Federal Bridge Certification Program Details

(<https://patriots4truth.org/2018/11/19/federal-bridge-certification-program-details/>)

All hands on deck for research into the Federal Bridge Certification program. We need all White Hats to pay attention to these notes.

Yes, they needed this to handle all the interconnections among the Richard C. Walker components in the Internet of Things (<https://patriots4truth.org/2018/01/12/how-they-plan-to-control-everything-in-your-life/>).

Microsoft appears to have taken this over.

Removing the Federal Bridge cross certification certificates.

These instructions are intended to help you remove the Federal Bridge certificates from the Microsoft Certificate store on your computer. The objective of the Federal Bridge is to 'cross certify' the different certificate policies of all the federal agencies. The **Federal Bridge has succeeded in getting Microsoft to include the Federal Bridge certificates in the Microsoft Certificate Store** through initial operating system installation (it comes from the factory that way) and/or software updates.

Federal Bridge Certification Authority

Acronym(s):

FBCA (<https://csrc.nist.gov/Glossary/?term=1565>).

Definition(s):

The Federal Bridge Certification Authority consists of a collection of Public Key Infrastructure components (Certificate Authorities, Directories, Certificate Policies and Certificate Practice Statements) that are used to provide peer to peer interoperability among Agency Principal Certification Authorities.

Source(s): NIST SP 800-32 (<https://csrc.nist.gov/publications/detail/sp/800-32/final>)

<https://csrc.nist.gov/Glossary/?term=4343> (<https://csrc.nist.gov/Glossary/?term=4343>).

Federal Bridge Certification Authority Membrane

Acronym(s):

None

Definition(s):

The Federal Bridge Certification Authority Membrane consists of a collection of Public Key Infrastructure components including a variety of Certification Authority PKI products, Databases, CA specific Directories, Border Directory, Firewalls, Routers, Randomizers, etc.

Source(s): NIST SP 800-32 (<https://csrc.nist.gov/publications/detail/sp/800-32/final>)

E-Government Moves Forward as Federal Bridge Certification Authority Conducts First Cross-Certifications

GSA # 9982

September 18, 2002

Contact: Mary Alice Johnson, 202-501-1231

maryalice.johnson@gsa.gov

WASHINGTON, DC - The Federal Bridge Certification Authority (Federal Bridge) today cross-certified with the public key infrastructures (PKI) of the U.S. Department of Defense, U.S. Department of the Treasury, U.S. Department of Agriculture National Finance Center, and National Aeronautics and Space Administration, allowing them to trust and validate the digital signatures on files issued and received by each other.

PKI certificates can be used to affix user unique digital signatures to electronic documents, forms, and any other digital files, offering four benefits: authentication, transaction integrity, non-repudiation, and confidentiality. "The Federal Bridge is a key component of E-Authentication," said Mark Forman, Associate Director for Information Technology and E-Government. "It will serve as a facilitator to unify islands of automation across government and demonstrates the huge potential for integration of federal systems. The Federal Bridge is a key component of E-Authentication and eventually will serve to bridge all levels of government." The process of

You can find Auditing information [here](#).

Federal Trust Framework

The FPKI is a network of hundreds of Certification Authorities (CAs) that issue:

- PIV credentials and person identity certificates
- PIV-Interoperable credentials and person identity certificates
- Other person identity certificates
- Enterprise device identity certificates
