

Windows Server Internet Information Services Library

Microsoft.Windows.InternetInformationServices.CommonLibrary .. 6.0.6658.0 (Management Pack)

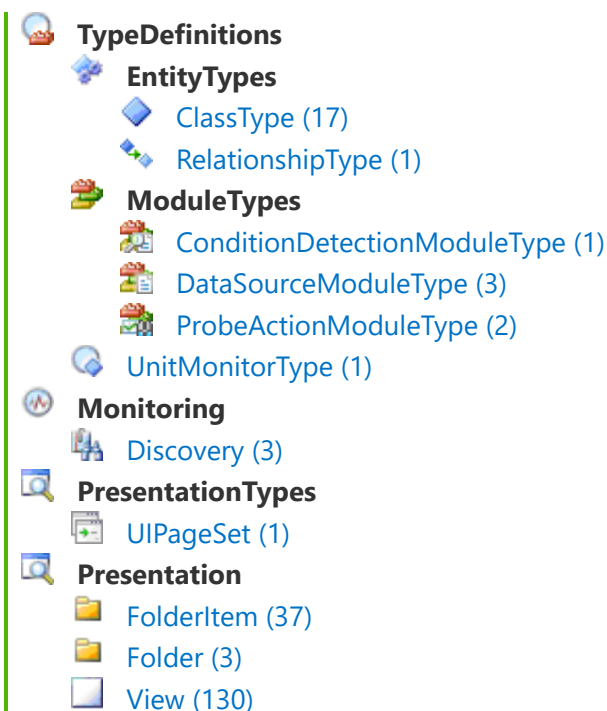

Microsoft Windows Server Internet Information Services Library: This management pack is the library management pack that defines all of the features and components that are common to all versions of Windows Server Internet Information Services.

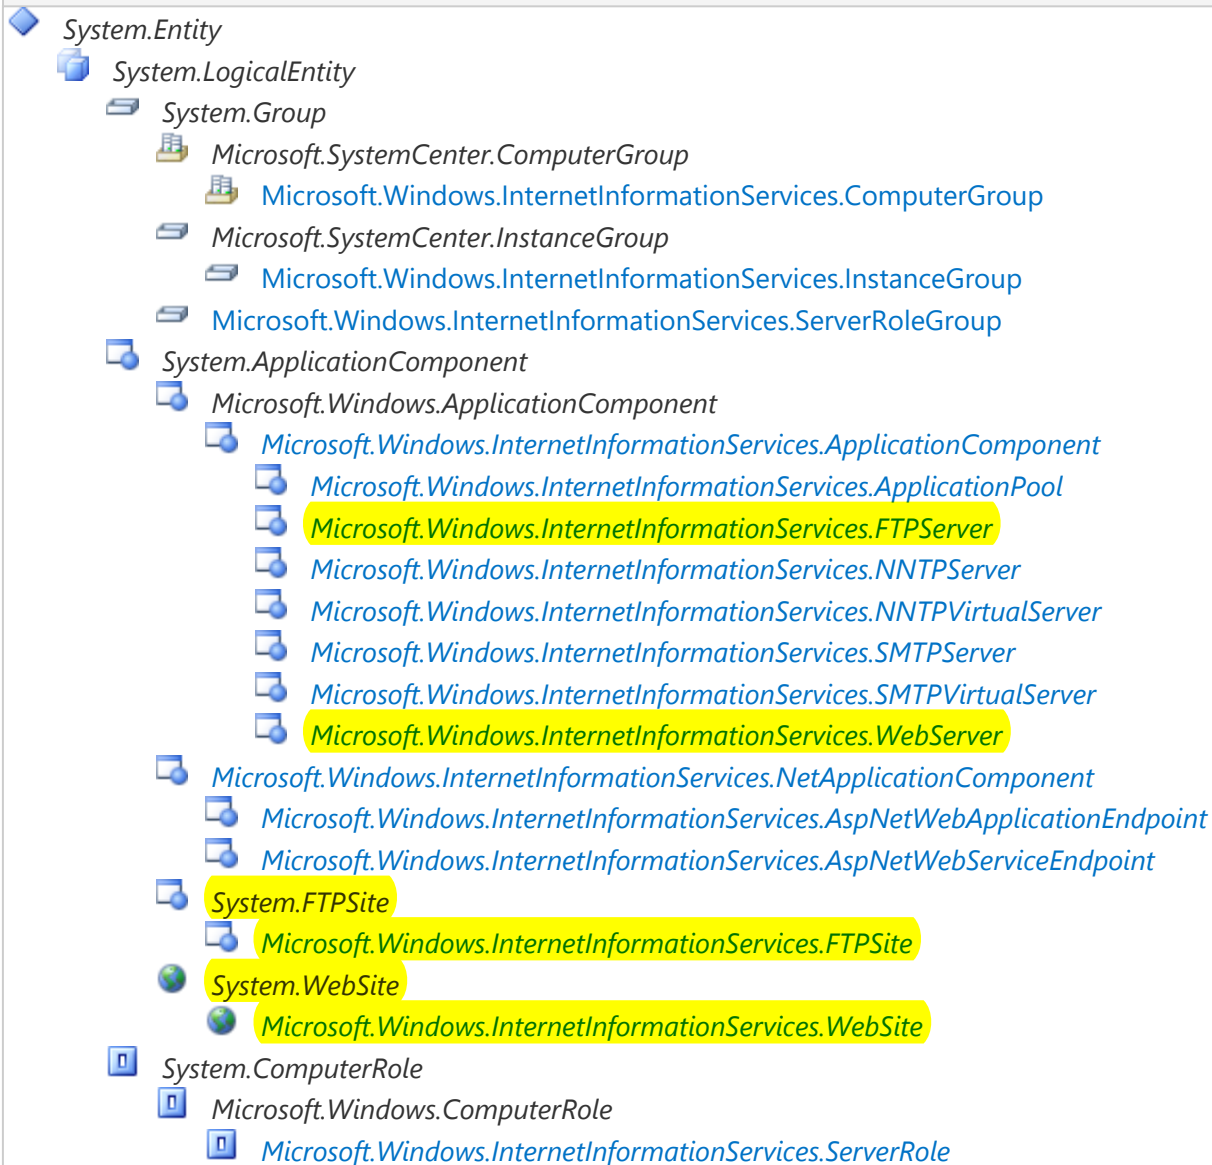

-

Summary

The Microsoft Windows Internet Information Services Library Management Pack provides the base monitoring related features (Managed Entities, Groups, Discovery, etc) that are required to monitor Internet Information Services Servers. This Library Management Pack must be imported before or during the import of the version specific Management Pack for Internet Information Services (for example; Internet Information Services 2003).

Management Pack Elements

Classes (17)

	DisplayName	ID	Base Class
	IIS Application Component	Microsoft.Windows.InternetInformationServices.ApplicationComponent	Microsoft.Windows.Applic
	IIS Application Pool	Microsoft.Windows.InternetInformationServices.ApplicationPool	Microsoft.Windows.Interr
	ASP.NET Application Endpoint	Microsoft.Windows.InternetInformationServices.AspNetWebApplicationEndpoint	Microsoft.Windows.Interr
	ASP.NET Web Service Endpoint	Microsoft.Windows.InternetInformationServices.AspNetWebServiceEndpoint	Microsoft.Windows.Interr

11/22/2020	Windows Server Internet Information Services Library (Microsoft.Windows.InternetInformationServices.CommonLibrary)		
	IIS Computer Group	Microsoft.Windows.InternetInformationServices.ComputerGroup	Microsoft.SystemCenter.C
	IIS FTP Server	Microsoft.Windows.InternetInformationServices.FTPServer	Microsoft.Windows.Intern
	IIS FTP Site	Microsoft.Windows.InternetInformationServices.FTPSite	System.FTPSite
	IIS Instance Group	Microsoft.Windows.InternetInformationServices.InstanceGroup	Microsoft.SystemCenter.I
	ASP.NET Application Component	Microsoft.Windows.InternetInformationServices.NetApplicationComponent	System.ApplicationComp
	IIS NNTP Server	Microsoft.Windows.InternetInformationServices.NNTPServer	Microsoft.Windows.Intern
	IIS NNTP Virtual Server	Microsoft.Windows.InternetInformationServices.NNTPVirtualServer	Microsoft.Windows.Intern
	IIS Server Role	Microsoft.Windows.InternetInformationServices.ServerRole	Microsoft.Windows.Comp
	IIS Server Group	Microsoft.Windows.InternetInformationServices.ServerRoleGroup	System.Group
	IIS SMTP Server	Microsoft.Windows.InternetInformationServices.SMTPServer	Microsoft.Windows.Intern
	IIS SMTP Virtual Server	Microsoft.Windows.InternetInformationServices.SMTPVirtualServer	Microsoft.Windows.Intern
	IIS Web Server	Microsoft.Windows.InternetInformationServices.WebServer	Microsoft.Windows.Intern
	IIS Web Site	Microsoft.Windows.InternetInformationServices.WebSite	System.WebSite

Relationship Types (1)

	DisplayName	ID
	Microsoft Windows Internet Information Services Server Role Group Contains Microsoft Windows Internet Information Services Server Role Instances	Microsoft.Windows.InternetInformationServices.ServerRoleGroup.Contains.Microsoft.Windows.InternetInf

ConditionDetection Modules (1)

--	--	--	--	--

	DisplayName	ID	Isolation	Accessibility
	IIS Log filter	Microsoft.Windows.Server.IIS.IISLogFilter	Any	Internal

DataSource Modules (3)

	DisplayName	ID	Isolation	Accessibility
	IIS Discovery data source	Microsoft.Windows.Server.IIS.IISDiscoveryDataSource	Any	Public
	IIS Log data source	Microsoft.Windows.Server.IIS.IISLogDataSource	Any	Internal
	IIS Site State data source	Microsoft.Windows.Server.IIS.IISSiteStateDataSource	Any	Internal

ProbeAction Modules (2)

	DisplayName	ID	Isolation	Accessibility
	IIS Discovery probe	Microsoft.Windows.Server.IIS.IISDiscoveryProbe	Any	Internal
	IIS Site State probe	Microsoft.Windows.Server.IIS.IISSiteStateProbe	Any	Internal

Unit Monitor Types (1)

	DisplayName	ID	Accessibility	Support Monitor Recalculate
	Check Site State	Microsoft.Windows.InternetInformationServices.CheckSiteState	Public	False

Discoveries (3)

	DisplayName	ID	Target
	Populate Microsoft Internet Information Services Server Computer Group	Microsoft.InternetInformationServices.ComputerGroupDiscovery.Rule	Microsoft.Windows.Inter
	Populate Microsoft Windows Internet Information Services Instance Group	Microsoft.Windows.InternetInformationServices.InstanceGroupDiscovery.Rule	Microsoft.Windows.Inter
	Populate Microsoft Windows Internet Information Services Server Role Group	Microsoft.Windows.InternetInformationServices.ServerRoleGroupDiscovery.Rule	Microsoft.Windows.Inter
