, H. F.	Centrifugal Governor.
1452269	do	Goodrum, C. L.	Telephone Exchange System.
1452274	do	Houskeeper, W. G.	Pressure Gauge.
1452275	do	do	Method of Making Leading-In Conductors.
1452277	do	Johnson, K. S.	Telephone Substation Set.
1452308	do	Miller, E. B.	Material Blanking Operation.
1452323	do	Stokley, R. L.	Toll Trunking Circuit for Machine Switching Telephone Systems.
1452339	do	Heising, R. A.	Electrical Discharge Device.
1452361	do	Clausen, H. P.	Phonographic Apparatus.
1452527	Apr. 24, 1923	Potts, L. M.	Transmitting Apparatus for Electric Telegraphs.
1452548	do	Conlee, C. M.	Manhole Platform Support.
1452827	do	De Forest, L.	Telephone Device.
1452931	do	Price, C. S.	Electric Switch.
1452957	do	Colpitts, E. H.	High Frequency Signaling.
1453387	May 1, 1923	Espenschied, L.	System for Communicating with Moving Vehicles.
1453430	do	Blackwell, O. B.	Voice Operated Relay.
1453452	do	Dobbin, H. F.	Centrifugal Governor.
1453980	do	Hoyt, R. S.	Attenuation Equalizer.
1453982	do	Kendall, B. W.	Electrical Receiving or Repeating Apparatus and Method of Operating the Same.
1454011	do	Blackwell, O. B.	System for Attaining Uniform Attenuation.
1454157	May 8, 1923	Egerton, H. C.	Phonographic Recording and Reproducing System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1454158	May 8, 1923	Espenschied, L.	Means for Ringing Over Multiplex Transmission Channels.
1454159	do	do	Do.
1454214	do	Dean, R. S.	Fused Salt Bath for Heating Steel in Hardening.
1454495	do	Vennes, H. J.	System of Current Wave Transmission.
1454496	do	Vischer, A., Jr.	Calling Device.
1454532	do	Beatty, W. E.	Method of and Means for Secret Signaling.
1454840	May 15, 1923	Affel, H. A.	Means for Ringing Over Multiplex Transmission Channels.
1454895	do	Jones, G. G.	Electrolysis Mitigation.
1455827	May 22, 1923	Affel, H. A.	Selective Circuit for Multiplex Transmission.
1455843	do	Kirkwood, M.	System for Measuring Distortion.
1455957	do	Johnson, E. D.	Repeater System.
1495958	do	do	Signaling System.
1456059	do	do	Do.
1456076	do	Robbins, C. W.	Measuring and Testing of Inductances.
1456500	May 29, 1923	Forsberg, O. F.	Adjustable Mounting for Terminal Bank Panels.
1456501	do	Glunt, O. M.	Desk Stand for Hand Telephones.
1456503	do	Heising, R. A.	Translating Apparatus.
1456504	do	Housekeeper, W. G.	Electrode Supporting Device.
1456505	do	Knoop, W. A., and Cioffi, P. P.	Electric Discharge Device.
1456506	do	Leveridge, W. J.	Vacuum Tube Electrode Assembling Jig.
1456507	do	Lundell, A. E.	Tandem Allotting System.
1456508	do	Lundell, A. E., and Van Amstel, T.	Number Indicating System.
1456510	do	Mathes, R. C.	Transmission Circuits.
1456511	do	Minton, J. P.	Transmitter.
1456516	do	Riecken, W. E.	Connecting Plug.
1456520	do	Shreeve, H. E.	Energization and Control of Vacuum Tubes.
1456523	do	Trimble, R. F.	Method of Treating Metals.
1456524	do	Waldron, F. D.	Helmet.
1456528	do	Arnold, H. D.	Electric Discharge Device.
1456534	do	Burgess, H. A.	Printing Telegraphy.
1456536	do	Clark, E. H.	Telephone System.
1456537	do	do	Telephone Exchange System.
1456538	do	Crandall, I. B.	Acoustic Apparatus.
1456549	do	Hamilton, B. P.	Composite Signaling Circuits.
1456556	do	Hudson, E. A.	Duplex Telegraph System.
1456938	do	Schoof, A. W.	Instrument for Testing and Comparing the Lead of a Screw Thread.
1457336	June 5, 1923	Affel, H. A.	Balancing Circuits.
1457338	do	Barrows, L. D., and Darrow, L. H.	Selective Connections of Trunk Lines.
1457438	do	Kelsall, G. A.	Permeameter Furnace.
1457447	do	Mills, J.	Radio Receiving Circuits.
1457898	do	Dodge, W. L.	Telephone System.
1457912	do	MacPherson, H. D.	Do.
1458193	June 12, 1923	Osborne, H. S.	Multiple Balancing Arrangement for Multiplex Transmission.
1458225	do	Espenschied, L.	Do.
1458949	June 19, 1923	Nichols, H. W.	Carrier Radio Telephone System.
1458988	do	Morehouse, L. F.	Means for Equalizing Transmission Over Lines of Different Electrical Characteristics.
1459003	do	Thompson, G. K.	Do.
1459004	do	do	Do.
1459005	do	do	Do.
1459175	do	Aldendorff, F.	Telephone Exchange System.
1459186	do	Polinkowsky, L.	Do.
1459391	do	Clausen, H. P.	Humidity Indicating and Regulating Device.
1459394	do	Gent, E. W.	Centrifugal Governor.
1459397	do	Herrmann, R. R.	Self-Induction Coil.
1459400	do	Hocker, C. D.	Electron Emitting Cathode and Process of Making the Same.
1459403	do	Keckler, C. W., and Strickler, W. B.	Signaling System.
1459412	do	Nicolson, A. M.	Thermionic Translating Device.
1459413	do	Otto, H. M.	Conveyor for Ticket Distributing Systems.
1459417	do	Schwerin, P.	Electron Discharge Device.
1459419	do	Scriven, E. O.	Multi-Stage Amplifier Circuits.
1459422	do	Stoller, H. M.	Electrical System.
1459425	do	Wheeler, C. H.	Armature Backstop.
1459427	do	Wold, P. I.	Thermionic Regulator.
1459428	do	do	Do.
1459431	do	Allen, L. M.	Controling System.
1459434	do	Blattner, D. G.	Transmission System.
1459435	do	Boe, H. J. and Egert, B. J.	Stop Mechanism.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1459709	June 19, 1923	Kendall, B. W.	Multiplex Signaling.
1459769	June 26, 1923	Jacobs, O. B.	Repeater Circuits.
1459770	do	Jones, A. L.	System for Testing Line Balance.
1459824	do	Ford, W. H. D.	Electromagnetic Device.
1460032	do	Moore, C. R.	Vibration Detector.
1460368	July 3, 1923	Darrow, L. H.	Electric Signaling System.
1460438	do	Parker, R. D.	Secret Communication System.
1461064	July 10, 1923	Martin, De L. K.	Multiplex Transmission Circuits.
1461183	do	Fletcher, H.	Substation Circuit.
1461190	do	Housekeeper, W. G.	Vacuum Pump.
1461204	do	Bell, J. H.	Signaling System.
1461212	do	Dobbin, H. F.	Telephone Exchange Line Switch.
1461220	do	Moore, C. R.	Submarine Signaling.
1461221	do	Mortimer, L. A.	Telephone Exchange System.
1461227	do	Schwerin, P.	Vacuum Tube Manufacture.
1461228	do	do	Method and Apparatus for Coating Material.
1461232	do	Thronsen, S.	Filament Support.
1461492	do	Moody, J. F.	Electrical Testing Instrument.
1461528	do	Irvine, F. S.	Automatic Switch.
1461758	July 17, 1923	Hosford, W. F.	Cable Measuring Device.
1461783	do	Parker, R. D., and Hamilton, B. P.	Secret Communication System.
1461790	do	Sultzer, M.	Maximum Voltage Indicator.
1462026	do	Booth, W. T.	Protective Device.
1462032	do	Egerton, H. C.	Electrical Coils and Machines for Winding Same.
1462035	do	Fondiller, W.	Method of Balancing Magnetic Materials.
1462038	do	Hartley, R. V. L.	Modulating System.
1462046	do	Reddig, C. E.	Clutch Mechanism.
1462047	do	Reynolds, J. N.	Cross Bar Line Switch.
1462050	do	Scriven, E. O.	Switching Device.
1462053	do	Stoller, H. M.	Electrical Testing System.
1462055	do	Wescoat, L. C.	Interlocking Knife Switch.
1462057	do	Wold, P. I.	Switching Mechanisms for Vacuum Tubes and the Like.
1462087	do	Hendrickson, C. J.	Centrifugal Governor.
Des. 62672	do	Lum, G. R.	Loud Speaking Telephone Receiver.
1462525	July 24, 1923	Thompson, G. K.	Arrangement for Producing Complementary Visual and Audible Exhibitions.
1462526	do	Toomey, J. F., and Harrison, W. H.	Composite Ringer Set.
1463199	July 31, 1923	Davidson, J., Jr.	Ringing Arrangement for Multiplex Circuits.
1463200	do	do	Do.
1463432	do	Nichols, H. W.	Vacuum Tube Apparatus.
1463433	do	do	Signaling.
1463475	do	Loewe, S.	Thermionic Translating Device.
1463795	Aug. 7, 1923	Carson, J. R.	Translating Circuits.
1463796	do	do	Do.
1463807	do	Fondiller, W.	Treatment of Magnetic Material.
1463810	do	Gilson, A. F. F.	Head Set.
1463813	do	Harris, J. W.	Electron Emitting Cathode and Process of Manufacturing the Same.
1463815	do	Hinrichsen, E. E.	Telephone System.
1463830	do	Maxfield, J. P.	Vibration Detector.
1463831	do	Miller, D. D.	Electromagnetic Device.
1463860	do	Wilson, W.	Electron Discharge Device.
1463982	do	Ulrich, H. W.	Telephone Exchange System.
1464072	do	Hancock, E. W.	Do.
1464078	do	Kopp, O. H.	Selective Switch.
1464083	do	Loewe, S.	Receiving Apparatus for High Frequency Signaling.
1464084	do	Lundell, A. E., and Clark, E. H.	Telephone Exchange System.
1464086	do	Beatty, W. E.	Method and Means for Secret Signaling.
1464087	do	Carpenter, W. W.	Machine Switching Telephone Exchange System.
1464088	do	Cummings, G. C.	Vibrating Telegraph Relay.
1464090	do	Field, J. C., and McCarty, C. J.	Signaling System.
1464091	do	Ford, W. H. D.	Electromagnetic Device.
1464096	do	Hartley, R. V. L.	Secret Signaling.
1464097	do	Heising, R. A.	Two-Way Signaling System.
1464103	do	Nash, G. H.	Sound Detector.
1464104	do	Nicolson, A. M.	Selective Apparatus for Signaling Circuits.
1464109	do	Polinkowsky, L.	Telephone Exchange System.
1464111	do	Read, H. S.	Electric Circuits.
1464112	do	Reddig, C. E.	Electrical Ignition System.
1464118	do	Stokely, R. L.	Machine Switching Telephone Exchange System.
1464119	do	Stoller, H. M., and Mathews, E. M.	Fault Locator for Electric Cables.
1464120	do	Stoller, H. M.	Electric Ignition System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1464124	Aug. 7, 1923	Wilson, W.	Method of making Thermionically Active Substances.
1464168	do	Booth, W. T., and Boyd, W. A.	Antenna System.
1464519	Aug. 14, 1923	Vennes, H. J.	Signaling System.
1464563	do	Demarest, C. S., and Loynes, O. H.	Repeater Control Arrangement.
1464565	do	Espenschied, L., and Bown, R.	Call System for Radio Telephony.
1464719	do	Lundell, A. E.	Telephone Exchange System.
1464726	do	Polinkowsky, L.	Do.
1465298	Aug. 21, 1923	Crisson, G., and Rose, A. F.	Cord Circuit Repeater for Use Between Four-Wire and Two-Wire Circuits.
1465299	do	Espenschied, L., and Toomey, J. F.	Low Frequency Alternating Current Signaling System.
1465332	do	Arnold, H. D.	Vacuum Tube Amplifier.
1465352	do	Dobson, G. G.	Electrical Testing System.
1465357	do	Heising, R. A.	Radio Communication.
1465358	do	do	Signaling.
1465360	do	Lundell, A. E.	Telephone Exchange System.
1465361	do	Magrath, A. C.	Operating Mechanism for Cross Bar Line Switches.
1465368	do	Shackelton, W. J.	Secret Signaling System.
1465381	do	Trimble, R. F.	Electrode and Its Construction.
1465384	do	Wescoat, L. C.	Interlocking Switch.
1465393	do	Goodrum, C. L.	Telephone Exchange System.
1465394	do	Housekeeper, W. G.	Control Apparatus for Evacuated Vessels.
1465395	do	Jammer, J. S.	Testing Circuits for Carrier Wave Signals.
1465732	do	Heising, R. A.	System of Communication.
1465757	do	Curtis, A. M.	Electric Wave Filter.
1465758	do	do	Do.
1465932	Aug. 28, 1923	Colpitts, E. H.	Multiplex Radio Telegraph System.
1465972	do	Crisson, G.	Transmission Regulating Circuit.
1466007	do	Walton, C. J.	Wire Grip.
1466155	do	Williams, S. B., Jr.	Telephone Exchange System.
1466233	do	Keckler, C. W.	Telephone System.
1466234	do	Kerr, M. B.	Telegraph System.
1466284	do	Harlow, J. B.	Detecting System.
1466286	do	Hearn, J. F.	Luminous Indicator.
1466701	Sept. 4, 1923	De Forest, L.	Method of and Means for Controlling Electric Currents by and in Accordance with Light Variation.
1466707	do	Espenschied, L.	Method and Apparatus for Limiting the Transmission of Electric Energy.
1466708	do	do	Transmission System.
1467174	do	Kern, P. E.	Protection of Iron and Steel.
Des. 62986	do	Heck, C. W.	Loud Speaking Receiver.
Des. 62997	do	Lum, G. R.	Loud Speaking Telephone Receiver.
1467360	Sept. 11, 1923	Elsasser, H. W.	Wave Filter.
1467398	do	Schumacher, E. E.	Process of Coating.
1467458	do	Toomey, J. F.	Signaling Circuit.
1467596	do	Wold, P. I.	High Frequency Modulation Device.
1468096	Sept. 18, 1923	Young, R. L.	Storage Battery Circuits.
1468101	do	Clark, A. B., and Crisson, G.	Testing Circuits.
1468687	Sept. 25, 1923	Affel, H. A.	Transmission Regulation.
1468704	do	Hamilton, H. S.	Apparatus and Method for Measuring Transmission.
1469253	Oct. 2, 1923	Deardorff, R. W.	Carrier Telegraph Circuits.
1469254	do	do	Carrier Telephone Circuits.
1469259	do	Hamilton, B. P.	Carrier Telegraph Circuits.
1469260	do	do	Do.
1469271	do	Fletcher, H.	Testing System.
1469832	Oct. 9, 1923	Hamilton, B. P.	Selective Circuits for Multiplex Signaling.
1469869	do	Affel, H. A.	Carrier Transmission Routing Arrangement.
1470035	do	Scudder, F. J.	Telephone Exchange System.
1470238	do	Mathes, R. C.	Repeater System.
1470594	Oct. 16, 1923	Branson, D. E.	Secret Signaling System.
1470611	do	Bailey, R. S.	Telephone Exchange System.
1470632	do	Martin, W. H.	Equalizing Transmission.
1470664	do	McBerty, F. R.	Automatic Telephone Exchange System.
1470696	do	Nicolson, A. M.	Television.
1470725	do	Goddard, F. M.	Selectively Operated Circuit Controlling Device.
1470747	do	Juley, J. P.	Coin Collector.
1470954	do	Beatty, W. E.	Repeater Method and System.
1470955	do	Booth, W. E.	Electric Wave Transmission System.
1470965	do	Elmen, G. W.	Transmission System.
1470982	do	Jammer, J. S.	Repeater Circuits.
1470984	do	Johnson, E. D.	Signaling Circuits.
1470985	do	Johnson, K. S.	Signaling System.
1470986	do	do	Means and Method for Signaling.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1470990	Oct. 16, 1923	Lucas, F. F	Process of Manufacturing Insulating Material.
1470991	do	Lundell, A. E	Telephone Exchange System.
1470992	do	do	Do.
1471010	do	Selvig, J. N	Spinning Tool and Machine.
1471012	do	Snook, H. C	Vacuum Pump.
1471013	do	Speed, J. B	Transmitting Device.
1471017	do	Williams, S. B. Jr	Telephone Exchange System.
1471018	do	do	Do.
1471335	Oct. 23, 1923	Johnson, E. D	Signaling System and Method of Operating the Same.
1471383	do	Clark, A. B	Method and Means for Measuring Unbalance
1471388	do	Dietze, E	Signaling Circuit.
1471404	do	Martin, W. H	Do.
1471617	do	Lundell, A. E	Telephone Exchange System.
1471634	do	Thronsen, S. and Sager J. W	Semi-Automatic Winding Machine.
1471636	do	Vennes, H. J	Artificial Line.
1471638	do	Whiting, D. F	Telephone System.
1471639	do	do	Do.
1471657	do	Hampton, L. N	Brake for Rolling Ladders.
1471661	do	Housekeeper, W. G	Vacuum Pump.
1471662	do	do	Do.
1472035	Oct. 30, 1923	Affel, H. A	Means for Signaling Over Multiplex Transmission Channels.
1472087	do	Pike, V. B	Gas Heated Soldering Iron.
1472237	do	Bendernagel, W. H	Telephone Transmission System.
1472289	do	Bown, R. and Nelson, E. L	Radio Wire Connecting Circuits.
Re 16385	July 20, 1926	do	Do.
1472351	Oct. 30, 1923	Aldendorff, F	Automatic Switch for Interconnecting Lines.
1472451	do	Akers, M. K	Phantomed Signaling Circuits.
1472453	do	Bell, J. H	Printing Telegraphy.
1742455	do	Blattner, D. G	Testing Circuit.
1472456	do	Boardman, A	Apparatus for Treating Brass.
1472458	do	Clark, E. H	Number Indicating System.
1472460	do	Clausen, H. P. and Goodrum, C. L.	Telephone System.
1472463	do	Eaves, A. J	Telegraph Repeating System.
1472465	do	Forsberg, O. F	Automatic Switch.
1472469	do	Goodrum, C. L	Telephone Exchange System.
1472470	do	Hartley, R. V. L	Method and Means for Producting Alternating Currents.
1472477	do	King, R. W	Electron Discharge Device.
1472483	do	Mathes, R. C	Telegraph System.
1472485	do	Morrill, J. B	Do.
1472501	do	Stokely, R. L	Machine Switching Telephone Exchange System.
1472503	do	Taylor, H. B	Switching Device.
1472505	do	Trimble, R. F	Method of Making Electrodes.
1472506	do	Van der Vort, C. O	Telegraph System.
1472507	do	Vennes, H. J	Artificial Line.
1472585	do	Colpitts, E. H	Multiplex Signaling System.
1472595	do	Hillhouse, J. T. E	Calling Device.
1472610	do	Mathes, R. C	Transmission Circuit.
1472631	do	Bowman, H. N	Magnetic Coil.
1472818	Nov. 6, 1923	Waller, L. R	Brush Tripping Device.
1472821	do	Affel, H. A	Ringing Channel for Multiplex Telephone System.
1472822	do	do	Calling Arrangement for Radio Systems.
1472849	do	Martin, W. H	Forwarding System for Ocean Cables and the Like.
1472987	do	Murphy, P. B	Signaling System.
1473417	do	Beetem, F. G	Radio Receiving Apparatus.
1473433	do	Kishpaugh, A. W	Carrier Wave Transmission System.
1473671	Nov. 13, 1923	Davidson, J., Jr	Telephone Exchange System.
1473674	do	Espenschied, L	Means for and Method of Modulation.
1473682	do	Osborne, H. S	Repeater Apparatus for Carrier Systems.
1474008	do	Stokely, R	Machine Switching Telephone Exchange System.
1474038	do	Johnson, E. D	Telephone Repeater Circuits.
1474408	Nov. 20, 1923	Deardorff, R. W	Detecting Circuit.
1474426	do	Affel, H. A	Secret Communication System.
1474430	do	Blackwell, O. B	Telephone Repeater.
1475201	Nov. 27, 1923	Toomey, J. F	Telephone Exchange System.
1475219	do	Brown, R	Radio Signaling System.
1475240	do	Osborne, H. S	Low Frequency Measuring Device.
1475667	do	Webster, W. S	Rheostat.
1475987	Dec. 4, 1923	Cushing, W. A	Single Transmission Telegraph System.
1475997	do	Hoyt, R. S	Network for Neutralizing the Susceptance of a Loaded Line.
1476003	do	Martin, DeL. K	Radio Signaling Call System.
1476678	Dec. 11, 1923	Affel, H. A	Demodulating Apparatus.

Patent no.	Date of issue	Inventor	Title
1476689	Dec. 11, 1923	Chapman, A. G.	Electrical Testing System.
1476721	do	Martin, DeL. K.	Frequency Control System.
1477017	do	Sprague, C. A.	Current Controlling and Static Reducing System.
1477528	Dec. 18, 1923	Affel, H. A.	Signaling.
1477596	do	Rhodes, F. L.	Means for Supporting Aerial Cables.
1477609	do	Thompson, G. K.	Telephone Receiver Attachment.
1477674	do	Trowbridge, A., and Duryea, W. C.	Camera.
1477874	do	Harrison, W. H.	Telephone System.
1478005	do	Field, J. C.	Signaling System.
1478008	do	Harlow, J. B.	Do.
1478014	do	Bellamy, H. T.	Switchboard Incandescent Lamp.
1478022	do	Carpenter, W. W., and Hovland, H.	Telephone System.
1478024	do	Clausen, H. P.	Combined Telephone and Telegraph System.
1478029	do	De Forest, L.	Radio Receiving System.
1478037	do	Keckler, C. W.	Telephone Exchange System.
1478042	do	Martin, H. T.	Multiple Unit Switch.
1478045	do	Mead, E. D.	Relay.
1478047	do	Mills, J.	Radio Receiving System.
1478050	do	Nelson, E. L.	Modulation Circuits and Measurement.
1478051	do	Nichols, H. W.	Relay.
1478062	do	Scheuch, W. A.	Degasifying Agent.
1478068	do	Selvig, J. N.	Apparatus for Drilling and Cutting.
1478071	do	Trimble, R. F.	Jig Employed in Construction of Electrodes.
1478072	do	Van der Bijl, H. J.	Vacuum Tube.
1478074	do	Van Rutten, L.	Telephone Transmitter Mouthpiece.
1478076	do	Weinhart, H. W.	Electron Discharge Device.
1478078	do	Wente, E. C.	Equalizing Network.
1478079	do	Wescoat, L. C.	Electrical Distribution System.
1478086	do	Williams, S. B., Jr.	Telephone Exchange System.
1478087	do	Wilson, W.	Vacuum Tube.
1478412	Dec. 25, 1923	Walton, C. E.	Telegraph Apparatus.
1478419	do	Bailey, R. S.	Machine Switching Telephone Exchange System.
1478458	do	Smith, D.	Network Controlling Circuits.
1478607	do	Goodrum, C. L.	Machine Switching Telephone Exchange System.
1479051	Jan. 1, 1924	Best, F. H.	Artificial Line.
1479430	do	Fell, J. M.	Telegraph Repeater System.
1479442	do	Aldendorff, F.	Metering Telephone System.
1479505	do	Johnson, K. S.	Transmission Circuit.
1479516	do	Scriven, E. O.	Signaling by High Frequency Waves.
1479554	do	Polinkowsky, L., and Matthies, W. H.	Machine Switching Telephone Exchange System.
1479613	do	Kendall, B. W.	Multiplex Signaling.
1479617	do	McQuarrie, J. L., and Goodrum, C. L.	Telephone Exchange System.
1479778	do	Van der Bijl, H. J.	Vacuum Tube Device.
1479779	do	do	Electron Discharge Device.
1479845	Jan. 8, 1924	Vernam, G. S.	Printing Telegraph System.
1479846	do	do	Ciphering Device.
1479984	do	Deakin, G.	Telephone Exchange System.
1479991	do	King, R. W.	Electron Discharge Device.
1480202	do	Goodrum, C. L.	Telephone System.
1480206	do	Hoffmann, H. L.	Machine Switching Telephone Exchange System.
1480207	do	Holmberg, C. G., Jr.	Strand Twisting Machine.
1480208	do	Housekeeper, W. G.	Vacuum Tube.
1480209	do	Jammer, J. S.	Carrier Wave Call Signaling System.
1480210	do	Johnson, K. S.	Telephone Circuits and Method of Operating the Same.
1480214	do	Lundell, A. E.	Telephone Exchange System.
1480215	do	Matthies, W. H.	Machine Switching Telephone Exchange System.
1480216	do	Mills, J.	Transmission System.
1480217	do	do	Method and Means for Signaling.
1480218	do	Moore, C. R.	Submarine Signaling.
1480219	do	Nicholson, A. M.	Vacuum Tube.
1480225	do	Snook, H. C.	Electrical Cutout.
1480227	do	Stevenson, G. H.	Impedance Element.
1480229	do	Strickler, W. B.	Telephone Exchange System.
1480235	do	White, C.	Carrier Wave Signaling System.
1480239	do	Chaplin, M. P.	Friction Clutch.
1480240	do	Clark, E. H.	Telephone Exchange System.
1480241	do	Clausen, H. P., and Goodrum, C. L.	Machine Switching Telephone Exchange System.
1480242	do	do	Telephone Exchange System.
1480243	do	Clokey, A. A.	Signaling System.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1480403	Jan. 8, 1924	Lattig, J. W., and Goodrum, C. L.	Telephone Exchange System.
1480612	Jan. 15, 1924	Hitchcock, H. W.	Multiplex Signaling System.
1480614	do	Jacobs, O. B.	Telephone Repeater.
1481284	Jan. 22, 1924	Deardorff, R. W.	Means for and Method of Amplitude Selection.
1481289	do	Jones, G. G.	Electrolysis Mitigation.
1481324	do	Lack, F. R., and Murphy, P. B.	Signaling System.
1481817	Jan. 29, 1924	Affel, H. A.	Repeater for Multiplex Systems.
1481831	do	Demarest, C. S.	Repeater Arrangement for Multiplex Signaling.
1481923	do	Nash, G. H.	Method and Apparatus for Locating the Direction of a Source of Vibration.
1481969	do	Reeves, F. N.	Telephone Exchange System.
1482119	do	De Forest, L.	Means for Recording and Reproducing Sound.
1482557	Feb. 5, 1924	Hamilton, B. P.	Composite Signaling System.
1482558	do	do	Alternating Current Signaling Apparatus.
1482618	do	Polinkowsky, L., and Matthies, W. H.	Telephone Exchange System.
1482625	do	Thompson, G.	Distributing Switch.
1482712	do	Stearn, F. A.	Testing System for Automatic Exchanges.
1483133	Feb. 12, 1924	Toomey, J. F., and Crisson, G.	Electrical Testing System.
1483172	do	Gannett, D. K.	Signaling System.
1483179	do	Jammer, J. S.	Means for Controlling Electrical Transmission.
1483273	do	Blattner, D. G.	Circuit for Heating the Filament of Audions.
1483400	do	Wilbur, R. S.	Telephone System.
1483790	do	Edwards, G. D.	Method and System for Detecting Sources of Vibration.
1483876	Feb. 19, 1924	Goff, H. W.	Electromagnetic Step-by-Step Switch with Magnetic Brake.
1483900	do	Lundell, A. E.	Telephone Exchange System.
1483930	do	Darrow, L. H.	Transmission Equalization Arrangement.
1483956	do	Toomey, J. F.	Telephone System.
1484087	do	Ryan, F. M.	Radio Broadcasting Equipment.
1484134	do	Keckler, C. W.	Telephone System.
1484348	do	Aldendorff, F.	Machine Switching Telephone System.
1484386	do	Cummings, G. C.	Telegraph System.
1484396	do	Johnson, K. S.	Telephone System.
1484397	do	do	Substation Circuit.
1484402	do	Martin, H. T.	Fastening for Telephone Key Bases.
1484405	do	Oswald, A. A.	Signaling System.
1484411	do	Read, H. S.	Radio Receiving System.
1484412	do	Reddig, C. E.	Prime Mover Dynamo Plant.
1484614	Feb. 26, 1924	Albert, W. P.	Telephone System.
1484707	do	Gannett, D. K.	Relays and Circuits Therefor.
1484731	do	Malm, F. S.	Manufacture of Sponge Rubber Articles.
1484732	do	Mather, G. E.	Switching Device.
1484751	do	Andrick, W. P.	Telephone Exchange System.
1484762	do	Cummings, G. C.	Telegraph System.
1484765	do	Edwards, G. D.	Do.
1484771	do	Goodrum, C. L.	Do.
1484933	do	Conway, R. D.	Do.
1484941	do	Goodrum, C. L.	Telephone Exchange System.
1484950	do	Lundell, A. E.	Do.
1484963	do	Raynsford, A.	Do.
1484967	do	Schelleng, J. C.	Amplifying System.
1484973	do	Stevenson, G. H.	Airplane Interphone Set.
1484988	do	Hamilton, H. S.	Public Address Circuits.
1485005	do	Wright, J. L.	Telephone Exchange System.
1485156	do	Arnold, H. D.	System of Distribution.
1485650	Mar. 4, 1924	Vennes, H. J.	Generating Harmonic Currents.
1485662	do	Arnhorst, C. F.	Serving or Insulating Machine.
1485675	do	Hartley, R. V. L.	Multiplex Telegraphy.
1485710	do	Reddig, C. E.	Vaporizer.
1485713	do	Rhoads, C. S.	Tension Tester or Indicator.
1485773	do	Espenschied, L.	Radio Calling or Signaling.
1486132	Mar. 11, 1924	Egerton, H. C.	Telephone Transmitter Button.
1486863	Mar. 18, 1924	Buckley, O. E.	Continuously Loaded Signaling Conductor.
1486866	do	De Forrest, L.	Sound Producer.
1486868	do	Egerton, H. C.	Intercommunicating Telephone System.
1486892	do	Herrmann, R. R.	Transmitting Device.
1487108	do	Knoop, W. A.	Regulating System.
1487112	do	Lundell, A. E.	Telephone Exchange System.
1487113	do	do	Machine Switching Telephone System.
1487115	do	McQuarrie, J. L.	Intelligence System.
1487138	do	Atwood, G. F.	Method of Detecting the Direction of Under Water Vibrations.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1487267	Mar. 18, 1924	Retallack, J. B.	Testing System.
1487288	do	Thronsen, S.	Device for Treating Glass.
1487298	do	Vennes, H. J.	Method of and Apparatus for Vibration.
1487309	do	Booth, W. T.	Airplane Signaling Apparatus.
1487314	do	Chaplin, M. P.	Speed Regulator.
1487351	do	Polinkowsky, L.	Machine Switching Telephone Exchange System.
1487373	do	Deakin, G.	Power Transmitting Mechanism.
1487451	do	Farrington, J. F.	Circuits for Electrical Discharge Devices.
1487996	Mar. 25, 1924	Williams, S. B., Jr.	Telephone Exchange System.
1488006	do	Heising, R. A.	Radio Transmission System.
1488187	do	Ramsdell, R. G.	Signaling System.
1488207	do	Kuhn, G. W., and Ramsdell, R. G.	Do.
1488489	Apr. 1, 1924	Gabriel, J. C.	Wave Modulating.
1488586	do	Deakin, G.	Senderless Automatic Telephone Satellite System.
1488598	do	Goodrum, C. L.	Telephone Exchange System.
1488774	do	Atwood, G. F.	Electromagnetic Step-by-Step Mechanism.
1488784	do	Goodrum, C. L.	Measured Service Telephone System.
1488785	do	do	Coin Collecting and Metering System for Telephone Systems.
1488788	do	Hearn, J. F.	Electric Current Controlling Device.
1488797	do	Polinkowsky, L.	Machine Switching Telephone Exchange System.
1488800	do	Stoller, H. M., and Pattison, H. A.	Electric Control System.
1488847	do	Toomey, J. F.	Telephone System.
1489782	Apr. 8, 1924	Newell, E. L.	Calculating and Plotting Device.
1490165	Apr. 15, 1924	Expenschied, L.	Balanced Antenna System.
1490166	do	do	Carrier Telegraph Circuits.
1490679	do	Pratt, E. J.	Repeater Circuits.
1490958	Apr. 22, 1924	Bown, R.	Frequency Control System.
1490993	do	Toomey, J. F.	Apparatus and Circuits for Preventing Side Tone.
1491177	do	Stokely, R. L.	Telephone Exchange System.
1491321	do	Swoboda, A. R.	Electromagnet.
1491323	do	Temple, D. L.	Telephone Exchange System.
1491327	do	Van Amstel, T.	Register Control Telephone Exchange System.
1491331	do	Baker, C. I.	Card Holder.
1491334	do	Casper, W. L.	Telephone System.
1491337	do	Conway, R. D.	Coin Collecting System for Automatic Telephone Exchange.
1491338	do	do	Pay Station Automatic Telephone System.
1491339	do	do	Do.
1491340	do	Curtis, A. M.	System for Signaling.
1491341	do	Eaves, A. J.	Condenser.
1491343	do	Fondiller, W.	Loading Coil.
1491344	do	Fry, J. R.	Relay Controlling System.
1491345	do	Gargan, J. O.	Electrical Regulating Device.
1491346	do	Gent, E. W.	Relay.
1491348	do	Keller, L., and Goodrum, C. L.	Telephone Exchange System.
1491349	do	Kendall, B. W.	Electrical Receiving or Repeating Apparatus.
1491350	do	McMurry, F. R.	Enciphering and Deciphering Mechanism.
1491351	do	McQuarrie, J. L.	Automatic Telephone Switch.
1491355	do	May, D. T.	Electromagnet.
1491357	do	Nichols, H. W.	Secret Signaling.
1491358	do	Pfannenstiehl, H.	Enciphering and Deciphering Mechanism.
1491359	do	Pleijel, H. B. M., and Olsson, A. H.	Means and Method for Reducing Crosstalk in Loading Coils.
1491362	do	Shreeve, H. E.	Vacuum Tube.
1491769	do	Arntzenius, C. R. H.	Telephone System.
1491848	do	Crisson, G.	Artificial Line.
1491867	Apr. 29, 1924	Kuhn, G. W.	Electrical Switching Device.
1492092	do	Wilbur, R. S.	Telephone System.
1492213	do	Mortimer, L. A.	Do.
1492219	do	Quass, R. L.	Party Line Telephone Exchange System.
1492602	May 6, 1924	Leveridge, W. J., and Schwerin, P.	Machine for Working on Glass.
1492868	do	Toomey, J. F.	Telephone System.
1493109	do	Davidson, J., Jr.	Do.
1493216	do	Mathes, R. C.	Vacuum Tube Filament and Plate Compensation.
1493217	do	do	Vacuum Tube Circuits.
1493586	May 13, 1924	Wood, E. B.	Measuring and Recording Device.
1493595	do	Blattner, D. G.	Amplifying with Vacuum Tubes.
1493600	do	Campbell, G. A.	Wave Filter.
1493619	do	Espenschied, L.	Carrier Transmission System.
1493631	do	Holland, N. H.	Diaphragm and Method of Making the Same.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1494347	May 20, 1924	Espenschied, L.	High Speed Radio System.
1494349	do	Fletcher, H.	Testing System.
1494392	do	Shanck, R. B.	Means for Preventing Electrical Interference.
1494548	do	Ives, H. E.	Photometer.
1494551	do	Johnston, J.	Humidity Regulator.
1494629	do	Reddig, C. E.	Automatic Power and Light System.
1494878	do	Andrick, W. P.	Telephone System.
1494905	do	Hartley, R. V. L.	Modulator Control.
1494908	do	Heising, R. A.	Amplification of Modulated Waves.
1494924	do	Lundell, A. E.	Telephone Exchange System.
1494927	do	Merrill, F. W.	Regulator.
1494935	do	Scriven, E. O.	Alternating Current Source.
1494964	do	Stoller, H. M.	Propeller.
1495221	May 27, 1924	Clark, A. B.	Means and Method for Controlling Transmission.
1495228	do	Hamilton, B. P.	Detecting Circuits.
1495279	do	Van der Bijl, H. J.	Pressure Control for Gaseous Discharge Device.
1495295	do	Fletcher, H.	Telephone Circuits.
1495422	do	Mathes, R. C.	Transmission Circuits.
1495429	do	Nicolson, A. M.	Piezophony.
1495466	do	Wente, E. C.	Electrical Testing System.
1495470	do	Farrington, J. F.	High Frequency Transmission.
1495497	do	Johnson, J. B.	Method of Coating.
1495585	do	Fowler, C. B.	Operator Instruction Circuits.
1495597	do	Johnson, K. S.	Testing System.
1495932	June 3, 1924	Espenschied, L.	Means for and Method of Reducing Singing in Repeaters.
1496014	do	Osborne, H. S.	Multi-Channel Circuits.
1496763	June 10, 1924	Booth, W. T., and Boyd, W. A.	Vibration-Reducing Mounting Device for Signaling Systems.
1496767	do	Bowne, L. J.	Telephone System.
1496772	do	Conway, R. D.	Pay Station Automatic Telephone System.
1496783	do	Mills, E. H.	Electrical Relay.
1496785	do	Shackelton, W. J.	Portable Impedance Bridge.
1496817	do	Mather, G. E.	Electrical Connector.
1496813	do	May, D. T.	Electrical Switching Circuit.
1496847	do	Hoffmann, H. L.	Telephone Exchange System.
1496849	do	Holden, W. H. T.	Selective Signaling System.
1496875	do	Fiehl, J. C.	Impulse Transmitting Mechanism.
1497032	do	Williams, S. B., Jr.	Telephone Exchange System.
1497231	do	Polinkowsky, L.	Do.
1497235	do	Raynsford, A.	Do.
1497237	do	Bell, J. H.	Telegraph System.
1497299	do	Mills, J.	System of Wave Transmission.
1497300	do	Stoller, H. M.	Electric Regulator.
1497379	June 17, 1924	Grondahl, H. H. C.	Wire or Thread Whipping Mechanism.
1497714	do	Espenschied, L.	Secret Communication System.
1497715	do	do	Multiplex Signaling Circuits.
1497733	do	Hoge, J. F. D.	Battery Holder.
1497832	do	Balduf, B. E.	Wire or Thread Whipping Mechanism.
1498539	June 24, 1924	Albert, W. P.	Controlling System.
1498544	do	Fowler, C. B.	Electrical Selective System.
1498560	do	Lundius, E. R.	Testing Device for Telephone Exchange Systems.
1498598	do	Osborne, H. S.	Equalization of Carrier Transmissions.
1498592	do	Toomey, J. F., and Loynes, O. H.	Telephone System.
1498932	do	Bendernagel, W. H.	Telephone Transmission System.
1498957	do	Casper, W. L.	Artificial Line.
1498915	do	Hoyt, R. S.	Do.
1498941	do	Wilbur, R. S.	Signaling Circuits.
1498945	do	Bendernagel, W. H.	Telephone Transmission System.
1499091	do	Smythe, E. H., and Williams, S. B., Jr.	High Frequency Signaling and Communicating System.
1499439	July 1, 1924	Affel, H. A.	System of Radio Communication with Moving Vehicles.
1499454	do	Loynes, O. H.	Transmission Regulating Circuits.
1499766	do	Field, J. C.	Switching System.
1500552	July 8, 1924	Espenschied, L.	Multiplex Transmission System.
1500553	do	do	Harmonic Suppressor.
1500593	do	Richard, C. D.	Cross Bar Line Switch.
1500937	do	Taylor, H. B.	Power Transmitting Mechanism.
1501033	July 15, 1924	Albert, W. P.	Telephone Exchange System.
1501046	do	Goodrum, C. L.	Automatic Control for Charging Secondary Batteries.
1501070	do	Snook, H. C.	Vacuum Pump.
1501071	do	do	Do.
1501074	do	Stokely, R. L.	Machine Switching Telephone Exchange System.
1501077	do	Van Inwagen, C. L., Jr.	Conveyer.

Patent no.	Date of issue	Inventor	Title
1501103	July 15, 1924	Espenschied, L.	Conjugate Signaling Circuits.
1501104	do	do	Multiplex Radio System.
1501109	do	Harlow, J. B.	Switching System.
1501120	do	Lysons, N. H.	Polarized Relay.
1501132	do	Murphy, P. B.	Signaling System.
1501174	do	Mortimer, L. A.	Switching System.
1501576	do	Whiting, D. F.	Electrical Testing System.
1501647	do	Campbell, T. C.	Shaft Coupling.
1501648	do	Conway, R. D.	Telephone System.
1501649	do	Cummings, G. C.	Transformer.
1501667	do	Johnson, K. S.	Electrical Network.
1501668	do	Keller, L.	Telephone System.
1501669	do	Kelsall, G. A.	Inductance Device and Method for Operating the Same.
1501674	do	Long, M. B.	Selective Circuits.
1501675	do	Lundell, A. E., and Clark, E. H.	Telephone Exchange System.
1501676	do	Lundell, A. E., and Wynne, J. J.	Do.
1501683	do	Oswald, A. A.	Remote Control System.
1501684	do	do	Do.
1501691	do	Vennes, H. J.	Selective Transmission of Electric Waves.
1501692	do	Ward, H. L.	Electrode.
1501693	do	Wilbur, R. S.	Telephone Transmission System.
1501711	do	Heising, R. A.	Distant Control System.
1501729	do	Scriven, E. O.	Oscillation Generator.
1501871	do	Stearn, F. A.	Telephone Exchange System.
Des65194	do	Lum, G. R.	Casing for a Telephone Transmitter.
Des65204	do	Thompson, G. K.	Desk Stand for Hand Telephones.
1501926	July 22, 1924	Shaw, T.	Loaded Transmission Circuit.
1501959	do	Martin, W. H., and Shaw, T.	Loaded Transmission Circuits.
1502243	do	Fry, T. C.	System for Determining the Direction of Propagation of Wave Energy.
1502811	July 29, 1924	Epsenschied, L.	High Frequency Multiplex Signaling System
1502812	do	do	Do.
1502813	do	do	Do.
1502814	do	do	Do.
1502815	do	do	Do.
1502816	do	do	Do.
1502817	do	do	Do.
1502889	do	Van der Bijl, H. J.	Method and System for Radio Signaling.
1503709	Aug. 5, 1924	Pruden, H. M.	Vacuum Tube Circuits.
1503824	do	Fry, T. C.	Harmonic Analyzer.
1504124	do	Kuhn, G. W.	Electrical Testing System.
1504135	do	Nyquist, H.	Telephone Repeater Circuits.
1504204	Aug. 12, 1924	Andrick, W. P.	Switching Circuit for Radio and Similar Systems.
1504215	do	Clausen, H. P.	Telephone Exchange System.
1504227	do	Gent, E. W.	Automatic Telephone Switch.
1504228	do	Gooderham, J. W.	Telephone Exchange System.
1504229	do	do	Do.
1504230	do	do	Do.
1504231	do	do	Do.
1504232	do	Hinrichsen, E. E., and Goodrum, C. L.	Metering System for Party Telephone Lines.
1504254	do	McQuarrie, J. L., and Bullard, A. M.	Semi-Mechanical Telephone Exchange System.
1504258	do	Matthies, W. H.	Telephone Exchange System.
1504260	do	Mills, E. H.	Do.
1504261	do	do	Do.
1504267	do	Polinkowsky, L.	Machine Switching Telephone System.
1504268	do	do	Machine Switching Telephone Exchange System.
1504275	do	Scudder, F. J.	Automatic Telephone Exchange System.
1504276	do	Shackelton, W. J.	Transmission Circuits.
1504283	do	Taylor, H. B.	Sequence Switch.
1504293	do	Williams, S. B. Jr.	Telephone Exchange System.
1504294	do	do	Telephone System.
1504295	do	do	Telephone Exchange System.
1504296	do	do	Telephone System.
1504297	do	do	Telephone Exchange System.
1504301	do	Adams, A. H.	Method of Producing a Balanced Telephone Exchange.
1504303	do	Affel, H. A.	Method and Means for reducing Static Disturbances.
1504304	do	Albert, W. P., and Carpenter, W. W.	Telephone Exchange System.
1504319	do	Best, F. H.	Testing Apparatus.
1504406	do	White, C.	Signaling System.
1504535	do	Affel, H. A.	Multiplex Transmission Channel.
1504537	do	Arnold, H. D.	Power Limiting Amplifying Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1504882	Aug. 12, 1924	Elmen, G. W	Method and Apparatus for Transmitting Signals.
1505158	Aug. 19, 1924	Martin, DeL. K	Frequency Control System.
1505171	do	Stearn, F. A	Telephone Exchange System.
1505231	do	Toomey, J. F	Signaling System.
1505234	do	Akers, M. K	Vacuum Tube Frequency Converter.
1505275	do	Mills, J	Operating Alternating Current Relays.
1505276	do	do	System for Locating the Source of Sound.
1505481	do	Moore, C. R	Acoustical Device.
1505710	do	Irvine, F. S	Telephone System.
1506271	Aug. 26, 1924	Reynolds, J. N., and Hearn, J. F.	Line Switch.
1506275	do	Stevenson, G. H	Protective Means for Electric Circuits.
1506735	Sept. 2, 1924	Conway, R. D., and Quass, R. L.	Coin Collect System for Automatic Telephone Exchanges.
1506743	do	Gooderham, J. W	Telephone Exchange System.
1506747	do	Hall, J. A	Do.
1506759	do	Lundell, A. E	Telephone System.
1506760	do	Lysons, N. H	Calling Device.
1506764	do	May, D. T	Apparatus for and Method of Recording the Temperature and Humidity of the Atmosphere.
1506765	do	Merrill, F. W	System for Controlling the Speed of Dynamo-Electric Machinery.
1506864	do	Polinkowsky, L	Telephone Exchange System.
1506884	do	Carpenter, W. W	Do.
1506895	do	Field, F. E	Electrical Measuring Methods and Means.
1506896	do	do	Testing Methods and Systems.
1506899	do	Goodrum, C. L	Telephone System.
1506901	do	Hall, J. A	Telephone Exchange System.
1506912	do	MacPherson, H. D	Do.
1560913	do	do	Do.
1507000	do	Roberts, J. G	Automatic Telephone Exchange.
1507016	do	De Forest, L	Radio Signaling System.
1507017	do	do	Wireless Telegraph and Telephone System.
1507113	do	Gooderham, J. W	Telephone Exchange System.
1507116	do	Hinrichsen, E. E	Telephone System.
1507136	do	Nicoll, R. I. D	Transmission System.
1507140	do	Reynolds, J. N	Automatic Telephone Switch.
1507144	do	Vallette, F. C	Telephone System.
1507160	do	Crisson, G	Pilot Wire Regulator System.
1507178	do	Hitchcock, H. W	Method and Means for Reducing Interference in Transmission Systems.
1507763	Sept. 9, 1924	Whiting, D. F	Telephone Transmission System.
1507887	do	Mills, J	Wave Frequency Circuits for Communication Systems.
1507889	do	Nicolson, A. M	Method and Means for Repeating.
1507894	do	Robinson, C. A	Signaling System.
1507905	do	Beatty, W. E	Do.
1507913	do	Fitch, A. L	Modulation of Electrical Waves.
1507919	do	Johnson, J. B	Apparatus and Method for Admitting Gas Into a Vacuum.
1507930	do	McDonough, J	Gauging Device.
1507946	do	Wynne, J. J	Switch Control Circuits.
1507962	do	Hibbard, F. H	Jig for Assembling Coordinate Switches.
1507966	do	Irvine, F. S	Telephone System.
1507994	do	Field, F. E	Electric Circuits.
1508135	do	Blount, H., and Hallsworth, H. M.	Treatment of Bright Surfaced Materials.
1508354	do	Scriven, E. O	Electric Wave Filter.
1508404	do	Lundell, A. E	Telephone Exchange System.
1508424	Sept. 16, 1924	Thompson, G. K	Telephone Desk Set.
1508425	do	Toomey, J. F., and Phelps, H. E.	Telephone Private Branch Exchange Circuits.
1508432	do	Wier, H. B	Sound Recording and Reproducing Apparatus.
1508565	do	Mills, J	Loading System.
1508744	do	Carr, J. O., and Krum, H. L. H. L.	Supporting Base for Relays or Other Electric Units.
1509139	Sept. 23, 1924	Grimes, D	Radio Receiving Apparatus.
1509184	do	Zobel, O. J	Multiplex Band Wave Filter.
1509434	do	Kopp, O. H	Telephone Exchange System.
1509851	Sept. 30, 1924	Trapp, E. F	Signaling System.
1509886	do	Vernam, G. S	Printing Telegraph System.
1509901	do	Nyquist, H	Electrical Measuring System.
1510676	Oct. 7, 1924	Johnson, E. D	Repeater Circuits.
1510698	do	Nicolson, A. M	Repeating Method and System.
1510985	do	Espenschied, L	Transmission Regulation.
1511013	do	Affel, H. A	Equalization of Carrier Transmissions.
1511014	do	do	Transmission Regulation.
1511015	do	do	Do.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1511326	Oct. 14, 1924	Fell, J. M	Duplex Telegraphy.
1511360	do	Osborne, H. S	Anti-Inductive System.
1511423	do	Quarles, D. A., and Mohr, F.	Electric Current Transmission.
1511629	do	Nyquist, H	Electrical Testing System.
1511755	do	Cory, S. I	Do.
1511756	do	do	Do.
1512024	Oct. 21, 1924	Hocker, C. D	Plastic Composition.
1512039	do	Radford, J. B	Street Lighting Accessory.
1512070	do	Vernam, G. S	Printing Telegraphy.
1512087	do	Fish, L. B	Buckle for Safety Straps.
1512584	do	Dunham, B. G	Telephone Exchange System.
1512907	Oct. 28, 1924	Conway, R. D	Telephone System.
1512930	do	Hitchcock, H. W	Do.
1512933	do	Husta, P	Do.
1512941	do	Loewe, S	Frequency Changing Device.
1512953	do	Shanck, R. B	Arrangement for Protecting Electrical Contacts.
1513351	do	Taggart, D. M., and Scudder, F. J.	Measured Service Telephone System.
1513362	do	Allen, L. M	Telephone Exchange System.
1513441	do	Affel, H. A	Half-Duplex Morse Carrier System.
1513450	do	Espenschied, L	Do.
1513451	do	do	Do.
1513452	do	do	Do.
1513453	do	do	Do.
1513760	Nov. 4, 1924	Martin, W. H	Foreign Potential Dectecting Device.
1513761	do	Osborne, H. S	High Frequency Composite Set.
1514645	Nov. 11, 1924	Bailey, R. S	Private Branch Exchange Circuits.
1514648	do	Bown, R	Directive Radio System.
1514701	do	Horton, J. W	Transmission Circuits.
1514705	do	Kendall, B. W	Vacuum Tube Repeater Circuits.
1514708	do	Lucas, F. F	Method of Making Insulated Tubes.
1514718	do	O'Neill, H. W	Telephone System.
1514728	do	Reddig, C. E	Reversing Mechanism.
1514733	do	Sass, A. H	Condenser.
1514735	do	Scriven, E. O	Method and Means for Producing Harmonics of Alternating Currents.
1514736	do	Siegmund, H. O	Asymmetric Cell Anode.
1514751	do	Wold, P. I	Vacuum Tube Oscillator Chronometer.
1514752	do	do	Means of and Method for Receiving Radio Signals.
1514753	do	do	Signal Receiving System.
1514837	do	Deakin, G	Machine Switching Telephone System.
1514844	do	Field, J. C	Switching System.
1514847	do	Fowler, C. B	Telephone Exchange System.
1514850	do	Goff, H. W	Coordinate Switch.
1514852	do	Grondahl, H. H. C	Wire or Thread Whipping Mechanism.
1514853	do	Haase, C. O	Do.
1514854	do	Harlow, J. B	Switching System.
1514861	do	Raynsford, A	Telephone Exchange System.
1515109	do	Hartley, R. V. L	Current Modifying Relay System.
1515152	do	De Forest, L	Communication System for Railway Trains.
1515631	Nov. 18, 1924	Taylor, H. B	Switching Device.
1515632	do	do	Automatic Telephone Switch.
1515643	do	Wright, S. B	Transmission Circuits.
1515660	do	Crisson, G	Measuring Instrument for Vacuum Tubes.
1515669	do	Forsberg, O. F	Switching Device.
1515674	do	Goodrum, C. L	Telephone System.
1515686	do	Kuntz, F. A	Mounting for Calling Dials.
1515735	do	Goodrum, C. L. and Reynolds, J. N.	Machine Switching Telephone System.
1516518	Nov. 25, 1924	Carson, J. R	Signaling System.
1516519	do	Crisson, G	Electrical Transformer.
1517257	Dec. 2, 1924	Scudder, F. J	Telephone Exchange System.
1517260	do	Stearn, F. A	Do.
1517265	do	Taylor, H. B	Automatic Telephone Switch.
1517315	do	Rhodes, W. A	Telephone Exchange System.
1517331	do	Williams, S. B., Jr	Do.
1517381	do	Potts, L. M	System of Telegraph Distribution.
1517425	do	Hendrickson, C. J., and Miller, V. F.	Automatic Telephone Switch.
1517857	do	Norton, P., and May, D. T	Selective System.
1517869	do	Stokely, R. L	Semi-Automatic Telephone Exchange System.
1518495	Dec. 9, 1924	Espenschied, L	Selective Circuits.
1518543	do	Nyquist, H	Electrical Measuring Apparatus.
1518736	do	Goodrum, C. L	Telephone System.
1518815	do	Polinkowsky, L	Machine Switching Telephone Exchange System.
1519202	Dec. 16, 1924	Herman, J	Telegraph System.
1519211	do	Martin, W. H	Loud Speaker Circuits.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1935—Continued

Patent no.	Date of issue	Inventor	Title
1519477	Dec. 16, 1924	Beach, W. C.	Signaling System.
1519497	do	MacPherson, H. D.	Telephone System.
1519499	do	Menefee, H. R.	Test Device.
1519568	do	Van Amstel, T.	Slow Acting Relay.
1519573	do	Clark, A. B., Nyquist, H., and Gannett, D. K.	Voice Frequency Signaling.
1519574	do	Clark, A. B., and Martin, W. H.	Method of Testing Transmission Lines.
1519612	do	Hartley, R. V. L.	Loading System.
1519613	do	Hazard, A. B.	Distributing Mechanism.
1519615	do	Heising, R. A.	Signaling System.
1519619	do	Horton, J. W.	Harmonic Generator System.
1519626	do	Nichols, H. W.	Two-Way High Frequency Signaling.
1519635	do	Scriven, E. O.	Electric Circuits.
1520097	Dec. 23, 1924	Thompson, G. K.	Selective Signaling System.
1520098	do	Toomey, J. F.	Signaling System.
1520718	do	Kochendorfer, F. S.	Strand or Cord Working Mechanism.
1520793	do	Young, R. L.	Current Regulating Device.
1520813	do	Espenschied, L.	Selective Circuits for Multiplex Transmission.
1520910	do	Richard, C. D.	Calling Device.
1520994	do	Arnold, H. D.	Electron Discharge Amplifier.
1521019	do	Goodrum, C. L.	Telephone System.
1521159	do	MacPherson, H. D.	Do.
1521160	do	do	Toll Switching.
1521586	do	Merrill, F. W.	Means for Regulating the Voltage of Distribution Systems.
1521591	Jan. 6, 1925	Beck, W. O.	Electromagnetic Device.
1521664	do	Wright, S. B.	Testing Circuits for Echo Suppressors.
1521671	do	Deardorff, R. W.	Carrier Telegraph Circuits.
1521674	do	Espenschied, L.	Do.
1521685	do	Hamilton, B. P.	Do.
1521728	do	Strickler, W. B., and Wright, P. L.	Trunk Circuit.
1521755	do	Conway, R. D.	Transmission System.
1521771	do	Hoffman, H. L.	Telephone Exchange System.
1521824	do	Merrill, F. W.	Regulator.
1521852	do	Arnold, H. D.	Amplifier Circuits.
1521870	do	Clokey, A. A.	Telegraph System.
1521871	do	Deakin, G.	Rotary Selector Switch.
1522006	do	Fletcher, H.	Testing System.
1522044	do	Bown, R.	Secret Communication System.
1522268	do	Potts, L. M.	Automatic Telegraph Repeater.
1522286	do	Clausen, H. P.	Method and Apparatus for Mounting Filaments.
1522291	do	Elmen, G. W.	Loaded Signaling Conductor.
1522294	do	Fletcher, H.	Electrical Testing System.
1522299	do	Hampton, L. N.	Brake for Rolling Ladders.
1522580	Jan. 13, 1925	Espenschied, L.	Composited Multiplex Transmission System.
1522581	do	do	Radio Broadcasting System.
1522713	do	Coyne, H. L.	Circuit Controlling Switch.
1522855	do	Bertels, A. S.	Electrical Testing System.
1522856	do	do	Testing Device for Telephone Exchange Systems.
1522862	do	Bowne, L. J.	Telephone System.
1522865	do	Clokey, A. A.	Signaling System.
1522875	do	Fowler, C. B.	Telephone Exchange System.
1522893	do	Lundell, A. E.	Telephone System.
1522905	do	Polinkowsky, L.	Telephone Exchange System.
1522930	do	Williams, S. B., Jr., and Gibson, E. S.	Do.
1523037	do	Quarles, D. A.	Signaling Circuit.
1523102	do	Betts, W. L.	Receiving Circuit.
1523109	do	Elmen, G. W.	Magnetic Material.
1523111	do	Fisher, H. J.	Signaling System.
1523127	do	Kendall, B. W.	Multiplex Signaling System.
1523139	do	Peterson, E.	High Frequency Signaling.
1523149	do	Wheeler, E. B.	Means for Control of Electric Impulses.
1523383	Jan. 20, 1925	Adams, A. H.	Selector.
1523385	do	Atwood, G. F.	Switching Device.
1523398	do	Ceccarini, O. O.	Method of and Apparatus for Locating Faults.
1523402	do	Clark, E. H.	Telephone System.
1523407	do	Dobbin, H. F.	Switching Mechanism.
1523408	do	Dodge, W. L.	Testing System for Testing Senders of Automatic Exchanges.
1523411	do	Forsberg, O. F.	Switching Device.
1523412	do	Fowler, C. B.	Telephone Exchange System.
1523413	do	Gent, D. W.	Magnetic Clutch.
1523422	do	Hoge, J. F. D.	Shaft Coupling.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1523423	Jan. 20, 1935	Hoge, J. F. D	Alternating Current Relay.
1523428	do	Keckler, C. W	Telephone Exchange System.
1523429	do	Keckler, C. W., and Dahl, J. F.	Telephone System.
1523430	do	Knoop, W. A	Mounting for Vacuum Tubes.
1523439	do	McQuarrie, J. L., and Goodrum, C. L.	Selector Switch.
1523446	do	Polinkowsky, L	Telephone Exchange System.
1523447	do	Retallack, J. B	Do.
1523468	do	Woodruff, H. S., and Motley, J. G.	Calling Dial.
1523473	do	Clark, A. B	Repeater Circuits.
1523488	do	Moore, R. P	Telegraph Signal Circuits.
1523589	do	Goodrum, C. L	Automatic Telephone System.
1523741	do	Yonkman, W	Method of Rust Removal and Prevention.
1523827	do	Nelson, E. L	Transmission Circuits.
1523874	do	Horton, J. W	Automatic Transmission Control System.
1523998	do	Dodge, W. L	Telephone System.
1524278	Jan. 27, 1925	Alder, F. H	Telephone Instrument.
1524312	do	Rasmussen, O. E	Automatic Telephone Switch.
1524344	do	Dobbin, H. F	Coordinate Switch.
1524357	do	Hudson, G. E	Telegraphy.
1524379	do	Bailey, R. S	Telephone Exchange System.
1524402	do	McKown, F. W	Anti-Side-Tone Substation Circuit.
1524697	Feb. 3, 1925	Egerton, H. C	Phonographic Apparatus.
1524930	do	Hartley, R. V. L	Automatic System of Control.
1525053	do	Toomey, J. F	Program Transmission over Wires.
1525054	do	do	Power and Amplifying Equipment for Distribution of Intelligence over Wires.
1525522	Feb. 10, 1925	Vernam, G. S	Printing Telegraph System.
1525523	do	do	Printing Telegraphy.
1525780	do	Polinkowsky, L	Machine Switching Telephone System.
1525787	do	Williams, S. B., Jr	Telephone System.
1525823	do	Nicolson, A. M	Piezo-Electrical Transmitter.
1526063	do	Griffin, J. T., and Timm, W. A.	Method of and Apparatus for Removing the Insulation from Electrical Conductors.
1526071	do	Kochendorfer, F. S., and Boe, H. J.	Cable or Strand Handling and Working Mechanism.
1526335	Feb. 17, 1925	Griggs, E. V	Secrecy Transmission System.
1526337	do	Hartley, R. V. L	Method of and Apparatus for Measuring Time Intervals.
1526348	do	Labaugh, J. M., Jr	Two-Party Signaling System.
1526371	do	Potts, L. M	Regulating Device.
1526402	do	Watson, E. F	Loop Circuits for Telegraph Repeaters.
1526408	do	Young, F. W	Carrier Wave Receiving System.
1526550	do	Johnson, E. D	Two-Way Transmission with Repeaters.
1526572	do	Ten Eyck, W. B	Method of and Apparatus for Wrapping a Stranded Material About a Core.
1526778	do	De Forest, L	Thermophone.
1527177	Feb. 24, 1925	Elmen, G. W	Loaded Signaling Conductor.
1527228	do	Schelleng, J. C	Method of Harmonic or Subharmonic Frequency Production.
1527318	do	Lewis, E	Insulator.
1527345	do	Birchall, B. H	Electrical Testing Device.
1527651	do	Jammer, J. S	Current-Wave Repeater.
1528010	Mar. 3, 1925	Demarest, C. S., and Almquist, M. L.	Radio Signaling System.
1528011	do	do	Do.
1528424	do	Holland, N. H	Recording and Reproduction of Talking Motion Pictures.
1528746	Mar. 10, 1925	Albert, W. P	Telephone Exchange System.
1528761	do	Goff, H. W	Automatic Telephone Switch.
1528763	do	Goodrum, C. L., and Hendrickson, C. J.	Switching Device.
1528767	do	Hendrickson, C. J	Do.
1528777	do	Marting, H. E	Nut and Bolt Locking Device.
1528791	do	Richard, C. D	Automatic Switching Apparatus.
1528806	do	Wilbur, R. S., and White, C	Telephone Exchange System.
1528907	do	Bsacom, H. M	Trunking System.
1528920	do	Foster, R. M	Do.
1528982	do	Molina, E. C	Do.
1529151	do	Albert, W. P	Controlling System.
1529171	do	Dahl, J. F	Telephone Exchange System.
1529786	Mar. 17, 1925	Harper, A. U	Secret Communication System.
1529801	do	Martin, W. H	Multiplex Submarine Cable.
1529978	do	Wilbur, R. S	Telephone Exchange System.
1530335	do	Ward, H. L	Operation of Electrolytic Cells.
1530482	Mar. 24, 1925	Cummings, G. C	Signaling System and Method.
1530498	do	Kendall, B. W	Synthesis of Compound Tones by Vacuum Tube Oscillators.
1530514	do	Rainey, P. M	Telegraph System.

1531016	do	Martin, H. T., and Neill, P.	Electrical Switching Device.
1531025	do	Polinkowsky, L	Telephone Exchange System.
1531029	do	Ryan, F. M	Radio Transmission System.
1531046	do	Temple, D. L	Telephone Exchange System.
1531048	do	Thompson, G	Do.
1531080	do	Dodge, W. L	Do.
1531134	do	Richard, C. D	Automatic Telephone Switch.
1531135	do	do	Do.
1531347	Mar. 31, 1925	Rhodes, W. A	Relay.
1531360	do	Toomey, J. F	Telephone System.
1531598	do	Cummings, G. C	Telegraph System.
1531633	do	Vennes, H. J	Oscillation Generator.
1531805	do	Mathes, R. C	Do.
1532130	Apr. 7, 1925	From, O. C	Controlling Mechanism.
1532169	do	Best, F. H	Method of and Means for Measuring Transmission.
1532172	do	Carson, J. R	Means for Receiving Weak Signal Currents.
1532207	do	Stacy, L. J	Signaling System.
1532533	do	Harris, J. E	Colloidal Suspension.
Des 66991	do	Thompson, G. K	Hand Telephone.
1533091	Apr. 14, 1925	Blackwell, O. B	Duplex Signaling System.
1533105	do	Eggers, H. C. T	Electric Signaling.
1533153	do	Williams, S. B., Jr	Telephone Exchange System.
1533154	do	do	Circuit Controlling Apparatus.
1533157	do	Beatty, W. E	Modulating Method and Apparatus.
1533163	do	Clausen, H. P., and Goodrum, C. L.	Telephone Exchange System.
1533171	do	Dowd, A. D	Telegraph System.
1533178	do	Gilbert, J. J	Artificial Electric Line.
1533179	do	Goff, H. W	Wire Switch.
1533181	do	Goodrum, C. L	Telephone System.
1533182	do	do	Telephone Exchange System.
1533188	do	Hargan, A. D	Automatic Switching Device.
1533192	do	Keckler, C. W	Telephone Exchange System.
1533193	do	Kelsay, L. W	Telephone Hand Set.
1533195	do	Lundius, E. R	Testing System.
1533197	do	Malm, F. S	Manufacture of Sponge Rubber Articles.
1533203	do	Murphy, P. B	Telephone Exchange System.
1533206	do	Pfannenstiehl, H	Printing Telegraphy.
1533207	do	do	Do.
1533209	do	Radu, J. W	Vacuum Tube Holder.
1533210	do	do	Vacuum Tube Mounting.
1533211	do	Rainey, P. M., and Locke, G. A.	Starting Device.
1533311	do	Fletcher, H	Secret Signaling.
1533376	do	Brownell, F. J	Automatic Telephone Switch.
1533477	do	Stearn, F. A., and McAuliffe, J. C.	Routine Test Circuits for Central Office Senders.
1533645	do	Gilbert, J. J	Submarine Signaling System.
1534073	Apr. 21, 1925	Nyquist, H	Means for Neutralizing Foreign Interference.
1534074	do	Parker, R. D	Telegraphy.
1534086	do	Scriven, E. O	Transformer Circuits.
1534109	do	Goff, H. W	Automatic Telephone Switch.
1534118	do	Hitchcock, H. W	Method of Adjusting Balance Between Electric Conductors or Networks.
1534172	do	Field, F. E	Amplifier Circuits.
1534287	do	Schelleng, J. C	Method of and Means for Electric Energy Translation.
1534660	do	Potts, L. M	System of Telegraphic Distribution.
1534661	do	do	Do.
1535104	Apr. 28, 1925	Cory, S. I	Means for Preventing Electrical Interference.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1535130	Apr. 28, 1925	Oswald, A. A.	High Power Radio Telephony.
1535244	do	Percival, H. S.	Telegraphy.
1535269	do	Toomey, J. F.	Selective Signaling Apparatus and Circuits.
1535490	do	Ong, M. L.	Guide Chart for Automatic Telephone Instruments.
1535527	do	Harrison, H. C.	Vibratory System.
1535538	do	Maxfield, J. P. and Harrison, H. C.	Do.
1536116	May 5, 1925	Martin, W. H.	Sound Reproducer.
1536118	do	McCutchen, B. S.	Do.
1536130	do	Perry, D. B.	Operation of Printing Apparatus by Radio.
1536464	do	Williams, S. B., Jr.	Telephone System.
1536753	do	Bell, J. H.	Telegraph System.
1536763	do	Brown, J. T. L.	Testing System.
1536764	do	Buckley, O. E.	Signaling System.
1536784	do	Fry, J. R.	Electromagnetic Device.
1536805	do	Melhuish, L. E.	Vacuum Tube Socket.
1536809	do	Potts, L. M.	Signaling System.
1536810	do	Reddig, C. E.	Primer and Choke.
1536855	do	Housekeeper, W. G.	Electron Discharge Device.
1536907	do	Mills, J.	Carrier Current System.
1537074	May 12, 1925	Ford, B. K.	Apparatus for Whipping Cores with Strand Material.
1537081	do	Graham, F. H.	Multiple Plug.
1537099	do	Vennes, H. J.	Carrier Current System.
1537101	do	Whiting, D. F.	Means for Connecting Devices of Different Impedance.
1537106	do	Affel, H. A.	Means for and Method of Equalizing Attenuation.
1537109	do	Davidson, J. Jr.	Telephone System.
1537126	do	Martin, W. H.	Loud Speaker Circuit.
1537137	do	Quass, R. L.	Measured Service Telephone System.
1537154	do	Wolfe, W. V.	Multiplex Signaling System.
1537228	do	Gargan, J. O.	Means for Cooling Carrier Wave Apparatus.
1537255	do	Mills, J.	Carrier Current System.
1537283	do	Affel, H. A.	Repeater for Multiplex Systems.
1537535	do	Kranz, F. W.	Signaling by High Frequency Waves.
1537575	do	Bandur, A. F.	Method of and Apparatus for Applying a Serving to a Core.
1537653	do	Murphy, P. B.	Signaling System.
1537911	do	Heising, R. A.	Wave Transmission.
1537936	May 19, 1925	Crisson, G. and Shackleton, S. P.	Telephone Repeater Equipment.
1537990	do	Espenschied, L.	Method of Improving Boradcast Reception.
1538001	do	Pierce, R. E.	Current Measuring Arrangement.
1538048	do	Long, M. B.	Multiplex Signaling System.
1538216	do	Kingsbury, E. F.	Metallic Composition.
1538429	do	Forsberg, O. F.	Switching Mechanism.
1538918	May 26, 1925	Nyquist, H.	Transformer.
1538930	do	Thompson, E. O.	Alternating Current Relay.
1538934	do	Zobel, O. J.	Wave Filter.
1539380	do	Williams, S. B. Jr.	Telephone Exchange System.
1539402	do	Nichols, H. W.	Means for Producing Electrical Oscillations.
1539602	June 2, 1925	Honaman, R. K.	Carrier Transmission over Power Circuits.
1539903	do	Ilgenfritz, L. M.	Elimination of Interference in Carrier Systems.
1539920	do	Taggart, D. M.	Signaling System.
1540033	do	Polinkowsky, L.	Machine Switching Telephone Exchange System.
1540034	do	Richard, C. D.	Telephone Exchange Line Switch.
1540049	do	Williams, R. R.	Plastic Composition.
1540053	do	Burton, P. H.	Impulse Receiving Circuit.
1540054	do	Carpenter, W. W.	Telephone Exchange System.
1540059	do	Conway, R. D.	Selective Switch.
1540060	do	Deakin, G.	Telephone Call Distribution System.
1540063	do	Forsberg, O. F.	Switching Mechanism.
1540064	do	Fowler, C. B.	Telephone Exchange System.
1540066	do	Goodrum, C. L.	Do.
1540080	do	Magrath, A. C.	Line Bar for Cross Bar Line Switches.
1540272	do	Merrill, F. W.	Centrifugal Speed Regulator.
1540310	do	Browne, L. J.	Testing System.
1540313	do	Chaplin, M. P.	Printing Telegraphy.
1540317	do	Craft, E. B. and Colpitts, E. H.	Method of and Apparatus for Recording Sound.
1540322	do	Folsom, R. A.	Humidity Control Apparatus.
1540328	do	Haddock, A.	Contact Terminal.
1540355	do	Mathes, R. C.	Vacuum Tube Testing Device.
1540401	do	Kelly, M. J. and Griffith, T. R.	Vacuum Oven.
1540710	do	Pfannenstiehl, H.	Printing Telegraphy.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1540750	June 9, 1925	Beck, W. O	Electromagnetic Device.
1540797	do	Murphy, P. B	Signaling System.
1540799	do	Nunn, D	System for Measuring the Capacity of Electrical Circuits.
1540835	do	Hamilton, B. P	Telegraph Repeater.
1540849	do	Loynes, O. H	Signal Storing Arrangement.
1540858	do	Pitcher, J. L	Brush.
1541164	do	Miller, V. F	Automatic Telephone Switch.
1541193	do	Smith, P. C	Electrical Switching Apparatus.
1541194	do	do	Electrical Switching Device.
1541196	do	Sperry, A. B	Telephone System.
1541229	do	Locke, G. A	Automatic Telegraph System.
1541291	do	Temple, D. L	Telephone Exchange System.
1541301	do	White, J. H	Soldering Device and Material.
1541308	do	Albert, W. P	Telephone System.
1541311	do	Anderson, S. E	Vacuum Tube Circuits.
1541316	do	Bancroft, E. P. and Kerr, M. B.	Automatic Telegraph System.
1541341	do	Forsberg, O. F	Contact Bank for Coordinate Switches.
1541343	do	Goff, H. W	Switching Device.
1541344	do	do	Switching Mechanism.
1541347	do	Goodrum, C. L	Telephone Exchange System.
1541356	do	Irvine, F. S	Message Register System.
1541359	do	Kane, A. F	Telephone System.
1541367	do	McQuarrie, J. L	Telephone Exchange System.
1541368	do	Martin, G. R	Do.
1541386	do	Polinkowsky, L., and Deakin, G.	Machine Switching Telephone Exchange System.
1541387	do	Polinkowsky, L	Telephone System.
1541388	do	do	Automatic Telephone Exchange System.
1541408	do	Stearn, F. A	Telephone Exchange System.
1541513	do	Knoop, W. A	Electric Resistance Welding.
1541779	June 16, 1925	Aldendorff, F	Electromechanical Telephone System.
1541878	do	Watson, E. F	Single Polar Telegraph Circuits.
1541879	do	do	Do.
1541880	do	do	Do.
1541881	do	do	Do.
1542105	do	Smith, P. C	Measured Service Automatic Telephone System.
1542121	do	Williams, S. B., Jr	Carrier Wave Communicating System.
1542365	do	Branigan, J	Glass Working Machine.
1542366	do	Brough, W. R	Vacuum Tube Base.
1542372	do	Casper, W. L	Transformer.
1542377	do	Dobbin, H. F	Telephone Instrument.
1542381	do	Gabriel, J. C., and Landeen, A. G.	Discharge Device System.
1542383	do	Hague, A. E	Automatic Telephone System.
1542385	do	Harris, J. E	Thermionic Cathode and Method of Making the Same.
1542386	do	Hartley, R. V. L	Vacuum Tube Design.
1542389	do	Houskeeper, W. G., and Brough, W. R.	Vacuum Insulated Terminal.
1542390	do	Houskeeper, W. G	Vacuum Pump.
1542398	do	McGall, P. K	Electromagnetic Device.
1542411	do	Reddig, C. E	Prime Mover Dynamo Plant.
1542413	do	Retallack, J. B	Telephone Exchange Testing System.
1542414	do	Richard, C. D	Automatic Telephone Switch.
1542425	do	Van Inwagen, C. L	Wrench.
1542565	do	Mathes, R. C	Secret Signaling.
1542566	do	do	Do.
1542567	do	do	Do.
Des 67608	do	Lum, G. R	Loud Speaking Telephone Receiver.
1542847	June 23, 1925	Bailey, R. S	Signaling System.
1542849	do	Bascom, H. M	Do.
1542850	do	Curtis, A. S., and Beaver, D. J.	Thermostat.
1542922	do	Thompson, G. K	Telephone Receiver.
1542977	do	Williams, S. B., Jr., and Hinrichsen, E. E.	Telephone Exchange System.
1543001	do	Gaynor, E. G	Magnetic Core.
1543117	do	Maxfield, J. P	Acoustical Aid for Deaf Persons.
1543119	do	Pfannenstiehl, H	Distributing Apparatus.
1543124	do	Ricker, N. H	Frequency Standard.
1543125	do	Robinson, H. R	Control of Relays.
1543662	June 30, 1925	Booth, W. T	Calling Device.
1543665	do	Conway, R. D	Alarm System for Automatic Telephone Exchanges.
1543666	do	Dobbin, H. F	Automatic Telephone Switch.
1543667	do	Forsberg, O. F	Do
1543669	do	Goodrum, C. L., and Forsberg, O. F	Do.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1935—Continued

Patent no.	Date of issue	Inventor	Title
1543670	June 30, 1935	Graham, F. H.	Coordinate Switch.
1543671	do	Hinrichsen, E. E.	Telephone System.
1543685	do	Stokely, R. L.	Semi-Automatic Telephone System.
1543688	do	Wilbur, R. S., and Johnson, E. D.	Switching Apparatus.
1543772	do	Hunter, R. N.	Apparatus for Neutralizing Radio Interference on Wire Lines.
1543775	do	Ilgenfritz, L. M.	Do.
1543789	do	Parker, R. D., and Vernam, G. S.	Printing Telegraph Exchange System.
1543813	do	Atwood, G. F.	Impulse Generating Device.
1543824	do	Craft, E. B.	Switching device.
1543825	do	Dobbin, H. F.	Do.
1543836	do	Field, J. C.	Signaling System.
1543854	do	Johnson, L. H.	Telephone Exchange System.
1543863	do	Merrill, F. W.	Method and Apparatus for Electrical Regulation.
1543869	do	Polinkowsky, L.	Telephone Exchange System.
1543890	do	Williams, R. R.	Method of and Apparatus for Vulcanizing Rubber.
1543893	do	Williams, S. B., Jr.	Telephone System.
1543900	do	Bertels, A. S.	Testing System for Automatic Telephone Switches.
1543914	do	Goff, H. W.	Telephone Switch.
1543926	do	Kemp, A. R.	Method of Vulcanizing Rubber and Similar Materials.
1543933	do	Lundius, E. R.	Testing Device for Telephone Exchange Systems.
1543937	do	McQuarrie, J. L.	Automatic Telephone Exchange System.
1543967	do	Williams, S. B., Jr., and Gibson, E. S.	Telephone Exchange System.
1543990	do	De Forest, L.	Electrical Means for Producing Musical Notes.
1543994	do	Ferguson, J. G.	Inductometer.
1544381	do	Elmen, G. W., and Ort, C. F.	Method and System for Amplifying Variable Currents.
1544622	July 7, 1925	Affel, H. A.	Elimination of Interference in Carrier Systems.
1544638	do	Fell, J. M.	Telegraph Signaling System.
1544737	do	Green, E. I.	Elimination of Interference in Carrier Systems.
1544910	do	Kendall, B. W.	Repeater for Multiplex Systems.
1544921	do	Mathes, R. C.	Amplifier Circuits.
1544926	do	Nichols, H. W.	Signaling System.
1544939	do	Schelleng, J. C.	Do.
1544943	do	Scriven, E. O.	Electric Wave Repeater for Multiplex Transmissions.
1544958	do	Trapp, E. F.	Telephone Exchange System.
1545247	do	Gargan, J. O.	Support for Vacuum Tubes.
1545251	do	Gent, E. W.	Tuning Fork.
1545256	do	Hocker, C. D.	Process of Manufacturing Electron Emitting Cathodes.
1545270	do	Nichols, H. W.	Secret Carrier Wave Signaling System.
1545276	do	Pfannenstiehl, H.	Selecting Mechanism.
1545541	July 14, 1925	Wright, S. B.	Tandem Operated Echo Suppressor.
1545549	do	Child, B. L.	Do.
1545558	do	Hamilton, H. S., and Wright, S. B.	Do.
1545576	do	Allen, R. M., and Atwood, G. F.	Acoustical Device.
1545581	do	Chaplin, M. P.	Printing Telegraphy.
1545591	do	Madine, J. J.	Manufacture of Electron Discharge Devices.
1545601	do	Potts, L. M.	Telegraph System.
1545602	do	do	Do.
1545606	do	Ryder, H. W.	Signal.
1545607	do	Schelleng, J. C.	System of Wave Transmission.
1545654	do	Hoppock, A. H.	Water Cooled Anode for Vacuum Tubes.
1545659	do	Ives, H. E.	Sheet Mounting Device.
1545662	do	Juley, J. P.	Coin Actuated Device.
1545708	do	Terry, D. M.	Transmission of Pictures by Electricity.
1545828	do	Herrmann, R. R.	Transmitter.
1545855	do	Scriven, E. O.	Amplifier Circuits.
1545897	do	Haynes, C. H.	Sheet Mounting Device.
1545906	do	Kochendorfer, F. S.	Material Carrier for Strand Wrapping Machine.
1546113	do	Albert, W. P.	Telephone System.
Des. 67818	do	Vroom, E.	Loop Antenna.
1546392	July 21, 1925	McCurdy, R. G.	Testing Apparatus.
1546395	do	Martin, W. H.	Duplex Signaling System.
1546427	do	Affel, H. A.	Auxiliary Signaling Circuits.
1546432	do	Branson, D. E.	Relay and Circuits Therefor.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1546439	July 21, 1925	Espenschied, L.	Secret Telephone System.
1546749	do	Roberts, J. G.	Telephone Transmitter.
1547217	July 28, 1925	Herman, J.	Phase Regulator for Multifequency Generators.
1547226	do	Martin, W. H.	Signaling.
1547227	do	Mitchiner, J. I.	Telegraph Signaling System.
1547232	do	Parker, R. D.	Multiplex Signaling System.
1547242	do	Strieby, M. E.	Carrier Transmission over Power Circuits.
1547277	do	Wheeler, C. H.	Coin Actuated Device.
1547351	do	Schwerin, P.	Electric Heater.
1547363	do	Catlin, A. A., and Massingham, H. R.	Method of Treating Conductors.
1547577	do	Fowler, C. B.	Connecting Circuits.
1547635	do	Akers, M. K.	Gas Engine Ignition Coil.
1547670	do	Radu, J. W.	Vacuum Tube.
1547729	do	Booth, W. T.	Vacuum Tube Socket.
1547753	do	Houskeeper, W. G.	Process of Treating Metal.
1547754	do	do	Grid Making Machine.
1547760	do	King, R. W.	Electron Discharge Device.
1547771	do	Mathes, R. C.	Signaling System.
1547772	do	Moore, C. R.	Telephone Receiver.
1547812	do	Hendry, W. F.	Vacuum Tube and Method of Manufacturing the Same.
1548022	Aug. 4, 1925	Casper, W. L., and Schwartz, E. L.	Inductance Device.
1548028	do	Egerton, H. C.	Tranmission System.
1548039	do	Jammer, J. S.	Two-Way Repeater.
1548059	do	Nyquist, H.	Electrical Testing System.
1548060	do	Pfannenstiehl, H.	Printing Telegraph System.
1548062	do	Pierce, P. H.	Coupling Arrangement for Multiplex Transmission.
1548088	do	Herman, J.	Telegraph Circuits.
1548095	do	Osborne, H. S.	Vacuum Tube Translating Device.
1548106	do	Speed, J. B., and Falk, A. H.	Telephone Receiver Diaphragm.
1548110	do	Toomey, J. F.	Telephone Toll Circuits.
1548119	do	Dietze, E.	Busy Test Circuit for Telephone Cord Circuits.
1548168	do	Pfannenstiehl, H.	Printing Telegraphy.
1548260	do	Espenschied, L.	Multiplex System.
1548267	do	Helsing, R. A.	High Frequency Carrier Signaling.
1548388	do	Shackelton, W. J.	Transformer.
1548592	do	Fletcher, H.	Testing Circuit.
1548597	do	Gilbert, J. J.	Signaling System.
1548862	Aug. 11, 1925	Blackwell, O. B.	Interference Neutralizing Arrangement.
1548873	do	Fell, J. M.	Telegraph Signaling System.
1548874	do	Fell, J. M., and Pierce, R. E.	Do.
1548878	do	Gannett, D. K., and Kirkwood, M.	Electrical Signaling System.
1548895	do	Mertz, P.	Electrical Transmission of Pictures.
1548947	do	Helsing, R. A.	Telegraph System.
1548952	do	Mills, J.	Electric Control Circuits.
1548959	do	Stoller, H. M., and Morton, E. R.	Control Regulator.
1549253	do	Houskeeper, W. G.	Electrode for Electron Discharge Devices.
1549816	Aug. 18, 1925	Toomey, J. F.	Program Transmission Over Wires.
1549817	do	do	Trouble Indicating Arrangement.
1549820	do	Vernam, G. S.	Printing Telegraph.
1549821	do	do	Printing Telegraph System.
1549849	do	Affel, H. A.	Voice Frequency Carrier Telegraph.
1549907	do	Clokey, A. A.	Telegraphy.
1549948	do	Zelenka, J. J.	Submarine Cable.
1550270	do	Long, M. B.	Transmission of Pictures by Electricity.
1550377	do	Lundell, A. E.	Telephone Exchange System.
1550657	Aug. 25, 1925	Affel, H. A.	Ringing Circuits for Multiplex Signaling.
1550658	do	do	Do.
1550659	do	do	Supervisory Circuits for Multiplex Signaling.
1550660	do	do	Prevention of Overloading in Speech Circuits.
1550684	do	Espenschied, L.	Do.
1550724	do	Hubbard, F. A.	Public Address System.
1550752	do	Smith, P. C.	Measured Service Automatic Telephone Exchange System.
1550768	do	Weinhart, H. W.	Electric Discharge Device.
1550769	do	Williams, S. B., Jr.	Telephone Exchange System.
1550783	do	Clark, E. H.	Do.
1550801	do	Goodrum, C. L.	Automatic Telephone Systems.
1550814	do	Johnson, L. H.	Telephone Exchange System.
1550815	do	do	Toll Charging System.
1550819	do	Kerr, M. B.	Automatic Switching Device.
1550830	do	MacPherson, H. D.	Telephone System.

1551190	do	Craft, E. B.	Cross Bar Line Switch.
1551199	do	Lundquist, F. A.	Telephone Exchange.
1551539	Sept. 1, 1925	Clark, A. B.	Transmission Equalization.
1551559	do	Hamilton, B. P.	Carrier Telegraph Circuits.
1551578	do	Loye, D. P.	Radio Receiving Circuits.
1551595	do	Watson, E. F.	Alternating Current Printing Telegraph System.
1551603	do	Melosi, H. E., and Gray, J. H.	Adjustable Mold for Making Plastic Forms.
1551624	do	Schelleng, J. C.	Circuits for Wave Transmission.
1551707	do	Sprague, C. A.	Electric Wave Secrecy Transmission.
1551797	do	Buckley, O. E.	Artificial Line.
1552465	Sept. 8, 1925	Campbell, G. A.	Means and Method for Measuring Direct Capacities.
1552466	do	do	Means and Method for Measuring Balanced Terminal Capacities.
1552467	do	do	Means and Method for Measuring Direct Capacities.
1552470	do	Cory, S. I.	Means for Measuring Telegraph Distortion.
1552499	do	Nyquist, H.	Do.
1552590	do	Allen, R. M.	Acoustical Aid for Deaf Persons.
1552646	do	Pratt, E. J.	Do.
1552914	do	De Forest, L.	Telephone Device.
1553304	Sept. 15, 1925	Bancroft, E. P.	Printing Telegraphy.
1553305	do	Broadwell, H.	Lubricating Device.
1553308	do	Dodge, W. T., and Retallack, J. B.	Testing System for Testing Senders of Automatic Telephone Exchanges.
1553311	do	Ford, U. S.	Telephone Exchange System.
1553312	do	Garrecht, A. C.	Universal Joint.
1553313	do	Goff, H. W.	Switching Mechanism.
1553314	do	do	Switch Contact Bank.
1553316	do	Harper, R. W.	Telephone Exchange System.
1553317	do	Hinrichsen, E. E.	Telephone System.
1553322	do	Miller, O. R.	Testing System.
1553327	do	Reeves, F. N.	Telephone Exchange System.
1553329	do	Ryan, F. M.	Radio Telephone System.
1553335	do	Smythe, E. H.	Automatic Telephone System.
1553337	do	Stokely, R.	Telephone Exchange System.
1553346	do	Williams, S. B., Jr.	Recording Mechanism.
1553347	do	do	Telephone Exchange System.
1553369	do	Dahl, J. F.	Do.
1553417	do	Vernam, G. S.	Printing Telegraph System.
1553435	do	Chapman, A. G., and McCurdy, R. G.	Means to Control Crosstalk.
1553452	do	McQuarrie, J. L., and Bullard, A. M.	Semi-Automatic Telephone Exchange System.
1553454	do	Martin, DeL. K.	Radio Repeating System.
1553465	do	Osborne, H. S.	Testing Apparatus.
1553489	do	Toomey, J. F., and Phelps, H. E.	Telephone System.
1553625	do	Mills, J.	Duplex Radio System.
1553983	do	Casper, W. L.	Electrical Coil.
1554007	do	Johnson, K. S.	Anti-Side-Tone Circuits.
1554188	Sept. 22, 1925	Affel, H. A.	High Frequency Multiplex Signaling System.
1554189	do	do	Equalization of Carrier Transmission.
1554190	do	do	Detecting Circuits.
1554286	do	Espenschied, L.	Do.
1554290	do	Parker, R. D., and Hamilton, B. P.	Carrier Telegraph System.
1554340	do	Gent, E. W.	Time Measuring D vice.
1554561	do	De Forest, L.	Sound Reproducing Mechanism.
1554794	do	do	Loud Speaking Device.
1554795	do	do	Radio Signaling System.
1555001	Sept. 29, 1925	Gray, E. A.	Telephone Signaling System.
1555002	do	do	Telephone Exchange System.
1555037	do	Stone, J. S.	Resistance Amplifier.
1555041	do	Vernam, G. S., Perry, D. B., and Cory, S. I.	Distortion Measuring System.
1555042	do	Vernam, G. S.	Transmitting Handwriting and Pictures.
1555870	Oct. 6, 1925	Nyquist, H.	Telegraph Repeater.
1555875	do	Pierce, R. E.	Telegraph Measuring System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1555893	Oct. 6, 1925 do	Thompson, E. O	Alternating Current Relay.
1555916	do	Espenschied, L	Frequency Translating System.
1555917	do	Fell, J. M	Telegraphy.
1556311	do	Davidson, J., Jr	Signaling System.
1556318	do	Espenschied, L., and Affel, H. A.	High Frequency Multiplex Signaling System.
1556319	do	Espenschied, L	Do.
1556320	do	do	Do.
1556321	do	do	Do.
1557036	Oct. 13, 1925	Elsasser, H. W	Terminal Network for High Pass Wave Filter.
1557037	do	Espenschied, L	Reduction of Crosstalk.
1557079	do	Morehouse, L. F	Telephone Signaling Equipment.
1557229	do	Zobel, O. J	Terminating Network for Filters.
155 230	do	do	Complementary Filter.
1557386	do	Thuras, A. L	Electromagnetic Device.
1557420	do	Clokey, A. A	Signaling System.
1557544	Oct. 20, 1925	Affel, H. A	Carrier Frequency Arrangement.
1557562	do	Crisson, G	Frequency S lective Device.
1557596	do	Lamb, W. E., and Mason, R. W.	Machine Switching Telephone Exchange System.
1557609	do	Perry, D. B	Printing Telegraph Exchange System.
1557633	do	Vernam, G. S	Translating Device.
1557860	do	Mathes, R. C	Electric Circuits.
1558231	do	Bruce, W. M., Jr	Multiplex Telegraphy.
1558280	do	Potts, L. M	Secret System of Telegraphy.
1558521	Oct. 27, 1925	Von Nostitz, E	Telephone Exchange System.
1558534	do	Davidson, J., Jr	Telephone Circuits.
1558541	do	Herman, J	Monitoring Set for Telegraph Repeaters.
1558564	do	Nyquist, H	Electrical Testing System.
1558822	do	Baker, C. I	Selector Switch.
1558826	do	Beebe, M. C	Electrical Testing System.
1558830	do	Brough, W. R	Electron Discharge Device.
1558834	do	Carpenter, W. W	Telephone System.
1558855	do	Field, J. C	Apparatus Rack.
1558862	do	Gibson, E. S	Controlling Mechanism.
1558872	do	Helwig, E. C	Telephone System.
1558880	do	Hocker, C. D	Solvent and Vehicle for Resinous and Gelatinized Material.
1558883	do	Housekeeper, W. G	Vacuum Tube.
1558909	do	Nichols, H. W	Selective Circuits.
1558944	do	Taylor, H. B	Telephone Switch.
1558952	do	Van Inwagen, C. L	Carrier System.
1559116	do	Marrison, W. A	Wave Generating and Modulating System.
1559159	do	Carson, J. R	Telegraph Signaling System.
1559244	do	Gibson, E. S	Telephone Exchange System.
1559246	do	Gilson, A. F. F	Signaling Apparatus.
1559250	do	Hampton, L. N	Electrical Plug Switch.
1559251	do	Harper, R. W	Private Branch Exchange Sender Circuit.
1559260	do	Kochendorfer, F. S	Mounting for Sheet-Like Articles.
1559269	do	Matthies, W. H., and Albert, W. P.	Telephone Exchange System.
1559271	do	Mills, P. E	Rheostat.
1559280	do	Ronci, V. L	Electron Discharge Device.
1559295	do	Stoller, H. M	Frequency Converter.
1559297	do	Albert, W. P	Telephone System.
1559305	do	Beck, W. O	Relay.
1559325	do	Jewett, F. B	Means for Analyzing or Synthesizing Electric Waves.
1559372	do	Powell, W. T	Telephone Exchange System.
1559381	do	Swoboda, A. R	Vacuum Bulb Device.
1559396	do	Young, C. R	Loading Coil Case and the Like.
1559638	Nov. 3, 1925	Martin, W. H	Wave Filter.
1559641	do	Nyquist, H	Signaling with Phase Reversals.
1559642	do	do	Do.
1559656	do	Thorp, I. J	Method of and Means for Increasing Voltages.
1559659	do	Walters, J. N	Service Observing Equipment for Automatic Telephone Systems.
1559679	do	Craft, E. B	Signaling Apparatus.
1559753	do	Horton, J. W	Signaling System.
1559776	do	Read, H. S	Thermionic Repeater or Oscillator Circuits
1559802	do	Stevenson, G. H	Electrical Switching Circuits.
1559850	do	Casper, W. L	Transmission System.
1559858	do	Field, F. E	Inductance Device.
1559864	do	Fry, T. C	Filtering Circuit.
1559865	do	Gowing, M. R	Selective Signaling Circuits.
1559867	do	Griggs, E. V	Wave Transmission System.
1559869	do	Hartley, R. V. L	Selective Current Production and Amplification.
1559870	do	Heising, R. A	Generating and Modulating System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1560054	Nov. 3, 1925	Heising, R. A.	Modulated Wave Transmission.
1560056	do	Horton, J. W.	Source of Waves of Constant Frequency.
1560502	do	De Forest, L.	Sound Reproducing Device.
1560531	Nov. 10, 1925	Blauvelt, W. G.	Automatic Switch.
1560540	do	Cory, S. I.	Means for Preventing Electrical Interference.
1560543	do	Crisson, G.	Testing Circuits for Echo Suppressors.
1560544	do	do	Do.
1560610	do	Shoffstall, H. F.	Supervisory Circuits.
1560690	do	Houskeeper, W. G.	Electron Discharge Device.
1560691	do	do	Do.
1560692	do	do	Do.
1560704	do	Locke, G. A.	Printing Telegraphy.
1560724	do	Potts, L. M.	Regulating System.
1560727	do	Pruden, H. M.	Testing System.
1560728	do	Radu, J. W.	Vacuum Tube Socket.
1560737	do	Schwerin, P.	Electron Discharge Device.
1560740	do	Stelling, J. L.	Do.
1560760	do	Chaplin, M. P.	Engine Control Means.
1560768	do	Curtis, A. S.	Telephone Set.
1530774	do	Garvin, J. S.	Relay.
1530778	do	Goddard, F. M.	Anti-Induction Device.
1560803	do	Miller, D. D.	Relay.
1561204	do	Beers, R. F.	Transformer.
1561225	do	Fry, J. R.	Method and Means for Measuring Time.
1561227	do	Griggs, E. V.	Carrier Current Signaling System.
1561247	do	Kingsbury, E. F.	Metallic Composition.
1561273	do	Nichols, H. W.	Radio System.
1561289	do	Vennes, H. J.	Signaling by High Frequency Waves.
1561292	do	Aldendorff, F.	Automatic Telephone System.
1561468	Nov. 17, 1925	Jordan, J. D.	Coiling or Winding Apparatus.
1561486	do	Whitlock, L. E.	Tool for Cleaning Electric Contact Surfaces.
1561524	do	Sandalls, G., Jr.	Telephone Testing System.
1561526	do	Vernam, G. S.	Printing Telegraphy.
1561530	do	Conover, E. J.	Telegraph Repeater Circuit.
1561531	do	Cory, S. I.	Telegraph Circuit.
1561532	do	do	Telegraph System.
1561782	do	Given, F. J.	Inductance Coil.
1561892	do	Whiting, D. F.	Regulating Repeater Systems.
1561912	do	Clark, E. H.	Registering System.
1561921	do	Gooderham, J. N.	Do.
1561933	do	Kendall, B. W.	Source of Alternating Current.
1561936	do	Kiesel, W. C.	Telephone Exchange System.
1561951	do	Stacy, L. J.	Testing Device.
1562164	do	Harris, J. E.	Process of Coating Electrodes.
1562165	do	Harrison, H. C.	Acoustic Device.
1562171	do	Hoornbeek, H. G.	Strand Working Machine.
1562172	do	Houskeeper, W. G.	Electron Discharge Device.
1562187	do	Radu, J. W.	Vacuum Tube Socket.
1562188	do	Rainey, P. M.	Selecting System.
1562189	do	do	Printing Telegraph System.
1562200	do	Beck, W. O.	Electromagnetic Device.
1562202	do	Boving, H.	Method of Forming Metallic Compositions.
1562209	do	Egert, B. J., and De Coster, C. J.	Vacuum Tube Evacuating Oven.
1562210	do	Field, J. C.	Signaling System.
1562211	do	do	Supervisory System.
1562228	do	Grange, J. D.	Stencil Sheet.
1562396	do	Ward, F. E.	Electron Discharge Device.
1562403	do	Wilson, J. R.	Do.
1562436	Nov. 24, 1925	Chaplin, M. P.	Translating Device.
1562485	do	Affel, H. A.	Movement and Position Indicator.
1562500	do	Espenschied, L.	Receiving Circuits for Low Frequency Impulses.
1562526	do	Toomey, J. F., and Phelps, H. E.	Telephone Exchange Circuit.
1562527	do	do	Do.
1562528	do	do	Telephone System.
1562578	do	Nicolson, A. M.	Piezo-Electric Device and Method of Producing the Same.
1562844	do	O'Neill, H. W.	Transmission Circuits.
1562943	do	Cummings, G. C.	Telegraph System.
1562947	do	Eaves, A. J.	Electromagnetic Device.
1562955	do	Granich, A. M.	Power Line Signaling.
1562961	do	Heising, R. A.	Directive Radio Transmission System.
1562964	do	Horton, J. W.	Multiplex Carrier Wave Transmission.
1562989	do	Quarles, D. A.	Signaling Circuits.
1563007	do	Bell, J. H.	Selecting System.
1563326	Dec. 1, 1925	Bown, R.	Secret Communication System.
1563370	do	Jacobsen, E.	Testing Set for Telephone Systems.
1563377	do	Klein, C. H.	Pulling and Transposing Mechanism for Line Wires.

Patent no.	Date of issue	Inventor	Title
1563432	Dec. 1, 1925	Nyquist, H	Composite Ringer for Transmission Systems.
1563488	do	Hoge, J. F. D	Circuit Interrupter.
1563517	do	Murphy, P. B	Signaling System.
1563555	do	Clark, E. H	Electrical Switching Mechanism.
1563556	do	do	Telephone System.
1563599	do	Walters, J. N	Telephone Exchange System.
1563618	do	Gibson, E. S	Do.
1563620	do	Gorton, W. S	Oscillation Generator.
1563630	do	Hinrichsen, E. E	Telephone System.
1563631	do	do	Do.
1563643	do	Newsom, J. B	Do.
1563644	do	Nichols, H. W	Wave Receiving System.
1563658	do	Richard, C. D	Line Switch.
1563727	do	Curtis, A. M	Isochronizing and Synchronizing System.
1563738	do	From, O. C	Registering Device.
1563740	do	Goff, H. W	Automatic Telephone Switch.
1564201	Dec. 8, 1925	Carson, J. R., Clark, A. B., and Mills, J.	Loading System.
1564203	do	Clark, A. B., and Crisson, G	Receiver Shunt.
1564209	do	Crandall, I. B	Electrical Circuits for Production of Musical Tones.
1564224	do	Espenschied, L	Modulating Apparatus for Telegraph Signals
1564228	do	Fletcher, H	Testing Circuits.
1564231	do	Goff, H. W	Telephone Switch.
1564259	do	McCurdy, R. G	Electrical Testing System.
1564266	do	Nyquist, H	Electrical Teansformer.
1564274	do	Rand, C. C	Method of and Means for Casting Articles.
1564303	do	Wold, P. I	System for Location of a Source of Wave Energy.
1564357	do	Kendall, B. W	Monitoring System.
1564391	do	Wilbur, R. S	Telephone Repeater Monitoring System.
1565044	do	Barber, C. C	Oil Pump.
1565088	do	Gargan, J. O	Condenser.
1565089	do	Gauthier, E	Reciprocating Mechanism.
1565091	do	Griggs, E. V	Wave Transmission System.
1565092	do	Harrison, H. C	Attachment for Oscillation Generators.
1565115	do	Speed, J. B., and Falk, A. H	Solder.
1565131	do	Wilbur, R. S	Signaling System.
1565135	do	Wright, J. C	Measuring and Recording Device.
1565150	do	Horton, J. W	Oscillation Generator.
1565151	do	Houskeeper, W. G	Electric Discharge Device.
1565152	do	do	Vacuum Insulator and Its Assembly.
1565155	do	Jammer, J. S	Carrier Signaling System.
1565157	do	Johnson, J. B	Circuit Arrangement for Discharge Devices.
1565177	do	MacKenzie, D	Method and Apparatus for Comparing Sound.
1565200	do	Reeve, H. T	Method of Making Cores for Cathodes of Vacuum Tubes.
1565302	Dec. 15, 1925	Arnold, H. D	Two-Way Repeater Circuits.
1565325	do	Herman, J	Means for Regulating Motors.
1565343	do	Vernam, G. S., and Perry, D. B.	Printing Telegraph Exchange System.
1565358	do	Gardiner, L. A	Alloy for Electrical Contacts.
1565441	do	Hamilton, H. S	Automatic Volume Regulation of Transmission Systems.
1565491	do	Nyquist, H	Volume Control of Transmission.
1565505	do	Ryan, F. M	Radio Transmitter.
1565521	do	Stone, J. S., and Rose, C. C	Secret Communication System.
1565522	do	Stone, J. S	Carrier Current Multiplex Signaling System.
1565540	do	Wright, S. B	Automatic Volume Regulation.
1565544	do	Bown, R	Radio Transmission System.
1565548	do	Clark, A. B	Arrangement for Controlling Volume Range.
1565555	do	Fetter, C. H	Arrangement for Automatically Controlling Volume Output.
1565562	do	Griffith, T. R	Electron Discharge Device.
1565566	do	Hartley, R. V. L	Translating Device.
Re18274	Dec. 8, 1931	do	Do.
1565569	Dec. 15, 1925	Houskeeper, W. G	Electron Discharge Device.
1565570	do	do	Do.
1565577	do	McDonough, J	Testing Device.
1565578	do	do	Testing Fixtur ..
1565581	do	Moore, C. R	Telephone Transmitter.
1565596	do	Snook, H. C	Signal System.
1565600	do	Stoekle, E. R	Electron Discharge Device.
1565603	do	Trumble, R. F	Do.
1565613	do	Anderegg, G. A	Electrical Measuring Apparatus.
1565625	do	Clausen, H. P	Signaling System.
1565628	do	Edwards, G. D., and Capen, W. H.	Telephone Intercommunicating System for Aeroplanes.
1565637	do	Goff, H. W	Telephone Switch.
1565652	do	Kochendorfer, F. S., and Robinson, M. E.	Taping Machine.

Patent no.	Date of issue	Inventor	Title
1565847	Dec. 15, 1925	Coram, R. E	Circuits for the Production of Pure Modulated Carrier Waves.
1565855	do	Johnson, J. B	Vacuum Tube.
1565857	do	Kelly, M. J	Vacuum Tube Manufacture.
1565862	do	Massingham, H. R	Strand Twisting Mechanism.
1565868	do	Stoll, C. G	Strand Cord Working Machine.
1565869	do	Straw, W. A	Etching.
1565873	do	Van der Bijl, H J	Vacuum Tube and Method of Operating the Same.
1565904	do	Burkholder, J. C	Signalling System.
1565925	do	Green, C. W	Transmission Regulation.
1565012	do	Horton, J. W	Carrier Wave Signaling System.
1566034	do	Mills, J	Thermionic Meter.
1566279	Dec. 22, 1925	King, R. W	Gas Pressure Control.
1566293	do	Van der Bijl, H. J	Thermionic Device.
1566295	do	Watson, E. F	Printing Telegraph System.
1566311	do	Clark, A. B., and Hoyt, R. S	Telephone Repeater Circuit.
1566337	do	Martin, W. H	Sound Radiator.
1566342	do	Nyquist, H	Means for Increasing Power Capacity of 22-Type Repeaters.
1566345	do	Peterson, G. H	Trunk Circuits.
1566489	do	Farrington, J. F	Two-Way Communication System.
1566777	do	Shackelton, W. J	Inductance Device.
1566792	do	Field, F. E	Do.
1566802	do	Milton, I. L	Loading Coil and Method of Construction.
1567029	Dec. 29, 1925	Borgman, C	Telephone Switchboard.
1567040	do	Clark, E. H	Telephone Exchange System.
1567041	do	Covell, R. O	Do.
1567042	do	Deakin, G., and Polinkowsky, L.	Do.
1567053	do	Hibbard, F. H	Stepping Mechanism.
1567054	do	Hinrichsen, E. E	Automatic Telephone System.
1567060	do	Keller, L., and Williams, S. B., Jr.	Telephone Exchange System.
1567069	do	Lundell, A. E	Allotter Controlling System.
1567072	do	Matthies, W. H	Telephone Exchange System.
1567087	do	Smith, P. C	Do.
1567094	do	Williams, S. B., Jr	Do.
1567122	do	Dunham, B. G	Automatic Telephone Exchange System.
1567128	do	Fetter, C. H	Wire Program Transmission System.
1567167	do	Nyquist, H	Four-Wire Repeater Circuits.
1567204	do	Stone, J. S	Radio Transmitting System.
1567208	do	Toomey, J. F., and Phelps, H. E.	Program Transmission Over Wires.
1567209	do	Toomey, J. E	Subscriber's Equipment for Program Transmission.
1567223	do	Albert, W. P	Controlling System.
1567231	do	Bowne, L. J	Telephone Exchange System.
1567236	do	Butz, E. D	Telephone System.
1567240	do	Carpenter, W. W	Restricted Service Automatic Telephone System.
1567242	do	Clark, E. H	Telephone Exchange System.
1567249	do	Devaux, L	Do.
1567250	do	Dunham, B. G	Automatic Telephone Exchange System.
1567253	do	Forsberg, O. F	Switching Device.
1567254	do	do	Means for Adjusting Coordinate Switch Parts.
1567256	do	Fowler, C. B	Telephone System.
1567257	do	do	Do.
1567261	do	Gibson, E. S	Telephone Exchange System.
1567265	do	Hinrichsen, E. E	Do.
1567266	do	do	Message Register System.
1567271	do	Johnson, L. H	Telephone Exchange System.
1567280	do	Lundell, A. E	Do.
1567282	do	MacDougall, H. W	Telephone System.
1567283	do	Matthies, H. W	Telephone Exchange System.
1567295	do	Polinkowsky, L	Do.
1567297	do	Reeves, F. N., and Clark, E. H.	Selective Switch.
1567305	do	Smythe, E. H	Telephone System.
1567309	do	Waller, L. R	Automatic Telephone System.
1567316	do	Buckley, O. E	Means for Reducing Interference.
1567734	do	Heising, R. A	Radio Transmission System.
1568038	do	Williams, S. B., Jr., and Gibson, E. S.	Automatic Telephone System.
1568039	do	Williams, S. B., Jr., and Hinrichsen, E. E.	Telephone Exchange Systems.
1568141	Jan. 5, 1926	Elsasser, H. W	Frequency Selective Circuit.
1568142	do	do	Do.
1568143	do	do	Do.
1568144	do	do	Do.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1568145	Jan. 5, 1926	Elsasser, H. W.	Frequency Filter for Electric Currents.
1568194	do	Smythe, E. H.	Carrier Wave Transmission and Communicating System.
1568306	do	Williams, S. B., Jr., and Gibson, E. S.	Telephone Exchange System.
1568861	do	Affel, H. A.	Repeater Circuit.
1568891	do	Espenschied, L.	Repeater Circuits.
1568963	Jan. 12, 1926	Coram, R. E.	Translating Apparatus.
1568979	do	Knudsen, V. O.	Oscillation Generator.
1568991	do	Morehouse, L. F.	Ciphering and Deciphering Device.
1568996	do	Best, F. H.	Electrical Measuring Apparatus.
1569001	do	Clark, A. B., and Crisson, G.	Do.
1569003	do	Curtis, A. M.	Signaling System.
1569006	do	Deakin, G.	Telephone System.
1569034	do	Rhodes, W. A.	Machine Switching Telephone Exchange System.
1569055	do	Weaver, A.	Telegraph Circuit.
1569615	do	Clarke, H. R.	Telephone Apparatus.
1569616	do	Conway, R. D.	Electric Signaling System.
1569623	do	Dunham, B. G.	Pay Station Telephone System.
1569630	do	Griffith, T. R.	Electron Discharge Device.
1569639	do	Stevenson, G. H.	Vacuum Tube Socket.
1569654	do	Helwig, E. C.	Telephone Exchange System.
1569844	do	Schwerin, P.	Electron Discharge Device.
1569874	Jan. 19, 1926	Newby, N. D.	Indicating Means for Calling Dials.
1569898	do	Toomey, J. F.	Signaling System.
1569899	do	Vernam, G. S., and Watson, E. F.	Telegraph Repeater.
1569905	do	Affel, H. A., and Ilgenfritz, L. M.	Neutralizing Radio Interference on Wire Lines.
1569936	do	Land, E.	Machine Switching System.
1570120	do	Bennett, A. F.	Telephone Device.
1570129	do	Clarke, H. R.	Support for Head Telephone Receivers.
1570215	do	Fry, T. C.	Electrical Network.
1570460	do	Clokey, A. A.	Telegraph System.
1570490	do	Horton, J. W.	Sound Reproducing Method and Apparatus.
1570633	Jan. 26, 1926	Krum, H. L.	Printing Telegraph Receiver.
1570741	do	Harden, W. H., and Graefenecker, M. A.	Testing System for Machine Switching Circuits.
1570755	do	Loynes, O. H.	Radio Ringing System.
1570770	do	Nyquist, H.	Means for and Method of Reducing Interference.
1570771	do	do	Do.
1570772	do	do	Reduction of Distortion in Multiplex Repeaters.
1570901	do	Loewe, S.	Amplifying System.
1570923	do	Potts, L. M.	Printing Telegraphy.
1570948	do	Crouch, J. L.	Test Fixture.
1570950	do	Gargan, J. O.	Tube Mounting.
1571005	do	Hartley, R. V. L.	Secret Signaling.
1571006	do	do	Signaling System.
1571010	do	Kendall, B. W.	Secret Signaling.
1571011	do	do	Do.
Des. 69313	do	Englund, C. P. and Haddock, A.	Loop Antenna.
Des. 69314	do	do	Do.
1571357	Feb. 2, 1926	Whiting, D. F., and Taylor, H. D.	Communication System.
1571513	do	Edwards, W. H.	Telephone Substation Circuit.
1571948	Feb. 9, 1926	Houskeeper, W. G.	Electron Discharge Device.
1571991	do	Bailey, R. S.	Telephone Ringing System.
1572010	do	Herman, J.	Detector Circuit.
1572083	do	Read, H. S.	Amplifier Circuit.
1572380	do	Clark, E. H.	Telephone Switch.
1572387	do	Harrison, H. C.	Sound Box.
1572530	do	Hendry, W. F.	Vacuum Tube.
1572587	do	Williams, S. B., Jr.	Telephone System.
1572673	do	Newman, P. A.	Interrupter.
1572679	do	Powell, A. C.	Telephone Exchange System.
1572721	do	Houskeeper, W. G.	Vacuum Tube.
1572726	do	Kelly, M. J.	Electron Discharge Device.
1572756	do	Smythe, E. H., and Williams, S. B., Jr.	High Frequency Wave Signaling and Communicating System.
1572757	do	Affel, H. A.	Multiplex Signaling System.
1572782	do	Fay, F. H.	Telegraph Circuits.
1572785	do	do	Do.
1572869	Feb. 16, 1926	Adams, A. H.	Electromagnet.
1572977	do	Von Nostitz, E.	Telephone System.
1572992	do	Crisson, G., and Glezen, L. L.	Adjustable Electrical Network.
1573068	do	Honaman, R. K.	Voltage Limiting Device.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1573282	Feb. 16, 1926	Stone, J. S.	Thermionic Modulator.
1573303	do	Colpitts, E. H.	Carrier Wave Transmission.
1573309	do	Dowey, T. L.	Recording and Reproducing Machine.
1573315	do	Griffin, J. T.	Method of Cementing Two Parts Together.
1573317	do	Houskeeper, W. G.	Manufacture of Vacuum Tubes.
1573323	do	Nichols, H. W.	Highly Selective Circuit.
1573333	do	Stoller, H. M.	Dynamo-Electric Machine.
1573337	do	Vennes, H. J.	Electrical Bridge.
1573367	do	Arnold, H. D., and Minton, J. P.	Alternating Current of Variable Frequency.
1573395	do	Johnson, E. D., and Green, C. W.	Signaling Circuits.
1573396	do	Green, C. W.	Signaling System.
1573412	do	MacDougall, H. W., and Bertels, A. S.	Automatic Testing System to Test Automatic Switches.
1573413	do	MacDougall, H. W.	Do.
1573529	do	Terry, D. M.	Picture Transmission System.
1573794	Feb. 23, 1926	Bailey, R. S.	Telephone Exchange System.
1573801	do	Bown, R.	Trouble Alarm System for Radio Receiving Sets.
1573865	do	Robbins, C. W.	Method of and Apparatus for Testing the Elastic Properties of Metals.
1573891	do	Wright, S. B., and Schott, J. T.	Gain Controlling Circuits.
1573907	do	Blauvelt, W. G.	Telephone Exchange System.
1573913	do	Casper, W. L.	Transmission Circuit.
1573924	do	Fletcher, H.	Secret Signaling.
1573936	do	Hartley, R. V. L.	System of Carrier Wave Signaling.
1573948	do	Terry, D. M.	Means for Producing Oscillations.
1573954	do	Vennes, H. J.	Current Wave Transmission.
1573959	do	Williams, S. B., Jr.	Carrier Wave Communicating System.
1573983	do	Mathes, R. C.	Secret Signaling.
1573984	do	Maxfield, J. P.	Radio Broadcasting Equipment.
1573991	do	Murphy, P. B.	Signaling System.
1574205	do	Polinkowsky, L.	Telephone System.
1574302	do	Nicolson, A. M.	Piezo-Electric Loud Speaker.
1574350	do	Johnson, J. B.	Electrical Testing.
1574484	do	Horton, J. W.	Multiplex Signaling System.
1574779	Mar. 2, 1926	Affel, H. A.	Translating Circuits.
1574780	do	do	Means for and Method of Modulation.
1574781	do	Barton, H. A.	Voice Operated Repeater System.
1574807	do	Gannett, D. K.	Means for Regulating Voltage.
1574808	do	do	Regulation of Transmission.
1574873	do	Deakin, G.	Telephone Exchange System.
1574954	do	Wright, J. L.	Do.
1575128	do	Reeves, F. N.	Testing System for Testing Senders of Automatic Exchanges.
1575140	do	Williams, S. B.	Telephone Exchange System.
1575271	do	O'Neill, H. W.	Telephone System.
1575272	do	do	Do.
1575299	do	Weaver, W. C.	Telephone Exchange System.
1575312	do	Bertels, A. S., and Trapp, E. F.	Automatic Testing System for Automatic Telephone Switches.
1575326	do	From, O. C.	Registering Mechanism.
1575334	do	Harper, R. W.	Telephone System.
1575336	do	Henry, I. H.	Telephone Exchange System.
1575353	do	Magrath, A. C.	Card Holder for Calling Dials.
1575628	Mar. 9, 1926	Herman, J.	Telegraph Signaling System.
1575650	do	Shanck, R. B.	Telegraph Key.
1575658	do	Strieby, M. E.	Volume Control for Program Distribution Systems.
1575659	do	do	Filter Arrangement for Wire Program Distribution Circuits.
1575672	do	Blackwell, O. B.	Wire Carrier Program Distribution System.
1575951	do	Thuras, A. L.	Acoustical Instrument.
1576561	Mar. 16, 1926	Toomey, J. F.	Arrangement for Exercising Remote Control over Repeaters.
1576566	do	Affel, H. A.	Duplex Balancing Arrangement.
1576579	do	Cory, S. I.	Ground Potential Neutralizing System.
1576657	do	Jacobsen, E.	Telephone Exchange System.
1576658	do	do	Do.
1576747	do	Hoffman, H. L.	Telephone System.
1577033	do	Kerr, M. B.	Automatic Telephone Exchange.
1577046	do	Miller, O. R.	Testing System.
1577051	do	Albert, W. P.	Telephone System.
1577059	do	Clark, E. H.	Telephone Exchange System.
1577076	do	Powell, A. C.	Do.
1577083	do	Sperry, A. B.	Do.
1577333	do	Lundius, E. R.	Testing System.
1577513	Mar. 23, 1926	Blauvelt, W. G.	Telephone Exchange System.
1577514	do	Bonell, R. K.	Selector Circuits.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1577515	Mar. 23, 1926	Bonell, R. K	Selective Signaling Circuits for Carrier Systems.
1577719	do	Holden, W. H. T	Electrical Protective Device.
1577720	do	do	Acoustic Shock Absorber for Telephone Lines.
1577722	do	Horton, J. W	Generation and Control of Electric Waves.
1577778	do	White, C	Carrier Signaling System.
1577846	do	Nicolson, A. M	Electric Space Discharge Device and Method of Operating the Same.
1578269	Mar. 30, 1926	Demarest, C. S	Signaling Arrangement for Four-Wire Circuit.
1578299	do	Vernam, G. S	Printing Telegraph System.
1578307	do	Zinn, M. K	Inductance Coil.
1578488	do	Walker, H. G	Apparatus for Handling Strands.
1578634	do	Porgmann, C	Clamping and Supporting Device.
1578642	do	Clarke, H. R	Head Band for Telephone Receivers.
1578645	do	Craft, E. B	Sound Reproduction.
1578646	do	do	Telephone Device for Aiding the Deaf.
1578651	do	Fetzer, K. M	Telephone Exchange System.
1578559	do	Harrison, H. C	Electromagnetic Device.
1578662	do	Hunter, F. L	Electric Oven.
1578667	do	Kelsay, L. W	Binding Post.
1578671	do	Martin, F. J	Testing Device.
1578672	do	Martin, H. T	Designation Device.
1578677	do	Nicolson, A. M	Method of Growing Crystals.
1578679	do	Peterson, E	Modulating System.
1578685	do	Richard, C. D	Electrical Switching Device.
1573707	do	Beck, W. O	Electromagnetic Device.
1578845	do	Nelson, E. L	Modulation Indicating System.
1578846	do	Nichols, H. W	Carrier Wave Transmission.
1578857	do	Siegmund, H. O., and Brown, C. E.	Electrode for Electrolytic Cells.
1579199	Apr. 6, 1926	Adams, W. J	Current Control Device.
1579203	do	Boe, H. J	Safety Device for Clutch Mechanisms.
1579209	do	Clausen, H. P	Variable Condenser.
1579211	do	Cummings, G. C	Telegraph System.
1579216	do	Knoop, W. A	Voltage Limiting Device.
1579217	do	Kochendorfer, F. S., and Selvig, J. N.	Strand or Cord Working Mechanism.
1579229	do	Mathes, R. C	Electric Current Transmission.
1579236	do	O'Neill, H. W	Telephone Exchange System.
1579237	do	do	Switching Device.
1579253	do	Singer, E	Reception of Signals.
1579256	do	Smythe, E. H	Carrier Wave Communicating and Switching System.
1579263	do	Watson, E. F	Electrical Transmission of Pictures.
1579274	do	Yale, W. S	Apparatus for and Method of Whipping Strand About a Core.
1579283	do	Crisson, G	Multiple Way Connection for a Plurality of Lines.
1579286	do	Dupy, O. L	Dynamo-Electric Machine.
1579291	do	Emery, C. B	Gauging Means for Measuring and Adjusting Apparatus.
1579299	do	Gabriel, J. C	Two-Way Communication System.
1579301	do	Garvin, J. S	Relay.
1579304	do	Goddard, F. M	Switching Device.
1579307	do	Gordon, C. S	Tool Handle.
1579313	do	Haase, C. O	Strand Whipping Mechanism.
1579320	do	Hysko, J. L	Frequency Indicating System.
1579626	do	Banta, H. W	Sealing Leading-in Conductors.
1579695	do	Ford, B. K	Method of Whipping Cores with Strand Material.
1579696	do	do	Apparatus for and Method of Whipping Cores With Strand Material.
1579708	do	Jammer, J. S., and Anderson, C. T.	Indicating Electrical Effects.
1579709	do	Janicki, J	Method of and Apparatus for Serving Material Upon a Core.
1579731	do	O'Neill, H. W	Telephone System.
1579769	do	Jones, H. F	Material Handling Apparatus.
1579887	do	Pratt, E. J	Relay.
1579894	do	Snook, H. C	Oscillation Generator.
1579895	do	do	Do.
1579930	do	Haddock, A	Radio Transmitter.
1579931	do	Hartley, R. V. L., and Mathes, R. C.	Transmission Circuits.
1579935	do	Heising, R. A	Resonance Indicator.
1580191	Apr. 13, 1926	Fell, J. M	Means for Reducing Cross Fire in Telegraph Circuits.
1580192	do	do	Duplex Telegraph System.
1580225	do	Watson, E. F	Telegraph Circuit.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1580427	Apr. 13, 1926	Farrington, J. F.	Circuit for Audions.
1580624	do	Nyquist, H., Bouton, L. L., and Shoffstall, H. F.	Gain Control Circuits for Repeaters.
1580630	do	Albert, W. P.	Telephone Exchange System.
1580848	do	Newman, P. A.	Electric Motor and Control System Therefor.
1580850	do	Otis, R. M., and Funk, W. F.	Electron Discharge Device.
1580879	do	Evans, W. A.	Electrical Connector.
1580882	do	Gent, E. W.	Interrupter.
1580884	do	Goff, H. W.	Swaging Tool.
1580896	do	Ives, H. E.	Picture Analysis.
1580897	do	do	Photo-Engraving.
1580899	do	Johnson, J. B.	Apparatus for Modifying the Wave Form of Alternating Current.
1580901	do	Jones, W. C.	Switching Device.
1580923	do	Selvig, J. N.	Clutch Controlling Mechanism.
1580929	do	Stokely, R. L.	Machine Switching Telephone Exchange System.
1580940	do	Albert, W. P.	Testing Device for Telephone Exchange Systems.
1580943	do	Baker, C. I.	Calling Dial.
1580951	do	Bowne, J. L., and Ulrich, H. W.	Telephone System.
1581160	Apr. 20, 1926	Berteis, A. S.	Battery Control System.
1581296	do	Schmied, J. W.	Modulating Carrier Waves.
1581305	do	Watson, E. F., and Hunt, A. E.	Electrical Controlling System.
1581314	do	Herbert, C. M.	Device for Coiling Cables.
1581326	do	Shanck, R. B.	Means for Preventing Bias in Telegraph Systems.
1581334	do	Crandall, I. B.	Vibration Detecting Device.
1581509	do	Bungerz, K.	Telephone Receiver.
1581520	do	Schwerin, P.	Vacuum Tube.
1581576	do	Horton, J. W.	Carrier Wave Signaling System.
1582023	Apr. 27, 1926	Adams, A. H.	Strand Working Mechanism.
1582026	do	Duclos, A. J. N.	Method of and Apparatus for Producing Plastic Articles.
1582043	do	Hilberry, N.	Method of and Apparatus for Electric Welding.
1582044	do	Horton, J. W.	Wave Modulation System.
1582045	do	Don Howe, A. H.	Vehicle.
1582057	do	Larsen, E. W.	Mechanism for Supporting and Moving Circular Objects.
1582073	do	O'Leary, J. T.	Phantom Carrier Circuits.
1582107	do	Whiteside, V.	Conveyor.
1582112	do	Affel, H. A.	Phantom Carrier Circuits.
1582113	do	do	Do.
1582270	do	Snook, H. C., and Johnson, J. B.	Method of and Means for Generating Electric Oscillations.
1582948	May 4, 1926	Walters, J. N., and Ewing, C.	Testing System.
1582984	do	Hamilton, H. S.	Automatic Regulation of Echo Suppressor Sensitivity.
1583004	do	Osborne, H. S.	Signal Detecting System.
1583067	do	Moore, C. R.	Vibration Responsive Device.
1583365	do	Pfannenstiehl, H.	Printing Telegraphy.
1583416	do	Moore, C. R.	Vibration Responsive Apparatus.
1583417	do	Nicolson, A. M.	Piezo-Electric Device and Method of Producing it.
1583463	do	Houskeeper, W. G.	Electron Discharge Device.
1583464	do	do	Method of Forming Glassware.
1583809	May 11, 1926	Stoller, H. M.	Dynamo-Electric Machine.
1583814	do	Till, H. R.	Pressure Controlling Device.
1583815	do	Trebes, B. M. A.	Apparatus for Applying Insulating Coverings on Electrical Conductors.
1583826	do	Deardorff, R. W.	Method and Apparatus for Balancing Out Radio Interference on Wire Lines.
1583827	do	Green, E. I.	Loading Transmission Lines.
1583844	do	Kochendorfer, F. S., and Boe, H. J.	Mechanism for Treating Cables and Strands.
1583854	do	Perry, D. B.	Volume Control Apparatus.
1584327	do	Schelleng, J. C.	Electric Wave Transmission System.
1584748	May 18, 1926	Toomey, J. F.	Circuit Controller.
1584749	do	Vernam, G. S., and Perry, D. B.	Ciphering Device.
1584819	do	Smith, T. C., Freeman, A. E., and Simonds, G. D.	Winch.
1585010	do	Bellamy, H. T.	Casting Slip.
1585018	do	Casper, W. L., and Whittle, H.	Transformer Circuits.
1585024	do	Goodrum, C. L.	Controlling Mechanism for Progressively Movable Electric Switches and Other Devices.

Patent no.	Date of issue	Inventor	Title
1585701	May 25, 1926	Clark, A. B	Method and Means for Telephone Transmission Measurements.
1585702	do	do	Echo Suppressor for Two-Wire Systems.
1585729	do	Matte, A. L	Emergency Switching Mechanism.
1585770	do	Conway, R. D	Method and Means for Selecting Balancing Networks.
1585842	do	Fearing, J. L	Electric Current Transmission.
1585866	do	Kendall, B. W	Repeater Circuits.
1586162	do	Palmer, J. C. R	Electron Discharge Device.
1586518	June 1, 1926	Clark, E. H	Telephone System.
1586520	do	Davis, R. C	Do.
1586524	do	Heising, R. A	Constant Frequency System.
1586527	do	Hinrichsen, E. E	Telephone System.
1586533	do	Peterson, E	Thermionic Meter.
1586537	do	Stokely, R. L	Machine Switching Telephone System.
1586538	do	Thompson, G	Telephone Exchange System.
1586549	do	Fry, J. R	Alternating Current Relay.
1586554	do	Goodrum, C. L	Telephone System.
1586558	do	Harris, J. E	Manufacture of Electron Discharge Devices.
1586564	do	Lundius, E. R	Testing System.
1586569	do	Newman, P. A	Regulator.
1586570	do	Nichols, H. W	Signaling System.
1586580	do	Schelleng, J. C	Oscillating System.
1586584	do	Soper, C. P	Repeating Circuits and Method.
1586587	do	Taplin, C. V	Testing System for Testing Subscribers' Station Apparatus.
1586633	do	McCurdy, R. G	Drainage Method for Four-Wire Cable Systems.
1586811	do	Kemp, A. R	Method of Covering Cores.
1586821	do	Mathes, R. C	Receiving System for Telegraphic Signals.
1586822	do	do	Correction for Line Distortion.
1586862	do	Ten Eyck, W. B	Method of Applying Magnetic Material to Electrical Conductors.
1586871	do	White, J. H	Casting Metals.
1586874	do	Buckley, O. E	Long Submarine Telegraph Cable for Operation at High Speed.
1586875	do	do	Continuously Loaded Submarine Cable.
1586876	do	do	Power Limiting Method and Apparatus.
1586877	do	do	Electromagnetic Device.
1586878	do	Clokey, A. A	Telegraph System.
1586879	do	Curtis, A. M	Submarine Cable Telegraph System.
1586883	do	Elmen, G. W	Loading of Signaling Conductors.
1586884	do	do	Magnetic Material.
1586885	do	do	Electromagnetic Device.
1586886	do	do	Do.
1586887	do	do	Inductively Loading Signaling Conductors.
1586888	do	do	Method of Applying Metallic Sheathing to Metallic Cores.
1586889	do	do	Magnetic Structure and Method of Manufacture.
1586894	do	Gilbert, J. J., and Clokey, A. A.	Submarine Cable System.
1586895	do	Gilbert, J. J	Submarine Cable Signaling.
1586897	do	Harris, J. W	Heat Treatment of Metals.
1586961	do	Buckley, O. E	Submarine Cable Telegraphy.
1586962	do	do	Induction Apparatus.
1586965	do	Clokey, A. A	Telegraph System.
1586966	do	do	Synchronizing System.
1586970	do	Curtis, A. M	Signaling System.
1586971	do	do	Do.
1586972	do	do	Submarine Signaling.
1586985	do	Friis, H. T	Duplex Carrier Wave Transmitting and Receiving System.
1587098	do	Whittle, H	Transformer Circuits.
1587107	do	Edwards, G. D	Public Address System.
1587120	do	Haddock, A	Mounting for Vacuum Tubes.
1587121	do	Harlow, J. B	Remote Control and Supervisory System.
1587122	do	do	Electrical Switching and Indicating System.
1587139	do	Betts, W. L	Electric Switch.
1587140	do	Blount, N	Telephone Head Set.
1587155	do	Honan, E. M	Electrical Apparatus.
1587156	do	Housekeeper, W. G	Vacuum Insulator.
1587363	do	Blackwell, O. B	Attenuation Controlling Device.
1587520	June 8, 1926	Hartley, R. V. L	Non-Resonant System.
1587574	do	Zobel, O. J	Doubly Periodic Wave Filter.
1587610	do	Smith, R. H	Telephone Exchange System.
1587620	do	Toomey, J. F	Do.
1587744	do	Bandur, A. F	Loading Coil Case.
1587813	do	Young, C. R	Do.
1587888	do	Wickstrom, C. A., and Patey, J. S.	Sand Blast Apparatus.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1587947	June 8, 1926	Griffin, J. T., and Nelson, C. A.	Abrading Machine.
1587998	do	Adams, A. H	Material Winding Mechanism.
1588017	do	Feely, F. J	Reel.
1588020	do	Grange, J. D	Stencil Material.
1588021	do	Grange, J. D., and Strawn, M. L.	Method of and Apparatus for Forming Composite Articles.
1588022	do	do	Composite Article.
1588122	do	Massingham, H. R	Heating Device.
1588186	do	Hartley, R. V. L	Transmitting Electrical Energy.
1588415	June 15, 1926	do	Production and Transmission of Modulate Waves.
1588416	do	do	Multiplex Telegraphy.
1588437	do	Bailey, R. S	Telephone System.
1588450	do	Cory, S. I	Telegraph System.
1588492	do	O'Neill, H. W	Signaling System.
1588527	do	Clokey, A. A	Do.
1588566	do	Wismer, E	Step for Poles.
1588725	do	Heinicke, H. M. E	Sealing Material.
1589344	June 22, 1926	Akers, M. K	Radio Signaling System.
1589395	do	Jacobs, O. B	Telephone Repeater.
1589398	do	Kelley, W. F	System for Guiding Vessels.
1589402	do	Kopp, O. H	Telephone Exchange System.
1589405	do	Loynes, O. H., and Ohl, R. S.	Ringing Arrangement for Carrier Circuits.
1589406	do	do	Do.
1589407	do	Martin, F. J	Testing System for Testing Multiple Wiring Between Switches.
1589408	do	Maxfield, J. P	Protector for Acoustic Apparatus.
1589409	do	Miller, O. R	Automatic Telephone Exchange System.
1589444	do	Thurston, E. W., and Chase, P. M.	Telephone Exchange System.
1589489	do	Snook H. C	Electric Ignition System.
1590252	June 29, 1926	Osborne, H. S	Artificial Line.
1590263	do	Stone, J. S	Amplifier.
1590270	do	Watson, E. F	Method and Apparatus for Synchronizing in Picture Transmission Systems.
1590311	do	Nicolson, A. M	Piezo-Electric Device and Method of Producing the Same.
1590346	do	Clement, L. M	Radio Direction Finding.
1590352	do	Eglin, J. M	Electron Discharge Device.
1590362	do	Gibson, R. D	Transmission Regulation.
1591073	July 6, 1926	Zobel, O. J	Electrical Network.
1591107	do	Toomey, J. F. and Phelps, H. E.	Program Transmission Over Wires.
1591108	do	Toomey, J. F	Do.
1591961	July 13, 1926	Clark, A. B	Grid Circuit for Electron Tubes.
1591994	do	Nyquist, H	Electrical Measuring Apparatus.
1591998	do	Popper, J. S	Dial Operating Device.
1592232	do	Stuart, W. M	Switching System.
1592243	do	Wente, E. C	Telephone Apparatus.
1592272	do	Kelly, M. J	Electron Discharge Device.
1592274	do	Kipping, N	Employment of Cathode Ray Oscillographs.
1592277	do	Lane, C. E	Telephonic Apparatus.
1592323	do	Aldendorff, F	Electromechanical Devices and Telephone Systems.
1592364	do	Housekeeper, W. G	Ionization Manometer.
1592365	do	do	Apparatus for Vacuum Tube Manufacture.
1592883	July 20, 1926	Barton, H. A. and Nyquist, H.	Repeater for Transmission Lines.
1592885	do	Fetter, C. H	Broadcast Transmission System.
1592891	do	Lysons, N. H	Calling Dial.
1592901	do	Ohl, R. S	Oscillator.
1592903	do	Reeves, F. N	Interlocking Control of a Plurality of Testing Units.
1592934	do	Hartley, R. V. L	Means for Modulating High Frequency Oscillations.
1592937	do	Jammer, J. S	Method of and Means for Producing Harmonics.
1592940	do	Kendall, B. W	Secret Signaling.
1592994	do	Townsend, J. R	Metallic Composition.
1593365	do	Scriven, E. O	Method and System of High Frequency Transmission.
1593373	do	Van der Bijl, H. J	Electron Discharge Device and Method of Operating the Same.
1593380	do	Bertels, A. S	Testing Device for Telephone Exchange Systems.
1593387	do	Clark, E. H	Telephone Exchange System.
1593401	do	Goodrum, C. L	Telephone Switch.
1593619	July 27, 1926	Carpe, A	Carrier Signaling System.
1593639	do	Reynolds, F. W	Optical System.
1593640	do	Trueblood, H. M	Neutralization of Inductive Interference.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1593963	July 27, 1926	Bruce, W. M., Jr.	Radio Receiver.
1593992	do	Smith, P. C.	Calling Device.
1593993	do	Sprague, C. A.	Selective System.
1594003	do	Carpenter, W. W.	Telephone Exchange System.
1594214	do	Reiber, A. H. and Nelson, C. E.	Motor Control for Selective Systems.
1594432	Aug. 3, 1926	Toomey, J. F.	Telephone System.
1594453	do	Clark, A. B. and Crisson, G.	Transmission Circuits.
1594454	do	do	Do.
Des. 70752	do	Green, I. W. and Inglis, A. H.	Universal Casing for Telephone Sets.
1595072	Aug. 10, 1926	Caverly, H. C.	Telephone Exchange System.
1595083	do	Gibson, E. S.	Do.
1595084	do	Goodrum, C. L. and Gibson, E. S.	Do.
1595100	do	Jammer, J. S.	Repeater.
1595107	do	Lyng, J. J., and Wood, L. E.	Composite Article and Method of Making the Same.
1595126	do	Smith, P. C.	Measured Service Automatic Telephone System.
1595132	do	Williams, S. B.	Telephone Exchange System.
1595135	do	Affel, H. A.	Carrier Current Signal System.
1595139	do	Blount, H.	Annealing Apparatus.
1595142	do	Cory, S. I.	Means for Preventing Bias in Telegraph Systems.
1595159	do	Jacobs, O. B.	Telephone Repeater System.
1595793	do	Levinger, D., and Balduf, B. E.	Insulation Stripping Mechanism.
1595799	do	Massingham, H. R.	Heated Element.
1596087	Aug. 17, 1926	Espenschied, L.	Selecting Circuits.
1596101	do	Holden, W. H. T., and Schramm, F. W.	High Frequency Signaling System.
1596102	do	Holden, W. H. T.	High Frequency Translating Circuits.
1596163	do	Eaves, A. J.	Impedance Changing Device.
1596198	do	Loewe, S.	System for Generating Oscillations.
1596916	Aug. 24, 1926	Wright, S. B., and Pfleger, K. W.	Measuring Transmission Delay.
1596941	do	Nyquist, H.	Do.
1596942	do	Nyquist, H., and Etheridge, H. A., Jr.	Measuring Transmission Phase Shift.
1597789	Aug. 31, 1926	Herman, J.	Telegraph Distortion Measuring Machine.
1597790	do	do	Multiplex Signaling System.
1597817	do	Nyquist, H.	Do.
1598663	Sept. 7, 1926	Stone, J. S.	Multiplex Radio Telegraphy and Telephony.
1598673	do	Blackwell, O. B., Martin, DeL. K., and Vernam, G. S.	Secrecy Communication System.
1598694	do	Shackleton, S. P.	Electrical Regulator.
1598815	do	Gauthier, E.	Bearing.
1598835	do	Walter, R. C.	Guiding Apparatus.
1598845	do	Blount, H., and Selvig, J. N.	Reel.
1598871	do	Otto, H. M.	Ruling Machine.
1598886	do	Schulz, A. E.	Material Handling Apparatus.
1598890	do	Stokely, R. L.	Testing System.
1598937	do	Selvig, J. N.	Cord or Strand Operating Mechanism.
1599393	do	Blount, H.	Wire Drawing Apparatus.
1599445	Sept. 14, 1926	Watson, E. F.	Alternating Current Printing Telegraph System.
1599453	do	Affel, H. A.	Antenna Structure.
1599499	do	St. John, E.	Battery Light.
1600274	Sept. 21, 1926	Crisson, G.	Telephone Transmission Circuits.
1600283	do	Hitchcock, H. W.	Artificial Line.
1600290	do	Martin, W. H.	Wave Filter.
1600398	do	Carpenter, W. W.	Telephone Exchange System.
1600399	do	do	Do.
1600421	do	Mills, J.	Oscillation Circuit.
1600443	do	Williams, S. B.	Telephone Exchange System.
1600444	do	Williams, S. B., and Gibson, E. S.	Do.
1600556	do	Matthies, W. H.	Straightforward Trunking System.
1601021	Sept. 28, 1926	Holden, W. H. T.	Superimposed Ringing System.
1601023	do	Hoyt, R. S.	Electrical Signaling System.
1601037	do	Nyquist, H.	Artificial Line.
1601050	do	Wheeler, C. H.	Coin Actuated Device.
1601052	do	Williams, S. B.	Telephone Exchange System.
1601053	do	do	Telephone System.
1601058	do	Berry, C. H.	Selector Switch.
1601060	do	Clarke, H. R.	Telephone Hand Set.
1601061	do	Dunham, B. G.	Automatic Telephone Exchange System.
1601063	do	Frederick, H. A.	Acoustic Device.
1601064	do	Gibson, E. S.	Telephone Exchange System.
1601065	do	Griffith, T. R.	Electron Discharge Device.
1601066	do	Harris, J. E.	Do.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1601069	Sept. 28, 1926	Hofstetter, R.	Method of and Apparatus for Assembling Members.
1601070	do	Horton, J. W.	Wave Meter.
1601071	do	do	Oscillation Generator.
1601074	do	Kendall, B. W.	Multi-Frequency Current Transmission.
1601075	do	Kishpaugh, A. W.	System of Space Discharge Devices.
1601078	do	MacKenzie, D.	Sound Recording.
1601795	Oct. 5, 1926	Gordon, G. B.	Nail Expansion Anchor.
1601799	do	Herman, J.	Telegraph Repeater.
1601808	do	Nyquist, H.	Multiplex Signaling System.
1601940	do	Clokey, A. A.	Telegraph System.
1601941	do	do	Submarine Telegraph System.
1601942	do	do	Telegraph System.
1601967	do	Hartley, R. V. L.	Carrier Wave Transmission.
1601969	do	Jammer, J. S.	Call Signaling System.
1602019	do	Weis, C. L., Jr.	Carrier Wave Signaling System.
1602469	Oct. 12, 1926	Watson, E. F., and Weaver, A.	Electrical Transmission of Pictures.
1602491	do	Hoyt, R. S.	Signaling System Utilizing as Signaling Channels the Minor Transmitting Bands of a Loaded Line.
1602501	do	Peterson, G. H.	Telephone System.
1602681	do	Kochendorfer, F. S., and Schulz, A. E.	Grinding Apparatus.
1602682	do	Kochendorfer, F. S.	Apparatus for Welding and Annealing Meta Parts.
1602809	do	Carpenter, W. W.	Telephone Exchange System.
1603233	Oct. 19, 1926	Allen, R. M.	Centering Device.
1603267	do	Brown, H. B.	Telephone System
1603273	do	Frederick, H. A.	Testing Device.
1603279	do	Gray, F.	Spark Arrester.
1603282	do	Heising, R. A.	Modulating.
1603283	do	Hubbard, F. A.	Electrical Compensator.
1603284	do	Johnson, J. B.	Electric Discharge Device.
1603287	do	Mills, J.	Secret Phonograph Record.
1603289	do	O'Neill, H. W.	Switching Device.
1603290	do	do	Telephone Signaling System.
1603298	do	Speed, J. B.	Method for and Means of Separating Electrolytes.
1603300	do	Winckel, R. C.	Telephone Transmitter.
1603305	do	Zobel, O. J.	Electrical Network and Method of transmitting Electric Currents.
1603319	do	Clark, A. B.	Telephone Repeater.
1603329	do	Dietze, E.	Tapered Filter for Alternating Currents of Varying Frequency.
1603416	do	Shackelton, W. J.	Magnetic Coil.
1603582	do	Clement, L. M.	Carrier Wave Transmission System.
1603500	do	Heising, R. A.	Signal Transmission System.
1603503	do	Kerr, M. B.	Telephone Exchange System.
1603555	do	Williams, S. B., and Gibson, E. S.	Measured Service Telephone System.
1603557	do	Wolfe, W. V.	Power Line Signaling.
1603762	do	Gorton, A. F., and Groves, W. H.	Fusion Furnace.
1603778	do	Kochendorfer, F. S., and Selvig, J. N.	Strand or Cord Working Mechansim.
1603801	do	Potter, W. H.	Coil Winding Machine.
1603802	do	do	Bobbin Winding Machine.
1604140	Oct. 26, 1926	Affel, H. A.	Multi-Frequency Oscillator.
1604163	do	Herman, J.	Means for Regulating Motors.
1604282	do	Haislip, R. A.	Submarine Cable.
1604550	do	Dakin, G.	Rotary Final Selector Switch.
1604597	do	O'Neill, H. W.	Composite Ringer Circuit.
1604610	do	Schelleng, J. C.	Modulation Indicator.
1604637	do	Fearing, J. L.	Phonic Diaphragm.
1604931	Nov. 2, 1926	Elsasser, H. W.	Selective Circuit.
1604937	do	Garvin, J. S.	Energizing Circuits for Vacuum Tubes.
1604939	do	Gorton, W. S.	Operating Relay.
1604995	do	Guilband, L. R.	Inductance Device.
1605001	do	Schroter, F.	Vacuum Valve with Glow Discharge.
1605010	do	Stone, J. S.	Signaling System.
1605023	do	Hartley, R. V. L.	Signaling Method and System.
1605048	do	Mathes, R. C.	Operating Relay.
1605071	do	Ronci, V. L.	Method of Arc Welding.
1605205	do	Bellamy, H. T.	Method of Securing a Union Between Elements.
1605230	do	Hendry, W. F.	Electron Discharge Device and Method of Manufacturing the Same.
1605244	do	Kochendorfer, F. S.	Cable or Strand Handling and Working Machine.
1605255	do	Massingham, H. R.	Strand Distributor.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1605469	Nov. 2, 1926	Sattelberg, O	Long Distance Cable.
1605854	do	Putt, H. O	Convolute Amplifying Horn.
1605921	Nov. 9, 1926	Carpenter, W. W	Telephone Exchange System.
1605930	do	Egerton, H. C	Television System.
1605933	do	Gannett, D. K	Duplex Telegraph System.
1605952	do	Hovland, H	Automatic Coin Service Telephone System.
Re 16616	May 3, 1927	do	Do.
1605972	Nov. 9, 1926	Nyquist, H	Arrangement for Increasing the Power of Repeater Circuits.
1605992	do	Shoffstall, H. F	Means for Controlling Volume Range.
1606006	do	Weaver, W. C	Trunking System.
1606131	do	Pruden, H. M	Carrier Wave Signaling System.
1606133	do	Smythe, E. H	Telephone Apparatus.
1606138	do	Barber, C. C	Centrifugal Governor.
1606139	do	Baulch, E. L	Telephone System.
1606143	do	Butterfield, J. T	Protective Device.
1606161	do	Fowler, C. B	Telephone System.
1606164	do	Garvin, J. S	Circuit Controlling Device.
1606165	do	Glenn, H. H	Electrical Conductor.
1606184	do	Ronci, V. L	Electron Discharge Device.
1606199	do	Wilbur, R. S	Telephone Exchange System.
1606227	do	Horton, J. W., Ives, H. E., and Long, M. B.	Transmission of Pictures by Electricity.
1606316	do	Murphy, P. B	Signaling System.
1606388	do	Scharringhausen, W. H	Telephone Hand Set Mounting.
1606571	do	Heising, R. A	Relay.
1606755	Nov. 16, 1926	Field, F. E	Induction Coil.
1606760	do	Griffith, T. R	Method of and Apparatus for Bending Filaments.
1606761	do	Guilband, L. R	Inductance Device.
1606763	do	Hartley, R. V. L	Signaling Method and System.
1606764	do	do	Speed Regulation.
1606773	do	Nelson, E. L	Transmission System.
1606777	do	Payne, E. B	Inductance Device.
1606783	do	Heising, R. A	Production of Modulated Waves.
1606788	do	Honan, E. M., and Townsend, J. R.	Lubricant.
1606791	do	Horton, J. W	Oscillation Generator.
1606792	do	Isles, F. W	Oscillation Generator for Current of Continuously Varying Frequency.
1606794	do	Johnson, K. S	Telephone System.
1606795	do	Johnson, K. S., and Long, M. B.	Multiplex signaling.
1606816	do	Stevenson, G. H	Inductance Device.
1606817	do	do	Electrical Network.
1606822	do	Bailey, R. S	Telephone Switchboard.
1606851	do	Toomey, J. F., and Phelps, H. E.	Program Transmission Over Wires.
1606855	do	Watson, E. F	Distortion Measuring System.
1607073	do	Gros, G. A	Machine and Method of Supplying Work Thereto.
1607074	do	do	Forming Mechanism.
1607075	do	Hall, E. C	Electrolytic Rectifier.
1607668	Nov. 23, 1926	Fetter, C. H	Carrier Transmission Over Power Circuits.
1607673	do	Inglis, A. H	Telephone Substation Circuits.
1607682	do	Martin, DeL. K	Radio Repeater System.
1607683	do	do	Do.
1607687	do	Nyquist, H	Electrical Circuits.
1607837	do	Martin, DeL. K	Radio Repeater System.
1607893	do	Ives, H. E	Transmission of Pictures by Electricity.
1607902	do	Mathes, R. C	Multiplex Signaling System.
1607903	do	Matthies, W. H	Telephone Exchange System.
1607910	do	O'Neill, H. W	Switching Device.
1607978	do	Casper, W. L	Transmission Circuits.
1607980	do	Green, C. W	Telephone Repeater.
1608247		Selvig, J. N	Wire Drawing Machine.
1608248	do	do	Do.
1608249	do	do	Do.
1608487	Nov. 30, 1926	Blattner, D. G	Transmitting Circuits.
1608488	do	Bowne, L. J	Telephone System.
1608500	do	Goff, H. W	Switching Device.
1608509	do	Jammer, J. S	Carrier Wave Signaling System.
1608516	do	MacDougall, H. W	Testing System.
1608520	do	O'Neill, H. W	Signaling System.
1608521	do	do	Do.
1608522	do	do	Composite Ringer Circuits.
1608524	do	Porter, L. F	Telephone System.
1608527	do	Rainey, P. M	Facsimile Telegraph System.
1608535	do	Schwerin, P	Electric Discharge Device.
1608546	do	Clark, A. B., and Shanck, R. B.	Distortion Measuring System.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1608551	Nov. 30, 1926	Demarest, C. S., and Bonell, R. K.	Radio Signaling System.
1608566	....do	Potter, R. K	System for Binaural Transmission of Sound.
1608645	....do	Bruce, W. M., Jr	Acoustic Attachment for Loud Speakers.
1609339	Dec. 7, 1926	Williams, S. B	Telephone Exchange System.
1609383	....do	Shanck, R. B	Distortion Measuring System.
1609394	....do	Bailey, R. S	Telephone System.
1609395	....do	....do	Do.
1609422	....do	Olofson, K. R	Indenturing Apparatus.
1609438	....do	Stoll, C. G	Feeding Device for Strand Material.
1609455	....do	Boe, H. J	Strand Twisting Machine.
1609460	....do	Buttles, W. S	Apparatus for Holding Articles under High Pressure.
1609461	....do	Carpenter, C. C	Indenturing Machine.
1609490	....do	Mohn, F	Reel.
1610234	Dec. 14, 1926	Almquist, M. L	Carrier Signaling System.
1610336	....do	Stone, J. S	Circuits for Passing or Stopping a Frequency Band of Alternating Currents.
1610442	....do	Gorton, W. S	Stuffing Box.
1610910	....do	Williams, R. R	Composite Article and Method of Forming It
1610954	....do	Lamplough, L. F	Method of Making Composite Articles.
1611124	....do	Nyquist, H	System of Transmission Over Loaded Lines.
1611223	Dec. 21, 1926	....do	Apparatus for Controlling the Frequency of an Alternating Current.
1611224	....do	....do	Method and Apparatus for Measuring Frequency.
1611252	....do	Snavely, P. M	Switching System.
1611350	....do	Jammer, J. S	Carrier Wave Transmission.
1611445	....do	Hinrichsen, E. E	Trouble Indicating System.
1611692	....do	Stokely, R. L	Machine Switching Telephone Exchange System.
1611711	....do	Beaumont, W. M	Telephone System.
1611716	....do	Brown, J. T L	Measuring Electrical Quantities.
1611741	....do	Haliburton, W. M	Reverse Current Relay.
1611870	Dec. 28, 1926	Anderson, H. A	Acoustic Apparatus.
1611916	....do	Johnson, K. S	Electric Wave Transmission.
1611932	....do	Mathes, R. C	Frequency Selective Current Transmission.
1612005	....do	Ellsworth, J. D	Electrical Picture Transmission System.
1612011	....do	Green, I. W., and Bisbee, F. C.	Recording and Reproducing System.
1612014	....do	Hinrichsen, E. E	Recording Mechanism.
1612019	....do	Holden, W. H. T	Asymmetrical Wave Generating System.
1612090	....do	Beatty, W. E	Means and Method for Signaling.
1612147	....do	O'Neill, H. W	Signaling System.
1612202	....do	Mortimer, L. A	Telephone System.
1612848	Jan. 4, 1927	Affel, H. A	Multiplex Telegraphy.
1612849	....do	Anderson, G. T., and Taplin, C. V.	Testing Device.
1612880	....do	Peterson, G. H	Telephone Exchange System.
1612897	....do	Zethmayr, G. J	Thermocouple.
1612916	....do	Gorton, A. F	Ceramic Articles and Method of Producing Them.
1612952	....do	Stevenson, G H	Radio Receiving Apparatus.
1612965	....do	Dahl, J. F	Telephone Exchange System.
1612966	....do	Deakin, G	Selector Switch.
1612988	....do	Schulz, A. E	Strand Holder.
1613240	....do	Mills, J	Wave Transmission Control Circuits.
1613246	....do	O'Neill, H. W	Telephone Exchange System.
1613422	....do	Wegel, R. L	Transmission Control.
1613423	....do	....do	Do.
1613606	Jan. 11, 1927	Flammer, H. A	Electrical Regulating Device.
1613607	....do	Fletcher, H	Compensating Network for Carrier Transmission Circuits.
1613609	....do	Harrison, H. C	Acoustic Device.
1613612	....do	King, R. W	Electron Discharge Device.
1613613	....do	Kopp, O. H	Telephone Exchange System.
1613616	....do	Lum, G. R	Contact Spring Vibration Damper.
1613624	....do	Stokely, R. L	Machine Switching Telephone Exchange System.
1613625	....do	Stoller, H. M	Dynamo-Electric Machine.
1613626	....do	Van de Bijl, H. J	Space Discharge System.
1613630	....do	Watrous, P. M	Vacuum Tube.
1613685	....do	Vernam, G. S., and Perry, D. B.	Printing Telegraph Exchange System.
1613686	....do	Vernam, G. S	Method of and Apparatus for Secret Electrical Transmission of Pictures.
1613704	....do	Herman, J	Telegraph Distortion Measuring System.
1613927	....do	Buckley, O. E	Translating Device.
1613937	....do	Chaplin, M. P	Printing Telegraphy.
1613943	....do	Fetzer, K. M	Testing System.
1613944	....do	Field, J. C	Signaling System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1613946	Jan. 11, 1927	Gent, E. W	Pneumatic Valve.
1613948	do	Hartley, R. V. L	Electron Tube.
1613949	do	Heising, R. A	Electric Wave Filter.
1613951	do	Jammer, J. S	Carrier Wave Signaling System.
1613952	do	Johnson, K. S	Electric Wave Filter.
1613954	do	Knoop, W. A	Sweep Circuits for Cathode Ray Oscillographs.
1613956	do	Locke, G. A	Signaling System.
1613958	do	Payne, E. B	Apparatus for Loading Transmission Circuits.
1613964	do	Shackelton, W. J	Testing System.
1613970	do	Tanner, DeW. C	Transmission of Pictures by Electricity.
1614254	do	Persons, G. A	Voltage Limiting Device.
1614285	do	Craft, E. B., and Keller, L	Trouble Indicating System.
1614291	do	Fetzer, K. M., and Newell, N. A.	Telephone Exchange System.
1614545	Jan. 18, 1927	Deardorff, R. W	Carrier Telegraph Circuits.
1614546	do	do	Multiplex Telegraphy with Magnitude Discrimination.
1614553	do	Hitchcock, C. H	Strand Gauge.
1614555	do	Hunter, H. V	Multiplex Telegraph System with Magnitude Discrimination.
1614557	do	Jongedyk, R	Machine Press.
1614565	do	McWaid, R. A	Method of and Apparatus for Testing the Viscosity of Matter.
1614569	do	Parcells, P. D	Material Working Mechanism.
1614575	do	Siebs, C. T	Hoisting Apparatus.
1614594	do	Boe, H. J	Serving Mechanism.
1614595	do	do	Reel Supporting Apparatus.
1614596	do	Bouvier, G. A	Means for and Method of Serving a Material.
1614597	do	do	Controlling Mechanism.
1614605	do	Egert, B. J	Measuring Device.
1614609	do	Grange, J. D., and Vosyke, E. F.	Process of and Apparatus for Making Stencil Sheets.
1614953	do	Goff, H. W	Stepping Switch.
1614959	do	Hovland, H	Automatic Telephone System.
Re 16615	May 3, 1927	do	Do.
1615044	Jan. 18, 1927	Soriven, E. O	Transformer Circuit.
1615089	do	Lang, F. H	Finish Remover.
1615094	do	McFarland, R. E	Cored Article and Method of Producing Such Articles.
1615115	do	Durhan, E., Jr	Motor Driven Traveling Crane Mechanism.
1615117	do	Emery, C. B	Device for Gauging and Adjusting Springs.
1615130	do	Milton, I. L	Means for Adjusting Electrical Inductances.
1615137	do	Ruby, F. J	Feeding Mechanism.
1615149	do	Trebes, B. M. A	Supporting Device.
1615161	do	Bouvier, G. A	Winding Mechanism.
1615219	Jan. 25, 1927	Franfield, J. C	Telephone Switchboard Cord Terminal Test Connector.
1615252	do	Zobel, O. J	Electrical Wave Filter.
1615259	do	Clark, A. B	Telephone Repeater System.
1615374	do	Gerhardt, A. P	Mechanism for Working Pulpous Material.
1615375	do	Gill, F	Method of Producing Coated Cores.
1615381	do	Hosford, W. F	Method and Apparatus for Coating Cores.
1615387	do	Jespersen, H. W	Method of and Apparatus for Coating Cores.
1615388	do	do	Moisture Extracting Apparatus.
1615390	do	Little, J. S	Method and Apparatus for Coating Cores.
1615391	do	do	Machine for Forming Sheets of Pulpous Material.
1615392	do	do	Method of and Apparatus for Making Fibrous Articles.
1615393	do	do	Method for Coating Cores.
1615394	do	do	Apparatus for Coating Cores.
1615395	do	do	Method of and Apparatus for Coating Cores.
1615416	do	Walker, H. G., and March, A. T.	Method of Coating Cores.
1615417	do	do	Machine for Coating Cores.
1615418	do	do	Method of and Apparatus for Coating Cores.
1615419	do	do	Do.
1615420	do	do	Machine for Coating Cores.
1615421	do	do	Method and Means for Coating Cores.
1615422	do	do	Method and Apparatus for Coating Cores.
1615423	do	Walker, H. G	Do.
1615424	do	Walker, H. G. and March, A. T.	Method and Apparatus for Producing Fibrous Articles.
1615425	do	do	Coated Core.
1615426	do	do	Mechanism for Working Pulpous Material.
1615428	do	Willard, F. W	Coated Core and Method of and Apparatus for Coating Same.
1615431	do	Albright, H. F	Method and Apparatus for Coating Cores.
1615896	Feb. 1, 1927	Affel, H. A	High Frequency Signaling System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1615911	Feb. 1, 1927	Nyquist, H.	Apparatus and Method for Regulating Attenuation and Phase on Transmission Lines.
1615913	do	Osborne, H. S.	Radio Direction Finding System.
1615935	do	Davis, R. C. and Conway, R. D.	Manual Telephone System.
1615941	do	Fowler, C. B.	Telephone System.
1615956	do	Rogers, J. E.	Telephone Exchange System.
1615957	do	Schumacher, E. E.	Sintering Refractory Metals.
1615958	do	Schwerin, P.	Electron Discharge Device.
1615957	do	Vroom, E.	Transmission System.
1615971	do	Williams, S. B. and Gibson, E. S.	Telephone Exchange System.
1615983	do	Jones, C. G.	Mounting Vacuum Bulbs.
1615988	do	Long, M. B.	Carrier Transmission System.
1616102	do	Anderson, S. E.	Electromagnetic Coupling Device.
1616114	do	Curran, S. T. and Mueller, E. C., Jr.	Telephone Jack.
1616127	do	Johnson, L. H. and Roberts, T. H.	Telephone Exchange System.
1616139	do	Ronci, V. L.	Electron Discharge Device.
1616156	do	Vroom, E.	System for Energizing and Testing Repeaters.
1616162	do	Adams, W. J., Jr.	Electric Current Transmission.
1616180	do	Field, F. E.	Electromagnetic Device.
1616182	do	From, O. C.	Telephone Exchange System.
1616184	do	Griffith, T. R.	Electron Discharge Device.
1616186	do	Harlow, J. B.	Control and Supervisory System.
1616193	do	Mills, R. H.	Selective Signaling Circuits.
1616200	do	Shackelton, W. J.	Transformer.;
1616491	Feb. 8, 1927	Green, I. W.	Head Band for Telephone Receivers.
1616499	do	King, M., Jr.	Linear Measuring Device.
1616507	do	Pierce, R. E.	Means for Measuring the Margin of Operation of Telegraph Circuits.
1616589	do	Locke, G. A.	Signaling System.
1616607	do	Clokey, A. A.	Do.
1616622	do	Horton, J. W.	Oscillation Generator with Automatic Frequency Control.
1616638	do	Ryan, F. M.	Supervisory System for Carrier Telephone Systems.
1616639	do	Sprague, C. A.	High Frequency Sound Transmission System
1616643	do	Vadersen, H.	Variable Coupler.
1616823	do	Quarles, D. A.	Supervisory System.
1616892	do	Espenschied, L. and Martin, DeL. K.	Duplex Radio System.
1617336	Feb. 15, 1927	Lawson, W. L. and Canfield, M. E.	Testing System.
1617372	do	Casper, W. L.	Repeating Coil.
1617391	do	Jammer, J. S.	Carrier Transmission System.
1617392	do	do	Carrier Wave Transmission System.
1617393	do	do	Carrier Transmission System.
1617405	do	MacDougall, H. W.	Testing System for Automatic Telephone Switches.
1617413	do	Mortimer, L. A.	Telephone System.
1617414	do	O'Neill, H. W.	Signaling System.
1617421	do	Schleppy, S. L. and Bureau, A. A.	Spool.
1617427	do	Wegman, E. C. and Southwick, W. A.	Apparatus for Working Strand Material.
1617428	do	Wier, H. B.	Reproduction of Music and Speech.
1617447	do	Johnston, J.	Preservation of Wood.
1617467	do	Uphoff, L. S.	Radio Signaling System.
1617482	do	Herman, J.	Intermediate Telegraph Set for Duplex Lines.
1617934	do	Affel, H. A.	Carrier Telegraph System.
1617935	do	Affel, H. A., and Deardorff, R. W.	Multiplex Telegraphy by Phase Discrimination.
1617938	do	Bouvier, G. A.	Method of and Apparatus for Determining the Pliability of Strands.
1617971	do	Dowey, T. L.	Synchronizing System.
1618011	do	Gauthier, E.	Press.
1618028	do	Vroom, E.	Means for Energizing Electron Tubes.
1618193	Feb. 22, 1927	Herman, J.	Telegraph System.
1618201	do	Inglis, A. H.	Substation Circuits.
1618242	do	Thompson, G. K.	Time Announcing System.
1618251	do	Wentz, J. F.	Electric Fuse.
1618388	do	Rinker, J. C., and Kraisinger, A. J.	Switching Device.
1618402	do	Adams, A. H.	Strand Working Machine.
1618423	do	Gibson, E. S.	Telephone Exchange System.
1618456	do	Locke, G. A.	Signaling System.
1618468	do	Palmer, J. C. R.	Radio Receiving Equipment.
1618641	do	De Forest, L.	Recording Sound.
1619058	Mar. 1, 1927	Crisson, G.	Telephone Repeater Station.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1619060	Mar. 1, 1927	Deardorff, R. W	System of Multi-Frequency Circuits.
1619085	do	Nyquist, H	Carrier Current Signaling System.
1619228	do	Williams, S. B., and Clement, L. M.	Automatic Telephone High Frequency Trunk.
1619250	do	Dunham, B. G	Telephone Exchange System.
Des72103	do	Lum, G. R	Loud Speaking Sound Reproducer.
1619882	Mar. 8, 1927	Ohl, R. S	Means for Transferring High Frequency Energy.
1619891	do	Silent, H. C	Echo Suppressor Relay.
1619897	do	Vernam, G. S	Printing Telegraph Exchange System.
1620012	do	Dunham, B. G., and Haines, W. T.	Telephone Exchange System.
1620204	do	Heising, R. A	Frequency Indication and Control.
1620286	do	Potts, L. M	Trouble Indicating System.
1620629	Mar. 15, 1927	Black, H. S	Carrier Wave Signaling System.
1620655	do	Heising, R. A	Directive Radio Receiving System.
1620656	do	do	Carrier Wave Signaling System.
1620733	do	Nelson, S. F	Telephone System.
1620735	do	Nyquist, H	Multiplex Signaling System.
1620878	do	Elmen, G. W	Electromagnetic Device.
1620884	do	Gallopin, G	Method of Repairing Torn Fabric.
1621309	do	Blount, H., and Hernlund, J. W.	Wire Drawing Apparatus.
1621480	do	Ewing, C	Testing System.
1621530	Mar. 22, 1927	Fitzpatrick, P. G	Dead Ending Clamp.
1621533	do	Grimes, D	Alternating Current Relay.
1621557	do	Nyquist, H	Combined Resonant Shunt Device for Telegraph Circuits.
1622297	Mar. 29, 1927	Vernam, G. S	Radio Printing Telegraph System.
1622357	do	Staples, E. M	Electrical Transmitting System.
1622370	do	Espenschied, L	Multiple Antenna System for Radio Communication.
1623095	Apr. 5, 1927	Crisson, G., and Silent, H. C	Multi-Way Connection.
1623118	do	Jacobsen, E	Telephone Exchange System.
1623139	do	Toomey, J. F	Do.
1623480	do	Kuhn, J. J	Transmission System.
1623555	do	Roberts, J. G	Loaded Signaling Conductor.
1623600	do	Jammer, J. S	Transmission Regulation.
1623712	do	Wood, E. B	Regulating and Recording Device.
1623734	do	King, R. E., and Beaumont, W. M.	Telephone System.
1623748	do	Pfannenstiehl, H	Printing Telegraphs.
1623756	do	Sacia, C. F	Recording and Reproducing of Sounds.
1623769	do	Williams, S. B., and Gibson, E. S.	Telephone Exchange System.
1623777	do	Carpenter, W. W	Do.
1623809	do	Pfannenstiehl, H	Printing Telegraphs.
1623810	do	do	Printing Telegraphy.
1624023	Apr. 12, 1927	Strieby, M. E., and Fetter, C. H.	Equalization of Transmission.
1624056	do	McKown, F. W., and Dietze, E.	Telephone Substation Circuits.
1624057	do	do	Do.
1624202	do	Aldendorff, F	Electrical Switch.
1624341	do	Hinrichsen, E. E	Semi-Automatic Telephone System.
1624351	do	Moore, C. R	Telephone Transmitter.
1624352	do	do	Do.
1624353	do	Moore, C. R., and Hayward, J. M.	Double Diaphragm Transmitter.
1624357	do	Nicolson, A. M	Phonic Diaphragm.
1624363	do	Richard, C. D., and Morris, G. T.	Coil with Multiple Adjustments.
1624374	do	Swoboda, A. R	Switching Device.
1624391	do	Clausen, H. P	Electric Switch.
1624393	do	Clokey, A. A	Telegraph System.
1624395	do	Curtis, A. M	Signaling System.
1624396	do	do	Submarine Signaling System.
1624412	do	Horton, J. W	Submarine Signaling.
1624422	do	Miller, R. B	Dial Testing Circuit.
1624451	do	Weinhart, H. W	Vacuum Tube.
1624459	do	Adams, W. J., and Haddock, A.	Shielding and Balancing Means.
1624470	do	Buckley, O. E	Signaling Conductor System and Method of Operation.
1624473	do	Clement, L. M	High Frequency Signaling System.
1624476	do	Cummings, G. C	Contact Device.
1624486	do	Fletcher, H., and Sivian, L. J	Binaural Telephone System.
1624495	do	Mathes, R. C	Carrier Wave Signaling.
1624498	do	Mohr, F	Modulating System.
1624506	do	Pruden, H. M	Carrier Wave Signaling System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1624536	Apr. 12, 1927	Christopher, A. J	Inductance Device.
1624537	do	Colpitts, E. H	Oscillation Generator.
1624540	do	Clark, E. H	Testing Device for Testing Register Senders.
1624551	do	Jammer, J. S	Multiplex Transmissio .
1624560	do	Payne, E. B	Inductance Coil and Method of Manufacturing the Same.
1624562	do	Ronci, V. L	Electron Discharge Device.
1624566	do	Stoller, H. M	Control Regulator.
1624579	do	Burkholder, J. C	Signaling System.
1624595	do	Haddock, A	Attachment to Electric Insulation.
1624596	do	Hartley, R. V. L	Signaling Method and System.
1624601	do	Horton, J. W	Secret Communication.
1624630	do	Shackelton, W. J	Inductance Device and Method for Manufacturing the Same.
1624646	do	Wolfe, W. V	Transmission System.
1624665	do	Johnson, K. S., and Shea, T. E.	Wave Filter.
1624668	do	Kochendorfer, F. S	Apparatus for Heat Treating Metals.
1624672	do	O'Neill, H. W	Communication System.
1624682	do	Shea, T. E	Electrical Network.
1624918	Apr. 19, 1927	Blackwell, O. B., and Herman, J.	Method and Apparatus for Television.
1624936	do	Faries, C. L	Telegraph System.
1624953	do	Jordan, W. C	Telephone Exchange System.
1624966	do	Morris, R. W	Ambulatory Repeating System.
1625332	do	Potter, W. H	Means for Trimming Articles.
1625432	do	Sager, J. W	Winding Mechanism.
1625449	do	Bohn, H. E., and Fauquier, R. H.	Method of Molding Phenol Plastic or Like Compounds.
1625450	do	Bollinger, C	Furnace.
1625451	do	Brown, A. B	Method of and Apparatus for Drying and Storing Material.
1625463	do	Gauthier, E	Diamond Lap.
1625468	do	Hosford, W. F	Method of and Apparatus for Drying and Storing Dried Material Preparatory to Processing.
1625469	do	do	Tape or Ribbon Working Machine.
1625483	do	Marwin, A. C	Casein Glue.
1625484	do	Mason, S. R	Process of and Apparatus for Cleaning Metal.
1625485	do	Maurer, O. H	Terminal for Electric Conductors.
1625495	do	O'Neill, H. W	Telegraph System.
1625779	Apr. 26, 1927	Aldendorff, F	Electromechanically Controlled Telephone System.
1625822	do	Potter, R. K	Radio Receiver and Trouble Alarm.
1625823	do	do	Do.
1625840	do	Whittle, H	Transmission System.
1625897	do	Klein, C. H	Cable Clamp and Bridle Ring.
1625983	do	Carter, H. F	Method of and Apparatus for Wrapping Strand Material Around a Core.
1626724	May 3, 1927	Demarest, C, S., and Almquist, M. L.	Frequency Controlling System.
1626731	do	Martin, J	Method of and Apparatus for Synchronization in Picture Transmission.
1626734	do	Martin, W. H	Cone Loud Speaker Diaphragm.
1627111	do	Nyquist, H	Picture Transmitting System.
1627633	May 10, 1927	Cory, S. I	Telegraph Distortion Measuring System.
1627701	do	Hall, M. C	System for Transmitting and Reproducing Pictures.
1627739	do	Hosford, W. F	Method of Coating Strands.
1627740	do	do	Coated Strands.
1628392	do	Cory, S. I	Telegraph Distortion Measuring System.
1628398	do	Casper, W. L., and Field, F. E.	Magnetic Coil.
1628666	May 17, 1927	Harrison, H. C	Electromagnetic Device.
1628695	do	Toomey, J. F	Subscriber's Equipment for Program Transmission.
1628696	do	do	Program Selecting Circuits.
1628697	do	do	Program Transmission Over Wires.
1628883	do	Holden, W. H. T	Carrier Amplitude Control System.
1628898	do	Moore, C. R	Telephone Transmitter.
1628978	do	Hersey, R. E	Automatic Regulator for Energy Transformers.
1628982	do	Hulsizer, R. I	Electron Discharge Device.
1628983	do	Johnson, K. S	Electrical Network.
1628986	do	Kemp, A. R	Insulating Material.
1628987	do	King, R. W	Thermionic Device and Method of Evacuating the Same.
1628990	do	Lucas, F. F	Alloy.
1628991	do	Miller, D. D	Switching Device.
1628992	do	Mills, J	System for Location of a Source of Sound Vibrations.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1628997	May 17, 1927	Retallack, J. B.	Testing Device for Testing Register Senders.
1628999	do	Ronci, V. L.	Electron Discharge Device.
1629001	do	Schelleng, J. C.	Oscillation Generator.
1629007	do	Smith, E. R.	Telephone Exchange System.
1629008	do	do	Telephone System.
1629009	do	Snook, H. C.	Low Impedance Electric Discharge Device.
1629016	do	Beaumont, W. M., and Bonomi, F. A.	Telephone System.
1629020	do	Craft, E. B.	Condenser.
1629093	do	Curtis, A. M.	Signaling System.
1629099	do	Fowler, C. B.	Telephone System.
1629100	do	Hartley, R. V. L.	Transmission System.
1629168	do	Massingham, H. R.	Method of and Apparatus for Serving Material Upon a Core.
1629169	do	do	Do.
1629491	May 24, 1927	Fetter, C. H.	Program Selecting Circuits.
1629552	do	Strieby, M. E.	Do.
1629559	do	Watson, E. F.	Signaling System.
1629646	do	Aldendorff, F.	Automatic Switch.
1629694	do	Ford, B. K.	Apparatus for and Method of Applying Tips to Cores.
1629705	do	Holmberg, C. G., Jr., and Stull, J. S.	Material Working Mechanism.
1629709	do	Jones, H. F.	Guard for Pulleys.
1630293	May 31, 1927	Fish, L. B.	Step for Poles.
1630312	do	Rhodes, W. A.	Thermal Translating Device.
1630340	do	Hall, M. C.	Telegraph System.
1630431	do	Houskeeper, W. G.	Electron Discharge Device.
1630451	do	Ray, J. L.	Method of Producing Coated Cores.
1630775	do	Arkema, H. P.	Apparatus for Treating Dies.
1630827	do	Bruce, W. M., Jr.	Alternating Current Telegraph System.
1631143	June 7, 1927	Matthews, E. M., and Carr, J. A.	Deflection Dynamometer.
1631153	do	Peterson, G. H.	Trunk Circuits.
1631174	do	Wilburn, S. D.	Telegraph Signaling System.
1631958	June 14, 1927	Gent, E. W.	Pneumatic Relay.
1631963	do	Ives, H. E.	Transmission of Pictures by Electricity.
1631976	do	Mathes, R. C.	Signaling.
1631977	do	Merrill, F. W.	Electric Motor.
1631978	do	Nordenswan, R.	Telephone Receiver.
1631981	do	Porter, L. F.	Telephone System.
1631982	do	Potts, L. M.	Control Mechanism.
1632004	do	Hampton, L. N.	Cutting Device.
1632012	do	Toomey, J. F.	Program Selecting Circuits.
1632025	do	Dustin, G. E.	Automatic Telephone System.
1632030	do	Martin, W. H.	Method and Means for the Identification of Electrical Cables.
1632035	do	Morton, C. A.	Automatic Telephone System.
1632039	do	Oswald, A. A., and Nelson, E. L.	Antenna Structure.
1632048	do	Van de Water, J. W., and Blair, B. R.	Testing System.
1632050	do	Wennemer, G. P.	Protective Device.
1632051	do	Whitney, W.	Telephone System.
1632053	do	Bertals, A. S.	Testing Device.
1632054	do	Brown, J. T. L.	Oscillation Generator.
1632056	do	Carpenter, W. W.	Telephone Exchange System.
1632057	do	Coon, L. E.	Signaling System.
1632058	do	Coram, R. E.	Secret Signaling.
1632059	do	Curtis, A. M.	Alarm System.
1632062	do	Ferguson, J. G.	Regulator.
1632063	do	Fowler, C. B.	Telephone System.
1632066	do	Hague, A. E.	Do.
1632067	do	Hampton, L. N.	Clearance Gauge.
1632068	do	Harrison, H. C.	Phonic Diaphragm.
1632069	do	Hartley, R. V. L.	Wave Transmission System.
1632074	do	Houskeeper, W. G.	Control Apparatus.
1632075	do	do	Winding Machine.
1632076	do	Hubbard, F. A.	Method of Determining Inequalities in Wall Thickness of Tubes.
1632078	do	Jammer, J. S.	Signaling System.
1632079	do	Jenkins, G. M. O.	Pneumtaic Valve.
1632080	do	Johnson, J. B.	Electric Discharge Device.
1632093	do	Mueller, E. C., Jr., and Curran, S. T.	Call Indicator.
1632095	do	Newton, E. E.	Grid Winding Machine.
1632099	do	Schelleng, J. C.	Secret Signaling.
1632104	do	Whiting, D. F.	Transmission Circuits.
1632105	do	Zickrick, L.	Magnetic Material and Method of Producing it.
1632106	do	Zogbaum, F.	Signaling System.
1632130	do	Haddock, A.	Condenser.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1632134	June 14, 1927	Harrison, H. C.	Electromagnetic Device.
1632135	do	Hendry, W. F.	Electrode Structure for Electron Discharge Devices.
1632275	do	Curtis, A. M.	Signaling System.
1632282	do	Farrington, J. F.	Two-Way Wave Transmission System.
1632389	do	Curtis, A. M.	Oscillation Generating and Supply System.
1632398	do	Franks, C. H.	Method of Producing Tubular Articles from Pulpous Material.
1632404	do	Griffin, J. T.	Cementing Material.
1632777	June 21, 1927	Affel, H. A.	Distribution of Intelligence.
1632814	do	Zinn, M. K.	Filter for Periodic Electric Currents.
1632817	do	Bascom, H. M.	Transmission System.
1632826	do	Eagon, L. L.	Trunk Signaling System.
1632852	do	Richter, J. W.	Feeding Device.
1632853	do	Rock, G. L.	Method of Insulating Cores.
1632874	do	Blount, H.	Means for Lubricating Bearing Surfaces.
1632875	do	Bouvier, G. A.	Strand Handling Apparatus.
1632876	do	do	Strand Tensioning Device.
1632884	do	Carter, H. F.	Serving Machine.
1632886	do	Cox, L. T.	Testing System.
1632895	do	Hazelthorn, T.	Cleaner.
1632900	do	Jammer, J. S.	Repeater Circuits for Multiplex Systems.
1632901	do	Johnson, H. B.	Trunking System.
1632902	do	Johnson, L. H.	Testing System.
1632908	do	Lundell, A. E.	Register Controlling System.
1632909	do	Mason, S. R.	Buffing and Cleaning of Metal Parts.
1633016	do	Hartley, R. V. L.	Electric Wave Modulating System.
1633082	do	Espenschied, L.	Distribution of Intelligence.
1633100	do	Heising, R. A.	Plural Channel Signaling.
1633181	do	Jespersen, H. W.	Mechanism for Working Pulpous Material.
1633576	June 28, 1927	Franks, C. H.	Protective Coating.
1633577	do	do	Electrical Coil.
1633590	do	Lamplough, L. F.	Method of and Apparatus for Vulcanizing Rubber.
1633591	do	do	Method of and Apparatus for Vulcanizing Material.
1633592	do	Hart, C. D.	Do.
1633611	do	Shanck, R. B.	Means for Preventing Electrical Interference.
1633615	do	Silent, H. C.	Delay Circuits for Voice Operated Devices.
1633625	do	Espenschied, L.	Secrecy System.
1633987	do	Heimann, G.	Semi-Automatic or Automatic Graded Service Telephone Systems.
1634007	do	Aldendorff, F.	Automatic Switching System.
1634271	July 5, 1927	Shackleton, S. P.	Composite Ringer.
1634286	do	Herman, J.	Telegraph Circuits.
1634299	do	Parker, R. D.	Do.
1634343	do	Smith, G. O.	Alloy.
1634359	do	Hocker, C. D.	Coating composition.
1634734	do	Blauvelt, W. G.	Telephone Exchange System.
1634800	do	Schelleng, J. C.	Rectifying and Modulating System.
1635129	do	Krum, C. L. and H. L.	Telegraph Transmitter.
1635130	do	Krum, H. L.	Telegraph System.
1635131	do	do	Selective Telegraph System.
1635207	July 12, 1927	Espenschied, L.	Carrier Current Telegraphy.
1635209	do	Fell, J. M.	Telegraph Distortion Measuring System.
1635227	do	Shackleton, S. P. and Glezen, L. L.	Cord Circuit Repeater.
1635486	do	Krum, C. L. & H. L.	Printing or Selecting Telegraphs.
1635990	July 19, 1927	Gargan, J. O.	Electrostatic Condenser.
1635992	do	Haddock, A.	Electron Discharge Device.
1635999	do	Housekeeper, W. G.	Do.
1636006	do	Lum, G. R.	Telephone Transmitter Mounting.
1636015	do	Ronci, V. L.	Electron Discharge Device.
1636031	do	Wright, S. B.	Voice Operated Relay Equipment.
1636053	do	Hamilton, B. P.	Carrier Telegraph Repeater Circuits.
1636054	do	Holden, W. H. T.	Electrical Discharge Device.
1636134	do	Horton, J. W.	Carrier Wave Signaling System.
1636146	do	Mohr, F.	Control of Electric Waves.
1636152	do	Shea, T. E.	Wave Filter.
1636170	do	Chaplin, M. P.	Stepping Mechanism.
1636171	do	Clark, E. H.	Telephone Exchange System.
1636175	do	Fay, J. W.	Soldering Unit.
1636178	do	Gargan, J. O.	Variable Inductive Device.
1636436	do	Rettenmeyer, F. X.	System for Wave Analysis.
1636713	do	Reier, G. C.	Electrical Wave Filter.
1636737	do	Dietze, E.	Do.
1636763	do	Boving, H.	Metallic Composition.
1636765	do	Curtis, A. S.	Wave Transmission System and Apparatus.
1636830	do	Nicolson, A. M.	Cement Composition and Method of Preparation.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1637082	July 19, 1927	Maxfield, J. P.	Sound Recording Method.
R. 18228	Oct. 20, 1931	do	Do.
1637161	July 26, 1927	Richard, C. D.	Synchronizing Mechanism.
1637171	do	Bell, J. H.	Duplex Telegraph System.
1637324	do	Perry, D. B.	Printing Telegraph Exchange System.
1637403	Aug. 2, 1927	Abbott, H. H.	Telephone System.
1637404	do	Bown, R.	Signaling System.
1637419	do	Klein, C. H.	Nail Expansion Anchor.
1638430	Aug. 9, 1927	Bailey, R. S. and Broe, E. P.	Straightforward Trunking System.
1638432	do	Connors, N. D.	Strand Tightener.
1638437	do	Gannett, D. K. and Kirkwood, M.	Electrical Network.
1638534	do	Kelsay, LeR. W.	Cartridge Fuse.
1638535	do	Kemp, A. R.	Plastic Material.
1638542	do	Mesa, J. O.	Clutch.
1638551	do	Ronci, V. L.	Electron Discharge Device.
1638555	do	Wente, E. C.	Translating Device.
1638556	do	Wheeler, E. B.	Process of Making Insulated Conductors.
1638557	do	Wilson, J. M.	Insulating Compound.
1638559	do	Zogbaum, F.	Signaling System.
1638578	do	Hill, M. F.	Automatic Telephone Exchange.
1638579	do	Hocker, C. D.	Coating Compositions.
1638580	do	Horton, J. W.	Method of and Means for Transmitting Signals.
1638925	Aug. 16, 1927	Espenschied, L.	High Frequency Signaling System.
1638930	do	Herman, J.	Voltage Regulator for Vacuum Tubes.
1638952	do	Nyquist, H.	Means for Regulating Transmission Circuits.
1638993	do	Hartley, R. V. L.	Modulation System.
1639000	do	Horton, J. W.	Wave Modulation.
1639045	do	Marrison, W. A.	Harmonic Frequency Producer.
1639135	do	Johnson, H. B. and Eagon, L. L.	Telephone System.
1639652	Aug. 23, 1927	Fay, J. W.	Method of and Means for Forming Composit Articles.
1639653	do	Fay, J. W. and Wales, C.	Method of and Apparatus for Welding Metal Strands.
1639673	do	Seeley, G. A.	Method of and Apparatus for Braiding.
1639676	do	Thronsen, S.	Method of and Mechanism for Winding Strand Material.
1639688	do	Duncan, G. W.	Welding Tool.
1639692	do	Gauthier, E.	Bearing.
1639700	do	Martin, W. I.	Machine for Assembling Parts or Elements of Fabricated Articles.
1639773	do	Hamilton, H. S.	Two-Way Telephone Transmission.
1639799	do	Friend, O. A. and Dustin, G. E.	Automatic Telephone System.
1639819	do	Thompson, G. K.	Cleaning Device for Dials of Telephone Instruments.
1639929	do	Curtis, A. M.	Signaling System.
1640425	Aug. 30, 1927	Percival, H. S.	Measuring Instrument.
1640435	do	Armstrong, F. C.	Sighting Instruments for Measuring Angles.
1640462	do	Mathes, R. C.	Electron Discharge Device.
1640469	do	Ronci, V. L.	Leading-In Conductor.
1640503	do	Houskeeper, W. G.	Electron Discharge Device.
1640524	do	Augustine, R. W.	Means for Detecting Metal Particles in Non-Metallic Material.
1641145	Sept. 6, 1927	Aldendorff, F.	Automatic Switching.
1641218	do	Bailey, R. S.	Straightforward Trunking System.
1641251	do	Curtis, A. M.	Vibrating Device.
1641257	do	Fay, J. W.	Apparatus for Handling and Severing Articles.
1641276	do	Huntington, V. C.	Method of and Apparatus for Advancing Articles.
1641285	do	Miller, D. D.	Relay.
1641286	do	Mueller, E. C., Jr.	Test Plug.
1641289	do	Ohl, R. S.	Radio Signaling System.
1641290	do	Perry, D. B.	Printing Telegraph Exchange System.
1641300	do	Spencer, F. C.	Material Distributing Device.
1641359	do	Stoller, H. M.	Dynamo-Electric Machine.
1641425	do	Graham, F. H.	Transmission Control.
1641431	do	Horton, J. W.	Communication System.
1641432	do	Hubbard, F. A.	System for Determining the Direction of Propagation of Wave Energy.
1641447	do	McGall, P. K.	Measuring Instrument.
1641449	do	O'Neill, H. W.	Telephone System.
1641450	do	do	Do.
1641473	do	Chylinski, S. Z.	Induction Coil.
1641664	do	De Forest, L.	Electrical Sound Reproducing Apparatus.
1641925	do	Gabriel, J. C.	Inductive Coupling Device.
1641973	Sept. 13, 1927	Horton, J. W.	Frequency Meter.
1642025	do	Hosford, R. F.	Crossarm.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1642040	Sept. 13, 1927	McCutchen, B. S.	Public Address System.
1642048	do	Vernam, G. S., and Perry, D. B.	Printing Telegraph System.
1642363	do	De Forest, L.	Telephone Device.
1642389	do	Shea, T. E.	Voltage Amplifier.
1642488	do	Clausen, H. P.	Electrical Coil.
1642498	do	Houskeeper, W. G.	Electron Discharge Device.
1642499	do	Jammer, J. S.	Transmission Regulation.
1642500	do	Kiesel, W. C., and Fowler, C. B.	Telephone System.
1642506	do	Norton, E. L.	Wave Transmission System.
1642507	do	Porter, L. F.	Telephone System.
1642517	do	Taylor, H. S.	Socket.
1642522	do	Vroom, E.	Loop Antenna.
1642525	do	Wheeler, E. B.	Recording Device.
1642702	Sept. 20, 1927	Strom, F. H.	Synchronizing Attachment for Phonographs.
1642708	do	Thorp, V. P.	Carrier Telegraph Receiver.
1642710	do	Affel, H. A.	Pilot Channel Indicating System.
1642749	do	Rose, A. F.	Telephone Repeater System.
1642755	do	Ward, H. L.	Forming Apparatus.
1642771	do	Fullarton, G. M.	Apparatus for Assembling Parts.
1642773	do	Gauthier, E.	Punch Press.
1642774	do	Grange, D.	Marked Article and Process of Making Articles.
1642776	do	Jones, W. C.	Telephone Receiver.
1642777	do	Jones, W. C.	Receiver.
1642778	do	Elmen, G. W.	Do.
1642785	do	McFarland, R. E.	Braiding Machine.
1643068	do	Ray, W. H.	Forming Apparatus.
1643089	do	Ray, W. H. & Strawn, M. L.	Skiving Apparatus.
1643323	Sept. 27, 1927	Stone, J. S.	Directive Antenna Array.
1643332	do	Campbell, G. A.	Electrical Network.
1643350	do	Shetzline, R. A.	Neutralization of Inductive Interference.
1643452	do	Hinrichsen, E. E.	Telephone System.
1644004	Oct. 4, 1927	Zobel, O. J.	Electrical Wave Filter.
1644014	do	Gordon, C. S., and Lowe, J. T.	Carbon Monoxide Detector.
1644024	do	McCurdy, R. G.	Lighting Circuit.
1644060	do	Hovland, H.	Telephone System.
1644727	Oct. 11, 1927	Jacobsen, E.	By-Pass Selector Circuit.
1644745	do	Potter, R. K.	Transmission Level Control System.
1644761	do	Toomey, J. F.	Signaling System.
1644788	do	Moore, C. R.	Acoustic Device.
1644789	do	Nordenswan, R., and Curtis, A. S.	Electromagnetic Device.
1645139	do	Harrison, H. C.	Mechanical Vibratory System.
1645147	do	Kuhn, J. J., and Betts, W. L.	Switching Device.
1645152	do	May, D. T.	Wire Splicing Machine.
1645165	do	Shackelton, W. J.	Transformer Circuits.
1645174	do	Wilson, I. G.	Electrical Disturbance Eliminating System.
1645573	Oct. 18, 1927	Bascom, H. M.	Telephone Exchange System.
1645607	do	Matte, A. L.	System of Synchronizing Signaling Apparatus.
1645618	do	Nyquist, H.	Method and Apparatus for Measuring Transmission Delay.
1645758	do	Kemp, A. R.	Submarine Cable Insulation.
1645778	do	Shiel, J. B.	Telephone System.
1645805	do	Dowd, A. D.	Printing Telegraphy.
1645810	do	Hubbard, F. A.	Direction Finding and Indicating System.
1645823	do	Shann, O. A., and Kuntz, F. A.	Sound Producing Device.
1645850	do	Bernhard, F. S.	Regulator.
1646389	Oct. 25, 1927	Bunting, E. N.	Granular Carbon and Process of Making the Same.
1646438	do	Affel, H. A.	Harmonic Generator.
1646439	do	do	Do.
1646444	do	Carpe, A., and Deardorff, R. W.	Protection Circuits.
1646811	do	Curtis, A. M.	Electric Current Transmission.
1646825	do	Kochendorfer, F. S.	Fibrous Article and Method for Producing Such Article.
1647192	Nov. 1, 1927	Nyquist, H.	Apparatus for Controlling the Frequency of an Alternating Current.
1647212	do	Crisson, G.	Vacuum Tube Echo Suppressor.
1647216	do	Espenschied, L.	Amplifying Circuit.
1647236	do	Long, M. B.	Electrical Testing System.
1647238	do	Manthorne, W. H.	Electron Discharge Device.
1647242	do	Mills, J.	Recording and Reproducing System.
1647244	do	Mitchell, C. E.	Telephone Transmitter.
1647256	do	Stokely, R. L.	Selector Switch Circuits for Step-by-Step Systems.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1647258	Nov. 1, 1927	Ulrich, H. W	Telephone System.
1647259	do	Vadersen, H	Adjustable Coil.
1647263	do	Blount, H	Carrier.
1647267	do	Buckley, O. E	Loaded Submarine Cable Telegraph System.
1647270	do	Burton, E. T	System for Indicating Frequency Changes.
1647284	do	Field, J. C	Signaling System.
1647286	do	Fisher, H. J	Telephone System.
1647287	do	Floyd, C. L	Tension Measuring Device.
1647290	do	Haddock, A	Antenna Switching Relay.
1647349	do	Friis, H. T	Radio Signaling Apparatus.
1647363	do	Jacobsen, E., and Sperry, A. B.	Telephone System.
1647373	do	Reeves, F. N	Selective Switch Controlling System.
1647383	do	Ulrich, H. W	Regulating Means and Circuits.
1647605	do	Chesnut, R. W	Circuit for Electric Discharge Devices.
1647615	do	Gargan, J. O	Electrical Coil.
1647617	do	Griffith, T. R	Electron Discharge Device.
1647631	do	Ives, H. E	Optical System.
1647634	do	Johnson, K. S	Electric Wave Filter.
1647645	do	Marrison, W. A	Electrical Generator.
1647737	do	Legg, V. E	Magnetic Core.
1647738	do	do	Insulation of Magnetic Material.
1647760	do	Von Zastrow, C. G	Signaling System.
1647765	do	Arnold, H. D	Transmission of Pictures By Electricity.
1647792	do	Gent, E. W	Switching Device.
1647796	do	Glezen, L. L., Shackleton, S. P., and Vroom, E.	Telephone System.
1647988	Nov. 8, 1927	Farrington, J. F	Wave Modulating.
1647990	do	Goodrum, C. L	Telephone Exchange System.
1647993	do	Hoffmann, H. L	Telephone System.
1647994	do	Houskeeper, W. G	Electron Discharge Device.
1647998	do	Landeen, A. G	Electrical Energy Translation System.
1647999	do	Laskey, W. G	Telephone Switchboard Lamp.
1648006	do	Schafer, J. P	Rectifier and Modulator.
1648009	do	Stearn, F. A	Machine Switching Selector Switch Circuit.
1648053	do	Martin, G. R	Telephone System.
1648058	do	Parker, R. D	Electro-Vision.
1648079	do	Toomey, J. F	Testing System for Telephone Cord Circuits.
1648120	do	Harrison, H. C	Vibration Responsive Device.
1648121	do	Hartley, R. V. L	Apparatus and System for Detecting Vibrations.
1648122	do	Hinrichsen, E. E	Telephone Exchange System.
1648127	do	Ives, H. E	Transmission of Pictures By Electricity.
1648145	do	Nyquist, H	Method and Apparatus for Compensating for Distortion on Long Loaded Lines.
1648149	do	Reeve, H. T	Method of Forming Refractory Crucibles.
1648179	do	Hull, S. M	Organic Molding Composition.
1648427	do	Seeley, G. A	Press.
1648443	do	Cawthon, S. C	Electric Cable.
1648922	Nov. 15, 1927	Vernam, G. S	Printing Telegraph System.
1648944	do	Hofstetter, R	Nut Tightening Apparatus.
1648974	do	Vernam, G. S	Printing Telegraph Exchange System.
1648975	do	do	Do.
1649016	do	Buckley, O. E	Control Apparatus for Electric Discharge Devices.
1649099	do	Carpenter, W. W	Telephone Exchange System.
1649309	do	Ives, H. E	Photomechanical Reproduction of Pictures.
1649819	Nov. 22, 1927	Fell, J. M	System of Television.
1649863	do	Shanck, R. B	Cross Fire Neutralizing System.
1649884	do	Wright, S. B	Protective Circuits.
1649912	do	Murphy, F	Wire Drawing Apparatus.
1649924	do	Roman, F. L., and Winsemius, H. T.	Insulated Electrical Conductor.
1650655	Nov. 29, 1927	Rose, A. F	System of Multi-Frequency Circuits.
1650671	do	Vernam, G. S	Stereopticon Control Device.
1650683	do	Bascom, H. M., and Fowler, C. B.	Straightforward Trunking System.
1650701	do	Farrington, J. F	Radio Signaling System.
1650706	do	Gent, E. W	Terminal Bank and Method of Constructing It.
1650708	do	Gooderham, J. W	Telephone Exchange System.
1650721	do	Peoples, R. E	Testing System.
1650731	do	Wilbur, R. S	Telephone System.
1650740	do	Roberts, J. G	Transmitter.
1650745	do	Stearn, F. A	Counting Relay Operation.
1650763	do	MacKenzie, D	Telephone Exchange System.
1650865	do	Edwards, W. H	Head Band for Telephone Receivers.
1651017	do	Deakin, G	Party Line Revertible Ringing System.
1651019	do	Emery, C. B	Electrical Circuit Connecting Device.
1651021	do	Field, F. E	Voltage Limiting Device.
1651024	do	Hart, C. D	Method of and Apparatus for Serving a Core.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1651440	Dec. 6, 1927	Campbell, G. A.	Electrical Testing Apparatus.
1651451	do	Fish, L. B.	Battery Light.
1651480	do	St. John, E.	Do.
1651957	do	Lowry, H. H.	Insulation of Finely Divided Magnetic Material.
1651958	do	do	Do.
1652239	Dec. 13, 1927	Edwards, W. H., and Tucker, R. S.	Coin Collector.
1652241	do	Hall, M. C.	Device for Electrical Measurement.
1652242	do	Herman, J.	Telegraph Repeater.
1652489	do	Mead, E. D.	Electromagnetic Device.
1552490	do	Miller, D. D.	Do.
1652491	do	do	Do.
1652549	do	Wold, P. I.	Carrier Wave Telegraphy.
1652995	do	Ryan, F. M.	Eelectric Wave Signaling System.
1653031	Dec. 20, 1927	Zogbaum, F.	Signaling System.
1653074	do	Weaver, A.	Transmission of Pictures by Electricity.
1653082	do	Bailey, A.	Volume Indicator.
1653089	do	Demarest, C. S.	Telegraph System.
1653215	do	Kochendorfer, F. S., and Shulz, A. E.	Apparatus for Heat Treating Metals.
Des. 74114	do	Lum, G. R.	Loud Speaking Sound Reproducer.
1653694	Dec. 27, 1927	Branson, D. E.	Apparatus and Method for Measuring Transmitted Light.
1653736	do	Shackleton, S. P., and Schott, J. T.	Impulse Registering Device.
1653738	do	Silent, H. C.	Suppression of Echoes and Singing in Four-Wire Circuits.
1653782	do	Riggs, G.	Testing System.
1653789	do	Stokely, R. L.	Telephone Exchange System.
1653790	do	Temple, D. L.	Automatic Telephone System.
1653794	do	Whitehorn, H. A.	Temperature Compensating Means for Maintaining Constant Frequency in Tuning Forks.
1653804	do	Hague, A. E.	Automatic Electric Cut-Out.
1653805	do	Housekeeper, W. G.	Method of Removing Enamel from Electrical Conductors.
1653837	do	Black, H. S.	Modulated Carrier Wave Signaling System.
1653840	do	Byl, G. N.	Clamping Device.
1653843	do	Dowey, T. L.	Synchronizing Mechanism.
1653878	do	Schelleng, J. C.	Electric Wave Signaling System.
1653879	do	Siegmund, H. O.	Electrolytic Cell.
1653881	do	Snook, H. C.	Apparatus for Varying the Wave Form of Alternating Current.
1653887	do	Black, H. S.	Frequency Translating Circuits.
1653888	do	Chaplin, M. P.	Stepping Mechanism.
1653890	do	Deakin, G.	Telephone System.
1653898	do	Gilson, A. F. F.	Signaling System and Apparatus.
1653899	do	Goff, H. W.	Coupling.
1654062	do	Willis, F. C.	Translating Apparatus.
1654068	do	Blattner, D. G.	Apparatus for Visual Interpretation of Speech and Music.
1654071	do	DeMonte, E. W., and Shea, T. E.	Electrical Wave Filter.
1654074	do	Fondiller, W.	Loading System.
1654075	do	Gorton, W. S.	Electric Wave Transmitting Means.
1654080	do	Heising, R. A.	Carrier Signaling System.
1654085	do	Lorance, G. T.	Voltage Limiting Device.
1654090	do	Oswald, A. A.	Modulation Indicator.
1654097	do	Shackelton, W. J.	Alternating Current Supply Means.
1654098	do	Shea, T. E.	Electrical Circuit.
1654123	do	Hartley, R. V. L.	Frequency Selective Transmission System.
1654297	do	Malm, F. S.	Adhesive Compound.
1654328	do	Gilbert, J. J.	Submarine Signaling.
1654374	do	Horton, J. W.	Transmission of Pictures by Electricity.
1654524	Jan. 3, 1928	Boe, H. J.	Housing.
1654526	do	Brown, A. B.	Method of Operating Extruding Process.
1654534	do	Dean, E. A.	Electrical Insulator.
1654546	do	Malm, F. S.	Electric Cable.
1654633	do	Bisbee, F. C.	Recording System.
1654645	do	Green, I. W.	Do.
1654657	do	Matthews, E. M.	Cable Terminal.
1654890	do	Mathes, R. C.	Loading System.
1654899	do	Schwerin, P.	Electron Discharge Device.
1654900	do	Sivian, L. J.	System for Secret Signaling.
1654902	do	Smythe, E. H.	Modulating System.
1654903	do	Sprague, C. A.	Oscillation Generator.
1654905	do	Voos, F. A.	Measuring Syringe.
1654912	do	Baulch, E. L.	Telephone System.
1654923	do	Dehn, J. W.	Do.
1654926	do	Engel, T. J.	Talking Motion Picture.
1654927	do	Farrington, J. F.	Transmission Circuits.

Patent no.	Date of issue	Inventor	Title
1654928	Jan. 3, 1928	Field, J. C., and Zogbaum, F.	Control and Indicating System for Electric Railways.
1654929	....do....	Foley, J. W.	Amplifier Circuits.
1654932	....do....	Heising, R. A.	Magnetic Amplifying System.
1655026	....do....	Siegmund, H. O., and Brown, B. E.	Electrolytic Cell.
1655048	....do....	DeMonte, R. W.	Electrical Coil System.
1655054	....do....	Gargan, J. O.	Adjusting and locking Device.
1655056	....do....	Goff, H. W.	Selector Switch.
1655059	....do....	Hess, G. K.	Do.
1655061	....do....	Jordan, W. C.	Telephone Exchange System.
1655373	....do....	Kellar, W. S.	Method of Rolling Thin Strips of Metal.
1655420	Jan. 10, 1928	Herman, J.	Intermediate Telegraph Station.
1655421	....do....	....do....	Differential Duplex Telegraph Repeater.
1655448	....do....	Watson, E. F.	Printing Telegraph System.
1655520	....do....	Smythe, E. H.	Carrier Wave Communicating and Switching System.
1655537	....do....	Foley, J. W.	Amplifier Circuits.
1655543	....do....	Heising, R. A.	Transmission System.
1655557	....do....	Mathes, R. C.	Amplifier Circuits.
1655625	....do....	Nicolson, A. M.	Piezo-Electric Device.
1655843	....do....	Reynolds, J. L.	Signal Controlling Apparatus.
1655847	....do....	Siebs, C. T.	Magnetic Temperature Regulator.
1655852	....do....	Adams, A. H.	Do.
1656158	Jan. 17, 1928	Affel, H. A.	Reducing Intersystem Crosstalk Between Channels.
1656174	....do....	Dahl, A. C.	Braking Mechanism.
1656226	....do....	Palm, S. M., and Putnam, H. P.	Wire Clamp.
1656243	....do....	Seeley, G. A.	Severing Apparatus.
1656250	....do....	Thompson, E. O., Grimes, D., and Fisher, H. C.	Alternating Current Relay.
1656251	....do....	Till, H. R.	Vulcanizing Apparatus.
1656255	....do....	Wente, E. C.	Talking Motion Picture Production.
1656258	....do....	Yale, W. S.	Method of Joining Sheaths for Cores.
1656632	....do....	Harrison, H. C.	Diaphragm Drive.
1656737	....do....	Kemp, A. R.	Insulating Material and Method of Producing the Same.
1656755	....do....	Palmer, R.	Method of, and Apparatus for, Removing Coverings from Cores.
1656915	Jan. 24, 1928	Ives, H. E.	Transmission of Pictures by Electricity.
1656916	....do....	King, D. H., Dowd, F. J., and Stevens, C. W.	Selector Switch.
1656956	....do....	Schroter, F.	Electric Vacuum Valve Tube.
1656957	....do....	....do....	Glow Discharge Valve.
1656987	....do....	Ohl, R. S.	Ultra High Frequency Generator.
1657030	....do....	Nielsen, J. F.	Transmission of Pictures.
1657078	....do....	Frederick, H. A., and Blattner, D. G.	Acoustic Stethoscopics.
1657235	....do....	Sundt, E. V.	Contact Device.
1657308	....do....	Jespersen, H. W.	Material Reeling Mechanism.
1657451	Jan. 31, 1928	Affel, H. A.	Non-Singing Reamplifying Circuits.
1657462	....do....	Espenschied, L.	Do.
1657498	....do....	Demarest, C. S., and Almquist, M. L.	Radio Signaling System.
1658094	Feb. 7, 1928	Paschen, H. F., and DePotter, E. F.	Paper Conveying System.
1658095	....do....	Paschen, H. F.	Feeding Device for Belt Conveyers.
1658096	....do....	....do....	Unloading Device for Belt Conveyers.
1658192	....do....	Hampton, L. N.	Brake for Rolling Ladders.
1658197	....do....	Hinrichsen, E. E.	Telephone Exchange System.
1658200	....do....	Housekeeper, W. G.	Electron Discharge Device.
1658210	....do....	Ryan, F. M.	Electric Wave Signaling System.
1658215	....do....	Vennes, H. J.	Current Wave Transmission.
1658222	....do....	Burns, R. M., and Warner, C. W.	Electro-Cleaning.
1658232	....do....	Eaves, A. J.	Train Announcing System.
1658315	....do....	Wheeler, E. B.	Battery.
1658327	....do....	Dodge, H. F.	Stethoscopic Apparatus.
1658337	....do....	Jammer, J. S.	Carrier Wave Signaling System.
1658338	....do....	Jammer, J. S., and Green, C. W.	Two-Way Repeater.
1658339	....do....	Jammer, J. S.	Carrier Wave Transmission.
1658346	....do....	Mathes, R. C.	Amplifier Circuits.
1658349	....do....	Moore, C. R.	Loud Speaking Receiver.
1658404	....do....	Bruce, W. M., Jr.	Telegraphy.
1658829	Feb. 14, 1928	Berry, C. H.	Telephone System.
1658843	....do....	Gray, F.	Modulating Syst m.
Re. 18,400	Mar. 29, 1932	....do....	Do.
1658846	Feb. 14, 1928	Hoffman, H. L.	Recording Device.
1658851	....do....	Martin, DeL. K.	Directive Radio Repeating System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1658856	Feb. 14, 1928	Potter, R. K.	Tansmission Line Control System.
1658887	do	Dotzauer, J. F.	Duct Grapple.
1659083	do	Clark, E. H.	Telephone Exchange System.
1659570	Feb. 21, 1928	Ives, H. E.	Transmission of Pictures by Electricity.
1659716	do	Bancroft, E. P., Burkholder, J. C., and Phelps, W. A.	Picture Transmission System.
1659729	do	Gannett, D. K.	Constant Voltage Alternator.
1659731	do	Green, E. I.	Insulator.
1659745	do	Rapelje, J. A.	Wire Clamp.
1659895	do	Ray, W. H.	Material Applying Apparatus.
1659911	do	Fay, J. W.	Apparatus for Performing Soldering Operations.
1659919	do	Marchev, A.	Tension Measuring Device.
1659921	do	Nichols, J. C.	Clamping Device.
1659927	do	Stull, J. S.	Attaching Device and Molded Member Containing the Same.
1659933	do	Wegel, R. L.	Loud Speaker.
1659936	do	Albright, H. F.	Molding Composition.
1659945	do	Farrington, J. F.	Duplex Communication.
1659946	do	Fay, J. W.	Apparatus for Heat Treating Articles.
1659953	do	Jespersen, H. W.	Mechanism for Working Pulpous Material.
1660072	do	Farrington, J. F.	Duplex Transmission System.
1660084	do	Morton, E. R.	Electrical Control System.
1660388	Feb. 28, 1928	Matte, A. L.	System of Synchronizing Signaling Apparatus.
1660389	do	do	Do.
1660405	do	Affel, H. A.	High Frequency Measuring System.
1660975	do	Quass, R. L.	Telephone System.
1660979	do	Thayer, W. J.	Current Control Device.
1660990	do	Dodge, H. F.	Sound Responsive Device.
1660994	do	Garvin, J. S.	Electromagnetic Device.
1660996	do	Holland, N. H.	Combined Radio Loud Speaker and Phonograph.
1661004	do	Mills, J.	Signaling System.
1661006	do	Moore, C. R.	Telephone Transmitter.
1661012	do	Pfannenstiehl, H.	Automatic Impulse Transmitter.
1661167	Mar. 6, 1928	Clark, A. B., and Gannett, D. K.	System of Picture Transmission.
1661249	do	Deakin, G.	Timing Device.
1661261	do	Murphy, P. B.	Signal Receiving System.
1661263	do	Nyquist, H.	Method of and Means for Regulating the Transmission Over Electric Circuits.
1661264	do	do	Do.
1661535	do	Haddock, A.	Electric Shielding.
1661536	do	Jordan, W. C.	Telephone Exchange System.
1661539	do	Maxfield, J. P.	Phonograph System.
1661751	do	Fletcher, H.	Acoustical Apparatus.
1661793	do	Espenschied, L.	Sound Recording and Reproducing.
1662060	Mar. 13, 1928	Herman, J.	Relay and Circuits Therefor.
1662071	do	Manderfeld, E. C.	Regulating System.
1662081	do	Silent, H. C.	High Frequency Modulating System.
1662083	do	Stoller, H. M., and Morton, E. R.	Electric Regulator.
1662084	do	do	Do.
1662085	do	Stoller, H. M.	Regulating System.
1662126	do	Potter, R. K.	Duplex Radio Signaling Set.
1662168	do	Reynolds, J. L.	Switching Apparatus and System.
1662252	do	Morton, E. R.	Electric Regulator.
1662876	Mar. 20, 1928	Affel, H. A.	Repeater System.
1662877	do	Almquist, M. L.	Radio Signaling System Employing Machine Switching Dial.
1662888	do	Herman, J.	Automatic Volume Control for Telephone Lines.
1662956	do	Buckley, O. E.	Telegraph Conductor.
1662966	do	Foley, J. W.	Substation Circuit.
1663086	do	Long, M. B.	Means for Indicating Frequency Changes.
1663110	do	Bruce, W. M., Jr.	Radio Receiver.
1663230	do	Aldendorff, F.	Electromechanical Telephone System.
1663231	do	do	Automatic Telephone System.
1663747	Mar. 27, 1928	Bascom, H. M.	Telephone Exchange System.
1663748	do	Bender, H. D., and Kent, R. J.	Braid Stripper for Insulated Wires.
1663750	do	Best, F. H.	Automatic Transmission Measuring Set.
1663880	do	Gabriel, J. C., and Thurston, G. M.	Signaling Apparatus.
1663884	do	Harrison, H. C.	Device for the Transmission of Vibratory Energy.
1663885	do	Holland, N. H.	Electromagnetic Device.
1663890	do	Stoller, H. M.	Electrical Control System.
1663891	do	Stoller, H. M., and Morton, E. R.	Regulator System Employing Electron Discharge Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1664017	Mar. 27, 1928	Benjamin, J. C.	Loud Speaking Device.
1664453	Apr. 3, 1928	Herman, J.	Manual Morse Multiplex System.
1664455	do	King, R. W.	Electrical Translating Circuit.
1664468	do	Strieby, M. E.	Program Selecting Circuits.
1664495	do	Vadersen, H.	Variable Inductance Appartaus.
1664652	do	Watson, E. F., and Weaver, A.	Picture Transmitting System.
1664755	do	Norton, E. L.	Electrical Network.
1664852	do	Dodge, H. F.	Transmitter Mouthpiece.
1664860	do	Heising, R. A.	Signal System.
1665283	Apr. 10, 1928	Singer, F. J.	Signaling System.
1665296	do	Cory, S. I.	Grounded Duplex Telegraph System.
1665297	do	do	Do.
1665318	do	Mead, E. D.	Electromagnetic Device.
1665325	do	Peterson, E.	Electrical Network and Its Operation.
1665328	do	Schmitt, H. R.	Carrier Wave Transmission.
1665338	do	Whitney, W.	Telephone System.
1665499	do	Hoch, E. T.	System of Grouping Units.
1665501	do	Jammer, J. S.	Amplifying Repeater.
1665508	do	Schumacher, E. E.	Electron Discharge Device and Circuit Therefor.
1665673	do	Nottingham, W. B.	Arrangement of Carrier Channels in Multiplex Signlaing Systems.
1665674	do	Oswald, A. A.	System Including Space Discharge Device.
Re18501	June 21, 1932	do	Do.
1665698	Apr. 10, 1928	Gorton, W. S.	Electric Current Transmission.
1666153	Apr. 17, 1928	Toomey, J. F.	Program Selecting Circuits.
1666154	do	Toomey, J. F.	Distribution of Programs Over Wires.
1666158	do	Affel, H. A.	System for Binaural Transmission of Signals.
1666191	do	Bandur, A. F.	Method of Treating Magnetizable Materials.
1666195	do	Clokey, A. A.	Duplex Telegraph System.
1666206	do	Hartley, R. V. L.	Modulation System.
1666214	do	Little, J. S.	Method of Coating Cores.
1666651	do	Heising, R. A.	Plural Channel Secrecy System.
1666661	do	Morton, E. R.	Inductance Coil.
1666676	do	Bjornson, B. G.	Repeater Circuits.
1666680	do	Buckley, O. E.	Dynamometer.
1666681	do	Burgess, H. A.	Mechanical Wave Filter.
1666738	do	Hartley, R. V. L.	Transmission Circuit.
1666947	Apr. 24, 1928	Silent, H. C.	Method of and Means for Reducing Body Capacity Effects on Loop Antenna Systems.
1666965	do	Herman, J.	Differential Duplex Telegraph Repeater.
1666988	do	Blauvelt, W. G.	Trunking System.
1667006	do	Hofstetter, R.	Lapping Machine.
1667028	do	Boynton, S. E.	Material Working Apparatus.
1667753	May 1, 1928	Toomey, J. F.	Program Selecting Circuits.
1667792	do	Martin DeL. K.	Radio Signaling System.
1667804	do	Hoyt, F. A., and Shann, O. A.	Means for Reenforcing the Lock and Door of Telephone Coin Collectors.
1667805	do	Ives, H. E.	Transmission of Pictures by Electricity.
1667824	do	Richey, A. L.	Multiple Unit Cable.
1667830	do	Ulrich, H. W.	Telephone System.
1667845	do	Fowler, C. B., and Lucek, C. W.	Do.
1667846	do	do	Do.
1668240	do	Green, C. W.	Amplifying System.
1668270	do	Farrington, J. F.	Radio Signaling.
1668637	May 8, 1928	Espenschied, L., and Martin, DeL. K.	Directive Radio Repeating System.
1668638	do	do	Do.
1668654	do	Moore, C. R.	Direct Current Transforming Apparatus.
1668656	do	Phelps, W. A.	Relay Circuit.
1668674	do	Espenschied, L., and Martin, DeL. K.	Directive Radio Repeating System.
1668676	do	Fultz, M. E.	Electric Discharge Apparatus.
1668677	do	Harvey, W. H.	Telephone Exchange System.
1668687	do	Low, F. K.	Do.
1668724	do	Loewe, S.	Electron Discharge Tube.
1668725	do	McKown, F. W.	Telephone Transmission.
1668734	do	Schumacher, E. E.	Electron Emitting Cathode and Method of Making It.
1668742	do	Stoekle, E. R.	Apparatus for Making Electron Emitting Means.
1668748	do	Whiting, D. F., and Blanchard, J.	Means for Testing Electron Tubes.
1668757	do	Bown, R., and Hamilton, H. S.	Radio Transmission System.
1668856	do	MacKenzie, D.	Photographic Printing Machine.
1668888	do	Buckley, O. E.	Signaling System.
1668890	do	Curran, S. T., and Mueller, E. C., Jr.	Universal Adjustable Earpiece for Audiphones.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1668910	May 8, 1928	Jones, W. C	Adjustable Earpiece for Audiphones.
1669123	do	Espenschied, L., and Martin, DeL. K.	Directive Radio Repeating System.
1669368	do	Aldendorff, F	Electromechanically Controlled Telphone System.
1669448	May 15, 1928	Brand, S	Multiplex Signaling System.
1669449	do	do	Do.
1669450	do	do	Synchronization In Multiplex Signaling.
1669589	do	Buttner, H. H	Power Line Signaling System.
1669642	do	Andrews, J. W	Magnetic Material.
1669643	do	Andrews, J. W., and Gillis, R.	Do.
1669644	do	Andrews, J. W	Do.
1669645	do	Andrews, J. W., and Gillis, R.	Do.
1669646	do	Bandur, A. F	Do.
1669647	do	do	Do.
1669648	do	do	Do.
1669649	do	Beath, C. P., and Heinicke, H. M. E.	Do.
1669658	do	Elmen, G. W	Magnetic Core.
1669665	do	Karcher, J. C	Magnetic Material.
1670375	May 22, 1928	Nyquist, H	Picture Transmitting System.
1670376	do	do	High Speed Signaling System.
1670461	do	Locke, G. A	Signaling System.
1670777	do	Lum, G. R	Acoustic Device.
1671130	do	Shackleton, S. P	Grid Circuits of Electron Tubes.
1671143	do	Campbell, G. A	Wave Translator.
1671151	do	French, N. R., and Zinn, M. K.	Method of and Apparatus for Reducing Width of Transmission Bands.
1671172	do	Vernam, G. S	Volume Control Apparatus.
1671204	do	Oswald, A. A	High Voltage Vacuum Tube System.
1671205	do	do	Vacuum Tube Control.
1671302	do	Mathes, R. C	Electro-Optical Transmission.
1671976	June 5, 1928	Avery, G. R	Strand Tension Control Mechanism.
1672049	do	Almquist, M. L	Alternating Current Relay.
1672056	do	Carson, J. R	Translating Circuit.
1672057	do	Clark, A. B	Electrical Circuits.
1672215	do	Heising, R. A	Wave Varying and Transmitting.
1672784	do	Selvig, J. N	Strand Reeling Apparatus.
1672821	do	Martell, C	Submarine Cable Core and Insulator Therefor.
1672840	do	Terry, D. M	Amplifier.
1672866	June 12, 1928	Adams, A. H	Method of and Apparatus for Making Conductor Terminals.
1672933	do	Edwards, W. H., and Niles, E. W.	Lineman's Test Set.
1672940	do	Honaman, R. K	Carrier Transmission Over Power Circuits.
1672957	do	Shackleton, S. P	Signaling System.
1672963	do	Straw, W. A	Method of and Apparatus for Testing.
1672964	do	Stull, J. S	Clutch.
1672967	do	Watkins, S. S. A	Electrical Translating Device.
1672968	do	Whitehorn, H. A	Transmission Circuits.
1672969	do	Wickstrom, C. A	Reel.
1672970	do	Williams, S. B	Machine Switching Telephone System.
1672973	do	Albright, H. F	Method for Coating Cores.
1672975	do	Farrington, J. F	Wave Transmission System.
1672976	do	Field, J. C	Electromagnetic Device.
1672977	do	Field, F. E	Repeating Coil.
1672979	do	Fondiller, W	Loaded Conductor.
1672984	do	Marchev, A	Material Working Mechanism.
1672987	do	Mougey, W. E., and Collard, J.	Method of Balancing Cable Circuits.
1672991	do	Selvig, J. N	Serving Mechanism.
1672993	do	Snook, H. C	Protective Device.
1672994	do	Thompson, G	Telephone System.
1672995	do	Whiting, D. F	Electric Current Transmission.
1672998	do	Clement, L. M	Telegraph System.
1673002	do	Fearing, J. L	Control of Electric Waves.
1673005	do	Gargan, J. O	Condenser.
1673006	do	Heising, R. A	High Frequency Transmission and Reception.
1673008	do	Knoop, W. A	Electron Discharge Device.
1673014	do	Morrison, R. F	Apparatus for Assembling Articles.
1673015	do	Murphy, P. B	Switching System.
1673016	do	Oswald, A. A	System of Electrical Conductors.
1673020	do	Powell, R. E	Resistance Welding Electrode.
Re. 17604	Feb. 25, 1930	do	Do.
1673023	June 12, 1928	Rettenmeyer, F. X	Carrier Wave Repeater.
1673024	do	Royal, R	Electromagnetic Device.
1673026	do	Schelleng, J. C	Semi-Mechanical Rectifier.
1673031	do	Whiting, D. F	Wave Transmission System.
1673034	do	Adams, W. J., Jr	Connector.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1673036	June 12, 1928	Bertels, A. S	Monitoring Supervision on Party Lines in Automatically Operated Telephone Exchanges.
1673037	do	Blattner, D. G	Sound Measuring.
1673040	do	Bureau, A. A	Reel.
1673042	do	Curtis, A. M	Signaling System.
1673124	do	Raynsford, A	Do.
1673267	do	Price, R. A	Incandescent Electric Lamp.
1673270	do	Schulz, A. E., and Aeby, J. H.	Apparatus for Advancing Material to Material Working Apparatus.
1673271	do	Stewart, C. R. G	Method of Annealing.
1673281	do	Fay, J. W	Method of and Apparatus for Dispensing Matter.
1673284	do	Hodge, J. C	Material Handling Apparatus.
1673790	June 19, 1928	Bandur, A. F	Magnetic Material, Process of Producing It, and Electromagnetic Device Incorporating Such Material.
1673792	do	Affel, H. A	Level Control for Carrier Transmission Systems.
1673803	do	Daniels, E. A., and Snell, H. S.	Hardening Resinous Exudations with a Guanidine.
1673804	do	do	Hardening Resinous Exudations with an Aldehyde.
1673805	do	do	Hardening Resinous Exudations with Aminonaphthalene.
1673806	do	do	Hardening Resinous Exudations with an Aromatic Secondary Amine.
1673807	do	do	Hardening of Resinous Exudations by the Use of a Heterocyclic Compound.
1673808	do	do	Hardening Resinous Exudations with an Organic Compound.
1673813	do	Edelmann, O	Clamping Device.
1673828	do	Ives, H. E	Television.
1673829	do	Kirkwood, M	Testing of Telegraph Circuits.
1673830	do	do	Trouble Alarm for Telegraph Systems.
1673887	do	Selvig, J. N	Strand Reeling Apparatus.
1674677	June 26, 1928	Bascom, H. M	Connector Switch Circuit.
1674679	do	Blackwell, O. B	Voice Operated Echo Suppressor.
1674695	do	Nyquist, H., and Wright, S. B.	Radio Telephone System.
1674696	do	Ohl, R. S	Radio Receiving System.
1674705	do	Stone, J. S	Reactance Neutralizing Network.
1674709	do	Thomas, W. G	Reeling Device.
1674954	do	Dean, R. S., and Hudson, W. E.	Hardening Lead Alloy and Method of Producing Same.
1674955	do	do	Process for Preparing Lead Alloys on Which Work is to be Performed.
1674956	do	do	Extruding and Improving of Lead Alloys.
1674957	do	do	Process for Improving Lead Alloy Articles.
1674958	do	do	Alloy.
1674959	do	Dean, R. S	Hardenable Alloy.
1675096	do	Curtis, A. M	Signaling System.
1675102	do	Holland, N. H	Adjustable Reflector System for Recording.
1675412	July 3, 1928	Holden, W. H. T	Echo and Singing Suppressor System.
1675423	do	Ohl, R. S	Telephone Substation Circuits.
1675429	do	Schnee, H. E	Reeling Device.
1675441	do	Wright, S. B	Means for Measuring Balance of Electrica Networks.
1675460	do	Nyquist, H	Distortion Compensator.
1675643	do	Dean, R. S., and Hudson, W. E.	Storage Battery Grid.
1675644	do	do	Age Hardening Process.
1675823	do	Potts, L. M	Telegraph Transmitter.
1675828	do	Siegmund, H. O	Electrolyte.
1675848	do	Friis, H. T	Transmission Regulation.
1675849	do	Fultz, M. E	Alarm and Control Device.
1675853	do	Harrison, H. C	Wave Energy Translating Diaphragm and Method of Mounting Same.
1675866	do	Pierce, P. H	Selective Signaling Circuits.
1675872	do	White, J. H	Permanent Magnet and Method of Making the Same.
1675874	do	Baumann, H. C	Amplifying Electrical Variations.
1675876	do	Black, H. S	Translating Circuits.
1675879	do	Crandall, I. B	System for Producing and Transmitting High Frequency Sound Energy.
1675880	do	Curtis, A. M	Electric Current Transmission.
1675884	do	Elmen, G. W	Magnetic Material.
1675886	do	Hague, A. E	Telephone System.
1675888	do	Heising, R. A	Radio Transmission.
1675889	do	Kishpaugh, A. W	Electric Wave Signaling System.
1675890	do	Gabriel, J. C	High Frequency Transmission.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1675893	July 3, 1928	Jammer, J. S.	Carrier Wave Transmission.
1675894	do	Lindridge, C. D.	Method and Apparatus for Recording and Reproducing Sound.
1675956	do	Porter, L. F.	Telephone System.
1676240	July 10, 1928	Affel, H. A.	Radio Signaling System.
1676244	do	Blackwell, O. B., and Martin, DeL. K.	Multiple Channel Radio Receiver.
1676252	do	Coxhead, H. B.	Do.
1676301	do	Toomey, J. F.	Program Transmission System for Apartment Houses.
1676321	do	Carpe, A.	Secrecy Signaling System.
1676447	do	Krum, C. L., and H. L.	Electric Selecting Apparatus.
1676448	do	do	Selecting Apparatus for Electric Telegraphs.
1676605	do	Hart, C. D.	Feeding Mechanism.
1676606	do	Albright, H. F., Jr.	Do.
1676607	do	Lamplough, L. F.	Do.
1676614	do	Heising, R. A.	Frequency Grouping Arrangement for Communication Systems.
1676627	do	Black, H. S.	Method and Means for Reducing Crosstalk in Carrier Current Signaling Systems.
1677133	July 17, 1928	Ford, B. K.	Method of and Machine for Feeding and Working Articles.
1677135	do	Haase, C. O.	Strand Working Mechanism.
1677138	do	Hodge, J. C.	Tension Device.
1677139	do	Karcher, J. C.	Process for Increasing the Permeability of Silicon Steel.
1677157	do	Weaver, A.	System for Measuring Contact Rebounding.
1677159	do	Whited, B. L.	Material Working Machine.
1677161	do	Adams, A. H.	Method of and Device for Electric Welding.
1677167	do	Borgeson, S. E.	Material Unwinding Device.
1677168	do	Brown, A. B.	Machine Framework.
1677172	do	Calbeck, F. W., and Thornsen, S.	Method of and Apparatus for Working Materials.
1677178	do	Fay, J. W.	Method of and Apparatus for Assembling Members.
1677181	do	Grondahl, H. H. C.	Material Handling Apparatus.
1677186	do	Kochendorfer, F. S.	Strand Working Mechanism.
1677190	do	Loynes, O. H.	Modulating Atrangement.
1677191	do	do	Do.
1677193	do	McCurdy, R. G.	Short Circuiting Switch.
1677205	do	Pugh, E.	Device for Welding Parts.
1677206	do	do	Method of Electric Welding.
1677214	do	Santschi, A. E.	Electrically Heated Apparatus.
1677217	do	Selvig, J. N.	Material Unwinding Device.
1677224	do	Affel, H. A.	Carrier Receiving System.
1677240	do	Kochendorfer, F. S., and Gill, T. A.	Resistance Unit.
1677956	July 24, 1928	Dean, S. W.	Broadside Antenna Array.
1677957	do	Eagon, L. L.	Telephone System.
1677966	do	Green, E. I.	Carrier Signaling System.
1677967	do	Holden, W. H. T.	Radio Signaling System.
1677983	do	Parker, R. D., and Perry, D. B.	Printing Telegraph Exchange System.
1678101	do	Bower, J. H.	Air Conditioning System.
1678103	do	Caverly, H. C.	Telephone System.
1678116	do	Harrison, H. C.	Device for the Transmission of Mechanical Vibratory Energy.
1678128	do	Thorp, K. O.	Transmission Control System.
1678133	do	Wolfe, W. V.	Power Line Signaling.
1678145	do	Kelly, M. J.	Electron Discharge Device.
1678160	do	Oswald, A. A.	Electric Wave Translation System.
1678163	do	Peterson, E.	Modulation.
1678173	do	Tournier, E. P.	Tool.
1678182	do	Estes, M. S.	Transmitter for High Frequency Sound Signaling.
1678183	do	Friis, H. T.	Signal Reception.
1678184	do	Gilbert, J. J.	Submarine Signaling.
1678185	do	Harper, R. W.	Telephone System.
1678188	do	Mathes, R. C.	Electric Wave Transmission.
1678190	do	Mortimer, L. A.	Telephone System.
1678199	do	Rettenmeyer, F. X.	Oscillation Generator.
1678200	do	Rorty, M. C., and Potter, J. C.	Telephone Receiver.
1678203	do	Smythe, E. H.	Communicating and Switching System.
1678390	do	Hosford, W. F.	Method of Working Fibrous Material
1678395	do	Kellems, E. E.	Self Loading Trailer.
1678663	July 31, 1928	Wilson, L. T.	Insulator.
1678665	do	Affel, H. A.	High Frequency Measuring System.
1678672	do	Espenschied, L., Affel, H. A., and Anderson, C. N.	Two-Way Radio Telephone System.
1678674	do	Koenig, W., Jr.	Method and Apparatus for Computation.

Patent no.	Date of issue	Inventor	Title
1678685	July 31, 1928	Toomey, J. F	Telephone Signal System.
1678710	do	Selvig, J. N	Material Spooling Mechanism.
1678713	do	Snell, H. S	Molding Compound.
1678732	do	Knaus, P. J	Grinding and Polishing Apparatus.
1678833	do	Smythe, E. H	Acoustic Device.
1678872	do	Potter, R. K	Method and Apparatus for Producing Musical Sounds.
1679376	Aug. 7, 1928	Roscoe, R	Apparatus for Abrading.
1679378	do	Sanders, W. R	Abrading Apparatus.
1679396	do	Bascom, H. M	Measuring System.
1679411	do	De Potter, E. F	Loading Device for Conveying Systems.
1679412	do	do	Unloading Device for Conveying Systems.
1679427	do	Jewell, H. W	Underground Conduit.
1679434	do	McCurdy, R. G	Electric Wave Filter for Variable Load Circuits.
1679597	do	Berkland, T. H	Radio Receiving Circuit.
Re. 18055	Apr. 26, 1931	do	Do.
1680207	Aug. 7, 1928	De Forest, L., and Logwood, C.	Radio Signaling System.
1680273	Aug. 14, 1928	Akers, M. K	Generating and Transmitting System.
1680363	do	Bown, R	Directive Antenna.
1680367	do	Demarest, C. S	Repeater Circuits.
1680376	do	Herman, J., and Singer, F. J	Telegraph Circuits.
1680377	do	Holden, W. H. T	Alternating Potential Generator.
1680390	do	Nyquist, H	Picture Transmitting System.
1680550	do	Kerr, M. B	Signaling System.
Re. 18126	July 7, 1931	do	Do.
1680656	Aug. 14, 1928	Wheeler, E. B., and Wright, J. C.	Storage of Dry Cells and Batteries.
1680667	do	Curtis, A. M	Electromagnetic Device.
1681215	Aug. 21, 1928	Blauvelt, W. G	Telephone Exchange System.
1681216	do	Branson, D. E., and Shanck, R. B.	Composite Set.
1681221	do	Coggins, P. P	Telephone Exchange System.
1681245	do	May, D. T., and McCormick, C. G.	Cable Splicing Machine.
1681246	do	McCurdy, R. G	Telephone System with Auxiliary Signaling Circuit.
1681252	do	Nyquist, H	Distortion Correction for Transmission Lines.
1681376	do	Snook, H. C	Sound Recording and Reproduction.
1681489	do	Locke, G. A., and Haglund, H. H.	Signaling System.
1681510	do	Williams, S. B	Telephone System.
1681515	do	Buckley, O. E	Submarine Cable.
1681520	do	Dahl, J. F	Trunk Circuits.
1681532	do	Gardner, F. G	Transmission Control.
1681541	do	Johnston, J	Electrical Conductor.
1681543	do	Kuhn, J. J	Acoustical Device.
1681554	do	Norton, E. L	Wave Filter.
1681566	do	Anderegg, G. A	Manufacture of Cables.
1681573	do	Elmen, G. W	Transformer.
1681972	Aug. 28, 1928	Blackwell, O. B., and Affel, H. A.	Carrier Amplitude Control System.
1682911	Sept. 4, 1928	Jorgensen, E. N	Material Working Mechanism.
1683716	Sept. 11, 1928	Espenschied, L	Antenna for Radio Telegraphy.
1683725	do	Nyquist, H	Phase Regulating System.
1683739	do	Stone, J. S	Directive Antenna Array.
1683833	do	Maneschi, E	Method of and Apparatus for Determining the Energy Losses in Dielectric Materials.
1683894	do	Ives, H. E	Reproducing Pictures Transmitted Electrically.
1683796	do	do	Transmission of Pictures By Electricity.
1684397	Sept. 18, 1928	Hubbard, F. A	Electrical Testing.
1684403	do	Mason, W. P	Electrical Testing System and Method.
1684408	do	Nicolson, A. M	Acoustic System.
1684422	do	Toomey, J. F	Monitoring and Controlling Circuits for Program Distribution.
1684445	do	Honaman, R. K	Signaling System.
1684455	do	Nyquist, H	Multiplex Carrier Current Signaling.
1684511	do	O'Donnell, T. E	Strand Twisting Apparatus.
1684532	do	Bouvier, G. A	Method of and Apparatus for Forming Stranded Articles.
1684533	do	do	Strand Twisting Apparatus.
1684799	do	Kochendorfer, F. S	Thread Rolling Machine.
1685145	Sept. 25, 1928	Bartenbach, H., and Freeman, A. E.	Hook.
1685154	do	Edwards, W. H	Lock.
1685161	do	Honaman, R. K	Multi-Winding Discharge Balance Coil.
1685357	do	Griggs, E. V	Transmission System.
1685386	do	Williams, R. R	Insulated Conductor.
1685801	Oct. 2, 1928	Ballard, W. R	Current Controlling Device.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1685835	Oct. 2, 1928	Baseom, H. M., Arnold, O. M., and Pentland, R. L.	Program Selecting Arrangement.
1685847	do	Huntington, H	Test Clip.
1685913	do	Espenschied, L	Recording and Reproducing of Sound Waves.
1686355	do	Wente, E. C	Translating Device.
1686504	do	Dodge, H. F., and Frederick, H. A.	Stethoscopic Apparatus.
1686552	Oct. 9, 1928	Fairchild, F. E	Stabilization of Circuit Output.
1686570	do	Ohl, R. S	Equipotential Cathode Vacuum Tube.
1686585	do	Vernam, G. S	Telegraph Cipher System.
1686792	do	Black, H. S	Translating System.
1687211	do	Jones, W. C	Telephone Receiver.
1687220	do	Mackeown, S. S	Electric Wave Producer.
1687225	do	Peterson, E	Frequency Translating Circuits.
1687231	do	Speed, J. B	Translating Device.
1687233	do	Stoller, H. M	Dynamo-Electric Machine.
1687234	do	Terry, D. M	Thermionic Peak Voltmeter.
1687244	do	Heising, R. A	Signaling System.
1687245	do	do	Amplifying.
1687364	do	De Forest, L	Radio Transmitting System.
1687489	Oct. 16, 1928	Branson, D. E	Apparatus and Method for Electrical Transmission of Pictures.
1687495	do	Gordon, C. S., and Lowe, J. T.	Insulator.
1687524	do	Smith, A. B	Material Feeding Device.
1687525	do	Sturdevant, E. G	Flame-Proof Electric Insulation and Method of Producing the Same.
1687535	do	Affel, H. A., and Green, E. I.	Reduction of Losses in Insulators, Pins, and Crossarms.
1687556	do	Gordon, C. S., and Lowe, J. T.	Reduction of Attenuation Due to the Conductance Losses in Crossarms and Insulator Pins.
1687574	do	Liss, A. S	Article Forming Apparatus.
1687579	do	McMullan, S	Material Holder.
1687588	do	Pearson, A	Method of Drying Corrodible Materials.
1687669	do	Hinrichsen, E. E	Trunk Testing Circuits for Selector Switches.
1687882	do	Nichols, H. W	Oscillation Generator and Modulator.
1687883	do	O'Neill, H. W	Transmission System.
1687896	do	Ryan, F. M	Radio Transmitting System.
1687912	do	Wheeler, E. B	Insulated Conductor.
1687932	do	Farrington, J. F	Secret Signaling.
1687933	do	do	Electrical Signaling System.
1688036	do	Clement, L. M	Radiant Energy Transmission System.
1688038	do	Curtis, A. M	Protective Device.
1688081	do	Ives, H. E	Transmission of Pictures By Electricity.
1688292	do	Weaver, A	System of Modulating Carrier Currents.
Des. 76622	do	Lum, G. R	Transmitter Mounting.
1688451	Oct. 23, 1928	Demarest, C. S., and Loynes, O. H.	Telephone Signaling System.
1688452	do	do	Do.
1688453	do	do	Do.
1688454	do	do	Do.
1688455	do	do	Do.
1688976	do	Lum, G. R	Audiphone.
1688991	do	Schwerin, P	Electron Discharge Device.
1688993	do	Smith, E. B	Telephone System.
1688995	do	Smith, W. F., Jr	Telephone Muffler.
1688997	do	Sprague, C. A	Signaling System.
1689006	do	Akers, M. K	Variable Inductance Device.
1689020	do	Gilbert, J. J	Submarine Signaling.
1689026	do	Heising, R. A	Frequency Arrangement in Carrier Wave Systems.
1689030	do	Holland, N. H	Acoustic Diaphragm.
1689205	Oct. 30, 1928	Lamplough, L. F	Method of and Apparatus for Continuously Sheathing Cores.
1689206	do	do	Apparatus for Treating Vulcanizable Material.
1689230	do	Christopher, H. J	Locking Device for Switch Keys.
1689263	do	Vernam, G. S	Printing Telegraphy.
1689267	do	Weaver, A	Method and Apparatus for Picture Transmission.
1689292	do	O'Neill, H. W	Navigation Directing System.
1689293	do	Oswald, A. A	Signaling System.
1689294	do	Potts, L. M	Remote Control and Indicating System.
1689295	do	do	Printing Telegraph.
1689311	do	Wheeler, E. B	Insulated Wire.
1689312	do	Williams, R. R	Method of Insulating Conductors.
1689313	do	Wood, E. B	Direct Humidity Recorder.
1689318	do	Bjornson, B. J	Repeater Circuits.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1689324	Oct. 30, 1928	Buckley, O. E.	Manufacture of Continuously Loaded Electrical Conductors.
1689328	do	Curtis, A. M.	Submarine Telegraph System.
1689337	do	Haddock, A.	Antenna.
1689338	do	Harris, J. E.	Electron Discharge Device.
1689339	do	Harrison, H. C.	Energy Translation System.
1689340	do	Hearn, J. F.	Selector Switch.
1689341	do	Heising, R. A.	Highly Selective Signal Receiption.
1689343	do	Hinrichsen, E. E.	Telephone System.
Re. 17666	May 13, 1930	do	Do.
1689346	Oct. 30, 1928	Kendall, B. W.	Method and System of Carrier Wave Telegraphy.
1689347	do	Korn, F. A.	Telephone System.
1689348	do	Kuhn, J. J.	Combined Jack and Selecting Switch.
1689358	do	Miller, D. D.	Magnetic Shield.
1689406	do	Scruby, S. V. C., Turkhud, B. A., and DeFremery, F.	Recording Means for Busy Telephone Lines.
1690153	Nov. 6, 1928	Abraham, L. G.	Selective Echo Suppressor.
1690167	do	Holden, W. H. T.	Vacuum Tube and Associated Element.
1690182	do	Silent, H. C.	Suppression of Echoes and Singing in Four-Wire Circuits.
1690201	do	Mougey, W. E.	Signaling Conductor.
1690206	do	Raynsford, A.	Telephone System.
1690210	do	Stokely, R. L.	Do.
1690211	do	Toomey, J. F., and Duhnrock, G. H.	Do.
1690213	do	Wilson, I. G.	Automatic System for Testing Repeaters.
1690214	do	Carpenter, W. W.	Restricted Service Telephone Exchange System.
1690224	do	Gent, E. W.	Wave Transmission System.
1690226	do	Heising, R. A.	Plural Phase Generation or Other System.
1690227	do	do	Transmission by Modulated Waves.
1690228	do	do	High Frequency Transformer.
1690232	do	Kuhn, J. J.	Vacuum Tube Socket.
1690234	do	Lamberty, F. R.	Trunking Circuit to Centralized Operator's Position.
1690241	do	O'Neill, H. W.	Telephone System.
1690250	do	Saunders, A. W.	Radio Signaling System.
1690255	do	Snook, H. C.	System for Converting Sound Waves Into Electrical Waves.
1690269	do	Booth, W. T., and Magrath, A. C.	Testing Device.
1690271	do	Clement, L. M.	Method of and Means for Protecting Electrical Apparatus.
1690279	do	Craft, E. B.	Apparatus for Visual Interpretation of Speech and Music.
1690280	do	Curtis, A. M.	Electrical Testing.
1690297	do	Hoge, J. F. D.	Cable Support.
1690299	do	Horton, J. W.	Generation and Control of Electric Waves.
1690300	do	do	Transmission of Pictures by Electricity.
1690373	do	Marchev, A.	Method of and Apparatus for Twisting Strands.
1690377	do	Pugh, E.	Method of Welding Parts.
1690378	do	Rinck, F. B.	Treatment of Ferrous Metals to Produce a Protective Coating Thereon.
1690379	do	Siebs, C. T.	Heater.
1690398	do	Bollinger, C.	Apparatus for Performing Pressing Operations.
1690421	do	Moore, C. R.	Sound Radiator.
1690457	do	Pennock, G. A.	Apparatus for Performing Pressing Operations.
1690566	do	Ziegler, A. W.	Current Ballasting Device.
1691029	Nov. 13, 1928	Bandur, A. F.	Conductor for the Transmission of Electrical Energy and Method of Producing the Same.
1691043	do	Blount, H.	Wire Drawing Guard.
1691052	do	Fay, J. W.	Soldering and Welding Tool and the Like.
1691055	do	Gauthier, E.	Screw Forming Machine.
1691058	do	Grondahl, H. H. C.	Material Treating Apparatus.
1691071	do	Ives, H. E., and Long, M. B.	Transmission of Pictures By Electricity.
1691076	do	Mathes, R. C.	Two-way Radio Signaling System.
1691091	do	Thompson, E. O.	Alternating Current Relay.
1691098	do	Whiting, D. F.	Means for Coupling Circuits of Different Impedance Characteristics.
1691103	do	Yancey, T. McD.	Material Working Apparatus.
1691147	do	Clark, A. B., Nyquist, H., and Gannett, D. K.	Electrical Picture Transmitting System.
1691150	do	Crisson, G.	Electrical Power Limiting Device.
1691543	do	Crawford, C. A.	Combined Waterproof and Adhesive Composition.
1691588	do	Schuls, A. E.	Material Working Mechanism.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1691962	Nov. 20, 1928	Demarest, C. S.	Selective Signaling System.
1691986	do	Nyquist, H.	Apparatus and Method for Generating Pure Sine Waves of Electromotive Force.
1691990	do	Potter, R. K.	High Frequency Signaling System.
1692317	do	Stewart, G. W.	Acoustic Wave Filter.
1692437	do	Farrington, J. F.	Signaling System.
1692904	Nov. 27, 1928	Potter, R. K.	Amplification of Photelectric Call esponse.
1692907	do	Shackleton, S. P., and Hansen, A. A.	Relaying Arrangement.
1692961	do	Thompson, E. O.	Alternating Current Relay.
1693072	do	De Forest, L.	Means for Shielding Sound Detector and Amplifier Apparatus.
1693653	Dec. 4, 1928	McKown, F. W.	Battery Supply Circuit.
1693659	do	Nyquist, H., and Pfleger, K. W.	Echo Suppressor.
1693662	do	Ohl, R. S.	Radio Signaling System.
1693685	do	Weaver, A.	Method and Apparatus for Transmission of Pictures.
1693955	do	Mathes, R. C.	Electric Current Transmission.
1694406	Dec. 11, 1928	Bascom, H. M., and Jacobsen, E.	Telephone Exchange System.
1694415	do	Gordon, C. S.	Insulator.
1694425	do	McCurdy, R. G., and Blye, P. W.	Electrical Testing System.
1694429	do	Peak, W. L.	Auxiliary Dialing Tool.
1694473	do	Kendall, B. W.	High Frequency Signaling.
1695032	do	Shackelton, W. J.	Impedance Measuring Bridge.
1695035	do	Stoller, H. M.	Electric Regulator.
1695038	do	Buckley, O. E.	Magnetic Alloy.
1695039	do	Clement, L. M.	Electric Wave Signaling System.
1695040	do	Clokey, A. A.	Multiplex Telegraph System.
1695041	do	Elmen, G. W.	Production of Magnetic Dust Cores.
1695042	do	Fearing, J. L.	High Efficiency Discharge Device System.
1695043	do	Haines, W. T., and Harper, R. W.	Telephone xchange System.
1695046	do	Hippensteel, C. L.	Testing Apparatus.
1695047	do	Horton, J. W.	Art of Electrical Measurements.
1695048	do	Ives, H. E.	Picture Transmission.
1695049	do	Jacobsen, E., and Sperry, A. B.	Telephone Exchange System.
1695050	do	Lundius, E. R.	Pulsing System.
1695051	do	Marrison, W. A.	Translating Circuits.
1695057	do	Murphy, P. B.	Telephone System.
1695058	do	Peterson, E.	High Frequency Signaling.
Des. 77,165	do	Lum, G. R.	Diaphragm for a Loud Speaker.
1695267	Dec. 18, 1928	Aldendorff, F.	Automatic Telephone System.
1695268	do	do	Do.
1695312	do	Abbott, H. H.	Telephone System.
1695314	do	Bascom, H. M.. and Abbott, H. H.	Do.
1695328	do	Gordon, W. A., Murphy, J. J., and Perrone, P.	Adjustable Reference Book.
1695813	do	Mathes, R. C.	Electric Current Transmission.
1695828	do	Stokely, R. L.	Telephone Exchange System.
1695844	do	Gorton, W. S.	Signaling System.
1696012	do	Ray, W. H.	Method of and Apparatus for Interconnecting and Testing Electrical Apparatus.
1696212	Dec. 25, 1928	Schafer, J. P.	Selective Translation System.
1696223	do	Wotton, J. A.	Electromagnetic Device.
1696225	do	Blood, H. L.	Thread Forming Mechanism.
1696230	do	Gilbert, J. J.	Electrical Pilotage.
1696233	do	Heising, R. A.	Energizing Vacuum Discharge Device by Alternating Current.
1696234	do	do	Antenna.
1696241	do	Kendall, B. W.	Repeater.
1696242	do	Kochendorfer, F. S.	Method of and Apparatus for Forming Articles.
1696246	do	Mathes, R. C.	Telegraph System.
1696248	do	Morton, E. R.	Circuits for Synchronous Motors.
1696249	do	Nichols, H. W.	Antenna System.
1696256	do	Rock, G. L.	Spool and Method of Manufacturing Spools.
1696257	do	do	Apparatus for Assembling Elements of Articles.
1696258	do	Schmied, J. W.	Carrier Wave Communication.
1696260	do	Swasey, C. F.	Casing and Support for Electrical Apparatus.
1696261	do	Williams, S. B.	Transmission System.
1696262	do	Bandur, A. F.	Conductor for the Transmission of Electrical Energy and Method of Producing the Same.
1696265	do	Buckley, O. E.	Accoustic Device.
1696267	do	Dunham, B. G.	Telephone System.
1696268	do	Fay, J. W.	Apparatus for Producing Soldering Units Comprising Solder and Fluxing Materials.
1696271	do	Hague, A. E.	Call Charging Telephone Exchange System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1696273	Dec. 25, 1928	Jespersen, H. W	Mechanism for Working Pulpous Material.
1696274	do	Johnson, K. S	Substation Circuits.
1696275	do	Johnson, L. H., and Hague, A. E.	Call Charging Telephone Exchange System.
1696315	do	Mathes, R. C	Wave Transmission System.
1696415	do	Roberts, L. C	Voltage Balance Regulator.
1696416	do	do	Voltage Regulator.
1696417	do	do	Do.
1697042	Jan. 1, 1929	Bown, R	Radio Receiving System.
1697057	do	Edwards, W. H	Ringer.
1697061	do	Gordon, G. B	Corner Bridle Ring Support.
1697845	Jan. 8, 1929	Adams, J. H	Soldering Material.
1697848	do	Boynton, S. E	Bearing and Method of Producing It.
1697860	do	Franks, C. H., and Rock, G. L.	Assembling Apparatus.
1697870	do	Hall, S. M	Insulating Composition and Method of Forming the Same.
1697872	do	Johnson, E. V	Resilient Member.
1697873	do	Lambert, H. E	Material Working Machine.
1697903	do	Clapp, R. H	Transmission Repeating System for Radio and Carrier Telegraph Systems.
1697905	do	Deardorff, R. W	Transmission Regulating System for Radio and Carrier Telegraph Systems.
1697933	do	Shackleton, S. P	Signaling Circuits for Repeaters.
1698558	do	Oswald, A. A., and Nelson, E. L.	System of Space Discharge Devices.
1698770	Jan. 15, 1929	Ohl, R. S	Signaling Circuits.
1698772	do	Schramm, F. W	Remote Control System.
1698777	do	Bown, R	Radio Repeater.
1699222	do	Clarke, C. A	Transmission of Pictures.
1699514	Jan. 22, 1929	Aldendorff, F	Electrical Switch.
1699553	do	Weaver, A., and McMurry, F. R.	Picture Transmitting System.
1699567	do	Ohl, R. S	Radio Signaling System.
1699570	do	Potter, R. K	Carrier Suppression Modulation.
1699711	do	Peterson, E	System of Space Discharge Devices.
1700166	Jan. 29, 1929	Johnson, B	Insulator for Bridle Wires.
1700168	do	Klien, C. H., and St. John, E.	Cable Clamp and Bridle Ring.
1700180	do	Roberts, L. C	Selective Telegraph System.
1700441	do	Lum, G. R	Acoustic Device.
1700444	do	Mougey, W. E	Method of and Apparatus for Measuring the Inductance of Cables and Conductors.
1700450	do	Reynolds, J. L	Sound Reproducing System.
1700451	do	Ronci, V. L	Electron Discharge Device.
1700452	do	do	Do.
1700454	do	Schumacher, E. E	Electron Emitter and Process of Making the Same.
1700456	do	Stearn, F. A	Telephone System.
1700457	do	Thuras, A. L	Acoustic Device.
1700458	do	Waller, L. R	Party Line Telephone System.
1700460	do	White, J. H	Metallurgical Process.
1700466	do	Carpenter, W. W	Machine Switching Telephone Exchange System.
1700467	do	Clark, E. H	Telephone Exchange System.
1700469	do	Conway, R. D	Telephone System.
1700470	do	Curtis, A. M	Electromagnetic Relay.
1700472	do	Deloraine, E. M	Electron Discharge Device.
1700473	do	Draper, J. B	Telephone Exchange System.
1700476	do	Gilbert, J. J	Submarine Signaling Cable.
1700478	do	Haddock, A	Electron Discharge Device.
1700528	do	Hartley, R. V. L	Direction Finding.
1700530	do	Holland, N. H	Acoustic Diaphragm.
1700531	do	Houskeeper, W. G	Electron Discharge Device.
1700536	do	Keith, C. R	Frequency Translating Circuits.
1700766	Feb. 5, 1929	Kemp, A. R	Continuously Loaded Submarine Cable.
1700799	do	Inglis, A. H., and Bostwick, L. G.	Locking Mechanism.
1700805	do	Morris, R. W	Cone Loud Speaker.
1700806	do	do	Do.
1700833	do	Engel, T. J	Sound Recording System.
1700100	do	Cummings, G. C	High Speed Telegraph Repeater Employing Vibrating Relays.
1701552	Feb. 12, 1929	Zobel, O. J	Distortion Compensator.
1701561	do	Gordon, C. S	Insulator.
1701562	do	do	Do.
1701633	do	Proffitt, A. A	Tool.
1701639	do	Schulz, A. E	Material Treating Apparatus.
1701641	do	Skriba, R. A	Article Sorting Apparatus.
1701644	do	Stull, J. S	Work Handling Device for Drilling Machines.
1701656	do	Arkema, H. P., and Thronsen, S.	Method of Mounting Dies.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1702033	Feb. 12, 1929	Bellamy, H. T., and Groves, W. H.	Furnace.
1702050	do	Grondahl, H. H. C	Molding Apparatus.
1702051	do	do	Do.
1702242	Feb. 19, 1929	Bureau, A. A	Reel.
1702305	do	Lewis, B. F	Impedance Modifying Device.
1702308	do	Niles, E. W., and Edwards, W. H.	Intercommunicating System.
1702309	do	Nyquist, H	Composite Set.
1702568	do	Marrison, W. A	Constant Frequency Wave Source.
1703142	Feb. 26, 1929	Green, E. I	Compensation for Phase Variations.
1703146	do	Holden, W. H. T	Rectifier Alarm System.
1703147	do	do	Do.
1703287	do	Andrews, J. W	Method of Producing Magnetic Materials.
1703300	do	Daniel, T. A	Extrusion Press.
1703870	Mar. 5, 1929	Demarest, C. S., and Ohl, R. S.	Radio Antenna.
1703880	do	Gordon, C. S	Thermoscope.
1703972	do	Watson, E. F	Printing Telegraph System.
1704354	do	Wegel, R. L	Acoustic Device.
1704780	Mar. 12, 1929	Affel, H. A., Hamilton, B. P., Thorp, V. P., and Clapp, R. H.	Method and Means for Simultaneously Signaling All Subscribers of Carrier Telegraph Systems.
1704786	do	Chapman, A. G	Crosstalk Meter.
1704806	do	Nyquist, H	Signaling System.
1704850	do	Wilson, I. G	Wave Transmission Control.
1705054	do	Aldendorff, F	Electromechanical Telephone Switching Systems.
1705551	Mar. 19, 1929	Abraham, L. G	Electro-Optical Transmission.
1705560	do	Edwards, P. G., and Herrington, H. W.	Electrical Instrument.
1705561	do	do	Electrical Testing System.
1705891	do	Arnold, H. B	Power Line Signaling.
1705903	do	Davee, L. W	Do.
1705906	do	Dehn, J. W	Telephone System.
1705913	do	Gilbert, J. J	High Frequency Submarine Cable.
1705917	do	Hamer, T. M	Toll Service Telephone Exchange System.
1705944	do	Siegmund, H. O	Electrolytic Device.
1705947	do	Thompson, G	Telephone Exchange System.
1705949	do	Williams, R. R	Insulated Cable.
1705993	do	Oswald, A. A	Voltage Limiting Device.
1706005	do	Thompson, W. V	Method of Making Cord Tips.
1706032	do	Long, M. B	Transmission of Pictures by Electricity.
1706311	do	Nichols, H. W	Wireless Signaling System.
1706393	Mar. 26, 1929	Fay, J. W	Apparatus for Forming Articles.
1706472	do	Wright, S. B	Echo Supressor.
1706490	do	Holden, W. H. T	Carrier Amplitude Control in Radio Systems.
1706538	do	Mertz, P	Testing Television and Like System.
1706702	do	McMullan, S	Strand Working Mechanism.
1706724	do	Anderson, D. G	Stripping Apparatus.
1706725	do	LeBoutillier, A	Method of Heat Treating Articles.
1706727	do	Bouvier, G. A., and Richter, J. W.	Strand Assembling Apparatus.
1706729	do	Gauthier, E	Machine for Working Metal Strands.
1706730	do	Gros, G. A	Method of and Means for Forming Composite Articles.
1706740	do	Powell, R. E	Heated Tool.
1706741	do	Pugh, E	Method of and Apparatus for Feeding Material.
1706754	do	Stastney, L	Wire Drawing Apparatus.
1707260	Apr. 2, 1929	Fetter, C. H	Recording and Reproducing of Sound Waves.
1707261	do	do	Recording and Reproduction of Sound Waves.
1707265	do	Hansen, A. A	Means for Testing Lever Keys.
1707486	do	Kishpaugh, A. W	Electro-Optical Transmission.
1707544	do	Thuras, A. L	Electrodynamic Device.
1707545	do	Wente, E. C	Acoustic Device.
1707997	Apr. 9, 1929	Shanck, R. B	Telegraph System.
1708027	do	Ohl, R. S	Control Device for Vacuum Tubes.
1708038	do	Wilson, L. T	Low Loss Insulator.
1708933	Apr. 16, 1929	Beach, W. C	Signaling System.
1708934	do	Burton, E. T	Electric Signaling.
1708935	do	Christopher, A. J	Coil and Transformer.
1708936	do	Cioffi, P. P	Magnetic Material.
1708938	do	Crandall, I. B., and Estes, M. S.	High Frequency Sound Signaling.
1708939	do	Crawford, A. I	Electron Discharge Device.
1708943	do	Goodrum, C. L	Acoustic Device.
1708944	do	Heising, R. A	System for Neutralizing Capacitive Reactance Between Two Circuits Placed Close to Each Other.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1708945	Apr. 16, 1929	Horton, J. W	Selective Transmission System.
1708946	do	Hovland, H	Telephone Exchange System.
1708949	do	Matthies, W. H	Telephone System.
1708950	do	Norton, E. L	Electric Wave Filter.
1708954	do	Potts, L. M	Transmission System
1708955	do	Pruden, H. M	Relay Commutator.
1708959	do	Stokley, R. L	Intercepting Cord and Trunk Circuit.
1708960	do	Ulrich, H. W	Telephone System.
1708974	do	Parker, R. D., and Overton, W. L.	Submarine Cable Telegraphy.
1708982	do	Vroom, E., and Krecek, J. A	Repeater Selection for Toll Lines.
1708983	do	Vroom, E., and Entz, F. S	Telephone System.
1709009	do	Espenschied, L., and Martin, DeL. K.	Multiple Channel Radio Receiver.
1709037	do	Pero, S. E	Distortion Compensator.
1709044	do	Smythe, E. H	Multiplex Carrier Wave Communication.
1709061	do	Clement, L. M	Radio Receiving Circuit.
1709067	do	Field, J. C	Indicating System.
1709073	do	Hartley, R. V. L	Sound Radiator.
1709076	do	Jammer, J. S	Multiplex Signaling System.
1709084	do	MacDougall, H. W	Number Indicating System.
1709089	do	Nash., G. H., and Grace, B. B.	Wireless Receiving Set.
1709090	do	Nichols, H. W	Electrical Energy Radiator.
1709361	do	McCormack, A. A	Sheet Folding Apparatus.
1709448	do	Walter, R. C	Rolling Mill.
1709554	do	Black, H. S	Voice Frequency Calling System.
1709571	do	Harrison, H. C	Electromechanical Translating Device.
1709900	Apr. 23, 1929	Dietze, E	Telephone System.
1709901	do	Espenschied, L., and Gillett, G. D.	Secret Signaling System.
1709926	do	Weaver, A	Apparatus and Method for Transmitting Pictures.
1710235	do	Nelson, E. L. and Oswald, A. A.	Radio Transmitting Circuit.
1710249	do	Wegel, R. L	Cone Loud Speaker.
1710254	do	Bruce, E	Electric Wave Translation System.
1710756	Apr. 30, 1929	Wilson, L. T	Reduction of Attenuation Due to the Conductance Losses in Crossarms and Insulator Pins.
1710786	do	Pike, V. B., and St. John, E.	Method and Means for Producing Insulating Sleeves.
1710787	do	Pike, V. B., and St. John, E.	Do.
1711025	do	Hull, S. M	Organic Molding Composition.
1711101	do	Shanck, R. B	Means for Indicating Frequency Changes.
1711168	do	Bouvier, G. A	Apparatus for Producing Reciprocating Mechanical Movement.
1711258	do	Bennett, A. F	Telephone Apparatus.
1711550	May 7, 1929	Sturdy, W. W	Alternating Current Relay.
1711560	do	Espenschied, L., Bown, R., and Martin, DeL. K.	Radio Broadcasting System.
1711562	do	Fetter, C. H	Echo Suppressor Circuits.
1711636	do	Eaves, A. J	Radio Receiving System.
1711640	do	Hartley, R. V. L	Electron Discharge Device.
1711646	do	McGall, P. K	Electromaguetic Device.
1711650	do	Pfannenstiehl, H	Phonograph Record Recording Machine.
1711651	do	Pruden, H. M	Signaling System.
1711653	do	Quarles, D. A	Loading System.
1711658	do	Sprague, C. A	Current Controlling and Static Reducing System.
1711661	do	Stoller, H. M	Regulating System.
1711663	do	Van der Bijl, H. J	System Utilizing Radiant Energy Sensitive Device.
1711664	do	Williams, S. B	Transmission System.
1711666	do	Adams, E. W	Sound Reproducing and Recording Device.
1711672	do	Coon, L. E	Remote Control System.
1711673	do	Crawford, A. I., and Sample, R. M.	Vacuum Tube Base.
1711679	do	Heising, R. A	Signal System.
1711680	do	Holland, N. H	Combined Recorder and Reproducer.
1711681	do	do	Sound Recording System.
1711682	do	Hovland, H	Telephone Exchange System.
1711684	do	Ives, H. E	Method of Making Half Tones.
1711687	do	Miller, V. F	Telephone Calling Dial.
1711689	do	Pierce, P. H., and Means, W. J.	Rotary Mercury Interrupter.
1711690	do	Richard, C. D	Phonograph Record Recording Machine.
1712243	do	Aldendorff, F	Automatic Electric Switching System.
1712528	May 14, 1929	Swezey, B. S	Printing Telegraph System.
1712541	do	Wright, J. W	Wire Splicing Machine.
1712542	do	Bailey, R. S	Toll Trunk Circuit.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1712993	May 14, 1929	Heising, R. A.	Signaling System.
1712994	do	do	Oscillation Production.
1713039	do	Espenschied, L.	Phonograph Recording and Reproducing.
1713603	May 21, 1929	Hoyt, R. S.	Electrical Network.
1713615	do	Ohl, R. S.	Thermionic Vacuum Tube.
1713618	do	Overton, W. L.	Electric Picture Transmitting Apparatus.
1713771	do	Melching, A. F.	Control Apparatus.
1713786	do	Stearns, H. C.	Method of and Apparatus for Assembling Articles.
1713788	do	do	Do.
1713833	do	Kochendorfer, F. S.	Indicating and Regulating Apparatus.
1713833	do	Tinom, W. A.	Apparatus for Heat Treating Metals.
1713875	do	Kay, C. J.	Filing Apparatus.
1713904	do	Jespersen, H. W.	Mechanism for Working Fibrous Material.
1713909	do	Marchev, A.	Clutch.
1713941	do	Adams, A. H., and Franks, C. H.	Method of Winding Coils.
1714149	do	Whittle, H., and Christopher, A. J.	Amplifying System.
1714525	do	Silent, H. C.	Suppression of Echoes and Singing in Four-Wire Circuits.
1714551	do	Edwards, P. G., and Herington, H. W.	Cable Testing Arrangement.
1714567	do	Nyquist, H.	Telegraph Circuit.
Des 78605	do	Bascom, H. M.	Telephone Desk Stand.
1714683	May 28, 1929	Lowry, H. H.	Electrical Insulation.
1714697	do	Stevenson, G. H.	Electric Wave Transmission System.
1714700	do	Stull, J. S.	Rotary Tool.
1715415	June 4, 1929	Hanson, O. B., Crisson, G., and McKown, F. W.	Volume Control System.
1715433	do	Stone, J. S.	Antenna Array.
1715475	do	Shetzline, R. A.	Electrical Protective System.
1715541	do	Elmen, G. W.	Magnetic Material.
1715542	do	do	Electrical Coils and Systems Employing Such Coils.
1715543	do	do	Magnetic Core.
1715561	do	Mohr, F.	Transmission System.
1715574	do	Skriba, R. A.	Abrading Apparatus.
1715645	do	Dickieson, A. C.	Electrical Signaling.
1715646	do	Elmen, G. W.	Magnetic Material and Appliance.
1715647	do	do	Magnetic Material.
1715648	do	do	Do.
1715713	do	Legg, V. E.	Treatment of Magnetic Materials.
1716437	June 11, 1929	Gannett, D. K.	Testing System.
1716438	do	do	Do.
1716447	do	Ladner, H.	Signaling and Transmission Circuits.
1717010	do	De Coutouly, G. C.	Receiving Circuit.
1717011	do	do	Reactance Device.
1717030	do	Heising, R. A., and De Coutouly, G. C.	Frequency Stabilizing System.
1717049	do	Locke, G. A.	Synchronous Telegraph System.
1717055	do	Melhuish, L. E.	Public Address System.
1717062	do	Phelps, W. A.	Electric Signaling.
1717064	do	Rettenmeyer, F. X.	Electric Wave Transmission System.
1717070	do	Siegmund, H. O.	Rectifying System.
1717074	do	Taplin, C. V., Allen, L. M., and Bertels, A. S.	Telephone Exchange Maintenance System.
1717079	do	Wheeler, C. H.	Coin Collection Apparatus.
1717083	do	Arnold, H. B.	Carrier Signal System.
1717094	do	Clokey, A. A.	Vibration Device.
1717095	do	do	Potential Limiting Device.
1717143	do	Cahill, H. D.	Telephone System.
1717146	do	Crouch, J. L.	Sound Reproducer.
1717158	do	Jones, W. C.	Do.
1717174	do	Slaughter, N. H.	Radio Receiving Circuit.
1717400	June 18, 1929	Nyquist, H.	Phase Shifting Network.
1717410	do	Roberts, L. C.	Attenuation Compensator.
1717475	do	Thompson, E. O.	Alternating Current Relay.
1717781	do	Ives, H. E.	Picture Transmission System.
1717782	do	Ives, H. E., and Horton, J. W.	Electro-Optical Transmission.
1717783	do	Jespersen, H. W.	Mechanism for Working Pulpous Material.
1717787	do	Knuuti, C. O., and Nelson, C. E.	Material Feeding Apparatus.
1717793	do	Marchev, A.	Material Handling Apparatus.
1717831	do	Borland, C. A., and Melching, A. F.	Voltage Regulator.
1717834	do	Bureau, A. A.	Method of and Apparatus for Applying the Lateral Surfaces of Containers.
1718280	June 25, 1929	Edwards, P. G.	Spring Jack Connection.
1718291	do	Guenther, R.	Buckle.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1718301	June 25, 1929	Nelson, S. F.	Operator's Telephone Circuit.
1718449	do	Aldendorff, F.	Automatic Telephone System.
1718946	July 2, 1929	Casper, W. L.	Transmission Circuits.
1718950	do	Field, F. E.	Transmission System.
1719041	do	Blackwell, O. B., and Strieby, M. E.	Carrier Amplitude Control System.
1719047	do	Clark, A. B., and Crisson, G.	Volume Range Control System.
1719052	do	Green, E. I.	Single Side Band Carrier System.
1719091	do	Stokely, R. L.	Telephone Exchange System.
1719128	do	Reeve, H. T.	Electron Emitter.
1719456	do	Sterba, E. J.	System of Space Discharge Devices.
1719462	do	Clausen, H. P.	Sound and Scene Reproducing Apparatus.
1719465	do	Curtis, A. M.	Measuring Instrument.
1719471	do	Hoffman, H. L.	Control and Supervisory System.
1719472	do	Holland, N. H.	Acoustic Diaphragm.
1719474	do	Jutson, R. P.	Current Controlling Device.
1719477	do	Knoop, W. A.	Telegraph System.
1719479	do	Legg, V. E.	Composite Conductor.
1719481	do	Maxfield, J. P.	Studio for Acoustic Purposes.
1719484	do	Norton, E. L.	Carrier Transmission System.
1719485	do	Pease, R. M.	Power Line Carrier Wave Signaling System.
1719489	do	Shangle, A. H.	Telegraph Printer.
1719491	do	Stoller, H. M., and Morton, E. R.	Electric Regulator.
1719492	do	Stoller, H. M.	Regulator System.
1719494	do	Ulrich, H. W., and Prince, W. B.	Telephone Exchange System.
1719495	do	Wiese, F. M.	Oscillation Generator.
1719499	do	Bowne, L. J.	Telephone System.
1719506	do	Field, J. C.	Supervisory System.
1719609	do	Houts, G. J.	Apparatus for Supporting Composite Strands.
1719645	do	Bennett, A. F., and Moore, C. R.	Intelligence Signaling Apparatus.
1719845	do	Martin, DeL. K.	Reduction of Fading of Radio Signals.
1719896	do	do	Do.
1719916	do	Watson, E. F.	Picture Transmitting System.
1720544	do	De Forest, L.	Radio Receiving Apparatus.
1720676	July 16, 1929	Hosford, W. F., and Levinger, D.	Strand Working Mechanism.
1720681	do	Kochendorfer, F. S.	Molded Article.
1720715	do	Bidwell, E. M.	Mechanism for Working Fibrous Material.
1720722	do	Dean, R. S.	Slug for Use in Extrusion Operations and Method of Extrusion.
1720732	do	Jongedyk, R.	Article Handling Device.
1720738	do	Le Boutillier, A.	Signaling System.
1720739	do	McMullan, S.	Material Spooling Apparatus.
1720746	do	Povlsen, P. K., and St. John, E.	Support for Wires.
1720747	do	Roman, F. L.	Waterproof and Flameproof Material.
1720749	do	Schnable, G. L.	Insulating Material.
1720750	do	Selvig, J. N.	Mechanism for Working Fibrous Material.
1720759	do	Boynton, J. E.	Method of and Means for Handling Matter.
1720763	do	Siebs, C. T.	Vulcanizer.
1720770	do	Stone, J. S.	Associated Resonant Circuits.
1720773	do	Tournier, E. P., and Wolff, J. F.	Tool.
1720777	do	Zobel, O. J.	Electrical Network.
1721567	July 23, 1929	Martin, DeL. K.	Multiplex Radio Transmitting System.
1721572	do	O'Leary, J. T.	Carrier Current System Superposed on Side Circuit of Phantom System.
1721574	do	Potter, R. K.	Transmission Level Regulation.
1722016	do	Ronci, V. L.	Electrical Conductor and Method of Making Same.
1722020	do	Smythe, E. H.	Sound Reproducer.
1722027	do	Wente, E. C.	Acoustic Device.
1722033	do	Bragg, H. E.	Telephone Exchange System.
1722036	do	Byl, G. N.	Deflection Dynamometer.
1722039	do	Dudley, H. W.	Signal Operated Repeater Circuits.
1722045	do	Fry, J. R.	Transmission System.
1722047	do	Heising, R. A.	System for Signaling.
1722060	do	Knoop, W. A.	Printing Telegraph System.
1722055	do	Lowry, H. H.	Preparation of Granular Carbon.
1722064	do	Stearn, F. A., and Clark, E. H.	Telephone Exchange System.
1722068	do	Whiting, D. F.	Radio Apparatus.
1722079	do	Elmen, G. W.	Heat Treating Metallic Conductors.
1722080	do	Farrington, J. F.	Signaling.
1722081	do	do	Two-Way Signaling System.
1722083	do	Gabriel, J. C., and Thurston, G. M.	Electrical Condenser.
1722084	do	Gabriel, J. C.	Frequency Indicating System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1722089	July 23, 1929	Heising, R. A	Wave Repeating and Amplifying.
1722094	do	Jensen, A. G	Electric Wave Transmission System.
1722099	do	Landeen, A. G	Space Discharge Amplifier System.
1722121	do	Wilson, J. R	Electron Discharge Device.
1722262	July 30, 1929	Bascom, H. M	Telephone Exchange System.
1722274	do	Clark, A. B., and Mertz, P	Telautograph System.
1722283	do	Eyster, J. A	Telegraph System.
1722347	do	Wente, E. C	Acoustic Apparatus.
1722351	do	Quass, R. I	Telephone System.
1722353	do	Ray, W. H	Connecting Terminal for Electrical Conductors.
1722358	do	Seljesaeter, K. S	Alloy and Method of Making Alloys.
1722362	do	Wiley, S. C	Method of Winding Coils.
1722372	do	Hallam, C. A	Method of Reclaiming Metal Portions of Electrical Apparatus.
1722379	do	Kiviey, R. C	Apparatus for Coating Strand Material.
1722380	do	Kochendorfer, F. S., and Thode, W. N.	Mold Handling Mechanism.
1722421	do	Hosford, W. F	Wire Drawing Machine.
1722436	do	Martell, C	Signaling Conductor.
1722452	do	Bollinger, C	Electrical Switch.
1722739	do	Ford, B. K	Method of Manufacturing Connection Plugs
1722751	do	Jones, R. L	Optical Inspection System.
1722797	do	Jessup, R. D	Method of and Apparatus for Applying and Baking an Insulating Enamel Coating.
1722805	do	Lane, C. E	Sound Radiator.
1722987	do	Schelleng, J. C	Space Discharge System.
1723108	Aug. 6, 1929	Wilson, I. G	Echo Measuring Circuit.
1723123	do	Bascom, H. M	Telephone System.
1723153	do	Green, I. W	Do.
1723220	do	Thorp, V. P	Carrier Telegraph Alarm System.
1724019	Aug. 13, 1929	Harper, A. E	Radio Receiving System.
1724057	do	Weaver A., and Chase, F. H.	Radio Receiving Set.
1724082	do	Green, E. I	Means to Control Crosstalk.
1724898	do	Bailey, R. S., and Eagon, L. L.	Telephone System.
1724900	do	Beach, W. C	Control System for Producing Signals of Various Frequencies.
1724903	do	Bowne, L. J	Telephone System.
1724905	do	Caverly, H. C	Do.
1724915	do	Deering, L. E	Electrical Transmission System.
1724917	do	Farrington, J. F	Signaling.
1724922	do	Heising, R. A	Multiplex Radio System.
1724923	do	Gilbert, J. J	Submarine Telegraph System.
1724924	do	Graham, F. H	Telephone System.
1724925	do	Green, E. I	Carrier Signaling System.
1724938	do	Jammer, J. S	Carrier Wave Transmission.
1724962	do	Peoples, R. E	Electrical Testing System.
1724965	do	Rettenmeyer, F. X	Amplifying Circuits.
1724968	do	Schelleng, J. C	Regulator for Rectifiers.
1724971	do	Schwerin, P	Electron Discharge Device.
1724972	do	Schwerin, P., and Pfeiffer, J. G.	Glass Working Machine.
1724973	do	Shann, O. A	Testing Device.
1724987	do	Zobel, O. J	Selective Constant Resistance Network.
1724989	do	Barber, C. C	Contactor Drum for Telephone Central Office Equipment.
1724994	do	Curtis, A. M	Duplex Telegraph System for Loaded Cables.
1725022	do	Stacy, L. J., and Krom, M. E.	Alarm.
1725032	do	Weis, C. L., Jr	Secret Communicating System.
1725044	do	Alendorff, F	Electromechanical Switching System.
1725323	do	Vroom, E., and Entz, F. S	Telephone Exchange System.
1725377	do	Siegmund, H. O	Direct Current Supply System.
1725566	do	Chestnut, R. W	Secret Communication System.
1725610	do	Byl, G. N	Drop Wire Hanger.
1725691	do	Affel, H. A	System of Electrical Distribution.
1725753	Aug. 27, 1929	Davidson, J., Jr., and Phelps, H. E.	Office Selecting Means for Telephone Trunk Circuits.
1725756	do	Gannett, D. K	Determination of Delay by Impedance Measurements.
1725757	do	Haines, W. T	Call Charging Telephone Exchange System.
1725773	do	White, J. H	Electric Conductor.
1726105	do	Harrison, H. C	Acoustic Device.
1726340	do	Battles, W. S	Method of and Apparatus for Coating Finely Divided Particles.
1726359	do	Martell, C., and Hagen, B. A	Apparatus for Applying Material to Cords.
1726551	Sept. 3, 1929	Ford, L. S	Electrical Cable.
1726578	do	Nyquist, H., and Mertz, P	Secret Telephone System.
1726580	do	Ohl, R. S	Thermionic Vacuum Tube.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1726622	Sept. 3, 1929	Holden, W. H. T.	Radio Receiver.
1726658	do	Fay, O. J., Heimberger, H. T. and Pugh, E.	Heating Device.
1727010	do	Friis, H. T., and Jensen, A. G.	Radio Receiving Circuit.
1727328	Sept. 10, 1929	Affel, H. A.	High Frequency Measuring System.
1727388	do	do	Do.
1727408	do	Ohl, R. S.	Control of Regeneration in Signaling Systems
1727550	do	Legg, V. E.	Composite Conductor.
1727955	do	Biggar, J. H.	Electrical Cable.
1727971	do	Ford, L. S.	Do.
1727972	do	do	Do.
1728122	do	Horton, J. W.	Television System.
1728226	Sept. 17, 1929	Branson, D. E.	Telegraph Repeater.
1728239	do	Green, I. W.	Arrangement for Establishing Time Intervals
1728247	do	Mitchell, D.	Echo Suppressor.
1728304	do	Pfannenstiehl, H.	Film Drive Mechanism.
1728311	do	Taylor, A. T.	Electrical Converting and Measuring System
1728975	Sept. 24, 1929	Morris, R. W., and Nelson, S. F.	Premature Disconnect Signal for Telephone Circuits.
1728978	do	Parker, R. D.	Telegraphic Transmission of Pictures.
1728986	do	Stokes, H. G.	Picture Transmission System.
1729644	Oct. 1, 1929	Henneberger, T. C.	Electrical Testing System.
1729645	do	Mertz, P.	Signaling System.
1729649	do	Toomey, J. F., and Phelps, H. E.	Program Transmission Over Wires.
1729806	do	Thuras, A. L.	Electrodynamic Device.
1730049	do	Aldendorff, F.	Electromechanically Controlled Switch and Remote Control Signaling and Telephone System.
1730368	Oct. 8, 1929	Herman, J.	Method of and Means for Measuring Differences in Time of Propagation of Wave Fronts of Different Frequencies Over a Circuit.
1730402	do	Abbott, H. H., and Kuhn, G. W.	Testing Apparatus for Electrical Circuits.
1730416	do	Gannett, D. K.	Electro-Optical System.
1730424	do	Harrison, H. C.	Magnetic Ball or Roller Bearing.
1730425	do	do	Acoustic Device.
1730605	do	Farrington, J. F., and Smythe, E. H.	Signal Receiver.
1730611	do	Heller, H. S.	Art of Artificial Sound Reproduction.
1730614	do	Knoop, W. A.	Synchronous Vibratory Relay System.
1730969	do	Chanter, A. J.	Telephone Service Observing System.
1730971	do	Gilbert, J. J.	Treating Loaded Submarine Cables.
1730977	do	Johnson, L. H.	Electrical Testing System.
1730981	do	Murphy, P. B.	Telephone System.
1731055	do	Marchev, A.	Strand Treating Machine.
1731239	Oct. 15, 1929	Affel, H. A.	Thermo-Milliammeter.
1731243	do	Ehrlich, J.	Signaling System.
1731264	do	Potter, R. K.	Apparatus for Controlling the Output of Alternating Current Generators.
1731570	do	Harrison, H. C.	Sound Radiating System.
1731656	do	Flanders, P. B.	Repeater Circuits.
1732236	Oct. 22, 1929	Kochendorfer, F. S.	Casting Apparatus.
1732246	do	Thode, W. N.	Do.
1732255	do	Branson, D. E.	Telegraph Monitoring System.
1732286	do	Shanck, R. B.	Telegraph System.
1732311	do	Nyquist, H.	Method and Apparatus for Testing Networks.
1732312	do	Nyquist, H., and Pfleger, K. W.	Electrical Delay Network.
1732313	do	do	Electrical Delay.
1732398	do	Daniels, E. A., and Snell, H. S.	Cork Composition.
1733121	Oct. 29, 1929	Giddis, G. F.	Telephone or Other Booth.
1733127	do	Lewis, B. F.	Signaling Circuits.
1733130	do	Niles, E. W., and Edwards, W. H.	Telephone Signaling Circuits.
1733165	do	Perry, D. B.	Synchronizing Arrangement for Moving Picture Projectors.
1733172	do	Stover, H. F.	Collapsible Support.
1733553	do	Nebel, C. N.	Power Line Carrier Current System.
1733554	do	Norton, E. L.	Magnetic Device.
1733556	do	Peterson, E.	Carrier Wave Transmission.
1733557	do	Pfannenstiehl, H.	Film Retaining Roller.
1733560	do	Scruby, S. V. C.	Automatic Battery Charging System.
1733568	do	Wilbur, R. S.	Telephone System.
1733569	do	Williford, O. H.	Telephone Exchange System.
1733579	do	Coolbroth, F. H.	Ear Piece.
1733580	do	Collis, R. E.	Telephone System.
1733583	do	Curtis, A. M.	Submarine Carrier Telegraphy.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1733584	Oct. 29, 1929	Deakin, G	Telephone System.
1733585	do	Dehn, J. W	Method of Testing and Test Set.
1733591	do	Gilson, A. F. F	Electric Circuit Connector.
1733592	do	Given, F. J	Process of Manufacture of Magnetic Cores.
1733596	do	Harrison, H. C	Acoustic Device.
1733602	do	Johnson H. B	Telephone System.
1733603	do	do	Electron Discharge Device.
1733605	do	Jones, W. C	Tactual Interpretation of Vibrations.
1733667	do	Keller, A. C	Combined Recorder and Reproducer.
1733608	do	Knox, W. G., and Russell, A. G.	Phonograph Needle.
1723609	do	Kuhn, J. J	Transmission System.
1733614	do	Marrison, W. A	Subharmonic Frequency Producer.
1733617	do	Meissner, C. R	Signaling System.
1734038	Nov. 5, 1929	Levy, L	Electrical Transmission of Energy.
1734104	do	Wright, S. B	Two-Way Transmission with Repeaters.
1734112	do	Carson, J. R	Radio Receiving System.
1734113	do	Clark, A. B., and Crisson, G.	Telephone Repeater Circuits.
1734121	do	Fisher, H. J	Electrical Wave Transmission System.
1734124	do	Green, I. W., and Inglis, A. H.	Universal Telephone Set.
1734132	do	Kendall, B. W	High Frequency Signaling.
1734150	do	Shaw, T	Loaded Transmission System.
1734219	do	Lorance, G. T	Transmission Regulation.
1734624	do	Harrison, H. C	Piston Diaphragm Having Tangential Corrugations.
1734700	do	Walker, H. G	Coated Core.
1734703	do	Yancey, T. McD	Method of and Apparatus for Unwinding Strand Material.
1734704	do	do	Do.
1734705	do	do	Do.
1734716	do	Daniel, T. A	Apparatus for Welding.
1734732	do	Kranz, H. E	Controlling System.
1734737	do	Martindell, F	Method of and Apparatus for Coating Strand Material.
1734745	do	Ray, W. H	Apparatus for Removing Insulation.
1734747	do	Seeley, G. A	Mixing Apparatus.
1735037	Nov. 12, 1929	Carpe, A	Method of and Apparatus for Reducing Width of Transmission Band.
1735041	do	Gardner, F. G	Carrier Telegraph Alarm System.
1735044	do	Green, E. I	Frequency Equalization Carrier System.
1735052	do	Nyquist, H	Phase Compensating Networks.
1735053	do	Ohl, R. S	Radio Signaling System.
1735742	do	Fetter, C. H	Wave Filter.
1735846	Nov. 19, 1929	Blood, H. L	Wire Drawing Apparatus.
1735850	do	Boedeker, W. U	Do.
1735871	do	Olson, H. O	Do.
1735905	do	Martin, W. H., and Strieby, M. E.	Microphone Mounting.
1735933	do	Nyquist, H	Method of Testing Telegraph Transmission
1735939	do	St. John, E	Drive Ring.
1735940	do	Vernam, G. S	Telegraph System.
1735943	do	Watson, E. F., and Swezey, B. S.	Method of and Means for Testing Telegraph Transmission.
1736783	Nov. 26, 1929	Gary, L. A., and Tasker, H. G.	Measurement of Electrical Resistance.
1736785	do	Haines, W. T	Measuring System.
1736786	do	Herman, J	Telegraph Repeater Circuits.
1736814	do	Affel, H. A	Electrical Transposition System.
1736816	do	Almquist, M. L	Alternating Current Relay.
1736852	do	Evans, P. H	Power Line Signaling.
1737438	do	Stearns, H. C	Apparatus for Arranging Articles.
1737640	Dec. 3, 1929	Channel, J. W	Machine for Producing Insulating Sleeves.
1737652	do	Gannett, D. K	Ballast Lamp and Filament Activity Tests for Repeaters.
1737668	do	Morehouse, L. F., and Watson, E. F.	Signaling System.
1737671	do	Ohl, R. S	Multi-Channel Radio Printing Telegraph System.
1737672	do	do	Radio Printing Telegraph System.
1737830	do	Crisson, G	Means for and Method of Volume Control of Transmission.
1737843	do	Hartley, R. V. L	Wave Trasnferring System.
1737992	do	Bostwick, L. G	Volume Control System.
1738000	do	Green, E. I	Means for and Method of Volume Control of Transmission.
1738007	do	Ives, H. E	Television.
1738234	do	Curtis, A. M	Submarine Cable Construction.
1738235	do	Farrington, J. F	Signaling.
1738245	do	Hinrichsen, E. E	Telephone System.
1738247	do	Husta, P	Current Controlling System.
1738253	do	Locke, G. A	Frequency Changer.
1738266	do	Schelleng, J. C	Rectifier System.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1738269	Dec. 3, 1929	Van der Bijl, H. J	Electron Discharge Device and Method of Making the Same.
1738274	do	Anderson, S. E	Wave Transmission Means.
1738289	do	Fletcher, H	Tactile Reception of Sound.
1738290	do	Fowler, C. B	Telephone Exchange System.
1738292	do	Gilbert, J. J	Submarine Duplex Telegraph System.
1738293	do	Gooderham, J. W	Electrical Controlling Device.
1738294	do	do	Telephone System.
1738298	do	Johnson, L. H	Do.
1738299	do	Kille, L. A	Intermittently Operated Signaling Device.
1738302	do	Krecek, J. A	Telephone System.
1738307	do	McKeehan, L. W	Metallic Element.
1738322	do	Schlenker, V. A	Acoustic Device.
1738327	do	Smythe, E. H., and Lane, C. E.	Vibration Device.
1738519	Dec. 10, 1929	Abbott, H. H	Signaling System for Subscribers' Telephone Circuits.
1738522	do	Campbell, G. A	Electromagnetic Wave Signaling System.
1738524	do	Christopher, H. J	Device for Locking Evacuated Tubes.
1738536	do	Mitchell, D., and Silent, H. C	Echo Suppressor.
1738653	do	Inglis, A. H., and Guenther, R.	Telephone Receiver.
1739052	do	White, J. H	Production of Finely Divided Metallic Materials.
1739068	do	Harris, J. E	Method of Producing Materials in Finely Divided Form.
1739247	do	Marchev, A	Apparatus for Measuring Materials.
1739265	do	Stastney, L	Winding Apparatus.
1739277	do	Babbitt, B. J	Apparatus for Measuring the Permeability of Magnetic Materials.
1739282	do	Blount, H	Material Working Apparatus.
1739298	do	Ford, B. K	Method of and Apparatus for Testing Flexible Strands.
1739494	Dec. 17, 1929	Affel, H. A	Piezo-Electric Interference Eliminator.
1739520	do	Potter, R. K	Radio Receiving Circuits.
1739531	do	Taylor, E. R	Remote Control System.
1739532	do	do	Remote Control of Repeaters.
1739606	do	Nyquist, H. and Pfleger, K. W.	Echo Suppressor.
1739668	do	Green, C. W	Transmission System.
1739609	do	Whittle, H	Electrical Transmission Circuits.
1739752	do	Elmen, G. W	Magnetic Material and Appliance.
1740491	Dec. 24, 1929	Affel, H. A	Compensation for Phase Variations.
1740577	do	De Forest, L	Wireless Telegraph-Telephone System.
1740620	do	Nyquist, H	Controlling Phase Relations Between Stations.
1740621	do	do	Suppression of Echoes and Singing in Four-Wire Circuits.
1740856	do	Herman, J., and Wright, S. B.	Volume Regulation in Two-Way Telephone Circuits.
1740867	do	Nyquist, H	Controlling Phase Relations Between Stations.
1741272	Dec. 31, 1929	Bascom, H. M	Telephone System.
1741356	do	do	Protective Device for Electric Circuits.
1741363	do	Green, E. I	Piezo-Electric Interference Eliminator.
1471375	do	Niles, E. W., and Edwards, W. H.	Current Equalizing Device.
1741749	do	Whittle, H	Transmission Circuits.
1741767	do	Green, C. W	Carrier Current Signaling System.
1741812	do	Boynton, J. E	Method of and Means for Working Moldable Matter.
1741813	do	do	Apparatus for Producing Composite Articles.
1741814	do	do	Method of and Apparatus for Extruding Matter.
1741815	do	do	Method of and Apparatus for Treating Moving Matter.
1741816	do	do	Apparatus for Pumping Material.
1741926	do	French, N. R	Compound Loading System.
1742243	Jan. 7, 1930	Fish, L. B	Cable Clamp and Bridle Ring.
1742251	do	Holden, W. H. T	Amplifying System.
1742252	do	do	Piezo-Electric Frequency Eliminator.
1742291	do	Thompson, G. K	Selective Signaling System.
1742293	do	Watson, E. F., and Swezey, B. S.	Tape Cutting and Pasting Device.
1742543	do	Ives, H. E	Colored Picture Transmission.
1742899	do	Clockey, A. A	Synchronous Telegraphy.
1742902	do	Deloraine, E. M., and Sandeman, E. K.	Multi-Channel Radio Communication System.
1742906	do	Fultz, M. E., and Knettles, H. R.	Alarm Circuits for Space Discharge Systems.
1742909	do	Griggs, E. V	Wave Transmission System.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1742912	Jan. 7, 1930	Hartley, R. V. L.	Electro-Optical System.
1742916	do	Irvine, F. S.	Telephone Exchange System.
1742920	do	Matthies, W. H.	Do.
1742927	do	Nicoll, R. I. D., Davis, R. C., and Von Nostitz, E.	Do.
1742928	do	Nicoll, R. I. D.	Telephone Trunk Circuits.
1742930	do	Paine, R. C.	Telephone System.
1743089	Jan. 14, 1930	Bandur, A. F.	Magnetic Material.
1743132	do	Green, E. I.	Equalization of Carrier Systems.
1743141	do	Ilgenfritz, L. M.	Do.
1743180	do	Abraham, L. G.	Picture Transmitting System.
1743245	do	Smith, T. C.	Apparatus for Spraying Liquids.
1743260	do	Zinn, M. K.	Means and Method for Maintaining Constant Transmission Efficiency.
1743309	do	Beath, C. P., and Babbitt, B. J.	Alloy of Steel and Method of Treating the Alloy.
1743318	do	Carrington, F. R.	Method of and Apparatus for Testing Electrical Conductors.
1743341	do	Grondahl, H. H. C.	Founding Apparatus.
1743354	do	Johnson, L. E.	Indicating Device.
1743364	do	Liss, A. S.	Apparatus for Assembling Articles.
1743386	do	Paulson, C.	Electrical Testing Apparatus.
1743414	do	Wente, E. C.	Method and Apparatus for Determining the Properties of Acoustic Materials.
1743415	do	Wilbur, R. S.	Telephone Exchange System.
1743429	do	Clark, E. H.	Do.
1743443	do	Fearing, J. L.	Means for Electric Energy Translation.
1743450	do	Grondahl, H. H. C.	Apparatus for Handling Containers.
1743453	do	Hillhouse, J. T. E.	Electromagnetic Device.
1743456	do	Keith, C. R.	Sound Recording.
1743470	do	Mead, E. D.	Magnetic Device.
1743471	do	Menefee, H. R.	High Voltage Switch.
1743478	do	Pratt, F. J.	Magnetic Device.
1743588	do	Affel, H. A., and Hamilton, B. P.	Carrier Transmission System for Printing Telegraphy.
1743670	do	Hartley, R. V. L.	Controlling the Frequency of an Alternating Current.
1743691	do	Shea, T. E.	Wave Transmission.
1743701	do	Anderson, S. E.	Vacuum Tube Circuits.
1743708	do	Collis, R. E.	Telephone System.
1743710	do	Englund, C. R., and Llewellyn, F. B.	Secrecy System for Signaling.
1743711	do	Field, J. C.	Supervisory System.
1743856	do	Ives, H. E.	Picture Transmission.
1744031	Jan. 21, 1930	Abraham, L. G.	Measurement of Active Balance Components.
1744044	do	Green, E. I.	Single Side Band Carrier System.
1744047	do	Keller, A. C.	Combined Recorder and Reproducer.
1744053	do	Miller, C. G.	Signaling System.
1744058	do	Shetzline, R. A.	Electrical Protective System.
1744063	do	Wilburn, S. D.	Bridge Duplex Telegraph System.
1744739	do	Blount, H.	Material Spooling Apparatus.
1744760	do	Grondahl, H. H. C.	Tension Device.
1744767	do	Huisken, A. H., and Roman, F. L.	Method of and Means for Rendering Fibrous Materials Transparent or Translucent.
1744776	do	Liss, A. S.	Work Feeding Device.
1744779	do	Massingham, H. R.	Material Feeding Apparatus.
1744782	do	Matthern, O. W., and Siebs, C. T.	Electrical Switching Apparatus.
1744784	do	McDonough, J., and Normann, L.	Flux.
1744797	do	Pfeiffer, C. L.	Method of and Apparatus for Welding.
1744802	do	Rock, G. L.	Percussion Device.
1744804	do	Sanborn, F. A.	Welding Apparatus.
1744810	do	Shallcross, J.	Method of Producing Electrical Contacts.
1744817	do	Ward, H. L.	Oven.
1744831	do	Canning-Martinsson, G. R.	Press.
1744835	do	Ohl, R. S.	Constant Frequency Oscillator.
1744836	do	do	Carrier Amplitude Control in Radio System.
1744840	do	Strieby, M. E., and Fetter, C. H.	Voltage Indicating and Translating Device.
1744887	do	Gruene, W. J.	Device for Introducing Gas Into Cables.
1744918	do	Phelps, H. E., and Davidson, J., Jr.	Telephone System.
1745347	Feb. 4, 1930	Anderson, S. E.	Receiving Circuit.
1745369	do	Holden, W. H. T.	Unipotential Cathode Vacuum Tube.
1745376	do	Ohl, R. S.	Short Wave Radio Receiver.
1745415	do	Green, E. I.	Carrier Amplitude Control System.
1745419	do	Henneberger, T. C.	Apparatus for Testing Open Wire Joints.
1745457	do	Silent, H. C.	Echo Suppressor.
1745612	do	Elmen, G. W.	Non-Magnetic Material.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1745680	Feb. 4, 1930	Kemp, A. R	Continuously Loaded Telephone or Telegraph Cable.
1745686	do	Moore, C. R	Mounting for Phonic Diaphragms.
1745756	do	Gray, F	Electrical Picture Transmission Receiving System.
1746239	Feb. 11, 1930	Best, F. H	Transmission Measuring System.
1746241	do	Clark, A. B., and Best, F. H	Do.
1746304	do	Clark, A. B	Method for Measuring the End Section Capacity of Coil Loaded Telephone Circuits.
1746305	do	Espenschied, L	Radio Signaling System.
1746314	do	Lewis, B. F	Loading System for Long Submarine Cables.
1746729	do	Ives, H. E	Electro-Optical System.
1746730	do	Jones, W. C	Reproducing Apparatus.
1746788	do	Marrison, W. A	Piezo-Electric Device.
1746793	do	Rhodes, W. A., and Dahl, J. F.	Trunking System.
1746800	do	Seacord, K. P	Telephone Receiver.
1746803	do	Stevenson, G. H	Balanced Radio Receiving System.
1746808	do	Wolfe, W. V	Power Line Signaling.
1746817	do	Campbell, T. R	Insulator Mounting.
1746827	do	Fry, J. R., and Hantzsch, R. E.	Retarded Action Circuit Controller.
1746829	do	Goodrum, C. L	Radio Signaling System.
1746960	do	Nichols, H. W	Carrier Communicating System.
1747160	Feb. 18, 1930	Carpe, A	Single Side Band Carrier System.
1747163	do	Dickieson, A. C	Carrier System Testing Method and Circuit.
1747169	do	Hovland, H	Connector Switch Circuits.
1747199	do	Wheeler, C. H	Coin Collection Apparatus.
1747218	do	Bohn, W. C	Automatic Selection of Receiving Channels.
1747219	do	Bowne, L. J., and Koechling, C. D.	Telephone System.
1747220	do	Bown, R	Automatic Selection of Receiving Channels.
1747221	do	do	Do.
1747224	do	Carpenter, W. W	Telephone Exchange System.
1747233	do	Gargan, J. O	Tuning Dial.
1747236	do	Gillett, G. D	Automatic Selection of Receiving Channels.
1747241	do	Hinrichsen, E. E	Telephone System.
1747244	do	Hoyt, F. A	Coin Collection Apparatus.
1747248	do	Knoop, W. A	Synchronizing System.
1747821	do	Field, J. C	Supervisory System.
1747829	do	Harrison, H. C	Electrical Reproducer.
1747830	do	do	Acoustic Horn.
1747833	do	King, G. V	Telephone Switchboard System.
1747835	do	Mathes, R. C	Two-Way Signaling System.
1747837	do	Moore, C. R	Oscillation Generator.
1747841	do	Peterson, A. E	Substation Apparatus.
1747847	do	Schlenker, V. A	Method of Manufacturing Acoustic Radiators.
1747849	do	Strickler, W. B	Telephone System.
1747852	do	Akers, M. K	Vacuum Tube Rectifier.
1747854	do	Bozorth, R. M	Magnetic Structure.
1747863	do	Dickieson, A. C	Electrical Signaling.
1747866	do	Elmer, L. A	Sound Recording and Reproducing Machine.
1748166	Feb. 25, 1930	Bascom, H. M., and Haines, W. T.	Telephone Exchange System.
1748171	do	Clark, A. B	Measurement of Echoes.
1748175	do	Holden, W. H. T	Thermionic Vacuum Tube.
1748186	do	Nyquist, H	Signaling System.
1748192	do	Satterthwaite, J. P., and Dingman, J. E.	Measurement of Echoes.
1748239	do	Matthies, W. H	Telephone System.
1748947	Mar. 4, 1930	Drew, H. S	Apparatus for Coating Cores.
1748969	do	Blankenstein, E. E., and Coulter, C. M.	Method of Testing Materials.
1748970	do	Blood, H. L	Serving Apparatus.
1748978	do	Feeney, J. D	Material Handling Apparatus for Processing Machines.
1748983	do	Hofstetter, R	Control Instrument.
1748993	do	Purdy, C. A	Electrical Coil and Method of Manufacturing It.
1748995	do	Reichelt, L. O., and Rohloff, J. J.	Serving Apparatus.
1749004	do	Strawn, M. L	Speed Regulating Device.
1749006	do	Trebes, B. M. A	Clamping Device.
1749007	do	Wales, C	Pressure Gauging Apparatus.
1749008	do	Walker, H. G	Insulating Material.
1749015	do	Bisbee, F. C	Meter.
1749023	do	Edwards, W. H	Do.
1749044	do	Niles, E. W	Do.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1749045	Mar. 4, 1930	Nyquist, H., and Pfleger, K. W.	Signaling System.
1749048	do	Thorp, V. P., and Rea, W. T.	Carrier Telegraph Alarm System.
1749076	do	Hofstetter, R.	Apparatus for Assembling Members.
1749825	Mar. 11, 1930	Loye, D. P.	Telegraph System.
1749838	do	Niles, E. W.	Selective System.
1749841	do	Nyquist, H.	Voice Operated Relay Equipment.
1749844	do	Roberts, L. C.	System for Furnishing Intermittent Telegraph Service.
1749851	do	Silent, H. C.	Circuit Controller.
1750310	do	Jonkel, F. F., and Larson, H. W.	Apparatus for Arranging Articles.
1750315	do	Franks, C. H., and Olsen, M. R.	Do.
1750327	do	Olsen, M. R.	Do.
1750328	do	Patchen, R. H., and Rock, G. L.	Apparatus for Arranging and Magazining Articles.
1750329	do	do	Apparatus for Arranging Articles.
Des80670	do	Blount, N.	Desk Stand for a Hand Telephone.
Des80671	do	do	Do.
Des80672	do	do	Do.
1750661	Mar. 18, 1930	Bown, R.	Cathode Ray Oscillograph.
1750666	do	Glezen, L. L., Stigers, M. J., and Taylor, E. R.	Toll Circuit.
1750668	do	Green, E. I.	Determining Movement and Position of Moving Objects.
1750688	do	Potter, R. K.	Signaling System.
1750694	do	St. John, E.	Drive Ring.
1751207	do	Johnson, H. B.	Telephone Trunk Circuit.
1751247	do	Mueller, E. C., Jr.	Designation Device.
1751259	do	Wentz, J. F.	Treating Loaded Submarine Cables.
1751263	do	Cesareo, O.	Electrical Switching System.
1751271	do	Farrington, J. F.	Radio Transmitting Apparatus.
1751509	Mar. 25, 1930	Cunningham, J.	Electric Soldering Machine.
1751510	do	do	Method and Apparatus for Making Joints.
1751516	do	Green, E. I.	Common Frequency Broadcasting System.
1751522	do	Mitchell, D., and Silent, H. C.	Multiple Way Connection for Transmission Lines.
1751527	do	Nyquist, H.	Distortionless Amplifying System.
1752046	do	Whittle, H.	Electric Coupling Circuits.
1752303	Apr. 1, 1930	Kelley, L. A.	Interference Neutralizer for Alternating Current Telegraph Systems.
1752325	do	Branson, D. E.	Reduction of Static Interference in Carrier Systems.
1752326	do	do	Do.
1752330	do	Clapp, R. H.	Suppression of Interference in Carrier Telegraph Systems.
1752344	do	Kelley, L. A.	Reduction of Atmospheric Interference.
1752345	do	do	Reduction of Atmospheric Disturbance.
1752346	do	Kelley, L. A., Monk, N., and Thorp, V. P.	Interference Neutralizer for Alternating Current Telegraph Systems.
1752347	do	Leibe, F. A.	Reduction of Atmospheric Disturbance.
1752360	do	Affel, H. A.	Reduction of Static Interference in Carrier Systems.
1752413	do	Buckley, O. E.	Signaling Cable.
1752429	do	Fowler, C. B.	Telephone Set.
1752436	do	Kinkead, F. S.	Telegraph Repeating System.
1752437	do	Kivley, R. C.	Braiding Machine.
1752438	do	Korn, F. A.	Telephone System.
1752461	do	Shea, T. E.	Transmission Network.
1752465	do	Spencer, F. C.	Feeding Device for Drilling Machine Spindles.
1752468	do	Stull, J. S.	Work Feeding Device for Drilling Machines.
1752471	do	Trebes, B. M. A.	Extrusion Machine.
1752474	do	Anderson, C. H.	Method of Treating Metals.
1752480	do	Fay, J. W.	Mechanism for Working Pulpous Material.
1752485	do	Hartley, R. V. L.	Secrecy System.
1752486	do	do	Magnetic Device.
1752487	do	Hoag, C. I.	Sawing Machine.
1752489	do	Jongedyk, R.	Wrapping Apparatus.
1752490	do	Karcher, J. C.	Process for Changing the Properties of Silicon Steel.
1752497	do	Messingham, H. R.	Apparatus for Producing Electrical Cables.
1752498	do	Mathes, R. C.	Telephone System.
1752507	do	Ruthven, W.	Shaping Tool.
1752515	do	Wensley, E.	Sound or Vibration Transmitting Apparatus.
1752528	do	Hubbard, F. A.	Method and Apparatus for Comparing and Adjusting the Electrical Length of Paths for the Transmission of Electrical Energy.
1752531	do	Malm, F. S.	Composition of Matter and Method of Its Preparation.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1752550	Apr. 1, 1930	Dehn, J. W.	Telephone System.
1752573	do	Piper, H. D.	Apparatus for Heat Treating Metals.
1752579	do	Shea, T. E.	Wave Filter.
1752580	do	Snell, H. S.	Molding Compound and Its Method of Production.
1752585	do	Beardsley, H. I., and Clark, H. R.	Cord Fastener.
1752598	do	Jorgensen, E. N.	Electric Welding.
1752604	do	Massingham, H. R.	Material Feeding Apparatus.
1753230	Apr. 8, 1930	Best, F. H.	Meter.
1753231	do	do	Meter for Transmission Testing.
1753256	do	Thorp, V. P.	Alternating Current Relay.
1753321	do	Stokely, R. L.	Telephone Exchange System.
1753325	do	Whittle, H.	Retardation Coil System.
1753329	do	Black, H. S.	Electric Signaling System.
1753330	do	Bragg, H. E.	Metering Device.
1753331	do	Clokey, A. A.	Constant Speed Drive.
1753334	do	Curley, T. V.	Telephone System.
1753336	do	Gilbert, J. J.	Duplex Telegraph System for Loaded Cables.
1753337	do	Given, F. J.	Adjustable Inductance Coil.
1753338	do	Hague, A. E., and Peterson, G. H.	Telephone Exchange System.
1753345	do	Knoop, W. A.	Timing Circuit.
1753346	do	Lum, G. R.	Sound Ranging System.
1753348	do	Newsom, J. B.	Monitoring System.
1753353	do	Steinberg, J. C.	Electrical System for Secret Tramsmission.
1753444	do	Ohl, R. S.	Signaling System.
1753445	do	do	Do.
1753446	do	do	Do.
1753715	do	do	Short Wave Radio Signaling System.
1753746	do	Kemp, A. R.	Plastic Composition.
1753869	do	Reed, T. C., and Odell, A. D.	Method and Means for Preparing Insulating Sleeves.
1753948	do	Selvig, J. N.	Method of and Mechanism for Working Fibrous Material.
1754224	Apr. 15, 1930	Davidson, J., Jr., and Moody, D. L.	Signaling System.
1754234	do	Holden, W. H. T.	Vacuum Tube.
1754238	do	Niles, E. W., and Edwards, W. H.	Coin Box Device.
1754239	do	do	Telephone Singaling System.
1754240	do	Nyquist, H., and Brand, S.	Composite Telephone and Telegraph System.
1755243	Apr. 22, 1930	Crisson, G.	Signaling Means for Telephone Systems.
1755244	do	Dietze, E.	Device for Measuring Level Differences.
1755257	do	Holden, W. H. T.	Vacuum Tube and Method of Preparing the same.
1755258	do	do	Battery Charging Circuits.
1755266	do	Ohl, R. S.	Tuned Radio Frequency Amplifier.
1756097	Apr. 29, 1930	Niles, E. W., and Edwards, W. H.	Electrical Delay Circuit Arrangement.
1756102	do	Rosekrans, W. M.	Telephone System.
1756130	do	Ohl, R. S.	Oscillation Generator.
1756131	do	do	High Frequency Oscillation Generator
1756132	do	do	Do.
1756274	do	Anderegg, G. A.	Signaling Conductor.
1756314	do	Ten Eyck, W. B.	Conductor.
1756319	do	Wentz, J. F.	Do.
1756341	do	Buckley, O. E.	Electrical Conductor.
1756371	do	McCann, P. S.	Continuously Loaded Conductor.
1756546	do	Gilbert, J. J.	Submarine Cable.
1756573	do	Stoller, H. M., and Porter, G. C.	Regulator System.
1756705	do	Smith, W. F., Jr., and Crabtree, T. H.	Voice Screen.
1756931	May 6, 1930	Anderson, S. E.	Loop Antenna.
1757173	do	Dingman, J. E., and Engelbert, R. F.	Combined Cutter and Pressure Roller Device.
1757178	do	Elmen, G. W.	Magnetic Material.
1757181	do	Espenschied, L.	Privacy System for Telephone Transmission.
1757193	do	Hotopp, A. H.	Current Measuring Device.
1757217	do	Rhodes, W. A.	Telephone System.
1757225	do	Singer, F. J.	Telegraph Alarm Circuit.
1757443	do	Sprague, C. A.	Submarine Cable.
1757446	do	Wright, E. P. G., Baker, J. H. E., and Cameron, A. H.	Telephone Exchange System.
1757459	do	Harrison, H. C.	Sound Translating System.
1757464	do	Malick, J. M.	Coin Collection Apparatus.
1757485	do	Moore, C. B.	Acoustic Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1757469	May 6, 1930	Oswald, A. A	Space Discharge System.
1757703	do	Curtis, A. M	Electrical Contact Device.
1757704	do	do	Contact Drive Vibratory Fork.
1757708	do	Everett, S. H	Telephone Exchange System.
1757710	do	Fondiller, W	Electromagnetic Circuits and Apparatus.
1757712	do	Harrison, H. C	Acoustic Device.
1757717	do	Johnston, J	Insulated Conductor and Method of Manufacturing the Same.
1757727	do	Marrison, W. A	Electric Control Device.
1757729	do	Mathes, R. C	Wave Transmission System.
1757736	do	Pritchard, W. T	Lubricating Device.
1758025	May 13, 1930	Bolin, C. H	Pole Planer.
1758029	do	Cole, O. R., and Garlinger, M. T.	Do.
1758044	do	Hoyt, R. S	Wave Antenna.
1758056	do	Niles, E. W	Signaling Circuit.
1758058	do	Potter, R. K	High Frequency Communication System.
1758933	May 20, 1930	Chapman, A. G	Transposed and Tapered Antenna.
1759000	do	do	Radio Signaling System.
1759019	do	Murphy, J. B	Electrical Testing System.
1759023	do	Schirmer, A. H	Electrical Protective Device.
1759026	do	Terriberry, W. S	Telegraph Apparatus.
1759046	do	Edelmann, O	Control Device.
1759328	do	Smythe, E. H	Sound Reproducer.
1759332	do	Whittle, H., and Grimley, D. G.	Wave Transmission Circuit.
1759504	do	Gray, F	Electro-Optical Transmission.
1759604	do	Bjornson, B. G	Indicating Device.
1759610	do	Fisher, G. H	Radio Receiving Set.
1759612	do	Given, F. J., Greenidge, R. M., and Weeks, J. R., Jr.	Method of Producing Magnetic Bodies.
1759623	do	Mathes, R. C	Signaling System.
1759632	do	Scheuch, W. A	Acoustic Diaphragm.
1759835	May 27, 1930	Boynton, S. E	Material Feeding Apparatus.
1759837	do	Brown, R. W., and Paulson, C.	System and Apparatus for Testing Impulses and Impulse Devices.
1759844	do	Gudge, A. W., and Wensley, E.	Method of Producing Articles from Sheet Material.
1759850	do	Janicki, J	Strand Coating Apparatus.
1759873	do	Shewmon, D. D	Apparatus for Measuring the Liquid Contents of Vessels.
1759874	do	Stearns, H. C	Power Transmitting Apparatus.
1759898	do	Fruth, H. F	Transmitter.
1759915	do	Potter, R. K	Photoelectric Cell.
1759933	do	Bonell, R. K	Contact Making Device.
1759938	do	Dean, S. W	Coordination of Direction Finder Observations.
1759950	do	Matte, A. L	Alternating Current Telegraph System.
1759952	do	McCurdy, R. G	Electrical Transmission System.
1760159	do	Mathes, R. C	Electro-Optical Image Production.
1760920	June 3, 1930	Stromberg, S. E	Testing System.
1760957	do	Ohl, R. S	Vacuum Tube Detector.
1760973	do	Zobel, O. J	Electrical Network.
1760983	do	Gordon, C. S., and Lowe, J. T.	Insulator.
1760984	do	Hamilton, H. S	Transoceanic Radio Telephone System.
1761565	do	Kaempf, E., and Dalzell, D. P	Cable.
1762139	June 10, 1930	Bennett, A. F., and Mitchell, C. E.	Signaling System.
1762160	do	Curtis, A. S	Means for and Method of Wave Analysis.
1762212	do	Carter, C. W., Jr	Thermionic Vacuum Tube.
1762252	do	Vernam, G. S	Printing Telegraph Exchange System.
1762255	do	Baldwin, C. E	Method of Plugging Cables.
1762278	do	Singer, F. J	Transmission System.
1762279	do	do	Do.
1762725	do	Marrison, W. A	Method of and Means for Indicating Synchronism.
1762727	do	Mathes, R. C	Volume Control System.
1762730	do	McKeehan, L. W	Heat Treatment of Magnetic Materials.
1762731	do	Mead, E. D	Magnetic Device.
1762737	do	Peterson, E	System Employing Space Discharge Device.
1762744	do	Schwartz, E. L., and Williams, A. J., Jr.	Retardation Coil for Composite Sets.
1762745	do	Shann, O. A	Substation Apparatus.
1762746	do	do	Substation Locking Apparatus.
1762751	do	Wright, E. P. G	Telephone System.
1762754	do	Black, H. S	Phantom Carrier Circuit.
1762755	do	do	Method and Means for Reducing Crosstalk in Carrier Current Signaling Systems.

Patent no.	Date of issue	Inventor	Title
1762759	June 10, 1930	Burkholder, J. C	Volume Control System.
1762763	do	Collis, R. E	Telephone System.
1762768	do	Dickieson, A. C	Transmission System.
1762774	do	Fry, J. R	Electromagnetic Device.
1762775	do	Ganz, A. G	Inductance Device.
1762777	do	Goodrum, C. L	Transmission System.
1762778	do	Gould, J. R	Telephone System.
1762780	do	Hibbard, F. H	Electrical Measuring Instrument.
1762941	do	Wood, E. B	Paper Insulated Conductor.
1762942	do	Wright, J. C., Wheeler, E. B., and Wood, E. B.	Measuring and Recording Device.
1762945	do	Anderson, S. E	Radio Receiving System.
1762952	do	Bell, J. H	Duplex Telegraph System.
1762953	do	Black, H. S	Signaling System.
1762956	do	Buckley, O. E	Signaling Conductor.
1762963	do	Dowd, A. D	Means for Synchronizing Rotary Devices.
1762968	do	Farnsworth, F. F	Composite Conductor.
1762969	do	Farrington, J. F	High Frequency Attenuating Network.
1762971	do	Field, J. C	Remote Control Power System.
1762973	do	Frederick, H. A	Alarm System.
1762974	do	Friis, H. T	Radio Receiving System.
1762976	do	Gilbert, J. J	Loaded Signaling Conductor.
1762981	do	Hartley, R. V. L	Acoustic Device.
1762984	do	Heising, R. A	Secret Communicating System.
1762986	do	Hinrichsen, E. E	Telephone System.
1762991	do	Jones, W. C	Electromagnetic Reproducer or Recorder.
1762996	do	Legg, V. E	Loading of Signaling Conductors.
1762999	do	Manderfield, E. C	Regulator System.
1763000	do	Marrison, W. A	Synchronous Motor.
1763003	do	Mead, E. D	Electromagnetic Device.
1763006	do	Murphy, P. B	Telephone Exchange Equipment.
1763008	do	Priessman, N. Y	Electromagnetic Device.
1763009	do	Quarles, D. A	Loading System.
1763013	do	Skillman, T. S	Telephone System.
1763014	do	Stacy, L. J., and Krom, M. E	Regulator System.
1763015	do	Stevenson, G. H	Operation of Electric Space Discharge Devices.
1763016	do	Stoller, H. M	Electric Regulator.
1763017	do	do	Regulator System.
1763036	do	Entz, F. S	Trunking System.
1763041	do	Gilbert, J. J	Loaded Signaling Conductor and Method of Signaling.
1763042	do	do	Loaded Signaling Conductor.
1763043	do	do	Loading of Conductors.
1763057	do	Krom, M. E	Regulator System.
1763060	do	Meyer, D. C	Telephone Exchange Equipment.
1763138	do	Edelmann, O	Signaling System.
1763157	do	King, G. V	Telephone System.
1763161	do	Koechling, C. D., and King, G. V.	Do.
1763169	do	Mathes, R. C	Sound Recording.
1763172	do	Miller, O. R., and Mead, E. D	Electro-Polarized Relay.
1763194	do	Sivian, L. J	Communication System.
1763203	do	Vieth, W. F	Remote Control System.
1763751	June 17, 1930	Bown, R	Radio Receiving System.
1763770	do	Fish, L. B., and St. John, E	Cable Clamp and Bridle Ring.
1763873	do	Weston, W. K	Telephone Cable.
1763878	do	Bresters, W	Testing System.
1763879	do	Burns, L. J., and Coon, L. E	Selector Supervisory System.
1763880	do	Burton, E. T	Signaling System.
1763881	do	Cioffi, P. P	Variable Inductance.
1763884	do	Elmen, G. W	Heat Treatment of Loaded Conductors.
1763891	do	Jones, W. C	Sound Recording.
1763893	do	Krecek, J. A	Telephone System.
1763909	do	Stoller, H. M., and Morton, E. R.	Speed Regulator.
1764592	do	Adams, A. H	Method of Making Conductor Terminals.
1764606	do	Cook, J. M	Material Working Apparatus.
1764607	do	do	Screw Threading Apparatus.
1764609	do	Dean, R. S	Oxidation Inhibitor.
1764613	do	Donnelly, E. J	Apparatus for Filing Sheets of Material.
1764618	do	Franks, C. H	Strand Distributing Apparatus.
1764619	do	Fruth, H. F., and Westhafer, T. O.	Transmitter.
1764623	do	Grondahl, H. H. C	Carrier.
1764624	do	Hall, E. C	Method of Coating Material.
1764625	do	do	Do.
1764628	do	Hofstetter, R	Indicating Apparatus.
1764629	do	Houts, G. J., Tournier, E. P., and Wulff, J. F.	Apparatus for Supporting Strands.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1764630	June 17, 1930	Houts, G. J.	Device for Supporting and Distributing Strands.
1764633	do	Keller, F. L.	Method of Manufacturing Dies.
1764636	do	Linkenheld, C. F.	Controlling System.
1764638	do	McKeon, E. J.	Article Holding Device.
1764641	do	Oesterle, F. D.	Tool.
1764647	do	Roscoe, R.	Heat Treating Apparatus.
1764650	do	Scott, J. W.	Electrolytic System.
1764662	do	Tomlin, J. H.	Method of Molding Articles.
1764665	do	Wennerberg, A.	Power Driven Apparatus.
1765396	June 24, 1930	Betts, P. H.	Indicating System.
1765404	do	Cook, W. J.	Apparatus for Forming Outlets.
1765413	do	Fruth, H. F.	Vibratory Element and Method of Producing the Same.
1765421	do	Griffin, D. A.	Signal Reception.
1765425	do	Harrison, H. C.	Submarine Signaling.
1765428	do	Hurford, G., and Kipping, N. V.	Molded Finger Plate for Dial Switches.
1765436	do	McCann, P. S.	Method of Producing Magnetic Materials.
1765437	do	McMullan, S., and Schulz, A. E.	Wire Drawing Apparatus.
1765447	do	Pritchard, A. D.	Distributing System.
1765458	do	Siebs, C. T.	System and Method of Electrical Distribution.
1765459	do	do	Method of Forming Outlets.
1765460	do	do	System of Electrical Distribution.
1765470	do	Wales, C.	Apparatus for Assembling and Treating Articles.
1765515	do	Whitfield, H. B.	Coated Core and Method of and Apparatus for Applying the Coating Thereto.
1765517	do	Wier, H. B.	Recording of Music and Speech.
1765520	do	Adams, A. H.	Method of and Apparatus for Insulating Electrical Conductors.
1765521	do	Barrans, W. T.	Method of Making Composite Electrical Conductors.
1765523	do	Ceccarini, O. O.	Signal Transmission System.
1765531	do	Howard, R. S., Brodie, G. H., and Westhafer, T. O.	Protective Device.
1765533	do	Jespersen, H. W.	Method of and Apparatus for Coating Cores.
1765540	do	Ray, W. H.	Terminal Plug.
1765585	do	Herman, J.	Set for Measuring Operating Time of Relays.
1765597	do	Malone, H. E., and Pryor, R. W.	Composition of Matter.
1765599	do	McFarland, R. E.	Strand Working Mechanism.
1765606	do	Ohl, R. S.	Harmonic Producer.
1765607	do	do	Amplifying Device.
1765616	do	Roman, F. L., and Winsemius, H. T.	Cementitious Substance and Method of Making the Same.
1766460	do	Schwerin, P.	Electron Discharge Device.
1766473	do	Wente, E. C.	Electrodynamic Device.
1767854	do	Lundell, A. E., and Clark, E. H.	Telephone Exchange System.
1767929	do	Johnson, H. B.	Telephone System.
1767943	do	Schenk, R.	Do.
1767951	do	Whittle, H.	Transmission Circuits.
1767959	do	Clark, E. H., and Carpenter, W. W.	Automatic Telephone Exchange System.
1767960	do	do	Do.
1767961	do	do	Do.
1767962	do	do	Do.
1767964	do	Cousins, V. M.	Vacuum Tube Circuits.
1768237	do	Elmen, G. W.	Magnetic Material.
1768238	do	do	Do.
1768239	do	Englund, C. R.	Directive Antenna System.
1768240	do	Falk, A. H.	Loading Coil Case.
1768248	do	Green, C. W.	Attenuation Equalizing Circuit.
1768251	do	Heising, R. A.	Electric Wave Transmission Device.
1768262	do	Marrison, W. A.	Phase Measuring System and Method.
1768264	do	Mathes, R. C.	Telephone System.
1768269	do	Schelleng, J. C.	Signaling System.
1768270	do	Strawn, M. L.	Apparatus for Preparing Members for Assembly.
1768273	do	Terry, R. V.	Sound Recording.
1768281	do	Aldendorff, F.	Electromechanical Switching System.
1768283	do	Bell, J. H.	Control System.
1768286	do	Bishop, N.	Radio Receiver.
1768288	do	Mohr, F.	System for Converting Light Energy Into Electrical Energy and Vice Versa.
1768394	do	Bracke, O.	Selector Switch.
1768418	do	Oswald, A. A., and Schelleng, J. C.	Space Discharge System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1768443	June 24, 1930	Elmen, G. W	Magnetic Material and Appliance.
1769270	July 1, 1930	Ohl, R. S	Harmonic Producer.
1769431	do	Herman, J	Electrical Communication Receiving Apparatus.
1769479	do	Whaley, S. E	Cable Grip.
Des. 81473	do	Bernhard, L	Hand Telephone.
Des. 81474	do	do	Desk Stand for a Hand Telephone.
Des. 81475	do	do	Hand Telephone.
Des. 81476	do	Clarke, R	Desk Stand for a Hand Telephone.
Des. 81477	do	do	Hand Telephone.
Des. 81510	do	Vassos, J	Desk Stand for a Hand Telephone.
Des. 81511	do	do	Hand Telephone.
Des. 81512	do	do	Desk Stand for a Hand Telephone.
Des. 81513	do	do	Hand Telephone.
Des. 81539	do	Jensen, G. B	Do.
Des. 81562	do	Vassos, J	Desk Stand for a Hand Telephone.
1769918	July 8, 1930	Gray, F., and Hefele, J. R	Electro-Optical Transmission System.
1769919	do	do	Do.
1769920	do	Gray, F	Do.
1769959	do	Mead, S. P., and French, N. R.	Loading System.
1769962	do	Nyquist, H	Apparatus for Testing and Repairing Telephone Circuits.
1769969	do	Shaw, T	Neutralizing Transformer Arrangement.
1770422	July 15, 1930	Nyquist, H	Phase Compensating Network.
1770969	July 22, 1930	Cherry, G. L	Method of and Apparatus for Sheathing Cores.
1770985	do	Kivley, R. C	Apparatus for Continuously Sheathing Cores of Material.
1771148	do	Sprague, C. A	Central Energy Wave Signaling System.
1771445	July 29, 1930	Parker, R. D., and Vernam, G. S.	Regenerative Telegraph Repeater.
1771446	do	do	Do.
1771453	do	Vernam, G. S	Do.
Des. 81680	do	Bernhard, L	Desk Stand for a Hand Telephone.
1772165	Aug. 5, 1930	Taylor, E. R., and Hanson, O. B.	Multiplex Broadcast System.
1772166	do	Taylor, E. R	Do.
1772167	do	do	Signaling System.
1772168	do	Taylor, E. R., and Hanson, O. B.	Multiplex Broadcasting System.
1772506	Aug. 12, 1930	Affel, H. A	Wave Filter.
1772508	do	Bascom, H. M	Voltage Limiting Device.
1772509	do	Blye, P. W	Harmonic Eliminator.
1772517	do	Ohl, R. S	Radio Receiver.
1772519	do	Potter, R. K	Electro-Optical Transmission.
1772550	do	Mitchell, D., and Silent, H. C.	Echo Suppressor.
1772551	do	do	Do.
1772552	do	Mitchell, D., and Herman, J	Do.
1772558	do	Shea, T. E	Loading System.
1773082	do	Harrison, H. C	Electromagnetic System.
1773092	Aug. 19, 1930	Clapp, R. H	Carrier Telegraph Circuits.
1773097	do	Dean, S. W	Staggered Wave Antenna System.
1773116	do	Potter, R. K	Single Side Band System.
1773119	do	Reynolds, F. W	Electro-Optical Transmission System.
1773126	do	Affel, H. A	Transmission System.
1773772	Aug. 26, 1930	Berthold, O. H	Harmonic Suppressor.
1773776	do	Crisson, G	Telephone Conference Arrangement.
1773785	do	Nyquist, H	Electro-Optical System.
1773789	do	Rea, W. T	Carrier Current Telegraph System.
1773798	do	Thorp, V. P	Do.
1773901	do	Kendall, B. W	High Frequency Signaling.
1773910	do	Lane, C. E	Sound Radiator.
1773938	do	Bishop, W. M	Method of Manufacturing Loaded Conductors.
1774003	do	Hartley, R. V. L	Synchronizing, Regulating, and Controlling Receivers and Generators.
1775241	Sept. 9, 1930	Horton, J. W	Electro-Optical System.
1775742	Sept. 16, 1930	Thomson, W. H	Sheet Mounting Device.
1775752	do	Edwards, W. H	Oscillation Generator.
1775775	do	Nyquist, H	Method of and Means for Wave Retardation.
Des. 82068	do	Vassos, J	Hand Telephone.
1776301	Sept. 23, 1930	Thompson, G. K	Coin Controlled Apparatus.
1776310	do	Crisson, G	Two-Way Negative Impedance Repeater.
1776311	do	do	Repeater System.
1776821	Sept. 30, 1930	Strieby, M. E	Automatic Volume Control System.
1776822	do	do	Do.
1777016	do	Potter, R. K	Electro-Optical Image Producing System.
1777118	do	Harrison, H. C	Acoustic Device.
1777355	Oct. 7, 1930	Fetter, C. H	Transmission Level Controlling Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1777374	Oct. 7, 1930	Martin, DeL. K	Wave Antenna.
1777378	do	Potter, R. K	Photoelectric Cell.
1778035	Oct. 14, 1930	Mason, W. P	Harmonic Noise Suppression Device.
1778077	do	Holden, W. H. T	Remote Control System.
1778085	do	Nyquist, H	Distortionless Amplifying System.
1778086	do	Palm, S. M. and Snyder, J. F.	Apparatus for Pulling Cables Through Conduits.
1778308	do	Burchett, G. W	Acoustic Device.
1778309	do	Carpenter, W. W., and Johnson, L. H.	Telephone Metering System.
1778319	do	Hague, A. E	Do.
1778377	do	Burton, E. T	Telegraph Repeating Device.
1778378	do	Butz, E. D	Telephone System.
1778386	do	Harrison, H. C	Sound Reproducer.
1778400	do	Pocock, L. C., and Blackburn, R.	Telephone Transmitter.
1778401	do	Pratt, E. J	Relay.
1778407	do	Walters, J. N., and Clark, E. H.	Selective Switch.
1778508	do	Peoples, J. S	Apparatus for Measuring and Recording Pressures.
1778725	Oct. 21, 1930	Oswald, A. A., and Sterba, E. J.	Control of Electrical Conditions.
1778750	do	Bruce, E	Transmission Regulation.
1778751	do	Buckley, O. E., and Johnson, J. B.	Control of Electrical Variations.
1778756	do	Elmer, L. A	Coupling Device.
1778759	do	Gilbert, J. J	Submarine Signaling.
1778761	do	Heising, R. A	Remote Control System.
1778768	do	Norton, P	Telephone Ringing System.
1778779	do	Whiting, D. F	Control Circuit for Transmission Systems.
1778871	do	Smythe, E. H	Acoustic Device.
1778894	do	Fry, J. R	Relay.
1779056	do	Till, H. R	Pressure Respofisive Device.
1779058	do	Borgmann, C., Marting, H. E., and Hagland, H. M.	Telephone Switchboard.
1779065	do	Grant, R	Pressure Responsive Device.
1779126	do	Graham, F. H	Negative Resistance Circuits.
1779380	do	Dudley, H. W	Negative Impedance Circuits.
1779382	do	Mathes, R. C	Do.
1779492	Oct. 28, 1930	Rea, W. T	Carrier Current Telegraph System.
1779493	do	do	Do.
1779495	do	Roberts, L. C	Substation Rectification of Carrier Telegraph Currents.
1779500	do	Shanck, R. B	Tone Reception for Carrier Telegraphy.
1779559	do	Royal, J. M	Method of and Apparatus for Covering Cores.
1779560	do	do	Apparatus for Covering Cores.
1779563	do	Siebs, C. T., and Daniel, T. A.	Process of Welding.
1779602	do	Kingsbury, E. F	Alloy for Electrical Contacts.
1779603	do	do	Do.
1779990	do	Shope, J. W	Guard for Guy Rods and Cables.
Des. 82387	do	Labaugh, J. M	Casing for a Telephone Substation Set.
1780229	Nov. 4, 1930	Green, E. I	Oscillation Generator.
1780244	do	Ritter, P. E	Telephone and Telegraph Circuit.
1780245	do	Roberts, L. C	Telephone and Telegraph System.
1780364	do	Reynolds, F. W	Electro-Optical Transmission.
Des. 82414	do	Barnhard, L	Desk Stand for a Hand Telephone.
1780906	Nov. 11, 1930	Carpenter, W. W., and Hersey, R. E.	Automatic Toll Switching Telephone System.
1780910	do	Dunham, B. G	Testing System.
1780917	do	Hoch, E. T	Electric Condenser.
1780919	do	Holland, N. H	Means for Recording Telephone Conversation.
1780921	do	Horton, J. W	Communication System.
1780937	do	O'Neill, H. W	Testing System.
1780953	do	Ten Eyck, W. B	Conductor.
1780962	do	Bailey, A., and Dean, S. W	Radio Signaling System.
1780963	do	Bailey, A	Do.
1780966	do	Blye, P. W	Electrical Transmission System.
1781092	do	Affel, H. A., and Green, E. I	Concentric Conducting System.
1781093	do	Affel, H. A	Do.
1781124	do	Nein, H. R	Do.
1781351	do	Thuras, A. L	Vibratory System.
1781363	do	Bruce, E	Electrical Testing System.
1781385	do	Hague, A. E	Telephone Exchange System.
1781387	do	Harrison, H. C	Diaphragm.
1781396	do	Johnson, K. S	Electrical Network.
1781469	do	Mason, W. P	Wave Filter.
Des. 82505	do	King, D. H., and Martin, H. T.	Wall Mounting for a Hand Telephone.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1781861	Nov. 18, 1930	Rittenhouse, M. J. and, Maurer, O. V.	Radio Reception Apparatus.
1782397	Nov. 25, 1930	Adams, A. H.	Apparatus for Testing Electrical Conductors.
1782402	do	Bouvier, G. A., and Case, H. L.	Do.
1782403	do	Bouvier, G. A.	Method of an Apparatus for Testing Electrical Conductors.
1782404	do	Bowly, H. W., and McWilliams, W. W.	Clamping Device.
1782406	do	Bureau, A. A.	Portable Crane.
1782425	do	Jessup, R. D.	Apparatus for Coating Strands.
1782434	do	McGuire, L. R.	Table Construction.
1782438	do	Oudin, F., and Skinner, B. H.	Clamping Device.
1782439	do	do	Do.
1782440	do	do	Do.
1782447	do	Scranton, DeH. G.	Method of Forming Electrical Terminal Members.
1782448	do	Short, S. F.	Guarding and Guiding Attachment for Tools.
1782907	do	Nielsen, J. F.	Remote Control System.
1782912	do	Snook, H. C.	Method for Eliminating Noise in Machinery.
1783130	do	Ohl, R. S.	Piezo-Electric Oscillator.
1783131	do	do	Mounting for Piezo-Electric Devices.
1783132	do	do	Do.
Des. 82612	do	Labaugh, J. M.	Casing for a Telephone Substation Set.
Des. 82613	do	do	Do.
1783321	Dec. 2, 1930	Weaver, A.	Electrical Transmission of Pictures.
1784176	Dec. 9, 1930	Carpe, A.	Equalization for Carrier Systems.
1784178	do	do	Voice Controlled Circuits.
1784194	do	Mitchell, D.	Transmission Frequency Dealy Measuring Circuit.
1784825	Dec. 16, 1930	Dudley, H. W.	Speech Transmission.
1784827	do	Elmen, G. W.	Magnetic Material.
1784830	do	Flanders, P. B.	Mechanical Impedance Device.
1784833	do	Hageman, E. C.	Toroidal Inductance Device.
1784839	do	Keller, A. C.	Sound Reproducing System.
1784844	do	Marrison, W. A.	Constant Frequency Wave Source.
1784845	do	Morrison, L. A.	Phonograph Needle.
1784858	do	Wente, E. C.	Sound Recording System.
1784859	do	Weston, W. K.	Twisting Machine.
1784860	do	Wiebusch, C. F.	Sound Recorder.
1784867	do	Farrington, J. F.	Singaling System.
1784869	do	Gray, F.	Rectifier.
1784871	do	Harrison, H. C.	Mechanical Transmission System.
1784874	do	Hubbard, F. A.	Control of Wave Transmission.
1784879	do	Peterson, E.	Magnetic Modulator Circuit.
1784891	do	Dean, S. W., and Anderson, C. N.	Privacy Signaling System.
1784898	do	Gary, L. A., and Tasker, H. G.	Circuit Switch.
1784905	do	Morency, G. H.	Telephone Exchange System.
1784957	do	Betts, P. H.	Electric Wave Transmission System.
1784978	do	Taylor, H. S.	Testing Apparatus.
1785036	do	Marrison, W. A.	Oscillation Generator.
1785037	do	Martell, C., and Hagen, B. A.	Method of and Apparatus for Coating Cores.
1785048	do	Reynolds, J. L.	System for Electrically Transmitting and Reproducing Sound.
1785060	do	White, J. H.	Metallurgical Process.
1785062	do	Whittle, H.	Transformer System.
1785818	Dec. 23, 1930	Peterson, G. H., and Rhodes, W. A.	Telephone System.
1785819	do	Silent, H. C.	Prevention of Parasitic Oscillations.
1786065	do	Heimberger, H. T., and Pugh, E.	Holder for Heated Devices.
1786075	do	Martell, C.	Method of Reclaiming or Improving Gum Exudates.
1786086	do	Pritchard, A. D.	System for Charging Storage Batteries.
1786412	do	Crisson, G.	Shielding Arrangement.
1786416	do	Martindell, F.	Apparatus for Treating Materials.
1786546	Dec. 30, 1930	Nyquist, H.	Power Standard Device.
1786549	do	Reed, T. C., and Odell, A. D.	Method and Means for Preparing Insulating Sleeves.
1786565	do	Freeman, A. E.	Thrust Bearing.
1786652	do	Hartley, R. V. L.	Electro-Optical System.
1787508	Jan. 6, 1931	Bulloch, H. D.	Singaling System.
1787511	do	Clapp, R. H.	Patching Arrangement for Carrier Telegraph Circuits.
1787552	do	Rice, J. S.	Filing Cabinet.
1787606	do	White, J. H., and Legg, V. E.	Magnetic Material.
1787688	do	Korthauer, T.	Telephone System.
1788007	do	Abbott, H. H., and Entz, F. S.	Telephone Repeater System.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1788017	Jan. 6, 1931	Elmen, G. W	Heat Treatment of Magnetic Material.
1788022	do	Heising, R. A	Directive Transmission of Energy.
1788028	do	Moore, C. R	Alternating Current Rectifier.
1788030	do	Penn, J. H	Telephone Instrument.
1788031	do	Pritchard, W. T	Forming Tool.
1788035	do	Stevenson, G. H	Volume Control Circuits.
1788470	Jan. 13, 1931	Nyquist, H	Electro-Optical System.
1788472	do	Reynolds, F. W	Light Valve Adjusting Means.
1788476	do	Watson, E. F	Electrical Picture Transmission.
1788487	do	Harrison, H. C	Vibration Transmission System.
1788508	do	Curtis, A. M	Submarine Signaling System.
1788513	do	Fultz, M. E	Signal and Control System.
1788517	do	Gould, J. R	Telephone Exchange System.
1788519	do	Harrison, H. C	Mechanical Transmission System.
1788521	do	Heising, R. A	Short Wave Amplifying System.
1788522	do	Horton, J. W	Signaling System.
1788526	do	Johnson, K. S	Artificial Line.
1788527	do	Kivley, R. C	Apparatus for Treating Articles With a Medium Under Pressure.
1788528	do	Koechling, C. D	Telephone System.
1788531	do	Little, J. S	Mold and Its Method of Construction for Paper Making Machines.
1788532	do	Llewellyn, F. B	Electron Tube Circuit.
1788533	do	Marrison, W. A	Frequency Control System.
1788534	do	Mason, W. P	Acoustic Phase Shifting Device.
1788538	do	Norton, E. L	Filtering Circuits.
1788543	do	Reynolds, J. L	Switching Apparatus for Sound Reproducing Systems.
1788548	do	Siebs, C. T	Approach Structure Between Different Levels and Method of Producing the Same.
1788556	do	Wood, E. B., and Eliason, O. C.	Ventilating Device.
1788560	do	Black, H. S	Wave Generating and Modulating System.
1788704	do	Cesareo, O	Telephone System.
1788714	do	Grimley, D. G	High and Low Frequency Transmission Circuits.
1788720	do	Jensen, A. G	Polyphase Vacuum Tube Oscillator.
1788733	do	Morton, E. R	Regulator System.
1788734	do	do	Do.
1788736	do	O'Neill, H. W	Echo Suppressing and Energy Limiting Circuits.
1788747	do	Scharringhausen, W. H	Telephone Desk Set.
1789261	do	Kidd, S. H. B	Interlocking System.
1789293	Jan. 20, 1931	Barnard, C. H	Switch Mounting.
1789358	do	Franks, C. H	Testing Device for Coil Winding Machines.
1789399	do	Bartenbach, H., and Spowart, J. B.	Earth Auger.
1789416	do	Potter, R. K	Neutralized Vacuum Tube Circuits.
1789419	do	Stone, J. S	Radio Receiving System.
1789451	do	Rosaire, E. E., and Kerns, A. D.	Method of and Apparatus for Manufacturing Electrostatic Condensers.
1789456	do	Blood, H. L	Article Working Apparatus.
1789457	do	Boynton, J. E	Apparatus for Extruding Matter.
1789458	do	Bureau, A. A	Chock.
1789469	do	Knaus, P. J	Article Forming Apparatus.
1789475	do	Powell, R. E	Soldering Iron Holder.
1789485	do	Wren, C. I	Indexing Mechanism.
1790069	Jan. 27, 1931	Neeb, L. S	Designation Label.
1790076	do	Schramm, F. W	Automatic Voltage Regulating Circuit.
1790079	do	Silent, H. C	System for Measuring Delayed Current Effects.
1790382	do	Korthauer, T	Telephone System.
1790673	Feb. 3, 1931	Mills, P. E	Coin Collection Apparatus.
1790687	do	Watkins, S. S. A	Combined Phonograph and Motion Picture Projector.
1790704	do	Harris, J. E	Magnetic Material.
1790742	do	Chapman, A. G	Wave Antenna Array.
1790771	do	Shackleton, S. P	Relay Arrangement.
1790776	do	Thompson, G. K	Telephone Cabinet and Table Lamp.
1791577	Feb. 10, 1931	Singer, F. J	Telegraph Receiving System.
1791578	do	do	Do.
1791579	do	do	Telegraph Signaling System.
1791587	do	Vernam, G. S	Printing Telegraph System.
1791740	do	Morton, S., and Krum, H. L.	Printing Telegraph Receiver.
1792479	Feb. 17, 1931	Bennett, A. F., and Mitchell, C. E.	Alarm System.
1792483	do	Elmen, G. W	Magnetic Material.
1792494	do	Harrison, H. C., and Anderson, H. A.	Phonographic Needle.
1792496	do	Hinshaw, F. A	Switching Device.
1792497	do	Keller, A. C., and Norton, E. L.	Vibration Damping Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1792512	Feb. 17, 1931	Siegm nd, H. O	Electromagnetic Device.
1792523	do	Zobel, O. J	Phase Shifting Network.
1792536	do	Harrison, H. C	Sound Radiator.
1792538	do	Hersey, R. E	Telephone System.
1792552	do	Siegmund, H. O	Method of Forming Contacts.
1792579	do	Edwards, W. H	Telephone Circuit.
1792600	do	Ohl, R. S	Radio Signaling System.
1792630	do	Curtis, A. M	Frequency Setting Fork.
1792637	do	Harrison, H. C	Vibration Transmission System.
1792650	do	Manderfeld, E. C	Regulator System.
1792655	do	Norton, E. L	Sound Reproducer.
1792662	do	Sterba, E. J	Antenna System.
1793034	do	Wetzel, C. L	Protective Apparatus.
1793044	do	Biggar, H	Forming Device.
1793090	do	Hite, H. N	Variable Electrical Resistance.
1793092	do	Jespersen, H. W	Strand Tensioning Device.
1793104	do	Larsen, E. W	Strand Handling Apparatus.
1793236	do	McDonough, J	Screw Inserting and Driving Apparatus.
1793247	do	Piper, H. D	Method of and an Apparatus for Working Material.
1793248	do	Rasmussen, R. C	High Frequency Electrical Apparatus.
1793254	do	Shann, O. A	Lock.
1793275	do	Carr, C. B	Method of Drying Material.
Des. 83, 408	do	Mahoney, J. A., and Zitzmann, A.	Combined Table and Cover for Telegraph Printer.
1793491	Feb. 24, 1931	Jones, T. A., and Phelps, W. A.	Current Limiting Device.
1793582	do	Bailey, R. S., Nelson, S. F., and Shipley, F. F.	Telephone System.
1793588	do	Cowan, F. A	Measuring and Monitoring Circuits for Telephone Lines.
1793598	do	Edwards, W. H	Telephone System.
1793835	do	Bruce, E	Electrical Testing.
1794393	Mar. 3, 1931	Bown, R., and Potter, R. K	Transmission Measuring Apparatus.
1794418	do	Potter, R. K	Radio Receiving Circuit.
1794847	do	Green, E. I	Frequency Eliminator.
1794889	do	Fetter, C. H	Multiplex System.
1795204	do	Espenschied, L	Electrical Wave Filter.
1795389	Mar. 10, 1931	Edwards, W. H	Selective Ringing System.
1795393	do	Herman, J	Reduction of Interference.
1795397	do	Hoyt, R. S	Directionally Selective Radio Receiving System.
1795439	do	Pratt, E. J	Magnetic Device.
1795474	do	Ceccarini, O. O	Non-Singing Amplifier.
1795479	do	Dickieson, A. C	Wave Transmission System.
1795484	do	Farrington, J. F	Wave Suppression Circuit.
1795498	do	Mathison, D. W	Electromagnetic Device.
1795499	do	Miller, D. D., and Pratt, E. J	Magnetic Device.
1795626	doz	Watkins, S. S. A	Camera.
1795639	do	Chaston, J. C., and Johns, J. P.	Magnetic Structure.
1795640	do	Collis, R. E	Telephone Exchange System.
1795647	do	Flanders, P. B	Method and Apparatus for Measuring Acoustical Impedances.
1795648	do	Friis, H. T	High Frequency Oscillation Generator.
1795652	do	Kinkead, F. S	Telegraph System.
1795656	do	Massonneau, R. F	Service Observing System.
1795714	do	Deloraine, E. M	Absorption Control Modulating System.
1795813	do	Whitney, W	Telephone System.
1795834	do	Cesareo, O	Testing System.
1795858	do	Heising, R. A	Radio Transmission System.
1795874	do	Mason, W. P	Impedance Element.
1795876	do	McCoy, C. E	Apparatus for Serving Material Upon Cores.
1795914	do	Whittle, H., and Christopher, A. J.	Amplifying System.
1795923	do	Bidwell, E. M	Method of and Apparatus for Handling Strand Material.
1795924	do	Bjornson, B. G	Relay Circuits.
1796486	Mar. 17, 1931	Southworth, G. C	Amplifier for Short Electric Waves.
1796496	do	Volkmar, W. A	Book Holder.
1796497	do	Weaver, A	Rectifying Arrangement.
1796683	do	Carlson, R. E	Method of Producing Articles.
1796803	do	Nelson, C. E	Safety Connection for Power Transmission.
1796805	do	Paulson, C	Method of and Apparatus for Adjusting Springs.
1796814	do	Trebes, B. M. A	Pump.
1796816	do	Wade, L. G	Control Mechanism.
1796819	do	Adams, A. H	Method of Treating Objects.
1796820	do	do	Apparatus for Treating Objects.
1796852	do	McDonough, J	Method of Riveting.
1796853	do	McMullan, S	Molding Apparatus.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1796931	Mar. 17, 1931	Ives, H. E	Electro-Optical Transmission.
1796965	do	Ryan, F. M	Method of and Means for Signaling.
1797284	Mar. 24, 1931	Coram, R. E	High Frequency Signaling.
1797317	do	Brand, S., and Mertz, P	Binaural Phase Discrimination Radio System.
1797337	do	Freeman, A. E	Connecting Pin.
1797365	do	Putnam, H. P	Wire Support.
1798202	Mar. 31, 1931	Herman, J	Relay Arrangement for Use with Voice Operated Devices.
1798235	do	Vernam, G. S	Printing Telegraph Switching System.
1798243	do	Whittle, H., and Hilton, L. B	Electric Transmission System.
1799159	Apr. 7, 1931	Espenschied, L	Multiple Modulation System.
1799174	do	Loye, D. P	Protective Device.
1799188	do	Weaver, M. A	Crosstalk Reduction.
1799189	do	Whiting, D. F	Energizing Electron Tubes.
1799202	do	Wegel, R. L., and Moore, C. R.	Harmonic Analyzer and Switching Mechanism Therefor.
1799214	do	Clokey, A. A	Submarine Telegraph System.
1799223	do	Fowler, C. B	Party Line Message Register System.
1799235	do	Humphrey, H. C	Sound Recording System.
1799627	do	Knoop, W. A	Signal Interpolating System.
1799634	do	Norton, E. L	Wave Transmission.
1799644	do	Roome, F. A	Telephone System.
1799651	do	Siegmund, H. O	Electrical Switching Apparatus.
1799653	do	Stokely, R. L	Telephone System.
1799654	do	do	Telephone Exchange System.
1799679	do	Dunham, B. G., and Fairbairn, R. A.	Do.
1799686	do	Goff, H. W	Impulse Transmitter.
1799794	do	Horton, A. W., Jr	Artificial Line.
1799795	do	Horton, J. W	Sound Recording and Reproducing.
1799796	do	Hovland, H	Telephone Exchange System.
1799798	do	Jacobitti, E. E	Switching System.
1799799	do	Jones, W. C	Sound Reproducer.
1799800	do	Lane, C. E	Adjustable Inductance Coil.
1799809	do	Craft, E. B	Phonograph.
1799810	do	Fry, T. C	Transmission Circuits.
1799811	do	Gooderham, J. W	Signaling System.
1799850	do	Hendry, W. F	Electron Discharge Device.
1800303	Apr. 14, 1931	Lindsay, R. H	Automatic Regulating Arrangement.
1800304	do	do	Relay Regulating Circuits.
1800305	do	do	Do.
1800370	do	Arkema, H. P., and Thronsen, S.	Apparatus for Mounting Dies.
1800372	do	Black, H. S	Frequency Translating Circuit.
1800384	do	Haack, W. F	Tool.
1800389	do	Jespersen, H. W	Method of and Apparatus for Controlling Working of Material.
1800394	do	Lunsford, R. L	Regulating Device.
1800411	do	Selvig, N. J	Coated Core.
1800901	do	Peterson, E., and Evans, H. P	Vacuum Tube Circuits.
1800903	do	Ramsey, E. G	Incandescent Lamp.
1800912	do	Stewart, C. R. G., and Zern, C. J.	Heat Treating Apparatus.
1800914	do	Stull, J. S	Apparatus for Stripping Covered Strands.
1800917	do	Weis, P. B	Do.
1800922	do	Yancey, T. McD	Material Unwinding Apparatus.
1800925	do	Blood, H. L	Perforating and Trimming Mechanism.
1800947	do	Mason, S. R	Method of Coating Articles.
1800950	do	Metzger, C. A	Method of and Apparatus for Removing Core Covering Material.
1801278	Apr. 21, 1931	Knuuti, C. O	Apparatus for Producing Electrical Connecting Elements.
1801311	do	Johnson, G. T	Apparatus for Working Covered Strand Material.
1801342	do	Gannett, D. K., and Kirkwood, M.	Electrical Network.
1801380	do	Vernam, G. S	Signaling System.
1802101	do	Wood, L. E	Molded Article.
1802118	do	Llewellyn, F. B	Modulator and System of Modulation.
1802419	Apr. 28, 1931	Freeman, A. E., and Livermore, W. T.	Gear Mechanism.
1802420	do	Green, E. I	Method of Utilizing a Wide Frequency Range for Signaling Channels.
1802446	do	Schneckloth, H. H	Telephone System.
1802605	do	Kemp, A. R	Method and Machine for Insulating Cables.
1803453	May 5, 1931	Affel, H. A	System for Communicating with Moving Vehicles.
1803454	do	do	Do.
1803466	do	Drew, G. A	Ticket Distributing System.
1803528	do	Hollman, H. E	Production of Electric Waves.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1803700	May 5, 1931	Gray, F.	Electro-Optical System.
1804087	do	Bruce, E., and Friis, H. T.	Wave Amplifying System.
1804121	do	Simonds, G. D.	Motor Vehicle.
1804126	do	Stoller, H. M.	Regulator System.
1804127	do	Stryker, N. R.	Speech Transmission System.
1804140	do	Barry, J. F.	Clamping Device.
1804150	do	Collis, R. E.	Telephone Exchange System.
1804168	do	Keller, A. G.	Method of and Means for Determining Cyclic Variations in a Rotating Member.
1804169	do	Knowlton, A. D., and Everett, S. H.	Telephone Exchange System.
1804178	do	Morton, E. R.	Regulator System.
1804408	May 12, 1931	Fowler, C. B.	Telephone Exchange System.
1804409	do	do	Do.
1804526	do	Coxhead, H. B.	Radio Receiving Circuit.
1804547	do	Shanck, R. B.	Telegraph Repeater Arrangement.
1804548	do	Vernam, G. S.	Telegraph Exchange System.
1804675	do	Clausen, H. P.	Signaling System.
1804688	do	Harrison, H. C.	Acoustic Device.
1804689	do	Holland, N. H.	Do.
1804732	do	Alden, J. L.	Flexible Conductor.
1804746	do	Curtis, A. M.	High Speed Relay.
1804759	do	Flanders, P. B.	Acoustic Device.
1804766	do	Hague, A. E.	Telephone System.
1804767	do	do	Do.
1804778	do	Johnson, L. H., and Stokely, R. L.	Do.
1804786	do	Kuhn, W.	Telephone Testing System.
1804911	do	Alden, J. L.	Core Covering Apparatus.
1804923	do	Fernekes, V. W., and Ray, W. H.	Conveying System.
1804952	do	Rettenmeyer, F. X.	Wave Signalling System.
1805229	do	Atwood, G. F.	Variable Electrical Apparatus.
1805591	May 19, 1931	Ohl, R. S.	Signaling System.
1805594	do	Parker, R. D.	Communicating System.
1805596	do	Potter, R. K.	Signaling System.
1806119	do	Rock, G. L.	Method of and Apparatus for Producing Tubular Articles.
1806121	do	Siebs, C. T.	Method of and Apparatus for Welding.
1806130	do	Stull, J. S.	Stock Feeding Device.
1806131	do	do	Apparatus for Handling Articles.
1806182	do	Seligman, W.	Work Holder for Material Working Apparatus.
1806183	do	Shaw, L. I.	Suspension.
1806188	do	Adams, A. H.	Method of Manufacturing Electrical Switching Apparatus.
1806202	do	Hofstetter, R.	Apparatus for Assembling Members.
1806638	May 26, 1931	Mertz, P.	Television.
1806657	do	Wintringham, W. T.	Power Limiting Apparatus.
1806666	do	Bown, R.	Radio Broadcasting System.
1806754	do	Gilbert, J. J.	Cable Signaling System.
1807740	June 2, 1931	Knandel, G. J.	Telegraph System.
1807744	do	May, H. F.	Do.
1807759	do	Silent, H. C.	Prevention of Parasitic Oscillations.
1807931	do	Purdy, C. A.	Method of and Apparatus for Preparing Compounds.
1808137	do	Hartley, R. V. L.	Electro-Optical System.
1808520	do	Brobst, D. R.	Insulated Conductor.
1808527	do	Carpenter, W. W.	Automatic Telephone Exchange System.
1808538	do	Gabriel, J. C., and Hubbard, F. A.	Transmission Regulation.
1808540	do	Gilbert, J. J.	Signaling System.
1808577	do	Scudder, F. J.	Automatic Telephone Exchange System.
1808579	do	Sivian, L. J.	Generation of Electric Currents.
1808867	June 9, 1931	Stone, J. S.	Directional Antenna Array.
1808868	do	do	Do.
1808869	do	do	Do.
1808894	do	Heising, R. A.	Electric Wave Translation System.
1808902	do	Mueller, E. C., Jr.	Telephone Plug.
1808915	do	Bjornson, B. G.	Repeater Circuits.
1808916	do	Burkholder, J. C.	Circuit Control System.
1808923	do	Horton, J. W.	Synchronizing System.
1808925	do	Knox, W. G.	Composite Conductor.
1809025	do	Cruser, V. I.	Electrical Device.
1809026	do	Cummings, G. C.	Telegraph System.
1809039	do	Hovland, H.	Telephone Exchange System.
1809042	do	Kelsall, G. A.	Magnet Core.
1809043	do	Knoop, W. A.	Printing Telegraph System.
1809067	do	Reeve, H. T.	Method of Making Cathodes.
1809095	do	Wilson, J. R., and Blackburn, C. M.	Process of Coating Thermionic Cathodes.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1809099	June 9, 1931	Arnold, H. D	Vacuum Tube.
1809124	do	Hovland, H	Telephone Exchange System.
1809125	do	Hoyt, F. A	Telephone Set Mounting.
1809625	do	Griggs, E. V	Electric Control Circuits.
1809684	do	Flanders, P. B	Sound Recording and Reproducing Instrument.
1809828	June 16, 1931	Buckley, O. E., and Hartley, R. V. L.	Telephone Transmission.
1809832	do	Curtis, A. M	Synchronous Driving System.
1809839	do	Field, F. E	Transformer and Transformer System.
1809841	do	Goff, H. W., and Forsberg, O. F.	Impulse Transmitter.
1809879	do	Whittle, H	Circuits for Electro-Magnetic Devices.
1809882	do	Wright, E. P. G	Telephone Exchange System.
1809887	do	Broadwell, H	Adapter.
1809925	do	Edwards, W. H	Variable Resistance Device.
1809945	do	Rea, W. T	Control Arrangement for Carrier Apparatus.
1809950	do	Thorp, V. P	Carrier Telegraph System.
1809963	do	Lodge, J. E	Material Feeding Device.
1810004	do	Bjornson, B. G	Voice Operated Relay Circuits.
1810015	do	Hogg, J. L	Transmission System.
1810016	do	do	Voice Operated Relay Circuits.
1810023	do	Lodge, J. E	Feeding Device.
1810024	do	Mathes, R. C	Relay Circuit.
1810025	do	do	Transmission System.
1810164	do	Fay, O. J., Heimberger, H. T., and Pugh, E.	Heating Device.
1810206	do	Gudge, A. W., and Wensley, E.	Apparatus for Producing Articles from Sheet Material.
1810225	do	Pugh, E	Method of and Apparatus for Welding.
1810227	do	Shea, J. R	Drive for Screw Machines and the Like.
1810326	do	Peterson, E	Wave Modulation and Application Thereof.
1811023	June 23, 1931	Potter, R. K	Photoelectric Cell.
1811024	do	do	Photoelectric Tube.
1811025	do	do	Regulation of Level in Broadcast Transmission.
1811102	do	Adams, R. R., and Griggs, E. V.	Signal Transmission by Guided and Unguided Waves.
1811369	do	St. John, E	Guard for Guys and the Like.
1811839	June 30, 1931	Arnold, H. D	Sound Transmission.
1811841	do	Benjamin, J. C	Sound Reproducing System.
1811844	do	Dixon, A. F	Automatic Telephone Exchange System.
1811856	do	Long, M. B	Switching Device for Radio and Phonograph Combinations.
1811857	do	Melhuish, L. E	Railway Traffic Controlling System.
1811858	do	Miller, O. R	Control System for Transmission of Signals.
1811860	do	Morton, E. R	Regulator System.
1811897	do	Runquist, E. M., and Yancey, T. McD.	Method of and Apparatus for Forming Cables.
1811905	do	Affel, H. A., and Carpe, A	Means to Control Crosstalk.
1811915	do	Carpe, A	Do.
1811941	do	Keith, C. R	Apparatus for Reducing Disturbing Currents.
1811947	do	Legg, V. E	Noise Suppressing Circuit.
1811954	do	Mitchell, D., and Silent, H. C.	Transmission Volume Control.
1811955	do	do	Do.
1811963	do	Peterson, E	Apparatus for Reducing Crosstalk Currents.
1812389	do	Wente, E. C	Acoustic Device.
1812402	do	Gray, F	Electro-Optical Transmission System.
1812405	do	Ives, H. E	Do.
1812617	do	Baker, J. H. E	Telephone Exchange System.
1812619	do	Blattner, D. G	Sound Reproduction.
1812624	do	Cummings, G. C	Telephone and Telegraph Signaling System.
1812625	do	Curtis, A. M	Signal Monitoring Device.
1812630	do	Gilbert, J. J	Cable Armoring.
1812634	do	Jones, W. C	Sound Reproducer.
1812635	do	Knoop, W. A	Signaling System.
1812828	do	Gray, F	Switch or Commutating Means.
1812961	July 7, 1931	Kent, R. J	Cable Guide.
1812964	do	Labaugh, J. M., and Miller, V. F.	Calling Dial.
1812977	do	Ohl, R. S	Oscillation Generator.
1812984	do	Richey, C. V	Lock-Out for Outgoing Calls for Telephone Systems.
1813143	do	Bruce, E	Aerial System.
1813154	do	Franz, E. E	Terminal for Electrical Devices.
1813179	do	Lodge, J. E	Device for Closing Openings.
1813196	do	Pettus, J. H	Melting Pot.
1813197	do	Reichelt, L. O	Cable Forming Apparatus.
1813208	do	Smythe, E. H	Acoustic Device.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1813425	July 7, 1931	Rosaire, E. E.	Method of Heating an Electrical and Thermal Non-Conductor.
1813913	July 14, 1931	Clokey, A. A., and Knoop, W. A.	Rotary Distributor.
1813923	do	Heising, R. A.	Radio Receiving System.
1813926	do	Hofstetter, R.	Clutch and Speed Reducing Mechanism.
1813933	do	Klein, C. H.	Wire Support.
1813942	do	Malles, R. E.	Frequency Indicator.
1813958	do	Rock, G. L.	Apparatus for Rotating Articles.
1813961	do	Schelleng, J. C.	Signaling System.
1813969	do	Smith, E. B.	Method and Apparatus for Measuring Small Time Intervals.
1814017	do	Wright, S. B., and Mitchell, D.	Means for Controlling Sensitivity of Voice Operated Devices.
1814018	do	do	Do.
1814038	do	Herman, J.	Echo Suppressor.
1814052	do	Mitchell, D.	Do.
1814158	do	Holden, W. H. T.	Signaling System.
1814238	do	Bode, H. W.	Wave Filter.
1814248	do	Gooderham, J. W.	Telephone System.
1814263	do	Reynolds, J. L.	Electrical Control System.
1814269	do	Terry, R. V.	Portable Talking Motion Picture Projector.
1814898	do	Deardorff, R. W.	Measuring System.
1814956	do	Ohl, R. S.	Radio Signaling System.
1814987	do	Weaver, A., and Branson, D. E.	Picture Transmitting System.
1815203	July 21, 1931	Ives, H. E.	Image Producing System.
1815212	do	Ogg, R. A.	Terminal Connector.
1815218	do	Spear, J. P.	Apparatus for Supporting and Handling Objects.
1815230	do	Boynton, S. E.	Assembling Fixture.
1815238	do	Cherry, G. L.	Cleaning Device.
1815241	do	Crisson, G.	Transmission System.
1815245	do	Dowd, A. J.	Coil and Method of Manufacturing Coils.
1815246	do	Englund, C. R.	Radio Direction Finder.
1815250	do	Gaylord, H. F.	Apparatus for Rewinding Rolls of Material.
1815254	do	Hoyt, R. S.	Shunt Type Impedance Equalizer for Any Smooth Line.
1815255	do	do	Impedance Equalizer for Any Smooth Line.
1815256	do	do	Series Type Impedance Equalizer for Any Smooth Line.
1815262	do	Larsen, E. W.	Feeding Mechanism.
1815263	do	do	Do.
1815264	do	do	Supporting Device.
1815269	do	Nydegger, R. R.	Apparatus for Supplying Material.
1815691	do	Wilson, R. V.	Method of Heat Treating Metal Parts.
1815695	do	Babbitt, B. J.	Method of and Material for Sealing Containers.
1815699	do	Bonsor, W.	Apparatus for Positioning and Holding Work for Material Working Apparatus.
1815709	do	Guthmann, E. A.	Apparatus for Detecting a Difference in the Thickness of Materials.
1815717	do	Kranz, H. E.	Apparatus for Measuring Variations in Thickness of Metallic Bodies.
1815721	do	McGraw, G. P.	Method of and Apparatus for Manufacturing Articles.
1815728	do	Robson, D. C., and Selvig, J. N.	Strand Reeling Apparatus.
1815976	July 28, 1931	Green, E. I.	Coupling Between Carrier and Transmission Lines.
1815986	do	Parker, R. D.	Telegraph Reading Machine.
1815996	do	Weaver, A.	Do.
1816558	do	Zupa, F. A.	Electromagnetic Device.
1816570	do	Draper, J. B.	Testing System.
1816599	do	Mathes, R. C.	Signal Transmission System.
1816601	do	McNeill, G. A.	Electron Discharge Device.
1816613	do	Powell, A. C.	Telephone System.
1816621	do	Stacy, L. J.	Testing System.
1816634	do	Carpenter, W. W., Dahl, J. F., Davis, R. C., and Kittredge, L. E.	Telephone Exchange System.
1816846	Aug. 4, 1931	Harvey, W. H.	Electrical Connector.
1816862	do	Miller, R. A.	Amplifying System.
1816875	do	Siegmund, H. O.	Electrolytic Device.
1816887	do	Adams, E. W.	Automatic Article Selecting and Distributing System.
1816905	do	Horton, J. W.	Communication System.
1816906	do	Jones, W. C.	Electromagnetic Device.
1816909	do	Larsen, E. W.	Material Handling Apparatus.
1816913	do	Schelleng, J. C.	Protective Circuit for Vacuum Tubes.
1816917	do	Smythe, E. H., and Flanders, P. B.	Apparatus for the Measurement of Acoustic Impedance.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1816953	Aug. 4, 1931	Bown, R	Privacy Signaling System.
1816958	do	Clark, A. B., and Best, F. H.	Transmission Measuring System.
1816967	do	Green, I. W	Telephone System.
1817024	do	Voos, F. A	Retractile Device.
1817949	Aug. 11, 1931	Smith, T. C	Snatch Block.
1817964	do	Carson, J. R., and Mead, S. P.	Concentric Conductor Transmission System.
1818018	do	Stocker, C. P	Control Circuit.
1818026	do	Wright, E. P. G	Telephone System.
1818027	do	Affel, H. A., and Green, E. I.	Concentric Conductor System.
1818054	do	Elmen, G. W	Magnetic Material.
1818064	do	Johnson, H. B., and Von Nostitz, E.	Telephone System.
1818070	do	Lathrop, H	Magnetic Body.
1818099	do	Rapelje, J. A	Drive Ring.
1818127	do	Gilbert, J. J	Submarine Cable Insulation.
1818131	do	Harrison, H. C	Mechanical Transmission System.
1818156	do	O'Neill, H. W	Designation Strip.
1818463	do	Curtis, A. M., and Burton, E. T.	Zero Correcting Circuit.
1818560	do	Lamplough, L. F	Device for Joining Articles.
1818568	do	Melick, J. M	Coin Collection Apparatus.
1818584	do	Schroeder, W	Lifting Device.
1818591	do	Tournier, E. P	Apparatus for Supporting Strands.
1818596	do	Zimmerman, P. P	Electromagnetic Device.
1818602	do	Bowly, H. W	Support for Strand Material.
1818648	do	Purdy, C. A	Apparatus for Pressing Condensers.
1818659	do	Tournier, E. P	Clamping Device.
1819054	Aug. 18, 1931	Affel, H. A	Carrier Signaling System.
1819069	do	Bonell, R. K	Static Frequency Changer.
1819083	do	Edwards, W. H	Phonograph Reproducer.
1819612	do	Massingham, H. R	Electrical Connection Cord and Method of Producing It.
1819614	do	Mathes, R. C	Wave Transmission System.
1819625	do	Schroeder, W	Industrial Truck.
1819629	do	Whiting, D. F	Vacuum Tube Circuits.
1819648	do	Mathes, R. C	Wave Transmission System.
1819649	do	do	Do.
1819675	do	Chaplin, M. P	Switch.
1820088	Aug. 25, 1931	Parker, R. D., and Best, F. H.	Recording Apparatus.
1820094	do	Smith, T. C., Spowart, J. B. and Fitzpatrick, P. G.	Winch Rope Winder.
1820116	do	Burns, R. W	Testing System.
1820990	Sept. 1, 1931	Siebs, C. T	Indicator Switch.
1821004	do	Carpe, A	Compression of Frequency Range.
1821005	do	Cowan, F. A	Gain Measuring Apparatus.
1821006	do	Crisson, G	Measurement of Negative Resistance.
1821076	do	Peterson, E	Amplifying System.
1821547	do	Hartley, R. V. L	Sound Radiator.
1821586	do	Smythe, E. H	Acoustic Device.
1821928	Sept. 8, 1931	Clark, A. B	Telephone Echo Suppressor.
1821993	do	Tradup, A	Telephone System.
1821997	do	Winthringham, W T	Compression of Frequency Range.
1822385	do	Watson, K. M	Apparatus for Coating Electrical Conductors.
1822432	do	Bradley, W. R	Article Handling Apparatus.
1822441	do	Knuuti, C. O., and Metzger, C. A.	Assembling Apparatus.
1822474	do	Bureau, A. A	Reel.
1822484	do	Hartsough, R. C	Method of Coating Electrical Conductors.
1822585	do	Lum, G. R	Mounting for Vacuum Tubes.
1823040	Sept. 15, 1931	Hague, A. E	Call Charging Telephone Exchange System.
1823085	do	Campbell, T. C	Show Case.
1823088	do	Clokey, A. A., and Burton, E. T.	Submarine Cable Repeating System.
1823091	do	Dahl, J. F., and Davis, R. C.	Indicating and Recording System.
1823120	do	O'Neill, H. W	Signaling and Communication System.
1823322	do	Heising, R. A	Wave Transmitting and Amplifying.
1823323	do	Hopkins, I. L	Desk Telephone Set.
1823329	do	Marrison, W. A	Piezo-Electric Device.
1823338	do	Skillman, T. S., Freeth, L. G., and Berry, R. J.	Dial Switching Toll System.
1823349	do	Chapman, S. C	Sound Picture System.
1823354	do	Dowd, A. D., Kerr, M. B., and Locke, G. A.	High Speed Submarine Cable Telegraph System.
1823360	do	Heising, R. A	Signaling System.
1823659	do	Miller, R. A	Wave Transmission System.
1823664	do	Pascarella, A. J	Circuit Maker and Breaker.
1823667	do	Powell, A. C	Trunking System.
1823671	do	Thode, W. N	Method of and Apparatus for Casting.
1823678	do	Bowman, H. N	Cabinet for Portable Testing Apparatus.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1823679	Sept. 15, 1931	Busch, A. J.	Call Charging Telephone Exchange System.
1823680	do	Curtiss, N. A.	Forming Apparatus.
1823687	do	Heising, R. A.	System for Frequency Translation of Electric Waves.
1823688	do	Hovland, H.	Telephone Exchange System.
1823739	do	Horton, J. W.	System Operating on a Marginal Current Basis.
1823827	do	Franz, E. E.	Electrical Device.
Des. 86107	do	Lum, G. R.	Wall Mounting for a Hand Telephone.
1823885	Sept. 22, 1931	Cherry, G. L.	Method of and Apparatus for Handling Strand Material.
1823933	do	Edwards, W. H.	Repeater Apparatus.
1823944	do	Kittredge, L. E., and Dorff, L. A.	Time Recording.
1823948	do	McCann, T. A.	Radio Telephone and Telegraph System.
1823981	do	Lamplough, L. F.	Method of Handling Strand Material.
1823982	do	Lodge, J. E.	Method of and Apparatus for Handling Strand Material.
1824801	Sept. 29, 1931	Bouton, L. L.	Electrical Potentiometer.
1824802	do	Brehaman, L. W.	Insulation Testing System.
1824827	do	Martin, De L. K.	Radio Signaling System.
1824829	do	McCurdy, R. G.	Cable Testing System.
1824857	do	Wintringham, W. T.	Electrical Switching Device.
1825715	Oct. 6, 1931	Cory, S. I.	Telegraph Transmission Measuring System.
1825723	do	Friend, O. A., and Heitsmith, W. J.	Telephone System.
1826196	do	Abraham, L. G.	Echo Suppressor.
1826709	Oct. 13, 1931	Adams, A. H.	Method of Soldering.
1826710	do	do	Apparatus for Soldering.
1826711	do	Andrews, J. W.	Method of Making Magnetic Structures.
1826716	do	Bartenbach, H.	Gas-Tight Plugging of Cables and the Like.
1826717	do	do	Dispensing Device.
1826725	do	Boynton, J. E.	Coupling In an Apparatus for Extruding Matter.
1826795	do	Larson, H. W.	Indenturing Apparatus.
1826808	do	McDonough, J., and Norman, L.	Apparatus for Removing Connecting Elements.
1826812	do	Nyquist, H.	Electro-Optical Transmission.
1826828	do	Schoof, A. W.	Apparatus for Gauging and Adjusting Articles.
1826835	do	Spousta, W. C.	Assembling Articles for Transportation.
1826856	do	Zimmerman, P. P.	Method of Treating Materials.
1827186	do	Borgeson, S. E.	Winding Machine.
1827187	do	Brown, G. R., and Loesges, C.	Recording Apparatus.
1827191	do	Casper, W. L.	Shielded Inductance.
1827196	do	Heising, R. A.	Piezo-Electric Oscillator.
1827198	do	Hofstetter, R.	Threading Apparatus.
1827203	do	Little, J. S.	Cellulose Containing Articles and Method of Producing Such Articles.
1827204	do	Mason, S. R.	Method of Protecting Metal Surfaces.
1827205	do	Middlekauff, R. P.	Composite Relay Stud.
1827209	do	Robbins, C. W.	Industrial Truck.
1827210	do	Siebs, C. T.	Method of Welding.
1827247	do	Mason, S. R.	Method of Protecting Metal Surfaces.
1827263	do	Roman, F. L.	Composition for Flame-Proofing Inflammable Materials.
1827297	do	Moore, C. R.	Method of Joining Wires by Means of Sleeves.
1827302	do	Stull, J. S.	Material Working Apparatus.
1827843	Oct. 20, 1931	Green E. I.	Piezo-Electric Frequency Eliminator.
1827855	do	Parker, L. T.	Reeling Device.
1827860	do	Thorp, V. P.	Carrier Telegraph System.
1827931	do	Blankenstein, E. E.	Method of Producing Carbon Granules.
1828009	do	Westhafer, T. O.	Do.
1828046	do	Howard, R. S.	Do.
1828454	do	Bode, H. W.	Transmission Network.
1828455	do	Borgmann, C.	Telephone Switchboard.
1828498	do	Heising, R. A.	Oscillation Circuits.
1828503	do	Lutomirski, K.	Means for Reducing Interference in Electrical Circuits.
1828507	do	Murphy, P. B.	Circuit Controlling Device.
1828513	do	Smythe, E. H.	Sound Reproducer.
1828803	Oct. 27, 1931	Freeman, A. E., and Livermore, W. T.	Multiple Drive Apparatus.
1828823	do	Taylor, E. R.	Combined Telephone and Telegraph System.
1829185	do	Herman, J.	Method and Means for Measuring Distortion of Telegraph Signals.
1829783	Nov. 3, 1931	Chesnut, R. W., Fisher, H. J., and Sanial, A. J.	Method and System of Secret Signaling.
1829798	do	Hatton, W., De Vriendt, C., and Rousseau, E. J.	Community Dial Switching Telephone System.
1829799	do	Hatton, W., De Vriendt, C., and Rousseau, E. J.	Zone Metering Telephone Exchange System.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1829801	Nov. 3, 1931	Jones, W. C	Sound Reproducing System.
1829803	do	Korn, F. A., and Entz, F. S	Telephone System.
1829805	do	Mathes, R. C	Transmission Control.
1829806	do	do	Do.
1829810	do	Reeve, H. T	Electron Emitter.
1829825	do	Freeman, A. E., and Livermore, W. T.	Brake for Power Driven Shafts.
1829830	do	Herman, J	Pilot Channel for Telegraph Systems.
1829836	do	Newby, N. D	Signaling System.
1829837	do	do	Do.
1829838	do	Nyquist, H	Transmission Delay Measuring System.
1829992	do	Kemp, A. R	Rubber Composition.
1829997	do	Martell, C	Composition of Matter and Method of Its Preparation.
1829998	do	do	Do.
1830163	do	Gray, F	Glow Discharge Lamp.
1830173	do	Nelson, E. L	Radio Television System.
1830210	do	Oswald, A. A., and Schelleng, J. C.	Electric Discharge Apparatus.
1830219	do	Bjornson, B. G	Transmission Control.
1830220	do	do	Do.
1830226	do	Dudley, H. W	Transoceanic Cable Circuit.
1830238	do	Nukiyama, H., and Nagai, K	Relay and Discharge Tube Circuit.
1830240	do	Peterson, E	Electric Wave Limiting Device.
1830834	Nov. 10, 1931	Green, J. W	Telephone System.
1830864	do	Weaver, A	Elimination of Radio Interference Due to Printing Telegraph.
1830873	do	Haines, W. T	Telephone System.
1830880	do	Misenheimer, H. N	Antenna Circuit.
1830896	do	Wintringham, W. T	Adjustable Electric Filter System.
1831018	do	Little, J. S	Machine for Making Articles from Pulpous Material.
1831037	do	Scott, K. L	Signaling Device.
1831375	do	Adams, W. J., Jr	Electrical Tuning Device.
1831377	do	Blount, N	Telephone Receiver.
1831380	do	Curley, T. V	Telephone System.
1831385	do	Hague, A. E	Do.
1831387	do	Hatton, W., De Vriendt, C., and Rousseau, E. J.	Dial Switching Rural Telephone Exchange System.
1831391	do	Perreault, G. E	Telephone Desk Set.
1831398	do	Spencer, C. G., and Hall, J. A	Telephone System.
1831399	do	Stevens, C. E., and Den Hertog, M.	Register Equipment for Automatic Telephone Exchanges.
1831400	do	Stokely, R. L	Telephone System.
1831881	Nov. 17, 1931	Potter, R. K	Radio Signal Measuring Device.
1831901	do	Bascom, H. M	Telephone System.
1831921	do	Martin, DeL. K	Short Wave Radio Antenna System.
1831922	do	McDavitt, M. B., and Schwantes, P. C., Jr.	Telephone Exchange System.
1831931	do	Stern, A. B	Telephone System.
1831945	do	Boynton, J. E	Forming Tubes.
1831992	do	do	Material Handling Apparatus.
1832261	do	Stevenson, G. H	Non-Singing Amplifier.
1832263	do	Strickler, W. B	Telephone System.
1832285	do	Elmer, L. A	Mechanical Coupling.
1832292	do	Fowler, C. B	Electrical Circuits.
1832293	do	Friedl, G., Jr., and Gastonguay, A.	Protective Device.
1832294	do	Gent, E. W	Sensitometer.
1832306	do	Kille, L. A	Semi-Automatic Telephone System.
1832307	do	Kingsbury, E. F	Alloy for Electrical Contacts.
1832308	do	Knoop, W. A	Interpolating System.
1832309	do	do	Synchronous Telegraph System.
1832366	do	Dudley, H. W	Electrical Communication System.
1832430	do	Siebs, C. T	Winding Device.
1832131	do	Sivian, L. J	Electric Wave Transmission System.
1832444	do	Berger, B	Safety Device.
1832446	do	Boe, H. J	Apparatus for Handling Reels.
1832417	do	Carpenter, W. W	Telephone System.
1832453	do	Fowler, C. B	Telephone Metering System.
1832455	do	Gilbert, J. J	Submarine Signaling Conductor.
1832466	do	Means, W. J	Resistance Unit.
1832886	Nov. 24, 1931	Whiting, D. F	Current Supply Circuits.
1832901	do	Harrison, H. C	Measurement of Mechanical Impedance.
1832969	do	Edwards, P. G., and Herrington, H. W.	Testing System.
1832977	do	Gannett, D. K	Multiple Way Connection for a Plurality Lines.
1832981	do	Haislip, R. A	System for Building Out Loading Sections of Signaling Cables.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1832996	Nov. 24, 1931	Percival, H. S., and Bartlett, H. H.	Grade Clamp.
1833000	....do	Shafer, W. L	Selective Signaling System.
1833616	....do	Nelson, C. E., and Stull, J. S.	Material Forming Apparatus.
1833636	....do	Dahl, A. C	Article Conveying System.
1833637	....do	Dennison, L. I	Method of and Apparatus for Handling Articles.
1833640	....do	Fruth, H. F	Microphonic Material and Method of Producing the Same.
1833641	....do	....do	Do.
1833642	....do	....do	Sound Generating and Sound Responsive Device.
1833644	....do	Haegele, O. P	Intermittent Motion Transmitting Device.
1833654	....do	McMullan, S	Signaling System for Material Handling Apparatus.
1833656	....do	Nelson, C. E	Material Forming Apparatus.
1833657	....do	....do	Do.
1833658	....do	Pullan, J. F	Do.
1833659	....do	Ravenschlag, A. G., and Tikalsky, F. P.	Ejecting Mechanism.
1833660	....do	Siebs, C. T., and Daniel, T. A.	Welding Apparatus.
1833661	....do	Stull, J. S	Threading Die.
1833662	....do	....do	Apparatus for Handling Articles.
1833663	....do	Tikalsky, F. P	Die Casting Machine.
Des. 85617	....do	Lum, G. R	Audiphone.
1833958	Dec. 1, 1931	Watson, E. F., and McCann, T. A.	Telegraph Signal Recording System.
1833966	....do	Fetter, C. H	Multiplex System.
1833968	....do	Holden, W. H. T	Amplifying System.
1834002	....do	Nyquist, H	Distortion Neutralizing Repeater.
1834005	....do	Roberts, L. C	Selective Circuit Arrangement.
1834376	....do	Boving, H	Insulated Wire.
1834393	....do	Fowler, C. B	Telephone Exchange System.
1834956	Dec. 8, 1931	Lonie, J. H	Hydraulic Feed for Work Tables.
1834986	....do	Strawn, M. L	Control Mechanism.
1834992	....do	Almquist, M. L	Device for Producing Modulated Currents.
1835003	....do	Bisbee, F. C	Telephone System.
1835031	....do	Espenschied, L., and Affel, H. A.	Concentric Conducting System.
1835080	....do	Pfleger, K. W	Transmission Regulation in Cable Circuits.
1835099	....do	Stone, J. S	Valve Commutator and Its Use in Multiplex Signaling.
1835597	....do	Hill, W. M., and McFarland, R. E.	Apparatus for Working Strand Coverings.
1835737	....do	Williams, S. B	Electrical Recorder.
1835743	....do	Aster, A. K	Sound Picture System.
1835757	....do	Burchett, G. W	Connecting Device.
1835771	....do	Gilbert, J. J	Submarine Signaling Cable.
1835783	....do	Kendall, B. W	High Frequency Signaling.
1835788	....do	Knoop, W. A	Electrical Contact Element.
1835792	....do	Lum, G. R	Head Set.
1835795	....do	Mason, W. P	Sound Transmission.
1835802	....do	Meszar, J	Signaling System.
1836106	Dec. 15, 1931	Broe, E. P	Overflow Jack Circuit.
1836109	....do	Edwards, W. H	Impedance Modifying Device.
1836114	....do	Green, E. I	System of Carrier Current Signaling on Power Lines.
1836127	....do	Matte, A. L	System for Testing and Adjusting Energy Levels in the Transmission of Signals.
1836129	....do	Potter, R. K	Signaling System.
1836549	....do	Paine, R. C	Telephone Exchange System.
1836556	....do	Shelleng, J. C	Regulating Device for High Frequency Power Amplifiers.
1836558	....do	Sherman, R. J	Light Valve.
1836569	....do	Benjamin, J. C	Electric Translating Device.
1836674	....do	Burton, E. T	Signal Shaping Amplifier.
1836582	....do	Dunham, B. G	Telephone Exchange System.
1836589	....do	Haigh, L. B	Rural Telephone System.
1836594	....do	Heising, R. A	Radio Signaling System.
1836804	....do	Kahl, W. E	Carrier Repeating System.
1836808	....do	Marrison, W. A	Inductance Coil.
1836809	....do	Mason, W. P	Distortion Corrections in Transmission Systems.
1836810	....do	....do	Do.
1836816	....do	Riesz, R. R	Artificial Larynx.
1836824	....do	Steinberg, J. C	Wave Transmission with Narrowed Bands.
1836829	....do	Weinhart, H. W	Electric Discharge Device.
1836839	....do	Coram, R. E	Oscillation Generator.
1836841	....do	Dudley, H. W	Electric Wave Signaling System.
1836844	....do	Fry, T. C., and Struik, D. J.	Distortion Correction in Transmission Systems.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1837202	Dec. 22, 1931	Burton, E. T.	Circuit Breaker.
1837206	do	Collis, R. E.	Ca l Charging Telephone Exchange System.
1837217	do	Hayward, J. M.	Telephone Card Holder.
1837229	do	Mason, W. P.	Distortion Correction in Transmission Systems.
1837237	do	Shangle, A. H.	Telegraph Apparatus.
1837238	do	Siegmund, H. O.	Method of Making Electrical Switch Contacts.
1837243	do	Watkins, S. S. A.	Sound Recording and Reproducing System.
1837245	do	Wheeler, E. B.	Inductance Device.
1837316	do	Crisson, G., and Wright, S. B.	Voice Operated Control Arrangement for Telephone Cable Systems.
1837327	do	Lewis, B. F.	Transmission Network.
1837337	do	Roberts, L. C.	Means for Producing Current of Reduced Frequency.
1837355	do	Burns, R. M., and Warner, C. W.	Electro-Deposition of Alloys.
1837364	do	Ives, H. E.	Signaling Apparatus.
1837365	do	do	Light Sensitive Device.
1837373	do	Ronci, V. L.	Glass Working Machine.
1837385	do	Wegel, R. L.	Sound Radiator.
1837413	do	Dobson, E. S.	Inductive Coupling Device.
1837434	do	Hickson, D. C.	Horn Support.
1837448	do	Krom, M. E.	Signaling System.
1837491	do	Sarbacher, R. I.	Horn Support.
1837721	do	Mason, S. R.	Method of Treating Metallic Surfaces.
1837723	do	McGraw, G. P.	Method of Manufacturing Electrical Connecting Plugs.
1837733	do	Stearns, H. C.	Protective Covering and Method of Producing Such Covering.
1837754	do	Calmus, C. J., and Tomlin, J. H.	Method of Producing Electrical Apparatus.
1838027	do	Clarke, H. R.	Electrodynamic Device.
1838268	Dec. 29, 1931	Ladner, H., and Welch, P. V.	Biased Carrier Telegraph System.
1838278	do	Montagnon, J.	Spanner Wrench.
1838281	do	Nyquist, H.	Transmission Line.
1838370	do	Dean, R. S., and Wilson, R. V.	Soldering Flux.
1839263	Jan. 5, 1932	Reiber, A. H.	Automatic Control System.
1839290	do	Bailey, A.	Direction Finder for Radio Waves.
1839320	do	Kellems, E. E.	Cable Reel Trailer.
1839321	do	Kent, R. J.	Reeling Device.
1839344	do	Scott, K. L.	Method of Treating Magnetic Materials.
1839345	do	Scott, K. L., Kirby, A. L., and Leach, M. R.	Method of Heat Treating Magnet Steels.
1839361	do	Weaver, A., and Branson, D. E.	Image Producing System.
1839436	do	Wood, L. E.	Method of Producing Composite Articles.
1839439	do	Raymond, G. F.	Measuring Device.
1839477	do	Grondahl, H. H. C.	Control Apparatus.
1839490	do	Moeller, L. J.	Apparatus for Distributing Parts.
1840015	do	Bjornson, B. G.	Transmission Control Circuit.
1840089	do	Gilbert, J. J.	Loaded Submarine Cable.
1840090	do	Goodrum, C. L.	Impulse Circuit.
1840097	do	Hinrichsen, E. E.	Do.
1840101	do	Jespersen, H. W.	Apparatus for Controlling the Working o Material.
1840102	do	do	Apparatus for Cleaning Articles.
1840109	do	Koechling, C. D.	Telephone System.
1840112	do	Lane, C. E.	Artificial Larynx.
1840113	do	Latimer, K. E.	Telephone Transmission System.
1840116	do	Linton, G., and Townsend, J. R.	Switch Cleaning Device.
1840132	do	Roberts, T. H.	Telephone System.
1840144	do	Wheeler, C. H.	Coin Collector.
1840350	Jan. 12, 1932	Ceccarini, O. O.	Radio Frequency Amplifier.
1840352	do	Elmen, G. W.	Process of Producing Magnetic Bodies.
1840356	do	Goodrum, C. L.	Automatic Telephone Exchange System.
1840357	do	do	Panel Dial Switching System.
1840359	do	Hellner, P. H.	Metering and Timing Apparatus for Telephone Systems.
1840360	do	Herman, J.	Selective Circuit Arrangement.
1840362	do	Hunter, R. N., and Stover, H. F.	Transposition Bracket for Insulators.
1840364	do	Irvine, F. S.	Telephone Dial System.
1840368	do	Porter, L. F.	Telephone Exchange System.
1840376	do	Whitney, W.	Telephone System.
1840377	do	Williams, R. R.	Electrical Conductor.
1840434	do	Cowan, F. A.	Conductor System for Signaling Currents.
1840580	do	Heising, R. A.	Crystal Controlled Oscillator.
1841033	do	Ives, H. E.	Photoelectric Tube.
1841034	do	do	Electro-Optical Apparatus.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1841084	Jan. 12, 1932	Bragg, H. E	Telephone System.
1841085	do	Bruce, E	Unidirectional Antenna System.
1841088	do	Christopher, A. J	Electrical Testing System and Method.
1841093	do	Dahl, J. F	Call Distributing System.
1841097	do	Elmen, G. W	Heat Treatment of Conductors.
1841101	do	Flanders, P. B., and Harrison, H. C.	Loud Speaker.
1841120	do	Hibbard, F. H	Slow Acting Relay.
1841123	do	Hovland, H	Telephone Exchange System.
1841125	do	Hoyt, F. A	Coin Collection Apparatus.
1841142	do	Mathes, R. C	Wave Communication System.
1841197	do	Massonneau, R. F., and Roberts, T. H.	Telephone Alarm System.
1841394	Jan. 19, 1932	Bachelet, A. E	Circuit for Space Discharge Devices.
1841405	do	Dudley, H. W	Transmission Control Circuits.
1841422	do	Stull, J. S	Apparatus for Forming Articles.
1841428	do	Barrows, L. D	Contact Mechanism.
1841468	do	Ford, B. K	Connecting Plug.
1841469	do	Franks, C. H	Telephone Receiver.
1841472	do	Given, F. J	Inductance Device.
1841473	do	Green, E. I	Arrangement for Connecting or Terminating Coaxial Conductors.
1841476	do	Griffiin, J. T	Method of Facilitating the Location of Members Secured Within Bodies.
1841479	do	Jessen, G. J	Combined Cable and Wire Support.
1841484	do	Larsen, H. M	Process of Treating Materials.
1841485	do	do	Apparatus for Treating Materials.
1841486	do	Legg, V. E	Composite Metallic Strand.
1841488	do	Liss, A. S	Material Feeding Apparatus.
1841489	do	Marrison, W. A	Oscillation Generator.
1841496	do	Milne, G. D	Electromagnetic Device.
1841501	do	Sivian, L. J	Circuits for Electric Discharge Devices.
1841504	do	Stoller, H. M	Do.
1842037	do	Mason, S. R	Article Made of Chromium.
1842478	Jan. 26, 1932	Rea, W. T	Telegraph System.
1842496	do	Wagner, R., Jr	Mounting for Books and the Like.
1842523	do	Hanley, F. H	Telegraph System.
1842721	do	Kleinschmidt, E. E	Radio Telegraph System.
1842722	do	do	Signaling System.
1843189	Feb. 2, 1932	Bailey, A	Radio Telephone and Telegraph System.
1843227	do	Herman, J	Do.
1843228	do	Herman, J., Taylor, E. R., and Wright, S. B.	Radio Telephone and Telegraph Circuits.
1843910	Feb. 9, 1932	Broadwill, H	Tuning Fork.
1844027	do	Bascom, H. M., and Nelson, S. F.	Signaling Arrangement for Telephone Systems.
1844108	do	Smythe, E. H	Method of Manufacturing Acoustic Impedance Elements.
1844110	do	Steinberg, J. C	Determination of Telephone Quality.
1844111	do	Stokely, R. L	Telephone Exchange System.
1844114	do	Bishop, W. M	Manufacture of Continuously Loaded Conductors.
1844121	do	Hibbard, F. H	Electromagnetic Switching Device.
1844123	do	Holland, N. H	Acoustic Diaphragam.
1844125	do	Kelsay, L. W	Cable Terminal Device.
1844147	do	Clark, E. H	Automatic and Semi-Automatic Telephone System.
1844422	do	Mathes, R. C., and Horton, A. W., Jr.	Cable Telephony.
1844423	do	Mathes, R. C	Attenuation and Volume Control.
1844424	do	Horton, A. W., Jr	Long Distance Telephone Transmission.
1844886	do	Herman, J	Means for Measuring Time of Propagation of Wave Fronts over Circuits.
1844887	do	do	Method of and Means for Measuring Time of Propagation of Wave Fronts over Circuits.
1844953	Feb. 16, 1932	Friis, H. T	Radio Receiving Circuits.
1844973	do	Ports, E. G	Radio Communication System.
1845017	do	Edwards, W. H	Telephone Signaling System.
1845033	do	Bausch, E	Switching Mechanism.
1845034	do	Bickelhaupt, C. O	Signaling Apparatus for Recording Systems.
1845041	do	Boving, H	Insulated Electric Conductor.
1845042	do	Burns, R. M	Electron Discharge Device.
1845075	do	Boving, H	Insulation for Electrical Conductors.
1845077	do	Dixon, J. B., and Hayford, W. S.	Drawing Tool.
1845080	do	Eyring, C. F., Hanson, R. L., and MacNair, W. A.	Studio for Acoustic Purposes.
1845081	do	Ferris, L. P	Electrical Protective System.
1845113	do	Andrews, J. W., and Gillis, R	Magnetic Material and Magnet Core.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1845144	Feb. 16, 1932	Gillis, R.	Method of Making Magnetic Structures
1846261	Feb. 23, 1932	Kittredge, L. E.	Telephone System.
1846262	do	do	Do.
1846516	do	Haines, W. T.	Do.
1846678	do	Ferrell, M. P.	Speeding Measuring Apparatus.
1846883	do	Locke, G. A.	Synchronous Signaling System.
1846917	do	Stevenson, G. H.	Bushing for High Frenquency High Voltage Current.
1847079	Mar. 1, 1932	Burton, E. T.	Wave Modulation and Application Thereof.
1847086	do	Gargan, J. O.	Fluid Operated Switch.
1847089	do	Heising, R. A., and Farrington, J. F.	Radio Receiving System.
1847100	do	Rock, G. L.	Terminal and Method of Attachment Thereof.
1847102	do	Scott, W. J.	Ceramic Material.
1847113	do	Keller, L.	Communication System.
1847116	do	Labaugh, J. M.	Telephone Substation Set.
1847122	do	Macintyre, M.	Electrical Connector.
1847123	do	Malm, F. S.	Compositions of Matter and Methods of Their Preparation.
1847124	do	Marrison, W. A.	Oscillation Generator.
1847137	do	Roberts, J. G.	Communication System.
1847140	do	Shee, P. L.	Locating Device.
1847142	do	Sivian, L. J.	Means and Method of Signaling by Electric Waves.
1847145	do	Tarr, J. E.	Amplifier System.
1847151	do	Watson, E. F., and Hunt, A. E.	Transmitter of Variably Biased Impulses.
1847160	do	Affel, H. A.	Frequency Control.
1847161	do	Alden, J. L.	Feeding Apparatus.
1847174	do	Dixon, A. F.	Communication System.
1847181	do	Harrison, H. C.	Talking Motion Picture System.
1847190	do	Marrison, W. A.	Electric Wave Signaling System.
1847191	do	Morton, E. R.	Control System.
1847196	do	Scott, W. J.	Ceramic Material and Method of Manufacturing Ceramic Articles.
1847197	do	Shaw, L. I., and Scott, W. J.	Ceramic Material and Method of Making the Same.
1847208	do	Bennett, F. W.	Inclosure for Devices.
1847213	do	Folkner, G. W.	Selector Switch.
1847702	do	Thuras, A. L.	Sound Translating Device.
1848126	Mar. 8, 1932	Heising, R. A.	Generation and Modulation of Electric Waves.
1848134	do	Lambert, K. B.	Electrical Testing System.
1848143	do	Pfannenstiehl, H.	Motion-Picture Apparatus.
1848169	do	Greenidge, R. M. C.	Adjustable Inductance.
1848174	do	Irvine, F. S., and Roberts, T. H.	Trouble Recording System.
1848180	do	Knoop, W. A.	Synchronizing System.
1848181	do	do	Synchronous Signaling System.
1848187	do	McNally, J. O.	Vacuum Tube Amplifier.
1848196	do	Polinkowsky, L., and From, O. C.	Semi-Automatic Rural Telephone System.
1848209	do	Strong, C. E.	Vacuum Tube Circuits.
1848212	do	Waterman, J. S.	Apparatus for Producing Artificial Breathing.
1848220	do	Lindsay, R. H.	Energy Control Arrangement.
1848221	do	McCurdy, R. G.	Filter Arrangement.
1848222	do	Potter, R. K.	Producing Musical Sounds.
1848364	do	Legg, V. E.	Treating Magnetic Materials.
1849087	Mar. 15, 1932	Hovland, H.	Telephone System.
1849088	do	do	Do.
1849141	do	Dutton, T. D.	Transmission Regulator System.
1849189	do	Holden, W. H. T.	Gain Control Apparatus.
1849193	do	McCurdy, R. G.	Submarine Cable.
1849641	do	Sandeman, E. K.	Mechanical Wave Transmission Device.
1849643	do	Seasongood, C. C., and McWilliams, C. W.	Electric Contact Device.
1849645	do	Stoller, H. M.	Motor Structure.
1849646	do	do	Motor Control System.
1849651	do	Anderson, S. E.	Radio Apparatus.
1849656	do	Bennett, W. R.	Transmission Network.
1849662	do	Dunham, B. G.	Telephone Exchange System.
1850130	Mar. 22, 1932	Gannett, D. K.	Talking Moving Picture System.
1850145	do	Thorp, V. P.	Carrier Telegraph System.
1850146	do	Zobel, O. J.	Electrical Wave Filter.
1850576	do	Zimmerman, L. C.	Apparatus Used in the Process of Heat Treating Metallic Articles.
1850579	do	Casper, W. L.	Adjustable Inductance Coil.
1850580	do	Coram, R. E.	Oscillation System.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1850581	Mar. 22, 1932	Duclos, A. J. M.	Apparatus for Sealing Conductors under Pressure.
1850591	do	Martin, F. D.	Apparatus for Handling Material.
1850593	do	Mathes, R. C.	Transmission Control.
1850597	do	McGuire, L. R.	Method of and Apparatus for Shipping Articles.
1850603	do	Quass, R. L.	Telephone System.
1850608	do	Stokely, R. L.	Do.
1851072	Mar. 29, 1932	Vernam, G. S., Watson, E. F., and Perry, D. B.	Apparatus and Method for Electrical Transmission of Pictures.
1851090	do	Fetter, C. H.	Transmission Delay Circuits.
1851091	do	do	Signaling System Including Adjustable Wave Filter.
1851092	do	do	Transmission Delay Circuits.
1851139	do	Stokely, R. L.	Telephone System.
1851173	do	Hall, A. G.	Method of and Apparatus for Gauging Articles.
1851185	do	Johnson, L. H.	Telephone System.
1851778	do	Walbran, C. J.	Tape Moistening and Pasting Device.
1852045	Apr. 5, 1932	Edwards, W. H.	Signaling Arrangement for Telephone Lines.
1852050	do	Hamilton, B. P.	Telegraph System.
1852061	do	Hamilton, B. P., and Rea, W. T.	Telegraph Repeater System.
1852162	do	Harris, J. E., and White, J. H.	Refining of Copper.
1852584	do	Mathes, R. C.	Transmission Control.
1852605	do	Carlton, R. C., Tinus, W. C., and Vadersen, H.	Inductance Device.
1852647	do	Gooderham, J. W.	Telephone System.
1852743	do	Elmer, L. A.	Motion Picture Apparatus.
1852746	do	Gooderham, J. W.	Telephone System.
1852747	do	Hague, A. E.	Trunk Circuit for Telephone Exchange Systems.
1852753	do	Knoop, W. A.	Telegraph Signal Distributing Device.
1852756	do	Pritchard, W. T.	Lubricating Device.
1852758	do	Schroeder, W.	Material Handling Apparatus.
1852759	do	Shaw, L. I., and Johnson, A. G.	Enameled Article and Method of Producing the Same.
1852769	do	Collard, J.	Interference Determining.
1852773	do	Gent, E. W.	Electromagnetic Signaling Device.
1852774	do	Gent, E. W., and Potts, L. M.	Transiating Device.
1852777	do	Hoernel, P. C., and Smith, J. W.	Cooling System.
1852792	do	Siebs, C. T., and McGuire, L. R.	Reel and the Transportation Thereof.
1852793	do	Scrantom, D. G.	Apparatus for Amplifying and Distributing Sound Waves.
1852795	do	Wegel, R. L.	Wave Transmission Device.
1853022	Apr. 12, 1932	Allison, S. W., and McCullagh, W. I.	Automatic Dialing Circuits.
1853070	do	Mitchell, D.	Equalization of Power Level in a Signal Transmitting System.
1853077	do	Peterson, G. H.	Timing Circuit for Telephone Calls.
1853117	do	Espenschied, L., and Fetter, C. H.	Receiver for Radio Broadcast and Wire Distributing Systems.
1853548	do	Casper, W. L.	Coil.
1853912	do	MacNair, W. A.	Studio for Acoustic Purposes.
1853924	do	Owens, C. D.	Process for Insulating Magnetic Bodies.
1853929	do	Rettenmeyer, F. X.	Electric Wave Filter.
1853955	do	Blattner, D. G.	Acoustic Device.
1853969	do	Ganz, A. G.	Circuits for Coupling Lines of Different Impedances.
1853974	do	Hogg, J. L., and Doba, S.	Transmission System.
1854106	do	Carpenter, W. W.	Automatic Telephone System.
1854247	Apr. 19, 1932	Brand, S., and Mertz, P.	Multiplex Phase Discrimination Transmission System.
1854255	do	Green, E. I.	Triple Concentric Conductor System.
1854267	do	Matte, A. L.	Tuning Fork Generator.
1854432	do	Thurston, G. M.	Generation of Electric Waves.
1854457	do	DeCoutouly, G. C.	Electric Wave Signaling System.
1854760	do	Paulson, C.	Apparatus for Gauging Material.
1854795	do	Kaempf, E.	Electric Communication Cable.
1854802	do	Meyer, A.	Telephone Receiver.
1854812	do	Steinberg, J. C.	Do.
1854824	do	Burgess, H. A.	Toroidal Coil.
1854828	do	Doba, S.	Transmission System.
1854830	do	Flanders, P. B.	Acoustic Device.
1854832	do	Gastonguay, A., and Puller, G.	Support.
1854838	do	Hartsough, R. C.	Apparatus for Inspecting Material.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1854916	Apr. 19, 1932	Wirth, G	Telephone Exchange System.
1855288	Apr. 26, 1932	Green, E. I	Coaxial Construction for Power Line Carrier System.
1855303	do	McCurdy, R. G	Multiple Coaxial Conductor System.
1855321	do	Shackleton, S. P	Gas Pressure Alarm System for Toll Cables.
1855571	do	Fondiller, W	Continuously Loaded Conductor.
1855576	do	Keith, C. R	Frequency Translating System.
1855578	do	Legg, V. E	Heat Treatment of Signaling Conductors.
1855593	do	Whitney, W	Telephone System.
1855598	do	Carpenter, W. W., and Collis, R. E.	Telephone Exchange System.
1855600	do	Clarke, H. R	Sound Translating Device.
1855601	do	Gorton, W. S	Impulse and Wave Transmission System.
1855602	do	Kerner, S	Crimping Tool.
1855616	do	Stevens, W. E	Telephone System.
1855849	do	Babbitt, B. J	Apparatus for Determining Magnetic Properties of Materials.
1855855	do	Gillis, R., and Morison, J. C	Molding Die.
1855862	do	McCann, P. S., and Spousta, W. C.	Container Handling and Dumping Device.
1855869	do	Pugh, E	Method of and Apparatus for Coating Articles.
1855870	do	Rinker, J. C	Filing Device.
1855872	do	Shaw, L. I	Detergent.
1855874	do	Stull, J. S	Apparatus for Forming Articles.
1855876	do	Barker, V. D	Method of and Apparatus for Producing Electrical Resistance Elements.
1855877	do	Blood, H. L., and Olson, H. O.	Material Handling Apparatus.
1855930	do	Stull, J. S	Apparatus for Forming Articles.
1856202	May 3, 1932	Wilson, L. T	Testing Apparatus.
1856204	do	Affel, H. A., and Green, E. I	Coaxial Conductor System.
1856213	do	Hamilton, B. P., and Rea, W. T.	Radio Receiving Apparatus.
1856224	do	Perry, D. B	Telegraph Communication System.
1856373	do	Burton, E. T	Power Amplifier.
1856654	do	Nebel, C. N	Terminating Circuit for Two-Way Signaling Systems.
1856665	do	Stoller, H. M	Power Supply System.
1856666	do	do	Filter Circuits.
1856676	do	Weston, W. K	Telephone Cable.
1856702	do	Gilbert, J. J	Tapered Loading of Conductors.
1856707	do	Horton, J. W	Frequency Measuring Circuits.
1856714	do	Locke, G. A	Printing Telegraph Radial Switching System.
1857201	do	Lathrop, H	Process for Insulating Magnetic Bodies.
1857238	do	Cory, S. I	Transmission System.
1857258	do	Rea, W. T	Do.
1857259	do	do	Do.
1857786	do	Krum, H. L	Telegraph Printer and the Like.
1857794	do	Smythe, E. H	Wave Energy Translating Diaphragm and Method of Mounting It.
1857801	do	Arkema, H. P., and McMullan, S.	Strand Slackening Device.
1857817	do	McCann, P. S	Winding and Reeling Device.
1857819	do	Merriam, F. F	Radio Telephone System.
1857820	do	Rice, E. U	Serving Device.
1857827	do	Stacy, L. J	Telephone System.
1857828	do	Wagar, H. M	Circuit Controlling Device.
1857830	do	Whittle, H	Transmission Circuit.
1857835	do	Bidwell, E. M	Apparatus for Handling Strand Material.
1857848	do	Hinrichsen, E. E	Communication System.
1858037	do	Burton, E. T	Zero Correcting Circuit.
1858237	May 17, 1932	do	Submarine Cable Telegraph System.
1858307	do	Nyquist, H	Means for Compensating for Non-Linear Distortion in Transmission Circuits.
1858338	do	do	Do.
1858339	do	Ohl, R. S	Piezo-Electric Oscillator.
1858350	do	Weaver, A	Printing Telegraph System.
1858364	do	Koenig, W., Jr	Multiple Slide Wire Potentiometer.
1859011	do	Wales, C	Method of and Apparatus for Making Glass Articles.
1859019	do	Bjornson, B. G	Voice Operated Relay Circuits.
1859020	do	Brown, L. H	Method of and Apparatus for Measuring Materials.
1859030	do	Dudley, H. W	Distortion Correction in Transmission Systems.
1859047	do	Paulson, C	Apparatus for Determining Indications of Measuring Instruments and Controlling Apparatus Thereby.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1859067	May 17, 1932	Beath, C. P., and Heinicke, H. M. E.	Method of Producing Magnetic Materials.
1859087	do	Heinicke, H. M. E	Do.
1859111	do	Rock, G. L	Indexing Apparatus.
1859385	May 24, 1932	Edwards, W. H	Telephone System.
1859386	do	do	Do.
1859390	do	Green, E. I	Concentric Conductor System.
1859404	do	McDavitt, M. B	Telephone Exchange System.
1859423	do	Arnold, H. D	Sound Recording.
1859470	do	Road, R. A., and Redmond, F. J.	Selector Brush.
1859475	do	Skillman, T. S., and Freeth, L. G.	Call Indicator System.
1859476	do	Skillman, T. S	Semi-Automatic Telephone System.
1859494	do	Black, H. S	Circuits for Electric Discharge Devices.
1859498	do	Carpe, A	Vacuum Tube Control System.
1859565	do	Keith, C. R	Apparatus for Reducing Cross Talk Currents.
1859867	do	Friis, H. T., and Jensen, A. G.	Wave Transmission Circuits.
1859885	do	Paine, R. C	Telephone System.
1859892	do	Ricker, N. H	Acoustic Device.
1859901	do	Trebes, B. M. A	Extruding Apparatus.
1859910	do	Bowne, L. J	Telephone System.
1859921	do	Heising, R. A	Acoustic Device.
1859924	do	Johnson, L. H., and Gibson, E. S.	Call Charging Telephone Exchange System.
1859929	do	McKim, J. B	Telephone System.
1859930	do	Miller, I. R	Recording and Reproduction of Intelligence.
1859941	do	Stokely, R. L	Telephone Exchange System.
1860007	do	Bascom, H. M	Telephone Office Alarm Circuit.
1860070	do	Blount, H	Strand Working Apparatus.
1860130	do	do	Do.
1860446	May 31, 1932	Bailey, R. S., Newby, N. D., and Moody, D. L.	Signaling System.
1860455	do	Dietze, E	Lineman's Test Set.
1860457	do	Edwards, W. H	Signaling System for Party Telephone Lines.
1860458	do	do	Telephone Signaling System.
1860459	do	do	Signaling Arrangement for Two-Party Telephone Lines.
1860464	do	Kleinschmidt, E. E	Selective System and Apparatus Therefor.
1860498	do	Ford, L. S	Electrical Cable.
1860500	do	Gilbert, J. J	Conductor.
1860503	do	Holland, N. H	Acoustic Diaphragm.
1860515	do	Stokely, R. L	Telephone Exchange System.
1860535	do	Goff, H. W	Impulse Transmitter.
1860556	do	Sole, J. H	Regulator.
1860820	do	Scott, K. L	Method of Producing Magnetic Cores.
1860843	do	do	Apparatus for Producing Magnetic Cores.
1860844	do	Sorensen, E. H	Assembling Apparatus.
1860935	do	Marrison, W. A. and Horton, J. W.	Speed and Position Control for Television Apparatus.
1860936	do	do	Electricl Control System.
1861196	do	Stokely, R. L	Telephone Exchange System.
1861201	do	Whiting, D. F	Electron Tube Circuits.
1861204	do	Berrian, J. A	Electrical Controller System.
1861221	do	Martin, H. T. and Hoyt, F. A.	Reeling Device.
1861344	do	Hulfish, D. S	Printing Telegraph System.
1861524	June 7, 1932	Coolidge, O. H	System for Neutralizing Crosstalk between Signaling Circuits.
1861549	do	Ratta, J. A	Vehicle Chock.
1861550	do	Rea, W. T	Motor Generator Regulator System.
1861553	do	Shanck, R. B	Alarm Circuit.
1861556	do	Smith, T. C. and Livermore, W. T.	Cable Reel Trailer.
1861562	do	Bouget, Y. A. and Reichelt, L. O.	Supporting Arbor.
1861574	do	Larson, H. W. and Patchen, R. H.	Material Working Apparatus.
1861851	o	Gilbert, J. J	Submarine Signaling Cable.
1861945	do	Ward, H. L	Method of Producing Composite Articles.
1861990	do	Troche, E. R	Apparatus for Handling Strand Material.
1862005	do	Cherry, G. L. and Troche, E. R.	Apparatus for Sheathing Cores.
1862458	do	Barstow, J. M	Measuring Apparatus.
1862519	June 14, 1932	Brown, H. G. W	Time of Day Announcing System.
1862532	do	Ferguson, J. G	Telephone System.
1862536	do	Hartley, G. C. and Wright, E. P. G.	Tandem Trunk Circuits.
1862537	do	Hatton, W. and Sano, K. M	Time Measuring Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1862540	June 14, 1932	Koll, H. M	Carrier.
1862549	do	Raymond, R., and Scully, W. J.	Telephone System.
1862551	do	Rosander, A. P., and Tikalsky, F. P.	Apparatus for Actuating the Cores of a Die Casting Machine.
1862552	do	Schlenker, V. A	Acoustic Device.
1862554	do	Smythe, E. H	Do.
1862556	do	Welhaven, E	Tool.
1862559	do	White, J. H. and Wahl, C. V.	Workable Magnetic Compositions Containing Principally Iron and Cobalt.
1862569	do	Gargan, J. O	Remote Control Device.
1862570	do	Given, F. J	Electrical Condenser.
1862571	do	Goff, H. W	Terminal Strip.
1862578	do	Murphy, P. B	Signaling System.
1862582	do	Schlenker, V. A	Acoustic Device.
1862583	do	Skriba, R. A	Abrading Apparatus.
1862587	do	Almquist, M. L	Signaling Arrangement for Telephone Systems.
1862591	do	Fisher, D	Conduit Threader.
1862595	do	Holden, W. H. T	Voltage Regulator.
1862598	do	Livermore, W. T	Reeling Device.
1862608	do	Schimming, H. H	Arrangement for Producing Modulated Currents.
1863048	do	Hayford, W. S	Method of Joining Wires.
1863072	do	Smythe, E. H	Sound Radiator and Method of Making the Same.
1863073	do	do	Method and Means for Tensioning and for Mounting Diaphragms.
1863086	do	Curley, T. V	Telephone System.
1863089	do	Field, J. C	Remote Control System.
1863137	do	Keckler, C. E., and Hague, A. E.	Time of Day Announcing System.
1863139	do	Massonneau, R. F	Do.
1863141	do	Prince, W. B	Do.
1863225	do	Krum, H. L	Electric Selector Mechanism.
1863292	do	Whitney, W	Telephone System.
1863307	do	Hovland, H	Telephone Exchange System.
1863308	do	Jones, W. C	Receiver.
1863309	do	Kitts, H. L	Motion Picture Projector.
1863322	do	Bennett, A. F	Telephone Pay Station.
1863330	do	De Vriendt, C	Telephone Exchange System.
1863342	do	Kelly, M. J	Electron Discharge Device.
1863384	do	Terry, R. V	Lens Tube Adjusting Appliance.
1863411	do	Nachumsohn, I	Remote Control Selective Mechanism.
1863651	June 21, 1932	Chapman, A. G	Apparatus and Method for Remedying Crosstalk.
1863655	do	Hamilton, B. P	Means for Reducing Lightning Interference in Carrier Telegraph Systems.
1863671	do	Pitts, F. B., Garlinger, M. T., and Smith, T. C.	Cable Laying Apparatus.
1863674	do	Thorp, V. P	Means for Reducing Lightning Interference in Carrier Telegraph Circuits.
1863675	do	do	Do.
1864054	do	Elmen, G. W	Magnetic Material.
1864061	do	Gooderham, J. W	Telephone Ringing System.
1864074	do	Krum, H. L	Telegraph Signaling System.
1864076	do	Legg, V. E	High Frequency Furnace.
1864082	do	Massonneau, R. F	Telephone Exchange System.
1864088	do	Morton, S	Selecting Mechanism.
1864091	do	Parsons, I. H	Method and Means of Testing Photographic Developers.
1864524	June 28, 1932	Bragg, H. E	Telephone System.
1864527	do	Castner, T. G	Measuring Apparatus.
1864528	do	Crawford, A. I., and Glass, M. S.	Vacuum Bulb Mounting.
1864535	do	Hach, C. A., and Sanborn, F. A.	Chair.
1864543	do	Horton, J. W	Frequency Measuring Circuits.
1864547	do	Morton, E. R., and Stoller, H. M.	Incandescent Lamp.
1864553	do	Quass, R. L	Telephone System.
1864558	do	Seeley, G. A	Strand Supplying and Distributing Apparatus.
1864645	do	Edwards, W. H	Telephone Signaling System.
1864646	do	do	Telephone Signaling Arrangement.
1864670	do	Reynolds, F. W	Electro-Optical System.
1864676	do	Smith, T. C., Freeman, A. E., and Livermore, W. T.	Cable Reel Trailer.
1864955	do	Stokely, R. L	Telephone Exchange System.
1864963	do	Vadersen, H	Electron Discharge Device.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1864981	June 28, 1932	Curtis, A. M.	Circuit Breaker for Motors in Signaling Systems.
1865004	do	Haring, H. E.	Reference Electrode.
1865005	do	Harrison, H. C.	Power Transmitting Mechanism.
1865028	do	Mallina, R. F.	Film Editing System.
1865136	do	Potts, L. M.	Synchronizing System.
1865165	do	Bjornson, B. G.	Transmission Control Circuits.
Des. 87286	do	Bescherer, E. A., and Zitzman, A.	Combined Table and Cover for Telegraph Printer.
1865516	July 5, 1932	Gray, F.	Glow Discharge Lamp.
1865571	do	Kline, W. H.	Means for Eliminating Interference in Grounded Telegraph Systems.
1865593	do	Singer, F. J.	Do.
1865600	do	Welch, P. V.	Multi-Switch Coupling.
1866095	do	Foley, E. J.	Cutting Tool.
1866097	do	Gaetje, J. H., and Santschi, A. E.	Electrical Heating Device.
1866100	do	Hach, C. A.	Coating Apparatus.
1866101	do	Hach, C. A., and Hoag, C. L.	Apparatus for Shaping Saw Teeth.
1866102	do	Hach, C. A.	Do.
1866120	do	McWilliams, W. W.	Tool for Handling Clamping Members.
1866123	do	Neighbors, C. C.	Magnetic Material, Method of Making the Same and Articles Made Therefrom.
1866128	do	Pfeiffer, C. L.	Clutch.
1866142	do	Waters, D. V.	Apparatus for Handling Material.
1866250	do	Curtiss, N. A.	Method of Forming Cables.
1866260	do	King, G. V., and Bonomi, F. A.	Telephone System.
1866261	do	Lutomirski, K.	Signal Transmission System.
1866272	do	Seeley, G. A.	Cable Forming Apparatus.
1866274	do	Stoller, H. M.	Resilient Support.
1866275	do	Stoller, H. M., and Morton, E. R.	Speed Regulator.
1866403	do	Elmer, L. C.	Phonograph Recorder and Reproducer Arm.
1866533	July 12, 1932	Horton, J. W.	Vacuum Tube Mounting.
1866592	do	Bjornson, G. B.	Voice Operated Repeater Circuit.
1866593	do	Dahl, J. F., and Carpenter, W. W.	Call Distributing System.
1866601	do	Rendall, A. R. A., and Sandeman, E. K.	Compensating for Distortion in Transmission.
1866603	do	Schlenker, V. A.	Acoustic Device.
1866604	do	Siegmund, H. O.	Electrolytic Device.
1866606	do	Warner, L. C.	Time of Day Announcing System.
1866611	do	Affel, H. A.	Concentric Conducting System.
1866631	do	Dorff, L. A., and Sandalls, G., Jr.	Magneto-Optical Device.
1866669	do	Rhodes, W. A.	Impulse Transmitter.
1866924	do	Cioffi, P. P.	Magnetic Material.
1866925	do	do	Do.
1867333	do	Smith, E. M.	Telegraph Exchange Switchboard.
1867340	do	Weinhart, H. W., and Hall, H.	Electro-Optical Apparatus.
1867350	do	Burchett, G. W.	Artificial Larynx.
1867356	do	Friis, H. T.	Electric Wave Translating System.
1867362	do	Lathrop, H.	Insulation of Metal Bodies.
1867368	do	Massonneau, R. F.	Testing System.
1867373	do	Morton, E. R.	Motor Control System.
1867380	do	Runyon, B. F.	Thermal Switch.
1867638	July 19, 1932	Weaver, A.	Telegraph Printer.
1867663	do	Garber, L. H., Hall, R. G., and Blackwood, C.	Arrangement for Producing Modulated Currents.
1867976	do	Kleinschmidt, E. E.	System of Signaling and Repeater Therefor.
1868090	do	Bostwick, L. G.	Sound Translating Device.
1868105	do	Hopper, F. L.	Apparatus for Measuring Reverberation Time.
1868296	do	Stokely, R. L.	Automatic Telephone System.
1868309	do	Carpenter, W. W., and Dahl, J. F.	Telephone System.
1868315	do	Ellis, W. C.	Continuously Loaded Conductor.
1868318	do	Greenidge, R. M. C.	Adjustable Inductance.
1868321	do	Harrison, H. C.	Sound Recording.
1868326	do	King, G. V.	Telephone System.
1868366	do	Pfannenstiehl, H.	Driving Mechanism.
1868369	do	Sailliard, J. H.	Sound Recording Machine.
Des. 87387	do	Eighmey, D. T.	Transmitter.
1868559	July 26, 1932	Bascom, H. M.	Relay.
1868579	do	Lane, E. Z.	Broad Band Audio-Amplifier.
1868585	do	Phelps, H. E.	Telephone System.
1869160	do	Marrison, W. A.	Piezo-Electric Resonator.
1869171	do	Rose, C. F. P.	Oscillation Generator.
1869175	do	Sprague, C. A.	Radio Clock Regulation.

Digitized by Google

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1869178	July 26, 1932	Thuras, A. L.	Sound Translating Device.
1869180	....do	Anderson, S. E	Transformer.
1869181	....do	Beck, W. O	Electric Test Connector.
1869184	....do	Burr, G. W	Jig.
1869194	....do	Gray, F	Electro-Optical System.
1869196	....do	Hibbard, F. H	Method of and Apparatus for Measuring Reverberation Time.
1869323	....do	Evans, P. H	Communication System.
1869458	Aug. 2, 1932	Bickelhaupt, C. O., and Penuel, C. E.	Do.
1869459	....do	Bostwick, L. G	Amplifying System.
1869466	....do	Cole, I. E	Voltage Limiter.
1869484	....do	Knoop, W. A	Peak Voltage Limiter.
1869515	....do	Shanck, R. B	Measurement of Attenuation and Noise.
1869870	....do	Stevenson, G. H	Filtering Circuits.
1869884	....do	Curtis, A. M	Testing Device.
1870271	Aug. 9, 1932	Wegel, R. L	Acoustic Device.
1870352	....do	Watson, E. F	Telegraph System.
1870392	....do	....do	Telegraph Printer.
1870396	....do	Abraham, L. G., and Staples, E. M.	Telephone Signaling System.
1871243	....do	Smythe, E. H	Acoustic Device.
1871266	....do	Gray, F	Electro-Optical Transmission.
1871269	....do	Hobrock, R. H	Method of Drying Materials.
1871272	....do	Jongedyk, R	Material Handling Apparatus.
1871278	....do	Powell, R. E	Method of Finishing the Edge of a Material.
1871304	....do	Clement, L. M	System of Space Discharge Tubes.
1871310	....do	Entz, F. S., and Bachelet, A. E.	Communication System.
1871317	....do	Gillis, R	Magnetic Core and Method of Making the Same.
1871321	....do	Hayford, W. S., and Moore, C. R.	Forming Tool.
1871339	....do	Pearson, A	Apparatus for Drying Parts.
1871347	....do	Stoller, H. M	Constant Speed Motor.
1871351	....do	Wentz, J. F	Entrance Die for Tanks.
1871356	....do	Butterfield, J. T	Electrical Contact.
1871361	....do	Curtis, A. M	Indicating Device.
1871383	....do	Miller, R. A	Sound Reproducing System.
1871391	....do	Robson, D. C	Strand Working Machine.
1871404	....do	Brown, L. H	Method of and Apparatus for Indicating Speed.
1871406	....do	De Turk, J. A., and Hanson, E. D.	Molding Apparatus.
1871408	....do	McDonough, J., and Rock, D. D.	Work Holding Fixture.
1871414	....do	Liss, A. S	Feeding Device.
1871456	Aug. 16, 1932	Kivley, R. C	Method of and Apparatus for Treating Materials.
1871886	....do	Inglis, A. H., Goodale, W. D., Jr., and Dietze, E.	Sound Measuring System.
1871904	....do	Niles, E. W., and Edwards, W. H.	Frequency Converter.
1871906	....do	Nyquist, H	Concentric Shield for Cables.
1871916	....do	Pierce, R. E	Signal Monitoring Device.
1871923	....do	Singer, F. J., and Gardner, L. A.	Printing Telegraph System.
1871933	....do	Watson, E. F	Telegraph Printer.
1871944	....do	Best, F. H	Transmission Measuring System.
1871959	....do	Corderman, R. C	Transmission Regulator System.
1871967	....do	Edwards, P. G., and Henneberger, T. C.	Electrical Testing System.
1871986	....do	Hamilton, H. S	Method of and Means for Reducing Distortion of Vacuum Tube Amplifiers.
1873206	Aug. 23, 1932	Kleinschmidt, E. E	Selective System and Apparatus.
1873255	....do	Arnold, H. B	Power Line Carrier Telephone System.
1873268	....do	Bjornson, B. G	Transmission Control Circuits.
1873283	....do	Burton, E. T	Telegraph Repeater.
1873315	....do	Dreyer, C. F	Gauging Apparatus.
1873334	....do	Sarros, J. D	Power Line Carrier Telephone System.
1873346	....do	Siegmund, H. O	Method of Producing Switching Apparatus Parts.
1873357	....do	St. John, E	Grade Clamp.
1873387	....do	Gray, F	Electro-Optical System.
1873393	....do	Hallam, C. A	Method of and Apparatus for Separating Materials.
1873394	....do	....do	Do.
1873395	....do	Hallam, C. A., and Palmer, R.	Do.
1873411	....do	Ives, H. E., and Gray, F	Television.
1873429	....do	Knoop, W. A	Electric Current Distributing Device.
1873440	....do	Locke, G. A	Rotary Distributor Phasing Circuit.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1873470	Aug. 23, 1932	Peek, R. L., Jr., and Hippensteel, C. L.	Cable Armor.
1873477	....do....	Quarles, D. A.	Coaxial Conductor Transmission Line.
1873609	....do....	Locke, G. A.	Synchronous Signaling System.
1874191	Aug. 30, 1932	Ives, H. E.	Electro-Optical System.
1874200	....do....	Manderfeld, E. C.	Electro-Optical Image Producing System.
1874238	....do....	Callahan, V. T.	Fuel Control Mechanism.
1874242	....do....	Christopher, A. J.	Inductance Network.
1874271	....do....	Fracker, E. G.	Resilient Mounting for Electrical Devices.
1874281	....do....	Gilbert, J. J.	Submarine Signaling Cable.
1874307	....do....	Kemp, A. R.	Insulating Compound.
1874326	....do....	Mason, W. P.	Sound Muffler.
1874374	....do....	Sole, J. H.	Control System.
1874380	....do....	Stoller, H. M., and Morton, E. R.	Regulated Motor System.
1874466	....do....	Demarest, C. S.	Transmission Regulating System.
1874472	....do....	Edwards, W. H.	Party Telephone Signaling Arrangement.
1874492	....do....	Ganz, A. G.	Electric Wave Transmission.
1874530	....do....	Holden, W. H. T.	Transmission Regulating System.
1874537	....do....	Jaycox, E. K.	Manufacture of Vacuum Devices.
1874543	....do....	Kent, R. J.	Cable Car.
1874550	....do....	Kuhn, J. J.	Phonograph Record Turntable.
1874563	....do....	Martin, DeL. K.	System for Producing High Voltage Direct Currents.
1874664	....do....	Vernam, G. S.	Multiplex Telegraphy.
1874684	....do....	Wright, E. P. G.	Telephone System.
1874698	....do....	De Turk, J. A.	Molding Machine.
1874707	....do....	Oswald, A. A.	Electric Discharge Apparatus.
1874716	....do....	Stoller, H. M.	Electric Regulator.
1875156	....do....	Roberts, L. C.	Method and Means for Producing Loss Varying with Energy Level.
1875157	....do....	....do....	Compression and Expansion of Range of Energy Level.
1877872	Sept. 20, 1932	Hollman, H. E.	Production of Short Electric Waves.
1878147	....do....	Ives, H. E.	Electro-Optical Transmission.
1878152	....do....	Kleinschmidt, E. E.	Printing Telegraph.
1878711	....do....	Reynolds, F. W.	Electro-Optical Transmission System.
1878724	....do....	Stevens, W. A.	Generating and Modulating Apparatus.
1878936	....do....	Legg, V. E.	Refining of Copper.
1879741	Sept. 27, 1932	Haines, W. T.	Telephone System.
1879746	....do....	Holden, W. H. T.	Submarine Concentric Conductor System.
1879773	....do....	Swart, L. K.	Electrical Protective System.
1880285	Oct. 4, 1932	Scheppman, W.	Wireless System.
1880311	....do....	Boose, H. B.	Printing Telegraph System.
1880412	....do....	Burton, E. T.	Transformer.
1880425	....do....	Flanders, P. B.	Measurement of Mechanical Impedance.
1880511	....do....	Soreny, E.	Mounting for Electrical Devices.
1880676	....do....	Beck, W. O.	Circuit Controlling Device.
1880714	....do....	Bjornson, B. G.	Gas Filled Tube Circuits.
1880715	....do....	Bjornson, B. G., Horton, A. W., Jr., and Norwine, A. C.	Transmission Control Circuits.
1880727	....do....	Blood, H. L.	Fluid Actuated Device.
1880728	....do....	Blount, H.	Drilling Mechanism.
1880729	....do....	....do....	Lapping Mechanism.
1880746	....do....	Bouton, G. M.	Lead Alloy.
1880764	....do....	Buckley, O. E.	Submarine Signaling Cable.
1880765	....do....	Bureau, A. A., and Burk, E. P.	Portable Platform or Skid.
1880794	....do....	Carter, H. F.	Apparatus for Preparing and Distributing Material.
1880800	....do....	Chestnut, R. W., Terry, D. M., and Kannenberg, W. F.	Regulating Circuits.
1880805	....do....	Christopher, A. J.	Inductive Device.
1880806	....do....	Cioffi, P. P.	Heat Treating Furnace.
1880809	....do....	Clarke, H. R.	Spool for Electrical Devices.
1880833	....do....	Crawford, A. I.	Electron Discharge Device.
1880889	....do....	Doba, S., Jr.	Signal Transmission, System.
1880917	....do....	Eastlake, W. H.	Method of and Apparatus for Coating Materials.
1880942	....do....	Erickson, E. C.	Photographic Recorder.
1881018	....do....	Cary, M. C.	Coiling Apparatus.
1881019	....do....	McFarland, R. E.	Winding Apparatus.
1881020	....do....	....do....	Material Slitting Device.
1881273	....do....	Haigh, L. B., and Borger, H. E. A.	Telephone System.
1881460	Oct. 11, 1932	Fry, J. R.	Relay.
1881469	....do....	Gastonguay, A., and Puller, G.	Motion Picture Projector.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1881480	Oct. 11, 1932	Gilbert, J. J	Continuously Loaded Communication Conductor.
1881481	do	do	Duplex Telegraph System.
1881483	do	Gillett, G. D	Radio Transmission Systems.
1881499	do	Gorton, W. S	Submarine Cable Loading Coil.
1881501	do	Gosmann, E	Sound Reproducing System.
1881503	do	Graham, F. H	Mounting Frame for Electrical Apparatus.
1881515	do	Grimley, D. G	Transmission Circuit.
1881520	do	Gros, G. A	Composite Article.
1881524	do	Gustafsson, H. G	Guarding Device.
1881544	do	Hartley, G. C	Testing Device for Telephone Exchange Systems.
1881550	do	Hatton, W., Spann, R. D., Rousseau, E. J., and Larson, F. O. V.	Telephone System.
1881607	do	Hunt, A. E., and Lang, W. Y	Printing Telegraph System.
1881616	do	Ives, H. E	Electro-Optical Device.
1881621	do	Janicke, J	Strand Covering Apparatus.
1881633	do	Johnson, E. V	Overload Clutch.
1881639	do	Johnstone, H. G	Perforating Apparatus.
1881640	do	do	Tabulating System.
1881642	do	Jones, H. L., and Veazie, E. A.	Transmission Control Circuits.
1881657	do	Keith, C. R	Circuit for Electrical Discharge Apparatus
1881669	do	King, G. V., and Bonomi, F. A.	Telephone System.
1881684	do	Knoop, W. A	Synchronizing System.
1881685	do	do	Phase Shifting Device.
1881698	do	Kuriyama, Z	Electric Soldering Iron.
1881706	do	Larsen, E. J	Apparatus for Handling Articles.
1881711	do	Lathrop, H	Magnetic Structure.
1881785	do	Malm, F. S	Method of Cleaning and Vulcanizing Materials.
1881788	do	Manning, A. L	Apparatus for Securing and Bracing Articles for Transportation.
1881801	do	Mathes, R. C	Two-Way Signaling System.
1881810	do	Marrison, W. A	Frequency Control Method and System.
1881829	do	Miller, D. D	Electromagnetic Signaling Device.
1881830	do	Miller, R. J	Electrical Sound Reproduction of Gramaphone and Like Records.
1881868	do	Nelson, C. E	Magazining Device.
1881869	do	Nelson, I. S	Rolling Mill Guide.
1881887	do	Normann, L	Apparatus for Removing Material from Articles.
1881891	do	Olpin, A. R	Electric Discharge Device.
1882081	do	Kemp, A. R	Insulating Adhesive.
1882125	do	Edwards, P. G	Testing System.
1882150	do	Kent, R. J	Manhole Guard.
1882718	Oct. 18, 1932	Arkema, H. P., and Trebes, B. M. A.	Reel.
1882753	do	Bowne, L. J	Telephone System.
1882755	do	Boynton, S. E	Method of Producing Assembling Fixtures.
1882757	do	Boynton, J. E	Method of Sealing Joints.
1882815	do	Haegele, O. P., and Paulson, C.	Apparatus for Testing Electrical Coils.
1882829	do	Hall, H	Relief Picture Viewing Screen.
1882849	do	Marrison, W. A	Frequency Control System.
1882850	do	do	Frequency Producer.
1882851	do	Matthies, W. H	Telephone System.
1882854	do	Mead, E. D	Mounting Frame for Electrical Apparatus.
1882866	do	Mathes, R. C	Signaling System.
1882885	do	Polkinghorn, F. A	Holder for Crystal Resonators.
1882892	do	Potts, L. M	System for Causing Impulses to Control the Production of Impulses of Different Frequency.
1882893	do	do	Sound Picture Camera.
1882902	do	Reichelt, L. O	Cable Forming Apparatus.
1882919	do	Robbins, C. W	Apparatus for Locating Objects.
1882924	do	Rock, D. D	Screw Driving Mechanism.
1882925	do	Rock, G. L	Method of Sealing Materials.
1882936	do	Ronci, V. L	Electron Discharge Device.
1882940	do	Rosander, A. P., and Tikalsky, F. P.	Die Casting Machine.
1882974	do	Schlenker, V. A	Acoustic Device.
1882981	do	Schreiber, L. J. J., Chevigny, G. P., and Lens, G. X.	Switching Mechanism.
1882985	do	Schroeder, W	Apparatus for Handling Material.
1882994	do	Schwerin, P	Electron Discharge Device.
1882998	do	Scott, J. W	Process of Refining Copper.
1883006	do	Shea, J. R	Apparatus for Working Material.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1883007	Oct. 18, 1932	Sheel, H.	Conveyer.
1883011	do	Shewmon, D. D., and Schroeder, W.	Method of and Apparatus for Securing Inclosure Elements on Containers.
1883043	do	Soreny, E.	Pouch.
1883060	do	Stull, J. S., and King, J. W.	Apparatus for Forming Articles.
1883098	do	Templeton, B. O.	Electrical Resistance Device.
1883111	do	Thurston, G. M.	Piezo-Electric Crystal Mounting.
1883116	do	Tomlinson, M. C. W.	Device for Determining the Condition of a Gas.
1883117	do	Tompkins, W. J.	Combined Floor and Cove Covering.
1883130	do	Troche, E. R.	Strand Handling Device.
1883137	do	Waller, L. R.	Switching Device.
1883140	do	Walter, R. C.	Rolling Mill.
1883155	do	Watson, K. M.	Method of Coating Electrical Conductors.
1883158	do	Ulrich, H. W.	Trunk Cicruit.
1883163	do	Van Voorhis, F., Jr.	Remote Control Device.
1883181	do	Weaver, L. L.	Material Advancing Apparatus.
1883269	do	Yonkers, E. H.	Electrical Conductor.
1883290	do	Ives, H. E.	Projection of Stereoscopic Pictures.
1883291	do	do	Do.
1884562	Oct. 25, 1932	Carr, J. O., and Benjamin, A. S.	Signaling System.
1884567	do	Catogge, J. J.	Telegraph Exchange System.
1884582	do	Crawford, A. I.	Vacuum Tube Socket.
1884675	do	Helsing, R. A.	Electric Wave Transmission System.
1884697	do	Horton, A. W., Jr.	Long Distance Telephone System.
1884711	do	Jensen, A. G.	Electric Wave Transmission System.
1884724	do	Keller, A. C.	Sound Box for Phonic Diaphragms.
1884743	do	Kleinschmidt, E. E.	Single Magnet Reperforator.
1884744	do	do	Repeating System and Apparatus.
1884745	do	do	Selective System and Apparatus.
1884753	do	Krum, H. L.	Keyboard Mechanism for Printing Telegraph Apparatus.
1884754	do	do	Printing Telegraph.
1884755	do	do	Coupon Printer.
1884760	do	Lake, R. A.	Mechanism for Feeding and Aligning Multiple Printed Forms.
1884807	do	Morton, S.	Keyboard Mechanism for Telegraph Apparatus.
1884844	do	Peterson, E.	Magnetic Wave Amplifying Repeater.
1884845	do	do	Magnetic Amplifier.
1885060	do	Cherry, G. L., and Lamplough, L. F.	Apparatus for Handling Treated Articles.
1885151	Nov. 1, 1932	Sterba, E. J.	Directive Antenna System.
1885168	do	Affel, H. A.	Concentric Conducting System.
1885195	do	Green, E. I.	Concentric Conductor Transmission System.
1885214	do	Almquist, M. L., and Thompson, A. C.	Signaling System.
1885299	do	Schramm, F. W.	Monitoring System.
1885632	do	Schelleng, J. C.	Oscillation Generator.
1885728	do	Keith, C. R.	Harmonic Generating and Selecting System.
1885798	do	Brand, S.	Transmission Regulation.
1885826	do	Holden, W. H. T., and Bonell, R. K.	System of Photography Employing Frequency Modulation.
1886808	Nov. 8, 1932	Herman, J.	Bias Control in Telegraph Communication.
1887172	do	Smith, T. C., and Spowart, J. B.	Combined Earth Boring Machine and Derrick Apparatus.
1887576	Nov. 15, 1932	Bollinger, H. M.	Telephone Pay Station Apparatus.
1887599	do	Nyquist, H.	Constant Current Regulation.
1888227	Nov. 22, 1932	Horton, A. W., Jr.	Volume Control System.
1888266	do	Herman, J.	Measurement of Crosstalk.
1888275	do	Larsen, L. O.	Electrical Apparatus and Method of Manufacturing It.
1888280	do	McCann, T. A.	Reduction of Interference.
1888288	do	Purdy, C. A., and Stockfleth, S. J.	Container and Its Method of Manufacture.
1888558	do	Latimer, K. E.	Method of and Means for Reducing Crosstalk in Cable Systems.
1889053	Nov. 29, 1932	Nelson, S. F.	Annunciator System.
1889083	do	Wintringham, W. T.	Frequency Stabilizing System.
1889106	do	Rattig, G.	Time Announcing System.
1889398	do	Bishop, J. S.	Electrical Coil and a Method of Manufacturing It.
1889421	do	Schwartzmann, H.	Do.
1889576	do	Snook, H. C.	Apparatus to Enable the Blind To Read.

List of unexpired patents owned or controlled by the American Telephone & Telegraph Co., Apr. 1, 1933—Continued

Patent no.	Date of issue	Inventor	Title
1890454	Dec. 13, 1932	Bruce, E.	Automatic Gain Control.
1890488	do	Arnold, H. B.	Remote Control System.
1890523	do	Marshall, T. A.	Telephone System.
1890543	do	Holden, W. H. T.	Current Suppressor.
1890561	do	Cash, C. C.	Telephone Circuit.
1890899	do	Capek, A., and Van den Broecke, F.	Telephone System.
1890904	do	Gent, E. W.	Translating Device.
1891241	Dec. 20, 1932	Pfannenstiehl, H.	Sound Picture System.
1891297	do	Wintringham, W. T.	Variable Gain Circuit Device.
1891299	do	Anderson, C. N., Taylor, E. R., and Wright, S. B.	Radio Telephone System.
1892253	Dec. 27, 1932	Schelleng, J. C.	Directive Antenna System.
1892279	do	Kemp, A. R.	Communication Cable.
1892284	do	Mathes, R. C.	Voice Operated Circuit.
1892352	do	Kleinschmidt, E. E.	Printing Telegraph Apparatus.
1892358	do	Morgenstern, O.	Electromagnetic Device.
Des. 88804	do	Lum, G. R.	Desk Stand for a Hand Telephone.
1893031	Jan. 3, 1933	Llewellyn, F. B.	Control Circuits for Space Discharge Devices.
1893302	do	Peterson, E.	Method of and Means for Controlling Electric Wave Amplifiers.
1893545	Jan. 10, 1933	Gannett, D. K.	Alternating Current Amplifier.
1893569	do	Thorp, V. P.	Reduction of Interference in Carrier Systems.
1894016	do	Blount, N.	Telephone Desk Set.
1894022	do	Cruser, V. I.	Container.
1894023	do	Dawson, W. L.	Circuits for Photoelectric Cells.
1894025	do	Dennison, L. I., and Dreyer, C. F.	Gauging Apparatus.
1894322	Jan. 17, 1933	Nyquist, H.	Means for Eliminating Distortion in Repeaters.
1894335	do	Zinn, M. K.	Phantom Telephone Circuit.
1894644	do	Sturdevant, E. G.	Method of Coating Metallic Bodies.
1894671	do	Cox, T. K.	Method of Coating Articles.
1894823	do	Hoyt, F. A.	Coin Receptacle.
1895020	Jan. 24, 1933	Bascom, H. M.	Telephone System.
1895058	do	Weaver, A.	Combined Telegraphy and Telephony.
1895441	Jan. 31, 1933	Bostwick, L. G.	Sound Translating Device.
1895461	do	Heising, R. A.	Combined Radio Telephone and Telegraph System.
1895462	do	Henning, G. E.	Braiding Machine.
1895463	do	do	Self-Aligning Strand Carrier for Braiders.
1895466	do	Kuntz, F. A.	Hinge.
1895487	do	Quinlan, A. L.	Method of and Apparatus for Constructing Electrical Coils.
1895488	do	Reisinger, J. C.	Power Driven Fan.
1895494	do	Smythe, E. H.	Sound Reproducer.
1895498	do	Stoller, H. M.	Electric Regulator.
1895531	do	Weaver, A.	Electro-Optical System.
1895542	do	Deardorff, R. W.	Pilot Channel Indicating System.
1895757	do	Gent, E. W.	Translating Device.
1895760	do	Hunt, F. L.	Fluid Treating Apparatus.
1895774	do	Smets, F. E. A., and Hansen, C. F.	Signal Shaping Circuit.
1895828	do	Van Inwagen, C. L., Jr.	Wire Splicing Machine.
1896065	Feb. 7, 1933	Budenbom, H. T.	Selective Circuit for Superheterodyne Radio Receivers.
1896195	do	Green, I. W., and Bisbee, F. C.	Electromagnetic Signaling Device.
1896196	do	Green, I. W.	Telephone Substation Apparatus.
1896464	do	Ronci, V. L.	Electron Discharge Device.
1896473	do	Townsend, J. R.	Article of Metallic Compositions or Alloys of Lead.
1896478	do	Burns, R. M.	Treating Wood and Preventing Corrosion of Cables.
1896480	do	Christopher, A. J.	Balanced Inductance Device.
1896485	do	Flint, J. G., and McKie, D. G.	Acoustic Device.
1896487	do	Gibson, R. D.	Calling Circuit.
1896510	do	Given, F. J.	Adjusting Inductance.
1896512	do	Hayford, W. S., and Moore, C. R.	Metal Rolling Tool.
1896513	do	Hovgaard, O. M.	Piezo-Electric Crystal.
1896757	do	Strickler, W. B.	Telephone Exchange System.

United States of America, before Federal Trade Commission. In the Matter of General Electric Co., American Telephone & Telegraph Co., Western Electric Co., Inc., Westinghouse Electric & Manufacturing Co., the International Radio Telegraph Co., United Fruit Co., Wireless Specialty Apparatus Co., and Radio Corporation of America. Docket No. 1115.

COMPLAINT

Acting in the public interest pursuant to the provisions of an act of Congress, approved September 26, 1914, entitled, "An Act To create a Federal Trade Commission, to define its powers and duties, and for other purposes", the Federal Trade Commission charges that the various persons, corporate and individual, mentioned in the caption hereof and more particularly hereinafter described and hereinafter referred to as respondents, have been and are using unfair methods of competition in commerce in violation of the provisions of section 5 of said act, and states its charges in that respect as follows:

PARAGRAPH 1. The General Electric Co. is (and was at all times hereinafter named) a corporation organized and doing business under the laws of the State of New York. Its principal place of business is in Schnectady, N. Y. It is engaged in the manufacture and sale in interstate and foreign commerce of apparatus intended for the generating and application of electric current to various purposes, including communication by radio or wireless waves. Prior to October 1919, and subsequently, it has employed a large staff of electrical experts in research and experiment with a view to developing new inventions, discoveries, and devices applicable to any of the various uses of electricity, including apparatus for radio communication, both transmitting and receiving. It was the owner of many patents and licenses or rights under patents for the manufacture, use, and sale of the articles above described and certain applications for patents covering important inventions for use in vacuum tubes used in radio communications. The General Electric Co. is the largest manufacturer of electrical apparatus, including devices used in radio communication, in the United States.

PAR. 2. The American Telephone & Telegraph Co. is a corporation organized and doing business under the laws of the State of New York. It has its principal place of business in New York City, State of New York. It is engaged principally in the transmission of telephone messages by wire from point to point in the United States. The Western Electric Co. is a corporation organized and doing business under the laws of the State of New York. It has its principal office and place of business in Cleveland, Ohio. It is engaged principally in the manufacture and sale, in interstate commerce and with foreign countries, of apparatus and devices used in wire telephony and in ether applications of electricity. A large majority of the stock of the Western Electric Co. was and is owned by the American Telephone & Telegraph Co. Prior to October 1919, and subsequently, the said American Telephone & Telegraph Co. and the Western Electric Co. maintained a large staff of experts in research and experiment with a view to developing new inventions, discoveries, and devices applicable to any of the various uses of electricity, including radio communication. Each of them was the owner of many patents and licenses or rights under patents, relating to such inventions and devices, and particularly of important patents relating to vacuum tubes as used in radio communication. The Western Electric Co. manufactured and sold in interstate commerce various articles under the patents of the American Telephone & Telegraph Co. and its own patents, including the aforesaid vacuum tube patents. The Western Electric Co. is one of the largest manufacturers of electrical apparatus, including apparatus used in radio communications in the United States.

PAR. 3. The Westinghouse Electric & Manufacturing Co. is a corporation organized and doing business under the laws of the State of Pennsylvania. It has its principal place of business in Pittsburgh, State of Pennsylvania. It is engaged principally in the business of the manufacture and sale, in interstate commerce and with foreign countries, of electrical apparatus for the generation of electric current and its application to various purposes. Prior to October 1919, and at all times hereinafter named, it maintained a large staff of experts in research and experiment with a view to deveolping new inventions, discoveries, and devices applicable to any of the various uses of electricity, including radio communication. It is the owner of many patents and licenses and rights

Digitized by Google

under patents relating to such inventions and devices, and particularly certain important patents covering inventions and devices known as the Armstrong "regenerator" and the Fessenden heterodyne patents, of primary importance in radio communication. The Westinghouse Electric & Manufacturing Company is the second largest manufacturer of electrical apparatus, including apparatus used in radio communication in the United States.

PAR. 4. The International Radio Telegraph Co. is a corporation organized and doing business under the laws of the State of Delaware. It is the successor of the International Radio Telegraph Co., having been organized under an agreement of May 22, 1920, between the latter and the Westinghouse Electric & Manufacturing Co. The earlier company had been engaged in the business of transmitting and receiving wireless messages in a limited field prior to the war, and of manufacturing under patents and selling radio apparatus in interstate commerce. The new company, the International Radio Telegraph Co., continued the business of radio communication.

PAR. 5. The United Fruit Co. is a corporation organized and doing business under the laws of the State of New Jersey. It has its principal place of business in New York City. It is engaged in the growing of fruit and the transportation thereof from Central and South America to the United States and the sale thereof, and in connection therewith operates a fleet of steamships. Prior to October 1919, and subsequently, it had in connection with its business, through its subsidiary, the Tropical Radio Telegraph Co., owned and operated stations for the sending and receiving of wireless communications between the United States and various points in the territory where it produced and shipped its products and was equipped with the necessary apparatus for such purposes. These stations were also open to the public for the receiving and transmission of wireless messages. Prior to October 1919, the United Fruit Co. and the Wireless Specialty Apparatus Co., another of its subsidiaries, had acquired and were the owners of various patents and licenses and rights under patents, for the use, manufacture, and sale of various important devices and apparatus useful in radio communication, especially broad patents covering the use of crystal receiving apparatus. It and its said subsidiary, the Wireless Specialty Apparatus Co., employed staffs of experts in research and exeriment with a view to developing new inventions, discoveries, and devices applicable especially to radio communication.

PAR. 6. The Radio Corporation of America is a corporation organized and doing business under the laws of the State of Delaware, having been incorporated on or about October 17, 1919, its principal place of business is in New York City.. Its capitalization was 5,000,000 shares preferred stock, par value $5, and 5,000,000 shares of common stock, no par value. It is engaged in conducting a public radio communication service between points in different States in this country and between ships and ships and shore, and between the United States and Cuba and foreign countries, and in the business of buying and selling apparatus and devices for use in radio broadcasting and receiving and radio communication and shipping the same among and between the States of the United States and to foreign countries.

PAR. 7. The Marconi Wireless Telegraph Co. of America was, prior to October, 1919, a corporation organized and doing business under the laws of the State of New Jersey. It had its principal place of business in New York City, State of New York, and was engaged in operating a transoceanic radio service and from ships to shore, and in the manufacture of apparatus and devices used in radio communication. It owned and operated stations at various points in the United States and elsewhere for the conduct of its business, equipped with the necessary apparatus therefor, and through its connection with the Marconi Wireless Co., Ltd., of Great Britain, the largest holder of its stock, was equipped for transoceanic radio traffic. It was the owner of various patents and licenses and rights under patents for inventions and devices used in radio communication, and it manufactured and sold various articles under said patents, including important patents relating to the manufacture and use of vacuum tubes in radio communication.

PAR. 8. Prior to this country's entering the war the General Electric Co., in connection with its research work in the radio field, had developed and constructed a powerful rapid alternating generator known as the Alexanderson generator. The efficiency of this machine in transoceanic communication by radio was demonstrated during the war. The movement for control of this machine and other patented radio devices not owned by General Electric Co.,

Digitized by Google

led to the organization of Radio Corporation of America as above alleged, by persons among whom the interests of General Electric Co. predominated. On or about October 22, 1919, the General Electric Co. entered into an agreement with the Marconi Wireless Telegraph Co. of America, whereby the latter agreed to seek the approval by its stockholders of a proposed agreement between the Radio Corporation of America and the Marconi Wireless Telegraph Co. of America, and the General Electric Co. agreed to cause the Radio Corporation of America to execute and deliver said proposed agreement as soon as approved by the stockholders of the Marconi Wireless Telegraph Co. of America. This proposed agreement provided substantially for the sale to the Radio Corporation of America of the assets of the Marconi Wireless Telegraph Co. of America, including its patents and physical assets and stock of various subsidiary corporations, in consideration of the issuance to it by the Radio Corporation of America of two million shares of its preferred stock and two million shares of its common stock, as more fully appears from said agreement. Thereafter, and on or about November 20, 1919, said proposed agreement between the Radio Corporation of America and the Marconi Wireless Telegraph Co. of America was executed and delivered. In connection with said negotiations and agreements, the General Electric Co. purchased the holdings of the Marconi Wireless Telegraph Co., Ltd., a British corporation, in the stock of the Marconi Wireless Telegraph Co. of America, for the Radio Corporation of America. In August 1919, the Marconi Wireless Telegraph Co. of America was dissolved, a trust, however, being created, with the corporation's directors as trustees, for the purpose of prosecuting claims of the corporation against the United States Government and accounting for any proceeds thereof. All the stock of the company has been exchanged for shares in the Radio Corporation of America, it being noted in the stock of the Marconi Co. so exchanged that it was entitled to share pro rata in any moneys resulting from the prosecution of said claims against the United States Government, and it was provided further that such moneys were to be invested in the preferred stock of the Radio Corporation of America.

PAR. 9. On or about October 22, 1919, the Radio Corporation of America agreed, by appropriate action of its directors, to issue to the General Electric Co., in consideration of its services and expenses in bringing about the purchase above described from the Marconi Wireless Telegraph Co. of America, and otherwise, 135,174 shares of preferred and 2,000,000 shares of the common stock of the Radio Corporation of America. Among the considerations referred to was the procuring of an agreement between Marconi Wireless Telegraph Co., Ltd., a British corporation, and the Radio Corporation of America, for the conduct of international transoceanic radio traffic. Prior thereto the former corporation (British Marconi Co.) had been the largest stockholder in the Marconi Wireless Telegraph Co. of America, and had entered into agreements and contracts with it covering the exchange of traffic facilities and all equipment and apparatus under patent rights. By said agreement between the Radio Corporation and the Marconi Wireless Telegraph Co., Ltd., all said agreements and rights of the Marconi Wireless Telegraph Co. of America under said contracts and agreements and specifically the agreement of April 18, 1902, were confirmed and continued to the Radio Corporation of America under an agreement executed on or about November 20, 1919 between the Marconi Wireless Telegraph Co., Ltd., and the Radio Corporation of America.

PAR. 10. On or about November 20, 1919, the General Electric Co. and the Radio Corporation of America made an agreement by which the General Electric Co. granted to the Radio Corporation of America the exclusive divisible license to use and sell (with certain reservations as to use) but not to make, unless the General Electric Company is not in a position to do so, apparatus for radio purposes under all patents, present or future, owned or controlled by the General Electric Co., for the term of the agreement, namely, until 1945. The Radio Corporation of America granted to the General Electric Co. the exclusive divisible right to make and sell radio devices through the Radio Corporation only, under all its patents, present or future, for the term of the agreement, except certain patents acquired by purchase, for which special provision for apportioning costs was made; and the Radio Corporation agreed to purchase from the General Electric Co. all radio devices covered by patents, which the General Electric Co. is in a position to supply, and not to sell patented articles except as a part of the radio system; and generally to restrict its business to radio supplies and not to enter with any patented device, process, or system, the field of

Digitized by Google

the General Electric Co. or encourage others so to do as more fully appears from said agreement. On December 31, 1922, the General Electric Co. owned 620,800 shares of the preferred stock and 1,876,000 shares of the common stock of the Radio Corporation of America.

PAR. 11. Said agreement of November 20, 1919, between the Marconi Wireless Telegraph Co., Ltd. (British), and the Radio Corporation of America recited the agreement of November 20, 1919, described in paragraph 10 between the General Electric Co. and the Radio Corporation of America; also that both companies (Radio and British Marconi) owned and controlled patented inventions in radio devices and intended to prosecute diligent research for improving same and producing others in order to establish economically world-wide public commercial wireless; that the Marconi Co. owns rights in all the Marconi radio patents for the British Empire and Marconi patents and inventions of its employees outside of the British Empire existing and in the future; whereupon it is agreed that the trans-Atlantic circuit of radio communication shall be maintained by the parties together and a traffic agreement entered into therefor between them, temporary provision being made for the division of tolls equally. The Radio Corporation then sells to the Marconi Co. for radio purposes only, all its patents and licenses, etc., existing or acquired during the term of the agreement, for the Marconi territory (except those acquired by purchase, as specially provided), and the Marconi Co. grants to the Radio Corporation (subject to previous grants) nonexclusive rights and licenses under its patents, present and future, for radio purposes, and the right to make and sell thereunder radio devices in the territory between the southern jurisdiction of the United States and the Republic of Panama and adjacent islands and regions. The agreement provides that the traffic agreement shall run to January 1945, and the British Marconi Co. agrees to transmit or receive over the circuit established by it and the Radio Corporation, every message sent or received by or to it, or any affiliated company or interest, which originates in or passes through or to Great Britain and is destined to or routed through or from the territory of the Radio Corporation, and, reciprocally the Radio Corporation agrees to transmit over said circuit every message sent or received by it or any affiliated company or interest which originates in or passes through or to the territory of the Radio Corporation and is destined or routed to or through or from Great Britain. The agreement of November 20, 1919, by which the licenses and rights of the Marconi Wireless Telegraph Co. of America under all the patents of the British Marconi Co. were transferred to the Radio Corporation of America and the grant above described of its patents for radio purposes by the Radio Corporation to the British Marconi Co. effected an interchange of licenses in all the patents now or during the term of the contract owned or controlled by the British Marconi and Radio Corporation pertaining to radio. The agreement provides for the maintenance of special departments by each of the parties for the diligent prosecution of research for the improvement of the radio art and for free exchange of information and patents relating thereto, all of which more fully appears by the terms of said agreement of November 20, 1919.

PAR. 12. On or about May 22, 1920, the Wetinghoue Electric & Manufacturing Co. entered into a contract with the International Radio Telegraph Co. (see par. 5) for the formation of a new company of the same name. The International Radio Telegraph Co. to take over patents and certain assets of the International Radio Telegraph Co. (the prior company) relating to apparatus for radio communication. The consideration for this contract was the payment by the Westinghouse Co. of $2,500,000 for one-half of the common voting stock of the new company. The purpose was that the new organization should enter the commercial radio communication field in a more comprehensive way and in pursuance of said purpose, the new company did construct and operate stations for the transmission and reception of radio messages at Cape May, N. J., and Siasconsett, Mass., and reopened or rehabilitated stations formerly operated by the old International Co. In connection with the contract of May 22, 1920, the old International Co. agreed to grant to the Westinghouse Co. the right to manufacture and sell radio devices and apparatus under all the patent rights to be transferred to the International Co., subject to the condition that it should not sell such devices or apparatus to business competitors of the International Co. for use in the latter's field. On or about June 29, 1921, the parties above named entered into an agreement which

Digitized by Google

recited that the International Co. had, by separate instruments, assigned to the Westinghouse Co. all of its existing patents and applications therefor, and that the International Co. granted to the Westinghouse Co. the exclusive, divisible right to make and to sell radio devices to the International Co. only, as well as the exclusive, divisible right to make use of and sell devices other than radio devices under all its future patents and applications for patents, inventions, and rights or licenses under, or in connection with, patents which the International Co. may require during the term of the agreement, namely until January 1, 1945, except as to certain patents acquired by purchase. The Westinghouse Co. granted to the International Co. an exclusive, divisible license to use and sell, as well as a nonexclusive, indivisible license to make only when the Westinghouse Co. is not in a position to supply the desired device with reasonable promptness, every radio apparatus under all patents, applications for patents, inventions, or rights and licenses under, or in connection with, patents which the Westinghouse Co. owns or may acquire during the term of the contract. The International Co. further agreed to purchase from the Westinghouse Co. all radio devices covered by said patents and the Westinghouse Co. agreed to produce the same. The International Co. agreed to use care not to enter, under any patent rights, into the field of the Westinghouse Co. or encourage others so to do. The parties also agreed to assist each other with scientific information and results of research of their engineers, in their respective fields. Among the patents so acquired by the Westinghouse Co. were patents covering important inventions for radio communication known as the Fessenden or heterodyne, all of which more fully appears from said agreement of June 29, 1921. On December 31, 1922, the Westinghouse Co. owned 1,000,000 shares of the common and 1,000,000 shares of the preferred stock of the Radio Corporation of America.

PAR. 13. On or about July 1, 1920, the General Electric Co. and the American Telephone & Telegraph Co. made an agreement by which each granted to the other, with certain reservations and restrictions, licenses under all patents and rights to or under patents, owned by each respectively, present and future, for the term of the agreement (namely, 10 years, unless previously terminated by consent of the parties) to use methods and processes, and to make, use, lease, sell, or otherwise dispose of apparatus, machines, and devices thereunder in the fields in which the licenses are granted to each respectively, but no rights are granted to either party to manufacture under patents, license for which are granted in said agreement, apparatus at the time manufactured by the other party, except in the factories of either party; the uses by each party to which said grants of licenses are restricted, in the fields of telephony and telegraphy, broadcasting and commercial communication, are carefully defined; certain fields of use and manufacture of radio apparatus under said licenses being granted to one party and others to the other. The American Telephone & Telegraph Co. acquired the exclusive right to manufacture and sell broadcasting transmitting apparatus for commercial purposes, and the General Electric Co. acquired the exclusive right to manufacture and sell receiving apparatus for noncommercial purposes. It is provided that when either party acquires rights to patents applicable to the fields of both, it must do so in such a manner that both parties shall be given an opportunity to acquire the patent, in their respective fields. Each party grants to the other a license for transoceanic wireless telephony, subject to the condition that the General Electric Co., so far as concerns service on this continent for the public and others than the General Electric Co., must render such service through only the telephone Company's wire or wireless telephone systems, so long as it supplies that service; and that the telephone company in the field of transoceanic wireless telephony, so far as concerns service for the public or for others than the telephone company, shall render such service through only the General Electric Co.'s system for transoceanic communication, so long as the latter supplies such system. It is agreed that information with reference to patents and inventions shall be exchanged and facilities mutually afforded for the development of wireless telephony, and that each party shall manufacture for the other certain apparatus covered by patents which are the subject of this agreement; as more fully appears from the said agreement of July 1, 1920. On December 31, 1922, the American Telephone & Telegraph Co. owned 400,000 shares of the preferred stock of the Radio Corporation of America.

PAR. 14. By an agreement dated July 1, 1920, between the General Electric Company, the American Telephone & Telegraph Co., the Radio Corporation

Digitized by Google

and the Western Electric Co., provision was made whereby the Telephone Co. could extend to the Western Electric and likewise the General Electric could extend to the Radio Corporation their respective rights under the agreement of July 1, 1920, described in paragraph 13, and the Western Electric Co. did extend to the General Electric Co. and the Radio Corporation of America grants to the American Telephone & Telegraph Co. rights under their respective radio patents, present and future, of the same character and scope as the rights granted between the General Electric Co. and the American Telephone & Telegraph Co. by the agreement of July 1, 1920, described in paragraph 13, and subject to similar reservations, limitations, and conditions as therein provided, as more fully appears from said agreement dated July 1, 1920, first named herein.

PAR. 15. On March 7, 1921, the Radio Corporation of America entered into an agreement with the United Fruit Co. by which the former granted to the latter a license to use the inventions and devices covered by its patents, present or future, relating to wireless communication or apparatus or devices in connection therewith. This grant was limited, however, to certain territory, defined in said agreement and being generally the territory in which said United Fruit Co. had previously operated in Central America and adjacent regions, and limited otherwise. The United Fruit Co. in said agreement granted to the Radio Corporation an exclusive license under its patents, reserving a right to license similarly, the Wireless Specialty Apparatus Co., to make or have made, use and sell radio devices under its own patents. The United Fruit Co. further agreed to limit its wireless communication business within its territory as defined in said agreement, and to purchase its supplies under the patents under which it is licensed by the Radio Corporation from the Radio Corporation, except at its option to purchase from the Wireless Specialty Apparatus Co. such apparatus as the latter is licensed to make. Provision is made for the exchange of information with reference to inventions and patents relating to wireless communications or apparatus and exchange of licenses under patents thereafter obtained; the agreement includes provisions for exchange of traffic, all of which more fully appears in the said agreement of March 7, 1921. Prior to the date of the agreement above described, namely, March 7, 1921, the United Fruit Co. had purchased 200,000 shares of the preferred stock (par value $5) and 200,000 shares of the common stock (no-par value) of the Radio Corporation for the sum of $1,000,000 cash. On December 31, 1922, the United Fruit Co. owned 160,000 shares of the common and 200,000 shares of the preferred stock of the Radio Corporation of America.

PAR. 16. On March 7, 1921, the Radio Corporation of America and the General Electric Co., parties of the first part, entered into an agreement with the Wireless Specialty Apparatus Co., being a subsidiary of the United Fruit Co., whereby the parties of the first part granted to the Wireless Specialty Apparatus Co. under all patents or patent rights owned by them then or thereafter, a nonexclusive license to manufacture and sell certain apparatus, specifically named, and excluding vacuum tubes, for use in radio communication, limited, however, to manufacture for sale to the United Fruit Co. or its subsidiaries for use under the license granted of even date, namely, March 7, 1921, by the Radio Corporation of America, to the United Fruit Co. (par. 15 above); and the Wireless Specialty Apparatus Co. granted to the parties of the first part an assignable license to make and use under all its patents having to do with radio communication or with apparatus or devices in connection therewith, present or future, reserving, however, the right to grant licenses to the United Fruit Co., the said agreement to continue until January 1, 1945, all of which more fully appears in said agreement of March 7, 1921.

PAR. 17. By letter of June 30, 1921, the American Telephone & Telegraph Co. and the Western Electric Co. agreed to the extension by the General Electric Co. and the Radio Corporation of America to the Westinghouse Electric & Manufacturing Co. of the rights under the licenses acquired or to be acquired under the agreement of July 1, 1920 (described in pars. 13 and 14), in consideration of the grant to the American Telephone & Telegraph Co. and the Western Electric Co. of licenses under the present and future patents and inventions of the Westinghouse Electric & Manufacturing Co., corresponding to rights granted by the General Electric Co. in the aforesaid agreement of July 1, 1920; the receipt of such grants from the Westinghouse Electric & Manufacturing Co. being acknowledged by the American Telephone & Telegraph Co. and the Western Electric Co.

Digitized by Google

PAR. 18. On June 13, 1921, an agreement was made between the Westinghouse Electric & Manufacturing Co., the Radio Corporation of America, and the General Electric Co. by which rights under the Armstrong-Pupin patents were extended by the Westinghouse Electric & Manufacturing Co., with the consent of the Radio Corporation of America, to the General Electric Co., and the terms of payment therefor by the Radio Corporation and the General Electric Co. were fixed.

PAR. 19. On June 30, 1921, the Radio Corporation of America entered into an agreement with the International Radio Telegraph Co. by which in consideration of the issuance to it by the Radio Corporation of America of 1,000,000 shares of its preferred and 1,000,000 shares of its common stock, the International Radio Telegraph Co. sold and assigned all of its assets and liabilities to the Radio Corporation, including its patents rights, and licenses under patents, real estate, and especially the right to the sum of $2,200,000 payable by the Westinghouse Electric & Manufacturing Co. to the International Radio Telegraph Co. in accordance with the terms and provisions of an agreement dated June 21, 1921, between said companies. (See par. 12 above.)

PAR. 20. By a letter dated March 9, 1921, the American Telephone & Telegraph Co. and the Western Electric Co., its subsidiary, assented to the grant by the General Electric Co. and the Radio Corporation of America of special licenses to the United Fruit Co., the Tropical Radio Telegraph Co., and the Wireless Specialty Apparatus Co. under the patent licenses acquired or to be acquired under the agreement of July 1, 1920, between the General Electric Co. and the American Telephone & Telegraph Co. (par. 14 above), on the condition of a grant to the American Telephone & Telegraph Co. and the Western Electric Co. by the United Fruit Co., the Tropical Radio Telegraph Co., and the Wireless Specialty Apparatus Co. of licenses under all United States patents now or hereafter owned or controlled by the United Fruit Co., Tropical Radio Telegraph Co., and the Wireless Specialty Apparatus Co.

PAR. 21. On or about March 14, 1923, the Radio Corporation of America procured from the Radio Engineering Co., a New York corporation, an assignable and divisible license to make, use, sell, and lease under certain patents owned by the Radio Engineering Co., with the right to the Radio Corporation of America, after 2 years, to take an assignment of these patents, all of which more fully appears from said agreement.

PAR. 22. On or about September 1922 the Radio Corporation of America entered into an agreement with the Federal Telegraph Co. of California to incorporate the Federal Telegraph Co. of Delaware for the purpose of carrying out certain agreements between the Federal Telegraph Co. of California and the Government of China executed on or about January 8 and September 20, 1921, for the construction, installing, and operation in China of a radio system for communication between this country and China; said agreement between the Radio Corporation of America and the Federal Telegraph Co. of California was for the term of 10 years and provided for the taking over by the Federal Telegraph Co. of Delaware of said contracts of January 8 and September 20, 1921, and the participation of the Radio Corporation of America in the carrying out of the agreement with the Federal Telegraph Co. of California with the Chinese Government on the basis of an equal share of the profits, the Radio Corporation to name the chairman of the board of directors, on which the Radio Corporation of America and the Federal Telegraph Co. of California were to have equal representations in number; the president of the Federal Telegraph Co. of California to be president of the Delaware corporation. By said agreement of September 1922 the Radio Corporation granted to the Delaware corporation, for the purpose of construction and communication under the Federal Co.-China contracts, a nonexclusive license under all its patents in the United States, to use in China for radio telegraphing purposes but not to make or sell, and the Federal Telegraph Co. of California granted to the Delaware corporation a similar license under its patents, all of which more fully appears from said agreements.

PAR. 23. On or about July 10, 1922, the Radio Corporation of America and the Postal Telegraph Co., a New York corporation, entered into an agreement by which the Postal Co. agreed to accept for and receive from the Radio Corporation messages, each to pay the other for its respective service tolls; the Radio Corporation agreed to tender the Postal Co., to be forwarded over its lines, all trans-Atlantic radio messages received by it or its connections

Digitized by Google

destined to points in the United States reached by the Postal Co., except where the Radio Corporation has its own facilities; it being provided that no traffic arrangement should be made with any other company where the Postal Co. has facilities except for ship-to-shore and ship-to-ship traffic, the Postal Co. agreeing to receive radiograms only of and from the Radio Corporation and not otherwise to be the forwarder of trans-Atlantic radio messages under any agreement for through radio telegraph service, all of which more fully appears from said agreement.

PAR. 24. On or about September 25, 1920, the Radio Corporation of America and the American Telephone & Telegraph Co. entered into an agreement for extracontinental radio traffic, which recites that the latter company in connection with its telephone system maintains some telegraph terminals and that the Radio Corporation purposes to establish transfer offices for the transfer of extracontinental radio telegrams between land lines and its radio stations; said agreement provides that the Radio Corporation may attach wires connecting its transfer offices with radio stations to poles of the American Telephone & Telegraph Co. at the same rates as commercial telegraph companies for use only for the transmission of the Radio Corporation's extracontinental radio telegraph messages, and transmission of its telegraph service and other messages at the Radio Corporation's expense, on the condition that the Radio Corporation shall not direct elsewhere a material part of its extracontinental traffic, all of which more fully appears from said agreement.

PAR. 25. Among the assets of the Marconi Wireless Telegraph Co. of America, acquired as hereinbefore alleged by the Radio Corporation of America, by an assignment dated on or about March 27, 1920, was an agreement entered into or about August 22, 1916, between the Marconi Co. and the Imperial Japanese Government, which provided for a mutual exclusive contract for the handling of traffic unless specially ordered otherwise by senders, and provided that rates are as cheap as elsewhere, and subject to the terms of the International Telegraph Convention of St. Petersburgh so far as compatible with said agreement, all of which more fully appears from said agreement.

PAR. 26. By various agreements by assignment from the Marconi Wireless Telegraph Co. of America, or directly with the Governments and/or companies having exclusive rights for the operation of radio communication from said Governments, respectively, of Germany, France, Sweden, Norway, and Poland, the Radio Corporation of America has acquired in the year 1920, and thereafter, exclusive and/or preferential traffic arrangements and/or exclusive or preferential arrangements for the exchange of patents and patent rights, relating to radio communication and the operation of same, respectively, as more fully appears from said agreements.

PAR. 27. By an agreement entered into on or about October 14, 1921, between the Radio Corporation of America and representatives of British, French, and German interests owning or controlling rights for the operation of radio communication in and with various territories of Central and South America, a trust was created of which the chairman was to be named by the Radio Corporation with power of veto, by which the parties agreed to communicate exclusively with the stations of the other parties and their affiliated companies in their respective territories and for traffic in the territory of the other parties with the consent of the respective parties, as more fully appears from said agreement.

PAR. 28. Since the organization of the Radio Corporation of America, the following respondents have been represented on the board of directors: General Electric Co., Westinghouse Electric & Manufacturing Co., American Telephone & Telegraph Co., and United Fruit Co.; and on December 31, 1922, the respondents named, with the exception of the American Telephone & Telegraph Co., were so represented.

PAR. 29. The Radio Corporation of America has, by appropriate action of its board of directors, caused to be published in connection with its radio apparatus offered for sale a so-called "patent license" containing restrictions as to the use thereof by purchasers, viz, to amateur and experimental purposes only and not for commercial purposes or sale, and not for use in circuits or sets made or assembled for commercial purposes; and has also provided that transmitting apparatus, not exceeding 2 kilowatts antenna input, and receiving apparatus may be leased to competing companies and others for communication only be-

Digitized by Google

tween ship and shore and vice versa, also for private use and not for tolls and not to resell, on condition that, other things being equal, the Radio Corporation should be given preference in routing business transmitted by such apparatus; also that apparatus not for external international communication purposes may be sold or leased, provided transmitting apparatus shall not exceed 2 kilowatts per antenna input; also that whenever possible, an agreement should be secured giving exclusive traffic connections to stations of the corporation and its affiliated companies; and that no licenses of whatsoever nature are to be granted for the manufacture and sale of vacuum tubes; also, its policy, as recommended by its board of directors, has been that apparatus sold for amateur, entertainment, and experimental purposes differ as widely as practicable from the designs of the apparatus sold or leased for other purposes, as "the best way in which to protect our licensees and enforce our restrictions" and to offer "just one more obstacle that nonlicensees will have to overcome."

PAR. 30. By reason of the facts and acts of the respondents set forth in the preceding paragraphs numbered 8 to 29, inclusive, the respondents have combined and conspired for the purpose and with the effect of restraining competition and creating a monopoly in the manufacture, purchase and sale, in interstate commerce, of radio devices and apparatus, and other electrical devices and apparatus, and in domestic and transoceanic radio communication and broadcasting by the following means:

(1) Acquiring collectively, directly, and indirectly patents and patent rights covering all devices and apparatus known to and used in any and all branches of the practice of the art of radio, and combining and pooling, by assignment and licensing, rights thereunder to manufacture and use and/or sell such devices and apparatus, competing and noncompeting, and allotting certain of such rights exclusively to certain respondents.

(2) Granting to the Radio Corporation of America the exclusive right to sell such devices and apparatus manufactured under said patents and patent rights and restricting purchases by the Radio Corporation of America of devices and apparatus useful in the art of radio to certain respondents and apportioning such purchases among them.

(3) Restricting the competition of certain respondents in the respective fields of manufacture and commerce of other respondents.

(4) Attempting to restrict and restricting the use for radio communication and/or broadcasting of articles manufactured and sold under said patents and patent rights.

(5) Acquiring the equipment heretofore existing in this country essential for transoceanic radio communication and perpetuating the monopoly thereof by refusing to supply to others apparatus and devices necessary for the equipment and operation of such service.

(6) Entering into exclusive contracts and preferential agreements for the handling of transoceanic radio traffic, and the transmission of radio messages in this country, thereby excluding others from the necessary facilities for the transmission of radio traffic.

(7) Agreeing and contracting among themselves to cooperate in the development of new inventions relating to radio and to exchange patents covering the results of the research and experiment of their employees in the art of radio, including patents on inventions and devices which they may obtain in the future, seeking thereby to perpetuate their control and monopoly of the various means of radio communication and broadcasting beyond the time covered by existing patents owned by them or under which they are licensed.

PAR. 31. The above alleged acts and practices of respondents are all to the prejudice of the public and of respondents' competitors and constitute unfair methods of competition in commerce within the intent and meaning of section 5 of an act of Congress entitled, "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes", approved September 26, 1914.

Wherefore, the premises considered, the Federal Trade Commission, on this 24th day of January, A. D. 1924, now here issues this its complaint against said respondents.

NOTICE

Notice is hereby given you, and each of you, General Electric Co., American Telephone & Telegraph Co., Western Electric Co., Inc., Westinghouse Electric & Manufacturing Co., the International Radio Telegraph Co., United Fruit Co.,

Digitized by Google

Wireless Specialty Apparatus Co., and the Radio Corporation of America, respondents herein, that the 14th day of March 1924, at 10:30 o'clock in the forenoon, is hereby fixed as the time, and the office of the Federal Trade Commission, in the city of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you shall have the right, under said act, to appear and show why an order should not be entered by said Commission requiring you to cease and desist from the violation of the law charged in this complaint.

In witness whereof, the Federal Trade Commission has caused this complaint to be signed by its secretary, and its official seal to be hereto affixed at Washington, D. C., this 26th day January 1924.

By the Commission; Commissioner Van Fleet dissenting.

OTIS B. JOHNSON, *Secretary.*

UNITED STATES OF AMERICA—BEFORE FEDERAL TRADE COMMISSION

At a regular session of the Federal Trade Commission, held at its office in the city of Washington, D. C., on the 31st day of January, A. D. 1928.

Present: William E. Humphrey, chairman; Abram F. Myers, Edgar A. McCulloch, Garland S. Ferguson, Jr., C. W. Hunt, commissioners.

In the matter of General Electric Co., et al. Docket No. 1115, order amending complaint.

The above cause coming on for hearing on this 23d day of January 1928, upon the motion by attorneys for the Commission to amend the complaint to conform to proof as follows:

Comes now counsel for Commission at the close of the Commission's case in chief and in order to conform to proof, moves the Commission to amend its complaint in this case by adding at the end of paragraph 30 the following:

"(8) Substantially lessened competition and tended to create a monopoly in the sale in commerce of unpatented parts of chassis, and of unpatented consoles and cabinets, and of other unpatented parts of radio devices and apparatuses which are made by various respondents and by agreements sold exclusively through and by respondent Radio Corporation of America."

And counsel for the Commission and for respondent being present and having presented arguments, and the Commission being duly advised in the premises, after full consideration.

It is ordered that the motion be and the same is hereby granted and the complaint is amended accordingly.

By the Commission:

[SEAL] OTIS B. JOHNSON, *Secretary.*

UNITED STATES OF AMERICA—BEFORE FEDERAL TRADE COMMISSION

At a regular session of the Federal Trade Commission, held at its office in the city of Washington, D. C., on the 19th day of December, A. D. 1928.

Commissioners: Abram F. Myers, chairman; Edgar A. McCulloch, Garland S. Ferguson, Jr., C. W. Hunt, William E. Humphrey.

In the matter of General Electric Co., et al. Docket 1115, order of dismissal.

This matter coming on to be heard on the motions of the respondents to dismiss the complaint herein as amended, and the Commission having heard oral argument in support of said motions and oral argument in opposition to said motions, and the Commission having considered briefs filed in support of and in opposition to said motions and the Commission being fully advised in the premises,

It is hereby ordered that the said motions be and the same are hereby granted, and that the said complaint as amended be and the same is hereby dismissed.

By the Commission:

[SEAL] OTIS B. JOHNSON, *Secretary.*

No. 147. REQUIRED REPORT

(Complying with Department's instruction of Dec. 19, 1933, with which was enclosed a memorandum specifying the revised periodic report requirements of the Department of Commerce.)

MOTION PICTURE NOTES FOR AUGUST 1935

From: Walter W. Orebaugh, American Vice Consul, Wellington, New Zealand. Date of Completion: September 10, 1935. Date of Mail Leaving: September 20, 1935.

Approved:

GEO. A. BUCKLIN,
American Consul General.

GENERAL

According to sources considered authoritative, a further improvement in aggregate theater revenue has materialized during the past 3 months. It is stated that the increase for all theaters is about 10 percent, but that a few are running as much as 30 percent ahead of receipts for the same period of last year.

To account for this improvement there is, of course, the better state of business in general, which has made significant progress, even during the usually slack winter quarter. But more particularly relevant is the fact that the motion pictures released for exhibition this year in New Zealand have as a class been definitely superior to the general average of those shown in previous years, and hence have attracted larger audiences.

Exhibitors throughout the Dominion are very pleased with this year's results and are looking forward with confidence to a continuation of good conditions.

STANDARD FILM-HIRE CONTRACT FORM

Exhibitors also have been cheered by the announcement that the standard film-hire contract form, which was gazetted on August 19 by the Minister of Internal Affairs under the Cinematograph Films Amendment Act, 1934, will govern all future contracts. This form, it will be remembered, has been sought by them for several years and was one of the principal factors which prompted the Government to institute a fact-finding investigation into the film industry as a whole, early in 1934. In the act referred to above, which was passed as a result of the Government's inquiry, the need for a standard film contract form was recognized, and a committee representing both exhibitors and exchanges was charged with the responsibility of framing a document mutually satisfactory. This was finally accomplished, although a few points not agreed upon were left for decision to the committee chairman, a stipendiary magistrate, who was delegated authority to rule on any outstanding issues.

While most of the exchanges in New Zealand feel that the realm of private industry has been unduly invaded, and that the contract form is yet another manifestation of a socialistically inclined government, it is not felt that they will suffer much hardship. It is indeed true that under the old individual contracts practically all responsibility was apportioned to the exhibitors, and that the distributors could more or less dictate whatever terms they chose to make.

It is now felt that the whole contract is placed on a more clearly defined and equitable basis and that responsibilities are shared about equally. Under the terms of the new contract there are alternative clauses fixing minimum prices. In the one most generally applicable, the exhibitor agrees to charge an admission price of not less than 1 shilling for adults and sixpence for children, except for matinees, at which the minimum charge may be set at threepence for children. The alternative clause stipulates a minimum of sixpence for adults and threepence for children in all instances. However, both these clauses are subject to legislation, which permits the lower minimum to be adopted only in the case of films over 2 years old. An important clause bears the practice of the giving away of any gifts which would have the effect, directly or indirectly, of reducing the admission price below the minimum set.

Copies of the standard film-hiring contract form as gazetted on August 19, 1935, are transmitted herewith.

Enclosure: Film-hiring contract form.

A true copy of the signed original. W. W. O.

POOLING OF PATENTS

SUPPLEMENT TO THE NEW ZEALAND GAZETTE OF THURSDAY, AUGUST 15, 1935

(Published by Authority.—Wellington, Monday, August 19, 1935)

FORM OF STANDARD FILM-HIRING CONTRACT APPROVED BY THE MINISTER UNDER THE CINEMATOGRAPH FILMS AMENDMENT ACT, 1934

WELLINGTON, *August 16, 1935.*

Pursuant to the provisions of section 10 of the Cinematograph Films Amendment Act, 1934, I hereby approve of the terms and conditions of the standard form of film-hiring contract as set out hereunder. I also approve of the use in practice of a printed form in which Parts A, B, and C of the said standard form of contract are printed in full and the provisions of Part D are included by reference in Part C to the gazetted copy of the said standard form. This approval shall be effective for a period of 12 months from date hereof.

J. A. YOUNG,
Minister of Internal Affairs.

STANDARD FILM-HIRING AGREEMENT

Agreement made this ____ day of _____, 19__, between _____, a company duly incorporated in _____, and carrying on business in the Dominion of New Zealand (hereinafter called "the renter"), of the one part, and _____, of _____, an exhibitor operating the _____ theatre at _____ (hereinafter called "the exhibitor"), of the other part, whereby it is agreed between the parties hereto as follows:

PART A.—EXHIBITION PERIOD

The renter agrees to hire and the exhibitor to take on hire for the purposes of exhibition the films contracted for herein on the dates specified or otherwise provided for in the Schedule hereto and in accordance with the provisions hereof. The period for the supply and the exhibition of the whole of the films contracted for shall extend from the ____ day of _____, 19__, until the ____ day of _____, 19__, but shall not in any event extend beyond the period or periods limited by section 37 of the Cinematograph Films Act, 1928, as modified by section 3 of the Cinematograph Films Amendment Act, 1929.

PART B.—SCHEDULE

This agreement refers to films released during the 19__–19__ film-renting season.

(NOTE.—These blanks must be filled in.)

Number of film(s)	Particulars	Number of screening days	Screening dates	Rental per film

Digitized by Google

Rider: The above films are feature films and sufficient short subjects shall be supplied with each feature film to be supplied hereunder to make up a programme of approximately 11,000 feet.

(NOTE.—This rider may be deleted or varied to suit the circumstances.)

PART C.—SPECIAL CONDITIONS

This agreement is made subject to the provisions of Part D hereof and the following special provisions [*Here insert special provisions, if any*]:

PART D.—PROVISIONS OF GENERAL APPLICATION

(1) *Supply and Classification of Films.*—(*a*) The films to be supplied are those designated either specifically or generally in the Schedule hereto.

(*b*) In so far as such films are not specified by title or other particulars then (subject to the provisions of paragraphs (*f*) and (*i*) of this clause) the renter shall, unless the parties by express stipulation otherwise agree, offer to the exhibitor for selection all the films which are required to be included in the statement required to be made by the renter pursuant to section 7 of the Cinematograph Films Amendment Act, 1934, with respect to the film-renting season in question.

(*c*) (i) If no express provision be inserted either in the said Schedule or elsewhere in this agreement for the classification of the said films, the same may be classified by the renter.

(ii) Provided, however, that unless identical terms of hiring shall apply to all films the subject of this agreement any differentiation of such terms shall be deemed to be a classification within the meaning of this provision.

(iii) Provided also that the renter shall include in the notice of availability of every released film offered to the exhibitor pursuant to this agreement an intimation of the classification of such film.

(iv) Provided further that, if the renter shall offer to the exhibitor a lesser number of films than are provided for by this agreement, the numbers of films stated in respect of each class shall be adjusted *pro rata*. If such adjustment should vary the classification of any picture already screened, and hire paid, or to be paid in respect thereof, the variation in the amount of such hire shall be adjusted retrospectively, the average rentals from the different classes being the basis of such adjustment, and the renter shall debit or credit to the exhibitor in account any deficiency or excess of hire ascertained upon such adjustment. In the event of any dispute, the matter shall be determined by arbitration.

(*d*) If during the film-renting season the renter releases or offers for release more films than are included in the statement required to be made to the Minister pursuant to section 7 of the Cinematograph Films Amendment Act, 1934, and if this agreement provides for the supply wholly or in part of unnamed or undescribed films, the unnamed or undescribed films to be made available to the exhibitor shall be the films released or offered for release in New Zealand which were first generally released in the country of origin, and in the case of any dispute as to which of those unnamed or undescribed films are included in this agreement, the matter shall be determined by arbitration.

(*e*) If the renter shall fail during the period of supply designated herein to offer to the exhibitor any named or specifically described film required to be so offered, which film is released in the country of origin in the film-renting season corresponding to that to which this agreement has reference, the renter agrees that if he releases such film during the next succeeding film-renting season, he will offer such film to the exhibitor, in the same relative priority in relation to other exhibitors in the city, town, or locality in which the exhibitor's theatre or theatres is or are situated, and upon the same terms, *mutatis mutandis*, as would have applied had the film been duly tendered during the period of supply under this agreement. Upon written notice of the availability of such film the exhibitor may within twenty-one days of such notice elect to take such film, and if he shall not within such period so elect, he shall be deemed to have waived his rights under this subclause. In the event of any dispute as to the season in which any such film was released in the country of origin the matter shall be determined by arbitration.

(*f*) Nothing in this agreement shall prevent the parties (in the event of their so agreeing by express provision in the said Schedule or elsewhere in this agreement) from conferring on the renter a right to reserve or withhold from the films which would otherwise be offered to the exhibitor pursuant hereto such number of films as may be designated in that behalf: Provided,

Digitized by Google

however, that if any of such films have been named or defined as in subclause (*b*) of this clause, then no reservation shall apply unless such film is adequately identified in the memorandum of reservation.

(*g*) Unless any of the said films is specifically contracted for first- or second-run exhibition, the renter shall not be under any obligation to supply the same until it has had first- and second-run exhibitions in the chief city or town of the provincial district in which the said theatre is situated.

(*h*) All films referred to in this agreement are to be of the standard size only (35 mm. width).

(*i*) Should the renter for any of the reasons hereinafter named be unable to deliver on the due date any of the films specified by title or other particulars herein or otherwise intended to be supplied hereunder, the renter shall, upon notifying the exhibitor, have the right either to select and supply some other film in lieu thereof or to reduce the number of films to be supplied to the extent that the renter is unable to deliver for any of the said reasons. In the event of the renter electing to supply a substitute film, it shall be optional on the part of the exhibitor whether he will accept the same by way of substitution, but he shall be deemed to have accepted if he fails within fourteen days after the receipt of notification to inform the renter of his rejection thereof; and in the event of his rejection the number of films to be supplied hereunder shall to that extent be reduced. The reasons for any of which the right conferred on the renter by this present paragraph (*i*) shall be deemed to arise are as follows:

(i) Any cause beyond the control of the renter.

(ii) The loss or destruction of the film, or such damage thereto as to render it unfit for exhibition.

(iii) If in the opinion of the renter the delivery of the film would or might involve the renter or the exhibitor in a suit, action, or proceeding by any person claiming any interest in copyright or any other right or interest affecting the film.

(iv) If difficulties arise between the renter or its suppliers on the one hand and any person holding or claiming to hold any interest in copyright or any other right or interest affecting such film on the other hand, which in the opinion of the renter may render it unprofitable or inexpedient from the point of view of the renter to deliver such film.

(*j*) Any change by the renter of the name or title of any film shall not by reason only thereof be deemed to constitute such film a substitute film.

(*k*) Subject, however, to the provisions of subclause (*c*) hereof, if the renter releases during the said film-renting season a lesser number of films than he contracts to supply hereunder, the exhibitor shall not be entitled to require the renter to make good the deficiency or any part thereof out of films which are acquired by the renter *bona fide* for release by the renter in a subsequent season.

(2) *Time and Place of Exhibition.*—The exhibitor agrees to exhibit the said films, but only at the theatre or theatres hereinbefore specified on the exhibition date or dates fixed in the said Schedule or determined as herein provided, and save with the consent of the renter not to allow any print thereof to leave the exhibitor's possession during the period specified for the exhibition thereof by the exhibitor, nor to exhibit or permit the exhibition of any such print at any other time or place. Unless otherwise provided herein, the exhibitor will not, without the written consent of the renter, exhibit any of the said films on any Sunday or between the hours of 11:45 p. m. on any day and 6 a. m. on the following day.

(3) *Designation of Play Dates.*—Unless the Schedule hereto designates the screening dates then, on the execution of this agreement or thirty days before the commencement of the exhibition period, the exhibitor may give written notice to the renter designating the dates during the first three months of such period on which he can take and exhibit a proportionate number of the films the subject of the contract, and he may give the like notice thirty days before each succeeding three months of such period. If the exhibitor fails to give any such notice the renter may designate the dates for exhibition of the said films during the relative three-monthly period, and in either case such designation shall be binding on both parties. No such designation of dates by the exhibitor shall entitle him to appropriate particular films to particular dates, the intention being that the renter shall determine the allocation of films to the dates so designated.

(4) *Payment Clause.*—(*a*) Flat Rentals: Subject in the case of percentage bookings to the special provisions specified in paragraph (*b*) hereof (which

Digitized by Google

shall be deemed to apply only to the percentage portion of the hire), the hire payable for each film, together with all advertising, freight, and other charges, shall be paid free of exchange to the renter not less than three days in advance of the date of despatch from renter's exchange or from the last previous exhibitor.

(*b*) Percentage Bookings: In any case where the hiring fee is to be computed entirely or in part upon the gross admission receipts of the said theatre, the exhibitor shall pay to the renter within seven days of the first authorized exhibition date, or if the exhibition period exceeds one week, then within seven days of the first authorized exhibition date in each respective week or part of a week, a sum equal to the proportion of the gross admission receipts aforesaid due to the renter, as well as all moneys which may be due and owing to the renter for freight, cartage, and other charges: Provided that, in any case where the hiring fee is to be so computed, the exhibitor shall, prior to the exhibition period of the film, or at any time during such period, if so requested by the renter, deposit with the renter in cash or otherwise to the satisfaction of the renter a sum of money based upon the estimated hiring fee or balance thereof, as the case may be, such estimated hiring fee or balance thereof to be determined by the renter. All moneys so deposited by the exhibitor may, at the option of the renter, be applied by the renter in or towards satisfaction of the hiring fee and other moneys due and payable to the renter for the film, and any surplus remaining shall be refunded to the exhibitor without unreasonable delay. The exhibitor hereby undertakes to supply to the renter immediately after the authorized exhibition period, and in a form satisfactory to the renter, a certified itemized statement of the daily gross admission receipts for the exhibition date or dates of each film for which payment is so required to be made. Upon such date or dates an authorized representative of the renter is hereby given the right to verify the sale of all tickets of admission to said theatre and receipts therefrom, and for such purpose shall have access to the theatre including the box-office and also access to and the right to examine at all reasonable times the exhibitor's books and records in so far as they relate to such gross receipts, including copies of returns furnished to taxation authorities for purposes of entertainment-tax for the purpose of verifying such box-office statement. The renter agrees that any information obtained by it pursuant to the provisions of this clause will be treated as confidential except in any arbitration proceedings or litigation in respect of this agreement. The words "gross receipts" used in this or any other part of this agreement mean gross receipts exclusive of entertainment-tax.

(*c*) Nothing herein contained shall impose any obligation on the exhibitor to make payment for any film which is not delivered in reasonable physical condition for projection and exhibition, and which for that cause he does not screen.

(*5*) *Unplayed Dates: Flat Rentals.*—If in the case of any of the said films in respect of which a flat hiring fee alone is payable the exhibitor fails to exhibit the same on the date or dates specified in the said Schedule and/or determined in accordance with the provisions hereof for any reason other than specifically mentioned in clause (25), the exhibitor agrees to pay the renter free of exchange the hire payable for such film, together with all advertising, freight, and other charges on the due date. On receipt of such payment the renter undertakes to grant the exhibitor a substitute exhibition date as shall be mutually agreed upon, but the exhibitor shall not be entitled in the case of such film to any priority of exhibition over other exhibitors that may be conferred upon him by this agreement.

(*6*) *Liquidated Damages: Percentage Hiring.*—If this agreement calls for payment computed either in whole or in part upon a percentage of the exhibitor's gross admission receipts, and if the exhibitor fails or refuses to exhibit such film as provided in this agreement, the exhibitor shall pay to the renter as liquidated damages for each day that the exhibitor fails or refuses to exhibit such film (in addition to any fixed sums payable hereunder in respect thereof) a sum equal to such percentage of the average daily gross admission receipts of such theatre on the corresponding days of the twelve weeks prior to the date or dates when such film should have been so exhibited: Provided, however, that if the exhibitor shall exhibit such film for less than the full number of days provided for in this agreement, such sum equal to such percentage shall for each day on which the exhibitor fails to exhibit the film be computed upon a sum equal to seventy-five (75) per cent of the gross receipts of the said

Digitized by Google

theatre for the last day of the exhibition thereat of such film. An itemized statement of the said daily gross receipts shall be delivered by the exhibitor to the renter upon demand therefor, and the renter shall have the same right of access and inspection as aforesaid.

(7) *Admission Prices.*—(*a*) The exhibitor agrees that he will charge a price for the admission to the theatre of not less than 1s. for adults and 6d. for children, except at matinees, when the minimum charge may be 3d. for children, and also except in the case of films designated in a list approved by the Minister for the purposes of this clause, in which case the minimum charge shall be 6d. for adults and 3d. for children; or

The exhibitor agrees that he will charge a price for admission to the theatre of not less than 6d. for adults and 3d. for children.

(NOTE.—Either of these alternative forms may be used at the discretion of the renter.)

(*b*) For the purposes of this clause a child shall be deemed to be a person under the age of fifteen years.

(*c*) The exhibitor further agrees with the renter that he will not do or offer to do any act, matter, or thing, or give or offer to give any benefit, inducement, advantage, gratuity, or other property to patrons of the said theatre which will have the effect, directly or indirectly, of reducing the charge for admission of any person below such minimum as aforesaid or of reducing the net result to the exhibitor in respect of the admission of such person below the minimum.

(*d*) In the event of any breach by the exhibitor of this clause the exhibitor shall pay to the renter by way of liquidated damages the sum of five pounds (£5) in respect of each exhibition in respect of which such breach is committed, but this provision shall be without prejudice to the exercise by the renter of any other remedy to which he may be entitled under these presents by reason of such breach.

(8) *Exhibition and Advertising.*—(*a*) The exhibitor agrees in any advertising to announce each film as "A [*mentioning the name of the producer*] picture", and to give full prominence to the trade-mark of the renter.

(*b*) The exhibitor shall not use any advertisement or publicity of which the renter has notified his disapproval in writing and shall indemnify the renter against any loss or damage suffered by the renter by reason of any breach of this obligation.

(*c*) No lithographic posters, photographs, slides, lobby displays, or other advertising accessories purchased, leased, or otherwise acquired by the exhibitor from or through the renter shall be sold, leased, lent, or given away by the exhibitor to any other person. Upon the breach or attempted breach of this provision by the exhibitor the right to the immediate possession of such advertising matter shall revert to the renter which may take possession of the same wherever found.

(*d*) The exhibitor agrees that not more than one other feature-length film is to be presented at the same performance with any feature-length film supplied hereunder.

(*e*) Nothing in this agreement shall preclude any special written agreement relating to advertising in any particular case.
