Proof: Obama's SES stay-behind Army is running America's 5G space program

The Aerospace Corporation gets \$1b per year to control space policy for the globalists

May 04, 2018—May is SERCO awareness month at American Intelligence Media. In the process of digging up Serco contracts, AFI/AIM researchers discovered multi-billion dollar contracts to another shadowy organization named The Aerospace Corporation.

What is this The Aerospace Corporation?

[The Aerospace Corporation 2017 Annual Report](#) says:

The Aerospace Corporation is a nonprofit corporation that operates a federally funded research and development center (FFRDC) for the United States Air Force. In this capacity, the corporation is able to respond with **agility** to the unique challenges posed by national security space requirements, delivering well-defined, **innovative** solutions that assure mission success. Relying on its **cutting-edge** tools and facilities, a **vast repository** of space-system knowledge and experience, and, most importantly, the technical expertise of its people, Aerospace provides **unsurpassed** levels of support to both immediate and long-term military and intelligence space programs and other programs of national significance.

This TAC report is little more than self-congratulatory puffery. It is totally devoid of normal accountability reporting for a real corporation—finance statements, beneficial ownership, material conflicts of interest disclosures, risk disclosures, accountability requirements, independent auditor reports, etc.

Remarkably, TAC has its finger on the pulse of American *entire* civilian, military and commercial space program. In our experience, whenever a quasi-government agency assigns to itself superlative descriptions like “unsurpassed” performance, one must look for what they really do. It appears that TAC’s mission is to control ALL space policy for the SES globalist handlers. Another telltale sign of corruption is the presence of large, unwieldy boards of directors and officers.

The Aerospace Corporation (TAC) is an unaccountable SES space program

TAC’s board and officers are heavily infiltrated with “Obama’s SeS Army.” [Click here for an overview of the SES.](#) SES is a group of about 10,000 senior government bureaucrats who are paid more than anyone in civil service, get annual raises decided by a group of 500 lawyers in the Justice Department, and they claim they cannot be fired by the President.

If SES and the senior The Aerospace Corporation doesn’t work for our elected President, then who do they work for? Listed below is the current TAC senior leadership who are listed in one or more [SES Plum Book’s](#).

The Aerospace Corporation directs the coming, unnecessary, physically harmful 5G electromagnetic WiFi smog system

The announced plan to implement 5G WiFi from space is a treat to the whole world. Evidently, this space policy is being driven by The Aerospace Corporation.

5G is not needed for faster WiFi. New technologies already exist to transmit high speed WiFi via light. It makes 5G primitive.

However, assuming their eugenics motivation, 5G can be used to literally fry your brain with milliwave-level radio waves targeted to different parts of your brain. It can also be used to read your emotions via bio-chemical sensors. Look it up.

Call to Action

The Aerospace Corporation is an illegal, SES run space program that must be defunded and shut down immediately.
