[Post Political Times](#)

The weblog of Richard Allan, sometime elected representative and long-time political blogger.

« [In Touch or Out of Touch](#)

[Meeting the Minister](#) »

[Patently Something](#)

In preparation for tomorrow's meeting on software patents at the DTI, I should be reading the [helpful information on the Protect Innovation website](#) but I have been distracted by a link sent by a friend to the [aptly named PatentlySilly site](#). This patenting business would be laughable if it weren't such a potentially serious threat to innovation and creativity.

This entry was posted on Monday, December 13th, 2004 at 1:57 pm and is filed under [General](#). You can follow any responses to this entry through the [RSS 2.0](#) feed. You can [leave a response](#), or [trackback](#) from your own site.

Good luck getting something out of the DTI tomorrow. I'd be there if it wasn't for work. Something you might want to look at before is a story on [slashdot about another attempt to ignore the European Parliament](#). I haven't had a chance to check out its significance/truthfulness yet.

Good luck getting something out of the DTI tomorrow. I'd be there if they'd ever confirmed my reply to their invitation.

I'm not going on the off-chance, as it's over 3 hours travelling on the day and I'm already going to be talking to politicians on Thursday - local politicians, trying to get them to refuse planning permission for felling of 221 trees in The Walks, King's Lynn.
