Justice Department Requires Key Divestiture in Election Systems & Software/Premier Election Solutions Merger

Divestiture Will Restore Competition in Voting Equipment Systems, Nine State Attorneys General Join in Department's Resolution

WASHINGTON — The Department of Justice announced today that it will require Election Systems & Software (ES&S) to divest voting equipment systems assets it purchased in September 2009 from Premier Election Solutions Inc. in order to restore competition. The assets to be divested include the means to produce all versions of Premier's hardware, software and firmware used to record, tabulate, transmit or report votes, including the Assure 1.2 system, and a license to better serve disabled voters. The department said that today's settlement will restore competition in voting equipment systems in the United States and that, without the divestiture, the acquisition would result in higher prices, lower quality and a reduced incentive to innovate.

The Department of Justice's Antitrust Division, along with nine state attorneys general, filed a civil antitrust lawsuit today in U.S. District Court in Washington, D.C., alleging that the transaction harmed competition. At the same time, the department filed a proposed settlement that, if approved by the court, would resolve the department's competitive concerns. The state attorney general offices are: Arizona, Colorado, Florida, Maine, Maryland, Massachusetts, New Mexico, Tennessee and Washington.

"The proposed settlement will restore competition, provide a greater range of choices and create incentives to provide secure, accurate and reliable voting equipment systems now and in the future," said Molly S. Boast, Deputy Assistant Attorney General for the Department of Justice's Antitrust Division.

According to the complaint, the acquisition substantially reduced competition as it combined the two largest providers of systems used to tally votes in federal, state and local elections in the United States. ES&S's acquisition of Premier made ES&S the provider of more than 70 percent of the voting equipment systems in the United States. The department said that because the cash value of the deal between ES&S and Premier was \$5 million, far below the mandatory reporting threshold for mergers under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, the department's investigation of the transaction did not begin until the companies had combined their assets and dismantled many of Premier's operating divisions. The department said that today's settlement provides quick, effective relief that resolves the department's competitive concerns, and enables local and state jurisdictions to obtain competitive bids for their immediate voting equipment systems needs.

Under the terms of the settlement, ES&S must divest all of the intellectual property associated with all versions –past, present and in development –of the Premier voting equipment systems to another company. ES&S also must divest all Premier tooling and fixed assets, as well as inventory of parts and components. In order to allow the divestiture buyer to better serve disabled voters, ES&S must also grant a fully paid-up, irrevocable, perpetual license to use the AutoMARK, ES&S's ballot marking device for which Premier had a limited license prior to the acquisition. The buyer of the divestiture assets will have the right to modify and improve both Premier products and the AutoMARK.

ES&S must sell the divestiture assets to a buyer approved by the department. The settlement prohibits ES&S from bidding on new voting equipment system contracts using the Premier equipment. The department also required that

ES&S grant the divestiture buyer an opportunity to compete to provide services to Premier customers currently under contract with ES&S, giving customers the option to switch to the divestiture buyer or to remain with ES&S. The department said that this option addresses customer concerns that an outright divestiture of service contracts would disrupt the administration of upcoming primaries and general elections. ES&S also must provide access to knowledgeable Premier employees and agree to offer a supply agreement to allow the divestiture buyer time to establish its own manufacturing of voting equipment systems.

The proposed settlement, if approved by the court, would be in effect for 10 years. The proposed settlement requires ES&S to complete the divestiture within 60 days, or five days after the entry of the proposed settlement by the court, whichever is later. The department may agree to the extension of this time period by no more than 60 days. If ES&S does not complete the divestiture within this time period, a trustee selected by the department and approved by the court will be appointed by the court to complete the divestiture.

ES&S is a Delaware corporation with its headquarters in Omaha, Neb. Prior to its acquisition of Premier, ES&S was already the largest provider of voting equipment systems in the United States, had systems installed in at least 41 states, and collected revenue of \$149.4 million in 2008.

Premier, prior to its acquisition, was a subsidiary of Diebold Inc. and was incorporated in Delaware with its headquarters in Allen, Texas. Premier was the second largest provider of voting equipment systems in the United States, had equipment installed in 33 states, and collected revenue of approximately \$88.3 million in 2008.

As required by the Tunney Act, the proposed settlement, along with the department's competitive impact statement, will be published in the Federal Register. Any person may submit written comments concerning the proposed settlement during the 60-day comment period to Maribeth Petrizzi, 450 Fifth Street, N.W., Suite 8700, Washington, D.C., 20530. At the conclusion of the 60-day comment period, the U.S. District Court for the District of Columbia may enter the proposed settlement upon finding that it is in the public interest.

Updated September 15, 2014

Scrap Corruption-ridden Electronic Voting – **Now!**

Finding: All prominent electronic voting systems in the U.S. (Smartmatic, Sequoia, Diebold, ES&S, Dominion and Hart InterCivic) are networked to the *same* software engine and controlled by the same financiers tied to George Soros and the Queen's Privy Council, thus making corrupt practices in U.S. elections a foregone conclusion. Lord Mark Malloch-Brown and Sir Geoffrey E. Pattie brag about their ability to "bend" elections, protected by the Queen.

Recommendation: In addition to the companies identified below, there are other companies trying to make voting secure with jpegs, separate validations, etc. on separate machines. However, no tech of any kind can maintain a "bipartisan chain of custody." The human eye cannot see silicon circuits, software induced voltages, and that which is hidden from empirical observation. We can only 'trust' the process and the people. Electronic voting offends the entire concept of our Republic -- which was formed on the concept that authority, being given from the "power of the people" who gain it directly from God, must be separated with jurisdictional boundaries so that the "tendency of men with too much authority to 'oppress'" can be muted by that separation. Centralizing the voting process so that the 'Fake News' can report a sensationalized and profitable result is pure idiocy. We the People should not trust government. We must insist at all times and under all circumstances that dual-Federalism is maintained. The job of the People is to ensure that the boundaries are maintained. We must all be mechanics of the Republic. The following voting machines must be scrapped immediately as the fruit of a poisoned tree called technocracy.

Chief Electronic Voting Scammers:

SMARTMATIC

2000 Founded in Venezuela
2004 28% Caesar Chavez-owned; offices in London UK, Caracas VZ, Boca Raton FL, Sunnyvale CA
2005 Purchased Sequoia; acquired **OpTech**
2006 Sold Sequoia-Smartmatic (US) to Smartmatic (UK)
2012 Smartmatic (UK) operated R&D labs in US, Brazil, Venezuela, Barbados, Panama, UK, Netherlands, UAE, Phillipines, Estonia and Taiwan.
2014 SGO (**Lord Malloch-Brown**) acquired Smartmatic (UK)

SEQUOIA

1960 Mathematical Systems Corp; punch cards
1970 Diamond National Corp acquired Mathematical
1983 Sequoia Pacific; acquired Diamond
1984 Sequoia Voting Machines formed from Diamond, Automatic Voting Machine Corp, **OpTech** license from Smartmatic
1997 Licensed OpTech software from Smartmatic
2005 Sequoia purchased by Smartmatic (UK)
2010 **DOJ-triggered** sale of Smartmatic to US investors (**Mitt Romney, Bain Capital, Booz Allen**), renamed company Sequoia
2011 Sold to Dominion (Canada)
2011 Filed Chapter 11 bankruptcy in US

DIEBOLD / ES&S / DOMINION

1974 Klopp Printing, Urosevich Bros, created **OpTech**; ally with Westinghouse Corp to sell Data Mark Systems
1979 Urosevich Bros and Westinghouse start American Information Systems
1997 America Info acquired ESD; renamed to Election Systems & Software (ES&S); licensed OpTech to Diebold (later renamed Premier)
1998 ES&S acquired Votronic fully electronic voting (DRE)
2006 Diebold rebranded to Premier Election Systems
2009 ES&S acquired Premier
2010 Dominion Voting Systems acquired Premier (formerly Diebold) in a **DOJ-triggered** anti-trust divestiture

HART INTERCIVIC

2000 Hart InterCivic spun off from Hart Graphics to focus on election systems
2010 **Mitt Romney, Bain Capital, Booz Allen** purchased Smartmatic (US); acquires **OpTech** license from **DOJ-triggered** sale; renamed it Sequoia
LORD MALLOCH-BROWN
2010 Avid introduced **LeaderPlus** Election Night Newsroom management suite
2012 Investec Plc, Malloch-Brown invested in **ISIS Management Limited (Investec Plc)**; Avid introduced **Avid Knowledge Base ISIS Management Console** - Agent Settings as complement to LeaderPlus; pushes Fake News scripts to MSM election news anchors in real time

How to steal an election with hidden software code, built in Venezuela, owned by Smartmatic's Lord Mark Malloch-Brown and Kamala Harris' husband's boss at DLA Piper Plc, Sir Nigel Knowles

Just one fraudulent "optech.exe" program embedded in the Dominion Voting machines' Microsoft Internet Information Service (IIS) can be used to alter the course of history. This is why paper ballots and unbroken, bipartisan chain of custody counting is the **ONLY** fix.

Just one vote fraud file like "optech.exe" installed with the Microsoft Internet Information (IIS) server is enough to run the program and control any number of Dominion voting machines attached to Microsoft IIS.

Georgia's Brad Raffesperger's joke of a hack test after the 2020 election would never find this "optech.exe" program because it would look like any other program in Windows—authorized by the administrator.

MEET MARIBETH PETRIZZI, DOJ ELECTION RIGGER – THE GREAT OPTECH SOFTWARE ANTITRUST RUSE

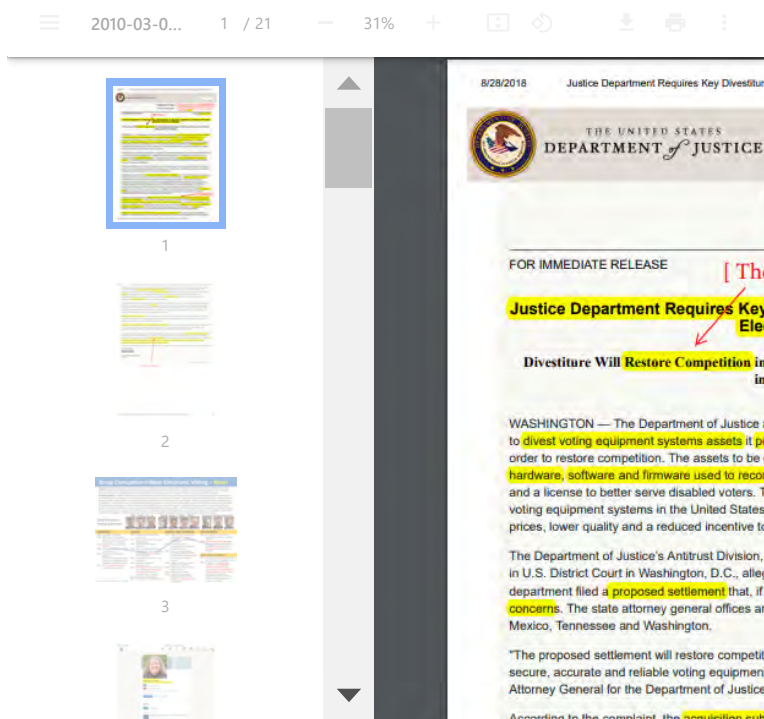

RIGGER, 2010 – THE GREAT OPTECH SOFTWARE ANTITRUST RUSE

Meet Maribeth Petrizzi, the Eric Holder DOJ staffer who handled this “restore competition” election machine ruse for Lord Mark Malloch-Brown and his sidekick George Soros

See Patrick Berne video: <https://rumble.com/v3kveyk-breaking-sep-24-2023-patrick-byrne-biggest-news-since-nov-3rd-2020.html>

Read the DOJ Ruse: Maribeth Petrizzi. (Mar. 08, 2010). Justice Department Requires Key-Divestiture in Election Systems and Software Premier Election Solutions Merger. Press Release. U.S. Dept. of Justice.

NOTE: This "reorganization" of the scanning software in ALL electronic voting machines in America occurred only **six (6) months** after **Hillary Clinton secret contracted with Facebook** for an "election winning template".

Hillary Clinton hid these election winning template contracts (starting 6 months after the **DOJ VOTING MACHINE OPTech SOFTWARE FIDDLE**) with Facebook in her private server; cut these deals while the *Leader v. Facebook* patent infringement lawsuit was in progress. **THIS IS HARD PROOF OF OBSTRUCTION OF JUSTICE ON ITS FACE.**

February 2009 – August 2010 (1 year 7 months)

Social Gaming:

Worked with Facebook's biggest advertisers to scale and optimize their performance marketing efforts. Managed the entire Zynga ads relationship as they grew to become Facebook's largest advertiser at the time. Helped industry leaders achieve record acquisition numbers and ROI.

Politics and November 2010:

Developed Facebook's political advertising go-to-market strategy for the November 2010 elections. Worked with agencies and campaigns and help them use Facebook Ads & Pages to drive awareness, persuasion, fundraising, and votes. Established a template for winning elections using advanced Facebook marketing.

Obstruction of Justice in *Leader v. Facebook*

Hillary Clinton & U.S. State Department paid \$120,000 to Facebook to supply "template for winning elections"—a.k.a. illegal election rigging by U.S. government officials

On Sep. 26, 2009, Hillary Clinton and the State Department signed a \$120,000 Contract No. SAQMMA09M1870 with Facebook to provide "Facebook pages to build an international community to discuss relevant issues of the day." The Facebook contact was Dmitry Shevelenko whose LinkedIn profile states that between Feb. 2009 and Aug. 2010 he was a Facebook Relationship Manager.

More specifically:[389] Interfering in U.S. elections is a criminal violation of the Hatch Act 5 CFR 733.106(d). [392]

Shevelenko on Hillary's contract:
"Established a template for winning elections using advanced Facebook marketing."

Dmitry Shevelenko,
Facebook "election winning" template manager

Dmitry Shevelenko LinkedIn Profile:

"Politics and November 2010:

Developed Facebook's political advertising go-to-market strategy for the November 2010 elections. Worked with [U.S. government] agencies and campaigns and help them use Facebook Ads & Pages to drive awareness, persuasion, fundraising, and votes. Established a template for winning elections using advanced Facebook marketing." [391]

MEET MARIBETH PETRIZZI, DOJ ELECTION RIGGER, 2010

Scrap Corruption-ridden Electronic Voting – Now!

Finding: All prominent electronic voting systems in the U.S. (Smartmatic, Sequoia, Diebold, ES&S, Dominion and Hart InterCivic) are networked to the same software engine and controlled by the same financiers tied to George Soros and the Queen's Privy Council, thus making corrupt practices in U.S. elections a foregone conclusion. Lord Mark Malloch-Brown and Sir Geoffrey E. Pattie brag about their ability to "bend" elections, protected by the Queen.

Recommendation: In addition to the companies identified below, there are other companies trying to make voting secure with jpegs, separate validations, etc. on separate machines. However, no tech of any kind can maintain a "bipartisan chain of custody." The human eye cannot see silicon circuits, software induced voltages, and that which is hidden from empirical observation. We can only "trust" the process and the people. Electronic voting offends the entire concept of our Republic – which was formed on the concept that authority, being given from the "power of the people" who gain it directly from God, must be separated with jurisdictional boundaries so that the "tendency of men with too much authority to oppress" can be muted by that separation. Centralizing the voting process so that the "Fake News" can report a sensationalized and profitable result is pure idiocy. We the People should not trust government. We must insist at all times and under all circumstances that dual-Federalism is maintained. The job of the People is to ensure that the boundaries are maintained. We must all be mechanics of the Republic. The following voting machines must be scrapped immediately as the fruit of a poisoned tree called technocracy.

Chief Electronic Voting Scammers:

8/28/2018 Justice Department Requires Key Divestiture in Election Systems & Software/Premier Election Solutions Merger | OPA | Department of J...

THE UNITED STATES DEPARTMENT OF JUSTICE

Department of Justice
Office of Public Affairs

[This nonsensical fiddle made it legal for Lord Mark Malloch-Brown, United Nations, George Soros aka Smartmatic aka Dominion aka Premier aka ES&S aka Premier to give all supposedly "competitive" voting system then and in the future the same core vote scanning software named OPTECH]

FOR IMMEDIATE RELEASE [The Ruse] Monday, March 8, 2010

Justice Department Requires Key Divestiture in Election Systems & Software/Premier Election Solutions Merger

Divestiture Will Restore Competition in Voting Equipment Systems, Nine State Attorneys General Join in Department's Resolution

WASHINGTON — The Department of Justice announced today that it will require Election Systems & Software (ES&S) to divest voting equipment systems assets it purchased in September 2009 from Premier Election Solutions Inc. in order to restore competition. The assets to be divested include the means to produce all versions of Premier's hardware, software and firmware used to record, tabulate, transmit or report votes, including the Assure 1.2 system, and a license to better serve disabled voters. The department said that today's settlement will restore competition in voting equipment systems in the United States and that, without the divestiture, the acquisition would result in higher prices, lower quality and a reduced incentive to innovate.

The Department of Justice's Antitrust Division, along with nine state attorneys general, filed a civil antitrust lawsuit today in U.S. District Court in Washington, D.C., alleging that the transaction harmed competition. At the same time, the department filed a proposed settlement that, if approved by the court, would resolve the department's competitive concerns. The state attorney general offices are: Arizona, Colorado, Florida, Maine, Maryland, Massachusetts, New Mexico, Tennessee and Washington.

"The proposed settlement will restore competition, provide a greater range of choices and create incentives to provide secure, accurate and reliable voting equipment systems now and in the future," said Molly S. Boast, Deputy Assistant Attorney General for the Department of Justice's Antitrust Division.

According to the complaint, the acquisition substantially reduced competition as it combined the two largest providers of systems used to tally votes in federal, state and local elections in the United States. ES&S's acquisition of Premier made ES&S the provider of more than 70 percent of the voting equipment systems in the United States. The department said that because the cash value of the deal between ES&S and Premier was \$5 million, far below the mandatory reporting threshold for mergers under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, the department's investigation of the transaction did not begin until the companies had combined their assets and dismantled many of Premier's operating divisions. The department said that today's settlement provides quick, effective relief that resolves the department's competitive concerns, and enables local and state jurisdictions to obtain competitive bids for their immediate voting equipment systems needs.

Under the terms of the settlement, ES&S must divest all of the intellectual property associated with all versions -- past, present and in development -- of the Premier voting equipment systems to another company. ES&S also must divest all Premier tooling and fixed assets, as well as inventory of parts and components. In order to allow the divestiture buyer to better serve disabled voters, ES&S must also grant a fully paid-up, irrevocable, perpetual license to use the AutoMARK, ES&S's ballot marking device for which Premier had a limited license prior to the acquisition. The buyer of the divestiture assets will have the right to modify and improve both Premier products and the AutoMARK.

ES&S must sell the divestiture assets to a buyer approved by the department. The settlement prohibits ES&S from bidding on new voting equipment system contracts using the Premier equipment. The department also required that

<https://www.justice.gov/opa/pr/justice-department-requires-key-divestiture-election-systems-software-premier-election>

1/2

conduct with ES&S, giving customers the option to either to the divestiture buyer or to remain with ES&S. The department said that this option addresses customer concerns that an outright divestiture of service contracts would disrupt the administration of upcoming primaries and general elections. ES&S also must provide access to knowledgeable Premier employees and agree to offer a supply agreement to allow the divestiture buyer time to establish its own manufacturing of voting equipment systems.

The proposed settlement, if approved by the court, would be in effect for 10 years. The proposed settlement requires ES&S to complete the divestiture within 60 days, or five days after the entry of the proposed settlement by the court, whichever is later. The department may agree to the extension of this time period by no more than 60 days. If ES&S does not complete the divestiture within this time period, a trustee selected by the department and approved by the court will be appointed by the court to complete the divestiture.

ES&S is a Delaware corporation with its headquarters in Omaha, Neb. Prior to its acquisition of Premier, ES&S was already the largest provider of voting equipment systems in the United States, had systems installed in at least 41 states, and collected revenue of \$149.4 million in 2008.

Premier, prior to its acquisition, was a subsidiary of Diebold Inc. and was incorporated in Delaware with its headquarters in Allen, Texas. Premier was the second largest provider of voting equipment systems in the United States, had equipment installed in 33 states, and collected revenue of approximately \$88.3 million in 2008.

As required by the Turney Act, the proposed settlement, along with the department's competitive impact statement, will be published in the Federal Register. Any person may submit written comments concerning the proposed settlement during the 60-day comment period to Maribeth Petrizzi, 450 Fifth Street, N.W., Suite 8700, Washington, D.C., 20530. At the conclusion of the 60-day comment period, the U.S. District Court for the District of Columbia may enter the proposed settlement upon finding that it is in the public interest.

United States elections 2005 – 2016

Achievements

- Over 35 million voters assisted in some 50 elections across the US
- More than 300 jurisdictions served in 17 States
- Some 57,000 voting and counting machines deployed
- Approximately 392,000 election devices deployed successfully
- 1st online voting experience in Utah – 2016 GOP Presidential Caucus

Smartmatic in the United States

In 2005, Smartmatic began participating in US elections through its subsidiary, Sequoia Voting Systems.

During the 2005 and 2006 election cycles, it provided technology and support services to more than 307 jurisdictions across 16 states: Arizona, California, Colorado, District of Columbia, Florida, Illinois, Louisiana, Michigan, Missouri, New Jersey, Nevada, Oregon, Pennsylvania, Virginia, Washington and Wisconsin.

Technology deployed

Type of device	Models	Quantity
Direct Recording Electronic Voting Machines (DRE)	(Advantage, Edge, Edge2P and Edge2Plus)	47,847
Precinct Count Optical Scanners (PCOS)	Eagle, Insight, NCS OpScan and Optech	10,728
Central Counting Optical Scanners (CCOS)	400C	34

After Smartmatic sold Sequoia Voting Systems, it continued offering maintenance and support services for the City of Chicago and Cook County in Illinois.

In recent years Smartmatic has deployed some of its most innovative technology like the ePen and online voting in California, Utah and Virginia.

Smartmatic technology for US elections

Smartmatic's R & D labs have produced technology which has facilitated voting, results transmission, vote tallying and other crucial tasks of election administration.

- **Edge2Plus** is our touchscreen voting machine specifically designed and manufactured for the US market. The Edge2Plus was sold in 2005 to the City of Chicago and Cook County, IL.
- **HAAT**. Our Hibrid Activator-Acumulator-Transmitter (HAAT) is a device we developed to help authorities consolidate data from different voting machines, print consolidation reports, and transmit precinct totals to a central tabulation center. HAAT is one of the more than twenty US patented inventions owned by Smartmatic.
- **ePen**. This digital pen includes a special camera that captures and digitizes every stroke performed, instantly translating handwritten information into digital format. The ePen can be used to improve many election processes. In 2015, the City of Richmond, VA, used the ePen to streamline the transmission of results. During the 2016 Primary Presidential Elections, three cities of the L.A. County, used the ePen to transmit results electronically to the County Clerk's Office.
- **TIVI** is an online voting solution built around the successful Estonian online voting system –the longest-standing and most advanced in the world. TIVI was used in 2016 during the Utah GOP Presidential Caucus. Online voting enfranchised Utahans from over 45 countries, including places as far as South Africa, Japan and French Polynesia.

Services

A successful election requires more than good technology. This is why Smartmatic offers a wide range of election support services that can guarantee efficient processes.

Technical Support

- Election configuration and setup, including: election database configuration, ballot style creation and precinct configuration.
- Testing and certification of election configuration: voting machine configuration (including DRE, PCOS and CCOS), ballot configuration testing, end-to-end system testing and certification.
- Remote technical support to service personnel on-site during the installation and deployment of the election system.
- On-site technical support during election day to certain counties, including: Illinois (Chicago/Cook), California (Santa Clara), Nevada (Douglas), Colorado (Denver, Arapahoe), and Arizona (Maricopa).

Chicago and Cook County in Illinois

For these two important jurisdictions, we also provided the following services:

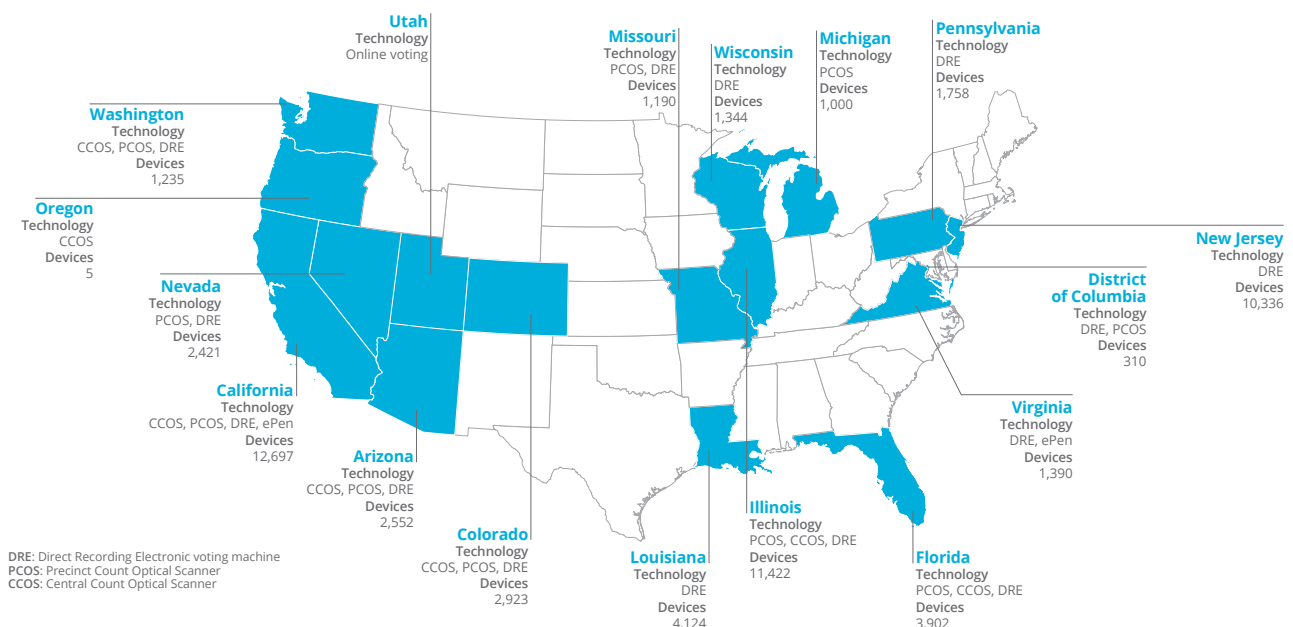

- Sale, manufacture and set up of the voting machines and vote transmission platform
- Installation of Data Centers and a system for election management and configuration
- Election configuration and end-to-end testing
- Support during all phases of the election (pre-election, early voting, election day and tally)
- Field support to operators
- Maintenance of hardware and software

Smartmatic manufactured - US Certified

As required by the law, Smartmatic complied with the certification processes that were necessary to sell the technology in the US Market.

- Edge2Plus voting machine and the HAAT, which consolidates results according to the Voting Voluntary Guidelines (VVG) adopted by the US Electoral Assistance Commission.
- Edge2Plus voting machine and the HAAT, according to the standards of Illinois.
- Edge2Plus and the HAAT, along with the WinEDS system to configure the elections, as a component of the election solution by Smartmatic-Sequoia.

Smartmatic in the US

Continent: North America

Country: United States

Capital: Washington, D. C.

Estimated population: 326 million

Type of government: Constitutional
Federal Republic

"In fact, for most voters voting was simple and smooth. The feedback from the polls was that voters liked the [Smartmatic's] electoral solution [through its subsidiary Sequoia Voting System]" | **Langdon D. Neal, President of the Electoral Commission of Chicago and David Orr, Clerk of the Cook County in Illinois, 2006.**

"We are proud to have taken a leading role in election modernization. By offering online voting, we expanded the number of options citizens have to participate and made voting as convenient as possible. Technology proved key in engaging citizens and bolstering democracy." | **James Evans, Chairman of the Utah Republican Party, 2016**

About Smartmatic

Smartmatic is the world's leading elections and voting technology company. Since forming in 2000, it has developed and implemented technology solutions that help authorities run efficient and transparent elections.

Today, Smartmatic offers a comprehensive portfolio of unique and innovative technologies and services to improve every stage of the electoral process. Its technology has processed over 3.7 billion votes in election projects on five continents.

Smartmatic is headquartered in London and serves its customers through an organisation of more than 600 employees working in 16 offices around the world.
