Technest Holdings Announces Agreement to Sell EOIR Subsidiary for up to $34 Million

September 14, 2007

BETHESDA, MD--(Marketwire - September 13, 2007) - Technest Holdings, Inc. (OTCBB: TCNH), a defense and homeland security company, announced today that it entered into a Stock Purchase Agreement with EOIR Holdings LLC, a Delaware limited liability company ("LLC"), pursuant to which Technest will sell EOIR Technologies, Inc. to LLC. LLC is an entity formed for the purposes of facilitating this transaction and is an affiliate of The White Oak Group, Inc., an Atlanta, Georgia-based private investment firm. The sale of EOIR to LLC will be structured as a stock sale in which LLC will acquire all of the outstanding stock of EOIR in exchange for approximately $34 million in cash, $11 million of which will be paid at closing and $23 million of which is contingent upon the successful re-award to EOIR of the contract with the U.S. Army's Night Vision and Electronics Sensors Directorate by December 31, 2009. The award of the NVESD contract is expected at the end of 2007 or early in 2008. Technest and LLC will complete the transaction when the conditions to closing are satisfied, including among other things, approval of the transaction by the stockholders of Technest. The board of directors of Technest voted unanimously in favor of this transaction. The board of directors of Technest was advised by Rodman & Renshaw, LLC who acted as a financial advisor to Technest and provided a fairness opinion to the Technest board as to the fairness of the consideration to be received by Technest. The board believes this transaction will add significant value to its shareholders.

A significant portion of the proceeds from the closing will be used to retire all of the outstanding commercial debt of Technest and EOIR. Technest then intends to distribute a majority of the contingent purchase price of $23 million that it receives upon the successful re-award of the NVESD contract to EOIR to its shareholders in the form of a dividend. The remaining portion of the proceeds will be used to continue Technest's investment in promising technologies in the field of 3-dimensional and advanced imaging where Technest holds 19 patents. After the sale of EOIR, Technest intends to focus on its core technical competencies in advanced imaging and detection and broaden its offerings into the health care and commercial markets.
