

Biotechnology and Biological Sciences Research Council

Biotechnology and Biological Sciences Research Council (BBSRC), part of UK Research and Innovation, is a Non-departmental public body (NDPB), and is the largest UK public funder of non-medical bioscience. It predominantly funds scientific research institutes and university research departments in the UK.

Biotechnology and Biological Sciences Research Council

	Biotechnology and Biological Sciences Research Council
Abbreviation	BBSRC
Formation	1994 (from merger of 2 other organisations)
Type	Non-Departmental Public Body
Purpose	Funding of UK biological and biotechnological science research
Headquarters	Polaris House, North Star Avenue, Swindon, SN2 1UH
Region served	United Kingdom
Chair	Sir Gordon Duff
Executive Chair	Melanie Welham
Main organ	BBSRC Council
Parent organization	UK Research and Innovation
Affiliations	AHRC, EPSRC, ESRC, MRC, NERC, STFC, Innovate UK, Research England, UKSA
Budget	c. £498M
Website	bbsrc.ukri.org (http://bbsrc.ukri.org)

Purpose

Receiving its funding through the science budget of the Department for Business, Energy & Industrial Strategy (BEIS), BBSRC's mission is to "promote and support, by any means, high-quality basic, strategic and applied research and related postgraduate training relating to the understanding and exploitation of biological systems".^[1]

Structure

BBSRC's head office is at Polaris House ^[2] in Swindon - the same building as the other councils of UK Research and Innovation, AHRC, EPSRC, ESRC, Innovate UK, MRC, NERC, Research England and STFC, as well as the UKSA. Funded by Government, BBSRC invested over £498 million in world-class bioscience in 2017-18. BBSRC also manages the joint Research Councils' Office in Brussels - the UK Research Office (UKRO).

History

BBSRC was created in 1994, merging the former Agricultural and Food Research Council (AFRC) and **taking over the biological science activities of the former Science and Engineering Research Council (SERC).**^[3]

Chairs

- Sir Alistair Grant (1994-1998)^[4]
- Dr Peter Doyle CBE (1998-2003)
- Dr Peter Ringrose (2003-2009)
- Prof Sir Tom Blundell FRS (2009–2015)
- Prof Sir Gordon Duff (2015–present)^[3]

Chief Executives

- Prof (now Sir) Tom Blundell FRS (1994 -1996)
- Prof Ray Baker CBE (1996-2002)
- Prof (now Dame) Julia Goodfellow CBE (2002-2007)
- Prof Douglas Kell CBE (2008–2013)
- Dr Jackie Hunter CBE (from 21 October 2013)
- Prof Melanie Welham FRSB (2016-2018)^[3]

Executive Chairs

- Prof Melanie Welham FRSB (2018–present)^[5]

Governance and management

BBSRC is managed by the BBSRC Council consisting of a Chair (from 2015, **Professor Sir Gordon Duff**), an Executive Chair (**Professor Melanie Welham**) and from ten to eighteen representatives from UK universities, government and industry. The Council approves policies, strategy, budgets and major funding.

A Research Panel provides expert advice which BBSRC Council draws upon in making decisions. The purpose of the Research Panel is to advise on:

- the development and implementation of the Council's strategic plans
- the competitiveness, relevance, economic impact, and societal considerations of the science and innovation activities funded by BBSRC
- opportunities for partnership with national and international organisations

Boards, panels and committees

In addition to the Council and the Research Panel, BBSRC has a series of other internal bodies for specific purposes.

- Appointments Board
- Remuneration Board
- Strategy Advisory Panels - eight Panels advise and report to the BBSRC Executive Chair
- Research Committees - five Committees award research grants in specific science areas

Institutes of BBSRC

The Council strategically funds eight research institutes in the UK, and a number of centres (BBSRC: Institutes and centres (<http://www.bbsrc.ac.uk/organisation/institutes/>)).

The Institutes are tasked with delivering innovative, world class bioscience research and training, leading to wealth and job creation, generating high returns for the UK economy. They have strong links with business, industry and the wider community, and support policy development.

The institutes' research underpins key sectors of the UK economy such as agriculture, bioenergy, biotechnology, food and drink and pharmaceuticals. In addition, the institutes maintain unique research facilities of national importance.

- Babraham Institute (BI) (Cambridge)
- Earlham Institute (EI) (formerly The Genome Analysis Centre) (Norwich)
- The Institute of Biological, Environmental and Rural Sciences (IBERS) part of Aberystwyth University, (Aberystwyth)
- John Innes Centre (JIC) (Norwich)
- The Pirbright Institute (Pirbright) (Norwich), formerly the Institute for Animal Health (IAH) (Norwich)
- Quadram Institute (Norwich)
- The Roslin Institute (RI), part of the University of Edinburgh, (East Lothian)
- Rothamsted Research (Harpenden and North Wyke)

Other research institutes have merged with each other or with local universities. Previous BBSRC (or AFRC) sponsored institutes include:

- Institute of Grassland and Environmental Research (IGER - Aberystwyth), merged with the University of Aberystwyth 2008
- The Roslin Institute (RI - Edinburgh), merged with the University of Edinburgh 2008
- Letcombe Laboratory
- Long Ashton Research Station (LARS - Bristol)
- the Plant Breeding Institute (PBI - Cambridge)
- the Weed Research Organisation (WRO - Oxford)
- Silsoe Research Institute (SRI - Bedfordshire) was closed in 2006.
