[CITATION: Sydney Brenner. (ca. 1972). Confidential handwritten letter from Sydney Brenner to Victor Rothschild re. genes, viruses, human virus experimentation in UK care homes Bodmer and Kevlin, Israel and Jewish populations., SB/1/1/561, Item No. 64627. CSHL Archives Repository. Reproduced for educational purposes only. Fair Use relied upon. Source: <http://libgallery.cshl.edu/items/show/64627>]

Dear Victor,

This is a good application, and there should be no doubt about the quality of Bodmer and Kevlin. The subject of the study ~~is~~ has more than academic interest because of the possible association between resistance to viruses, especially tumour viruses, and the immune response genes. The linkage of these ~~genes~~ genes to the histocompatibility locus has been proven in mice and is likely to be true in Man as well. Israel is a good country to study these and other problems in human genetics because of the peculiar structure of the Jewish population. I also think that the collaborative style is worth supporting ~~and also~~ even ~~although~~ though there is an additional ~~travel~~ requirement for travel money. I am however worried about taking on technicians for a short time and feel that you ought to have a certain arrangement there ought to be a defined arrangement for ~~them~~ them on grant completion. Similarly no student or post doctoral fellow should be taken on at a time when his expected tenure might overrun the termination date.

I hope this is what you want. £

Yours
Sydney

Dear Victor,

This is a good application, and there ~~should be~~ is no doubt about the quality of Bodmar and Kevlin. The subject of the study has more than academic interest because of the possible association between resistance to viruses, especially known viruses, and the immune response genes. The linkage of these genes to the histocompatibility locus has been proven in mice and is likely to be true in Man as well. Israel is a good country to study these and other problems in human genetics because of the peculiar structure of the Jewish population. I also think that the collaborative style is worth supporting ~~and also even although~~ though there is an additional ~~travel~~ requirement for travel money. I am however worried about taking on technicians for a short time and fell that ~~you ought to have a certain arrange~~ there ought to be a defined arrangement for ~~this~~ them on grant completion. Similarly no student or post doctoral fellow should be taken on at a time when his expected tenure might overrun the remuneration date.

I hope this is what you want.

Yours

Dear Victor,

This is a good application, and there ~~should be~~ is no doubt about the quality of Bodmer and Kohn. The subject of the study ~~is~~ has more than academic interest because of the possible association between resistance to viruses, especially tumour viruses, and the immune response genes. The linkage of these ~~with~~ genes to the histocompatibility locus has been proved in mice and is likely to be true in Man as well. Israel is a good country to study these and other problems in human genetics because of the peculiar structure of the Jewish population. I also think that the collaborative style is worth supporting ~~not only~~ even ~~though~~ though there is an additional ~~travel~~ requirement for travel money. I am however worried about taking on technicians for a short time and feel that ~~you ought to have a certain arrange~~ there ought to be a defined arrangement for ~~them~~ them on grant completion. Similarly no student or post doctoral fellow should be taken on at a time when his expected tenure might overrun the termination date.

I hope this is what you want. $\$$
