## STRATEGIC REPORT

**FOR THE YEAR ENDED 31 MARCH 2017**

---

The directors present the strategic report and financial statements for the year ended 31 March 2017.

### **Review of the business**

The results for the year are set out on page 6.

The company was the principal employer in the Guinness Mahon Pension scheme ("the scheme") which is a non-contributory defined benefit scheme and its assets are held in separate trustee administered funds. The company has accounted for this scheme on a defined contribution basis. The scheme is closed to new entrants and accrual of service ceased on 31 March 2002.

In November 2016, the trustees of the GM scheme entered into a "buy-in" insurance agreement with Aviva Annuity UK Ltd ("Aviva"). As a result Aviva provide the accrued pension benefits of members of the scheme, as the previous assets held in the scheme are now replaced by this insurance agreement. As a result the group has reduced its exposure to the risks associated with the scheme. The administrative transition between the scheme trustees and Aviva is ongoing.

Under the agreed contribution plan deficit contributions of £4m were paid into the GM scheme in the year to March 2017 and the group will make an additional contribution to the GM scheme in the 2017/18 financial year when the finalisation of the transfer of the administration from the trustees to Aviva is completed.

Given the straight forward nature of the business the company's directors are of the opinion that analysis using key performance indicators is not necessary for an understanding of the development, performance or financial position of the business.

At 31 March 2017 the company had net assets of £442,521,000 (2016: £446,859,000)

The company's financial risks are managed at the Investec plc group level. Surplus liquidity, arising from time to time, was loaned by the company during the year in which it arose on an interest free basis to its immediate parent company. The loan is repayable on demand and the company has the right, at any time and at its sole discretion, to charge interest thereon at a commercial rate. The company's exposure to financial risks is further discussed in note 15.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 MARCH 2017

---

### 1 Accounting policies

(Continued)

#### 1.3 Investments in associates and subsidiaries

Interests in subsidiary and associated undertakings are stated at cost less any impairment in value.

#### 1.4 Fair value measurement

IFRS 13 establishes a single source of guidance for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS when fair value is required or permitted. The company is exempt under FRS 101 from the disclosure requirements of IFRS 13. There was no impact on the company from the adoption of IFRS 13.

#### 1.5 Financial assets

Financial assets are recognised in the company's balance sheet when the company becomes party to the contractual provisions of the instrument.

Financial assets are classified into specified categories. The classification depends on the nature and purpose of the financial assets and is determined at the time of recognition.

Financial assets are initially measured at fair value plus transaction costs, other than those classified as fair value through profit and loss, which are measured at fair value.

##### **Available-for-sale financial assets**

Available-for-sale financial assets are those which are designated as such or do not qualify to be classified as designated at fair value through profit or loss, held-to-maturity, or loans and receivables. They include strategically held equity instruments that are not interests in associated undertakings, joint ventures or subsidiaries of the group. Further, certain debt instruments that are held at fair value due to being quoted on an active market, which are neither actively traded nor held-to-maturity instruments, are classified as available-for-sale financial assets.

Financial assets classified as available-for-sale are measured at fair value with unrealised gains and losses recognised directly in other comprehensive income in the available-for-sale reserve. When the asset is disposed of, the cumulative gain or loss previously recognised in other comprehensive income is recognised in the income statement. Interest earned while holding available-for-sale financial assets is reported as interest income using the effective interest rate. Dividends earned while holding available-for-sale financial assets are recognised in the income statement when the right of payment has been established.

If an available-for-sale instrument is determined to be impaired, the respective cumulative unrealised losses previously recognised in other comprehensive income are included in the income statement in the period in which the impairment is identified. Impairments on available-for-sale equity instruments are not reversed once recognised in the income statement.

If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the income statement, the impairment loss is reversed, limited to the impairment value previously recognised in the income statement.

### 1 Accounting policies

(Continued)

#### ***Loans and receivables***

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and exclude the following:

- Those in which the group intends to trade in, which are classified as held-for-trading and those that the group designates as fair value through profit and loss.
- Those that the group designate as available for sale.
- Those for which the group may not recover substantially all of its initial investment, other than because of credit deterioration, which is accounted for as available-for-sale instruments.

Subsequent to initial recognition, loans and receivables are measured at amortised cost, using the effective interest method, less impairment losses. The effective interest rate represents that rate that exactly discounts future projected cash flows through the expected life of the financial instrument, to the net carrying amount of the financial instrument. Included in the effective calculation of the effective interest rate is any discount or premium on acquisition and fees that are an integral part of the effective interest rate.

Losses arising from impairment of such investments are recognised in the income statement line "impairment losses on loans and advances".

Interest on impaired financial assets is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

#### ***Impairment of amounts due from group undertakings held at amortised cost***

Amounts due from group undertakings carried at amortised cost are impaired if there is objective evidence that the company will not receive cash flows according to the inter-company agreement. Amounts due from group undertakings are assessed for objective evidence of impairment at least at each balance sheet reporting date. The test for impairment is based on the specific amount due from the group undertaking and the impairment is credited against the carrying value of the amount due. The impairment is calculated as the difference between the carrying value of the asset and the expected cash flows discounted at the effective interest rate.

### 1.6 Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

#### ***Current tax***

Current tax is provided on the amount expected to be payable on taxable profit at rates that are enacted or substantively enacted and applicable to the relevant period.

# INVESTEC GROUP (UK) LIMITED

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 MARCH 2017

---

### 1 Accounting policies

(Continued)

#### **Deferred tax**

Deferred taxation is provided using the balance sheet method on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base, except where such temporary differences arise from:

- The initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction has no effect on the income statement or taxable profit.
- In respect of temporary timing differences associated with the investments in subsidiaries or interests in associated undertakings, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets or liabilities are measured using the tax rates that have been enacted or substantively enacted at the balance sheet date.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deferred tax asset can be utilised.

Items recognised directly in other comprehensive income are net of related current and deferred taxation.

#### **1.7 Provisions**

Where the company has a lease regarded as an onerous lease, it is the policy to provide against the present obligation of all expected future cash flows arising from the lease.

#### **1.8 Employee benefits**

The company accounts for its contributions to the Guinness Mahon Pension Scheme ("the scheme") on a defined contribution basis. All the company's contributions are charged to the income statement as and when they are incurred, and are included under administration expenses.

### **2 Directors' Emoluments**

The directors were employed and remunerated as directors of Investec plc and its subsidiaries (the "Group") in respect of their services to the Group as a whole and their remuneration has been paid by other Group companies. It is estimated that the remuneration for their services to the Company in the year totalled £10,500, (2016: £12,000).

	Loss for the year is stated after charging/(crediting):

The company was the principal employer in a pension scheme which is a non-contributory defined benefit scheme and the assets of which are held in separate trustee administered funds. Employees from various Investec plc undertakings participate in this scheme and the company is unable to identify its share of the underlying assets and liabilities in the scheme on a consistent and reasonable basis. The company has accounted for this scheme on a defined contribution basis. The scheme is closed to new entrants and accrual of service ceased on 31 March 2002. The company's share of contributions to the scheme in the year ended 31 March 2017 totalled £4.236m (2016 - £4.316m).

The financial statements of Investec plc, the company's ultimate parent company, disclose the actuarial valuation of the scheme under IAS 19 at 31 March 2017. This was performed by a qualified, independent actuary. The valuation showed a deficit in the scheme of £4,529,000 (2016 - surplus of £41,776,000). This surplus and the major assumptions used have been recognised and disclosed in the financial statements of Investec plc.

The contributions made by the company are paid in accordance with the agreement between the Investec group and the pension trustees after the latest triennial funding valuation, carried out at March 2015. The existence of an accounting deficit or surplus under IAS 19 thus does not change the contributions required to be paid by the company.
