PATENT OFFICE REMOVES CRITICAL LEADER V. FACEBOOK DISCLOSURE ITEMS

USPTO CONDUCT PARALLELS THE DOCUMENT OBSTRUCTION BY THE IRS

DISARM THE POWERMONGERS – FORCE FACEBOOK TO RETURN LEADER’S INVENTION (WHAT THE COURTS FAILED TO DO)

Justice advocates today called on Congress to step in and fix the Wild West abortions of American justice that have been exposed by the Leader v. Facebook scandal. One activist asked, “How can any innovator rely upon the trustworthiness of the U.S. Patent Office and the Justice Department, after knowing that all the judges held Facebook stock during Leader case? I am thinking it makes no sense to file my new patents until this trust issue is fixed, if it ever gets fixed. My confidence level is low right now.”

CLICK HERE to view a document received today titled Lawfare which highlights the big picture of the Leader v. Facebook corruption. Readers should note that we have been writing about “lawfare” for some time. It was a highly successful assymetric warfare tactic of the former Soviet KGB’s Department of Disinformation.

Facebook’s Moscow partners have evidently dusted off the training...
Americans For Innovation: PATENT OFFICE REMOVES CRITICAL LEADER V. FACEBOOK DISCLOSURE ITEMS

The bylines are even more interesting: “When lawyers, bankers and techs conspire illegally with the President to seize powers, democracy dies” and “American society’s new battleground—citizens who exploit the law’s good faith expectations, and breach their public oaths, in order to neuter checks and balances and prevent accountability.” The document suggests that Congress take away Facebook technology engine and give it back to the inventor, Leader Technologies. By doing so, the Facebook crowd would lose their primary organizing tool. The illustration contains a background photo of President Obama’s toast with Mark Zuckerberg, Larry Ellison and the late Steve Jobs at a pre-election Silicon Valley dinner in February 2011. A fitting comeuppance.

Fig. 1—The Facebook crowd is waging LAWFARE against the American public and the world. See the KGB logo below for more on the KGB Department of Disinformation who developed this asymmetric warfare tactic, and which is still used by the FBIS... and the Facebook cabal.

FOREWORD

“American society’s new battleground—citizens who exploit the law’s good faith expectations, and breach their public oaths, in order to neuter checks and balances and prevent accountability.”

ORIGINAL POST

(Aug. 15, 2013)—The U.S. Patent Office continues to dig its ethics hole deeper. On Aug. 7 the Patent Office responded to a Jul. 9, 2013 FOIA request (CLICK HERE).[01]

For starters, the Deputy FOIA Officer, Kathryn W. Siehndel, still does not disclose her prior employment by Facebook’s attorney, White & Case LLP. Now, she refuses to provide any biographical or financial information about herself, Director David R. Kappos or any of the Leader v. Facebook patent judges.

Tellingly, Siehndel provides no required public disclosure information about Judge Stephen C. Siu, the judge assigned by Director David Kappos to oversee the 3rd Leader Technologies politically-motivated patent reexam. She uses HIPAA healthcare information protection statutes as her justification for withholding mandated judicial financial and background disclosures. The request did not ask for healthcare information, and more than 70% of the information identified was withheld.

OGE 278 FINANCIAL DISCLOSURE REPORTS ARE REQUIRED BY LAW

Public disclosure of judicial and senior staff financial records is required by law. The Patent Office even says so in a current job posting for an administrative judge at JOBSUSA: “The Ethics in Government Act of 1978... requires senior officials in the executive, legislative and judicial branches to file public reports of their finances as well as other interests outside the Government... The OGE 278 [Financial Disclosure Report] is available to the public.” Therefore, the FOIA response breaks the law by refusing to provide those reports in a public FOIA request. In fact, not a single judicial financial report has been provided by the FOIA Officer to this or any previous FOIA request.[15]

The Patent Office’s disturbing FOIA conduct directly contradicts their own words in their current USAJOBS posting. A reasonable person can only assume that the Patent Office is

UPDATE MAR. 25, 2014

FOUR CRITICAL AFI POSTS ON JUDICIAL COMPROMISE

Fully updated Mar. 25, 2014 in the wake of the Scribd censorship:

1. WAS CHIEF JUSTICE ROBERTS BLACKMAILED into supporting Obamacare by his ethical compromises in Leader v. Facebook?
2. JUSTICE ROBERTS MENTORED Facebook Gibson Dunn LLP attorneys.
3. JUSTICE ROBERTS HOLDS substantial Facebook financial interests.
running some sort of protection racket. Perhaps these judges become compromised once they are employed, then it becomes the FOIA counsel’s and Director’s jobs to protect those individuals from exposure of their misconduct. Perhaps this is where the side deals to protect cronies begins. Wink. Wink. Since they are refusing to release even one financial report, one can only conclude that they must be hiding many sins.

**USPTO LAWYER FABRICATION**

*Update Aug. 20, 2013—AFI investigators have just learned that USPTO FOIA counsel Kathryn W. Siehndel (formerly employed by Facebook’s counsel White & Case LLP) made false claims in her response. She wrote “In our July, 9, 2013 telephone call to clarify this request, you indicated that you intended your requests to be limited to records related to the subject line . . . 3rd Reexam.” CLICK HERE to read this statement in her letter. This claim is impossible since the requester did not email the request until 5:58PM on July 10, 2013. CLICK HERE to see that email. The Express Mail copy was not received until 8:21AM on July 12, 2013. CLICK HERE to see that delivery receipt.*

In fabricating her story, Ms. Siehndel appears to have become confused by the dates since the file name on the email attachment is July 8, but it was not attached and sent until July 10. She evidently believed she needed this excuse to justify her redactions. Tellingly, in her redactions one cannot find a single reference to Facebook or Microsoft. A Microsoft dictionary is among the items of alleged “prior art” that Facebook keeps putting forward (and losing on—at trial and in two previous reexams). The USPTO has almost 15,000 “likes” on Facebook.

**Rhetorical questions: Does the USPTO’s daily consumption of Facebook bias their perspectives? Of course it does. Can one taste-test two burgers impartially when one has been gorging on one of the brands for years? Of course not. This is precisely why we have conflicts of interest disqualification laws; none of which were followed by the entire U.S. Patent Office.**

*Update Aug. 21, 2013—AFI investigators just uncovered another smoking gun. Not only did Kathryn W. Siehndel conceal FOIA information about Facebook and Director Kappos, but she failed to even provide a May 20, 2010 USPTO press release by Director David J. Kappos announcing the USPTO’s new Facebook Page. Note that Kappos even uses the word “consume.” (see Fig. 4). [Editorial: We must pat our volunteer investigators on the backs for this find.]

CLICK HERE to read the press release.[13]

Here are a few statistics about the Patent Office’s Facebook Page. Patent Office Director David J. Kappos has used Facebook as a Director’s exclusive newsletter that carries his propaganda, without the possibility of objection, dissent or public comment (as AFI activists discovered yesterday when they attempted to post a comment about Leader v. Facebook, which was removed). Director Kappos has made a total of 303 Facebook entries since May 14, 2010. Kappos is mentioned by name in 40 Facebook entries (CLICK HERE). Kappos’ photo appears in 15 Facebook entries. Kappos’ video appears in 2 Facebook entries. Kappos ordered the 3rd Leader patent reexam on Apr. 17, 2012 (CLICK HERE).**

**WITHOUT PUBLIC DISCLOSURE, JUDGES AND JUDICIAL EMPLOYEES CANNOT BE HELD ACCOUNTABLE**

**WITHOUT PATENT OFFICE TRUTHFULNESS AND IMPARTIALITY, NO PATENT IS SAFE**

http://americans4innovation.blogspot.com/2013/08/uspto-conduct-parallels-foia.html
Worse, Siehndel even redacted information that the judges themselves have disclosed on their LinkedIn Profiles. These judge disclosures make a mockery of Ms. Siehndel’s actions, especially in light of the high-sounding call for transparency and accountability in President Obama’s Jan. 21, 2009 FOIA speech. Investigative Reporter Julia Davis investigates Facebook’s Leader v. Facebook attorney Gibson Dunn LLP. She credits this firm with the reason why not a single Wall Street banker has gone to jail since 2008. Click here to read her article “Everybody hates whistleblowers.” Examiner.com, Apr. 10, 2012. Here’s an excerpt:

> Skillful manipulation of the firm's extensive media connections allows Gibson Dunn to promote their causes, while simultaneously smearing their opponents and silencing embarrassing news coverage.

This statement followed right after Davis cited Facebook's chief inside counsel in the Leader v. Facebook case, Theodore Ullyot, who appears to have helped lead the Leader v. Facebook judicial corruption. Interesting word choices associated with Gibson Dunn LLP: manipulation, smear. Attorneys swear a solemn oath to act morally, ethically, and in
Judge Rader is concealing massive conflicts of interest among his judges involved in the Leader v. Facebook case—judges who held stock in Facebook during the proceedings. In addition, Judge Rader is a former law student of Leader’s attorney, Professor James P. OUR MISSION

American citizens must fight abuse of the constitutional right for authors and inventors to enjoy the fruits of their inventions, as a matter of basic property rights and sound public policy. Otherwise, instead of innovation, creativity, genius, ideas, vision, courage, entrepreneurship, respect, property, rejuvenation, morals, ethics, values, renewal, truth, facts, rights, privacy, solutions and judicial faithfulness, . . . our society and economy will be dragged down (and eventually destroyed) by copying, infringement, thievery, counterfeiting, hacking, greed, misinformation, exploitation, abuse, disrespect, falsity, corruption, bribery, coercion, intimidation, doublespeak, misconduct, lies, deception, attorney “dark arts,” destruction, confusion, dishonesty, judicial chicanery and lawlessness.

If we do not speak up, impeach derelict judges and imprison corrupt attorneys, we cannot possibly hope to start fixing the current ills in our society. Without justice and respect for private property, democracy has no sure foundation.

ITEM 1: FINANCIAL DISCLOSURES OF

No. Unwarranted

The "public interest" is already identified in U.S. Law. For example: “Any justice, judge, or magistrate judge of the United States shall disqualify himself in any proceeding in which his impartiality might reasonably be questioned.” 28 USC § 455 - Disqualification of justice, judge, or magistrate.

We are an opinion blog that advocates for strong intellectual property rights. We welcome commenters and contributors. The Leader v. Facebook patent infringement case first came to our attention after learning that the trial judge, Leonard P. Stark, U.S. District Court of Delaware, ignored his jury’s admission that they had no evidence to support their on-sale bar verdict, but the judge supported it anyway.

The judicial misconduct has deteriorated from there, replete with two of the three judges on the Federal Circuit appeal panel, Judges Alan D. Lourie and Kimberly A. Moore, holding Facebook stock that they did not disclose to the litigants, and later tried to excuse through a quick motion slipped in at the last minute by the Clerk of Court, Jan Horbaly, and his close friends at The Federal Circuit Bar Association. (The DC Bar subsequently revealed that Mr. Horbaly is not licensed to practice law in Washington D.C.)

The judges ignored shocking new evidence that Mark Zuckerberg withheld 28 hard drives of 2003-2004 evidence from Leader Technologies that could prove actual theft (and therefore claims even more serious than infringement). In addition, Facebook's appeal attorney, Thomas G. Hungar of Gibson Dunn LLP, has close personal ties to just about every judicial player in this story. The misconduct appears to reach into the U.S. Patent Office through abuse of the reexamination process by Facebook. We will stay focused on Leader v. Facebook until justice is served, but we also welcome news and analysis of intellectual property abuse in other cases as well.

We know his information exists because some of the judges admit membership in public writings. Presumably such association memberships and affiliations would be required by their conflicts of interest disclosures . . . and therefore, in the USPTO "electronic conflicts screen system" that is mandated by the Judicial Conference.

HUMPTY DUMPTY HAD A GREAT FALL

The Patent Office clearly cannot sustain this level of badness for very long. The rules and common sense are against them. The light of public accountability shines, and compliance is inevitable. The chorus for transparency and fairness is growing louder each day. We encourage whistle blowers to step forward.

The public must be able to trust the impartiality of the Patent Office. Without that trust, small business inventors will stop filing patents since they will not be able to rely on a full and fair hearing that is free of the undue influence of big infringers like Microsoft (for Facebook) and IBM (for Facebook), Judge Stephen C. Siu’s former employers.

Deputy Counsel Kathryn W. Siehndel is evidently protecting Facebook and their cronies. Is the Patent Office and its parent, the Executive Branch, one big, ethically-challenged Humpty Dumpty?

Anyone can send in a FOIA request to the Patent Office to drill down on the conduct being exposed here. Here's a link to the instructions. The request can be in writing or by email. Be sure to follow the instructions carefully, because as we can see, the FOIA Officer is looking for any reason she can find to deny your request.

As we are seeing, the information that agencies conceal, deny or black/white out can be as instructive as what they disclose. Let's keep pounding. We pay these people their salaries and they owe us duties of loyalty, honesty and good faith.

He was at Latham & Watkins LLP, Facebook's James W. Breyer's firm, between 2004-2008. That's when all the Leader v. Facebook theft and dirty work was done. Then he moved to, ahhhhmm, Chicago and worked at Nixon Peabody LLP until he was appointed a Patent Judge by, ahhhhmmmm, Obama-appointee Director David Kappos and Federal Circuit Judge Randall R. Rader. Just look at the guy's picture. Mole? No wonder Siehndel doesn't want to release their background information. Dollar to donuts he's got a ton of Facebook and related stock.

I scratched an itch this weekend. It has started to bug me that Wikipedia has NO ENTRIES for Leader Technologies, Michael McKibben or Jeffrey Lamb, the inventors of social networking. This parallels the fact that one hears nothing but crickets from the mainstream media on Leader v. Facebook, the corruption, the judicial misconduct. Nothing. Nada. Zilch.

This observation led me to investigate Wikipedia's history. They appear to use 'Socialtext' software, founded in 2002, and funded in 2004 by OMIDYAR NETWORK and REID HOFFMAN (PayPal, LinkedIn, Facebook). Ahhhhmomm. This is the exact same time frame as the Accel Partners' James W. Breyer's/Zuckerberg's theft of Leader's software at Harvard in late 2003 early 2004 (Facebook went live on Feb. 4, 2004). Hoffman now even admits publicly to having coached the 19-year old Zuckerberg at Harvard then. Hoffman was a busy boy. PayPal sale, fund LinkedIn, fund Facebook, fund Socialtext/Wikipedia.... one gets the impression that the CROWD AROUND ACCEL PARTNERS AND JAMES W. BREYER for the misconduct of his judges and Clerk of Court in Leader Techs v. Facebook, Inc., 678 F.3d 1300 (Fed. Cir. 2012). Judge Rader failed to manage his court resulting in a likely situation where his judges never even received briefs that they allegedly ruled on in favor of Facebook. Judge Rader also failed to disclose his conflicting relationships with a Leader principle with whom he may have had deep professional differences during his time at the Senate Judiciary Committee—his former professor of law at George Washington University Law Center, former Leader director Professor James P. Chandler. See analysis of Judge Rader's undisclosed conflicts of interest in Leader v. Facebook.

Judge Rader also did not stop his judges from creating new arguments and evidence for Facebook in the secrecy of chambers—after they had debunked all of Facebook's evidence on appeal, which is a clear breach of constitutional due process.

was frantically carving up Leader's invention like an elephant—every man and women getting their chunk. How could one person like Hoffman do so much, so quickly, unless the core tech was stolen? Remember, Zuckerberg claims to have done his part in 'one to two weeks' while studying for finals.

OMIDYAR was founded in 2004. One of its senior directors is TODIR TASHEV from Moscow, Russia who used to work for JP Morgan and maintains strong ties to Moscow as well as Harvard. Hmmmmm. Still more Harvard people. Socialtext even took an investment by the University of Utah's Endowment in April 2009 -- that’s HARRY REID’s alma mater!

Given that Leader and McKibben have had some remarkable accomplishments and contributions, like the Hurricane Katrina lifesaving with Governor Kathleen Blanco and the State of Louisiana, not to mention inventing SOCIAL NETWORKING, one gets the impression that Wikipedia is very intentionally not telling the truth.

AFI researchers have been digging more into the FOIA disclosure and discovered more mess. Take note of a new 4th paragraph about USPTO FOIA deputy counsel Kathryn Sienhdel’s outright lie about calling the requester (she did not), updates on the conflicts in Table 1, especially the fact that the ENTIRE US PATENT OFFICE has been using Facebook since before the Leader v. Facebook trial. Simply put, the whole of the Patent Office drank the Kool-Aid, and are thus conflicted out of any decisions regarding Leader Technologies' patent.

Here is the cast of characters in Leader v. Facebook. We encourage you to report their corrupt activities to this site and others, like Lawless America. Feel free to communicate anonymously in any way in which you are most comfortable. The attempt of these people and their organizations to corrupt American justice and commerce cannot be tolerated. Vigilance. We will expose them. See Congressional Briefings (currently being updated after Scribd censored the documents on Fri. Mar. 7, 2014).

A. Facebook’s law firms:

1. Fenwick & West LLP (Facebook securities and patent law firm; former Leader Technologies counsel; attempted an appearance in Leader v. Facebook; did not seek conflicts waiver from Leader prior to
judges, to visit it DAILY. They currently have 14,700 "likes."

And they want us to believe that they are not BIASED against Leader Technologies?? What planet is this?

Here is one of the press release by the Patent office! This was made while the Patent office is still in the reexamination of Leaders patent!!!!! Leader was still in the court system with their appeal!!! This "proves" that the Patent office is conflicted, biased and corrupted. Remember there is no a Patent on the core technology for Facebook other than Leaders 761 patent which has been proven in court and Leader was issued a Patent by the USPTO, reaffirmed twice in previous reexams!!!! Now the patent office is trying to steal Leaders by using scheming lawyers inside and outside the patent office! Contact your Congressional representatives and express your outrage and request an investigation!

What?? This is beyond ridiculous.

So let's say there is an Apple patent and they allege that Microsoft infringes it through Windows. Apple patent is up for review. By your logic, no one at the patent office could use Windows because this would be a conflict of interest. It would show bias.

In fact the patent office would be prohibited from using any product involving any patent being challenged. Want to use that Xerox machine? Sorry. Conflict of interest. Bias. Want to use that Swingline stapler? Sorry, Bostitch is suing. Conflict of interest. Bias.

This sounds ridiculous because it is. You can't prohibit the patent office from having any association whatsoever with products that involve allegations of patent infringement. It's nonsensical and completely unworkable.

Here are some suggestions on what your USPTO FOIA requests might ask for:

1. Notes of the alleged July 9, 2013 telephone call between Kathryn W. Siehndel and the requester of F-13-00218. Please include all briefing notes on conclusions drawn from this alleged conversation.

2. Statutory background and financial disclosure for Kathryn W. Siehndel and David J. Kappos. (Siehndel's claim that no information exists is not credible.)

3. Conflicts of interest assessment performed before Kathryn W. Siehndel was approved as the FOIA officer for Leader v. Facebook since she was formerly employed by White & Case LLP, one of Facebook's law firms in Leader v. Facebook.

4. Conflicts of interest assessment performed by David J. Kappos's office before issuing the 3rd reexamination order on Leader Technologies' patent.

5. Conflicts of interest assessments performed on the administrative patent judges (incl. Petrivcik, MacDonald, Sliu, Hughes, Timm) assigned to any of Leader Technologies' patent reexaminations.

Wally gives Darren an attaboy. Attorneys and judges have more ethics rules than any other profession on the planet. Ever wonder why they have such difficulty doing the right thing? Could it be because the profession actually attracts liars, cheats and thieves like moths to light? ... and we let them be “self-policing.” This is like letting murdere run the prison. This system needs constitutionally overhauled. Simply making more rules and paying for more studies, etc. only gives the unscrupulous more Play Dough to run the prison. “Corruption relies on confusion. When people are not confused, they stop corruption.”
Let’s end this intentional confusion by the Facebook crowd. Orwellian doublespeak is their tool for confusion.

BEWARE FORMER WORLD BANK ECONOMISTS ALLIED WITH FACEBOOK BEARING GIFTS

I notice that the mobile app company SQUARE is advertising heavily to get small business vendors to use their product. Everyone should know that Facebook Cabal President Lawrence “Larry” Summers is behind that company. This probably means this is another piece in his puzzle for dominating world commerce after his buddy Obama is out of power... and he wants to be Chairman of the Federal Reserve to boot.

U.S. District Court Judge Robert W. Sweet, in Manhattan, who was assigned the consolidated cases by a panel of 11 other federal judges, will preside over the conference and the subsequent trial.

Lawyers had previously said the judges would assign the trial to New York because of proximity to Facebook's principal underwriters, Morgan Stanley (NYSE: MS), Goldman Sachs (NYSE: GS) and JPMorgan Chase (NYSE: JPM), as well as the court's familiarity with complex financial matters.

Zuckerberg had apparently signed an affidavit that he had never seen Leader’s white paper. [BUT YOU SENT A COPY OF THIS WHITE PAPER TO DAVID]

At one point during the summer of 2004, according to documents viewed by Business Insider, Mark told friends he had exploited a flaw in ConnectU’s account verification process to create a fake Cameron Winklevoss account with a fake Harvard.edu email address.

Next, Mark told a friend he logged into the accounts of some ConnectU users and changed their privacy settings to invisible. In an IM, Mark explained his idea was to make it harder for ConnectU users to find their friends on the site, thus reducing its utility. Later, Mark told a friend he’d gone a step further, deactivating about 20 ConnectU accounts entirely. It is not clear how Mark accessed these accounts. It does appear that he retained access to ConnectU’s servers for quite some time. (In an earlier hack of the email accounts of two Harvard Crimson editors, he used login information stored in Facebook’s servers.)

In July 2010, Booker attended a dinner at a conference in Sun Valley, Idaho, where he was seated with Facebook founder Mark Zuckerberg. Zuckerberg, who had no known ties to Newark, announced in September 2010 that he was donating $100 million of his personal fortune to the Newark school system. Joel Salatin, author of ‘Folks, This Ain’t Normal’ agrees with AFI about our broken
justice system.

“This whole litigation climate is destroying innovation because it makes people too
afraid to move. If I think you might sue me, I’m going to move much more cautiously in
my relationship with you than if I know you won’t sue me. Polyface [Farm] now leases
several farms in the area. These are landowners who, for the most part, have
approached us and asked us to manage their properties. It allows us to expand to meet
our market demand but maintain a decentralized, spread-out production and processing
model consistent with our ecological and business values.

Each agreement contains a no-litigation clause. No matter what happens or who is at
fault, neither party can sue the other. Instead, we must go to binding arbitration. I have
been in courtrooms several times and find them outrageous. I think if we elected non-
attorneys as legislators, and selected judges from regular people, including the Supreme
Court, we would have more reasonable decisions. The Constitution does not encourage
attorneys to be judges. Our cultural assumption that only licensed attorneys are eligible
to be judges automatically excludes innovation. It assures a fraternity of like-minded
people who will assuredly protect the culture’s power brokers.”

Joel Salatin, author of ‘Folks, This Ain’t Normal’ agrees with AFI about our broken
justice system.

“This whole litigation climate is destroying innovation because it makes people too
afraid to move. If I think you might sue me, I’m going to move much more cautiously in
my relationship with you than if I know you won’t sue me. Polyface [Farm] now leases
several farms in the area. These are landowners who, for the most part, have
approached us and asked us to manage their properties. It allows us to expand to meet
our market demand but maintain a decentralized, spread-out production and processing
model consistent with our ecological and business values.

Each agreement contains a no-litigation clause. No matter what happens or who is at
fault, neither party can sue the other. Instead, we must go to binding arbitration. I have
been in courtrooms several times and find them outrageous. I think if we elected non-
attorneys as legislators, and selected judges from regular people, including the Supreme
Court, we would have more reasonable decisions. The Constitution does not encourage
attorneys to be judges. Our cultural assumption that only licensed attorneys are eligible
to be judges automatically excludes innovation. It assures a fraternity of like-minded
people who will assuredly protect the culture’s power brokers.”
