

The Bill & Hillary Clinton 1999 sellout of America – creation of digital open borders... using the excuse of security and privacy

Duration	Activity
	<p><u>On Jul. 14, 1999</u>, the Clinton White House set up a skunk works to run all future rogue intelligence operations called the National Infrastructure Assurance Council.</p> <p>79. Bookmark: #niac-version-1</p> <div data-bbox="435 814 1437 1501">  <p>On Jul. 14, 1999, Bill Clinton issued Executive Order 13130 that formed the National Infrastructure Assurance Council (NIAC). The stated goal was to coordinate "effort by both government and private sector entities to address threats to our Nation's critical infrastructure."</p> <p>Hindsight shows that NIAC was the beginning of a private spy agency for the Executive Branch, NSA, and crony banks, judges, bureaucrats, politicians, lawyers and nerds. Massive amounts of bulk personal data were collected illegally and used privately among these players for bribery, coercion, blackmail, advertising, and voter manipulation, we believe. Case in point is the consistently exorbitant speaking fees (\$117 million) and Clinton Foundation donations (\$152+ million) that Bill and Hillary Clinton have been able to garner between 2001 and 2016. [232] The likely drafter of this order, James P. Chandler, III, was later appointed to serve as a member of the NIAC, on the last day of Bill Clinton's presidency, Jan. 18, 2001. Encryption key scam began this day organized by Clinton's rogue globalists at the C.I.A., NSA, FBI, DoD—*A Day That Will Live In Infamy*

On Sep. 16,

1999, President Bill Clinton announced an entirely new (underhanded, criminal, Deep State shadow government, Senior Executive

Services (SES)) approach to export of encryption hardware, software and firmware. Tellingly, White House press secretary Joe P. Lockhart made the announcement. Lockhart was appointed Facebook vice president of communications on [On Jun. 14, 2011](#). This press release and supporting White House briefing documents, including President Clinton's letter to Congress, were evidently written by chief Clinton outside intellectual property and national security legal advisor, James P. Chandler, III. Chandler had earlier written Clinton's Economic Espionage Act and Federal Secrets Act of 1996 which passed on [Oct. 11, 1996](#). Within a four months of this press release, in [early Jan. 2000](#), Chandler agreed to be social networking innventor Leader Technologies, Inc.'s patent attorney. Export was allowed after a "one-time technical review" [*this is a joke as a serious technology vetting standard*] that was totally devoid of teeth. America's technology borders were essentially opened to all commercial and state actors foreign and domestic.[\[1368\]](#)

	<p>82. Bookmark: #glass-steagall</p> <div data-bbox="430 289 1437 871"><p>... two weeks later:</p><p>On Nov. 12, 1999, Larry Summers was instrumental in the repeal of the Glass-Steagall Act— the Gramm-Leach-Bliley Act of 1999. Gramm-Leach removed the affiliation restrictions between banks and securities firms. Glass-Steagall was enacted on Sep. 4, 1929 in the aftermath of the stock market crash that resulted in the Great Depression. Stock brokers in the 1920's had been speculating wildly with the everyday banking activity of average Americans. After Gramm-Leach, Citibank became Citigroup, one of Facebook's later underwriters. Pundits believe the abolishment of the Glass-Steagall checks and balances to fraud and greed caused the 2008 banking meltdown and the "too big to fail" banks to actually fail.</p><p>Larry H. Summers</p></div>
5 days later	<p><u>On Nov. 17, 1999</u>, Agilent Technologies went public using Robert S. Mueller's III's law firm Hale and Dorr (renamed Wilmer Hale); Agilent was tasked with building the digital infrastructure for "The Internet of Things" global mass surveillance of everything using the Richard C. Walker HP/Agilent patents for monitoring all human beings called "wet-ware" in the patents.</p>

5 weeks
later

[On or about Oct. 01, 2000](#), NSA director Michael Hayden initiated the Trailblazer Project that opened the door for the National Security Agency (NSA) to conduct mass surveillance on Americans.

TIMELINE: The Bill & Hillary Clinton 1999 sellout of America – creation of digital open borders... using the excuse of security and privacy

3.5 months later, *the day before* Clinton left office

On Jan. 18, 2001, Bill Clinton appointed **James P. Chandler** and **Bill Gates (Microsoft)** to the National Infrastructure Assurance Council ("NIAC"). These men have directed the encryption key scam from inception and were evidently assigned to carry it into the Baby Bush administration uninterrupted by a change of administration.

On Jan. 18, 2001, Bill Clinton appointed James P. Chandler and Bill Gates (Microsoft) to the National Infrastructure Assurance Council ("NIAC"). [024] Hindsight reveals this council directed the creation via a string of self-serving executive orders of a *secret* White House intelligence agency for the exploitation of the privacy and property of the American public without any Congressional or normal judicial oversight. This agency appears to be the source of the blackmail and coercion dirt used to "convince" individuals and organizations around the planet to sponsor Bill and Hillary Clinton for pay-for-play speaking engagements. The perennial excuse for this activity has been "national security." But greed and lust for power and control evidently undergird the rationalizations and incessant stonewalling that has occurred subsequently.
