Wellcome news for Morocco

Tourism of animals in the
Agricultural Bank has
offered a special loan in the
amount of ＄10 million to
finance an export.

Mr. John Smith, the
Chairman of the Bank,
announced that the loan will
be used to finance exports of
livestock and poultry.

The loan is expected to
benefit farmers and traders
in the agriculture sector.

Opel’s splendid isolation

Opel and Vauxhall — the
German manufacturers —
have every intention of
remaining independent.

In a statement, Dr. Hans
Beck, the CEO of Opel,
confirmed that the company
has no plans to merge with
other manufacturers.

The decision comes amid
rumors of a possible
merger with General Motors.

The Beetle bows out

For the director,
with the most
attention.

The Beetle, a
popular model
since 1945,
has been
withdrawn from
production.

The car has
accumulated
over 60 million
units sold
worldwide.

The final
Beetle
was produced
in July 2019.

Wellcome news for Morocco Vaccination of animals in this country against foot and mouth when epidemics break out is not yet authorised.

Nevertheless, Britain plays a part in checking plagues by this method elsewhere.

Currently one is raging in Morocco, with an obvious risk that it could spread to Europe.

But one million doses of vaccine are being sent to that country from the laboratories of the Wellcome Foundation, in Pirbright, Surrey, which is the only unit in the world permitted to, produce vaccines against any strain of this disease.

The operation is being financed by the Food and Agricultural Organisation of the United Nations, which is also helping local authorities in Morocco, to control the outbreak.

Soon after it began, earlier in the year, Wellcome was able to grow the virus and then prepare and test the vaccine. The epidemic comes from an exotic strain of foot and mouth, against which cattle in Europe possess no immunity.

Britain has not had an outbreak of foot and mouth since the great epidemic of ten years ago.

Reproduced for educational purpose only. Fair Use relied upon.
