The Rockefeller Foundation 2004 Annual Report

PRESIDENT'S LETTER

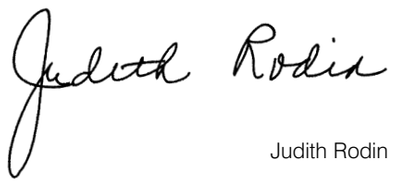

Stepping into the presidency of the Rockefeller Foundation in early 2005 has been at once exhilarating and humbling. While this has been a period of substantive accomplishment, we must now build on that recent work and on our great history and legacy as we move the Foundation forward.

It is a legacy that sets an impressive standard for new achievement. Over the course of a 92-year history, the Foundation and its many partners established the first schools of public health, developed a vaccine against yellow fever, funded the global agricultural modernization known as the Green Revolution, created fellowships that have helped train hundreds of scientists, medical practitioners and public servants in many parts of the developing world, and provided early and persistent support for educational equality in the United States. Over that time, the Foundation has been true to a steady vision of addressing the root causes of global problems through a combination of pursuing deeper knowledge and creating practical solutions.

This annual report is testimony to both that breadth of effort and steadiness of vision. It describes grants for soil improvement and crop breeding and for the creation of agricultural markets in Africa that have begun to undo the isolation and seeming powerlessness of small farmers in remote communities. AIDS clinics in Asia and Africa are making a life-and-death difference in places previously untouched by hope. The transformation of elementary and secondary education in Kenya and Uganda finally open the prospect of universal public education there—a once-distant goal that much of the rest of the world takes for granted. In the United States, our investments in community development and new partnerships to end long-term homelessness through supportive housing now fuel ambitions that were unimaginable a few decades ago when those movements first started to grow.

Yet for all its steadiness of vision, the Foundation has likewise distinguished itself by adapting, re-examining its environment, adjusting strategy and continually searching for new understanding that might lead to new ways of working. That adaptability, in an ever-changing world, is the most pressing responsibility for anyone stepping into the presidency of this institution. We will be judged partly by our alertness to these signals and by the inventiveness with which we respond to them.

Our business is promoting change, and much of our work consists of building and improving institutions. Those aspirations apply as much within our walls as in the communities where we work. Proud as I am to present this report—full of work that I can praise unreservedly—I am likewise determined that in the coming years we will expand and enrich this record of accomplishment, build beyond it and rise to whatever demands the new century will place on us and on philanthropy as a whole.

2004 – THE YEAR IN REVIEW

In the new global marketplace of instant communication and capital flows, a widening gulf divides those who are connected to the world's intricate exchange of information and wealth from those who are not. More and more, skillful participation in the worldwide network of knowledge and capital is an essential condition of prosperity. An inability to take a place in that network, or an inability to make full use of the place one occupies, is a near guarantee of material privation and cultural isolation. Seen in that light, the Rockefeller Foundation's commitment to *the poor and excluded* is not merely a two-part nod to separate realms of human need, one economic and the other social. It is a recognition that, today more than ever, exclusion *is* poverty, and vice versa. Addressing one demands a careful reckoning with the other, or else neither is likely to budge.

The mechanics of exclusion and isolation work in myriad ways, often through institutions and systems whose purposes (and many of whose effects) are largely benign. Intellectual property and trade policies that protect the inventors of new products and research methods surely encourage innovation and inquiry. But their side effects include barring the gates to those same products and processes for whole regions that lack the wealth and markets needed to gain entry. Widening channels of travel, information and labor mobility create unprecedented opportunity for people to make better lives in faster-growing, labor-hungry parts of the world. But they also make it far more likely that the places left behind will lose more of their precious store of talent and enterprise in an accelerating brain drain. Even when products, technologies and work become available in poorer countries, the scarcity of capital, education and leadership in those countries may mean that these benefits won't end up—or won't be put to effective use—in the places where they are most needed.

To be sure, globalization has brought real advantages even to some countries that had largely been locked out of earlier waves of development. And in any case, globalization and its side effects make up just a portion of the issues on which we focus our work. Still, the battle against exclusion and isolation—whether from product and labor markets, from sources of innovation and technological advancement, from advances in health care, from artistic and scholarly exchange, or from public forums where policy in all these areas is hammered out—is a crucial thread uniting much of our thought and effort. Creating more opportunity to participate in these global networks, and to derive greater benefit from them, is a fundamental ambition of all our programs. Because no annual report can cover the full wealth of ideas, activity and investment that make up the Foundation's year, we have sought to view 2004's efforts through the clarifying lens of one idea that motivates us, and that rests at the very core of our mission: expanding the opportunities for poor people and communities to better participate in the global web of information, creativity, care and commerce.

The Science and Economics of Food Security

For decades—at least since the Green Revolution of the 1960s and '70s—funders of international development programs have been frustrated by the difficulty of bringing the benefits of higher crop yields to many of the world's poorest communities and farmers. This selective exclusion from the benefits of agricultural science has been especially pronounced in sub-Saharan Africa, for a tangle of reasons that include complex weather conditions, limited government capacity, scant infrastructure, and markets for both inputs and crops that remain concentrated in cities and coastal areas.

One lesson of this experience has been that development and distribution of seeds and soil nutrients needs to be accompanied by stronger market forces. Our grants and investments therefore increasingly focus on building a network of small businesses that develop, package and distribute inputs for small farmers, and on creating remunerative outlets for the larger harvests that result.

For example, one crucial missing factor in rural markets has been a lack of community-level retailers who can get seed and fertilizer from regional wholesalers into the hands of small-scale farmers. Among our investments in the past few years have been support for networks of family shops in rural villages—"stockists" who have traditionally sold basic household necessities, usually in their homes—to help them become retailers of essential farming inputs to their neighbors. We have supported a team of nongovernmental organizations that help train and supply the stockists, who in turn help to train farmers in how to use the inputs most effectively.

At the other end of production, we have supported cereal banks to collect, grade and market surplus grain in bulk, thus getting a better return for farmers and ensuring that excess product gets to processors who can turn it into usable products. Some of our philanthropic venture-capital investments also go to small or rural processing firms that create end products, such as animal feed, that farmers need and can afford.

Another lesson has been that only Africans can ultimately solve Africa's problems. Our main philanthropic goal must therefore be to support and expand the indigenous expertise—individual, institutional and society-wide—that can advance the work of development. One example is in plant breeding. There were, as of the end of 2004, fewer than 100 Ph.D. plant breeders working in national crop-improvement programs throughout all of southern and eastern Africa—a region of some 250 million people whose economy is dominated by agriculture. Our commitment to academic centers for the doctoral training of additional plant breeders will roughly double the available expertise. That will mean not only more scientists available to work with local farmers on their specific problems, but also stronger research institutions that can continue to draw more people into the field and encourage them to stay.

Advancing Health Amid Poverty

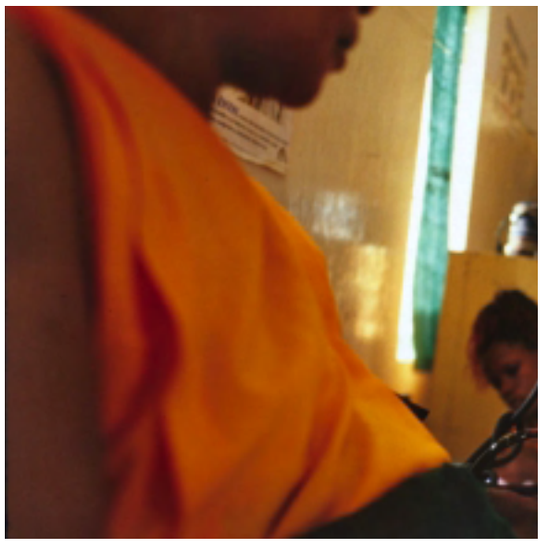

Just as in agriculture, progress in health care in poor societies likewise depends on more than just developing new products—in this case, more effective vaccines, drugs and treatments. Even as some companies have begun to provide free or discounted medicines, many poor, isolated and rural areas still have no way of delivering these products to everyone who needs them, administering and supervising their use, and ensuring that supplies continue uninterrupted once treatment begins.

Thus the Foundation's commitment to global health begins with investment in five major public/private partnerships advancing research on several of the most urgent needs in developing countries, particularly vaccines for AIDS and pediatric dengue fever, microbicides to protect women from sexually transmitted diseases, and drugs to fight malaria and tuberculosis. Of these, the quest for microbicides and malaria treatments seem closest to fruition in the next few years, though all of them are still some distance from proving their full potential. Still, consider the prospect of a microbicides breakthrough: potentially arming women with a defense against HIV transmission, one they can control and administer themselves. It could profoundly alter the epidemiology of AIDS and other sexually transmitted diseases, which are among the world's most discriminatory yet preventable causes of death. Yet this is precisely the kind of low-return investment (at least initially) on which unprompted market forces have been too weak to bring about fundamental change. It is precisely the right terrain for global, collaborative philanthropy.

Yet beyond the development of new drugs, the challenge of providing adequate health care and prevention is an urgent problem in poor societies, one that the new global economy threatens to worsen rather than improve. "On the front line of human survival," says a report from a Foundation-sponsored project called the Joint Learning Initiative, "we see overburdened and overstressed health workers—too few in number, without the support they so badly need—losing the fight. Many are seeking a better life and more rewarding work by departing for richer countries." Based partly on the lessons of the Joint Learning Initiative, we have lately dedicated more of our grantmaking to international efforts that support countries in formulating complete health workforce strategies aimed at training and retaining dedicated professionals.

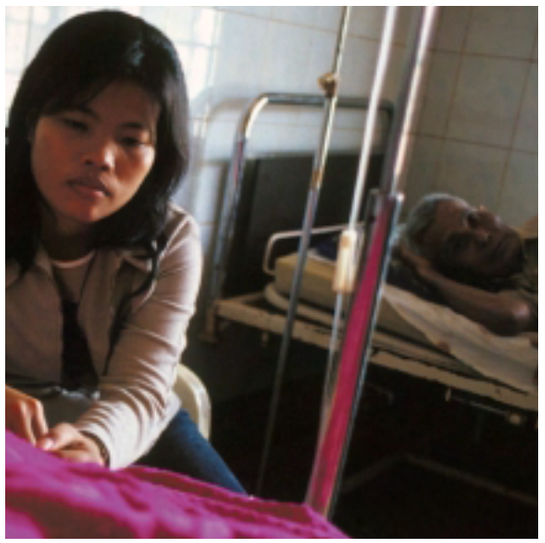

Yet effective delivery of care and treatment isn't solely the work of the health professions. Just as important is the web of social, tribal or religious organizations that provide information and basic human services to families who are otherwise unconnected with modern or urban health systems. Several Foundation efforts are therefore beginning to reinforce and link institutions of civil society working in health care, especially HIV/AIDS, in East Africa and the Mekong sub-region of Southeast Asia, where we have regional offices.

The sheer scale of the health problems afflicting countries on the margins of globalization are apt to encourage despondency, even fatalism, among some observers. Yet more and more, our understanding of these challenges, and a gathering consensus about how to address them, provide reasons for hope and continued effort. And in any event, we know for certain that in areas of deepest need, even marginal improvements save thousands of lives and build a platform on which future improvements can rise.

Fostering Communities That Work

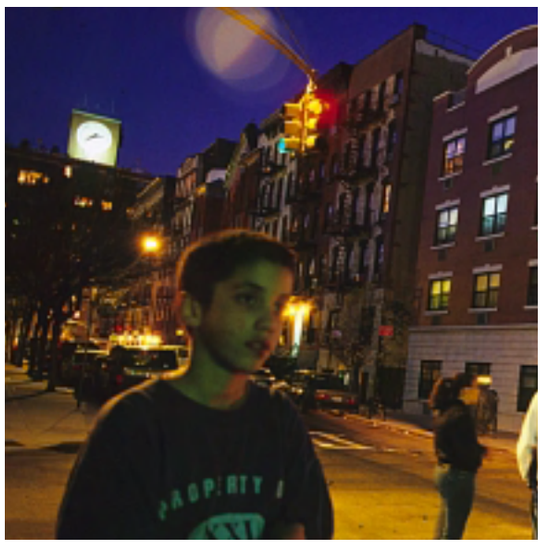

Compared with the depths of poverty, hunger and disease around the world, it is deceptively easy to presume that the problems of poverty and exclusion within the United States are much simpler and more easily remediable than those abroad. Indeed, we are told more and more that, in developed countries, market forces will efficiently ease the pains of adjusting to the global economy, and that these forces will work best if left to function without interference from government or philanthropy.

Yet the more closely current market trends are examined, the less encouraging is the picture they yield. Over the last few decades, the world of stable, lifelong jobs has passed; more and more jobs are temporary, part-time, or carry none of the traditional protections of full-time employment, such as health insurance or pensions. Nearly a quarter of the American work force, some 27.5 million employees, earn too little to support a family of four above the poverty line even if working full time and year-round (which many jobs don't allow). Especially among the lowest-paid and least-skilled employees, work in America has more and more become an adjunct of poverty, not a means of escape from it.

Our goal is therefore to understand this changing environment better—both to research its causes and trends and to consider ways of alleviating its harsher consequences. In our various educational and market interventions, the result we hope for is a set of lessons about effective ways of creating opportunity and overcoming obstacles. These lessons can then become the basis of wider policy discussions. In virtually all of our grants, domestic and international, it is the knowledge generated by our work that is our primary contribution.

In some cases, for example, Foundation grants have aimed at promoting employment opportunity and advancement by bringing workforce development services directly into public-housing complexes—an effort that has been shown to pay off in increased earnings. In other cases, we are supporting an expansion of supportive housing for people with long-term disabilities that have left them chronically homeless. After some two decades of experimentation, the combination of housing and supportive services for this population seems to offer a genuine hope of ending long-term homelessness for good, and replacing it with stable, permanent housing and the prospect of an independent life.

In a long tradition of Rockefeller Foundation funding for equity in American public education, the Foundation has in recent years supported a group of organizations pursuing research and public engagement to examine more equitable state funding for schools, particularly in New York, Wisconsin and California. The Foundation's main role in this effort has been to support research that documents the wide disparities in educational quality available to children in poorer and wealthier districts, and means of addressing them. It is cause for reflection that, more than 50 years after the moral clarity of the Supreme Court ruling in Brown v. Board of Education, the court system remains a primary avenue for ensuring that a poor, urban child is provided the same basic learning as for more advantaged youngsters in outlying areas.

An Expansive Approach to Creativity and Culture

For much of its history, the Rockefeller Foundation has found compelling reason to invest in the nonmaterial forces that draw people and cultures together and promote creative thought and understanding: the arts and humanities, including the study of religion. Among many other Foundation efforts in these fields is a long commitment to regional and area studies—support for programs that focus attention on poorly understood or marginalized cultures and forms of expression. Another long-standing theme has been support for individual artists, the underlying source of any society's creative self-expression. The work of emerging artists has always been a difficult field for philanthropy and government. It is impossible for any funder to know, in the heat of emerging new work, what will endure, what will inspire and what will provoke the controversy, derision or hostility that is always the occupational hazard—and sometimes the intent—of the inventive artist.

The Foundation's commitment to creative exploration and to global and national cultural awareness is not an adjunct to our work in development, health and science, but a necessary complement. In the current international climate, it verges on the obvious to note that economic, social and scientific advances proceed or falter in direct relation to their ability to engage the cultural, moral and religious sensibilities of each affected community. Further, the Foundation's work in the arts and humanities has also been an often indispensable way of making sure that our own grantmaking is responsibly grounded in, and takes account of, the values, beliefs and aspirations of the people among whom we work.

Still, the particular form of this grantmaking has changed profoundly over time. It has been necessary to re-examine our work in the arts and humanities periodically, constantly recalibrating the relationship of that work to the Foundation's other activities and goals. In the next few years, for example, we expect to take increasing account of the global dynamics of cultural encounter, exchange and understanding. We will also look for ways of strengthening scholarly and curatorial approaches to the current needs of local, national and regional cultures. And, as in other branches of our work, these threads will be woven together in regional offices, especially in Africa and Southeast Asia, with careful attention to the opportunities and interests of practitioners and communities in each place.

A Regional Lens on the World

The four programs we have just described are one way of looking at the Foundation's activities. Another is to consider the three regions of the world in which we concentrate a significant portion of our work: the Greater Mekong Sub-region of Southeast Asia, eastern and southern Africa, and the families whose lives are divided by the U.S.-Mexican border—what we call the North American Transnational Communities. In each of these regional programs, we focus our attention on the same four themes we have just discussed, but in ways that apply and integrate those lines of work to be of maximum benefit to the people of each region. We also devote particular interest in each place to the people and influences that span national boundaries—migrant communities moving among the nations of the region, regional agriculture and markets, natural conditions that are indifferent to official borders, ethnic and cultural groups whose homes aren't correlated with political lines on maps.

The importance of this regional perspective lies partly in the blurring of boundaries in an increasingly mobile and integrated world. But a considerable reason for our interest in regional issues is also their importance in determining whether people will be included or left out of the web of communication, commerce and culture being woven around them. The ability to grow food; the likelihood of suffering from epidemics or environmental change; the consequences of belonging to a particular culture, caste or religion—all these issues tend to impinge most severely on the most vulnerable communities. Yet often none of these factors is under the control of any single government, and yet may determine whether a community can participate in regional and global opportunities or whether it is effectively excluded.

Contending With Change in Southeast Asia

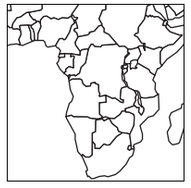

The Greater Mekong Sub-region—encompassing Cambodia, Vietnam, Laos, Myanmar, Thailand and China's Yunnan Province—is a case in point. After decades of armed conflict, a period of comparative peace in the area is leading to widening economic liberalization, intergovernmental and cultural cooperation, and the formation of cross-border markets for goods, labor and raw materials. In the midst of these largely hopeful trends, of course, come new pressures on the natural and social environment, with far-reaching consequences for traditional livelihoods and ways of life. In the process, disparity of incomes and opportunity is widening among neighboring countries and between educated, urban, mobile workers and those in poorer, more remote areas or in traditionally marginalized ethnic groups. Among the results have been unprecedented flows of migrants and refugees across borders and a corresponding surge in interactions among dispersed families and communities. Along with these disruptions has come, almost inevitably, incursions of crime, drugs and infectious diseases, including soaring rates of HIV/AIDS.

In this context, our Southeast Asia Regional Program has placed its greatest emphasis on understanding the emerging patterns and disparities confronting the sub-region and its constituent peoples, developing capacity to respond, highlighting policy options and sharing knowledge more broadly among all those affected. Our regional efforts combine support for research, grants to strengthen educational and training institutions, support for collaboration among institutions and indigenous organizations, and help in bringing information on successful efforts to the attention of policymakers and the public. Some of our regional grants have been devoted to reinforcing institutions and activities that foster intercultural understanding and communication, such as journalism and museums.

Of particular importance to our work have been the pressures on the Mekong's many marginalized minority groups, especially in relation to their vulnerability to disease and food shortages. More than 30 percent of the region's population is made up of members of some 350 distinct ethnic and cultural minorities, many of whom are not recognized as citizens of the countries in which they reside, and some of whom have been compelled by natural or political circumstances to migrate to countries in which they are not officially welcome. The result is a system of legal exclusions that prevents whole communities from taking part in the economic, political and social life of a region where they have lived since time immemorial. Part of our grantmaking has therefore been devoted to gathering and circulating information on these groups and the consequences of their exclusion.

Supporting New Approaches to Governance in Africa

In large sections of eastern and southern Africa—particularly in places where ethnic conflict, persecution and political turmoil don't stand in the way—several national governments have begun to rethink the way state services are rendered and power is distributed across their countries. In the strongest cases, the consequences have been profound and encouraging: increasing delegation of fiscal and policy control to local officials, more flexible and responsive use of power in national capitals, and more tangible benefits to residents of poor areas and rural communities.

This opening up of government is partly the result of a new generation of progressive, better-trained leaders emerging in several countries. In helping to learn from and build on these trends, the Rockefeller Foundation has focused much of its attention on three areas: (1) development of data and communication systems that can equip local and national governments with the information they need to make effective decisions; (2) investment in universities and professional schools to help expand the pool of well-trained leaders in public and nongovernmental agencies; and (3) help to build and strengthen the networks linking people and organizations involved in these sweeping changes. The role of education and information in all these efforts is a crucial unifying theme.

Another Rockefeller Foundation priority in recent years, likewise linked to education, has been expanding educational opportunity for Africa's women and girls. Of all the factors that determine a newborn child's chances of survival and later development, nutrition and health, among the most powerful is the education of that child's mother. Even a very basic education for an African girl or mother greatly improves the likelihood that her children—including her daughters—will enjoy better health and receive an education at least as good as their mother's.

Understanding Transnational Communities

Like earlier waves of immigrants into the United States, recent migrants from Mexico have contributed in countless ways to American society while also maintaining connections with relatives and communities in their native country. But more than for any previous immigrant group, Mexican Americans have been able to remain close to, even active in, the political and cultural life of their original cities and villages even while establishing roots in the United States. The ease of travel and communication in both directions has made it possible to preserve strong connections to community and family that stretch across political boundaries and thousands of miles of geographic separation. Among other forms of transnational exchange among Mexican immigrants has been the increasingly common practice of remitting a portion of the U.S. income they earn back to the families and localities from which they came. These remittances have grown so large in the aggregate that by now they are at least equivalent to oil revenues as a source of Mexico's foreign income.

Increasingly, these remittances appear to be more than private transactions solely between members of the same family. Over the years, Mexicans in many parts of the United States have come together in associations based on the states and localities from which they emigrated. Increasingly, these hometown associations have begun raising and pooling money for projects to improve their Mexican communities. Though most of the associations are individually small, the projects to which they direct their funds are often large developments like roads, water and sewer systems, churches, and schools—projects with significant consequences for short-term employment (during construction) and for longer-term economic and cultural development.

The bonds of family and community extending across the U.S.-Mexico border are not purely economic. Along with more-frequent travel and communication have come changes in the way families think about the decision to emigrate and how they preserve family ties across borders. Little by little, the culture and values of each country come to influence and blend with those of the other—within individual families at first, but inevitably in the wider communities where they live as well. The religious and civic organizations in which immigrants are active, both in the United States and in their places of origin, naturally adapt to these new patterns and interests, becoming, to some degree, transnational themselves.

While it is virtually certain that transnational ties and hometown associations are a sign of some important trends in the relationship between Mexican and U.S. communities, just where those trends might lead is still unknown. Might these organizations become important vehicles for helping lower-income, recent immigrants accommodate to life in the United States while supporting families and communities back home? Could they become a constructive response to the continuing poverty of many Mexican-American communities? And as more Mexican families escape such poverty and accumulate assets in the United States, will their connections to Mexican life remain strong and become a source of deepening influence, or gradually fade, as has happened with earlier waves of immigrants?

The Foundation's grants in this area are aimed, for now, at learning more about the effects of these new cultural, social and economic relationships in both countries. Our goal is to learn, first, about the scope and organization of transnational life across this one border and, second, to see if it yields lessons for transnational communities elsewhere.

Global Rule-Making and the Poor

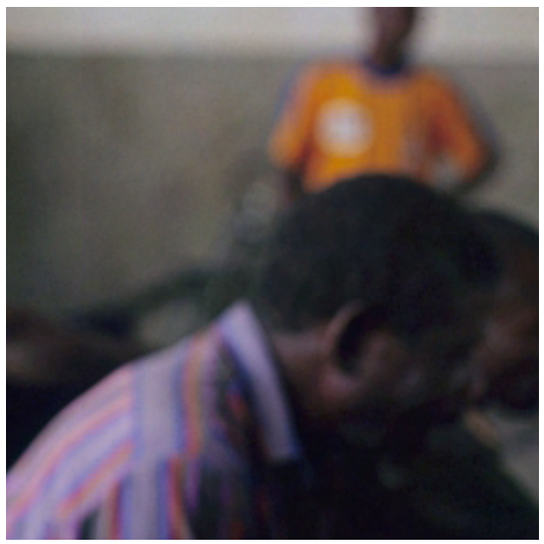

Among the means by which poor nations and communities remain excluded from full participation in global society are some of the very rules, bodies and practices set up to promote globalization and increase its benefits. Participating in regional and global negotiations is hugely demanding in time, cost, expertise and personnel, among other things. It is unlikely that a small, struggling society can participate on an equal footing with large, developed nations—even when procedures are scrupulously fair and issues of equity are intentionally thought through.

To gain the benefits of worldwide interaction, innovation and growth, poor countries therefore need a stronger voice in global policy- and rule-making. That includes not just formulating strategy and negotiating more effectively at multilateral meetings. It also involves the ability to formulate policies within each country to deal effectively with international competition and trade, cultural influences from abroad, the promise and perils of technology, and other challenges of advancing globalization. Those policies, and the development needs they address, will necessarily be different from country to country, and in some cases among regions and communities within countries. Reckoning with all these demands presupposes a keen ability to marshal information and expertise, both within governments and more broadly from civil society in each country and region.

One significant portion of our more recent work has therefore focused on helping developing countries grapple with global issues on which much of their future depends—such as science and technology, the restrictions and protection of intellectual property, or the rules negotiated to govern international trade—and on building the knowledge and information systems that undergird effective policy-making and negotiation. In one cluster of grants, for example, we have sought ways of informing the debate in developing countries over the adoption and use of science and technology for development. In other cases, we have supported the collection and dissemination of information on trade, technology and other issues in globalization to help arm countries and nongovernmental organizations with better information to advance their interests.

The effect of any one of these grants, or even of any one foundation, will probably be modest, though taken together, they may well contribute to a gradual change in the ability of developing countries to participate more effectively in international debates. Recent years have seen a steadily rising interest and commitment among international philanthropy, donor agencies and national governments in helping to expand the circle of participation, influence and growth associated with globalization. Results are beginning to appear, in the form of new organizations to promote the sharing of knowledge and the extension of scientific and industrial progress, new forms of public and private collaboration, and more ambitious attempts to widen the influences in international policy discussions. Whether these efforts will be effective, and whether their results will genuinely benefit people and communities who are now relegated to the margins of commerce and technology, may be the most important question facing the world—and especially global philanthropy—as the 21st century unfolds.

PROGRAM GOALS

ROCKEFELLER FOUNDATION IN BRIEF

MISSION

The Rockefeller Foundation is a knowledge-based global foundation with a commitment to enrich and sustain the lives and livelihoods of poor and excluded people throughout the world.

DATA

- Founded in 1913.
- $3.2 billion in assets (December 31, 2004).
- $124 million in grants, fellowships and programmatic investments in 2004.
- 186 employees worldwide.

HISTORY

- Established the first schools of public health.
- Provided early support in the United States for education "without distinction of sex, race or creed."
- Developed the vaccine to prevent yellow fever.
- Supported the establishment of international cultural institutions, including Lincoln Center in New York City and the Berkshire Music Festival at Tanglewood in western Massachusetts.
- Funded the modernization of agriculture in the developing world, known as the Green Revolution.

OFFICES

Headquarters in New York City (United States), regional offices in Bangkok (Thailand), Nairobi (Kenya) and San Francisco (United States), and a conference and study center in Bellagio (Italy).

PHILANTHROPIC APPROACH

- **Improving Opportunities for Poor People.** We are committed to working with poor people to achieve lasting improvements in their lives.
- **Using Knowledge.** We generate new, and harness existing knowledge to address the complex challenges faced by poor people.
- **Global.** We view poverty globally and are committed to working with poor people on the ground in targeted regions of the world.
- **Focusing on Lives and Livelihoods.** Our work addresses the everyday challenges to poor people's lives and livelihoods.

PROGRAMS

- Creativity & Culture: Promoting arts, humanities and cultural institutions.
- Health Equity: Improving the health of poor and marginalized people.
- Food Security: Advancing developing country agriculture.
- Working Communities: Improving employment, education and housing.
- Global Inclusion: Extending globalization's benefits to poor people.
- Africa Regional Program: Improving the capacity of people and institutions.
- Southeast Asia Regional Program: Responding to emerging cross-border challenges.
- North America Regional Program: Focusing on transnational communities.
- Assets and Capacities: The Bellagio Study and Conference Center, Program Venture Experiment and The Philanthropy Workshop.

The Foundation seeks opportunities that will advance its long-term goals of improving the lives of poor and excluded people and the communities in which they live. Grants are made through our primary programs which focus on: eradicating poverty and hunger, minimizing the burden of disease, improving employment opportunities, increasing the availability and quality of housing and schools, stimulating creativity and cultural expression, and extending globalization's benefits to poor people.

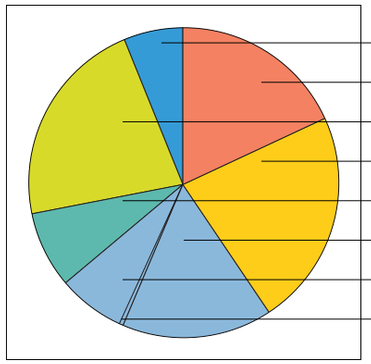

The "Program Goals" section of this report reflects Foundation goals and strategies in 2004. The Foundation periodically refines its strategies and programs to adequately respond to changes impacting poor and excluded people. To determine if your organization's project aligns with the Foundation's goals, please visit **www.rockfound.org.** You may then want to send a brief letter of inquiry addressed to the director of the subject area of interest, **The Rockefeller Foundation, 420 Fifth Avenue, New York, NY 10018.** Inquiries can also be sent electronically to the e-mail addresses on each program description page.

Letters of inquiry should briefly describe the issues that the proposed project would address; information about the organization's experience in the field; estimated budget for and expected duration of the project; and qualification of key personnel involved in the project. Please do not send attachments.

Letters of inquiry will be considered as they are received throughout the year. Inquiries take from six to eight weeks for review. Organizations submitting inquiries that Foundation staff think might contribute to a defined program will be asked to submit a full proposal.

As a matter of policy, the Foundation does not give or lend money for personal aid to individuals or, except in rare cases, fund endowments, or contribute to building and operating funds.

PROGRAM GOALS

CREATIVITY & CULTURE	$ 7,578,000
FOOD SECURITY	$ 22,651,000
HEALTH EQUITY	$ 27,157,000
WORKING COMMUNITIES	$ 28,044,000
GLOBAL INCLUSION	$ 10,030,000
REGIONAL PROGRAMS	$ 19,661,000
ASSETS & CAPACITIES	$ 8,843,000
PROGRAM VENTURE EXPERIMENT	$ 125,000
TOTAL	$ 124,089,000

CREATIVITY & CULTURE

PROMOTING THE ARTS, HUMANITIES AND CULTURAL INSTITUTIONS

Goal: To give full expression to the creative impulses of individuals and communities in order to enhance the well-being of societies and better equip them to interact in a global and dynamic world.

Artists, cultural workers and the institutions that support them are vital to community resiliency. They help people and their communities comprehend and articulate their needs and aspirations. A community rich in culture is better equipped to withstand and respond to the stresses of poverty, migration, violence and discrimination.

The Foundation supports cultural organizations, artists and humanists seeking to understand and interpret the interaction of people's beliefs and ideas in today's global world. We support scholarship in multiple disciplines including gender, ethnic and religious studies; and fund the presentation of traditional and contemporary artistic work focusing on the performing and media arts and digital media.

Inquiries: creativity@rockfound.org.

FOOD SECURITY

ADVANCING DEVELOPING-COUNTRY AGRICULTURE

Goal: To improve the lives of the rural poor through the generation of agricultural technologies, and support for institutions and policies that improve food security in areas of sub-Saharan Africa and Asia bypassed by the Green Revolution.

Nearly 3 billion people living in rural areas of developing countries depend on agriculture for their livelihoods. For these farming families, having enough food at all times to live normal active lives is a path out of poverty. And for their countries, adequate food production is an imperative of economic development.

The Rockefeller Foundation is supporting people, institutions and scientific innovation in sub-Saharan Africa and parts of Asia to dramatically increase food production by generating new crop varieties, developing more dependable and sustainable soil conservation and enrichment techniques, and improving access to markets where small farmers can buy seeds and fertilizer and sell any surplus harvest. The Foundation is also working with public- and private-sector partners to extend the benefits of new agricultural knowledge to those who need them most.

Inquiries: food@rockfound.org.

WORKING COMMUNITIES

IMPROVING EMPLOYMENT, EDUCATION AND HOUSING

Goal: To transform poor urban neighborhoods into working communities—safe, healthy and effective neighborhoods—by increasing the amount and quality of employment, improving the quality of all urban schools, and revitalizing poor neighborhoods through mixed-income community development.

To help ensure that all Americans, especially those from traditionally poor and underserved communities, can achieve stable livelihoods and become full and productive members of the community, the Rockefeller Foundation focuses on strategies to improve employment, provide quality education and foster decent, affordable housing.

The Foundation supports programs to improve wages and benefits at the low end of the labor market as well as training and placement in higher-wage growth-industry jobs with opportunities for mobility. We fund research and public engagement to address the education needs of low-income children; and support institutions and policies that promote affordable housing and mixed-income communities.

Inquiries: work@rockfound.org.

HEALTH EQUITY

IMPROVING THE HEALTH OF POOR AND MARGINALIZED PEOPLE

Goal: To reduce avoidable and unfair differences in the health status of populations.

Poor people—in both poor and rich countries—are sicker and die younger. They often live in areas with inadequate health systems and have not benefited from the dramatic scientific advances of the past century. For example, of the nearly 1,400 new drugs entering the market in the last quarter of the 20th century, just 16 were for tropical diseases or tuberculosis, which mainly afflict poor societies in huge numbers.

The Foundation supports programs to accelerate the development of vaccines and medicines for diseases like malaria, HIV/AIDS and tuberculosis that are associated with poverty. We fund research to determine strategies to increase the quantity and quality of trained health workers in developing countries. And the Foundation is supporting research to better understand and address the prevention, care and mitigation of the HIV/AIDS epidemic.

GLOBAL INCLUSION

EXTENDING GLOBALIZATION'S BENEFITS TO POOR PEOPLE

Goal: To help broaden the benefits and reduce the negative impacts of globalization on vulnerable communities, families and individuals around the world.

Poor people can more fully benefit from globalization's tremendous technological, economic and social changes if they can gain access and are adequately equipped to participate in decision-making processes affecting the future of their communities.

The Foundation supports the inclusion of poor people and their representatives in critical global dialogues around issues such as intellectual property, economic integration, and the adoption and appropriate use of technology. We also support The Philanthropy Workshop, a program to maximize new philanthropists' effectiveness in working with poor and excluded communities in developing countries.

AFRICA REGIONAL PROGRAM

IMPROVING THE CAPACITY OF PEOPLE AND INSTITUTIONS

Goal: To contribute to the revitalization of the African continent by building the required human and institutional capacity and providing critical information that will promote effective approaches to improving the lives and livelihoods of the poor.

Development that benefits the majority of Africans requires committed local and national leadership, better educational opportunities at all levels and policies that directly benefit poor people.

The Foundation supports the access to quality universal primary education with special attention to removing the barriers against girls' full participation. We are working to strengthen universities' ability to contribute to social, economic and political progress on the continent. We also fund research to improve the quality of local and national information needed on food, work and health to better understand and address the root causes of poverty.

The Foundation advances this work from its Africa Regional Office in Nairobi, Kenya.

SOUTHEAST ASIA REGIONAL PROGRAM

RESPONDING TO EMERGING CROSS-BORDER CHALLENGES

Goal: To enhance the capacity of people and institutions in the Greater Mekong Sub-region to better understand and respond to cross-border and intercultural challenges arising from regional integration.

Profound economic and social changes in the Greater Mekong Sub-region of Southeast Asia have led to trends such as migration, the cross-border spread of disease, and a disruption in the lives and livelihoods of marginalized, upland, ethnic communities.

Many of the challenges affecting the region go beyond political boundaries and cannot be addressed by national policies alone. Thus the Foundation is funding work to better equip local organizations to understand and respond to the impacts and opportunities of regional development, including efforts to better address the emerging health, food security and cultural needs of the region's most affected communities.

The Foundation advances this work from its Southeast Asia Regional Office in Bangkok, Thailand.

Inquiries: rf-bkk@rockfound.or.th.

NORTH AMERICA REGIONAL PROGRAM

FOCUSING ON TRANSNATIONAL COMMUNITIES

Goal: To support the well-being of the transnational poor by improving the understanding of livelihood choices and new forms of culture and identity.

Across the United States, Mexican and other migrants have assumed an increasingly vital economic, political and cultural role in their local communities. Migrant groups are also devising innovative ways to mitigate the stresses of their transnational experience and to catalyze economic development in their communities of origin.

The Foundation is supporting research to better understand the impacts of migration on the social, cultural and economic dynamics in rural communities in Mexico and major U.S. cities, as well as strengthening the capacity of migrants' organizations to contend with these issues.

The Foundation advances this work from its New York headquarters.

THE BELLAGIO STUDY AND CONFERENCE CENTER

The Bellagio Study and Conference Center, through its conference and residency programs, promotes achievements in scholarship, artistic creation and public affairs. Deliberately interdisciplinary, the Center brings together for periods of time talented and dedicated people who, through their interaction, are able to envision and achieve what otherwise might not be possible.

Applications are available on the Foundation Web site.

PROGRAM VENTURE EXPERIMENT

The Program Venture Experiment (ProVenEx) seeks to catalyze private-sector investments in areas that will benefit poor and excluded people. Through this program, the Foundation makes investments that are structured using market principles in early-stage and growing businesses that focus on improving food security in developing countries, minimizing the burden of disease, improving employment opportunities, increasing the availability and quality of housing and schools, and stimulating creativity and cultural expression.

SUPPORT FOR INDIVIDUAL ARTISTS

Amrita Performing Arts, Oakland, California: $60,000 toward general operating support of its mission to assist in the revival of Cambodian performing arts.

Asian American Arts Alliance, New York, New York: $40,000 toward the costs of its 20/20 Vision Campaign, a strategic planning initiative to stabilize and redirect services to the Asian Pacific American cultural community in New York.

Creative Capital Foundation, New York, New York: $1,300,010 toward the costs of the Multi-Arts Production Fund, a program that supports the creation of new work in the performing arts.

Creative Capital Foundation, New York, New York: $150,000 for general support of its mission to support artists pursuing innovative approaches to form and content in the media, performing and visual arts, as well as in emerging arts fields.

Foundation-administered project: $437,000 toward the costs of developing a new philanthropic initiative that seeks to affirm the importance of creativity in a democratic society through support for individual artists and their work.

Grantmakers in the Arts, Seattle, Washington: $15,000 toward general operating support of its mission to strengthen the field of private-sector arts-and-culture grantmaking.

Harare International Festival of the Arts, Harare, Zimbabwe: $35,000 toward the costs of its 2004 Pan-African Program.

National Alliance for Media Arts and Culture, San Francisco, California: $100,000 toward the costs of a public education campaign for "Deep Focus: The Future of Independent Media."

National Association of Latino Independent Producers, Santa Monica, California: $100,000 for support of three initiatives—its Latino Writers Lab, Latino Producers Academy and Latino Media Resource Guide—that seek to increase Latino presence in all aspects of media production.

National Performance Network, New Orleans, Louisiana: $100,000 to support the creation and exhibition of new work and promote the exchange of diverse approaches to advancing the performing arts field.

National Video Resources, New York, New York: $1,092,733 toward the costs of The Program for Media Artists, a program that supports film, video and multimedia artists.

National Video Resources, New York, New York: $15,000 for the ongoing activities of Grantmakers in Film and Electronic Media and the Council on Foundation's Film and Video Festival.

New England Foundation for the Arts, Boston, Massachusetts: $24,600 toward the costs of "Field Inquiry: Creative Practice in the 21st Century," a project investigating the current methods of creative practice in the performing arts.

New York Foundation for the Arts, New York, New York: $80,000 toward post-production costs of "Been Rich All My Life," a documentary project featuring the "Silver Belles," a tap troupe comprised of women who were members of the Apollo Theatre chorus in the 1930s.

Zest for Life Foundation, New York, New York: $500,000 toward the costs of its Maisha program, a filmmakers laboratory and training program dedicated to the support and development of screenwriters and directors in East Africa.

UNDERSTANDING CULTURAL CONTEXTS AND FRAMEWORKS

CULTURAL INDICATORS

Americans for the Arts, Washington, D.C.: $75,000 toward the costs of developing a National Arts Index that will measure the vitality of the arts in the United States.

City Lore: The New York Center for Urban Folk Culture, New York, New York: $70,000 toward the costs of City of Immigrants, a mapping of and online dialogue about the cultural assets of New York City, which will be added to City Lore's larger City of Memory interactive "storymap" and Web site.

Field Museum, Chicago, Illinois: $100,000 toward the costs of an ethnographic study incorporating asset-mapping techniques to examine the social, cultural and artistic resources of recent Mexican immigrants in Chicago.

University of California, Los Angeles, Los Angeles, California: $100,000 for use by its Center for the Study of Urban Poverty toward the costs of a research project to describe and examine the ways in which arts, culture and creative expression are present, valued and supported in immigrant, particularly transnational, communities in Los Angeles.

University of Illinois at Urbana-Champaign, Urbana, Illinois: $100,000 for use by its Team Engineering Collaboration toward the costs of an ethnographic study incorporating asset-mapping techniques to examine the social, cultural and artistic resources of recent Mexican immigrants in Chicago.

CULTURAL POLICY

Princeton University, Princeton, New Jersey: $100,000 for use by its Center for Arts and Policy Studies toward the costs of research and meetings on: (1) inequality in access to and usage of the Internet; (2) intellectual property issues in the arts; (3) national trends in arts participation; and (4) arts in new immigrant communities.

Vanderbilt University, Nashville, Tennessee: $85,000 for use by its Curb Center for Art, Enterprise and Public Policy toward the costs of a conference and related research papers on the subject of "Gatekeepers in the U.S. Cultural System: Changing economics, institutions and influence."

William J. Brennan Jr. Center for Justice, New York, New York: $100,000 toward the costs of its Free Expression Policy Project, which provides information and analysis on free expression issues.

THE PUBLIC DOMAIN

Duke University, Durham, North Carolina: $100,000 for use by its Center for the Study of the Public Domain at Duke Law School, toward the costs of the "Duke Project on Intellectual Property, Art and Culture," an investigation of how intellectual property affects creativity and the legality of creative practices.

LINKING SCHOLARSHIP TO PRACTICE

HUMANITIES

American Council of Learned Societies, New York, New York: $100,000 toward the costs of planning a program designed to empower scholar-teachers to help improve university curricula and connections to their communities.

Feminist Press, New York, New York: $20,000 toward the costs of travel for the editorial team of the volume of "Women Writing Africa—Northern Region" to participate in a team residency at the Bellagio Study and Conference Center, Italy, February 2005.

PARTNERSHIPS AFFIRMING COMMUNITY TRANSFORMATION (PACT)

American Composers Forum, St. Paul, Minnesota: $100,000 toward the costs of researching and designing an assessment service that will help arts organizations and participating artists demonstrate the value of artistic collaboration in building vigorous communities.

Art in the Public Interest, Saxapahaw, North Carolina: $202,992 in support of its work, especially through its Community Arts Network, to promote growth and stability of the community arts field.

Foundation-administered project: $30,000 toward the costs of a consultancy to assist in advancing the work of the PACT program.

Foundation-administered project: $60,000 toward the costs of a convening to reshape the PACT program to focus on community cultural and economic development.

ROLE OF RELIGION IN BUILDING CIVIL SOCIETY

Harvard University, Cambridge, Massachusetts: $300,000 toward the costs of its Pluralism Project, a research initiative to document and disseminate information about religious pluralism in the United States.

Interfaith Youth Core, Chicago, Illinois: $100,000 toward general support of its mission to build a movement that encourages religious young people to strengthen their religious identity, build interreligious understanding and cooperate to serve communities.

World Conference on Religion and Peace, New York, New York: $1,000,000 for continued support of its efforts to build and expand sustainable multireligious networks collaborating for the common good.

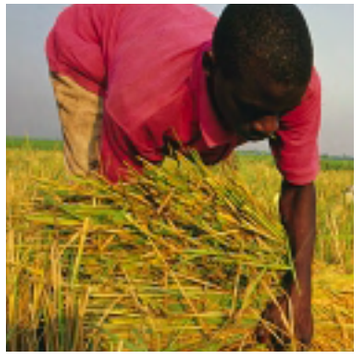

EXPLORATIONS AND OTHER

Art Science Research Laboratory, New York, New York: $100,000 toward the costs of a project to create a digital archive and learning center for global access to two books by Stephen Jay Gould, "Ontogeny and Phylogeny" and "An Urchin in the Storm."

Foundation-administered project: $275,000 toward the costs of a joint initiative between the Foundation's Creativity & Culture and Africa Regional Programs to refocus the Foundation's African cultural programming so that it gives voice to poor and excluded people, aligns with the Foundation's other work in Africa and addresses an African audience.

Fund for Independent Publishing/The New Press, New York, New York: $10,000 toward the costs of a book-and-CD set entitled "Say It Plain: Live Recordings of the 20th Century's Great African-American Speeches."

Hispanics in Philanthropy, San Francisco, California: $400,000 for continued support of its Funders' Collaborative for Strong Latino Communities initiative to build organizational capacity of, and a broader funding base for Latino nonprofit organizations in the United States and selected Latin American countries.

ENHANCED SOIL PRODUCTIVITY

Calibre, Reading, United Kingdom: $25,047 toward the costs of travel for participants in the conference, "Starter Packs: A Strategy to Fight Hunger in Developing and Transition Countries," held at the Bellagio Study and Conference Center, Italy, October 2004.

Cornell University, Ithaca, New York: $95,300 toward the costs of studies on soil organic matter recapitalization, to be conducted by a Kenyan Ph.D. student in collaboration with Kenyatta University.

Egerton University, Njoro, Kenya: $2,500 for use by its Faculty of Agriculture to further the development of its programs.

Forum for Organic Resource Management and Agricultural Technologies, Nairobi, Kenya: $134,903 toward the costs of organizing countrywide grassroots public events on organic resource management technologies in order to accelerate the adoption of promising soil management technologies in Kenya.

Foundation-administered project: $177,100 toward the costs of facilitating a pilot program to improve teaching and research competencies among faculty at Makerere University.

Foundation-administered project: $230,000 toward the costs of the first meeting of grantees under the Foundation's Enhanced Soil Productivity in Africa area of work, held in Nairobi, Kenya, September 2004.

Foundation-administered project: $149,400 toward costs associated with the coordination of integrated soil management strategies and legume research and extension activities in Kenya.

International Center for Tropical Agriculture, Cali, Colombia: $400,000 in support of its Tropical Soil Biology and Fertility Institute's research program on integrated soil fertility management.

International Center for Tropical Agriculture, Cali, Colombia: $16,192 for use by its Tropical Soil Biology and Fertility Institute to convene a workshop aimed at developing a Ugandan country-based program on legume research, held in Kampala, Uganda, August 2004.

International Center for Tropical Agriculture, Cali, Columbia: $73,436 for use by its Tropical Soil Biology and Fertility Institute to publish proceedings of the African Network for Soil Biology and Fertility international symposium held in Yaoundé, Cameroon, May 2004.

International Institute of Tropical Agriculture, Ibadan, Nigeria: $319,930 for use by its Eastern and Southern Africa Regional Center in support of research on integrated soil and pest management within banana systems in Uganda, to be conducted in collaboration with its Tropical Soil Biology and Fertility Programme and Uganda's National Agricultural Research Organization.

International Institute of Tropical Agriculture, Ibadan, Nigeria: $50,000 toward the costs of harmonizing data collected during a multi-country survey carried out on cassava production in sub-Saharan Africa.

International Maize and Wheat Improvement Center, Mexico City, Mexico: $444,000 toward the costs of establishing a Soil Fertility Consortium for Southern Africa to promote research and development in integrated soil fertility management.

Kenya Agricultural Research Institute, Nairobi, Kenya: $98,962 for use by its National Agricultural Research Centre-Kitale to continue farmer participatory research on improved soil management practices.

Kenya Agricultural Research Institute, Nairobi, Kenya: $99,322 for use by its Kisii Regional Research Centre to continue on-farm research on improved soil management technologies using participatory research methods.

Kenya Agricultural Research Institute, Nairobi, Kenya: $64,540 for use by its Mtwapa Regional Research Centre for continued research on increasing smallholder food production through improved soil and water management and the integration of livestock into cropping systems in coastal regions of Kenya.

Makerere University, Kampala, Uganda: $80,000 for use by its Faculty of Agriculture to further the development of its programs.

Makerere University, Kampala, Uganda: $176,327 toward the costs of strengthening its training programs for professionals and practioners who will work at the district level to improve food security and rural livelihoods.

Moi University, Eldoret, Kenya: $2,500 for use by its Faculty of Agriculture to further the development of its programs.

Regional Universities Forum for Capacity Building in Agriculture, Kampala, Uganda: $3,550,000 for general support.

Sustainable Agriculture Centre for Research and Development in Africa, Nairobi, Kenya: $217,570 to continue on-farm testing of selected technologies for improved soil fertility management in western Kenya.

University of Zimbabwe, Harare, Zimbabwe: $88,810 in support of research to harness the diversity and nitrogen-fixing capacity of indigenous herbaceous legumes, as a low-cost organic nutrient resource for use in the management of soil fertility by smallholder farmers in southern Africa.

Wageningen University, Wageningen, Netherlands: $123,906 in support of dissertation research conducted by African Ph.D. students in the program on Participatory Approaches and Up Scaling in agricultural research and extension.

World Agroforestry Centre, Nairobi, Kenya: $91,804 to enable a consortium of over 70 organizations in western Kenya to consolidate ongoing activities, document lessons learned and build the capacity of farmers to develop their own forum, which will assist them to scale up soil fertility improvement technologies.

IMPROVED CROP VARIETIES

Auburn University, Auburn, Alabama: $128,800 in support of research to identify *Bacillus thuringiensis* insecticidal proteins that are effective against the sweet potato weevil.

Center for the Application of Molecular Biology to International Agriculture, Black Mountain, Australia: $250,000 in support of further research on the development of a novel gene transfer method that will bypass intellectual property constraints currently limiting gene transfer in plants.

Central Science Laboratory, York, United Kingdom: $15,000 toward the costs of a study of opportunities for and constraints upon development of sustainable vegetable seed businesses in eastern and southern Africa.

Cornell University, Ithaca, New York: $194,620 toward the costs of providing consulting and technical assistance aimed at enhancing the quality of Ph.D. training for plant breeders at the University of KwaZulu-Natal's African Center for Crop Improvement.

Cornell University, Ithaca, New York: $40,005 to support dissemination to developing countries of information on genetic improvement for drought tolerance in cereals.

Cornell University, Ithaca, New York: $99,990 for use by its Strategic World Initiative for Technology Transfer to advance the development, transfer and use of provitamin A rice (Golden Rice) in developing countries where vitamin A deficiency is a serious problem.

Foundation-administered project: $313,814 toward the costs of the second general meeting of participants in the Foundation's program, Improved Crop Varieties for Africa, held January 2005.

Foundation-administered project: $177,560 for administrative costs associated with monitoring and evaluating efforts to intersect Food Security's activities in western Kenya.

Foundation-administered project: $50,000 toward the costs of engaging experts, convening small consultative gatherings and facilitating travel of plant breeders and seed specialists to relevant meetings related to the development of improved crop varieties.

Foundation-administered project: $20,000 to assist the officers of the Food Security theme in raising public awareness in India regarding the lack of public institution investment in crop genetic improvement for drought tolerance in rice.

Flemisch Interuniversity Institute for Biotechnology, Ghent, Belgium: $91,380 toward the costs of a project, in collaboration with Uganda's National Agricultural Research Organization, to increase banana productivity through genetic transformation to improve the architecture and development time of the East African Highland Banana.

Gordon Research Conferences, West Kingston, Rhode Island: $10,000 to enable scientists from Africa and Asia to attend the Gordon Research Conference on Salt & Water Stress in Plants, held at the Hong Kong University of Science & Technology, June 13-18, 2004.

Huazhong Agricultural University, Wuhan, Hubei Province, China: $512,000 toward the costs of research to elucidate the molecular genetic basis of drought tolerance in rice and to breed and distribute new drought-tolerant varieties of rice to both rainfed and poorly irrigated areas of China.

Indira Gandhi Agricultural University, Raipur, India: $217,140 toward the costs of development and distribution of drought-tolerant rice varieties to farmers in eastern India through rice genetic improvement and farmer participatory selection techniques.

Institute of Biotechnology, National Center for Natural Science and Technology, Hanoi, Vietnam: $36,462 to support research on drought tolerance in rice utilizing DNA genetic markers to assist in breeding new rice varieties for the hill regions of northern Vietnam.

International Centre of Insect Physiology and Ecology, Nairobi, Kenya: $26,000 in support of a study to identify chemicals secreted by a forage legume that inhibit development of the parasitic weed *Striga*, which attacks staple maize and sorghum crops across Africa, and for Ph.D. training of one student.

International Center for Tropical Agriculture, Cali, Colombia: $280,140 in support of research to be conducted in collaboration with the Max Planck Institute for Plant Breeding Research, to enhance the ability of breeders to improve cassava and tropical fruits by over-expression of known genes that allow breeders to control the timing and extent of flowering.

International Center for Tropical Agriculture, Cali, Colombia: $75,000 toward the costs of the Sixth International Scientific Meeting of the Cassava Biotechnology Network: Adding Value to a Small-Farmer Crop, held in Cali, Colombia, March 2004.

International Crops Research Institute for the Semi-Arid Tropics, Patancheru, India: $450,000 for research on genetic improvement and increased diversification of pigeon pea, to enhance the crop's productivity in eastern and southern Africa.

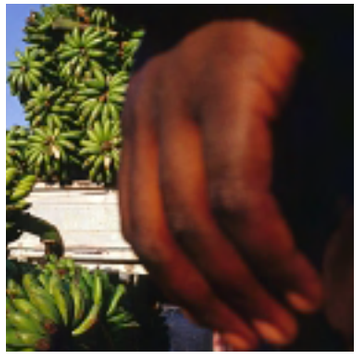

International Crops Research Institute for the Semi-Arid Tropics, Patancheru, India: $45,825 in support of research to determine the potential value of pearl millet top-cross hybrids in West Africa by assessing levels of hybrid vigor across different growing environments during the 2004 growing season.

International Institute of Tropical Agriculture, Ibadan, Nigeria: $490,000 toward the costs of developing, with the use of biotechnology, cassava varieties that are resistant to the Cassava Brown Streak Disease.

International Maize and Wheat Improvement Center, Mexico City, Mexico: $428,000 for the costs of an international workshop for the Foundation's grantees in Africa and Asia working on new varieties of drought-tolerant maize and rice for use by smallholder farmers.

International Maize and Wheat Improvement Center, Mexico City, Mexico: $219,950 in support of research to be conducted in collaboration with the Kenya Agricultural Research Institute on development of insect-resistant maize for Africa.

International Maize and Wheat Improvement Center, Mexico City, Mexico: $124,800 toward the costs of the on-farm testing and seeds component of the Southern Africa Drought and Low Soil Fertility Network's project to develop, and now disseminate, drought-tolerant varieties of maize.

International Potato Center, Lima, Peru: $111,550 in support of research to identify *Bacillus thuringiensis* insecticidal proteins that are effective against the sweet potato weevil.

International Rice Research Institute, Metro Manila, Philippines: $275,616 in support of molecular genetic studies of drought tolerance in rice and training of postdoctoral fellows from India in both molecular marker technology and participatory varietal selection.

International Rice Research Institute, Metro Manila, Philippines: $60,000 toward continued support of a postdoctoral fellow undertaking research activities on marker-aided breeding, leading to drought-tolerant rice varieties.

Iowa State University, Ames, Iowa: $165,806 in support of training for two African scientists who will contribute to the sustainability of African vitamin A maize research.

Kenya Agricultural Research Institute, Nairobi, Kenya: $170,351 in support of research to be conducted by its Katumani National Dry Farming Research Centre, to develop and test new maize varieties for the dryland and coastal areas of Kenya.

Kenya Agricultural Research Institute, Nairobi, Kenya: $94,575 in support of research to manage cassava diseases in central Kenya through farmer participatory resistance breeding and multiplication of clean planting material.

Kenya Agricultural Research Institute, Nairobi, Kenya: $220,550 in support of research to be conducted in collaboration with the International Maize and Wheat Improvement Center on development of insect-resistant maize for Africa.

Kenya Agricultural Research Institute, Nairobi, Kenya: $46,620 toward the costs of enhancing its ability to identify and characterize Banana Streak Virus isolates, through the training of one of its scientists at the John Innes Centre in England.

Kenyatta University, Nairobi, Kenya: $144,900 to develop African maize resistant to the parasitic weed *Striga*, in a collaborative project with the University of California, Davis.

Max Planck Society for the Advancement of Science, Munich, Germany: $130,500 for use by its Max Planck Institute for Plant Breeding Research to conduct research, in collaboration with the Centro Internacional de Agricultura Tropical, to enhance the ability of breeders to improve cassava and tropical fruits by over-expression of known genes that allow breeders to control the timing and extent of flowering.

McGill University, Montreal, Canada: $30,000 toward the costs of research on enzymes and signal transduction proteins for abiotic stress tolerance in rice.

National Agricultural Research Organisation, Entebbe, Uganda: $118,650 for use by its Namulonge Agricultural and Animal Production Research Institute for participatory evaluation of upland rice varieties and determination of suitable crop management practices in Uganda.

National Agricultural Research Organisation, Entebbe, Uganda: $100,280 in support of research to identify *Bacillus thuringiensis* insecticidal proteins that are effective against the sweet potato weevil.

National Agricultural Research Organisation, Entebbe, Uganda: $387,560 toward the costs of a project, in collaboration with the Flemish Interuniversity Institute for Biotechnology, to increase banana productivity through genetic transformation to improve the architecture and development time of the East African Highland Banana.

National Institute for Agronomic Research, Maputo, Mozambique: $74,700 to facilitate the development and operation of specialized drought-tolerance screening facilities in Mozambique's maize breeding program.

Punjab Agricultural University, Ludhiana, India: $13,910 in support of research on the economic impacts of new rice varieties developed for northern India through the use of modern biotechnology tools.

Purdue University, West Lafayette, Indiana: $190,592 in support of research to assess the value of transgenic maize engineered to create resistance to the parasitic weed *Striga*.

Shanghai Academy of Agricultural Sciences, Shanghai, China: $20,000 to enable its Shanghai Agrobiological Gene Center to conduct research and activities to raise public awareness about the future problems and potential solutions related to water scarcity and rice production in China.

Shanghai Academy of Agricultural Sciences, Shanghai, China: $450,000 in support of research to be conducted by its Shanghai Agrobiological Gene Center for continued modifications and improvements of screening facilities in Shanghai and Hainan, China, leading to genetically improved drought-tolerant rice.

Sichuan Agricultural University, Sichuan, China: $60,000 in support of research on the genetic improvement of maize for drought tolerance in southwestern China, to be conducted by its Maize Research Institute.

Sustainable Agriculture Centre for Research and Development in Africa, Nairobi, Kenya: $117,998 for the strategic testing, promotion and evaluation of new maize cultivars in western Kenya.

University of California, Davis, Davis, California: $108,100 to develop African maize resistant to the parasitic weed *Striga*, in a collaborative project with Kenyatta University.

University of Georgia, Athens, Georgia: $10,000 for use by its College of Agricultural and Environmental Sciences to enable African scientists to attend the Plant and Animal Genome XIII meeting, held in San Diego, California, January 2005.

University of Illinois at Urbana-Champaign, Urbana, Illinois: $34,020 to enable African scientists to attend the Maize Genetics, Genomics and Bioinformatics Workshop and the 46th Annual Maize Genetics Conference, held in Mexico, March 7-14, 2004.

University of KwaZulu-Natal, Durban, South Africa: $758,800 for use by its African Center for Crop Improvement to enable the first cohort of African students to carry out Ph.D. research in their home countries: Kenya, Malawi, Mozambique, Nigeria, Uganda, Zambia and Zimbabwe.

University of Nairobi, Nairobi, Kenya: $150,000 toward the costs of establishing a molecular biology and biotechnology laboratory at its College of Biological and Physical Sciences, to enhance the College's capacity to undertake sustainable research and training on a regional basis aimed at addressing the problems of food security in Africa.

University of Queensland, St. Lucia, Brisbane, Australia: $12,000 to support participation of Asian scientists in the combined 4th International Crop Science Congress and 5th Asian Crop Science Congress, held in Brisbane, Australia, September 2004.

WARDA-The Africa Rice Center, Abidjan, Côte d'Ivoire: $885,597 toward the costs of field and laboratory research aimed at developing more drought-tolerant varieties of rice for farmers in drought-prone areas of sub-Saharan Africa.

Weizmann Institute of Science, Rehovot, Israel: $8,400 in support of travel to enable five scientists from developing countries to participate in a workshop entitled: Crop Ferality and Volunteerism: A Threat to Food Security in the Transgenic Era, held at the Bellagio Study and Conference Center, Italy, May 24-29, 2004.

Yale University, New Haven, Connecticut: $383,490 for a collaborative research project with Peking University to improve stress tolerance in rice and other cereals through the genome-wide identification of rice promotors with desirable drought-inducible characteristics.

INTERNATIONAL PUBLIC GOODS FOR POOR FARMERS

Cornell University, Ithaca, New York: $73,950 for use by its Albert R. Mann Library to disseminate The Essential Electronic Agricultural Library and its hardware to four universities and agricultural research institutions in sub-Saharan Africa.

Cornell University, Ithaca, New York: $300,300 toward the costs of cross-disciplinary training workshops to facilitate the use in Africa of Internet-based access to literature in the fields of agriculture and health provided by the Access to Global Online Research in Agriculture initiative (AGORA) and the Health InterNetwork Access to Research Initiative (HINARI).

Foundation-administered project: $236,000 to facilitate an exploration of options for forming an alliance between the International Rice Research Institute and the International Maize and Wheat Improvement Center.

Foundation-administered project: $115,419 toward the costs of establishing the Public Intellectual Property Resource for Agriculture, an entity that will facilitate public-sector access to new agricultural technologies for the developing world.

International Plant Genetic Resources Institute, Rome, Italy: $233,158 to promote the development, testing and implementation of institutional learning and change in the Consultative Group on International Agricultural Research.

International Service for the Acquisition of Agri-biotech Applications, Ithaca, New York: $190,000 toward the costs of producing, publishing and disseminating in developing countries the annual "Global Review of Commercialized Transgenic Crops," an in-depth analysis of global developments pertaining to the adoption and socioeconomic impacts of genetically modified crops.

University of Connecticut, Storrs, Connecticut: $40,000 toward the costs of publishing a special issue of *Nature*, that will demonstrate and promote the accomplishments of the University's China Bridges International Fellowship program.

MARKETS TO RAISE INCOMES OF POOR FARMERS

Africare, Washington, D.C.: $412,522 in support of its Soybean Market Linkage Project, intended to improve soybean production and market development systems for poor rural households in Zimbabwe.

Citizens Network for Foreign Affairs, Washington, D.C.: $656,482 to improve the access of poor farmers to improved seeds and fertilizers through the provision of business training, and technical and financial support to a network of small rural input shops in western Kenya.

Cornell University, Ithaca, New York: $270,000 for a research and training fellowship in development sociology tracing the institutional arrangements governing the growth of pigeon pea, groundnut and chickpea markets in Malawi and Mozambique.

Foundation-administered project: $300,000 for the first workshop of all grantees under the Foundation's Markets Area of Work, held in conjunction with the inaugural meeting of the program's External Advisory Committee, April 5-7, 2004, in Nairobi, Kenya, to monitor and review progress on program investments.

Foundation-administered project: $99,000 toward the costs of the External Advisory Committee for the Foundation's Food Security area of work, Markets to Raise Incomes of Poor Farmers in Africa.

Foundation-administered project: $150,734 toward the costs of developing public/private partnerships within the banana industry of Uganda designed to help increase incomes of poor farmers.

International Association of Agricultural Economists, Oak Brook, Illinois: $20,950 toward the costs of a symposium entitled Shaping the future of African agriculture for development: The role of social scientists, held in Nairobi, Kenya, December 2004.

International Center for Tropical Agriculture, Cali, Colombia: $178,750 for use by its Tropical Soil Biology and Fertility Institute to conduct a research program to expand the production and commercialization of soybeans by poor farmers in eastern Africa.

International Food Policy Research Institute, Washington, D.C.: $500,000 toward the costs of developing a Collaborative Master of Science Program in Agricultural and Applied Economics for eastern, central and southern African universities.

International Institute of Tropical Agriculture, Ibadan, Nigeria: $23,348 toward the costs of the Ninth Symposium of the International Society for Tropical Root Crops—Africa Branch.

International Maize and Wheat Improvement Center, Mexico City, Mexico: $91,671 toward the costs of developing a strategy for using market incentives to improve the production and distribution of newly developed drought- and low-nitrogen-tolerant maize varieties, and evaluating the impact of these varieties on the food security and incomes of smallholder farmers in southern Africa.

TREASURER'S LETTER

As a result of fourth-quarter gains, financial markets posted strong returns in 2004. For the year, the Russell 3000, a broad index of U.S. equities, returned 12.0 percent. Within this sector, small capitalization stocks and value stocks significantly outperformed. International equities, as measured by the EAFE index, returned 20.3 percent, and emerging markets equities gained 25.6 percent. Public and private real estate, as well as certain private equity and distressed debt investments, also generated strong returns during the year.

The Rockefeller Foundation's portfolio returned 13.8 percent for the year, benefiting from a significant commitment to international equities and strong performance of real estate and distressed credit investments. As of December 31, 2004, the market value of the portfolio was $3.2 billion. Foundation spending on grants and administrative costs during the year totaled $174.5 million or 5.5 percent of ending market value.

The concept of generational neutrality—maintaining the long-term purchasing power of the endowment to ensure the Foundation's robust grantmaking ability over the long term—is a touchstone for the Foundation. The original corpus, which was fully funded in 1929, was worth $3.0 billion in 2004 dollars compared to its $3.2 billion value today. With the benefit of compounding investment returns, the Foundation has been able to make approximately $13 billion (2004 dollars) in grants since 1929 while maintaining the value of the endowment in real dollars. Thus, the Rockefeller Foundation's grantmaking capacity, as well as its legacy of knowledge and experience, is still benefiting the world today.

☐ CURRENT INVESTMENT LANDSCAPE

The investment staff of the Rockefeller Foundation is keenly aware of the challenges presented by the current financial landscape. As we continually strive to manage our portfolio in ways that will meet the Foundation's long-term objectives, we must consider several issues:

- The challenge of finding truly undervalued sectors in a world where momentum has driven asset values in most sectors back to premium levels;
- The effect of rising U.S. interest rates on the world economy and the impact of U.S. deficits in the context of global capital flows;
- The changing landscape and increasing short-term orientation of the investment management industry, partly driven by the phenomenal growth of hedge funds;
- The lack of technological drivers that will underpin the next wave of entrepreneurial profits; and
- The impact of emerging global actors, such as China and India.

Many economists and investors believe that returns on financial assets will be below historical averages in the coming decade. Thus, foundations will find it challenging to structure portfolios that will, at a minimum, meet the IRS spending requirement and preserve capital after inflation. The Rockefeller Foundation's approach is evolving in ways that include:

- Reducing reliance on benchmark-oriented investment strategies,
- Taking a more flexible approach to asset allocation, and
- Searching for opportunities in areas that have not been fully exploited.

Investment returns can be divided into two categories—returns generated by market forces and returns independent of and in excess of the market. An institution's goals and risk tolerance influence the desired mix of the two sources of return in a portfolio. However, managers who deliver principally market returns should not be paid the higher fees commanded by managers capable of generating excess returns. As much as possible, market returns should be achieved inexpensively. For example, in the Foundation's fixed-income portfolio, the desired market exposure is increasingly being achieved through lower cost index strategies.

As investors seek to add returns in excess of the market, traditional asset class definitions become less meaningful. While the Foundation still uses an asset allocation framework as an organizing principle for the portfolio, frequently the most attractive investment opportunities have characteristics that defy traditional classification. In these instances, project teams with interdisciplinary skills are assigned to evaluate the investment and the focus is on assessment of the potential of the opportunity to generate risk-adjusted return. Finding skilled investment partners who can generate returns independent of market results requires investors to be flexible and opportunistic.

As an example of the Foundation's search for new opportunities, investment staff has been following developments in emerging Asian markets for several years. Investments in this area have been made by specialist emerging-markets managers and were increased in 2004 with the hiring of an Asia-focused manager.

☐ PORTFOLIO OVERSIGHT

In providing oversight of the Rockefeller Foundation's endowment, the board of trustees strives to balance two long-term objectives—maximizing funds for current programs and maintaining generational neutrality—through policies on spending rate and asset allocation of the investment portfolio. The Foundation's long-term target for annual spending is 5.5 percent of the market value of the endowment.

Asset allocation policy is reviewed annually by the Foundation's Finance Committee, which establishes a target allocation for each asset class. The combination of an equity bias and broad diversification among equity-oriented asset classes provides a powerful underpinning for a long-term institutional portfolio. The Foundation rebalances to policy targets as markets move, and does not make frequent tactical shifts in asset allocation. Over time, the Foundation is implementing a plan to reduce investments in marketable securities and increase commitments to absolute return, real assets and private equity. The long-term asset allocation targets are:

ASSET CLASS	PERCENT
U.S. Equity	20 – 22
International Equity	17
Global Equity	8
Fixed Income	15
Cash	1
Absolute Return	14 – 16
Real Assets	10 – 12
Private Equity	10 – 12

The Foundation's investment staff develops overall strategy, recommends investment managers, and oversees their performance and adherence to guidelines. Staff also researches new investment opportunities and monitors and controls portfolio risks. In selecting outside managers, the Foundation seeks firms that, in addition to strong track records, have the people, management structure, disciplined process, fundamental research and operational controls to deliver superior results. In-depth due diligence is conducted up front since the Foundation seeks to establish long-term relationships with its advisers and partners.

☐ PORTFOLIO STRUCTURE

The Foundation's U.S. equity portfolio has a small investment in index strategies, and the remainder is allocated among nine active managers. Each manager has a distinct investment approach and can add significant value through sector and security selection. In most cases, this results in portfolios that are concentrated in a relatively small number of securities. As noted above, the lines between traditional asset classes are blurring, and hedge strategies with a significant long bias are included in U.S. equities.

The Foundation's international equity portfolio has five active managers with EAFE benchmarks. In addition, a manager that specializes in Japan has been added. Of the 17 percent allocation to international equities, 7 percent is invested with specialist emerging markets managers. One of these managers focuses solely on the Asian markets.

In addition to U.S. and international equities, the Foundation has an allocation to global managers who have the discretion to hold U.S. and international securities. The Treasurer's Office believes that increasing worldwide economic integration requires that investment managers be thoughtful about the relative attractiveness of regions and able to identify the best companies in global industries. It is difficult to find advisers with true global capacity. To date, the Foundation has three managers in this asset class, which is expected to grow over time.

A currency overlay program is in place covering 50 percent of the value of developed market international equities. In the past, the overlay functioned principally to hedge exposure to a strengthening dollar. Over the last two years, the program has been transitioned to an active mandate with the objective of adding return. The Foundation has two specialist currency managers with complementary approaches to adding value.

The fixed-income portfolio includes a 40 percent position in index funds holding government securities, including Treasury Inflation Protected Securities (TIPS). The move to passively managed government securities was made to increase credit quality, to allocate portfolio risk in asset classes where there is greater value added potential, and to reduce investment management fees. In addition to U.S. Treasury and agency securities, the actively managed portion of the portfolio may include mortgages, corporate bonds and asset-backed securities.

The absolute return asset class includes investments in event-driven strategies, long/short equity strategies, and distressed debt. These investments are expected to provide equity-like returns that are not highly correlated with the public equity and fixed-income markets. As of December 31, 2004, the absolute return asset class was 10 percent of the endowment and included an investment with one fund-of-funds manager, with whom the Foundation has a strategic relationship, as well as direct investments with 12 managers.

The Foundation makes investments in private equity and real assets through limited partnerships. The inefficiency of private markets offers long-term institutional investors, who can tolerate illiquidity, the opportunity to benefit from experienced partners who have consistently added value to their portfolio holdings. Our strategy is to build relationships with leading firms with whom we can invest in a series of funds over time and to structure partnerships that align our interests with those of our partners.

Returns in alternative asset classes are substantially better for top-tier managers. For example, in venture capital, first quartile managers returned over 30 percent more than median managers over the last 10 years. In addition, investments in alternative asset classes are less liquid and require longer-term commitments. These factors underscore the Treasurer's Office focus on thorough due diligence on partners in these sectors and unwillingness to compromise high standards to achieve target allocations more quickly.

In private equity, the Foundation has ongoing relationships with over 20 venture and buyout partners. Currently, there are substantial commitments that have not been funded as partnerships attempt to digest an overhang of capital raised in prior years. During the past year, the Foundation has been able to establish relationships with a number of new, high-quality private equity partners. A diligent effort to add to this base will continue in 2005.

In real assets, the Foundation has ongoing relationships with 17 partners. Property sales in older partnerships continued to exceed capital calls during 2004 as advisers took advantage of the opportunity to sell high-quality, well-leased properties at premium prices. The Foundation has continued to make selective commitments to proven real estate partners, believing that it is important to be a steady investor in this asset class and that, when interest rates rise, it would be wise to have capital poised to take advantage of opportunities that arise.

Building a portfolio that respects the abiding principles of diversification and alignment of sponsor/manager interests but takes advantage of new approaches and unexplored territory requires a careful balancing of creativity and discipline. The Foundation's investment staff strives to exercise the creativity to push the bounds of traditional asset allocation and find exceptional partners in new places while maintaining the discipline to underwrite investments with care and to rigorously evaluate risk/return trade-offs.

INDEPENDENT AUDITOR'S REPORT

The Board of Trustees of the Rockefeller Foundation

We have audited the accompanying statements of financial position of the Rockefeller Foundation (the "Foundation") as of December 31, 2004 and 2003, and the related statements of activities and cash flows for the years then ended. These financial statements are the responsibility of the Foundation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for purposes of expressing an opinion on the effectiveness of the Foundation's internal control over financial reporting. Accordingly, we express no such opinion.

An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Rockefeller Foundation at December 31, 2004 and 2003, and the changes in its net assets and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

NOTES TO FINANCIAL STATEMETNS

As of and for the years ended December 31, 2004 and 2003

1. ORGANIZATION

The Rockefeller Foundation (the "Foundation"), chartered in 1913 "to promote the well-being of mankind throughout the world," is a knowledge-based global foundation with a commitment to enrich and sustain the lives and livelihoods of poor and excluded people throughout the world. Grantmaking is organized around thematic lines of work: Creativity & Culture, Food Security, Health Equity, Working Communities, a cross-theme of Global Inclusion and a number of regional and specialty programs. In managing the endowment, the Foundation has two primary objectives: to maximize the funds available for current funding and to preserve the value of the endowment. These objectives are achieved through a diversified investment portfolio and spending policies.

The Foundation qualifies as a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code and, accordingly, is not subject to Federal income tax (Note 2).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Cash and Cash Equivalents—Cash and cash equivalents consists of cash and investments with maturities of less than 90 days from the time of purchase. Cash and cash equivalents held by the Foundation's investment managers are not included.

Investments—Investments in marketable securities are stated at fair value. Fair value is determined using daily closing prices, where available, for any tradeable instruments on any global stock exchange. Interest income and related expenses are accounted for on the accrual basis on trade date. Dividend income and related expenses are recognized on ex-date, net of withholding taxes where applicable. Realized gains and losses on investments in securities are calculated based on the specific identification method, based on trade date.

Limited partnership investments and similar interests are stated at estimated fair value. Values for these partnerships, which may include investments in both nonmarketable and market-traded securities, are provided by the general partner and reviewed by the Foundation's management. Values may be based on historical cost, appraisals, fair values discounted for concentration of ownership or other estimates that require varying degrees of judgment. The financial statements of the limited partnerships are audited annually by independent auditors.

Programmatic investments are philanthropically-driven, nonmarketable investments and loans, made under the Foundation's Program Venture Experiment ("ProVenEx"), in businesses that further the Foundation's program work. Programmatic investments are stated at estimated fair value, which may be based on historical cost, financing events or material changes in the business.

Transactions in other currencies are translated into U.S. dollars at the exchange rates in effect at the date of the transactions. Monetary assets and liabilities denominated in non-U.S. currency are reported at the exchange rates in effect at the dates of the statements of financial position. Any gain or loss arising from a change in exchange rates subsequent to the date of the transaction is included in realized and change in unrealized gain on investments—net, in the statements of activities. For the years ended December 31, 2004 and 2003, the realized and change in unrealized gain—net, resulting from foreign exchange was approximately $22.5 million and $46.5 million, respectively.

Derivatives—The Foundation records its derivatives at fair value. The fair value of futures and forwards is reflected in investments in the statement of financial position. Each of these financial instruments contains varying degrees of risk whereby changes in the fair value of the securities underlying the financial instruments or the cost of satisfying the Foundation's obligations may exceed the amount recognized in the statements of financial position. Changes in the fair value of derivatives are included in the statement of activities as part of the realized and change in unrealized gain on investments—net.

Property—Property is stated at cost at the date of acquisition. Depreciation is provided on a straight-line method over the assets' estimated useful lives, which range from 45 years for condominium and condominium improvements, 10 years for furniture and fixtures, and five years for equipment.

Financial Instruments—The Foundation has estimated, where practicable, the fair value of its financial instruments by using appropriate valuation methodologies. Except where noted otherwise, the Foundation determined that the differences between the carrying values and fair values of its financial assets and liabilities are not material.

Federal Excise and Unrelated Business Income Taxes—The Foundation is classified as a private foundation. It is subject to a Federal excise tax of 1 percent or 2 percent on investment income (its principal source of revenue) less investment expenses, and on net realized taxable gains on securities transactions. In accordance with Section 4940(e) of the Internal Revenue Code, for the years ended December 31, 2004 and 2003, the Foundation met the specified distribution requirements and, therefore, was subject to a Federal excise tax of 1 percent. Additionally, the Foundation's investments in certain private equity and real estate partnerships give rise to unrelated business income tax liabilities.

Deferred Federal excise tax arises from temporary differences between financial and tax reporting related to investment income and the difference between the cost basis and fair value of marketable securities.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Management believes that the estimates utilized in preparing its financial statements are reasonable and prudent. Actual results could differ from these estimates.

New Accounting Pronouncements—Statement of Financial Accounting Standards No. 132, *Employers' Disclosures About Pensions and Other Postretirement Benefits,* was revised and became effective for the Foundation's fiscal year ended December 31, 2004. This revision does not have an effect on the accounting for pensions and other post-retirement benefit costs, but requires additional disclosures. These requirements have been adopted in 2004.

3. INVESTMENTS

The Foundation's investment portfolio consists of the following:

			December 31 (in thousands)	
	2004 Cost	**2004 Fair Value**	2003 Cost	2003 Fair Value

Total	**$ 2,848,806**	**$ 3,173,102**	$ 2,755,982	$ 2,981,278

In 2001, the Foundation began investing in absolute return strategies. Absolute return strategies focus on long/short, event-driven and distressed investments. These investments are held in the form of limited partnerships.

As of December 31, 2004, under the terms of various private equity, real estate and other limited partnership agreements, the Foundation has commitments to contribute approximately $538 million in additional capital over the next 10 to 15 years.

The Foundation has two investment custodians. Both of these custodians maintained securities lending programs during 2004 and 2003. Collateral is in the form of cash and securities and was held by the custodians at all times in excess of the value of the securities on loan. The collateral is limited to being held in cash or invested in government securities. Investment of this collateral is in accordance with specified guidelines. Interest earned on these transactions is included with other investment income in the statements of activities. The fair value of securities on loan at December 31, 2004 and 2003, was approximately $274.2 million and $230.2 million, respectively. In exchange, collateral was provided to the custodians of $283.2 and $236.5 million as of December 31, 2004 and 2003, respectively of which $277.4 and $236.0 million was received in cash and $5.8 and $.5 million was received in securities. In accordance with SFAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities,* the collateral is shown as both an asset and a liability on the Statements of Financial Position.

4. DERIVATIVE FINANCIAL INSTRUMENTS

Derivatives are highly effective tools used to maintain asset mix or adjust portfolio risk exposure. The Foundation invests in futures on the S&P 500 index and U.S. Treasury bonds, and foreign currency forward contracts. The S&P 500 index and U.S. Treasury futures are purchased or sold at minimum transaction cost to adjust desired asset mix. Currency forward contracts are utilized by certain specialist investment managers to hedge foreign currency exposure in the Foundation's international equity portfolio.

Within the Foundation's limited partnerships, managers may create additional exposure to the Foundation through short sales of securities, and trading in futures and forward contracts, options, swaps and other derivatives products.

The full market risk and credit risk of derivative financial instruments are associated with their underlying contract amounts or "notional values" in addition to their fair values. Market risk represents potential loss from the decrease in the value of these financial instruments. Credit risk represents potential loss from possible nonperformance by obligors and counterparties on the terms of their contracts.

Assets and liabilities represent the derivative contracts purchased and sold by the Foundation. The fair value of such positions represents the net unrealized gains and losses and, consequently, the net receivables and payables at December 31, 2004 and 2003. Fair values of the Foundation's derivative financial instruments generally are determined by either quoted market prices or third-party pricing models. Pricing models utilize a series of market inputs to determine the present value of future cash flows, with adjustments, as required, for credit risk, liquidity risk and ongoing costs.

Fair values of the Foundation's derivative financial instruments at December 31, 2004 and 2003, are summarized below. This table excludes exposures relating to derivatives held indirectly through partnership investments.

		December 31 (In thousands)
	2004	2003
Equity contracts to manage desired asset mix (contracts primarily based on S&P 500 index):		
Futures contracts:		
Assets	**$ -**	$ 132
Fixed income contracts to manage portfolio duration, asset mix and interest rate risk:		
Futures contracts:		
Assets	**61**	49
Liabilities	**(24)**	(38)
Foreign currency contracts to hedge foreign exchange exposure in non-U.S. dollar securities:		
Forward contracts:		
Assets	**5,920**	4,684
Liabilities	**(8,606)**	(11,760)

Of the above contracts, approximately $14.5 million at December 31, 2004, and $16.4 million at December 31, 2003, related to over-the-counter ("OTC") contracts and are included in investments as foreign currency—short term. The remaining contracts of approximately $85,000 at December 31, 2004, and $219,000 at December 31, 2003, related to exchange-traded contracts for futures and are included in investments as part of U.S. and other government obligations or corporate obligations. The Foundation uses financial futures contracts for the purpose of hedging the risk on existing securities, rebalancing, or to take active trading positions. Upon entering into a contract, the Foundation deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Foundation is to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract, also known as the variation margin. The Foundation records daily fluctuations in the variation margin account as realized gains and losses. At December 31, 2004 and 2003, $2.7 million and $8.7 million, respectively, was on deposit with the brokers as collateral for margin requirements on futures. This amount is included in investments as either U.S. and other government obligations or corporate obligations.

Counterparties to the Foundation's OTC derivative products are high credit quality institutions, which are primarily banks, securities firms and investment companies. Management does not anticipate that losses, if any, resulting from credit or market risk, would materially affect the Foundation's financial position.

5. PROPERTY

Expenditures for capital items currently in use are included in the property account and depreciated on a straight-line basis over the lives of the respective assets. At December 31, 2004 and 2003, the property account included the following:

		(In thousands)
	2004	2003
Condominium interest in 420 Fifth Avenue	**$ 16,555**	$ 16,555
Condominium improvements	**14,145**	14,130

	33,478	33,449
Less accumulated depreciation and amortization	**11,409**	10,194
Property—net	**$ 22,069**	$ 23,255

6. PENSIONS AND OTHER POST-RETIREMENT BENEFITS

The Foundation maintains a defined benefit pension plan (the "Plan") for regular salaried employees who were at least 21 years old and have completed one year of service or had attained the age of 40 prior to July 1, 2000. As of July 1, 2000, the Plan was closed to new employees and also to those employees hired prior to July 1, 2000, who did not meet the eligibility requirements. The Plan provides retirement benefits based on years of service and final average pay, with benefits after retirement subject to increase under a cost-of-living augmentation formula. The Foundation makes annual contributions to the Plan, as needed, based on actuarial calculations, in amounts sufficient to meet the minimum funding requirements pursuant to the Employee Retirement Income Security Act of 1974. Plan assets are invested in a diversified portfolio of equities and fixed income securities.

In 2000, the Foundation enhanced its 401(k) plan to create the Retirement Savings Plan (formerly, the Trusteed Savings Plan). Foundation contributions are now made to equal 13 percent of compensation plus a dollar-for-dollar match of up to an additional 2 percent of compensation contributed on a pre-tax basis by employees up to the compensation cap of $205,000. Current members of the Plan had the option of remaining in the combined retirement plan consisting of the defined benefit pension plan and the former 401(k) Trusteed Savings Plan or moving to the new Retirement Savings Plan. Employees can make additional unmatched pre-tax contributions which, when combined with employee contributions that are matched, cannot exceed the maximum pre-tax contribution limit of $13,000. All contributions are credited to the participants' accounts. The Foundation's contributions to the Plans were $1,457,000 and $1,517,000 in 2004 and 2003, respectively.

Locally hired staff in the Foundation's foreign offices participate in provident funds or building societies that conform to local customs, conditions or law.

The Foundation provides certain health care and life insurance benefits ("Other Benefits") for retired employees. Employees are eligible for these benefits when they meet the criteria for retirement under the Foundation's pension plan. The plans are noncontributory and there are no cost sharing features. The Foundation accrues the expected cost of providing post-retirement benefits over the years that employees render service and pays the cost of retiree health care benefits with excess pension plan assets under the applicable provisions of the Internal Revenue Code.

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 introduces a prescription drug benefit under Medicare, as well as a federal subsidy to sponsors of retiree medical benefit plans that provide a benefit that is similar to Medicare. In accordance with Financial Accounting Standards Board Staff Position ("FSP") No. 106-1, *Medicare Prescription Drug, Improvement and Modernization Act of 2003,* the Foundation had elected to defer recognizing the effects of the Act on its accounting of retiree medical benefits until such time that specific authoritative guidance was issued. FSP 106-2 was issued in May 2004 and supersedes FSP 106-1. FSP 106-2 will be effective for the Foundation's year beginning January 1, 2005. Upon initial adoption of FSP 106-2, the Foundation will initially account for the effect of the subsidy as an actuarial experience gain that adjusts the accumulated benefit obligation and the effect on the employer's share of plan costs as a reduction of service cost at the time the service cost is recognized as a component of net periodic post-retirement benefit cost. The Foundation has not estimated the effect of the Act on its post-retirement benefit obligations and which transition method they will adopt.

Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	**5%**	5%
Year that the rate reaches the ultimate trend rate	**2006**	2006

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

(In thousands)

	1-Percentage-Point Increase	**1-Percentage-Point Decrease**
Effect on total of service and interest costs	$ 230	$ (110)
Effect on post-retirement benefit obligation	2,074	(1,731)

Plan Assets

	Plan Assets at December 31 **2004**	2003

International equities	**14.5%**	11.4%
Fixed income securities	**30.5%**	32.2%
Total	**100%**	100%

Due to the Plan's relatively small asset size, the investment strategy has been kept simple. The Plan is diversified among three asset classes: U.S. equity, international equity and fixed income with weighted average target asset allocations of 55 percent, 10 percent and 35 percent, respectively. The Plan's investment managers have been selected from among the endowment's managers to achieve savings on asset-based management fees and to garner the benefits of consolidated risk management and oversight.

Cash Flows

Contributions

The Rockefeller Foundation does not expect to need to make any contributions to its pension plan in 2005; it expects to contribute approximately $1.2 million toward other post-retirement medical and life insurance plans, most of which will be offset by a 401(h) transfer from excess pension plan assets.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

	Pension Benefits	Other Benefits
2005	$ 3,835	$ 1,212
2006	3,957	1,267
2007	4,134	1,290
2008	4,264	1,340
2009	4,348	1,314
Years 2010–2014	23,072	6,480

7. BONDS PAYABLE

During fiscal 1993, the Foundation issued $20,445,000 in tax-exempt term bonds and $9,815,000 in tax-exempt serial bonds to fund the acquisition, construction and furnishing of a new office facility (the "Facility"). The bond proceeds and related investment income earned were held by a trustee (the "Trustee") and have been disbursed at the direction of the Foundation to fund allowable Facility-related costs. Deferred charges pertaining to the bond interest and underwriter's fees total $3,375 and $3,247 at December 31, 2004 and 2003, respectively, and are included in the statement of financial position as prepaid pension costs and other assets. The underwriter's fees are being amortized over the life of the bonds. Deferred interest costs represent the difference between the amount of interest paid on the bonds and the effect of the cumulative interest expense allocated to operating expenses on a straight-line basis over the life of the bonds. Commencing in 2008, the deferred interest cost will be amortized to expense over the succeeding 15 years.

The bonds are rated Aaa by Moody's and AAA by Standard & Poor's and are backed by the general assets of the Foundation. In addition, the bonds are secured by the Foundation's ownership interest in the Facility, a leasehold interest in the Facility, and insurance proceeds with respect to the Facility. The nominal interest rates on the serial bonds range from 4.9 percent to 5.1 percent. The nominal interest rates attributable to the term bonds are 5.3 percent and 5.4 percent. The serial bonds mature in various amounts, ranging from $760,000 to $880,000 per year, through 2008. The term bonds are due in 2013 ($5,140,000) and 2023 ($15,305,000). Bond maturities are as follows (in thousands):

	Fiscal Year Ending December 31
2005	$760
2006	800
2007	840
2008	880
2009	-
Thereafter	20,445
	$23,725

8. APPROPRIATIONS AND EXPENDITURES

Appropriations by the trustees are considered to be obligations when grants are approved (awarded) for specific grantees; appropriations not released for specific grantees and the appropriation for the budget for the next year are considered as board-designated net assets. The majority of approved grants are scheduled for payment within one year. Investment expenses, program and general administrative expenses, and excise and unrelated business income taxes account for approximately 30 percent in 2004 (28 percent in 2003) of the Foundation's total expenses and are charged to operations when incurred.

Appropriations and expenditures for the year are summarized as follows:

	Appropriated for Specific Grantees/ Purposes	Appropriated for Allocation and Next Year's Budget	Total Appropriated
Balance— December 31, 2002	$ 110,252	$ 197,246	$ 307,498

Lapses and refunds	(2,800)	870	(1,930)
Expenditures for grants and operations	(172,798)	-	(172,798)
2005 budget	8,000	152,000	160,000
Balance— December 31, 2004	$ 86,967	$ 185,662	$ 272,629

9. RESTATEMENT

As described in Note 3, the Foundation maintains securities lending programs with two investment custodians. Subsequent to the issuance of the 2003 financial statements, the Foundation's management determined that the cash and securities held by the Foundation's custodians related to the securities lending activities should be recorded as an asset and the related obligation should be recorded as a liability in accordance with SFAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.* As a result, the 2003 statement of financial position was restated from the amount previously reported to record the asset and liability. These amounts had previously been excluded from the statement of financial position. The effect on the previously issued 2003 financial statements is as follows:

	2003 Previously Reported Amount	2003 As Restated
Collateral held for securities on loan	$ -	$ 236,466
Total assets	3,071,494	3,307,960
Payable for return of collateral on loaned securities	-	(236,466)
Total liabilities	(168,858)	(405,324)
Unrestricted net assets	$ 2,902,636	$ 2,902,636

*** For underpayments paid after March 31, 2005:** For lines 30, 32, 34, and 36, use the penalty interest rate for each calendar quarter, which the IRS will determine during the first month in the preceding quarter. These rates are published quarterly in an IRS News Release and in a revenue ruling in the Internal Revenue Bulletin. To obtain this information on the Internet, access the IRS website at **www.irs.gov**. You can also call 1-800-829-1040 to get interest rate information.

EXPENDITURE RESPONSIBILITY GRANTS AND PRIs

Prospective grantees are asked to furnish information in order to enable the Foundation to determine whether they have received a determination of 501(c)(3) status from the U.S. Internal Revenue Ser vice or may be considered the equivalent of a tax-exempt charity if formed outside the United States. Prospective grantees with respect to whom the Foundation is believed to have "expenditure responsibility" obligations are informed by letter, before payment is made on a grant, of the responsibilities imposed upon the Foundation and its grantees by the Internal Revenue Code of 1986, as amended. Each grantee must agree in writing to those terms and conditions, including the obligation to provide financial and substantive reports on how Foundation grant funds are expended. The reports that are received are reviewed for general accuracy sufficiency and compliance with the terms and conditions of the grant. Additional information is requested from grantees in instances where reports are considered inadequate. Where the Foundation has not received financial or substantive reports from a grantee when expected, Foundation staff follow up in several ways, including reminders that are sent at regular intervals after reports are expected and personal follow-up by program staff through telephone, mail and e-mail.

The following schedules list grant and program-related investment expenditures with respect to which the Foundation has exercised expenditure responsibility Grantee organizations marked "*" are either private foundations, private operating foundations, or foreign private-foundation equivalents. All other grantees are non 501(c)(3) organizations or organizations for which the Foundation has not made a reasonable determination of 501(c)(3) equivalency status that received grants for charitable projects and maintained payments in segregated funds as required by Treasury Reg. 53 4945-6(c).

The dates of the reports shown on the following schedules are annotated with an "F" and/or an "N" to indicate that the reports are financial reports or narrative reports, respectively Unless otherwise noted, the reports received were found to be in order and to show that the funds were fully expended for the purpose of the grant.

Where the grantee has satisfactorily reported full expenditure of the funds, the "reporting status" for the expenditure is marked "complete." For all other expenditures, we will provide follow-up information in our 2005 990-PF

Reporting status is as of 11/10/2005

Schedule 1	Grant expenditures: (1) all 2004 grant expenditures, and (2) grant expenditures from 1999 through 2003 for which we were not able to report that reporting was complete when we filed our 2003 990-PF
Schedule 2:	Program-related investments

SUMMARY OF FOUR LARGEST DIRECT CHARITABLE ACTIVITIES

Bellagio Study and Conference Center - $4,271,044
The Center had operating expenses of $3,650,331 in 2004. Since 1959, the Center has served as a resource for fostering dialogue and problem solving for diverse participants around the world. The Center hosts conferences that focus on topics of international importance, with preference given to applications that promote development and align with the Foundation's program areas. In 2004, the Center hosted 56 conferences and team meetings with a total of 1,071 participants; 64 percent of the participants were from outside the United States and 32 percent were from developing countries. In addition, the Center offers month-long residencies to scholars, writers, artists, and composers. In 2004, the Center hosted 147 individual residents, 43 percent of whom were from outside the U.S. and 22 percent from developing countries. A listing of 2004 conferences, teams and individual residents is attached.

In addition to the Center's operating expenses, the following expenses were incurred in furtherance of the programs:

> The **Bellagio Center Office in New York** (including the Bellagio Committee) had operating expenses of $620,713 in 2004. This Office is responsible for soliciting proposals and managing their review and disposition; assessment of needs of the program as a whole; drafting policy for consideration by the Bellagio Committee; working with users to maximize their use of the Center in flexible and innovative ways; and regular communication and information exchange with the Bellagio Center, Italy.

Human Resources for Health - $881,858

Weak health systems in developing countries are overburdened by HIV/AIDS, malaria, tuberculosis and other diseases of poverty and though new sources of funding to combat these diseases have recently been made available, using these new resources effectively is hampered by constraints in the health workforce. This problem arises because of the chronic underinvestment in human resources, large numbers of health workers killed by AIDS in those countries where the disease is endemic, and the brain drain of nurses and doctors from countries that can least afford the loss of their services. In response, The Rockefeller Foundation, in partnership with the World Bank, the Swedish International Development Cooperation Agency, Harvard University, the Atlantic Philanthropies, the Bill & Melinda Gates Foundation and other donor groups launched the Joint Learning Initiative in 2002. This initiative engaged more than 100 global health leaders in landscaping human resources for health and in identifying strategies to strengthen the global health workforce. A report documenting this effort and providing recommendations for addressing the problem was published by Harvard University Press in entitled, "Human Resources for Health: Overcoming the Crisis."

The Philanthropy Workshop (TPW) - $837,666

The mission of The Philanthropy Workshop (TPW), an operating program of the Foundation, is to create an active, global association of strategic philanthropists with the skills, commitment and imagination to make a significant contribution to pressing issues of our time. TPW consists of four modules, offered over the course of a year, that provide opportunities for leadership development, lifelong learning and collaborative problem solving. Each module explores critical elements of international and strategic philanthropy through a variety of methods, including site visits, case studies, seminars, discussions, colloquia and retreats. In 2004, modules were conducted in New York ("Developing a Framework for Strategic Philanthropy"), Berlin, Germany ("Exploring Issues and Building Skills"), Uganda ("Global Philanthropy: Working Across Borders") and Washington, DC (Putting Strategic Philanthropy into Action"). TPW also brings together alumni of the program for ongoing learning, international site visit modules to the developing world, and collaborative grantmaking.

The Legacy of Brown versus the Board of Education of Topeka, Kansas - $506,632

In 2004, the 50th anniversary of the landmark U.S. Supreme Court decision *Brown v. Board of Education of Topeka, Kansas* provided the Rockefeller Foundation with an opportunity to energize a national dialogue and generate lessons on the nation's progress on racial integration and its 50-year effort to integrate the nation's schools. The Foundation's approach had several prongs: (1) preparation, production and dissemination of an essay on the effect that the Brown decision had (and will continue to have) on American education, while also addressing the broader social, political and cultural trends related to integration and its role in America society; (2) market research, communications and media outreach including tracking and analysis of coverage in connection with the Brown anniversary; (3) survey of U.S. organizations planning events, conferences and publications focused on the Brown anniversary; and (4) organize meetings and other fora to ensure a national dialogue.

In addition, the Rockefeller Foundation made grants totaling approximately $1.4 million in 2004 for Brown-related activities. The institutions that received funding were the NAACP Legal Defense Fund; Howard University School of Law; the Graduate Center, City University of New York; the Metropolitan Center for Urban Education, New York University; CEJJES Institute and Library, Editorial Projects in Education and Firelight Media. Activities supported included a

A cross-theme of Global Inclusion supports, promotes and supplements the work of these themes. In addition, the Foundation supports a number of regional and special programs, including the Africa Regional Program, the Southeast Asia Regional Program, and the North America Regional Program.

(For additional information see Program Theme Guidelines following this page.)

OVERVIEW

The Rockefeller Foundation is a knowledge-based, global foundation with a commitment to enrich and sustain the lives and livelihoods of poor and excluded people throughout the world.

In order to maximize its resources and leverage the Foundation's strengths, grantmaking is organized around four thematic lines of work: Creativity & Culture, Food Security, Health Equity and Working Communities. A cross-theme of Global Inclusion supports, promotes and supplements the work of these themes.

In addition, the Foundation supports a number of regional and special programs, among them the Africa Regional Program and the Southeast Asia Regional Program. We also offer a unique place for study and creative endeavor through our Bellagio Study and Conference Center in northern Italy.

The challenges confronting poor and excluded people are too numerous, complex and massive to be addressed by any single foundation alone. We must continue to emphasize the creation and support of global partnerships, alliances and collaboratives to effect positive change in the daily lives of poor people. The Foundation will continue to join forces with governments, industry, other foundations, and nongovernmental organizations to ensure that poor people are included in decisions that affect their lives.

Following are more specifics on the Foundation's programs.

Contacting the Foundation about grants

The Rockefeller Foundation works to enrich and sustain the lives and livelihoods of poor and excluded people throughout the world.

The Foundation is a proactive grantmaker—that is, the staff seek out opportunities that will advance the Foundation's long-term goals rather than responding to unsolicited proposals. Foundation staff receive more than 8,000 unsolicited proposals each year, more than 75 percent of which cannot be considered because their purposes fall outside the Foundation's program guidelines.

The Foundation strongly discourages unsolicited grant proposals. We do not use an application form or standard format for proposals. Organizations seeking funding should carefully review the Foundation's grantmaking guidelines shown below (or visit the Foundation's Web site at www.rockfound.org) to determine if their project aligns with the Foundation's strategic interests. A short letter of inquiry can be addressed to the director of the subject area of interest, Rockefeller Foundation, 420 Fifth Avenue, New York, N.Y. 10018. Inquiries can also be sent electronically to the e-mail addresses listed after each description below.

Letters of inquiry should briefly describe the purpose of the project for which funds are being requested; the issues the proposed project will address; information about the organization; estimated budget and period for which funds are being requested; and qualifications of key personnel involved in the project.

Letters of inquiry will be considered as they are received throughout the year. Inquiries take from six to eight weeks for review. Organizations submitting inquiries that align with the interests of the Foundation may be asked to submit a proposal.

As a matter of policy, the Foundation does not give or lend money for personal aid to individuals or, except in rare cases, provide general institutional support, fund endowments, or contribute to building and operating funds.

ABOUT THE PROGRAMS

THEMES

Creativity & Culture

Goal: To give full expression to the creative impulses of individuals and communities in order to enhance the well-being of societies and better equip them to interact in a globalized world.

Culture and artistic expression serve as both barometers of the quality of people's lives and livelihoods, and as agents for improving them. Cultural workers—ranging from humanities scholars to traditional African griots and artists—serve as catalysts for comprehending and addressing the needs and aspirations of individuals and communities. Their role and the roles of their institutions are essential to preserving community traditions and memories, and to provide critical commentary about a rapidly changing world. Cultural workers and artists are vital to community resiliency as they help people withstand and respond to the stresses of poverty, migration, violence and discrimination.

Globalization, flowing on the currents of new technologies, can place creativity at risk as well as offer new avenues for expression. Technology can capture and provide new energy to threatened traditions by offering renewed strength to communities, and also give life to altogether new, borderless "imagined communities" that unite people through shared experiences. At the same time, globalization can lead to the homogenization of cultures and may undermine cultural diversity.

As it has throughout most of its history, the Rockefeller Foundation bases its support for the arts and humanities on the conviction that societies are enriched by the free expression of creative individuals. So as to address today's challenges of globalization, the Foundation aims to enhance the creativity of individuals and communities through the preservation and renewal of the cultural heritage of poor and excluded people, the engagement of artists and humanists in the creation of democratic and inclusive societies, and the support of diverse creative expression and experiments with the new digital technologies.

FUNDING GUIDELINES

Creativity & Culture's grantmaking falls into several areas:

Understanding Cultural Contexts and Frameworks: Initiatives that seek to measure the role culture plays in building community, promote greater fairness in the ownership and control of knowledge and build channels from communities to established institutions and scholarly and policymaking bodies.

Linking Theory to Practice: Initiatives to transform and strengthen institutions by leveraging the cultural, creative and intellectual assets of people commonly marginalized by social and globalizing processes.

Support for Artists: Initiatives to support diverse creative expression in the arts and humanities by fostering the work of creative artists in the performing arts whose work reflects the boldest explorations in intercultural and/or international representation.

Support is provided to preserve and strengthen threatened traditional art forms in Southeast Asia; to help communities recover and interpret cultural materials, such as literary or religious texts and oral histories; and to examine the role that memory, history and imagination play in helping communities withstand and adapt to the stresses of poverty, exclusion and violence.

The theme has also funded an exploration to create environments that encourage new media collaborations between the artistic, scientific and technological communities, and to engage humanists and social scientists to probe the meaning of the cultural expression and new forms of social organization enabled by the Internet.

Food Security

To improve the food security of the rural poor through the generation of agricultural innovations, institutions and policies that will provide sustainable livelihoods in areas of sub-Saharan Africa and Asia bypassed by the Green Revolution.

Food security—all people having enough food to carry on normal activities at all times—will continue to be a central challenge for millions of households, numerous countries and at least one continent, Africa, over the next half century. Of the 5.1 billion people living in developing countries, 3 billion live in rural areas, most of them dependent on agriculture for their livelihoods. Currently, about 800 million people remain undernourished and roughly 24,000 people die each day from hunger and hunger-related causes.

Most of those who remain undernourished live in regions bypassed by the agricultural advances of the Green Revolution that contributed to dramatic improvements in food security for the majority of the world's people. Living on land that is often lower in natural agricultural potential, having few formal educational opportunities and little access to technology, these farming families, concentrated in sub-Saharan Africa, and less-favored parts of Asia and Latin America, remain in poverty.

To help these farm families move out of poverty, Foundation grantees are generating agricultural innovations, including more dependable and sustainable farming practices, and new crop varieties developed for the specific environmental and socioeconomic conditions under which the poor farm.

Our grantees are engaging the farmers themselves as participants in scientific investigations and in the development of new technologies to meet their needs.

The ability of local organizations to access and move key institutional, policy and technological levers is critical to the success of this process. To foster development of local, national and international policies that will increase the productivity, stability and sustainability of smallholder agriculture, the Foundation seeks to empower and invigorate institutions that provide goods and services to poor farmers.

FUNDING GUIDELINES

Food Security's grantmaking falls into four areas:

International Public Goods for Poor Farmers seeks to ensure that national scientists and others working on behalf of small-scale farmers have access to the best knowledge, scientific tools, plant genetic resources and scientific networks available worldwide.

Enhanced Soil Productivity and Improved Crop Varieties draw on these international resources and work in concert to increase farm productivity. The Soils Area of Work uses modern science to assess the nutrient status of soils at the farm level. Innovative farming practices are then used to supply the missing nutrients and increase the yield potential of each field. The Crops Area of Work uses advanced biotechnology, conventional plant breeding and knowledge of on-farm production constraints to develop new crop varieties that are resistant to the pests, diseases and environmental stresses that cause yield losses. Together, enhanced soil fertility and more resilient crop varieties result in increased crop production.

Markets to Raise Incomes of Poor Farmers seeks to build and make more equitable both the input markets that can deliver improved seeds and other new technologies to farmers, and the output markets that enable farmers to convert surplus production into increased profits.

Please see the Foundation's Web site for more information.

Health Equity

Goal: To advance global health equity by pursuing the reduction of avoidable and unfair differences in the health status of populations.

The 20th century generated tremendous technological, economic and social change, of which one result has been a dramatic increase in both life expectancy and quality of life. Yet the majority of these advances have accrued to a very small fraction of humankind. Progress in health has not been equally distributed, either among or within countries.

These disparities in health achievement arise because of a host of factors including, genetic predisposition, crowded living conditions, environmental exposures, food insecurity and inadequate access to health care. While some of these health inequalities may be considered reasonable or unavoidable, others are deemed unjust and therefore inequitable. Making this distinction involves an ethical notion of fairness. There is equity in health when individuals are able to attain their full health potential regardless of age, gender, race or socioeconomic circumstances.

Health-product market failures, crumbling health systems in the wake of health-care reform and a myriad of looming health threats have combined to generate inequities in health that the Foundation is working to address by harnessing the new sciences, resourcing public health and strengthening global leadership.

Since its creation, the Rockefeller Foundation has pursued scientific approaches to global health—from pioneering strategies for disease control and establishing the first schools of public

health and tropical medicine, to fostering such new disciplines as molecular biology. The Foundation's grantees' accomplishments are many, including research leading to the discovery of penicillin and the yellow-fever vaccine, for which a staff member won a Nobel Prize.

The Foundation's Health Equity theme envisions a "new health world" whereby poor and excluded people can achieve their full health potential. To help achieve this, the Foundation seeks to counter health-product market failures with advocacy, capacity building and support for specific product initiatives. Much of this work is being done through public/private partnerships, including a new alliance to accelerate tuberculosis drug development and a partnership to speed the development of safe, effective microbicides—substances that can substantially reduce transmission of HIV and other sexually transmitted infections. The importance of partnerships is underscored by the creation and funding, by a broad community of global foundations, of a pilot program in AIDS prevention and care. The program, known as Mother-To-Child Transmission of HIV or MTCT–Plus, builds on the opportunity of preventing HIV transmission from mother to child by extending care to the mothers, thereby increasing the chances of survival for infected mothers and diminishing the incidence of orphanhood.

FUNDING GUIDELINES

Health Equity's grantmaking falls into the following areas:

Harnessing the New Sciences aims (a) to accelerate research for products to alleviate suffering from diseases of the poor; (b) to foster greater public- and private-sector responsibility and collaboration in product development; and (c) to ensure that the resulting products are affordable, acceptable and available to the poor in developing countries.

Learning Health Systems: Strengthening systems for human resources for health and designing effective systems of knowledge exchange and translation will help create an environment for "health systems that learn" while solving problems, thereby helping to create more effective and equitable health systems.

Rising to the Challenge of AIDS: Policies and programs that address structural inequities in gender and sexual power dynamics and inequities from marginalization and poverty will lead to more equitable and effective responses to the HIV/AIDS epidemic in sub-Saharan Africa.

Working Communities

Goal: To transform poor urban neighborhoods into working communities—safe, healthy and effective neighborhoods—by increasing the amount and quality of employment, improving the quality of all urban schools, and increasing the influence and voice of the poor and excluded in political decisions that affect their lives.

The mix of productive work, quality education and racial equity makes a working community. Employment provides the material means of support for individuals, structures their daily lives and engenders fulfillment or frustration. Education and training determine access to meaningful employment with advancement potential. Racial equity ensures that all residents have access to

the means necessary to achieve stable livelihoods and become full and productive members of the community.

In its effort to make this vision a reality in the United States, the Foundation faces a multitude of challenges. For example:

- Despite sustained U.S. economic growth throughout the 1990s, one in every eight persons remains in poverty.
- Income inequality in the United States is the highest among all industrialized nations, due, in part, to the decline in real wages of low-skilled workers.
- Poverty is primarily an urban phenomenon: three-fourths of the poor live in metropolitan areas, and central U.S. cities are home to half of the nation's poor.
- Poverty weighs more heavily on minorities and non-English speakers—a quarter of all African-Americans and a fifth of Latinos are poor; half of the foreign-born are poor.
- An estimated third of public schools that are failing to teach are in central cities, and teachers continue to report that they are unprepared to teach growing numbers of minority and new English-language learners.

The Foundation supports three areas of activity to improve these conditions: public policies with explicit goals to eliminate or reduce inequities and disparities in education, employment and civic participation; competent public and private organizations to implement and sustain such policies and programs; and detailed practical knowledge and research about which programs work, which do not, and with what costs and benefits.

Partnerships and public/private initiatives will continue to play an important role in addressing the plight of urban neighborhoods. For example, spurred by the foundations that started the National Community Development Initiative (NCDI) and the Ford Foundation—and by such federal policies as the Community Reinvestment Act and the low-income housing tax credit, multibillion-dollar investments were made in housing and community development. With these resources, community development corporations have created hundreds of thousands of units of affordable housing in inner-city neighborhoods.

The Foundation continues support for strategies to improve wages, employment and economic opportunities for the working poor. This includes funding of research and policy analysis, as well as grassroots initiatives to improve employment access and job opportunities for low-skilled urban residents—such as innovative, paid community-service jobs and more effective training and placement services for low-income people. Funding also supports a rigorous experiment aimed at increasing employment rates among public-housing residents.

In 2001, the Foundation completed its partnership with the Comer School Development Program, after a decade of funding that helped it expand to more than 700 schools and train thousands of educators and school administrators nationwide. Broadly, the experience of the school-reform movement and evaluations of Foundation-led initiatives have led to the conclusion that adequate financial resources are critical to any strategies to improve educational outcomes for all children. The Foundation will examine and build models of education-finance reform and accountability that can address current disparities in educational resources and student achievement.

FUNDING GUIDELINES

Working Communities supports work in the following areas:

Adequate School Financing: Ensuring adequate financing for urban schools that serve low-income and minority children will necessitate research, model-building, public mobilization and communication investments in grantees in order to impact the way public education is financed and administered at the state level.

Building Mixed Income Communities: New public policies, evidence building and advocacy will be required if we are to expand the production and preservation of affordable housing (particularly for extremely low-income households), increase private-sector investment in low-income neighborhoods and spread the benefits of regional economic development.

Encouraging Economic Resiliency: Improving employment opportunities and working conditions for low-skilled workers will require new employment and workforce policies and practices that result in a more constructive relationship between employers, training providers and government.

CROSS-THEME

Global Inclusion

Goal: To help broaden the benefits and reduce the negative impacts of globalization on vulnerable communities, families and individuals around the world.

In an age of continuous and rapid change, it is essential to the work of the Foundation that we maintain a constant analytical vigil seeking to identify and understand the impacts of global trends, especially those that impact the lives of poor people, before or as soon as they occur. The Foundation's Global Inclusion cross-theme monitors the pace and scale of change in all four of our themes while it also works to build a deeper appreciation of the complexity and diversity of human experience. Global Inclusion supports, promotes and supplements all four of the Foundation's thematic lines of work.

Reaching across boundaries of discipline and experience, Global Inclusion provides analyses of global trends and policy issues, and stimulates and incubates work among the themes that seeks a comprehensive, holistic approach to enriching the lives and livelihoods of poor communities.

By analyzing, interpreting and debating important global trends and issues in poverty and exclusion, ranging from protests against scientific innovations and protection of indigenous rights, to migration restrictions in the face of liberalizing cross-border trade, Global Inclusion helps position the Foundation on a complex array of crosscutting policy and strategic concerns.

At any moment, a discrete issue or a few selected issues affect each of the Foundation's themes and demands an overarching response that acknowledges the interconnected and intertwined themes of people's lives—their health, food, work and creative expression. One example involves the Foundation's commitment to the promotion of science and technology to help enrich the lives of poor people. The cross-theme is engaged in finding an appropriate set of positions in

many of the public-policy and scientific debates that emerge from the tension between science and society.

FUNDING GUIDELINES

Global Inclusion makes connections among the four themes, regional offices and special programs, tackling issues that connect the themes and their constituencies and identifying ways to strengthen the linkages between them. It seeks to frame issues and focus public will and resources on critical world issues. Grantmaking is designed to encourage a more open and productive atmosphere in current global debates and to enhance the participation and voice of developing-country actors in policymaking.

Global Inclusion makes grants according to the following lines of work:

Intelligence on Global Trends: To identify and examine new trends and developments that may have an impact on poor and excluded people.

Building Support for Global and Regional Policies to Benefit the Poor: To inform and build consensus around global polices (such as intellectual property and trade and development) that benefit poor people and countries.

REGIONAL PROGRAMS

Africa Regional Program

Goal: To contribute to the revitalization of the African continent by building the required human and institutional capacity and providing critical information that will promote effective policies and programs to improve the lives and livelihoods of the poor.

The Rockefeller Foundation's Africa Regional Program is based on the premise that equitable social and economic development that benefits the majority of Africans requires a new generation of committed leaders who know how to harness the opportunities presented by globalization, social institutions and policies to ensure that benefits accrue directly to the poor and enable an environment for business and social entrepreneurship to flourish.

The program supports the broader work of the Foundation in Africa by strengthening the institutional context in which the themes do their work, and by reinforcing the quantity and quality of human capital on the continent that is available and willing to work for more equitable and sustainable development. It supports the creation of a solid information base for policy analysis and informed decision making in agriculture, education, health and population, and endeavors to enhance the interest of the emerging African private sector in the needs of the poor.

Africa's dual challenge in education is both to provide access to universal primary education of a good quality for a young and growing population and to upgrade its higher-education system. To become skilled in national governance, and users and innovators of sophisticated technology, Africa's daughters and sons require an increase in educational opportunities at all levels. The Foundation's efforts in Higher Education endeavor to strengthen the ability of African universities to contribute to social, economic and political progress in the continent. In

Uganda, for example, the Foundation is working with Makerere University to address the human-capacity needs of decentralized governance.

The program supports research that informs and guides policy and practice aimed at addressing the needs of the poor. Democratization and increased accountability of elected leaders is increasing the local demand for evidence-based decision making. The Foundation funds grantees whose work informs policy development, program design and resource allocation by providing local-level, multifaceted information on food, work, health and other human conditions that is needed to understand and address the root causes of poverty. The mapping of poverty in all its dimensions, by piecing together the huge amounts of data collected regularly by statistical offices and other research institutions in Africa, will empower local policymakers to develop a sound understanding of problems and hence to design more realistic solutions.

Recognizing that long-term solutions to the problems of Africa's poor require sustained economic development, which, in turn, requires peace and political stability, democracy, a strong private sector and a host of other critical fundamentals, the Foundation supports enabling partnerships between the key actors in economic development and fosters entrepreneurship and private-sector involvement in social development.

The AIDS pandemic, a profound threat to Africa's stability, has caused severe economic and social dislocation. The program aims to bring indigenous knowledge and traditional social relations to bear on the challenges posed by the pandemic, and complements Health Equity's efforts to stimulate research to enhance sound clinical management of AIDS that is safe, feasible and sustainable. Partnerships are being encouraged between practitioners in the conventional health system and traditional healers who are the only care providers in many remote communities.

FUNDING GUIDELINES

Grantmaking supports work in human capacity building to strengthen the ability of African universities to contribute to social, economic and political progress in the continent and, in primary education, to emphasize literacy as the basis for good quality education with special attention to barriers to girls' full participation.

Research is also funded that informs policy development, program design and resource allocation by providing local-level, multifaceted information on food, health, work and other human conditions that is needed to understand and address the root causes of poverty.

Southeast Asia Regional Program

The Foundation has been developing a regional program focusing on issues in the Greater Mekong Sub-region, an area encompassing the watershed of the Mekong River, including Thailand, Laos, Cambodia, Vietnam and China's Yunnan province.

Uneven economic development and cultural tensions within this ethnically diverse region have given rise to inequities both between and within countries. These inequities have become increasingly articulated as "boundaries" between the peoples of the region. Boundaries include not only conventional geopolitical borders but the very real boundaries of ethnic and gender identity, religion, and health and economic status. Multidisciplinary program activities within the region reflect and respond to the challenges of the area's most marginalized, vulnerable and excluded communities.

Programming is focused on fostering the capacity to think and act across geo-political and identity boundaries through regional exchanges and collaborations that enable people and institutions in the region to respond to emerging trans-boundary trends, capture the benefits and mitigate the negative impacts of regional development on the poor and excluded people in the region.

Programs in cross-border health and Mekong upland communities in transition are aimed at helping to ease the impact of AIDS in marginalized cross-border communities and to explore the impact of rapid development on rural, agrarian societies.

ASSETS & CAPACITIES

Bellagio Study and Conference Center

The Bellagio Study and Conference Center, located on Lake Como, Italy, provides an ideal environment of solitude, contemplation and productivity in which scholars, scientists, artists, writers, policymakers and practitioners from all over the world may pursue their creative and scholarly work.

The Center offers one-month stays for some 150 residents annually in any discipline or field who expect a publication, exhibition, performance or other concrete product to result. The Center also offers interdisciplinary, intercultural networking through the convening of some 55 conferences and small working groups (from three to 25 participants) of policymakers, practitioners, scholars, scientists, artists and others. Priority is accorded to proposals that address significant issues and problems within or across given fields, are innovative in their design, and promise concrete outcomes beyond the drafting of a statement or recommendations.

Applications are reviewed by an interdisciplinary group of Rockefeller Foundation staff and outside specialists. Decisions are based upon the quality of the project proposed, the importance of the proposed work in its field and discipline, the qualifications of the applicant(s), and the suitability of the Center for the proposed activity. The Foundation provides room and board for all residents and working group participants. Some travel assistance is available for those from developing countries who qualify.

Public/Private Partnerships

The Program Venture Experiment (ProVenEx) seeks to catalyze private-sector investments in areas that will benefit poor and excluded people. Through this program the Foundation is testing the hypothesis that philanthropic, market-driven investment tools are capable of earning a return on capital while engaging the private sector in accomplishing program goals, addressing market failures in a financially sustainable manner and achieving greater scale in addressing the needs of poor and excluded people. Through investments in early stage and growing companies, ProVenEx may be able to mend key market failures related to specific program goals such as drugs and vaccines for diseases of the poor, jobs in low-income communities and large-scale distribution of seeds to African farmers.

Application for Extension of Time To File an Exempt Organization Return

▶ File a separate application for each return.

OMB No 1545-1709

- If you are filing for an **Automatic 3-Month Extension, complete only Part I** and check this box . . . . . ▶ ☑
- If you are filing for an **Additional (not automatic) 3-Month Extension, complete only Part II** (on page 2 of this form).

Do not complete Part II unless you have already been granted an automatic 3-month extension on a previously filed Form 8868.

Part I **Automatic 3-Month Extension of Time**—Only submit original (no copies needed)

Form 990-T corporations requesting an automatic 6-month extension—check this box and complete Part I only . . . ▶ ☐

All other corporations (including Form 990-C filers) must use Form 7004 to request an extension of time to file income tax returns. Partnerships, REMICs, and trusts must use Form 8736 to request an extension of time to file Form 1065, 1066, or 1041.

Electronic Filing (e-file). Form 8868 can be filed electronically if you want a 3-month automatic extension of time to file one of the returns noted below (6 months for corporate Form 990-T filers). However, you cannot file it electronically if you want the additional (not automatic) 3-month extension, instead you must submit the fully completed signed page 2 (Part II) of Form 8868. For more details on the electronic filing of this form, visit *www.irs.gov/efile*.
